

# PRINCIPLES OF WATER LAW AND ADMINISTRATION

*National and international*

DANTE A. CAPONERA

A.A. BALKEMA / ROTTERDAM / BROOKFIELD / 1992

# Table of contents

ACKNOWLEDGEMENTS	XIX
CHAPTER 1: INTRODUCTION	1
1 Water and the society	1
2 Need for a water policy, legislation and administration	2
3 Interdisciplinarity of the subject	4
4 Physical context	5
4.1 The hydrologic cycle	5
4.2 Definition and analysis of precipitation	5
4.3 Analysis of the flow	6
4.4 Weather modification	6
5 Socio-economic context	7
5.1 Water demand	7
5.2 Water pricing	8
5.3 Externalities	8
5.4 Cost analysis	9
6 Purpose of the book	9
References	9
CHAPTER 2: EARLIEST WATER REGULATIONS AND MANAGEMENT	11
1 Importance of water regulations throughout history	11
2 Difficulty of studying early water regulations	12
3 Development of earliest water law principles	13
4 Ancient Egyptian water regulations and management	14
4.1 Earliest dynasties (3400-2650 BC)	14
4.2 Later dynasties (2650-300 BC)	14
5 Ancient Mesopotamian water regulations and management	15
5.1 Historical development	15
5.2 The Hammurabi Code	15
5.3 Subsequent codifications	16
5.4 Detailed water regulations	17

## VIII Principles of water law and administration

6	Ancient Hindu water regulations and management	18
6.1	General Hindu legal system	18
6.2	The water regulations in the Code of Manu	19
7	Ancient Chinese water regulations and management	20
7.1	Introduction	20
7.2	Water regulations	20
7.3	Basic principles	21
8	Hebrew water regulations and management	21
8.1	Introduction	21
8.2	Importance of water	22
8.3	Water law principles	22
8.4	Conclusion	23
9	Pre-Columbian water regulations and management	23
9.1	Coastal Peru (Inca)	23
9.2	Meso-America (Maya-Aztec)	24
10	Other early systems of water regulations and management	24
11	General conclusion	25
	Notes	25
	References	27

## CHAPTER 3: ROMAN AND INTERMEDIATE PERIOD 29

1	Introduction	29
2	Roman water law principles	30
2.1	Origins and Regal period (1000-500 BC)	30
2.2	Republican period (509-27 BC)	30
2.2.1	Classification and ownership of water	31
2.2.2	Right to use water	32
2.2.3	Protection from harmful effects of water and control on waterworks and structures	33
2.2.4	Water administration	33
2.3	The Principate (27 BC-286 AD)	34
2.3.1	Classification and ownership of water	35
2.3.2	Right to use water	36
2.3.3	Protection of existing water rights: The interdicta	37
2.3.4	Protection from harmful effects of water and control on waterworks and structures	38
2.3.5	Water administration	39
2.4	The Absolute Monarchy or Late Empire (286-565 AD)	40
2.4.1	Classification and ownership of water	41
2.4.2	Right to use water	42
2.4.3	Protection from harmful effects of water and control on waterworks and structures	43
2.4.4	Water administration	43
3	Intermediate water law principles in Europe (565-1812)	43
3.1	First period (fifth century AD-1158)	43

18			
18	3.1.1	Introduction	43
19	3.1.2	Principles of water law under Roman-Barbaric rule	45
20	3.1.3	The feudal system	45
20	3.1.4	Water law principles under the feudal system	46
20	3.2	Second period (1158-1812)	46
21	3.2.1	Introduction	46
21	3.2.2	Classification and ownership of water	47
21	3.2.3	Right to use water	48
22	4	Intermediate water law principles in Ibero-America	48
22	4.1	Early legal principles	49
23	4.2	Water regulations	49

		<b>CHAPTER 4: DEFINITION AND SOURCES OF WATER LAW</b>	<b>55</b>
	1	Introduction	55
	2	Content and concept of water law	55
	3	Relationship between water law and other legal disciplines	57
	3.1	Constitutional law	57
	3.2	Administrative law	57
	3.3	Civil law	57
	3.4	Criminal or penal law	57
	3.5	Agrarian law	57
	3.6	Mining law	58
	3.7	Natural resources and/or environmental law	58
	3.8	Public health law	58
	3.9	Other legal disciplines	58
	4	Sources of water law	58
	5	Legislation in general	59
	6	International and interstate agreements	60
	7	Customary law	61
	8	Case law and arbitral awards	62
	9	Doctrine or scholarly opinion	63
	10	Common law	64
	11	Conclusion	64
		References	64
		<b>CHAPTER 5: EXISTING SYSTEMS</b>	<b>65</b>
	1	Introduction	65
	2	Original Roman water law principles and their influence in subsequent legislation	65
	3	Customary water law: Its importance	66
	4	Water law principles in the Islamic system	68
	4.1	Introduction	68
	4.2	Origin and sources of Islamic water law	69
	4.3	Water ownership and right of use	69

X Principles of water law and administration			
4.4	Groundwater law	70	
4.5	The process of codification and the Ottoman Civil Code 'Mejelle'	71	
4.5.1	The Ottoman Civil Code 'Mejelle'	71	
4.5.2	Legal status of water	71	
4.5.3	The right to use water	71	
4.5.4	Maintenance of waterways	71	
4.5.5	The <i>harim</i>	72	
4.6	Islamic water administration	72	
4.6.1	Customary water administration	73	
4.6.2	Recent developments in the administration of water	73	
4.7	Government action in Moslem countries	74	
5	Water law principles in civil law countries	74	
5.1	Introduction	75	
5.2	The legal status of water resources	75	
5.3	The right to use water	77	
5.4	Water quality and pollution control	77	
5.5	Water administration	78	
5.6	Conclusion	79	
6	Water law principles in common law countries	79	
6.1	Introduction	80	
6.2	The legal status of water resources	80	
6.3	The right to use water	81	
6.4	Water quality and pollution control	82	
6.5	Recent developments of the common law system	83	
6.6	Water administration	84	
7	Water law principles in the former Soviet system	84	
7.1	Fundamentals of socialist water law	84	
7.2	Legal status of water	84	
7.3	The right to use water	85	
7.4	Order of priorities	86	
7.5	Harmful effects of water	86	
7.6	Water quality and pollution control	87	
7.7	Enforcement	87	
7.8	Centralized inventory and planning	87	
7.9	Water administration	88	
7.10	Evolution and trends	88	
8	Water law principles in the Hindu <i>subak</i> system of Bali	88	
8.1	Legal-historical background	89	
8.2	Definition and origin	89	
8.3	Organization	89	
8.4	The legal status of water resources	90	
8.5	The right to use water	90	
8.6	Order of priorities	91	
8.7	Water quality and pollution control	91	
8.8	The water distribution system	92	
8.9	Financial aspects	92	
8.10	Water law implementation	92

	CHAPTER 6: DEVELOPMENT BY REGION	97
	1 Africa	97
	1.1 Introduction	97
	1.2 Customary law	97
	1.3 Countries following principles of the civil law system	98
	1.4 Countries following principles of the common law system	99
	1.5 Countries following principles of other systems	100
	1.6 Countries influenced by principles of the Islamic water law system	100
	2 Asia and the Pacific	102
	2.1 Introduction	102
	2.2 Countries following principles of the civil law system	102
	2.3 Countries following principles of the common law system	103
	2.3.1 Australia	103
	2.3.2 Bangladesh	103
	2.3.3 India	104
	2.3.4 Sri Lanka (Ceylon)	104
	2.3.5 Other countries	104
	2.4 Countries following principles of other systems	104
	2.4.1 People's Republic of China	105
	2.4.2 Japan	105
	2.4.3 The Philippines	106
	2.4.4 Other countries	106
	2.5 Water administration	107
	3 Central and South America	108
	3.1 Introduction	109
	3.2 Central and South American water law principles	109
	3.2.1 Latin American countries	109
	3.2.2 Other countries of Central and South America	109
	3.3 Legal status of water resources	110
	3.4 The right to use water	110
	3.5 Order of priorities	111
	3.6 Legislation on water use, quality and pollution control	111
	3.7 Water administration	112
	4 Europe	113
	4.1 Introduction	113
	4.2 Legal status and right to use water	113
	4.3 Water quality and pollution control	114
	4.4 Institutional framework	115
	4.4.1 Federal states	116
	4.4.2 Unitary states	117
		118

XII Principles of water law and administration

4.4.3 States undergoing a process of decentralization	120	
4.4.4 Basin level		11
5 United States of America	121	
5.1 Introduction	122	
5.2 Federal water law principles	122	
5.3 State water law principles	123	
5.3.1 Riparian water law	125	
5.3.2 Appropriation doctrine	126	
5.3.3 Groundwater management	127	
5.3.4 Conjunctive use of surface and underground water	129	12
Notes	130	13

	132	
CHAPTER 7: POSSIBLE CONTENTS OF AND REASONS FOR WATER LAW	133	
1 Introduction	133	
2 The contribution of the lawyer	134	
3 General considerations	134	14
4 Water policy	134	15
5 Collection and use of information	136	16
6 Water resources planning	136	17
7 Ownership or other juridical status of water	137	18
7.1 Public waters	138	
7.2 Private waters	138	
7.3 <i>Res nullius</i>	139	
7.4 Common waters: Community or tribal waters	139	
7.5 Conclusion	139	
8 The right to use water	139	
8.1 Basic concepts	140	
8.2 Legal régimes governing the right to use water freely or by virtue of a simple declaration/registration	140	19
8.2.1 Free use of water	140	20
8.2.2 Declaration/registration	141	21
8.3 The permit system	141	22
8.3.1 Applicability	141	
8.3.2 Different types of permit	142	
8.3.3 Procedure for granting permits	143	
8.4 Characteristics of permits and concessions	143	
8.4.1 Difference between permits and concessions	143	CHA
8.4.2 Common characteristics of permits and concessions	144	
8.5 Recognition or reallocation of pre-existing water rights	144	1 7
8.5.1 Customary and riparian rights	144	2 0
8.5.2 Rights under the appropriation doctrine	145	3 7
8.5.3 Powers of the administration	145	4 1
8.5.4 Reallocation of water	146	5 1
9 Limitations to the right to use	146	6 1
10 Priorities	147	6 0

120	11 Beneficial uses	148
121	11.1 Water and other natural resources	148
122	11.2 Domestic and municipal uses	148
122	11.3 Agricultural uses	149
123	11.4 Industrial uses	149
125	11.5 Hydropower production	149
126	11.6 Other public uses	150
127	11.7 Conclusion	150
129	12 Harmful effects of water	151
130	13 Water quality and pollution control	151
130	13.1 Waste and misuse of water	152
132	13.2 Recycling, re-use of water and recharging of aquifers	152
	13.3 Wastewater and effluent control	152
133	13.4 Health preservation	152
	13.5 Pollution control	153
133	13.6 Environment protection	153
134	14 Underground waters	153
134	15 Control and protection of waterworks and structures	154
136	16 Protected zones/areas	154
136	17 Legislation on financial aspects	155
137	18 Implementation of water legislation	156
138	18.1 General remarks	156
138	18.2 Judicial and administrative control over water ownership, use and distribution	157
139	18.3 Protection of individual rights and water rights	157
139	18.4 Administrative procedures for claims against the water administration	158
139	18.5 Water tribunals or courts	158
140	18.6 Penalties and sanctions	158
140	19 Interconnection between water law and other legal enactments relevant to water law	159
140	20 Customary water law and institutions	159
140	21 Water users' associations	160
141	22 National water resources administration	160
141	Notes	160
141	References	160
142		
143		
143	CHAPTER 8: WATER RESOURCES PLANNING AND WATER LAW	161
144	1 The rationale of water planning	161
144	2 Objectives of a water resources plan	162
144	3 Types and characteristics of plans	163
145	4 Relationship between water planning and economic and social sectors	165
145	5 Methods for planning processes	165
146	6 Relevant administrative and institutional issues	166
146	6.1 Administrative and institutional issues	166
147		

XIV Principles of water law and administration

6.2 Other factors contributing to a better administration and planning of water resources

CHAPTER 9: NATIONAL WATER RESOURCES ADMINISTRATION

1 Introduction	169
2 Different types of water administration	169
2.1 Institutions according to their powers	170
2.2 Institutions according to their functions	170
2.3 Institutions according to uses	171
2.4 Institutions according to their territorial level of jurisdiction	171
2.5 Institutions according to their legal régime	172
2.6 Special water development agencies	172
2.7 Water users' associations	173
3 Major issues of water resources administration	174
3.1 The need for coordination	174
3.2 The question of centralization, decentralization and deconcentration of the water administration	175
3.3 The water rights administration	176
3.4 The need for a water resources 'regulatory' institution	176
3.4.1 Definitions	176
3.4.2 Major objectives and functions of a regulatory institution	177
3.5 The role of water law in institution building	178
4 A possible institutional solution	178
4.1 Institutions at the national level	178
4.1.1 A national water resources council	179
4.1.2 A national water committee or commission	179
4.1.3 A central water administration	179
4.2 Institutions at the regional, basin, sub-basin and local levels	180
4.2.1 At the regional, basin or sub-basin levels	180
4.2.2 At the local level	180
4.2.3 At the international level	180
4.3 Conclusion	181
Notes	181
