

113972.

The author presents estimates of levels and trends of fertility and mortality in Honduras during 1950-1974. Data sources are discussed, and the results are classified according to the type of evidence used.

fertility, mortality, divorce, abortion, and migration and examines the effects of various socioeconomic factors on these trends.

1180 U.N. Economic Commission for Africa (ECA). Population Division. General Demography Section [Addis Ababa].

Population growth in Africa, 1970-2000. ECA/WP/PD/1980/2. Addis Ababa, [1980?]. Various pagings.

This document provides details of the most recent population estimates for 1970 and projections up to the year 2000 for the independent countries of Africa. The estimates have been prepared by the Economic Commission for Africa. The methodology and assumptions used in their preparation are described.

1181 U.N. Economic Commission for Western Asia (ECWA). Population Division [Beirut].

Estimates and projections of population, vital rates, and economic activity for members of the Economic Commission for Western Asia. Beirut, June 1978. 104 pp. In English and Arabic.

Data are included, for each country of the ECWA region, on total and urban population by sex for single years, 1968-1976; vital statistics for the two latest available years; population by age group and sex; labor force by age and sex; and labor force by sex, economic activity, and industry.

1185 O'Hare, W. P.

A note on the use of regression methods for population estimates. Demography (Washington) 17(3):341-343. Aug. 1980.

The author examines alternative methods for generating population estimates. In particular, the relative merits of the ratio-correlation and difference-correlation methods are assessed in light of recent studies.

1176 Robitaille, Norbert; and Bourbeau, Robert R.

Estimation de la population corrigée pour le sous-dénombrement par sexe et par âge, Québec, 1971 et 1976 [Estimation of the population when corrections are made for the under-enumeration by sex and age, Quebec, 1971 and 1976]. Cahiers Québécois de Démographie (Montreal) 9(1):87-104. April 1980.

The authors test the hypothesis that certain age groups in Quebec were under-enumerated in the Canadian censuses of 1971 and 1976. Corrected data are presented in graphic and tabular forms.

Birth rate and death rate in Bangladesh, 1951-74. Research Report, New Series, No. 28. Dacca, Bangladesh Institute of Development Studies, Aug. 1979. 25 pp. LC 79-906843.

The author provides estimates of birth and death rates in Bangladesh for the two intercensal periods 1951-1961 and 1961-1974 using the stable population analysis and census survival rate methods. The reasons for the apparent declines in fertility and mortality rates are analyzed.

1178 Smith, Stanley K.; and Lewis, Bart B.

Some new techniques for applying the housing unit method of local population estimation. Demography (Washington) 17(3):323-339. Aug. 1980.

"In this paper [the authors] discuss several new techniques [they] have developed for estimating households and the average number of persons per household. Estimates produced by these techniques are compared to estimates produced by several other techniques. Special census results from Florida provide preliminary evidence that the new techniques produce more precise, less biased estimates than the other techniques."
