General Palmer

Dear Sir when you were here last fall you requested me to administer medicine to Chief To and his family when sick since that time I have been called on by others for medical aid but in almost every case I have refused for the reason that I have had ^{no} assurance that I should get any compensation I have no objection to rendering them such medical aid as may ^{be} useful to them provided I can have an assurance from you that I shall be paid for it.

Suffer me if you please to inquire of you whether it is possible for you to make any arrangement by which money can be obtained to pay off the claims standing against the Indian funds for planting potatoes I know not the condition of others but as for my self I am suffering great loss for the want of my money I am now compelled to pay five per cent a month in consequence of not getting the money that is due me for what I did for the Indians last summer I hope you will find it convenient to pay over the money soon inasmuch as by doing it you will confer a favor that will be remembered.

By doing it you will enable me to release myself
from obligations to others from whom I bought seed
potatoes. They also need their money very badly and would
much relived by getting it

I hope you will favourably entertain
these requests and oblige me

Yours truly
Wm Miller

P.S. Please write immediately
