City Council approves liquor license

Moratorium on additional Monroe Street licenses to be considered

By TRICIA MCALEER **Barometer Writer**

Capping off years of controversy over whether Monroe street eateries should be allowed to serve liquor, the Corvallis City Council last night approved a class R liquor license for La Creperia restaurant.

A class R liquor license, permitting wine and beer sales for consumption on the premises, was approved for at the meeting. Citizens were

La Creperia with one major limitation: beer and wine could not be served to customers unless it would be consumed with a bonafide meal. Mixed drinks would not be allowed under this license.

A separate city council meeting was held Monday at noon in order for council members to discuss the liquor license issue. This was not a public hearing although several citizens were present

not allowed to submit any comments on the issues.

During the noon meeting, the council made a decision to support approval of the class R liquor license for La Creperia. Several citizens present at the evening meeting were upset because they were not able to voice their views before the decision was made.

bulk of the public is able to be present," said Fred Decker. Corvallis resident. "The noon session occurred without full citizen input. There was a reversal of previously taken actions and I ask that you rescind action taken this noon."

One woman attending the noon meeting had conducted a study on the Monroe Street "Controversial issues are neighborhood. The study usually held over until the revealed new information evening meetings when the concerning the liquor-

licensing issue that she thought should be presented to the council before they reached a decision. The mayor would not let her

A suggestion was made by a council member for a moratorium blocking Monroe Street eateries from obtaining liquor licenses. The moratorium would exclude La Creperia.

Furthur discussion on the moratorium was postponed until the next city council meeting on April 15.

Belle Covalt, Shakey's Pizza representative, strongly opposed the moratorium.

"Granting La Creperia immunity from the moratorium is not fair to Shakey's," exclaimed Covalt. "Shakey's has been on Monroe Street 11 years. Ten percent of the sales at our other locations are beer and wine. People desire to sit and have a glass of beer with their pizza."

According to Covalt, Robert MacVicar, OSU president (not present at the meeting), told her if one exception is made in granting a liquor license, then Shakey's should also be granted the license. She also said MacVicar feels a study should be done on Monroe Street eateries before a decision is made on the moratorium.

In the past, MacVicar has been vocal in opposing the liquor licensing on Monroe Street. He feels licensing one restaurant may eventually lead to a "tavern row," causing an atmosphere detrimental to the area. MacVicar also said he thought it was not possible to restrict the liquor sales to those buying food.

A final decision on whether the liquor license should be granted will be made by the Oregon Liquor Control Commission.

La Creperia restaurant, 1501 NW Monroe, has the approval of the Corvallis City Council to seek a class R liquor license from the Oregon Liquor Control Commission, following council action Monday. La Creperia and the Tally Ho, a restaurant formerly occupying the premises, have tried unsuccessfully for several years to gain approval for the license. (Photo by Ross Anker)

ASOSU senate to meet tonight

The 38th ASOSU Senate will hold its first meeting for the month of April 1979 at 7 p.m. in MU 105, discussing four items.

Student insurance packets will be the first item of new business, followed by a bill calling for support of Women's Intercollegiate Athletics funding.

The third item on the agenda will open discussion on a resolution proposing that senate backs House Bill 2831. This bill has to do with faculty evaluations.

Senate's last item of new business will be debate on a statement regarding student tuition levels.

New business will be preceded by reports from ASOSU's four executive officers.

Council members view widescreen TV

By TRICIA MCALEER **Barometer Writer**

When asked what happened during the Corvallis City Council meeting last night, council members may say they watched TV

Although a serious decision was made last night concerning Monroe Street liquur licensing, council members did indeed watch approximately 20 minutes of wide screen television during the meeting.

Representatives from Corvallis TV Cable gave the council a visual presentation concerning new cable TV options for Cor-

"We want to upgrade the TV cable system in Corvallis," said Steve Gregory, western region manager for cable TV "We've had an awful lot of requests from the public for a better cable system."

New options available for cable TV, according to Gregory, include: WTCG, a 24 hour "super" station from Atlanta, Georgia; Christian Broadcasting System, two channels with 24 hour Christian programs; Madison Square Garden Sports; and "Showtime", an optional premium movie channel with 24 hours of uninterrupted, uncut movie service.

The Corvallis TV Cable Company is asking the City Council to support the new cable options which will in turn bring cable TV rate increases to Corvallis citizens.

'We are convinced through conversations with the public that this is something they want," said Gregory.

Current rates for cable TV in Corvallis are approximately \$5.50 per month. With the additional service, the rates may go up to approximately \$8. The 24 hour movie option would cost an additional \$10.95 per month.

The issue was referred to the Finance Law and Order Committee for furthur consideration.

Loan limit increases

SALEM (UPI) - The Oregon Senate Monday on a 28-0 vote approved legislation to increase the maximum limit for veterans' home loans from the present \$42,500 to \$51,000 in order to help combat inflation.

The Senate also approved a bill making it easier to convict persons who promote or compel prostitution and increasing the penalties, and another bill reworking the state's election laws.

The veterans' loan limit has been raised in each of the last three sessions of the legislature but Sen. Lenn Hannon, D-Ashland, said the present loan of \$42,500 "has long since been superseded by housing costs."

He said, "Though an increase from the present limit to \$51,000 would amount to the largest single increase in the history of the program, it would still not equal the 1977 homebuying value of last session's loan maximum."

A twist of irony

COQUILLE (UPI) - It was a bad weekend for car thieves in Coos County, the sheriff's office reported.

One set of thieves stole two cars and a bicycle that would not run, a third auto that they wrecked, and a fourth vehicle that they abandoned in the middle of a rural road, sheriff's deputies said.

A Fairfield juvenile was arrested when he flagged down help to pull from the ditch a car he had allegedly stolen, only to find that he had flagged down the auto's real owner, officers said.

The thefts occurred in Myrtle Point and in the neighboring community of Arago, Sheriff's Sgt. Mike

Non-smokers' bill fails

SALEM (UPI) - A "non-smokers' rights" bill that would limit smoking to designated areas of public buildings and offices failed to pass the Oregon House Monday by a slim, one-vote margin.

The proposal failed on a 30-27 vote, which changed to a final vote of 29-28 with reconsideration of the measure possible. Bills must receive a minimum of 31 of the 60 votes in the House to pass.

Rep. Rod Monroe, D-Portland, sponsor of the proposal, said it "doesn't really ban smoking, it simply says there should be non-smoking areas." He added that the bill, patterned after a similar law in Minnesota, is designed to "set up a little more equity" for nonsmokers.

Committee created

SALEM (UPI) - An 11-member Commission on the Status of Blacks in Oregon would be created under a bill approved by the Senate Aging and Minority Affairs Committee and sent to the joint Ways and Means Committee today.

The commission would be charged with studying state and local laws and ordinances for evidence of discrimination against blacks, studying working conditions and union representation, examining educational opportunities and developing programs designed to inform blacks of services available to them.

Spending limited

SALEM (UPI) — Both those in favor of and opposed to a bill which would limit campaign spending in Oregon used constitutional arguments to defend their positions Monday in a hearing before the House Elections Com-

Rep. Dave Frohnmayer, R-Eugene, said the bill. HB3011, is "both unconstitutional and unwise."

The bill would violate "constitutional guarantees of free expression and association and can only undercut the vigorous exchange of political ideas necessary for an informed electorate," Frohnmayer added.

Begin arrives in Cairo; receives little welcome

CAIRO, Egypt (UPI) -Menachem Begin, the first Israeli prime minister to visit Cairo, arrived Monday to a low-key and almost chilly welcome from Egyptian officials buffeted by an Arab world angered by the Egyptian-Israeli peace treaty.

An expression of that anger was demonstrated Monday in Beirut where unidentified assailants struck the U.S. Embassy with two rocketpropelled grenades, damaging the first and fifth floors of the building and toppling the American flag. There was an attack against the U.S. Embassy in Damascus a week

TEHRAN, Iran (UPI) -Turkoman rebels caved in Monday under an Islamic government threat to send in Iranian army tanks and armored cars to attack the city

Ayatollah Ruhollah

Palestinian delegation to the holy city of Qom by condemning Israel as the "usurper" of Arab lands and calling on Arab nations to "eject Israel from Jerusalem."

Tehran radio said the Turkoman gunmen in Gonbad, 300 miles northeast of Tehran near the Soviet border, signed a four-point peace agreement with central authorities after the army threatened a counter-offensive and moved in reinforcements.

The Turkomans agreed to give up control of half the city, hand over the area to the army and free all prisoners in exchange for permission to take their wounded to hosptials in area controlled by Iranian troops, the radio said.

The radio did not mention a settlement on the Turkomans' demands for autonomy, indicating the government had maintained its hardline stand that it would no longer tolerate regional revolts against its central authority.

Several hundred persons have been killed since the clashes began Monday, and an Iranian source who returned from the city Monday said Turkoman snippers were still firing on anyone trying to pick up bodies as late as Sunday.

"As a result, there are bodies lying in every street in their range," he said, adding that at least six persons, including an 11-year-old girl, were killed Sunday by the Turkomen despite a cease fire declared by government troops.

He said at least 150 persons, including women and children, had been killed by Turkoman gunfire during eight days.

Amin only bystander as armies battle

NAIROBI, Kenya (UPI) - The armies of Libya and Tanzania are battling one another in Uganda with Uganda's President Idi Amin seeming hardly more than an interested onlooker.

President Julius Nyerere of Tanzania, Uganda's neighbor, stands to lose heavily unless his army quickly topples the African dictator.

As the Tanzanian invasion force reached the outskirts of Amin's capital last week, Libya, 3,000 miles away, rushed 3,000 troops plus military hardware - including Soviet-built supersonic bombers — into Uganda to prop up

Libyans now man roadblocks and strategic military points throughout the capital.

Diplomatic sources said Amin's 20,000-strong army, equipped with Soviet arms, has simply fallen apart.

Only Ugandan marines are known to be still loyal to Amin — they helped quash an ill-timed coup attempt from within the army at the dictator's statehouse headquarters at Entebbe as Tanzanian forces approached

But since then, thousands of troops have simply fled, discarding uniforms and weapons and melting into the streams of refugees leaving Kampala.

As for the so-called Uganda Liberation Army of anti-Amin exiles in Tanzania, observers said it would quickly disintegrate without the several thousand Tanzanian troops in its invasion force.

One question now is whether the Tanzanian army, which has never fought a war, can overcome the equally undistinguished Libyan army.

Nyerere's invasion gamble, already in trouble, could become a disaster. The Tanzanian leader hoped to touch off a widespread Ugandan revolt against Amin, who would then be felled by his own forces.

Students unsettled over the nuclear accident last week at a power plant Harrisburg, Pa., need not fear a similar accident occurring at OSU's nuclear reactor, according to professors and officials here.

Such an accident, which continues to leak radiation into the atmosphere in the East, "cannot happen here at all," said Karl Hornyik, associate professor of nuclear engineering.

Hornyik explained the different purposes of experimental reactors like OSU's and those used to generate electricity are factors which make OSU's reactor safe to use.

"The power plants can only operate efficiently if they produce heat at a high level of temperature and pressure," said Hornyik. The heat released is converted to mechanical energy by being used to produced steam, which turns turbines, producing electricity.

"Our reactor puts out thousands of times less heat than nuclear power plants," he said. "It couldn't put out as much, anyway," he continued, "because the chemical structure of the uranium used in OSU's reactor will not permit the chain reactions necessary for operation to continue under excessive temperatures."

A major concern regarding the Eastern plant is a bubble of hydrogen which has formed inside the pressure chamber. This is where the actual nuclear reactions take place and the hydrogen may dissipate, exposing the fuel rods inside the chamber to air. The rods, normally submerged in cooling water, would then begin to melt, with the possibility of liquid nuclear fuel dissolving its way through the surrounding concrete walls and into the environment.

"Should the uranium at the center of OSU's reactor be exposed, such a 'meltdown' would not occur," said Hornyik.

"Our reactor sits in a swimming pool," said Hornyik, explaining that a pressure chamber like those used in electicity-producing plants is unnecessary because of the small amount of energy involved in experiments and research at the ten-year-old reactor. "Any hydrogen (gas) formed would simply escape into the air."

John Ringle, associate professor of nuclear engineering and reactor administrator, further pointed

permit the chain reactions out the inherent safety in necessary for operation to OSU's reactor.

"The reactor is rarely operated at full power," said Hornyik, but never for a great length of time, since this reduces the chances for an accident.

However, such guaranteed safety measures do not mean relaxed precautions at the reactor site. "The reactor is inspected and regulated the same way a power plant is," said Hornyik.

"I would say at least 75 percent of our time here is spent complying with regulations," commented Hornyik. He explained that there is a continuing series of reports the department is required to make to the Nuclear Regulatory Commission, some daily, others weekly, monthly, semiannually, and annually.

"Even if you operated this type of reactor at full power for an infinite length of time," he said, "and then had an accident, such as the loss of cooling fluid, the surrounding air would be enough to cool the fuel (and prevent a meltdown)."

"The outcome of the Pennsylvania accident may not be entirely negative for the industry or the public," speculated Ringle. "It may prove to be a valuable learning experience for both groups," he said.

"Things may have cropped up that (the nuclear industry) didn't think of before," said Ringle. "There may be changes made in safety requirements."

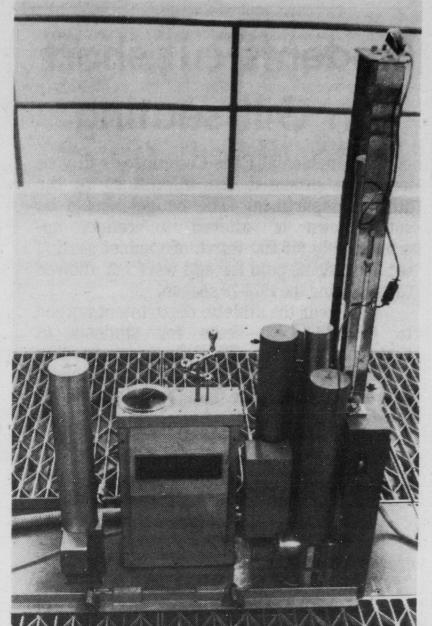

"There are still no fatalities, no cases of overexposure, and no broad effects on the health and safety of the people," he said, adding that "the impact of this, besides the fear and panic, maybe isn't too bad."

"In a statistical sense, sooner or later something like this was going to happen," he continued, "maybe (the lack of tragedy associated with this country's first nuclear accident) will alleviate some fears. Worry over the possible consequences of such an accident has been bugging people for years."

Ringle also commented on why the Pennsylvania incident has caused so little loss in terms of human life or property.

"Things are not worse than they are because of the precautionary methods built into the system," he explained. "(The area in Pennsylvania) is not at the brink of disaster. There are still many

Students cut short on Gill seating

The Incidental Fees Committee will vote today on proposed fee allocations to the athletic department. The budget should be voted down or altered to reflect approximately \$15,000 worth of student seating which students paid for and were not allowed to use during the 1978-79 season.

Last year the athletic department agreed to provide 4,400 seats for students at basketball games in Gill Coliseum, according to student representatives on the athletic board. The seats were paid for with students' incidental fees.

After receiving the designated dollars from student budgets, the athletic department sold 238 seats in the student section as reserve seating, thus accruing an additional \$15,000.

As a result of this action, student seating at basketball games this year was more crowded than ever.

Students are justified in questioning the resale of these seats. Selling the same piece of merchandise twice without refunding the full amount to the first buyer defies all ethical standards of any business transaction.

The \$15,000 value of the seats should be credited to the amount of athletic funding coming from student fees in the 1979-80 budget. MH

FRANKLY SPEAKING

Energy Council

To the Editor:

Gov. Atiyeh's recent actions regarding the Energy Facility Siting Council threaten to destroy the council's credibility. This sevenmember council has been struggling for eight years to decide whether or not to permit construciton of the two Pebble Springs Nuclear Plants (at an initial construction cost of over \$3.5

To remove two members who have served on the siting council and its predecessor, the Nuclear and Thermal Energy Council - over eight years each - destroys the purpose of allowing public citizens to decide this question free from political pressure. To remove two members now when the decision is about to be made, when those two members have expressed doubts about the wisdom of building another plant before safe, permanent waste disposal has been developed is like tampering with a jury. And it has the effect of stacking the deck, especially when two other members are being left on who have indicated strong favor for more nuclear plants. Those two, Chi Wong and Phil Schneider have served as long as the two who are being tossed off.

Recent political upheavals have given various third world countries equal bargaining power with the U.S., and now we are criticizing them for adopting our basis for providing a sound economy. In a sense, anything they do to us was learned from us.

The reference to Arabs sacrificing their 1979 Trans Ams to be able to continue their education here was crude and also rather narrowminded. It's views like this that give third world countries their present notions about the

Mark Mastrandea Jr., Pre-Med.

Rebuttal

To the Editor:

The April 2 editorial on raising OSU tuition for foreign students does a grave disservice to the Daily Barometer and to the university. It reflects the sort of jingoistic parochialism and anti-foreign stereotyping that it is the university's mission to eradicate. It also evidences a misinformed and unsophisticated attitude toward U.S. foreign assistance and international relations, and a sloppiness of reasoning and expression that are unworthy of discourse within a university. In additon, it bespeaks an absence of generosity and an alarming ignorance of the many contributions that foreign students make to the educational experience of all OSU students and faculty who come in contact with them.

I sincerely hope the author of this editorial will endeavor to become better informed on these matters before expressing himself so thoughtlessly again.

This year there were 238 fewer seats available for students seats)." at home basketball games than there were during the 77-78 season. Students paid for those 238 seats, however, as part of the incidental fee allocation to the athletic department.

Incidental Fees paid the same amount both years for student seats. The 238 seats (located at both ends of the basketball court) were also sold as reserved seats, resulting in an extra \$15,000 income for the athletic department.

The money went towards maintaining a balanced athletic budget, according to Dee Andros, OSU athletic director.

NUCLEAR REACTOR

contained."

"Designers of nuclear individuals. facilities have to visualize then design ways to eliminate to think," continued Hornyik. the danger caused by such accidents," said Ringle.

happen here (at the OSU reactor)," said Ringle, "is for the reactor to be operated for a pretty bad one," he said. a long period of time, followed by a loss of coolant. The fuel can't melt, but even if it did, the radiation doses arising from that situation would be less than one millirem." This amount is much less than the dose of radiation a person receives in an x-ray, and relatively insignificant, according to experts.

"The dangers from excess radiation exposure are not insignificant, however," as Hornyik readily admits. "Overexposure can cause acute and immediate illnesses," he said, adding that the effects may be delayed into later-developing complications, such as cancer from 3:30 to 5:30 p.m.

barriers to keep the stuff or genetic damage witnessed in offspring of over-exposed

"Such effects are not as new every possible accident and or foreign as some people care

"Sunlight is a form of radiation and people know "The worst thing that could that if they expose themselves too long to the sun, they are going to get a burn, sometimes

Varsity rally tryouts slated

Tryouts for the OSU Varsity Rally Squad are April 21. Interested persons missed organizational meeting Monday can contact Yolanda Leal at 753-8679 for more information.

Six women, four men and one Benny Beaver will be chosen for the 1979-80 squad. Clinics will be April 16-20 at Dixon Recreation Center

"It's like reserving seats and then selling them again," ASOSU President Mel Ferguson said. "It is my contention that the students should receive some reimbursement (for the resold

The athletic department contends that no students were deprived of admittance to basketball games because there were fewer seats, although there were many games this season where there were students standing or sitting in the aisles in direct violation of fire codes.

we didn't turn any away," said Andros.

The seats were taken away from the students "last August" when Andros decided that the seats were needed for Beaver Club contributors.

The decision was not taken to student officials at that time - although they were on campus at the time - and the athletic department "forgot about it when football season came around."

The issue will be taken up this afternoon in MU 110 at 3:00 when the Incidental Fees Committee will go over the budget requests by the athletic department.

Mel Ferguson feels the fees committee should cut the athletic department budget by as much as \$15,000 to make up for the amount that was made by reselling the seats. Such action was supported by university president Robert MacVicar at a president's council meeting last Wednesday.

At the athletic department budget meeting last Wednesday, Andros claimed that if his funding from student fees was cut by \$15,000, he would have to either cut the budgets for minor sports (leaving the basketball and football programs alone), or begin "I don't feel that we took anything away from the students if charging students admission to athletic events at the door, like the University of Oregon does now.

> "I don't want this (making students pay admission to athletic events) in any way." Andros said. But he added that such action would mean more income for the athletic department because it would result in decreased student attendance and more seats available for sale to the public.

> The athletic department's claim that a \$15,000 cut in funds from student fees would result in an insufficient budget is made questionable by the fact that the athletic department has \$240,000 in unexpected income from two televised football games last fall.

The OSU NROTC Drill team will travel to Tempe, Ariz. on Wednesday to compete in the Governor of Arizona Invitational Drill Meet. The meet will be composed of 20 collegiate teams from the southwestern portion of the U.S.

Hard work, dedication, and over 20 weekly hours of practice have enabled the drill team to remain undefeated for the past two years. "I hope to keep up our image by winning this year," said Clarke Lethin, commander of the squad.

This year the team won the Northwest Navy Competition and the Tulane Invitational Drill Meet during the Mardi Gras Festival. Last year, the team won the two previous events plus the Governor of Nevada Meet and the Tulane Invitational Drill Meet.

The competition consists of four phases: Inspection, regulation drill, squad basic drill and exhibition drill. Both the regulation drill and inspection are combined to form one sequence of the competition performed by the 16-member

The squad members are David R. Becker, Eric T. Bender, Thomas J. Jardine, Lawrence M. Vellucci, Robert A. Alvick, Scott G. Shaver, Tony L. Walters, Roger D. Angel, Thomas T. Brice, Roger L.Burton, Mark E. Cantrell, James P. Halferty, Wendell H. Macrae, Chris J. Roach, Domingo K. Salazar, Wayne R. Steenson and Squad Commander Clarke

Dance Theatre presents ballet

OSU's Dance Theatre will present modern ballet and jazz dance at Mitchell Playhouse Thursday through Saturday at 8:15.

Tickets for the event. sponsored by the physical education department, can be purchased this week from noon to 5 p.m. at the Mitchell Playhouse Box Office or at the

Prices are \$3 and \$2.50 with a \$1 student discount.

"A wide variety of dance forms - from classical to avantgarde, will be presented by OSU students and faculty," saidl Carol Soleau, principal choreographer.

"Some of the dances express optical illusions, others are firmly grounded in the music, and two are based on theatre ideas," she added.

Baseball fever—catch it!

By NICK DASCHEL **Barometer Sports Editor**

Baseball fever — catch it! Or - it's contagious!

So say the slogans in media guides and television as the 1979 major league baseball season gets underway.

You know it's baseball season when:

-the baseball guides come out on the newsstand.

-the New York Yankees make the headlines on top of the front page four out of seven days during the week about the latest clubhouse feud.

-a loud crash follows a screaming noise through the neighbor's picture window.

yearly predictions.

Page 12 of today's Daily Barometer has the predictions of the Barometer staff, plus the picks of Oregon State coach Jack Riley. Last year, the Barometer hit on 75 percent of their picks, the only missed pick being, of all teams, New York. And it was the Yankees who took the 1978 World Series. So you can take our picks with a grain of salt. Or a barrel if you wish.

Let's take a look at the upcoming season.

AMERICAN LEAGUE EAST — This is where it's at. In this division are four teams that could win any division in baseball, but unfortunately for them, they are all in the same division.

New York is in the division, with all its high priced talent. Milwaukee is in the division, with all of its explosive bat power. Boston is in the division, with a likewise explosive bat artillery. So is Baltimore, which has a smat-

tering of everything.

And one cannot forget Detroit, which has youth now, but with seasoning, could be a very real challenger.

Cleveland and Toronto are in the division, but will probably be teams that others will look at to fatten their "W" column.

Most of the pickers are going with New York, and splitting evenly between Milwaukee and Boston for second. New York can be had, for it took the Yankees until August to get going last year. If either Boston or the Brewers get hot and stay there, the Yanks will be hardpressed to match them. And one has to believe that NY can -the Barometer makes its fall, as evidenced by their 6-18 preseason record.

> AMERICAN LEAGUE WEST - A three-way race shapes up in this division.

> Kansas City will be back after its fourth consecutive title, but will not win it easily this time if at all.

Why? Try California and

maybe Texas for size. California is the favorite in the division, thanks to recent acquisitions of Dan Ford and Rod Carew. Those two players combined with an already power-laden lineup plus two of the finest pitchers around in Nolan Ryan and Frank Tanana will make the Angels tough in 1979.

Texas has the power, but whether the pitching is there or not is still up for grabs. Oakland and Chicago share the same problem, which is an unstable lineup. Seattle has some talent, but the team is too young to be predictable. Minnesota had talent, but lost it all, and seventh place is a good bet for the Twins.

LEAGUE NATIONAL EAST — With Pete Rose added to the defending East champion Philadelphia, how can the Phils not repeat as division winners? It's hard to imagine them

not winning the title, but Pittsburgh and Montreal could surprise the Phils if they decided to dawdle around and

wait until the last day in September to win the division.

St. Louis is said to be much improved over last season, and Chicago is expected to ride the fingers of Bruce Sutter to wherever they finish up. The New York Mets are still about light years away from glory.

Drlica says bad publicity all in the line of his job

By THOMÁS HEITSTUMAN Barometer Sports Writer

Dr. Karl F. Drlica, coach of the Oregon State crew team, came under attack last term when several members of his past crews wrote letters to the Daily Barometer's Fencing column charging Drlica with incompetence as a coach.

The letters, written by Tom Woodman and Steve Kelley, championship-winning OSU oarsmen, criticized Drlica's workouts, the style of rowing he teaches, Drlica's empathy towards his teams, and his general understanding of physical training.

"Locker rooms are full of people that know more than the coach," Drlica mused during yesterday's workout. The letters upset the coach at first but he is philosophical about them now.

He likens rowing to "a kind of fraternity" and says, "it kind of bothers you when you feel you are giving them (the rowers) something and then get something like this (the letters).

"But," he asks, "how did they get to be national champs? Everything was available to them here. They had the opportunity to be successful.

"There is an adage," smiled Drlica, "that says if the team loses, the coach did it — if the team wins, the players did it.

"They won and they are saying they did it."

Drlica feels that the letter writers should study a little history.

They claim that OSU crew was unknown until the last few years. Drlica points to a bulletin board that lists OSU crew champions dating back to 1961.

Another claim that the coach disputes is that his workouts are, as Kelley put it, "disorganized, inefficient, and without a long-term goal." Drlica maintains that, by their nature, practices must be flexible.

Weather conditions and mechanical breakdowns cause the best plans to go awry but, he stresses, the practices are not disorganized.

When asked about the alleged "high turnover rate" of the oarsmen, Drlica stated that it was no higher than any other sport.

Losses occur mainly because recruitment is aimed at OSU's general student body during fall term, he said, and "people find out that rowing isn't what they want to do.

"September is warm and balmy but in November it's cold and people not already dedicated find things they would rather do," he explains.

Charged with a "lack of empathy," Drlica remarks that he tries to remain objective.

"Personalities don't enter into it. If a person can make the boat go faster, he races. Sometimes you can't be very

sympathetic."

Both letters in the Fencing column accused Drlica of teaching a style of rowing that is obsolete. He says that is simply not true.

Drlica uses the style of Carl Adam, a man that he claims revolutionized rowing. Drlica has attended numerous clinics given by Adam. According to the Beaver coach, European teams utilize this style and are successful in beating American teams. "We must know something to be among the top three teams on the west coast," he grinned.

Drlica's coaching philosophy is unique. "I once took a psychology class where the professor, for the first few days of class, did nothing but sit in the back of the classroom," he recalled.

Half of the class dropped out, according to Drlica, because they were uncomfortable in an unstructured atmosphere. Finally, the psychology students started to express themselves, and that is what Drlica wants his teams to do.

The coach says that everyone on the team is involved in more than just racing. Many of the crew facilities were built by the team themselves.

Likewise, much of the fundraising is done by team members to buy new boats and equipment. The crew is a miniature "democracy," states Drlica, "and the heart of it is the students. There is always a risk that in giving them too much responsibility they will assume they know everything."

That is what caused the letters, Drlica thinks.

The letters have hurt the team, the coach admits.

He wishes the people that wrote the letters would have talked to him first. Then, perhaps, some good could have come out of it.

Smythe resigns football post

After one year as a coach at the major college level, Tom Smythe has decided to go back ... back to the high school coaching environment that was his "home" for seven years.

Smythe, who joined the Oregon State football staff as an assistant coach in August of 1978, has resigned his post here and will return to high school coaching in 1979.

After seven successful years at Lakeridge High School in Portland, where he compiled a 49-15-1 mark as head football coach, Smythe was invited by OSU coach Craig Fertig to join the Beaver staff to fill a vacancy that

presented itself late in the summer.

Smythe accepted, worked with the defensive unit during the '78 season, and was slated to be quarterback coach in the upcoming campaign before deciding to return to the prep ranks.

"My decision to leave OSU is based entirely on my desire to return to the secondary level," said Smythe. "I found that I greatly missed the teaching as well as the total involvement of the high school atmosphere."

Fertig is expected to name a coach to replace Smythe sometime this spring. Spring drills are slated to begin on April 12.
