

THE
FIELDING-WALES COMPANY
709 UNION BUILDING
CLEVELAND

Dear Mrs. Warner:

It was very kind of you to send us a notice of the Memorial to Murray at The University of Oregon; but a shame that we could not be there. Sam showed me a small part of the collection when I was in Eugene in 1927. I remember some of the robes and draperies of the Ming Dynasty. One of our few luxuries is membership in the Cleveland Art Museum at \$10.00 annually. Jane has shown a little skill in art -- at rare intervals very marked -- and we are endeavoring to see whether or not this is great enough for her to become an industrial or advertising artist. Jane takes a free art course at the Museum. Her greatest talent is in English and public speaking. So we are "pushing" her as much as we think we should in these ways. She is thirteen and a half and a dear girl.

There are a number of things which come to mind about Murray. One, when Perkins Bass and I met him at the station in Chicago about 1914. His comment as we were walking down the street was, "Well, it's interesting how speedily Chicago can put its' stamp equally on two individuals." I did not entirely comprehend then just what that remark meant, -- but I do now. At that time I'd been there only two years. -- Then, he sent me a very nice letter before my marriage saying he was pleased I was soon to begin living a real and complete life.

You soon will be on your way to England and I hope you will have a very pleasant and restful trip.

Helen and Jane are in Vermont but will be back here shortly.

With best wishes,

Your friend,

July 28, 1933

Arthur S. Greeley

THE UNION BUILDING
CLEVELAND

Dear Mrs. Bennett

It was very kind of you to send me a notice of the opening of
the new building at the University of Toronto and I am glad that we could
not be there. I remember as a small part of the collection
which I saw in London in 1917. One of our last letters in the
discovery of the King's discovery. One of our last letters in the
discovery of the King's discovery at 210,000 annually. I am
now given a little ball in the -- at your invitation very warmly
-- and we are endeavoring to see whether or not this is great
enough for you to become an industrial or scientific center.
I am sure a time will come at the museum. The greatest talent
is in England and this country. We are "looking" but we
must be in order to think in these ways. We are looking and
a ball and a ball.

There are a number of things which seem to give about thirty
and some things which seem to give about thirty
about 1914. His comment as we were walking down the street was
"Well, it's interesting how quickly things can be done."
I did not entirely understand him
I am sure that your means. -- but I do not know if that time is
I am sure that your means. -- but I do not know if that time is
I am sure that your means. -- but I do not know if that time is
I am sure that your means. -- but I do not know if that time is

You need not be in your way to England and I hope you will have
a very pleasant and useful trip.

Kind and love are in Toronto but will be back here shortly.

With best wishes,

Your friend,
