

IRANIAN AND AFGHAN  
CALENDARS

There are two solar calendars, ancient and modern (Hijra-i-Shamsi), which correspond roughly, i.e., within three or four days, with each other and with the Christian dates given below:

<u>Ancient</u>	<u>Modern</u>	<u>Christian</u>
Farvardin	Hamal { 31)	21 March - 20 April
Ardibihisht	Saur { 31)	21 April - 21 May
Khurdad	Jauza { 31)	22 May - 21 June
Tir	Saratan { 32)	22 June - 23 July
Murdad	Asad { 31)	24 July - 23 Aug.
Shahriwar	Sumbula { 31)	24 Aug. - 23 Sept.
Mihr	Mizan { 30)	24 Sept. - 23 Oct.
Aban	Akrab { 30)	24 Oct. - 22 Nov.
Azur	Kaur { 30)	23 Nov. - 22 Dec.
Dai	Jadi { 29)	23 Dec. - 20 Jan.
Bahman	Dalv { 30)	21 Jan. - 19 Feb.
Isfandarmuz	Hut { 29)	20 Feb. - 20 Mar.

The Hijra-i-Kamari (lunar Hegira year) began originally on June 16, 622, with the months of Muharram, Safar ..... Rajab, Shaban, Ramazan, Shawwal, etc., but the months travel around the year. 32 solar years equal 33 Muhammadan lunar years, so 1 Muharram 1311 was 15th July 1893, difference of 582 rather than 621 years.

The solar Hijra year can be calculated for Iranian and Afghan purposes as follows:

Before March 21	1950 - 622 = 1328
After March 21	1950 - 621 = 1329
Before Dai or Jadi	1329 - 621 = 1950
After Dai or Jadi	1329 - 622 = 1951
