

Fertility and child mortality rates in India are estimated using indirect methods developed by William Brass and James Trussell. The estimates, which are for 1978 for the whole country and major states, are compared with data from the Sample Registration System. The results indicate a 1978 birth rate of 34.1 per 1,000, an underreporting of births and deaths for the period 1970-1975 of about 6 percent in the Sample Registration System, and a 1978 adjusted mortality rate of 14.5 per 1,000. The data also show a sharp decline in fertility in the first half of the 1970s, followed by a period of stabilization. The reverse situation occurred with mortality, with the sharp decline occurring at the end of the decade. *Location:* Princeton University Library (SPR).

A brief analysis of data from the 1980 census of Mexico is presented. Data are included on total population by federal entity, literacy by age group, educational status, and labor force. *Location:* World Bank, Joint Bank-Fund Library, Washington, D.C.

51:10090 *Jordan. Department of Statistics (Amman, Jordan). Population situation in Jordan: summary.* Mar 1984. 27 pp. Amman, Jordan. In Eng.

An analysis of demographic data available for Jordan up to 1983 is presented. The analysis takes into account preliminary data from the 1979 census. Separate sections are included on the history of population growth, fertility, family planning, mortality, geographic distribution, age and sex composition, education, the economically active population, housing, population projections, and population policy. *Location:* Columbia University, CPFH Library, New York, N.Y.

A review of demographic trends in Luxembourg in 1983 is presented. The most significant trend was a decline in the number of marriages to the lowest level since World War II. Topics covered include fertility, nuptiality and divorce, mortality, natural increase, migration, and adoptions. Selected vital statistics for the first six months of 1984 are also presented. *Location:* Princeton University Library (SPR).

51:10092 *Riley, Marvin P.; Satterlee, James L.; Crotchett, Deborah. South Dakota population: age and sex structure, 1970-1980. Update Series C229, No. 9, Mar 1984. 112 pp. South Dakota State University, Agricultural Experiment Station, Department of Rural Sociology, Brookings, S.Dak. In Eng.*

Data on the age and sex distribution of the population of South Dakota are presented for the years 1970 and 1980. The data, taken from published sources of the U.S. Bureau of the Census, are presented for South Dakota as a whole, state planning districts, counties, and urban places. Retrospective data for the period 1890 to 1970 are also included. *Location:* Princeton University Library (SPR).

"This report on the urban and rural population of Israel (including East Jerusalem) contains tables of selected demographic information including size of population, and estimates of fertility, mortality, and migration for the total country, urban, and rural areas. Specifically, annual estimates of total population, by sex and residence, are shown beginning in 1950." Projections for the period from 1982 to 2010 are also provided.

"Fertility measures shown in the report include crude birth rates, age-specific fertility rates, and gross and net reproduction rates. Mortality is shown in terms of crude death rates, life expectancies at birth, infant mortality rates, and other life table functions, by age and sex. Migration measures include the net numbers of migrants and age-sex specific migration rates for the international and internal components."

Summary information is included "on district and city population, marital status, and selected health measures. Other related items are included such as school enrollment and completion; literacy; labor force, by industry and occupation; and number and size of households." *Location:* Princeton University Library (SPR).

Selected results are presented from the 1981 census of India. Data are included on population size and growth, geographic distribution by state and union territory, population density, and urban population growth. Some comparative data from earlier censuses are also provided. *Location:* Princeton University Library (Maproom).
