# Horoscope

**Today's Birthday (06/06/16).** Your family holds priority this year. Efforts now provide long-term dividends. Partnerships thrive with steady support. A two-year phase of fun, passion and romance begins in September, with eclipses favoring home renovations and career changes. February eclipses highlight shifting conversations and career opportunities. Follow your heart.

To get the advantage, check the day's rating: 10 is the easiest day, 0 the most challenging.

**Aries (March 21-April 19)** — Today is a 5 — A home project has your focus. Add beauty where it's needed. Pamper your family with tasty tidbits and creature

comforts. Restore balance and harmony.

**Taurus (April 20-May 20)** — Today is a 6 — Academic subjects, writing and communications projects go further than anticipated. Practice your creative arts. Your work is attracting attention. Make fascinating new professional connections, and generate collaborative possibilities.

**Gemini (May 21-June 20)** — Today is a 7 — There's money to be made. Do what you love and prosper. Focus on the big picture, while taking small, simple steps. Ask for what you want, and get it. Make a surprising discovery.

**Cancer (June 21-July 22)** — Today is a 7 — Do something nice for yourself today. Spend time on personal priorities.

Get a new style or look. Support yourself with rest, good food and exercise so you can support others. Your energy rises.

**Leo (July 23-Aug. 22)** — Today is a 5 — Find a peaceful spot to craft your plans. Think about what you love doing, and review whether you're doing it as much as you'd like. Let a spiritual lesson sink in.

**Virgo (Aug. 23-Sept. 22)** — Today is a 7 — Following through pays off. Your friends are really there for you. Enjoy parties, meetings and gatherings. Talk about what you would love to see happen. Savor good music together.

**Libra (Sept. 23-Oct. 22)** — Today is a 7 — A rise in status is available. Keep your eyes open. There's a test or challenge, but it's nothing you can't overcome. You can handle an inspection. Look sharp and polish your presentation.

**Scorpio (Oct. 23-Nov. 21)** — Today is a 6 — You're inspired to go wandering. Explore a subject of particular fascination on a deeper level. Get to what's most authentic about it. Avoid lies like the plague. Study your practice.

**Sagittarius (Nov. 22-Dec. 21)** — Today is a 7 — Talk over financial details with your partner. A profitable opportunity has your attention. A sibling's crazy idea could work. Keep your objective in mind, and lay a budgetary foundation.

**Capricorn (Dec. 22-Jan. 19)** — Today is a 7 — Work together to go farther today. Work out who will do what. Collaboration could get romantic when you focus on a shared dream. Contribute what you can. Leave nothing to chance.

**Aquarius (Jan. 20-Feb. 18)** — Today is an 8 — Demand is high today, so crank out profits. You're gaining respect. Set high standards. Invest in your career. Rake in a fat harvest and store what you can for winter. Friends help out.

**Pisces (Feb. 19-March 20)** — Today is a 6 — Expand in the direction of least resistance. Take it easy and relax. Embrace your romantic side. Hang out with enjoyable company, and play your favorite games together. Your skills keep improving.

The Barometer is published Monday through Friday except holidays and final exam week during the academic school year; weekly during summer term; one issue week prior to fall term in September by the Oregon State University Student Media Committee on behalf of the Associated Students of OSU, at the Student Experience Center, OSU, Corvallis, OR 97331-1614.

The Daily Barometer, published for use by OSU students, faculty and staff, is private property. A single copy of The Barometer is free from newsstands. Unauthorized removal of multiple copies will be considered theft and is prosecutable.

Responsibility: The University Student Media Committee is charged with the general supervision of all student publications and broadcast media operated under its authority for the students and staff of Oregon State University on behalf of the Associated Students of OSU.

Formal written complaints about The Daily Barometer may be referred to the committee for investigation and disposition. After hearing all elements involved in a complaint, the committee will report its decision to all parties concerned.

# THE YEAR IN REVIEW

## A BUDDING INDUSTRY October 1, 2015

The recreational use and sales of marijuana took effect Oct. 1, 2015 in Oregon. Five dispensaries in Corvallis were able to sell recreationally on that date. However, because Oregon State University is a federally funded entity, and marijuana remains illegal federally, marijuana is still considered a controlled substance by OSU and the possession, sale or use of marijuana on university property is still strictly prohibited. After Dec. 31, all medical dispensaries that were selling recreationally in Corvallis for the short period it was allowed had to apply for a recreational license.

JOHN KACHATURIAN | THE DAILY BAROMETER

After Measure 91 was previously passed, recreational marijuana became legal for purchase in October.

COURTESY OF MATE LAUSMANN

A high-speed car chase that went through the OSU campus in October ended in front of a residence hall.

## SUSPECT APPREHENDED AFTER HIGH-SPEED CHASE October 23, 2015

A 17-year-old male was arrested following a high-speed chase that went through and ended on the Oregon State University campus on Friday, Oct. 23. The suspect had made threats against his ex-girlfriend who was an OSU student and was allegedly on his way to find her on campus. The chase ended around 7:20 p.m. in front of West Hall, one of OSU's residence halls, when the suspect got out of his car and officers were able to apprehend him. During the chase and apprehension, the residence hall and other buildings on campus were put on lockdown.

COURTESY OF STEPHEN WARD

A strain of Pacific dulse, a native red algae found on the west coast, was not originally being developed for human consumption or commercial use.

## BACON FLAVORED SEAWEED July 22, 2015

On July 22, vegetarians, vegans and plant eaters alike rejoiced after OSU fish and wildlife professor Chris Langdon patented a strain of Pacific dulse, an Oregon native red algae, that tasted like bacon after it's been cooked. Dulse has graced plates around the world prior to this discovery at OSU's Hatfield Marine Science Center in Newport, OR, and is much healthier than bacon with its low cholesterol, up to 16 percent protein dry weight and unsaturated marine fatty acids. It's unknown at this time when this particular strain of dulse can be expected to make its debut in grocery stores or specialty shops.

# Highlights from the 2015-2016 school year

AARON NEWTON | THE DAILY BAROMETER

OSU was ranked by Trojan Condoms as the best university in the country for sexual health programs and resources for the second year in a row.

## OSU NAMED FIRST IN SEXUAL HEALTH November 10, 2015

After a study of the sexual health of America's universities was conducted by Trojan Condoms, OSU's sexual health status was no longer under wraps. OSU was ranked first out of 140 universities for having the best sexual health programs in terms of availability of contraceptives, HIV and STD testing, outreach programs, operation hours, and sexual assault services. This is OSU's second year as the best-ranked school for sexual health, after jumping to first place from 25th last year.

November

## ADDRESSING CAMPUS EQUALITY November 17, 2015

Oregon State University students had their chance to speak out about their experiences with inequality, prejudice and racism at the university at the Speak Out event on Nov. 16 in Gill Coliseum. Topics such as cultural appropriation, the teaching of curriculum that's insensitive to minorities as well as students questioning their safety on campus were discussed by attendees. As a result of the event, OSU President Ed Ray and the administration held two town hall meetings over the course of the remainder of the year.

AARON NEWTON | THE DAILY BAROMETER

Junior WGSS major Sierra Lantz speaks at the Speak Out event in Gill Coliseum about her experiences with racial intimidation in the classroom at OSU.

JOSHUA LUCAS | THE DAILY BAROMETER

Mammoth bones, as well as the remains of other prehistoric creatures were discovered in Reser Stadium during the Valley Football Center construction in January.

## COLOSSAL FOSSIL January 28, 2016

Post-season renovations on the Valley Football Center came to a brief halt on Monday Jan. 25 when a large mammoth femur was unveiled under the north endzone of Reser Stadium. The bones were removed by associate anthropology professor Loren Davis and his crew, and the following day as construction resumed. The bones of other prehistoric creatures were discovered as well, and are believed to be over 10,000-years-old. Construction for the center is still expected to be completed on time.

# Highlights from the 2015-2016 school year

**BRAD ANDERSON | THE DAILY BAROMETER**

Kyle Hart, an OSU graduate and children's book author and illustrator, was one of the speakers at the TEDxOregonStateU event.

## TEDxOregonStateU COMES TO OSU FOR SECOND TIME February 11, 2016

This year OSU hosted its second independently organized Technology Entertainment and Design (TEDx) talk on Feb. 11. The conference, featured five speakers including Jonathan Hurst, an associate professor in the OSU College of Engineering and Chinyere Tutashinda, a journalist and media activist. TEDxOregonStateU was themed IGNITE and was designed to motivate students and inspire change. Kyle Hart, a children's book author and illustrator, is an OSU graduate, and talked at the event about the power of imagination and his experiences with his career.

## OSU WOMEN'S BASKETBALL MAKES NCAA FINAL FOUR MARCH 29, 2016

The OSU women's basketball team advanced all the way to the Final Four in this year's NCAA tournament—the furthest they have made it in school history. The women ultimately lost to University of Connecticut 80-51, who would go on to win the tournament. For the first time in 26 years, the OSU men's basketball team also made it to the NCAA tournament, but lost in the first round to Virginia Commonwealth University 75-67.

**COURTESY OF KARL MAASDAM**

The OSU Women's Basketball team celebrates their victory over Baylor 60-57, which sent them to the NCAA Final Four for the first time in school history.

**COURTESY OF JAKE CHAMSEDDINE**

T-Pain headlined this year's annual DAM JAM, a concert put on at the end of the school year by the MUPC. This year's event also featured The Colourist and Battle of the Bands winner Adieu Caribou.

## CAMPUS JAMS May 23, 2016

Over 2,600 students participated in a poll to help decide the headliner for this year's Dam Jam music festival, which took place on May 21. This year's winner was rap artist T-Pain. In addition to T-Pain, this year's DAM JAM featured alternative-rock band, The Colourist and MUPC Battle of the Bands winner Adieu Caribou. Thousands of students and community members filled the Memorial Union quad for the concert itself, which saw tickets sell out faster than they had in previous years.

# Outgoing Editor-in-Chief Rachel Suchan reflects

By Rachel Suchan  
Editor-in-Chief

Imagine spending hours working tirelessly on a final project. You research, write, study, proofread, design and triple check everything. Then print out five thousand copies and distribute them all across town and on the internet for everyone you know and thousands of people you don't know to read it, judge it and tell you what you did wrong.

Then do that five days a week for an entire year.

That's what it's like to be editor-in-chief of a daily newspaper.

I absolutely loved it. My time here has taught me more than I could have ever imagined about community, relationships, involvement and

accomplishments.

Thank you for never being afraid to point out my failures. I have learned more from them than you will ever know.

The late nights and stressful deadlines are all worth the invaluable experiences I have gained through my time here.

As you may already know, after 95 years of daily service to the students, The Daily Barometer now faces a fundamental shift which will certainly change the publication as we know it forever.

For those of us who have been a part of this paper and grown up with newspapers still delivered to doorsteps, this shift is met with a sizable dose of nostalgia.

Alongside it, though, excitement, collaboration and creativity as we transition to a period of innovation and evolution.

As The Daily Barometer moves from daily print to a weekly publication, know that as journalists, our job remains the same—to entertain and inspire, to educate and inform, to represent the underrepresented, to be a voice for the voiceless, to speak for those too afraid to speak for themselves.

Help the future staff in their journey by approaching their mistakes with a gentle understanding. As students and even just as human beings, we are always learning and growing.

Know that as a student body

it is absolutely possible for your voices to be heard, and that the Barometer is here to help make that happen.

Above all else, thank you for reading. Thank you for caring and for sharing our articles and your opinions.

Thank you for using our publication as a platform for sharing important campus issues.

Keep on keepin' on and don't forget to write.

*Sent from your mom's iPad.*

*The opinions expressed in Suchan's column do not necessarily represent those of The Daily Barometer staff.*

baro.editor@oregonstate.edu

# Incoming Editor-in-Chief Riley Youngman looks forward

By Riley Youngman  
News Editor

and inclusion, we have been through several peaks and valleys as a community.

Working as a reporter and the news editor for The Daily Barometer, I hope that I have in some way contributed positively to your experience at OSU over this time with the coverage of these events and more.

As I take the reigns of The Daily Barometer now, I am beyond excited to see what the future has in store. This has been a year of transition for us at the Baro as well, with a lot of internal changes being made since August, which will continue into my term as Editor-in-Chief.

Next year The Daily Barometer will switch over from printing five days a week, to only being printed once a week. There are a variety of reasons behind this decision, but over-

all, this transformation will be a positive one that will allow our coverage to be more expansive and more inclusive.

While the nearly one hundred years of daily publication leaves many of us with a nostalgic feeling and a hesitation to buy into the "new", I ask that you go into this new era with an open mind and a willingness to continue to see the Barometer as your source for campus news.

We are expanding our online presence not only at the Barometer, but also within the entire Orange Media Network, and next year will be the first time that all of your student media will be working closely together to bring a variety of content to students and the community on several different platforms.

Sports coverage will continue

to grow through radio broadcasts, game coverage and videos, as well as features. Forum will continue to highlight the campus's voices and opinions and the arts and entertainment related content will still come out regularly. In addition to this, several blogs covering a wide array of topics are being started for the first time that will further provide online exclusive content daily for those interested.

The news will continue to exist on a daily cycle, with much of the the same content you are used to this year continuing to exist online next year. This will allow for the printed edition of the Barometer to focus on more impactful, heavy hitting pieces.

The Daily Barometer and Orange Media Network are growing, and we are excited to have you along for the ride.

During my time with the Barometer this year, I have made relationships and friendships that will last a lifetime, and feel more connected to this campus and this community than I ever would have imagined possible.

I have also experienced failure on more than one occasion, but with that, I have learned the importance of learning from one's mistakes and using them to grow not only personally, but professionally as well. The Barometer is a better publication now because of those mistakes, and I will continue to take the lessons we have learned this year forward and ensure that they are not made again.

Undoubtedly, we will fail again, but I look forward to expanding coverage next year to become a more inclusive publication, and shedding lights on

organizations and and demographics that may have been left out or underrepresented previously.

If you are at all interested in joining the team at The Daily Barometer, or any of the six other organizations housed within Orange Media Network, I urge you to get involved. This is your student media, this is your university. Your voice can, and should be heard.

Our office is always open, and our staff is always willing to talk and listen.

I look forward to serving you all next year.

*The opinions expressed in Youngman's column do not necessarily represent those of The Daily Barometer staff.*

## Questions asked:

**A) Who is one of the most influential people you have come across during your time at OSU?**

**B) What are you going to miss most about OSU?**

**1: Hannah Holman  
Speech Communication**

**A)** "The first person that comes to mind is Leslie C. Schacht-Drey. She is the coordinator for the center of fraternity and sorority life. I've only known her for a year, but she's just a great person to look up to. She just rocks! She rocks at her job. She does not let anybody get in her way of doing what she wants to do."

**2: Alex Arreguin  
Computer Science**

**A)** "Definitely my supervisors at work (Valley Library). They have helped me with a lot with on and off the job issues."

**3: Julia Shields  
Zoology**

**A)** "My older sister, Molly, she was a senior when I was a freshman here at OSU. And I did not want to necessarily follow in her footsteps, but it worked out. She was always there to show me the ropes my first year. Ever since then she still comes to visit. So she has been a good support system."

**B)** "I am going to miss being around so many people who want to do something with their future. And being around people that are striving to succeed in life."

**4. Abrianna Lochner  
Kinesiology Major**

**A)** "Lindsay Biga, she is the pro-

fessor of anatomy and physiology at the 200 level. The first day of her lecture, my first day on campus, first everything—I thought I was well prepared.

I purchased my anatomy textbook, unwrapped it, and redeemed the code. Then I got there and realized it was the wrong textbook.

I freaked out.

So Lindsay, she notices I am really upset, and I tell her what happened. She tells me to follow her to her office. At this point I am sobbing day one in front of my professor.

She said 'Why don't you let me use that textbook for my reference?' Then she turned around and hands me a complete set of the textbook that she had purchased extra to give them to people like me.

So now every year I lend out every textbook I have. I never re-sold a textbook since. So I've recently gave away like a \$200 physics textbook just to pay it forward."

**5: Bonnie Nutting  
Business Marketing**

**B)** "Just the general environment. Like walking through campus, heading to class, and I just got back from my last class so it's really hitting me now. I love Corvallis as a whole. It is such a college town. And I'll miss being so close to all my friends that I've made over the last four years. They're all going to be off doing their own thing. This is going to be the only time everyone is in one area. So I am definitely going to miss that."

**6. Natalie Lind  
Zoology**

**B)** "Probably Professor Andrew Blaustein. He really started my interest in animal cognition and behavior. So I think that's what set the ground work for what I want to do with my career."

**7: Deven Hunter  
Apparel Design**

**A)** "My professor, Kathy Mullet. She has helped me grow as a designer, and helped me step by step, and she also played a good part in the fashion show."

**B)** "What I'll miss most about OSU is my friends, the connections I've made over the last four years, and this nice community."

**8. Jessica Frelich  
Human development and Family Studies**

**A)** "My sister. She joined the navy. So we have pushed each other to finish our own tracks."

**B)** "All the outgoing activities to get people together and doing things."

**9. Jack Brennan  
Plant Breeding and Genetics**

**B)** "Just meeting new people. Being at a university (offers) a great diversity of people, so it is a lot easier to meet people."

# This is (not) the end of our journey

By Sean Bassinger  
Forum editor

On an April evening in 2013, I was getting ready to head home after I turned in my last news article for the week.

That's when my boss got the call. "What?" She first asked. It was her brother, describing a bomb threat that someone called into each residence hall on campus, but I didn't know that yet.

I did, however, know that my night wasn't over.

I've spent three out of my five years in college at Oregon State University, though it honestly feels like I attended here longer.

I could say the same about my two years at Linn-Benton Community College, and my three month stay during my first internship at the Klamath Falls Herald and News.

Sometimes, when you're a journalist, you get to do a little bit of everything.

I say "sometimes" since some reporters stick to a single beat or topic within their beat. Others say farewell to the reporter's life after a term or two as they ascend to the role of section editor, managing editor or editor-in-chief.

Others don't always get the full experience when they decide this isn't for them.

And that's perfectly fine—exactly

how it should be, actually.

Nobody's college experience is going to be "one size fits all."

One of the greatest things I've loved about working for a student paper is getting to see a variety of these experiences in my own way, whether it was from bolting out to cover breaking news on campus chaos to sitting at the editor's desk as an indifferent conservative pens a letter to let me know how they really feel (spoiler alert: not happy).

But the paper (and this goes for all newspapers, quite frankly) is more than just an aging coffee shop decoration or something for grammar aficionados to yell at.

The Daily Barometer has existed for more than a century on campus—it first published in 1896 and evolved from a weekly to a daily, and will likely see more transitions on the print front as community journalism continues a seemingly frightening shift toward digital platforms (more spoiler alerts: it's really not that frightening).

If you search through the archives, that's more than 120 years of student-documented history.

And, naturally, student papers tend to receive a pretty large amount of criticism, which I'm rather fond of myself.

Someone would not comment if they did not care. You should care.

And, as the guard continues to shift, there will be better and worse terms. The same goes for other student-run organizations on campus, such as the Associated Students of Oregon State University.

No matter what any of us do or continue to do, we're going to receive what we put in. Based on my own stories and interviews over the years, I've seen many students, staff and faculty put a lot of energy and drive into this university.

SEAN BASSINGER | THE DAILY BAROMETER

I imagine many of these students will continue to put the same if not more effort into their future endeavors.

So for those of you graduating, don't panic if you haven't entirely figured out where you're going right after commencement.

Some of us will have jobs or internships lined up right after graduation. Others may take a bit longer to get situated or look into future options (there's graduate school for those of you who

continue to fall in love with academia).

I've known friends from years prior who took a few months to find gigs. They've all landed on their feet in one way or another.

But regardless of your major or area of interest, make sure you maintain some sort of passion, drive and energy dedicated toward what you love. As students with backgrounds related to science, engineering, business and the liberal arts, OSU students continue to

stand out with a variety of skills.

After all, there has to be something behind those "Powered by Orange" banners we see floating across campus. At least, I hope it means more than just \$15,000-100,000 in potential student loan debt.

Cheers.

# Tackling the future

## Senior to continue her love of sports, rugby overseas

By Lauren Sluss  
News Reporter

As a young girl growing up in Redlands, California, Amanda McBride knew her life would always be filled with sports. From playing water polo and rugby, to majoring in exercise and sports science, McBride's athletic life was never dull.

Now, as a graduating senior from Oregon State University, McBride looks towards a future filled with her favorite things—sports, anatomy and best of all, teaching.

"My dream is to teach high school anatomy," McBride said. "If I'm working either with sports or anatomy, it's not really work because I want to learn about it. It's always been a passion of mine."

During her time at OSU, McBride demonstrated her love of sports by joining the OSU Women's Rugby Club. The club provided her with new friendships which helped her through her first year.

"My freshmen year, I was going through a really hard time, and they rallied around me in a way I didn't expect," McBride said. "They came and hung out with me in my dorm when I was feeling bad, and they became my family away from home."

After three years of playing, McBride took on her leadership role this year by becoming the club's president. Although it required a lot of work, McBride was able to keep the club running smoothly and help her teammates along the way, according to OSU Women's Rugby Head Coach David Dickson.

"Her positive attitude also generally percolated through the team," Dickson said. "She was always able to pick herself up when things were chal-

“ Her positive attitude also generally percolated through the team. ”

David Dickson  
OSU Women's Rugby Head Coach

lenging, and do the same for her teammates."

Teammate Alexandra Fautanu admired McBride from the very first time they met, while Fautanu was watching McBride play in a rugby game.

"She [McBride] got the ball and was stiff-arming people left and right, but then she got tackled and twisted her ankle. On the sidelines she continued to cheer on her team, yelling at them to do better," said Fautanu, a sophomore in mechanical engineering. "From that instance I admired her, and throughout the year she kept demonstrating these skills."

Fautanu was not the only teammate to respect McBride on the rugby team. For Constance Parker, freshman in electrical engineering,

McBride's leadership allowed the new players to grow and learn.

"She leads with humility and is always working with the players who are new," Parker said. "What's important to her is that we are working together as a team, and she is always helping us learn the basic skills to help us become better players."

McBride's ability to lead extends into other facets of life as well, including attending Grace City Church in Corvallis. Since joining the church her freshmen year, McBride discovered her new passion of volunteering.

"People ask me why I volunteer so much, but I don't see it as volunteering because I enjoy it and love the people," McBride said. "The way God has changed my life and

CONTRIBUTED BY MIA MITCHELL

Bonnie Kenyon, Amanda McBride, Alexandra Fautanu (BACK) and Patricia Cheyenne (BACK) celebrating their victory over the Ducks in January.

grown me is something that would have never happened if I didn't go or if I didn't come to OSU."

McBride's passion for sports and volunteering will not stop after her time at OSU, however. This summer, McBride plans to travel around the country through Unchartered Waters Sports Ministry, hosting sports camps for local churches.

"I'm going to be leading four and five year old groups, and will be focusing on gross movement and motor development," McBride said. "It's really cool because I've learned all of it through my major."

After hosting two camps per week for the entire summer, the group plans to make one final stop—Belize.

"At the end of the summer we will put on three camps in 11 days in Belize," McBride said. "I'm so excited about it; I think it's going to be a lot of fun."

After her time in Belize, McBride plans to spend time with her family in California hiking Mt. Whitney, and then return to Corvallis.

Although McBride has several plans for her future, she is currently looking towards graduation next week, a bittersweet moment for her.

"I'll probably cry a lot. I might cry now," McBride said. "It didn't matter what I was going through, I always

felt like the university was supportive no matter what, through the services they offered and through my instructors."

Although McBride is about to leave OSU, those around her are confident of her ability to take what she learned at OSU and apply it to her life, according to Dickson.

"I hope that she maintains and carries the confidence and leadership she found on the rugby pitch through the rest of her other efforts in life," Dickson said. "If she does that, she will be successful in whatever she chooses to do, and that's all I wish."

4: March 18, 2016: Men's basketball makes first NCAA Tournament appearance since 1990.

5: April 2016: OSU gymnast Madelin Gardiner named All-Pac-12 First Team in All Around.

6: April 3, 2016: Women's basketball makes first Final Four appearance in school history.

7: March 18, 2016: Amar Dhesi becomes first OSU wrestler to be named All-American in three years.

8: May 15, 2016: After a stellar out-of-conference record and a legitimate conference record OSU softball made the NCAA tournament for the first time since 2013.

9: May 30, 2016: OSU Baseball gets snubbed from NCAA Tournament. This is the first time the team has missed the postseason since 2008 after winning back-to-back NCAA Championships.

THE OREGON STATE ENGINEER™

CREATE A BETTER FUTURE

The Sky is Not the Limit

CONGRATULATIONS

COLLEGE OF ENGINEERING

Class of 2016

Oregon State UNIVERSITY

# Catching up with Alyssa Martin

COURTESY OSU ATHLETICS

Former Oregon State University women's basketball guard Alyssa Martin now works for a civil engineering firm in Portland.

“Enjoy every second. It goes by super fast, and it's kind've the last minute of freedom before you enter the real world. If you're able to take a trip, take a trip before you have to worry about vacation days and when you can hang out with your friends. Take advantage of the time you have left.”

Alyssa Martin  
Former OSU Guard

## Q&A with former OSU basketball player Martin

By Josh Worden  
Senior Beat Reporter

Alyssa Martin was a Pac-10 All-Freshman member in 2011, which was also current head coach Scott Rueck's first year with the Beavers. OSU went 9-21 that year but four years later, Martin was the only senior on an OSU squad that won 24 games. Martin was a three-time All-Conference Academic Honorable Mention and finished third in OSU history with 150 three-pointers in her career.

Now, Martin works for a civil engineering firm in Portland, Harper Houf Peterson Righellis. She talked with the Barometer this week about her memories of OSU, graduating and life after college.

### What do you remember about graduating?

“I didn't actually do the big graduation, just the Civil Engineering one. So it was different, but I remember my personal goal was to have a job by the time I graduated. Luckily I found a job the week of finals. I felt this big relief that I was done, graduating and I have a job. I don't have to go back home and beg my mom to take me back. I remember feeling excited and ready for this next adventure. And a little nervous to not have basketball every day.”

### Do you have any advice for graduating seniors?

“Enjoy every second. It goes by super fast, and it's kind've the last minute of freedom before you enter the real world. If you're able to take a trip, take a trip before you have to worry about vacation days and when you can hang out with your friends. Take advantage of the time you have left.”

### What are some highlights for you, both athletically and academically?

Athletically, for me the biggest highlight was the first time we beat Oregon in the Civil War. It was huge and fun and a big comeback win. Academically, I think the Senior Project with Civil Engineering was pretty cool. It's different than all your classes where normally professors say “Here's a problem, solve it, blah blah blah.” That was more of a real world example of putting your engineering skills to the test and presenting it to people. I thought that was pretty cool to do that with a group of people I had never met before.”

### Does the Senior Project help you in your job now?

“I kind've went a different route with my Civil Engineering degree. Our project was a bridge, and I'm not doing bridges now (laughs). But it

definitely was good to have. I learned some stuff I did not know.”

### How well did OSU prepare you for your civil engineering job in Portland?

“I think awesomely for the fact that I got to do basketball and Civil Engineering. I think that time management helped. Some weeks I'd be working on multiple projects and I had to figure out which one needed to get done first and how much to focus on each one. Having to juggle basketball and Civil Engineering was a big factor. Classes-wise it was great. Yeah, work is different than school, but I think with the background of Oregon State I definitely felt prepared on my first day.”

### If you could go back to OSU, would you do anything different?

“Oh man, I don't know. I think I like how everything turned out. Maybe starting in Civil Engineering, since I took a term to figure things out and started in Marine Biology.”

### What are your biggest hopes for your future?

“I love Beaverton — it's where I grew up and where my whole family is. I plan on staying here. I love where I'm working and I plan on staying for sure. Extracurricular-wise, I'm training for a half-Iron Man Triathlon this summer. So I'm excited for that but a little nervous.”

### How has training been going for the half-Iron Man?

“It's been going pretty well. I had to do something to stay in shape, and I did triathlons in college in the summers anyways, so I figured this year it was time to step it up to the half-Iron Man. We'll see.”

### How has maintaining friendships changed after graduating?

“You have to put in a lot more effort than in college since you're all there on campus. One of my best friends from engineering lives in Portland so I still get to see him and I'll go on trips with him and his girlfriend. It's just putting in the effort and I think it's definitely worth it.”

### Graduation calendar

#### June 9

- Lavender Graduation (Pride Center)

#### June 10

- MIME Graduation (Mechanical, Industrial and Manufacturing Engineering)

- Pharmacy Graduation

- College of Science

- College of Education Commencement

- Black Graduation (Black Cultural Center)

- CCE Graduation (Civil and Construction Engineering)

- School of Psychological Science

#### June 11

- OSU Commencement
- Air Force ROTC
- EECS Graduation (Electrical Engineering and Computer Science)

### Graduation ceremony information

- Date: Saturday, June 11
- Time: 10:30 a.m.
- Location: Reser Stadium
- Gate opens at 9 a.m.
- Rain or shine
- Tickets are not required
- Watch live broadcast on OPB Plus

### Speaker and Honorary Doctorate

#### Juan Felipe Herrera

Juan Felipe Herrera will deliver the 2016 commencement speech at Oregon State's graduation on Saturday. Herrera became the first Mexican American to be appointed the United States Poet Laureate in 2015.

Herrera has written 30 books in a variety of writing styles and genres that includes poetry, prose, short stories, young adult novels and children's picture books.

CREATIVE COMMONS

### Commencement music

#### Prelude

- "In Storm and Sunshine" by John Clifford Heed
- "Downey Overture" by Oscar Navarro
- "America the Beautiful" by Samuel Ward

#### Processional

- "Fanfare for the Common Man" by Aaron Copland
- "Pomp and Circumstance" March No. 1 by Edward Elgar;
- "OSU School Songs Medley" arranged by Christopher Chapman
- "The Chimes of Liberty" by Edwin Franko Goldman
- "Centennial Celebration" by John Carnahan
- "Second Suite in F" by Gustav Holst;
- "Procession of the Nobles" by Nikolai Rimsky-Korsakov

# The 147th Oregon State Commencement

### Who's handing out diplomas?

#### Presentation of Doctoral Degrees

- Jennider Dennis, Ph.D., Dean, Graduate School

#### Conferring of Doctoral Degrees

- President Ray

#### Presentation of Master's Degrees

- President Ray

#### Conferring of Master's Degrees

- Dean Dennis

#### Presentation of Baccalaureate Degrees

- The dean of each college presents Baccalaureate Degrees

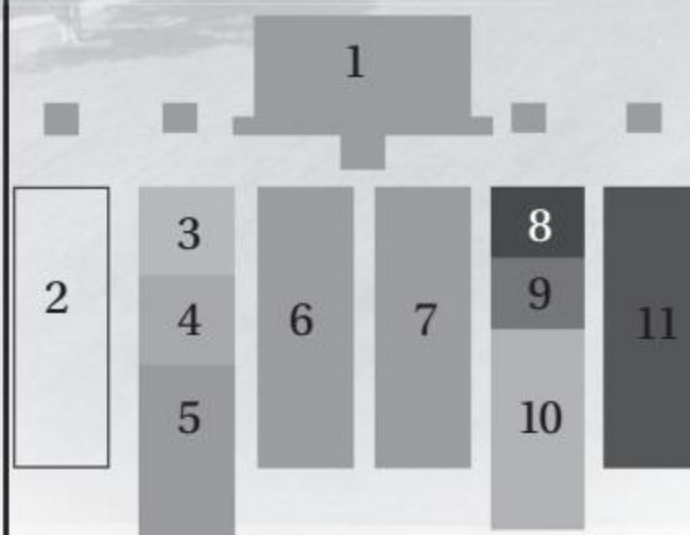

#### Conferring of Baccalaureate Degrees

- President Ray

#### Diploma Distribution

- Doctoral Diplomas
- Master's Diplomas
- Baccalaureate Diplomas

### Commencement seating chart

- |   |  |                                      |
|---|--|--------------------------------------|
| 1. Main Stage                             | 5. Engineering                           | 8. Agricultural Sciences             |
| 2. Liberal Arts                           | 6. Faculty, Doctoral & escorts, Master's | 9. Forestry                          |
| 3. Science                                | 7. Doctoral & Escorts, Master's          | 10. Business                         |
| 4. Earth, Ocean, and Atmospheric Sciences |  | 11. Public Health and Human Sciences |

### Diploma distribution

- Doctoral degree candidates cross the center stage one at a time to receive their diplomas.
- Master's degree candidates cross the center stage in two lines to receive their diplomas.
- Bachelor's diplomas will be distributed at the two areas to the far left and far right of the center stage, as well as on the center stage.
- Distribution of diplomas to the far RIGHT of the center stage: College of Public Health and Human Sciences, College of Forestry and College of Agricultural Sciences.
- Distribution of diplomas to the far LEFT of the center stage: College of Science, College of Liberal Arts and College of Earth, Ocean, and Atmospheric Sciences.
- Distribution of diplomas at the center stage: College of Engineering and College of Business.
