

WATER PROJECT FOR TIKRIT

An ID 4 million contract has been signed between the General Establishment for execution of water supply and sewerage projects and an Austrian firm and the Iraqi Eastern Company for the construction of a water supply project in the city of Tikrit, Saladdin Province.

The projects, expected to be completed within 30 months, will supply 7.5 million gallons of drinking water a day.

It includes a large pumping station, eight 40 sq. m. concrete water purification basins, 3000 sq. m. underground water reservoir, another 1.5 million gallons 25-metres high water tank, and a number of houses.
