New Information Resources of the U.S. Geological Survey Library System

Number 86-400-A

January 1986

**U.S. Geological Survey
OPEN-FILE REPORT 86-400-A**

DEPARTMENT OF THE INTERIOR

U.S. GEOLOGICAL SURVEY

NEW INFORMATION RESOURCES OF THE U.S. GEOLOGICAL
SURVEY LIBRARY SYSTEM.

Open-file Report 86-400-A

This report is preliminary and has not been reviewed for conformity with the U.S. Geological Survey editorial standards.

1986

The U.S. Geological Survey Library System is pleased to re-institute a publication to alert you to recent additions to our collection of information materials. The list is a photographic reproduction of a printout from the On-Line Computer Library Center (OCLC) system, a national utility which allows libraries nationwide to share bibliographic data and materials. OCLC interfaces with the USGS Library System's LS/2000 mini-computer based system. There will be no editing of the list as it comes from OCLC.

In addition, please use the list as a tearsheet to request loan of materials from the Libraries. There is also a coupon for your use in making recommendations for additions to the collection.

If you wish to add to or delete from the mailing list, please send the name and address information to Bob Reed, Chief Cataloger, USGS Library System, MS 950, National Center, Reston, VA 22092. After the third issue, return of a coupon or a phone call will be required for continued receipt.

This first issue has been reproduced by a high quality process. Due to budget cuts, we cannot continue that expense, so subsequent issues will be prepared by photocopy.

We will run a news page, with items of interest to the user community across the entire Survey. From time to time, we will also have "thumb nail" profiles of our staff members.

Like all parts of the USGS, your Library System has been adversely affected by budget erosions and cuts. The loss of purchasing power forces us to make changes in the way we operate. Nevertheless, the entire Library System staff remains committed not only to maintain but to improve the quality and quantity of the research information which is our contribution to the USGS mission.

Elizabeth J. Yeates
Chief Librarian

NEWS ITEMS

On March 3, 1986, the 107th Anniversary of the formation of the Geological Survey, the Survey Library System will celebrate with a major transition ceremony by closing the Author/Title card file in the Public Catalog. The last card will be filed on that date in the Author/Title file, and from that time on, access will be by computer terminal through the LS/2000 automated system. This is a system-wide change. The Director of the Survey, the Chief Geologist, the Chief and Associate Chief of the Office of Scientific Publications, other officials, and library users are expected to participate in the reception at the Library System headquarters in Reston.

- - - - -
The USGS Library System will adopt the Library of Congress (LC) system for cataloging and classification of the collections.

The USGS Library System methodology for cataloging and classification has been in effect since 1904. However, resources adequate for the on-going development and operation of an independent system of analysis have not been available for some time, nor are they likely to become available in the Gramm-Rudman-Hollings environment. Conversion to the LC system will allow the USGS analysis staff to make greater use of records from the OnLine Computer Library Center (OCLC), a national bibliographic data base, as well as make USGS records more useful to other OCLC participants. It will also facilitate the USGS Library System in developing cooperative agreements for shared collection management with other major libraries; preliminary talks have occurred with the National Agricultural Library on this topic.

The LS/2000 on-line catalog has a searching capability which helps compensate for some lack of specificity in the subjects and classifications that will be assigned in the LC method.

Change-over will begin with monographs bearing a 1986 date of publication. After thorough study, categories of publications will be selected for retrospective conversion, the extent and rate depending upon funds available.

Bob Reed, Chief Cataloger of the USGS, will be the leader in developing and implementing the comprehensive action plan for the Library System's data base management program.

- - - - -
The serials collection has been comprehensively reviewed and nearly 300 subscriptions have been cancelled. A list of cancelled items is available in all libraries and is being updated.

Libraries in the Geological Survey Library System are located in the Eastern, Central, and Western Regions. Personnel whose duty station is other than Reston, Denver, Menlo Park or Flagstaff, may borrow items by completing an Accessions List Loan Request form and mailing it to the Survey Library in their Region if the item is available there or to the nearest Survey Library holding the item if it is not. Personnel whose duty station is Reston, Denver, Menlo Park or Flagstaff should continue to request items as they are accustomed to doing.

If a Library is unable to fill a request immediately because its copy of the item is charged out or otherwise unavailable for loan, the request will be forwarded to any Survey Library which may be able to supply a copy. If no copy is available for immediate loan, the requester's name will be placed on a waiting list and the publication dispatched as soon as it becomes available. Publications with a waiting list are loaned for two weeks only; those without are loaned for thirty days. If there is no waiting list, the loan period may be extended by contacting the lending library prior to the expiration of the loan period and requesting a renewal.

In filling out the Loan Request form, it is essential that requesters include their (1) Division/Office/Branch affiliation, (2) complete mailing address, and (3) phone numbers, both commercial and FTS. Typing or printing such information will help avoid unnecessary delays in processing requests. Loan Request forms will be found at the end of each List; they should be duplicated if additional copies are required. A separate form should be used for each item requested.

Questions regarding entries in the List or the information to be supplied on the Loan Request form should be referred to the Library located in the same Region as the requester's duty station.

<u>Eastern Region</u>	<u>Central Region</u>	<u>Western Region</u>
Reston Library (703) 860-6671	Denver Library (303) 234-4133	Menlo Park Library (415) 323-8111, ext. 2207
FTS 928-6671	FTS 234-4133	FTS 467-2207

		FTS 765-7008

Suggestions and comments about this service are welcome and should be sent to:

Chief Cataloger
U.S. Geological Survey Library
950 National Center
Reston, Virginia 22092

Additional explanation beyond that provided by the preceding examples seems appropriate.

Each entry consists of the following components which always appear in the order given: (1) Principal subject heading, always capitalized; (2) Main entry, which may be a personal author, corporate author, or title; (3) Title (if the main entry is either a personal or corporate author); (4) Imprint; (5) USGS call no., always located in the lower left and the last component in each entry.

The call number on catalog cards normally consists of two or more lines of a combination of letters and numbers, arranged in the following manner:

G(253)
F46
v.37
no.4
D,MP

In the Accessions List the same number appears in a straight line. There are no spaces to show where the call no. lines are broken on the catalog cards: G(253)F46v.37no.4D,MP

Call numbers prefixed with "M" indicate item is part of the map collection.

Call numbers prefixed with "R" indicate item is part of the Library's Reference collection. These items normally do not circulate.

Capital letter suffixes denoting which libraries (D = Denver, MP = Menlo Park, and F = Flagstaff), other than Reston, hold a particular item, follow the call no. and are set off from it by a space. Please note that no letter suffix is employed for Reston, which should be understood to hold the item unless otherwise indicated. In the call no. above, the Reston, Denver, and Menlo Park libraries each have this item.

If a library, other than Reston, is the sole holder of an item, the suffix statement will reflect that fact; for example: F only.

Occasionally an item will not be assigned a call no., receiving instead an alpha abbreviation, such as PAM = pamphlet or MICRO = microform. In such entries, that designation occupies the space normally set aside for the call no. When completing the Loan Request form, alpha abbreviations should be recorded on the call no. line.

HYDROLOGY--RESEARCH--SOVIET UNION--ADDRESSES, ESSAYS, LECTURES.

Ispol'zovanie metoda vodnogo balansa v gidrologicheskikh issledovaniĭakh.
Leningrad : Gidrometeoizdat, 1985.
780(570) R92t vyp.296

HYDROLOGY--SIBERIA, EASTERN--ADDRESSES, ESSAYS, LECTURES.

Voprosy gidrologii BAM. Leningrad : Gidrometeoizdat, 1983.
780(570) R92t vyp.290

HYDROLOGY--SOVIET UNION--ADDRESSES, ESSAYS, LECTURES.

Vliĭanie khoziaistvennoi deiatel'nosti na vodnye resursy i
gidrologicheskii rezhim. Leningrad : Gidrometeoizdat, 1984.
780(570) R92t vyp.291

HYDROLOGY--SOVIET UNION--RESEARCH.

Slaughter, Charles W. Kolyma Water Balance Station, Magadan Oblast,
Northeast U.S.S.R. : United States-Soviet scientific exchange visit.
Hanover, N.H. : Corps of Engineers, U.S. Army, Cold Regions Research and
Engineering Laboratory, [1977]
P(200) DS5ssr no.77-15

HYDROLOGY--SOVIET UNION--VALDAI HILLS--ADDRESSES, ESSAYS, LECTURES.

Eksperimentalnye gidrologicheskie issledovaniĭa na Valdae. Leningrad :
Gidrometeoizdat, 1983.
780(570) R92t vyp.289

HYDROLOGY--STATISTICAL METHODS--ADDRESSES, ESSAYS, LECTURES.

Statisticheskie metody v gidrologii. Leningrad : Gidrometeoizdat, 1983.
780(570) R92t vyp.294

HYDROLOGY--SWEDEN--BALTIC COAST--COMPUTER PROGRAMS.

Engqvist, Anders. Water turnover in Himmerfjard 1977 : a simulation study.
Norrköping, Sweden : Swedish Meteorological and Hydrological Institute,
1984.
P(583) qM467r no.38

HYDROLOGY--UNITED STATES--PERIODICALS.

Water fact sheet. [Reston, Va.] : The Survey.
R (200) W288fs

HYDROLOGY--WASHINGTON (STATE)--YAKIMA RIVER WATERSHED.

Molenaar, Dee. Water in the lower Yakima River Basin, Washington.
[Olympia] : State of Washington, Department of Ecology, 1985.
780(284) W28 no.53

IDAHO--GEOLOGY--CARIBOU MOUNTAIN REGION--MAPS.

Huntsman, John R. Geologic map and cross sections of the Caribou Mountain
Area, southeastern Idaho. Reston, Va. : U.S. Geological Survey, 1985.
M(283)2 C192h -- M(200)4 vUn3mf no.1715 -- M(200) MF no.1715

IDAHO--GEOLOGY--SEVEN DEVILS MOUNTAINS.

LeAnderson, P. James. Geology of the Wallowa-Seven Devils volcanic (island)
arc terrane between the Snake and Salmon Rivers near Lucile, Idaho : pt. 1.
Stratigraphy, structure, and metamorphism. [Denver, CO] : U.S. Geological
Survey, 1985.
(200) R29o no.85-611 D MP

IDAHO--MINERAL RESOURCES.

Developments in minerals, mining, and energy resources in Idaho for 1982.
Moscow : Idaho Dept. of Lands, Bureau of Mines and Geology, 1983.
(283) T226 no.83-7

IMAGING SYSTEMS IN ASTRONOMY--CONGRESSES.

Indirect imaging : measurement and processing for indirect imaging :
proceedings of an international symposium, Sydney, Australia, 30 August to
2 September 1983. Cambridge ; New York : Cambridge University Press, 1984.
036.5 In3

INDIA--GEOLOGY--JAMMU AND KASHMIR--CONGRESSES.

International Workshop on the Late Cenozoic Palaeoclimatic Changes in Kashmir
and Central Asia (1982 : Ahmedabad, India). Climate and geology of
Kashmir, the last 4 million years : proceedings of the International
Workshop on the Late Cenozoic Palaeoclimatic Changes in Kashmir and Central
Asia, Ahmedabad, 19-23 October 1982. New Delhi : Today & Tomorrow's
Printers and Publishers, 1985.
201(640) In8c

INDIANS OF NORTH AMERICA--CALIFORNIA.

Heizer, Robert Fleming. The California Indians : a source book. 2d ed.,
rev. and enl. Berkeley : University of California Press, 1971.
