

Nader's Raiders

Statement by
Robert D. Clark, President
University of Oregon
November 13, 1970

Any endeavor by university students which provides them a role for responsible citizenship should be widely applauded and supported. The Oregon Student Public Interest Research Group is, it seems to me, such an endeavor. I am, therefore, happy to endorse it. Whatever our other differences in this nation may be, we all are consumers of material goods and thus have a common cause in protecting consumer interests. If OSPIRG can make a constructive contribution toward that end -- as I believe it can -- I'm for it.
