We announce the addition of

MR. WILLIAM L. FINLEY JR.

to our professional staff

J. P. FINLEY & SON MORTICIANS

The People

A RARE PROGRAM

To the Editor of The Journal-News:
There are so many interesting and rare programs offered in Ithaca that many times really extraordinary offerings are overlooked. Next Monday evening in Baker Laboratory William L. Finley is bringing his Alaska pictures, including those of the great brown bear of Alaska, the largest carnivorious animal in the world.

I have had the pleasure of seeing these films many times and cannot help calling their attention to all those who are interested in American Big Game, in extraordinary animal photography, and in the scenery of some of the most beautiful parts of the American continent. I think these pictures of Mr. Finley's will always rank among the finest of wild life ever taken, and anyone who misses his lecture is, I am sure, overlooking a rare treat.

ROBERT E. TREMAN.

Lecture-Film Tonight
At Bushnell Memorial
On 'Alaskan Wild Life'

"Alaskan Wild Life and the Kodiak Bear" is the topic of the lecture-film which William L. Finley, noted American naturalist, will present at the Horace Bushnell

WILLIAM L. FINLEY.

Memorial Hall tonight at 8:15 o'clock at the second event of the Bushnell Motion Picture and Lecture Course.

ture Course.

This evening Mr. Finley will be guest of honor at a dinner to be given by Mr. and Mrs. Philip Hansling, Jr., of 65 Sherman Street, and will stay over night at the Hansling home. Other guests will include Mr. and Mrs. Thornton Burgess; Dr. and Mrs. Joseph E. Root and Mr. and Mrs. Hollis F. Church of South Windsor.

William Lovell Finley, Vice-President of J. P. Finley & Son and well-known naturalist, has transferred his membership in the club to Wm. L. Finley, Jr. Bill, Jr., is no stranger to us as he has attended many of the meetings with Bill, Sr., and F. A. Kenny, Associate Manager of Finley's. Welcome to our organization.

FINLEY TO SHOW ANIMAL PICTURES

'Alaskan Wild Life, Kodiak Bear' to Be Subject of Address by Explorer

William L. Finley, noted explorer who is to lecture on "Alaskan Wild Life and the Kodiak Bear" in the main lecture room of Baker Laboratory Monday evening, has taken some remarkable motion pictures which he will use to illustrate his talk.

While on expeditions into British Columbia and Alaska, Mr. Finley not only took movies of the interesting Kodiak bear, but he also obtained some excellent shots of the whales of the region. One of the most spectacular pictures he has ever taken shows two whales "breaching"—jumping far into the air in play and landing on their backs with tremedous impacts. This was the first time that a 50-foot whale had ever been photographed leaping from the water.

Johnson Commends Films

The famous African explorer and photographer, Martin Johnson, who has seen Finley's films, commends especially the unusual fishing scenes and the pictures of the bears, "Mr. Finley," he says, "has handled the Alaskan atmosphere and scenery in a most professional and interesting manner." On numerous islands off the Alaskan Coast, Mr. Finley also filmed many species of birds, especially those that live in large colonies.

In his 20 seasons of travel and adventure, he has produced more than 200,000 feet of motion picture film and over 25,000 still-life negatives, the most remarkable record of American wild life pictures ever made.
