CONTENTS

		<u>Page</u>
I.	INTRODUCTION	1
II.	SUMMARY OF DISCUSSIONS	3
III.	RECOMMENDATIONS	=
IV.	WORKING PAPERS	I
A.	<u>Evolution, Extent and Economic Land Classification of Salt Affected Soils</u>	
Paper 1	1. Evolution of soil salinity, alkalinity and waterlogging Prof. V.A. Kovda	7
Paper 2	2. Present and potential salt affected soils - an introduction Dr. I. Szabolcs	9
Paper 3	3. Economic land classification for the prevention and reclamation of salt affected soils Mr. W. Peters	15
B.	<u>Factors to be considered for Prognosis</u>	
Paper 4	1. Natural factors Dr. W. H. van der Molen	31
	2. Man-made factors:	
Paper 5	a. Water management and salinity Dr. Jan van Schilfgaarde	53
Paper 6	b. Assessing the suitability of water for irrigation: theoretical and empirical approaches Drs. J. D. Rhoades and S.D. Merrill	69
Paper 7	c. Soil management and agronomic practices Dr. F.I. Massoud	111
C.	<u>Methods of Prognosis and Monitoring</u>	
Paper 8	1. Soil and hydrologic surveys for the prognosis and monitoring of salinity and alkalinity Drs. I. Szabolcs, G. Varallyay and K. Darab	119
Paper 9	2. Soils and hydrologic surveys Dr. K. W. Flach	131
Paper 10	4. Use of satellite imagery for salinity appraisal in the Indus Plain Mr. M. Rafiq	141

	5.	Laboratory and field characterizations	
Paper 11	a.	Laboratory analyses of soils related to the prognosis and monitoring of salinity and alkalinity Dr. K. Darab	147
Paper 12	b.	Measuring, mapping and monitoring field salinity and water table depths with soil resistance measurements Dr. J.D. Rhoades	159
Page 13	c.	La morphologie des sols affectes par le sel, reconnaissance et prevision - surveillance continue Dr. G. Aubert	187
Paper 14	d.	Survey methods for performance, monitoring and prognosis of natural vegetation and economic crops with special reference to salt affected soils Dr. I.S. Zonneveld	195
Paper 15	6.	Modelling of salt movement through the soil profile Dr. H. Laudelout	213
	D.	<u>Tentative Guidelines</u>	
Paper 16	1.	Interpretation of quality of water for irrigation Dr. R.S. Ayers	221
Paper 17	2.	Predicting soil salinization, alkalization and waterlogging Dr. A. Monem Balba	241
V.		WORLD MAP OF DESERTIZATION	
	A.	Discussion paper on the preparation of the World Map of Desertization with particular reference to salinity/alkalinity problems Mr. P.J. Mahler	253
	B.	Draft Report of an FAO Expert Consultation on the Preparation of a World Map of Desertization	257
ANNEX 1		Agenda	265
ANNEX 2		List of Participants	267
