A Column On Columns

By HOWARD DOUGLASS

We've been wondering for some time just how to go about writing a column on columns. There really isn't anything that can be done NEW BUDGET OFFERED about suggesting an approach, although columns continue to be as New York until the recent "bumping-off" of one of the progenitors of the glorified speakeasy-cabaret.

Just what is a column? I've been wondering for some time. Is wit to show off to the reading pubup, or is it a space in which current questions should be discussed editorial-fashion? I confess, I don't

There are columnists and columnists, just as there are columns and columns. There's the Walter Winchell and the Arthur Brisbane types. There's the so-called humor columns of the "Senator Soaper" sort which satirically discuss present-day happenings. There's the daily syndicated letter by our cowboy-humorist Will Rogers, a homelily written two or three paragraphs giving a common citizen's views on what he reads in the Foster, shows that on January 12, knows.

business, no matter how private, is made public property-but that's a lis. foolish question, of course you would, the urge for knowledge, no matter how unsavory, is natural with most of us. However, columns can also discuss current, political, economic and social problems a la Brisbane, just as well as Win- Communication Held chell and O. O. McIntyre can dig in the dirt, although McIntyre's column "New York Day by Day" is as clean a gossip column as

Then there's the heart-throb column-Dorothy Dix, Cynthia Grey Marian Miller and all the rest of them-dealing out advice to the sick of heart, the lovelorn, the unhappy. They fill a big niche in modern journalism, at least 'most every paper carries one of them.

Larger publications carry society columns through which the more common readers are informed of the gay whirl of social activities with which the ultra set of the city amuses itself. These serve a definite purpose since they offer a form of escape of the hoi polloi. It's evident from the way in which the feminine members of a family look first at a society section in a Sunday edition. They want to read what Mrs. So-and-So did, what she wore, who were there and-if there's any gossip about the exclusive ones, you can bet your Sunday-go-to-meetin's that the society columnist will include it.

Well, just where has this gotten us? I'm still as muddled as before, except that I know that the column is an essential part of modern journalism. Perhaps that's all there was to learn anyway.

SATURDAY, DEADLINE FOR PICTURE APPOINTMENTS

Students who want their picture in the Beaver must schedule their appointment at Ball's studio before the end of this week, says Marvin Davidson, editor.

Pictures portraying student life and activities will also be accepted by the staff. Snapshots taken at unusual angles are very effective in making an attractive campus life section and are particularly desirable, according to Davidson.

Secrets of Motion.

I am the physics building. Within my somber walls lies the knowledge of science. I have the secrets of motion and the stories of machines. From my roof rise the tow ers of human communication. From my classrooms come the engineers and scientists of tomorrow, who, bent with the knowledge I have given them, trudge forth into the world showing people why things go as they do.

It is just because of such human indifference to the things I have to teach, that I receive as little attention as I do. If people were to wish to understand things, to want to know why things are as they are, then, would I rise in my glory and overshadow my neighbors. They are inconsequential. Without my knowledge they could not have been built. yet do they show me the respect that is due me? No! I am merely the mines building. Ah, but the day will come when my importance will be recognized. Then, will I assume the part that has long been awaiting me, but which needed only the recognition of these things called men to make it real.

NATIONAL HONOR SOCIETY WILL SELECT STUDENTS

The outstanding freshman of last year's class in chemical engineering who will receive the prize given each year by Phi Lambda Upsilon, national honor society in ehemistry, will be selected tonight at the regular meeting of the society. The name of the student will be announced and the prize awarded at an open meeting early in February.

Timothy Coleman, president of the organization, announced that room 218, Memorial Union building had been set aside for the use of Eta Kappa Nu. Tau Beta Pi. lon, engineering honor society. A analyzed his case and advised him for a person to get the important a cabinet for records.

POSTAL SERVICE NOW PROVIDED BY CO-OP

cilities for Campus

vides postal weighing and mailing

There has been a very definite need for such a service on the campus, according to Paul Irvine, manager of the Co-op.

It enables students and faculty members to mail letters and packages, insure packages, obtain stamps of all denominations and purchase American Railway Express money orders at the Co-on numerous as night clubs were in Limited Expenditure for Gift The book store offers all the services of a postal sub-station with the exception of registering letters and C.O.D. packages.

Parcel post and mail is dispatched to the Corvallis postoffice daily at 8, 1 and 5:30 o'clock. Many (Continued on Page Four)

STUDENTS SUMMONED BY CAR COMMITTEE

Campus Parking Rules Misunderstood, Broken, by **Twelve Violators**

Twelve students were summoned before the car committee at the regular meeting yesterday for violations of the rules regarding the use of cars on the campus. Misunderstanding on the part of the students was given as the major reason for the violations.

Students having square stickers granting permission to drive on the campus for special reasons should park cars only in recognized parking spaces and should inform themselves of the location of these places, according to the committee. Several cases were heard involving the improper location of parked cars and in other cases students did not seem to know the extent of the campus boundaries.

The student owner of a car is responsible for the location of the car, although someone else may be using it, and will be held liable when the car is operated on the campus, according to a decision handed down by the car committee. Some students who were called before the committee seemed to "When we have the right physi- feel that because they knew the ceive the values that are inherent cal education program in the high officer, they should not have been mittee desires to clear these erroneous ideas and states that any-

Here and Moscow . . .

At Moscow university in Russia, 10,000 students were recently released owing to "overcrowding of the universities and lack of funds to support the students." "Improper social status and poor scholarship" were the technical grounds for ousting the students.

Compare this with conditions in higher education in America or to bring it closer home, in Oregon. Here one finds students feeling that they are unfortunate in attending a school in a state where higher education is unsettled. They worry about the reductions in the funds of higher education; 212. All members and anyone inthey fret about the lack of school spirit; they fear for the terested are urged to attend as new future of the schools; they bother themselves with problems of no consequence; they do all this when they ought to consider themselves fortunate in attending school at all. They ought to be glad that they are not one of the 10,000 students in Moscow who when removed from the schools are classed as "socially undesirable" elements and sent to lumber camps.

It all leads to the thought that no matter how hard the struggle for an education may seem at times students in present. America today do not go through the trials that students in some foreign countries face nor do they have half the troubles experienced by the builders of education in America. the "Y" room at 5 o'clock. They ought to be content and make the best of the opportunities presented them instead of complaining because they are not better .-- W.A.R.

The "Flu" Menace . . .

Everyone has it, or has had it, or is expecting it. It has taken on the average of one day's effectiveness out of 2,000 7:30 o'clock in pharmacy 303. Elecstudents—20,000 student working hours at 25 cents each. Shades of Brewster and his millions—the one extravagance of the depression—it is the "flu."

The medical men say that it is a combination of inclement weather and the "flu" bug itself, which brings on the epidemic. Well, the old weatherman has never shown himself to be open to negotiations, but there is something all students can do. They can attack those "flu" germs as soon as they reach them, and do a great deal to prevent the spread of the virulent little "bug" among all their associates.

There is an efficient health service at Oregon State college which all have paid for but not all have used. They can stop undue spread of the "flu" epidemic by securing immediate treatment at the health service when the first unhealthy rattles start rolling in their throats.—P.A.B.

FIRST SUBTROPICAL "AGGIE" COLLEGE TO OPEN

Occupying the structure shown above, on the campus of the University of California at Los Angeles the first agricultural college majoring in subtropical horticulture will be inaugurated in February. Besides laboratories and class rooms it will be equipped with an experimental orchard containing many exotic fruits such as figs, olives, loquats, jujubes, feijoas, guavas, cherimoyas macadamias and white sapotes. Prof. Robert Hodgson, at right, will head the faculty. (Associated Press Photos)

Moro Station Proves Beneficial to Farmers

Sitting beside me with eyes like of a series of articles concerning a stuffed deer is the West Coast the work of the central and branch in the Columbia river basin. experiment stations.)

> The Sherman branch experiment tation at Moro, established in 1909 by the state legislature, has to its credit accomplishments that are actually saving farmers, or adding to their incomes, hundreds of thousands of dollars annually.

Emphasis has been placed on the esting and improvement of wheat varieties, but outstanding results have also been obtained in cereal breeding, fertilizer, tillage, crop rotation and crop residue investiga-

The purpose of the Moro branch station, as defined by the legisla ture, is "to investigate and demonstrate the conditions under which iseful plants may be grown in dry, arid or non-irrigated lands of the state of Oregon and to determine the kinds of plants best adapted for growth on these lands." In accordance with the demands of the agricultural problems peculiar to the Columbia river basin, the following investigations are carried on at the Moro station:

Yield Increased Hundreds of grain varieties are being tried in nursery rows. The

PULLEY'S Shoe Shop 336 North Tenth

(Editor's note: This is the last | nursery method is also used to test in the Columbia river basin. The superior varieties from the nursery trials are further tested in field plots. Improvement work with cereals

ncludes pure-line selection and hybridization to increase yield, improve quality and increase resistance to smut. Several specialized strains or physiologic forms of stinking smut have been found in the northwest and the breeding work for smut-resistance has now entered a new phase-that of determining the behavior of these specialized strains on resistant wheats and the making of new hyorid combinations to produce desirable varieties resistant to most or all forms of smut. Several new early - maturing winter wheats which have shown promise in nursery trials have been advanced to field-plot trials. An early-maturing wheat with enough hardiness to be safely sown in the fall in the Coumbia basin will increase yields and reduce hazards from drought.

Rotation Tried Eighteen years' results with winer wheat have proved that time of plowing for fallow and manner of fallow cultivation have a marked nfluence on both yield and quality of winter wheat. Early spring plowing averages a yield of 27.2 bushels an acre compared with 21.9 bushels for late spring plowing. Depth of plowing influences yields only slightly. Thirty rotation systems are being tried. These include the growing of spring and winter wheat, barley, field peas, corn and potatoes in various sequence.

Orangemen Can Win Conference Crown

Through intricate manipulation of the mathematical laws of cancellation-thus, pretzel and cheese -(or cancels) one bottle of beerand find that Oregon State can win the northern division of the pacific coast conference basketball crown this season. This took quite some time but we find that it is not necessary to play our cards too close to the belt to make it come out in favor of the "Orange."

Here are the present northern division standings:

	W.	L.	Pct.
Washington	5	1	.833
Wash. State	6	3	.667
Oregon State	5	3	.625
Idaho	3	4	.625
Oregon	0	8	.000
And have are	the	ove	

which these teams have yet league leading position. to play:

Washington—2 with Idaho; 2 with Oregon State; 4 with Washington State; 2 with Oregon.

Washington State-4 with Washington; 3 with Idaho. Oregon State - 2 with

Washington; 2 with Idaho; 4 with Oregon. Idaho—3 with Washington State; 2 with Washington; 2 with Oregon; 2 with Oregon

with Idaho.

you through the remainder of each not been all it should have been in slowly the first two games but team's schedule, showing you just earlier games. how we figure this arrangement In the first eight games this may be settled, by the cancellation method, and thereby will disprove the point not adequately proved by Mr. Gregory of the Morning 12 markers per contest but now Oregonian, yesterday, when he made the assumption that respective titles of the northern and southern divisions of coast conference were in the bag for Washington and Southern California.

Starting with Washington-Washington will split its two-game series with Idaho as the Vandals are coming fast now. This was proved to our satisfiction when they took Washington State by 20 points and stopped Oregon twice. Washington meets Idaho at Moscow-do not disregard that point. Washington will split with Oregon State. That's readily understandable as the teams split here and Washington was lucky to get that much out of it.

Washington will split with Washington State. We believe that the Cougars have a better ball club entered school here, he had been but the Huskies will be tough to beat at Seattle. Washington will of E. L. Spivey of Portland. Spivey, undoubtedly take two from Oregon at Seattle. And that finishes Washington with 11 wins and 5 losses.

Washington State, next in line, will split with Washington and should take two ou tof three from Idaho. This is giving the Cougars plenty of room against the Vandals and they'll be lucky to pull through but we'll give them better than an even break. That leaves Washington State with 10 wins and 6 losses.

will split two games with Washon his feet. ington, will take two from Idaho and will take four from Oregon. a great number, but in six starts game, Kappa Delta Rho took the from Idaho at home for they did and lost a close, hard-fought deci- pa Sigma overcame the lead and at Moscow and certainly should be sion to Freddie Lynch of Multno- won, 21 to 19. The second game able to dump Oregon for four, de- mah Athletic club of Portland. showed the points more evenly dispite the old jinx baloney, for the Webfoots are hopelessly out of the in 1932 and national champion in 18 points and then Kappa Sigma running this season. This puts the 1931. Beavers in the lead with 12 wins and 4 losses.

Idaho, coming fast, will split losses two games with Washington and will lose two to Oregon State. Al- when the conference closes though Washington took the Vandals plenty at Seattle we believe that Idaho will be a bit too tough at Moscow. The Vandals will take about it: one and lost two to Washington State and will split two games with Oregon. That gives Idaho 6 wins and 10 losses.

Oregon, cellar tennants, and the only team on the coast that hasn't won a game, will lose four to Oregon State, two to Washington and will split with Idaho, having a clos- Patronize Barometer Advertisers

COMPLETE ROUND

First Intercollegiate Match Completed; Score 3608

Scoring a total of 3608 out of a possible 4000 points the Oregon State rifle team completed their first intercollegiate match of 1933 last Saturday.

Hervey Ide led the scoring for the locals with 368 out of a possible 400, with Maurice Shepard, runner-up, with 367.

The match was fired against the ollowing colleges and universities Michigan M. and T., Presbyterian college. Montana State college. ornell university, Wyoming university, Minnesota university, New York university, Norwick university, New Mexico A. and M., Cornell Institute of Technology, Woffard college, Pasadena Junior college, New Hampshire university and Porto Rico.

The scores were low, according to Major Mapes, due to the adverse conditions under which the men had to fire. Comparatively higher

scores are expected this week. The results of the matches at the various schools will be distributed by mail or telegraph and will be announced as soon as they are received and compiled.

HANDBOOK COMMENDED

FOR BIG GAMES

Southern Branch Youngsters and Beaver Babes Will Play This Weekend

With three more practice sesions before the opening games of the frosh series, the rook basketball quintet has started on its final game will be played in Eugene Sat-

ooks' game, as the stiff play against the varsity has given the rook club a fast checking combination. While the rook quintet has not dropped a game, the babes from the south have lost three of their six games.

Offense plays have been the as the quintet depends on its fast Coach Lamb and Joe Mack have given the rook club practice in this sort of play and expect to see the Orange babes use set offensive plays Friday night.

HURRAH! ROOKESS

Rook lids-green ribbons-sopho more cotillions-senior mustaches-All those are alike in this respect: they are traditions. Undoubtedly they originated many years ago. but to the mind of a "lowly" rookess, age enhances rather than make a custom an object of scorn.

If we take away one tradition, others will be broken down. Deny rooks green lids, and they will be sure to "sprout" mustaches and wear cords. That is not a threat; it is a prophecy.

As for green ribbons, you try get mine away from me! There may be grumbling on the surface. I'll admit that ribbons are a bother on wet days. And even in good weather they are liable to be riding on one ear. But, getting away rom those trivial annoyances you'll find that the rookesses are proud of the bit of green that shouts to the world-"Here is a reshman at O.S.C.!

Instead of making rooks and rookesses look green, as the original idea may have been, the lids The story becomes very much and ribbons really show how far nonchalance which surpasses even that of seniors with mustaches in

If colleges are going to become chools minus traditions, I'll reform correspondence school -- C.M.

Budget Proposed A budget of the year's expenses from now until graduation is proposed by Foster as follows: 30 item could be applied on the class

This leaves a surplus of \$627.51 which divided among 400 seniors would make possible a payment of \$1.50 on each senior's can and gown and would make possible obtaining them for one dollar. Plan Supported

Foster believes that the seniors have created the surplus, and that all should get this refund to lower the cost of graduation. He reports that many campus leaders are in favor of the plan.

During a period of depression it gift which would be creditable to the class and still cost a nominal amount, he believes.

lion with a formal dinner at the chapter house, members and pledges of Sigma Phi Sigma entertained the following guests with Mr. and Mrs. Bert Christensen as patron and patroness:

Miss Melissa Martin, Helen Smyth, Clara Shank, Nadine Millhollen, Betty Glaisyer, Helen Scruggs, Betty Jelinek, Marian Beezley, Lucile Smith, Dorothy Atwood and James Martin.

6 o'clock means nothing to telephone service!

Bell System service must go on all the time. Day and night, Sundays and holidays, it must handle with speed and accuracy not only the usual traffic but also the unexpected rush of calls.

To meet this obligation, Bell System men tackle problems of many kinds. At Bell Telephone Laboratories, scientists develop new kinds of apparatus. At Western Electric, engineers find ways to make telephones, switchboards and cable more and more reliable. In the telephone companies, traffic engineers devise improved operating methods that make service faster, more accurate, more dependable.

Result: at noon or in the dead of night, the public reaches confidently for the telephone, knowing that Bell System service never stops.
