MEMORANDUM

January 18, 1970

To: President Clark
From: *Jerry*
Gerald W. Bogen

I feel that minority groups on our campus need a legitimate cause-- something to complain about. This need is probably felt more acutely since their recent rejection of the "January 14 Coalition". They have now, I believe, found the issue which will be brought to our attention in the near future. Mr. Hollins, Mr. Hill, and Mr. de la Isla are all very concerned about the "lack of service" they have been receiving for the amount of money that has been brought into the University through the indirect costs on their Federal grants. For example, Chuck Hollins delights in referring to the University's collecting about \$3,000 for the depreciation of the Vets dorms. It is important to understand that the afore mentioned people do not question the need for indirect costs but they do feel the need to get "a piece of the action".

I feel that we should allow this matter to come to a head as these young men need to demonstrate their "macho". I do, however, feel that we should make an analysis of this indirect cost pattern, prior to these issues coming to our attention, so that if concessions can be made, we will have had full deliberation.

GKB:b
