

GENERAL CATALOG

2014-2015

Oregon State
UNIVERSITY

Please note:

Custom copies of the *OSU General Catalog* may be printed by going to <http://catalog.oregonstate.edu/>. Go to the section you want a hard copy of and click the Print Version icon and follow the subsequent instructions.

Or to print out a PDF of a printed version of the *OSU General Catalog*, go to the the online catalog link above and click on Archives of Catalogs & Schedules of Classes, then click on OSU Archives of General Catalogs in PDF.

OSU Printing and Mailing offers printed catalogs via a print-on-demand service. To order, visit <http://printmail.oregonstate.edu/>.

Other sources of information about Oregon State University include the *Summer Term Planning Guide*, distributed by the Summer Session Office and online at <http://summer.oregonstate.edu/>; and the *Viewbook*, available through the Office of Admissions. All of these bulletins are free.

The address for all campus offices:

541-737-1000

Admission information: 541-737-4411

Published by Oregon State University, Registrar's Office,
B102 Kerr Administration Building, Corvallis, OR 97331-2130.

CATALOG YEAR POLICY**Graduation Requirements/Catalog Contract Policy**

When determining the graduation requirements for a given student:

- Students must meet all applicable degree requirements from the published catalog(s).
- The student's catalog year for institutional and baccalaureate core requirements is established by his or her first term of attendance (matriculation date) at Oregon State University as an admitted student.
- The student's catalog year for college/major/option/minor requirements is based on the date of declaration of the major/option/minor; consequently, a student's first (primary) major/option must be in the same catalog year. If a primary option is declared in a subsequent academic year, the primary option will be aligned with the catalog year of the primary major. If the primary option did not exist in the catalog year of the primary major, the primary major will roll forward to the catalog year of the primary option.
- Additionally, while the student's first major/option must be in the same catalog year, any additional declarations of majors/options/minors will be determined by the declaration dates (and corresponding catalog years) established by the change of academic program process. A student, in collaboration with an advisor, can also choose to graduate under a subsequent (to their most recent major declaration date) catalog year within the same major/option.
- At the time of graduation, all students, including transfer students, must use a catalog that is not more than ten years old. Students may petition to the head advisor of their college for an extension of a catalog greater than ten years prior to their expected graduation term.
- Current OSU policy requires a student to reapply after not enrolling at OSU for four consecutive terms (not including summer terms); the published catalog for the

resulting readmission/matriculation date will become the catalog of record for graduation requirements. The Planned Educational Leave Program defined in AR 13.d beginning with the 2011–2012 academic year, provides a mechanism for a student to sustain their original catalog of record during a planned absence.

- For Degree Partnership Program students, the first term the student is admitted to OSU will be the matriculation date and will determine the catalog year for institutional and baccalaureate core requirements. The catalog year for college/major/option/minor requirements will be the same as all other OSU students.
- Every effort has been made to ensure the accuracy of information in the OSU General Catalog. However, Oregon State University or the Oregon State Board of Higher Education may find it necessary from time to time to make changes in courses, curricula, or degree requirements. Students already admitted to a program in which such changes have been made will be reasonably accommodated, if possible, to ensure their normal progress toward a degree. A student may, however, still be required to conform to changes in courses, curricula, or degree requirements as deemed necessary by Oregon State University or the State Board of Higher Education.

Note: OSU is on a term (quarter credit) system. When transferring in course work from semester system institutions, multiply the number of credits by 1.5 to see how many quarter credits will be transferred (3 semester hours x 1.5 = 4.5 quarter credits). If you are planning to transfer OSU credits out to a semester system institution, multiply the number of quarter credits by .67 to find out how many credits will transfer (4 quarter credits x .67 = 2.68 semester credits).

OSU'S POLICY REGARDING UNAUTHORIZED PEER-TO-PEER (P2P) FILE SHARING AND OTHER COPYRIGHT INFRINGEMENT**Institutional policies and sanctions related to the unauthorized distribution of copyrighted material:**

The University takes copyright infringement seriously. As set forth in the Acceptable Use of University Computing Resources policy (located at <http://oregonstate.edu/aup.htm>), all students must abide by federal and state copyright laws when using University computing or network resources. The unauthorized publishing or use of copyrighted material on the University computer network is strictly prohibited and users are personally liable for the consequences of such unauthorized use. This specifically applies to Peer-to-Peer or P2P file-sharing of copyrighted music and movies. Students should be aware that by engaging in unauthorized sharing of copyrighted material, they not only violate University policy, but they may also be held criminally and civilly liable by federal and/or state authorities.

Under current copyright law, criminal cases of copyright violation carry a penalty of up to five (5) years in prison and a \$250,000 fine. Civil penalties for copyright infringement include a minimum fine of \$750 for each work. Oregon State University will subject students who violate this policy to discipline as appropriate. For a first-time violation of this copyright policy, students are required to pass a copyright quiz within 72-hours or else their network access is disabled. Repeated infringement is subject to disciplinary action by the Office of Student Conduct and Community Standards, up to and including expulsion from the University.

Catalog Coordinator: Larry M. Bulling

Meeting the Needs of Oregon—and the World

Focusing on its current strengths and future potential, Oregon State University fosters exceptional educational, research, and outreach initiatives that sustain human well being and improve the quality of human life. Acting on this imperative requires understanding diverse, complex interactions among population, demographics, human health, climate, access to natural resources (including safe food, clean water and air, and wood products), sustainability, economic vitality, cultural diversity, and new technologies, among others. Well-being and quality of life are likewise enhanced by the fine and performing arts and the humanities and social sciences, which promote understanding and improvement in human interactions within and across cultures.

A successful response to this imperative requires OSU to meet two commitments: 1) OSU will lead in develop-

ing a globally competitive workforce and an informed and capable citizenry; and 2) OSU will address multifaceted national and global challenges that resist simple technical or social solutions.

Three Signature Areas of Distinction, informed by the university's two commitments, provide OSU a competitive edge, a stronger assertion of institutional identity nationally and internationally, and the greatest possible opportunity to have a positive impact throughout the state, nation and world. These three areas are:

- Advancing the Science of Sustainable Earth Ecosystems
- Improving Human Health and Wellness
- Promoting Economic Growth and Social Progress

Students Come First

- **OSU is committed to diversity.** Our students come from all walks of life and from all over the world. And they enter Oregon State with the highest high school GPA of any school in the Oregon University System.
- OSU offers a full range of **scholarships, grants, work-study, and loans** from federal, state, and university sources. We will help you get the best possible financial aid package.
- **OSU CONNECT**, a five-day orientation program before the start of fall term, helps students adjust to campus life. Activities include new student convocation, welcome receptions, interactive workshops with students and professors, and many other educational and social activities geared toward connecting new students to the university and Corvallis.
- Our **First-Year Experience** program helps new students transition into university life. A variety of small-group experiences are offered (such as OSU U-Engage, a student orientation course) to connect first-year students to faculty, current OSU students, and other new students.
- The **University Exploratory Studies Program** allows students to explore a variety of disciplines before choosing an academic major.
- Our **Intercultural Student Services office, cultural centers, and Educational Opportunities Program** work with African American, Hispanic American, Asian American, and Native American students to ensure that their OSU experience is positive.
- Oregon State is the only college or university in the state that offers **ROTC programs** for all four services—Air Force, Army, Marines, and Navy.
- With more than **300 student organizations, plus club, intramural, and Pac-12 Conference sports**, students find it easy to keep busy at OSU.

OSU's Campus—Is the State of Oregon

- The **OSU Extended Campus** office offers an extensive range of distance education services and bachelor's degree programs throughout Oregon.
- The **OSU Extension Service** provides services in all 36 Oregon counties.
- Corvallis is an ideal **university town** of 54,000 people, offering a wide range of community, religious, dining, shopping, and cultural opportunities. And the city is just an hour or two from the **Oregon Coast, the snow-capped Cascade Mountains, and Portland**—Oregon's largest city.

MISSION

Preamble

Oregon State University is a comprehensive, public, internationally recognized research university. As one of only two land, sea, space and sun grant universities in the country (Cornell being the second), OSU offers programs and employs faculty and staff in every county of the state. OSU views the state of Oregon as its campus, and works in partnership with all of Oregon’s community colleges and the state’s public and private colleges and universities to serve Oregonians’ educational needs.

Mission

As a land grant institution committed to teaching, research, and outreach and engagement, Oregon State University promotes economic, social, cultural and environmental progress for the people of Oregon, the nation and the world. This mission is achieved by producing graduates competitive in the global economy, supporting a continuous search for new knowledge and solutions, and maintaining a rigorous focus on academic excellence, particularly in the three Signature Areas:

Advancing the Science of Sustainable Earth Ecosystems; Improving Human Health and Wellness; and Promoting Economic Growth and Social Progress.

Vision

To best serve the people of Oregon, Oregon State University will be among the Top 10 land grant institutions in America.

Goals

1. Provide outstanding academic programs that further strengthen performance and pre-eminence in the three Signature Areas of Distinction: Advancing the Science of Sustainable Earth Ecosystems; Improving Human Health and Wellness; and Promoting Economic Growth and Social Progress.
2. Provide an excellent teaching and learning environment and achieve student access, persistence and success through graduation and beyond that matches the best land grant universities in the country.

3. Substantially increase revenues from private fundraising, partnerships, research grants, and technology transfers while strengthening our ability to more effectively invest and allocate resources to achieve success.

Core Values

Accountability. We are committed stewards of the loyalty and good will of our alumni and friends and of the human, fiscal, and physical resources entrusted to us.

Diversity. We recognize that diversity and excellence go hand-in-hand, enhancing our teaching, scholarship, and service as well as our ability to welcome, respect, and interact with other people.

Integrity. We practice honesty, freedom, truth, and integrity in all that we do.

Respect. We treat each other with civility, dignity, and respect.

Social responsibility. We contribute to society's intellectual, cultural, spiritual, and economic progress and well-being to the maximum possible extent.

FALL 2014

Priority registration:

Phase 1, Sunday, May 18, 2014

Phase 2 with wait listing, June 5–October 5

START: Summer advising and registration program for new undergraduates. Requires paid \$200.00 advance tuition deposit.

Off-Campus Students:

Alaska, June 6; California, June 14–15; Hawaii, June 21

On-Campus First-Year Students:

June 23–24; June 26–27; July 7–8; July 14–15; July 17–18; July 21–22; July 24–25; Aug. 25–26
(START Bilingüe), June 29–30

On-Campus Transfer Students:

July 1; July 11; July 23; Aug. 27

Continuing registration and course add/drop with wait listing,

June 5–October 5

Verification of enrollment begins,

September 19

OSU Connect:

New student fall orientation,
International students: Sept. 22

First Year & Transfer students: Sept. 24

CONNECT events:

Sept. 25–28

Classes begin, Monday, September 29

Late registration begins (\$50 late fee assessed),

Monday, September 29

Last day to add a class by Web without departmental approval,

Sunday, October 5

Tuition bills emailed to ONID accounts,

October 5, due October 31

Second week adds by Web with departmental approval,

October 6–10

Audit registration period

(Requires instructor approval; tuition and fees assessed), October 6–10

Deadline to Apply Online for Graduation (Fall Term),

October 10

Last day to drop a class by Web,

11:55 p.m., Friday, October 10

Last day to register or add a class by Web

(Requires departmental approval), 5 p.m., Friday, October 10

Late registration fee increases to \$100,

October 14 through December 5

Last day to change to or from S/U grading

(Requires approval of academic advisor/dean), 5 p.m., Friday, Nov. 14

Last day to withdraw from a course by Web.

(W grade entered on transcript) 11:55 p.m., Friday, November 14

Thanksgiving Holiday

(University holiday), November 27–28

Last day for total withdrawal from the university

(W grade for each registered course), 5 p.m., Friday, December 5

Dead week,

December 1–5

Finals week,

December 8–12

End of term,

Friday, December 12

Final grades due in Registrar's Office,

5 p.m., Monday, December 15

MyDegrees not refreshing, Dec. 15–16

Verification of enrollment begins, June 24

(Session 6) Inter-session/Zero-week, June 15–June 19

(Session 1) 11-week session, June 22–Sept. 4

(Session 2) First 4-week session, June 22–July 17

(Session 3) 8-week session, June 22–Aug. 14

Deadline to Apply Online for Graduation Degree Audit (Summer Term),

July 3

Holiday: Independence Day,

July 3 (Friday; no classes)

(Session 4) Second 4-week session, July 20–August 14

(Session 5) 3-week session, Aug. 17–Sept. 4

Holiday: Labor Day,

Sept. 7 (Monday)

OSU is on a Term (Quarter Credit) system.

When transferring in course work from semester system institution, multiply the number of credits by 1.5 to see how many quarter credits will be transferred (3 semesters x 1.5 = 4.5 quarter credits). If you are planning to transfer OSU credits out to a semester system institution, multiply the number of quarter credits by .67 to find out how many credits will transfer (4 quarter credits x .67 = 2.68 semester credits).

Academic Advising

OSU recognizes that quality academic advising is integral to the academic development and well-being of students. Quality academic advising includes both the prescriptive elements of advising (assisting with course selection, maintaining curriculum checklists, tracking degree progress and completing degree audits, etc.) and the developmental aspects of advising (major and career decision making, integration in campus and academic cultures, assistance with and referrals surrounding issues affecting a student's academic success, etc.).

While each college has developed an advising system sensitive to the needs of its academic disciplines and departments, there is consistency in that each also has a head advisor. Undeclared students receive advising through the University Exploratory Studies Program (UESP).

Vision

Oregon State University aspires to be recognized nationally for excellence in academic advising among land grant institutions.

Mission

Oregon State University academic advising is a teaching and learning process dedicated to student success. Academic advising engages students in developing a plan to realize their educational, career and life goals.

Values

The values associated with OSU advising are closely aligned with the stated values of the university.

Accountability: We are committed to providing timely, accurate, and intentional advising.

Diversity: We honor the unique nature and interests of each student. Advising services and delivery methods will be shaped to fit the diverse needs of our campus populations.

Respect: We seek to establish a reciprocal relationship with students based on an ethic of care and shared responsibility.

Social Responsibility: We foster a culture of independent thinking and global awareness so that students make informed, socially responsible choices consistent with their academic, career and life goals.

Integrity: We seek to engage students in a fair and professional process of meaningful self-reflection and authentic inquiry.

Goals

OSU academic advising reflects the institutional goal of excellence in teaching and learning that is focused on student success. We will...

- Continually assist students in understanding the nature, purpose and potential of higher education.
- Ensure that students have access to knowledgeable and informed advisors who demonstrate care and respect.
- Mentor students as they explore and clarify their values and educational and life goals.
- Provide accurate information about educational opportunities, requirements, policies and procedures.
- Collaborate with students on the development and implementation of academic plans and educational experiences congruent with their interests and abilities.
- Communicate regularly with students to monitor and evaluate their educational progress.
- Teach students to utilize university resources to maximize their unique educational and personal potential.
- Improve university-wide academic advising via an ongoing assessment program.

Academic Advising

Academic advisors assist you in long- and short-term academic and career planning. They provide information on curricula, educational and experiential options within your college and the university, schedule planning, and help interpret university and departmental requirements.

The following are tips from academic advisors to assist you in getting the most out of your academic advising appointment.

- Know who your academic advisor is.
- Meet with your academic advisor on a regular basis.
- Schedule your academic advising appointment well-ahead of Phase I registration.
- Prepare for your advising appointment.
- Utilize MyDegrees advising tool, your major advising guide, the OSU Baccalaureate Core guide.
- Understand the Academic Regulations.
- Abide by the academic calendar deadlines.
- Take responsibility for learning your degree requirements.
- Understand the advisor/advisee responsibilities.
- Utilize advising technology.

UNIVERSITY OVERVIEW

Oregon State University provides diverse educational opportunities through the undergraduate and graduate programs of its 11 colleges and one school. Academic choices include studies in scientific, technological, interdisciplinary, and professional as well as liberal arts fields. A land grant, sea grant, space grant, and sun grant university with beginnings in the 1850s, OSU is now home to more than 28,800 undergraduate, graduate, and first professional students, representing about 90 countries, every state in the nation and every county in the state of Oregon.

In addition to its regular educational programs, the university is responsible for Oregon's Land Grant mission of research, education, and outreach. OSU Extension Service delivers educational programs in all of Oregon's 36 counties, reaching out to communities with programs as diverse as Master Gardeners, 4-H, and community leadership. Working in collaboration with Extension Service faculty, the researchers in Oregon's Agricultural Experiment Station conduct scientific, social, and economic research at 11 branch stations at 15 locations across the state, including one of the nation's only urban experiment stations, the Food Innovation Center in Portland.

Oregon State University Ecampus provides learners with access to an OSU education no matter where they live. Ecampus offers accredited courses and degree programs online and at various sites throughout the state of Oregon. There are currently 16 undergraduate degree programs, 19 undergraduate minors and 17 graduate programs being delivered online and at a distance. The Ecampus website is <http://ecampus.oregonstate.edu>.

In addition to these extended campus opportunities, OSU has established a dual enrollment Degree Partnership Program (DPP) with all 17 Oregon community colleges and several others in Hawaii. With the degree partnership-dual enrollment programs, students may take classes at both institutions simultaneously. Students complete just one application, pay one application fee, and have the freedom to select courses from either institution's schedule of classes. The DPP website is <http://oregonstate.edu/partnerships>.

OSU's educational partners include all Oregon community colleges, Eastern Oregon University, Oregon Center for Advanced Technology Education, Oregon Health and Science University, Portland State University, Southern Oregon University, University of Idaho, University of Oregon, and Washington State University.

The OSU-Cascades branch campus in Bend, Oregon—the first branch campus

in the state—began offering undergraduate and graduate degree programs fall term 2001 in partnership with Central Oregon Community College. OSU offers 15 undergraduate degree programs, three graduate degree programs, and 12 different minors. Students enroll, register, and pay tuition fees at OSU-Cascades, but earn a degree awarded by Oregon State University. In 2015, OSU-Cascades will become a full four-year branch campus of OSU and will begin enrolling freshmen and sophomores in a broad range of undergraduate programs. The OSU-Cascades website is www.osucascades.edu.

ACCREDITATION

Oregon State University is accredited by the Northwest Commission on Colleges and Universities. The university is authorized to offer baccalaureate, master's, doctorate, and first professional degrees, as well as undergraduate-, postbaccalaureate-, and graduate-level certificates. The Northwest Commission on Colleges and Universities reaffirmed the accreditation of Oregon State University in Spring 2011. The next comprehensive evaluation is scheduled for 2018. The accreditation includes the College of Pharmacy.

In the **College of Agricultural Sciences**, the Rangeland Sciences program is accredited by the Society for Range Management. The Department of Food Science and Technology's curricula are approved by the Education Committee of the Institute of Food Technologists. The Agricultural Education major is accredited by the National Council for Accreditation of Teacher Education (NCATE) and the Oregon Teacher Standards and Practices Commission (TSPC).

In the **College of Business**, the Business Administration programs (undergraduate and graduate) are accredited by the Association to Advance Collegiate Schools of Business—International.

The **College of Education** programs are accredited by the National Council for Accreditation of Teacher Education (NCATE) and the Oregon Teacher Standards and Practices Commission (TSPC) for the preparation of elementary and secondary teachers. The graduate program in Counseling is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

In the **College of Engineering**, the Bachelor of Science degrees in Bioengineering, Chemical, Civil, Ecological, Electrical and Computer, Environmental, Industrial, Manufacturing, Mechanical, and Nuclear Engineering baccalaureate programs are accredited by the Engineering Accreditation Commission of the ABET, Inc. 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; 410-347-7700. The Construction Engineering

Management program is accredited by the American Council for Construction Education. The Bachelor of Science degree in Computer Science-Computer Systems option is accredited by the Computing Accreditation Commission of the ABET, Inc. 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; 410-347-7700. The Bachelor of Science degree in Radiation Health Physics is accredited by the Applied Science Accreditation Commission of the ABET, Inc. 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; 410-347-7700.

In the College of Forestry, BS degrees in Forest Management, Forest Operations Management, Forest Engineering, and Forest Engineering-Civil Engineering are accredited by the Society of American Foresters (SAF). In addition, the BS degree in Forest Engineering and the BS double degree in Forest Engineering-Civil Engineering are accredited by the Engineering Commission of ABET, www.abet.org. The BS degree in Renewable Materials is accredited by the Society of Wood Science and Technology (SWST).

In the **College of Liberal Arts**, the Music Education MAT degree program is accredited by the National Council for Accreditation of Teacher Education (NCATE) and by the Oregon Teacher Standards and Practices Commission (TSPC).

The **College of Pharmacy's** PharmD program is accredited by the Accreditation Council for Pharmacy Education (ACPE). The college also offers Community Pharmacy Residencies jointly accredited by the American Society of Health Systems Pharmacists and the American Pharmacists Association.

In the **College of Public Health and Human Sciences**, the Athletic Training major is accredited by the Commission on Accreditation of Athletic Training Education. The Dietetic option in the Nutrition major is accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics, as is the transcript-visible post-baccalaureate Dietetic Internship. The graduate Physical Education Teacher Education licensure program is accredited by the Council for the Accreditation of Educator Preparation and the Oregon Teacher Standards and Practices Commission. The Health Management and Policy undergraduate program is certified by the Association of University Programs in Health Administration and the Master of Public Health program is accredited by the Council on Education for Public Health. In Human Development and Family Sciences, the Human Services option is accredited by the Council for Standards in Human Services Education, and the OSU Child Development Center in Bates Hall is

accredited with the National Association for the Education of Young Children (NAEYC). HDFS participates in a double degree program in Early Childhood/Elementary Education that is accredited through the College of Education's teacher education programs. The Double Degree pathway includes all the course work and field experiences necessary to qualify for an Oregon Initial Teaching License granted by the Teacher Standards and Practices Commission (TSPC).

In the **College of Science**, the Bachelor of Science in Chemistry Track One is approved by the American Chemical Society and has two options: advanced biochemistry and advanced chemistry.

The **College of Veterinary Medicine's** DVM program is accredited by the American Veterinary Medical Association: Council on Education. In addition to the DVM degree, the Veterinary Diagnostic Laboratory is accredited by the American Association of Veterinary Laboratory Diagnosticians, and the Small Animal Teaching Hospital is accredited by the American Animal Hospital Association.

Student Health Services is accredited by the Accreditation Association for Ambulatory Health Care and is a member of the American College Health Association. The Student Health Services Laboratory is accredited by the Commission on Office Laboratory Accreditation (COLA).

The university's **Counseling and Psychological Services (CAPS)** office is accredited by the International Association of Counseling Services, Inc., and the pre-doctoral training program at CAPS is accredited by the American Psychological Association.

The Oregon State University **Institutional Animal Care and Use Program** is fully accredited by the **Association for Assessment and Accreditation of Laboratory Animal Care, International (AAALAC)**. AAALAC accreditation is recognized world-wide as the gold standard for animal research programs. OSU's participation in the rigorous AAALAC accreditation process demonstrates a campus-wide commitment to humane and responsible animal use in research, instruction and testing and dedication to excellent science. This institutional accreditation encompasses all OSU sites where university-owned animals are housed or maintained, including the College of Agricultural Sciences, the College of Veterinary Medicine, the Eastern Oregon Agricultural Research Centers, the Hatfield Marine Science Center, the Oregon Hatchery Research Center, the Laboratory Animal Resources Center and the entire campus research enterprise.

The Academic English and General English programs at **INTO OSU** are ac-

credited by the Commission on English Language Program Accreditation (CEA) for 5 years from August 2013. **INTO OSU** agrees to uphold the CEA Standards for English Language Programs and Institutions. CEA is recognized by the U.S. Secretary of Education as a national accrediting agency. For further information about this accreditation, please contact the Commission on English Language Program Accreditation, 801 N. Fairfax St., Suite 402A, Alexandria, VA 22314, 703-665-3400, www.cea-accredit.org

For further information, visit <http://oregonstate.edu/admin/aa/apaa/accreditation/nwccu-institutional-accreditation>.

HISTORY OF OSU

Founded in 1858 as a small, private academy called Corvallis College, Oregon State University has developed into a major teaching, research, and public service institution.

College-level courses were introduced into the curriculum about 1865, and two men and one woman fulfilled the requirements for baccalaureate degrees in 1870, becoming the first graduates of a state-assisted college in the western United States.

In its early days, Corvallis College was maintained by the Methodist Episcopal Church, South, and was only partly state-supported. The state assumed complete control in 1885.

With the assumption of state control, the college became known as Oregon Agricultural College. The name was changed to Oregon State College in the 1920s and to Oregon State University on March 6, 1961.

In designating Corvallis College as Oregon's agricultural institution, the state legislature accepted the provisions of the Morrill Act, signed into law by President Abraham Lincoln on July 2, 1862. The act provided grants of land to be used by states for the sole purpose of endowing, supporting, and maintaining publicly controlled colleges.

State assistance to higher education in Oregon started on October 27, 1868, when Corvallis College was designated as "the agricultural college of the state of Oregon."

Following designation of the college as a land grant institution, agriculture was added to the existing arts and science curriculum in 1869. The curriculum continued to expand, with professorships in commerce (1880), agriculture (1883), household economy (1889), and engineering (1889) resulting in the establishment in 1908 of the professional schools of commerce, agriculture, home economics, and engineering. The first summer session was also held in 1908.

Curricular growth continued with the schools of forestry (1913), mines (1913),

pharmacy (1917), education (1918), basic arts and sciences (1922), and health and physical education (1931).

In 1932, the Oregon State Board of Higher Education established the School of Science for the state system at Corvallis, eliminated the School of Mines, and reduced the School of Health and Physical Education to a division. Major work in business administration was discontinued but was reinstated when the College of Business was established (first as a division) in 1943. The College of Liberal Arts was established (as the School of Humanities and Social Sciences) in 1959. The Department of Oceanography was established in 1959, became the School of Oceanography in 1972 and the College of Oceanography in 1983. In 1992 the Department of Atmospheric Sciences in the College of Science was merged with the College of Oceanography and renamed the following year as the College of Oceanic and Atmospheric Sciences. In 2011, the Department of Geosciences in the College of Science was merged with COAS and the college renamed the College of Earth, Ocean, and Atmospheric Sciences. The College of Health and Physical Education (now the College of Public Health and Human Sciences) was reinstated (as a school) in 1974, and the College of Veterinary Medicine was established (as a school) the following year. In 1983, all schools of the university, except the School of Education, were redesignated as colleges. In 1989, the School of Education became a college. In 1991, the College of Education merged with the College of Home Economics, and within the College of Home Economics and Education, was renamed the School of Education. In 1995 the University Honors College was established. In 2002, the College of Health and Human Performance and the College of Home Economics and Education were merged into the College of Health and Human Sciences. As part of this restructuring, the new School of Education became an independent academic unit. In 2005, the School of Education was renamed the College of Education. The College of Health and Human Sciences was renamed the College of Public Health and Human Sciences in 2011.

Following the approval of legislation adopted by the 2013 Oregon Legislature, Oregon State University made the decision to have its own institutional board of trustees. That board was appointed by Oregon Governor John Kitzhaber in the fall of 2013 and will assume all of its official duties on July 1, 2014.

Presidents of the institution since its founding are:

1. William A. Finley, 1865–72;
2. Benjamin L. Arnold, 1872–92;
3. John M. Bloss, 1892–96;

4. Henry B. Miller, 1896–97;
5. Thomas M. Gatch, 1897–1907;
6. William Jasper Kerr, 1907–32;
7. George Wilcox Peavy, 1934–40;
8. Frank Llewellyn Ballard, 1940–41;
9. August Leroy Strand, 1942–61;
10. James Herbert Jensen, 1961–69;
11. Robert William MacVicar, 1970–84;
12. John V. Byrne, 1984–95;
13. Paul G. Risser, 1996–2002;
14. Edward J. Ray, August 2003–present.

Acting presidents of the institution since its founding are:

- Joseph Emery, 1872
- John D. Letcher, 1892
- George Wilcox Peavy, 1932–34
- Francois Archibald Gilfillan, 1941–42
- Roy Alton Young, 1969–70
- Timothy P. White, 2003

For more details, see http://osulibrary.oregonstate.edu/archives/chronology/chron_head.html.

For the Best of OSU Archives, see <http://oregondigital.org/digcol/archives/index.html>.

ORGANIZATION OF THE UNIVERSITY

The **president** is the chief executive officer of the university. He is appointed by the **Oregon State Board of Higher Education**, and is responsible for the overall leadership and direction of the university. The **provost and executive vice president** is the chief academic and operating officer and is responsible for the daily operations of the university.

In November 2009, four new divisions were created as part of OSU's Strategic Alignment and Budget Reduction Implementation Plan: the Division of Arts and Sciences, Division of Business and Engineering, Division of Earth Systems Science, and the Division of Health Sciences.

The academic programs of Oregon State University are divided among 11 colleges, the Graduate School, and the University Honors College, each with a dean responsible for all faculty, staff, students, and academic programs.

The 11 colleges are the College of Agricultural Sciences; College of Business; College of Earth, Ocean, and Atmospheric Sciences; College of Education; College of Engineering; College of Forestry; College of Public Health and Human Sciences; College of Liberal Arts; College of Pharmacy; College of Science; and the College of Veterinary Medicine.

Colleges are divided into departments or schools administered by a department head, chair, or director. Each department may offer several programs of study leading to degrees, certificates, options, or minors requiring a specific group of courses for completion.

Some courses and programs described in the OSU General Catalog are offered

throughout the year online and at a distance by OSU Ecampus. A list of online and distance education courses and programs are available on the Web at <http://ecampus.oregonstate.edu>.

OSU Extended Campus also is home to OSU Summer Session, which serves more than 10,000 students annually on the Corvallis campus, online and at the OSU Hatfield Marine Science Center on the Oregon coast. Summer session courses are published annually in the OSU Summer Session Planning Guide and listed in the online schedule of classes. The OSU Summer Session website is <http://summer.oregonstate.edu>.

This OSU General Catalog lists requirements for each program, as well as all regular courses offered by Oregon State University. A number of special temporary or 'X' courses are also offered each year and are listed in the online Schedule of Classes.

The **Graduate School** section of this catalog offers a summary of graduate programs and general regulations.

Programs and courses offered by OSU-Cascades on the Central Oregon Community College campus in Bend, Oregon, are available on the Web at <http://www.osucascades.edu/>.

CATALOG DEFINITIONS

The following terms are used throughout the catalog.

Academic year: The time period containing the academic terms fall, winter, and spring (currently September through June). When summer term is considered as part of an academic year, or when it is considered as part of the Banner Student Information Systems (SIS), summer term is the first term of the academic year.

Advisor: A faculty member appointed by a program, department, school, or college to advise students during their college experience.

BA degree: The Bachelor of Arts degree is conferred for broad and liberal education in humanities, arts, social sciences, and sciences. College BA requirements provide: a) a breadth of preparation in these fields that is significantly greater than that required of all undergraduates through the baccalaureate core; and b) foreign language proficiency certified by the School of Language, Culture, and Society as equivalent to that attained at the end of the second year course in the language. Proficiency in American Sign Language equivalent to that attained at end of the second year also meets the BA language requirement.

BS degree: The Bachelor of Science degree is conferred for focused curricula that emphasize scientific ways of knowing and quantitative approaches to understanding in the sciences and social

sciences, and for curricula in professional fields.

Baccalaureate core: The university's general education requirements. See Earning a Degree at Oregon State University in this catalog. Courses in the baccalaureate core list have an asterisk in front of the title.

Baccalaureate degree: An approved academic award given for the satisfactory completion of an instructional program requiring at least four but not more than five years of full-time equivalent college-level academic work that includes the following: (1) institutional general education requirements (i.e., baccalaureate core); (2) major area of study requirements; and (3) may include option, minor, supporting area, or elective requirements. A minimum of 180 credits is required for most degree programs. Some majors may require more. The conditions and conferral of the award are governed by the faculty and ratified by the Oregon State Board of Higher Education.

Blanket-numbered courses: Reserved number courses such as 401/501/601. See Reserved numbered courses.

Certificate program (undergraduate): A specified interdisciplinary program of study leading to an official certificate and notation on the transcript. A certificate program draws courses from more than one department, rather than a single department (as with most minors). An undergraduate certificate program must be taken in conjunction with a formal degree program. An undergraduate certificate requires a minimum of 27 credits.

Certificate program (postbaccalaureate): A specified program of study of undergraduate courses leading to an official certificate and notation on the transcript. A completed baccalaureate degree program from an accredited institution is required. A postbaccalaureate certificate program requires a minimum of 27 credits.

Certificate program (graduate): A structured progression of graduate-level courses that constitute a coherent body of study with a specifically defined focus within a single discipline or a logical combination of disciplines. It is designed for students who have completed a baccalaureate degree and are in pursuit of advanced-level learning. A graduate certificate requires a minimum of 18 graduate credits.

Certificate program (professional): A site-based training and professional development certificate that is not transcript visible.

Course: An organized unit of instruction or research. Types include lectures, recitations, seminars, laboratories, discussions, internships, clerkships, reading

and conference, independent study, and other categories of courses.

CRED (Credentialed): A student who has received a previous baccalaureate degree from either OSU or another accredited university or college may be granted a subsequent minor, certificate, major or option under the guidelines of Academic Regulation 27. It indicates the student is not seeking a degree, but rather a credential to accompany an existing degree.

Credit: Credits vary, depending upon the type of course and level at which it is offered. One credit is generally given for three hours per week of work in and out of class. For example, each hour of class lecture is generally expected to require two hours of work out of class. One credit would be given for a lecture course that met for one 50-minute period each week over a 10-week period; i.e., 10 contact hours between faculty and students. One credit is typically given for a laboratory course that meets for two to three hours per week for an entire term. Equivalent credits are given for recitations, discussions, and other types of courses. **All credits given in the General Catalog refer to quarter credits.** When transferring in course work from a semester system institution, multiply the number of credits by 1.5 to determine how many quarter credits will be transferred ($3 \text{ semester hours} \times 1.5 = 4.5 \text{ quarter credits}$). If planning to transfer OSU credits out to a semester system institution, multiply the number of quarter credits by .67 to determine how many credits will transfer ($4 \text{ quarter credits} \times .67 = 2.68 \text{ semester credits}$).

Curriculum: (plural *curricula*) An organized program of study and courses required for a specific degree or certificate program.

Degree: An academic award granted upon satisfactory completion of a set of collegiate-level educational requirements.

Discipline: A field of study in which a student may concentrate, such as sociology, anthropology, or mathematics.

Doctoral degree: An approved academic award given as a sign of proficiency in scholarship and for the satisfactory completion of an instructional program requiring at least three years of full-time equivalent academic work beyond the baccalaureate degree, the completion of which signifies recognized competence, original research and/or the capacity to do independent advanced graduate-level analysis. A minimum of 108 credits is required beyond the baccalaureate degree. [**Note:** The total number, above the minimum, will vary by degree program.] The conditions and conferral of the award are governed by the faculty and ratified by the Oregon State Board of Higher Education.

Electives: Courses that students may select, either for general knowledge or for fulfilling specific degree requirements.

Endorsement: An endorsement is the subject matter (content area) or specialty in which an individual is licensed to teach. Endorsements can be part of an initial teaching license or can be added later.

First professional degree: An academic award granted for an instructional program the completion of which: (1) signifies completion of the academic requirements to begin practice in the profession; (2) requires at least two years of full-time equivalent college-level work prior to entrance; and (3) usually requires a total of at least five years of full-time equivalent academic work to complete the degree program, including prior required college-level work plus the length of the professional program itself (examples, DVM in veterinary medicine and PharmD in pharmacy). The conditions and conferral of the award are governed by the faculty and ratified by the Oregon State Board of Higher Education.

Grade-point average (GPA): The total number of grade points received for grades divided by the total number of credits attempted. OSU uses a 4-point grade scale.

Graduate area of concentration: A graduate area of concentration is a subdivision of a major or minor in which a strong graduate program is available. Areas of concentration may be referenced on the student's program of study, but they are not listed on the student's transcript. "Areas of concentration" can only be used in association with graduate programs.

Graduate major: A graduate major is the area of academic specialization, approved by the State Board of Higher Education, in which the student chooses to qualify for a graduate degree. Upon completion of a graduate degree, the degree awarded and the graduate major are listed on the student's transcript.

Graduate option: Options are for students of a specific major. An option is one of several distinct variants of course aggregations within a major that focus on an area of study designed to provide a student with specialized knowledge, competence, and skills while sharing a minimum core of courses.

A graduate option consists of a minimum of 12 designated quarter credits of related course work (excluding thesis credits), comprised of course work offered by the sponsoring unit as well as by other academic units. The option may be comprised of specific courses, completion of a designated number of credits from a longer list of alternative courses, or a combination of specific and alternative course lists. Approved options may be

added to a graduate program of study, and approved by the faculty advisor(s) and the director of the sponsoring unit. On the program of study, there should be no overlap in course credits between options (the same course cannot be used to satisfy credit requirements in multiple options). When the unit submits the final examination card to validate awarding of the major to the Graduate School, the unit will also validate that the requirements of the option have been completed.

Hybrid Course: A hybrid course includes both regularly scheduled on-site classroom meetings, and significant online out-of-classroom components, that replace regularly scheduled class meeting time.

Interdisciplinary: A course or program that integrates concepts, knowledge, or faculty from several fields of study.

Lower-division courses: Course offerings at a level of preparation usually associated with freshmen and sophomore students (e.g., 100- and 200-level courses).

Major (graduate): See Graduate major above.

Major (undergraduate): An extensive program of study in a designated subject area. Majors require at least 36 credits, 24 of which must be upper-division.

Master's degree: An approved academic award given as a mark of proficiency in scholarship and for the satisfactory completion of an instructional program requiring at least one but not more than two years of full-time equivalent academic work beyond the baccalaureate degree. A minimum of 45 credits is required beyond the baccalaureate degree. [**Note:** The total number, above the minimum, will vary by degree program.] The conditions and conferral of the award are governed by the faculty and ratified by the Oregon State Board of Higher Education.

Minor (graduate): A graduate academic area that clearly supports the major and consists of a group of related courses totaling at least 15 credits in a specific topical area.

Minor (undergraduate): A secondary field of specialized study that may be offered by an academic unit for its own majors and/or majors from other academic units. Minors require at least 27 credits, 12 of which must be at the upper-division level. An approved minor is placed on the student's transcript.

Option (undergraduate): Options are for students of a specific major. Options consist of at least 21 designated credits of course work, 15 of which must be at the upper-division level. If all requirements have been met, the option

may be listed on a student's transcript.

Perspectives courses: Baccalaureate core courses that integrate fundamental knowledge from science and liberal arts disciplines to develop cultural, historic, and scientific perspectives.

Reading and conference: A course focused on reading assignments to be completed in conferences with the instructor.

Reserved numbered courses: Certain blocks of numbers that have been assigned for specific courses that may be taken for more than one term. The credits being granted vary according to the amount of work done.

100–110 and 200–210: Survey or foundation courses in the liberal arts and sciences

401/501/601: Research and Scholarship

402/502/602: Independent Study

403/503/603: Thesis/Dissertation

404/504/604: Writing and Conference

405/505/605: Reading and Conference

406/506/606: Special Problems/Special Projects

407/507/607: Seminar

408/508/608: Workshop

409/509/609: Practicum/Clinical Experience

410/510/610: Internship/Work Experience

Sequence: Two, three, or four closely related courses that are usually taken in numerical order and through more than one term.

Skills courses: Baccalaureate core courses designed to give the student fundamental mathematical, communication, and fitness competence.

Special topics courses (X99): Like reserved numbered courses, special topics courses may be repeated as specified by the academic unit responsible for the course offering. It is implied that the course content is different each time the student takes the course.

Student Enrollment Levels: The levels below establish enrollment levels for federal financial aid eligibility and the deferment of student loans. Summer enrollment levels are the same as other terms.

Full Time: 12 or more credits in a term

Three Quarter Time: 9 to 11 credits in a term

Half Time: 6 to 8 credits in a term

Syllabus: A list of course objectives, lecture topics, assigned reading, exams, etc., prepared and distributed by a professor at the beginning of the term.

Synthesis courses: Baccalaureate core upper-division courses that emphasize interdisciplinary, critical thinking approaches to global, technological, and societal issues.

Term: Usually one-third of the school year. Terms at OSU are divided into fall, winter, and spring terms (also referred to as "quarters"). Summer term is generally an 8- or 11-week session during the summer. See "Credits" above.

Upper-division courses: Course offerings at a level of preparation usually associated with junior or senior students (e.g., 300- and 400-level courses).

Waive: This term refers to decisions of advisors to "waive" a course or courses in a student's program. Typical reasons include transfer credit for equivalent courses, equivalent experience in the profession or discipline, and petitioning for and successfully completing an examination. Waiving courses usually does not decrease the total credits required for completion of the degree or program; students should discuss this with their advisor.

Workshop: A brief intensive course for a small group which emphasizes problem solving.

Writing Intensive Courses (WIC): Designated upper-division courses in the major discipline that use student writing as a significant approach to learning. WIC courses must meet a variety of requirements, as do other courses in the baccalaureate core. WIC courses have a carat, ^, in front of the title.

READING A COURSE DESCRIPTION

The elements of a typical course description found under department/school headings in the colleges are illustrated by the microbiology course example below:

Science Course Example:
MB 479. FERMENTATION MICROBIOLOGY (3). An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. **CROSSLISTED** as FST 479/FST 579. **REQ:** Field trips. **PREREQS:** BB 450 and MB 302*, (BB 350 or BI 314). This course is repeatable for a maximum of 6 credits.

Course Designator (Subject Code): **(MB)** an abbreviation representing the department, college, or program offering the course. MB indicates that the course is offered through the Department of Microbiology.

Number: (479) indicates the level of the course. This is an upper-division, undergraduate course. 400-level courses are offered for undergraduate credit. Courses numbered at the 500- or 600-level may be taken for **graduate credit**. Courses numbered 500–599 are generally taken by master's candidates and courses numbered 600–699 are taken by doctoral candidates. (See Course Numbering System below.)

Title: FERMENTATION MICROBIOLOGY

Credit: (3) the number of credits awarded for successful completion of the course.

Course description: A brief description of what will be taught in the course. "An introduction to industrial microbiology..."

CROSSLISTED: **CROSSLISTED** as FST 479/FST 579 means the same course is also offered through another department; course numbers, titles, credits, descriptions, and prerequisites are the same for both courses. Only the course designator (subject code) is different.

REQ: A requirement for that course, such as field trips.

PREREQS: Prerequisites a student must have completed or be currently enrolled in before registering for the course. The registration system and/or instructor may not allow students to enroll for the course unless they have the prerequisite on their transcripts or are currently enrolled in the prerequisite. Students may be administratively dropped after registering for their courses if they have not met the prerequisites of a course. These courses are the background necessary for successful performance in the course.

*** (Asterisk):** The asterisk *after* a prerequisite (MB 302*) indicates that it *may* be taken concurrently with the course described.

COREQ: A course that *must* be taken simultaneously with the course described.

REC: Means the course is recommended but not required by the instructor.

This course is repeatable...: Some courses may be taken again for additional credit that applies toward the student's academic program.

Liberal Arts Course Example:
HST 202H. HISTORY OF THE UNITED STATES (4). Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers 1820 to 1920. HST 201H, HST 202H, and HST 203H need not be taken in sequence. (H) (SS) (Bacc Core Course) **PREREQS:** Honors College approval required.

Letter suffix: (HST 202H) "H" signifies an Honors College course. An "X" signifies an experimental course.

Liberal Arts Core: Students pursuing College of Liberal Arts majors are required to complete courses in certain study areas. Four abbreviations are used in the college to indicate courses that may be used to fulfill requirements in each of these areas:

- **(FA)** Fine Arts Core
- **(H)** Humanities Core

- **(NC) Non-Western Core**
- **(SS) Social Studies Core**

Additional Curricular Terms:

See the Academic Programs website at <http://oregonstate.edu/admin/aa/apaa/academic-programs/curriculum/curricular-policies-and-procedures>.

COURSE NUMBERING SYSTEM

Oregon State University follows the basic course numbering system used by institutions in the Oregon University System (OUS):

0–99. Noncredit or credit courses of a remedial, terminal, or semiprofessional nature that are not applicable toward degree requirements.

100–299. Undergraduate, lower-division courses.

300–499. Undergraduate, upper-division courses.

500–599. Graduate courses offered primarily in support of a master's degree but which are also available for doctoral-level credit. Undergraduates of superior scholastic achievement may be admitted on approval of the instructor and department head. An undergraduate student may apply to reserve these courses for later use on a graduate degree program.

600–699. Graduate courses offered principally in support of doctoral-level instructional programs but also available for master's program credit.

700–799. Professional or technical courses that may be applied toward a professional degree (such as DVM or PharmD) but not toward other graduate degrees (such as PhD).

800–899. In-service courses aimed at practicing professionals in the discipline. These courses may not be applied to graduate or professional degree programs.

001NC–099NC. Non-credit courses offered through the INTO Oregon State University Intensive English program.

Commonly Numbered Courses.

House Bill 2913 directed the Oregon University System and Oregon community colleges to jointly develop, to the extent

possible, a common course numbering system for lower-division transfer courses. The “Commonly Numbered Course List” represents a good faith effort to meet the requirements of the legislation. The list of courses is recommended for use by campuses’ faculty and administration as they develop or revise academic programs to better facilitate students transferring from community colleges to public four-year institutions. OSU agreed to this list after review by all affected departments. The “Commonly Numbered Course List” includes course descriptions in addition to the course numbers and titles. Course numbers and title should follow the usage in the list. Descriptions may vary. The list is at: <http://oregonstate.edu/admin/aa/apaa/academic-programs/curriculum/curricular-policies-and-procedures#76>.

EQUIVALENT COURSES LIST

Some courses at OSU have equivalent versions with different subject prefixes or course numbers. Such courses are equivalent for degree clearance purposes, in other words, taking either version will meet the requirements for an academic program. Students may only take one of the versions for credit, not both.

Students will not earn credit for a course if they have previously taken its equivalent. Doing so is the same as repeating a course, see Academic Regulation 20, Repeated Courses.

Examples of equivalent courses include:

- Regular and Honors College versions of the same course.
- Crosslisted courses with the same title, course description, and course number (e.g. CS 372 and ECE 372).
- Transfer courses treated as equivalent to OSU courses.
- Courses that have been replaced by a new subject code (e.g. BA 434 replaced by FIN 434).

Equivalent Courses List is in the Registrar's Office Website at <http://oregonstate.edu/registrar/equivalent-courses>

Oregon State University welcomes all students without regard to race, creed, sex, marital status, sexual preference, age, religion, handicap, or national origin who provide evidence of suitable preparation for course work at the university level.

Information for undergraduate, postbaccalaureate, nondegree undergraduate students are available from the Office of Admissions. Admission applications are available at <http://oregonstate.edu/admissions/index.php>.

OSU code for ACT reports: **3482**

ADMISSION REQUIREMENTS FOR FIRST-YEAR STUDENTS

When to Apply

See application deadlines at <http://oregonstate.edu/admissions/admission-priority-deadlines-students-0>.

The application and fee must be submitted electronically by the respective deadline.

The Admission Process

Apply online at <http://oregonstate.edu/admissions/>. Applicants are required to use a valid Visa, MasterCard, or Discover credit card to pay the \$60 nonrefundable application fee. Request that your high school send your *official* high school transcript to OSU, and have your *official* SAT or ACT test scores sent to OSU.

Telefax (Fax) credentials are considered official if faxed **directly** from a high school within the U.S.A. with a cover page. The fax number is 541-737-2482.

Portfolios, videotapes, essays and personal interviews are generally not required.

EVALUATION PROCESS

Admission to Oregon State University is selective and competitive.

Complete applications are first reviewed to confirm successful completion of the 15 high school subject requirements and GPA earned. For those who meet GPA and subject requirements, there is no minimum SAT or ACT score requirement. However, official scores from one of these tests are required for admission and advising purposes.

Applicants for undergraduate admission are required to complete an "Insight Résumé," a written assessment designed to evaluate students' noncognitive attributes. These attributes include self-concept, realistic self-appraisal, handling the system, ability to set long-range goals, leadership, connections with a strong support person, community engagement, and nontraditional learning.

Academic performance is not the sole criterion for admission to the university.

The university may evaluate a person's behavior and background to determine their ability to maintain the standards of academic and professional conduct expected at the university. An evaluation may take into consideration current behavior and performance as well as past experiences and actions. Simply qualifying for admission does not guarantee admission.

Go to <http://oregonstate.edu/admissions/main/admission-requirements-1> to see when applicants will be notified of their admission status.

SELECTION OF FIRST-YEAR STUDENTS

OSU's admission requirements promote student success by assessing preparedness and academic potential in the unique context of each student's personal experience. Admission assessment will consider all achievement, both academic and non-academic, to enroll students with a broad range of characteristics and perspectives. These include, but are not limited to: academic achievement, creativity, initiative, motivation, leadership, persistence, service to others, intellectual curiosity, exceptional personal or academic recognition, unusual talent or ability, substantial experience with other cultures, and ability to overcome significant challenges.

The admissions process provides a fair and comprehensive review of all applicants to determine potential success at OSU. It is crucial that applicants carefully complete the application process by providing thorough information. Estimating the likelihood of admission is very difficult without considering the complete application file.

Regular Admission

Initial admission selections are based on a holistic assessment of the criteria listed below. Minimum requirements for admission include a high school grade-point average of 3.0 (on a 4.0 scale) and completion of 15 high school courses with earned grades of C- or higher (See high school course requirements.). Meeting minimum requirements does not guarantee admission.

Strength of Curriculum:

- Quality, quantity, and level of course work throughout the entire high school program, especially course work completed beyond the minimum courses required (See the high school course requirements chart.)
- Advanced placement (AP), international baccalaureate (IB), or college course work completed or in progress
- Strength of the program taken within the context of the high school attended
- Progressively challenging math sequence (beyond Algebra II), demonstrated by performance

ADMINISTRATION

Noah Buckley,
Director,
 541-737-0583

Matt Ogawa,
Associate Director,
 541-737-9807

Mickey Reynolds,
Associate Director,
 541-737-2499

Blake Vawter,
Associate Director,
 541-737-3597

Erin Rau,
Assistant Director-Residency Officer,
 541-737-0579

Amanda Hutchinson,
Campus Visitor Center Program Coordinator,
 541-737-8863

Academic Performance:

- A minimum high school grade-point average of 3.0 (on a 4.0 scale as calculated by the Office of Admissions)
- Class rank taken in context with academic rigor and size of high school attended
- Performance on standardized tests: SAT or ACT.

Insight Résumé:

- Understanding of you as a unique, contributing individual
- Your accomplishments, perspectives, experiences, and talents
- Your achievements within the context of your social and personal circumstances
- Participation in activities that develop academic, intellectual, and leadership abilities

Insight Résumé scores are also used for scholarship selection, secondary review of applicants who do not meet admission requirements, and compiling baseline data.

Extended Admission

Students not selected for regular admission may be invited to participate in the extended admission process. Extended admission decisions will be determined by the Undergraduate Admissions Committee. In addition to regular admission requirements, students participating in the extended admission review will be asked to provide additional materials for consideration. Please refer to the OSU Admissions website for specifics: <http://oregonstate.edu/admissions/extended-admission-0>.

HIGH SCHOOL COURSE REQUIREMENTS

College Preparatory Subjects	Minimum Units
------------------------------	---------------

Grades of C- or higher are required.

English..... 4 years
Mathematics 3 years
Culminating at the Algebra II level or higher
Social Studies..... 3 years
Science 3 years

One year each of two different sciences (biology, chemistry, physics, etc.).

One year of lab strongly recommended.

Foreign Language..... 2 years
(not required if high school graduation of GED date prior to 1997)

May be met in any one of these ways:

- Completing two years of the same high school-level foreign language
- Earning grade of C- or higher in the third year of high school-level foreign language
- Completing two consecutive quarters of the same college-level foreign language
- Earning a satisfactory score on an

- approved assessment of foreign language knowledge
- Demonstrated proficiency in American Sign Language (ASL)
- Completing grades 1 through 7 at a school in which all courses are taught in a language other than English (Documentation is required.)

ALTERNATIVES TO SUBJECT REQUIREMENTS

Students unable to fulfill the subject requirements will be eligible for admission by:

1. Earning a 940 total score on two SAT Subject Tests (Math level I or II and a second test of choice [foreign language recommended])
- OR**
2. Successfully completing course work (high school or college transfer) for specific subject deficiencies.

Alternatives should be completed by high school graduation.

Test Requirements

Freshman applicants (except those applying on the basis of GED scores) must submit Scholastic Assessment Test (SAT-Reasoning) or American College Test (ACT) scores. Test scores are used to determine course placement and are considered for applicants not meeting the minimum high school GPA requirement.

Official scores are required.

The institutional code for having most test scores sent to OSU is **4586**.

The OSU ACT code is **3482**.

High School Graduation

Public high school students must graduate from standard high schools.¹ Private high school students must graduate from accredited high schools.²

Footnotes

¹ Standard high schools are public high schools that are certified as meeting specified levels of resources, services, and quality established by the Oregon Department of Education.

² Accredited high schools are those that are reviewed and recognized by a regional entity, such as the Northwest Association of Schools and Colleges, as meeting an appropriate level of academic rigor and support.

Graduates of Nonstandard or Unaccredited High Schools or Home-Schooled Students

Graduates of nonstandard or unaccredited high schools must qualify for admission by meeting institutional SAT Reasoning Exam/ACT requirements (see minimums below) **and** have an average score of 470 or above (940 total) on two College Board SAT subject tests.

(Math level I or II and another test of the student's choice. An examination in a second language is strongly recommended to qualify a student for admission by meeting the language proficiency requirements. Students who do not take

a SAT subject test in a second language must prove language proficiency through another approved process.)

Meeting minimum requirements does not guarantee admission.

Minimum ACT/SAT Reasoning Requirements for Students Who Did Not Graduate from an Accredited or Standard School (includes Math, Critical Reading, and Writing beginning March 2005)

ACT* 23 or SAT Reasoning 1540

* ACT scores are subject to change with additional information from ACT regarding integration of the optional writing exam.

Applicants must submit scores on the SAT Reasoning or American College Test (ACT) that include a standardized writing examination. SAT subject tests are required for applicants who are graduates of unaccredited high schools, including home schooled students. Meeting minimum requirements does not guarantee admission.

Test scores are used:

- as an alternate means of meeting the GPA and/or subject requirements;
- to comply with the admission policy for graduates of unaccredited high schools;
- in selectively admitting qualified applicants; and
- for advising, guidance, and research purposes.

OR

Admission Based Upon GED Scores

Achieve an average GED score of at least 58 (if taken prior to January 2002) or 580 (if taken January 2002 or later). No subtest score can be less than 41 (if taken prior to January 2002) or 410 (if taken January 2002 or later). Applicants admitted on the basis of GED scores *are not required to submit SAT or ACT scores*. Meeting minimum requirements does not guarantee admission.

Please note: Students who graduate from high school or took the GED test in the 1996-97 school year and later must pass two years of the same foreign language prior to admission. Foreign language taken at an unaccredited high school does not qualify. If you have questions pertaining to these guidelines, please contact the OSU Admissions Office regarding your options for completion of this requirement.

PETITION FOR ADMISSION CONSIDERATION

Most students not approved for admission may complete extended admission requirements and will be provided with information about the petition procedure. Deadlines are in effect each term for appeals. For additional information, please refer to the OSU Admissions web-

site: <http://oregonstate.edu/admissions/extended-admission-0>.

ADVANCED PLACEMENT (AP) CREDIT

Oregon State University awards ungraded credit for achievement on certain College Board Advanced Placement (AP) examinations. Information pertaining to specific AP credit policies is available in high school counseling centers or may be obtained from the OSU Office of Admissions website. OSU's college code is 4586 for those wishing to have their scores sent.

INTERNATIONAL BACCALAUREATE CREDIT

Oregon State recognizes IB achievement by awarding credit to students who score 5 or above on standard and higher level IB exams. OSU also grants additional benefits for students who complete the full IB diploma with a score of 30 or higher, as follows:

Sophomore Standing, and **IB Scholarships** are available. Students with a total score on IB exams of 30 or higher may choose to accept the annual, renewable scholarship award of at least \$3,000 **OR** may compete for more substantial awards.

Students must indicate that they would like official test scores sent to OSU. The official International Baccalaureate Certificate is required in order to award credit.

Contact your IB coordinator or IB North America to request score reports. IBO North America
212-696-4464

<http://www.ibo.org/> | Order IBO Transcript Direct Link (<http://www.ibo.org/graduates/transcripts/index.cfm>)

TRANSFER ADMISSION

When to Apply

Apply online at <http://oregonstate.edu/admissions/>. Applicants are required to use a valid Visa, MasterCard, or Discover credit card to pay the \$60 nonrefundable application fee. Request that your high school send your **official** high school transcript to OSU, and have your **official** SAT or ACT test scores sent to OSU. **Official** transcripts must be sent to OSU from each college or university attended.

Please refer to <http://oregonstate.edu/admissions/admission-priority-deadlines-students-0> for application deadlines.

MINIMUM REQUIREMENTS FOR ADMISSION CONSIDERATION

U.S. Citizens and Permanent Residents:

1. Successful completion of no less than 36 quarter (24 semester) graded, transferable credits from

(an) accredited U.S. institution(s). Students with at least 12 quarter hours but fewer than 36 graded transferable hours will be considered on the basis of their high school records and test scores, **and** must have a 2.25 GPA on all collegiate work attempted.

2. Only college-level, transferable credits are counted in those accepted in the GPA computation (professional-technical course grades are not included).
3. Grade of C– or better earned in the following courses:
 - College-level writing equivalent to WR 121 (English Composition) or equivalent.
 - Mathematics course with course content of College Algebra for which the prerequisite is Intermediate Algebra.
 - Two terms of the same foreign language in college will be required of those high school graduates of the class of 1997 and beyond who did not successfully complete two units (years) of foreign language while in high school. For additional information on how to meet foreign language deficiencies, http://www.ous.edu/sites/default/files/stucoun/counres/files/2010Secondlanguagepolicy_final.pdf
4. Eligibility to return to the most recent college or university attended.
5. Academic performance is not the sole criterion for admission to the university. The university may evaluate a person's behavior and background to determine their ability to maintain the standards of academic and professional conduct expected at the university. An evaluation may take into consideration current behavior and performance as well as past experiences and actions. Simply qualifying for admission does not guarantee admission.

Consideration will be given to applicants with a 2.00 GPA and an Associate of Arts Oregon Transfer (AAOT) degree from an Oregon community college.

Evaluation and Transferability of Credit

Only **official** records are used to evaluate eligibility for admission and transferability of credit.

Official transcripts of **all** college work attempted must be submitted directly from the Registrar's Office of each institution. Telefax (Fax) credentials are considered official if faxed **directly** from a U.S. school with a cover page. OSU's fax number is 541-737-2482.

OSU accepts in transfer college-level

courses successfully completed at colleges or universities accredited by an appropriate accreditation agency. An advanced standing report acknowledging the courses accepted by the university will be sent via email by the Office of Admissions after the official letter of admission.

Persons transferring to OSU from a community college may have up to 124 quarter credits (83 semester units) accepted toward their bachelor's degree. If the school previously attended used the semester system, one semester credit equals 1.5 quarter credits at OSU.

CLEP

Applicants who want credit for College-Level Examination Program (CLEP) tests should have official test scores sent to Admissions using **college code 4586**. Additional details are available in the OSU Credit Opportunities brochure and on the OSU Admissions website.

For information on OSU's acceptance of professional-technical courses, please see Academic Regulation 2, paragraph b below.

Acceptance of Credit from a Two-Year Institution

(OSU Academic Regulation 2):

Credit From A Two-Year Institution (Undergraduate Students)

- a. **College Transfer Credits:** Oregon State University accepts for credit toward a baccalaureate degree all college transfer work completed at an Oregon or other accredited community college up to 124 lower-division quarter credits. For Institutional Requirements for Baccalaureate Degrees, see AR 25. Students are encouraged to work with the relevant academic unit to ensure that transfer credits meet department and college requirements for the degree. It would be unlikely for an individual student to be able to use all 124 credits toward an OSU baccalaureate degree. Transfer credits and grades are not used in calculating the OSU cumulative GPA. Students who hold OSU-approved direct transfer degrees from Oregon or other accredited community colleges (e.g., the Associate of Arts Oregon Transfer) or who have 90 or more credits accepted in transfer will be granted junior standing.¹ Students who hold OSU-approved direct transfer degrees will be considered to have met the Perspectives and Skills (except WIC) areas of the Baccalaureate Core. In addition, they must complete the upper-division Synthesis areas of the core. Students transferring from Oregon or other accredited community colleges who do not hold approved direct transfer degrees ordinarily will be given baccalaureate

core credit in the Perspectives and Skills area on a course-by-course basis for work that is judged to be equivalent in content.

- b. **Transfer of Professional-Technical Credits:** a maximum of 12 quarter credits (8 semester credits) of professional-technical course work applicable in an associate's degree or certificate program at an accredited institution can be accepted upon admission to OSU as general elective credit (graded as Pass) and as part of the 124-quarter credit total that can be applied toward a baccalaureate degree.

- c. **Transfer of Professional-Technical Course Credits through Articulation Agreements:** Lower-division OSU credit may be awarded for specific professional-technical community college courses when those courses are validated by articulation agreement with the appropriate OSU department. This may be above the 12 quarter credits of general electives (graded as Pass) allowed when a student is admitted to OSU. Credit will be awarded only upon the recommendation of the appropriate department and college, and approval by the Curriculum Council. Community college professional-technical course work is not equated to upper-division OSU course work. These course credits will count as part of the 124 quarter credits defined in paragraph 2a above. OSU departments who have articulation agreements with community colleges regarding community college professional-technical courses shall review the agreements annually and forward a dated list of the articulated community college courses to the Curriculum Council.

Footnote:

¹ Junior standing does not necessarily imply that OSU institutional, college, division, and/or departmental requirements, which are normally satisfied by OSU students prior to their junior year, have been satisfied.

Petition for Admission Consideration

Transfer students not approved for admission may complete the extended admission requirements and will be provided with information about the petition procedure. Deadlines are in effect each term for appeals.

NONDEGREE STATUS

Nondegree enrollment status is designed for students who want to take courses but do not want to pursue a degree. In some instances nondegree students may not meet regular admission require-

ments. Nondegree students are part-time students who are expected to enroll in no more than 8 credits a term. Students who want to enroll for more than 8 credits a term must apply for regular admission.

Nondegree enrollment status requires no formal admission process and has no requirements for entrance. Nondegree applications should be submitted electronically. Approval is granted for a specific term. Students who are unable to attend the specific term and want to enroll later should contact the Office of Admissions (undergraduate nondegree) or the Graduate School (graduate nondegree).

Nondegree students are given grades and academic records, and are reviewed according to university standards of good academic progress.

Nondegree students who wish to seek full admission and pursue a degree must do so by submitting an undergraduate, postbaccalaureate or graduate application for admission. In all cases, an admission application fee is required. Successful enrollment as a nondegree student does not guarantee regular admission. Credits earned while enrolled under nondegree undergraduate status will be applied to a student's record.

Nondegree graduate students who decide to seek admission to a specific degree program during the course of their studies should note that any credits taken as a nondegree student may or may not be applicable for that degree, depending upon a variety of factors, their chosen program, and the policies of the Graduate School. Graduate students are further advised that academic residency must be completed after full admission as a degree-seeking graduate student, regardless of the number of credits previously earned while in nondegree status. Please refer to "Reclassification of Postbaccalaureate Students, Nondegree-Seeking Students, and Graduate Certificate Students" at <http://catalog.oregonstate.edu/ChapterDetail.aspx?key=36#Section1792>.

Nondegree students follow the registration procedures and policies as outlined in the Registration Information Handbook. The Schedule of Classes is available through the Web at <http://catalog.oregonstate.edu/Default.aspx?section=ClassListing>. Registering students are expected to obtain a student identification card through the ID Center in the Kerr Administration Building.

Tuition and fees for nondegree students enrolled in **fewer than 9** credits are assessed at resident rates based on undergraduate- or graduate-course level. Payment of the health service fee is optional. Enrollment in excess of 8 credits requires that tuition and fees be assessed at the same rates as regular students

and requires full admission as a regular student.

Registration holds in place prior to applying for nondegree status must be satisfied before registration as nondegree student will be allowed.

Academic Regulation 1. Admission for Nondegree Students

- a. Nondegree enrollment status for undergraduate students is designed for students who wish to take 8 or fewer credits per term, but do not wish to pursue a degree or a specific postbaccalaureate credential.
- b. Nondegree enrollment status for graduate students is designed for students who wish to take graduate courses, but do not wish to pursue an advanced degree. Nondegree graduate students are not limited as to the number of courses (credits) per term.
- c. Credits earned as a nondegree undergraduate student may be used to satisfy degree requirements upon admission as a degree-seeking student.
 1. Credits earned while enrolled as a nondegree graduate student will not necessarily apply to a graduate program upon admission to degree-seeking status. Communication with the Graduate School and specific academic programs is advised.
 2. Nondegree students seeking admission to a degree program must do so by submitting an undergraduate, postbaccalaureate, or graduate application for admission.

INTERNATIONAL UNDERGRADUATES AS NONDEGREE STUDENTS

International students who are currently in the U.S. on visas such as an F-1, F-2, B-2, J-1, etc. should consult with OSU's International Student Advising and Services (ISAS) (email: isas.advisor@oregonstate.edu) before submitting the OSU non-degree application for admission. Only certain visa types allow an individual to pursue part-time or non-degree-seeking course work and still maintain one's visa status.

International students who plan to enroll with OSU as non-degree exchange students should use the application form that is made available at each partner institution. For a list of exchange partner institutions, go to <http://oregonstate.edu/international/atosu/students/prospective/exchange>

Undergraduate students who wish to enroll with OSU for one or more terms, but who do not plan to complete degree requirements at OSU and will not partici-

pate in an established exchange program, should contact International Admissions at intladmit@oregonstate.edu for further information, and before applying.

International students who wish to enroll in Academic English, Undergraduate Pathway or Graduate Pathway programs should contact INTO Oregon State University at intladmit@oregonstate.edu for further information.

SELECT A MAJOR

Undergraduates and postbaccalaureate applicants are asked to select a college and a major within that college. The University Exploratory Studies Program is a choice available to undergraduates who are undecided about a major. Students may change their major in consultation with an academic advisor.

ADMISSION OF POSTBACCALAUREATE STUDENTS

Students who want to earn a subsequent undergraduate degree or are fulfilling prerequisites for a degree program from OSU may apply for postbaccalaureate admission through the Office of Admissions. Applicants for consideration must meet the same application deadline and GPA requirements as transfer applicants. The GPA is computed on the first baccalaureate degree plus any subsequent credit earned. Applicants must include a statement of objectives of 150 to 200 words with their application. A \$60.00 application fee must be included with application. Academic departments may impose additional requirements.

ADMISSION OF SUBSEQUENT MINOR, CREDENTIAL OR CERTIFICATE

Students who want to earn a subsequent minor, credential or certificate from OSU may apply for nondegree credential enrollment status. Students must complete the current requirements for a minor, credential or certificate and receive the dean's approval. Students must also achieve a minimum GPA of 2.0 and complete a minimum of 15 credits in residence. A nonrefundable \$60.00 admission application fee is charged.

ADMISSION WITH GRADUATE STANDING

To be considered for admission to the Graduate School, an applicant must have a baccalaureate degree from an accredited college or university, as well as a scholastic record, background, or other evidence that indicates the ability to do satisfactory graduate work. See Graduate Admission Procedures in this catalog: <http://catalog.oregonstate.edu/Chapter-Detail.aspx?key=36#Section216>.

ADMISSION OF INTERNATIONAL UNDERGRADUATE STUDENTS

International students are admitted to OSU based on meeting the minimum OSU academic requirements, English language proficiency requirements and evidence of funding requirements (if an F-1 or J-1 visa is needed). Visit the Office of International Admissions online at <http://oregonstate.edu/admissions/international/>.

In general, international applicants must have completed their high school diploma or secondary school certificate with a minimum 3.0 on a 4.0 scale, an average "B" grade (A–F), or the equivalent.

Applicants transferring from a recognized college or university outside the U.S. must have a cumulative grade-point average of 2.5, meet OSU's math requirement for transfer students (if you have earned 36 or more transferrable credits) AND be eligible to return to the most recent institution attended.

Applicants transferring from a regionally accredited college or university in the U.S. must have a cumulative grade-point average of 2.25, meet OSU's math and writing requirements for transfer students (if you have earned 36 or more transferrable credits), AND be eligible to return to the most recent institution attended.

Applicants for a bachelor's degree must submit official records of all secondary, middle and high schools attended (in general, these represent years 9–12) AND all colleges, universities and/or professional schools attended. Results of comprehensive examinations are required in the original language and on the official form of the institution, government, or other examining or certifying agency.

Applicants must present proof of English language proficiency, if available, by submitting TOEFL, IELTS or an acceptable alternative, e.g. IGCSE, SAT, ACT, or AP results.

Exceptions to the English proficiency test requirement are:

- Individuals who have completed a bachelor's degree from a regionally accredited institution in the U.S. or other English speaking country (See list below).
- Citizens of the following countries: Anguilla, Antigua and Barbuda, Australia, Bahamas, Barbados, Belize, Bermuda, British Virgin Islands, Canada (English speaking provinces), Cayman Islands, Dominica, Grenada, Ireland, Jamaica, Montserrat, New Zealand, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Trinidad and Tobago, Turks and Caicos, United Kingdom, U.S. Virgin Islands.

** For citizens of African countries whose official language is English, waivers will be

considered on a case-by-case basis if the medium of instruction is English.

INTO OSU PATHWAY PROGRAMS:

Undergraduate Pathway

INTO Oregon State University's Undergraduate Pathway programs combine intensive language study, academic skills development and academic course work in a carefully constructed program designed to move students successfully through one to three terms of undergraduate study in their degree program. Entry requirements vary based on the length of program chosen. All students have a study plan and receive academic advising that is reflective of their specific Undergraduate Pathway program.

Successful completion of Undergraduate Pathway progression requirements allows students to complete one to three terms of undergraduate study and progress to their undergraduate degree at Oregon State University in their respective field of study.

Conditional Undergraduate Pathway

Academically qualified applicants for Undergraduate Pathway who are unable to provide a language proficiency score (or provide one that is below the minimum) will be conditionally admitted to the Undergraduate Pathway program and required to complete INTO OSU Academic English through Level 4 before beginning the OSU academic course work portion of the program. All students have a study plan and receive academic advising that is reflective of their specific Conditional Undergraduate Pathway program.

Graduate Pathway

INTO Oregon State University's Graduate Pathway program is a pre-Master's program that provides international students a direct path to various graduate degrees at the university. The program gives students the academic foundation, essential language skills and GMAT/GRE test preparation to successfully move on to the Master's degree. Entry to this program requires satisfactory completion of a four-year undergraduate degree in an appropriate subject with at least a 2.75 GPA or equivalent overall and a minimum of 2.75 GPA for the final year of study and a 70 iBT TOEFL or equivalent test score (some options have higher entry requirements). All students have a study plan and receive academic advising that is reflective of their specific Graduate Pathway program.

Successful completion of Graduate Pathway progression requirements secures students a place in full-time graduate studies at Oregon State University in their respective field of study.

Conditional Graduate Pathway
Academically qualified applicants for Graduate Pathway who are unable to provide a language proficiency score (or provide one that is below the minimum) will be conditionally admitted to the Graduate Pathway program and required to complete INTO OSU Academic English through Level 5 before beginning the OSU academic course work portion of the program. All students have a study plan and receive academic advising that is reflective of their specific Conditional Graduate Pathway program.

When to Apply: International Undergraduate Students

The Office of International Admissions recommends that international undergraduate applicants submit a complete application and supporting documents preferably 4 to 6 months before the intended term start date.

Term	Start Date (First day of classes)
Summer 2014	June 23
Fall 2014	September 29
Winter 2015	January 5
Spring 2015	March 30
Summer 2015	June 22

For information about Admission of International Graduate Students, please see the Graduate Admissions Requirements section at <http://catalog.oregonstate.edu/ChapterDetail.aspx?key=36#Section1787>.

ADMISSION TO SUMMER SESSION

Students who wish to begin work on a degree during summer session at OSU must satisfy regular admission requirements and apply by the specified deadlines.

ADMISSION TO PROFESSIONAL PROGRAMS

Professional programs are accredited according to requirements set by professional societies. These programs often have more rigorous requirements for admission, continuation in the program, and acceptance of transfer credit. Therefore, admission to OSU is separate from admission to a professional program and does not guarantee such admission.

OSU-CASCADES CAMPUS

OSU-Cascades in Bend is a branch campus of Oregon State University that provides OSU's excellence in academics and innovative research, as well as the lifelong advantages of a premier research university. Within 18 undergraduate majors, 30 minors and options, and three graduate programs, students take classes with an average of only 17 students. Field studies, research projects, and internships and international opportunities are available to all students. A partner-

ship with Central Oregon Community College allows students to take lower-division courses before transitioning to OSU-Cascades for upper-division courses. The branch campus plans to expand to a four-year university beginning fall 2015. For information call 541-322-3100 or visit <http://www.osucascades.edu/>.

DEGREE PARTNERSHIP PROGRAMS - DUAL ADMISSION AND ENROLLMENT AT DESIGNATED COMMUNITY COLLEGES

Oregon State University offers special Degree Partnership Programs (dual admission and enrollment) with most of Oregon's community colleges:

1. Blue Mountain Community College in Pendleton
2. Central Oregon Community College in Bend
3. Chemeketa Community College in Salem
4. Clackamas Community College in Oregon City
5. Clatsop Community College in Astoria
6. Columbia Gorge Community College in The Dalles
7. Klamath Community College in Klamath Falls
8. Lane Community College in Eugene
9. Linn-Benton Community College in Albany
10. Mt. Hood Community College in Gresham
11. Oregon Coast Community College in Newport
12. Portland Community College
13. Rogue Community College in Medford [Pending]
14. Southwestern Oregon Community College in Coos Bay
15. Tillamook Bay Community College in Tillamook
16. Treasure Valley Community College in Ontario [Pending]
17. Umpqua Community College in Roseburg

OSU also has Degree Partnership Programs with four of Hawaii's seven community colleges:

1. Hawai'i Community College in Hilo, Hawaii (Big Island)
2. Kapi'olani Community College in Honolulu, Oahu
3. Leeward Community College in Pearl City, Oahu [Pending]
4. Maui College, University of Hawaii, in Kahului, Maui

These programs provide students with simultaneous access and admission/enrollment status at both OSU and the community college. There is one application process to attend both schools, advising is available at either campus, and the student has the opportunity to access services and participate in college life on both campuses. There is flexibility

in scheduling with access to more classes, financial aid is available for qualified students while attending both schools, and admitted students have access to library and computer lab resources at both campuses. For more information on Degree Partnership Programs (dual admission and enrollment), please contact the admissions office at the community college, OSU Degree Partnership Student Services Manager: 541-737-2790, or the University Partnership Programs Web page at <http://oregonstate.edu/partnerships/>.

Application deadlines for Degree Partnership Programs vary. Please refer to the DPP website at <http://oregonstate.edu/partnerships/application-deadlines> to assure that you meet the appropriate deadline.

CREDIT FOR MILITARY EXPERIENCE

Students are recommended to seek advice from their Academic Advisor prior to transferring in their Military Credits. Oregon State University grants up to 45 credits for military education as recommended by the American Council on Education's (ACE) *Guide to the Evaluation of Educational Experiences in the Armed Services*. This is in accordance with transfer credit policies at Oregon State University. Students may request evaluation of military credit by furnishing the Office of Admissions with a Joint Services Transcript or Navy SMART transcript or U.S. Coast Guard transcript. Transcripts may be obtained through these homepages:

- JST (<https://jst.doded.mil/official.html>) **Note:** Some browser security settings may raise a caution message before entering these Department of Defense websites.
- SMART (<http://www.cnmc.navy.mil/>) (Search for 'Smart Transcripts')
- U.S. Coast Guard Institute (<http://www.uscg.mil/>) (Search for 'Transcripts')
- Additional informational links to other service pages can be found on the ACE website (<http://www.acenet.edu/higher-education/topics/Pages/College-Credit-for-Military-Service.aspx>).

Oregon State University will grant 1.00 quarter credit for the course HHS 241 Lifetime Fitness Lab. For HHS 241 credit to be granted, please submit either the DD214 or an official ACE transcript. Credit will also be granted if one of the following military science courses has been completed successfully: Physical Fitness, Physical Education, or Physical Conditioning. To receive credit, please submit an official transcript from the institution.

Oregon State University will assess and award block transfer credit upon review of your military record. An evaluation report showing block transfer credits will be sent to you. Your major college will

receive a copy of your evaluation report and the ACE recommendation guideline. For a better understanding of how each college uses the 45-credit block of general elective credits there is a web page on the OSU Veterans website (go to <http://oregonstate.edu/veterans/home/>, click on Student Resources, then click on Evaluation of Military Credit) outlining this information. In addition, if you believe a specific military course, training, experience, etc. directly relates to a university course, you can complete a form to petition for Military Credit Course Substitution (go to <http://oregonstate.edu/veterans/home/>, click on Student Resources, then click on Petition for Military Credit Course Substitution).

PLACEMENT EXAMINATIONS

High school seniors planning to enter OSU must take the SAT or the ACT. These tests provide academic advisors with valuable information about a student's educational development, abilities, and aptitudes.

New students are required to take an online Math Placement Test (see http://www.math.oregonstate.edu/mlc_placement). Students who enter the university with previous language training from another institution and who wish to continue their study of the language are required to take a language proficiency examination to determine placement level. Please call the OSU School of Language, Culture, and Society at 541-737-4603. Other placement examinations may be required in certain majors.

REGISTRATION PROCEDURES

Once admitted to Oregon State University, students are eligible for course registration. Complete registration instructions, procedures, schedules and deadlines are detailed in the Schedule of Classes on the Web. A student is officially registered and eligible to attend classes only when all procedures have been completed. Students who make arrangements to pay outstanding university debts and who do not adhere to the agreed upon plan may be dis-enrolled.

In addition to the basic information regarding registration, the *Registration Information Handbook* is an essential resource to the student for the academic calendar, fee schedule, academic and other student regulations and procedures, final examination schedule, and listing of baccalaureate core courses.

RE-ENROLLMENT

Undergraduate students who wish to re-enroll in the university after an absence may do so providing they were eligible to re-enroll their last term of attendance. Students who have been absent four or more terms, not including summer terms, should contact the Registrar's Of-

fice to reactivate their records, at which time the current catalog becomes their catalog of record for graduation requirements. The university reserves the right to consider a student's status with respect to voluntary or involuntary leave, as well as any existing student conduct issues when requesting to re-enroll. Students who have been absent less than four terms are still considered active and register following the registration instructions in the current Registration Information Handbook in PDF format in the online catalog at <http://catalog.oregonstate.edu/Default.aspx?section=Registration>. International students who wish to re-enroll after an absence should check in with International Student Advising and Services (ISAS) to make sure they have the required documents to return.

Re-enrolling students who have attended another college or university since their last term at OSU are required to report that enrollment at the time of re-entry. Official transcripts must be forwarded to the Office of Admissions. Returning students with an OSU cumulative GPA below or very near 2.00 are reminded of the OSU graduation requirement (Academic Regulation 25e), which stipulates 2.00 as the minimum OSU cumulative grade-point average required to earn a baccalaureate degree from OSU.

All re-enrolling students are reminded of their responsibility to update any outdated information, such as address, in their OSU records. Contact the Registrar's Office to make changes.

OREGON TRANSFER MODULE-OSU VERSION

The Oregon Transfer Module (OTM) provides a one-year curriculum for students who plan to transfer to a state of Oregon two-year or four-year college/university of higher education. The Oregon Transfer Module is neither a certificate nor a degree; it represents the successful completion of certain general education courses. OTM completion will be noted in the student's record. The Oregon Transfer Module documents that a student has met a subset of the common general education requirements at all Oregon community colleges and Oregon University System institutions.

The Oregon Transfer Module requirements at Oregon State University are:

- 45 lower-division credits—minimum of 12 credits must be OSU course work according to the attached list
- Minimum grade of C– for each course
- Minimum cumulative GPA 2.0 at time Oregon Transfer Module is completed
- Students are allowed 3 S/U credits per full time term or a maximum of 9 S/U credits in the Oregon Transfer Module.

OSU students planning to complete the Oregon Transfer Module must file the OTM Completion Application with the Registrar's Office. Students should fill out the form when the module is completed or they are in the last term of completion.

Upon successful review by OSU and completion of the Oregon Transfer Module, a notation will be added to the student's OSU record indicating the module is complete and the date. The notation will appear on the transcript as follows:

"Oregon Transfer Module Completed day-month-year"

OREGON TRANSFER MODULE COURSES

Foundational Skills (12–13 credits)

Writing (6 credits)

Select two writing courses from the following:

- HC 199. Honors Writing (3)
- PHL 121. Reasoning and Writing (3)
- WR 121. English Composition (3)
- WR 201. Writing for Media (3)
- WR 214. Writing in Business (3)
- WR 222. English Composition (3)
- WR 224. Introduction to Fiction Writing (3)
- WR 241. Introduction to Poetry Writing (3)

Oral Communication (3 credits)

Select one speech course from the following:

- COMM 111. Public Speaking (3)
- COMM 114. Argument and Critical Disclosure (3)
- COMM 114H. Argument and Critical Disclosure (3)
- COMM 218. Interpersonal Communication (3)
- COMM 218H. Interpersonal Communication (3)

Mathematics (3–4 credits)

Select one mathematics course from the following:

- MTH 105. Introduction to Contemporary Mathematics (3)
- MTH 111. College Algebra (4)
- MTH 112. Elementary Functions (4)
- MTH 211. Foundations of Elementary Mathematics (4)
- MTH 241. Calculus for Management and Social Science (4)
- MTH 245. Mathematics for Management, Life, and Social Sciences (4)
- MTH 251. Differential Calculus (4)
- MTH 251H. Differential Calculus (4)

Introduction to Disciplines (30 credits)

Arts and Letters (9+ credits)

Select a minimum of three courses:

- ART 101. Introduction to the Visual Arts (4)
- ART 204. Introduction to Art History-Western (3)
- ART 205. Introduction to Art History-Western (3)
- ART 206. Introduction to Art History-Western (3)
- ART 207. Indigenous Art of the Americas (3)
- ENG 104. Intro to Literature: Fiction (3)

- ENG 104H. Introduction to Literature: Fiction (3)
- ENG 105. Introduction to Literature: Drama (3)
- ENG 106. Introduction to Literature: Poetry (3)
- ENG 201. Shakespeare (4)
- ENG 202. Shakespeare (4)
- ENG 204. Survey of British Literature: Beginning to 1660 (4)
- ENG 205. Survey of British Literature: Restoration to Romantic Era (4)
- ENG 206. Survey of British Literature: Victorian Era to 20th Century (4)
- ENG 207. Literatures of Western Civilization: Classical-Renaissance (4)
- ENG 208. Literatures of Western Civilization: 18th Century to Present (4)
- ENG 210. Literatures of the World: Asia (4)
- ENG 211. Literatures of the World: Africa (4)
- ENG 212. Literatures of the World: Meso/South America, Caribbean (4)
- ENG 213. Literatures of the World: Middle East (4)
- ENG 215. Classical Mythology (4)
- ENG 221. African-American Literature (4)
- ENG 253. Survey of American Literature: Colonial to 1900 (4)
- ENG 254. Survey of American Literature: 1900 to Present (4)
- ENG 260. Literature of American Minorities (4)
- ENG 275. The Bible as Literature (4)
- FILM 110. Introduction to Film Studies: 1895-1945 (3)
- FILM 125. Introduction to Film Studies: 1945-Present (3)
- FILM 220. Topics in Difference, Power, and Discrimination (4)
- FILM 245. The New American Cinema (4)
- FILM 265. Films for the Future (4)
- FR 270. France Today: Cultures Within and Beyond It's Borders (3)
- LING 208. Western Culture Study Abroad (3)
- LING 209. Cultural Diversity Study Abroad (3)
- LING 251. Language of Oregon (3)
- MUS 101. Music Appreciation I: Survey (3)
- MUS 102. Music Appreciation II: Periods and Genres (3)
- MUS 103. Music Appreciation III: Great Composers (3)
- MUS 108. Music Cultures of the World (3)
- MUS 121. Literature and Materials of Music I (3)
- RUS 231. Russian Culture (3)
- RUS 232. Russian Culture (3)
- RUS 233. Russian Culture (3)
- TA 147. Introduction to the Theatre (3)
- Social Sciences (9+ credits)**
Select a minimum of three courses:
- ANTH 110. Introduction to Cultural Anthropology (3)
- ANTH 208. Western Culture Study Abroad (3)
- ANTH 209. Cultural Diversity Study Abroad (3)
- ANTH 210. Comparative Cultures (3)
- ANTH 251. Language in the USA (3)
- AREC 250. Introduction to Environmental Economics and Policy (3)
- AREC 253. Environmental Law, Policy, and Economics (4)
- AREC 253H. Evolution of US Environmental and Natural Resources Law (4)
- DHE 270. Appearance, Power, and Society (4)
- ECON 201. Introduction to Microeconomics (4)
- ECON 201H. Introduction to Microeconomics (4)
- ECON 202. Introduction to Macroeconomics (4)
- ES 101. Introduction to Ethnic Studies (3)
- ES 212. Survey of Chicano/a-Latino/a Studies II (3)
- ES 213. Contemporary Latino/a Culture and Issues (3)
- ES 221. Survey of African American Studies I (3)
- ES 223. Survey of African American Studies II (3)
- ES 231. *Asian American Studies: Mid-1800s-Present (4)
- ES 233. Contemporary Issues and Cultures in Asian America (3)
- ES 241. Survey of Native Americans and Alaskan Natives (3)
- ES 243. Native American Experience in the 20th Century U.S. (3)
- FST 260. Food Science and Technology in Western Culture (3)
- GEO 105. Geography of the Non-Western World (3)
- GEO 106. Geography of the Western World (3)
- H 150. Environmental Health and Safety: Hits and Near Misses (3)
- H 210. Introduction to Health Services and Organizations (3)
- H 225. Social and Individual Health Determinants (3)
- HDFS 201. Contemporary Families in the U.S. (3)
- HST 101. History of Western Civilization (4)
- HST 101H. History of Western Civilization (4)
- HST 102. History of Western Civilization (4)
- HST 102H. History of Western Civilization (4)
- HST 103. History of Western Civilization (4)
- HST 103H. History of Western Civilization (4)
- HST 104. World History I: Ancient Civilizations (3)
- HST 105. World History II: Middle and Early Modern Ages (3)
- HST 106. World History III: The Modern and Contemporary World (3)
- HST 201. History of the United States (4)
- HST 202. History of the United States (4)
- HST 203. History of the United States (4)
- HST 203H. History of the United States (4)
- NUTR 216. Food in Non-Western Culture (3)
- PHL 150. Great Ideas in Society (3)
- PHL 160. Questions for Meaning: World Religions (3)
- PHL 170. The Idea of God (4)
- PHL 201. Introduction to Philosophy (4)
- PHL 205. Ethics (4)
- PHL 207. Political Philosophy (4)
- PHL 220. World-Views and Values in the Bible (4)
- PHL 251. Knowers, Knowing, and The Known (4)
- PHL 280. Ethics of Diversity (4)
- PS 201. Introduction to United States Government and Politics (4)
- PS 201H. Introduction to US Government Politics (4)
- PS 204. Introduction to Comparative Politics (4)
- PS 205. Introduction to International Relations (4)
- PS 205H. Introduction to International Relations (4)
- PS 206. Introduction to Political Thought (4)
- PS 206H. Introduction to Political Thought (4)
- PSY 201. General Psychology (3)
- PSY 202. General Psychology (3)
- SOC 204. Introduction to Sociology (3)
- SOC 205. Institutions and Social Change (3)
- SOC 206. Social Problems and Issues (3)
- WGSS 223. Women: Self and Society (3)
- WGSS 223H. Women: Self and Society (3)
- WGSS 224. Women: Personal and Social Change (3)
- WGSS 280. Women Worldwide (3)
- Science/Math/Computer Science (12+ credits)**
Select three courses, including at least one biological or physical science with a laboratory.
- ANS 121. Introduction to Animal Sciences (4)
- BI 101. General Biology (4)
- BI 102. General Biology (4)
- BI 103. General Biology (4)
- BI 211. Principles of Biology (4)
- BI 211H. Principles of Biology (4)
- BI 212. Principles of Biology (4)
- BI 212H. Principles of Biology (4)
- BI 213. Principles of Biology (4)
- BI 213H. Principles of Biology (4)
- BOT 101. Botany: A Human Concern (4)
- CH 122. General Chemistry (5)
- CH 123. General Chemistry (5)
- CH 202. Chemistry for Engineering Majors (3)
- CH 231. General Chemistry (4)
- and** CH 261. Laboratory for Chemistry 231 (1)
- CH 232. General Chemistry (4)
- and** CH 262. Laboratory for Chemistry 232 (1)
- CH 233. General Chemistry (4)
- and** CH 263. Laboratory for Chemistry 233 (1)
- CH 224H. Honors General Chemistry (5)
- CH 225H. Honors General Chemistry (5)
- CH 226H. Honors General Chemistry (5)
- CSS 205. Soil Science (4)
- or SOIL 205. Soil Science (4)
- FOR 240. Forest Biology (4)
- GEO 101. The Solid Earth (4)
- GEO 102. The Surface of the Earth (4)
- GEO 201. Physical Geology (4)
- GEO 202. Earth Systems Science (4)
- GEO 203. Evolution of Planet Earth (4)
- MB 230. Introduction to Microbiology (4)
- OC 103. Exploring the Deep: Geography of the World's Oceans (4)
- OC 103H. Exploring the Deep: Geography of the World's Oceans (4)
- PH 104. Descriptive Astronomy (4)
- PH 106. Perspectives in Physics (4)
- PH 201. General Physics (5)
- PH 202. General Physics (5)
- PH 203. General Physics (5)
- PH 211. General Physics with Calculus (4)
- PH 212. General Physics with Calculus (4)
- PH 213. General Physics with Calculus (4)

Electives (3+ credits)

One additional course as required to bring the total to 45. The course may be from any of the Introduction to Disciplines areas (Arts and Letters, Social Science, or Science/Math/Computer Science).

UNIVERSITY DEGREE REQUIREMENTS

Current degree requirements are printed each year in the “Academic Regulations and Procedures” section of the *Registration Information Handbook* and in the electronic or printed *General Catalog*, along with other information on a wide range of topics from minimum credits for full-time status to adding courses. All students are encouraged to review this part of the *Registration Information Handbook* and electronic or printed *General Catalog* each year for the most current information about OSU requirements and procedures.

Students with questions about baccalaureate degree requirements are encouraged to contact their advisor. Students needing assistance in selecting a major or selecting an advisor may wish to call or stop by the college office.

CATALOG YEAR POLICY

Graduation Requirements/ Catalog Contract Policy

When determining the graduation requirements for a given student:

- Students must meet all applicable degree requirements from the published catalog(s).
- The student’s catalog year for institutional and baccalaureate core requirements is established by his or her first term of attendance (matriculation date) at Oregon State University as an admitted student.
- The student’s catalog year for college/major/option/minor requirements is based on the date of declaration of the major/option/minor; consequently, a student’s first (primary) major/option must be in the same catalog year. If a primary option is declared in a subsequent academic year, the primary option will be aligned with the catalog year of the primary major. If the primary option did not exist in the catalog year of the primary major, the primary major will move to the catalog year that the primary option was declared.
- Additionally, while the student’s first major/option must be in the same catalog year, any additional declarations of majors/options/minors will be determined by the declaration dates (and corresponding catalog years). A student, in collaboration with an advisor, can also choose to graduate using a subsequent (to their most recent major declaration date) catalog year within the same major/option.
- At the time of graduation, all continuously enrolled students, including transfer students, may not use a catalog that is more than ten years old. Students may petition their college’s head advisor for an extension of a catalog greater than ten years

prior to their expected graduation term.

- Current OSU policy requires a student to reapply after not enrolling at OSU for four consecutive terms (not including summer terms). The published catalog for the resulting readmission/matriculation date will become the catalog of record for graduation requirements. The Planned Educational Leave Program defined in AR 13.d beginning with the 2011–2012 academic year, provides a mechanism for a student to keep their original catalog of record during a planned absence.
- For Degree Partnership Program students, the first term the student is admitted to OSU will be the matriculation date and will determine the catalog year for institutional and baccalaureate core requirements. The catalog year for college/major/option/minor requirements will be the same as all other OSU students.
- Every effort has been made to ensure the accuracy of information in the OSU General Catalog. However, Oregon State University or the Oregon State Board of Higher Education may find it necessary from time to time to make changes in courses, curricula, or degree requirements. Students already admitted to a program in which such changes have been made will be reasonably accommodated, if possible, to ensure their normal progress toward a degree. A student may, however, still be required to conform to changes in courses, curricula, or degree requirements as deemed necessary by Oregon State University or the Oregon State Board of Higher Education.

THE BACCALAUREATE EXPERIENCE

Oregon State University is committed to creating an atmosphere of intellectual curiosity, academic freedom, diversity, and personal empowerment. This will enable everyone to learn with and from others. This compelling learning experience celebrates knowledge; encourages personal growth and awareness; acknowledges the benefits of diverse experiences, world views, learning styles, and values; and engenders personal and societal values that benefit the individual and society.

OSU develops curricula based on sound disciplinary knowledge and input from practitioners. Students acquire skills and knowledge for a lifetime of learning, and will be involved in scholarly and creative pursuits.

The baccalaureate degree includes:

- the baccalaureate core
- an in-depth study in at least one major; and
- individual elective courses.

Minors are available in many areas

Registrar’s Office

Tom Watts,
Associate Registrar,
541-737-4048

Amy Flint,
Assistant Registrar,
541-737-4048

and are required in certain programs. Students should check college, school, program, or departmental requirements.

The Baccalaureate Core (bacc core) Curriculum represents what the OSU faculty believes is the foundation for students' further understanding of the modern world. Informed by natural and social sciences, arts, and humanities, the bacc core requires students to think critically and creatively, and to synthesize ideas and information when evaluating major societal issues. Importantly, the bacc core promotes understanding of interrelationships among disciplines in order to increase students' capacities as ethical citizens of an ever-changing world.

THE BACCALAUREATE CORE

The Oregon State University Baccalaureate Core (<http://catalog.oregonstate.edu/bcc.aspx>) is continually enriched. It emphasizes critical thinking, writing, world cultures, appreciation of differences, the arts, sciences, literature, lifelong fitness, and global awareness in 15 course categories. Over 250 courses are available to meet core requirements. Students must complete a total of 48 credits plus a Writing Intensive Course (WIC) of at least 3 credits.

The Baccalaureate Core Committee determines which courses will satisfy each of the requirements above. WIC courses will be reviewed by the WIC Director and the Baccalaureate Core Committee. The core is governed by the following rules: (1) No more than two courses from any one department may be used by a student to satisfy the Perspectives category of the core. (2) No single course may be used by a student to satisfy more than one subject area of the core even though some courses have been approved in more than one area. (3) Both Synthesis courses may not be taken in the same department.

Defining characteristics of baccalaureate core courses are available at <http://oregonstate.edu/ap/curriculum/baccore.html>. Additional information is available at <http://oregonstate.edu/main/baccalaureate-core>.

The purpose of the writing intensive requirement is to insure that each graduate is prepared to write in the discourse, conventions, and genres of his or her major field.

A student completing requirements for two majors, including double degrees as well as dual majors (one degree with two majors), may request that one WIC course satisfy the WIC requirement for graduation in both majors. **This opportunity is available if and only if:**

1. The discourse, written conventions, and genres of the two majors are closely related, **and**
2. The substitution of a WIC course

from one major for that in another major is approved in writing by the chairs or heads of both departments involved and the approval is placed in the student's academic file.

Students and advisors should be aware that in some cases, the WIC course in a major is an integral part of the degree and substitution may not be appropriate. The final decision rests with the department chair or head.

BACCALAUREATE CORE REQUIREMENTS

Skills Courses

(lower division except WIC) (15)

To support students' success in all courses, the following first-year Skills courses are to be taken and completed satisfactorily within the first 45 hours of OSU-generated credits.

- Writing I (WR 121, must earn at least C–)
- Mathematics (approved list below)
- Speech (approved list below)

To prepare for the upper-division Writing Intensive Course in the major, the following Skills course is to be taken and completed satisfactorily within the first 90 hours of OSU-generated credits:

- Writing II (approved list below)

For transfer students with sophomore standing or above, Writing II and Speech must be completed within the first 45 hours of OSU-generated credits. These requirements apply to all students, whether full time or part time.

Note: *No single course may be used by a student to satisfy more than one area of the core even though some courses are approved for more than one area.*

- Fitness (3)
- Mathematics: MTH 105, *Introduction to Contemporary Mathematics, or higher level mathematics (3)
- Writing I (3)
- Writing II (3)
- Speech (3)

Perspectives Courses (lower and upper division) (24)

No more than two courses from any one department may be used by a student to satisfy the Perspectives category of the core. GEO courses listed under Physical Science are considered to be from a different department than GEO courses listed under any other Perspective category. Choose an additional course from either Physical Science or Biological Science.

- Biological Science (including lab) (4)
- Physical Science (including lab) (4)
- Plus choice of additional physical or biological science (including lab) (4)

Take a minimum of one course in each of the following areas:

- Cultural Diversity (3)
- Literature and the Arts (3)
- Social Processes and Institutions (3)
- Western Culture (3)

Difference, Power, and Discrimination Courses (3)

Synthesis Courses (upper division) (6)

Both synthesis courses may not be taken in the same department.

- Contemporary Global Issues (3)
- Science, Technology, and Society (3)

WIC (Writing Intensive Course, upper division, included in credits for major) (3)

Total (48) + WIC (3) = 51

APPROVED BACCALAUREATE CORE COURSES

For the current and complete list of approved baccalaureate core courses, go to <http://catalog.oregonstate.edu/bcc.aspx>.

BACCALAUREATE CORE COURSES

Skills Courses (15)

To support students' success in all courses, the following first-year Skills courses are to be taken and completed satisfactorily within the first 45 hours of OSU-generated credits:

- Writing I (WR 121, minimum passing grade C–)
- Mathematics (approved list below)
- Speech (approved list below)

To prepare for the upper-division Writing Intensive Course in the major, the following Skills course is to be taken and completed satisfactorily within the first 90 hours of OSU-generated credits:

- Writing II (approved list below)

For transfer students with sophomore standing or above, Writing II and Speech must be completed within the first 45 hours of OSU-generated credits. These requirements apply to all students, whether full time or part time.

Fitness (3)

Choose HHS 231, plus a 1-credit course from HHS 241-HHS 248 listed below or any PAC course:

- HHS 231 LIFETIME FITNESS FOR HEALTH (2)
- HHS 241 LIFETIME FITNESS (1)
- HHS 242 LIFETIME FITNESS FOR HEALTH: CARDIO CONDITIONING LAB (1)
- HHS 243 LIFETIME FITNESS: RESISTANCE TRAINING (1)
- HHS 244 LIFETIME FITNESS: WEIGHT MANAGEMENT (1)
- HHS 245 LIFETIME FITNESS: RUNNING (1)
- HHS 246 LIFETIME FITNESS: WALKING (1)
- HHS 247 LIFETIME FITNESS: AQUATIC EXERCISE (1)
- HHS 248 LIFETIME FITNESS: YOGA (1)

Mathematics (3)

PERSPECTIVE COURSES (24)

No more than two courses (or lecture/lab combinations) from any one department may be used by a student to satisfy the Perspectives category of the core. GEO courses listed under Physical Science are considered to be from a different department than GEO courses listed under any other Perspective category. Choose one Biological Science lecture/lab combination, one Cultural Diversity, one Literature and the Arts, one Physical Science lecture/lab combination, one Social Processes and Institutions, one Western Culture, one Difference, Power, and Discrimination, plus one additional lecture/lab combination from either Physical Science or Biological Science.

Biological Science (Lecture/Lab) (4 or 8)

Choose 1 or 2 lecture/lab combinations. Combination is assumed (uses the same number) unless indicated in the title.

MAJOR PROGRAM

In-depth study in at least one area is required in each baccalaureate degree. Major requirements often include not only courses within the given discipline but also necessary prerequisites and work in related areas.

Students must satisfy all the requirements of their major department and major college. The dean's certification of fulfillment of all requirements of the major college is required.

UPPER-DIVISION COURSES

- Credits in upper-division courses:** minimum 60 (exclusive of upper-division physical education activity courses).
- Credits in each major:** minimum 36, including at least 24 in upper-division courses.

For further details on upper-division course requirements, see Academic Regulation 25c, Institutional Requirements for Baccalaureate Degrees, <http://catalog.oregonstate.edu/ChapterDetail.aspx?key=75#Section2893>.

PRACTICUM COURSES AND INTERNSHIPS

Academic performance is not the sole criterion for admission to and continuation in certain courses and programs at the university, particularly practicum courses and internships. The university may find it necessary to evaluate a person's behavior and background to determine the ability to maintain the standards of professional conduct which are necessary in some disciplines. An evaluation may take into consideration current performance as well as past experiences and actions which could effect the ability to perform in the particular course or program.

GRADE-POINT AVERAGE (GPA)

A minimum GPA of 2.00 on OSU cumulative grade-point average is required. See Academic Regulation 25e, Institutional Requirements for Baccalaureate Degrees, <http://catalog.oregonstate.edu/ChapterDetail.aspx?key=75#Section2893>.

TOTAL CREDITS

A minimum 180 earned credits, which must include:^{4,5}

- Credits in upper-division courses:** minimum 60 (exclusive of upper-division physical education activity courses).
- Credits in each major:** minimum 36, including at least 24 in upper-division courses.

Footnotes:

⁴ Some degree programs may require more than 180 credits.

⁵ Unearned credits are those courses for which a grade of F, N, U, I, W, Y, AUD, or WAU are assigned as a final grade for that course. All other grades are calculated as earned credit.

For further information on total credits required, see Academic Regulation 25c, Institutional Requirements for Baccalaureate Degrees, <http://catalog.oregonstate.edu/ChapterDetail.aspx?key=75#Section2893>.

ACADEMIC STANDING

Oregon State University expects students to maintain satisfactory academic progress toward degree completion. At the conclusion of each term, grade-point averages are calculated and academic standings determined for students seeking a baccalaureate degree according to the criteria outlined in the Grades, Regulations, and Records section of this catalog.

ACADEMIC RESIDENCE REQUIREMENT

Academic Regulation 25f (<http://catalog.oregonstate.edu/ChapterDetail.aspx?key=75#Section2893>), Institutional Requirements for Baccalaureate Degrees, states:

- A minimum of 45 of the last 75 credits must be completed while the student is in academic residence at OSU. "Academic Residence" is defined as OSU courses taken as a degree-seeking student of OSU or courses through one of the following approved special programs: Professional degree programs which require that the student enroll in another institution while finishing the bachelor's degree at OSU or an international study program sponsored by the Oregon University System.
- A minimum of 15 upper-division credits used to meet the preceding residency requirement (1) must be taken in each of the student's majors.
- Credits earned by special examination for credit (Academic Regulation 23) are not considered in academic residence.

OTHER GRADUATION REQUIREMENTS**BA Degree Requirements**

The bachelor of arts (BA) degree is conferred for broad and liberal education in various approved areas of studies (typically humanities, arts, social science, and sciences). Requirements for the BA degree differ from those for a bachelor of science (BS) degree in the same department. Many departments offer only one or the other of the two baccalaureate degrees. Check departmental curricula for detailed information. The BA degree requires second language proficiency, including American Sign Language (ASL), equivalent to that attained at the end of the second year course in the language as certified by the School of Language, Culture, and Society. See the Academic Regulations for more details.

Concurrent and Subsequent Baccalaureate Degrees

Academic Regulation 26: <http://catalog.oregonstate.edu/ChapterDetail.aspx?key=75#Section2894>

a. Concurrent Baccalaureate

Degrees: An undergraduate student may be granted two or more baccalaureate degrees (for example the BA or BS) at the same graduation exercise. The student must:

- Complete institutional, college, and departmental requirements for the degree;
- Complete, for each additional degree, a minimum of 32 credits more than the requirements of the curriculum requiring the least number of credits; and
- Complete each additional 32 credits in residence.

b. Subsequent Baccalaureate

Degree: A student who has received a previous baccalaureate degree from either OSU or another accredited university may be granted a subsequent baccalaureate degree. The student must:

- Complete, for a BA degree, the requirements for foreign language proficiency (AR 25d);
- Achieve a minimum of 2.00 on OSU cumulative grade-point average;
- Complete requirements of the major college and receive the dean's certification; and
- Meet the requirements for a concurrent degree as specified in AR 26a, if a previous baccalaureate degree has been received from OSU. The additional credits may be taken at any time prior to or subsequent to the granting of a previous OSU baccalaureate degree. Students with a baccalaureate degree from another institution

- must meet the Academic Residence requirement in AR 25f.
- c. A student seeking a baccalaureate degree under the provisions of either AR 26a or AR 26b also must satisfy the appropriate residence requirements as defined in AR 25f.

Subsequent Credentials: Minors, Certificates, Options, and Majors

Academic Regulation 27: <http://catalog.oregonstate.edu/ChapterDetail.aspx?key=75#Section2895>

- a. **Subsequent Minors and Certificates:** A student who has received a previous baccalaureate degree from either OSU or another accredited university or college may be granted a subsequent minor or certificate. The student must:
1. Complete current requirements for minor or certificate and receive the dean's approval;
 2. Achieve a minimum of 2.0 OSU cumulative grade-point average on work taken for subsequent credential;
 3. Academic residence: minimum 15 credits in residence.
- b. **Subsequent Options and Majors:** A student who has received a previous baccalaureate degree from OSU may be granted a subsequent option or major credential:
1. Complete current requirements for option or major and receive dean's approval;
 2. Achieve a minimum of 2.0 OSU cumulative grade-point average on work taken for subsequent credential;
 3. Academic residence: minimum 15 credits in residence.
- c. Additional credits necessary for subsequent credentials may be taken prior to or subsequent to the granting of a previous baccalaureate degree.

REQUIREMENTS FOR CERTIFICATES

See individual certificate programs described in this catalog.

REQUIREMENTS FOR ADVANCED DEGREES

For advanced degree requirements see the Graduate School section of this catalog or contact the Graduate School. Students who take courses they wish to apply toward an advanced degree before they have received baccalaureate degrees may have a limited number of credits reserved by petition. Also see Reserving Credits in the Graduate School section. A graduate student also may obtain baccalaureate degrees from Oregon State University by satisfying the requirements for subsequent degrees.

APPLYING FOR BACHELOR'S DEGREE AND GRADUATION

Students should consult with their advisor to check progress toward graduation requirements. Progress will be based on the formally declared major, minors, options, degree, and other applicable requirements. Prior to submitting an application for graduation the student is responsible for verifying that all of the aforementioned components of their declared program(s) are accurate and complete. Applications are submitted via MyOSU to the Office of the Registrar. They may be filed up to three terms before the expected graduation term so progress can be monitored each term. However, applications must be submitted no later than the end of the second week of the term in which the student plans to complete degree requirements. The Registrar's Office checks for total credits, academic residency, total upper-division credits and grade-point average.

Please keep the following in mind when using the online application for graduation:

1. Students should make all necessary changes to their program prior to submitting an application for graduation. In the interest of providing accurate degree audits, it is imperative that the curriculum under which the student applies for graduation accurately reflects their educational goals.
2. Undergraduates must be of senior standing before being eligible to submit an application.
3. Students who wish to change graduation dates or program information after the first application must cancel their existing application for graduation and file a new application in accordance with the stated deadline.
4. Students receiving multiple degrees will need to apply for each degree separately.
5. Students must be a current OSU student (see 'Re-Enrolling Students' below).

Additionally, please be aware that all corresponding transcripts are sealed, meaning the academic record cannot be altered, by the Office of the Registrar 90 days after the conferral of a degree. This ensures that the academic course work that reflects the components that substantiated the awarding of the degree is accurately and permanently recorded.

DEGREES WITH DISTINCTION

Graduates who have completed at least ninety credits at OSU or sixty upper-division credits at OSU, and who have an OSU cumulative GPA of 3.5 or higher, are awarded an OSU degree with distinction as follows:

Academic Distinction	OSU GPA Range	Graduation Honor Cord Color
<i>Cum Laude</i>	3.50–3.69	Orange
<i>Magna Cum Laude</i>	3.70–3.84	Gold
<i>Summa Cum Laude</i>	3.85–4.00	White

These distinctions are noted on diplomas.

UNDERGRADUATE RESEARCH/ARTS FELLOW HONOR DISTINCTION

Oregon State University recognizes significant engagement and accomplishment in undergraduate research and the arts by awarding an honor distinction of "Undergraduate Research/Arts Fellow" to students of all majors upon completion of a significant research or creative arts experience under faculty mentorship. "Research" here is intended to encompass modes of scholarship and inquiry as they are variously practiced and defined in OSU's academic disciplines. Students completing significant creative projects in the arts may receive the honorary distinction "Undergraduate Arts Fellow." The distinction will be noted on the student's transcript, and the student will receive a blue honor cord to be worn at graduation ceremonies.

To qualify for the Undergraduate Research/Arts Fellow distinction:

1. Students must demonstrate involvement in all major phases of their project including conception, implementation, and presentation. This involvement will generally consist of sustained work over multiple quarters resulting in an original contribution relative to the discipline.
2. The project presentation must be to an audience that extends beyond the immediate research group or creative context, for example at a public performance, departmental symposium, the annual Celebration of Undergraduate Excellence, a professional meeting, or through publication in a student or professional journal.
3. Evidence of the presentation must be submitted with the final honorary distinction application and deposited into the OSU Scholars Archive.
4. A member of the OSU Graduate Faculty must endorse the application, verifying satisfaction of the criteria described above.

To apply for the distinction, students should complete the OSU Undergraduate Research/Arts Fellow Honor Distinction Application, which will be made available on the Oregon State Undergraduate Research Framework website (<http://oregonstate.edu/students/research/>). The application includes a detailed narrative description of the project and the student's involvement in specific research/creative tasks, a timeline of the student's project engagement, details of the public presentation, and the Graduate Faculty member's endorsement. Applications are submitted to the head advisor in the students' major college, who will sign the application and transmit to the Office of the Registrar for processing. Applications may be submitted at any time during the undergraduate's career but no later than three weeks prior to a student's anticipated graduation date.

DISSERTATION/THESIS

Upon completion and acceptance of a dissertation/thesis at the conclusion of a program of study, the dissertation/thesis will be recorded on a student's transcript, notating the title and term/year that the dissertation/thesis was accepted by the university.

RE-ENROLLING STUDENTS

Re-enrolling students are reminded that graduation requirements may have changed. Students are responsible for consulting their college for changes in their curriculum. If a program has been discontinued, students cannot expect to continue pursuit of that program. Re-enrolling students are also reminded that individual retention and re-enrollment standards of specific colleges may be in effect.

TRANSFER STUDENTS

Oregon community college students entering OSU who have completed the Associate of Arts Oregon Transfer (AAOT) degree (meeting the OUS-Oregon Community College block transfer agreement) will satisfy the lower-division requirements of the baccalaureate core (except those in the synthesis requirement) and have junior standing for registration.

When entering OSU, Oregon community college students who have completed the Associate of Arts Oregon Transfer (AAOT) degree will have junior standing for registration and will satisfy the lower-division requirements of the baccalaureate core, except those in the synthesis requirement. The AAOT degree meets the OUS-Oregon Community College block transfer agreement.

TRANSFER CREDITS

Decisions on transfer courses meeting specific baccalaureate core (general education requirements) will be made by the Office of Admissions with the Faculty Senate and the Office of Academic Programs. Some requirements may be met by advanced placement or international baccalaureate. For more information, contact the Office of Admissions. Articulation tables for baccalaureate core courses can be found on the Web at http://oregonstate.edu/admissions/transfer/bacc_core_1140.html.

INTRODUCTION

These regulations and procedures are published to assist students by providing information that is essential for planning and pursuing their academic programs. Continuing efforts are made each year by the students, faculty, and administration to revise and improve these regulations in order to enhance the quality of the university's programs and the achievement of educational goals.

Every student is responsible for knowing the academic regulations and for observing the procedures that govern his or her relations with Oregon State University. Unless otherwise specified, these regulations apply to both undergraduate and graduate students. Any question regarding these regulations that cannot be answered by a student's academic advisor should be referred directly to the Office of the Registrar (B102 KAd). Additional information regarding Graduate School policies should be addressed to the Office of the Graduate Dean (A300 KAd).

Some students encounter special problems whose proper solution may require deviations from the academic regulations or procedures. Requests for such deviations in the regulations below must be presented to the Office of the Registrar on petition forms, which are available in that office. Petitions received by the registrar will be forwarded to the proper committee or office for review and appropriate action. Requests for deviations from Graduate School policies should be presented by letter to the graduate dean (See the Graduate School section of this catalog).

Other special problems may involve academic issues such as academic freedom in the classroom or evaluations of a student's academic performance. All students should appeal academic grievances first to the instructor of the course and then to the chair or head of the academic unit in which the course is offered. If the situation is not resolved to the student's satisfaction, an undergraduate student should consult with the head advisor of the college in which the course is offered to obtain further information about appeal procedures of the college or university; a graduate student should consult the dean of the Graduate School regarding academic appeal procedures above the departmental level. (Appeal procedures for other than academic grievances, e.g., grievances regarding student employment, financial aid, housing, discipline, human rights, etc. are outlined in the Student Life Policy and Regulations, which are available on the OSU website under "Student Conduct" or from the Office of Student Leadership and Involvement, 202 Memorial Union. Some of these regulations pertain to both undergraduate and graduate students.

The Graduate School section of this catalog outlines both academic appeal procedures and those relating to the employment of graduate students.)

AR 1. ADMISSION FOR NONDEGREE STUDENTS

- a. Nondegree enrollment status for undergraduate students is designed for students who wish to take undergraduate classes, but do not wish to pursue a degree or a specific postbaccalaureate credential. Nondegree undergraduate students are limited to taking a maximum of 8 credits per term. Nondegree Ecampus, International Exchange, credential and certificate students are not limited to 8 credits per term.
- b. A maximum of 36 credits attempted as a nondegree undergraduate student may be used to satisfy Baccalaureate degree requirements upon admission as a degree-seeking student. The most recent 36 credits (or all credits if fewer than 36) will be applied to the Baccalaureate requirements.
- c. Nondegree enrollment status for graduate students is designed for students who wish to take graduate courses but do not wish to pursue an advanced degree. Nondegree graduate students are not limited as to the number of courses (credits) taken per term.
- d. Credits earned while enrolled as a nondegree graduate student will not necessarily apply to a graduate program upon admission to degree-seeking status. The student should refer to the admission requirements given in the *Graduate School* section of this catalog. Communication with the Graduate School and specific academic programs is advised.
- e. Nondegree students seeking admission to a degree program may do so by filing an undergraduate, postbaccalaureate, or graduate application for admission.

AR 2. CREDIT FROM A TWO-YEAR INSTITUTION (UNDERGRADUATE STUDENTS)

- a. **College Transfer Credits:** Oregon State University accepts for credit toward a baccalaureate degree all college transfer work completed at an Oregon or other accredited community college up to 124 lower-division quarter credits. For Institutional Requirements for Baccalaureate Degrees, see AR 25. Students are encouraged to work with the relevant academic unit to ensure that transfer credits meet department and college requirements

for the degree. It would be unlikely for an individual student to be able to use all 124 credits toward an OSU baccalaureate degree. Transfer credits and grades are not used in calculating the OSU cumulative GPA. Students who hold OSU-approved direct transfer degrees from Oregon or other accredited community colleges (e.g., the Associate of Arts Oregon Transfer) or who have 90 or more credits accepted in transfer will be granted junior standing.¹ Students who hold OSU-approved direct transfer degrees will be considered to have met the Perspectives and Skills (except WIC) areas of the Baccalaureate Core. In addition, they must complete the upper-division Synthesis areas of the core. Students transferring from Oregon or other accredited community colleges who do not hold approved direct transfer degrees ordinarily will be given baccalaureate core credit in the Perspectives and Skills area on a course-by-course basis for work that is judged to be equivalent in content.

- b. **Transfer of Professional-Technical Credits:** a maximum of 12 quarter credits (8 semester credits) of professional-technical course work applicable in an associate's degree or certificate program at an accredited institution can be accepted upon admission to OSU as general elective credit (graded as Pass) and as part of the 124-quarter credit total that can be applied toward a baccalaureate degree.
- c. **Transfer of Professional-Technical Course Credits through Articulation Agreements:** Lower-division OSU credit may be awarded for specific professional-technical community college courses when those courses are validated by articulation agreement with the appropriate OSU department. This may be above the 12 quarter credits of general electives (graded as Pass) allowed when a student is admitted to OSU. Credit will be awarded only upon the recommendation of the appropriate department and college, and approval by the Curriculum Council. Community college professional-technical course work is not equated to upper-division OSU course work. These course credits will count as part of the 124 quarter credits defined in paragraph 2a above. OSU departments who have articulation agreements with community colleges regarding community college professional-technical courses shall review the agreements annually and forward a dated list of the articulated

community college courses to the Curriculum Council.

Footnote:

¹ Junior standing does not necessarily imply that OSU institutional, college, division, and/or departmental requirements, which are normally satisfied by OSU students prior to their junior year, have been satisfied.

AR 3. CREDIT FROM AN UNACCREDITED INSTITUTION (UNDERGRADUATES)

After three terms of work at Oregon State University satisfactory to the Undergraduate Admissions Committee, a student may request validation of work done in an unaccredited institution of collegiate rank. The committee will consider each petition separately and base its decision on all information available. In some instances, informal examinations by the departments concerned may be required. Credit for transfer of professional-technical work will be awarded in accordance with paragraphs 2b and 2c.

AR 4. CLASSIFYING STUDENTS

- a. **Undergraduate students:** A student who has earned at least 45 credits is classified as a sophomore. A student who has earned at least 90 credits is classified as a junior. A student who has earned at least 135 credits is classified as a senior.
- b. **Postbaccalaureate students:** A student holding a baccalaureate degree who is admitted to work toward a second baccalaureate degree or teaching certificate is classified as a postbaccalaureate student.
- c. **Graduate students:** A student who has been admitted to the Graduate School is classified as a graduate student.

AR 5. TRANSFER FROM ONE COLLEGE TO ANOTHER (UNDERGRADUATE STUDENTS)

Registered students may transfer from one college to another at any time. Returning but not-registered students may transfer colleges between the dates of readmission and registration.

AR 6. CHANGE IN CREDITS SCHEDULED

No change may be made in the number of credits specified for the various courses and published in the OSU *General Catalog*.

AR 7. MAXIMUM AND MINIMUM REGISTRATION

- a. The minimum number of credits for which a full-time undergraduate student may register is 12, and the maximum is 19, regardless of the method of grading used for the

classes selected. (In determining the load for students not normally held responsible for physical education, the credits in activity courses in physical education will be disregarded.) The maximum may be extended:

- 1. Up to and including 24 credits when a student has completed in his or her most recent term at least 12 credits in courses other than those graded P/N and S/U with a grade-point average of 3.00 or better or when a student has filed with the registrar a petition approved by his or her advisor and college dean (or head advisor).
 - 2. Over 24 credits by petition approved by a student's advisor and college dean (or head advisor) and the Academic Requirements Committee and filed with the registrar.
- b. The minimum number of credits for a full-time graduate student is 9; the maximum is 16. The maximum can be extended by approval of the dean of the Graduate School.
 - 1. Degree-seeking graduate students must take a minimum of 3 credits for any term in which they are enrolled.
 - 2. The following FTE and credit allowances are permitted for graduate students holding an academic appointment.

FTE	Credits
.15 to .29	15
.30 to .50	12

Appointees on graduate assistantships are limited to the above credits during each term.

AR 8. LATE REGISTRATION

Registration is permitted through the tenth class day of each term. Late fees are assessed in accordance with the fee policies stated in the *Schedule of Classes*.

AR 9. ADMISSION TO CLASS

- a. Instructors will receive lists of students in their classes within two days after the opening of the term. Subsequent lists will include the names of later registrants. Students whose names appear on these lists are officially registered; others are to be referred immediately to the Registrar's Office for completion of registration.
- b. If it is anticipated that the demand for enrollment in a given course will exceed the maximum number that can be accommodated, the department offering the course may designate it in the *Schedule of Classes*

with the code "NSHD" (no-show-drop). A student who is registered for such a course who attends no meetings of the course during the first five school days of the term will be dropped from the course by the instructor, unless the student has obtained prior permission for absence. If such action is taken, the instructor will send written notice through the department to the Registrar's Office, which in turn will notify the student that the course has been dropped from his or her schedule. Students should not assume they have been dropped unless they receive notification from the Registrar's Office. No fee will be charged.

AR 10. ELIGIBILITY

To be eligible to hold office or to participate in any extracurricular activity supervised by Oregon State University, students must meet certain requirements.

- a. For student activities, students are responsible for following the Student Life Policy and procedures.
- b. For participation in intercollegiate athletics, students must meet all institutional Pac-12 and NCAA requirements. Students should contact the Compliance Office in the Department of Intercollegiate Athletics on all such matters.

AR 11. ADDING AND DROPPING COURSES

- a. Students may add courses through the first ten class days of each term, depending on the nature of the course and the availability of space. From the sixth class day through the tenth class day of each term, permission (signature) of the instructor offering the course must be obtained.
- b. A student may drop courses without responsibility for grades through the tenth class day of each term. After the tenth class day of each term courses may not be dropped. Failure to drop a course properly will result in an F grade being recorded; courses properly dropped do not appear on the student's transcript.
- c. Add/drop fees will be assessed in accordance with the fee policies stated in the *Schedule of Classes*.

AR 12. WITHDRAWAL FROM INDIVIDUAL CLASSES

Any student may withdraw from a maximum of 12¹ individual OSU credit bearing classes throughout their undergraduate career² at OSU³. Any student may petition for an exception to this limitation if the justification for withdrawal

is clearly associated with circumstances beyond the student's control. Withdrawal from a class with a W grade begins after the tenth day of classes and continues through the end of the seventh week of classes. After the seventh week of classes, students are expected to complete the program attempted and will receive letter grades (A, B, C, D, F, I, S, U, P, N) for all classes in which enrolled unless they officially withdraw from the university. Procedures for withdrawal from individual classes are outlined in the term *Schedule of Classes*.

Footnotes:

¹ Complete withdrawal from the university, as defined in AR 13, is not included in the maximum of 12 individual OSU classes.

² This regulation applies to undergraduate, postbaccalaureate, and nondegree undergraduate students.

³ The maximum withdrawal count will begin for all students starting fall 2012.

AR 13. WITHDRAWAL FROM THE UNIVERSITY

- Any student in good standing (See AR 22) is entitled to withdraw without prejudice at any time prior to the beginning of finals week. The student may accomplish this by completing the online withdrawal survey available through Online Services.
- Withdrawal from the university prior to the beginning of finals week will result in the grade of W being recorded for each course for which the student is registered.
- When a student's academic progress is interrupted by an emergency situation such as serious illness, accident, or death of a family member, within the last four weeks of the term, and the student submits evidence of such to the registrar, he or she may withdraw from the university with I grades in all subjects.
- Undergraduate Planned Educational Leave Program. The Undergraduate Planned Educational Leave Program (PELP) is a voluntary, temporary, planned interruption or pause in a student's regular, full-time education. Its purpose is to enhance an undergraduate student's prospect of successful completion of their academic program. The PELP provides one opportunity¹ for a student to arrange a voluntary absence for as many as six consecutive regular academic terms (not including the summer terms). The PELP is designed to allow a student to pursue other activities that will assist them in clarifying their educational goals, such as job opportunities and experiences away

from campus, military deployment, time to resolve personal or medical problems, or other similar pursuits. The PELP allows an undergraduate student to temporarily suspend their academic work for a period of time (in accordance with AR 13a, 13b, and 13c above), and resume their studies with minimal procedural difficulties. The PELP \$25 non-refundable application fee allows an undergraduate student to maintain their official standing as a student at OSU and reserves the student's right to keep their original academic catalog² active during their absence. Beginning with the 2011–2012 academic year, all OSU undergraduate students³ are eligible to request leave through the PELP. The university reserves the right to consider a student's current academic standing and any existing student conduct issues prior to approving the voluntary PELP leave request. Students who withdraw from OSU prior to the 2011–2012 academic year and who are away from campus for four or more consecutive regular academic terms (not including summer terms) must re-enroll with OSU to re-establish their relationship as an OSU student and their academic catalog will be reset to the academic year they return to OSU.

Transcript Notation

A notation of the dates of any approved leave will be indicated on each student's official transcript.

Footnotes:

¹ Military deployments are an exception to this limitation. All military personnel who are deployed for military service may submit a voluntary leave request for each deployment.

² In accordance with the university's catalog policy on the inside cover of the *General Catalog*.

³ The PELP began with the 2011–2012 academic year (Summer 2011). Any former OSU students who attended OSU prior to the 2011–2012 academic year and have been absent for four or more consecutive regular academic terms will be held to OSU's prior policy that resets the academic catalog to the catalog in effect at the time they return to OSU.

AR 14. ATTENDANCE

Attendance is one of the most important factors in a student's academic success. Therefore, an instructor may consider attendance in arriving at a student's grade. While attendance should not be the primary factor in determining a student's academic accomplishment in a course, it may be used as a partial measure of performance.

AR 15. HONESTY IN ACADEMIC WORK

The administration of the classroom rests with the instructor. When evidence of academic dishonesty comes to the instructor's attention, the instructor should: (a) document the incident, (b) permit the accused student to provide an explanation, (c) advise the student of possible penalties, and (d) take action. The instructor may impose any academic penalty up to and including an F grade in the course after consulting with his or her department chair and informing the student of the action taken. Using the standard form, the instructor must report the incident and the action taken to his or her department chair, who, in turn, shall forward the report to his or her dean.

If the student is not enrolled in the college or school in which the course is offered, the dean of that college shall forward the report to the dean of the college or school in which the student is enrolled for possible disciplinary action.

Grade penalties imposed as a result of academic dishonesty may be appealed by the student in accordance with the procedures developed by the department and college or school in which the course is offered.

AR 16. FINALS WEEK

- No final, midterm, or comprehensive examinations shall be given during the week preceding final examination week. (Examinations on laboratory work, course material covered by "weekly" or "section" quizzes, television courses, ROTC activities, and physical education activities are allowed.)
- Course work shall continue up to final week. Final examinations shall be given during finals week in accordance with the finals week schedule. If a final examination is not to be given in a course, this action must be approved by the department with notification to the Registrar's Office. Requests for changes in the time of final examinations will be submitted to the Registrar's Office.
- All student petitions for changes in the time of final examinations must be made using forms available from the Registrar's Office. (A summary of university final examination policy is printed on the form.) Petitions for changing final examinations are submitted directly to the instructor. Students may forward disapproved petitions through the dean of the college to the Registrar's Office. Requests to change the assigned final examination time for an entire class must be approved by the Registrar's Office. Final examinations may not

be changed to the week preceding final week without approval of the Academic Requirements Committee.

- d. No extracurricular activities or curricular activities other than examinations and final class meetings shall be scheduled during final week.

AR 17. GRADES

The grading system consists of twelve basic grades, A, A-, B+, B, B-, C+, C, C-, D+, D, D-, and F. The grade of A denotes exceptional accomplishment; B, superior; C, average; D, inferior; F, failure. Other marks are I, incomplete; W, withdrawal; R, thesis in progress; P, pass; N, no-credit; S, satisfactory; U, unsatisfactory; AUD, audited course; WAU, withdrawal from audited course; NG, no basis for a grade (administratively assigned by the Registrar's Office, see below); WC, complete withdrawal.

When a requirement of a course has not been completed for reasons acceptable to the instructor and the rest of the academic work is passing, a report of I (incomplete) may be made and additional time granted. The I is only granted at the discretion of the instructor. The instructor must submit the grade the student will earn if the missing work is not completed. That alternate grade will become the default grade if the missing work is not completed. The instructor documents the deficiency and the deadline for completing the missing work. A record of the deficiency shall be kept on file in the unit or department office. The allotted time awarded shall not exceed one calendar year except by petition* or the time of the degree conferral, whichever comes first. To remove the I grade, the student must complete the deficiency within the allotted time and the instructor will then submit the appropriate grade. If the student fails to complete the work within the allotted time, the Registrar's Office will automatically change the I grade on the student's record to the alternate grade submitted by the instructor at the time the I was given. The alternate grade will be included in the grade point average. Under no circumstances shall a student who earns an A-F grade or an N or U grade have his or her grade changed retroactively to an I grade.

When an instructor does not submit a grade for a student, the Registrar's Office will automatically record an interim Y code. To remove the Y grade, the instructor must submit a Change of Grade with the Registrar's Office. If no such change is made, the Registrar's Office will change the interim Y grade to a grade of NG, either at the end of 1 year or at the time of degree conferral, whichever comes first.

An instructor may move to correct a grade by filing a Change of Grade in

the Registrar's Office. Grade changes for students of a permanently separated instructor will be managed by the department chair of the course involved. Upon permanent separation from the university an instructor's change of grade will not be accepted by the Office of the Registrar. The Office of the Registrar will routinely review grade changes.

**A student may petition via the Office of the Registrar for an extension of the one calendar year deadline with the concurrence of the faculty. An approved petition will grant an extension of a single additional term, with a maximum of three total extensions being possible. An approved petition for an extension of time to remove an incomplete will be voided at the time of degree conferral.*

Click here for sample Contract for Completion of I Grade

AR 18. ALTERNATIVE GRADING SYSTEMS

In addition to traditional letter grading (A-F), Oregon State University has adopted two alternative grading systems to be employed in accordance with the provisions outlined below:

a. Satisfactory/Unsatisfactory (S/U)

- Undergraduate students may elect to be graded on a Satisfactory/Unsatisfactory (S/U) basis in a course (except P/N courses) under the following conditions:

- A maximum of 36 credits of those presented in satisfaction of the baccalaureate degree may have been graded on an S/U basis at Oregon State University.
- A student normally elects the option S/U at the time of registration. Changes either to or from S/U grading will be permitted through the end of the seventh week of any term.
- A student must obtain the approval of his or her academic advisor or dean in order to elect to be graded on an S/U basis.

- Graduate students may elect to take undergraduate courses on the S/U basis except those courses required for the removal of deficiencies. Graduate courses may also be taken on an S/U basis. (Such courses cannot be used as part of a student's graduate program. All other provisions of S/U grading apply to graduate students.)
- A grade of S (satisfactory) shall be equivalent to grades A, A-, B+, B, B-, C+, C, and C-. A grade of U (unsatisfactory) shall be equivalent to grades D+, D, D-, or F.
- Grades of S or U shall have no grade-point equivalents; hence

such grades shall not be included in the computation of grade-point averages. The credit of courses in which an S grade is obtained shall be counted toward graduation. Credits shall not be awarded for U grades.

- Election of S/U grading for a course shall be known only to the student and the academic advisor. Instructors shall enter on grade forms the traditional letter grade (A-F) earned. Automatic conversion to S grades and to U grades will be made in the Registrar's Office. Grades of I, or W may be assigned wherever appropriate.

- In compliance with Section III of the Statement on Student Rights, Freedoms, and Responsibilities (dated April 28, 1969), disclosure or nondisclosure of the traditional letter grades received in courses in which S grades were awarded is recognized as an exclusive right of the individual student. The Registrar's Office is obliged and authorized to honor requests for disclosure, provided that the express consent of the student is obtained.

b. Pass/No Credit (P/N)

- Those courses in which traditional letter grading has been deemed inappropriate because of the nature of the course content or the objectives of the course are graded on a Pass/No Credit (P/N) basis.
- Grades of P or N shall have no grade-point equivalents; hence such grades shall not be included in the computation of grade-point averages. The credits of courses in which a grade of P is obtained shall be counted toward graduation. Credit shall not be awarded for N grades.
- Departments are authorized to designate Pass/No Credit courses, subject to the following guidelines and procedures:
 - The principal criterion for choice of grading system is enhancement of the educational experience for the student;
 - The nature, structure, and/or objectives of a course may suggest that the Pass/No Credit grading system be adopted. It is anticipated that courses graded on this basis will generally fall into one of the following categories: skill-building courses or practicums, courses which stress orientation and awareness rather than academic preparation;

- c. The designation of Pass/No Credit grading for a course will follow the academic college's recommendation and approval by the University Curriculum Council, and in the case of graduate courses, by the Graduate Council. Designation of courses for P/N grading must be completed prior to the opening of the term in which the course is offered and normally prior to preparation of the Schedule of Classes.
4. Courses approved for grading on a Pass/No Credit (P/N) basis are identified in the *General Catalog* course descriptions and in the Schedule of Classes.
- c. Nothing stated in the above paragraphs shall be construed as constituting support for petitions requesting change of grade in courses taken during or prior to spring term, 1971.

AR 19. GRADE POINTS

Grade points are computed on the basis of:

- 4 points for each credit of A grade,
- 3.7 for each credit of A– grade,
- 3.3 for each credit of B+ grade,
- 3.0 for each credit of B grade,
- 2.7 for each credit of B– grade,
- 2.3 for each credit of C+ grade,
- 2.0 for each credit of C grade,
- 1.7 for each credit of C– grade,
- 1.3 for each credit of D+ grade,
- 1.0 for each credit of D grade,
- 0.7 for each credit of D– grade, and
- 0 for each credit of F.

Marks of I, W, P, N, NG, R, S, U, AUD, WAU, and WC are disregarded in the computation of points. The grade-point average (GPA) is the quotient of total points divided by total credits; total credits are the number of term credits in which grades A, B, C, D, and F are received. Thus a person receiving 1 credit of A, 2 credits of B, 3 credits of C, 4 credits of D, 5 credits of F would have 20 grade points (1 x 4 plus 2 x 3 plus 3 x 2 plus 4 x 1 plus 5 x 0). The grade-point average would be 20 (grade points) divided by 15 (credits) equals 1.33. A C average on 15 credits attempted would require 30 grade points; if the student has 20 points, he or she is 10 grade points deficient.

AR 20. REPEATED COURSES

If a student repeats an Oregon State University course, the grade from each attempt¹ will appear on the student's academic record but only the second attempt will count toward the student's institutional credits, requirements, and grade-point average². An academic unit³ may, however, include subsequent at-

tempts after the second attempt to meet individual course degree requirements associated with the baccalaureate core/majors/options/minors/certificates/endorsements. A course may not be repeated on an S/U basis if it was taken previously on a normal grade basis⁴.

Footnotes:

¹ An attempt comprises a final grade in a course where the grade is: A, A–, B+, B, B–, C+, C, C–, D+, D, D–, F, S, U, P, NP or an I/Alternate Grade (where the Alternate Grade is one of these grades).

² Recognized repeatable courses as defined in the Oregon State University course catalog, such as activity courses, research, seminars, and selected topics, do not come under this restriction. Additionally, if a course has been approved as a multiple repeatable course for credit and grade points, each attempt will be included in the institutional credits and grade-point average until it reaches its defined limit (total allowable attempts or credit maximums for the course). Further, the Office of the Registrar will include all courses from the first repeat taken until it reaches the maximum total allowable attempts or credit maximums for the course. All subsequent repeats after the repeat maximum has been reached will be excluded from both institutional credits earned and grade-point average calculations.

³ Academic Unit: College, School, or Department

⁴ Normal Grade Basis is defined as any grade of A, A–, B+, B, B–, C+, C, C–, D+, D, D–, F, or any I/Alternate Grade (where the Alternate Grade is one of these grades).

AR 21. HONOR ROLL

At the close of each term, the OSU Registrar publishes a list containing the names of all undergraduate and postbaccalaureate students who for the term have completed at least 12 graded credits with a grade-point average of 3.50 or above.

AR 22. SATISFACTORY ACADEMIC STANDING (FOR UNDERGRADUATE STUDENTS)

Oregon State University expects students to maintain satisfactory academic progress toward degree completion. At the conclusion of each term, grade-point averages are calculated and academic standings determined for students seeking a baccalaureate degree according to the criteria outlined below. Students whose standings evidence a lack of satisfactory progress will be warned of this condition and advised to seek help from their academic advisors.

- a. **Academic Warning:** Students with a term GPA below 2.0 will be placed on Academic Warning.
- b. **Academic Probation:** Students who have attempted¹ 24 or more credits at OSU and have an OSU cumulative GPA below 2.0 will be placed on Academic Probation. Students who attain a cumulative

GPA of 2.0 or better are removed from Academic Probation.

- c. **Academic Suspension:** Students who are on Academic Probation and have a subsequent term GPA below 2.0 will be placed on Academic Suspension. Academic Suspension is recorded on the student's academic record. Students who are academically suspended are denied all the privileges of the institution and of all organizations in any way connected to it, including any university-recognized living group.
- d. **Reinstatement to the University:** Suspended students will be considered for reinstatement to the university after two years or completion of a minimum of 24 quarter credits of transferable college-level work at an accredited college or university, with a GPA of 2.5 or above.

The Faculty Senate Committee on Academic Standing is charged with the responsibility for enforcement of the above regulations on Satisfactory Academic Standing. Additionally, this committee has discretionary authority to grant exceptions and to develop guidelines for the administration of these regulations.

Footnote:

¹ An attempt comprises a final grade in a course where the grade is: A, A–, B+, B, B–, C+, C, C–, D+, D, D–, F, S, U, P, NP, I/Alternate Grade (where the Alternate Grade is one of these grades), W, or Y.

AR 23. SPECIAL EXAMINATION FOR CREDIT

A regularly enrolled student in good standing, either graduate or undergraduate, currently registered at Oregon State University and wishing credit for an OSU course for which a grade has not been previously received, may petition for credit examination under the following conditions:

- a. The application for such examination shall be presented on an Official Student Petition and shall bear the approvals of the dean of the student's college, the dean of the college in which the course is offered, and head of the department in which the course is offered. Petitions for special examination for credit may be approved or denied at the sole discretion of the department/college or the faculty member offering the course, taking into account both the academic merit of the petition and the department/college's ability to deploy adequate resources to prepare, administer, and grade such an examination.
- b. In no case may such examination be based on work used for graduation from high school, or in a foreign

- language that is the mother tongue of the applicant, or in courses not listed in the Oregon State University General Catalog.
- Grades earned in special examinations shall be submitted and recorded in the same way as for regularly registered courses, and will count with respect to repeating a course as defined in AR 20.
 - A student may not petition for credit by special examination for a course in any term in which the student is or has been enrolled in the course after the add/drop deadline for that term.
 - An examination for credit will not be approved for courses below the level for which college credit has previously been granted.
 - No examination may be taken until the applicant has received a permit from the Registrar's Office, for which a fee of \$80 will be charged.¹
- offering the course, taking into account both the academic merit of the petition and the department/college's ability to deploy adequate resources to prepare, administer, and grade such an examination.
- No examination may be taken until the applicant has received a permit from the Registrar's Office, for which a fee of \$80 will be charged.
 - A minimum grade of C (or equivalent) must be attained in an examination for that waiver to be granted.
 - Credit will not be granted for courses waived.
 - This regulation does not invalidate the right of a dean of a college or head of a department to waive a course requirement of their particular college or department, respectively.

above. WIC courses will be reviewed by the Writing Advisory Board. The core is governed by the following rules: (1) No more than two courses from any one department may be used by a student to satisfy the Perspectives category of the core. (2) No single course may be used by a student to satisfy more than one subject area of the core even though some courses have been approved in more than one area. (3) Both Synthesis courses may not be taken in the same department.³

b. An undergraduate student may be granted a baccalaureate degree with one or more majors.

- c. Credits:** Minimum 180 earned credits, which must include:^{4,5}

1. Credits in upper-division

courses: minimum 60 (exclusive of upper-division physical education activity courses).

2. Credits in each major:

minimum 36, including at least 24 in upper-division courses.

- d. Baccalaureate Degrees:** All students receiving a BA degree shall have proficiency in a second language, including American Sign Language (ASL), equivalent to that attained at the end of the second year sequence with a grade of C– or better as certified by the School of Language, Culture, and Society. Colleges offering both the BA and the BS will have specific requirements distinguishing the two degrees. The college requirements for the two degrees will place comparable demands upon the time and effort of students, and that assessment of comparability will include the foreign language requirement for the BA. Academic units offering both the BA and BS may have specific requirements distinguishing the two degrees.
- e. Grade-Point Average:** minimum of 2.00 on OSU cumulative grade-point average.
- f. Academic Residence:**

- A minimum of 45 of the last 75 credits, or 150 total credits, must be completed while the student is in academic residence at OSU. "Academic Residence" is defined as OSU courses taken as a degree-seeking student of OSU or courses through one of the following approved special programs: Professional degree programs which require that the student enroll in another institution while finishing the bachelor's degree at OSU or an international study

AR 25. INSTITUTIONAL REQUIREMENTS FOR BACCALAUREATE DEGREES

- a. Baccalaureate Core:** Each student will complete the following requirements:

1. Skills Courses (15 credits)

Mathematics, Writing I, and Speech must be taken and completed satisfactorily within the first 45 hours of OSU-generated credits. Writing II must be taken and completed satisfactorily within the first 90 hours of OSU-generated credits.

Fitness (3 credits)
Mathematics (3 credits)
Speech (3 credits)
Writing I (3 credits)
Writing II (3 credits)

2. Perspectives Courses (24 credits)

Physical science (with lab) (4 credits)
Biological science (with lab) (4 credits)
Plus choice of second course in either of the above (with lab) (4 credits)
Take a minimum of one course in each of the following areas:
Western culture (3 credits)
Cultural diversity (3 credits)
Literature and the arts (3 credits)
Social processes and institutions (3 credits)

3. Difference, Power, and Discrimination Courses (3 credits)

4. Synthesis Courses (6 credits) Science, technology, and society (3 credits)

Contemporary global issues (3 credits)

5. Writing Intensive Courses, upper division (WIC) (3 credits)

The Baccalaureate Core Committee determines which courses will satisfy each of the requirements

Footnote:

¹ As an alternative to departmental examinations, students may seek credit through the College Level Examination Program (CLEP) to the College Entrance Examination Board. CLEP includes nationally normed subject matter examinations and general examinations covering material included in a number of relatively standard courses taught in colleges and universities throughout the United States. Some of these subject matter examinations and general examinations have been accepted by departments at this institution. Policy guidelines have been established that make it possible for admitted and enrolled students to (a) transfer credits earned through these accepted CLEP subject matter and general examinations to this institution, providing certain criteria are met, and (b) earn credits through accepted CLEP subject matter and general examinations providing certain criteria are met. Further information about CLEP may be obtained from the Office of Admissions, B104 Kerr Administration Bldg.

AR 24. SPECIAL EXAMINATION FOR WAIVER (UNDERGRADUATE STUDENTS)

A student may petition for examination to waive a course under the following conditions:

- The application for examination to waive a course shall be presented on an Official Student Petition and shall bear the recommendations of the dean of the student's college, the dean of the college in which the course is offered, and head of the department in which the course is offered. Petitions for special examination for waiver may be approved or denied at its sole discretion by the department/college

program sponsored by the Oregon University System.

2. A minimum of 15 upper-division credits used to meet the preceding residency requirement (1) must be taken in each of the student's majors.
3. Credits earned by special examination for credit (AR 23) are not considered in academic residence.

g. Dean's certification of fulfillment of all requirements of major college. (For details, see college advisors and deans.)

h. Restrictions: A maximum number of credits may be applied to the Baccalaureate Degree as follows:

1. Transfer from first professional programs such as Law, Medicine, Pharmacy, and Veterinary Medicine: maximum 48 quarter credits.
2. Music courses (applied music): maximum 12 credits. (This restriction is not applicable to majors in music.)
3. Physical activity courses: maximum 11 credits.
4. Courses graded on an S/U basis at Oregon State University: maximum 36 credits.
5. Academic Learning Service courses: maximum 15 credits.

i. Application for a Degree: To become a candidate for a degree, a student must have achieved senior standing and must make formal application for the degree. It is recommended that the student file an application with the registrar three terms prior to the term in which he or she wishes to graduate. The student's deadline to file an application with the registrar is the end of the second week of the term in which he or she expects to complete requirements for a degree. [Approved by Faculty Senate 1/8/09.]

Footnotes:

³ Lists of approved courses may be obtained from advisors. Approved courses are also listed in the *OSU General Catalog*.

⁴ Some degree programs may require more than 180 credits.

⁵ Unearned credits are those courses for which a grade of F, N, U, I, W, Y, AUD, or WAU are assigned as a final grade for that course. All other grades are calculated as earned credit.

AR 26. CONCURRENT AND SUBSEQUENT BACCALAUREATE DEGREES

a. Concurrent Baccalaureate Degrees: An undergraduate student may be granted two or more baccalaureate degrees (for example the BA or BS) at the same graduation

exercise. The student must:

1. Complete institutional, college, and departmental requirements for the degree;
2. Complete, for each additional degree, a minimum of 32 credits more than the requirements of the curriculum requiring the least number of credits; and
3. Complete each additional 32 credits in residence.

b. Subsequent Baccalaureate

Degree: A student who has received a previous baccalaureate degree from either OSU or another accredited university may be granted a subsequent baccalaureate degree. The student must:

1. Complete, for a BA degree, the requirements for foreign language proficiency (AR 25d);
2. Achieve a minimum of 2.00 on OSU cumulative grade-point average;
3. Complete requirements of the major college and receive the dean's certification; and
4. Meet the requirements for a concurrent degree as specified in AR 26a, if a previous baccalaureate degree has been received from OSU. The additional credits may be taken at any time prior to or subsequent to the granting of a previous OSU baccalaureate degree. Students with a baccalaureate degree from another institution must meet the Academic Residence requirement in AR 25f.

c. A student seeking a baccalaureate degree under the provisions of either AR 26a or AR 26b also must satisfy the appropriate residence requirements as defined in AR 25f.

AR 27. SUBSEQUENT CREDENTIALS: MINORS, CERTIFICATES, OPTIONS, AND MAJORS

a. Subsequent Minors and

Certificates: A student who has received a previous baccalaureate degree from either OSU or another accredited university or college may be granted a subsequent minor or certificate. The student must:

1. Complete current requirements for minor or certificate and receive the dean's approval;
2. Achieve a minimum of 2.0 OSU cumulative grade-point average on work taken for subsequent credential;
3. Academic residence: minimum 15 credits in residence.

b. Subsequent Options and Majors:

A student who has received a previous baccalaureate degree from

OSU may be granted a subsequent option or major credential:

1. Complete current requirements for option or major and receive dean's approval;
 2. Achieve a minimum of 2.0 OSU cumulative grade-point average on work taken for subsequent credential;
 3. Academic residence: minimum 15 credits in residence.
- c.** Additional credits necessary for subsequent credentials may be taken prior to or subsequent to the granting of a previous baccalaureate degree.

AR 28. SUBSTITUTIONS

a. Undergraduate students:

Substitutions for institutional requirements as outlined in AR 25, except for baccalaureate core requirements of AR 25a, may be petitioned to the Academic Requirements Committee after approval by the student's dean or college head advisor. Substitutions for baccalaureate core requirements of AR 25a may be presented for consideration to the student's dean or college head advisor. Substitutions or adjustments of college or departmental requirements are also subject to approval by the college or department.

b. Graduate students: Substitutions for institutional requirements or deviations from the normal Graduate School regulations and policies may be made only by obtaining the approval of the dean of the Graduate School following a petition by means of a letter signed by the student and the student's major professor. Action taken on such substitutions or petitions will not be considered as a precedent for any future action.

AR 29. GRADUATION EXERCISES

Attendance at graduation exercises is optional for graduating students. In accordance with procedures obtained from the Registrar's Office, the candidate is responsible for declaring whether or not he or she will attend commencement, regardless of the term in which requirements are completed.

AR 30. AUDITING COURSES

Audit registration permits a student to enroll in a course for no credit and no grade. Course requirements for an audited course will be determined by the course instructor. Audit registration is available to admitted and non-admitted students. Audit registration begins on the sixth day of registration and ends with the close of registration at the conclusion of the tenth day of class. Those who wish

to audit should contact the Registrar's Office for registration procedures, which will require approval of the course instructor. Audit courses are assessed instructional fees at the same rate as for credit courses. Any changes to an audit registration are subject to the same procedures, deadlines, and special fees as for registration changes to regular courses. Upon completion of an audited course, the designation of AUD will be recorded on the transcript. The designation of WAU will be recorded on the transcript for students who withdraw from an audit course.

AR 31. ACADEMIC FRESH START POLICY

An Oregon State University undergraduate student may petition once with the registrar to exclude OSU courses from the calculation of institutional requirements, credits, and grade-point average, under a condition of academic fresh start defined below:

Conditions to qualify:

The student must have an absence from OSU that begins after the end of the student's last term of attendance and exceeds five academic years before re-admittance to a degree program at OSU. Prior to applying for academic fresh start student must, after re-enrolling in the university, have successfully completed a minimum of 24 letter-graded units over two consecutive terms, and earned a grade-point average of at least 2.5 in these terms. The student must also provide a signed letter of recommendation from a current OSU college dean, school director, or department or program chair/head. It may be seconded by the college head advisor or a current faculty member within the discipline the student is currently engaged to complete advocating on the student's behalf for academic fresh start.

Effect of the academic fresh start:

- Upon meeting all of the conditions of qualification, the student may select from one to three contiguous academic terms from previous enrollment at OSU for the application of academic fresh start.
- The grades¹ from all courses taken during the terms that are proposed for academic fresh start will be excluded from meeting institutional requirements and the calculation of institutional units and grade-point average.
- All grades representing the student's academic history at OSU will appear on the student's academic record (transcript), but all academic fresh start approved courses will be coded as "excluded" similar to a repeated course. Additionally, a comment of "Academic Fresh Start" will be appended to each term that qualifies under academic fresh start.
- All courses excluded under academic fresh start, will also be excluded from the calculation of course repeats defined by AR 20.

Footnote:

¹ Valid grades include outstanding I (Incomplete) grades that have not been resolved.

CATALOG YEAR POLICY

Graduation Requirements/Catalog Contract Policy

When determining the graduation requirements for a given student:

- Students must meet all applicable degree requirements from the published catalog(s).
- The student's catalog year for institutional and baccalaureate core requirements is established by his or her first term of attendance (matriculation date) at Oregon State University as an admitted student.
- The student's catalog year for college/major/option/minor requirements is based on the date of declaration of the major/option/minor; consequently, a student's first (primary) major/option must be in the same catalog year. If a primary option is declared in a subsequent academic year, the primary option will be aligned with the catalog year of the primary major. If the primary option did not exist in the catalog year of the primary major, the primary major will roll forward to the catalog year of the primary option.
- Additionally, while the student's first major/option must be in the same catalog year, any additional declarations of majors/options/minors will be determined by the declaration dates (and corresponding catalog years) established by the change of academic program process. A student, in collaboration with an advisor, can also choose to graduate under a subsequent (to their most recent major declaration date) catalog year within the same major/option.
- At the time of graduation, all students, including transfer students, must use a catalog that is not more than ten years old. Students may petition to the head advisor of their college for an extension of a catalog greater than ten years prior to their expected graduation term.
- Current OUS policy requires a student to reapply after not enrolling at OSU for four consecutive terms (not including summer terms); the published catalog for the resulting readmission/matriculation date will become the catalog of record for graduation requirements. The Planned Educational Leave Program defined in AR 13.d beginning with 2011-2012 academic year, provides a mechanism for a student to sustain their original catalog of record during a planned absence.
- For Degree Partnership Program students, the first term the student is admitted to OSU will be the matriculation date and will determine the catalog year for

institutional and baccalaureate core requirements. The catalog year for college/major/option/minor requirements will be the same as all other OSU students.

- Every effort has been made to ensure the accuracy of information in the OSU General Catalog. However, Oregon State University or the Oregon State Board of Higher Education may find it necessary from time to time to make changes in courses, curricula, or degree requirements. Students already admitted to a program in which such changes have been made will be reasonably accommodated, if possible, to ensure their normal progress toward a degree. A student may, however, still be required to conform to changes in courses, curricula, or degree requirements as deemed necessary by Oregon State University or the State Board of Higher Education.

GRADING SYSTEM

Grades

The grading system consists of:

- A = Exceptional, 4.0 grade points per credit.
- A- = 3.7 grade points per credit.
- B+ = 3.3 grade points per credit.
- B = Superior, 3.0 grade points per credit.
- B- = 2.7 grade points per credit.
- C+ = 2.3 grade points per credit.
- C = Average, 2.0 grade points per credit.
- C- = 1.7 grade points per credit.
- D+ = 1.3 grade points per credit.
- D = Inferior, 1.0 grade point per credit.
- D- = 0.7 grade point per credit.
- F = Failure, 0.0 grade point per credit.
- G = Reserved for Graduate Credit, no grade point per credit.
- I/Alt Grade = Incomplete, no grade points or credits. If not resolved after 12 months or degree conferral, the "I" reverts to the alternate grade.
- N = No credit, no grade point per credit.
- NG = No basis for a grade, no credit or grade points.
- P = Pass, credit given, no grade points.
- R = Thesis in Progress, credit given, no grade points.
- S = Satisfactory, credit given, no grade points.
- TR = Accepted Transfer Credit.
- U = Unsatisfactory, no credit or grade points.
- W = Withdrawal (passing), no credit or grade points.
- WC = Complete withdrawal, no credit or grade points.
- Y = Grade yet to be determined, no

credit or grade points.

- AUD = Audit, no credit or grade points.
- WAU = Withdrawal from Audit, no credit or grade points.

When a requirement of a course has not been completed for reasons acceptable to the instructor and the rest of the academic work is passing, a report of I (incomplete) may be made and additional time granted. The I is only granted at the discretion of the instructor. The instructor must submit the grade the student will earn if the missing work is not completed. That alternate grade will become the default grade if the missing work is not completed. The instructor documents the deficiency and the deadline for completing the missing work. A record of the deficiency shall be kept on file in the unit or department office. The allotted time awarded shall not exceed one calendar year except by *petition** or the time of the degree conferral, whichever comes first. To remove the I grade, the student must complete the deficiency within the allotted time and the instructor will then submit the appropriate grade. If the student fails to complete the work within the allotted time, the Registrar's Office will automatically change the I grade on the student's record to the alternate grade submitted by the instructor at the time the I was given. The alternate grade will be included in the grade-point average. Under no circumstances shall a student who earns an A-F grade or an N or U grade have his or her grade changed retroactively to an I grade.

An instructor may move to correct a grade by filing a Change of Grade in the Registrar's Office. Grade changes for students of a permanently separated instructor will be managed by the department chair of the course involved. Upon permanent separation from the University an instructor's change of grade will not be accepted by the Office of the Registrar. The Office of the Registrar will routinely review grade changes.

**A student may petition via the Office of the Registrar for an extension of the one calendar year deadline with the concurrence of the faculty. An approved petition will grant an extension of a single additional term, with a maximum of three total extensions being possible. An approved petition for an extension of time to remove an incomplete will be voided at the time of degree conferral.*

Students may withdraw from a course. In such cases, a grade of W is assigned. A student who discontinues attendance in a course without official withdrawal receives a grade of F in the course.

GRADE POINTS

Grade points are computed on the basis of 4 points for each credit of A grade, 3.70 for each credit of A- grade, 3.30 for

each credit of B+ grade, 3.00 for each credit of B grade, 2.70 for each credit of B- grade, 2.30 for each credit of C+ grade, 2.00 for each credit of C grade, 1.70 for each credit of C- grade, 1.30 for each credit of D+ grade, 1.00 for each credit of D grade, .70 for each credit of D- grade, and 0 for each credit of F.

Marks of I/Alt, W, WC, P, N, NG, R, S, and U are disregarded in the computation of points. The grade-point average (GPA) is the quotient of total points divided by total credits; total credits are the number of term credits in which grades A, B, C, D, and F are received.

ACADEMIC STANDING

Satisfactory Academic Standing (Undergraduate students) (AR 22)

Oregon State University expects students to maintain satisfactory academic progress toward degree completion. At the conclusion of each term, grade-point averages are calculated and academic standings determined for students seeking a baccalaureate degree according to the criteria outlined below. Students whose standings evidence a lack of satisfactory progress will be warned of this condition and advised to seek help from their academic advisors.

- a. **Academic Warning:** Students with a term GPA below 2.0 will be placed on Academic Warning.
- b. **Academic Probation:** Students who have attempted¹ 24 or more credits at OSU and have an OSU cumulative GPA below 2.0 will be placed on Academic Probation. Students who attain a cumulative GPA of 2.0 or better are removed from Academic Probation.
- c. **Academic Suspension:** Students who are on Academic Probation and have a subsequent term GPA below 2.0 will be placed on Academic Suspension. Academic Suspension is recorded on the student's academic record. Students who are academically suspended are denied all the privileges of the institution and of all organizations in any way connected to it, including any university-recognized living group.
- d. **Reinstatement to the University:** Suspended students will be considered for reinstatement to the university after two years or completion of a minimum of 24 quarter credits of transferable college-level work at an accredited college or university, with a GPA of 2.5 or above.

The Faculty Senate Committee on Academic Standing is charged with the responsibility for enforcement of the above regulations on Satisfactory Academic Standing. Additionally, this commit-

tee has discretionary authority to grant exceptions and to develop guidelines for the administration of these regulations.

Footnote:

¹ An attempt comprises a final grade in a course where the grade is: A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F, S, U, P, NP, I/Alternate Grade (where the Alternate Grade is one of these grades), W, or Y.

Attendance

An instructor has the privilege of considering class participation in arriving at a student's grade, but it is not intended that attendance in and of itself normally be a factor in measuring a student's academic accomplishment in a course.

Other Limitations

Academic performance is not the sole criterion for admission to and continuation in certain courses and programs at the university, such as practicum courses and internships. The university may find it necessary to evaluate a person's background to determine his or her likelihood of maintaining standards of professional conduct that are necessary in the academic discipline or profession. An evaluation may take into consideration current performance, as well as past experiences and actions that could affect a student's ability to perform in the particular course or program.

STUDENT CONDUCT REGULATIONS

Oregon State University aspires to stimulate a lasting attitude of civility, social responsibility and openness in our students as well as an appreciation for our values of accountability, diversity, respect, and truth. Consistent with that, all students enrolled at OSU are expected to follow student conduct regulations and university policies that have been developed to govern behavior of students as well as members of the university community. These regulations and policies are formulated to guarantee each student's freedom to learn and to protect the fundamental rights of others. The assumption upon which these regulations are based is that all people must treat others with dignity and respect in order for scholarship to thrive. The regulations and procedures for disciplinary action and appeal are available on the OSU website, <http://oregonstate.edu/studentconduct/home/>. Violations of the regulations subject a student to appropriate disciplinary or judicial action. These regulations have been formulated by the Student Conduct Committee, the Student Activities Committee, the university administration, and the State Board of Higher Education.

STUDENT RECORDS

Family Educational Rights and Privacy Act of 1974, as amended, (20 U.S.C. 1232g) provides that Oregon State University students have the right to inspect and review the student's education records within 45 days of the day the university receives a request for access; the right to request the amendment of the student's education record that the student believes are inaccurate or misleading; the right to consent to disclosures of the personally identifiable information contained in the student's educational record, except to the extent that FERPA authorizes disclosure without consent; and the right to file a complaint with the U.S. Department of Education concerning alleged failures by Oregon State University to comply with the requirements of FERPA. The Student Records Policy is available in the printed and electronic *Registration Information Handbook* and *OSU General Catalog*.

RELEASE OF STUDENT INFORMATION TO MILITARY RECRUITERS (SOLOMON AMENDMENT)

Oregon State University provides information about students that is requested by military recruiters under requirements of the Solomon Amendment (As of Oct. 23, 1998 [63 Fed. Reg. 56819] and the Interim Rule published Jan. 13, 2000 [65 Fed. Reg. 2056] by Department of Defense). Under this federal law military recruiters may request the following information: Name, current mailing address (as provided by the student) including email address, current telephone number (as provided by the student), age, class level (e.g. freshman, sophomore, etc.), and academic major. The information may be requested for the immediately previous term, current term, or future term for all students age 17 and older who are or were registered at OSU for at least 1 credit in the requested term. Recruiters may request this information each term. Recruiters may not obtain any information that is not in the above list of student recruiting information. For example, they may not request any of the following: Social Security Number or ID Number, place of birth, race/ethnicity/nationality, grades and GPA, grades of low-performing students, religious affiliation, names of students with loans in default, veteran status, or names of students no longer enrolled at OSU. Institutions that do not comply with the Solomon Amendment risk losing federal funding from the departments of Defense, Education, Health and Human Services, Labor, and Transportation. Institutions do not risk losing student-aid funding such as Perkins Loans, Federal SEOG or Work-Study funds.

PROGRESS STANDARDS FOR VETERAN STUDENTS

Programs at Oregon State University are approved for the use of VA benefits under the Montgomery GI Bill, Dependents Educational Assistance, and Title 38 and Title 10 of the US Code, or benefits offered by the State of Oregon Department of Veteran Affairs. The university, through the Registrar's Office, provides the certifying service to qualified students. The certifying official issues enrollment certification documents to the appropriate VA regional office and monitors students' satisfactory progress for the VA. Students wishing veterans counseling or other services must address the Veterans Administration directly.

1. OSU students who receive benefits from the Veterans Benefits Administration of the Department of Veteran Affairs are subject to the satisfactory progress standards as set forth in Chapter 38, U.S. Code sections 1674, 1724, 1775, and 1776, and to those defined by the university in **Academic Regulation 22, Satisfactory Academic Standing**: Oregon State University expects students to maintain satisfactory academic progress toward degree completion. At the conclusion of each term, grade-point averages are calculated and academic standings determined for students seeking a baccalaureate degree according to the criteria outlined below. Students whose standings evidence a lack of satisfactory progress will be warned of this condition and advised to seek help from their academic advisors.
 - a. **Academic Warning:** Students with a term GPA below 2.0 will be placed on Academic Warning.
 - b. **Academic Probation:** Students who have attempted¹ 24 or more credits at OSU and have an OSU cumulative GPA below 2.0 will be placed on Academic Probation. Students who attain a cumulative GPA of 2.0 or better are removed from Academic Probation.
 - c. **Academic Suspension:** Students who are on Academic Probation and have a subsequent term GPA below 2.0 will be placed on Academic Suspension. Academic Suspension is recorded on the student's academic record. Students who are academically suspended are denied all the privileges of the institution and of all organizations in any way connected to it, including any university-recognized living group.
 - d. **Reinstatement to the University:** Suspended students will be considered for

reinstatement to the university after two years or completion of a minimum of 24 quarter credits of transferable college-level work at an accredited college or university, with a GPA of 2.5 or above.

2. Students, who are placed on probation by the university, also will be notified that they are on probation insofar as Veterans Affairs' progress standards are concerned. If a student's deficiency is not corrected and they subsequently are placed on academic suspension, the university will notify Veterans Affairs of his or her unsatisfactory progress.
3. The university will recertify students who are suspended by the university and subsequently reinstated by the Academic Standing Committee.
4. Students dismissed from the university for unsatisfactory conduct will be reported as making unsatisfactory progress. The university will recertify the student only upon rescission of the dismissal by the university.

VETERAN RESOURCES COORDINATOR

The Veteran Resources Coordinator (VRC) helps veterans and eligible dependents at Oregon State University find, utilize, and in some cases apply for applicable state and federal VA education benefits. In addition to helping with educational benefits, the VRC can also help veterans and their dependents tap into other non-education related VA benefits (e.g. disability compensation, VA Medical, Employment, and Homeless Veterans Reintegration Programs). In addition, the VRC can provide information to active duty military personnel on benefits they can access while in the service that will have a positive impact on their transition into civilian life down the road (e.g. Vet Centers, VA Medical Facilities, Tricare/ Triwest questions, the VA claims process, etc).

Contact Veteran Services Advisor Gus Bedwell at gus.bedwell@oregonstate.edu.

VA CERTIFYING OFFICIAL

The VA Certifying Official (VACO) certifies the enrollment of veterans and eligible dependents at Oregon State University. All veterans and eligible dependents, whether new, returning, or transfer students, who expect to receive educational benefits from the Veterans Administration must notify the VACO in the Registrar's Office. For questions about benefits, contact veterans@oregonstate.edu.

The VA Certifying Official also monitors and reports to the Veterans Administration the Satisfactory Progress Standards for students who are receiv-

ing VA education benefits. See Progress Standards for Veteran Students for more information.

VETERANS TUITION ASSISTANCE PROGRAM

The Veterans Affairs Certifying Officials (VACO) at Oregon State University are the direct contact points for students using the Veterans Tuition Assistance Program. VACOs process students' tuition assistance authorizations and contracts and forward copies to OSU Business Affairs for billing the military branches. Depending on the branch of the military, requirements vary on how grades are reported. Grade reporting is done at the end of each academic term.

For questions about the Veterans Tuition Assistance Program, contact veterans@oregonstate.edu.

STATE EDUCATION AID

The state of Oregon has an educational aid program available to Oregon veterans who meet eligibility requirements. The state benefit may not be received for training for benefits which the veteran currently is receiving under the federal GI Bill and Voc Rehab. Information about the Oregon aid program may be obtained from the Department of Veterans Affairs, Education Section, 700 Summer St., NE, Salem, OR 97301-1285, 503-373-2000 or 800-828-8801. Additional information may be obtained from the website at <http://www.oregon.gov/odva/BENEFITS>.

VETERAN AND U.S. MILITARY SERVICE RECOGNITION CORD

Recognition of U.S. Military Service
Oregon State University recognizes the significant contribution and sacrifices made by OSU students who are U.S. military service members and veterans. Students may receive a red, white, and blue Military Service Recognition Cord to be worn at commencement.

To apply for the recognition, students should complete the OSU Military Service Recognition application which is available on the OSU Veterans website at <http://oregonstate.edu/veterans/home/>. Applications are to be submitted to the Veterans Resource Coordinator who will approve the application and distribute the recognition cord.

UNDERGRADUATE PLANNED EDUCATIONAL LEAVE PROGRAM

The Undergraduate Planned Educational Leave Program (PELP) is a voluntary, temporary, planned interruption or pause in a student's regular, full-time education. Its purpose is to enhance an undergraduate student's prospect of successful completion of their academic program. The PELP provides one opportunity¹ for a student to arrange a

voluntary absence for as many as six consecutive regular academic terms (not including the summer terms). The PELP is designed to allow a student to pursue other activities that will assist them in clarifying their educational goals, such as job opportunities and experiences away from campus, military deployment, time to resolve personal or medical problems, or other similar pursuits. The PELP allows an undergraduate student to temporarily suspend their academic work for a period of time (in accordance with AR 13a, 13b, and 13c), and resume their studies with minimal procedural difficulties. The PELP \$25 non-refundable application fee allows an undergraduate student to maintain their official standing as a student at OSU and reserves the student's right to keep their original academic catalog² active during their absence. Beginning with the 2011–2012 academic year, all OSU undergraduate students³ are eligible to request leave through the PELP. The university reserves the right to consider a student's current academic standing and any existing student conduct issues prior to approving the voluntary PELP leave request. Students who withdraw from OSU prior to the 2011–2012 academic year and who are away from campus for four or more consecutive regular academic terms (not including summer terms) must re-enroll with OSU to re-establish their relationship as an OSU student and their academic catalog will be reset to the academic year they return to OSU.

Transcript Notation

A notation of the dates of any approved leave will be indicated on each student's official transcript.

Footnotes:

- ¹ Military deployments are an exception to this limitation. All military personnel who are deployed for military service may submit a voluntary leave request for each deployment.
- ² In accordance with the university's catalog policy on the inside cover of the General Catalog.
- ³ The PELP began with the 2011–2012 academic year (Summer 2011). Any former OSU students who attended OSU prior to the 2011–2012 academic year and have been absent for four or more consecutive regular academic terms will be held to OSU's prior policy that resets the academic catalog to the catalog in effect at the time they return to OSU.

TUITION AND FEE SCHEDULE (PER TERM) FOR 2014-2015

For a full listing of tuition and fees, please visit OSU Business Affairs at <http://oregonstate.edu/fa/businessaffairs/student/tuition-and-fees>.

MANDATORY ENROLLMENT FEES

Students paying mandatory enrollment fees are entitled to services maintained by OSU for the benefit of students. These services include use of the library; use of laboratory equipment and materials; medical attention and advice at the Student Health Center; use of gymnasium equipment; the student newspaper; admission to some athletic events; admission to concerts and lectures; and registration. No reduction in fees is made to students who may not wish to use these privileges. Employees paying staff fees are entitled to instructional and library privileges only.

Matriculation Fee: \$350.00

All new students (except non-degree seeking) are charged a one-time fee of \$350.00 at the start of their first term at OSU. This fee provides access to a variety of OSU programs and services at no additional charge. Programs and services included in the fee include, but are not limited to, open house programs, START, CONNECT, pre-enrollment advising, course drop/add/withdrawal, and official transcripts.

Advance Tuition Deposit: \$200.00

New undergraduate students will be requested to submit a tuition deposit of \$200.00 after being admitted to the university. This deposit is the indication of a student's intent to enroll at OSU.

- **Fall Term only:** Payment for your Advance Tuition Deposit is required to participate in the START program, which allows students to register for fall term classes. After May 1 the deposit is nonrefundable.

Other Fees

(Subject to change without notice.)

GRADUATE RESEARCH ASSISTANT TUITION AND FEES

See Mandatory Fees on the OSU Business Office website (http://oregonstate.edu/fa/businessaffairs/studentfinance/tuition/tuition_info). Click on Tuition/Fee Information then click on "Corvallis Campus Tuition/Fees" for the desired year. This opens a PDF within which you scroll down to the information for Oregon State University-Corvallis Campus Graduate Students.

PHARMACY TUITION AND FEES

See **Mandatory Fees** on the OSU Business Office website (http://oregonstate.edu/fa/businessaffairs/studentfinance/tuition/tuition_info). Click on Tuition/

Fee Information then click on "Corvallis Campus Tuition/Fees" for the desired year. This opens a PDF within which you scroll down to the information for Oregon State University-Corvallis Campus Pharmacy Program.

VETERINARY MEDICINE TUITION AND FEES

See **Mandatory Fees** on the OSU Business Office website (http://oregonstate.edu/fa/businessaffairs/studentfinance/tuition/tuition_info). Click on Tuition/Fee Information then click on "Corvallis Campus Tuition/Fees" for the desired year. This opens a PDF within which you scroll down to the information for Oregon State University-Corvallis Campus Veterinary Medicine.

FOR MORE INFORMATION ABOUT TUITION AND FEES

Academic Year Fee Book rates are available on the OSU Budget website at <http://oregonstate.edu/budget/tuition-and-fees>.

STUDENT ACCOUNTS OFFICE WEBSITE

Go to <http://oregonstate.edu/fa/businessaffairs/studentfinance/>.

NONDEGREE STUDENTS

(This category is designed for students not planning to complete a degree at OSU.)

Nondegree students may only enroll in 8 or fewer credits and pay tuition/fees at resident rates based on undergraduate or graduate course level. To be eligible to use Student Health Services, you must also pay the student health fee.

If a nondegree student were to enroll in 9 or more credits they would pay tuition/fees based on the undergraduate or graduate tuition fee schedule determined by the student's status.

For more information, call Student Accounts at 541-737-3775.

FEE PAYMENT OBLIGATION

Web registration presents you with a confirmed class schedule. When you finish registering, your schedule is official. This obligates you to pay all tuition and fees for your classes. If you wish to cancel this commitment and reduce or eliminate tuition charges for the term, you must officially cancel your registration or withdraw from the university (see the Tuition/Fee Reduction and Refund Schedule at http://oregonstate.edu/fa/businessaffairs/studentfinance/tuition/tuition_info). Click on Tuition/Fee Information then "Tuition Reduction Schedule."

Electronic billing statements are processed around the 5th of each month. Notification that your statement is ready will be sent to your ONID email address. It is very important that your ONID address is active and that you are

checking it regularly. You may also select to have your ONID email forwarded to an alternate address. You may view your monthly billing statements by logging onto the eBill website at <http://mybill.oregonstate.edu>. See "**eBill and eCheck**" at <http://oregonstate.edu/fa/businessaffairs/studentfinance/eBill/>.

You may pay your tuition and fees in the following ways:

OSU currently accepts eCheck, paper checks, money orders and cash as acceptable payment methods. Students can use MyOSU, <http://myosu.oregonstate.edu/>, (Paying for College, Financial Services, Pay My Bill), as a convenience option for making credit card payments. Please see the Cashier's Office Payment Information Section for more details regarding all acceptable payment methods.

Accounts are "due upon receipt" of the monthly statement, and any unpaid balance remaining after the 1st of each month is subject to an interest charge of 1 percent per month (12 percent APR).

Registration/Transcript Hold Policy

If you are enrolled for the current term, you will be allowed to register for the following term only if your account balance consists of charges only from recent academic terms—the current term and one term prior—and your overall account balance does not exceed \$2,200.00. If you are not currently enrolled, you must have your account balance paid in full in order to register.

Requests for transcripts cannot be processed until your account balance is paid in full.

DROP/WITHDRAW REFUNDS

Students who drop or withdraw from a class, or withdraw from the university may be eligible for a tuition refund. Refunds are based on assessed tuition, course fees, and mandatory fees, and are calculated from the date you officially drop, withdraw, or cancel your registration or reduce your class load, not the last date of class attendance. Please see "Registration Cancellation/Withdrawal from the University."

Refunds are processed as a credit on your account. A check will be issued to you if any credit balance remains after other charges and financial aid repayments have been satisfied. No refunds are authorized for persons paying staff rates. Allow about two weeks for processing a refund. Your refund will be sent to your current mailing address. Be sure to update your current mailing address online in MyOSU, <https://myosu.oregonstate.edu/>.

The **Tuition/Fee Reduction Schedule** below follows those policies as established by Oregon State University (there are no refunds given for persons paying staff rates):

Academic Year 2014–2015

Drop Dates	Tuition Credit	Tuition Due
Fall 2014		
October 12 or Before	100%	0%
October 13–October 19	50%	50%
October 20–October 26	25%	75%
After October 26	0%	100%
Winter 2015		
January 18 or Before	100%	0%
January 19–January 25	50%	50%
January 26–February 1	25%	75%
After Feb. 1	0%	100%
Spring 2015		
April 12 or Before	100%	0%
April 13–April 19	50%	50%
April 20–April 26	25%	75%
After April 26	0%	100%

HOW TO HANDLE AN ERROR IN BILLING

If there appears to be an error on your monthly statement, use the following guidelines:

Graduate Assistants: Errors may occur due to incorrect rate codes. Please notify your department.

Residents Billed Nonresident Rates: Pay the amount appropriate for a resident and then go to the Office of Admissions to confirm your residency status. You will be advised as to the next action to take.

Financial Aid Not Applied: If financial aid has not been applied you should verify approval of scholarships and grants at the Office of Financial Aid and Scholarships, A218 Kerr Administration Building.

Support Payments Not Applied: Verify approval for support billing at Business Affairs, B100 Kerr Administration Building.

Housing: Verify the billed amount with the University Housing and Dining Office, 102 Buxton, 541-737-4771.

Any Other Billing Amount Errors: Pay based upon the correct amount, then go to Business Affairs, B100 Kerr Administration Building for assistance.

SPECIAL FEES**Application Fee for Admission (not refundable)—**

- Undergraduate — \$60
- Graduate — \$60.00
- Nondegree-Seeking Student — \$30.00

Archiving Doctoral Thesis —

All doctoral candidates pay a minimum fee of \$25, \$80 if paying for copyright (optional), for archiving of the doctoral dissertation. See the Thesis Guide at http://oregonstate.edu/dept/grad_school/thesis.php.

Auditor's Fee—

Fee to audit a course is the same as regular fees in all classes.

Collection Fee — \$10–\$60.00

If you are enrolled Fall term 2014 and do not enroll Winter term 2015 and you leave school owing the university money and collection proceedings are initiated, you may be assessed a service charge. For balances of \$50–\$99.99, the fee is \$10; for \$100–\$499.99, the fee is \$20; for \$500 or more, the fee is \$60.

Course Fees

Certain courses have additional fees. Refer to the Schedule of Classes for individual course fees.

Diploma Mailing Fee— \$25.00 (\$40.00 out of country)

Duplicate Diploma — \$40.00
Assessed to cover the cost of special printing order and handling.

Examination for Credit—

\$80.00 per exam

Examination for Waiver—

\$80.00 per exam

FAX Service — \$20.00 per request to fax documents.**Individual Music Lesson Fee —**

Consult the Department of Music.

Late Registration Change — \$20.00 per course changed

There is no charge to change registration (add, drop, withdraw from a course, change credits, change grade option, or change to audit) by the stated deadlines. Each registration change after the stated deadlines will be charged a \$20.00 late registration fee. This applies to any late add, late add to audit, late drop, late withdrawal from a course, late change in grading basis, or late change in course credit. If you initially register after the end of the second week of the term, you will be charged a \$100.00 late registration fee, but *the \$20.00 fee is not charged when the \$100.00 late registration fee is charged*. For any registration change thereafter, however, you will be charged the \$20.00 fee.

Late Registration Fees — \$50.00 and \$100.00

A late registration fee of \$50.00 will be assessed for all initial registrations during the first two weeks of classes. For registrations approved *after* the first two weeks of classes (i.e., after the end of the late registration period) a late fee of \$100.00 will be assessed.

Library Fines and Fees

- Overdue fine for circulating books is \$0.25 per day.
- Overdue fine for Reserve Book Room material checkout:
 - Two-hour material, \$1.00 per hour.
 - Two-day material, \$2.00 per day.

Borrowers failing to return material within 42 days of the due date are charged the replacement cost of items, plus the amount of the fine (maximum

fine, \$10.00 per item). When such items are returned before the replacement has been ordered, the replacement cost will be refunded. When such items are returned after replacement items have been ordered, no refund will be made. A charge at cost, to be determined by the library, may be made for repair or replacement of damaged or mutilated library material.

PELP Fee (Undergraduate Planned Educational Leave Program) — \$25.00

Non-refundable application fee allows an undergraduate student to maintain their official standing as a student at OSU and reserves the student's right to keep their original academic catalog active during their absence.

Readmission Fee: Undergraduate — \$25.00

Required after an absence of one year. See "Eligibility to Register" in the How to Register section for details.

Readmission Fee: Graduate — \$60.00

Required after an absence of one term. See "Registration Requirements" in the Graduate School section of the catalog.

Reinstatement Fee — \$50.00

If a student's registration is canceled for failure to comply with the regulations of the institution, but is later allowed to continue work in the same term, the student must pay the reinstatement fee.

Returned Check Fee — \$25.00

If a check is returned because of any irregularity for which the student is responsible, a fine of \$25.00 will be charged.

Replacement ID Card Fee — \$25.00**Service Fee for International Programs —**

A \$325.00 per term administrative management fee will be charged for international students supported under contractual arrangement with sponsoring agencies or entities requiring special administrative or management services beyond those normally provided. This program and finance fee will be assessed for these international student programs that are administered and managed by the International Student and Faculty Services office.

Senior Citizen Fee — for special materials only

Persons 65 or older may attend class on a noncredit, space-available basis.

Special Examination Fee —

See examination for credit/waiver in the list above.

Staff Fee (except staff auditors) — 30 percent of resident undergraduate tuition

Staff members or their dependents may register for courses at 30 percent of the

per credit resident undergraduate tuition. Academic, professional, and classified employees whose appointment is equivalent to 0.50 or more may take up to 12 credits a term at this rate. Payment of the staff fee entitles the staff members to instructional and library privileges only. The fee is not refundable. The applicable course fees and resources fees are charged at 100 percent, and family members are subject to other mandatory enrollment fees. Eligibility for the staff rate must be approved by the Department of Human Resources.

If you are intending to enroll for course work at another OUS university, you must submit the staff fee privileges approval form to OSU-HR two days prior to the first day of classes.

If you are transferring the staff fee privilege to your dependent, and they are intending to enroll for course work at another OUS university, you must submit the staff fee privileges approval form to OSU-HR two weeks prior to the first day of classes.

Staff fees are nonrefundable.

Stop Payment Fee — \$15.00

Fee assessed when the payee of an OSU check requests a stop payment order.

Student ID Card Services Fee — \$20.00

Charged to all new and readmitted students their first term after admission or readmission.

Transcripts — No Fee

There is no fee for official transcripts. You can order transcripts on the Web, in person, or by mail. You can print unofficial transcripts via MyOSU, <https://myosu.oregonstate.edu/>. All financial obligations to OSU must be cleared before transcript orders are processed.

Transcripts — Rush Order Fee \$30.00

Rush order provides expedited service; the transcript is processed within two hours and sent by standard first-class mail. Rush requests for transcripts to be mailed must be received in the Registrar's Office by noon M–F in order to be mailed the same day. The rush order does **not** include express delivery.

Verification of Enrollment Fee — \$15.00 per verification

See Enrollment Verification via the Web for other options.

FINANCIAL AID

SCHOLARSHIPS, STUDENT LOANS, AND GRANTS

Approved scholarships, student loans, and grant awards will be applied automatically to registered students' accounts. You can monitor your account via Online Services and MyOSU, to see if your financial aid has been disbursed to your account.

If financial aid amounts exceed the amount of qualifying tuition/fees expenses owed, a refund will be generated if the surplus exceeds \$1.00. Distribution of the refund can be made by direct deposit or check.

- If you would like direct deposit of your financial aid refund, complete the Direct Deposit form found through Online Services or Student Finance website at <http://oregonstate.edu/fa/businessaffairs/studentfinance/>.
- If you would like your refund as a check, your current mailing address must be up to date for all check processing. You can do this through MyOSU, <https://myosu.oregonstate.edu/>.

For full details, visit the **Business Affairs Office Website**. Click on Current Student.

Beginning the third week of the term, students eligible for refunds due to financial aid or scholarship disbursements may request a refund at the Cashier's Office or through email at refund@oregonstate.edu.

EMERGENCY LOANS

Emergency loans, not to exceed \$350.00 per term, are available to students in good financial standing, attending at least half time, and formally admitted to the university. Loans are to be repaid by the last day of the current term. Loan amounts become part of the revolving account balance, and carry interest at 1 percent per month (12 percent APR). Forms to apply for an emergency loan may be picked up in the lobby of Kerr Administration and turned in at the cashier's window for review by Student Accounts.

PAYMENT OF STUDENT FEES

Payment of Nonresident Instruction Fee (580-10-080)

1. All students classified as nonresidents shall pay a nonresident fee.
2. Refunds of the nonresident fee may be granted if the student shows that the classification previously assigned was in error, but no such refund shall be made unless the student applies and submits all supporting information for residency status prior to the last day to register for the term in which the student seeks change of status.

ENROLLMENT OF SPOUSE AND DEPENDENT CHILDREN (580-010-086)

The spouse and dependent children of regular department staff members with a full-time equivalent of at least .50 may enroll as students at resident fee rates in department institutions.

RESIDENCY REQUIREMENTS

RESIDENCY CLASSIFICATION FOR TUITION PURPOSES

In Oregon, as in all other states, tuition at publicly supported four-year universities is higher for non-resident students than for resident students. The rules used in determining residency seek to ensure that only individuals who satisfy Oregon University System residency requirements are assessed the resident fee. Those rules—Oregon Administrative Rules, Chapter 580, Division 10-Board of Higher Education—appear below.

Only duly authorized residency officers have the authority to apply and interpret these rules and procedures. No other indication or determination of residency by any other institutional office, department, program or staff represents the official institutional determination of residency.

Residency for tuition purposes is determined at the point of admission. At Oregon State University, the residency officer is a member of the Office of Admissions' management team. If a person wishes to change their residency status, a residency affidavit must be filed with the residency officer no later than the last day to register for the term in which residency is sought. This day is always the first Friday of the term.

Establishing residency for tuition purposes is much different than the rules for voting, driving and filing taxes. It is possible for an individual to qualify as a resident of Oregon for purposes of voting or obtaining an Oregon driver's license and not meet the residency requirements established by these rules. For more information, contact the Office of Admissions, 541-737-4411, and ask for the Residency Officer.

DEFINITIONS (580-010-0029)

For the purpose of OAR 580-010-0030 through 580-010-0045, the following words and phrases mean:

1. "Domicile" is a person's true, fixed, and permanent home and place of habitation. It is the place where a person intends to remain and to which the person expects to return when the person leaves without intending to establish a new domicile elsewhere. In order to establish a domicile in Oregon, a person must maintain a predominant physical presence in Oregon for 12

- consecutive months after moving to the state.
2. A “financially independent person” is a person who, at the time of application for residency status:
 - a. declares himself or herself to be financially independent;
 - b. has not been claimed as a dependent during the immediately preceding tax year, and will not be claimed as a dependent during the current tax year, on the federal or state income tax returns of any other person; and
 - c. has not received in the immediately preceding calendar year, and will not receive during the current calendar year, one-half or more of his or her support, in cash or in kind, from another person or persons, except for support received from his or her spouse.
 3. A “financially dependent person” is a person who, at the time of application for residency status:
 - a. declares himself or herself to be financially dependent; and
 - b. has been claimed as a dependent on the federal and state income tax returns of another person during the immediately preceding tax year.
 3. A student may be considered primarily engaged in educational activities regardless of the number of hours for which the student is enrolled. However, a student who is enrolled for more than 8 hours in any semester or quarter during the 12-month period referred to in section (2) of this rule shall be presumed to be in Oregon for primarily educational purposes. Such period of enrollment shall not be counted toward the establishment of a bona fide domicile of 12 consecutive months in this state unless the student proves, in fact, establishment of a bona fide domicile in this state primarily for purposes other than educational.
 4. An Oregon resident is also a financially dependent person who is claimed as a dependent by another person who has both:
 - a. established and maintained an Oregon domicile as provided under OAR 580-010-0029(1) for 12 consecutive months; and
 - b. during that period, has been primarily engaged in activities other than those of being a college student.
 5. A financially dependent person who is claimed as a dependent by another person who has not established and maintained an Oregon domicile shall be presumed to be a nonresident. This presumption may be overcome by evidence of the student’s long-standing presence in Oregon and demonstration of other factors under OAR 580-010-0031.
 6. The criteria for determining Oregon resident classification shall also be used to determine whether a person who has moved from Oregon has established a non-Oregon residence.
 7. If institution records show that the residence of a student or the person upon whom the student is dependent is outside of Oregon, the student shall continue to be classified as a nonresident until entitlement to resident classification is shown. The burden of showing that the residence classification should be changed is on the student requesting the change.
 8. Notwithstanding section (4) of this rule, a student who is financially dependent on a non-Oregon resident may nonetheless be considered an Oregon resident if the student resides in Oregon for at least 12 consecutive months with a parent or legal guardian who has both:
 - a. established and maintained an Oregon domicile under OAR 580-010-0029(1) for 12 consecutive months; and
 - b. during that period, has been primarily engaged in activities other than those of being a college student

DETERMINATION OF RESIDENCE (580-010-0030)

1. For purposes of admission and instruction fee assessment, OUS institutions shall classify a student as Oregon resident or nonresident. In determining resident or nonresident classification, the primary issue is a person’s intent in coming to Oregon. Intent is inferred from a person’s conduct and history as they relate to the requirements of these residency rules. If a person is in Oregon primarily for the purpose of obtaining an education, that person will be considered a nonresident. It is possible for an individual to qualify as a resident of Oregon for purposes of voting or obtaining an Oregon driver’s license and not meet the residency requirements established by these rules.
2. An Oregon resident is a financially independent person who, prior to the term for which Oregon resident classification is requested, has both:
 - a. established and maintained a domicile in Oregon as provided under OAR 580-010-0029(1) for 12 consecutive months; and
 - b. during that period, has been primarily engaged in activities other than those of being a college student.

RESIDENCY CONSIDERATION FACTORS (580-010-0031)

1. The following factors, although not necessarily conclusive or exclusive, have probative value in support of a claim for Oregon resident classification:
 - a. Reside in Oregon for 12 consecutive months prior to the beginning of the term for which resident classification is sought and during that period be primarily engaged in activities other than those of a college student;
 - b. Reliance upon Oregon resources for financial support;
 - c. Domicile in Oregon of persons legally responsible for the student; Acceptance of an offer of permanent employment in Oregon; and
 - d. Ownership by the person of his or her living quarters in Oregon.
2. The following factors, standing alone, do not constitute sufficient evidence to effect classification as an Oregon resident:
 - a. Voting or registration to vote;
 - b. Employment in any position normally filled by a student;
 - c. The lease of living quarters;
 - d. Admission to a licensed practicing profession in Oregon;
 - e. Automobile registration;
 - f. Public records, for example, birth and marriage records, Oregon driver’s license;
 - g. Continuous presence in Oregon during periods when not enrolled in school;
 - h. Ownership of property in Oregon or the payment of Oregon income or other Oregon taxes; or
 - i. Domicile in Oregon of the student’s spouse.
3. Reliance upon non-Oregon resources for financial support is an inference of residency in another state.

EVIDENCE OF FINANCIAL DEPENDENCY (580-010-0033)

1. In determining whether a student is financially dependent, a student must provide:
 - a. Evidence of established domicile as provided under OAR 580-010-0029(1) of the person claiming the student as a dependent; and

- b. The identification of the student as a dependent on the federal and state income tax returns of the person claiming the student as a dependent. Additional documentation to substantiate dependency during the current calendar year may be required at a later time if deemed necessary by the institution.
2. A student who provides evidence that he or she is a financially dependent person under these rules shall not be required to establish a 12-month domicile prior to classification of resident status, provided such a student may not be classified as a resident while receiving financial assistance from another state or state agency for educational purposes.

RESIDENCE CLASSIFICATION OF ARMED FORCES PERSONNEL (580-010-0035)

1. For purposes of this rule, members of the armed forces means officers and enlisted personnel of:
 - a. The Army, Navy, Air Force, Marine Corps, and Coast Guard of the United States;
 - b. Reserve components of the Army, Navy, Air Force, Marine Corps, and Coast Guard of the United States;
 - c. The National Guard of the United States and the Oregon National Guard.
2. Notwithstanding OAR 580-010-0030, active members of the armed forces and their spouses and dependent children shall be considered residents for purposes of the instructional fee if the members:
 - a. Reside in this state while assigned to duty at any base, station, shore establishment, or other facility in this state;
 - b. Reside in this state while serving as members of the crew of a ship that has an Oregon port of shore establishment as its home port or permanent station; or
 - c. Reside in another state or a foreign country and file Oregon state income taxes no later than 12 months before leaving active duty.
3. An Oregon resident entering the armed forces retains Oregon residence classification until it is voluntarily relinquished.
4. An Oregon resident who has been in the armed forces and assigned on duty outside of Oregon, including a person who establishes residency under section (2)(c) of this rule, must, within a reasonable time, demonstrate an intent to retain classification as an Oregon resident.

Such intent may be shown by returning to Oregon within six months after completing service in the armed forces.

5. A person who continues to reside in Oregon after separation from the armed forces may count the time spent in the state while in the armed forces to support a claim for classification as an Oregon resident.
6. The dependent child and spouse of a person who is a resident under section (2) of this rule shall be considered an Oregon resident. "Dependent child" includes any child of a member of the armed forces who:
 - a. Is under 18 years of age and not married, otherwise emancipated or self-supporting; or
 - b. Is under 23 years of age, unmarried, enrolled in a full-time course of study in an institution of higher learning, and dependent on the member for over one-half of his/her support.

RESIDENCE CLASSIFICATION OF MEMBERS OF OREGON TRIBES (580-010-0037)

1. Students who are enrolled members of federally recognized tribes of Oregon or who are enrolled members of a Native American tribe which had traditional and customary tribal boundaries that included parts of the state of Oregon or which had ceded or reserved lands within the state of Oregon shall be assessed resident tuition regardless of their state of residence.
2. For purposes of this rule, the federally recognized tribes of **Oregon** are:
 - a. Burns Paiute Tribe;
 - b. Confederated Tribes of Coos, Lower Umpqua and Siuslaw;
 - c. Confederated Tribes of Grand Ronde Community of Oregon;
 - d. Confederated Tribes of Siletz Indians of Oregon;
 - e. Confederated Tribes of the Umatilla Indian Reservation;
 - f. Confederated Tribes of the Warm Springs Indian Reservation;
 - g. Coquille Indian Tribe;
 - h. Cow Creek Band of Umpqua Indians;
 - i. Klamath Tribes.
3. For purposes of this rule, the Native American tribes that had traditional and customary tribal boundaries that included parts of the state of Oregon or which had ceded or reserved lands within the state of Oregon are:

a. **California:**

1. Benton Paiute Tribe;
2. Big Bend Rancheria;
3. Big Lagoon Rancheria;
4. Blue Lake Rancheria;
5. Bridgeport Indian Colony;
6. Cedarville Rancheria;
7. Fort Bidwell Indian Tribe;
8. Hoopa Valley Tribe;
9. Karuk Tribe of California;
10. Likely Rancheria;
11. Lookout Rancheria;
12. Lytton Rancheria;
13. Melochundum Band of Tolowa Indians;
14. Montgomery Creek Rancheria;
15. Pit River Tribe;
16. Quartz Valley Indian Community;
17. Redding Rancheria;
18. Roaring Creek Rancheria;
19. Smith River Rancheria;
20. Susanville Rancheria;
21. Tolowa-Tututni Tribe;
22. Winnemucca Colony;
23. XL Ranch;
24. Yurok Tribe.

b. **Idaho:**

1. Nez Perce Tribe of Idaho;
2. Shoshone-Bannock Tribes.

c. **Nevada:**

1. Duck Valley Shoshone-Paiute Tribes;
2. Fallon Paiute-Shoshone Tribe;
3. Fort McDermitt Paiute-Shoshone Tribe;
4. Lovelock Paiute Tribe;
5. Pyramid Lake Paiute Tribe;
6. Reno-Sparks Indian Colony;
7. Summit Lake Paiute Tribe;
8. Walker River Paiute Tribe;
9. Winnemucca Indian Colony;
10. Yerington Paiute Tribe.

d. **Oklahoma:** Modoc Tribe of Oklahoma.

e. **Washington:**

1. Chehalis Community Council;
2. Colville Confederated Tribes;
3. Quinault Indian Nation;
4. Shoalwater Bay Tribe;
5. Yakama Indian Nation.

4. A student seeking to be assessed resident tuition under the provisions of this rule shall submit, following procedures prescribed by the OUS institution where the student seeks to enroll, a photocopy of tribal enrollment which documents tribal membership.

RESIDENCE CLASSIFICATION OF NONCITIZENS (580-010-0040)

A person who is not a citizen of the United States may be considered an Oregon resident if the person qualifies as a resident under OAR 580-010-0030 and is one of the following:

1. A lawful permanent resident. The date of approval of lawful permanent residency shall be the earliest date upon which the 12-month residency requirements under OAR 580-010-0030 may begin to accrue.
2. An immigrant granted refugee or political asylum in the United States. The date of approval of political asylum or refugee status shall be the earliest date upon which the 12-month residency requirements under OAR 580-010-0030 may begin to accrue.
3. A person holding one of the following non-immigrant visa classifications: A, E, G, H-1B, H-1C, the spouse or child of a person holding an H-1B or H-1C visa, I, K, L, NATO, O, R, S, T, TN, U, or V. The date of the issuance of a visa for one of these classifications shall be the earliest date upon which the 12-month residency requirements under OAR 580-010-0030 may begin to accrue. A person possessing a non-immigrant or temporary visa that is not identified under this rule shall not be considered an Oregon resident.

CHANGES IN RESIDENCE CLASSIFICATION (580-010-0041)

1. If an Oregon resident student enrolls in an institution outside of Oregon and later seeks to re-enroll in an OUS institution, the residence classification of that student shall be re-examined and determined on the same basis as for any other person.
2. A financially dependent student who is dependent on a person who establishes a permanent Oregon residence as defined in OAR 580-010-0030(2) during a term when the dependent student is enrolled at an OUS institution may register as a resident at the beginning of the next term.
3. Once established, classification as a resident continues so long as the student remains in continuous academic year enrollment in the classifying institution.
4. A person who seeks classification as a resident under these rules shall complete and submit a notarized Residence Information Affidavit. The affidavit and all required supportive documents and materials must be submitted by the last day to register for the term in which resident status is sought.

5. No OUS institution is bound by any determination of residency except by duly authorized officials under procedures prescribed by these rules including timely submittal of the notarized affidavit.

REVIEW OF RESIDENCE CLASSIFICATION DECISIONS BY IRC (580-010-0045)

1. An interinstitutional residency committee (IRC) is established consisting of the officers determining student residence classification at OUS institutions and a member of the Chancellor's staff appointed by the Chancellor. The member of the Chancellor's staff shall serve as chairperson. A majority of the members of the Committee shall constitute a quorum. A majority of a quorum may make decisions.
2. Residence cases of unusual complexity, especially where there may be conflict of rules, may be referred by an institution residence classification officer to the IRC for decision.
3. Any person who is aggrieved by the institution residence classification may, within ten (10) days of the date of mailing or other service of classification decision, appeal the classification to the IRC. The appeal must be in writing and shall be filed with the institution. An aggrieved person may supply written statements to the IRC for consideration in reviewing the case and may also make an oral presentation to the IRC on a date to be scheduled by the IRC. The decision of the IRC shall be final unless appealed.
4. A person dissatisfied with the IRC decision may, within ten days of the date of the mailing or other service of the IRC decision, appeal the IRC decision to the Vice Chancellor for Academic Affairs or designee. An appeal to the vice chancellor shall be in writing only. The vice chancellor's decision shall be final.
5. A person granted a meritorious hardship exception to residency under this rule prior to July 1, 1990, shall not lose the exception solely because of the repeal of the exception authorization.

RESIDENTS UNDER WICHE (580-010-0047)

A certification officer, designated by the Board, shall determine the residence classification of any person seeking certification as an Oregon resident, pursuant to the terms of the WICHE Compact. Any person dissatisfied with the decision of the certification officer may appeal to the IRC. The decision of the IRC shall be final unless further appeal is made to the Vice Chancellor for Academic Affairs pursuant to OAR 580-010-0045(4).

The Office of Financial Aid and Scholarships is here to help you invest in your future. We offer many financial aid choices for undergraduate and graduate students. It's a good idea to apply for financial aid at the same time that you apply for admission to OSU. Although we won't review your financial aid information until after your admission application is filed, you can still apply for financial aid before you have been admitted to OSU. Learn more about your options at OSU by choosing a category below so that you can start the process of applying for aid...and reaching your goals.

Financial aid is based on the premise that the student and parents are primarily responsible for providing for their education expenses and is intended to supplement student and family contributions toward educational costs. Financial aid comes from many sources, including the federal and state governments, private organizations, and Oregon State University's institutional funds. These funds consist of grants, scholarships, Federal Work-Study, subsidized loans, unsubsidized loans, and parent loans.

FINANCIAL AID AND SCHOLARSHIPS

Eligibility/Application Procedures

To be eligible for federal financial aid, a student must:

1. Fill out the Free Application for Federal Student Aid (FAFSA), **applying as soon as possible after Jan. 1** using previous year tax data (for example the 2014–2015 application will use 2013 tax information). Parents and students may estimate their income information as accurately as possible in order to complete the form and submit it by the **OSU priority deadline of February 28**. Improvements to the FAFSA application process now allow for the completion of tax information questions from the IRS directly from your return! Follow the prompts while completing the application to authorize this information exchange. Always remember that there is no fee to apply for federal aid.
2. List Oregon State University as a school that you would like your information to be sent to on the FAFSA. Oregon State's school code is **003210**.
3. **The priority FAFSA application deadline for OSU is February 28th. This date is used to determine eligibility for some need-based aid programs as well as state and institutional funds.** Applications received after the priority deadline will still be eligible for federal aid such as the Pell Grant and Direct Loans. Graduate students are not eligible for federal Title IV grants or subsidized loans.

4. Make sure you are eligible to receive financial aid. In order to receive federal funding you must:
 - Have a high school diploma or a General Education Development (GED) certificate, or complete a high school education in a home school setting that is treated as such under state law.
 - Be enrolled or accepted for enrollment in a degree or approved certificate program (e.g., not special admit)
 - Be a U.S. citizen or eligible noncitizen.
 - Have a valid Social Security Number.
 - Register with the Selective Service if required. You can register at <http://www.sss.gov>, or you can call 1-847-688-6888. (TTY users can call 1-847-688-2567.)
 - Maintain satisfactory academic progress as defined by Oregon State University once in school.
 - Are not in default on a federal student loan and do not owe money on a federal student grant.
 - The Higher Education Act of 1965 as amended (HEA) suspends aid eligibility for students who have been convicted under federal or state law of the sale or possession of drugs, if the offense occurred during a period of enrollment for which the student was receiving federal student aid (grants, loans, and/or work-study).
5. Apply for admission to Oregon State University: **Apply Online**. You will not be considered for any financial aid award until you have applied to the university.

WHAT HAPPENS AFTER I APPLY?

Once you have submitted your FAFSA application online you will receive a confirmation of receipt from the FAFSA processor. They will also send you a Student Aid Report that will give you a summary of your application and inform you of any problems you might need to resolve. You should read this report carefully and resolve problems in a timely manner. If you receive notification that something on your FAFSA is missing or incorrect, you can check Online Services Financial Aid information or contact the OSU Office of Financial Aid and Scholarships for further information.

Students whose aid application was received by the end of February may expect to receive an initial award letter by approximately April 1. Aid applications are then completed on a rolling basis by date of receipt with award notifications being sent out as files are completed.

You will receive an email or letter once your financial aid award has been completed. You will also be notified if you need to provide further information in order for us to complete your application. All cor-

respondence will be sent to your ONID account, so be sure to keep your information up to date!

The award notification will show the type and amount of aid available to you for the coming school year. To reserve these funds, the student must read and accept the award within 30 days. The accepted award indicates the student has read and agrees to the terms of the award as outlined.

You can accept, reject, or revise your Financial Aid Award through Online Services by completing the following steps:

- Log in
- Go to Financial Aid
- Go to My Award Information
- Go to Award by Aid Year
- Select the appropriate year (e.g. 2014–2015)
- Select the far right tab, Accept Award Offer
- Make your decisions about the aid that you want
- Click Submit when done
- Go to the <http://www.studentloans.gov> to complete any necessary Entrance Counseling or Master Promissory Notes

Please note that PLUS loans are credit based and require a separate application process. Please visit <http://www.studentloans.gov> for additional information. PLUS credit checks/application expire within 90 days, so be sure to wait until 90 days or less prior to the start of the term you are attending before you apply.

If you make a mistake while accepting your award, do not worry, we can fix it for you! Just visit the Financial Aid Forms page and submit a copy of the Student Loan Revision Request form so we can make the necessary adjustments for you.

You are responsible for notifying the OSU Office of Financial Aid and Scholarships in the event that you receive any additional awards from any other source. The OSU Office of Financial Aid and Scholarships will then make any required revisions to your aid package. The receipt of additional aid may result in a reduction or elimination of aid from university-administered programs, even if it has already been paid.

TYPES OF FINANCIAL AID

Federal Programs

Federal Pell Grant – The Federal Pell Grant is a need-based grant from the federal government intended for undergraduate students who have not earned a bachelor's degree. Each student's award amount is determined on the basis of family circumstances and cost of attendance. After the Free Application for Federal Student Aid (FAFSA) is filed, the Department of Education sends you a Student Aid Report (SAR) or an Information Acknowledgement if you filed

online. These documents will indicate if you are Pell eligible and it is important to review them for accuracy.

Federal Supplemental Educational Opportunity Grant (FSEOG)

– The Federal Supplemental Educational Opportunity Grant is awarded to undergraduate students with exceptional financial need and is administered by the OSU Office of Financial Aid and Scholarships. Funds are limited and eligibility is based in part by meeting the OSU priority FAFSA submission deadline of February 28.

Federal College Work-Study Program (FWS)

– The Federal Work-Study (FWS) program provides part-time jobs for students with financial need to help them pay for their education. It's designed to put you to work in the community or in a job related to your studies, whenever possible. The program is administered by the OSU Office of Financial Aid and Scholarships. Funds are limited and eligibility is based on need and in part by meeting the OSU priority FAFSA submission deadline of February 28. The amount of FWS indicated on your award is the maximum amount you may earn for the academic year. Funds are paid monthly on the basis of hours worked in the pay period not to exceed 20 hours per week. Wages range from the state minimum rate up to \$10.00 per hour, depending on job responsibilities.

Federal Perkins Loan – A Federal Perkins Loan is a low-interest (5 percent) loan for full-time undergraduate, postbaccalaureate, and graduate students. Funds are limited and eligibility is based on need and in part by meeting the OSU priority FAFSA submission deadline of February 28. Perkins Loans are made through OSU's Financial Aid office. OSU is your lender, and the loan is made with government funds. Repayment and Deferment options are handled by the OSU Business Affairs Student Loan Office. Students must be enrolled at least half-time and repayment begins nine months after graduation, withdrawal, or if you drop below half-time enrollment. **The maximum loan amount per year at OSU depends on available institutional funds and may not meet the federal yearly maximum.**

Federal Direct Ford Loan Program

– Direct Stafford Loans, from the William D. Ford Federal Direct Loan (Direct Loan) Program, are low-interest loans for eligible students to help cover the cost of higher education. Eligible students borrow directly from the U.S. Department of Education (the department) at participating schools. The maximum yearly amount for any combination of Direct Subsidized and Unsubsidized Stafford/Ford Loan as set by the federal

government and based on class rank are:

- \$5,500 for the first year of undergraduate study (freshman=0–44 credits);
- \$6,500 for the second year of undergraduate study (sophomore=45–89 credits);
- \$7,500 per academic year for the remaining years of undergraduate study (junior/senior=90+ credits);
- \$20,500 per academic year for graduate students.

The **Subsidized** Federal Direct Ford Loan is need-based with the government paying the interest on the loan while the student is enrolled. Students must be enrolled at least half-time and repayment begins six months after graduation, withdrawal, or if you drop below half-time enrollment. For current interest rates, visit <http://www.oregonstate.edu/financialaid>.

The **Unsubsidized** Federal Direct Ford Loan is non-need-based with the student being responsible for paying the interest while enrolled. Students may choose to defer the interest by having it added to the principal, which is called capitalization. Students must be enrolled at least half-time and repayment begins six months after graduation, withdrawal, or if you drop below half-time enrollment. The maximum annual loan limit is \$2,000. For current interest rates, visit <http://www.oregonstate.edu/financialaid>.

Independent undergraduate students are eligible to borrow an additional Federal Direct Unsubsidized Ford Loan amount. Dependent undergraduates may not borrow from this program, unless an exception is made by a financial aid advisor due to the student's parent being denied the FDPLUS loan. The additional loan limits are:

- \$4,000 for the first year and second year of undergraduate study;
- \$5,000 per academic year for the remaining years of undergraduate study.

Graduate students are only eligible to receive Unsubsidized Direct Loans effective July 1, 2012. The annual loan maximum is:

- \$20,500 per academic year for graduate students.

The total debt you can have outstanding from all Federal Stafford/Ford Loans combined is:

- \$31,000 as a dependent undergraduate;
- \$57,500 as an independent undergraduate;
- \$138,500 as a graduate or professional student, which includes all loan amounts received for undergraduate study.

Federal Direct Parent Loan for Undergraduate Students (FDPLUS)

– The FDPLUS is a federal loan borrowed

by the parent on behalf of a dependent student to assist with educational expenses. Students are awarded the maximum amount they are personally eligible to receive. Parents may borrow the remaining amount up to the cost of attendance in the form of a Parent PLUS loan. As with all loans, you are not required to take it. Parents are required to complete a FAFSA application to be eligible for a Direct PLUS Loan, and the parent must complete a Direct PLUS Loan Application and Master Promissory Note (MPN) on the Federal Loan website. The PLUS is a non-need based loan. Interest is charged on the loan from the date the first disbursement is made until the loan is paid in full. Payment can be deferred while the student is attending school at least half-time, but interest will continue to accrue. For current interest rates, visit <http://www.oregonstate.edu/financialaid>.

STATE AND INSTITUTIONAL PROGRAMS

Campus Scholarships – Limited merit and need-based campus scholarships are administered by the Office of Financial Aid. Eligibility is limited to students who have completed fewer than 12 terms and submit the aid application (FAFSA) by February 1. Recipients must be enrolled full time and are notified of their awards in writing.

Departmental Awards – Each department on campus administers their own awards. Contact the department or donor directly for specific information regarding the award. For a searchable database of scholarships, visit: <http://www.oregonstate.edu/scholarships>.

Private Awards – These awards come from outside donors and can affect your financial aid package. Outside scholarship checks should be mailed to Student Accounts at the following address: Student Accounts, Oregon State University, PO BOX 1086, Corvallis, OR 97339. If you have not already submitted notification to the Financial Aid Office regarding your outside scholarships, please submit the Reporting Additional Sources of Assistance form located on the Financial Aid website. Please review your scholarship payment status through Online Services as funds will be credited to your student billing account when received.

State of Oregon Opportunity Grant – The Opportunity Grant is a state grant administered by the Oregon Student Access Commission (OSAC) and awarded to full-time undergraduates Oregon residents based on need and allowable funding. Twelve terms of eligibility are possible. This grant is not available during summer term.

OTHER PROGRAMS

Private Supplemental/Alternative Loan – Students needing additional funding for school, whose aid package has not fully met their cost of attendance, may opt to apply for funding through a private lending agency. These loans have a variable interest rate, and a credit check must be done on all applicants. OSU cannot recommend lenders for private/alternative loans.

GRADUATE STUDENTS

Graduate students are only eligible to receive Unsubsidized Direct Loans effective July 1, 2012. The annual loan maximum is \$20,500 per academic year for graduate students with an aggregate borrowing limit of \$138,500, which includes all loans borrowed for undergraduate study. Students must be enrolled at least half time (5 credits) and repayment begins six months after graduation, withdrawal, or if you drop below half-time enrollment. For current interest rates, visit <http://www.oregonstate.edu/financialaid>.

In addition to Unsubsidized Direct Loan eligibility, Graduate Students can also apply for a GRAD PLUS loan to help cover education expenses.

The terms and conditions applicable to PLUS Loans for parents also apply to PLUS Loans for graduate and professional students. These terms and conditions include a determination that you (the applicant) do not have an adverse credit history.

Before you can receive a PLUS Loan, your school must have determined your maximum eligibility for Direct Unsubsidized Stafford Loans.

In addition to these Federal Aid Programs, the Graduate School offers additional information on Assistantship, Grant and Scholarship Opportunities on their website.

RECEIPT OF AID FUNDS

OSU Office of Business Affairs is responsible for disbursing refunds from student accounts once financial aid has been applied to your student account. You must be registered and have your tuition and fees billed to your account for financial aid to be applied. Aid funds are never made available in advance. Textbooks cannot be charged to a student's account. It is assumed that the student will purchase textbooks out-of-pocket and use any refund to "reimburse" themselves for the costs. If a credit balance remains on your student account after current university charges are paid, you will be issued a refund. Federal Work-Study earnings are paid by payroll check to you each month for hours worked. You may receive a refund and still have an outstanding balance on your account. For more information about your bill or refund, visit the Business Affairs website.

Delayed Disbursements

There are several ways in which your aid may be delayed. Here are the most common reasons:

- You may be required to complete Entrance Counseling and sign a Master Promissory Note (MPN) for your Ford Direct Loans. You would have been notified of these requirements via an email to your ONID email account.
- Dropping classes (below 12 for undergraduates, 9 for graduates). All students are assumed to be full-time unless they notify Financial Aid in writing that they will be less. If you are not enrolled at full-time and have not notified us, your aid will not disburse.
- Registering late for classes.
- Being waitlisted for classes. These classes do not count toward your enrollment level until you are actually enrolled in them.
- Having unsatisfied requirements with your financial aid file that you have not completed.

You are responsible for managing your Financial Aid experience, so be sure to check Online Services frequently and review any emails you receive from us as they may include requests for additional information or action.

LOANS

Borrowed money you repay with interest.

• Federal Perkins Loan

The Federal Perkins Loan is a need-based, university administered federal loan with a 5 percent interest rate. The Federal Perkins Loan is interest-free while the student is enrolled at least half time. Repayment begins nine months after graduation or withdrawal. Students are considered for the Federal Perkins Loan on the basis of their financial aid application (FAFSA). The loan is made available to full-time undergraduates, post-baccalaureate and graduate students with high financial need. The maximum loan amount per year at OSU depends on available funds and may not meet the federal maximum. Payments and the length of the repayment period depend on the size of your debt with up to 10 years to repay. Deferments are possible under certain conditions and are handled by the OSU Business Affairs Office.

• William D. Ford Federal Direct Loan Program

The following loans are awarded by the OSU Office of Financial Aid and Scholarships to students on the basis of their financial aid application (FAFSA). Under this program, the loan funds come directly from the U.S. Government. A fee of up to 1.5 percent of the loan is

deducted proportionately from each disbursement.

• **Federal Direct Subsidized Ford Loan**

This is a need-based federal loan with a fixed interest rate of 6.8 percent for new borrowers. The interest rate is set by federal legislation. The government pays the interest on the loan while the student is enrolled at least half time. Repayment begins six months after graduation, withdrawal, or if a student drops below half time. For current interest rates, visit <http://www.oregonstate.edu/financialaid>.

• **Federal Direct Unsubsidized Ford Loan**

This is a non-need-based federal loan for both undergraduate and graduate students. The student is responsible for paying the interest while enrolled, but may choose to defer the interest payment until repayment begins six months after graduation, withdrawal, or if a student drops below half time. For current interest rates, visit <http://www.oregonstate.edu/financialaid>.

The maximum yearly loan amount for any combination of Direct Subsidized and Direct Unsubsidized Ford Loan as set by the federal government and based on class rank are:

- \$5,500 for the first year of undergraduate study (freshman=0–44 credits);
- \$6,500 for the second year of undergraduate study (sophomore=45–89 credits);
- \$7,500 per academic year for the remaining years of undergraduate study (junior/senior=90+ credits);

Independent undergraduate students are eligible to borrow an additional Federal Direct Unsubsidized Ford Loan amount. Dependent undergraduates may not borrow from this program, unless an exception is made by a financial aid advisor due to the student's parent being denied the FDPLUS loan. The additional loan limits are:

- \$4,000 for the first year and second year of undergraduate study;
- \$5,000 per academic year for the remaining years of undergraduate study.

Graduate students are only eligible to receive Unsubsidized loan funds effective July 1, 2012. The annual loan maximum is:

- \$20,500 per academic year for graduate students.
- The total debt you can have outstanding from all Stafford/Ford loans combined is:
- \$31,500 as a dependent undergraduate;
- \$57,500 and an independent undergraduate;
- \$138,500 as a graduate or professional student, which includes

all loan amounts received for undergraduate study.

- \$224,000 as a graduate health professional student

• **Federal Direct Parent Loan for Undergraduate Students (FDPLUS)**

The FDPLUS is a federal loan borrowed by the parent on behalf of a dependent student to assist with educational expenses. Students are awarded the maximum amount they are personally eligible to receive, after which PLUS loans are automatically offered to the parents of dependent students to meet the cost of attendance. As with all loans, you are not required to take it. Parents are required to complete a FAFSA application to be eligible for a Direct PLUS Loan, and the parent must complete a Direct PLUS Loan Application and Master Promissory Note (MPN) on the Federal Loan website, <http://www.studentloans.gov>. The PLUS is a non-need based loan. Interest is charged on the loan from the date the first disbursement is made until the loan is paid in full. Payment can be deferred while the student is attending school at least half-time, but interest will continue to accrue. For current interest rates, visit <http://www.oregonstate.edu/financialaid>.

REQUESTING CHANGES

It is understood that you want as much grant and scholarship money as possible. When you are awarded your financial aid, your award will reflect your eligibility for available grant aid. When accepting your award, you may always request a lesser loan amount. Please note that loan funds are divided into equal disbursements, based on your enrollment at OSU within the given year. You may replace your Federal Work-Study funds with a Direct Ford loan, however this is dependent upon your loan eligibility. In addition, if you initially decline loan funds but find later that you in fact need them, you may also request that the loan be reinstated up to the total of your original offer. Please request any changes in writing by submitting a Loan Revision Request form to the financial aid office. Be aware that not all budget requests can be accommodated.

Additional Costs

In certain instances, your cost of attendance may be adjusted to include other allowable costs incurred to meet your educational needs. Requests are reviewed on a case-by-case basis to determine approval. Documentation of the additional expense must be included for consideration. If approved, additional expenses are usually funded with "self-help" assistance in the form of loans. Adjustments are not made for consumer debts, car payments, or private school tuition.

Adjustments may include, but are not limited to:

- Medical or dental cost not covered by insurance
- Computer expense (one time allowance)
- Child care cost for children 12 and under
- Commuting costs from outside the Corvallis area
- Costs related to students with disabilities
- Study abroad program fees

Parent or Student Expected Contributions (EFC)

The information you reported on your FAFSA is used to calculate a number called the Expected Family Contribution (EFC). The EFC is not the amount of money that your family must provide. The school uses the EFC to determine the amount of your federal grants, loans, or work-study awards for which you may be eligible.

Changes in your situation:

Financial Aid offices may consider special or unusual circumstances that impact your family situation. Examples such as loss of employment, a one-time benefit (that affected your previous year's tax return), a change in marital status since filing the FAFSA, and major medical or dental expenses, may be considered. For more information please download and review the appeal form, and feel free to contact us with any questions you might have.

RENEWING AID

You must apply for financial aid every year by submitting a FAFSA application. Applications must be received before February 28 at the central processor to be considered for priority funding. You may apply for aid online after Jan. 1 for the following academic year. Below are a few of the issues that may affect you as a continuing OSU student and financial aid recipient. Be sure to keep on top of managing your award!

DROPPING COURSES AND THE CENSUS DATE

Dropping courses impacts your financial aid in several ways. Aid assistance is based on your enrollment level each term and may be adjusted accordingly. All students are initially awarded based on full-time enrollment. Full-time undergraduate status is 12 or more credits, 3/4 time is 9–11 credits, 1/2 time is 6–8 credits, and anything below 6 credits is considered less than half time. Changes in your enrollment levels may affect your financial aid eligibility.

Your financial aid is paid each term based on your level of enrollment at the "census date". The term Census Date refers to the point at which your enroll-

Yearly Loan Limits

If you have been awarded a Ford loan, you are eligible for additional Ford loan funding as you progress through school. Depending on your credits and class standing, you will be able to receive different loan amounts. Below are the credit requirements and loan amounts:

Class Standing	Credits	Loan Limit (Dependent)	Loan Limit (Dependent)
Freshman	0-44	\$5,500	\$9,500
Sophomore	45-89	\$6,500	\$10,500
Junior/Senior	90-up	\$7,500	\$12,500

If you change class standing in either fall or winter term, you may request that your loans be increased for the current academic year. Download and complete the Loan Revision Form and return it to the Office of Financial Aid and Scholarships for review.

ment is locked for financial aid purposes, and it happens to coincide with the last date you can add or drop classes for a full tuition refund. This Census Date is used for all terms, including the summer session. At this point in the term, credit hours are locked and financial aid for the term is adjusted to reflect the student's official enrolled credits. For example, if the student received aid at the beginning of the term based on full-time enrollment and then dropped credits, aid is then revised to match their eligibility based on the number of credits enrolled in as of the Census Date and types of aid that were awarded. Credits added after the Census Date cannot be used to increase financial aid eligibility.

When you drop credits after the census date and your aid has been paid, you will not need to repay your financial aid you unless you completely withdraw from ALL classes for the term. You will instead need to be concerned with meeting Satisfactory Academic Progress, as this will affect your overall PACE (completion rate).

WHAT HAPPENS IF I WITHDRAW?

Students who withdraw from the university after the start of the term must complete a Withdrawal Form through the Registrar's Office ("Withdraw from the University for the Term") and contact the Office of Financial Aid and Scholarships. If financial aid funds were used to pay tuition and fees, and a student withdraws, any refundable tuition amount is returned to the appropriate financial aid sources (refer to the tuition/fee refund schedule in the OSU Schedule of Classes).

Return of Title IV Funds and Withdrawal Record

OSU is required to calculate the return of Title IV financial aid funds for students that officially or unofficially withdraw during the academic term. Students who do not intend to complete the term for which they are enrolled, should follow the official withdrawal process as outlined by university regulations. This calculation determines the amount of

aid funds that must be returned by the institution as well as how much aid the student must return for the period of non-enrollment. If a return of aid amount is calculated, the funds must be repaid to the financial aid programs in the following order:

- Federal Direct Unsubsidized Ford Loan
- Federal Direct Ford Loans
- Federal Perkins Loan
- Federal Direct PLUS Loan
- Federal Pell Grant
- FSEOG

The amount of federal aid that you must repay is determined via the Federal Formula for Return of Title IV funds (Section 484B of the Higher Education Act). This law also specifies the order in which funds are to be returned to the financial aid programs from which they were awarded, starting with loan programs.

You may be required to make a repayment when cash has been disbursed from financial aid funds, in excess of the amount of aid that you earned (based on the date of your total withdrawal) during the term. The amount of Title IV aid earned is determined by multiplying the total Title IV aid (other than FWS) for which you qualified by the percentage of time during the term that you were enrolled.

If less aid was disbursed than was earned, you may submit a request to receive a late disbursement for the difference.

If more aid was disbursed than was earned, the amount of Title IV aid that you must return (i.e. not earned) is determined by subtracting the earned amount from the amount actually disbursed.

The responsibility for returning unearned Title IV aid is shared between the university and you. It is allocated according to the portion of disbursed aid that could have been used to cover university charges, and the portion that could have been disbursed directly to you once those charges were covered. OSU will distribute the unearned aid back to the Title IV programs, as specified by law. You will be notified if you owe a repayment due to

an official/unofficial withdrawal within 45 days of the date the determination of the withdrawal is made.

You will be billed for the amount that you owe to the Title IV programs, as well as any amount due to the university, as a result of Title IV funds that were returned that would have been used to cover university charges.

Students who have received aid and then withdraw will have future funds withheld. Students must appeal in writing to the OSU Office of Financial Aid and Scholarships regarding their academic progress and future aid eligibility.

STUDENT RESPONSIBILITIES

Reporting Changes

Your financial aid is based on the information submitted to our office for the current academic year in which you requested aid. To keep your file current and accurate, you are required to report the changes to the OSU Office of Financial Aid and Scholarships. You should expect a revision of your award in most cases. Reasons for changes can include but are not limited to:

- Additional financial assistance: scholarships, grants, loans, fee waivers, Tribal Assistance, tuition/book support, social security benefits or any other monetary award not reported previously.
- Receipt of graduate teaching or research assistantship, and/or fellowship.
- Receipt of resident advisor position or ROTC stipend and scholarship
- Changes in enrollment hours and/or withdrawal from the university
- Changes in residency status for tuition purposes.
- Change in course load if below full time.

Entrance and Exit Interview

All Federal Direct Ford loan recipients are required to complete an entrance interview prior to receiving the first disbursement of their loan proceeds. They are also required to complete an exit interview during their last term of attendance. (For further information, visit <http://www.studentloans.gov>).

Applying Annually

You must submit a financial aid application (FAFSA) for each academic year in which you want to be considered for financial aid assistance. Oregon State University is not obligated to continue aid beyond the last term stated on the award letter.

Appeals

Students who are not satisfied with a decision of a financial aid staff member may appeal that decision, in writing, and then in person to the following staff in the order indicated: the director of

Financial Aid and Scholarships, and then the Financial Aid Appeals Subcommittee. The decision of the director and/or Financial Aid Appeals Subcommittee will be considered final.

STUDENT ENROLLMENT LEVELS

Federal financial aid eligibility and deferment of student loans are affected by enrollment levels. Summer enrollment levels are the same as other terms.

Undergraduate

Full Time: 12 or more credits in a term

Three Quarter Time: 9 to 11 credits in a term

Half Time: 6 to 8 credits in a term

Graduate

Full Time: 9 or more credits in a term

Half Time: 5 to 8 credits in a term

SCHOLARSHIP MANAGEMENT SYSTEM (SMS)

Students seeking scholarships are encouraged to use the centralized Scholarship Database at https://scholarship.ucsadm.oregonstate.edu/prod/search_schol.php

For further information, contact Jessica Abblitt, Assistant Director of Scholarships, Office of Financial Aid and Scholarships, 541-737-9056, jessica.abblitt@oregonstate.edu.

ART AND MUSIC

Yuji Hiratsuka, *School of Arts and Communication*
541-737-5006
yhiratsuka@oregonstate.edu

Marlan Carlson, *School of Arts and Communication*
541-737-5591
mcarlson@oregonstate.edu

Art exhibits, lectures, concerts, and recitals sponsored by the School of Arts and Communication, Memorial Union Program Council, and student musical and art organizations play a central part in the cultural life of the community. Under the patronage of the Memorial Union, exhibitions in the Memorial Union stimulate interest in architecture, painting, sculpture, and related arts. They offer students knowledge of their cultural heritage and an awareness of contemporary art movements.

The School of Arts and Communication features the Fairbanks Gallery of Art <http://oregonstate.edu/fairbanksgallery/About.html>, which features exhibitions focusing on contemporary Northwest, national, and international artists. This program provides the campus and student communities diverse creative experiences and interactions. The Visiting Artists and Scholars Lectures Series also brings internationally acclaimed artists to the school for free public lectures.

Student and faculty art exhibits are shown in various galleries throughout the year (see "Museums, Galleries, Collections.")

Noncredit classes in ceramics, photography, woodworking, weaving, and glass are offered through the Memorial Union Craft Center.

The School of Arts and Communication offers more than two dozen performance ensembles, giving student musicians of all majors the opportunity to participate at their level of ability. Students enroll in these organizations as a class and earn regular credit. Some ensembles require an audition. All require a consultation with the instructor. The Corvallis-OSU Symphony Orchestra, Wind Ensemble, Campus Band, Chamber Choir, Bella Voce women's chorus, Meistersingers men's chorus, OSU Opera Workshops, jazz band, and the athletic bands present numerous performances on or near campus, in which free or reduced-price tickets are available to students. Faculty members and advanced music majors also perform free, public recitals throughout the school year. The OSU Steinway Piano Series, Chamber Music Corvallis and the Corvallis-OSU Symphony Orchestra bring artists of international fame to campus for public concerts. The Music à la Carte Concert

series, held most Thursdays at noon in the Memorial Union Lounge, gives students and faculty the opportunity to see fine amateur and professional chamber, jazz, and ethnic musicians and performance ensembles for free over the lunch hour. Several dance recitals are also given each year under the auspices of the College Health and Human Sciences and other organizations.

ASOSU OFFICE OF ADVOCACY

Patricia Lacy, *Advocate*
131 MU East
541-737-6349
Patricia.lacy@oregonstate.edu
Websites: <http://oregonstate.edu/dept/asosu-advocacy>

****The Office of Advocacy does not handle immigration, taxes, copyright, patent, small business or real estate issues.****

The following are some of the areas with which the Office of Advocacy assists:

- Academic Dishonesty
- Financial Aid
- Privacy
- Student Conduct
- Tuition, Fees, Business
- On-Campus Disputes with OSU Security Officers/Oregon State Police
- Faculty Misconduct
- Grade Appeals
- Parking
- Residency Appeals
- Student Health Insurance
- University Housing & Dining Services/The Gem
- INTO OSU

If you are unsure whether your issue falls within the scope of the Office of Advocacy, please contact one of our student interns at 541-737-9200 for clarification.

About Us

The Office of Advocacy has worked with thousands of students in a wide array of conflicts. Since 2000, the Office of Advocacy has served to empower and support students within the university. In addition to helping with conflicts, researching and providing general assistance to students, we work to support and further the best interest of students throughout the university. We encourage all students to contact our office with any questions or disputes that involve the university.

ASOSU STUDENT ADVOCATE

Drew Desilet, *Student Advocate*
149 Snell Hall, Corvallis, Oregon 97331
541-737-8237
drew.desilet@oregonstate.edu
or student.advocate@oregonstate.edu
Website: <http://asosu.oregonstate.edu/>

The ASOSU Student Advocate serves as a community organizer and political advisor for students, while providing a level of faculty and staff support to the student leaders of the ASOSU. This position provides direct support to ASOSU, student organizations and individuals in their grassroots efforts to create change that improves the lives of students. The ASOSU Student Advocate also helps to coordinate the ASOSU Organizing for Social Change Internship Program, which includes a range of introductory and advanced courses designed to advance student government leadership by familiarizing students with direct-action, community and grassroots organizing, movement-building and capacity-building, political identity development, government relations, and tactics for addressing contemporary and historical issues facing students, as well as related concepts central to engaging student governance. The student advocate also exists to provide logistical expertise to student leaders in planning and implementation of events, trainings, and professional development.

ASSOCIATED STUDENTS OF OREGON STATE UNIVERSITY

ASOSU
149 Snell Hall
541-737-2101
541-737-5560 FAX
asosu@oregonstate.edu
Website: <http://asosu.oregonstate.edu>

The Associated Students of Oregon State University (ASOSU) is an alliance encompassing all students at OSU. The **elected and appointed officers** comprise the officially recognized student government at OSU. The ASOSU represents students at the campus, community, state, and federal levels on issues that directly influence the quality of, and access to, post-secondary education. ASOSU provides numerous opportunities for leadership development and professional experience in areas as diverse as political organizing and other forms of social activism.

The structure of ASOSU is similar to other forms of national government. Governance is shared among three branches—the legislative, judicial, and executive. The legislative portion is divided into two bodies, the **ASOSU House of Representatives** and the **ASOSU**

Senate. House Representatives and Senators are elected by popular vote during the student officer elections in spring term of each academic year. The judiciary function in ASOSU is carried out by the **Judicial Council.** The Judicial Council, comprised of seven students at large, oversees any controversies or cases that involve interpretation of the ASOSU Constitution.

The **Executive branch** is led by the president and vice president whom are elected as a ticket by popular vote of the entire student body. Upon election, this executive duo appoints executive officers, service directors, 10 taskforce directors, as well as various support staff. Each executive appointee is subject to approval by the ASOSU Congress. Those **seeking employment with ASOSU are welcome and encouraged to apply for positions during the spring hiring process, which usually takes place early in May.**

ASOSU is constantly seeking **interns and volunteers** and future leaders who are ambitious about making a difference in the lives of OSU students.

There are a number of ways to **get involved in a broad range of interests and topics.** One of the easiest ways to get involved in ASOSU is to simply volunteer. Volunteers work at their own pace and choose their level of involvement.

Through the **ASOSU Organizing for Social Change Internship Program**, students spend between 2 to 6 hours per week working with any of the various members of the executive branch, as well as attend a class one night a week to learn fundamental leadership and organizing skills. The Internship is a great way to create your own path into campus governance at OSU.

Students can also serve as representative on one of the various campus **committees** at OSU that govern issues ranging from public safety to budgets and fiscal planning. Students who serve on a university committee are eligible to receive academic credit.

If you are interested in getting involved in one of the nation's premiere student governments, or have any questions or concerns regarding any other matter, please feel free to contact ASOSU anytime.

ATHLETICS

Website: <http://oregonstate.edu/dept/camp/>

The College Assistance Migrant Program is a federally-funded program through the U.S. Department of Education that provides support for first-year college students from migrant/seasonal farmworker backgrounds.

To be eligible, the student or the student's parents must have worked at least 75 days in the past 24 months in migrant/seasonal farmwork (including crop, dairy, poultry or livestock production, the cultivation or harvesting of trees, or work on a fish farm), be eligible for participation in a Migrant Education Program, or have attended a High School Equivalency Program (HEP) within the last 12 months and have completed a GED.

CAMP students are eligible for the following scholarships and services:

- Placement testing and academic advising
- Quarterly book allowance to cover the cost of textbooks
- Monthly stipend throughout the academic year
- Personal counseling
- Travel allowance
- Supplemental aid to reduce debt and meet financial need
- Internship in residence halls

- Orientation/study skills workshops
- Financial aid counseling
- Health services
- Free tutoring
- Career orientation, job search skills development
- Other services as needed

Career Services provides career planning and employment services and resources for undergraduate students, graduate students and alumni. More than 400 employers interview OSU undergraduate students, graduate students and alumni each year in Career Services. The annual fall, winter, and spring career fairs bring nearly 300 organizations to campus to meet with students.

Career counselors are available to discuss career exploration and job search strategies. Beaver JobNet lists available jobs and internships on and off campus. Seminars in Career Services include writing cover letters and résumés, interviewing techniques, job search strategies, and co-op and internship opportunities. Resources on the job market and company information are available for student use. Listings of on campus employer recruitment schedules, job listings, and links to employer home pages, as well as other information about Career Services is available on the Web at <http://oregonstate.edu/career/>. Call 541-737-4085.

CENTER FOR CIVIC ENGAGEMENT

Emily E. Bowling, *Civic Engagement and Service Coordinator*

Oregon State University
Snell Hall 158
Corvallis, Oregon 97331-2212
541-737-3041

cce@oregonstate.edu

Website: <http://oregonstate.edu/cce/>

Facebook: <https://www.facebook.com/OSUCCE>

Twitter: <https://twitter.com/OSUCCE>

Better yourself, better the world through community engagement.

Get to know OSU's Center for Civic Engagement (CCE)! The CCE strives to engage students in community service, philanthropy and giving, and activism. Join us to further discover where your passions meet our community's needs.

In partnership with community-based organizations, the Center for Civic Engagement (CCE) facilitates meaningful service, community engagement, and educational programs. The CCE strives to:

- Engage students in service, philanthropy, and activism based work,
- Meet diverse community-identified needs,
- Inspire positive change in local and global communities,
- Enhance students' knowledge of self and sense of place, and
- Foster active citizenship and social responsibility.

Events and Programs:

- Annual Service Days (Make a Difference Day, Dr. Martin Luther King Jr. Day of Service, Earth Day Service Day, Day of Caring)
- DOT: Do One Thing to better the world
- Alternative Break Service Trips
- Non-Profit and Volunteer Fair
- National Hunger and Homelessness Awareness Week
- Bloss Hall Civic Engagement Community

Services:

- Individual service consultation to assist students in finding service opportunities and areas of passion
- Consultation for service groups and student organizations related to community service programming, service-learning education, and reflection strategies
- Networking between the OSU campus and surrounding community

Why get involved?

Here are a few potential benefits of civic engagement and community service:

- Enhance your sense of self and place
- Impact change in your areas of passion and interest

- Deepen your understanding of social issues
- Build relationships with people motivated to create change
- Explore your values, interests, and passions
- Build your leadership and practical skills
- Foster your community and professional networks and contacts
- Survey various career paths and options to aid with career decision-making
- Feel happier, people who volunteer are happier on average!
- Your community needs YOU!

CHILDCARE AND FAMILY RESOURCES

Amy Luhn, *Director*
amy.luhn@oregonstate.edu

Kristi King, *OLV Site Coordinator*
kristi.king@oregonstate.edu

Erika Woosley, *Program Assistant*
Erika.woosley@oregonstate.edu
151 Snell Hall
541-737-4906

Website: <http://oregonstate.edu/childcare>

The Childcare and Family Resources office supports parents at OSU by advocating for student parent needs, as well as the needs of all parents and caregivers on campus *and* by providing direct services, child care and other family-centered resources in support of a parent's academic and professional success. We oversee Beaver Beginnings, the campus child care center; provide free short-term drop-off child care for students with children; provide lactation rooms across campus and lactation support information; administer student and faculty/staff child care subsidy programs; provide monthly parenting education and support opportunities; and host special events for families, in addition to other services and resources. The Childcare and Family Resources office is primarily student fee funded and is directed by an advisory board of students, faculty and staff.

Our Little Village (OLV) is a short-term drop-off child care center with two locations on campus, open evenings and weekends. Drop-off child care enables student parents to take advantage of two important resources on campus: The Valley Library and Dixon Recreation Center. Any currently enrolled student may drop off their child aged 6 months to 10 years old. The free service is paid for by student fees. In The Valley Library, parents must remain in the building while their child is in care. In Dixon Recreation Center, parents may leave the facility and work or study elsewhere on campus.

COALITION FOR COMMUNITY DIALOGUE

Becky Evans, *Coordinator*,
Cultural Programs

433A Snell Hall
541-737-9857

Email: rebecca.evans@oregonstate.edu

Website: <http://oregonstate.edu/communitydialogue/>

The Coalition for Community Dialogue (formerly Team Liberation) believes in justice for humanity through dialogue, continuous learning, and intentional experiences.

Have you taken courses, attended conferences, or participated in retreats, workshops, or any other activities that have inspired in you a passion for social justice? We are building a network where people who have had experiences like these can meet to support one another and to learn and grow together. To do this, we hold regular meetings and quarterly trainings. Additionally, we hold an annual conference and sometimes do workshops, which allows people to engage with us at any level.

For more detailed explanations of these programs, check out our website at <http://oregonstate.edu/communitydialogue/> and you can follow us at <https://www.facebook.com/CoalitionforCommunityDialogueOSU>.

COUNSELING AND PSYCHOLOGICAL SERVICES (CAPS)

Jacqueline Alvarez, *Director*
Snell Hall, 5th floor
541-737-2131

jackie.alvarez@oregonstate.edu

Website: <http://oregonstate.edu/counsel/>

Counseling and Psychological Services (CAPS) is staffed by licensed mental health professionals who are especially trained to work with university students. We provide a variety of confidential counseling, wellness, and educational services to help students address the challenges they face and to help them thrive during their time at OSU. These services are designed to help students understand themselves better, create and maintain satisfying relationships, manage anxiety and stress, improve their mood, enhance academic performance, make healthy and satisfying career and life choices, and address mental health problems that interfere with their ability to succeed. CAPS also houses Sexual Assault Support Services, which has a separate confidential phone line, 541-737-7604.

We are dedicated to helping students by providing brief counseling services, or—if more intensive or specialized care

is needed—making referrals to health care providers in the community. Our counseling services are confidential. This means that anything said to a counselor, the fact that a student used the service, or any test results, are not disclosed to other people or agencies, within the limits of professional ethical and legal standards.

All regularly enrolled Oregon State University students who have paid the Student Health and Counseling Fee are eligible for services. Ecampus students are eligible for services if they pay the entire student fee package for the quarter(s) they receive services.

CAPS staff members are strongly committed to affirming diversity in a broad sense, to treating all with dignity and respect, and to opposing discrimination, prejudice, and oppression.

DEAN OF STUDENT LIFE

Tracy Bentley-Townlin, *Interim Dean of Student Life*
tracy.bentley@oregonstate.edu

Kris Winter, *Assistant Dean of Student Life*
Kris.winter@oregonstate.edu

A200 Kerr Administration Bldg.
541-737-8748
Website: <http://oregonstate.edu/deanofstudents>

The Office of the Dean of Student Life (ODOSL) supports the university's mission by providing students with services and opportunities that enhance critical thinking, an appreciation for diversity and life-long learning. Our mission is to provide educational and developmental opportunities for students to make informed decisions that support their success at Oregon State University. We are dedicated to providing an environment that will enable students to effectively engage in their academic and intellectual work as well as develop cultural competencies, social and global awareness in order to be informed, involved and engaged citizens.

ODOSL assists students in the resolution of problems and concerns, provides information about and referral to campus resources, and promotes initiatives that address students' needs and interests. We also serve as a resource for parents, families, faculty and staff in supporting student success from the First-Year Experience program through graduation.

Learn about our programs and services by visiting the Dean of Student Life website at <http://oregonstate.edu/deanofstudents>.

DISABILITY ACCESS SERVICES

Martha Smith, *Director*
A200 Kerr Administration Bldg.
541-737-4098
martha.smith@oregonstate.edu
541-737-7354 FAX
Disability.services@oregonstate.edu
Website: <http://ds.oregonstate.edu/home/>
Accessibility Website: <http://oregonstate.edu/accessibility/>

The Disability Access Services office (DAS) offers an array of services to students with documented disabilities. Services include, but are not limited to note taking, sign language interpreting, real-time transcribing, alternative testing, transcribing and captioning media for accessibility, and conversion of text into Braille, digital text and tactile images. DAS can also assist with registration, disability-related housing needs, and access to OSU community events. DAS offers two scholarships for students with physical disabilities. DAS also assists the Office of Equity and Inclusion in supporting faculty, staff and other members of the OSU community with access consultation and accommodation requests.

EDUCATIONAL OPPORTUNITIES PROGRAM

Janet Nishihara, *Director*
337 Waldo Hall
541-737-3628
janet.nishihara@oregonstate.edu
Website: <http://oregonstate.edu/dept/eop/>

The Educational Opportunities Program (EOP) was created at Oregon State University in 1969 and provides a welcoming environment that supports the full development of the personal and academic potential of students who have traditionally been denied equal access to higher education.

These groups include students of color, older-than-average students, students with disabilities, students who are single parents, low-income students, students who have been rurally isolated, veterans, and students who are the first generation in their family to attend college.

The goals of the program include providing services which will:

- acclimate students to university culture,
- enhance each student's academic performance,
- develop each student's professional and personal growth, and
- assist students in developing a sense of belonging and a strong connection to the university.

Students in the program will have access to the following services:

- assistance through the admissions process,
- assistance in locating financial resources,
- orientation to the university,
- academic and personal counseling,
- courses in math, reading and writing, and
- assistance with finding jobs and internships,
- assistance with international study experience and undergraduate research, and
- support in writing resumes and cover letters.

U.S. citizens or permanent residents interested in learning more about the program or in applying for services should visit the EOP website: <http://oregonstate.edu/dept/eop/>.

FORENSICS

Mark J. Porrovecchio, *Director*
541-737-8230
Shepard Hall 205
Website: <http://groups.oregonstate.edu/forensics/>

OSU's nationally recognized forensics program invites all undergraduates to participate in speech and debate activities. Continuing a tradition at Oregon State that started in 1890s, the forensics team involves members from all majors and schools on campus. Each year, students compete in state, regional, national, and international intercollegiate tournaments. Events include public debate (following the limited preparation model of the Lincoln-Douglas format) and individual public speaking formats such as informative, persuasive, and after dinner, as well as a range of oral interpretation categories involving prose, poetry, and drama. The team travels to tournaments in both the fall and winter terms.

FRATERNITIES AND SORORITIES (GREEK LIFE)

Brandon Lee, *Interim Assistant Director*
Snell Hall Room 433C-D, 541-737-5432
Brandon.Lee@oregonstate.edu
Website: <http://oregonstate.edu/cfsl/>

Oregon State University is host to 47 different fraternities and sororities representing three governing councils of the College Fraternity Movement. The Greek experience on the OSU campus places emphasis on academic achievement, community building, community service, service learning, and preparing the Greek students for leadership roles following graduation.

The Greek community participates in leadership roles as ASOSU officers, *Barometer* staff members, MUPC chairs, resident assistants, and varsity athletes.

Representing approximately 13.6 percent of the undergraduate student population, the Greek community at OSU has provided 99 continuous years of excellence in service and support to Oregon State University.

Students interested in exploring membership in a fraternity or sorority may contact the Center for Fraternity & Sorority Life at Snell Hall Room 433C-D, Corvallis, OR 97331; 541-737-5432, or visit our website for additional information, <http://oregonstate.edu/cfsl/>.

HUMAN SERVICES RESOURCE CENTER

Clare Cady, HSRC Coordinator
233 Snell Hall
541-737-3747
hsrc@oregonstate.edu
Website: <http://oregonstate.edu/hsrc/>

We provide direct service, outreach, education, and referral services to OSU students that help alleviate the effects of hunger, poverty, and other human needs so that students can pursue a quality education. We also create a dynamic learning environment in which students, faculty, and the community can learn how to meet the current pressing societal challenges facing college students.

How HSRC Helps Students

- Intermediary services between students and agencies that provide rental assistance, utility assistance, food stamps, childcare, food boxes, and health insurance.
- Workshops, seminars, and opportunities for internships and employment.
- Connection to community service opportunities.
- Assistance in maintaining food and health insurance subsidies through the university.
- Applications for food stamps.

If you have any questions or concerns, please feel free to stop by our office in 233 Snell Hall, call us at 541-737-3747, or email us at hsrc@oregonstate.edu.

INTERCULTURAL STUDENT SERVICES

Allison Davis-White Eyes, Director
Maleah Harris, Administrative Assistant
A150 Kerr Administration Building
541-737-9030
541-737-7874 FAX
ISS@oregonstate.edu
Website: <http://oregonstate.edu/dept/iss/>

Intercultural Student Services (ISS), a department of the Division of Student Affairs, is the home of initiatives, programs and services regarding African/African-American; Asian American; Pacific Islander; American Indian; Latina/o; multi-racial; lesbian, gay, bi, transgender students; women; and multiple identity students.

Our work is grounded in ideals of social justice, equity, and a dedication to facilitating experiences in which all students reach their full potential as learners and as socially aware and active individuals, locally, nationally, and globally.

What We Do

Organize intentional and deliberate culturally specific outreach/and on-campus visits and recruitment activities. We also help new students orient and transition to OSU's campus.

Provide individual informal/formal mentoring and support, referral to services, and advocacy for personal, interpersonal, academic, career, cultural, spiritual development and success.

Develop, present, and coordinate educational programs for students contributing toward retention and success including academic counseling, personal, social, interpersonal, cultural, career issues; leadership and professional development; organization development; intercultural effectiveness, community service, and social justice. We also engage in consultation and teaching.

AMERICAN INDIAN INITIATIVES

Allison Davis-White Eyes, Director
Intercultural Student Services
A150E Kerr Administration Building
541-737-4383
Website: <http://oregonstate.edu/dept/indian/>

The American Indian Initiatives office is charged with the central goal of building the capacity and potential of American Indian students and American Indian communities. To that end, the Office of American Indian Initiatives is responsible for the management of collaborative efforts between Oregon State University, American Indian student organizations, the Nine Sovereigns of the state of Oregon, and National American Indian Education organizations as well as Tribal Colleges.

In consultation with the statewide Oregon Tribal Education Contractors, and the vice provost of Student Affairs, the Office of American Indian Initiatives is also charged with the following:

Developing and implementing strategic plans for the recruitment of American Indian students;

Creating and implementing specific programs and events to enhance the university's visibility in reservation communities;

Adhering to, and upgrading the management of tribal relationships, and memorandums of understanding that exist with the Nine Sovereigns of Oregon as pursuant to Executive Order #EO-96-30;

Maintaining liaisons with other campus programs and units, community groups, regional and national Indian organizations;

Serving as the central access point for on-campus programs,

Tribal education contractors, prospective students and parents, and others seeking information or services on or for American Indian students.

In addition, the office determines campus policy in collaboration with other academic and administrative units on campus.

ASIAN & PACIFIC ISLANDER AMERICAN STUDENT SERVICES

Intercultural Student Services
A150 Kerr Administration Bldg.
541-737-9033
Website: <http://oregonstate.edu/dept/apia/>

The APIA Student Services Office focuses on the access, retention, and success of Asian and Pacific Islander American students with multiple identities that include race, ethnicity, gender, sexual orientation, etc. Access programming includes hosting of on campus and off campus events for pre-college students. Assessment, assistance, and/or referral are made for issues negatively impacting retention. Focus is on making better choices, learning survival skills for thriving, becoming academic leaders, and managing the challenges. Written, verbal, and emotional support and advocacy is provided to increase retention regarding academics, financial aid, race/ethnicity/gender, cultural, and professional advancement.

Advises and collaborates with student organizations, e.g., the Asian and Pacific American Council (Asian and Pacific Cultural Center, Asian and Pacific American Student Union, Cambodian Student Association, EPIC, Hui O Hawaii, Hula Club, Delta Phi Omega, HMONG OSU, Isang Bansang Pilipino, Japanese American Students Association, Korean Students Association, Polynesian Cultural Club, Sigma Beta Rho, and the Vietnamese Students Association) to celebrate

diversity and to organize events and activities that provide social support and aids in the transition, retention, and success of students. Events include APA Connect, A&PIA Leaders Connecting, APA Heritage Month, API Welcome Reception, End of the Year Celebration of Graduates and Leaders, etc. Provides training and development in leadership, organization skills, and community networking; and regarding academic, personal, social and cultural issues.

CASA LATINA/O DE OSU
Oscar Humberto Montemayor,
Director

Intercultural Student Services
 A150 Kerr Administration Bldg.
 541-737-9031
 Website: <http://oregonstate.edu/dept/casa/>

CASA is responsible for the administration, management and operation of the CASA Latina/o de OSU to increase the recruitment, retention, student development, academic performance and graduation of students of Latina/o, Hispanic, and/or Chicana/o heritage. Develop and coordinate the recruitment of Latina/o, Hispanic, and Chicana/o students by the CASA Latina/o de OSU. Establish and maintain Latina/o, Hispanic, and Chicana/o community alliances and other communication venues to access the Oregon and Northwest Latina/o, Hispanic, and Chicana/o community.

CASA leads community-building efforts, works collaboratively with student leaders, faculty, staff, and community to carry out the vision of CASA Latina/o de OSU, the Intercultural Student Services Department, Student Affairs, and Oregon State University. CASA develops educational and cultural education programming collaborating with and to students, the OSU campus, and the surrounding communities.

CROSS-CULTURAL MENTORING PROGRAM
Charlene Martinez, *Director*

Intercultural Student Services
 charlene.martinez@oregonstate.edu
 Website: <http://oregonstate.edu/dept/iss/mentoring>

The purpose of the Cross-Cultural Mentoring Program is to develop the cross-cultural awareness and social justice education skills and capacities of mentees and mentors through a year-long process.

The Cross-Cultural Mentoring Program will help participants learn to:

- Enhance understanding of one's own dimensions of identity
- Increase vocabulary, awareness, and skills, around issues of social justice education
- Recognize and challenge personal biases and prejudices

- Create and communicate a personal vision for being an ally
- Create healthier relationships that value, recognize, and celebrate difference
- Engage in authentic conversations

As a program, we value:

- Experiential learning
- Inclusive and braver spaces
- Self-reflection and discovery
- Positive social change
- Personal transformation and growth
- Building community

Participation includes mentor training, institutes on special topics, periodic workshops, and leadership support. If you are interested in being a mentor or mentee, or if you would like more information, please contact Charlene Martinez at charlene.martinez@oregonstate.edu.

DIVERSITY DEVELOPMENT

Intercultural Student Services
 129 Snell Hall/MU East
 541-737-6370

diversity.office@oregonstate.edu
 Website: <http://oregonstate.edu/diversitydevelopment/>

Diversity Development coordinates safe environments in which students can share their multiple identities, and learn about issues of culture, heritage, history, identity, and self-expression in an atmosphere of positive engagement and mutual respect. The office is dedicated to fostering an inclusive community at OSU that is committed to social justice and liberation for all people, regardless of racial/ethnic background, gender, sexual orientation, religion, socioeconomic class, age, and/or physical abilities. Diversity Development manages SOL and the four cultural centers: the Asian & Pacific Cultural Center, the Lonnie B. Harris Black Cultural Center, the Centro Cultural César Chávez, and the Native American Longhouse. The centers provide support services to students, leadership development, as well as opportunities for all members of the OSU community to learn about different cultures and communities in a safe environment. Events and activities at the four centers include national history and heritage month programs, social justice workshops, cultural holiday celebrations, mentoring opportunities, and many other programs. Everyone is welcome to visit!

OFFICES OF LGBT SERVICES
Jeff Kenney, *Coordinator*

Intercultural Student Services
 149 Snell Hall
 541-737-6342
 Website: <http://oregonstate.edu/lgbtqqia/>

The Office of LGBT Services supports Oregon State University in meeting the specific academic, social, and cultural needs of Lesbian, Gay, Bisexual, Trans, Queer, Questioning, Intersex, Asexual, and Allied (LGBTQQIAA) students, prospective and current. Retention of LGBTQQIAA students is the primary goal of the Office of LGBT Services. Promoting campus-based groups that educate and raise awareness about sexual and affectional orientation and identities is an essential component of the program. Equally important is the goal of fostering relationships within Corvallis and across surrounding communities to help build relationships through which LGBTQQIAA students can thrive as they pursue future educational, career, and life goals.

The Office of LGBT Services works to empower all students by fostering opportunities to think critically, receive information, share knowledge and to sustain an educational environment in which each student has the support needed to shape unique identities. Growth is a natural progression of curricular and co-curricular experiences and the Office of LGBT Services assists students with such growth processes through mentoring, advising, interaction and commitment.

UJIMA EDUCATION OFFICE
Earlean Wilson Huey, *Director*

Intercultural Student Services
 A150G Kerr Administration Building
 541-737-9032
 Website: <http://oregonstate.edu/dept/ujima/>

The Ujima Education Office provides African centered programming that is designed to meet the specific academic,

social, and cultural needs of African/African American students, prospective and current. Retention is the heart of Ujima, while recruitment is the natural extension. The Ujima Office works to empower students by giving them the opportunities to think critically, receive information, and share knowledge. Our staff aims to build a strong cohort of student leaders within the Black community and serves as advisor to student groups and organizations, creates opportunities for increasing leadership development, and assists groups with program development, implementation, and conflict resolution. Additionally, written, verbal, and emotional support and advocacy is provided to increase retention regarding academics, financial aid, race/ethnicity/gender, cultural, and professional advancement. Lastly, the staff conduct outreach programs for middle and high school students in the community.

WOMEN'S CENTER

Mirabelle Fernandes Paul, *Director*

Intercultural Student Services

Benton Annex

541-737-1330

Email: mirabelle.fernandes-paul@oregonstate.edu

Website: <http://oregonstate.edu/womenscenter/>

Come and visit the friendly staff at the Women's Center for information on resources for women students, connection to multicultural resources, and support on a wide variety of topics. We strive to be an inclusive, collaborative, and accountable student services organization and serve a diverse group of students and student issues. Our goal is to provide information, referrals, advocacy, support, programs, resources, and mentoring relationships for the women of OSU and the community. The educational programs provided by the Women's Center reflect the diverse views of women from all walks of life and all identities. The Women's Center coordinates many workshops and opportunities for students, staff, faculty, and community members to present information about women's lives, challenges and opportunities for social justice.

Internships and volunteer opportunities are available for both undergraduates and graduate students. Over 1,400 books are available in our library for checkout to students, staff and faculty; and current periodicals and reference books are available for on-site use. There is a full kitchen, dining area, and computer lab available for use anytime between 8 a.m. and 6 p.m. during the week; meeting space can be reserved for groups of up to 25 during business hours.

LECTURES

Frequent public lectures by faculty members, visiting scholars, and persons prominent in national affairs supplement the regular curriculum. Campus sponsors of lectures include the Y-Round Table, Associated Students, Memorial Union Program Council, Sigma Xi, and others.

MEMORIAL UNION PROGRAMS AND SERVICES

MEMORIAL UNION AND MEMORIAL UNION EAST

Michael Henthorne, *Director*

112 Memorial Union

541-737-6256

michael.henthorne@oregonstate.edu

Website: <http://mu.oregonstate.edu/>

The Memorial Union, located in the heart of campus, is the community center of the university. It provides services, facilities, and programs to meet the varied social, recreational, and cultural needs of OSU students, faculty, staff, alumni, and campus guests.

The building provides five restaurants, a coffee shop, and banquet facilities, a bookstore, recreation area including billiards and bowling; music practice rooms, ballroom, post office, art gallery; lounges, the Joyce Powell Leadership Center and meeting rooms of all types.

The president of the Memorial Union is a student; other students share actively in its management and in organizing social, recreational, and cultural programs, including the Memorial Union Program Council, a student-led programming board.

The Memorial Union houses the office of the Department of Student Leadership and Involvement, which supports OSU students in organizational and leadership development. Under the Department of Student Leadership and Involvement are Student Activities, Club and Organization Development, Greek Life, and Leadership Education and Development (LEAD).

The Memorial Union East (MU East, Snell Hall) houses the student governing body, the Associated Students of OSU, and staff who provide support to the Department of Student Leadership and Involvement, as well as financial advising for student groups. MU East also provides a communication center for student broadcast and publications media, meeting rooms, and a craft center.

The Memorial Union buildings stand as constant reminders of this nation's struggle for peace and as living memorials to Oregon Staters who have given their lives in the service of their country.

MEMORIAL UNION PROGRAM COUNCIL

Linda Howard, *Program Advisor*

103 Memorial Union

541-737-6872 (MUPC), Front Desk

Information

Linda.howard@oregonstate.edu

541-737-1369

Website: <http://mu.oregonstate.edu/mupc/>

The Memorial Union Program Council (MUPC) is a student-led, student-driven organization that plans and produces high-quality, large-scale events for the OSU community. MUPC is committed to serving the OSU community by upholding traditions and creating co-curricular social, educational and recreational programs that are inclusive, accessible and entertaining.

Programs are intended to create community, make memories, and enhance the college experience.

This is achieved through many traditional events such as "Moms and Family Weekend," "Dads and Family Weekend," "OSU Has Talent," "Battle of the Bands," "Dam Jam," "Western Wind Up" and more.

MUPC also programs a variety of new events.

NEW STUDENT PROGRAMS AND FAMILY OUTREACH

Kris Winter, *Assistant Dean of Student Life*

kris.winter@oregonstate.edu

Leslee Mayers, *Associate Director*

leslee.mayers@oregonstate.edu

ruth.sterner@oregonstate.edu

Remi Nagata, *Orientation Coordinator*

remi.nagata@oregonstate.edu

B009 Kerr Administration

541-737-7627

Website: <http://oregonstate.edu/newstudents/home/>

First Year Student Website: <http://oregonstate.edu/main/firstyear>

New Student Programs & Family Outreach supports the college transition process with educational programs and outreach for new OSU students and their families. New Student Programs & Family Outreach coordinates new student orientations (START) and welcome activities (CONNECT), as well as parent/family outreach through orientations, events, websites and the OSU Parent & Family Association. New Student Programs & Family Outreach also coordinates U-Engage courses, 2-credit classes available to any new OSU student. U-Engage

classes give students the opportunity to get to know faculty and students with similar academic interests in small class settings. In addition, students gain an understanding of campus resources and tips on how to successfully complete their transition to OSU.

Principles

The Office of Equity and Inclusion is committed to success for the entire campus community through equality, fairness, and understanding. Our work is guided by three principles:

- **Equity**—Ensuring equality of opportunity in all that we do. We strive to ensure equality in terms of the opportunity to become a member of the Oregon State University learning and working community; in one's opportunity to participate in and contribute to the work; in one's opportunity to participate in and benefit from the programs, services,

and activities; and in terms of the communities of the state that are served by the university.

- **Inclusion**—Welcoming, valuing, and seeking to understand the experiences of everyone with whom we interface. We create and sustain this environment through interpersonal interactions that explicitly support and affirm the inherent dignity and uniqueness of individuals and communities, and through institutional efforts that address systemic barriers to inclusion.
- **Diversity**—Recognizing that a diversity of people, perspectives, experiences, and thought is essential to a compelling research, scholarship, and learning environment. We aim to develop policies and practices that promote and enhance diversity in all university endeavors, striving to benefit maximally from our different ideas, perspectives, and ways of being, knowing, and doing.

Expertise and Leadership

In service to both Oregon State University and the broader community, the Office of Equity and Inclusion provides expertise and leadership in the following areas:

- Engaging in community development, including creating, leading, and supporting opportunities for involvement with an array of equity and inclusion efforts.
- Partnering with a range of individuals and groups to develop and deliver programs, initiatives, and resources related to campus-wide diversity and social justices issues.
- Working to eliminate barriers to achievement for individuals and groups historically underrepresented in higher education.
- Managing the university's affirmative action and equal opportunity efforts.
- Responding to discrimination complaints through investigation and resolution.
- Providing advice and assistance to individuals who believe they have experienced bias or discrimination.
- Promoting understanding about affirmative action, equal opportunity, diversity, and inclusion.
- Coordinating access and accommodation in accordance with the Americans with Disabilities Act.
- Offering education and training on a variety of topics related to equity and inclusion.
- Assisting individuals and offices or units who would like guidance in areas such as search and selection, inclusive working and learning environments, and policy and best practices development.

OSU CRAFT CENTER

Susan Bourque, *Manager*
112 Memorial Union
541-737-2937 Front Desk Information
craftcenter@oregonstate.edu
susan.bourque@oregonstate.edu
541-737-6371
Website: <http://mu.oregonstate.edu/craftcenter/>

Engage your creativity at the OSU Craft Center...a dynamic, user-supported arts and crafts studio. With its hands-on, friendly and casual environment, it's a great place to take a creative time out from the whirlwind of life. Open seven days per week, the craft center offers studio workspaces, late night programming and a wide variety of classes and workshops for the beginning to experienced artist/craftsperson.

The OSU Craft Center will be relocation to a new facility—the Student Experience Center (SEC), starting Winter term 2015. Be sure to come check out our new space!

Facilities include fully equipped studios in ceramics; digital photography; fine woodworking; stained glass, fused glass and glass torchwork; fibers and sewing, silkscreen and weaving; jewelry/metalwork; plus other mixed media crafts and lots of room to work. Power and hand tools are available for use in all the craft areas. The center also operates a promotional button-making business.

Each term, over 35 non-credit classes and workshops are offered. Taught by skilled local artisans, classes focus on non-competitive learning; their small size enables students to receive individual attention. Open studio memberships are also available for those with prior experience who are interested in using the center's studio areas tools and equipment for projects and exploration. Catalogs with current class offerings are located each term around campus, at the Craft Center, or by calling 541-737-2937. Located on the ground floor of MU East/Snell Hall through Fall term 2014, then relocating to the basement level of the SEC. The OSU Craft Center's hours of operation follow the OSU academic calendar.

RECREATIONAL SPORTS

541-737-3748

Website: <http://oregonstate.edu/recsports/>

Student fee-funded Recreational Sports programs and facilities at Oregon State University are coordinated and administered by the Board of Recreational Sports.

Recreation Facilities

Registered students who have paid full incidental fees have access to Dixon Recreation Center, McAlexander Fieldhouse, and Student Legacy Park. **Dixon Recreation Center** includes Stevens Natatorium, the Adventure Leadership Institute, an Indoor Climbing Center, weight rooms, cardio equipment, multi-purpose rooms, an indoor track, and multiple gyms and courts. **McAlexander Fieldhouse** includes indoor turf, multi-sport courts, and an indoor climbing center.

Student Legacy Park includes turf fields, indoor and outdoor tennis courts, a track, basketball court, and outdoor pavilion. **Peavy Sports Fields** (grass) are commonly used for intramural play.

NOTE: Additional recreational facilities are available through the College of Public Health and Human Sciences: Langton Hall, Women's Gym, and golf practice areas.

Recreational Sports also rents facilities for large and small groups—camps, conference activities, events, etc. Learn more about available spaces, fees, and schedules at <http://oregonstate.edu/recsports/rentals>.

Recreation Services and Programs

The **Stevens Natatorium** includes an 8-lane, 25-yard lap pool, a deep-water pool, and a spa with an adjoining observation deck. Full-service locker rooms, equipment issue area, and a private changing room are also available. When the weather is nice there is also an outside sun deck. The natatorium accommodates recreational and fitness swimming, water fitness classes, springboard diving, and family swim times.

Sports and Special Programs provide students of all skill levels with educational, recreational, and competitive sport opportunities through student-led organizations and sport leagues and events.

Intramural sports offers over 35 individual, dual, and team sports including 5K walk/runs, badminton, basketball, billiards, bowling, dodgeball, flag football, golf, indoor baseball, kickball, pickle ball, racquetball, soccer, softball, swimming, tennis, track, ultimate disc, volleyball, water polo, wrestling, and others.

Sport clubs are available for student intercollegiate competition in badminton, baseball, bass fishing, cycling, disc golf, dodgeball, equestrian (dressage, drill, hunter-jumper, IHSA), gymnastics,

judo, karate, kendo, lacrosse, pistol, polo, racquetball, rifle, rugby, sailing, soccer, table tennis, tae kwon do, tennis, triathlon, ultimate disc, volleyball, water polo, and wheelchair basketball.

The **Adventure Leadership Institute** includes a variety of facilities, classes, programs, and services that support educational and leadership experiences outside the classroom. Special 'for-credit' classes are offered to provide the skills needed to lead trips or facilitate groups. Professional certificates can be obtained in these areas. Call 541-737-4341 to set-up an appointment with an advisor. The Adventure Leadership Institute is also the home of the Adventure Club, offering a variety of outdoor pursuits for the OSU community to join in throughout the year.

The **Challenge Course** offers six acres of low and high elements designed to actively engage your mind and body. Participants develop a greater understanding of communication and problem solving skills, as well as the people they live and work with through group challenge activities. This facility is open to students, faculty, and community groups. Highly trained instructors are on hand to assist all groups.

The **Dixon Climbing Center** provides over 7,000 square feet of climbing surface for climbers of all abilities. This 42-foot-tall facility has three types of wall surface and is equipped with several cracks for lead climbing. It also contains the world's only elevator-accessible rappel station. The **McAlexander Climbing Center** provides over 4,000 square feet of high performance climbing wall surface including a 60-foot-long bouldering wall. This wall is equipped with several instructional components such as a rappelling ledge, and a cliff-top training platform.

Fitness programs offer drop-in group fitness classes in activities such as zumba, indoor cycling, yoga, kickboxing, step, boot camp and group strength and resistance. Personal training and small-group training are available by appointment. Fitness hosts special events, presentations and workshops year-round and upon request. Appointments are available for fitness testing, personal training, and athletic training.

Safety programs are a campus resource for CPR and First Aid training, first aid kits and supplies, emergency response staffing for events, and safety awareness seminars.

For more information on recreational sports, visit the website at <http://oregonstate.edu/recsports/>.

STUDENT CONDUCT AND COMMUNITY STANDARDS

Carl Yeh, Director

B058 Kerr Administration Bldg.

541-737-3656

SCCS@oregonstate.edu

Website: <http://oregonstate.edu/studentconduct/home/>

Student Conduct and Community Standards serves as the central coordinating office for violations of University Student Conduct Regulations. The office acts on reports of possible violations from law enforcement, faculty and staff or others. The program provides conflict resolution support for students, faculty, and staff as well as staff training.

STUDENT EVENTS AND ACTIVITIES CENTER

Robin Ryan, Associate Director

Memorial Union 103

Robin.ryan@oregonstate.edu

541-737-2917

SEAC-MU 103

Website: Events.sli@oregonstate.edu

541-713-8368

The Student Events and Activities Center is the hub of support for recognized student organizations and all students that provide events and activities for the OSU community. The goal of the center is to provide visibility of all of the involvement opportunities that exist for OSU students; ranging from being a part of a student organization, participating in a university student-coordinated program, getting involved as a peer educator or participating in one of the hundreds of extracurricular programs available. In addition, the SEAC provides support to ISOSU and MUPC, cohost AFTER DARK@OSU, leads the #beBEAVERBOLD initiative and is the home for the MU Inclusivity Initiative and the Community and Cultural Food Program. Visit the SEAC to get involved, make a difference in the world, enhance your academic experience, discover yourself, make friends, have fun and Get Engaged in What Matters!

Contact: Danté L. Holloway, Coordinator, Coordinator Student Organizations, 541-737-1562; Linda Howard, Advisor-MUPC, 541-737-1369; Becky Evans, Cultural Program Coordinator, 541-737-0760; and Derek Rice, Community and Cultural Food Program, 541-737-0763.

STUDENT HEALTH SERVICES

Jennifer Haubenreiser, *Executive Director*

201 Plageman Building
541-737-9355

Email: jenny.haubenreiser@oregonstate.edu
Website: <http://studenthealth.oregonstate.edu/>

Appointments 541-737-WELL (9355)

Information/Nurse Advice Line
541-737-2724

Health Promotion Department
541-737-2775

Student Health Services@Dixon
541-737-7556

Student Health Services (SHS) at Oregon State provides leadership for health and wellness on campus to enhance student success while at OSU and throughout students' lifetimes. The SHS is accredited by the Accreditation Association for Ambulatory Health Care and is a member of the American College Health Association.

The SHS provides campus-wide comprehensive primary health care, disease prevention and treatment services, as well as extensive health promotion programs for all OSU students. Most services are housed in the Plageman Building on campus, which includes the medical center, lab, pharmacy and health promotion. Specialized services are available at the Dixon Recreation Center (SHS@Dixon). Expansion for a second clinic location starting in the Fall 2014 is underway.

General medical and health promotion services are available year round. During the academic year the medical center is open M–F, 9 a.m. to 6 p.m., and 10 a.m. to 3 p.m. on Saturdays. Hours and services vary during summer session, term breaks and on holidays. A telephone nurse information and advice line is available during clinic hours and after hours. More extensive clinic information and an online self-care guide is available at <http://studenthealth.oregonstate.edu/>.

Medical Services in the Plageman Building

Confidential and high-quality health care is provided by physicians, nurse practitioners, physician assistants, registered nurses, physical therapists and other health care professionals. Students are encouraged to become established with a primary care clinician early in their academic career. Clinical services include general medicine, women's health, sexual health, allergy/asthma, sports medicine, travel medicine, and psychiatry. Specialty consultations in dermatology, orthopedics, and endocrinology are available, as well as consultation with a Certified Diabetic Educator. Nutrition services and tobacco cessation counseling are also available, and the Oregon Contraceptive

Care (CCare) unit provides free contraceptive services to qualified students. SHS provides x-ray and laboratory services, and a full-service pharmacy, operated by the OSU College of Pharmacy, is located on the first floor of the building.

SHS@Dixon

SHS@Dixon provides services to treat activity-related injuries and other medical conditions and supports and promotes positive health behaviors. SHS staff provide physical therapy, sports medicine, massage therapy, nutrition consultation, acupuncture, chiropractic and health coaching services at Dixon Recreation Center. For appointments and information, please call 541-737-7556.

Health Promotion

The goal of the Health Promotion Department is to enable OSU students to gain knowledge and skills and to modify attitudes necessary for making healthy lifestyle choices and behavioral changes. Health Promotion offers a broad array of outreach programs on a variety of health issues most commonly identified as concerns or interests of students. Students are encouraged to participate in Peer Health Advocates, a student volunteer program, or Every1, a peer-based sexual violence prevention program. Individual consultations are also available for nutritional concerns, health coaching, tobacco cessation, and alcohol issues. Male Advocates for Responsible Sexuality (MARS) offers individual consultations to male students regarding sexual health and sexuality, as well as outreach programs.

Immunization and Medical History Requirements

Completion of the Medical Health History Form is required of all registered OSU students. Students are encouraged to satisfy all immunization requirements before arriving at OSU. Documentation of immunity against measles, mumps and rubella is required. Tuberculosis testing (*T-Spot*) is required for students arriving from certain countries and is available at the SHS. Students who are non-compliant with immunization requirements will have a hold placed on registration for classes. While not required, students are encouraged to be immunized against hepatitis A, hepatitis B, chicken pox, diphtheria/tetanus/pertussis, HPV (*genital wart virus*), and meningococcus. Appropriate travel immunizations are also recommended. Annual flu immunizations are offered to students, faculty and staff. For additional information call the Immunization Help Line at 541-737-7573.

Fees

Students pay a quarterly health fee that provides access to clinical office visits at no charge. Additional fees are charged to

see on-site medical specialists, laboratory tests, x-rays, certain procedures, and pharmacy. Charges for the most commonly used services are listed on the SHS website <http://studenthealth.oregonstate.edu/fees>. Any fees for service can be billed directly to the student's OSU account.

OSU Student Health Insurance

OSU sponsors insurance plans for students and their families. The OSU plan is coordinated between SHS and private insurance providers. Insured family members who are not OSU students are not eligible to be seen at SHS and are referred to private community providers. Students must pay the OSU health fee to be eligible to purchase the OSU Student Health Insurance. International students are required to enroll in an OSU Student Health Insurance plan or provide proof of comparable insurance. More information is available in the Insurance Office in the Plageman Building or by calling 541-737-7568.

STUDENT LEADERSHIP AND INVOLVEMENT, CLUBS, ORGANIZATIONS, ACTIVITIES

Eric N. Alexander, *Director*
541-737-8849

eric.alexander@oregonstate.edu
203 Memorial Union
541-737-8849

General SLI Information: 541-737-2101
Website: <http://oregonstate.edu/sli/>

Comprised of the **Center for Leadership Development**, the **Student Events and Activities Center**, the **Center for Fraternity and Sorority Life**, and the **Center for Civic Engagement**, the Department of Student Leadership and Involvement (SLI) provides programs, services and opportunities that intentionally promote student learning and growth in four critical areas: 1) Civic Engagement & Sustainability, 2) Community Building & Celebration, 3) Leadership Development, and 4) Global Perspective & Multiculturalism. See individual listings for information about each center.

SLI works in direct support of the following Student-Coordinated Programs: Coalition for Community Dialogue, International Students of OSU (ISOSU), the Memorial Union Program Council (MUPC), and the Student Sustainability Initiative (SSI); and indirectly with other groups, including ASOSU and the Cultural Resource Centers. See individual listings for information about each program.

Additionally, SLI supports OSU Recognized Student Organizations with leadership, organizational development

and activity/event planning, including events through the Cultural Meal Support program.

STUDENT MEDIA

Julia Sandidge, *Director*

Kami Hammerschmith, *Assistant Director of Student Media*

118 MU East
541-737-4615

Email: julia.sandidge@oregonstate.edu

The Daily Barometer

Oregon State University's student newspaper is distributed throughout the campus and community each weekday during the school year and once a week in the summer. Its student editors determine news and editorial content and direct the staff in reporting, writing, and editing assignments. Offices are located on the first floor of MU East (Snell Hall). Newsroom, 541-737-2231. Advertising, 541-737-2233. Website: <http://www.dailybarometer.com/>.

Beaver Yearbook

The Beaver Yearbook reviews the people and events that make the academic year memorable. It is under the direction of student editors who determine its policy and content.

The yearbook may be ordered throughout the year and is available for pickup in Student Leadership and Involvement in the fall. Students who will not be on campus when the yearbooks are distributed may pay a mailing and handling fee at the Student Media Office, 541-737-3374. Website: <http://oregonstate.edu/yearbook>.

KBVR FM Radio

Oregon State University's on-campus radio station gives students an opportunity to gain experience in live radio broadcasting. Featuring high quality public affairs programming and alternative music, the station can be found on the dial at 88.7 FM. Offices are located on the second floor of MU East (Snell Hall), 541-737-6323. Website: <http://kbvr.com/>.

KBVR TV

A fully equipped television studio, editing facility and remote gear afford students practical training in television production. Programming includes a wide variety of locally produced shows plus the nightly news, live music programs, live coverage of OSU sporting events, game shows, comedy, movies, public affairs interviews and documentaries. KBVR TV can be seen on cable channel 26 in Corvallis, Albany and Philomath. Offices are located on the second floor of MU East (Snell Hall), 541-737-3522. Website: <http://kbvr.com/>.

Prism

Prism, OSU's art and literary magazine, is published three times per year by

students at Oregon State University. Prism welcomes contributions from OSU students in the form of photography, art, poetry, and short stories. Contact the Prism Office for more information, 541-737-2253. Website: <http://oregonstate.edu/prismmagazine/>.

STUDENT SUPPORT SERVICES (TRIO)

Roberto Casarez, *Director*

325 Waldo Hall
541-737-9326

Website: <http://oregonstate.edu/dept/sss/>

Student Support Services (SSS) is a federal TRiO program, funded by the U.S. Department of Education, with the intent of providing assistance to low-income, first generation (neither of whose parents graduated from a four-year institution), and students with a learning or physical disability. SSS is able to provide academic counseling, peer mentoring, tutoring, and cultural enrichment opportunities for students who qualify for the program. In addition, financial assistance is available to students who meet certain additional criteria.

STUDENT SUSTAINABILITY INITIATIVE AND CENTER

Olivia Poblacion, *Director*

Jen Christion Myers, *Advisor*

Jen.ChristionMyers@oregonstate.edu
738 SW 15th St.

Corvallis, OR 97333

541-753-4072

Email: ssi@oregonstate.edu

Website: <http://oregonstate.edu/ssi/>

The Student Sustainability Initiative (SSI) is a student fee-funded, student-led organization, whose mission is to create a culture of sustainability at OSU through opportunity, education, and action. The SSI strives to address all three pillars of sustainability: environmental, social, and economic.

Objectives:

- Increase understanding of the need for a sustainable culture
- Develop students' capacities to organize sustainability projects and campaigns
- Encourage and support students in furthering their own vision of sustainability on campus
- Connect organizations on campus and the Corvallis community
- Advocate for stronger institutional commitments to sustainability

These objectives are implemented through:

- Education, actions and campaigns to raise awareness and improve

sustainability on campus

- Student leadership opportunities
- Sustainability grants program
- Information about opportunities and resources

The OSU Student Sustainability Center (SSC) houses the Student Sustainability Initiative (SSI) and is a place for sustainability-minded individuals and groups to network and exchange ideas. The site features an organic garden and permaculture site, solar trailer, and resource library. The SSC is located at 738 SW 15th St. on the southeast edge of campus. Office hours are 11 a.m. to 5 p.m., Monday through Friday during the school year.

If you would like to get involved, visit the SSI's website, check out their Facebook page (<http://www.facebook.com/osussi>), follow them on Twitter (<http://twitter.com/#!/osussi>), e-mail them, or drop by the SSC.

102 Buxton (Jefferson Street entrance)
Oregon State University

Corvallis, OR 97331

541-737-4771

Website: <http://oregonstate.edu/uhrs/>

The Department of University Housing and Dining Services (UHDS) provides a diverse selection of housing and dining alternatives—university-owned student cooperatives, residence halls, and student family housing—all of which offer a variety of programs and services.

Oregon State University recognizes the impact the living environment has upon student life. This environment, whether on or off campus, is an important part of the student's education experience. The university is committed to providing all students in the residential setting an integrated program for social, cultural, and educational development beyond the classroom.

First-year students are required to live on campus their first academic year at OSU. It is easier for students to make

friends and adjust to university life if they live on campus for a year or two. Academic indicators have shown that students who live on campus typically do better academically and are more likely to continue their education.

University Housing and Dining Services' main goals are to help students succeed academically, become active citizens of their communities, and to enrich and enjoy their university experience. Through the Department of University Housing and Dining Services, students can make arrangements for meals and accommodations, consult with residential education staff, bring suggestions for improvements, and receive assistance on their concerns and interests. Emphasis is upon helping students achieve academic success and providing comfortable, safe, reasonably priced living accommodations and programs.

Residence Halls

Through its 15 residence halls, the university offers a variety of living environments, including special program halls, designated quiet floors, coeducational facilities, and substance-free housing and an academic success program focus with faculty-in-residence. More details about the living communities can be found at <http://oregonstate.edu/uahds/halls>.

Most student rooms are designed for double occupancy. A limited number of single rooms are available in each hall. All residence halls are smoke-free.

The residence hall dining program features an a la carte meal service, with services offered in Marketplace West, McNary Central, and Arnold Dining Centers, Bing's Café located in Weatherford Residential College, as well as Cascadia Market and Peet's Coffee & Tea in the International Living Learning Center. Residential students have a choice of flexible meal plans, which can be used in any of the UHDS operated dining facilities and cafes. They can also participate in the Orange Rewards program, which allows them to eat in all 27 campus dining venues.

For more detailed descriptions of residence halls, please visit the University Housing and Dining Services' website at <http://oregonstate.edu/uahds/>.

Residence Hall Application

Once admitted to OSU, students submit an online application for university-owned residence halls at <http://oregonstate.edu/uahds>. Flexible academic year contracts are available to all students. Comprehensive UHDS information packets titled Life on Campus are emailed out to all admitted students or are available from the Department of University Housing and Dining Services, 541-737-4771.

Residence Hall Rates

Note: The figures listed below are estimated room and meal rates for 2014–

2015. When established, the new rates will be available through the Department of University Housing and Dining Services.

Residence Halls

Estimated rates listed are for the academic year; room and meal package rates will vary by type of meal plan chosen.

Double room with preferred meal plan (including \$100 Orange Rewards):

\$9,900–\$12,300

There is an additional fee for single room.

All Oregon State University residence halls and dining facilities are built and operated entirely with income from resident students and summer conferences and camps. No state tax funds are used.

University Housing for Student Families (All Terms)

Oregon State University maintains 107 unfurnished apartments in Orchard Court for student families. Rentals start at approximately \$525 a month with water, garbage, and TV cable service furnished. Students should apply to the Department of University Housing and Dining Services. Additional information is available at: <http://oregonstate.edu/uahds/family-housing>.

Housing in Summer Session

Summer Session housing is available for short or long-term stays. Additional information is available at: <http://oregonstate.edu/uahds/summer>.

Off-Campus Housing

Current bulletin board listings for a variety of rentals available in Corvallis and surrounding communities are located in the Memorial Union lower concourse. A copy of the Renter's Guide may be obtained upon request from The Daily Barometer office, 118 MU East, Corvallis, OR 97331.

UNIVERSITY OMBUDS

Sue Theiss, Ombuds
sue.theiss@oregonstate.edu

Breanne Taylor, Associate Ombuds
breanne.taylor@oregonstate.edu
University Ombuds
Waldo Hall 116

Oregon State University
Corvallis, OR 97331
541-737-7029
Website: <http://oregonstate.edu/ombuds/>

The University Ombuds strengthens campus communication and administrative processes by acting as a designated neutral referral resource and dispute resolution practitioner. The ombuds' major function is to provide informal, impartial, and confidential* assistance to the university community by listening to concerns, clarifying issues, exploring options for resolution, providing infor-

mation and referrals, and if all parties agree, facilitating informal, non-binding mediation. The ombuds also reports anonymous trend data to the president and provides periodic conflict management trainings to all members of the campus community.

Serving as a designated neutral, the ombuds is not an advocate for any individual or for the university, but rather acts as an advocate for fairness and healthy campus conflict management. The ombuds does not have the power to make any decisions as to ultimate resolution, nor does the ombuds have the power to reverse any decisions made or actions taken by the regularly constituted university authorities. The ombuds does not provide legal advice or psychological counseling. This position compliments, but does not replace, the university's existing resources for conflict resolution. To preserve independence and neutrality, the ombuds reports directly to the president.

**Confidentiality cannot be promised in matters relating to threats to public safety, child abuse, if there is imminent risk of serious harm, or if compelled by a court of law. Speaking with an ombuds does not constitute legal notice to the university of any problem, concern, or complaint. You must pursue alternative complaint avenues if you wish to obligate the university to respond in any way. The ombuds has no duty or responsibility to report incidents to any person or authority, other than as described above.*

UNIVERSITY THEATRE

George Caldwell, Coordinator
541-737-2853
george.caldwell@oregonstate.edu
Website: <http://oregonstate.edu/dept/theatre/>

University Theatre, continuing a tradition of more than 100 years of public performances in Corvallis, offers all students involvement in the theatre creative process. Each season, three main stage and numerous studio and classroom productions give student actors, designers and technicians ample opportunity to develop as theatre artists and craftspeople.

For several years, the University Theatre, with the support of the Memorial Union and Summer Session, has produced "Bard in the Quad," summer outdoor performances of Shakespeare on the MU Quad. Auditions and crew assignments for the University Theatre are open to all students, no matter what their major. Students can also earn academic credit for participation on stage and behind the scenes.

VETERAN RESOURCES

Gus Bedwell, *Veterans Resources Coordinator*

B102 Kerr Admin. Bldg.
Oregon State University
541-737-7662

Email: gus.bedwell@oregonstate.edu
Website: <http://oregonstate.edu/veterans/home/>

PROGRESS STANDARDS FOR VETERAN STUDENTS

Programs at Oregon State University are approved for the use of VA benefits under the Montgomery GI Bill, Dependents Educational Assistance, and Title 38 and Title 10 of the US Code, or benefits offered by the State of Oregon Department of Veteran Affairs. The university, through the Registrar's Office, provides the certifying service to qualified students. The certifying official issues enrollment certification documents to the appropriate VA regional office and monitors students' satisfactory progress for the VA. Students wishing veterans counseling or other services must address the Veterans Administration directly.

1. OSU students who receive benefits from the Veterans Benefits Administration of the Department of Veterans Affairs are subject to the satisfactory progress standards as set forth in Chapter 38, U.S. Code sections 1674, 1724, 1775, and 1776, and to those defined by the university in **Academic Regulation 22, Satisfactory Academic Standing**:

Oregon State University expects students to maintain satisfactory academic progress toward degree completion. At the conclusion of each term, grade-point averages are calculated and academic standings determined for students seeking a baccalaureate degree according to the criteria outlined below. Students whose standings evidence a lack of satisfactory progress will be warned of this condition and advised to seek help from their academic advisors.

a. Academic Warning: Students with a term GPA below 2.0 will be placed on Academic Warning.

b. Academic Probation: Students who have attempted 24 or more credits at OSU and have an OSU cumulative GPA below 2.0 will be placed on Academic Probation. Students who attain a cumulative GPA of 2.0 or better are removed from Academic Probation.

c. Academic Suspension: Students who are on Academic Probation and have a subsequent term GPA below 2.0 will be placed on Academic Suspension. Academic

suspension is recorded on the student's academic record. Students who are academically suspended are denied all the privileges of the institution and of all organizations in any way connected to it, including any university-recognized living group.

d. Reinstatement to the University:

Suspended students will be considered for reinstatement to the university after two years or completion of a minimum of 24 quarter credits of transferable college-level work at an accredited college or university, with a GPA of 2.5 or above.

2. Students, who are placed on probation by the university, also will be notified that they are on probation insofar as Veterans Affairs' progress standards are concerned. If a student's deficiency is not corrected and they subsequently are placed on academic suspension, the university will notify Veterans Affairs of his or her unsatisfactory progress.
3. The university will recertify students who are suspended by the university and subsequently reinstated by the Academic Standing Committee.
4. Students dismissed from the university for unsatisfactory conduct will be reported as making unsatisfactory progress. The university will recertify the student only upon rescission of the dismissal by the university.

VETERAN RESOURCES COORDINATOR

The Veteran Resources Coordinator (VRC) helps veterans and eligible dependents at Oregon State University find, utilize, and in some cases apply for applicable state and federal VA education benefits. In addition to helping with educational benefits, the VRC can also help veterans and their dependents tap into other non-education related VA benefits (e.g. disability compensation, VA Medical, Employment, and Homeless Veterans Reintegration Programs). In addition, the VRC can provide information to active duty military personnel on benefits they can access while in the service that will have a positive impact on their transition into civilian life down the road (e.g. Vet Centers, VA Medical Facilities, Tricare/Triwest questions, the VA claims process, etc).

Contact Veteran Services Advisor Gus Bedwell at gus.bedwell@oregonstate.edu.

VA CERTIFYING OFFICIAL

The VA Certifying Official (VACO) certifies the enrollment of veterans and eligible dependents at Oregon State University. All veterans and eligible dependents, whether new, returning, or

transfer students, who expect to receive educational benefits from the Veterans Administration must notify the VACO in the Registrar's Office. For questions about benefits, contact veterans@oregonstate.edu.

The VA Certifying Official also monitors and reports to the Veterans Administration the Satisfactory Progress Standards for students who are receiving VA education benefits. See Progress Standards for Veteran Students for more information.

VETERANS TUITION ASSISTANCE PROGRAM

The Veterans Affairs Certifying Officials (VACO) at Oregon State University are the direct contact points for students using the Veterans Tuition Assistance Program. VACOs process students' tuition assistance authorizations and contracts and forward copies to OSU Business Affairs for billing the military branches. Depending on the branch of the military, requirements vary on how grades are reported. Grade reporting is done at the end of each academic term.

For questions about the Veterans Tuition Assistance Program, contact veterans@oregonstate.edu.

STATE EDUCATION AID

The state of Oregon has an educational aid program available to Oregon veterans who meet eligibility requirements. The state benefit may not be received for training for benefits which the veteran currently is receiving under the federal GI Bill and Voc Rehab. Information about the Oregon aid program may be obtained from the Department of Veterans Affairs, Education Section, 700 Summer St., NE, Salem, OR 97301-1285, 503-373-2000 or 800-828-8801. Additional information may be obtained from the website at <http://www.oregon.gov/odva/BENEFITS>.

VETERAN AND U.S. MILITARY SERVICE RECOGNITION CORD

Recognition of U.S. Military Service

Oregon State University recognizes the significant contribution and sacrifices made by OSU students who are U.S. military service members and veterans. Students may receive a red, white, and blue Military Service Recognition Cord to be worn at commencement.

To apply for the recognition, students should complete the OSU Military Service Recognition application which is available on the OSU Veterans website at <http://oregonstate.edu/veterans/home/>. Applications are to be submitted to the Veterans Resource Coordinator who will approve the application and distribute the recognition cord.

UNDERGRADUATE PLANNED EDUCATIONAL LEAVE PROGRAM

The Undergraduate Planned Educational Leave Program (PELP) is a voluntary, temporary, planned interruption or pause in a student's regular, full-time education. Its purpose is to enhance an undergraduate student's prospect of successful completion of their academic program. The PELP provides one opportunity¹ for a student to arrange a voluntary absence for as many as six consecutive regular academic terms (not including the summer terms). The PELP is designed to allow a student to pursue other activities that will assist them in clarifying their educational goals, such as job opportunities and experiences away from campus, military deployment, time to resolve personal or medical problems, or other similar pursuits. The PELP allows an undergraduate student to temporarily suspend their academic work for a period of time (in accordance with AR 13a, 13b, and 13c), and resume their studies with minimal procedural difficulties. The PELP \$25 non-refundable application fee allows an undergraduate student to maintain their official standing as a student at OSU and reserves the student's right to keep their original academic catalog² active during their absence. Beginning with the 2011–2012 academic year, all OSU undergraduate students³ are eligible to request leave through the PELP. The university reserves the right to consider a student's current academic standing and any existing student conduct issues prior to approving the voluntary PELP leave request. Students who withdraw from OSU prior to the 2011–2012 academic year and who are away from campus for four or more consecutive regular academic terms (not including summer terms) must re-enroll with OSU to re-establish their relationship as an OSU student and their academic catalog will be reset to the academic year they return to OSU.

Transcript Notation

A notation of the dates of any approved leave will be indicated on each student's official transcript.

Footnotes:

- ¹ Military deployments are an exception to this limitation. All military personnel who are deployed for military service may submit a voluntary leave request for each deployment.
- ² In accordance with the university's catalog policy on the inside cover of the General Catalog.
- ³ The PELP began with the 2011–2012 academic year (Summer 2011). Any former OSU students who attended OSU prior to the 2011–2012 academic year and have been absent for four or more consecutive regular academic terms will be held to OSU's prior policy that resets the academic catalog to the catalog in effect at the time they return to OSU.

ASSOCIATE PROVOST FOR ACADEMIC SUCCESS AND ENGAGEMENT

Susie Brubaker-Cole, *Associate Provost for Academic Success and Engagement*

A500 Kerr Administration Bldg.

541-737-6164

susie.brubaker-cole@oregonstate.edu

The Office of the Associate Provost for Academic Success and Engagement works with faculty and university leaders in undergraduate education to advance the academic components of the provost's student success and engagement agenda. The associate provost provides leadership and coordination for nine academic support units within the division of Academic Affairs, and collaborates with departments, colleges and undergraduate education committees to develop and implement challenging academic programs and support resources to serve the diverse needs of OSU undergraduates.

Academic Affairs units reporting to the associate provost include:

- Academic Success Center
- Academics for Student Athletes
- The Writing Center
- College Assistance Migrant Program
- Educational Opportunities Program
- Student Support Services

ACADEMIC SUCCESS CENTER AND ALS COURSES

Clare Creighton, *Interim Co-Director*
Kerry Kincanon, *Interim Co-Director*

102 Waldo Hall

541-737-2272

Clare.creighton@oregonstate.edu

Kerry.kincanon@oregonstate.edu

Website: <http://success.oregonstate.edu/>

The Academic Success Center (ASC) is a friendly, student-centered place offering academic support services for all students at OSU. The ASC offers academic coaching, supplemental instruction, advising for exploring students (UESP), writing support, and information and referral.

Academic Learning Services (ALS) Courses

Academic Learning Services courses are designed to help students acquire a basic foundation of skills necessary for success in the university environment. They are not intended to form a significant part of any student's program, but instead, to help them complete a regular university degree program.

ALS is housed within the Academic Success Center. Many campus organizations and programs make up the courses within ALS and instructors come from throughout the university.

ALS COURSES

ALS 102. COLLEGE READING (3). Provides students with specific strategies for learning through reading. The primary focus of the course is to prepare students to function successfully in subsequent university course work. Emphasis is placed on the demonstration and practice of a study-reading process.

ALS 107. CAMP ORIENTATION (1-3). Assists students of migrant worker background to develop successful skills adaptive to the culture of higher education. This course is repeatable for a maximum of 9 credits.

ALS 108. ONLINE LEARNING SUCCESS (2). A comprehensive orientation for distance learners. The course will address topics such as success strategies for online learning, Ecampus resources, how to engage in the campus community, time management, OSU library resources, academic integrity and more. Graded P/N.

ALS 114. CAREER DECISION MAKING (2). Students will become knowledgeable about the world of work and career development theories using career assessment, literature, media, and computer resources. Lec/rec.

ALS 115X ORIENTATION TO ONLINE LEARNING (2). A comprehensive orientation for distance learners. The course will address topics such as success strategies for online learning, Ecampus resources, how to engage in the campus community, time management, OSU library resources, academic integrity and more.

ALS 116 ACADEMIC SUCCESS (2). Assessment and development of strategies for succeeding in university-level academics. Topics include time management, goal setting, critical thinking, note taking, and study skills. Graded P/N.

ALS 150. INTO OSU ACADEMIC READING AND WRITING 5 (3). Designed to provide international and/or immigrant students substantive practice in reading and writing English at the advanced level. Students are expected to read, understand and discuss a variety of academic readings from the natural and physical sciences, the social sciences, the humanities and literature. Students will work on reading skills; vocabulary acquisition; library and research skills; paraphrasing and summarizing; and the organization, style and development of essays. **PREREQS:** INTO Oregon State University students only.

ALS 151. INTO OSU ACADEMIC LISTENING AND SPEAKING 5 (3). Skill building to develop and improve comprehension and notetaking of lectures in an academic format. Students required to give individual and group presentations including informational, argumentative, and persuasive presentations. Instruction is given in cross-cultural communications styles, non-verbal communication, questioning techniques, and clarifying information. **PREREQS:** INTO Oregon State University students only.

ALS 161. ACADEMIC LISTENING AND SPEAKING 6 (3). Skill building to develop and improve comprehension and notetaking of lectures in an academic format. Students required to give individual and group presentations. Instruction is given in cross-cultural communication styles, non-verbal communication, questioning techniques, and clarifying information. **PREREQS:** ALS 150 and ALS 151 and INTO Oregon State University students only.

ALS 162. INTO OSU READING AND WRITING IN ACADEMIC CONTENT AREAS (3). Provides advanced practice in reading and writing with academic texts and is designed to help students move into college work. Assignments include extensive information searches, writing bibliographies, critiques of articles/readings, practice with essay exams, and a short research paper. **PREREQS:** ALS 150 and ALS 151 and INTO Oregon State University students only.

ALS 181. ESL BRIDGE (1-3). A support course for international students enrolled in OSU courses such as HHS 231, ENGR 111, GEO 105, and ANTH 210. It is called a "bridge" course because this course acts as a bridge to the regular university course. The bridge course provides the support you need as an international student to understand class assignments and vocabulary related to the course, and to help you build the language skills you need to fulfill written, oral, and group assignments for the regular university course. Classroom activities include discussions, in-class exercises, vocabulary games and exercises, online work on Blackboard and Internet sites applicable to the course content, mini-presentations, outlining, and quizzes focusing on the content of the university course. This course is repeatable for a maximum of 6 credits.

ALS 199. SPECIAL TOPICS (1-3). Graded P/N. This course is repeatable for a maximum of 9 credits.

ALS 199H. SPECIAL TOPICS (1-3). Graded P/N. This course is repeatable for a maximum of 9 credits.

ALS 210. HOW TO BE SUCCESSFUL IN YOUR INTERNSHIP SEARCH (2). Internship preparation course designed to provide students with the fundamental tools to find and secure an internship. Topics will include internship search strategies, resumes, cover letters, and interviewing. Guest speakers will provide additional insight into these topics from the perspective of employers and students with prior internship experience. Reflection on student's interests, values, and goals will also be integrated into the course.

ALS 212. LIFE AFTER COLLEGE (3). A variety of post-college experiences are examined, including family planning, managing finances, purchasing a car/insurance/home, and maintaining good credit.

ALS 225. TUTORING AND MENTORING SKILLS (1-3). Students are provided with tutoring and mentoring skills, and the opportunity to gain experience in working with diverse ethnic student groups. Students serve as tutors and mentors, and are provided with the opportunity to improve their own academic and communication skills. This course is repeatable for a maximum of 6 credits. **PREREQS:** Departmental approval required.

ALS 295. LAST YEAR EXPERIENCE (2). An introduction and analysis of post-college skill sets including the study of personal finance, career search techniques, communication skills, self-exploration and organizational integration. **PREREQS:** Junior and senior class standing.

ALS 299. SPECIAL TOPICS (1-3). This course is repeatable for a maximum of 3 credits.

ACADEMICS FOR STUDENT ATHLETES

Kate Halischak, *Director*

Third Floor, Beth Ray Center for Academic Support

541-737-9338

kate.halischak@oregonstate.edu

Website: <http://oregonstate.edu/studentathlete/>

The mission of Academics for Student Athletes (ASA) is to enable student athletes to achieve academic success through the provision of services that support the teaching and learning mission of the university. ASA strives to provide outstanding academic support and counseling that strengthen the persistence and success of student athletes through graduation, the academic performances of student athletes, the academic self-direction for student athletes, and the maintenance of NCAA compliance.

CENTER FOR TEACHING AND LEARNING

Kay Sagmillir, *Director*
Center for Teaching and Learning

Jeanna Towns, *Program Administrator*
jeanna.towns@oregonstate.edu
116 Waldo Hall
541-737-2804
Website: <http://oregonstate.edu/ctl/>

The CTL supports excellence in teaching and learning in the academic curriculum and learning in co-curricular settings. We have particular expertise in pedagogy and course design; general education; writing in the disciplines; difference, power and discrimination; teaching and learning technologies; global learning; GTA training and development; and classroom assessment techniques. Our services include individual consultation, faculty workshops and seminars, faculty learning communities, and orientations.

THE WRITING CENTER

Dennis Bennett, *Assistant Director*
Writing Center and Technology

Galina Romantsova, *English Language Learning Coordinator*
Writing Center
123 Waldo Hall
541-737-5640
Website: <http://writingcenter.oregonstate.edu>

The Writing Center is part of the Academic Success Center and is a support service for students and faculty at Oregon State University. Its mission is to provide writing programs that enable students at all levels to function effectively, efficiently, and confidently in an academic environment.

The Writing Center offers free help with any writing task at any stage of the writing process and is open to all OSU students, as well as to staff, faculty, and members of the Corvallis community. Writing assistants can help with all aspects of the writing process from brainstorming and organization to questions of grammar and usage. Call 541-737-5640 for an appointment.

COLLABORATIVE LEARNING CENTER

Located in The Valley Library's Learning Commons, the Collaborative Learning Center (CLC) offers a variety of resources for OSU students. During scheduled hours, peer tutors and graduate teaching assistants from the College of Science, the Center for Writing, the Academic Success Center, and Career Services are available to help students succeed.

Free drop-in tutoring is available from the Math Learning Center, Career Services, Chemistry (Mole Hole), Physics (Worm Hole). Students may also make appointments with Writing Center consultants or sign up for study tables managed by the Academic Success Center. There is no charge to use any of the learning services available in the CLC. Current schedules and a list of participating departments are available on the CLC website at <http://osulibrary.oregonstate.edu/clc>.

The CLC is designed to be a welcoming space for students. As part of the Learning Commons, it provides easy access to all of the resources in The Valley Library as well as:

- Computer workstations configured for both individual and collaborative work
- Moveable whiteboards
- Moveable tables and chairs, providing seating for more than 100 students
- "Mini" classrooms equipped with computers and whiteboards

COLLEGE ASSISTANCE MIGRANT PROGRAM (CAMP)

Amas Aduviri, *Director*
541-737-3923
amas.aduviri@oregonstate.edu
337 Waldo Hall
Oregon State University
Corvallis, OR 97331
541-737-2389
Website: <http://oregonstate.edu/dept/camp/>

The College Assistance Migrant Program is a federally-funded program through the U.S. Department of Education that provides support for first-year college students from migrant/seasonal farmworker backgrounds.

To be eligible, the student or the student's parents must have worked at least 75 days in the past 24 months in migrant/seasonal farmwork (including crop, dairy, poultry or livestock production, the cultivation or harvesting of trees, or work on a fish farm), be eligible for participation in a Migrant Education Program, or have attended a High School Equivalency Program (HEP) within the

last 12 months and have completed a GED.

CAMP students are eligible for the following scholarships and services:

- Placement testing and academic advising
- Quarterly book allowance to cover the cost of textbooks
- Monthly stipend throughout the academic year
- Personal counseling
- Travel allowance
- Supplemental aid to reduce debt and meet financial need
- Internship in residence halls
- Orientation/study skills workshops
- Financial aid counseling
- Health services
- Free tutoring
- Career orientation, job search skills development
- Other services as needed

COMPUTER CENTERS

Students at Oregon State have access to a wide variety of computer resources, from microcomputers to supercomputers, throughout the university. There are general access microcomputer facilities available to students at no charge. The microcomputer systems are networked so that they can act as workstations to access the campus mainframe and other facilities nationally and internationally. The College of Business facility contains 125 Hewlett-Packard PCs; the Milne facility contains 80 Pentium and 66 Power Macintosh systems; and the Bryan (Sackett Hall) facility houses 15 Pentium and 15 Power Macintosh systems. All facilities contain laser printers. The Milne facility is open 24 hours a day, seven days a week during the regular academic year.

In addition, many individual colleges, schools, and departments at OSU have their own computer facilities for use by students and faculty.

With thousands of individual computers located all over the campus, OSU students and faculty don't have to look far for the computer resources they need.

DIFFERENCE, POWER, AND DISCRIMINATION

Nana Osei-Kofi, *Director*
310 Waldo Hall
541-737-2824
nana.osei-kofi@oregonstate.edu
Website: <http://oregonstate.edu/dept/dpd/>

The Difference, Power, and Discrimination (DPD) Program, an affiliate of the Center for Teaching and Learning, offers support and training for faculty who teach DPD courses at Oregon State University. The DPD Program promotes the development of undergraduate courses that provide multidisciplinary perspec-

tives on difference, power, and discrimination in the United States.

EDUCATIONAL OPPORTUNITIES PROGRAM (EOP)

Janet Nishihara, *Director*

337 Waldo Hall

541-737-3628

janet.nishihara@oregonstate.edu

Website: <http://oregonstate.edu/dept/eop/>

The Educational Opportunities Program (EOP) was created at Oregon State University in 1969 and provides a welcoming environment that supports the full development of the personal and academic potential of students who have traditionally been denied equal access to higher education.

These groups include students of color, older-than-average students, students with disabilities, students who are single parents, low-income students, students who have been rurally isolated, veterans, or students who are the first generation in college.

The goals of the program include providing services which will:

- acclimate students to university culture,
- enhance each student's academic performance,
- develop each student's professional and personal growth, and
- assist students in developing a sense of belonging and a strong connection to the university.

Students in the program will have access to the following services:

- assistance through the admissions process,
- assistance in locating financial resources,
- orientation to the university,
- academic and personal counseling,
- courses to help review or fill in gaps in math, reading and writing, and
- assistance with finding jobs and internships, writing resumes and cover letters.

U.S. citizens or permanent residents interested in learning more about the program or in applying for services should visit the EOP website: <http://oregonstate.edu/dept/eop/>.

MATH LEARNING CENTER

Thomas P. Dick, *Director*

108 Kidder Hall

541-737-1570

tpdick@math.oregonstate.edu

Website: <http://www.math.oregonstate.edu/?q=mlc>

The Mathematics Learning Center provides assistance in all lower-division mathematics courses. Help is available

on a drop-in basis at no cost to students. Center hours in 108 Kidder Hall are 9 a.m. to 5 p.m., Monday through Thursday and 9 a.m. to 4 p.m. on Fridays from the second week of the term through dead week. MLC tutors are also available evenings in the Valley Library, 7 p.m. to 10 p.m., Sunday through Thursday. Make-up tests are sometimes administered in the MLC. Study materials, reference texts, and calculators are available. A computer lab is available for use by advanced math students in connection with some math courses. For more information, visit the website at <http://www.math.oregonstate.edu/?q=mlc>.

UNIVERSITY EXPLORATORY STUDIES PROGRAM

Kerry Kincanon, *Head Advisor*

102 Waldo Hall

541-737-8144

uesp.advisor@oregonstate.edu

The University Exploratory Studies Program (UESP) is an academic advising program for students who choose to explore majors at Oregon State University.

OSU students who are undecided about a major can elect to be in UESP. UESP students work through a decision-making process to help them learn more about themselves and the numerous academic options that OSU offers. They are encouraged to declare a major and transfer to an academic school or department once they have found the best fit. As part of a successful academic and university experience, UESP has targeted several important learning outcomes for its students:

- Per the university requirement, UESP students should complete the First-Year Skills courses (Writing I, Speech, Mathematics) in the baccalaureate core by the time they have earned 45 OSU-generated credits, and, the Second-Year Skills course (Writing II) by the time they have finished 90 OSU-generated credits.
- UESP student should know how to access and utilize MyDegrees, OSU's online degree audit system.
- UESP students should engage with active exploration activities and resources.
- UESP students should pursue involvement outside of the classroom.
- UESP students should set goals related to major declaration in alignment with UESP's defined major-decision making process.

UESP believes that regular consultation with a trained academic advisor will aid students in meeting these learning outcomes and moving through the major decision-making process. UESP

students are required to meet with an advisor at least once a term to discuss major options and experiential learning opportunities and to plan coursework for the subsequent term. Many students in UESP will also utilize Sigi³©, ALS 114, and the UESP website to assist in their exploration. UESP and Career Services co-sponsor access for all OSU students to Sigi³©, a comprehensive career planning website. Students can use the site to help them clarify their interests, values, and abilities, as well as find extensive information about the world of work. UESP coordinates ALS 114, Career Decision Making, a two-credit class available each term to any first- and second-year student interested in exploring major and career options in a classroom setting. UESP also provides a departmental website with exploration strategies, information about major and career exploration events on campus, and links to several career information websites.

WRITING INTENSIVE CURRICULUM PROGRAM

Vicki Tolar Burton, *Director*

306 Waldo Hall

541-737-3711

vicki.tolarburton@oregonstate.edu

Website: <http://wic.oregonstate.edu/>

The Writing Intensive Curriculum (WIC) Program offers support and training for faculty who teach writing intensive courses in the majors and promotes excellence in the teaching of writing at the university.

Primary functions include:

- Offering faculty development seminars on best practices for teaching writing in the disciplines.
- Consulting with faculty who are designing or revising WIC courses.
- Reviewing WIC course proposals for the Baccalaureate Core.
- Consulting with and making presentations to departments on issues of writing in the major.
- Publishing the WIC newsletter, Teaching with Writing.
- Developing and maintaining the WIC website, a rich resource for students and faculty, <http://wic.oregonstate.edu/>. In addition to writing help, the website includes criteria for WIC courses as well as links to a list of approved WIC courses.

Annually, the program invites departments to nominate their most outstanding student writer for a WIC Culture of Writing award in the discipline. Students who want information on WIC courses in their major should consult their departmental advisor.

Oregon State University Libraries and Press cultivates superior scholarship and creativity, empowers discovery, and preserves and disseminates knowledge. We develop user-focused services, share our expertise through teaching and research, and build gateways to unique resources to further the growth of the OSU community, the people of Oregon, and the global scholarly community. OSU Libraries supports the instructional and research needs of OSU students, faculty, and staff through both traditional and innovative services and collections. We advance OSU's land grant mission, contributing to learner success, scholarly excellence, and community engagement.

RESOURCES

The Oregon State University Libraries is the second largest research library in Oregon with three locations: The Valley Library at the main campus in Corvallis, The Marilyn Potts Guin Library at the Mark O. Hatfield Marine Science Center in Newport, and The OSU Cascades Library co-located at Central Oregon Community College in Bend.

The Valley Library collection includes materials in all subject areas, containing nearly 2 million printed volumes; subscriptions to more than 74,000 journal titles, most of which are available online; 500,000 maps and government documents; and hundreds of video and DVD recordings. As of 2012, more than 51,369 electronic books were available via the OSU Libraries' catalog. OSU Libraries digitized thousands of documents, photographs, and maps to make them more widely accessible for researchers, students, and the general public. Additionally, a notable collection of contemporary Northwest artwork is on display throughout The Valley Library with over 80 different artists represented.

The Valley Library provides a flexible learning environment that supports community and engaged learning. Two of its learning spaces are the Learning Commons and the Collaborative Learning Center (CLC). The Learning Commons offers a variety of spaces for groups to collaborate, as well as 118 computers (both Windows PCs and iMacs) that give students access to a wide variety of software. The CLC offers a variety of academic and student support services. Peer tutors and graduate teaching assistants from the College of Science, the Academic Success Center, and the Writing Center are available to assist students during scheduled hours in the CLC.

Partnering with Student Media Services gives students access to video editing and multimedia production software, large format printing, along with hardware including video cameras, microphones and audio recording equipment. In addition,

The Valley Library has 28 three-hour group study rooms, 37 90-day research rooms, six long-term research rooms, one media preview room and three designated floors for quiet study. A drop-in daycare facility is available on the third floor. Laptop computers are available to OSU students, staff and faculty for three-hour checkout and can be used with the wireless network anywhere in the library.

OSU Libraries supports faculty and student research not only through the purchased collection, but also through unique and rare materials held by the Libraries' Special Collections and Archives Research Center. Content in signature collecting areas is made freely accessible on the web to facilitate use by students, faculty, and other researchers. This includes extensive documents from the Ava Helen and Linus Pauling Papers, the History of Science Collections, the Oregon Multicultural Archives, the Natural Resources Collections, and the University Archives.

OSU Libraries also manages the ScholarsArchive@OSU institutional repository. This database makes a wide variety of information resources produced at OSU freely available on the web. Examples include faculty articles, OSU theses and dissertations, and all experiment and extension publications. ScholarsArchive@OSU is consistently ranked among the top ten institutional repositories in the United States, according to Webometrics (<http://www.webometrics.info/>).

OSU Libraries extends services and resources to the campus and off-campus community in a variety of ways. The collections can be accessed both online and through mobile devices. Hours at The Valley Library have been extended to 24 hours, five days a week (24/5), allowing OSU students and faculty access to collections as well as computers. The Valley Library has wireless throughout the building. Reference assistance is available in person and by phone, by e-mail, by text message, and by instant message during most hours when The Valley Library is open. Subject specialists are available by appointment for individual research consultation.

The Autzen Electronic Classroom in The Valley Library is an enhanced electronic classroom for library-related instruction. It provides a hands-on setting with 24-networked Mac mini dual-boot student workstations, Robotel Classroom Control Hardware, clickers, white boards, and a Smartboard.

OSU Libraries has two off-site branches. The Guin Library houses the research and teaching collection of Oregon State University's Hatfield Marine Science Center. The library's collection of more than 35,000 books and journals covers a broad range of marine-related topics including fisheries, aquaculture, oceanography, geology, environmental studies, and biology.

Oregon State University Libraries and Press
121 The Valley Library
Corvallis, OR
97331-4501
541-737-3331

ADMINISTRATION

Faye A. Chadwell,
Donald and Delpha Campbell University Librarian and OSU Press Director,
541-737-7300

Particular attention is paid to collecting material on marine fisheries, marine mammals, and information specific to the Northeast Pacific Ocean.

The Cascades Library in Bend, housed in the Barber Library of Central Oregon Community College, supports OSU-Cascades upper-division programs, including tourism and outdoor leadership and graduate programs in education. This is a relatively new branch campus that relies on the Cascades Library sharing the space and collections of the Central Oregon Community College Library to deliver services.

One on-campus branch facility is located in the College of Veterinary Medicine on campus. Open 24/7 to the college's academic community, the library has one full-time staff member, along with student employees paid by the college. OSU Libraries handles acquisitions and cataloging for the veterinary medicine collection, while the Veterinary Medicine Library fills interlibrary loan requests for items in the OSU Libraries' collection.

Since 2007, OSU Press has been a department of the OSU Libraries. OSU Press supports the university's strategic plan through its publication of scholarly and general interest books in forestry, natural resources management, and natural history as well as the cultural and social history of Oregon and the Pacific Northwest. The Press and Libraries collaborate on several projects including an open textbook initiative that supports the development of free online textbooks by OSU faculty.

COLLABORATION

As libraries move away from ownership to access, consortial memberships give OSU faculty and students a wide variety of information in a timely and efficient manner.

- OSU Libraries is a member of the Orbis Cascade Alliance which includes 37 Washington, Idaho, and Oregon universities, colleges, and community colleges with total holdings of 28.7 million titles.
- Membership in the Greater Western Library Alliance (GWLA) enables the Libraries to increase its digital presence through such sites as the Western Waters Digital Library. GWLA, a consortium of 32 research libraries from 17 Midwestern and Western states.
- OSU Libraries is a founding member and active contributor to the Northwest Digital Archives (NWDA), a consortium of 39 archives and special collections in Oregon, Washington, Idaho, Montana, and Alaska. NWDA provides enhanced

access to archival and manuscript collections across the northwest through a union database of Encoded Archival Description (EAD) finding aids.

- OSU Libraries participates in the Oregon Statewide Database Licensing Program that provides a suite of 22 general periodicals and reference database products from Gale/Cengage Learning, the database vendor that was awarded the state contract in 2013.
- As a member of the Center for Research Libraries, the OSU Libraries can provide unlimited access to all CRL resources — approximately five million publications, archives, and collections to supplement our holdings, especially in the areas of humanities and social science. OSU faculty can borrow CRL materials for extended loan periods.
- OSU Libraries is a member of the Western Regional Storage Trust (WEST), a distributed retrospective print journal repository program serving research libraries, college and university libraries, and library consortia in the Western Region of the United States.
- OSU Libraries is a member of the Coalition for Network Information, the Council on Library and Information Resources, OCLC (the world's largest library cooperative), the Library Publishing Coalition, and the Scholarly Publishing and Academic Resources Coalition."

OSU Libraries also collaborates with the University of Oregon Libraries on making joint decisions on collections, expanding access to each library's collections, sharing software, providing joint faculty/ staff development opportunities, and, in general, viewing the two libraries as a single library with shared purposes. This collaboration is especially visible in "Oregon Digital" (oregondigital.org), which provides integrated online access to digitized materials from both libraries.

OSU Libraries partners with the Institute for Natural Resources on the Oregon Explorer, a comprehensive, natural resources digital library designed to provide easy and rapid access to reliable, up-to-date information about the state's natural resources.

The most notable addition to the library's instruction program since 2010 has been the implementation of a library course designator that will allow OSU Libraries and Press to develop and offer a for-credit library sciences curriculum to partner with other academic departments to enhance student success in learning and development of critical thinking and life-long learning.

OSU PRESS

Faye Chadwell, *OSU Press Director and the Donald and Delpha Campbell University Librarian*

Thomas S. Booth, *Associate Director OSU Press*
121 The Valley Library
541-737-3166
Email: OSU.Press@oregonstate.edu
Website: <http://osupress.oregonstate.edu>

Since its founding in 1961, the Oregon State University Press has supported and enhanced the university's place as a major research institution by publishing outstanding works of scholarship by the faculty of OSU and of other institutions as well as works of general interest to readers in the state and beyond.

The OSU Press specializes in books of importance to the Pacific Northwest, especially those dealing with natural resource issues and the history, natural history, cultures, and literature of the region. The OSU Press has a long history of publishing books about the state and region, including guides to flora and fauna, atlases, guides to natural and historic sites; biographies, memoirs, and oral histories of cultural or historic importance; and literary works by some of the region's most accomplished writers.

The editorial program of the OSU Press includes several distinguished series of books:

- *Women and Politics in the Pacific Northwest*, edited by Dr. Melody Rose, Portland State University
- *Culture and Environment in the Pacific West*, which probes the relationships between cultural and environmental subjects west of the Rockies
- *Northwest Reprints*, which brings back into print classic works of fiction and nonfiction from the region's past
- *Northwest Readers*, which makes available collections of writing by notable Northwest authors and anthologies on provocative regional themes
- *Oregon Literature Series*, a project of the Oregon Council of Teachers of English
- *Northwest Photography Series*
- *Horning Visiting Scholars Series*
- *First Peoples: New Directions in Indigenous Studies*

Books published by the OSU Press have received awards for editorial and design excellence, including the Pacific Northwest Booksellers Association Special Award for Outstanding Contributions to Northwest Literature; *Choice Magazine* Outstanding Academic Title of the Year; inclusion in the Association of American University Presses Book, Jacket, and

Journal Show; Oregon Book Awards for Nonfiction and Literary Nonfiction; and the John Burroughs Society Medal from the American Museum of Natural History for a Distinguished Book of Natural History.

In 2007, OSU Press joined the OSU Libraries. Oregon State University Libraries and Press is a dynamic environment that promotes innovation, values diversity, nurtures creativity, and builds strong communities. Press staff work closely with library colleagues on projects and digital initiatives.

The press publishes 20 to 25 new books each year and has approximately 300 titles in print. The press also distributes select titles published by the University of Oregon Press and partners with other nonprofit organizations in the state on some projects. Publishing decisions are made in consultation with a faculty advisory board after external peer review of each project.

Members of the Editorial Board for 2013–2014 academic year are:

- **Peter Betjemann**, Chair, Oregon State University, English
- **Sy Adler**, Portland State University, Urban Studies and Planning
- **Katy Barber**, Portland State University, History
- **Susan M. Capalbo**, Oregon State University, Applied Economics
- **Steve Clark**, Oregon State University, University Relations and Marketing
- **Ellen Eisenberg**, Willamette University, History
- **Kenneth Helphand**, University of Oregon, Landscape Architecture
- **Peg Herring**, Oregon State University, Extension and Experiment Station Communications
- **Michael Nelson**, Oregon State University, HJ Andrews Experimental Forest
- **Jim Scheppke**, Oregon State Librarian (Retired)

The OSU Press is a member of the Association of American University Presses (<http://aaupnet.org/>)—a nonprofit organization whose purpose is to support university presses in their endeavor to make widely available the best of scholarly knowledge and the most important results of scholarly research; to provide an organization through which the exchange of ideas relating to university presses and their functions may be facilitated; and to afford technical advice and assistance to learned bodies, scholarly associations, and institutions of higher learning.

OSU Press books can be purchased from local and national booksellers as well as online at <http://osupress.oregonstate.edu>. Additional information for authors wishing to submit manuscripts, is also available at <http://osupress.oregonstate.edu/for-authors>.

INFORMATION, SERVICES

<http://oregonstate.edu/is>

Information Services supports OSU students by providing accounts, technologies, equipment checkout, printing, computing networks, and computing labs. The OSU Computer Helpdesk provides students with technical support for laptops, mobile devices, and campus systems like Blackboard, and if you need in-person support, please visit the Walkup Helpdesk in the Valley Library.

Student employment opportunities are available from a variety of units within IS, including Student Computing Facilities and the OSU Computer Helpdesk, with the greatest opportunities announced just prior to each new term.

ACCOUNTS AND PASSWORDS

<http://oregonstate.edu/is/accounts-support>

- *Accounts & Technologies Guide for New Students*: This guide is for new OSU students who need to get connected to OSU systems such as email and Blackboard. Even if you are already connected to one or more OSU systems, we recommend you go through this guide, anyway, just to be sure you've covered the bases and know where to get computing help.

- *ONID*: ONID stands for OSU Network ID. It's a universal computer account available to all OSU students and employees. You use your ONID username and password to access Online Services, Blackboard, ONID email, the wireless network, and many other university computing services.
- *Google Apps for OSU*: ONID email is accessed via Google Apps for OSU. All OSU students, instructors, and employees may access all the supported core apps: Drive, Mail, Calendar, Site, and Groups.

LEARNING TECHNOLOGIES

<http://oregonstate.edu/is/learning-technologies>

- Blackboard, OSU's Learning Management System used by both off-campus and on-campus students for classwork.
- Computing Labs
- Equipment Loan and Rental
- Standard ONID Printing
- Printing—Posters and Large Format
- Virtual Computing Lab (RemoteApps)
- Wireless Network

SOFTWARE

<http://oregonstate.edu/is/accounts-support/software>

- OSUware: Free Antivirus and Remote Access Software

TECHNICAL SUPPORT

- OSU Computer Helpdocs, <http://oregonstate.edu/helpdocs>, 24/7 help guides and FAQs
- OSU Computer Helpdesk, <http://oregonstate.edu/is/client-services/och>, Monday–Friday support via phone at 541-737-3474 and via email
- Walkup Helpdesk at the Valley Library Sunday–Friday support in person

STUDENT EMPLOYMENT

(Opportunities subject to availability)

Student workers provide programming, development, and support services for the OSU community. Please follow each unit's application guidelines. Some units accept applications during particular dates only and employment cannot be guaranteed. Potential employment is contingent upon eligibility per university policy on student employment.

- OSU Computer Helpdesk
- Technical support, programmers
- Central Web Services
- Web app and mobile app developers
- Student Computing Facilities
- Customer service and support, system maintenance

MISSION

To produce timely statistics, qualitative information and analyses that support university strategic planning and decision-making.

FUNCTION

Institutional Research, under the Office of Academic Affairs, provides services to offices and departments at Oregon State University. Responsibilities include:

- Developing and analyzing university strategic indicators and performance measures, drawing upon institutional data from all sectors of the university;
- Maintaining data archives to support longitudinal profiles and studies;

- Generating datasets of strategic interest to the university using survey instruments;
- Conducting research on issues of strategic importance to the university using national and institutional databases;
- Responding to federal, state and other external requests for institutional data;
- Supporting the academic unit program review process;
- Enhancing and improving the curricular review process; and
- Serving as a resource for the university on institutional research issues.

salvador.castillo@

oregonstate.edu

Website: [http://](http://oregonstate.edu/adminlaair/)

oregonstate.edu/

adminlaair/

The educational resources of the university include art, galleries, collections, and exhibits of cultural and scientific materials. Research, teaching, and extension functions are combined in these collections, which serve both the institution and the general public.

Over the years, various departments and schools of the university have become repositories for extensive holdings of manuscripts; rare books; prints, paintings, and other art objects; costumes; textiles; historic artifacts; archaeological material; fossils; preserved plants and animals; wood products; and marine material. These collections serve many of the same functions as a library or make possible the identification of materials whose age, name, or significance is unknown.

Most university collections serve primarily research and teaching functions and may be viewed by prior appointment with their curators. Permanent collections and museums include:

ARCHAEOLOGICAL COLLECTION

David R. Brauner, *Curator*

The Archaeological Collection consists of artifacts, field notes, maps, drawings, sketches, and photographs accumulated in archaeological investigations. Several thousand items of primary archaeological documentation comprise this collection. Location: Waldo Hall.

ART ABOUT AGRICULTURE

S.J. Curtis, *Curator*

The College of Agricultural Sciences has sponsored Art About Agriculture since 1983, as a source for education, inspiration, and research enabling people to understand and value agriculture and natural resources through the universal language of visual arts. The program, in part, recognizes regional artists for investigating agriculture and natural resources themes as content and subjects for creating their works of art. It also enables the college to acquire art for a permanent collection of contemporary fine art now representing more than 150 artists with their more than 250 works of art. The Art About Agriculture permanent collection, selected through peer review, comprises fiber arts, mixed media assemblages, paintings, sculptures, watercolors, and works on paper including drawings, photographs, and prints. Many distinguished artists are represented in the Art About Agriculture permanent collection, including Harrison Branch, Sally Cleveland, Betty Feves (1918–1985), Sally Finch, Sally Haley (1908–2007), Carl Hall

(1921–1996), (Manuel Izquierdo (1925–2009), Mary Josephson, Betty LaDuke, Marjorie McDonald (1898–1995), John Henry Rock (1919–1993), Laura Ross-Paul, Nelson Sandgren (1917–2006), Robert Schlegel, Robert Weller, and Renée Zangara.

Since the program began the college has collaborated with more than 50 galleries, primarily in Oregon, and also Washington, and British Columbia, Canada, for presenting the permanent collection, invitational art exhibitions, and regional art competitions. In 2006 the college cosponsored in partnership with the Oregon Historical Society a retrospective exhibition of the entire juried Art About Agriculture permanent collection. The late Brenda Hood, in memory of her husband, the late Gordon Hood, sponsored *This Bountiful Place: Art About Agriculture, the Permanent Collection*, an exhibition catalog published in association with the Oregon Historical Press, 2006.

Accessions to the Art About Agriculture permanent collection are made possible from patron-donor partnerships. The College of Agricultural Sciences is grateful for support from the deans of OSU Extension Service, College of Agricultural Sciences, and College of Liberal Arts; Dan and Wanda Arp; Todd and Sarah Bastian; Betty Brose; Gene and Cande Buccola; Capital Press; James and Stella Coakley; Marybeth Collins; William Cook and Gwil Evans; The Ford Family Foundation; the Carl Hall Family Collection through Bill Rhoades; the late Margaret Hogg; the late Brenda and Gordon Hood; E. R. Jackman; Larry and Sherry Kaseberg; Betty LaDuke; the Lamb Foundation; Beth and Edward Ray; and the late Gayle Strome. All gifts made to the OSU Foundation-Art About Agriculture qualify as contributions under current state and federal tax codes, including the Oregon Cultural Trust, and may be made at any time.

DEPARTMENT OF FISHERIES AND WILDLIFE'S BIRDS, MAMMALS, AND FISHES COLLECTIONS

Bruce Dugger, *Curator of Birds*

Brian Sidlauskas, *Curator of Fishes*

Clinton W. Epps, *Curator of Mammals*

The Department of Fisheries and Wildlife's Birds and Mammals Collections include more than 9,000 specimens of birds and 10,000 specimens of mammals, as well as the Braly Ornithological Collection; Overton Dowell, Jr., Bird Collection; Alex Walker Ornithological Collection; and Oregon Game Commission Collection. The Ichthyological Collection contains more than 19,000 cataloged

lots of fish representing approximately 200,000 specimens and 45 nominal type specimens. In addition, there are about 100,000 uncataloged specimens available for study. More than 13,000 frozen tissue specimens are available for genetic analysis. The collection emphasizes fishes of the Pacific Northwest, but also holds specimens from many parts of the world including Japan, Iran, Peru, Trinidad, Thailand and India. It recently added many fishes from Guyana. Use of the Department of Fisheries and Wildlife collections is restricted to qualified students and investigators. Location: Nash Hall.

FAIRBANKS ART GALLERY

Douglas Russell, *Director*

Website: http://oregonstate.edu/fairbanks/gallery/Current_Exhibit_.html

Fairbanks Gallery features exhibitions focusing on contemporary Northwest regional, national, and international artists. This program provides the public, campus, and student communities diverse creative experiences and interactions with the inspired, inventive world of visual art. In many cases exhibitions are accompanied by gallery talks, and sometimes also by classroom workshops, critiques and public lectures. Past one-person exhibits have featured notable artists such as Ruth Bernhard, Sue Coe, Wolf Kahn, Jacob Lawrence, Robert Motherwell, Philip Pearlstein, Wayne Thiebaud, Jerry N. Uelsmann, Edward Weston, Jenny Schmid, and Bill Viola. Group shows have included artists Robert Colescott, Christo, Jim Dine, Eric Fischl, Roy de Forest, Helen Frankenthaler, Ann Hamilton, David Hockney, Jenny Holzer, Roy Lichtenstein, Henri Matisse, Peter Milton, Robert Motherwell, James Rosenquist, Frank Stella, Andy Warhol, and William Wegman.

Fairbanks Gallery hosts many engaging and informative events. **Pondering the Muse** is a series of talks that examine the aesthetic and symbolic aspects of the artwork on display. These informal discussions also explore the artist's intent, historical references, design theories, and technical processes. All of the talks in this series are free and open to the public. In addition, we arrange talks for visitors ranging from elementary school students to art museum docents in specially scheduled presentations.

Email list

If you would like to be added to the email list to be notified of Fairbanks Gallery events and the Visiting Artists and Scholars Lecture program, please visit our Web page at http://oregonstate.edu/fairbanks/gallery/Join_Email_List.html.

Location

Fairbanks Gallery is located in Fairbanks Hall, at the corner of S.W. 26th Street

and S.W. Jefferson Way on the Oregon State University campus in Corvallis, Oregon. See our Web page for more directions.

Hours

Hours are 8 a.m.–5 p.m., Monday–Thursday, and 8 a.m.–noon, Friday. Occasionally the gallery will be closed during holidays and term breaks. To confirm gallery hours call 541-737-4745.

FINE ARTS PRINT COLLECTION

Douglas Russell, Curator

Website: <http://oregondigital.org/digcol/fairbanks/>

The School of Arts and Communication's Fine Art Print Collection contains nearly 600 prints representing numerous countries and spanning several centuries. The collection's holdings includes work of various styles, including Japanese Ukiyoe, modern Japanese woodblock, 20th century Latin American, German Expressionism, and 20th century American prints. Artists include Max Beckmann, Francisco Goya, Hideo Hagiwara, Hiroshige Utagawa, William Hogarth, Kathe Kollwitz, Kunisada, Mauricio Lasansky, Otto Mueller, Max Pechstein, Robert Rauschenberg, Jun'ichiro Sekino, Edward Weston, Yeizan and others.

Prints in the collection have been largely donated over the last seventy years from various sources, including patrons, faculty members, international donors, professional artists, and former students. The collection began in earnest under the direction of Gordon Gilkey. Formerly the chair of OSU's former Department of Art, Gilkey became the Dean of the College of Liberal Arts, and later became the curator of the Vivian and Gordon Gilkey Center for Graphic Arts at the Portland Art Museum. While chairman of the Department of Art at OSU, he hired numerous faculty who were talented printmakers. Berk Chappell, John Rock, Paul Gunn, Shepard Levine, Nelson Sandgren, and Demetrios Jameson not only made prints, but helped collect and find donations to add to the collection.

A World Print Competition portfolio of twenty prints was added in 1973. Portfolios of Latin American artists were organized as *Actualidad Gráfica Panorama Artístico*, and OSU was a recipient in 1975 and 1976. Photographs are included in this collection. In 1974 photography students petitioned the OSU Foundation to fund the purchase of

an edition of The Edward Weston Fiftieth Anniversary Portfolio.

A six-year rejuvenation project of preservation, cataloguing, and digital photography has culminated in a new collection website. The collection now serves as an educational resource for the students and faculty at OSU, and the prints are now also accessible via the Web for the general public and other educational institutions. The website also acts as a research center for art students, who can research prints and submit research papers to be Web published. The collection is housed in Valley Library, which offers important temperature and climate controls.

GEOLOGICAL COLLECTIONS

Andrew Meigs, Geology Program Director

The Geological Collections include minerals, rocks, and fossils. The Edward Taylor Mineral Collections (F. Tepley, Curator) contain several thousand rare and fine specimens. Over 5,000 fossil specimens of Paleozoic, Mesozoic, and Cenozoic marine invertebrates comprise the outstanding John H. Howard and Earl L. Packard Collections in Paleontology (A.G. Grunder, Curator). Location: Wilkinson Hall.

THE HERBARIUM

Aaron I. Liston, Director

The Herbarium contains more than 405,000 named specimens of seed plants, ferns, mosses, algae, fungi, and lichens. Emphasis is on collections from western North America. The herbarium is the repository for the Morton E. Peck Herbarium of Willamette University, a research collection of Oregon flora consisting of more than 30,000 sheets, and the former University of Oregon herbarium. The mycological collections (J. Spatafora, Curator) consist of approximately 75,000 dried specimens of fungi and lichens, supplemented by microscope slides and a culture collection. These collections include the H.C. Gilbert Myxomycete Collection and the Forest Service Pathology Herbarium. Location: Cordley Hall. Website: <http://www.oregonstate.edu/dept/botany/herbarium/>.

HERPETOLOGICAL COLLECTION

Stevan J. Arnold, Curator

The herpetological research collection consists of more than 60,000 ethanol-preserved amphibians and reptiles, and approximately 24,000 frozen tissue samples. The collection has excellent

representation for sites in the Pacific Northwest and includes the largest collection of garter snakes (*Thamnophis*) in the world. These and other aspects of the collection are described at the collection website <http://oregonstate.edu/~arnoldst/herp%20collection.htm>. Location: Cordley Hall.

THE J.C. BRALY NATURAL HISTORY COLLECTION

Robert T. Mason, Curator

The Natural History Collection includes 550 mounts of birds and mammals in the J.C. Braly Collection. A collection of specimen skins on the first floor is used mainly for teaching. In addition, over 1,000 preserved specimens of amphibians and reptiles from the Pacific Northwest constitute a considerable part of the teaching collection. Location: Cordley Hall.

THE LASELLS STEWART CENTER GALLERIES

Tina Green-Price, Curator and Assistant Director of The LaSells Stewart Center

The LaSells Stewart Center 875 SW 26th Street (located directly across from Reser Stadium) Corvallis, OR 97331 Oregon State University

The LaSells Stewart Center was constructed from patron-donor funds in 1981 and is the first performing arts venue and conference center on the campus of Oregon State University. The galleries at The LaSells Stewart Center offer visitors the opportunity to experience three distinct art galleries: Giustina Gallery, Murdock Gallery, and South Hall Display Case.

Giustina Gallery is located in the heart of The LaSells Stewart Center and is the largest art gallery in Willamette Valley. It proudly hosts 10 to 12 exhibits each year, featuring fine art of all mediums with over 450 local, regional and international artists represented. Giustina Gallery is recognized for cultivating creativity and building connections among the community and artists. Murdock Gallery provides art enthusiasts a more intimate art work experience—with nearly 64 linear feet of display area. South Hall Display Case features local artists in a two- and three-dimensional presentation case.

Collectively, the galleries provide the local and campus community diverse opportunities to view and display art work. Annual exhibits include: Vista and Vineyards, Art about Agriculture, Cultural Connections Exhibit, Community Art Exhibit, plus many more. Each exhibition is accompanied with a public art reception.

View upcoming exhibits, <http://oregonstate.edu/lasells/gallery>.

Sign-up to receive email notifications about upcoming art exhibits and receptions, performances and public sessions, <http://oregonstate.edu/lasells/Weekly-Happenings>.

Standard Hours of Operation: Monday–Friday, 8 a.m. to 5 p.m., and evenings and weekends during events. To learn more about The LaSells Stewart Center or its galleries, visit, <http://oregonstate.edu/lasells/>.

MEMORIAL UNION ART COLLECTION

Susan Bourque, *Curator*

541-737-6371

Website: <http://mu.oregonstate.edu/about/history>

To see and interact with *OSU Memorial Union Art Collection* go to: <http://www.facebook.com/pages/OSU-Memorial-Union-Art-Collection/17460794118>

Throughout the Memorial Union are selections from its permanent art collection. The collection began in 1928 with a gift from the Board of Regents, but the foundation of the collection came in 1943 with a donation of fifty-three William Henry Price paintings. Currently among the 125 artists included in the collection are paintings and sculptures by J. Leo Fairbanks, works from the early nineteen hundreds by Carrie Gilbert depicting Native Americans, prints collected and donated by Gordon and Vivian Gilkey, and historic photographs of OSU (a number of which are on display in the mezzanine hall). Art work commissioned under the Oregon's Percentage for the Arts Programs includes murals by Hector Hernandez, Henk Pender and Sherrie Wolf. The collection has over 300 works of art, half of which are on display at any one time throughout the building.

MEMORIAL UNION CONCOURSE GALLERY

Susan Bourque, *Exhibits Coordinator*

541-737-6371

Website: <http://mu.oregonstate.edu/art-gallery/>

The Memorial Union Concourse Gallery is one of the largest exhibition spaces on the OSU Campus. Several contemporary art exhibits reflecting a diversity of styles, media and cultural perspectives are scheduled throughout the year. These exhibits feature the artwork of international, regional, local recognized artists, and the art of talented OSU students. This program provides the public, campus, and student communities an opportunity to experience and engage their visual senses as they walk the long concourse or

take a break in one of the many seating options available. Some exhibits have related gallery talks, lectures, and/or receptions, when offered, detailed information will be available from our website. The gallery is located at the heart of campus in the historic and beautiful Memorial Union, on 26th and Jefferson Streets.

Gallery hours during the academic year: Monday–Saturday, 8 a.m.–11 p.m.; Sunday, 10:30 a.m.–11 p.m. Term breaks and summer: Monday–Friday, 8 a.m.–5 p.m.

OREGON STATE ARTHROPOD COLLECTION

David R. Maddison, *Director*

Christopher J. Marshall, *Curator and Collection Manager*

The Oregon State Arthropod Collection is a valuable research collection of nearly three million insect and mite specimens, chiefly from the Pacific Northwest. Collection strengths include Coleoptera, Hemiptera, Lepidoptera, and Hymenoptera. Areas of specialization include the Melville Hatch Beetle Collection, mites associated with insects and marine habitats, sphecoid wasps and bees of the world, leaf hoppers and plant bugs of North America, aquatic insects, litter arthropods, butterflies, and moths of the Pacific Northwest. Specimens of historic importance include the Hopkins Collection of western forest insects and voucher material of the H.J. Andrews (LTER). Location: 4082 Cordley Hall. Visit the website at <http://osac.science.oregonstate.edu>.

SCHOOL OF ARTS AND COMMUNICATION SLIDE COLLECTION

The School of Arts and Communication Slide Collection contains 90,000 slides of paintings, sculpture, architecture, crafts, graphic design, and general design from prehistoric times to the present. The collection is primarily for use by faculty in their classes. Location: Fairbanks Hall. Contact School of Arts and Communications, 541-737-4745.

SCHOOL OF DESIGN AND HUMAN ENVIRONMENT

Elaine L. Pedersen, *Collection Manager*

The School of Design and Human Environment (E. Pedersen, Collection Manager) houses a collection of approximately 2,800 historic and ethnic textiles and costumes. Among the earliest textiles in the collection are those from Coptic Egypt and pre-Columbian Peru. A collection of more than 300 historic American

and European costumes dates from 1805 to the present. Location: Milam Hall. Additional information is available on the World Wide Web at: <http://business.oregonstate.edu/sdhe/historic-collection>.

SPECIAL COLLECTIONS & ARCHIVES RESEARCH CENTER

Lawrence A. Landis, *Director*

The University Libraries' Special Collections & Archives Research Center maintains and makes available the university's unique collections of manuscripts, archives, photographs, and books. Its holdings include collections pertaining to the history of science and technology; the historical records of OSU and papers of its prominent faculty members; collections documenting cultural and ethnic groups in Oregon; and collections documenting natural resources in the Pacific Northwest, especially agriculture and forestry.

The **Ava Helen and Linus Pauling Papers** is the center's cornerstone history of science and technology collection. It is an archival research collection of more than 500,000 items which chronicles the life and work of OSU alumnus Dr. Linus Pauling, the only person in history to have received two unshared Nobel Prizes (Chemistry, 1954; Peace, 1962). The collection, donated by Dr. Pauling in 1986, includes the original manuscript for Pauling's seminal 1931 paper, *The Nature of the Chemical Bond*; the research notebooks and working manuscripts for a number of Pauling's over 1,100 journal publications and 13 books; and the original petition for nuclear disarmament presented to the United Nations in 1958, which contains the signatures of more than 9,000 scientists worldwide, including Nobel laureates Albert Schweitzer and Bertrand Russell. The archive also includes Dr. Pauling's numerous awards, over 100 hours of audiovisual material, his mammoth correspondence with many of the most prominent figures of the twentieth century, and a significant trove of molecular models constructed by Pauling. The collection serves the research interests of scholars from around the world. See <http://scarc.library.oregonstate.edu/coll/pauling/index.html>.

Another significant area within history of science and technology are the **Atomic Energy and Nuclear History Collections**. The collections include the first published account of the discovery of radioactivity in 1896, writings on the Manhattan project, the hearings of Robert Oppenheimer, and a formerly secret report of the effects of the atom bomb. It also features cultural aspects of the atomic age. See <http://>

scarc.library.oregonstate.edu/coll/energy/index.html.

The center is the official repository for the historical records created by OSU. The university archives component of the center was established in 1961 to collect, describe, preserve, make accessible to the public, and display historical records created or received in connection with the transaction of university affairs. Closely connected to the university records are the personal papers of several hundred OSU faculty, dating back to the 19th century. More than 300,000 historic photographs document campus buildings, university programs, special events, athletics, faculty, and students. A large collection of memorabilia consists of individual historical items such as programs, posters, brochures, and clippings. See <http://scarc.library.oregonstate.edu/university-history.html> for information about collections and other resources pertaining to OSU's history.

The **Oregon Multicultural Archives** was established by the OSU Libraries in 2005 to assist in preserving the histories and sharing the stories that document the lives and activities of African American, Asian American, Latino/a, and Native American communities of Oregon. Significant collections and projects include the Urban League of Portland Records, the Braceros in Oregon Photograph Collection, the Japanese American Association of Lane County Oral Histories, and the 2012 Oregon Tribal Archives Institute. See <http://scarc.library.oregonstate.edu/oma/index.html>.

The center's holdings include numerous collections pertaining to natural resources in the Pacific Northwest. A core collection in this area is the **Gerald W. Williams Collection**, which includes the personal papers and collected historic photographs of Williams, former chief historian for the U.S. Forest Service. Other significant natural resources related collections include the papers of wildlife conservationist William L. Finley, the Pacific Northwest Stream Survey Records, and the Alderman Farms Films. See

<http://scarc.library.oregonstate.edu/natural-resources.html> for information about natural resources related collections.

The **McDonald Collection** is the university's premier collection of rare books. Fine examples of typography, incunabula, works of famous illustrators, numerous fine bindings, and several first editions are represented in the collection. See <http://scarc.library.oregonstate.edu/coll/mcdonald/index.html>.

The center's collections are open to students, faculty, staff, and the public for research from 8:30 a.m. to 5 p.m., Monday through Friday. The center encourages the use of its collections in undergraduate and graduate classes; instruction services range from general orientation sessions to more specialized sessions with hands-on examination of archival materials in a classroom setting. Tours of the center are available upon request. More information about the center's services and holdings is available at <http://scarc.library.oregonstate.edu/>. Location: Valley Library.

VALLEY LIBRARY NW ART COLLECTION

Ruth Vondracek, *Humanities Librarian*

The Valley Library NW Art Collection of contemporary art by Northwest artists consists of 120 artworks selected in collaboration with the Oregon Arts Commission through the Oregon Percent for Art law. Located throughout the Valley Library, the collection includes paintings, sculptures, photographs, lithographs, prints and other media. A self-guided tour is available at the reference desk. The website http://osulibrary.oregonstate.edu/libraries_and_collections/art/ has images of all artworks and information about the artists. Location: Valley Library.

VISITOR CENTER, OSU MARINE SCIENCE CENTER

William Hanshumaker, *Public Marine Education Specialist*
Extension Sea Grant Faculty
Hatfield Marine Science Center
2030 SE Marine Science Dr.
Newport, OR. 97365-5296
541-867-0167
Website: <http://hmssc.oregonstate.edu/visitor/>

The Visitor Center of the HMSC at Newport features aquariums, interactive exhibits, and hands-on displays that bring to life the marine research conducted by OSU scientists. Special events, educational programs, guided tours and walks are available on request to teach visitors about the ocean and its inhabitants, from undersea volcanoes to the tiniest tide pool creatures.

The Visitor Center serves as a social laboratory for OSU Sea Grant's "Free-choice Learning" initiative.

THE XYLARIUM (WOOD COLLECTION)

Barbara Lachenbruch, *Curator*
541-737-4213
Website: <http://woodscience.oregonstate.edu/research-community/facilities/xylarium>

The Xylarium (Wood Collection) contains approximately 2,500 species of wood, primarily from North and South America, Southeast Asia, and Africa.

OSU ALUMNI ASSOCIATION

Kathy Bickel, *Executive Director*
204C CH2M HILL Alumni Center
541-737-2351
kathy.bickel@oregonstate.edu
Website: <http://www.osualum.com/>

The OSU Alumni Association seeks to enrich the lives of alumni and friends by helping them establish lifelong relationships with the university and with each other. Memberships are available to all graduates, former students and friends of Oregon State University. Current students are welcome to join the affiliated OSU Student Alumni Association, which helps maintain OSU traditions and assists its members in making mentoring connections with OSU alumni. The OSUAA publishes and maintains the *Oregon Stater* magazine, Beaver E-clips electronic news service, and the online alumni community at <http://www.osualum.com>. It also organizes alumni gatherings around a variety of athletic, cultural and educational events as well as class reunions. A board of directors from various geographical districts, academic disciplines and age groups, representing OSU's diverse alumni community, governs the association.

GOVERNMENT RELATIONS

Jock Mills, *Director*
652 Kerr Administration Bldg.
541-737-0725
jock.mills@oregonstate.edu

Kate Sinner, *Director of Federal Relations*
OSU Portland Center
707 SW Washington St. Ste. 500
Portland, OR 97205
503-553-3445
kate.sinner@oregonstate.edu
Website: <http://oregonstate.edu/government/>

Located in the president's office, Government Relations coordinates the university's efforts with state, federal, and local governments. The office provides state and federal legislative information and services to the university community, including assistance in working with the Oregon Congressional delegation, other members of Congress, state legislators, legislative committees, and other lobbying groups. The office also works with the governor's office, state and federal agencies, and other universities.

OREGON STATE UNIVERSITY FOUNDATION

J. Michael Goodwin, *President and CEO*

Foundation Bldg.
850 SW 35th St. at Western Blvd.
Corvallis, OR 97333
541-737-4218 or 800-354-7281

OSU Portland Center
Union Bank Bldg.
707 SW Washington St., Suite 500
Portland, OR 97205
503-553-3400 or 866-218-8930
Email: OSUFoundation@oregonstate.edu
Website: <http://osufoundation.org>

The Oregon State University Foundation, a private, nonprofit organization, dedicates itself to garnering the resources that enable OSU to achieve excellence in education, research, and outreach.

Private support deepens the university's impact and extends its reach across our state and around the world by helping to make an OSU education accessible to all qualified students, pushing the frontiers of knowledge, contributing to the state's prosperity, and addressing many of the most pressing challenges facing our planet and its people.

Together with university and alumni leaders, the foundation publicly launched The Campaign for OSU, the university's first comprehensive fundraising campaign, in 2007. Guided by OSU's strategic plan, the campaign seeks \$1 billion to provide opportunities for students, strengthen Oregon's economy, and conduct research that changes the world. The campaign will run through 2014 and will help advance OSU's drive to be recognized as a leading international research institution.

Through the campaign, donors have created over 600 new scholarship funds, more than doubled OSU's number of endowed faculty positions, and supported 28 major facility construction and renovation projects, including the \$62.5 million Linus Pauling Science Center, the university's largest academic building project.

The foundation, which is governed by a 42-member volunteer Board of Trustees, manages the majority of OSU's composite endowment, valued at more than \$440 million, which supports Oregon State University and the people it serves.

UNIVERSITY RELATIONS AND MARKETING

Steven J. Clark, *Vice President for University Relations and Marketing*
634 Kerr Administration Bldg.
541-737-4875
Website: <http://oregonstate.edu/ua/>

The Oregon State University Division of University Relations and Marketing serves as the communications interface between the university and its various publics. Our work helps our audiences better navigate through the organization. By creating credible, timely, authentic and confident communications opportunities that foster conversations, we heighten awareness and appreciation of OSU's distinctiveness and value. Comprised of the departments of News & Research Communications, University Events, University Marketing, and Web Communications, each unit is focused on building relationships and advancing OSU's brand and reputation through development of marketing strategies that marry fact-based decision making, innovative practices and superior creativity. We measure success through a variety of metrics, including the quality and diversity of our students and faculty; OSU's reputation of distinction in the three defined signature areas; support from alumni, donors and the Legislature; pride for the institution from our various audiences; and the sense of community we foster on our campuses.

NEWS AND RESEARCH COMMUNICATIONS

Mark Floyd, *Director*
416 Kerr Administration Bldg.
541-737-4611

News and Research Communications serves as the university's primary office for media relations, research communications and internal communications. Promoting OSU's distinction and value through a communications focus on the university's strategic areas of strength, the department builds the university's reputation for excellence in research, education and service to the public. News and Research Communications is part of University Relations and Marketing, OSU's award-winning marketing communications division, which includes Events, Marketing, Trademark Licensing, Web Communications and the Office of the Vice President for University Relations and Marketing.

UNIVERSITY EVENTS

Shelly Signs, *Director*
205 Adams Hall
541-737-0724
Email: shelly.signs@oregonstate.edu

The office of University Events strategizes, plans and implements high-impact events and manages special projects that engage internal and external audiences. Through these activities, we provide outstanding experiences that enhance the understanding of the institution's brand, and help foster support and engagement in the mission and goals that define Oregon State as a leading 21st century land grant university.

UNIVERSITY MARKETING

Melody Oldfield, *Director*
102 Adams Hall
541-737-8956
melody.oldfield@oregonstate.edu

University Marketing creates and executes clear, consistent and engaging strategies that advance the brand reputation of Oregon State University. By sustaining a strong brand image for the university, we promote awareness, understanding and support among OSU students, faculty, alumni, donors and other communities. University Marketing also strives to enhance the university's name recognition and awareness, locally, regionally and nationally, through licensed merchandise bearing registered trademarks of the university.

INTERACTIVE COMMUNICATIONS

David Baker, *Director*
102 Adams Hall
541-737-8323
david.baker@oregonstate.edu

Interactive Communications advances the reputation of Oregon State University through digital marketing and brand alignment, multimedia and interactive storytelling. We are responsible for the university's home page and top-tier websites. We produce targeted online marketing campaigns and create video and multimedia for broadcast television, events and the web.

University Conference Services delivers the highest level of quality standards for conferences, events, seminars, meetings and the performing arts. Through partnerships developed on- and off- campus, and from our two unique offerings, OSU Conferences Services (a conference management team) and The LaSells Stewart Center (a state-of-the-art conference and performing arts venue), clients benefit from invaluable, extraordinary and innovative experiences.

Partnerships for Achieving Excellence – Oregon State University Conference Center

Oregon State University Conference Center boasts one of the most successful collegiate conference programs in the nation with two world-class, year-round conference venues, a dedicated on-site conference management team, a conveniently located headquarter hotel (Hilton Garden Inn Corvallis), plus many other on-campus partners.

- **OSU Conference Services** offers a full suite of services to ensure that every component of your conference, workshop or whatever the event, will be planned and executed with the

highest level of precision. Whether hosting your conference on-campus or elsewhere, as the client, you'll have the flexibility to focus on the strategic elements of your conference—leaving the details to our team of qualified event professionals.

- **The LaSells Stewart Center** welcomes more than 160,000 guests annually and proudly hosts hundreds of conferences and events each year. It has over 40,000 square feet of dedicated, year-round conference and performing arts space, including a 1,200 person auditorium, a 200 person lecture hall, plus an executive board room and several breakout rooms. The venue is complimented by high-tech audio visual capabilities and the largest art gallery in Willamette Valley.
- **CH2M HILL Alumni Center** is a beautiful meeting and conference venue that offers 40,000 square feet of dedicated, year-round event space. The center consists of a 7,000 square foot ballroom, a variety of breakout rooms, a stunning lobby and other multi-purpose areas.

ADMINISTRATION

Kavinda Arthenayake,
Director, University Conference Services, Transportation Solutions, Printing & Mailing

The University Ombuds strengthens campus communication and administrative processes by acting as a designated neutral and dispute resolution practitioner. The Ombuds' major function is to provide informal, impartial, and confidential* assistance to the university community by listening to concerns, clarifying issues, exploring options for resolution, providing information and referrals, and if all parties agree, facilitating informal, non-binding mediation. Serving as a designated neutral, the ombuds is not an advocate for any individual or for the university, but rather acts as an advocate for fairness and healthy conflict management. The ombuds does not provide legal advice or psychological counseling. This position compliments,

but does not replace, the university's existing resources for conflict resolution.

To schedule an appointment, please contact the office by telephone or email. Walk-in appointments are welcome, however, scheduling appointments in advance is preferred to assure availability.

*Confidentiality cannot be promised in matters relating to threats to public safety, child abuse, if there is imminent risk of serious harm, or if compelled by a court of law. Speaking with an ombuds does not constitute legal notice to the university of any problem, concern, or complaint. You must pursue alternative complaint avenues if you wish to obligate the university to respond in any way. The ombuds has no duty or responsibility to report incidents to any person or authority, other than as described above.

Oregon State University serves the state of Oregon, the nation and the world through teaching, research and outreach. The OSU Extension Service has a presence in 36 Oregon counties and delivers programs in agriculture, family and community development, forestry, Sea Grant and 4-H youth development. These units have a direct impact on Oregon's economy and the lives of Oregonians.

OSU Extended Campus provides a variety of high-quality learning opportunities to students throughout the world. Extended Campus gives access to Oregon State's academic excellence through OSU Summer Session and by delivering degree programs and courses online through OSU Ecampus.

OSU Professional and Continuing Education (PACE) offers an array of continuing education courses and programs, delivered in a variety of formats that benefit individuals and organizations alike in Oregon and elsewhere.

The Open Educational Resources and Emerging Technologies unit works with faculty to create open learning modules such as free online textbooks, enabling them to share their expertise in digital media collections around the world.

ECAMPUS – ONLINE COURSES AND DEGREES

As the world of higher education increasingly gravitates toward online learning, Oregon State Ecampus continues to provide adult learners with access to a high-quality education no matter where they live. Thousands of online and distance students enroll in Ecampus' accredited degree programs and courses each year, all of which are developed by Oregon State University faculty.

OSU Ecampus consistently ranks among America's top providers of online education for the quality and strength of its programs. In each of the last four years, Ecampus has been ranked nationally by numerous publications such as U.S. News & World Report and SuperScholar. The national prestige is based on a variety of factors, including faculty credentials, student engagement, student services and academic quality.

Students interested in pursuing an OSU degree online with Ecampus can choose from more than 35 undergraduate and graduate programs, including fisheries and wildlife, an MBA in Executive Leadership, agricultural sciences, computer science, liberal studies, natural resources, psychology, and human development and family sciences. Find a complete list of degree programs online at <http://ecampus.oregonstate.edu>.

Ecampus delivers more than 900 online courses throughout the year. A complete list of classes is available online at <http://ecampus.oregonstate.edu/soc>.

Oregon State's distance learners include full- and part-time students, working and retired professionals, community college students, active-duty and retired military, high school students and individuals who want to further their education with a single college course. Ecampus students and graduates hail from all 50 states and more than 40 countries worldwide.

All curricula for Ecampus courses and degree programs are designed by Oregon State faculty and are held to the same rigorous academic standards as the university's on-campus classes. OSU is accredited by the Northwest Commission on Colleges and Universities, and all Ecampus students who complete degree requirements receive the same diploma and transcript as campus-based students.

Ecampus works closely with more than 500 OSU faculty members and department heads in order to provide students with enriching educational opportunities. Our current online offerings include courses in more than 80 subjects, from anthropology and chemistry to economics and public health.

Oregon State partners with nearly 20 community colleges throughout the state and in Hawaii as a way to help students progress toward a four-year degree. The Degree Partnership Program allows students to take community college and OSU classes concurrently in order to meet the course-load requirement for financial aid and to access other OSU services, including advising. Learn more about taking Ecampus online classes with the Degree Partnership Program at <http://oregonstate.edu/dpp>.

SERVICES FOR STUDENTS

There are a number of valuable resources distance students can take advantage of to improve their online-learning experience. The Ecampus librarian offers guidance to students as they conduct research, as well as access to a slew of community college and university libraries in the Pacific Northwest. Free online tutoring and remote test proctoring are also available.

The Ecampus staff also features several student success counselors, who help current and future Ecampus students explore issues that impact their academic success

Associate Provost for University Outreach and Engagement-OSU Extension Service

and identify strategies to support them in achieving their goals at OSU.

Ecampus works to create a sense of community for its students by sharing news about OSU faculty and students online (<http://ecampus.oregonstate.edu>) and in a series of e-newsletters. Ecampus also has a strong following on Facebook (<http://facebook.com/osuecampus>) and Twitter (<http://twitter.com/osuecampus>), where students can engage with fellow students, Beavers fans and ask questions of the Ecampus staff.

Ecampus also provides assistance via email (ecampus@oregonstate.edu), by phone (800-667-1465) or in person to prospects and students interested in taking Oregon State courses online and at a distance.

SERVICES FOR FACULTY

The Ecampus staff also provides an array of services for faculty, including course development training workshops, marketing support, facility coordination and liaison activities with partnering community colleges and universities.

The Ecampus Faculty Forum is an annual showcase of excellence in online teaching that features interactive, wide-ranging discussions on how OSU applies its academic prestige to online education. Held each spring on campus, the event gives faculty the opportunity to hear colleagues discuss innovative teaching methods, best practices and relate their experiences in online course development. More than 200 OSU faculty, administrators and staff attend the event annually.

In 2013 Ecampus launched an initiative called QM Online Course Design, which seeks to improve student success in online courses by focusing on continuously improving course design. Using the independent and research-based Quality Matters (QM) peer review process, the faculty-driven QM program examines course design, not the content itself or the teaching.

Having an online course peer reviewed is an ideal way for OSU faculty to receive fresh ideas from colleagues who can offer positive feedback to create more active learning. The Ecampus Course Development and Training team conducts trainings year-round, and stipends are awarded when one reviews a peer's course. Learn more online at <http://ecampus.oregonstate.edu/faculty/qm>.

OSU SUMMER SESSION

Claire Cross, *Director*

Maurine Powell, *Program Manager*

4943 The Valley Library
Corvallis, OR 97331-4504
541-737-1470
800-375-9359

Email: summer.session@oregonstate.edu
Website: <http://summer.oregonstate.edu>

OSU Summer Session serves more than 7,000 students annually on the Corvallis campus and at the OSU Hatfield Marine Science Center on the Oregon coast. Taking summer classes is an ideal way to expedite the journey to graduation. It allows students the ability to take classes that are difficult to get into during other terms, and it also gives students the opportunity to improve their GPA, perform research with faculty, and seek professional development or enrichment courses.

During summer term, Oregon State offers more than 1,700 on-site and online courses in over 100 subjects, from agriculture to zoology. Courses range in length from one week to 11 weeks, with most courses running three, four or eight weeks. Sequential courses (e.g. General Chemistry or Spanish) enable students to complete a full year's worth of courses in one term.

OSU Summer Session courses are held to the same rigorous academic standards as courses offered during the rest of the school year. Among the benefits of enrolling in summer term are the smaller class sizes and increased accessibility to instructors.

The full-time summer course load for undergraduates is 12 credits; for graduate students, it is 9 credits. Undergraduates may, however, take up to 19 credits, and graduate students can take up to 16 credits during summer term with advisor approval.

Nonresident students enjoy considerable tuition savings during summer term because all students pay in-state tuition.

Summer classes are open to all students who meet course requirements. Students who have been academically suspended from the university are ineligible to enroll in summer session. For application details, call the OSU Office of Admissions at 800-291-4192.

The OSU Summer Session Planning Guide, available in March, is the primary summer publication, and it contains important information regarding summer admission, registration procedures and deadlines, the summer calendar, tuition and fees, financial aid and housing. For a free copy of the planning guide, stop by the Office of the Registrar in the Kerr Administration building, the OSU Summer Session office on the fourth floor of The

Valley Library, or call 800-375-9359. For the most current information, go online to <http://summer.oregonstate.edu>.

Beginning in January, updated descriptions and schedule information for OSU Summer Session courses are available online at <http://summer.oregonstate.edu>. Please refer to this website, as course availability and offerings are updated through June.

OPEN EDUCATIONAL RESOURCES AND EMERGING TECHNOLOGIES (OER)

Dianna Fisher, *Director*

541-737-8658

Email: dianna.fisher@oregonstate.edu
Website: <http://outreach.oregonstate.edu/initiatives/oer>

The Open Educational Resources and Emerging Technologies unit guides faculty through the creation of open learning modules, enabling them to share their expertise around the world. In partnership with OSU Libraries and OSU Press, the OER team also creates interactive, free, online textbooks for students.

Examples of open educational resources (OERs) include full courses, course modules, syllabi, lectures, homework assignments, quizzes, classroom activities, pedagogical materials, games and more—all located in digital media collections around the world.

These learning modules are focused on defined, individual learning objectives and are available as a foundation for additional online course development, as well as for K–12 curriculum enhancement.

OSU EXTENSION SERVICE

A. Scott Reed, *Vice Provost for University Outreach and Engagement, Director Extension Service*

Deborah Maddy, *Associate Provost for University Outreach and Engagement, Associate Director Extension Service*

101 Ballard Extension Hall
Corvallis, OR 97331-3606
541-737-2713

Website: <http://extension.oregonstate.edu>

Oregon State University's Extension Service provides education and information based on timely research to help Oregonians solve problems and develop skills related to youth, family, farm, forest, and marine resources. It carries out its mission by extending the research and knowledge bases of the university to people who need the information, and provides leadership in applying this knowledge to the problems people have identified.

Anyone may participate in Extension offerings. Thousands of Oregon citizens

volunteer to assist in Extension programs by leading and teaching groups, responding to questions, and providing educational information. OSU students support their communities, gain practical experience and learn through Extension placements, applying academic learning to address local community needs.

Extension educational programs are developed in response to the needs of people in Oregon. Needs are identified by OSU Extension faculty, who are located throughout the state in county offices. Off-campus faculty, who work with people to assess their needs, partner with members of Extension's on-campus faculty to prepare and deliver useful educational programs. About two-thirds of OSU's Extension faculty and staff are located in offices off campus. Financial support is from county, state, and federal governments, grants, and other sources.

There are five major Extension education program areas:

Agricultural Sciences and Natural Resources

Extension's agricultural program provides education and technical assistance for people with agricultural interests. The major program emphasis is on food, feed, energy, fiber, seed, and ornamental production and management of animal and plant production systems. Programs include farm/ranch business management, marketing, value added processing, natural resource use and conservation, community horticulture, human and environmental health, and bioethics. Audiences include urban and rural residents and businesses, government agencies and communities with wide ranging interests in conservation, production, and community development.

Family and Community Health

Extension's Family and Community Health program helps Oregonians improve their health, family, and community through education and community partnerships. Major programming extends knowledge related to public health, nutrition, exercise science, human development, family financial management, and aging to address important needs in Oregon's communities.

Forestry and Natural Resources

Extension's Forestry and Natural Resources Program improves Oregonians' knowledge of forestry and natural resources and their options for enhancing benefits from these resources. This educational program assists forest owners, managers, processors, users, and students in understanding the importance of both production and environmental benefits from Oregon's forests. Priority subjects include reforestation, forest management, silviculture, forest health, wildland fire, intergenerational land transfer, harvesting and processing wood, protection

of soil and water, wildlife habitat, and related natural resources use, management, and protection.

Sea Grant Program

Extension's Sea Grant Program provides education, training, and technical assistance to people with coastal-related needs and interests. Major efforts are concentrated in the areas of fisheries and wildlife, watersheds and other natural resource management, marine engineering, food science and technology, economics, business, resource management, education, and recreation. The program is primarily supported by the OSU Sea Grant College and the OSU Extension Service.

4-H Youth Development

4-H helps young people learn and grow through an intentional process that builds competence, confidence, connection, compassion and character. Young people participate in 4-H through clubs, afterschool programs, camps, and school enrichment activities. These youth are supported by trained volunteers who work under the direction of local 4-H professionals located in all 36 counties. As the only nationwide youth development program with direct ties to the land grant university system, 4-H is uniquely positioned to ensure that its programs are based on what is known about how young people develop and learn.

OSU OPEN CAMPUS

A. Scott Reed, *Vice Provost for University Outreach and Engagement, Director Extension Service*

Jeff Sherman, *Open Campus and Special Initiatives*

101 Ballard Hall
Corvallis, OR 97331-3606
541-737-1384

Website: <http://outreach.oregonstate.edu/initiatives/open-campus>

OSU Open Campus is a shared initiative between OSU Ecampus, OSU Extension, local communities, led by the Division of Outreach and Engagement. In an effort to collaboratively engage community colleges, K-12 education, and universities, OSU convenes local educational teams to provide access to degree completion, career and college readiness, and professional and economic development.

Students and Faculty Engaging in Communities

Students and faculty who have interest in working with communities around the state can feel free to contact us for more information.

OSU PROFESSIONAL AND CONTINUING EDUCATION (PACE)

Dave King, *Associate Provost for University Outreach and Engagement*

Chris LaBelle, *Director of Professional and Continuing Education*

541-737-4197

800-667-1465

Website: <https://pace.oregonstate.edu/>

The OSU Professional and Continuing Education unit provides continuing education and professional development for professionals, hobbyists, organizations, associations and K-12 students throughout the state and beyond.

PACE works with colleges, businesses and professional associations to develop new onsite and online educational offerings in formats that include workshops, seminars, short courses, conferences and certificate programs; companies can request their own customized training as well.

PACE's growing list of courses and programs includes Master Gardener Online, Oregon Master Naturalist Online, Recycling 101, beer brewing and cider courses, the OSU Summer Chamber Music Workshop and many different certificate programs in areas such as horticulture, fashion design, digital brand management and communications, museum interpretation, integrated plant management and small farms. PACE also produces continuing education for pharmacists, veterinarians, hazardous waste professionals, beer brewers, naturalists, and many other professions.

Services for Students and Faculty

PACE works with works with colleges, departments and faculty to issue continuing education units (CEUs) and can assist with instructional design and program development, enrollment management, event management, mobile phone and web application development and videography for continuing education programs. PACE also provides assistance with grant writing and often partners with colleges or departments to provide an outreach vehicle for research in the form of an online continuing education program.

Contact us if you would like to discuss how your program might be adapted into an educational offering for professionals or lifelong learners.

Oregon State University offers academic Pathway and English language training programs through the INTO OSU Center. Personalized support tailored to international students' educational, social and cultural needs prepares them to progress with confidence as degree-seeking students. INTO OSU provides international students with learning experiences and services that promote academic, professional and personal success.

INTO established its first partnership in the U.S. at Oregon State University in 2008. Located in the new International Living-Learning Center, INTO OSU offers outstanding academic programs, technology-assisted learning, a welcoming, interconnected community of students from across the U.S. and the world, strong student support programs and state-of-the-art facilities. The innovative Pathway and English language programs offered at the INTO OSU Center are delivered by highly qualified OSU teaching faculty. INTO OSU also provides a breadth of academic preparation and support services designed specifically to meet the unique needs of its international students.

FACILITIES

The International Living-Learning Center opened in September 2011 and is the new home for INTO Oregon State University. This state-of-the-art building offers a world-class student experience where international and domestic students live and learn together in the heart of the OSU campus. The new building includes residential accommodations for more than 300 international and domestic students, 26 classrooms, a large and spacious auditorium, computer labs, a café, market and comfortable open spaces where students can socialize.

STUDENT SERVICES

The INTO OSU Student Services team provides a range of co-curricular programs and services promoting social, personal and academic wellbeing. Upon arrival at OSU, the team helps students settle in to life in Corvallis, provide social opportunities and a variety of resources tailored to the specific needs of international students. Whether it's a question about making an appointment with a doctor, finding a place to live, renewing your visa or anything else, there will always be someone available to help you.

INTERNATIONAL STUDENT ORIENTATION

Orientation involves a variety of important events that prepare students to be successful at OSU, including information about maintaining your visa status, registering for OSU classes, health requirements and insurance coverage. Attendance at International Student Orientation is required

of all international students, both direct and INTO OSU.

Other important activities during orientation include: opening an OSU email account, getting an OSU ID card, learning about OSU community expectations and taking a tour of the campus. It's also a great time to make new international and American friends and attend the many social events planned on campus.

VISA AND IMMIGRATION SUPPORT

Upon arrival, the university's International Student Advising and Services office, in conjunction with the INTO OSU Student Services team, will provide information, support and guidance on maintaining your immigration status while you are in the U.S. These can include questions about renewing a student visa, making sure your I-20 or DS-2019 status is always current, bringing your dependents, employment, traveling and more. They will issue any documentation you may need to support your visa application. Students can make individual appointments with an International Student Adviser at International Student Advising and Services. In addition, workshops are held throughout the year on topics such as employment, scholarships and travel.

OSU OFFICE OF INTERNATIONAL ADMISSIONS

The OSU Office of International Admissions is housed in the INTO OSU Center. The Office of International Admissions works closely with prospective international students from inquiry to admission for a variety of programs including: General English, Academic English, Pathway Programs (Undergraduate and Graduate), Undergraduate, Post-Baccalaureate, Professional (MBA, PharmD, and DVM), and Non-degree Exchange Students. All other graduate programs (Master's and PhD) are served by the Graduate School. Visit the Office of International Admissions online at <http://oregonstate.edu/admissions/international>.

SCHOLARSHIPS

Oregon State University and INTO Oregon State University are proud to offer a wide variety of scholarships for exceptional international students. Scholarships are available to undergraduate students, graduate students and Pathway students alike. For more information about these exciting scholarship opportunities, please visit <http://oregonstate.edu/admissions/international/scholarships>. Scholarships are available to undergraduate students, graduate students and Pathway and English language students.

UNDERGRADUATE PATHWAY

Undergraduate Pathway programs combine intensive language study, academic

ADMINISTRATION

Amy McGowan,
Center Director

Bob Gilmour,
Director of Academic Programs

Valerie Rosenberg,
Director of International Undergraduate Admissions and Director, INTO OSU Student Experience

skills development and academic coursework in a carefully constructed program designed to prepare students for rigorous OSU degree programs.

Three types of Undergraduate Pathway programs are available:

- Standard 3-term Pathway: leads students through their first year and upon completion of all progression requirements, students will move on to their degree-seeking program as second-year, freshman students.
- 2-term Accelerated Pathway: This program is composed of two terms of Pathway programming which count toward the student's undergraduate degree.
- 1-term Accelerated Pathway: This program is composed of one term of Pathway programming which counts toward the student's undergraduate degree.

The Undergraduate Pathway programs are designed for students who:

- Want to study for an undergraduate degree in the U.S.
- Need to improve their English language skills
- May have lower GPAs than required of direct-entry students
- Desire additional academic, language, and cultural support in order to succeed during their first year at a U.S. university
- Any or all of the above

The Pathway program is for students who want to take the fast-track to success. Pathway students receive the highest level of support during their transition abroad, making it an ideal choice for international students who are driven to achieve high academic goals.

Undergraduate Pathway programs are available in:

- Business
- Engineering
- Science
- Computer Science
- Sustainable Planet
- Food Science and Technology
- Exercise Sport Science
- General
- General – Liberal Arts Focus
- Public Policy
- Women and Gender Studies

* Both the 1-term and 2-term Accelerated Pathway programs lead to any undergraduate major at OSU. No specific tracks are offered.

Pathway Program

Core Academic Courses

The Undergraduate Pathway program is comprised of OSU credit-earning courses in math, science and writing. From the first day of classes, INTO OSU Pathway students study alongside domestic students in many of the same courses.

For more information please visit into-higher.com/osu/programs.

GRADUATE PATHWAY PROGRAM

The innovative Graduate Pathway program is a pre-Master's program that provides international students a direct path to various graduate degrees at the university. The program gives students the academic foundation, essential language skills and GMAT/GRE test preparation to successfully move on to the Master's degree.

Direct admission to the Graduate School and respective department-based graduate programs at Oregon State University is highly competitive with only the best and most prepared students being selected. Many students who meet all the minimum entry requirements are not admitted because of the highly competitive nature of the programs.

The Graduate Pathway program is designed for international students who:

- Require additional preparation to be admitted directly to the Graduate School
- Fall short of meeting the minimum GPA or test score requirements
- Need further English development
- Need to improve study skills for success in their chosen field of study
- Any or all of the above

Graduate Pathway Programs are available in:

- Master of Business Administration (MBA)
- Chemical Engineering
- Civil Engineering
- Comparative Health Sciences
- Computer Science
- Construction and Engineering Management
- Electrical and Computer Engineering
- Environmental Engineering
- Industrial Engineering
- Mechanical Engineering
- Mechanical Engineering with Materials Science Emphasis

Three types of Graduate Pathway Programs are offered:

- Standard 3-term Pathway (available for any track offered)
- 2-term Accelerated Pathway (available for the MBA Pathway)
- 1-term Accelerated Pathway (available for the MBA and all Engineering Pathway programs)

CORE ACADEMIC COURSES

The academic courses included in the Graduate Pathway programs are carefully chosen to ensure success in graduate-level studies. Students will be advised on which modules to follow during their academic orientation at the INTO OSU Center.

For more information please visit into-higher.com/osu/programs.

ACADEMIC ENGLISH

Program Description

The Academic English program at INTO Oregon State University prepares international students for university study in the U.S. The academically rigorous program provides international students with high-quality English language instruction and the academic skills to succeed at OSU through development of:

- Listening
- Speaking
- Reading
- Writing
- Standardized test preparation
- Academic study skills

Program Highlights

- Intensive English to prepare for university study
- Academic advising throughout the program
- Small classes of 18-20 students
- Highly-trained and experienced instructors
- Participation in the Conversant Program
- Use of a fully-equipped Learning Center with state-of-the-art technology

Program Outcomes

After finishing this intensive program successful students will be able to:

- Interact comfortably in the U.S. classroom with professors and fellow students
- Understand U.S. values in an academic setting
- Present their spoken and written ideas accurately and effectively in English
- Write research papers with proper use of citations and references
- Use the Internet and OSU library databases to conduct academic research
- Read, understand, and critically evaluate academic texts
- Understand and use vocabulary common to academic disciplines
- Take useful and accurate notes in academic lectures and presentations
- Develop and deliver oral presentations

GENERAL ENGLISH PROGRAM

Program Description

The General English program consists of 5-week sessions designed for students of all levels of English who want to develop communication skills in many social and professional situations while learning about American culture.

Program Highlights

- English instruction for personal or employment motives
- Flexible entry dates
- Flexible duration of study
- Access to all OSU campus facilities and events

- Academic advising throughout the program
- Small classes of 18–20 students
- Use of a fully-equipped Learning Center with state-of-the-art technology

Program Outcomes

The General English program allows students to tailor their program to suit their personal, professional, and academic goals.

General English students will be able to:

- Improve general language proficiency in listening, speaking, vocabulary, reading and writing
- Expand career prospects by improving English language proficiency
- Develop conversation skills for real-world situations such as greeting, initiating a conversation, turn-taking, interrupting, asking for information
- Read and understand schedules, signs, ads and other authentic materials
- Understand basic cultural values and behaviors of Americans in order to interact appropriately
- Have the opportunity to interact with native speakers
- Progress to Academic English for further study at OSU

STUDY ABROAD WITH ENGLISH

Program Description

Study Abroad at INTO OSU is designed for students who want one or more terms of study abroad experience at a top US university. The program provides students with a classic American university experience while taking a variety of classes. Students will have access to all the support services available at the university and INTO OSU, including exceptional one-on-one tutoring, social and cultural trips and more.

The length of the Study Abroad program will vary depending on a student's needs. The program can be customized for different levels of English and for specific academic interests. There are fall, winter, spring and summer start dates available. Additional program and admission information can be found at <http://oregonstate.edu/admissions/international/programs/study-abroad-with-english>.

With prior approval from your home university, the academic courses you will study at OSU can be used to gain credits toward your undergraduate degree in your home country. This program is not designed as a route to degree-seeking OSU programs, though your credits may apply to an OSU degree if you seek admission.

This program consists of three parts:

Study Abroad with English (SAWE) Part 1

Students study full-time in the Academic English program. Students have an opportunity to progress to Study Abroad with English Part 2 upon successful completion of Academic English level 4 and meeting internal progression criteria.

Study Abroad with English (SAWE) Part 2

Students are able to select from OSU undergraduate credit bearing courses offered by the College of Liberal Arts and study alongside domestic and international students while continuing to take 6-12 hours of academic English classes. Students have an opportunity to progress to the Visiting International Students Program upon successful completion of Academic English core level 6 courses or ALS160/ALS162 and meeting internal progression criteria.

Visiting International Students Program (VISP)

Students can select from a range of OSU credit-bearing courses offered by the College of Liberal Arts. Optional academic English courses are also available.

All OSU undergraduate College of Liberal Arts courses taken through the VISP and SAWE Part 2 program are transferable with prior approval from the student's home university (except intensive English courses, if selected).

Departmental approval is required for students seeking to register for a course outside the College of Liberal Arts.

For a comprehensive list of all current youth programs at Oregon State University, please visit http://oregonstate.edu/precollege/main_view.

General Information: 541-737-9424

OSU's Precollege Programs offers a variety of on- and off-campus academic programs designed to enhance learning and introduce youth to the college community. During the summer months and throughout the academic year, K-12 students participate in programs that range from several hours to several weeks. Our Precollege Programs provide compelling experiences and stimulating learning environments for a diverse group of students.

OREGON 4-H

Offers a variety of educational opportunities for youths in grades K through 12. The program is part of the OSU Extension Service and is active in all Oregon counties. Opportunities for leadership development, community service, and learning about topics as diverse as natural resource management, foods and fibers, animal science, and engineering abound. All 4-H educational activities are designed to help participants develop lifelong skills that will prepare them for future success. To learn more about local opportunities, contact the OSU Extension office in your county or call the State 4-H Office at 541-737-4444 (HHHH).

TAG PROGRAMS

Specifically designed academic and social experiences for gifted, talented, and high-ability youth.

Adventures in Learning

Combines stimulating academic and

social opportunities in a fun-filled 10-day experience exposing participants to exciting and sophisticated areas of interest not usually available during the regular school year. The program is designed for gifted, talented and high-ability learners who have completed grades 5 or 6 and who are interested in fast-paced, challenging opportunities.

Expeditions

Provides gifted, talented, and high-ability youth who have completed grades 3 or 4 a two-week, half-day educational experience with courses taught by experts in a variety of topics. Students are introduced to engaging, intriguing subjects in an enjoyable and nurturing environment.

Outside the Box

Enables gifted, talented, and high-ability youth who have completed grades 7 or 8 to pursue topics of interest through a unique combination of in-depth, challenging academic explorations and social interaction with intellectual peers. Program participants can anticipate excitement, discovery, and challenge in the program's offerings which are designed specifically to address their interests and abilities.

Winter Wonderings

Offers a variety of challenging Saturday courses designed specifically for gifted, talented, and high-ability 3rd, 4th, 5th and 6th graders. Participants discover new and exciting areas of study in a fast-paced learning environment with their social and intellectual peers.

OSU KIDSPIRIT SUMMER DAY CAMPS

Sponsored by the College of Public Health and Human Sciences, is an innovative youth summer day camp program, offered Monday-Friday for children grades K through 12. Youth may attend morning, afternoon, or all day sessions. Programs are based on grade levels. All activities are coeducational. All abilities are welcome! Group leaders will help in classes and escort children to activity areas. Head instructors plan, organize and lead activities.

Junior Beavers

Grades K through 2, have an established daily program with variations in class offerings from session to session, including skill development and supplementation in recreational sports, art and educational classes.

Dam Builders

Grades 3 through 5, choose the groups of classes that they take from session to session. Classes to choose from include athletics, drama, art, science, music, computers and lots more!

Duck Busters

Grades 6 through 8, choose all of their classes from session to session. Their

classes are designed for their age group and skills. Classes include biking, rock climbing, triathlon, art, inventions and lots more!

Teen Leadership Camp

Grades 9 through 12, is for teens who want to develop their leadership skills by working with youth. They will be facilitated by a coordinator, become certified in First-Aid and Adult and Child CPR, and work directly with the KidSpirit campers by assisting group leaders and head instructors.

Counselors in Training

Grades 9 through 12, "CIT" is for teens who want to develop their leadership skills by working with youth, but will work with group leaders and head instructors. CIT teens will have more responsibilities and will be given more leadership opportunities.

Girls on the Run of the Willamette Valley

Girls on the Run, is a life-changing experiential learning program for girls in grades 3-5 and 6-8, that combines training for a 5K event with self-esteem enhancing work-outs. The fun, interactive curriculum is designed to educate and prepare preteen girls for a lifetime of self-respect and healthy living.

KIDSPIRIT SPORT PROGRAMS

KidSpirit offers a variety of recreation classes throughout the summer for participants ages 2-18. Classes include gymnastics, archery, and tennis. Each of our programs focus on obtaining basic skill sets while learning to interact with other participants in a fun, safe, and supportive environment.

SKIES (SPIRITED KIDS IN ENGINEERING AND SCIENCE)

Science and engineering activities for grades K through 5 where kids will explore chemistry, physics, math, life sciences, ecology and engineering in a fun, interactive learning environment. Science activities will be mixed with physical activities throughout the morning or afternoon session.

HIGH SCHOOL NEWSPAPER AND YEARBOOK WORKSHOP

High school juniors, seniors, and faculty advisors from Oregon, Washington, California, Alaska, and Idaho meet on the OSU campus for a three-day workshop. The annual event gives practical instruction in organization and development of high school newspapers and yearbooks. It is co-hosted by Josten's Yearbook Company, Northwest Scholastic Press, and the OSU Student Media Department. Classes are 8 a.m. to 5:30 p.m. daily. Last year's workshop attracted more than 275 participants.

JumpstART

A precollege visual arts summer residential program hosted by the School of Arts and Communication, JumpstART emphasizes skill development and conceptual growth through exposure to accelerated art instruction and faculty mentors. Students spend six hours daily working in art and design, attend evening presentations by guest lecturers and artists, and participate in multi-disciplined events. The workshop concludes with a final exhibition, as well as an evaluation of the student's portfolio by a faculty committee.

CAMPUS FIELD TRIPS PROGRAM

The Office of Precollege Programs hosts middle and high school visits to Oregon State University during the school year. Teachers and group leaders are encouraged to plan visits to explore careers, experience OSU, or enhance current curriculum. Register to request a visit using the Precollege website at <http://oregonstate.edu/precollege/>.

STEM ACADEMY@OSU

For more information, contact catherine.law@oregonstate.edu or STEM.academy@oregonstate.edu
Website: <http://academy.engr.oregonstate.edu>

STEM Academy@OSU offers educational enrichment opportunities that provide youth a direct connection to the STEM (Science, Technology, Engineering, and Math) fields. Programs include after-school girls' science and engineering clubs, summer day camps, workshops, and outreach programs. Classes are small, hands-on, informal, project-oriented, and open to all interested students. Tuition costs vary, depending on the program or activity.

SUMMER EXPERIENCE IN SCIENCE AND ENGINEERING FOR YOUTH (SESEY)

SESEY is primarily for high school girls and ethnic minorities traditionally under-represented in science and engineering, and for science, math, or physics teachers who are interested in developing curricular materials to promote engineering activities in their classrooms. Students come to the OSU campus for a one-week residential summer camp and are paired with a faculty mentor in engineering for a mini-research project in areas such as microscale technologies, plastics recycling, drug formulation and delivery, bioprocessing, microelectronics, and environmental engineering. There are also group learning activities (computer instruction, communication skills, field trips) and social activities. Students are exposed to science and engineering as viable and interesting career paths.

Career counseling is provided by faculty mentors and OSU graduate and undergraduate students who work with the students throughout the week as research project advisors and friends. Students live in OSU housing, so they receive a complete college experience. For more information, contact Skip Rochefort, skip.rochefort@oregonstate.edu.

SCIENCE AND MATH INVESTIGATIVE LEARNING EXPERIENCES (SMILE) PROGRAM

Ryan Collay, Director,
ryan.collay@smile.oregonstate.edu,
541-737-2388
18 Gladys Valley Center
Website: <http://smile.oregonstate.edu/>

OSU's SMILE (Science and Math Investigative Learning Experiences) Program collaborates with 15 school districts and charter school partners in Oregon to increase the number of historically under-represented minority, low-income, and other educationally underserved students who graduate from high school prepared to go on to college and pursue careers in math, science, engineering, health professions, and teaching. More than 600 students and 50 teachers in 34 schools across the state participated in SMILE last year. The program functions as a pipeline that takes students from 4th to 12th grade and on to postsecondary education in STEM programs and careers.

SMILE provides a comprehensive program of science and math enrichment and college readiness through weekly after-school clubs, field trips, on-campus college-connection challenge activities, a bridge-to-college summer program for SMILE graduates entering OSU, and professional development for classroom teachers serving as SMILE Club advisors.

ADDITIONAL YOUTH PROGRAMS:**BUG ZOO**

The Oregon State University Bug Zoo is a student group interested in educating its members, other students and the public about the joys and importance of insects, other arthropods and reptiles and amphibians. Bug Zoo educates through live displays and hands-on activities. For more information, contact Sujaya Rao, 541-737-9038, email: sujaya.rao@oregonstate.edu. Website: <http://entomology.oregonstate.edu/content/bugzoo>.

DISCOVERY DAYS

Discovery Days is an outreach program involving many of the science departments at OSU as well as departments and schools from the College of Agricultural

Sciences and the College of Engineering. This two-day event, held in both the fall and spring terms, features displays and hands-on activities from different departments that are suitable for all ages. For more information, contact Margie Haak, 541-737-6716, email: margie.haak@oregonstate.edu. Website: <http://www.science.oregonstate.edu/DiscoveryDays/>.

EDUCATION/K-12 OUTREACH/ CHEMISTRY OUTREACH

The Department of Chemistry has an active program to bring chemistry to the local community. Through the Outreach Committee, opportunities are available to tour labs, do hands-on experiments, and have chemistry faculty and students to bring chemistry to schools. For more information, contact Margie Haak, 541-737-6716, email: margie.haak@oregonstate.edu. <http://www.chem.orst.edu/outreach/>.

INNER CITY YOUTH INSTITUTE (ICYI)

ICYI is a collaborative partnership among the OSU College of Public Health and Human Sciences, Forest Service, Pacific Northwest Research Station, and Bureau of Land Management. The program encourages urban youth to explore careers in natural resources, attain higher education in natural resource careers and understand the interrelationships between the use of natural resources, the people who use them and the land that sustains their community. For more information, visit <http://extension.oregonstate.edu/metro4h/icyi> or contact Stacey Sowders, Program 4-H ICYI Program Coordinator: 503-821-1125.

OREGON NASA SPACE GRANT

Oregon NASA Space Grant maintains a diverse array of programs to support space science and engineering education. Connecting educators with professional development opportunities, Oregon Space Grant aims to help develop a strong science, mathematics, and technology education base at all levels while fostering communication and continuity between the K-12 community and higher education. For more information, contact Oregon NASA Space Grant at 541-737-2414, email: spacegrant@oregonstate.edu. Website: <http://spacegrant.oregonstate.edu/>.

OREGON WOOD MAGIC™

Oregon Wood Magic™ is a 2 hour 45 minute interactive experience designed to educate elementary school teachers and their students about the wonders of wood as a material. For more information, visit <http://woodscience.oregonstate.edu/wood-magic/oregon-wood-magic> or call Michelle Maller, 541-737-4259, Wood Magic Coordinator, michelle.maller@oregonstate.edu.

OSU SUMMER VETERINARY EXPERIENCE

The OSU Summer Veterinary Experience is a hands-on learning experience for academically talented, low-income and minority high school students interested in veterinary medicine. Mentors and instructors will work with each student to discover and explore her or his talents and understanding of the basic sciences, animal and human health, and social sciences. For more information, visit <http://vetmed.oregonstate.edu/youth-summer-program>, or contact Aarika Guerrero, 541-737-2268, aarika.guerrero@oregonstate.edu.

PET DAY AND OPEN HOUSE

Pet Day and Open House provides outreach and information about veterinary science, and careers in veterinary science and animal care. It is open to the general public the first Saturday in May at Magruder Hall on campus. For more information, contact Suzanna Chase, suzanna.chase@oregonstate.edu, 541-737-6779. Website: <http://vetmed.oregonstate.edu/pet-day>.

RECRUITMENT AND RETENTION OF WOMEN AND MINORITIES IN ENGINEERING

Committed to bringing more woman and minorities to OSU to become tomorrow's engineers through our three pronged approach of Recruitment, Retention and Research. Activities include K-12 school visits, sponsoring teacher/career counselor workshops, OSU Engineering tours, developing lesson plans for K-12 classes. For more information, contact Ellen Momsen, 541-737-9699, email: ellen.momsen@oregonstate.edu. Website: <http://engr.oregonstate.edu/wme/>.

SCIENTISTS AND TEACHERS IN EDUCATION PARTNERSHIPS (STEPS)

Scientists and Teachers in Education Partnerships (STEPS) The STEPs program is a STEM outreach program at Oregon State University which strives to enhance 6-12 science, math, health, and engineering education by forging collaborative partnerships between Oregon scientists, teachers, and students. This goal is accomplished through activities such as teacher workshops, science events for students, and classroom equipment loans. Website: <http://steps.oregonstate.edu>. For more information, Kari van Zee vanzeek@science.oregonstate.edu; Dan Arp, Director, Dan.J.Arp@oregonstate.edu.

SUITCASE OCEANOGRAPHY

Suitcase Lessons are portable modules for K-6 students based on the FOSS science curriculum. They are designed with complete materials and instructions so any member of the OSU oceanography faculty, graduate student, or a scientist working at an oceanography institute can go to a classroom and successfully present the lessons. These kits can be checked out from CEOAS. Outreach opportunities include developing more lessons or creating suitcase lessons of your own. For more information, contact Marta Torres, 541-737-2902, email: mtorres@coas.oregonstate.edu. Website: <http://blogs.oregonstate.edu/suitcase/>.

WAVE RESEARCH LABORATORY TOURS

The O.H. Hinsdale Wave Research Laboratory strives to expose students of all ages to engineering and research with programs such as guided tours through the wave lab. The tours, guided by knowledgeable faculty and graduate students, include an introduction to basic wave mechanics, demonstrations of the wave lab equipment and experiments being conducted in the laboratory. Tours can range from 20 to 45 minutes and the WRL will work with teachers to develop meaningful and exciting lesson plans for the tour. For more information, contact Alicia Lyman-Holt, 541-737-3665, email: alicia.lyman-holt@oregonstate.edu. Website: <http://wave.oregonstate.edu/>.

The College of Agricultural Sciences performs four vital services—teaching, research, extension, and international agriculture—that are closely tied to the human and natural resources of the state of Oregon and that support the economic, environmental, and community welfare of the state, the Pacific Northwest, the nation, and the world.

The College of Agricultural Sciences offers educational programs to serve the needs of individuals interested in pursuing careers in agribusiness; agriculture; animal, plant and food systems; environmental economics and policy; fisheries and wildlife; food science; range and natural resource management; veterinary medicine; and more. The faculty realizes the importance of individual aims and abilities and, through course work, internships, advising, and extracurricular activities, tries to help each student discover and develop social, aesthetic, and ethical values as well as professional competence.

Undergraduate students may pursue the following bachelor of science degree programs through the College of Agricultural Sciences:

- Agricultural Business Management
- Agricultural Sciences
- Animal Sciences
- Bioresources Research
- Botany
- Crop and Soil Science
- Environmental Economics and Policy
- Fisheries and Wildlife Sciences
- Food Science and Technology
- Horticulture
- Rangeland Sciences
- Sustainability

Graduate students may pursue the following degree programs:

- Agricultural Education (MAG, MS)
- Animal Science (MAG, MS, PhD)
- Applied Economics (MA, MS, PhD, MAIS)
- Biological and Ecological Engineering (MEng, MS, PhD)
- Botany and Plant Pathology (MA, MAG, MS, PhD)
- Crop Science (MAG, MS, PhD)
- Entomology (MA, MAG, MS, PhD)
- Fisheries Science (MAG, MS, PhD)
- Food Science and Technology (MAG, MS, PhD)
- Horticulture (MAG, MS, PhD)
- Interdisciplinary Studies (MAIS)
- Public Policy (MPP)
- Rangeland Ecology and Management (MAG, MS, PhD)
- Soil Science (MAG, MS, PhD)
- Toxicology (MAG, MS, PhD)
- Water Resources Engineering (MS, PhD)
- Water Resources Policy and Management (MS)
- Water Resources Science (MS, PhD)
- Wildlife Science (MAG, MS, PhD)

DOUBLE DEGREES IN EDUCATION OR INTERNATIONAL STUDIES OR SUSTAINABILITY

Undergraduates with majors in the College of Agricultural Sciences can earn a second degree in education or international studies or sustainability. See the College of Education or International Programs or Sustainability major sections of this catalog for more information.

HIGH SCHOOL PREPARATION

Advances in the technology and sciences of agriculture and natural resources make the study of biological, physical, and social sciences and communications vital. High school agricultural science and technology (AST) courses also help prepare students for some fields of study. The following preparation in high school is strongly recommended for students who plan to enter a College of Agricultural Sciences degree program: English, 4 units; mathematics, 3 units; physics, chemistry, and biology, 1 unit each; social studies, 3 units; and foreign language, 2 units.

INDIVIDUAL ADVISING

Each student is considered an important individual. His or her study program is developed in personal consultation with an advisor in the department of his or her major interest. As early as possible, each student is encouraged to select a subject area and become associated with instructors and other students with similar interests. Initial or early advising is based upon the student's high school record and placement test scores. When high school preparation is found to be inadequate, the student is encouraged to enroll in courses providing the education, training, and experience necessary to help assure success at the university level, even though such work may require the student to take one or more additional terms to complete a prescribed four-year curriculum. Students planning to transfer from a community college or another four-year institution are encouraged to contact an advisor to discuss their plan of study as far in advance of transferring as possible.

INTERNSHIPS

College of Agricultural Sciences departments and programs offer academic credit for learning achieved during supervised work experience. Internships are available in all facets of agriculture and natural resources through individual departmental offerings. Applications for internships must be approved prior to placement. Details are available from departmental advisors.

SCHOLARSHIPS

The College of Agricultural Sciences and its departments offer a variety of scholarships to deserving students. Several are reserved for incoming high school or transfer students. Additional information and application forms for college-level scholarships are available online at <http://agsci.oregonstate.edu/scholarships>. For information about departmental scholarships, contact each department directly. For more information about university-level scholarships, contact the Office of Financial Aid and Scholarships, 541-737-2241.

MINOR PROGRAMS

Minors are offered through most departments of the College of Agricultural Sciences. Students interested in pursuing a minor must first contact the key advisor in the area of interest. The minor must consist of a minimum of 27 designated credits of related course work, including 12 in upper-division courses.

GRADUATION REQUIREMENTS

To be eligible for a bachelor of science (BS) degree, a student must complete a minimum of 180 credits including:

1. University Baccalaureate Core requirements
2. Courses in agricultural sciences: 36 credits including 24 credits at the upper-division level.

COLLEGE OF AGRICULTURAL SCIENCES COURSES

AGRI 299 SPECIAL TOPICS (1-4). Targeted courses that focus on specific topics in agriculture and natural resources. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 8 credits.

AGRI 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

Undergraduate Major**Bioresource Research (BS, CRED, HBS)****Options**

Animal Reproduction and Development
Applied Genetics
Bioenergy
Bioproducts
Biotechnology
Climate and Biosystems Modeling
Environmental Chemistry
Food Quality
Genomics/Bioinformatics
Pest Biology and Management
Plant Growth and Development
Sustainable Ecosystems
Toxicology
Water Resources

**Undergraduate Minor
Bioenergy**

Bioresource Research is an interdisciplinary biosciences major leading to a BS degree. The centerpiece of BRR is a comprehensive mentored research experience. BRR students take foundation courses in the biological and physical sciences. Each student's upper-division curriculum is individualized based on choice of option and research topic. All BRR students do a two-year, mentored research project culminating in a thesis, in a cutting-edge area of agricultural, biological, chemical, environmental, food, or health science. BRR faculty research mentors currently come from seven OSU colleges (Agricultural Sciences; Engineering; Earth, Ocean, and Atmospheric Sciences; Forestry; Pharmacy; Science; and Veterinary Medicine). BRR courses include classes in scientific research, data presentation, and seminar presentation. The BRR curriculum is flexible enough to allow students to complete a second major or minor related to their research interests.

In addition to research expertise, BRR students graduate with a strong background in biosciences, job training, and problem-solving and communication skills. Many will enter industrial or academic research or natural resource management. Others will enter graduate and professional schools in the life sciences or become secondary school science teachers. The BRR program fulfills requirements for entry to medical, veterinary, dental and related biomedical schools and graduate programs.

BIORESOURCE RESEARCH (BS, CRED, HBS)**Sample Curriculum****First Year (45)**

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)
BRR 100. Great Experiments in Bioresource Sciences (1)
CH 231, CH 232, CH 233. *General Chemistry (4,4,4)
and CH 261, CH 262, CH 263.
*Laboratory for Chemistry 231, 232, 233 (1,1,1)
HHS 231. *Lifetime Fitness for Health (2)
HHS 241-HHS 248. *Lifetime Fitness: (various activities) (1)
or any PAC Course (1-2)
WR 121. *English Composition (3)
Baccalaureate core (6)
Unrestricted electives (5)

Second Year (45)

BRR 200. Developing a Research Proposal: Theory and Practice (1)
PHL 205. *Ethics (4)
CH 331, CH 332. Organic Chemistry (4,4)
CH 337. Organic Chemistry Lab (4)
PH 201, PH 202, PH 203. *General Physics (5,5,5)

ST 351. Introduction to Statistical Methods (4)
Baccalaureate core selection (6)
Unrestricted electives (3)

Third Year (45)

BI 311. Genetics (4)
BRR 401. Research and Scholarship (8)
COMM 111. *Public Speaking (3)
MTH 251. *Differential Calculus (4)
MTH 252. Integral Calculus (4)
or MTH 268. Mathematical Ideas in Biology (4)
Baccalaureate core selection (3)
Unrestricted electives (4)
Selected courses to meet BRR option requirement (15)

Fourth Year (45)

BB 450, BB 451. General Biochemistry (4,3)
BRR 401. Research and Scholarship (6)
BRR 403. ^Thesis (4)
BRR 406. Projects: Data Presentations (1)
BRR 407. Seminar (1)
BRR 409. Practicum: Teaching and Peer Mentoring (1)
WR 327. *Technical Writing (3)
Baccalaureate core selection (3)
Unrestricted electives (5)
Selected courses to meet BRR option requirement (14)

Options Curricula

One option specialization is required (more are often possible). Course work for EACH option must total 29 credits.

Footnotes:

* Baccalaureate Core Course
^ Writing Intensive Course (WIC)

OPTIONS**ANIMAL REPRODUCTION AND DEVELOPMENT OPTION**

Animal reproduction and development entails the study of life processes in cells, organs, and whole animals to enhance efficient production of high quality animals and animal food products. Students use antibody based assays, molecular genetics, protein chemistry, embryo and tissue culture, electron chemistry, and other modern laboratory techniques in research in areas of animal reproduction, development and growth, preparing them for positions or graduate programs in the bioscience/biomedical/veterinary/agricultural fields.

Required Courses

ANS 121. *Introduction to Animal Sciences (4)
ANS 314. Animal Physiology (4)
ANS 316. Reproduction in Domestic Animals (4)
ANS 317. Reproduction in Domestic Animals Lab (1)
CSS/CROP/HORT 300. Crop Production in Pacific Northwest Agroecosystems (4)
Select one of the following courses:
BI 314. Cell and Molecular Biology (4)
BOT 331. Plant Physiology (4)
CSS 305. Principles of Soil Science (4)
[Taught at EOU LaGrande campus only.]

and CSS 306. Problem Solving: Soil Science (1)[*Taught at EOU LaGrande campus only.*]

or SOIL 205. *Soil Science (4)

ENT 311. Introduction to Insect Pest Management (4)

or CSS 311. Introduction to Insect Pest Management (5)[*Taught at EOU LaGrande campus only.*]

MB 302. General Microbiology (3)

RNG 341. Rangeland Ecology and Management (3)

TOX 411. Fundamentals of Toxicology (3)

Specialization and Breadth Courses
7 to 9 credits approved by option faculty and research mentor.

Total=29

APPLIED GENETICS OPTION

Applied genetics is directed at changing the genomes of organisms, to increase their utility to humans. Techniques are derived from cytogenetics, molecular biology, and Mendelian and quantitative genetics. Typically, applied geneticists have expertise in one or more related fields of study such as agronomy, biochemistry, botany, entomology, food processing, forestry, microbiology, pathology, physiology, and statistics. The goals of applied genetics include:

1. improving the quality of food and fiber products,
2. improving the cost efficiency of a given product, and
3. minimizing adverse environmental effects of food or fiber production.

Students in this option will be well prepared for positions in biosciences and agriculture, or in graduate and professional programs.

Required Courses

CSS/PBG 430. Plant Genetics (3)

and CSS/PBG 450. Plant Breeding (4)

or ANS 378. Animal Genetics (4)

ST 411. Methods of Data Analysis (4)

Specialization and Breadth Courses
18 to 21 credits approved by option faculty and research mentor.

Total=29

BIOENERGY OPTION

Bioenergy is renewable energy (e.g. fuel ethanol, hydrogen and biodiesel) derived from biomass, including byproducts, residues, woody waste products, and crops and microbes grown specifically for fuel. Development and production of bioenergy could contribute to long-term environmental and economic sustainability. Bioenergy research creates new uses for agricultural and other materials by developing new biochemical processes for the production of sustainable fuels. This area of research involves both science and engineering. Students completing this option will be ready for challenging careers in industry, governmental agencies, consulting companies, and

novel start-up companies, or for graduate programs.

Substituted Courses

BRR 350. Introduction to Regional Bioenergy (2) for BRR 100 and BRR 409

BRR 450. Interdisciplinary Research: Bioenergy Focus (2) for BRR 200

Required Courses

1. Background Course

Choose one course from below (3 cr):

CSS/CROP 330. *World Food Crops (3)

FOR 111. Introduction to Forestry (3)

MB 302. General Microbiology (3)

2. Upper-Division Lab Course

Choose one course from below (2–3 cr):

BB 493. Biochemistry Laboratory (3)

BB 494. Biochemistry Laboratory (3)

BOT 332. Laboratory Techniques in Plant Biology (3)

MB 303. General Microbiology Laboratory (2)

3. Engineering Course

Choose one course from the list, or another appropriate upper-division course in the area of process or ecological engineering, genomics/bioinformatics, or genetic engineering, approved by research mentor (3–4):

BEE 102. Ecological Engineering II (3)

BEE 320. Biosystems Analysis and Modeling (4)

BEE 453. Introduction to Process Engineering Design (4)

BOT 475. Comparative Genomics (4)

4. Specialization and Breadth Courses

WSE 473. Bioenergy and Environmental Impact (3)

Choose additional courses from above and below, or other upper-division courses approved by research mentor, to total 29 credits:

AREC 300. Applied Economic Analysis (3)

AREC 351. *Natural Resource Economics and Policy (3)

AREC/ECON 352. *Environmental Economics and Policy (3)

BEE 221. Fundamentals of Ecological Engineering (3)

Note: Students choosing BEE 221 may substitute it for BEE 102.

BEE 499. Special Topics: *Biofuel Feedstocks and Production* (3)

BI 314. Cell and Molecular Biology (4)

BI/FES/TOX 435. *Genes and Chemicals in Agriculture: Value and Risk (3)

ECON 201. *Introduction to Microeconomics (4)

ENGR 231 Understanding Energy (3)

ENGR 350. *Sustainable Engineering (3)

ENGR 363 *Energy Matters (3)

FOR 330. Forest Conservation Economics (4)

FOR 331. Forest Resource Economics II (4)

FS 432. Planning Agroforestry Projects (2)

MB 310. Bacterial Molecular Genetics (3)

MB 312. Bacterial Physiology and Metabolism (3)

MB 456. Microbial Genetics and Biotechnology (3)

MB/FST 479. Fermentation Microbiology (3)

MTH 254. Vector Calculus I (4)

MTH 256. Applied Differential Equations (4)

PHAR 536. Product Development (3)

PHAR 537. Bioorganic Chemistry (3)

PHAR 540. Medicinal Natural Products Chemistry (3)

BIOPRODUCTS OPTION

Bioproducts are biomaterials or biochemicals (e.g. biodegradable plastics and composites, antibiotics, pharmaceuticals and herbicides) produced by conversion processes from plant, animal, or microbial biomass. Development and production of bioproducts contribute to environmental and economic sustainability. Bioproducts research creates new uses for agricultural and other materials by developing new biochemical processes for the production of renewable chemicals and bioproducts. This area of research involves both science and engineering. Students completing this option will be ready for challenging careers in industry, governmental agencies, consulting companies, and novel start-up companies, or for graduate programs.

Students must choose option classes from three categories, to provide:

1. background appropriate to the systems that their research concerns (e.g., forests, agricultural crops, microbes);
2. an upper-division laboratory class;
3. appropriate "engineering" course work, broadly defined to include process engineering, ecological engineering, bioinformatics, breeding, or genetic engineering, depending on the student's choice of research.

1. Background Course

Choose one course from below (3 cr):

CSS/CROP 330. *World Food Crops (3)

FOR 111. Introduction to Forestry (3)

MB 302. General Microbiology (3)

2. Upper-Division Lab Course

Choose one course from below (2–3 cr):

- BB 493. Biochemistry Laboratory (3)
 BB 494. Biochemistry Laboratory (3)
 BOT 332. Laboratory Techniques in Plant Biology (3)
 MB 303. General Microbiology Lab (2)

3. Engineering Course

Choose one from the list, or another appropriate upper-division course in the area of process or ecological engineering, genomics/bioinformatics, or genetic engineering, approved by research mentor (3–4):

- BEE 102. Ecological Engineering II (3)
 BEE 320. Biosystems Analysis and Modeling (4)
 BEE 453. Introduction to Process Engineering Design (4)
 BOT 475. Comparative Genomics (4)
 ENGR 350. *Sustainable Engineering (3)

4. Specialization and Breadth Courses

Choose 19–21 credits from above and below, or other upper-division courses approved by research mentor, to total 29:

- AREC 300. Applied Economic Analysis (3)
 AREC 351. *Natural Resource Economics and Policy (3)
 AREC/ECON 352. *Environmental Economics and Policy (3)
 BEE 221. Fundamentals of Ecological Engineering (3)
Note: Students choosing BEE 221 may substitute it for BEE 102.
 BEE 499. Special Topics: *Biofuel Feedstocks and Production* (3)
 BI 314. Cell and Molecular Biology (4)
 BI/FES/TOX 435. *Genes and Chemicals in Agriculture: Value and Risk (3)
 ECON 201. *Introduction to Microeconomics (4)
 ENGR 363. *Energy Matters (3)
 FOR 330. Forest Conservation Economics (4)
 FOR 331. Forest Resource Economics II (4)
 FS 432. Planning Agroforestry Projects (2)
 MB 310. Bacterial Molecular Genetics (3)
 MB 312. Bacterial Physiology and Metabolism (3)
 MB 456. Microbial Genetics and Biotechnology (3)
 MB/FST 479. Fermentation Microbiology (3)
 MTH 254. Vector Calculus I (4)
 MTH 256. Applied Differential Equations (4)
 PHAR 536. Product Development (3)
 PHAR 537. Bioorganic Chemistry (3)
 PHAR 540. Medicinal Natural Products Chemistry (3)
 WR 201. *Writing for Media (3)
 WR 214. *Writing in Business (3)
 WSE 210. *Renewable Materials Technology and Utilization (4)
 WSE 321. Chemistry of Renewable Materials (3)
 WSE 322. Physical and Mechanical Properties of Renewable Materials (4)

- WSE 324. Renewable Materials Lab (3)
 WSE 453. ^Global Trade in Renewable Materials (3)
 WSE 535. Polymer Synthesis and Structure (3)
 WSE 573. Bioenergy and Environmental Impact (3)

Total=29**Footnotes:**

BIOTECHNOLOGY OPTION

Biotechnology refers to laboratory-based techniques such as genetic engineering, recombinant DNA, tissue culture, and horizontal gene transfer, to make or modify products, to improve plants or animals, or to develop useful microorganisms. Examples include gene transfer to increase plant yield or disease resistance; cell and tissue culture to clonally propagate plants or animals; manipulation of microorganisms or cultured cells for the production of fermented food and beverages or the development of vaccines; production of antibodies for detection of animal and plant diseases; drug discovery and development. Students will gain laboratory and/or field experience in modern techniques of biotechnology, preparing them for biosciences or biomedical graduate/professional schools or careers in biotechnology.

Substituted Courses

- BB 490 and BB 491. Biochemistry (3,3)
 for BB 450 and BB 451. Biochemistry (4,3)

Required Courses

- BB 492. Biochemistry (3)
 BI 314. Cell and Molecular Biology (4)
 MB 302. General Microbiology (3)
 and MB 303. General Microbiology Lab (2)
 or HORT/PBG 441. Plant Tissue Culture (4)
 MB 310. Bacterial Molecular Genetics (3)

Specialization and Breadth Courses

13 to 15 credits approved by option faculty and research mentor.

Total=29**CLIMATE AND BIOSYSTEMS MODELING OPTION**

The Climate and Biosystems Modeling option applies general systems theory to the analysis of climate, environmental and agricultural systems, and their interactions. Systems theory provides a method of analyzing overall system behavior by examining the relations among—and the behavior of—individual components, and synthesizing these relationships into a mathematical framework that describes the total system. Computer simulation using this mathematical framework can predict and analyze the response to various changes in the inputs to, and/or structure of, the system, providing a powerful tool for the development of comprehensive solu-

tions to problems. Examples of topics for student research could include studying the effects of climate change on vectored disease transmission, marine biodiversity, distributions of crops and crop pathogens, the carbon and nitrogen cycles, and wildfire cycles. The option is flexible; students design personalized programs and may complete a double major or minor if desired. This option will prepare students for challenging careers in governmental regulatory agencies and environmental consulting companies, or for graduate programs.

BRR students interested in climate and/or ecosystem research but not modeling should investigate the Sustainable Ecosystems option.

Required Courses**1. Climate**

Choose one course from below (3–4 credits):

- ATS 420. Principles of Climate (4)
 GEO 323. ^Climatology (4)

2. Biosystems

Choose one from below or another appropriate course approved by research mentor (3–4 credits):

- ATS 464X. Vegetation and the Atmosphere (3)
 BI 370. Ecology (3)
 BOT 341. Plant Ecology (4)
 CE 412. Hydrology (4)
 FE 430. Watershed Processes (4)
 FES 341. Forest Ecology (3)
 FW 320. Introductory Population Dynamics (4)
 OC 440. Introduction to Biological Oceanography (3)

3. Quantitative Modeling

Choose one course from below (3–4 credits):

- BEE 320. Biosystems Analysis and Modeling (4)
 ST 435. Quantitative Ecology (3)
 ST 443. Applied Stochastic Models (3)

4. Computer Programming

Choose one course from below or another appropriate course approved by research mentor (3–4 credits):

- CS 151. Introduction to C Programming (4)
 CS 161. Introduction to Computer Science I (4)

5. Statistics

Choose one sequence from below (8 credits):

- ST 411, ST 412. Methods of Data Analysis (4,4)
 ST 421, ST 422. Introduction to Mathematical Statistics (4,4)

Specialization and Breadth Courses
 6 to 9 credits approved by research mentor.

Total=29 credits**Footnote:**

- ^ Writing Intensive Course

ENVIRONMENTAL CHEMISTRY OPTION

Environmental chemistry focuses on the basic principles that control the fate of chemicals in the environment. A bewildering variety of chemicals, an inevitable result of modern industrial civilization, are released daily; some of them persist in soil, water, or air. The extent to which these chemicals are a health hazard depends in part on where, how much, and in what form they accumulate. OSU scientists use state-of-the-art methods to detect trace amounts of chemicals in the environment, at levels as low as one part per trillion, and track their movement and transformations. Students will acquire laboratory skills that will be in high demand as worldwide public concern with environmental quality increases.

Substituted Courses

CH 334, CH 335, CH 336. Organic Chemistry (3,3,3)

for CH 331, CH 332. Organic Chemistry (4,4)

PH 211, PH 212, PH 213. *General Physics with Calculus (4,4,4)

for PH 201, 202, 203. *General Physics (5,5,5)

Required Courses

CH 390. Environmental Chemistry (3)

CH 440. Physical Chemistry (3)

CSS 305. Principles of Soil Science (4)

and CSS 306. Problem Solving: Soil Science Applications (1)*[CSS taught only on EOU LaGrande campus]*

or SOIL 205. *Soil Science (4)

MTH 254. Vector Calculus I (4)

Select two courses from:

CH 324. Quantitative Analysis (4)

CH 421. Analytical Chemistry (3)

CH 428. Instrumental Analysis (4)

CH 435. Structural Determination by Spectroscopic Methods (3)

CH 440. Physical Chemistry (3)

CH 461. Experimental Chemistry II (3)

CSS/SOIL 545. Geochemistry of Soil Ecosystems (4)

TOX 430. Chemical Behavior in the Environment (3)

TOX 490. Environmental Forensic Chemistry (3)

Specialization and Breadth Courses
5 to 8 credits approved by option faculty and research mentor.

Total=29 (not including substitute courses)

FOOD QUALITY OPTION

Food quality research includes a broad range of studies involving sensory appeal, convenience, safety, and nutrition of food and beverages. The sensory aspects of food quality emphasize taste, texture, aroma, and appearance. The convenience aspects of food quality include shelf-life, ease of preparation, and improved functional properties. Food safety is concerned with acute and chronic responses of consumers to microorgan-

isms and chemicals that occur naturally or are added to foods. Nutritional aspects of food quality are related to the nutrient content of foods and the role of nutrients in human health. Research in these areas is grounded in the application of basic sciences, including biology, chemistry, microbiology, molecular biology, psychology and engineering. Students will acquire skills appropriate for laboratory, industrial, or regulatory positions.

Required Courses

FST 421. Food Law (3)

FST 422. Food Chemistry Fundamentals (4)

FST 423. Food Analysis (4)

MB 302. General Microbiology (3)

Specialization and Breadth Courses

14 credits approved by option faculty and research mentor.

Total=29

GENOMICS/BIOINFORMATICS OPTION

Technological advances in the life sciences have led to a virtual explosion of genomics, proteomics, metabolomics and related “omics” data that give unprecedented global and molecular views of living systems. The Genomics/Bioinformatics Option focuses on computational analyses of these data, using state-of-the-art methods. Computational areas of emphasis within this option include sequence (DNA and protein) analysis and alignment, biological network analysis, and quantitative modeling. Students will be able to use these data to answer research questions and address emerging applications in life sciences, biotechnology, and medicine, and will be prepared for careers or graduate programs in this new, rapidly growing field.

Required:**Biochemistry/Molecular Biology:**

Choose one course from below:

BB 331. *Introduction to Molecular Biology (3)

BI 314. Cell and Molecular Biology (4)

Computer Science:

Choose either:

BOT 476. Introduction to Computing in the Life Sciences (3)

or

CS 161, CS 162. Introduction to Computer Science I, II (4,4)

and MTH 231. Elements of Discrete Mathematics (4)

Genomics and Bioinformatics

BB 499. Special Topics: Nucleic Acid Bioinformatics (3)

BOT 475. Comparative Genomics (4)

Statistics

ST 352. Introduction to Statistical Methods (4)

Organismal Biology Elective:

Choose at least 3 credits of upper division coursework related to the group of organisms that your research concerns. Examples could include:

BOT 321. Plant Systematics (4)

MB 302. General Microbiology (3)

PGB/CSS/HORT 430. Plant Genetics (3)

PGB/CSS/HORT 450. Plant Breeding (4)

Z 361. Invertebrate Biology (3)

Specialization and Breadth Courses:

Choose courses from the lists below, or other upper-division courses approved by research mentor, for a total of 29 option credits.

General electives:

BB 481. Biophysics (3)

BB 494. Biochemistry Laboratory (3)

BB 499. Special Topics: Biocomputing: Molecular Simulation (3)

MB 310. Bacterial Molecular Genetics (3)

MB 311. ^Molecular Microbiology Laboratory: A Writing Intensive Course (3)

MB 668. Microbial Bioinformatics and Genome Evolution (4)

If your interest is in biological data mining, suggested choices include:

CS 261. Data Structures (4)

CS 325. Analysis of Algorithms (4)

CS 420. Graph Theory with Applications to Computer Science (3)

If your interest is in modeling, suggested choices include:

MTH 254. Vector Calculus I (4)

MTH 256. Applied Differential Equations (4)

MTH 341. Linear Algebra I (3)

ST 411, ST 412. Methods of Data Analysis (4,4)

ST 421, ST 422. Introduction to Mathematical Statistics (4,4)

ST 441. Probability, Computing, and Simulation in Statistics (4)

Total = 29

PEST BIOLOGY AND MANAGEMENT OPTION

Pest biology and management involves the study of living organisms, such as insects, fungal and bacterial pathogens, vertebrates, and weeds, that limit agricultural productivity. Students with an interest in entomology may study identification, biology and control of insects, including integrated plant protection, biocontrol, and use of beneficial insects. Research approaches range from basic laboratory studies to field experiments. Students will develop research skills in pest biology, development of management strategies, and assessment of pest impact on plants or livestock, preparing them for a variety of regulatory and research positions and graduate programs.

Required Courses

BOT 331. Plant Physiology (4)

BOT 350. Introductory Plant Pathology (4)

CSS 311. Introduction to Insect Pest Management (5)*[Only offered at Eastern Oregon University]*

CROP 440. Weed Management (4)

or CSS 440. Weed Management (4)*[Only offered at Eastern Oregon University]*

Specialization and Breadth Courses

12 credits approved by option faculty and research mentor.

Total=29

PLANT GROWTH AND DEVELOPMENT OPTION

Plant growth and development involves study of the control and coordination of processes in cells, organs, and/or whole plants, including, for example, changes in gene expression in response to environmental conditions such as climate change. Students will develop research skills and knowledge about the regulation of plant growth and development, metabolism, structure and function of macromolecules (i.e. enzymes, storage proteins, and nucleic acids), and whole plant physiology, preparing them for agricultural and biosciences positions or graduate programs.

Required Courses

BOT 313. Plant Structure (4)

BOT 331. Plant Physiology (4)

Select two of the following:

BI 314. Cell and Molecular Biology (4)

BOT 332. Laboratory Techniques in Plant Biology (3)

BOT 421. Advanced Plant Systematics (4)

CSS 305. Principles of Soil Science (4)

and CSS 306. Problem Solving: Soil Science (1) [CSS taught at EOU LaGrande campus only.]

or SOIL 205. *Soil Science (4)

HORT 316. Plant Nutrition (4)

Specialization and Breadth Courses

12 to 14 credits approved by option faculty and research mentor.

Total=29

SUSTAINABLE ECOSYSTEMS OPTION

Sustainable ecosystems research addresses the sustainability of agricultural, forest, rangeland, wildlife, fishery, and native ecosystems. The program aims to define and develop natural and managed ecosystems in which environmental soundness results from the conscious interaction of humans with wildlife and other components of the systems. Innovative links among scientific and humanistic disciplines will bring about increased understanding of the present and future health of natural and managed ecosystems and associated human communities. Sustainable ecosystems research is multidisciplinary: insights from sociology, political science, anthropology, or philosophy may be combined with basic concepts from biology, chemistry, and physics to support research rooted in agricultural, forestry, rangeland management, or wildlife management. Students will acquire perspective by choosing among a broad variety of courses, and will participate in field, laboratory, or systems analysis projects, preparing them for graduate/professional schools or research and regulatory positions.

Required Courses**Ecology and Ecological Methods:**

BI 370. Ecology (3)

or BOT 341. Plant Ecology (4)

or FES 341. Forest Ecology (3)

or RNG 421. Wildland Restoration and Ecology (4)

BI 371. ^Ecological Methods (3)

or RNG 441 Rangeland Analysis (4)

Ethics/Values:**Select one of the following:**

PHL 440. Environmental Ethics (4)

PHL 443. *World Views and Environmental Values (3)

Social/Political:**Select one of the following:**

ANTH 481. *Natural Resources and Community Values (3)

ANTH 482. *Anthropology of International Development (4)

ANS 315. *Contentious Social Issues in Animal Agriculture (3)

AREC 352. *Environmental Economics and Policy (3)

FOR 460. ^Forest Policy (4)

FW 325. *Global Crises in Resource Ecology (3)

FW 340. *Multicultural Perspectives in Natural Resources (3)

HST 481. *Environmental History of the U.S. (4)

PS 475. Environmental Politics and Policy (4)

SOC 480. *Environmental Sociology (4)

SOC 481. *Society and Natural Resources (4)

Integrative/Management/**Conservation:****Select one of the following:**

ANS/SOC 485. *Consensus and Natural Resource Issues (3)

AREC 351. *Natural Resource Economics and Policy (3)

BA 463. Family Business Management (4)

BOT 488. Environmental Physiology of Plants (3)

CSS/SOIL 395. *World Soil Resources (3)

CSS/CROP 480. Case Studies in Cropping Systems Management (4)

FE 430. Watershed Processes (4)

FES 365. *Issues in Natural Resources Conservation (3)

FES 451. History and Cultural Aspects of Recreation (4)

FOR 457. Techniques for Forest Resource Analysis (4)

FOR 459. Forest Resource Planning and Decision Making (4)

FW 321. Fisheries and Wildlife Resource Ecology (3)

GEO 300. *Sustainability for the Common Good (3)

RNG 468. International Rangeland Resource Management (3)

RNG 477. *Agroforestry (3)

Z 348. *Human Ecology (3)

Specialization Courses

Nine to 14 credits approved by option faculty and research mentor.

Total=29

TOXICOLOGY OPTION

Toxicology concerns potentially hazardous chemicals in food and the environment, and their effects on biological life. Toxic chemicals include pesticides such

as insecticides and herbicides, industrial waste products, compounds that exist naturally in plants, those that contaminate foods as a result of fungal growth, and even some that are produced in the preparation and cooking of foods. Potential health effects from toxin exposures can range from immediate impairment of breathing or nerve function to chronic diseases, cancer, birth defects, and immune disorders. Toxicology research focuses on understanding mechanisms of toxicity, human and environmental risks from exposure, and means for reducing risks. Students will acquire laboratory skills in applied biochemistry and molecular, cellular, and organismal biology, preparing them for research or regulatory positions or biosciences/biomedical graduate/professional programs.

Substituted Courses

CH 334, CH 335, CH 336. Organic Chemistry (3,3,3) for CH 331, 332 (4,4).

Required Courses

TOX 411. Fundamentals of Toxicology (3)

TOX 413. Environmental Toxicology and Risk Management (3)

Specialization and Breadth Courses

23 credits approved by option faculty and research mentor.

Total=29

WATER RESOURCES OPTION

Water resources research involves the use of science and policy tools to identify contaminants and make assessments of water quality. Students will acquire laboratory skills to detect water contaminants and track their movements and transformations, while learning related policy and management concerns. Research areas could include microbial contaminants, the impact of urbanization on water quality, and marine and estuarine water quality and its impact on fisheries and shellfish industries. Option course work covers water sciences and hydrology, environmental policy and management. Students completing this option will be prepared for graduate school or for positions in environmental consulting, research, and natural resource management.

Water Sciences:**Choose four courses from below:**

CSS 305. Principles of Soil Science (4)

[Taught at EOU LaGrande campus only.]

or SOIL 205. *Soil Science (4)

FW 456. Limnology (5)

GEO 487. Hydrogeology (4)

MB 302. General Microbiology (3)

OC 332. Coastal Oceanography (3)

OC 433. Coastal and Estuarine Oceanography (3)

TOX 430. Chemical Behavior in the Environment (3)

Watersheds and Hydrology:**Choose one course from below:**

CE 412. Hydrology (4)

FE 430. Watershed Processes (4)

Water Resources Environmental

Analysis:

Choose one course from below:

BEE 448. Non-point Source Pollution Assessment and Control (3)
 BI 371. ^Ecological Methods (3)
 BOT 547. Nutrient Cycling (3)
 CE 413. GIS in Water Resources (3)
 ENVE 456. Sustainable Water Resources Development (3)
 GEO 424. International Water Resources Management (3)
 TOX 455. Ecotoxicology: Aquatic Ecosystems (3)

Water Resources Environmental Policy and Management:

Choose one course from below:

AREC 432. Environmental Law (4)
 FOR 462. Natural Resource Policy and Law (3)
 FW 326. Integrated Watershed Management (3)
 GEO 425. Water Resources Management in the US (3)
 MRM 515. Coastal Resources Management (4)
 PS 475. Environmental Politics and Policy (4)
 RNG 455. Riparian Ecology and Management (3)

Specialization and Breadth Courses:

1 to 7 additional credits of upper division courses approved by research mentor, for a total of 29 credits.

Recommended areas: Climatology, geology, resource economics, watersheds, watersheds management, microbial ecology, engineering, mathematics, hydrology, hydrogeology, irrigation, toxicology, ecology, environmental analysis, environmental chemistry, geochemistry, environmental management, environmental policy, economics, marine biology, aquatic and marine botany and zoology, oceanography, statistics, geography, environmental ethics, research ethics.

INTERNATIONAL STUDIES (BA, HBA)

See International Programs for information on the International Studies Degree.

SUSTAINABILITY (BS, HBS)

The Sustainability Double Degree includes core, practicum and individualized study components. Courses from a student's major course of study will not count towards double-degree requirements. Completion of the double degree will require 36 credits beyond the 180-credit minimum for graduation.

OSU Main Campus Contact: Kate Lajtha, 3059 Ag Life Sciences Building, Oregon State University, Corvallis, OR 97331; 541-737-5674; kate.lajtha@oregonstate.edu or Fox Peterson, Lead Advisor, fox.peterson@oregonstate.edu.

BIOENERGY MINOR

Bioenergy is renewable energy derived from biomass, including by-products, residues, waste products, and crops and microbes grown specifically for fuel. Development of bioenergy could contribute to long-term environmental and economic sustainability, and help mitigate the climate impact of using fossil fuels. However, developing and establishing bioenergy will require integrating expertise from social, economic, and scientific/technical fields.

The Bioenergy minor is research-based and interdisciplinary, and provides an introduction to bioenergy concepts and issues, along with research experience and professional development. The Bioenergy minor is open to students in majors in science, agricultural sciences, forestry, engineering, earth/ocean/atmospheric sciences, education, social sciences and business, or with permission of the bioenergy adviser. Required classes for the minor present central bioenergy concepts such as life cycle analysis, feedstocks, feedstock conversions, and sustainability; introduce interdisciplinary research and research methods; expose students to regional bioenergy industries and issues; and provide professional skills and training. Each student will do a mentored bioenergy research project with a participating faculty member, industry or extension partner; write a thesis; and present a public seminar. This transcript-visible minor complements existing majors to help students attain their career or graduate/professional school goals in the growing field of bioenergy.

For further information, contact:

Website: <http://agsci.oregonstate.edu/brr/>

A basic knowledge of chemistry is needed to understand bioenergy core concepts, such as the carbon cycle and pathways of energy conversion. Bioenergy minor students must take CH 122 or equivalent. CH 122 fulfills Bacc Core requirements and is a prerequisite for WSE 473, which is required for the Bioenergy minor.

Required

- BRR 350. Introduction to Regional Bioenergy (2)
 BRR 450. Interdisciplinary Research: Bioenergy Focus (2)
 BRR 401. Research and Scholarship (10)
 BRR 403. Thesis (3)
 BRR 406. Projects: Data Presentation (1)
 BRR 407. Seminar (1)
 WSE 473. Bioenergy and Environmental Impact (3)

COURSES

BRR 100. GREAT EXPERIMENTS IN BIORESOURCE SCIENCES (1). For students interested in BRR and undergraduate research, to introduce the research process and help them start defining research interests and project areas. Faculty describe research projects and experimental approaches, and pose interesting political and ethical questions related to scientific research. Students work with junior and senior student mentors already involved in research projects. Offered fall term. This course is repeatable for a maximum of 2 credits.

BRR 200. DEVELOPING A RESEARCH PROPOSAL: THEORY AND PRACTICE (1). An introduction to conceptual issues for organizing, planning, designing and conducting research in biological and agricultural sciences and natural resources disciplines. Students will master methods and philosophy of research, and then apply them by working in teams to analyze a timely and relevant problem and formulate experimental approaches to address it. This course is repeatable for a maximum of 2 credits.

BRR 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BRR 350. INTRODUCTION TO REGIONAL BIOENERGY (2). Field trips to visit regional industry and research facilities will introduce bioenergy core concepts and technologies. Guest lecturers will provide technical background and discuss economic, environmental and socio-cultural sustainability of bioenergy. Course projects will analyze and present each facility in the context of regional bioenergy issues. Lec/lab.

BRR 401. RESEARCH AND SCHOLARSHIP (1-16). Undergraduate mentored research. Students select a faculty research mentor (from 7 OSU colleges) and complete 14 credits of research. Students follow established guidelines to prepare project proposals, progress reports, and a thesis; learn research methods applicable to their chosen field; gain professional skills and contacts.

Students are evaluated on their ability to develop and complete a research project proposal, learn and develop research methodologies, conduct research and trouble-shooting procedures, and demonstrate responsible and ethical participation in the research project. Offered all terms. This course is repeatable for a maximum of 99 credits. **PREREQS:** Departmental approval required.

BRR 403. ^THESIS (4). BRR students independently interpret and present their research in writing. Students write the thesis in a style appropriate for submission to a peer-reviewed journal in their chosen scientific discipline. Students receive a letter grade based on their final thesis. Timeliness of reports is factored in student assessments. The student's faculty mentor and the BRR Director provide a consensus grade when the thesis is completed. Offered all terms. (Writing Intensive Course) This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

BRR 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

BRR 406. PROJECTS: DATA PRESENTATIONS (1). For any student doing research, to learn to develop and evaluate poster and slide presentations containing scientific data. Students are exposed to a variety of scientific disciplines as they prepare and critique their own and other students' posters and oral presentations. Students improve written and oral communication skills. Letter grade is based on participation, improvement, and the quality of a final poster project and oral presentation. Offered winter term. CROSSLISTED as HORT 406.

BRR 407. SEMINAR (1). For BRR students, to encourage excellence in public speaking. Exposes students to a variety of current seminar topics and provides them with the opportunity to evaluate components of good public seminars. Students receive a grade only after completing a public seminar on their own research (final research seminar). Offered spring term.

BRR 409. PRACTICUM: TEACHING AND PEER MENTORING (1-2). Upper-division BRR students are grouped with lower-division students in BRR 100 to facilitate discussion and encourage dialogue about current research topics. Juniors and seniors continue to learn new ways to teach and communicate science issues in written and verbal formats. Offered fall term. This course is repeatable for a maximum of 16 credits.

BRR 410. INTERNSHIP (1-12). Supervised internship allowing students to gain off-campus work experience for credit. Under direction and approval of the program director, students will submit a statement of intent, identify employer contact, and provide a written report upon completion. This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing.

BRR 450. INTERDISCIPLINARY RESEARCH: BIOENERGY FOCUS (2). Bioenergy research presentations and papers introduce scientific inquiry, the research process, research seminars, papers and proposals. Analysis of different disciplines' approaches to research tools and data sources (e.g., quantitative versus qualitative approaches). Student teams write research proposals. Second core class in the Bioenergy minor.

BRR 499. SPECIAL TOPICS (2). This course is repeatable for a maximum of 4 credits.

are required. Areas may be applied
economics, agricultural education, animal
science, botany and plant pathology,
crop science, entomology, fisheries
science, food science and technology,
horticulture, rangeland ecology and
management, soil science, toxicology,
wildlife science, or other areas approved
by the College of Agricultural Sciences.*

Graduate Minors

Agricultural Education
International Agricultural Development

The Department of Agricultural Education and General Agriculture combines two programs: **Agricultural Sciences** and **Agricultural Education**.

The **Agricultural Sciences Program** is an undergraduate studies program that provides maximum flexibility in designing and structuring a course of study to meet the students' individual needs. Agricultural Sciences should be seriously considered by students desiring programs of study not currently available in any other agricultural subject matter department (such as those involving a minor in communications, recreation, or environmental studies in agriculture); students wishing to pursue two or more areas of specialization (such as students who are returning to farms or ranches

and who need substantial background, for example, in animal science, crops, and agricultural business management); students preparing for leadership positions in agriculture that require excellent communication and leadership skills as well as breadth of agricultural background (such as agriculture teachers, lobbyists, commodity liaison persons or extension staff); or students who have not selected a departmental major in the College of Agricultural Sciences but who know they are interested in an agricultural career.

The goal of the Agricultural Sciences Program is to help students identify the agricultural career in which they are most interested and build a course of study that will qualify each student for his or her chosen profession. Advising is of paramount importance in this process and major emphasis is placed on career advising.

The **Agricultural Education Program** offers course work serving teachers and leaders in agriculture. The MS, MAg, and MAIS degrees may be pursued with an emphasis in leadership, communication, pedagogy, extension and/or technical agriculture. Candidates work with an advisor to develop programs that meet their specific needs as indicated by their occupational objectives. The Agricultural Education MS degree aligns with an initial teaching license in Oregon.

Three undergraduate minors are available in the Department of Agricultural Education and General Agriculture.

- a. The **Agricultural Sciences minor** is available for undergraduate students who have majored in an area that requires the addition of breadth in agriculture to their major program. The minor provides the appropriate technical agriculture background for students interested in agricultural management, communication, environmental studies, etc.
- b. The **International Agricultural Development minor** is available for both undergraduate and graduate students who are interested in agricultural development abroad. The minor requires foreign language proficiency, as well as appropriate agricultural and sociological course work.
- c. The **Leadership minor** is designed for all undergraduates interested in developing premier leadership, enhancing professional competencies, and fostering the skills necessary to meet the local, national, and international needs of our society. The Leadership minor is centered on leadership theory (education), trait/skill development

(training), and application (development), and it is designed to allow students to both take and apply coursework in a relevant and relational manner.

CAREER OPPORTUNITIES IN AGRICULTURAL SCIENCES

Career opportunities for general agriculture majors are unlimited because of the nature of the program structure. Students can return to home farms or ranches, move into agricultural middle management, become extension staff, move into political lobby positions, work in marketing or international agriculture, become high school teachers of agriculture, teach agriculture in community colleges, or do whatever they have planned to accomplish from their program of study. Salaries vary depending on the position a student may strive to achieve.

UNDERGRADUATE STUDIES CURRICULUM

High school and college transfer students who are admitted to Oregon State University as an undergraduate are eligible to participate in the Agricultural Sciences Program. Agricultural Sciences majors, in consultation with their departmental academic advisor, may plan elective course work to emphasize personal interests, abilities and career objectives. A leadership and communication area of emphasis is available and is especially designed for those students who will need breadth in their technical agriculture background and excellence in communication and leadership skills. The intent of this area of emphasis within the Agricultural Sciences Program is to prepare agriculture's future leaders in extension, government, and business. A teacher preparation area of emphasis is available and allows for Initial Teacher Licensure within the baccalaureate degree.

AGRICULTURAL SCIENCES (BS, CRED, HBS)

BS Baccalaureate Core (48)

Agricultural Core

AG 111. Computer Applications in Agriculture (3)

AG 421. ^Leadership Development (3)

AREC 211. Management in Agriculture (4)

SOIL 205. *Soil Science (4)

UNDERGRADUATE MINORS**AGRICULTURAL SCIENCES MINOR****Lower-Division Core**

AG 111. Computer Applications in Agriculture (3)
One agricultural resource management (AREC, CSS, FW, HORT, RNG) course (3–4)
One production agriculture (AG, ANS, AREC, CSS, CROP, FST, HORT, SOIL) course (3–4)

Upper-Division Core

Two courses from a department in the College of Agricultural Sciences (6–8)
Two courses from a second department in the College of Agricultural Sciences (6–8)

Electives (0–9)

From departments in the College of Agricultural Sciences.

Total=27

INTERNATIONAL AGRICULTURAL DEVELOPMENT MINOR**Requirements**

AG 421. ^Leadership Development (3)
Language competency
Technical electives in agriculture (9)
Social, cultural and economic electives (5)
Minimum of 27 credits of which 12 credits must be upper division.

LEADERSHIP MINOR

The Leadership minor is designed for all undergraduates interested in developing premier leadership, enhancing professional competencies, and fostering the skills necessary to meet the local, national, and international needs of our society. The Leadership minor is centered on leadership theory (education), trait/skill development (training), and application (development), and it is designed to allow students to both take and apply course work in a relevant and relational manner.

Specifically, the course work focuses on major theories of leadership including contingency, path-goal, leader-member exchange theories as well as transformational, authentic, team, and servant leadership. Within each theory and type of leadership, students will be challenged to consider leadership ethics, leadership culture, gender in leadership, and integration of leadership into personal, civic, and social change. In addition, the elective courses allow students to pursue the development of trait and skill competencies necessary for employment in their chosen field. Students will then have the opportunity to directly apply their learning through a leadership internship, service learning project, or research opportunity.

Leadership Theory (8 credits)

AG 242. Personal Leadership Development (3)
AG 342. Team and Organizational Leadership (3)
AG 407. Seminar: Leadership Capstone (2)

Trait/Skill Development (10 credits)
Select 10 credits: no more than 2 courses from any single department:

AG 421/AG 521. ^Leadership Development (3)
AHE 499. Special Topics: Emerging Leaders (2)
ALS 295. Last Year Experience (2)
AS 311. Leadership Fundamentals, Team Building and Problem Solving (3)

PSY 437. Motivation (4)
YDE 484. Leadership and Management (2)

Applied Leadership Development (10 credits)

Select 10 credits total, may include a mix of the following courses:

AG 410. Internship (1–10)
AG 409. Practicum: Service Learning (1–10)
AG 401. Research: Undergraduate Research/Leadership (1–10)

Total=28

GRADUATE MAJORS**AGRICULTURAL EDUCATION (MAg, MS, MAIS)**

Graduate Areas of Concentration
Teacher preparation, leadership and communication in agriculture

The Department of Agricultural Education and General Agriculture offers course work that serves teachers and leaders in agriculture. The Master of Science, Master of Agriculture, and Master of Arts in Interdisciplinary Studies degrees may be pursued with an emphasis in leadership, communication, pedagogy, extension, and/or technical agriculture. Candidates work with an advisor to develop programs that meet their specific needs as indicated by their occupational objectives. A person who completes an Agricultural Education master's degree is not solely locked into teaching. Potential occupations also include lobbyist, journalist, and Extension work.

MASTER OF AGRICULTURE (MAg)

Graduate Areas of Concentration

Three agriculturally related areas are required. Areas may be applied economics, agricultural education, animal science, botany and plant pathology, crop science, entomology, fisheries science, food science and technology, horticulture, rangeland ecology and management, soil science, toxicology, wildlife science, or other areas approved by the College of Agricultural Sciences.

The Department of Agricultural Education and General Agriculture offers course work that serves teachers and leaders in agriculture. The Master of Science (MS), Master of Agriculture (MAg), and Master of Arts in Interdisciplinary Studies (MAIS) degrees may be pursued with an emphasis in leadership, communication, pedagogy, extension, and/or technical agriculture. Candidates work with an advisor to develop programs that meet their specific needs as indicated by their occupational objectives.

A minimum of 45 credits is required for the degree with a minimum of 24 credits outside of the major. The program of study will include a major field and two minor fields. The major field must be in the College of Agricultural Sciences and contain a minimum of 12 credits (excluding research or thesis credit.) Students have the option of a research paper (3–6 credits) or thesis (6 credits). Each minor concentration must contain a minimum of 9 credits. No more than 9 blanket numbered credits are to be contained in the program, excluding research paper or thesis.

The program is administered by the academic department of the major field and requires the department head's signature. The student's committee will consist of a representative from the

major and each minor field. A Graduate Council representative will serve on thesis programs. The committee will meet prior to the end of the student's second quarter in the program to approve the student's program of study proposal. The proposal will include the student's academic/professional background, intended occupational/educational destination, and rationale for the course combinations. A final oral examination is required and may include questions from both the course work and the research paper or thesis.

GRADUATE MINORS

AGRICULTURAL EDUCATION GRADUATE MINOR

Develop a teaching, pedagogical, leadership development in agriculture minor by working with a departmental advisor.

INTERNATIONAL AGRICULTURAL DEVELOPMENT GRADUATE MINOR

Requirements

AG 521. Leadership Development (3)

Language competency

Technical electives in agriculture (5 for master's, 9 for doctorate)

Social, cultural and economic electives (5)

Minimum of 21 credits for master's, 25 for doctorate.

Note: The graduate minor in International Agricultural Development is not available to students who took the undergraduate minor in International Agricultural Development at Oregon State University.

AGRICULTURAL EDUCATION COURSES

AED 313. THEORY AND PRACTICUM III: FIELD (4). Field based experience for students preparing to be agricultural teachers. Focus on teaching models. **PREREQS:** Advising and placement by AED staff.

AED 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

AED 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

AED 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

AED 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

AED 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

AED 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

AED 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

AED 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

AED 510. PROFESSIONAL INTERNSHIP: AGRICULTURE EDUCATION (1-40). A field experience in which the intern will integrate academic study with classroom teaching experience to learn specific competencies relating to functioning well in the context of the classroom and the school, and demonstrate this competency through the assessment of work by supervisors

and by evidence collected and presented in work samples. This course is repeatable for a maximum of 40 credits.

AED 518. EXTENSION COURSE IN TEACHER EDUCATION/PEDAGOGY (1-3). Enables present and prospective teachers of agriculture to continue their professional development on pedagogical topics of current importance. (This course is limited to 9 credits per term.) This course is repeatable for a maximum of 50 credits.

AED 533. RURAL SURVEY METHODS (3). Technique; analyzing, interpreting, and using results of survey data; identifying and utilizing community resources; develop and organize agriculture programs to meet community needs.

AED 552. PROGRAM ORGANIZATION AND MANAGEMENT (3). Explores the foundations of vocational education, essential learning skills, advisory committees, and development of a vocational education philosophy. Students will study the elements of educational reform as they apply to specific service areas. Resource analysis, student organizations, and school-to-work transitions will also be studied.

AED 553. APPLIED INSTRUCTIONAL STRATEGIES (3). Helps students in the identification and development of goals, objectives and units. The course includes the development and application of subject area instructional strategies/models, including applied math, writing, communication skills, measurement and evaluation of achievement, and delivery of instruction to at-risk students. Safety is a primary focus.

AED 554. MICRO-TEACHING (3). Planning, presenting and evaluating lessons in a micro-teaching lab. It includes application of content pedagogy strategies, subject matter principles and media technology. Lessons presented on safety.

AED 556. LINK RESEARCH, TEACHING, AND PRACTICE (3). Links research to teaching. Students will work with cooperating teachers to identify and apply research to teaching.

AED 557. ISSUES AND TRENDS IN CURRICULUM AND INSTRUCTION (3). Emphasizes trends related to subject matter curriculum issues unique to agricultural education at the secondary level.

AED 558. IMPROVING VOCATIONAL EDUCATION PROGRAMS (3). Stresses evaluation of programs and students, standardization and accreditation, legislation and state criteria for improving programs. Students will review applied research, and apply criteria for improving service area program and occupational guidance.

AED 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

AGRICULTURE-GENERAL COURSES

AG 111. COMPUTER APPLICATIONS IN AGRICULTURE (3). Computer use in agriculture and agribusiness; practical experience with computer programs applicable to all agricultural disciplines.

AG 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

AG 211. SURVEY AND CONSTRUCTION (3). Land measurement and leveling as applied to agricultural uses. Concrete and agricultural building construction including the use of construction power tools, selection of materials and cost estimating.

AG 221. METALS AND WELDING (3). Practices of metal working including the use of metal working machines, metal identification, heat treating and metal properties. Fabrication of metals including arc and oxy-acetylene welding and cutting. Lec/lab.

AG 242. PERSONAL LEADERSHIP DEVELOPMENT (3). Examines content related to leadership traits, styles, and effective leadership tactics. An introductory course designed to create awareness and develop the employability skills necessary for participants to be productive contributors in their school, home, community and profession.

AG 301. *ECOSYSTEM SCIENCE OF PACIFIC NW INDIANS (3). Designed and presented in partnership with Pacific Northwest Indians and Alaska Natives, focusing on natural ecosystems, differing views, power relationships, policymaking, and gender roles. (Bacc Core Course)

AG 312. ENGINE THEORY AND OPERATION (3). Engine construction, operational theories and principles, lubrication, fuels and oils, emissions and preventive maintenance are taught through the process of small engine lab activities. Engine efficiency theories and measurement are presented.

AG 318. ACCESSING INFORMATION FOR AGRICULTURAL RESEARCH (1). Designed for students at a distance to develop library skills and improve access to information used to conduct technical agricultural research.

AG 342. TEAM AND ORGANIZATIONAL LEADERSHIP (3). Examines the planning, implementation and evaluation of organizations, and challenges students in the development of effective communication, group dynamics, conflict management, teambuilding and problem solving. Students will be challenged to examine their leadership role in their school, community and profession. **PREREQS:** AG 242

AG 391. FARM IMPLEMENTS (3). Power farming implements including operation, maintenance, adjustments, calibration and use are covered. Field trips may be required.

AG 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

AG 402. INDEPENDENT STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

AG 403. THESIS (1-16). PREREQS: Departmental approval required.

AG 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

AG 406. SPECIAL PROBLEMS (1-16). This course is repeatable for a maximum of 16 credits.

AG 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

AG 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

AG 410. INTERNSHIP (1-16). A work internship to give students practical on-the-job preparation in any of the main facets of agriculture or related industries. This course is repeatable for a maximum of 16 credits. **PREREQS:** College and instructor approval.

AG 412. AG SAFETY AND HEALTH (3). An examination of various hazards associated with agriculture. Control strategies will be explored and prevention methods identified. Hazards examined include machinery, livestock, controlled spaces, pesticides, and other items common to the agricultural workplace. Lec/lab.

AG 421. ^LEADERSHIP DEVELOPMENT (3). Principles of leadership development, leadership analysis and style, record keeping procedures, youth organizations, and activities in leadership for youth. (Writing Intensive Course) **PREREQS:** Senior standing.

AG 425. DEVELOPMENTS IN AGRICULTURAL MECHANICS (3). Emphasis on the development of instructional units for agricultural instruction programs. Wide applications to agricultural mechanization and biotechnology. This course is repeatable for a maximum of 9 credits. **PREREQS:** Senior standing.

AG 442. LEADERSHIP SKILLS FOR CAREER SUCCESS (3). Focuses on the development and refinement of the following leadership skills: utilizing diversity, team building, project management, program planning models, working with difficult people, conflict management, leading change, establishing an effective network, organizational strategies, and emotional intelligence. **PREREQS:** Junior, senior or graduate standing.

AG 443. LEADERSHIP THROUGH CONVERSATIONS (3). Engages students in the exploration of conversations as a component of leadership. Students will engage in topics related to developing effective conversations, listening, conversation styles, group dynamics, digital communication, meetings as conversations and interviewing skills.

AG 444. LEADERSHIP MINOR CAPSTONE (2). Capstone course for students completing the Leadership minor. Students will reflect on what they have learned through the Leadership minor and how to apply that learning in the context of their future careers. **PREREQS:** AG 242 and AG 342

AG 492. TECHNOLOGY TRANSFER IN AGRICULTURE (3). Examination of processes by which formal and informal agricultural instruction programs influence the introduction and acceptance of technology in agriculture. An emphasis in the international arena will be maintained. The focus throughout the course will be on the role of a professional change agent working with technological change. **PREREQS:** Senior standing.

AG 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

AG 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

AG 518. EXTENSION COURSE IN TEACHER EDUCATION: TECHNICAL (1-3). Enables present and prospective teachers of agriculture to continue their professional development on technical topics of current importance. This course is repeatable for a maximum of 9 credits.

AG 521. LEADERSHIP DEVELOPMENT (3). Principles of leadership development, leadership analysis and style, record keeping procedures, youth organizations, and activities in leadership for youth. **PREREQS:** Graduate standing.

AG 525. DEVELOPMENTS IN AGRICULTURAL MECHANICS (3). Emphasis on the development of instructional units for agricultural instruction programs. Wide applications to agricultural mechanization and biotechnology. This course is repeatable for a maximum of 45 credits. **PREREQS:** Graduate standing.

AG 541. COMMUNITY PROGRAMS IN AGRICULTURE (3). Evaluating agricultural education program effectiveness and technical appropriateness. Development of long-range plans for agricultural programs to meet the technical needs of a community. **PREREQS:** Teaching or Extension experience will be verified by the instructor for approval.

AG 542. LEADERSHIP SKILLS FOR CAREER SUCCESS (3). Focuses on the development and refinement of the following leadership skills: utilizing diversity, team building, project management, program planning models, working with difficult people, conflict management, leading change, establishing an effective network, organizational strategies, and emotional intelligence. **PREREQS:** Junior, senior or graduate standing.

AG 543. LEADERSHIP THROUGH CONVERSATIONS (3). Engages students in the exploration of conversations as a component of leadership. Students will engage in topics related to developing effective conversations, listening, conversation styles, group dynamics, digital communication, meetings as conversations and interviewing skills.

AG 592. TECHNOLOGY TRANSFER IN AGRICULTURE (3). Examination of processes by which formal and informal agricultural instruction programs influence the introduction and acceptance of technology in agriculture. An emphasis in the international arena will be maintained. The focus throughout the course will be on the role of a professional change agent working with technological change. **PREREQS:** Graduate standing.

AG 808. WORKSHOP (1-4). This course is repeatable for a maximum of 4 credits.

ANIMAL AND RANGELAND SCIENCES

John Killefer, Department Head
112 Withycombe Hall
Oregon State University
Corvallis, OR 97331-6702

Graduate Minors

Animal Sciences

Rangeland Ecology and Management

Programs in animal sciences provide up-to-date information on methods of rearing livestock and poultry, that produce meat, milk, eggs, wool, and other animal products. In addition, the department addresses the care of animals that enhance human well-being through companionship, recreation, and human aid such as horses and companion animals. Essential to this information is knowledge generated from the fields of animal behavior/bioethics, genetics, nutrition, and physiology. The various teaching and research programs explore modern areas of animal biotechnology and data processing and how they apply to present day livestock and poultry production. Study in these areas provides the core around which various curricula leading to the BS degree in Animal Sciences can be developed. To allow students flexibility in course arrangement, two specialized program options are offered.

Increasing demands for livestock and poultry products by a rapidly expanding human population mean potential employment for well-trained individuals in such areas as farm, ranch, feedlot operation; meat, poultry, egg and milk processing, meat grading with the USDA; Federal Cooperative Extension Service, county and 4-H work; sales or technical employment with commercial feed, seed, and chemical companies and pharmaceutical houses; agricultural loan officer; government agency positions at local, state and federal levels; the Peace Corps; animal welfare auditing; as well as in journalism, mass media, and public policy. The expanding support structure for companion animals has created a growing job market for graduates in areas

such as animal behavior consultant; veterinary technician (animal nurse); and business management. In addition, students become prepared to go on to advanced studies in animal sciences, veterinary medicine, and education.

Graduate students may pursue research projects through the Agricultural Experiment Station as part of their programs for MS or PhD degrees. Graduate areas of concentration are offered in animal nutrition, dairy production, embryo physiology, endocrinology, ethology, growth and development, livestock management, muscle biology and meat science, nutritional biochemistry, reproductive physiology.

COOPERATIVE PROGRAMS

Students transferring after one or two years at a community college should also be able to complete the requirements for a BS after three or two years, respectively.

RANGELAND RESOURCE MANAGEMENT

Rangeland resource management is one of the family of natural resources professions important to the social, economic, and political development of Oregon, the nation, and the world. It is based upon ecological principles and is concerned with the restoration, improvement, conservation, and use of rangelands. Since range management is practiced on lands producing domestic and wild animals, timber, water, and recreation, concepts of integrated land use are included in the curriculum. A balance among soil, domestic animal, wildlife, ecology, and other biological sciences is realized in the educational program.

The curriculum below includes university and departmental requirements for the BS degree and provides emphasis either in science, management, ecology, or allied disciplines. The BS degree is also offered on the campus of Eastern Oregon University at La Grande through an extension of the OSU Department of Animal and Rangeland Sciences. Facilities for study include classroom and field-oriented educational environments both on-campus and at locations throughout Oregon. Field trips are taken in conjunction with specific courses.

Graduate work leading to MAg, MAIS, MS, or PhD degrees may involve research on domestic or wild animals, rangeland nutrition, community ecology, physiology of rangeland plants, rangeland improvement, rangeland watershed and riparian zone management, rangeland restoration, utilization and management, agroforestry and landscape ecology.

Summer employment with private industry, government agencies, and on range research projects makes possible learning experiences while earning a salary. Employment opportunities

include resource management, research, Extension, ranch management, college and university teaching, business and industrial activities related to rangeland resources, and foreign agricultural and resource development assistance.

The **Department of Animal and Rangeland Sciences** is accredited by the Society for Range Management. It is recognized throughout the country as one of the leading institutions of rangeland management.

UNDERGRADUATE MAJORS WITH OPTIONS

ANIMAL SCIENCES (BS, CRED, HBS)

Baccalaureate Core (51)

Animal Sciences Core

- ANS 100. Orientation to Animal Sciences (2)
- ANS 121. *Introduction to Animal Sciences (4)
- ANS 207. Sophomore Seminar (1)
- ANS 251. Principles of Animal Foods Technology (3)
- ANS 311. Principles of Animal Nutrition (3)
- ANS 313. Applied Animal Nutrition: Feeds and Ration Formulation (4)
- ANS 314. Animal Physiology (4)
- ANS 316. Reproduction in Domestic Animals (4)
- ANS 317. Reproduction in Domestic Animals Laboratory (1)
- ANS 378. Animal Genetics (4)
- ANS 420. ^Ethical Issues in Animal Agriculture (3)

Three animal industries courses from:

- ANS 215. Beef/Dairy Industries (3)
- ANS 216. Sheep/Swine Industries (3)
- ANS 217. Poultry Industries (3)
- ANS 220. Introductory Horse Science (3)
- ANS 280. Companion Animal Management (3)

Two production courses from:

- ANS 430. Equine Systems I: Exercise Science (4)
- or ANS 431. Equine Systems II: Nutrition (3)
- ANS 433. Poultry Meat Production Systems (3)
- or ANS 434. Egg Production Systems (3)
- ANS 436. Sheep Production Systems (3)
- ANS 439. Dairy Production Systems (4)
- ANS 445. Beef Production Systems (4)
- ANS 456. Companion Animal Production Systems (3)

+Select TWO courses from advanced ANS classes or electives (minimum of 6 credits).

- ANS 315. *Contentious Social Issues in Animal Agriculture (3)
- ANS 321. Avian Embryo (4)
- ANS 322. Equestrian Coaching (2)
- ANS 323. Principles of Colt Training (3)
- ANS 324. Advanced Colt Training (3)
- ANS 327. Applied Physiology of Reproduction (5)
- ANS 331. Advanced Livestock Evaluation (4)

- ANS 333. Equine Stable Management (3)
- ANS 351. Advanced Principles of Animal Foods Technology (4)
- ANS 401. Research (1-16)
- ANS 410. Animal Science Internship (3 credits maximum will count toward the two-class requirement)
- ANS 511. Digestive Physiology and Nutrition of Ruminant Animals (4)
- ANS 512. Monogastric and Poultry Nutrition (3)
- ANS 415. Livestock Judging Team (3)
- ANS 435/ANS 535. Applied Animal Behavior (3)
- ANS 438. Exploring World Agriculture (2)
- ANS 441/ANS 541. Topics in Animal Learning (3)
- ANS 452/ANS 552. Livestock Housing and Waste Management (3)
- ANS 453. Practical Broiler Production (1-3)
- ANS 465. Foodborne Disease (3)
- ANS 478/ANS 578. Animal Breeding and Genetics (3)
- ANS 485/ANS 585, SOC 485/SOC 585. *Consensus and Natural Resource Issues (3)
- ANS 490/ANS 590. Toxicants and Poisonous Plants (4)
- Additional ANS Production Systems Course (3)

Select 20 credits from the Agriculture Category (Choose any courses in agricultural field or natural resources area.)

Physical and Biological Sciences

- BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)
- CH 121. General Chemistry (5) **and** CH 122, CH 123. *General Chemistry (5,5) **or** CH 231, CH 232, CH 233. *General Chemistry (4,4,4) **and** CH 261, CH 262, CH 263. *Laboratory for Chemistry 231, 232, 233 (1,1,1)
- CH 130. General Chemistry of Living Systems (4)
- or CH 331. Organic Chemistry (4)
- or BB 331. *Introduction to Molecular Biology (3)
- MB 230. *Introductory Microbiology (4)
- or MB 302. General Microbiology (3)
- MTH 111. *College Algebra (4)

Statistics

- ST 201. Principles of Statistics (4)
- or ST 351. Introduction to Statistical Methods (4)

Business

Choose one from below:

- AREC 211. Management in Agriculture (4)
- AREC 221. Marketing in Agriculture (3)
- BA 215. Fundamentals of Accounting (4)
- BA 230. Business Law I (4)
- BA 260. Introduction to Entrepreneurship (4)

Footnotes:

- * Baccalaureate Core Course
- ^ Writing Intensive Course (WIC)

OPTIONS

ANIMAL MANAGEMENT OPTION

Animal Management option students, in consultation with their academic advisor, will select 27 credits from the following

courses of which 15 credits must be upper division.

ANS 190. Introduction to Horsemanship (1)
 ANS 191. Beginning Horsemanship (1)
 ANS 192. Intermediate Horsemanship (1)
 ANS 193. Dressage (1)
 ANS 194. Jumping (1)
 ANS 221. Equine Conformation and Performance (2)
 ANS 223. Equine Marketing (2)
 ANS 231. Livestock Evaluation (2)
 ANS 295. Reining (1)
 ANS 296. Advanced Jumping/Eventing (1)
 ANS 321. Avian Embryo (4)
 ANS 322. Equestrian Coaching (2)
 ANS 323. Principles of Colt Training (3)
 ANS 324. Advanced Colt Training (3)
 ANS 327. Applied Physiology of Reproduction (5)
 ANS 331. Advanced Livestock Evaluation (4)
 ANS 333. Equine Stable Management (3)
 ANS 351. Advanced Principles of Animal Foods Technology (4)
 ANS 401. Research (1–3)
 ANS 405. Reading and Conference/Calving School (1)
 ANS 405. Reading and Conference/Dairy Evaluation (2)
 ANS 405. Reading and Conference Steer-A-Year (3)
 ANS 410. Animal Science Internship (1–12) (*Maximum of 3 credits will count.*)
 ANS 415. Livestock Judging Team (3)
 ANS 432. Equine Systems III: Reproduction (4)
 ANS 435. Applied Animal Behavior (3)
 ANS 440. Dairy Production Systems (3)
 ANS 452. Livestock Housing and Waste Management (3)
 ANS 453. Practical Broiler Production (1–3)
 ANS 478. Animal Breeding and Genetics (3)
 ANS 490. Toxicants and Poisonous Plants (4)
 ANS 511. Digestive Physiology and Nutrition of Ruminant Animals (4)
 ANS 512. Monogastric and Poultry Nutrition (3)
 ANS 538. Biology of Lactation (3)
 AREC 221. Marketing in Agriculture (3)
 CROP/CSS 310. Forage Production (4) [*CSS taught at EOU LaGrande campus only.*]
 CSS 315. ^Nutrient Management and Cycling (4) [*Taught at EOU LaGrande campus only.*]
 ECON 201. *Introduction to Microeconomics (4)
 FST 212. Dairy Processing (2)
 FST 213. Dairy Processing Laboratory (1)
 FW 475. Wildlife Behavior (4)
 FW 481. Wildlife Ecology (4)
 MB 302. General Microbiology (3)
 PHL Any upper-division philosophy course dealing with ethics (3–4)
 PHL 205. *Ethics (4)
 PSY 201. *General Psychology (3)
 PSY 202. *General Psychology (3)
 PSY 340. Cognition (4)
 RNG 341. Rangeland Ecology and Management (3)
 ST 351. Introduction to Statistical Methods (4)
 Z 350. Animal Behavior (3)

PRE-VETERINARY MEDICINE/SCIENCE OPTION

The Pre-Veterinary Medicine/Science option is designed for students interested in fulfilling requirements for admission to the OSU College of Veterinary Medicine. It allows students who are admitted to the college, upon completion of three years of undergraduate study, to apply credit earned during the first year of professional study toward the BS degree in Animal Sciences.

Students not admitted to veterinary school after completing the three-year program may complete additional requirements to qualify for the BS degree in Animal Sciences. The Pre-Veterinary Medicine/Science option is also offered for students preparing for professional careers in animal science teaching and research. More intense training is provided in the biological and physical sciences, offering an excellent foundation for graduate study. Requirements include the core curriculum and additional credits as required by the College of Veterinary Medicine.

Required Courses

BB 450, BB 451. General Biochemistry (4,4)
 CH 331, CH 332, CH 337. Organic Chemistry (4,4,4)
 BI 314. Cell and Molecular Biology (4) **and** MB 230. Microbiology (4) **or** MB 302. General Microbiology (3)
 MTH 111. *College Algebra (4) **or** MTH 112. *Elementary Functions (4) **and** MTH 241. *Calculus for Management and Social Science (4) **or** MTH 251. *Differential Calculus (4)
 PH 201, PH 202. *General Physics (5,5)

Footnote:

^ Writing Intensive Course (WIC)

¹ Certain classes may be used to satisfy both the baccalaureate core and the rangeland ecology and management core.

UNDERGRADUATE MINORS

ANIMAL SCIENCES MINOR

Required

Select a minimum of 12 credits from any lower-division ANS courses.

And select a minimum of 15 credits from any upper-division ANS courses.

Total=27–28

Note: These courses should be taken in consultation with an academic advisor in the Department of Animal and Rangeland Sciences.

EQUINE MINOR

ANS 121. *Intro to Animal Sciences (4)
ANS 220. Introductory Horse Science (3)

Select two of the following three courses:

ANS 430. Equine Systems I: Exercise Science (4)
ANS 431. Equine Systems II: Nutrition (3)
ANS 432. Equine Systems III: Reproduction (4)

Select two courses from the following:

ANS 192. Intermediate Horsemanship (1)
ANS 193. Dressage (1)
ANS 194. Jumping (1)
ANS 295. Reining (1)
ANS 323. Principles of Colt Training (3)
ANS 324. Advanced Colt Training (3)

Select a minimum of 7-10 credits from the following:

ANS 221. Equine Conformation and Performance (2)
ANS 223. Equine Marketing (2)
ANS 313. Applied Animal Nutrition: Feeds and Ration Formulation (4)
ANS 322. Equestrian Coaching (2)
ANS 331. Advanced Livestock Evaluation (4)
ANS 333. Equine Stable Management (3)
ANS 415. Livestock Judging Team (3)

Total=28-30**12 credits must be upper division.***RANGELAND ECOLOGY AND MANAGEMENT MINOR****Requirements**

RNG 341. Rangeland Ecology and Management (3)
RNG 351. Range Ecology I-Grasslands (3)
RNG 352. Range Ecology II-Shrublands (3)
RNG 421. Wildland Restoration and Ecology (4)
RNG 442. Rangeland-Animal Relations (4)
RNG 490. Rangeland Management Planning (4)

Select 7 additional credits from:

Any other RNG course
ANS 436. Sheep Production Systems (3)
ANS 443. Beef Production Systems (3)
BOT 341. Plant Ecology (4)

Total=28

Note: Completion of the Rangeland Ecology and Management minor alone does not qualify students for rangeland conservationist positions with the U.S. Office of Personnel Management (OPM).

GRADUATE MAJORS**ANIMAL SCIENCE (MAg, MS, PhD, MAIS)**

Graduate Areas of Concentration
Animal nutrition, dairy production (MS only), embryo physiology, endocrinology, growth and development, livestock management (MS only), nutritional biochemistry, reproductive physiology

The Department of Animal and Rangeland Sciences offers graduate work leading to Master of Science and Doctor

of Philosophy degrees in Animal Science with concentrations listed above.

RANGELAND ECOLOGY AND MANAGEMENT (MAg, MS, PhD, MAIS)**Graduate Areas of Concentration**

Agroforestry, ecology of rangelands, physiology of range plants, range improvement, range nutrition, restoration ecology, riparian zone management, watershed management

The Department of Animal and Rangeland Sciences offers the Master of Agriculture, the Master of Science and the Doctor of Philosophy degrees.

The program integrates plant, soil, and animal sciences to prepare degree candidates for leadership in this professional field. Under the guidance of the rangeland faculty, graduate students study rangeland ecology, physiology of rangeland plants, rangeland nutrition, rangeland improvements, watershed management, restoration ecology, agroforestry, water quality, and riparian zone management. Through the Department of Animal and Rangeland Sciences, range management graduate students have access to greenhouse, field plot, pasture, range, and animal facilities on campus, and at the two Eastern Oregon Agricultural Research Center stations at Union and Burns.

Graduate students in rangeland ecology and management may select courses in complementary areas, including agricultural and resource economics, fisheries and wildlife, botany, soils, statistics, biology forestry, crop science, and animal science. The selection of these complementary areas depends on the interest of the students, their aptitude, and the thesis topic chosen. Minors are commonly elected in botany, soils, forage crops, animal nutrition, fisheries and wildlife, agricultural and resource economics, or in an integrated program of study.

GRADUATE MINORS**ANIMAL SCIENCE GRADUATE MINOR**

For more details, see the departmental advisor.

RANGELAND ECOLOGY AND MANAGEMENT GRADUATE MINOR

For more details, see the departmental advisor.

ANIMAL SCIENCES COURSES

ANS 100. ORIENTATION TO ANIMAL SCIENCES (2). Orientation of incoming animal sciences students to college life with emphasis on faculty, facilities, services and curricula of the Department of Animal Sciences.

ANS 121. *INTRODUCTION TO ANIMAL SCIENCES (4). Principles of breeding, physiology, nutrition, and management as they apply to

modern livestock and poultry production. Lec/lab. (Bacc Core Course)

ANS 121H. *INTRODUCTION TO ANIMAL SCIENCE (4). Principles of breeding, physiology, nutrition, and management as they apply to modern livestock and poultry production. Lec/lab. (Bacc Core Course) **PREREQS:** Honors College approval required.

ANS 190. INTRODUCTION TO HORSEMANSHIP (1). Designed for students with little to no experience in horsemanship. Students will be introduced to safe handling methods including approaching and haltering the horse, tying, leading, lunging, and grooming. Students will be familiarized with parts of the horse and tack, tack care and how to tack up a horse. In the arena, students will learn how to safely mount and dismount, basic position, cues, and control of the horse at the walk and trot. Emphasis will be placed on safety and developing the rider's balance, confidence, and control. This course is repeatable for a maximum of 3 credits. **PREREQS:** Must be able to lift, carry, push, and pull up to 50 lbs. Rider's weight must not exceed 220 lbs. Instructor approval required.

ANS 191. BEGINNING HORSEMANSHIP (1). Designed for beginning riders or those wishing to improve their basic skills. Offers an introduction to the basic Western or English (separate sections) riding position and control of the horse at the walk, trot, and lope/canter. Upon completion of the course, the student will be familiar with handling and leading a horse, grooming, tacking-up and riding simple school figures in an indoor arena. Instructors for this course will be OSU-certified coaching students or graduates. May be repeated. This course is repeatable for a maximum of 4 credits.

ANS 192. INTERMEDIATE HORSEMANSHIP (1). Designed for beginning riders who can comfortably walk, trot and canter on a trained horse. It offers a review of the basics, and opportunity to improve a rider's position and control at the trot and canter, either English or Western (Separate sections). Upon completion of the course, the student will be a more effective rider at all three gaits. This course is recommended for riders who have NOT had formal instruction or who are making a transition from the Western to English style of riding. Instructors for this course will be OSU-certified coaching students or graduates. This course is repeatable for a maximum of 4 credits. **PREREQS:** ANS 191 or equivalent.

ANS 193. DRESSAGE (1). Designed for riders who have taken Beginner Riding I and II (or the equivalent) and are interested in discovering and/or pursuing the art of dressage. Riders will be gently introduced to the terminology and techniques of dressage training through second level with ample demonstrations and hands-on experience. Upon completion of the course, riders will feel competent in riding a training level test for competition. This course is repeatable for a maximum of 4 credits. **PREREQS:** ANS 192 or equivalent.

ANS 194. JUMPING (1). Designed for riders who have taken ANS 193 (or the equivalent) and are interested in learning control of the horse over fences. Riders will be coached through several exercises designed to improve their ability to establish pace, rhythm and balance, adjust stride, and direct and control the horse over trotting and cantering poles, gymnastics, single fences, combinations, and an eight-fence hunter course. Aspects of course design will also be covered for interested students. This course is repeatable for a maximum of 4 credits. **PREREQS:** ANS 193 and / or equivalent. Departmental approval.

ANS 207. SOPHOMORE SEMINAR (1). Examination of career opportunities in animal sciences. **PREREQS:** Sophomore standing.

ANS 215. BEEF/DAIRY INDUSTRIES (3). Introduction to beef and dairy industries; history,

current industry status, and demonstration and practice of basic husbandry skills. **PREREQS:** ANS 121

ANS 216. SHEEP/SWINE INDUSTRIES (3). Introduction to the sheep and swine industries including history, current status and production practices, with demonstration and hands-on experience of basic husbandry practices. **PREREQS:** ANS 121

ANS 217. POULTRY INDUSTRIES (3). Familiarization of the organizational structure and marketing arrangement of poultry industries; hands-on managerial techniques, practices and procedures carried out by the poultry industries.

ANS 220. INTRODUCTORY HORSE SCIENCE (3). Introduction to horses, their history, breeds, form and function, performance evaluation, current industry status, and general management. **PREREQS:** ANS 121

ANS 221. EQUINE CONFORMATION AND PERFORMANCE (2). Students will learn systems of evaluating conformation and for judging current horse show disciplines typically featured in intercollegiate horse judging contests. Emphasis will be on the stock-type (AQHA) halter and performance classes. Students will learn to place classes objectively and give written and oral justifications of their judgements.

ANS 223. EQUINE MARKETING (2). Course covers practical concepts of equine marketing. Emphasis on market assessment, targeting buyers, marketing and advertising strategies, hands-on experience in product preparation and presentation, marketing legalities. **PREREQS:** ANS 121 and ANS 220 and ANS 192 or instructor approval required.

ANS 230. DAIRY CATTLE EVALUATION (3). Phenotypic evaluation of dairy cattle in relation to the productive life of the animals as well as efficiency and the economic impact on dairy producers. Labs consist of students spending time cow-side evaluating animals via knowledge gained from lectures. Cow anatomy will be mastered, value of type traits will be learned, differentiation of the dairy breeds will be understood, and oral presentation skills honed. \$20 course fee assessed. **PREREQS:** ANS 121 and ANS 215 are recommended.

ANS 231. LIVESTOCK EVALUATION (2). Visual appraisal of market and breeding classes of beef cattle, sheep, and swine. Live animal and carcass comparisons. **PREREQS:** ANS 121

ANS 251. PRINCIPLES OF ANIMAL FOODS TECHNOLOGY (3). Processing of meat, milk and eggs into human food products. Lec/lab. **PREREQS:** ANS 121

ANS 280. COMPANION ANIMAL MANAGEMENT (3). Care and management of companion animals, including dogs, cats, small mammals, reptiles, birds, and tropical fish. Responsibilities of pet ownership and the beneficial aspects of the human-animal relationship.

ANS 295. REINING (1). Reining will give the advanced rider the technical and theoretical knowledge of training reining horses in the stock seat style of riding. Focus will be on preparation and execution of the reining maneuvers. **PREREQS:** ANS 192 or instructor's approval.

ANS 296. ADVANCED JUMPING/EVENTING (1). Advanced jumping/eventing will introduce and practice training methods, conditioning, preparation, and skill building in the areas of dressage, jumping, and eventing (as weather permits). **PREREQS:** ANS 194 or instructor's approval.

ANS 302. COMMON DISEASES OF COMPANION ANIMALS (3). An introduction to common diseases of selected companion animals. Emphasis will be placed on identifying predisposing factors, clinical signs, common diagnostic procedures and potential implications

for human health. A \$10 course fee will be required. **PREREQS:** BI 211 and BI 212 and BI 213 and CH 121 and CH 122 and CH 123. ANS 280 is recommended.

ANS 311. PRINCIPLES OF ANIMAL NUTRITION (3). Classification, digestion, absorption, and metabolism of nutrients in animals; consequences of nutritional deficiencies and toxicities. **PREREQS:** ((BI 211 or BI 211H) and (BI 212 or BI 212H))

ANS 312. FEEDSTUFFS AND RATION FORMULATION (4). Presents the feedstuffs utilized by domestic animals including their characteristics and processing. Provides instruction in ration formulation and evaluation leading to development of the basic skills required to formulate and evaluate rations for domestic animals. Taught as a distance education course. **PREREQS:** ANS 121 and MTH 111 or equivalent or instructor approval.

ANS 313. APPLIED ANIMAL NUTRITION: FEEDS AND RATION FORMULATION (4). Discusses topics relevant to feedstuff identification and nutrient analysis, feed processing and formulation of balanced animal diets based on nutrient requirements. Provides students hands-on experiences in identifying various feedstuffs and formulating rations based on the nutrient composition of those feedstuffs. **PREREQS:** ANS 311 (recommended but not required) and junior status.

ANS 314. ANIMAL PHYSIOLOGY (4). Biological basis of animal performance; describes how networks of cells act cooperatively to enable locomotion, provide a stable internal environment, allocate resources, remove metabolic end-products, and counteract microorganisms. **PREREQS:** General principles of biology equivalent to BI 211, BI 212, BI 213; junior standing or higher or instructor permission.

ANS 315. *CONTENTIOUS SOCIAL ISSUES IN ANIMAL AGRICULTURE (3). Discussion of contentious issues including role of animal products and human health; use of hormones and antibodies; new animal biotechnologies; animal rights/welfare; livestock grazing on public lands. (Bacc Core Course).

ANS 316. REPRODUCTION IN DOMESTIC ANIMALS (4). Anatomy and physiology of mammalian and avian reproductive systems; fertilization, embryonic and fetal development, placentation and parturition; reproductive technologies. Lec/rec. **PREREQS:** (BI 211 or BI 211H) and (CH 121 or CH 221 or CH 231 or CH 231H) and ANS 121 and sophomore standing or higher.

ANS 317. REPRODUCTION IN DOMESTIC ANIMALS LABORATORY (1). Gross and microscopic anatomy of the reproductive tract; semen collection, evaluation and extension; evaluation of fertilization, embryo and fetal development and placentation. Lec/lab. **PREREQS:** ANS 316*

ANS 320. PRINCIPLES OF COMPANION ANIMAL NUTRITION (3). Learn about nutrients, the digestive process, and the application of nutritional sciences to the health and welfare of companion animals. Introduction to the metabolic basis and practical preventative management for nutritional diseases in companion animals. **PREREQS:** (BI 211 or BI 211H) and (BI 212 or BI 212H)

ANS 321. AVIAN EMBRYO (4). Discussion and experimentation involving the development and the environmental requirements for the artificial incubation of avian embryos. Lec/lab. Offered even-numbered years. **PREREQS:** ANS 121 and ANS 217 and BI 211

ANS 322. EQUESTRIAN COACHING (2). Practical development of coaching skills with novice to intermediate English/Western riders. Emphasis on knowledge of basic riding principles and stable management skills, teaching ability

and sport safety. Students required to enroll in a 1-credit internship program the following term for advanced teaching experience. **PREREQS:** ANS 193 and ANS 194 and ANS 221

ANS 323. PRINCIPLES OF COLT TRAINING (3). Students acquire the technical and theoretical knowledge of starting and training colts in the stock seat style of riding. **PREREQS:** ANS 295 and /or instructor's approval. Departmental approval.

ANS 324. ADVANCED COLT TRAINING (3). Students acquire the technical and theoretical knowledge of advancing the training of young horses in the stock seat style of riding. Lec/lab. **PREREQS:** ANS 295 and ANS 323 or instructor approval required.

ANS 327. APPLIED PHYSIOLOGY OF REPRODUCTION (5). Principles, techniques and recent development in semen collection, evaluation, extension and preservation; artificial insemination, estrus detection and synchronization; pregnancy diagnosis and embryo transfer. **PREREQS:** (ANS 316 and ANS 317)

ANS 331. ADVANCED LIVESTOCK EVALUATION (4). Aspects of an individual animal's economic merit are compared to a sample group. Emphasis is placed on beef, swine and sheep. Visual appraisal, performance data and carcass merit are stressed. Designed to prepare students for the intercollegiate livestock judging team. This course is repeatable for a maximum of 12 credits. **PREREQS:** ANS 231 and sophomore standing or higher.

ANS 333. EQUINE STABLE MANAGEMENT (3). Discusses developing a business plan, financial statements, and ratios, budgeting, financial planning, taxation, and employment issues within the current equine industry. **PREREQS:** ANS 220 and ANS 222 or instructor's approval.

ANS 335. EQUINE HEALTH AND DISEASE (3). Recognition of of common diseases and disorders including their cause, treatment and prevention. Management of internal and external parasites. Recognizing common lameness issues. **PREREQS:** Junior standing.

ANS 351. ADVANCED PRINCIPLES OF ANIMAL FOODS TECHNOLOGY (4). Provides in-depth coverage of both fresh and processed meats and eggs into products suitable for human consumption. **PREREQS:** ANS 251

ANS 378. ANIMAL GENETICS (4). Fundamentals of inheritance, principles of genetic segregation, population and quantitative genetics, response to natural selection and artificial manipulation of populations. **PREREQS:** BI 211 or BI 212 or BI 213 and ANS 121 or equivalent and ST 351 recommended.

ANS 401. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANS 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANS 405. READING AND CONFERENCE (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANS 407. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

ANS 410. ANIMAL SCIENCE INTERNSHIP (1-12). On- or off-campus, occupational work experience supervised by the department. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANS 413. COMPARATIVE NUTRITION OF DOMESTIC AND WILD ANIMALS (3). A comprehensive discussion of comparative similarities and differences in nutrient digestion and metabolism of domestic and wild animals.

Herbivores such as ruminants and hindgut fermentors will be emphasized, as will mammalian and avian carnivorous species. Emphasis will be on protein, carbohydrate and lipid metabolism, with other topics selected from the syllabus in accordance with student interest in a particular year. Student course fee: \$10. **PREREQS:** Junior or senior status and CH 331 required. An introduction to biochemistry is recommended but not required.

ANS 415. LIVESTOCK JUDGING TEAM (3). Designed to train students for participation in the intercollegiate livestock judging team. This course is repeatable for a maximum of 9 credits. **PREREQS:** ANS 331

ANS 420. ^ETHICAL ISSUES IN ANIMAL AGRICULTURE (3). Students are provided with an opportunity to discuss, debate and write extensively about current, relevant, and controversial social issues dealing with modern animal agriculture. (Writing Intensive Course)

ANS 430. EQUINE SYSTEMS I: EXERCISE SCIENCE (4). Seniors and graduate students intensively explore and apply science to real-life situations regarding cardiorespiratory, muscle physiology, and bone physiology responses to exercise, climate, and altitude. Lec/lab. **PREREQS:** ANS 314

ANS 431. EQUINE SYSTEMS II: NUTRITION (3). Senior and graduate students intensively explore and apply science to real-life situations regarding starch, fiber, protein, and fat metabolism in performance horses, breeding stock, and growing horses. **PREREQS:** ANS 313

ANS 432. EQUINE SYSTEMS III: REPRODUCTION (4). Senior and graduate students explore the fundamentals of equine reproduction and their application in horse breeding. Includes practical training of laboratory techniques. Lec/lab. **PREREQS:** (ANS 220 and ANS 316) and ANS 327

ANS 433. POULTRY MEAT PRODUCTION SYSTEMS (3). Fundamental applications and the analysis of management principles applied to brooding, rearing, feeding and housing meat-type chickens and turkeys and their respective breeders. Decision case studies and practical management problems are incorporated into the course. Offered odd number years. **PREREQS:** ANS 217 and ANS 313 and ANS 316 and ANS 378 or instructor's approval

ANS 434. EGG PRODUCTION SYSTEMS (3). Applications and analyses of egg production systems for brooding, rearing, feeding and housing egg producing chickens. Decision case studies and practical management problems are incorporated into the course. Offered even-numbered years. **PREREQS:** ANS 217 and ANS 313 and ANS 316 and ANS 378 or instructor's approval

ANS 435. APPLIED ANIMAL BEHAVIOR (3). Exploration of the fundamental processes of animal behavior and implications for animal management, production, housing and welfare. Examples provided in class will cover a range of species, with emphasis on domestic animals. Lec/lab. **PREREQS:** ANS 314 and BI 350 or Z 350 or equivalent.

ANS 436. SHEEP PRODUCTION SYSTEMS (3). Integration of nutrition, genetics, reproduction, behavior, and health principles into management systems for production and marketing of lamb and wool. **PREREQS:** ANS 216 and ANS 311 and ANS 316 and ANS 378

ANS 438. EXPLORING WORLD AGRICULTURE (2). Survey of crop and livestock production in a designated section of the world, including history, culture, and political situation. Course is designed to prepare students for a tour of study area. **CROSSLISTED** as AREC 438, CROP 438, CSS 438, HORT 438. Graded P/N. This course is repeatable for a maximum of 8 credits.

ANS 439. DAIRY PRODUCTION SYSTEMS (4). Fundamentals of nutrition, breeding, reproductive physiology and health programs and their applications in the care and management of dairy cattle. **PREREQS:** ANS 215 and ANS 313 and ANS 316 and ANS 378

ANS 440. DAIRY PRODUCTION SYSTEMS (3). Decision case analysis or special topics in application of dairy management principles. **PREREQS:** ANS 439

ANS 441. TOPICS IN ANIMAL LEARNING (2). Studies of animals' cognitive abilities have revealed a broad spectrum of learning capabilities in various species. Covers fundamental concepts associated with animal learning and cognition; the focus is on types of learning demonstrated by various animals and challenges associated with designing animal cognition experiments. Readings will cover a range of species. **PREREQS:** BI 211 and BI 212 and BI 213 and (BI 350 or Z 350) and junior standing. Recommended: ANS 435 or ANS 535.

ANS 443. BEEF PRODUCTION SYSTEMS: COW/CALF (3). Fundamentals of nutrition, reproductive physiology and health programs and their applications in the care and management of beef cattle. Overnight field trip with extra fee charged. Lec/lab. Taught at EOU La Grande campus only. **PREREQS:** ANS 313 and ANS 315 and ANS 316 and ANS 378

ANS 444. BEEF PRODUCTION SYSTEMS: STOCKER/FEEDLOT (3). Continuation of the study of beef cattle management. Students will practice decision-making processes using area beef cattle operations as case studies. Overnight field trip with extra fee charged. Taught at EOU La Grande campus only. **PREREQS:** ANS 443 or ANS 543

ANS 445. BEEF PRODUCTION SYSTEMS (4). Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of beef cattle from conception through calving, weaning, stocker/back grounding and the feedlot. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged. **PREREQS:** ANS 313 and ANS 316 and ANS 317 and ANS 378

ANS 452. LIVESTOCK HOUSING AND WASTE MANAGEMENT (3). Basics in where, how, and why one would build, insulate, and ventilate livestock buildings. Manure and wastewater collection, treatment, storage, and utilization.

ANS 453. PRACTICAL BROILER PRODUCTION (1-3). Students will be considered the growers and will be required to provide the management of the flock. The instructor will act the field supervisor, making suggestions for management changes if the student growers do not make timely adjustments. Students will be closely involved with the day-to-day responsibilities of broiler production, in a system virtually identical to that used in the commercial industry nationwide. They will be determining management, including ventilation, temperature, lighting, water, and feed availability. Attendance in the form of two visits per day (weekends included) is a major component of the class. All decisions on management are under the indirect supervision of the instructor. This course is repeatable for a maximum of 9 credits. **PREREQS:** Instructor approval required.

ANS 456. COMPANION ANIMAL PRODUCTION SYSTEMS (3). Fundamentals of dog and cat breeding stock selection, feeding and housing as well as biology and management from estrus through parturition to weaning. Due to the nature of this class, a variety of animals may be present during class session. Questions and interactions are encouraged but, while precautions are taken, any contact with animals carries some risk of injury or illness. **PREREQS:** (ANS 313 and ANS 316 and ANS 317 and ANS 378) and senior standing.

ANS 460. SWINE PRODUCTION SYSTEMS (4). Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of swine from conception through farrowing, weaning, and the growing/finishing phases. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged. **PREREQS:** ANS 121 and ANS 216 and ANS 311 and ANS 316 and ANS 378

ANS 465. FOODBORNE DISEASE (3). Examines ways pathogenic bacteria can enter the human diet via animal products, discusses rationale for the limitations of government meat inspection, explains disease symptoms in terms of intestinal physiology, and discusses food processing technology and food handling techniques that serve to minimize the risk of infection.

ANS 485. *CONSENSUS AND NATURAL RESOURCES (3). Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. **CROSSLISTED** as FES 485/FES 585, FS 485/FS 585, FW 485/FW 585, SOC 485/SOC 585. (Bacc Core Course)

ANS 490. TOXICANTS AND POISONOUS PLANTS (4). Natural toxicants and their biological effects, metabolism of toxicants, impacts of toxicants on livestock production, and consideration of the chemical structure, plant sources, toxicity problems, metabolism and metabolic effects, toxicity signs, and prevention of toxicoses. **PREREQS:** ANS 313

ANS 495. PHYSIOLOGICAL CHEMISTRY (4). Comprehensive analysis of the biochemical properties and pathways that characterize a living animal. **PREREQS:** ANS 314 and BB 350 or equivalent.

ANS 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ANS 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANS 503. THESIS (1-16). Graded P/N. This course is repeatable for a maximum of 999 credits.

ANS 505. READING AND CONFERENCE (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANS 507. GRADUATE SEMINAR (1). Section 1: Seminar/general for all graduate students. Preparation of effective visual aids. Practice explaining the validity or significance of experimental results to an informed audience. Section 2: Seminar/endocrinology, for graduate students interested in physiology. This course is repeatable for a maximum of 99 credits.

ANS 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

ANS 509. TEACHING PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

ANS 511. DIGESTIVE PHYSIOLOGY AND NUTRITION OF RUMINANT ANIMALS (4). Anatomy and physiology of the ruminant digestive tract including rumen microbiology and digestive processes. Nutritional biochemistry and physiology of ruminants. Feed chemistry, feed intake and principles of ration balancing. Theory of energy and protein metabolism. **PREREQS:** ANS 311 or ANS 313

ANS 512. MONOGASTRIC AND POULTRY NUTRITION (3). Anatomical differences in digestive tracts of monogastrics; nutritional biochemistry of poultry; practical feeding of avian species; least-cost ration techniques; techniques for determining nutrient needs of monogastrics. **PREREQS:** ANS 311 and ANS 313

ANS 513. COMPARATIVE NUTRITION OF DOMESTIC AND WILD ANIMALS (3). A comprehensive discussion of comparative similarities and differences in nutrient digestion and metabolism of domestic and wild animals. Herbivores such as ruminants and hindgut fermentors will be emphasized, as will mammalian and avian carnivorous species. Emphasis will be on protein, carbohydrate and lipid metabolism, with other topics selected from the syllabus in accordance with student interest in a particular year. Student course fee: \$10. **PREREQS:** Junior or senior status and CH 331 required. An introduction to biochemistry is recommended but not required.

ANS 515. REVIEW OF APPLIED RUMINANT NUTRITION RESEARCH TECHNIQUES (3). Review and discussion and applied techniques and methodology used for ruminant nutrition research.

ANS 530. EQUINE SYSTEMS I: EXERCISE SCIENCE (4). Senior and graduate students intensively explore and apply science to real-life situations regarding cardiorespiratory, muscle physiology, and bone physiology responses to exercise, climate, and altitude. Lec/lab. **PREREQS:** ANS 314

ANS 531. EQUINE SYSTEMS II: NUTRITION (3). Senior and graduate students intensively explore and apply science to real-life situations regarding starch, fiber, protein, and fat metabolism in performance horses, breeding stock, and growing horses. **PREREQS:** ANS 313

ANS 532. EQUINE SYSTEMS III: REPRODUCTION (4). Designed for seniors and graduate students to explore the fundamentals of equine reproduction and their application in horse breeding. Includes practical training in laboratory techniques. Lec/lab. **PREREQS:** ANS 220 and ANS 316 and ANS 327

ANS 533. POULTRY MEAT PRODUCTION SYSTEMS (3). Fundamental applications and the analysis of management principles applied to brooding, rearing, feeding and housing meat-type chickens and turkeys and their respective breeders. Decision case studies and practical management problems are incorporated into the course. Offered odd number years. **PREREQS:** ANS 217 and ANS 313 and ANS 316 and ANS 378 or instructor's approval

ANS 534. EGG PRODUCTION SYSTEMS (3). Applications and analyses of egg production systems for brooding, rearing, feeding and housing egg producing chickens. Decision case studies and practical management problems are incorporated into the course. Offered even-numbered years. **PREREQS:** ANS 217 and ANS 313 and ANS 316 and ANS 378 or instructor's approval

ANS 535. APPLIED ANIMAL BEHAVIOR (3). Exploration of the fundamental processes of animal behavior and implications for animal management, production, housing and welfare. Examples provided in class will cover a range of species, with emphasis on domestic animals. Lec/lab. **PREREQS:** ANS 314 and BI 350 or Z 350 or equivalent.

ANS 536. SHEEP PRODUCTION SYSTEMS (3). Integration of nutrition, genetics, reproduction, behavior, and health principles into management systems for production and marketing of lamb and wool. **PREREQS:** ANS 216 and ANS 311 and ANS 316 and ANS 378

ANS 538. BIOLOGY OF LACTATION (3). Physiological and environmental factors affecting mammary gland development and function. Offered alternate years. **PREREQS:** Z 431 or Z 531

ANS 539. DAIRY PRODUCTION SYSTEMS (4). Fundamentals of nutrition, breeding, reproductive physiology and health programs and their applications in the care and management of dairy cattle. **PREREQS:** ANS 215 and ANS 313 and ANS 316 and ANS 378

ANS 540. DAIRY PRODUCTION SYSTEMS (3). Decision case analysis or special topics in application of dairy management principles. **PREREQS:** ANS 439

ANS 541. TOPICS IN ANIMAL LEARNING (2). Studies of animal's cognitive abilities have revealed a broad spectrum of learning capabilities in various species. This course covers fundamental concepts associated with animal learning and cognition; the focus is on types of learning demonstrated by various animals and challenges associated with designing animal cognition experiments. Readings will cover a range of species. **PREREQS:** Junior standing.

ANS 543. BEEF PRODUCTION SYSTEMS: COW/CALF (3). Fundamentals of nutrition, reproductive physiology and health programs and their applications in the care and management of beef cattle. Overnight field trip with extra fee charged. Lec/lab. Taught at EOU La Grande campus only. **PREREQS:** ANS 315 and ANS 313 and ANS 316 and ANS 378

ANS 544. BEEF PRODUCTION SYSTEMS: STOCKER/FEEDLOT (3). Continuation of the study of beef cattle management. Students will practice decision-making processes using area beef cattle operations as case studies. Overnight field trip with extra fee charged. Taught at EOU La Grande campus only. **PREREQS:** ANS 443 or ANS 543

ANS 545. BEEF PRODUCTION SYSTEMS (4). Students will be exposed to the fundamentals of nutrition, reproductive physiology, selection, health programs, and their applications in the care and management of beef cattle from conception through calving, weaning, stocker/back grounding and the feedlot. Students will practice decision-making processes using working case studies. Overnight field trip with extra fee charged. **PREREQS:** ANS 313 and ANS 316 and ANS 317 and ANS 378

ANS 552. LIVESTOCK HOUSING AND WASTE MANAGEMENT (3). Basics in where, how, and why one would build, insulate, and ventilate livestock buildings. Manure and wastewater collection, treatment, storage, and utilization. Offered alternate years.

ANS 556. COMPANION ANIMAL PRODUCTION SYSTEMS (3). Fundamentals of dog and cat breeding stock selection, feeding and housing as well as biology and management from estrus through parturition to weaning. Due to the nature of this class, a variety of animals may be present during class session. Questions and interactions are encouraged but, while precautions are taken, any contact with animals carries some risk of injury or illness. **PREREQS:** ANS 313 and ANS 316 and ANS 317 and ANS 378 and senior standing.

ANS 560. LIPID METABOLISM (3). Digestion, absorption and metabolism of lipids with emphasis on lipoprotein metabolism, regulation of lipid metabolism in various tissues and metabolism of eicosanoids. Offered alternate years. **PREREQS:** BB 452 and BB 492 or equivalent

ANS 585. CONSENSUS AND NATURAL RESOURCES (3). Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. **CROSSLISTED** as FES 485/FES 585, FS 485/FS 585, FW 485/FW 585, SOC 485/SOC 585.

ANS 590. TOXICANTS AND POISONOUS PLANTS (4). Natural toxicants and their biological effects, metabolism of toxicants, impacts of toxicants on livestock production, and consideration of the chemical structure, plant sources, toxicity problems, metabolism and metabolic effects, toxicity signs, and prevention of toxicoses. **PREREQS:** ANS 313

ANS 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ANS 601. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANS 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ANS 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANS 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

ANS 607. GRADUATE SEMINAR (1). This course is repeatable for a maximum of 99 credits.

ANS 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

ANS 609. TEACHING PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

ANS 662. HORMONE ACTION (3). Mechanisms of action of peptide and steroid hormones and related compounds at the cellular level. Offered every other year, winter term. **CROSSLISTED** as BB 662, MCB 662, PHAR 662. **PREREQS:** BB 451 or BB 551 or BB 492 or BB 592

ANS 673. BIOLOGY OF MAMMALIAN REPRODUCTION (4). Physiological, neuroendocrine, endocrine and environmental factors that regulate reproduction of mammals. Offered alternate years. **PREREQS:** ANS 316 or equivalent and BB 350

ANS 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

■ RANGELAND ECOLOGY AND MANAGEMENT COURSES

RNG 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

RNG 299H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

RNG 341. RANGELAND ECOLOGY AND MANAGEMENT (3). Nature and management of rangelands. Integrated land use with emphasis on plant-animal-soil interactions.

RNG 346. TOPICS IN WILDLAND FIRE (3). An interdisciplinary survey of concepts relating to fire science, ecology, management, and policy. Includes case studies of several representative ecosystems, ranging from west- and eastside forests of the Pacific Northwest to shrub steppe ecosystems of the Intermountain West and chaparral ecosystems of southern California. Distance and campus-based delivery using videos, website, and discussion. **CROSSLISTED** as FOR 346, FW 346. **PREREQS:** Course work in forest biology or ecology (e.g. FOR 240, FOR 341) or equivalent.

RNG 351. RANGE ECOLOGY I-GRASSLANDS (3). Principles and terminology of grassland ecology. Addresses the spatial-temporal dynamics of structure, function, and process in North American grassland ecosystems. Water, nutrient cycles and energy pathways are explored in context of the variable driving forces of climate (drought), herbivory, and fire. **PREREQS:** (BOT 313 and RNG 341)

RNG 352. RANGE ECOLOGY II-SHRUBLANDS (3). Introduces the ecology of shrublands using an autecological approach. Explores the effects of stressors such as temperature, drought, fire, and herbivory on plant morphology, physiology, reproduction, and growth. Covers life histories of common shrubs and descriptions of shrubland communities used to promote understanding of autecological principles. **PREREQS:** (BOT 313 and RNG 341)

RNG 353. WILDLAND PLANT IDENTIFICATION (4). Students will learn how to identify approximately 100 plant species found in wildlands of North America and Mexico. Individual plant species ecology, basic plant anatomy and identification characteristics observable only through a microscope or dissecting scope, and how to use a dichotomous key for plant ID will also be covered.

RNG 355. DESERT WATERSHED MANAGEMENT (3). Principles and methods in managing rangeland for optimum production and regulation of water yields, as well as maintaining soil stability and on-site productivity. Effects of grazing herbivores and their potential as land use, manipulative tools. Concepts of arid land hydrology, with emphasis on the resultant effects on runoff quantity and quality.

RNG 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

RNG 403. SENIOR THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

RNG 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

RNG 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

RNG 411. ADVANCED PLANT ID (2). Advanced rangeland plant taxonomy. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

RNG 421. WILDLAND RESTORATION AND ECOLOGY (4). Emphasis is placed on understanding the ecology of arid and semi-arid ecosystems through the study of ecological processes responsible for ecosystem function. Range improvement practices for stabilizing and repairing degraded wildlands by directing autogenic recovery mechanisms are discussed. This involves manipulating plants, soil, animals and microenvironments for improved ecosystem function. **PREREQS:** Course work in soils and ecology. Field trip required.

RNG 436. WILDLAND FIRE SCIENCE AND MANAGEMENT (4). Principles and applications of fire as a natural resource management tool, the role of fire in conservation management, restoration, and preservation of ecosystems. Covers basic techniques and current research used to describe fire behavior and spread, fuels and fuel manipulation, and fire effects on the biota. Focus will be on fire as a natural process in ecosystem dynamics. Lec/lab. **CROSSLISTED** as FOR 436/FOR 536.

RNG 441. RANGELAND ANALYSIS (4). Techniques used to describe vegetation in shrub-lands, grasslands, and forests. Use of measurements in resource management. Course is field-oriented, emphasizing both theory and practice of wildland inventory methods. **PREREQS:** (ST 351 or ST 351H)

RNG 442. RANGELAND-ANIMAL RELATIONS (4). Domestic and wild animal use of rangelands as related to environmental factors, palatability, food habits, nutrition, physiography, and their effects on management of rangeland-animal resources. **PREREQS:** RNG 341

RNG 446. WILDLAND FIRE ECOLOGY (3). Coverage of fire histories and ecology of major forest, rangeland and wetland ecosystems. Includes fire interactions with physical and biotic components of ecosystems, role of fire in ecological processes, and utilization in natural resource management. **CROSSLISTED** as FOR 446/FOR 546 and FW 446/FW 546. **PREREQS:** Course work in ecology and natural resource management.

RNG 455. RIPARIAN ECOLOGY AND MANAGEMENT (3). Study of the ecology of riparian vegetation, including successional processes in riparian zones, productivity, structure and diversity of riparian ecosystems. The class

is focused on the terrestrial vegetation, soils and animals of riparian ecosystems. Emphasis is placed on the past abuse associated with riparian ecosystems, methods of rehabilitation, and theories of the proper use of riparian ecosystems under a multiple-use philosophy (i.e. fish, wildlife, livestock, aesthetics, recreation, and silviculture). **PREREQS:** RNG 355

RNG 477. *AGROFORESTRY (3). Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. **CROSSLISTED** as FS 477/FS 577, NR 477/NR 577. (Bacc Core Course) **PREREQS:** Any basic ecology course.

RNG 490. RANGELAND MANAGEMENT PLANNING (4). Administration and management of rangelands; planning processes involving goal setting, inventories, personnel management, environment, conflict resolution, and other constraints necessary for decision-making. Use of data collected from field problems to support the execution of class plans. Field trip required. Lec/lab.

RNG 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

RNG 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

RNG 503. MASTER'S THESIS (1-16). This course is repeatable for a maximum of 999 credits.

RNG 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

RNG 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

RNG 507. SEMINAR (1-2). This course is repeatable for a maximum of 16 credits.

RNG 521. WILDLAND RESTORATION AND ECOLOGY (4). Emphasis is placed on understanding the ecology of arid and semi-arid ecosystems through the study of ecological processes responsible for ecosystem function. Range improvement practices for stabilizing and repairing degraded wildlands by directing autogenic recovery mechanisms are discussed. This involves manipulating plants, soil, animals and microenvironments for improved ecosystem function.

RNG 536. WILDLAND FIRE SCIENCE AND MANAGEMENT (4). Principles and applications of fire as a natural resource management tool, the role of fire in conservation management, restoration, and preservation of ecosystems. Covers basic techniques and current research used to describe fire behavior and spread, fuels and fuel manipulation, and fire effects on the biota. Focus will be on fire as a natural process in ecosystem dynamics. Lec/lab. **CROSSLISTED** as FOR 436/FOR 536.

RNG 541. RANGELAND ANALYSIS (4). Techniques used to describe vegetation in shrub-lands, grasslands, and forests. Use of measurements in resource management. Course is field-oriented, emphasizing both theory and practice of wildland inventory methods. **PREREQS:** ST 351

RNG 542. RANGELAND-ANIMAL RELATIONS (4). Domestic and wild animal use of rangelands as related to environmental factors, palatability, food habits, nutrition, physiography, and their effects on management of rangeland-animal resources. **PREREQS:** RNG 341

RNG 546. WILDLAND FIRE ECOLOGY (3). Coverage of fire histories and ecology of major forest, rangeland and wetland ecosystems. Includes fire interactions with physical and biotic components of ecosystems, role of fire in ecological processes, and utilization in natural

resource management. **CROSSLISTED** as FOR 446/FOR 546 and FW 446/FW 546. **PREREQS:** Course work in ecology and natural resource management.

RNG 555. RIPARIAN ECOLOGY AND MANAGEMENT (3). Study of the ecology of riparian vegetation, including successional processes in riparian zones, productivity, structure and diversity of riparian ecosystems. The class is focused on the terrestrial vegetation, soils and animals of riparian ecosystems. Emphasis is placed on the past abuse associated with riparian ecosystems, methods of rehabilitation, and theories of the proper use of riparian ecosystems under a multiple-use philosophy (i.e. fish, wildlife, livestock, aesthetics, recreation, and silviculture). **PREREQS:** RNG 355

RNG 577. AGROFORESTRY (3). Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. **CROSSLISTED** as FS 477/FS 577, NR 477/NR 577. **PREREQS:** Any basic ecology course.

RNG 590. RANGELAND MANAGEMENT PLANNING (4). Administration and management of rangelands; planning processes involving goal setting, inventories, personnel management, environment, conflict resolution, and other constraints necessary for decision-making. Use of data collected from field problems to support the execution of class plans. Field trip required. Lec/lab.

RNG 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

RNG 603. DOCTORAL THESIS (1-16). This course is repeatable for a maximum of 999 credits.

RNG 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

RNG 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

RNG 607. SEMINAR (1-2). This course is repeatable for a maximum of 16 credits.

RNG 608. WORKSHOP (1-16).

RNG 643. WILDLAND PLANT ECOPHYSIOLOGY (4). Emphasizes the physiological ecology of plants living in arid and semi-arid ecosystems. Primary class emphasis will include photosynthesis, respiration, water stress and water use efficiency, stable isotopes, root structure and function, nutrient uptake and stress, and defoliation. Offered every other winter, odd years.

RNG 661. AGRICULTURAL RESEARCH PERSPECTIVES (3). Planning and managing agricultural research projects, publishing research results, professional ethics, interactions of science, scientists, and society. Offered on alternate years.

RNG 662. RANGELAND ECOLOGY (3). Studies ecological theory and related resource management implications in rangelands and arid wildlands. Topics include the history and development of rangeland ecology, plant demography, invasive species, plant population dynamics, disturbance theory, succession, vegetation classification and range condition assessments. Offered every other winter, even years. **PREREQS:** A course in basic ecology recommended.

RNG 670. ECOLOGICAL INVASIVE PLANT MANAGEMENT (2). Logic of ecologically based invasive plant management. Ecological processes of invasion. Management of plant succession with emphasis on augmentive restoration. Adaptive management of weed invasions into natural ecosystems. Development of ecologically based management plans for natural ecosystems. Offered odd-numbered years only.

FACULTY

Professors Antle, Capalbo, Färe, Jaeger, Lev, Munisamy, Seavert, Sylvia, Weber, Wu

Associate Professors Diebel, Durham, Eleveld, Langpap, Lewis, Reimer, Riggs, Sterns

Assistant Professors Chen, Kling

Instructors Brekken, Egelkraut, Fisher, Fleming, Gow, Gwin, Haim, Rahe, Sorte

Emeritus R. Adams, Barkley, Buccola, Johnston, Kerkvliet, McMullen

ADJUNCT FACULTY

D. Adams, Albers, Bernell, Boggess, Elston, Landkamer, Montgomery, Rosenberger, Talbott

AEC GRADUATE FACULTY

The Graduate Program in Applied Economics currently has 40 faculty members drawn from three departments and two schools in five colleges.

Albers, Alig, Antle, Bernell, Boggess, Buccola, Capalbo, Chen, Chi, Cross, Diebel, Durham, Eleveld, Färe, Fisher, Gopinath, Harte, Jaeger, Kerkvliet, Kline, Kling, Langpap, Lev, Lewis, Maness, McMullen, Meng, Montgomery, Plantinga, Pugatch, Reimer, Rosenberger, L. Schroeder, Seavert, Sessions, Sterns, Sylvia, Weber, Wu, Yoon

Undergraduate Majors

Agricultural Business Management (BS, CRED, HBS)

Environmental Economics and Policy (BS, HBS)

Options

Environmental Economics

Environmental Policy

General Option (Also available via Ecampus.)

Minors

Agricultural Business Management

Natural Resource and Environmental Law and Policy
Resource Economics (Also available via Ecampus.)

Graduate Major

Applied Economics (MA, MAIS, MS, PhD)

Graduate Areas of Concentration

Resource and Environmental Economics

Trade and Development

Public Health Economics

Transportation Economics (MA/MS only)

Graduate Minor

Applied Economics

The Department of Applied Economics offers the Bachelor of Science degree in Agricultural Business Management and the Bachelor of Science degree in Environmental Economics and Policy. These degrees open doors to exciting careers in the traditional areas of commercial agriculture, agricultural business management, and agricultural policy, and in the newer career areas of natural resource and environmental management, marine resources, international trade and development, rural growth and change, and environmental and resource law.

The Agricultural Business Management (ABM) major prepares students for unique challenges and opportunities in agricultural business careers. It combines economic and business principles and their application to farms and ranches, companies processing and marketing farm products, and companies supplying goods and services to farmers and other businesses. The curriculum combines skills in marketing, business management, accounting, and economic analysis with a minor appropriate to a student's professional goals and interests.

CAREER OPPORTUNITIES FOR UNDERGRADUATES

Graduates may pursue a number of attractive career opportunities. Agricultural Business Management (ABM) majors may move directly into professional jobs with agribusiness firms, financial and insurance institutions, or manage their own agribusinesses. Environmental Economics and Policy (EEP) students can serve effectively as members of interdisciplinary teams involved in resource and environmental management, planning, and policy analysis. Government job opportunities include management, planning, and analysis positions with federal, state, and local government agencies. Private company opportunities include similar positions with utility companies, banks, consulting firms, and resource management companies. The EEP degree also provides an excellent foundation for graduate work in economics, as well as law, public policy, and urban planning.

GRADUATE PROGRAM IN APPLIED ECONOMICS

The Graduate Program in Applied Economics offers the MS and PhD degrees in Applied Economics. Graduates pursue academic, analytical, and policy careers in universities, consulting, trade associations, firms, and government. Core course work consists of microeconomic and macroeconomic theory, econometrics, and other quantitative methods. Field (concentration) and elective courses include natural resources and the environment, energy, trade, economic development, marine and coastal resources, and health care. Program emphasis is on theory's applications to real-world settings, institutions, and problems. Faculty are in the Applied Economics Department; the Colleges of Forestry, Agricultural Sciences, and Liberal Arts; the College of Earth, Ocean, and Atmospheric Sciences; and the School of Public Health and Human Sciences.

UNDERGRADUATE MAJORS WITH OPTIONS**AGRICULTURAL BUSINESS MANAGEMENT (BS, HBS)**

The BS in Agricultural Business Management (ABM) degree curriculum blends course work in agricultural economics, business, agricultural sciences, computer science, arts, and humanities so that graduates can respond to the unique challenges and opportunities in agribusiness vocations.

All ABM students must select a minor (minimum of 27 credits) appropriate to their professional goals and interests. An internship or project is required to integrate course work with business-oriented experiences.

ENVIRONMENTAL ECONOMICS AND POLICY (BS, HBS)

Students pursuing the BS in Environmental Economics and Policy degree must choose one of three options:

1. The **Environmental Economics Option** focuses on development of strong economic and statistical skills and their use in the analysis, while providing flexibility to incorporate interests in the biological, physical or social sciences.
2. The **Environmental Policy Option** focuses on course work in environmental sciences, political sciences, and related subject areas with a greater focus on the socio-economic dimensions of environmental sciences.
3. The **General Option** allows the greatest flexibility for students to create their own curriculum, including senior research projects.

OPTIONS**ENVIRONMENTAL ECONOMICS OPTION**

The Environmental Economics option focuses on development of strong economic and statistical skills and their use in the analysis, while providing flexibility to incorporate interests in the biological, physical or social sciences.

UNDERGRADUATE MINORS**AGRICULTURAL BUSINESS MANAGEMENT MINOR**

The Agricultural Business Management minor is available to students who are not pursuing the ABM major. Business Administration majors planning to minor in Agricultural Business Management must see both a College of Business advisor and a Department of Applied Economics advisor to discuss certain course restrictions in the minor. Business majors must choose alternate courses to replace the credits that are also in the Business Administration major.

Each minor in the Applied Economics Department is created to provide students within and outside the discipline the opportunity to study a secondary area. Each minor requires 27 credits of course work in addition to the student's major. At least 12 of the 27 credits must be upper division. No credits counted toward the minor can be courses also counted toward the student's major.

- Agricultural Business Management (ABM) majors may not elect to complete an Agricultural Business Management.
- Environmental Economics and Policy (EEP) majors may not elect to complete a Resource Economics or Natural Resource and Environmental Law and Policy minor.

Required Courses (14–15 credits)

AREC 211. Management in Agriculture (4)
 AREC 221. Marketing in Agriculture (3)
 AREC 250. *Introduction to Environmental Economics and Policy (3)
 or ECON 201. *Introduction to Microeconomics (4)
 AREC 311. Microecon: Tools for Consumer Choice/Production Efficiency (4)

Students will work with the academic advisor in the Department of Applied Economics to select additional courses for a total of 27 credits.

Total=27**NATURAL RESOURCE AND ENVIRONMENTAL LAW AND POLICY MINOR**

The Natural Resource and Environmental Law and Policy Minor is available to students who are not pursuing the EEP major.

Each minor in the Applied Economics Department is created to provide students within and outside the discipline the opportunity to study a secondary area. Each minor requires 27 credits of course work in addition to the student's major. At least 12 of the 27 credits must be upper division. No credits counted toward the minor can be courses also counted toward the student's major.

- Agricultural Business Management (ABM) majors may not elect to complete an Agricultural Business Management minor.
- Environmental Economics and Policy (EEP) majors may not elect to complete a Resource Economics or Natural Resource and Environmental Law and Policy minor.

Required Courses (11 credits)

AREC 253. *Environmental Law, Policy and Economics (4)
 AREC 432. Environmental Law (4)
 FOR 462. Natural Resource Policy and Law (3)

Students will work with the academic advisor in the Department of Applied Economics to select additional courses for a total of 27 credits.

Total=27**RESOURCE ECONOMICS MINOR****Also available via Ecampus.**

The Resource Economics minor is available to students who are not pursuing the EEP major.

Each minor in the Applied Economics Department is created to provide students within and outside the discipline the opportunity to study a secondary area. Each minor requires 27 credits of course work in addition to the student's major. At least 12 of the 27 credits must be upper division. No credits counted toward the minor can be courses also counted toward the student's major.

- Agricultural Business Management (ABM) majors may not elect to

complete an Agricultural Business Management minor.

- Environmental Economics and Policy (EEP) majors may not elect to complete a Resource Economics or Natural Resource and Environmental Law and Policy minor.

Required Courses (16–17 credits)

AREC 250. *Introduction To Environmental Economics and Policy (3)
 or ECON 201. *Introduction to Microeconomics (4)
 AREC 311. Microecon: Tools for Consumer Choice/Production Efficiency (4)

 AREC 351. *Natural Resource Economics and Policy (3)
 AREC/ECON 352. *Environmental Economics and Policy (3)
 ECON 202. *Introduction to Macroeconomics (4)

Students will work with the academic advisor in the Department of Applied Economics to select additional courses for a total of 27 credits.

Total=27**APPLIED ECONOMICS (MA, MS, PhD, MAIS)****Graduate Areas of Concentration**

Resource and environmental economics, trade and development, public health economics, and transportation economics (MA, MS only)

The Applied Economics Graduate Program provides students with a strong foundation in economic theory, and quantitative methods while reserving sufficient flexibility to specialize in their areas of interest. The core curriculum includes courses in microeconomic and macroeconomic theory, in quantitative methods, and includes a set of qualifying examinations. Additional course work is required in the areas of concentration, which include: research and environmental economics, trade and development, public health economics, transportation economics, and an open area of concentration. The open area can accommodate students' interests in applied economic policy, sustainable development, food and climate policy, and marine issues. The hallmark of the Applied Economics Graduate Program is the training of students to understand and utilize economic theories, principles, and methods to examine real-world problems with significant attention to data, institutions, and context.

Since faculty from across campus are members of the graduate faculty in Applied Economics, and are potential research advisors, the Applied Economics Graduate Program allows students to work with faculty who most closely match their interests.

These faculty reside in many academic departments at Oregon State University,

including the Department of Applied Economics, the School of Public Policy, the Department of Forest Ecosystems and Society, the Department of Forest Resources, Engineering and Management, and the College of Public Health and Human Sciences. Many students are supported by graduate teaching or graduate research assistantships. The Graduate School website also provides information related to financing your graduate education.

For detailed information on the Applied Economics Graduate Program, please review the web page at <http://arec.oregonstate.edu/aec> or contact Dr. Steve Buccola, Director of Admissions, Applied Economics Graduate Program, 213 Ballard Extension Hall, OSU, Corvallis, OR 97331 or phone:541-737-1410, or email: applied.economics@oregonstate.edu.

GRADUATE MINORS

APPLIED ECONOMICS GRADUATE MINOR

For detailed information on the Applied Economics Graduate Program, please review the web page at <http://arec.oregonstate.edu/aec> or contact Dr. Steve Buccola, Director of Admissions, Applied Economics Graduate Program, 213 Ballard Extension Hall, OSU, Corvallis, OR 97331 or phone:541-737-1410, or email: applied.economics@oregonstate.edu.

RURAL STUDIES GRADUATE MINOR

Rural communities—both in the U.S. and globally—face an extraordinarily complex set of challenges due to sparse settlements and geographic isolation, exacerbated by globalization and technological change in an interdependent urban-rural system. Addressing these challenges requires both the theoretical insights of multiple disciplines and the practical wisdom that derives from engagement in solving actual problems in rural places. Emerging approaches to the study of rural people and places offer opportunities to examine rural issues from the perspective of multiple disciplines and diverse research methods that can capture the complexities at the intersections of place and space. Yet graduate training programs in these new approaches to rural studies are scarce.

Offered through campus and field-based experiential education, the graduate minor in Rural Studies provides students with the skills and competencies needed to understand economic, social, political and cultural dynamics of rural places.

The Rural Studies minor complements and supports other programs at OSU including the Master of Public Policy's concentration in rural policy and other graduate programs where students and

faculty engage in rural issues such as applied economics, anthropology, forest ecosystems and society, geosciences, and human development and family sciences.

Required Core (7 credits)

FS/RS 511, FS/RS 611X. Communities and Natural Resources (5)
RS 512X. Introduction to Rural Studies (1)
RS 513X. Contemporary Rural Issues (1)

Required (Minimum 11 credits)

ANTH 571. Cash, Class and Culture: Hunter-Gatherers to Capitalism (4)
ANTH 581. Natural Resources and Community Values (4)
ANTH 584. Wealth and Poverty (3)
ANTH 582. Anthropology of International Development (3)
ANTH 586. Anthropology of Food (2–6)
ANTH 599. Special Topics: Ethnographic FieldSchool 1-16
ANTH 599. Special Topics: Rural Anthropology (3)
AREC 554. Rural Development Economics and Policy (3)
ENG 582. Studies in American Literature, Culture, and the Environment (3)
ES 544. Native American Law: Tribes, Treaties, and the U.S. (3)
ES 548. Native American Philosophies (3)
GEO 520. Geography of Resource Use (3)
GEO 523. Land Use in the American West (3)
GEO 526. Third-World Resource Development (3)
GEO 552. Principles and Practices of Rural and Resource Planning (3)
HDFS 547. Families and Poverty (3)
H 520. Health Disparities (3)
PS 553. The Geopolitics of Oil and Energy (4) [*Pending approval*]
RS 502. Independent Study (1–16)
PS 575. Environmental Politics and Policy (4)
SNR 520. Social Aspects of Sustainable Natural Resources (3) [*Ecampus only*]
SOC 526. Social Inequality (4)
SOC 554. Leisure and Culture (4)
SOC 556. Science and Technology in a Social Context (4)
SOC 560. Comparative Societies (4)
SOC 566. International Development: Gender Issues (4)
SOC 575. Rural Sociology (4)
SOC 580. Environmental Sociology (4)
SOC 581. Society and Natural Resources (4)

Total=18 credits

■ APPLIED ECONOMICS COURSES

AEC 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.
AEC 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.
AEC 503. THESIS/DISSERTATION (1-16). This course is repeatable for a maximum of 999 credits.
AEC 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.
AEC 506. SPECIAL PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.
AEC 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

AEC 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

AEC 512. MICROECONOMIC THEORY I (4). Fundamental topics in microeconomic theory. Topics include utility maximization and consumer demand, profit maximization and the theory of the firm, and labor and capital markets. **PREREQS:** AREC 312 and MTH 252 or equivalent.

AEC 513. MICROECONOMIC THEORY II (4). Emphasizes principles for microeconomic theory at the master's level. Builds upon the foundations covered in AEC 512, and extends the theory and principles to cover uncertainty, game theory, competitive market equilibrium and welfare analysis, imperfect competition, and market failures. Primary emphasis is on understanding microeconomic theory and the underlying assumptions, and how it is applied to real world settings. **PREREQS:** AEC 512

AEC 515. MACROECONOMIC THEORY (4). Macroeconomic theory and policy that covers the historical foundations and evolution of modern macroeconomic thought. Topics include the equilibrium determination of output, employment, prices, wages, and interest rates; the causes and consequences of economic fluctuations; monetary and fiscal policies; micro-foundations; and the role of expectations. **PREREQS:** ECON 315 and MTH 251 or equivalent.

AEC 523. PRELIMINARIES FOR QUANTITATIVE METHODS (4). Examines mathematical and statistical topics essential for subsequent courses in graduate-level econometric analysis and quantitative methods. The course focuses on matrix algebra, probability and distribution theory (emphasizing joint and conditional distributions), statistical inference, properties of estimators, and iterative methods for solving non-linear systems. **PREREQS:** (ST 351 or ST 352 or ECON 424 or ECON 524) and MTH 253

AEC 525. APPLIED ECONOMETRICS (4). General principles of applied econometric research are emphasized, including model building, data analysis, hypothesis testing, and evaluation and interpretation of results. A variety of estimators are applied to real data, including least squares, panel data, simultaneous equations, discrete choice, and limited dependent variable models.

AEC 599. SPECIAL TOPICS (1-16). Various topics in applied economics of special and current interest not covered in other courses. This course is repeatable for a maximum of 16 credits.

AEC 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

AEC 602. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.

AEC 603. THESIS/DISSERTATION (1-16). This course is repeatable for a maximum of 999 credits.

AEC 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

AEC 606. SPECIAL PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

AEC 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

AEC 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

AEC 611. ADVANCED MICROECONOMIC THEORY I (4). A rigorous development of the theory of consumption and production, with emphasis on duality. **PREREQS:** (AEC 512 and AEC 513) and MTH 254 or equivalent.

AEC 612. ADVANCED MICROECONOMIC THEORY II (4). A rigorous extension of the theory of the consumer and firm to aggregate and heterogeneous populations, decision making under uncertainty, and related game theory concepts. **PREREQS:** AEC 611

AEC 613. ADVANCED MICROECONOMIC THEORY III (4). A rigorous development of the theory of competitive equilibrium, market power, public goods, and information. **PREREQS:** AEC 612

AEC 615. ADVANCED MACROECONOMIC THEORY (4). Introduction to modern macroeconomic theory on economic growth and fluctuations, including a review of Keynesian theory, optimal control theory and dynamic programming, exogenous and endogenous growth models, government budget deficit and debt, and unemployment theories. **PREREQS:** Intermediate macroeconomics or equivalent.

AEC 625. ADVANCED ECONOMETRICS I (4). Emphasizes basic theory underlying the main types of estimators used in econometrics, as well as their application in empirical research. Includes derivation, properties, and application of ordinary and generalized method of moments, maximum likelihood, and ordinary and generalized least squares estimators, statistical inference and hypothesis testing, and model building and specification analysis. **PREREQS:** AEC 523

AEC 626. ADVANCED ECONOMETRICS II (4). Extensions to the generalized linear regression model are considered: discrete choice, limited dependent variable, panel data, and simultaneous equations models, and new solutions to identification problems. Strong applied orientation, emphasizing problems of data measurement, model selection and specification. **PREREQS:** AEC 625

AEC 627. COMPUTATIONAL ECONOMICS (4). Covers the numerical analysis of static optimization models and stochastic dynamic models in resource and development economics, emphasizing formulation, solution, and simulation of dynamic optimization, rational expectations, and arbitrage pricing models. **PREREQS:** (AEC 512 and AEC 523)

AEC 699. SPECIAL TOPICS (1-16). Various topics in applied economics of special and current interest not covered in other courses. This course is repeatable for a maximum of 16 credits.

■ AGRICULTURAL AND RESOURCE ECONOMICS COURSES

AREC 121. DISCOVERING AGRICULTURAL AND RESOURCE ECONOMICS (2). Explore issues, opportunities, and challenges in the dynamic and diverse employment field of agricultural and resource economics. Case studies and field trips.

AREC 199. SPECIAL TOPICS (1-4). Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 8 credits.

AREC 211. MANAGEMENT IN AGRICULTURE (4). Economic and business principles applied to the management of agribusiness firms, including farms and ranches; goal-setting and management information; planning and decision-making tools; acquiring, organizing, and managing land, labor, and capital resources. **PREREQS:** (AREC 250 or ECON 201 or ECON 201H) and .

AREC 221. MARKETING IN AGRICULTURE (3). Organization and functions of domestic and international markets; market channels for various agricultural commodities; role of agribusiness, cooperatives, and government in marketing decisions. **PREREQS:** (AREC 250 or ECON 201 or ECON 201H)

AREC 240. *RURAL ECONOMICS OF PLACE AND PEOPLE (3). Provides perspective on issues influencing rural communities and economic development in rural America. People, places and natural resources of rural communities play a vital role in economic vitality of the West, yet rural landscapes are changing faster than many urban counterparts.

AREC 250. *INTRODUCTION TO ENVIRONMENTAL ECONOMICS AND POLICY (3). Examines how economic forces and social institutions cause environmental degradation and help build management solutions. Explains key economic concepts for valuing environmental resources and evaluating the trade-offs of alternative management approaches from private markets to regulation. Applies the concepts and theories to topical environmental issues such as water pollution and conserving biodiversity. (Bacc Core Course) **PREREQS:** MTH 111 or equivalent is recommended.

AREC 253. *ENVIRONMENTAL LAW, POLICY, AND ECONOMICS (4). A general introduction to federal environmental law and policy in the U.S. Familiarizes students with basic legal institutions and concepts of the American legal system, outlines the transition of environmental policy from its common law roots to its modern administrative law form, and gives an overview of the major federal environmental statutes. Relationships among legal theory and process and economic principles are emphasized. (Bacc Core Course)

AREC 299. SPECIAL TOPICS (1-4). Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 8 credits.

AREC 300. APPLIED ECONOMIC ANALYSIS (3). An intermediate level primer of microeconomic principles focusing on consumption and production theory and its application in the agriculture industry. The course serves as a bridge between principles of economics and intermediate economic theory courses. Both abstract and mathematical formulations of economic principles are emphasized. **PREREQS:** ((ECON 201 or ECON 201H or AREC 250) and MTH 241)

AREC 311. MICROECON: TOOLS FOR CONSUMER CHOICE/PRODUCTION EFFICIENCY (4). An examination of the theories of consumer behavior and demand, production cost, the firm, supply, and competitive and monopoly market structures. **PREREQS:** (AREC 250 or ECON 201 or ECON 201H and (MTH 241 or MTH 251 or MTH 251H)) and .

AREC 313. WELFARE ECONOMICS AND RESOURCE POLICY (3). Focuses on the intermediate microeconomic theory of social welfare and decision-making. Topics include welfare theory, externalities and public goods, public choice, uncertainty, asymmetric information, and cost-benefit analysis. Substantial attention will be given to the implications of these theories for real-world problems, especially regarding resource and environmental issues. **PREREQS:** (AREC 311 or ECON 311)

AREC 351. *NATURAL RESOURCE ECONOMICS AND POLICY (3). Application of principles of economics to identify the causes, consequences, and ways of dealing with natural resource problems, including problems associated with fisheries, forests, water resources, and land. Conceptual topics and policy applications. Emphasis is on developing students' skill in applying an economic way of thinking about natural resource management. (Bacc Core Course) **PREREQS:** (AREC 250 or ECON 201 or ECON 201H) and MTH 111

AREC 352. *ENVIRONMENTAL ECONOMICS AND POLICY (3). Provides an overview of the interrelationships between economic activity, the environment, and public policy. Through case studies, discussion groups, readings, and group activities, students learn how economists define and analyze environmental problems and the types of policies they advocate for managing environmental quality. **CROSSLISTED** as ECON 352. (Bacc Core Course) **PREREQS:** AREC 250 or ECON 201 or ECON 201H

AREC 371. TOPICS IN GLOBALIZATION (1). Surveys current economics issues associated with globalization.

AREC 372. AGRICULTURAL COOPERATIVES (3). An introduction to and in-depth examination of the agricultural cooperative. Students will gain a working knowledge of the concepts, principles, and terminology of agricultural cooperatives through reference materials, lectures, presentations by guest speakers and a cooperatives tour. Students will consider the strengths and weaknesses of the agricultural cooperative as well as the unique management and operational challenges inherent to this form of business operation.

AREC 382. FARM AND RANCH APPRAISAL (4). An introduction to appraisal of rural real estate, including methods of valuing property, different types of appraisals, and preparation and interpretation of an appraisal report. Not offered every year. **PREREQS:** (ECON 201 or ECON 201H or AREC 250) and AREC 211) and or instructor approval.

AREC 388. AGRICULTURAL LAW (4). Application of legal principles to business decision making in farming, ranching, and the agricultural support industry. Consideration of the obligations arising out of contract, tort, property, water, public land, and natural resource law. Not offered every year.

AREC 399. SPECIAL TOPICS (1-4). Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 8 credits.

AREC 399H. SPECIAL TOPICS (1-4). Targeted courses that focus on specific topics in agricultural and resource economics. Topics may vary from term to term and from year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 8 credits. **PREREQS:** Honors College approval required.

AREC 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

AREC 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

AREC 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior standing, departmental approval required.

AREC 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

AREC 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

AREC 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

AREC 407H. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

AREC 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

AREC 410. INTERNSHIP (1-6). Practical on-the-job training in agricultural business, marketing, commercial agricultural production, or related private or public organizations. Graded P/N. This course is repeatable for a maximum of 6 credits. **PREREQS:** Junior or senior standing. Submission and approval of pre-internship work plans. Internship program coordinator approval required.

AREC 421. ECONOMICS OF RURAL POVERTY AND THE U.S. SOCIAL SAFETY NET (4). Examines the geography of poverty in the United States and the "social safety net" that the U.S. has constructed to reduce poverty and its negative effects. Understand the geographical consequences of federal policies and the

challenges of providing social safety net programs in rural areas.

AREC 432. ENVIRONMENTAL LAW (4). Legal relationships arising out of rights to air, water, and land. The impact of federal and state regulation on pollution control and on the production, use, and disposal of hazardous materials. **PREREQS:** Junior standing.

AREC 434. ^MEASURING RESOURCE AND ENVIRONMENTAL IMPACTS (4). Examines economic perspectives on the allocation of natural resources and the management of environmental quality, emphasis on the use of economic concepts in the design and evaluation of public policies. Not offered every year. (Writing Intensive Course) **PREREQS:** AREC 313

AREC 438. EXPLORING WORLD AGRICULTURE (2). Survey of crop and livestock production in a designated section of the world, including history, culture, and political situation. Course is designed to prepare students for a tour of study area. Not offered every year. **CROSSLISTED** as ANS 438, CROP 438, CSS 438, HORT 438. Graded P/N. This course is repeatable for a maximum of 8 credits.

AREC 441. AGRICULTURAL FINANCIAL MANAGEMENT (4). Principles of financial management in production agriculture and agribusiness; financial statements, budgets, and capital investment analysis; business organization forms; legal aspects of borrowing; sources and terms of agricultural credit; taxation. EOU campus only. **PREREQS:** AREC 211 and (AREC 300 or AREC 311) and BA 340

AREC 442. AGRICULTURAL BUSINESS MANAGEMENT (4). Application of economic, financial, and strategic management principles to agricultural business with a focus on a case-study framework for analysis and business decision making for alternative business management strategies.

AREC 444. COMMODITY FUTURES AND OPTIONS MARKETS (4). Provides an overview of the basic concepts needed to use commodity futures and options markets to successfully manage price risk. To address the increasingly global economy in which commodity transactions occur, the course also includes financial futures such as interest rates and currencies. Specific topics covered include contract standardization, speculation and hedging, opening and closing of positions, and basis, i.e. the relationship between cash and futures markets, input-output hedges, and spreads. Students also gain hands-on experience through a trading simulation.

AREC 447. AGRICULTURAL PRICE AND MARKET ANALYSIS (4). Price determination for agricultural commodities and factors; quantitative analysis of prices, factors and markets; agricultural market structures, performance, and roles of institutions. Lec/lab. **PREREQS:** (AREC 300 or AREC 311 or ECON 311) and AREC 370 and ST 351.

AREC 448. ADVANCED READINGS IN ENVIRONMENTAL ECONOMICS AND POLICY (1). Introduces advanced theories and applications of environmental economics to selected policy concerns in the PNW and more globally. Attention will be directed to the methodology underpinnings of environmental policies and instruments using case studies on current, real world management issues. Offered in winter term odd years. **PREREQS:** (AREC 311 and AREC 351 and AREC 352)

AREC 449. RENEWABLE ENERGY ALTERNATIVES: ECONOMICS AND TECHNOLOGY (1). An overview of sustainable energy concepts and economic issues relevant to understanding the potential role of renewable energy in the nation's total energy mix. Offered even years. **PREREQS:** (AREC 250 or ECON 201)

AREC 450. VALUING ECOSYSTEM SERVICES (1). Explores the economic dimensions of policies that are impacted by and target ecosystem

services, including markets for ecosystem services, and the connections to institutions, regulations, and societal preferences. Offered in winter term odd years. **PREREQS:** (AREC 351 or AREC 352)

AREC 452. MARINE ECONOMICS (3). Economic aspects of marine resource utilization and management will be analyzed. Topics include open access aspect of marine resources; conflict and allocation of marine resources, marine resource markets, marine recreation, pollution, and aquaculture, with special emphasis on commercial fisheries. Offered every fall in odd years. **PREREQS:** (AREC 351 or AREC 352)

AREC 454. RURAL DEVELOPMENT ECONOMICS AND POLICY (3). Theories of economic change in developed and less-developed economies; natural resource sectors and the development of rural regions, with emphasis on growth, diversification, and instability; resource mobility and the spatial aspects of development; poverty and inequality; rural development policy. Not offered every year. **PREREQS:** (AREC 300 or AREC 311)

AREC 456. ECONOMICS OF WATER CONSERVATION (1). Students will analyze water conservation by examining the relationship between economic and technological efficiency in water systems and management; and the competition between water and energy needs. Offered in spring term even years. **PREREQS:** (AREC 311 and AREC 313)

AREC 457. ECONOMICS AND GLOBAL CLIMATE CHANGE (1). Uses economic concepts to explore and critically assess the economic impacts of climate change and policies to address both mitigation and adaptation. Attention will be directed to the global dimensions of these resource issues, recent and proposed policies to address the climate change, and focus on the agricultural sectors in the PNW and globally. Offered in winter term even years. **PREREQS:** (AREC 311 and AREC 351 and AREC 352)

AREC 458. ECONOMICS OF SUSTAINABLE GROWTH AND DEVELOPMENT (1). Uses economic concepts to explore and critically assess fundamental questions about economic growth, development, and sustainability. Offered in winter term even years. **PREREQS:** (AREC 250 or ECON 201)

AREC 460. CAPITAL INVESTMENT ANALYSIS USING AGTOOLS (3). Learn and understand the important factors in measuring the impacts of implementing technologies and/or conservation practices, adding value to products, or changing cropping systems or livestock enterprises. The AgTools TM software programs will be used to apply financial and economic principles to better understand and reduce the financial, production, marketing, and human resource risks facing agribusinesses.

AREC 461. ^AGRICULTURAL AND FOOD POLICY ISSUES (4). Principles of agricultural and food policy formulation; agricultural adjustment processes; agricultural price and income policies in relation to land use, water, and rural development policies; interrelationships among U.S. and foreign agriculture and trade policies. (Writing Intensive Course) **PREREQS:** (AREC 250 or ECON 201 or ECON 201H) and (AREC 300 or AREC 311 or ECON 311)

AREC 462. THE ECONOMIC HISTORY OF AMERICAN AGRICULTURE (3). Focuses on the historical development of the agricultural industry in the United States from the time of settlement through recent times. The colonial years, expansion into Western territories, development of new technologies, and the eventual emergence of government as an important force in agriculture receive special attention. The relationship between agriculture and the remainder of the economy call attention to poverty, money and banking, pure food laws, and the reaction to the New Deal.

AREC 465. M/AGRICULTURAL FINANCIAL REPORTING AND ANALYSIS (3). Covers balance sheet, income statement, statement of cash flows, and statement of owner equity, using standards outlined by the Farm Financial Records Task Force. Also the use of ratios to evaluate financial performance. **PREREQS:** AREC 211 and AREC 300 and BA 215 and BA 340

AREC 467. M/CAPITAL BUDGETING IN AGRICULTURE (1). Overview of capital budgeting techniques as applied to agribusiness decisions. Specific topics include methods of controlling land, leasing versus buying nonland capital assets. **PREREQS:** AREC 211 and AREC 300 and BA 340

AREC 468. M/CROP ENTERPRISE BUDGETING (1). Develop and calculate the per acre costs and returns of producing a crop enterprise. Includes the costs of owning and operating farm machinery. Distinguish between accountants' and economists' definitions of production costs. **PREREQS:** AREC 211

AREC 469. M/LIVESTOCK ENTERPRISE BUDGETING (1). Develop and calculate the costs and returns of producing a livestock enterprise. Includes the costs of raising breeding animals, as well as owning and operating machinery and livestock facilities. Distinguish between accountants' and economists' definition of production costs. **PREREQS:** AREC 211

AREC 470. M/FARM BUDGETING AND PLANNING (1). The process of planning a farm. Developing long-run whole farm budgets, cash flow planning/budgeting, monitoring and control, and year end analysis. **PREREQS:** AREC 211 and BA 215

AREC 475. M/NEGOTIATION IN BUSINESS AND RESOURCE MANAGEMENT (1). Understanding the theory and processes of negotiation as it is practiced in a variety of settings. The course covers distributive and integrative bargaining, dealing with the complexities of multi-party and multi-issue negotiations, and ethical issues that arise in negotiations. **PREREQS:** Junior or senior standing.

AREC 476. M/AGRICULTURAL PERSONNEL MANAGEMENT (2). A primer on agricultural personnel management including such topics as economic principles related to agricultural labor/management relations, the hiring process, performance appraisal, wage/benefit compensation, promotion/termination, personnel management from the employer perspective, and personnel management from the employee perspective.

AREC 499. SPECIAL TOPICS (1-3). Various topics in agricultural and resource economics of special and current interest not covered in other courses. This course is repeatable for a maximum of 9 credits.

AREC 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

AREC 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

AREC 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

AREC 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

AREC 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

AREC 521. ECONOMICS OF RURAL POVERTY AND THE U.S. SOCIAL SAFETY NET (4). Examines the geography of poverty in the United States and the «social safety net» that the U.S. has constructed to reduce poverty and its negative effects. Understand the geographical consequences of federal policies and the challenges of providing social safety net programs in rural areas.

AREC 532. ENVIRONMENTAL LAW (4). Legal relationships arising out of rights to air, water, and land. The impact of federal and state regulation on pollution control and on the production, use, and disposal of hazardous materials. **PREREQS:** Graduate standing.

AREC 534. ENVIRONMENTAL AND RESOURCE ECONOMICS (3). Examines environmental and natural resource issues emphasizing the role of economics in understanding their causes, consequences, and potential solutions (e.g. air, water, fish, forests, climate change, biodiversity). Reviews welfare economics, market failures, externalities, property rights. Covers non-market valuation, innovative market and regulatory policies. **PREREQS:** AREC 311 or instructor permission.

AREC 543. INTERNATIONAL TRADE (4). Introduction to the major theories of international trade and to models that are useful for applied policy and regional analysis. Effects of trade and trade policy on consumers, workers, and firms are emphasized. Not offered every year. **PREREQS:** (AEC 513 and AEC 523)

AREC 544. COMMODITY FUTURES AND OPTIONS MARKETS (4). Provides an overview of the basic concepts needed to use commodity futures and options markets to successfully manage price risk. To address the increasingly global economy in which commodity transactions occur, the course also includes financial futures such as interest rates and currencies. Specific topics covered include contract standardization, speculation and hedging, opening and closing of positions, and basis, i.e. the relationship between cash and futures markets, input-output hedges, and spreads. Students also gain hands-on experience through a trading simulation.

AREC 550. ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS (4). Presents concepts, theories, and methods used in the economic analysis of environmental and natural resource issues. The emphasis is on the economics of environmental policies and the development of decision rules regarding the efficient use of natural resources. **PREREQS:** AEC 512

AREC 551. NATURAL RESOURCE ECONOMICS (3). Brief introduction to welfare economics with emphasis on defining economic efficiency, intertemporal efficiency, and other criteria for economic policy; property rights and natural resource use; sources of inefficient allocation of natural resources; benefit-cost analysis with full and limited information; exhaustible resources; renewable resources; conservation and preservation. Not offered every year. **PREREQS:** (AREC 512* or ECON 512*)

AREC 552. MARINE ECONOMICS (3). Economic aspects of marine resource utilization and management will be analyzed. Topics include open access aspect of marine resources; conflict and allocation of marine resources, marine resource markets, marine recreation, pollution, and aquaculture, with special emphasis on commercial fisheries. Offered every fall in odd years. **CROSSLISTED** as MRM 552 **PREREQS:** AREC 351 or AREC 352

AREC 554. RURAL DEVELOPMENT ECONOMICS AND POLICY (3). Theories of economic change in developed and less-developed economies; natural resource sectors and the development of rural regions, with emphasis on growth, diversification, and instability; resource mobility and the spatial aspects of development; poverty and inequality; rural development policy. Not offered every year. **PREREQS:** AREC 300 or AREC 311

AREC 556. ECONOMICS OF WATER CONSERVATION (1). Students will analyze water conservation by examining the relationship between economic and technological efficiency in water systems and management; and the

competition between water and energy needs. Offered in spring term even years. **PREREQS:** AREC 311 and AREC 313

AREC 560. CAPITAL INVESTMENT ANALYSIS USING AGTOOLS (3). Learn and understand the important factors in measuring the impacts of implementing technologies and/or conservation practices, adding value to products, or changing cropping systems or livestock enterprises. The AgTools TM software programs will be used to apply financial and economic principles to better understand and reduce the financial, production, marketing, and human resource risks facing agribusinesses.

AREC 562. THE ECONOMIC HISTORY OF AMERICAN AGRICULTURE (3). Focuses on the historical development of the agricultural industry in the United States from the time of settlement through recent times. The colonial years, expansion into Western territories, development of new technologies, and the eventual emergence of government as an important force in agriculture receive special attention. The relationship between agriculture and the remainder of the economy call attention to poverty, money and banking, pure food laws, and the reaction to the New Deal.

AREC 565. M/AGRICULTURAL FINANCIAL REPORTING AND ANALYSIS (3). Covers balance sheet, income statement, statement of cash flows, and statement of owner equity, using standards outlined by the Farm Financial Records Task Force. Also the use of ratios to evaluate financial performance. **PREREQS:** AREC 211 and AREC 300 and BA 215 and BA 340

AREC 567. M/CAPITAL BUDGETING IN AGRICULTURE (1). Overview of capital budgeting techniques as applied to agribusiness decisions. Specific topics include methods of controlling land, leasing versus buying nonland capital assets. **PREREQS:** AREC 211 and AREC 300 and BA 340

AREC 599. SPECIAL TOPICS (1-16). Various topics in agricultural and resource economics of special and current interest not covered in other courses. May be repeated for credit when topics differ. This course is repeatable for a maximum of 16 credits.

AREC 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

AREC 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

AREC 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

AREC 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

AREC 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

AREC 640. SUSTAINABLE DEVELOPMENT (3). Surveys research on the quantitative economic analysis of sustainable development, with an emphasis on integrated assessment methods and models and their application to agriculture and rural development policy, agricultural technology impact assessment, and climate change impact assessment.

AREC 643. TRADE AND DEVELOPMENT (4). Introduction to advanced topics in modern trade theory, including technology and trade, distributional effects of trade with emphasis on regional development, trade and the environment, and multilateral trade negotiations. Applications of the above theories to specific industries are emphasized. **PREREQS:** (AREC 543 and AEC 612* and AEC 625*)

AREC 651. ADVANCED NATURAL RESOURCE ECONOMICS (3). Dynamic allocation of scarce exhaustible and renewable natural resources, social versus private decisions; market and non-market considerations; technological change;

regulation; dynamics and uncertainty. Not offered every year. **PREREQS:** AREC 513 and AREC 526

AREC 652. ADVANCED ENVIRONMENTAL ECONOMICS (3). Interrelationships of natural resource use and the environment; applied welfare and benefit-cost analysis; externalities and pollution abatement; non-market valuation of resources; property rights; legal and social constraints; policy approaches. Not offered every year. **PREREQS:** ((AREC 513 or ECON 513) and (AREC 526 or ECON 526))

AREC 653. SPATIAL ECONOMICS OF NATURAL RESOURCES (3). Introduces the tools of spatial economics and demonstrates how those tools have been applied to various natural resources. Taught winter term every even year. **PREREQS:** AREC 651

AREC 699. SPECIAL TOPICS (1-16). Various topics in agricultural and resource economics of special and current interest not covered in other courses. This course is repeatable for a maximum of 16 credits.

■ RURAL STUDIES COURSES

RS 421. ECONOMICS OF RURAL POVERTY AND THE U.S. SOCIAL SAFETY NET (4). Examines the geography of poverty in the United States and the "social safety net" that the U.S. has constructed to reduce poverty and its negative effects. Understand the geographical consequences of federal policies and the challenges of providing social safety net programs in rural areas. **CROSSLISTED** as AREC 421.

RS 499. SPECIAL TOPICS (1-5). This course is repeatable for a maximum of 9 credits.

RS 502. INDEPENDENT STUDY (1-6). This course is repeatable for a maximum of 9 credits.

RS 512. INTRODUCTION TO RURAL STUDIES (2). Introduces students to the emerging theoretical perspectives, methodologies, and critical themes that define rural studies in the U.S. and elsewhere. It draws primarily from the disciplines of sociology, economics, anthropology, human development and geography, examining how each discipline understands and analyzes rural households and communities.

RS 513. CONTEMPORARY RURAL ISSUES (2). The focus will be on issues confronting rural Oregon. The class will also explore broader U.S. and international rural issues and examine commonalities and differences across cultures and development contexts. Weekly lecturers are drawn from the OSU community and beyond, including public policy makers, rural stakeholders, and nonprofit organizations.

RS 521. ECONOMICS OF RURAL POVERTY AND THE U.S. SOCIAL SAFETY NET (4). Examines the geography of poverty in the United States and the "social safety net" that the U.S. has constructed to reduce poverty and its negative effects. Understand the geographical consequences of federal policies and the challenges of providing social safety net programs in rural areas. **CROSSLISTED** as AREC 521.

RS 556. INT'L COMPARATIVE RURAL POLICY STUDIES SUMMER INSTITUTE (5). The International Comparative Rural Policy Studies (ICRPS) annual summer institute (held in locations around the world) is designed for graduate students and professionals to broaden their knowledge of rural policy. Working in groups, students study facets of rural policy, from policy formation to policy impacts, and explore similarities and differences between their countries and those of other participants.

RS 599. SPECIAL TOPICS (1-5). This course is repeatable for a maximum of 9 credits.

Botany and Plant Pathology

UNDERGRADUATE STUDIES

Botany and plant pathology are concerned with the study of plants at all levels of biological organization, from molecular and cellular processes to the global ecosystem. This breadth of field reflects the wide range of issues and problems that confront plant biologists. In addition to addressing fundamental questions in plant biology, plant scientists in the 21st century will be called upon to provide information useful for producing food, fiber, and medicine for an increasing population, and for increasing our understanding of the diversity of plant and ecological systems and their interactions with humans. Students studying botany and plant pathology at OSU receive the basic science background necessary for such contributions, and may choose to focus in a particular area within plant science.

The undergraduate program in the Department of Botany and Plant Pathology is designed for students who wish to receive a BS in Botany degree and for students pursuing degrees in other fields that require a knowledge of plant biology. For example, students who have an undergraduate major in biology or environmental sciences may wish to emphasize botany courses in their upper-division course work.

Completion of the undergraduate curriculum in botany can qualify students for graduate work in various areas of plant biology and plant pathology, and for positions in state and federal agencies, and industries concerned with plants and their products.

Prospective botany majors should obtain a strong background in the biological and physical sciences at the high school level. Specifically recommended are a minimum of three years of high school mathematics, including algebra, geometry, and some exposure to trigonometry, one year of chemistry, one year of biology, one year of physics, and courses designed to develop computer and writing skills. Students without an adequate background in mathematics and science may make up these deficiencies early in their college careers.

GRADUATE STUDIES

The Department of Botany and Plant Pathology offers graduate programs in the following areas of concentration: applied systematics, ecology, genetics, genomics and computational biology, molecular and cellular biology, mycology, plant pathology, plant physiology, and systematics.

Students with majors in any one area may incorporate into their pro-

grams minors in other areas within the department or in other departments and colleges. Integrated minors, and interdisciplinary programs in plant physiology, molecular and cellular biology, genetics, and environmental sciences are also available.

The MS and PhD degrees offered by the Department of Botany and Plant Pathology require, in addition to course work, research resulting in presentation and defense of a thesis. A nonthesis MS degree also is available. PhD candidates must pass a written and oral preliminary examination upon completion of their course work. In addition, PhD students are required to be a teaching assistant for two quarters. The MA degree requires the knowledge of one foreign language.

Inquiries concerning graduate studies can be forwarded to the chairperson of the Department of Botany and Plant Pathology.

BOTANY (BS, CRED, HBS)

The required curriculum meets the course requirements of the university and the College of Agricultural Sciences and provides opportunity for specialized study in one or more principal areas of plant science. The undergraduate major, in regular consultation with a faculty advisor, prepares an academic program that meets university requirements, provides adequate scientific background, and fulfills individual goals and interests.

Required courses are listed below according to a suggested schedule. The order in which particular courses are taken may vary in individual cases.

All Botany undergraduate students are required to complete a focus area and its corresponding course work as part of the Botany undergraduate major. A student may choose more than one focus area; course work for focus areas should commence by the junior year. Course work delivered in these areas provide students with advanced knowledge and skills related to the study of plants and plant-like organisms in natural and managed ecosystems and in the laboratory.

Freshman Year

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)

CH 121, CH 122, CH 123. *General Chemistry (5,5,5)

OR CH 231, CH 232, CH 233. *General Chemistry (4,4,4)

and CH 261, CH 262, CH 263.

*Laboratory for Chemistry 231, 232, 233 (1,1,1)

Select 8 credits of Mathematics from the list below:

MTH 111. *College Algebra (4)

MTH 112. *Elementary Functions (4)

MTH 231. Elements of Discrete Mathematics (4)

MTH 241. *Calculus for Management and Social Science (4)

MTH 245. *Mathematics for Management, Life, and Social Sciences (4)
 MTH 251. *Differential Calculus (4)
 MTH 252. Integral Calculus (4)
 WR 121. *English Composition (3)
 Approved Speech (COMM) course (3)
 Perspective courses (6)

Sophomore Year

BI 314. Cell and Molecular Biology (4)
 BOT 220. Introduction to Plant Biology (4)
 BOT 321. Plant Systematics (4)
 CH 331, CH 332. Organic Chemistry (4,4)
 HHS 231. *Lifetime Fitness for Health (2)
 HHS 241–HHS 248. *Lifetime Fitness: (various activities) (1)
 or any PAC Course (1–2)
 Additional approved writing (WR II) course (3)
 Perspectives courses (6)
 Additional electives (9–10)

Junior Year

BB 350. Elementary Biochemistry (4)
 or BB 450 and BB 451. General Biochemistry (4,3)
 BI 311. Genetics (4)
 or PBG 430. Plant Genetics (3)
 and PBG 431. Plant Genetics Recitation (1)
 BOT 313. Plant Structure (4)
 BOT 341. Plant Ecology (4)
 ST 351. Introduction to Statistical Methods (4)
 Perspectives courses (6)
 Synthesis courses (6)
 Additional electives including botany area of concentration credits (10–13)

Senior Year

BOT 331. Plant Physiology (4)
 BOT 332. Laboratory Techniques in Plant Biology (3)

Select one Non-Vascular Plant Course:

BOT 461. Mycology (5)
 or BOT 465. Lichenology (4)
 or BOT 466. Bryology (4)

Additional Quantitative Skills Courses (select a minimum of two courses):

CS 161. Introduction to Computer Science I (4)
 CS 162. Introduction to Computer Science II (4)
 PH 201. *General Physics (5)
 PH 265. Scientific Computing (3)
 ST 352. Introduction to Statistical Methods (4)
 ST 411. Methods of Data Analysis (4)
 Others by approval of advisor.

Select one Writing Intensive Course from below:

BB/BI 317. ^Scientific Theory and Practice (3)
 BI 371. ^Ecological Methods (3)
 BOT 323. ^Flowering Plants of the World (3)
 CSS 325. ^Ag and Environmental Predicaments: A Case Study Approach (4)
 HSTS 415. **Theory of Evolution and Foundation of Modern Biology (4)
 HSTS 419. **Studies in Scientific Controversy: Methods and Practices (4)

HSTS 425. ^History of the Life Sciences (4)
 MB 311. ^Molecular Microbiology Lab: A Writing Intensive Course (3)
 Additional upper-division biological science courses other than BOT courses (4)
 Perspectives courses (6)
 Additional electives (11–14)

Botany Focus Area Requirements

Ecology, Evolution and Conservation (12)

OPTIONS

BOTANICAL RESEARCH OPTION

The Botanical Research option is designed for those undergraduate majors who desire to obtain the intensive research experience associated with the development of a thesis project.

This option requires the completion of a total of 21 credits selected from the following:

Two approved subject matter electives (6–10 credits)
 BOT 401. Research (9–12)
 BOT 403. Thesis (2–3)
 BOT 405. Reading and Conference (1–3)

To complete this option, students must follow the procedure outlined below:

- Choose a research advisor and develop the option.** Identify a research advisor from among the faculty in the Department of Botany and Plant Pathology who is willing to supervise the option. Develop a course list and overall plan for the option and have it approved by the research advisor and academic advisors.
- Develop expertise.** Complete two approved courses (6 credits minimum) in the area of the proposed research.
- Plan the research.** Develop a research proposal during one term of BOT 405, Reading and Conference (1–3 credits) (or HC 405, Reading

and Conference, for Honors College students), and have it approved by the research advisor.

- Perform the research.** Carry out the planned experimentation, receiving 9–12 credits for BOT 401, Research. (It is assumed that this credit and the associated research effort will ordinarily be distributed over several terms.)
- Report the research.**
 - Written form.** Write a document (thesis) describing the results of the research and have it approved by the research advisor and academic advisors. For this purpose, enroll in BOT 403, Thesis (2–3 credits).
 - Oral form.** Present the research results using an oral or poster presentation in a public forum approved by the research advisor and academic advisors. The presentation may be made to the department (e.g. at a BOT 407, Departmental Seminar) or at a scientific meeting for students or scientific society.

FUNGAL BIOLOGY OPTION

Required as part of the basic requirements for a botany major:

BOT 350. Introductory Plant Pathology (4)
 BOT 461. Mycology (5)

(Note: The above courses **do not** count toward the 21 credits required to complete the option.)

Select 2 to 7 credits of the following techniques courses:

BB 493. Biochemistry Laboratory (3)
 BB 494. Biochemistry Laboratory (3)
 MB 303. General Microbiology Lab (4)

Select 2 to 6 credits of the following professional experience electives:

BOT 401. Research (1–6)
 or BOT 410. Internship (1–6)
 BOT 405. Reading and Conference (1–2)
 or BOT 407. Seminar (1–2)

Select additional courses from below to bring total credits to 21:

BOT/FES 415. Forest Insect and Disease Management (5)
 BOT 465. Lichenology (4)
 BOT 590. Selected Topics in Mycology (3)
 FST 460. Brewing Science (3)
 FST/MB 479. Fermentation Microbiology (3)
 FS 499. Selected Topics in Forest Science: Mycorrhizal Ecology (1–3)
 MB 302. General Microbiology (3)
 MB 448. Microbial Ecology (3)

Total=21

PLANT ECOLOGY AND SYSTEMATICS OPTION

Select one of the following plant ecology courses:

BOT 440. Field Methods in Plant Ecology (4)
 BOT 442. Plant Population Ecology (3)

- BOT 488. Environmental Physiology of Plants (3)
 BOT 543. Plant Community Ecology (3)
 ENT 420. Insect Ecology (3)
Select one of the following plant systematics courses:
 BOT 323. ^Flowering Plants of the World (3)
 BOT 414. Agrostology (4)
 BOT 425. Flora of the Pacific Northwest (3)

Select additional courses from above or below to bring total to 21 credits:

Ecology Electives:

- BI 358. Symbioses and the Environment (3)
 BI 371. Ecological Methods (3)
 BOT 590. Selected Topics in Mycology: Fungal Symbioses (3)
 CH 390. Environmental Chemistry (3)
 CSS 305. Principles of Soil Science (4)
 [Taught at EOU La Grande campus only.]
 or SOIL 205. *Soil Science (4)
 FW 479. Wetlands and Riparian Ecology (3)
 MB 448. Microbial Ecology (3)
 RNG 352. Grassland and Shrubland Ecosystems (4)
 RNG 441. Rangeland Analysis (4)
 Z 351. Marine Ecology (3)

Systematics Electives:

- BI 445. Evolution (3)
 BOT 416. Aquatic Botany (4)
 BOT 461. Mycology (5)
 BOT 465. Lichenology (4)
 BOT 466. Bryology (4)
 BOT 590. Selected Topics in Mycology: Fungal Systematics (3)
 HORT/PBG 450. Plant Breeding (4)
 MCB 530. Introduction to Population Genetics (3)
 Z 427. Paleobiology (3)

Professional Experience Electives:

- BOT 401. Research (1–6)
 or BOT 410. Internship (1–6)
 BOT 405. Reading and Conference (1–2)
 or BOT 407. Seminar (1–2)

Total=21

PLANT MOLECULAR GENETICS AND BIOTECHNOLOGY OPTION

Required courses as part of the basic requirements for a botany major:

- BB 450, BB 451. General Biochemistry (4,3)
 BOT 350. Introductory Plant Pathology (4)
 (**Note:** The above courses **do not** count toward the **21 credits required** to complete the option.)

Required courses (10 credits):

- BI 460. Cell Biology (3)
 BI 461. Cell Biology Laboratory (2)
 MB 302. General Microbiology (3)
 MB 303. General Microbiology Laboratory (2)

Select one of the following molecular genetics courses (3–4 credits):

- CSS/HORT/PBG 450. Plant Breeding (4)
 MB 456. Microbial Genetics and Biotechnology (3)

Select one of the following technology courses (3–4 credits):

- BB 494. Biochemistry Laboratory (3)

- HORT/PBG 441. Plant Tissue Culture (4)
Select additional courses from above or below to bring total to 21 credits:

- BOT 401. Research (1–6)
 or BOT 410. Internship (1–6)
 BOT 405. Reading and Conference (1–2)
 or BOT 407. Seminar (1–2)

Total=21

PRE-PROFESSIONAL TEACHING BOTANY OPTION

The Pre-Professional Teaching option (24 to 26 credits), together with a BS in Botany, will complete the course requirements for admission to the Professional Teacher Education Licensure Program offered by the College of Education at Oregon State University. Prior to entering the initial licensure programs, students are also required to complete a series of tests specified by the licensure programs, including the basic skills test, multiple subject assessment tests, and approved subject matter tests for specific teaching endorsement areas. **Students electing to complete this option should note that admission to the licensure program is on a competitive basis. Completion of the option does not guarantee admission to the licensure program.**

In addition to completing all of the regular requirements for a BS in Botany, botany majors electing this option must:

1. Complete the following required pre-professional courses (12 credits).
 SED 409. Field Practicum: Science and Mathematics (3)
 SED 412/SED 512. Technology Foundations for Teaching Math and Science (3)
 SED 413/SED 513. Inquiry in Science and Science Education (3)
 and SED 501. Research: Scientific Inquiry (3 grad credits)
Note: SED 501 must be taken concurrently with SED 413/SED 513, but it must be reserved for graduate credit. Therefore, this course cannot be applied to an undergraduate degree.
Note: SED 51X courses are available in summer session as well as during the academic year.
2. Complete additional course work required or recommended for botany majors seeking licensure in one of the specific teaching endorsement areas indicated below (9–14).
Biology (Middle and High School option) (9)
 Z 331, Z 332, Z 333. Human Anatomy and Physiology (3,3,3)
 or Z 430. Principles of Physiology (4) and additional upper-division zoology courses (5)

Note: Blanket-numbered courses may not be used to meet this requirement.

Chemistry (Middle and High School option) (9–10)

- BB 450, BB 451. General Biochemistry (4,3)

Note: Elect BB 450 and BB 451 in completing requirements for a BS in Botany.

CH 337. Organic Chemistry Lab (4)
 One upper-division chemistry course in a field other than organic chemistry or biochemistry (3–4)

Note: These additional chemistry courses will qualify botany majors for a minor in chemistry.

Integrated Science (Middle and High School option) (12)

- GEO 201. *Earth System Science (4)
 GEO 202. *Physical Geology (4)
 GEO 203. *Evolution of Planet Earth (4)

Integrated Science (Elementary and Middle School option) (14)

- ATS 210. Introduction to the Atmospheric Sciences (3)
 GEO 201. *Earth System Science (4)
 GEO 202. *Physical Geology (4)
 OC 331. Intro to Oceanography (3)

3. Students electing this option are encouraged to participate in the undergraduate teaching assistant experiences available for reading and conference credit from the Department of Botany and Plant Pathology as BOT 405, Reading and Conference (1–16), or from the Biology Program as BI 405.
4. Students electing this option are encouraged to contact the College of Education for further advice and guidance, for information concerning other licensure areas of possible interest (e.g. physics and mathematics), and to obtain information concerning any recent changes in requirements for licensure.

UNDERGRADUATE MINORS

BOTANY MINOR

- BI 311. Genetics (4)
 or HORT/CSS/PBG 430. Plant Genetics (3)
 BOT 321. Plant Systematics (4)
 BOT 331. Plant Physiology (4)
 BOT 341. Plant Ecology (4)
 Additional upper-division BOT courses (11–12)
 [Excluding BOT 101 but may include BOT 401, BOT 405, BOT 407, BOT 410]

Total=27

The minor requirements listed above are subject to the following constraints: Courses required for a major and taken in the major department may not count toward a minor. An individual course may not count toward more than one minor. At least 12 credits of the minor must be upper division.

GRADUATE MAJORS

APPLIED SYSTEMATICS IN BOTANY (PSM)

Aaron Liston, *Director*
 Department of Botany and Plant Pathology

4086 Cordley Hall
Corvallis OR 97331
541-737-5301

Email: aaron.liston@oregonstate.edu
Website: <http://psm.science.oregonstate.edu/>

The worlds of science and business are increasingly interconnected, creating strong demand for individuals who can bridge these two disciplines. Systematics is the science devoted to the discovery, description, and classification of the earth's biological diversity. The need for an accurate and comprehensive knowledge of biological diversity is now recognized by a broad array of interests in the public and private sectors. Plants and fungi are the focus of current initiatives in the conservation of endangered species, the restoration of native ecosystems, and the control of invasive weeds. Industry, private environmental consulting firms, and government agencies have an increasing need for individuals with expertise in plant identification and experience in survey techniques.

The Professional Science Master's (PSM) in Applied Systematics in Botany at OSU is the first program of its kind in the Pacific Northwest and was created with the help of professional affiliates employed in leadership roles in plant biology and conservation. The objective of this degree is to train students to be able to function effectively in a variety of work environments. Special training in business management, communications, and ethics complement core science curriculum, and students are required to complete an internship in lieu of thesis research.

The PSM program can usually be completed in two years, based on full-time study and at least 54 credit hours. Courses in plant and fungal diversity form the foundation of this program (BOT 516, BOT 561, BOT 514, BOT 565 or BOT 566, and BOT 525). Approved elective options (e.g. plant ecology, biological conservation, statistics) give students flexibility to create their program of study based on career interests. Professional courses are required in communication, research ethics, and business management (PSM 513, PSM 565, PSM 566, PSM 567, COMM 550 and PHL 547). These courses are designed to be taken in sequence during the first academic year. Students are required to complete a 3 to 6 month internship (6-12 credits) in lieu of thesis research (BOT 510).

For general information about PSM programs, contact the PSM Director, 2082 Cordley Hall, Corvallis OR 97331, 541-737-5259; email: kirstin.carroll@oregonstate.edu.

Core science courses (19)

Approved electives (7)

Professional courses (18)

Internship (6)

BOTANY AND PLANT PATHOLOGY (MA, MAg, MS, PhD, MAIS)

Graduate Areas of Concentration

Applied systematics, ecology, genetics, genomics and computational biology, molecular and cellular biology, mycology, plant pathology, plant physiology, systematics

The Department of Botany and Plant Pathology offers graduate programs leading to the Master of Arts, Master of Agriculture, Master of Science, and Doctor of Philosophy degrees in the field of botany and plant pathology.

Within this major field, students may elect to specialize in one of the approved areas of concentration.

The selection of an area of concentration is optional. Students may major in botany and plant pathology without selecting an area of concentration. The approved areas of concentration are described below.

- **Applied systematics** includes internship-based programs of study providing technical skills in plant classification, identification, and ecological properties of plant species.
- **Ecology** includes physiological, population, community, ecosystem and global studies in ecology.
- **Genetics** includes molecular, classical and population studies of the genetics of plants, fungi, and plant-associated microorganisms.
- **Genomics and computational biology** includes the functional, comparative and structural study of plant, fungal, viral and bacterial genomes and the development and application of bioinformatic algorithms and tools used in the analysis of genomic data.
- **Molecular and cellular biology** includes studies of molecular and cellular mechanisms active during plant development, molecular aspects of plant-pathogen interactions, and various aspects of gene regulation, signal transduction, and the cytoskeleton.
- **Mycology** includes the systematics, ecology, and population genetics of lichenized and nonlichenized fungi.
- **Plant pathology** includes studies in the areas of bacteriology, nematology, virology, forest pathology, epidemiology of plant diseases, the physiology of parasitism, and the molecular and biochemical basis of plant host-pathogen interactions.
- **Plant physiology** includes investigations of the regulation of plant growth and development, the molecular and physiological basis of

plant-microbe interactions, nitrogen metabolism and the nitrogen cycle, and problems in environmental and stress physiology in plant systems.

- **Systematics** includes investigations of the taxonomy, phylogeny, and biogeography of plants, fungi, and lichens.

Students majoring in any one area of concentration may incorporate into their programs minors in other areas within the department or minors in other departments and colleges. Integrated minors, and interdisciplinary programs in plant physiology, molecular and cellular biology, genetics, and environmental sciences are also available.

The MS and PhD degrees offered by the Department of Botany and Plant Pathology require, in addition to course work, research resulting in the presentation and defense of a thesis. A nonthesis MS degree also is available for students with particular career goals, including an internship-based MS program in the area of applied systematics. PhD candidates must pass a preliminary examination upon completion of their course work. In addition, PhD students are required to be a teaching assistant for two quarters. The MA degree requires the knowledge of one foreign language.

Inquiries concerning graduate studies may be forwarded to the chairperson of the Department of Botany and Plant Pathology.

BOTANY AND PLANT PATHOLOGY GRADUATE MINOR

Courses required for a Botany and Plant Pathology graduate minor are determined in consultation with the minor advisor.

COURSES

BOT 101. *BOTANY: A HUMAN CONCERN (4). Introductory botany for non-majors, emphasizing the role of plants in the environment, agriculture and society. Includes molecular approaches to the study of plant function and genetic engineering. Lec/lab. (Bacc Core Course)

BOT 220. INTRODUCTION TO PLANT BIOLOGY (4). Introduction to plant biology including an overview of major groups of plants, plant cells and cell types, plant anatomy and architecture, physiology and function, and ecology and the roles of plants in the environment. Laboratory exercises build on lecture themes and provide hands-on learning experiences including field trips. Lec/lab. **PREREQS:** BOT 101 or co-enrollment in BI 101 or BI 211 or one term of college-level biology.

BOT 313. PLANT STRUCTURE (4). The structural components of vascular plants and how plant structure relates to function, development, environment, evolution, and human use of plants. Field trip. Lec/lab. **PREREQS:** BI 213 or BI 213H

BOT 321. PLANT SYSTEMATICS (4). Vascular plant classification, diversity, and evolutionary relationships. Lab emphasizes the collection and identification of ferns, gymnosperms, and flowering plants in Oregon. Field trips. Lec/lab. **PREREQS:** BI 213 or BI 213H

BOT 322. ECONOMIC AND ETHNOBOTANY: ROLE OF PLANTS IN HUMAN CULTURE (3). Economic and cultural (ethnobotanical) uses of plants and fungi by humans, including domesticated cultivated plants as well as wild-growing plants, and uses of plants and fungi by indigenous cultures. Ecampus course only.

BOT 323. ^FLOWERING PLANTS OF THE WORLD (3). Global perspective of plant biodiversity with a focus on evolutionary origins, classification, and evolutionary relationships of the major groups of plants. Development and application of scientific writing and utilization of online information resources in plant evolutionary biology. (Writing Intensive Course) **PREREQS:** One year of college biology or departmental approval required.

BOT 331. PLANT PHYSIOLOGY (4). Survey of physiological processes in plants, including photosynthesis and plant metabolism, mineral nutrition and ion uptake processes, plant cell/water relations, regulation of plant growth and development, and transpiration and translocation. Lec/rec. **PREREQS:** (BI 213 or BI 213H) and ((CH 123 or (CH 233 and CH 263))

BOT 332. LABORATORY TECHNIQUES IN PLANT BIOLOGY (3). Laboratory experiences in the manipulation and observation of physiological processes in plant systems. Analysis and interpretation of physiological data generated in experimentation with plant systems. Training in basic laboratory skills, including the principles and procedures involved in the use of common items of laboratory instrumentation. Lab. **PREREQS:** BOT 331 or BI 314 or equivalent.

BOT 341. PLANT ECOLOGY (4). Study of higher plants in relation to their environment. The relationship of plant physiology and reproduction to environmental factors; competition and other species interactions; the structure, dynamics and analysis of vegetation. Field trips. Lec/lab. **PREREQS:** BI 213 or BI 213H. BOT 321 is recommended.

BOT 350. INTRODUCTORY PLANT PATHOLOGY (4). Symptoms, causal agents, diagnosis, and prevention of plant diseases, with emphasis on fungi, bacteria, nematode, and virus pathogens. Lec/lab. **PREREQS:** BI 213 or BI 213H

BOT 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

BOT 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

BOT 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

BOT 407. SEMINAR (1). Section 1: Departmental seminar. Section 2: Lichens and Bryophytes Research (1). Weekly one-hour meetings for reporting and discussion of active research projects, discussion of proposal research, review and discussion of recent literature, and mini-workshops on particular problems. Normally graded P/N. This course is repeatable for a maximum of 16 credits.

BOT 407H. SEMINAR (1). Section 1: Departmental seminar. Section 3: Lichens and Bryophytes Research (1). Weekly one-hour meetings for reporting and discussion of active research projects, discussion of proposal research, review and discussion of recent literature, and mini-workshops on particular problems. Normally graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

BOT 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

BOT 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor approval required.

BOT 414. AGROSTOLOGY (4). Classification and identification of grasses, with emphasis on the modern system of grass classification; laboratory practice in keying grass specimens to genus and species. Lec/lab. **PREREQS:** BOT 321

BOT 415. FOREST INSECT AND DISEASE MANAGEMENT (5). Effects of insects and diseases on forest ecosystems. Recognition of important groups, prediction of pest responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab/rec. **PREREQS:** BI 213 or BI 213H

BOT 416. AQUATIC BOTANY (4). Taxonomy and ecology of aquatic vegetation, emphasizing freshwater and marine algae and the submergent vascular plants. Morphology, physiology, and classification of the algae; morphological and physiological adaptations of aquatic vascular plants; and primary production in aquatic ecosystems. Laboratory practice in the identification of local taxa. Field trips. Lec/lab. **PREREQS:** BI 213 or BI 213H

BOT 425. FLORA OF THE PACIFIC NORTHWEST (3). Vascular plant identification, terminology, and diagnostic characteristics of plant families. Lab emphasizes the use of keys for identification to the species level and ability to recognize by sight those plant families found in the Pacific Northwest. Field trips. Lec/lab. **PREREQS:** BOT 321 or equivalent.

BOT 435. POLLINATION BIOLOGY (4). Explores the special adaptations of flowering plants and insect pollinators. Lectures discuss the co-evolution of pollinators and flowering plants and specialized morphology of pollinators. Labs include the identification of pollinators, field surveys and an exercise that will create a management/restoration plan. Lec/lab. **PREREQS:** BOT 321 or equivalent or instructor consent.

BOT 440. FIELD METHODS IN PLANT ECOLOGY (4). Concepts and tools for describing, monitoring, and experimenting on vegetation. Combines Web-based material, field experience at the student's location, and student projects. **PREREQS:** Course in ecology and a course in statistics.

BOT 442. PLANT POPULATION ECOLOGY (3). Ecological aspects of plant form and reproduction; demography and population modeling; species interactions, including competition, mutualism, and herbivory. Lec/lab. **PREREQS:** BOT 341 or equivalent.

BOT 461. MYCOLOGY (5). A broad taxonomic survey of the fungi. Topics include life histories, systematics, ecology, genetics, and ethnomycology. Participation on field trips and the submission of a specimen collection are required. Lec/lab. **PREREQS:** (BI 211 or BI 211H) and (BI 212 or BI 212H) and (BI 213 or BI 213H)

BOT 465. LICHENOLOGY (4). Biology of lichens; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years. **PREREQS:** (BI 213 or BI 213H) and two botany courses.

BOT 466. BRYOLOGY (4). Biology of bryophytes; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years. **PREREQS:** (BI 213 or BI 213H) and two botany courses.

BOT 475. COMPARATIVE GENOMICS (4). Principles of comparative genomics. Methods for genome assembly and annotation. Genomic approaches for the study of structural change, whole genome duplication, gene family evolution, gene networks, gene regulation and epigenetics. Lab topics include the analysis of next generation sequencing data and conducting comparative genomic analyses. Lec/lab. **PREREQS:** ((BI 311 or CSS 430) and BI 314) and students will require a basic working knowledge of cell and molecular biology and genetics.

BOT 476. INTRODUCTION TO COMPUTING IN THE LIFE SCIENCES (3). Introduction to management of large datasets (e.g., nucleic acids, protein), computer programming languages, application of basic mathematical functions, and assembly of computational pipelines pertinent to life sciences. **PREREQS:** Cell and molecular biology or genetics, or by approval of instructor. Familiarity with text editing software and unix/linux operating system is advantageous.

BOT 480. PHOTOSYNTHESIS AND PHOTOBIOLOGY (3). Explores the diverse use of light in biological systems, with particular emphasis on photosynthesis. Lectures will discuss the nature of light, light in the natural environment, light absorption in biological systems, use of light energy for photosynthesis, communication, defense, motility, and vision, as well as deleterious effects of light and its use for global monitoring satellite systems. **PREREQS:** One course in plant physiology, ecology, or the equivalent, or by permission of instructor.

BOT 488. ENVIRONMENTAL PHYSIOLOGY OF PLANTS (3). Introduces students to mechanisms of plant responses to environmental change caused by humans, including atmospheric, nutrient, water, and global climate factors. Concepts are built around principles of plant environment relations. Lec/lab. **PREREQS:** One course in plant physiology or one course in ecology.

BOT 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BOT 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

BOT 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

BOT 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

BOT 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

BOT 507. SEMINAR (1-16). Section 1: Departmental seminar (F, W, S). Section 2: Communication in Ecology (F). Section 3: Community and Habitat Analyses (W). Section 4: Lichens and Bryophytes Research (S). Weekly one-hour meetings for reporting and discussions of proposal research, review and discussion of recent literature, and mini-workshops on particular problems. Graded P/N. This course is repeatable for a maximum of 16 credits.

BOT 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

BOT 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

BOT 514. AGROSTOLOGY (4). Classification and identification of grasses, with emphasis on the modern system of grass classification; laboratory practice in keying grass specimens to genus and species. Lec/lab. **PREREQS:** BOT 321

BOT 515. FOREST INSECT AND DISEASE MANAGEMENT (5). Effects of insects and diseases on forest ecosystems. Recognition of important groups, prediction of pest responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab/rec. **CROSSLISTED** as FES 515. **PREREQS:** BI 213 or BI 213H

BOT 516. AQUATIC BOTANY (4). Taxonomy and ecology of aquatic vegetation, emphasizing freshwater and marine algae and the submergent vascular plants. Morphology, physiology, and classification of the algae; morphological and physiological adaptations of aquatic vascular plants; and primary production in aquatic ecosystems. Laboratory practice in the identification of local taxa. Field trips. Lec/lab. **PREREQS:** BI 213 or BI 213H

BOT 525. FLORA OF THE PACIFIC NORTHWEST (3). Vascular plant identification, terminology, and diagnostic characteristics of plant families. Lab emphasizes the use of keys for identification to the species level and ability to recognize by sight those plant families found in the Pacific Northwest. Field trips. Lec/lab. **PREREQS:** BOT 321 or equivalent.

BOT 535. POLLINATION BIOLOGY (4). Explores the special adaptations of flowering plants and insect pollinators. Lectures discuss the co-evolution of pollinators and flowering plants and specialized morphology of pollinators. Labs include the identification of pollinators, field surveys and an exercise that will create a management/restoration plan. Lec/lab. **PREREQS:** BOT 321 or equivalent or instructor consent.

BOT 540. FIELD METHODS IN PLANT ECOLOGY (4). Concepts and tools for describing, monitoring, and experimenting on vegetation. Combines Web-based material, field experience at the student's location, and student projects. **PREREQS:** Course in ecology and ST 511 or equivalent.

BOT 542. PLANT POPULATION ECOLOGY (3). Ecological aspects of plant form and reproduction; demography and population modeling; species interactions, including competition, mutualism, and herbivory. Lec/lab. **PREREQS:** BOT 341 or equivalent.

BOT 543. PLANT COMMUNITY ECOLOGY (3). The structure, diversity, and successional dynamics of terrestrial plant communities; methods of analysis. Lec/lab. **PREREQS:** BOT 341 or equivalent.

BOT 547. NUTRIENT CYCLING (3). Reviews and discusses ecosystem-level biogeochemical concepts for terrestrial and freshwater ecosystems, primarily by reading and discussing classic and current literature to determine the state-of-knowledge and uncertainties associated with it. Topics will include root nutrient uptake mechanisms, soil chemical and biochemical transformations in different soil and ecosystems, measuring soil solution and watershed fluxes, soil organic matter formation and structure, the meaning of sustainability, the concept of N saturation in terrestrial ecosystems, and the use of natural abundance and tracer isotopes in ecosystem biogeochemistry. While forest biogeochemical processes will be emphasized, desert, aquatic, wetland, and prairie ecosystems will also be explored. **CROSSLISTED** as FS 547 and SOIL 547. **PREREQS:** College-level chemistry and biology and one class in ecology (BI 370 or equivalent) and/or soils (e.g. SOIL 205).

BOT 550. PLANT PATHOLOGY (5). Causal agents of plant disease, diagnosis, pathogenesis, epidemiology, and disease management principles and strategies. Field trip. Lec/lab/rec. **PREREQS:** BI 213 or BI 213H

BOT 552. PLANT DISEASE MANAGEMENT (4). Analysis of host, pathogen, and environmental factors influencing the increase and spread of plant disease. Epidemiological theory will be used as a basis for developing and evaluating principles and concepts of plant disease management. Lec/lab/rec. Offered alternate years. **PREREQS:** BOT 350 or BOT 550

BOT 553. PLANT DISEASE DIAGNOSIS (3). Diagnosis of plant diseases and identification of causal agents. Laboratory practice in identification techniques. Observation of symptoms exhibited by diseased plants in greenhouse and field locations. Field trips. Lec/lab. Offered alternate years in summer term. **PREREQS:** BOT 350 or BOT 550

BOT 554. PLANT PATHOGENIC NEMATODES (2). Survey of nematodes that cause plant disease. Includes taxonomy, identification, life cycles, symptomology, interactions with other plant pathogens, and how nematodes cause plant disease. Lec/lab. Offered alternate years.

PREREQS: BOT 550 and 6 credits of upper-division biology.

BOT 555. PLANT VIROLOGY (3). Nature and properties; symptomology; transmission; inhibitors; purification; electron microscopy; serology; control. Offered alternate years. **PREREQS:** BOT 550 and 6 credits of upper-division biology.

BOT 556. PHYLOGENETICS (4). Explores the theory and practice of modern phylogenetic analysis. Emphasis placed on tree reconstruction algorithms, assessment of statistical support, and contemporary issues in phylogenetics. Lab will focus on the use of phylogenetic software and the analysis of molecular data sets. Lec/lab. **CROSSLISTED** as Z 556. **PREREQS:** ST 511

BOT 561. MYCOLOGY (5). A broad taxonomic survey of the fungi. Topics include life histories, systematics, ecology, genetics, and ethnomycology. Participation on field trips and the submission of a specimen collection are required. Lec/lab. **PREREQS:** (BI 211 or BI 211H) and (BI 212 or BI 212H) and (BI 213 or BI 213H)

BOT 565. LICHENOLOGY (4). Biology of lichens; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years. **PREREQS:** (BI 213 or BI 213H) and two botany courses.

BOT 566. BRYOLOGY (4). Biology of bryophytes; includes structure, life histories, classification, and ecology. Field trip fee. Lec/lab. Offered alternate years. **PREREQS:** (BI 213 or BI 213H) and two botany courses.

BOT 575. COMPARATIVE GENOMICS (4). Principles of comparative genomics. Methods for genome assembly and annotation. Genomic approaches for the study of structural change, whole genome duplication, gene family evolution, gene networks, gene regulation and epigenetics. Lab topics include the analysis of next generation sequencing data and conducting comparative genomic analyses. Lec/lab. **CROSSLISTED** as MCB 575. **PREREQS:** Students will require a basic working knowledge of cell and molecular biology and genetics. BI 314 and (BI 311 or CSS 430)

BOT 576. INTRODUCTION TO COMPUTING IN THE LIFE SCIENCES (3). Introduction to management of large datasets (e.g., nucleic acids, protein), computer programming languages, application of basic mathematical functions, and assembly of computational pipelines pertinent to life sciences. **CROSSLISTED** as MCB 576. **PREREQS:** Cell and molecular biology or genetics, or by approval of instructor. Familiarity with text editing software and unix/linux operating system is advantageous.

BOT 580. PHOTOSYNTHESIS AND PHOTOBIOLOGY (3). Explores the diverse use of light in biological systems, with particular emphasis on photosynthesis. Lectures will discuss the nature of light, light in the natural environment, light absorption in biological systems, use of light energy for photosynthesis, communication, defense, motility, and vision, as well as deleterious effects of light and its use for global monitoring satellite systems. **PREREQS:** One course in plant physiology, ecology, or the equivalent, or by permission of instructor.

BOT 588. ENVIRONMENTAL PHYSIOLOGY OF PLANTS (3). Introduces students to mechanisms of plant responses to environmental change caused by humans, including atmospheric, nutrient, water, and global climate factors. Concepts are built around principles of plant environment relations. Lec/lab. **PREREQS:** One course in plant physiology or one course in ecology.

BOT 590. SELECTED TOPICS IN MYCOLOGY (1-3). Advanced topics in mycology through analysis of current literature. Detailed study of an aspect of mycology beyond those covered in

regular classes. Seminar and discussion format. This course is repeatable for a maximum of 16 credits. **PREREQS:** BOT 461 or BOT 561

BOT 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BOT 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

BOT 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

BOT 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

BOT 607. SEMINAR (1). Section 1. Departmental seminar This course is repeatable for a maximum of 16 credits.

BOT 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

BOT 616. FOREST PATHOLOGY (3). Advanced topics in forest pathology with an emphasis on field problems facing managers of forest resources. Field trips. Lec/lab. Offered alternate years. **PREREQS:** (BOT 415 or BOT 515) or BOT 550

BOT 651. MOLECULAR BASIS OF PLANT PATHOGENESIS (3). Analysis of current concepts in the physiology, biochemistry, and genetics of host-parasite interactions. Topics covered include specificity, recognition, penetration, toxin production, altered plant metabolism during disease, resistance mechanisms and regulatory aspects of gene expression during host-parasite interactions. Offered alternate years. **CROSSLISTED** as MCB 651. **PREREQS:** BOT 550

BOT 668. PLANT DISEASE DYNAMICS (4). Evaluation of processes affecting the dynamics of plant disease and pathogen populations through analysis of current literature. Students will be expected to conduct extensive reading and analysis of literature and to meet with the instructor for small group discussions. Offered alternate years. **PREREQS:** BOT 550 and ST 412

BOT 691. SELECTED TOPICS-PLANT ECOLOGY (1-3). Recent advances and developing problems in plant ecology, with critical evaluation of current literature. Topics vary from year to year. This course is repeatable for a maximum of 99 credits. **PREREQS:** Graduate-level ecology.

BOT 692. SELECTED TOPICS: PLANT PATHOLOGY (1-3). Selected topics concerning plant pathogens and plant disease processes, emphasizing current literature and theory. Topics vary from year to year. This course is repeatable for a maximum of 99 credits. **PREREQS:** BOT 550 or equivalent.

BOT 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

CROP AND SOIL SCIENCE**Russ Karow, Head**

107 Crop Science
3017 Ag and Life Sciences
Oregon State University
Corvallis, OR 97331
541-737-2821
Email: russell.s.karow@oregonstate.edu
Website: <http://cropandsoil.oregonstate.edu/>

FACULTY

Professors Bottomley, Butler, Corp, Dragila, Hannaway, Hayes, Horneck, Karow, Kling (sr. research), Lajtha, Machado, Macnab, Mallory-Smith, Myrold, Noller, Rao, Reitz, Shock, Stephenson, Tuck, Young (emeritus, part time), Zemetra

Associate Professors Angima, Baham, Bohle, Chastain, Elias (sr. research), Felix, Flowers, Hulting, Kleber, Lutcher, Nonogaki, Parke (sr. research), Rondon, Roseberg, Ross, Schrupf (seed certification, retired, part time), Sullivan, Walenta, Wysocki

Assistant Professors N. Anderson, Cuesta-Marcos (sr. research), Dreves (sr. research), Leonard (sr. research), Pett-Ridge, Townsend (sr. research)

Senior Instructors Cassidy, Charlton, Fery, McMorran (seed certification)

Instructors Burr (seed certification), Japhet, Maley, Shafabakhsh (seed certification), S. Smith (seed certification), Zielinski (seed certification)

COURTESY FACULTY

Professors Brilman, Brown, Griffith, Haunold, Olszyk, Peterson

Associate Professors Henning, Mueller-Warrant, Riera-Lizaraz, Vales

Assistant Professors M. Johnson, M. Rogers, Weisbrod

PROFESSIONAL FACULTY

Curry, Garay, Lundeen

Undergraduate Major

Crop and Soil Science (BS, CRED, HBS)

Options

Agronomy
Plant Breeding and Genetics
Soil Science

Minors

Crop Science
Soil Science

Graduate Majors

Crop Science (MAG, MAIS, MS, PhD)

Graduate Areas of Concentration

Crop Breeding, Genetics and Cytogenetics (cereals, oilseeds, potatoes)
Forage and Pasture Management
Grain Crop Production
Post-Harvest Seed Technology

Seed Biology
Seed Crop Physiology
Seed Production
Weed Biology
Weed Management

Graduate Options

Entomology
Plant Breeding and Genetics

Soil Science (MAG, MAIS, MS, PhD)**Graduate Areas of Concentration**

Environmental Soil Science
Forest Soils
Nutrient Cycling
Soil Geochemistry
Soil Conservation and Land Use
Soil Fertility and Plant Nutrition
Soil Genesis and Classification
Soil Microbiology
Soil Physics

Affiliated Interdisciplinary**Graduate Major****Water Resources Science (MS, PhD)**

(See Graduate School)

Graduate Minors

Crop Science
Soil Science

The discipline of crop science provides the knowledge and understanding for technologies that contribute directly to improvements in production and quality of food, feed, fiber, seed, energy, and nutraceutical crops for the world. The art and science of plant improvement are key elements in efforts to feed, clothe and provide energy for the world's ever-growing population. Conventional and molecular tools assist in the development of new genetic strains of food and energy crops. Crop plants play an important role in the future of sustainable food and energy production.

The discipline of soil science provides the basic understanding of the physical, chemical, and biological properties of this important natural resource. Why is soil important? Soil is the fundamental substrate for life on terrestrial landscapes. Soil plays a vital role in sustaining human welfare and assuring future agricultural productivity and environmental stability. An understanding of global and local ecology depends on an awareness of the soil and its properties. Global information and mapping systems are essential tools for characterizing the landscape and its constituent soils.

Agronomists are crop and soil scientists who work to improve crops and agricultural productivity while effectively managing pests and weeds. Students in crop and soil science explore important contemporary issues faced by our society, including water quality and management, sustainability of different types of

crop production, organic crop production, erosion and sedimentation, growing crops for biofuel production, land use and reclamation, genetic modification of crop plants, and soil quality and sustainability. An array of careers are available.

CAREER OPPORTUNITIES

Careers for crop scientists are available in business, industry, farming, research, agricultural chemical industries, seed production, seed technology, communications, conservation, and education. Positions are available in agricultural experiment stations and extension services, state departments of agriculture, food processing companies, insurance agencies, lending institutions, and commercial firms, both domestic and international, dealing in the processing and sale of farm products, chemicals, and seed.

Careers for soil scientists are available in agriculture, forestry, education, state and federal resource agencies, private consulting, and research. Farms, ranches, and agricultural supply companies employ soil scientists as managers or field representatives. Soil scientists may become teachers of vocational agriculture or environmental education, or they may become county extension agents in agriculture or natural resources. The U.S. Department of Agriculture's Forest Service and Natural Resources Conservation Service often employ soil scientists, as do private consulting firms in environmental engineering and land use planning.

ACADEMIC ADVISING

Undergraduate curricula in crop and soil science are flexible enough to provide for the student's individual professional needs and interests and for a broad-based general education by allowing electives in other colleges throughout the university. Undergraduate advising is a vital part of the program, and the department is well known for excellence in advising. The department has a head advisor who meets with all students each term. Advisors and faculty provide curricular guidance and aid in professional extra-curricular activities, career decisions, and job placement.

SCHOLARSHIPS

The Department of Crop and Soil Science administers a number of scholarships available only to students majoring in the department. Over \$40,000 is given to students each year.

STUDENT CLUBS

The department supports a Crop Science Club that provides valuable co-curricular professional development, a collegiate Soil Judging Team that participates in both regional and national competitions, the OSU Organic Growers Club that provides hands-on experience in organic

production of vegetable crops, and the OSU Bug Zoo, a student club whose members are actively engaged in insect education outreach to local schools and communities. Graduate students in soil science also have a student club.

CROP AND SOIL SCIENCE (BS, CRED, HBS)

The Bachelor of Science degree in Crop and Soil Science requires the choice of one of four options:

1. Agronomy
2. Plant Breeding and Genetics
3. Soil Science

OPTIONS

AGRONOMY OPTION

Students in the Agronomy option will gain the knowledge and skills necessary to be active participants in producing food, feed, fiber, and energy crops for our world. Increased production of field crops—wheat, corn, rice, sorghum, soybeans, forages, cotton, etc.—will be essential to meet the basic needs of the world's ever-growing population and such production will need to be accomplished in a world of diminishing soil, water, mineral, and petrochemical resources. As an agronomic professional you will have the knowledge and skill to access the potentials of a given production system and to choose plant materials and plant production practices that will optimize production while minimizing environmental impact. Maximum sustainable production will be your goal and you will need in-depth knowledge of plants, plant genetics, plant pests, soils, soil fertility, production equipment, economics, and politics to achieve this goal. Agronomists work for field crop production companies, as managers of small to large farms and ranches, and as managers of their own farming operations. Many work for federal, state, or local government agencies as educators, researchers, or field technicians. Others hold teaching, research, or extension positions in universities. Some work for private research laboratories, environmental service companies, insurance companies, or land appraisal firms.

Major Core

General Science Core

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)

Choose one of the following chemistry series:

CH 121. General Chemistry (5) **and**
CH 122, CH 123. *General Chemistry (5,5)

OR:

CH 231, CH 232, CH 233. *General Chemistry (4,4,4)

and CH 261, CH 262, CH 263.

*Laboratory for Chemistry 231, 232, 233 (1,1,1)

MTH 112. *Elementary Functions (4)

or MTH 241. *Calculus for Management and Social Science (4)

or MTH 245. *Calculus for Management, Life, and Social Sciences (4)

Orientation

CROP 101. Introduction to Horticulture, Crop, Soil, and Insect Science (1)

Agricultural Science

BOT 331. Plant Physiology (4)

BOT 350. Introductory Plant Pathology (4)

CROP 440. Weed Management (4)

ENT 311. Introduction to Insect Pest Management (4)

SOIL 205. *Soil Science (4)

Experiential Learning

CROP 401, CROP 403 or CROP 410.

Research/Thesis/Internship (3 or more credits)

CROP 407. Seminar (1)

Ecology

Select 1 of the following courses:

BI 370. Ecology (3)

BOT 341. Plant Ecology (4)

FES 341. Forest Ecology (3)

HORT 318. ^Applied Ecology of Managed Ecosystems (3)

RNG 341. Rangeland Ecology and Management (3)

Technology

HORT 414. Information Systems in Agriculture (4)

Writing Intensive Course (WIC)

CROP/SOIL 325. ^Ag and Environmental Predicaments: A Case Study Approach (3)

Capstone

CROP/HORT 480. Case Studies in Cropping Systems Management (4)

Option Requirements

Agronomy Core

CROP 200. Crop Ecology and Morphology (3)

CROP 300. Crop Production in Pacific Northwest Agroecosystems (4)

CROP 310. Forage Production (4)

CROP 319. Principles of Crop Production (3)

CROP 330. *World Food Crops (3)

CROP 460. Seed Production (3)

HORT 316. Plant Nutrition (4)

HORT 316. Plant Nutrition (4)

PBG 430. Plant Genetics (3)

SOIL 316. Nutrient Cycling in Agroecosystems (4)

ST 351. Introduction to Statistical Methods (4)

Agronomy Electives

Choose at least 6 credits from the following courses:

BEE 439. Irrigation Principles and Practices (4)

BOT 321. Plant Systematics (4)

BOT 414. Agrostology (4)

CROP 199. Special Studies: Issues in Sustainable Agriculture (1) (*repeatable*)

CROP 420. Seed Science and Technology (3)

Ecampus only

CSS 320. Principles of Oil and Fiber Crop Production (1)**EOU only**

CSS 321. Principles of Cereal Crop

Production (1)**EOU only**

CSS 322. Principles of Potato Production (1)
EOU only

CROP 418. Toxic Plants in PNW Pastures (1)
Ecampus only

FES 341. Forest Ecology (3)

FES 365. *Issues in Natural Resources Conservation (3)**Cascades & Ecampus only**

GEO 335. *Introduction to Water Science and Policy (3)

HORT 260. Organic Farming & Gardening (3)

HORT 433. Systematics and Adaptation of Vegetable Crops (4)

HORT 463. Seed Biology (3)

PBG 450. Plant Breeding (4)

RNG 341. Rangeland Ecology and Management (3)

SOIL 475. Soil Resource Potentials (4)

Business and Economics

AREC 211. Management in Agriculture (4)

AREC 221. Marketing in Agriculture (3)

AREC 250. *Introduction to Environmental Economics and Policy (3)

or ECON 201. *Introduction to Microeconomics (4)

Electives in Business

Choose a minimum of 4 credits from the following courses:

AREC 300. Applied Economic Analysis (3)

AREC 372. Agricultural Cooperatives (2)

AREC 388. Agricultural Law (4)

AREC 468. M/Crop Enterprise Budgeting (1)

AREC 470. M/Farm Budgeting and Planning (1)

AREC 476. M/Agricultural Personnel Management (2)

BA 463. Family Business Management (4)

Experiential Learning Track

(optional):

10 or more credits of a structured internship (CROP 410) can be substituted for the 6 credits of agronomy electives, and four credits of business electives. This would allow a student to use an entire term for internship work.

Research Track (optional):

Suggested classes, select courses most relevant to your intended graduate school program:

BB 350. Elementary Biochemistry (4)

BOT 321. Plant Systematics (4)

BOT 341. Plant Ecology (4)

BOT 414. Agrostology (4)

CH 331. Organic Chemistry (4)

CH 332. Organic Chemistry (4)

CH 337. Organic Chemistry Lab (4)

MB 230. *Introductory Microbiology (4)

MTH 251. *Differential Calculus (4)

PH 201. *General Physics (5)

WR 327. *Technical Writing (3)

Grade Requirements

Students pursuing the Agronomy option under the Crop and Soil Science major, are required to receive a grade of C or better in all CROP, CSS, ENT, HORT, PBG, and SOIL courses required within their major and option.

Footnotes:

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

PLANT BREEDING AND GENETICS OPTION

The Plant Breeding and Genetics (PB&G) option at Oregon State University embodies the Land Grant mission of integrated research, teaching and extension in the context of cultivar development and fundamental genetics. Plant breeding is a collaborative discipline spanning everything from classical field approaches to gene manipulation at the molecular level. Breeders regularly cooperate with pathologists, entomologists, soil scientists, physiologists, food scientists, genomicists, molecular biologists and experts in other fields.

Students in the Plant Breeding and Genetics option will learn an interdisciplinary approach to applied plant breeding by taking courses across a broad spectrum of disciplines. The option may be tailored to meet students' career goals including graduate school, as well as directly entering public or private sector breeding programs. After completing their degree, students will have gained fundamental knowledge in plant breeding that may be applied in a range of crops including annual and perennial horticultural crops, agronomic food and feed crops, and forestry products.

Major Core**General Science**

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)

SOIL SCIENCE OPTION

The study of soil as a science provides students with a basic understanding of the physical, chemical, and biological properties of this essential natural resource. Soil is the fundamental substrate for life in terrestrial systems. Our food, fiber, and renewable energy are dependent on soils. Our understanding of soils is critical in the successful siting of buildings and construction of roadways and other transportation infrastructure. Our understanding of global and local ecology depends on an awareness of soil and its properties. Soils are the filters of our water and play active roles in storing carbon and other materials that are essential in human existence. As a soil science student you will explore issues including water quality and management, organic crop production, erosion and sedimentation, land-use and reclamation, and soil quality and sustainability. As a soil science professional you will be able to use your knowledge and skills to solve real world, sustainable living problems in urban, agricultural, forest, rangeland, and other natural systems. Many soil scientists work for the Natural Resource Conservation Service. Some work for other federal, state, or local government agencies as extension educators, researchers, or surveyors. Others hold teaching or research positions in colleges and universities. Soil scientists also work for fertilizer companies, private research laboratories, environmental service companies, insurance companies, and land appraisal firms.

GRADUATE MAJORS

CROP SCIENCE (MAg, MS, PhD, MAIS)

Graduate Areas of Concentration

Crop breeding, genetics and cytogenetics (cereals, oilseeds, potatoes); forage and pasture management; grain crop production; post-harvest seed technology; seed biology; seed crop physiology; seed production; weed biology; weed management

Specific areas in crop science in which a student can prepare for his or her thesis include cereal breeding and genetics, grass breeding and genetics, forage and pasture management, seed production and technology, seed crop physiology, seed biology, post-harvest seed technology, and weed science.

Graduate Level Courses

in Crop Science

CROP 540. Weed Management (4)
 CROP 560. Seed Production (3)
 CROP 580. Case Studies in Cropping Systems Management (4)
 CROP 590. Experimental Design in Agriculture (4)
 CROP 670. Physiology of Crop Yield (3)
 PBG 550. Plant Breeding (4)
 PBG 620. DNA Fingerprinting (1)
 PBG 621. Genetic Mapping (1)
 PBG 622. Mapping Quantitative Trait Loci (1)
 PBG 650. Advanced Plant Breeding and Quantitative Genetics (3)
 PBG 660. Herbicide Science (4)

GRADUATE OPTIONS

ENTOMOLOGY GRADUATE OPTION

The Entomology (ENT) option at Oregon State University embodies the Land Grant mission of integrated research, teaching and extension in the context of understanding the basic biology of insects and with this knowledge then working with insects in natural and/or managed environments. Programs range from basic to applied and can include enhancement of environments to increase insect numbers to management of environments to diminish the numbers of insect pests. Entomologists regularly cooperate with plant scientists, physiologists, pathologists, soil scientists, genomics, molecular biologists and experts in other fields.

Students in the Entomology option will learn an interdisciplinary approach to entomology by taking courses across a broad spectrum of disciplines. The option may be tailored to meet students' career goals including further graduate education or directly entering public or private sector positions. After completing their degree, students will have gained fundamental knowledge in entomology that may be applied in a range of agricultural, forested, aquatic, or human environments.

Requirements

Select 12 credits from the following:

- ENT 507. Seminar (1-2)
- ENT/HORT 518. Current Topics in Entomology (2-4)
- ENT 520. Insect Ecology (3)
- ENT 542. Principles of Integrated Pest Management: Systems Design (4)
- ENT 599. Special Topics: *Explorations in OSU Entomology* (2-6)
- Z 540. Insect Physiology (3)

PLANT BREEDING AND GENETICS GRADUATE OPTION

The Plant Breeding and Genetics (PB&G) graduate option at Oregon State University embodies the Land Grant mission of integrated research, teaching and extension in the context of cultivar development and fundamental genetics. Plant breeding is a collaborative discipline spanning everything from classical field approaches to gene manipulation at the molecular level. Breeders regularly cooperate with pathologists, entomologists, soil scientists, physiologists, food scientists, genomics, molecular biologists and experts in other fields.

Students in the Plant Breeding and Genetics graduate option will learn an interdisciplinary approach to applied plant breeding by taking courses across a broad spectrum of disciplines. The option may be tailored to meet students' career goals including further graduate study, as well as direct entry into public

or private sector breeding programs. After completing the degree, students will have fundamental knowledge of plant breeding that may be applied to a range of crops including annual and perennial horticultural crops, agronomic food and feed crops, and forestry products.

Additional Requirements

Select 12 credits from the following list:

- BOT/MCB 575. Comparative Genomics (4)
- CROP 590. Experimental Design in Agriculture (4)
- PBG 507. Seminar (1-2)
- PBG/HORT 519. Current Topics in Plant Breeding and Genetics (2)
- PBG/HORT/CSS 530. Plant Genetics (3)
- PBG/HORT/MCB 541. Plant Tissue Culture (4)
- PBG/HORT/CSS 550. Plant Breeding (4)
- PBG/CSS/MCB 620. DNA Fingerprinting (1)
- PBG/CSS/MCB 621. Genetic Mapping (1)
- PBG/CSS/MCB 622. Mapping Quantitative Trait Loci (1)
- PBG 650. Advanced Plant Breeding and Quantitative Genetics (3)

SOIL SCIENCE (MAG, MS, PhD, MAIS)

Graduate Areas of Concentration

Environmental soil science, forest soils, nutrient cycling, soil geochemistry, soil conservation and land use, soil fertility and plant nutrition, soil genesis and classification, soil microbiology, soil physics

Faculty research specializations in soil science include ecosystem services, forest soils, management of soil nutrients, mineral-organic matter interactions, soil archaeology, soil biogeochemistry, soil microbial ecology, sustainable cropping systems, soil geomorphology, soil genesis, and soil hydrology. Amongst research institutions worldwide, Oregon State campus lands present the most soil diversity for study of associated problems.

Graduate Level Courses in Soil Science

- SOIL 513. Properties, Processes, and Functions of Soils (4)
- SOIL 523. Principles of Stable Isotopes (3)
- SOIL 525. Mineral-Organic Matter Interactions (3)
- SOIL 535. Soil Physics (3)
- SOIL 536. Vadose Zone Hydrology Laboratory (1)
- SOIL 545. Geochemistry of Soil Ecosystems (4)
- SOIL 555. Biology of Soil Ecosystems (4)
- SOIL 566. Soil Morphology and Classification (4)
- SOIL 568. Soil Landscape Analysis (4)
- SOIL 645. Soil Microbial Ecology (3)

GRADUATE MINORS

CROP SCIENCE GRADUATE MINOR

For more details, see the major professor. Approximately two-thirds (30 graduate

credits) of the 45-credit total required for a graduate degree should be listed in the major field and one-third (15 graduate credits) in the minor field. The student's advisory committee must include a member from the minor department.

SOIL SCIENCE GRADUATE MINOR

For more details, see the major professor.

Approximately two-thirds (30 graduate credits) of the 45-credit total required for a graduate degree should be listed in the major field and one-third (15 graduate credits) in the minor field. The student's advisory committee must include a member from the minor department.

■ CROP SCIENCE COURSES

CROP 101. INTRODUCTION TO HORTICULTURE, CROP, SOIL, AND INSECT SCIENCE (1). Introduces students with interests in horticulture, crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. Open to all students. CROSSLISTED as ENT 101, HORT 101, SOIL 101.

CROP 199. SPECIAL STUDIES: ISSUES IN SUSTAINABLE AGRICULTURE (1-16). Invited speakers present seminars on specific aspects of agriculture relating to sustainability. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 16 credits.

CROP 199H. SPECIAL STUDIES: ISSUES IN SUSTAINABLE AGRICULTURE (1-16). Invited speakers present seminars on specific aspects of agriculture relating to sustainability. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

CROP 200. CROP ECOLOGY AND MORPHOLOGY (3). An introduction to the concepts and principles of crop ecology and morphology and a foundation for other crop science courses. Examines the dynamics and function of crop communities, and the biotic and environmental interactions that influence productivity. Fundamentals of the developmental morphology of crop seeds, seedlings, and plants. Morphological features of seeds and plants in relation to the identification of crop families and species of economic importance.

CROP 300. CROP PRODUCTION IN PACIFIC NORTHWEST AGROECOSYSTEMS (4). Relation of crop production to human culture and the natural environment. Origins of agriculture and the processes of agricultural change, and productivity and sustainability of specific crop production systems in the Pacific Northwest. History, geography, resource requirements, and key challenges faced are presented. Fundamental crop production practices in relation to productivity and sustainability. Lec/lab/rec. CROSSLISTED as HORT 300 and CSS 300. **PREREQS:** One year of general biology or equivalent.

CROP 310. FORAGE PRODUCTION (4). Importance of, and current production practices for, forage crops. Lec/lab. **PREREQS:** (CSS 300 or CROP 300 or HORT 300) and (CSS 305 or CSS 205 or SOIL 205) or equivalent

CROP 319. PRINCIPLES OF FIELD CROP PRODUCTION (3). Provides students with an understanding of the basic principles of field crop production—tillage, soil testing, fertilization, variety selection, planting, and in-season crop management. Management practices for wheat, corn and soybean as «model» crops will be

discussed to assist students in preparing for a career in agriculture or the agricultural sciences. Offered odd years. **PREREQS:** CROP 300 or equivalent and SOIL 205

CROP 325. *AG AND ENVIRONMENTAL PREDICAMENTS: A CASE STUDY APPROACH (3). Evaluation of controversial agricultural and environmental problems. Production of clear oral and written documents describing and analyzing problems and specific courses of action utilizing team-building skills. (Writing Intensive Course) **CROSSLISTED** as SOIL 325. **PREREQS:** (CSS 305 or CSS 205 or SOIL 205)

CROP 330. *WORLD FOOD CROPS (3). Origin, production, utilization, and improvement of the world's major food crops. The role of crop production in global economic and social development; food security and worldwide nutritional requirements. (Bacc Core Course) **PREREQS:** CSS 200 or CROP 200 recommended.

CROP 340. *PENS AND PLOWS: WRITINGS OF WORKING THE LAND (3). A survey of literature from ancient Greece to the twentieth century focusing on the significance of agricultural life and/or the natural world. Students read and discuss writings considered critical in the development of Western culture and receive input on the literary significance and the accuracy of agriculture presented within the readings. (Bacc Core Course) Taught via Ecampus only.

CROP 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CROP 403. THESIS (1-16). Independent, original study and preparation of a senior thesis. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior standing.

CROP 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CROP 405H. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

CROP 407. SEMINAR (1). Senior seminar intended to instruct students on proper techniques for presentation of scientific material. Each student is expected to prepare and present a scientific seminar and to submit written documentation supporting that seminar.

CROP 410. INTERNSHIP (1-6). Professional work experience previously approved and supervised by the department, written report required. This course is repeatable for a maximum of 12 credits. **PREREQS:** Junior standing.

CROP 418. TOXIC PLANTS IN PNW PASTURES (1). Identifying and understanding ecology and biology of harmful weeds and poisonous plants found in Pacific Northwest pastures and rangelands and determining best management and control options. Taught via Ecampus only. **PREREQS:** College-level plant biology and/or taxonomy courses.

CROP 420. SEED SCIENCE AND TECHNOLOGY (3). Seed formation and factors affecting their development and maturation. Seed structure and chemical composition. Physiological and biochemical aspects of seed germination, dormancy, deterioration and storability. The concept of seed quality, its importance in agriculture, its attributes and impact on field performance. Methods of measuring seed quality of conventional and genetically modified seeds. Taught via Ecampus only. **PREREQS:** Biology, plant anatomy and/or physiology courses are recommended.

CROP 433. SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS (4). Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. Offered even

years. **CROSSLISTED** as HORT 433/HORT 533. **PREREQS:** (BI 102 or BI 213 or BI 311 or HORT 430 or CSS 430 or PBG 430 or HORT 450 or CSS 450 or PBG 450)

CROP 438. EXPLORING WORLD AGRICULTURE (2). Survey of crop and livestock production in a designated section of the world, including history, culture, and political situation. Course is designed to prepare students for a tour of study area. **CROSSLISTED** as ANS 438, AREC 438, CSS 438, HORT 438. Graded P/N. This course is repeatable for a maximum of 8 credits.

CROP 440. WEED MANAGEMENT (4). Principles of weed control by cultural, biological, and chemical means; weed identification; introduction to herbicides and factors influencing their use. Lec/lab/rec. **PREREQS:** One year biological science and one course in organic chemistry.

CROP 460. SEED PRODUCTION (3). An introduction to principles and practices of seed-based genetic delivery systems. Fundamentals of seed crop biology, cultivar maintenance and production methods are stressed. Concepts are illustrated using Pacific Northwest seed crops. **PREREQS:** CROP 200 or CSS 200 or equivalent.

CROP 463. SEED BIOLOGY (3). Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years. **CROSSLISTED** as HORT 463/HORT 563. Lec/lab.

CROP 480. CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT (4). Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. **CROSSLISTED** as HORT 480/HORT 580, CSS 480/CSS 580. **PREREQS:** CROP 300 or CSS 300 or HORT 300 and senior standing in agriculture.

CROP 499. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE (1-16). Technical knowledge and skills development courses offered in a wide array of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 16 credits.

CROP 499H. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE (1-16). Technical knowledge and skills development courses offered in a wide array of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

CROP 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CROP 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Masters-level graduate students.

CROP 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CROP 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CROP 507. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 99 credits.

CROP 509. PRACTICUM IN TEACHING (1-3). Developing skills and competence in teaching soil science under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. This course is repeatable for a maximum of 16 credits.

CROP 520. SEED SCIENCE AND TECHNOLOGY (3). Seed formation and factors affecting their development and maturation. Seed structure and chemical composition. Physiological and biochemical aspects of seed germination, dormancy, deterioration and storability. The concept of seed quality, its importance in agriculture, its attributes and impact on field performance. Methods of measuring seed quality of conventional and genetically modified seeds. Taught via Ecampus only. **PREREQS:** Biology, plant anatomy and/or physiology courses are recommended.

CROP 533. SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS (4). Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. **CROSSLISTED** as HORT 433/HORT 533. **PREREQS:** BI 102 or BI 213 or BI 311 or HORT 430 or CSS 430 or PBG 430 or HORT 450 or CSS 450 or PBG 450

CROP 540. WEED MANAGEMENT (4). Principles of weed control by cultural, biological, and chemical means; weed identification; introduction to herbicides and factors influencing their use. Lec/lab/rec. **PREREQS:** One year biological science and one course in organic chemistry.

CROP 560. SEED PRODUCTION (3). An introduction to principles and practices of seed-based genetic delivery systems. Fundamentals of seed crop biology, cultivar maintenance and production methods are stressed. Concepts are illustrated using Pacific Northwest seed crops. **PREREQS:** CROP 200 or CSS 200 or equivalent.

CROP 563. SEED BIOLOGY (3). Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years. **CROSSLISTED** as HORT 463/HORT 563. Lec/lab.

CROP 580. CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT (4). Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. **CROSSLISTED** as HORT 480/HORT 580, CSS 480/CSS 580. **PREREQS:** CROP 300 or CSS 300 or HORT 300 and senior standing in agriculture.

CROP 590. EXPERIMENTAL DESIGN IN AGRICULTURE (4). Field layout, analysis, and interpretation of basic experimental designs used in agronomy and plant breeding and including field plot techniques such as optimum plot size and shape, factorial arrangement, replication, sub-sampling, randomization, and blocking. Recitation provides practical experience with SAS. **PREREQS:** ST 351 or equivalent.

CROP 599. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE (1-16). Technical knowledge and skills development courses offered in a wide variety of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 16 credits.

CROP 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CROP 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** PhD-level graduate students.

CROP 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CROP 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CROP 607. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 99 credits.

CROP 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

CROP 660. HERBICIDE SCIENCE (4). Absorption, movement, and mechanism of action in plants; behavior of herbicides in soil. Offered alternate years. **PREREQS:** BOT 331 and (CSS 440 or CSS 540 or CROP 440 or CROP 540)

CROP 670. PHYSIOLOGY OF CROP YIELD (3). Concepts of crop growth and production in relation to environmental and physiological factors and their interactions; current literature. **PREREQS:** BOT 331 or equivalent.

CROP 699. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE (1-16). This course is repeatable for a maximum of 16 credits.

■ CROP AND SOIL SCIENCE COURSES

CSS 199. SPECIAL STUDIES: ISSUES IN SUSTAINABLE AGRICULTURE (1-16). Invited speakers present seminars on specific aspects of agriculture relating to sustainability. Topics vary from term to term and year to year. May be repeated for credit when topics differ. Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 200. CROP ECOLOGY AND MORPHOLOGY (3). An introduction to the concepts and principles of crop ecology and morphology and a foundation for other crop science classes. Examines the dynamics and function of crop communities, and the biotic and environmental interactions that influence productivity. Fundamentals of the developmental morphology of crop seeds, seedlings, and plants. Morphological features of seeds and plants in relation to the identification of crop families and species of economic importance. Taught at EOU LaGrande campus only.

CSS 205. *SOIL SCIENCE (4). Introduction to the chemical, physical and biological nature of soils. Examines the functions of soil as a medium for plant growth, a recycling system for nutrients and wastes, a modifier of atmospheric chemistry, a habitat for soil organisms, a system for water purification, and an engineering medium. Field and laboratory projects provide an understanding of fundamental soil science principles and the impact of human activities on soil quality and sustainability. Lec/lab. Field trips required. (Bacc Core Course) Taught at EOU LaGrande campus only.

CSS 300. CROP PRODUCTION IN PACIFIC NORTHWEST AGROECOSYSTEMS (4). Relation of crop production to human culture and the natural environment. Origins of agriculture and the processes of agricultural change, and productivity and sustainability of specific crop production systems in the Pacific Northwest. History, geography, resource requirements, and key challenges faced are presented. Fundamental crop production practices in relation to productivity and sustainability. Lec/lab/rec. CROSSLISTED as HORT 300 and CROP 300. Taught at EOU LaGrande campus only. **PREREQS:** One year of general biology or equivalent.

CSS 305. PRINCIPLES OF SOIL SCIENCE (4). Origin, formation, classification, physical, chemical, and biological characteristics; ecosystem functions of soils; effects of soil management on agricultural and forest crop production. Field trips. Taught at EOU LaGrande campus only. **PREREQS:** Two quarters of college chemistry or equivalent. CSS 306 recitation is recommended.

CSS 306. PROBLEM SOLVING: SOIL SCIENCE APPLICATIONS (1). Problem solving for, and in-depth exploration of, Principles of Soil Science (CSS 305). Real-world problems requiring knowledge of soil physical, chemical, and biological properties. Taught at EOU LaGrande campus only. **COREQS:** CSS 305

CSS 310. FORAGE PRODUCTION (4). Importance of, and current production practices for, forage crops. Lec/lab. Taught at EOU LaGrande campus only. **PREREQS:** CSS 300 or equivalent and CSS 305

CSS 311. INTRODUCTION TO INSECT PEST MANAGEMENT (5). Recognition, biology and management of injurious and beneficial insects; insects and human welfare. Concurrent laboratory is designed to illustrate principles of insect pest management in agricultural cropping systems, including medical and veterinary entomology. Lec/lab. Taught at EOU LaGrande campus only. **PREREQS:** One year of college biology.

CSS 315. ^NUTRIENT MANAGEMENT AND CYCLING (4). Nutrient forms, transformations, and plant availability as influenced by chemical and biological reactions in soils; soil pH and management of acid and alkaline soils; characteristics and use of fertilizers, soil amendments and organic wastes. Labs include routine soil testing procedures, computer applications for soil fertility management, and field trips. Lec/lab. (Writing Intensive Course) Taught at EOU LaGrande campus only. **PREREQS:** CSS 305 and CH 122. Courses in computers are recommended.

CSS 316. NUTRIENT CYCLING IN AGROECOSYSTEMS (3). Nutrient forms, transformations, and cycling. Diagnosis and correction of nutrient deficiencies, pH and salinity. Impact of nutrient management practices on crop production, soil health, nutrient use efficiency, and environmental quality. Organic and inorganic fertilization. Taught at EOU LaGrande campus only. **PREREQS:** CH 121 and (CSS 205 or CSS 305)

CSS 320. PRINCIPLES OF OIL AND FIBER CROP PRODUCTION (1). An overview of production practices and characteristics of oil seed, essential oil, and fiber crops. Taught at EOU LaGrande campus only. **PREREQS:** CSS 300 or equivalent and CSS 305

CSS 321. PRINCIPLES OF CEREAL CROP PRODUCTION (1). An overview of the principles underlying small grain production practices in the Pacific Northwest. Taught at EOU LaGrande campus only. **PREREQS:** CSS 300 or equivalent and CSS 305

CSS 322. PRINCIPLES OF POTATO PRODUCTION (1). Principles and practices governing all aspects of potato production, storage and use. Taught at EOU LaGrande campus only. **PREREQS:** CSS 300 or equivalent and CSS 305

CSS 325. ^AG AND ENVIRONMENTAL PREDICAMENTS: A CASE STUDY APPROACH (3). Evaluation of controversial agricultural and environmental problems. Production of clear oral and written documents describing and analyzing problems and specific courses of action utilizing team-building skills. (Writing Intensive Course) Taught at EOU LaGrande campus only. **PREREQS:** CSS 305

CSS 330. *WORLD FOOD CROPS (3). Origin, production, utilization, and improvement of the world's major food crops. The role of crop production in global economic and social development; food security and worldwide nutritional requirements. (Bacc Core Course) Taught at EOU LaGrande campus only. **PREREQS:** CSS 200 recommended.

CSS 340. *PENS AND PLOWS: WRITINGS OF WORKING THE LAND (3). A survey of literature from ancient Greece to the twentieth century focusing on the significance of agricultural life and/or the natural world. Students read and discuss writings considered critical in the development of Western culture and receive input on the literary significance and the accuracy of agriculture presented within the readings. (Bacc Core Course) Taught at EOU LaGrande campus and Ecampus only.

CSS 375. SOIL RESOURCE POTENTIALS (3). Bridges the gap between introductory soil science

classes and advanced mapping/classification courses. Emphasis is on the application of basic theoretical knowledge to understand practical, real world situations. Lec/lab. Taught at EOU LaGrande campus only. **PREREQS:** CSS 305 and or equivalent.

CSS 381. *AGRICULTURE, POWER, DISCRIMINATION, AND SURVIVAL (3). Study and discussion of the effect of difference, power, and discrimination from an agricultural perspective with particular emphasis on how agriculture has shaped both earth's ecology and human culture by enabling an ever-increasing human population. (Bacc Core Course) Taught at EOU LaGrande campus only.

CSS 395. *WORLD SOIL RESOURCES (3). The properties, global distribution, and agricultural productivity of major world soil groups are described. Potentials for human-accelerated soil degradation are introduced for each soil group, and reasons for conflicting assessments of degradation are discussed. (Bacc Core Course) CROSSLISTED as SOIL 395. Taught only at EOU LaGrande and Ecampus. **PREREQS:** CH 121 and /or equivalent.

CSS 401. RESEARCH (1-16). Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 403. THESIS (1-16). Independent, original study and preparation of a senior thesis. Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior standing.

CSS 405. READING AND CONFERENCE (1-16). Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 407. SEMINAR (1). Senior seminar intended to instruct students on proper techniques for presentation of scientific material. Each student is expected to prepare and present a scientific seminar and to submit written documentation supporting that seminar. Graded P/N. Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 99 credits.

CSS 408. WORKSHOP (1-16). Evaluation and judging of soils in Oregon and other states; directed studies of soil morphology, soil survey, soil fertility, soil physics, soil chemistry, soil biology, and soil information systems. Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 410. INTERNSHIP (1-6). Professional work experience previously approved and supervised by the department, written report required. Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 12 credits. **PREREQS:** Junior standing.

CSS 415. SOIL FERTILITY MANAGEMENT (3). Management of plant nutrients in agronomic systems; diagnosis of nutrient availability and prediction of crop response to fertilizers; interactions between nutrient response and chemical, physical and biological properties of soils. Taught at EOU LaGrande campus only. **PREREQS:** CSS 315 and courses in statistics, chemistry and plant physiology.

CSS 418. TOXIC PLANTS IN PNW PASTURES (1). Identifying and understanding ecology and biology of harmful weeds and poisonous plants found in Pacific Northwest pastures and rangelands and determining best management and control options. Taught via Ecampus only. **PREREQS:** College-level plant biology and/or taxonomy courses.

CSS 420. SEED SCIENCE AND TECHNOLOGY (3). Seed formation and factors affecting their development and maturation. Seed structure and chemical composition. Physiological and biochemical aspects of seed germination, dormancy, deterioration and storability. The concept of seed quality, its importance in agriculture, its attributes and impact on field

performance. Methods of measuring seed quality of conventional and genetically modified seeds. Taught at EOU LaGrande campus and Ecampus only. **PREREQS:** Biology, plant anatomy and/or physiology courses are recommended.

CSS 430. PLANT GENETICS (3). Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes. **CROSSLISTED** as HORT 430/HORT 530 and PBG 430/PBG 530. Taught at EOU LaGrande campus only. **PREREQS:** One year of biology and chemistry.

CSS 431. PLANT GENETICS RECITATION (1). Review and demonstration of plant genetics principles. **CROSSLISTED** as HORT 431 and PBG 431. Taught at EOU LaGrande campus only.

CSS 438. EXPLORING WORLD AGRICULTURE (2). Survey of crop and livestock production in a designated section of the world, including history, culture, and political situation. Course is designed to prepare students for a tour of study area. **CROSSLISTED** as ANS 438, AREC 438, CROP 438, HORT 438. Graded P/N. Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 8 credits.

CSS 440. WEED MANAGEMENT (4). Principles of weed control by cultural, biological, and chemical means; weed identification; introduction to herbicides and factors influencing their use. Lec/lab/rec. Taught at EOU LaGrande campus only. **PREREQS:** One year biological science and one course in organic chemistry.

CSS 445. ENVIRONMENTAL SOIL CHEMISTRY (3). Structural chemistry of clay minerals and organic matter, cation and anion exchange, and soil solution equilibria of soils. Ion exchange, mineral-solution equilibria, and adsorption reactions of silicate clays, oxides, and organic matter are emphasized. Covers the sorption behavior of environmental contaminants and the weathering reactions that govern the transport of reactive solutes through soils. Taught at EOU LaGrande campus only.

CSS 450. PLANT BREEDING (4). An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Examples are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evaluation, germplasm preservation, disease resistance, and biotechnology. Lec/lab. **CROSSLISTED** as HORT 450/HORT 550, PBG 450/PBG 550. Taught at EOU LaGrande campus only. **PREREQS:** BI 311 or (PBG 430 or CSS 430 or HORT 430)

CSS 455. BIOLOGY OF SOIL ECOSYSTEMS (4). A detailed study of the organisms that live in the soil and their activities in the soil ecosystems, soil as a habitat for organisms, taxonomy and biology of soil organisms, fundamentals of nutrient cycles, special topics in soil biology, review basis of soil microbial and ecological principles. Lec/lab/rec. Taught at EOU LaGrande campus only. **PREREQS:** CSS 305. Courses in chemistry, physics, and microbiology are recommended.

CSS 460. SEED PRODUCTION (3). An introduction to principles and practices of seed-based genetic delivery systems. Fundamentals of seed crop biology, cultivar maintenance and production methods are stressed. Concepts are illustrated using Pacific Northwest seed crops. Taught at EOU LaGrande campus only. **PREREQS:** CSS 200 or equivalent.

CSS 466. SOIL MORPHOLOGY AND CLASSIFICATION (4). Observation and description of soil properties in the field; writing soil profile descriptions; evaluating criteria that define features used to classify soils; using soil classification keys. Lec/lab. Taught at EOU LaGrande campus only. **PREREQS:** CSS 305

CSS 468. SOIL LANDSCAPE ANALYSIS (4). Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system at landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab. Taught at EOU LaGrande campus only. **PREREQS:** CSS 466*

CSS 480. CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT (4). Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. **CROSSLISTED** as CROP 480/CROP 580 and HORT 480/HORT 580. Taught at EOU LaGrande campus only. **PREREQS:** CROP 300 or CSS 300 or HORT 300 or and senior standing in agriculture.

CSS 499. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE (1-16). Technical knowledge and skills development courses offered in a wide array of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ. Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 501. RESEARCH (1-16). Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 503. THESIS (1-16). Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 999 credits. **PREREQS:** Masters-level graduate students.

CSS 505. READING AND CONFERENCE (1-16). Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 506. PROJECTS (1-16). Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 507. SEMINAR (1). Graded P/N. Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 99 credits.

CSS 508. WORKSHOP (1-16). Evaluation and judging of soils in Oregon and other states; directed studies of soil morphology, soil survey, soil fertility, soil physics, soil chemistry, soil biology, and soil information systems. Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 509. PRACTICUM IN TEACHING (1-3). Developing skills and competence in teaching soil science under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 513. PROPERTIES, PROCESSES, AND FUNCTIONS OF SOILS (4). Physical, chemical, biological, and landscape properties; processes of fluid retention and movement, weathering and cation exchange, decomposition and C-N dynamics, erosion and sedimentation; functions of hydrologic regulation, nutrient cycling, environmental protection, ecological habitat. Taught at EOU LaGrande campus only. **PREREQS:** CH 223 or CH 233 or CH 233H or equivalent

CSS 515. SOIL FERTILITY MANAGEMENT (3). Management of plant nutrients in agronomic systems; diagnosis of nutrient availability and prediction of crop response to fertilizers; interactions between nutrient response and chemical, physical and biological properties of soils. Taught at EOU LaGrande campus only. **PREREQS:** CSS 315 and courses in statistics, chemistry and plant physiology.

CSS 520. SEED SCIENCE AND TECHNOLOGY (3). Seed formation and factors affecting their development and maturation. Seed structure and chemical composition. Physiological and

biochemical aspects of seed germination, dormancy, deterioration and storability. The concept of seed quality, its importance in agriculture, its attributes and impact on field performance. Methods of measuring seed quality of conventional and genetically modified seeds. Taught at EOU LaGrande campus and Ecampus only. **PREREQS:** Biology, plant anatomy and/or physiology courses are recommended.

CSS 523. PRINCIPLES OF STABLE ISOTOPES (3). An introduction to the theory and use of stable isotopes. Applications of stable isotopes to soil science, plant physiology, hydrology, and ecosystem studies. Taught at EOU LaGrande campus only.

CSS 525. MINERAL-ORGANIC MATTER INTERACTIONS (3). Studies the fundamental properties of the mineral-organic interface and the mechanisms of interaction between mineral and organic soil properties. Taught at EOU LaGrande campus only. **PREREQS:** CSS 305 or equivalent.

CSS 530. PLANT GENETICS (3). Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes. **CROSSLISTED** as HORT 430/HORT 530 and PBG 430/PBG 530. Taught at EOU LaGrande campus only. **PREREQS:** One year of biology and chemistry.

CSS 535. SOIL PHYSICS (3). Theoretical elements of soil physical properties and processes related to agricultural, hydrological and environmental problems. Requires concurrent weekly laboratory: CSS 536. Taught at EOU LaGrande campus only. **PREREQS:** CSS 305. Recommended are MTH 241 and CH 123 and PH 201 or equivalent. **COREQS:** CSS 536

CSS 536. VADOSE ZONE HYDROLOGY LABORATORY (1). Experimental elements of soil physical properties and processes allowing practical experience in the measurement and analysis of soil physical processes related to agricultural, hydrological and environmental problems. Weekly laboratory. Taught at EOU LaGrande campus only. **PREREQS:** CH 123 and PH 201 or equivalent.

CSS 540. WEED MANAGEMENT (4). Principles of weed control by cultural, biological, and chemical means; weed identification; introduction to herbicides and factors influencing their use. Lec/lab/rec. Taught at EOU LaGrande campus only. **PREREQS:** One year biological science and one course in organic chemistry.

CSS 545. ENVIRONMENTAL SOIL CHEMISTRY (3). Structural chemistry of clay minerals and organic matter, cation and anion exchange, and soil solution equilibria of soils. Ion exchange, mineral-solution equilibria, and adsorption reactions of silicate clays, oxides, and organic matter are emphasized. Covers the sorption behavior of environmental contaminants and the weathering reactions that govern the transport of reactive solutes through soils. Taught at EOU LaGrande campus only.

CSS 550. PLANT BREEDING (4). An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Examples are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evolution, germplasm preservation, disease resistance, and biotechnology. Lec/lab. **CROSSLISTED** as HORT 450/HORT 550, PBG 450/PBG 550. Taught at EOU LaGrande campus only. **PREREQS:** BI 311 or CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530

CSS 555. BIOLOGY OF SOIL ECOSYSTEMS (4). A detailed study of the organisms that live in the soil and their activities in the soil ecosystems, soil as a habitat for organisms, taxonomy and biology of soil organisms, fundamentals of nutrient

cycles special topics in soil biology, review basis of soil microbial and ecological principles. Lec/lab/rec. Taught at EOU LaGrande campus only. **PREREQS:** CSS 305. Courses in chemistry, physics, and microbiology are recommended.

CSS 560. SEED PRODUCTION (3). An introduction to principles and practices of seed-based genetic delivery systems. Fundamentals of seed crop biology, cultivar maintenance and production methods are stressed. Concepts are illustrated using Pacific Northwest seed crops. Taught at EOU LaGrande campus only. **PREREQS:** CSS 200 or equivalent.

CSS 566. SOIL MORPHOLOGY AND CLASSIFICATION (4). Observation and description of soil properties in the field; writing soil profile descriptions; evaluating criteria that define features used to classify soils; using soil classification keys. Lec/lab. Taught at EOU LaGrande campus only. **PREREQS:** CSS 305

CSS 568. SOIL LANDSCAPE ANALYSIS (4). Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system at landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab. Taught at EOU LaGrande campus only. **PREREQS:** CSS 566*

CSS 580. CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT (4). Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. **CROSSLISTED** as CROP 480/CROP 580 and HORT 480/HORT 580. Taught at EOU LaGrande campus only. **PREREQS:** CROP 300 or CSS 300 or HORT 300 or and senior standing in agriculture.

CSS 590. EXPERIMENTAL DESIGN IN AGRICULTURE (4). Field layout, analysis, and interpretation of basic experimental designs used in agronomy and plant breeding and including field plot techniques such as optimum plot size and shape, factorial arrangement, replication, sub-sampling, randomization, and blocking. Recitation provides practical experience with SAS. Taught at EOU LaGrande campus only. **PREREQS:** ST 351 or equivalent.

CSS 599. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE (1-16). Technical knowledge and skills development courses offered in a wide array of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ. Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 601. RESEARCH (1-16). Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 603. THESIS (1-16). Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 999 credits. **PREREQS:** PhD-level graduate students.

CSS 605. READING AND CONFERENCE (1-16). Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 606. PROJECTS (1-16). Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 607. SEMINAR (1). Graded P/N. Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 99 credits.

CSS 608. WORKSHOP (1-16). Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

CSS 620. DNA FINGERPRINTING (1). Principles and methods for producing and analyzing DNA fingerprints. Offered alternate years. **CROSSLISTED** as PBG 620 and MCB

620. Taught at EOU LaGrande campus only. **PREREQS:** BI 311 or CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530 or equivalent.

CSS 621. GENETIC MAPPING (1). Principles and methods for constructing genetic maps comprised of molecular and other genetic markers. Offered alternate years. **CROSSLISTED** as MCB 621 and PBG 621. Taught at EOU LaGrande campus only. **PREREQS:** BI 311 or CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530 or equivalent.

CSS 622. MAPPING QUANTITATIVE TRAIT LOCI (1). Principles and methods for mapping genes underlying phenotypically complex traits. Offered alternate years. **CROSSLISTED** as MCB 622 and PBG 622. Taught at EOU LaGrande campus only. **PREREQS:** CSS 590 or ST 513 or equivalent.

CSS 645. SOIL MICROBIAL ECOLOGY (3). An advanced treatment of current topics in soil microbiology, with an emphasis on the ecology of soil microorganisms. Topics include the size, composition, diversity, and activity of soil microbial communities, linkage of microbial community structure to ecosystem functions, and applications of molecular biology to soil microbiology. Taught even years in fall. Taught at EOU LaGrande campus only. **PREREQS:** Recommend CSS 455 or MB 448.

CSS 650. ADVANCED PLANT BREEDING AND QUANTITATIVE GENETICS (3). Pedigree, bulk, single-seed-descent, doubled haploid, backcross, testcross, mass, and half-sib, S-1~, and S-2~ family breeding methods; breeding hybrids and selecting sources of alleles for developing superior hybrids; the nature and consequences of genotype by environment interactions; marker-assisted backcross and inbred line breeding; quantitative trait locus mapping; random linear models; designing and analyzing cultivar, line, and family selection experiments. Offered alternate years. Taught at EOU LaGrande campus only. **PREREQS:** (CSS 430 or CSS 530) and (CSS 450 or CSS 550) and (ST 411 or ST 511) and (ST 412 or ST 512) and (ST 413 or ST 513)

CSS 670. PHYSIOLOGY OF CROP YIELD (3). Concepts of crop growth and production in relation to environmental and physiological factors and their interactions; current literature. Offered alternate years. Taught at EOU LaGrande campus only. **PREREQS:** BOT 331 or equivalent.

CSS 699. SPECIAL TOPICS (1-16). Taught at EOU LaGrande campus only. This course is repeatable for a maximum of 16 credits.

■ PLANT BREEDING AND GENETICS COURSES

PBG 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 199H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

PBG 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 299H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

PBG 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

PBG 403. THESIS (1-16). This course is repeatable for a maximum of 99 credits.

PBG 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

PBG 405H. READING AND CONFERENCE (1-16). Offered via Ecampus only. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

PBG 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

PBG 409. TEACHING PRACTICUM (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

PBG 410. INTERNSHIP (3-12). This course is repeatable for a maximum of 12 credits.

PBG 430. PLANT GENETICS (3). Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes. **CROSSLISTED** as HORT 430/HORT 530 and CSS 430/530. **PREREQS:** One year of biology and chemistry.

PBG 431. PLANT GENETICS RECITATION (1). Review and demonstration of plant genetics principles. **CROSSLISTED** as HORT 431 and CSS 431.

PBG 441. PLANT TISSUE CULTURE (4). Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. Lec/lab. **CROSSLISTED** as HORT 441/HORT 541, MCB 541. **PREREQS:** (BI 311 and BOT 331) or HORT 430 or PBG 430 or CSS 430

PBG 450. PLANT BREEDING (4). An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Examples are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evaluation, germplasm preservation, disease resistance, and biotechnology. **CROSSLISTED** as HORT 450/HORT 550, CSS 450/CSS 550. Lec/lab. **PREREQS:** BI 311 or (PBG 430 or CSS 430 or HORT 430)

PBG 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

PBG 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

PBG 503. THESIS (1-16). Graded P/N. This course is repeatable for a maximum of 999 credits.

PBG 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

PBG 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 507. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

PBG 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

PBG 509. TEACHING PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

PBG 510. INTERNSHIP (4). This course is repeatable for a maximum of 12 credits.

PBG 513. PLANT GENETIC ENGINEERING (3). Principles, methods, and recent developments in the genetic engineering of higher plants. Offered alternate years. **PREREQS:** (BI 311 and BOT 331) or (CSS 430 or CSS 530) or (HORT 430 or HORT 530) or (PBG 430 or PBG 530)

PBG 519. CURRENT TOPICS IN PLANT BREEDING AND GENETICS (2). Provides an advanced understanding of plant breeding and genetics and their relationship to other disciplines through critical analysis of the scientific literature. Students practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. **CROSSLISTED** as HORT 519. This course is repeatable for a maximum of 12 credits.

PBG 530. PLANT GENETICS (3). Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes. CROSSLISTED as HORT 430/HORT 530 and CSS 430/CSS 530. **PREREQS:** One year of biology and chemistry.

PBG 541. PLANT TISSUE CULTURE (4). Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. Lec/lab. CROSSLISTED as HORT 441/HORT 541, MCB 541. **PREREQS:** (BI 311 and BOT 331) or HORT 430 or PBG 430

PBG 550. PLANT BREEDING (4). An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Example are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evaluation, germplasm preservation, disease resistance, and biotechnology. CROSSLISTED as HORT 450/HORT 550, CSS 450/CSS 550. Lec/lab. **PREREQS:** BI 311 or CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530

PBG 591. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 598. PLANT CHROMOSOME BIOLOGY (3). Exploration of the relationship between chromosome number, structure, and behavior to gene inheritance, organization, and expression. Discussion of chromosome manipulation strategies for genomics research, genetic analysis, and plant breeding. **PREREQS:** 6 credits of genetics or equivalent.

PBG 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 601. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

PBG 603. DISSERTATION (1-16). Graded P/N. This course is repeatable for a maximum of 999 credits.

PBG 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

PBG 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

PBG 620. DNA FINGERPRINTING (1). Principles and methods for producing and analyzing DNA fingerprints. Offered even years. CROSSLISTED as CSS 620 and MCB 620. **PREREQS:** BI 311 or CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530 or equivalent.

PBG 621. GENETIC MAPPING (1). Principles and methods for constructing genetic maps comprised of molecular and other genetic markers. Offered even years. CROSSLISTED as MCB 621 and CSS 621. **PREREQS:** BI 311 or CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530 or equivalent.

PBG 622. MAPPING QUANTITATIVE TRAIT LOCI (1). Principles and methods for mapping genes underlying phenotypically complex traits. Offered even years. CROSSLISTED as MCB 622 and CSS 622. **PREREQS:** CROP 590 or CSS 590 or ST 513 or equivalent.

PBG 650. ADVANCED PLANT BREEDING AND QUANTITATIVE GENETICS (3). Pedigree, bulk, single-seed-descent, doubled haploid, backcross, testcross, mass, and half-sib, S-1~, and S-2~ family breeding methods; breeding hybrids and selecting sources of alleles for developing superior hybrids; the nature and consequences of genotype by environment interactions; marker-assisted backcross and inbred line breeding; quantitative trait locus mapping; random linear models; designing and analyzing cultivar, line, and

family selection experiments. Offered odd years. **PREREQS:** (CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530) and (CSS 450 or CSS 550 or PBG 450 or PBG 550 or HORT 450 or HORT 550) and (ST 411 or ST 511) and (ST 412 or ST 512) and (ST 413 or ST 513)

PBG 691. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

■ SOIL SCIENCE COURSES

SOIL 101. INTRODUCTION TO HORTICULTURE, CROP, SOIL, AND INSECT SCIENCE (1). Introduces students with interests in horticulture, crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. Open to all students. CROSSLISTED as CROP 101, ENT 101, HORT 101.

SOIL 102. *INTRODUCTION TO ENVIRONMENTAL SCIENCE AND SUSTAINABILITY (4). An introduction to the science behind critical environmental issues and the biological basis of creating and maintaining sustainable ecosystems. Focus on such questions as: how do we decide what to believe about environmental issues? How do we quantify, restore, and value biodiversity? What is valid science in the global warming debate? Lec/lab. (Bacc Core Course)

SOIL 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 199H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

SOIL 205. *SOIL SCIENCE (4). Introduction to the chemical, physical and biological nature of soils. Examines the functions of soil as a medium of plant growth, a recycling system for nutrients and wastes, a modifier of atmospheric chemistry, a habitat for soil organisms, a system for water purification, and an engineering medium. Field and laboratory projects provide an understanding of fundamental soil science principles and the impact of human activities on soil quality and sustainability. Lec/lab. Field trips required. (Bacc Core Course)

SOIL 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 299H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

SOIL 316. NUTRIENT CYCLING IN AGROECOSYSTEMS (3). Nutrient forms, transformations, and cycling. Diagnosis and correction of nutrient deficiencies, pH and salinity. Impact of nutrient management practices on crop production, soil health, nutrient use efficiency, and environmental quality. Organic and inorganic fertilization. Lec/lab. **PREREQS:** CH 121 and SOIL 205 or (CSS 205 or CSS 305)

SOIL 325. *AG AND ENVIRONMENTAL PREDICAMENTS: A CASE STUDY APPROACH (3). Evaluation of controversial agricultural and environmental problems. Production of clear oral and written documents describing and analyzing problems and specific courses of action utilizing team-building skills. (Writing Intensive Course) CROSSLISTED as CROP 325. **PREREQS:** (CSS 305 or CSS 205 or SOIL 205)

SOIL 335. *INTRODUCTION TO WATER SCIENCE AND POLICY (3). Policy and science of the hydrologic cycle. Emphasis on interaction between water's natural time-space fluctuations and human uses. (Bacc Core Course) CROSSLISTED as GEO 335.

SOIL 366. ECOSYSTEMS OF WILDLAND SOILS (3). Focuses on soils that occur in relatively undisturbed ecosystems such as forests and

rangelands. Topics covered include properties and processes specific to understanding and managing the soil resource in these areas. An overview of US Soil Taxonomy will also be given. **PREREQS:** (SOIL 205 or CSS 205 or CSS 305) and an understanding and appreciation of environmental chemistry, biology, ecology, and physics is needed for this course.

SOIL 395. *WORLD SOIL RESOURCES (3). The properties, global distribution, and agricultural productivity of major world soil groups are described. Potentials for human-accelerated soil degradation are introduced for each soil group, and reasons for conflicting assessments of degradation are discussed. (Bacc Core Course) CROSSLISTED as CSS 395. Offered via Ecampus only. **PREREQS:** CH 121 and /or equivalent.

SOIL 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 403. THESIS (1-16). Independent, original study and preparation of a senior thesis. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior standing.

SOIL 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing.

SOIL 405H. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing and Honors College approval required.

SOIL 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing.

SOIL 408. WORKSHOP (1-16). Evaluation and judging of soils in Oregon and other states; directed studies of soil morphology, soil survey, soil fertility, soil physics, soil chemistry, soil biology, and soil information systems. This course is repeatable for a maximum of 16 credits.

SOIL 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 410. INTERNSHIP (1-6). Professional work experience previously approved and supervised by the department, written report required. This course is repeatable for a maximum of 12 credits. **PREREQS:** Junior standing.

SOIL 435. ENVIRONMENTAL SOIL PHYSICS (3). Covers principles of soil physical properties and processes as they relate to agricultural, hydrological and environmental problems. Lec/lab. Offered odd years. **PREREQS:** (CSS 205 or CSS 305 or SOIL 205) and CH 123 and MTH 241 and PH 201 or equivalent.

SOIL 445. ENVIRONMENTAL SOIL CHEMISTRY (3). Structural chemistry of clay minerals and organic matter, cation and anion exchange, and soil solution equilibria of soils. Ion exchange, mineral-solution equilibria, and adsorption reactions of silicate clays, oxides, and organic matter are emphasized. Covers the sorption behavior of environmental contaminants and the weathering reactions that govern the transport of reactive solutes through soils. Lec/rec. Offered odd years.

SOIL 455. BIOLOGY OF SOIL ECOSYSTEMS (4). A detailed study of the organisms that live in the soil and their activities in the soil ecosystems, soil as a habitat for organisms, taxonomy and biology of soil organisms, fundamentals of nutrient cycles, special topics in soil biology, review basis of soil microbial and ecological principles. Lec/rec/lab. **PREREQS:** (CSS 305 or CSS 205 or SOIL 205). Courses in chemistry, physics, and microbiology are recommended.

SOIL 466. SOIL MORPHOLOGY AND CLASSIFICATION (4). Observation and description of soil properties in the field; writing

soil profile descriptions; evaluating criteria that define features used to classify soils; using soil classification keys. Lec/lab. **PREREQS:** (SOIL 205 or CSS 205 or CSS 305)

SOIL 468. SOIL LANDSCAPE ANALYSIS (4). Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system and landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab. Offered even years. **PREREQS:** (SOIL 466* or CSS 466*)

SOIL 475. SOIL RESOURCE POTENTIALS (4). Course builds on knowledge from introductory pedology, soil chemistry, soil physics and soil biology to practice the evaluation of nutrient availability and soil moisture storage in the rooting space. Results from the application of pedotransfer functions to observations at the pit wall are translated into quantitative, numerical expressions of soil resource potentials. Lec/lab. **PREREQS:** (SOIL 435 and SOIL 455 and SOIL 466)

SOIL 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing.

SOIL 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing and Honors College approval required.

SOIL 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 503. THESIS/DISSERTATION (1-16). This course is repeatable for a maximum of 999 credits.

SOIL 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 508. WORKSHOP (1-16). Evaluation and judging of soils in Oregon and other states; directed studies of soil morphology, soil survey, soil fertility, soil physics, soil chemistry, soil biology, and soil information systems. This course is repeatable for a maximum of 16 credits.

SOIL 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 510. INTERNSHIP (1-6). Professional work experience previously approved and supervised by the department, written report required. This course is repeatable for a maximum of 6 credits.

SOIL 513. PROPERTIES, PROCESSES, AND FUNCTIONS OF SOILS (4). Physical, chemical, biological, and landscape properties; processes of fluid retention and movement, weathering and cation exchange, decomposition and C-N dynamics, erosion and sedimentation; functions of hydrologic regulation, nutrient cycling, environmental protection, ecological habitat. **PREREQS:** CH 223 or CH 233 or CH 233H or equivalent

SOIL 515. SOIL FERTILITY MANAGEMENT (3). Management of plant nutrients in agronomic systems; diagnosis of nutrient availability and prediction of crop response to fertilizers; interactions between nutrient response and chemical, physical and biological properties of soils. **PREREQS:** CSS 315 and courses in statistics, chemistry and plant physiology.

SOIL 523. PRINCIPLES OF STABLE ISOTOPES (3). An introduction to the theory and use of stable isotopes. Applications of stable isotopes to soil science, plant physiology, hydrology, and ecosystem studies. Offered even years.

SOIL 525. MINERAL-ORGANIC MATTER INTERACTIONS (3). Studies the fundamental properties of the mineral-organic interface and the mechanisms of interaction between mineral and organic soil properties. **PREREQS:** CSS 305 or CSS 205 or SOIL 205 or equivalent.

SOIL 535. SOIL PHYSICS (3). Theoretical elements of soil physical properties and processes related to agricultural, hydrological and environmental problems. Requires concurrent weekly laboratory: SOIL 536. Offered even years. **PREREQS:** CSS 305 or CSS 205 or SOIL 205. Recommended are MTH 241 and CH 123 and PH 201 or equivalent. **COREQS:** SOIL 536

SOIL 536. VADOSE ZONE HYDROLOGY LABORATORY (1). Experimental elements of soil physical properties and processes allowing practical experience in the measurement and analysis of soil physical processes related to agricultural, hydrological and environmental problems. Weekly laboratory. Offered even years. **PREREQS:** CH 123 and PH 201 or equivalent.

SOIL 545. ENVIRONMENTAL SOIL CHEMISTRY (3). Structural chemistry of clay minerals and organic matter, cation and anion exchange, and soil solution equilibria of soils. Ion exchange, mineral-solution equilibria, and adsorption reactions of silicate clays, oxides, and organic matter are emphasized. Covers the sorption behavior of environmental contaminants and the weathering reactions that govern the transport of reactive solutes through soils. Lec/rec. Offered odd years.

SOIL 547. NUTRIENT CYCLING (3). Reviews and discusses ecosystem-level biogeochemical concepts for terrestrial and freshwater ecosystems, primarily by reading and discussing classic and current literature to determine the state-of-knowledge and uncertainties associated with it. Topics include root nutrient uptake mechanisms, soil chemical and biochemical transformations in different soil and ecosystems, measuring soil solution and watershed fluxes, soil organic matter formation and structure, the meaning of sustainability, the concept of N saturation in terrestrial ecosystems, and the use of natural abundance and tracer isotopes in ecosystem biogeochemistry. While forest biogeochemical processes will be emphasized, desert, aquatic, wetland, and prairie ecosystems will also be explored. **CROSSLISTED** as BOT 547 and FS 547. **PREREQS:** College-level chemistry and biology and one class in ecology (BI 370 or equivalent) and/or soils (e.g. SOIL 205).

SOIL 555. BIOLOGY OF SOIL ECOSYSTEMS (4). A detailed study of the organisms that live in the soil and their activities in the soil ecosystems, soil as a habitat for organisms, taxonomy and biology of soil organisms, fundamentals of nutrient cycles, special topics in soil biology, review basis of soil microbial and ecological principles. Lec/rec/lab. **PREREQS:** CSS 305 or CSS 205 or SOIL 205. Courses in chemistry, physics, and microbiology are recommended.

SOIL 566. SOIL MORPHOLOGY AND CLASSIFICATION (4). Observation and description of soil properties in the field; writing soil profile descriptions; evaluating criteria that define features used to classify soils; using soil classification keys. Lec/lab. **PREREQS:** CSS 305 or CSS 205 or SOIL 205

SOIL 568. SOIL LANDSCAPE ANALYSIS (4). Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system at landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab. Offered odd years. **PREREQS:** (CSS 566* or SOIL 566*)

SOIL 591. SELECTED TOPICS (1-16). Course content and title will change with each offering. This course is repeatable for a maximum of 16 credits.

SOIL 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 601. RESEARCH (1-16). Offered via Ecampus only. This course is repeatable for a maximum of 16 credits.

SOIL 603. THESIS/DISSERTATION (1-16). This course is repeatable for a maximum of 999 credits.

SOIL 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 635. ADVANCED SOIL PHYSICS (3). Explores theoretical development of a key topic in soil physics. Topics may include evaporation from porous media, multiphase fluid movement, soil deformation, and soil salinization, with respect to either historical development, present day understanding or future needs of the field. Course structure incorporates lectures and discussion requiring intensive student participation. Offered odd years. **PREREQS:** (CSS 535 or SOIL 535) and a working knowledge of soil physics and a passing grade in a graduate-level soil physics course.

SOIL 645. SOIL MICROBIAL ECOLOGY (3). An advanced treatment of current topics in soil microbiology, with an emphasis on the ecology of soil microorganisms. Topics include the size, composition, diversity, and activity of soil microbial communities, linkage of microbial community structure to ecosystem functions, and applications of molecular biology to soil microbiology. Offered even years. **PREREQS:** Recommend SOIL 455 or CSS 455 or MB 448.

SOIL 691. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

(Administered by the Department of Horticulture in the College of Agricultural Sciences.)

Graduate Major**Entomology (MA, MAg, MS, PhD)**

*Graduate Area of Concentration
Entomology*

Graduate Minor**Entomology****GRADUATE AREA OF CONCENTRATION**

Graduate students pursuing an entomology area of concentration have the opportunity to study and conduct research within a number of graduate programs across the university in the Departments of Horticulture, Crop and Soil Science, Fisheries and Wildlife, and Forest Ecosystems and Society. Graduate students obtain their degree within the academic department of their major professor.

Entomologists continue to be at the forefront of basic and applied research in molecular biology, ecology, evolutionary biology, biodiversity, and pest management. The modern fields of physiology, ecology and systematics have their origins in research originally undertaken with insects, and entomologists help lead these disciplines today. Given the unique importance of insects in biodiversity and ecosystem processes, their roles in crop production and public health, and their value as model organisms for the exploration of basic scientific questions, there is demand for graduates who have acquired entomological expertise.

The Entomology Program is a component of the Agricultural Experiment Station, which has many research facilities for students and staff, including farms, greenhouses, an aquatic insect laboratory, and a forest insect research laboratory. In addition to OSU faculty, state and federal entomologists stationed across the state are available for consultation in their fields of specialization. The Oregon State Arthropod Collection has nearly 3,000,000 specimens of insects and mites and is a recognized center for research in insect systematics and biodiversity.

ENTOMOLOGY MINOR

The Entomology minor is administered by the Department of Horticulture in the College of Agricultural Sciences. Students pursuing any bachelor's degree may elect a minor in Entomology by satisfying a select set of courses related to insect science.

The Entomology minor is available to all OSU students. A minimum of 27 credits is required, at least 12 of which must be upper-division credits.

Select one course from the following:

ENT 311. Introduction to Insect Pest Management (4)

Z 365. Biology of Insects (4)

Select the remaining 23 credits from the following:

BOT/FES 415. Forest Insect and Disease Management (5)

ENT 101. Introduction to Horticulture, Crop, Soil, and Insect Science (1)

ENT 300. *Plagues, Pests, and Politics (3)

ENT 311. Introduction to Insect Pest Management (4)

ENT 322. Honey Bee Biology and Beekeeping (3)

ENT 401. Research (1–6)¹

ENT 405. Reading and Conference (1–6)

ENT 407. Seminar (1)

ENT 410. Internship (1–6)¹

ENT 420. Insect Ecology (3)

ENT 440. Issues in Insect Toxicology (3)

Ecampus only

ENT 499. Special Topics (1–16)

Z 365. Biology of Insects (4)

Z 440. Insect Physiology (3)

Z 477. Aquatic Entomology (4)

And entomology and life sciences courses approved in advance by the Entomology Minor advisor.

Total=27 minimum credits**Footnote:**

¹ Maximum 6 credits can be counted towards the minor from ENT 401 and ENT 410.

ENTOMOLOGY (MA, MAg, MS, PhD)**Graduate Areas of Concentration
Entomology**

The Entomology Graduate Program offers qualified candidates opportunities for graduate study and research leading to the Master of Arts, Master of Agriculture (nonthesis), Master of Science, and Doctor of Philosophy degrees. In keeping with traditional areas of strength at the university, a number of major research programs in entomology deal with problems in agriculture, forestry, and environmental quality. Integrated pest management techniques are emphasized in the solution of many of these problems.

There are no specific course requirements for entomology graduate degrees. Each student will work with their major professor and/or graduate committee to establish a program of study.

For additional information on the Entomology Graduate Program, see the program website at <http://entomology.oregonstate.edu/>.

ENTOMOLOGY GRADUATE MINOR

For more details, see the departmental advisor.

COURSES

ENT 101. INTRODUCTION TO HORTICULTURE, CROP, SOIL, AND INSECT SCIENCE (1).

Introduces students with interests in horticulture, crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. Open to all students. **CROSSLISTED** as CROP 101, HORT 101, SOIL 101.

ENT 300. *PLAGUES, PESTS, AND POLITICS (3). Integration and interaction of agricultural and public health aspects of entomology in society and history. **CROSSLISTED** as BI 300 and HORT 330. (Bacc Core Course)

ENT 311. INTRODUCTION TO INSECT PEST MANAGEMENT (4). Identification, biology and management of injurious and beneficial insects. Concurrent laboratory is designed to provide hands-on experience with identification of insect groups of relevance to agricultural cropping systems. Lec/lab. **PREREQS:** Entomology course work or one year college biology.

ENT 320. FUNDAMENTALS OF INSECT SCIENCE (2). An overview of insect biology from the perspective of plant production systems to serve students pursuing one of three tracks: 1) no further entomology, 2) enrolled concurrently with a separate but complimentary lab course (ENT 321), or 3) a prerequisite to an Introduction to Pest Management, ENT 323 and ENT 324. The primary objective of the course is to present the fundamental principles of morphological, physiological, and ecological relationships among the insects in the context of pest management.

ENT 321. FUNDAMENTALS OF INSECT SCIENCE LABORATORY (1). A hands-on experience integrating information on morphological, physiological, and ecological relationships among insects in the context of pest management. **PREREQS:** ENT 320*

ENT 322. HONEY BEE BIOLOGY AND BEEKEEPING (3). In this introduction to the fascinating honey bee and its biology, honey bees are used as model organisms to illustrate general principles of biology, entomology, and sociobiology. Students will learn the basics of beekeeping, have an opportunity to manipulate honey bee colonies, and gain hands-on experience, prevailing winter weather permitting.

ENT 331. *POLLINATORS IN PERIL (3). Pollinators, human influences on pollination systems, and the potential consequences of pollinator decline. An introduction to the skills needed to investigate media reports and multidisciplinary scientific research. Effects of pesticides, habitat fragmentation, climate change, invasive species, pests, pathogens, and other threats to pollinators in critical natural and agricultural systems around the world. **PREREQS:** Completion of a Baccalaureate Core biological science course. **CROSSLISTED** as HORT 331. (Bacc Core Course)

ENT 401. RESEARCH (1-16). Work on approved problems carried on in the library, laboratory or field. This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor approval required.

ENT 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing.

ENT 405. READING AND CONFERENCE (1-16). Reading and discussions on special topics. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENT 407. SEMINAR (1-2). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENT 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor approval required.

ENT 420. INSECT ECOLOGY (3). Insect ecology, evolution, and management. Biophysical ecology; foraging and feeding; life cycles; population

dynamics, regulation, and control; species interactions including herbivore-plant, predator-prey, parasite-host, competition, and mutualism; diversity, food web structure, agricultural ecology, exercises merge models, experiments, and sampling. Offered on even years. **PREREQS:** BI 370 or equivalent

ENT 440. ISSUES IN INSECT TOXICOLOGY (3). Introduction to concepts and mechanisms associated with molecular toxicology as it relates to insects, including interactions with naturally occurring and synthetic compounds. Overview of current research in insect toxicology including resistance to pesticides, protection of non-target species, and use of insects as model organisms. Discussion of laboratory and field approaches and potential strategies to address issues in insect toxicology. **PREREQS:** A background in basic chemistry and biology is recommended.

ENT 499. SPECIAL TOPICS (1-6). This course is repeatable for a maximum of 6 credits.

ENT 501. RESEARCH (1-16). Work on approved problems carried on in the library, laboratory or field. This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor approval required.

ENT 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ENT 505. READING AND CONFERENCE (1-16). Reading and discussions on special topics. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENT 507. SEMINAR (1-2). Graded P/N. This course is repeatable for a maximum of 16 credits.

ENT 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

ENT 509. PRACTICUM (1-16). Taught every Fall, Winter, and Spring term. This course is repeatable for a maximum of 16 credits.

ENT 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

ENT 518. CURRENT TOPICS IN ENTOMOLOGY (2). This is a core course of the Horticulture graduate program. Provides an advanced understanding of entomology and its relationship to other disciplines through critical analysis of the scientific literature. Students practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. **CROSSLISTED** as HORT 518. This course is repeatable for a maximum of 12 credits.

ENT 520. INSECT ECOLOGY (3). Insect ecology, evolution, and management. Biophysical ecology; foraging and feeding; life cycles; population dynamics, regulation, and control; species interactions including herbivore-plant, predator-prey, parasite-host, competition, and mutualism; diversity, food web structure, agricultural ecology, exercises merge models, experiments, and sampling. Offered even years. **PREREQS:** BI 370 and Z 365 or equivalent

ENT 540. ISSUES IN INSECT TOXICOLOGY (3). Introduction to concepts and mechanisms associated with molecular toxicology as it relates to insects, including interactions with naturally occurring and synthetic compounds. Overview of current research in insect toxicology including resistance to pesticides, protection of non-target species, and use of insects as model organisms. Discussion of laboratory and field approaches and potential strategies to address issues in insect toxicology. **PREREQS:** A background in basic chemistry and biology is recommended.

ENT 542. PRINCIPLES OF INTEGRATED PEST MANAGEMENT: SYSTEMS DESIGN (4). Principles of integrated pest management design focusing on the use of systems analysis as a means to integrate management tactics, environmental and biological monitoring, pest control models, and implementation elements into

a cohesive whole. Introduction to integrated pest management on websites. Students will design a hypothetical crop-pest management system. Lec/lab. **PREREQS:** ENT 311

ENT 599. SPECIAL TOPICS (1-16). Important topics of current interest in the areas of systematics, insect physiology and toxicology, ecology and behavior, and pest management. Course content and title will change with each offering. This course is repeatable for a maximum of 16 credits.

ENT 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor approval required.

ENT 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ENT 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor approval required.

ENT 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

ENT 699. SPECIAL TOPICS (1-16). Important topics of current interest in the areas of systematics, insect physiology and toxicology, ecology and behavior, and pest management. Course content and title will change with each offering. This course is repeatable for a maximum of 16 credits.

Neurotoxicology

Graduate Minor Toxicology

The Department of Environmental and Molecular Toxicology offers courses leading to MAg, MS, and PhD degrees in toxicology.

Training in toxicology prepares students for careers in industry, government, and academic institutions. Biochemical, chemical, and molecular research approaches are emphasized, focusing on the following areas: analytical and exposure assessment, aquatic, biochemical, comparative, environmental, food, immuno- and neurotoxicology.

Research is promoted by the faculty's close ties to the National Institute of Environmental Health Sciences (NIEHS), which supports the Environmental Health Sciences Center at OSU. The center contributes additional research and training opportunities for students. Opportunities in the area of neurotoxicology are provided by scientists of The Center for Research on Occupational and Environmental Toxicology (CROET) at Oregon Health and Sciences University.

Financial support is available to most students in the program through graduate research assistantships or from an NIEHS environmental health predoctoral training program. Completing the application by the end of January assures full consideration for funding for fall of that year.

Students who wish to enter the program should have a BS degree (or equivalent) in a science related field and are expected to select an MAg, MS, or PhD curriculum related to their own area of specialization. Students will take a core set of courses and will attend and participate in the toxicology seminar class. Courses in toxicology also may be taken by students in engineering or the basic sciences.

PhD PRELIMINARY EXAM GUIDELINES

Objective

The overall objective of the preliminary examination for advancement to PhD candidacy should assess whether a graduate student has the capacity and promise to:

1. understand the basic science of environmental and molecular toxicology;
2. be a creative and critical thinker;
3. understand the scientific literature;
4. conduct original and independent research; and
5. communicate the ideas and results of experiments.

Thus, the ideal examination format would select from these characteristics and prepare the student for the selective pressures that will be encountered upon completing the Environmental and Molecular Toxicology PhD degree program. In order to maintain high standards and produce quality graduate students, the

examination must be rigorous and challenging. In addition, the exam format should set specific limits on the amount of time that the student dedicates to this process.

Exam Format

The preliminary examination format outlined below consists of both oral and written elements. This examination must be completed no later than the end of the eighth academic term (not including summer terms) after entering the program. In most cases, the student would schedule the exam in the fall term of the third year of residence, although students may take the exam earlier, after completing at least one year in the program. The examination consists of a written and oral presentation of a research proposal that cannot be closely related to the student's thesis project. As outlined, the student's ability to develop, research, and defend original scientific ideas would be evaluated. The student is expected to demonstrate a capacity for critical thinking and a command of the specific field of focus. In addition, the student's general knowledge of environmental and molecular toxicology would be evaluated.

Procedural Outline

Research Proposal (written/oral)

1. Student submits outline descriptions (required elements listed below) of two potential research projects. The subject of each project must be chosen by the student based on their knowledge and review of the literature, and must describe original, hypothesis-driven research. The proposed projects cannot have been defined previously in published or unpublished form (i.e. manuscript, abstract, database of funded projects, submitted grant application, etc.), or cannot be known to be in progress. Proposed research also must not be closely related to the thesis research of the student. "Closely related" is defined as any research that conceivably could be part of the student's thesis or that conceivably might be initiated by the student's major professor.

Project outlines (limited to one page each) must include:

- a. Description of an unresolved question relevant to the field of environmental and molecular toxicology. (1–3 sentences)
- b. Statement of specific hypothesis to be tested. (1–2 sentences)
- c. Description of an experimental approach designed to test the hypothesis, including a minimum of two specific aims, and a statement of the rationale (justification) for the proposed

approach. (2–6 sentences)

- d. Statement of the significance of the proposed research. (1–2 sentences)
2. The student's graduate committee reviews both outlines and approves one topic to be developed into a written proposal. The research topic is chosen based on originality, quality, potential significance, and likelihood of expanding the student's education and training. Approval of the topic would occur within one week after the outlines are submitted. During this period the outlines would be returned to the student, and the student would receive feedback from the committee concerning the quality and design of the outlined projects. Major strengths and weaknesses in the experimental design or rationale would be identified.
 3. Student develops a written research proposal using the format and topic guidelines of application for the EPA, NIH, NSF, or other appropriate granting agency. The written proposal must be completed and returned to the committee within four weeks after the topic was approved. The scope of the project will be equivalent to that of a "pilot project" proposal and if conducted would be expected to take approximately one year of research time. The proposal is limited in length to 10 pages of double-spaced text (12 point font with 0.5 inch margins), and must include the following elements:
 - a. **Specific Aims.** State concisely and realistically what the research described in this application is intended to accomplish and what hypothesis is to be tested. Do not exceed one page.
 - b. **Background and Significance.** Briefly describe the background to the present proposal, critically evaluating the existing literature and specifically identifying gaps, which the project is intended to fill. State concisely the importance of the research described in this application, and relate the specific aims to the long-term objectives. Limited to two pages.
 - c. **Research Design and Methods.** Discuss in detail the experimental design and procedures to be used to accomplish the specific aims of the project. Describe the protocols to be used and the tentative sequence of investigation. Include the means by which

the data will be analyzed and interpreted. Discuss the potential difficulties and limitations of the proposed research and alternative approaches to achieve the aims. Point out any procedures, situations, or materials that may be hazardous to personnel and the precautions to be exercised. Limited to seven pages.

- d. **Literature Cited.** Do not scatter literature citations throughout the text. List them at the end of the proposal. All papers cited in the text must be listed in the reference list and vice versa. The list of literature citations at the end of the proposal do not count toward the 10-page limit.
 - e. **Appendix.** Students may include additional figures in an appendix, limited to five pages. The appendix may not be used to circumvent the page limits of the proposal.
4. The oral exam should be scheduled within two weeks of completion of the written proposal. This deadline can be extended with the approval of the student's graduate committee.
 5. During the exam the student would present the research plan and defend the experimental approach. Presentation would involve a seminar format with slides/overheads and would be expected to last no longer than 30 minutes. Following the presentation, the student would be judged on the soundness of the hypothesis, their understanding of the subject matter, their ability to defend the proposed experimental design, and their general knowledge of the field of environmental and molecular toxicology. The exam is expected to last approximately two hours, and is limited in length to three hours.

Examination Committee

The examination committee is the graduate student's doctoral committee. The doctoral committee consists of a minimum of five members of the graduate faculty, including at least two members from the major department and a representative of the Graduate Council. If a minor is declared, the committee must include a member from the minor department. All committee members must be on the graduate faculty with appropriate authorization to serve on the student's committee. The major professor would serve as the chairperson of the committee to oversee the exam. The decision concerning whether the student merits advancement to PhD candidacy would be the responsibility of the examination committee.

Evaluation

The basic question for the committee is whether or not they believe the student is adequately prepared to conduct doctoral level research and has a good chance of successfully completing such research. Following a discussion of the student's performance on the examination, each committee member is then asked to vote on the basic question. It is appropriate for secret ballots to be used, and secret ballots must be used if requested by any committee member.

If there is one negative vote on this question, the student will **pass**. If there are two or more negative votes on this question, the student will **not pass**.

If the committee decision is that the student has not passed the examination, the committee must then decide whether or not to allow the student to take a **re-examination**. If the majority of the committee votes in favor of a re-examination, the recommendation for re-examination should be recorded. In addition, the committee must set a time interval that must elapse before the re-examination is permitted. If the majority of the committee votes against a re-examination, the recommendation to terminate the student's work toward this degree should be recorded.

TOXICOLOGY MINOR

The Toxicology minor provides basic and applied science majors sufficient background for technical work in toxicology.

Required

BB 450. General Biochemistry (4)

or BB 490. Biochemistry (3)

CH 334. Organic Chemistry (3)

ST 351. Introduction to Statistical Methods (4)

TOX 411. Fundamentals of Toxicology (3)

Select five courses from the following or two courses plus undergraduate research:

BI 314. Cell and Molecular Biology (4)

TOX 401. Research (9)

TOX 413. Environmental Toxicology and Risk Assessment (3)

TOX 429. Toxic Substances in Food (3)

TOXICOLOGY (MAG, MS, PhD)

Graduate Areas of Concentration
Environmental chemistry and ecotoxicology, mechanistic toxicology, molecular and cellular toxicology, neurotoxicology

The Department of Environmental and Molecular Toxicology provides students with a fundamental knowledge of toxicology that prepares them for responsible

positions in research and development, academia, government, professional services, or research foundations.

The graduate faculty includes scientists with special interest in application of chemistry, biochemistry, molecular biology, pharmacology, pathology, neuroscience, immunology and ecology to problems in toxicology. The concentration in neurotoxicology is an interinstitutional alliance with Oregon Health and Science University (OHSU). Students will be affiliated with and advised by associated faculty.

For the MAG, MS, and PhD degrees, students are required to take a core curriculum plus elective courses connected with their particular area of specialization. In addition to completing appropriate course work, students will undertake a thesis research project related to some aspect of toxicology. Participation in the seminar program (a one-hour per week seminar) is mandatory.

Minimal prerequisites for admission include one year each of biology, organic chemistry, physics, and statistics. Students who do not meet all of these requirements may be admitted if their academic record is otherwise outstanding.

TOXICOLOGY GRADUATE MINOR

For more details, see the departmental advisor.

COURSES

TOX 360. *THE WORLD OF POISONS (3).

Provides a basic understanding of how we are exposed and respond to chemicals, examples of human diseases associated with toxic insult, the role of technology and the interface of society and toxicology in risk perception and legislation. (Bacc Core Course) **PREREQS:** One 3-credit course in chemistry or one 3-credit course in biology.

TOX 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

TOX 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

TOX 411. FUNDAMENTALS OF TOXICOLOGY (3).

Introduction to the discipline of toxicology. Examination of the basic concepts that define how chemicals are absorbed, distributed, metabolized, and eliminated by the body. Overview of associated dose/response relations. **PREREQS:** (BB 350* or BB 450* or BB 490*)

TOX 413. ENVIRONMENTAL TOXICOLOGY AND RISK ASSESSMENT (3). Procedures for defining exposure and the use of toxicological data in defining risk assessment. Recent application of mechanistic concepts are reviewed. **PREREQS:** TOX 411

TOX 429. TOXIC SUBSTANCES IN FOOD (3). Toxicology and epidemiology of human exposures to pesticides and food toxicants. **PREREQS:** (BB 350* or BB 450* or BB 490*) and .

TOX 429H. TOXIC SUBSTANCES IN FOOD (3). Toxicology and epidemiology of human exposures to pesticides and food toxicants. **PREREQS:** (BB 350* or BB 450* or BB 490*) and Honors College approval required.

TOX 430. CHEMICAL BEHAVIOR IN THE ENVIRONMENT (3). Applications of chemical concepts in the definition and solution of

pollution problems; analytical considerations, thermodynamic factors influencing movement of chemicals, physical and metabolic transformations occurring in the environment. **PREREQS:** (CH 123 or CH 331) and senior standing

TOX 435. *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK (3).

A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/lab/rec. **CROSSLISTED** as BI 435/BI 535, FES 435/FES 535, MCB 535. (Bacc Core Course)

TOX 435H. *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK (3).

A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/lab/rec. **CROSSLISTED** as BI 435/BI 535, BI 435H, FES 435/FES 535, MCB 535. (Bacc Core Course) **PREREQS:** Honors College approval required.

TOX 455. ECOTOXICOLOGY: AQUATIC ECOSYSTEMS (3).

Focuses on transport, fate, and effects of toxic substances in freshwater ecosystems. There is special emphasis on impacts on fish. **PREREQS:** CH 331

TOX 490. ENVIRONMENTAL FORENSIC CHEMISTRY (3).

Principles of Good Laboratory Practice Standards, methodology, utility and limitations of chemical forensic methods as applied to real investigations. **PREREQS:** One year of college chemistry and one term of organic chemistry.

TOX 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

TOX 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

TOX 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

TOX 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

TOX 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

TOX 511. FUNDAMENTALS OF TOXICOLOGY (3).

Introduction to the discipline of toxicology. Examination of the basic concepts that define how chemicals are absorbed, distributed, metabolized, and eliminated by the body. Overview of associated dose/response relations. **PREREQS:** (BB 550* or BB 590*)

TOX 512. TARGET ORGAN TOXICOLOGY (3).

Examination of toxicological effects of chemicals at organ level. Normal physiology of the organ system is reviewed. **PREREQS:** TOX 511

TOX 513. ENVIRONMENTAL TOXICOLOGY AND RISK ASSESSMENT (3). Procedures for defining exposure and the use of toxicological data in defining risk assessment. Recent application of mechanistic concepts are reviewed. **PREREQS:** TOX 511

TOX 529. TOXIC SUBSTANCES IN FOOD (3).

Toxicology and epidemiology of human exposures to pesticides and food toxicants. **PREREQS:** BB 350* or BB 450* or BB 490*

TOX 530. CHEMICAL BEHAVIOR IN THE ENVIRONMENT (3).

Applications of chemical concepts in the definition and solution of pollution problems; analytical considerations, thermodynamic factors influencing movement of chemicals, physical and metabolic transformations occurring in the environment. **PREREQS:** CH 106 and CH 331 and graduate standing.

TOX 535. GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK (3).

A multidisciplinary course that examines the scientific, social, political, economic,

environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/lab/rec. CROSSLISTED as BI 535, FES 535, MCB 535.

TOX 554. GENOME ORGANIZATION, STRUCTURE, AND MAINTENANCE (4). How diverse organisms store their individual sets of genetic information (genomes). Evolution of genomes and gene families. Structures of DNA and chromosomes. Biochemical and regulatory pathways that protect cellular genomes against environmental and endogenous damage and ensure transmission of faithful copies to progeny. Remodeling of genomes by recombination and transposition. CROSSLISTED as MCB 554. **PREREQS:** BI 311 (genetics or equivalent) and (BB 450 and BB 451 and BB 452) or (BB 490 and BB 491 and BB 492) or equivalent.

TOX 555. ECOTOXICOLOGY: AQUATIC ECOSYSTEMS (3). Focuses on transport, fate, and effects of toxic substances in freshwater ecosystems. There is special emphasis on impacts on fish. **PREREQS:** CH 331

TOX 575. ADVANCED XENOBIOTIC METABOLISM (3). Familiarizes students with basic principles of drug/xenobiotic metabolism. Concepts addressed include: how foreign chemicals or xenobiotics are absorbed, distributed, and metabolized; induction and inhibition of metabolism; effect of age, species, hormones, and disease on metabolism; genetic polymorphisms; effect of diet and environment; experimental techniques in xenobiotic metabolism; and regulatory issues (FDA and EPA). **PREREQS:** Graduate or professional pharmacy student standing.

TOX 590. ENVIRONMENTAL FORENSIC CHEMISTRY (3). Principles of Good Laboratory Practice Standards, methodology, utility and limitations of chemical forensic methods as applied to real investigations. **PREREQS:** One year of college chemistry and one term of organic chemistry.

TOX 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

TOX 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

TOX 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

TOX 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

TOX 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

TOX 611. TESTING FOR GENOTOXICITY (4). A lab-based course geared toward toxicology, biochemistry, biology, food science, nutrition, pharmacy and MCB students. Introduces principles and methods of several key assays used to screen for DNA damage and mutation. These tests will include the following: (i) Salmonella mutagenicity assay (<Ames test>), (ii) single cell gel electrophoresis (<comet-> assay, (iii) micronucleus assay, and (iv) PCR-based single strand conformation polymorphism (SSCP) screening for oncogene/tumor suppressor gene mutation in cancers. This 2-week, intensive lab/lecture class runs Mon-Fri in the LPSC during the first session of summer term. Each day includes laboratory work and a 2-hour lecture covering basic principles of the assays, as well as technical details of the experiment for the day. **PREREQS:** TOX 514 and BB 400 series, prior course work on DNA repair and mutagenesis, and/or instructor approval.

TOX 675. HUMAN CARCINOGENESIS (3). Familiarizes students with the basic principles of molecular carcinogenesis with an emphasis on the current molecular understanding of cancer development in humans, and how such understanding influences diagnosis, treatment, and prevention strategies. **PREREQS:** (TOX

514 and (MCB 555 or BB 592)) and graduate or professional pharmacy standing

TOX 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

TOX 808. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

FISHERIES AND WILDLIFE

W. Daniel Edge, Head
104 Nash Hall
Oregon State University
Corvallis, OR 97331-3803
541-737-4531
Email: daniel.edge@oregonstate.edu
Website: <http://fw.oregonstate.edu/>

FACULTY

Professors Baker, Boehlert, Brandt, Edge, Kauffman, Kennedy, Herlihy, Hughes, Langdon, Mate, Noakes, Robinson, Sampson
Associate Professors Banks, Bartholomew, Burris, B. Dugger, DeBano, Ford, Garcia, Giannico, Hagen, Scott Heppell, Selina Heppell, Horning, J. Li, Miller, Suryan, Wooster
Assistant Professors Bowman, Epps, Friedlaender, Kappes, Klink, Levi, O'Malley, Palacios, Sanchez, Sidlauskas, Torres, Warren
Senior Instructor Hanschumaker
Instructors Allen, Duplaix, Goddard, Goggans, Moore, Mortenson, Paoletti, Reese, Snyder

COURTESY FACULTY

Professors Haig, Lackey, H. Li, Power, Roby, Schreck
Associate Professors K. Dugger, Kaufmann, Landers, Larson, Peterson, Stein, Thompson
Assistant Professors Brodeur, Burnett, Camarra, Chapman, Davison, Dumbauld, Dunham, Eagle-Smith, Ebersole, Fitzpatrick, Forsman, Gervais, Hurst, Jackson, Johnson, Jorden, Landys, McIntosh, Reeves, Rogers, Rosenberg, Ryer, Van Sickle
Instructors Boyer, Martin

ADJUNCT FACULTY

Professors Kent (Microbiology), Smith (Anthropology), Sylvia (Applied Economics), Webster (OSU Library)
Associate Professor Betts (Forest Ecosystems and Society)

Undergraduate Major

Fisheries and Wildlife Sciences (BS, CRED, HBS)
(See specializations section below.)

Minor

Fisheries and Wildlife Sciences

Graduate Majors

Fisheries and Wildlife Administration (PSM)

Fisheries Science (MAG, MAIS, MS, PhD)

Graduate Areas of Concentration

Aquaculture
Conservation Biology
Fish Genetics
Ichthyology
Limnology
Parasites and Diseases
Physiology and Ecology of Marine and Freshwater Fishes
Stream Ecology
Toxicology
Water Pollution Biology

Wildlife Science (MAG, MAIS, MS, PhD)

Graduate Areas of Concentration

Animal-Habitat Relationships
Behavior
Biology of Big Game and Small Mammals
Conservation Biology
Community Studies
Ecology of Avian and Mammalian Predators
Ecology of Waterfowl and Upland Gamebirds
Effects of Parasites, Diseases, and Environmental Contaminants
Nutrition
Population
Population Dynamics
Reproductive Biology
Toxicology of Pesticides
Wildlife Ecology
Wildlife-Forestry Interactions
Wildlife Science

Graduate Minors

Fisheries Science
Wildlife Science

Graduate Certificate

Fisheries Management
Wildlife Management

Fisheries and wildlife prepares students for professional careers in fisheries and wildlife as research scientists, biologists, managers, educators, and administrators. Oregon State University is strategically located for the study of fisheries and wildlife, surrounded by diverse ecosystems including the Pacific Ocean and coastal estuaries, many small and large rivers, lowland valleys, mountains and the high desert. Courses include traditional classroom experiences and laboratories, often enriched by field trips to nearby state fish hatcheries, national forests and wildlife refuges. We also offer experiential learning opportunities at the Hatfield Marine Science Center on the coast in Newport. In addition to our full-time faculty, FW students benefit from courses and mentoring provided by scientists with the Oregon Cooperative Fish and Wildlife Research Unit, Oregon Department of Fish and Wildlife, and several federal research centers.

The undergraduate curriculum is designed to develop a solid background in biology and ecology for our students as the basis for careers in resource science, conservation and management. However, FW is not simply a biological discipline. Professionals must weigh social considerations when formulating conservation and management strategies and policies. Consequently, biological, social, economic, and political science courses are integrated within the curriculum. The undergraduate curriculum is composed of core courses and a specialization. The core represents the educational foundation for fish and wildlife conservation, while the specialization provides each student with an opportunity to build a curriculum to meet specific goals. Our capstone courses emphasize critical thinking in natural resource science and management, as well as science communication and outreach. Students planning to transfer to FW should focus on courses in general biology, general chemistry, physical science, and mathematics during their freshman and sophomore years.

TRANSFER STUDENTS

Because of the technical and professional nature of the college's curricula, the college reserves the right to determine whether courses taken at another institution satisfy the college's curricular requirements. In general, equivalent college-level courses successfully completed at an accredited college or university are accepted. OSU students requesting transfer to the College of Agricultural Sciences' Department of Fisheries and Wildlife must be a student in good academic standing at the university. Please contact the departmental head advisor at 541-737-1941 for additional information.

GRADUATE PROGRAM

Graduate programs leading to the PSM, MAg, MS, or PhD (and participation in the MAg and MAIS degree programs) permit intensive study in special areas of interest under the guidance of nationally known scientists. Advanced study in fisheries science may be pursued in stream ecology, aquaculture, population dynamics in response to exploitation, ecology of marine and freshwater fishes, taxonomy and systematics, genetics, toxicology, and parasites and diseases of fish. Advanced study in wildlife science can involve almost any invertebrate or vertebrate species, biotic community or habitat. Research emphasis may be placed on population dynamics and utilization, life history and ecology, conservation biology, habitats, nutrition, physiology, behavior, and organization of animal communities. Opportunities exist for work in terrestrial, marine and aquatic systems.

FISHERIES AND WILDLIFE SCIENCES (BS, HBS)

The undergraduate curriculum for the Fisheries and Wildlife Sciences BS degree (180 credits) is composed of core courses as well as specializations of 24 credits. The core represents the educational foundation of fish and wildlife conservation, and the specializations provide the student with an opportunity to build his or her curriculum to meet specific goals. Working with faculty in formal and informal settings, students are encouraged to become engaged in designing their own education. The core courses required of all students seeking the BS degree are listed below.

For further information, see the Fisheries and Wildlife website at <http://fw.oregonstate.edu/>.

Specializations

Through the specialization, undergraduate students are encouraged to become engaged in designing their own education. Students work with faculty in formal and informal settings to define career and life goals and then develop a course of study to achieve those goals. Specialization plans should be developed during the junior year and will be presented to the faculty for review and comment. Specializations must contain at least 24 credits and must be upper division with four lower-division credits allowed. A maximum of two courses may be taken before formulation and review of the plan. All courses in the specialization are in addition to the courses in the fisheries and wildlife core. Specializations are given titles to reflect their content, but titles must not substantially duplicate titles of existing degree programs. Examples of specializations include forest wildlife management, stream ecology, fish and wildlife law enforcement, marine fisheries, aquaculture, avian conservation and management, conservation education and extension, fisheries business, human dimensions of resource management, conservation biology, and many others. Specializations may include typical on-campus courses, special field courses, a full term of course work at the Hatfield Marine Science Center in Newport, Oregon, or one or more terms of international exchange. Combined with required internships and a capstone course sequence and group project, fisheries and wildlife science graduates will be well-prepared to begin professional careers in fish and wildlife conservation, or to continue their education in graduate school. For those students unsure of their professional goals or seeking diversity in course work, a broad specialization may be declared.

Specialization guidelines may be viewed at http://fw.oregonstate.edu/system/files/u3034/guidelines_for_specializations_201303_1.pdf.

Internships

One of the best avenues to a permanent job in fisheries and wildlife is through a strong internship and temporary employment or volunteer positions. Students are required to complete a minimum of two internships or other approved alternative experiences (one of each type) for their degree. There are two types of internships: Exploratory (1–2 credits) and Intensive (3–6 credits). Students are encouraged to start gaining professional experience by volunteering or interning with a natural resource agency as early as possible, and no later than their junior year. This requirement is listed as FW 410, Internship (2 required) (4–6), under Fisheries and Wildlife Core below.

Baccalaureate Core

Synthesis, Perspectives, and Writing Intensive Courses (24 credits)

Communications (9 credits)

COMM 111. *Public Speaking (3)
or COMM 114. *Argument and Critical Discourse (3)
WR 121. *English Composition (3)
WR 222. *English Composition (3)
or HC 199. *Honors Writing–Science (3)
or PHL 121. *Reasoning and Writing (3)
or WR 327. *Technical Writing (3)
or WR 362. *Science Writing (3)

Fisheries and Wildlife Core (110–130 credits)

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)
BI 370. Ecology (3)
CH 121. General Chemistry (5)
and CH 122, CH 123. *General Chemistry (5,5)
OR CH 231, CH 232, CH 233. *General Chemistry (4,4,4)
and CH 261, CH 262, CH 263.
*Laboratory for Chemistry 231, 232, 233 (1,1,1)
FW 107. Orientation to Fisheries and Wildlife (1)
FW 251. Principles of Fish and Wildlife Conservation (3)
FW 255. Field Sampling of Fish and Wildlife (3)
FW 307. Specialization Development (1)
FW 320. Introductory Population Dynamics (4)
FW 321. Applied Community and Ecosystem Ecology (3)
FW 410. Internship (2 required) (4–6)
FW 488. Problem Solving in Fisheries and Wildlife Science (3)
FW 489. Effective Communications in Fisheries and Wildlife Science (3)
MTH 241. *Calculus for Management and Social Science (4)
or MTH 245. *Mathematics for Management, Life, and Social Sciences (4)
or MTH 251. *Differential Calculus (4)
ST 351, ST 352. Introduction to Statistical Methods (4,4)

Vertebrate Biology (7–9 credits)

Select one of the following (3–4 credits):

BI/FW 302. Biology and Conservation of

Marine Mammals (4)[Offered at HMSC or by Ecampus]

FW 311. Ornithology (3)

FW 315. Ichthyology (3)

FW 317. Mammalogy (3)

Z 473. Herpetology (3)

Select one of the following (2 credits):

FW 312. Systematics of Birds (2)

FW 316. Systematics of Fishes (2)

FW 318. Systematics of Mammals (2)

Z 474. Systematic Herpetology (2)

Select one additional course from the preceding two lists (2–4 credits)

Advanced Core

Genetics and Evolution, select one from below (3–5 credits):

ANS 378. Animal Genetics (4)

BI 311. Genetics (4)

BI 445. Evolution (3)

FW 370. Conservation Genetics (4)[Ecampus]

PBG 430. Plant Genetics (3)

Z 345. *Introduction to Evolution (3)

Z 422. Comparative Anatomy (5)

Behavior and Physiology, select two from below (6–8 credits):

ANS 311. Principles of Animal Nutrition (3)

ANS 314. Animal Physiology (4)

ANS 413. Comparative Nutrition of Domestic and Wild Animals (3)

BI/Z 350. Animal Behavior (3)

BOT 313. Plant Structure (4)

BOT 331. Plant Physiology (4)

FW 471. Environmental Physiology of Fishes (4)

FW 474. Early Life History of Fishes (4)

FW 475. Wildlife Behavior (4)

FW 476. Fish Physiology (4)

Z 423. Environmental Physiology (4)

Z 430. Principles of Physiology (4)

Z 431, Z 432. Vertebrate Physiology (4,4)

Z 437. Vertebrate Endocrinology (4)

Habitats and Ecosystems, select one from below (3–5 credits):

FES 341. Forest Ecology (3)

FES 342. Forest Types of the Northwest (3)

FES/FW 445. Ecological Restoration (4)

FW 426. Coastal Ecology and Resource Management (5)

FW 435. ^Wildlife in Agricultural Ecosystems (3)

FW/FOR/RNG 446. Wildland Fire Ecology (3)

FW 453. Forest Management and Wildlife Conservation (3)

FW 456. Limnology (5)

FW 467. Antarctic Science and Conservation (4) [Ecampus only]

FW 479. Wetlands and Riparian Ecology (3)

RNG 341. Rangeland Ecology and Management (3)

Z 351. Marine Ecology (3)

Species Conservation and Management, select two from below (6–8 credits):

FW 419. The Natural History of Whales and Whaling (3)

FW/BI 421. Aquatic Biological Invasions (4)

FW 451. Avian Conservation and Management (3)

FW 454. ^Fishery Biology (4)

FW 458. Mammal Conservation and Management (4)

FW/Z 464. Marine Conservation Biology (3)

FW 473. Fish Ecology (4)

FW 481. Wildlife Ecology (4)

Physical Sciences (9–14 credits): Choose 3 courses from the lists below. No more than 2 courses may be selected from any single category.

Physics and Math, select no more than two from below:

MTH 252. Integral Calculus (4)

MTH 268. Mathematical Ideas in Biology (4)

PH 201, PH 202, PH 203. *General Physics (5,5,5)

PH 211, PH 212, PH 213. *General Physics with Calculus (4,4,4)

PH 331. *Sound, Hearing, and Music (STS) (3)

PH 332. *Light, Vision, and Color (STS) (3)

Earth Sciences, select no more than two from below:

ATS 210. Introduction to the Atmospheric Sciences (3)

ATS 320. *The Changing Climate (STS) (3)

GEO 201. *Physical Geology (4)

GEO 202. *Earth Systems Science (4)

GEO 203. *Evolution of Planet Earth (4)

GEO 221. *Environmental Geology (4)

GEO 305. *Living with Active Cascade Volcanoes (STS) (3)

GEO 306. *Minerals, Energy, Water, and the Environment (STS) (3)

GEO 307. *National Park Geology and Preservation (STS) (3)

GEO 308. *Global Change and Earth Sciences (CGI) (3)

GEO 322. Surface Processes (4)

GEO 323. ^Climatology (4)

OC 331. Introduction to Oceanography (3)

OC 332. Coastal Oceanography (3)

SOIL 205. *Soil Science (4)

or CSS 305. Principles of Soil Science (4) [Taught at EOU LaGrande campus only.]

Chemistry, select no more than two from below:

BB 350. Elemental Biochemistry (4)

CH 130. General Chemistry of Living Systems (4)

CH 324. Quantitative Analysis (4)

CH 331, CH 332. Organic Chemistry (4,4)

CH 334, CH 335, CH 336. Organic Chemistry (3,3,3)

CH 390. Environmental Chemistry (3)

TOX 360. *The World of Poisons (STS) (3)

Human Dimensions, select 3 from list below (9–12 credits)

AG 301. *Ecosystem Science of Pacific NW Indians (DPD) (3)

ANTH 481. *Natural Resources and Community Values (STS) (3)

AREC 351. *Natural Resource Economics and Policy (CGI) (3)

AREC 352. *Environmental Economics and Policy (STS) (3)

AREC 432. Environmental Law (4)

BI 301. *Human Impacts on Ecosystems (CGI) (3)

BI/Z 349. *Biodiversity: Causes, Consequences, and Conservation (3)

BOT 322. Economic and Ethnobotany: Role of Plants in Human Culture (3)

FES 351. Recreation Behavior and Management (4)

FES 355. Management for Multiple Resource Values (3)

FES 360. Collaboration and Conflict Management (3)

FES 365. *Issues in Natural Resource Conservation (CGI) (3)[Ecampus only]

FES 432. Economics of Recreation Resources (4)

FOR 330. Forest Conservation Economics (4)

FOR/FE 456. *International Forestry (CGI) (3)

FOR 462. Natural Resource Policy and Law (3)

FW 325. *Global Crises in Resource Ecology (3)

FW 340. *Multicultural Perspectives in Natural Resources (DPD) (3)

FW 350. *Endangered Species, Society and Sustainability (STS) (3)

FW 360. *Origins of F&W Management—Evolution, Genetics, and Ecology (3)

FW 415. Fisheries and Wildlife Law and Policy (3)

FW/FES 439. ^Human Dimensions of Fisheries and Wildlife Management (3)

FW 462. Ecosystem Services (3)

FW/HSTS 470. *Ecology and History: Landscapes of the Columbia Basin (STS) (3)

FW/ANS/FES/FS/SOC 485. *Consensus and Natural Resources (STS) (3)

GEO 300. *Sustainability for the Common Good (3)

HST 481. *Environmental History of the United States (4)

HSTS 415. *^Theory of Evolution and Foundation of Modern Biology (STS) (4)

PHL 440. Environmental Ethics (3)

PHL 443. *World Views and Environmental Values (CGI) (3)

PS 475. Environmental Politics and Policy (4)

PS 476. *Science and Politics (STS) (4)

SOC 480. *Environmental Sociology (CGI) (3)

SOC 481. *Society and Natural Resources (4)

SOIL/GEO 335. *Introduction to Water Science and Policy (3)

Z/BI 349. *Biodiversity: Causes, Consequences, and Conversation (3)

Specialization (24 credits)

Total Minimum Credits=180

Footnotes:

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

FISHERIES AND WILDLIFE SCIENCES MINOR

Also available via Ecampus.

A sequence in general biology equivalent to BI 211, BI 212, BI 213, *Principles of Biology (4,4,4), is a prerequisite to the Fisheries and Wildlife Sciences minor.

A minimum of 27 credits is required with a combination of the following courses. Double counting restrictions, when applicable, are listed for each section.

Required:

Double counting is allowed in this section.

BI 370. Ecology (3)
 FW 251. Principles of Fish and Wildlife Conservation (3)

Select a minimum of 7–9 credits from the following: One course may not be double counted.

FW 302. Biology and Conservation of Marine Mammals (4)
 FW 311. Ornithology (3)
 FW 312. Systematics of Birds (2)
 FW 315. Ichthyology (3)
 FW 316. Systematics of Fishes (2)
 FW 317. Mammalogy (3)
 FW 318. Systematics of Mammals (2)
 Z 473. Herpetology (3)
 Z 474. Systematic Herpetology (2)

Select a minimum of 12–14 credits from the following: None of these courses may be double counted.

FW 303. Survey of Geographic Information Systems in Natural Resources (3)
 FW 320. Introductory Population Dynamics (4)
 FW 321. Applied Community and Ecosystem Ecology (3)
 FW 323. Management Principles of Pacific Salmon in the Northwest (3)
 FW 325. *Global Crises in Resource Ecology (3)
 FW 326. Integrated Watershed Management (3)
 FW 340. *Multicultural Perspectives in Natural Resources (3)
 FW 346. Topics in Wildland Fire (3)
 FW 350. *Endangered Species, Society and Sustainability (3)
 FW 360. *Origins of Fisheries and Wildlife Management-Evolution, Genetics, and Ecology (3)
 FW 370. Conservation Genetics (4)
 FW 415. Fisheries and Wildlife Law and Policy (3)
 FW 419. The Natural History of Whales and Whaling (3)
 FW 421. Aquatic Biological Invasions (4)
 FW 426. Coastal Ecology and Resource Management (5)
 FW 427. Principles of Wildlife Diseases (4)
 FW 431. Dynamics of Marine Biological Resources (4)
 FW 435. ^Wildlife in Agricultural Ecosystems (3)
 FW 439. ^Human Dimensions of Fisheries and Wildlife Management (3)
 FW/FES 445. Ecological Restoration (4)
 FW 446. Wildland Fire Ecology (3)
 FW 451. Avian Conservation and Management (3)
 FW 453. Managed Forest and Wildlife Conservation (3)
 FW 454. ^Fishery Biology (4)
 FW 456. Limnology (5)
 FW 462. Ecosystem Services (3)
 FW 464. Marine Conservation Biology (3)
 FW 465. Marine Fisheries (4)
 FW 467. Antarctic Science and Conservation (4)
 FW 470. *Ecology and History: Landscapes of the Columbia Basin (3)

FW 471. Environmental Physiology of Fishes (4)
 FW 472. Advanced Ichthyology (3)
 FW 473. Fish Ecology (4)
 FW 474. Early Life History of Fishes (4)
 FW 475. Wildlife Behavior (4)
 FW 476. Fish Physiology (4)
 FW 479. Wetland and Riparian Ecology (3)
 FW 481. Wildlife Ecology (4)
 FW 485. *Consensus and Natural Resources (3)
 FW 491. Fish Diseases in Conservation Biology and Aquaculture (4)
 FW 499. Special Topics/Fisheries and Wildlife (1–4)

GRADUATE MAJORS**FISHERIES AND WILDLIFE ADMINISTRATION (PSM)****Selina Heppell, Director**

Department of Fisheries and Wildlife
 104 Nash Hall
 Corvallis, OR 97331
 541-737-9039
 Email: selina.heppell@oregonstate.edu
 Website: <http://psm.science.oregonstate.edu/fisheries-and-wildlife-administration>

The Professional Science Master's degree in Fisheries and Wildlife Administration (PSMFWA) provides advanced training for early- and mid-career professionals employed by natural resources agencies, non-government organizations, and other entities with a need for expertise in fisheries and wildlife science. Applicants must have at least 5 years of experience working in a natural resource field. The PSMFWA degree will help employers meet workforce planning goals and contribute to self-improvement goals of current employees.

The 57-credit PSMFWA curriculum is organized into four main sections:

1. Biophysical sciences core (23 credits)
2. Social sciences core (16 credits)
3. Business communication and management skills core (12 credits)
4. Internship (6 credits)

It is taught primarily as a distance, online curriculum via Ecampus, although some students may choose to work toward the PSMFWA degree while in residence at OSU or at the Hatfield Marine Science Center.

The PSMFWA degree is offered as a non-thesis program only. Students have an advisor and graduate committee to review their program of study, provide career and internship advice, and evaluate a final report based on the internship experience.

For general information about PSM programs, visit the PSM website <http://psm.science.oregonstate.edu/> or contact

the PSM Director, 2082 Cordley Hall, Corvallis OR 97331, 541-737-5259; email: kirstin.carroll@oregonstate.edu.

Course substitutions must be approved by the program coordinator.

Most of our courses are offered through Ecampus, but some may be offered through Corvallis, Cascades or Hatfield Marine Science Center. Please check course offerings through the online Catalog or consult with the program advisor.

Biophysical Sciences Core Courses (23 credits min)**Required:**

FW 537. Structured Decision Making in Natural Resource Management (2)

Plus 21 additional credits, with at least one Skills course: Fisheries and Wildlife-Related Science

BEE 512. Physical Hydrology (3)
 BOT 540. Field Methods in Vegetation Science (4)
 FES 536. Carbon Sequestration in Forests (2)
 FES 537. Belowground Ecosystems (3)
 FES 548. Biology of Invasive Plants (3)
 FW 519. The Natural History of Whales and Whaling (3)
 FW 520. Ecology and Management of Marine Fishes (3)
 FW 521. Aquatic Biological Invasions (4)
 FW 526. Coastal Ecology and Resource Management (5)
 FW 527. Principles of Wildlife Diseases (4)
 FW 535. Wildlife in Agricultural Ecosystems (3)
 FW/FES 545. Ecological Restoration (4)
 FW 551. Avian Conservation and Management (3)
 FW 553. Forest Wildlife Habitat Management (4)
 FW 554. Fishery Biology (4)
 FW 556. Limnology (5)
 FW 558. Mammal Conservation and Management (4)
 FW 562. Ecosystem Services (3) *Counts as FW core OR Human Dimensions*
 FW 563. Conservation Biology of Wildlife (3)
 FW 564. Marine Conservation Biology (3)
 FW 565. Marine Fisheries (4)
 FW/HSTS 570. Ecology and History: Landscapes of the Columbia Basin (3)
 FW 573. Fish Ecology (4)
 FW 575. Wildlife Behavior (4)
 FW 576. Fish Physiology (4)
 FW 579. Wetlands and Riparian Ecology (3)
 FW 580. Stream Ecology (3)
 FW 581. Wildlife Ecology (4)
 FW 599. Special Topics in Fisheries and Wildlife (2–4)
 SNR 530. Ecological Principles of Sustainable Natural Resources (3)
 SNR 540. Global Environmental Change (3)
Quantitative Skills in FW Science
 FW 524. Introduction to Fisheries Assessment (3)
 FW 531. Dynamics of Marine Biological Resources (4)
 FW 538. Structured Decision Making in Natural Resource Mgmt Lab (2)

FW 540. Vertebrate Population Dynamics (4)
 GEO 544. Remote Sensing (4)
 GEO 565. Geographic Information Systems and Science (4)
 ST 511. Methods of Data Analysis (4)
(Continues as ST 512, ST 513)

Social Sciences Core Courses (16 credits min.)

Required:

FW 620. Ecological Policy (3)
 or FW 515. Fisheries and Wildlife Law and Policy (3)
 FW/ANS/FES/FS/SOC 585. Consensus and Natural Resources (3)

Plus 10 additional credits, with at least one course from each group:

Policy Courses

AREC 532. Environmental Law (4)
 ES 544. Native American Law: Tribes, Treaties, and the U.S. (4)
 FW 522. Introduction to Ocean Law (3)
 GEO 523. Land Use in the American West (3)
 PS 575. Environmental Politics and Policy (4)
 PS 576. Science and Politics (4)
 PS 577. International Environmental Politics and Policy (4)

Human Dimensions Courses

ANTH 581. Natural Resources and Community Values (4)
 AREC 534. Environmental and Resource Economics (3)
 AREC/MRM 552. Marine Economics (3)
 FES 592. Ecosystem Services Ecology, Sociology, Policy (3)
 FW 562. Ecosystem Services (3) *Counts as FW core OR Human Dimensions*
 GEO 524. International Water Resource Management (3)
 GEO 525. Water Resources Management in the United States (3)
 MNR 511. Introduction to Sustainable Natural Resources (3)
 SNR 520. Social Aspects of Sustainable Natural Resources (3)
 SNR 521. Economics of Sustainable Natural Resource Management (3)
 SNR 522. Basic Beliefs and Ethics in Natural Resources (3)
 SNR 535. Sustainable Management of Aquatic and Riparian Resources (3)
 PHL 540. Environmental Ethics (3)
 PHL 543. World Views and Environmental Values (3)
 PHL 547. Research Ethics (3)
 SOC 556. Science and Technology in Social Context (4)
 SOC 580. Environmental Sociology (4)
 SOC 581. Society and Natural Resources (4)

Business, Communication, and Management Skills Core Courses (12 credits min.)

COMM 550. Communication and the Practice of Science (3)
 FES 593. Environmental Interpretation (4)
 FW 514. Professional Development: Meeting Communications (1)
 PS 579. Topics in Public Policy and Public Administration (4)
 PSM 513. Professional Skills (3)
 PSM 525. Advanced Scientific and Technical Writing (4)
 PSM 565. Accounting and Finance for

Scientists (3)
 PSM 566. Project Management and Marketing Scientific Technologies (3)
 PSM 567. Innovation Management (*PSM capstone*) (3)
 PSM 599. Special Topics (3)
 WRP 521. Water Conflict Management and Transformation (3)
 WRP 599. Special Topics (1–16)

Internship (6 credits min.)

FW 510 Professional Internship (1–16)
 or FW 506. Projects (1–6)

Total Credits=57 minimum

FISHERIES SCIENCE (MAG, MS, PhD, MAIS)

Graduate Areas of Concentration

Aquaculture, conservation biology, fish genetics, ichthyology, limnology, parasites and diseases, physiology and ecology of marine and freshwater fishes, stream ecology, toxicology, water pollution biology

The Department of Fisheries and Wildlife offers graduate work leading to the Master of Agriculture, Master of Science, and Doctor of Philosophy degrees (and participation in the MAg and MAIS degree programs) with majors in fisheries science.

Fisheries research in graduate studies involves quantitative analyses of marine and freshwater fish populations, water quality, fish systematics, fish and invertebrate physiology, stream ecology, modeling of aquatic ecosystems, land use interactions, endangered species, conservation biology, and aquaculture.

The Oregon Cooperative Fish and Wildlife Research Unit has active research programs funded in part by the Oregon Department of Fish and Wildlife and U.S. Geological Survey. The Agricultural Experiment Station, the Sea Grant program, Forest Science Laboratory and other organizations fund major research projects. The department maintains extensive collections of vertebrate species, which are curated by Doctors Sidlauskas (fish), Epps (mammals), and Dugger (birds).

For more information, visit <http://fw.oregonstate.edu>, or contact Lisa Pierson, Graduate Program Coordinator, Department of Fisheries and Wildlife, Nash Hall 104, OSU, Corvallis, OR 97331-3803, email: fw.gradadvising@oregonstate.edu.

WILDLIFE SCIENCE (MAG, MS, PhD, MAIS)

Graduate Areas of Concentration

Animal-habitat relationships; behavior; biology of big game and small mammals; conservation biology; community studies; ecology of avian and mammalian predators; ecology of waterfowl and upland gamebirds; effects of parasites, diseases, and environmental contaminants; nutrition; population; population dynamics; reproductive biology; toxicology of pesticides; wildlife ecology; wildlife-forestry interactions; wildlife science

The Department of Fisheries and Wildlife offers graduate work leading to the Master of Agriculture, Master of Science, and Doctor of Philosophy degrees (and participation in the MAg and MAIS degree programs) with majors in wildlife science.

The wildlife graduate program in the Department of Fisheries and Wildlife includes wildlife research concerning interaction of wildlife with land uses, migratory waterfowl, upland game birds, forest bird communities, endangered species, population dynamics, and conservation biology.

The Oregon Cooperative Fish and Wildlife Research Unit has active research programs funded in part by the Oregon Department of Fish and Wildlife and U.S. Geological Survey. The Agricultural Experiment Station, the Sea Grant program, Forest Science Laboratory and other organizations fund major research projects. The department maintains extensive collections of vertebrate species, which are curated by Doctors Sidlauskas (fish), Epps (mammals), and Dugger (birds).

CERTIFICATES

FISHERIES MANAGEMENT GRADUATE CERTIFICATE

Fisheries management is facing unprecedented challenges. Scientists, decision makers, and stakeholders must work together to rebuild over-fished stocks, implement ecosystem-based approaches, design global fisheries agreements, sus-

tain coastal fishing communities, reduce over-capacity and increase the cost-effectiveness of research and management.

Oregon State University's Graduate Certificate in Fisheries Management integrates diverse approaches and perspectives to find effective solutions for complex fisheries management problems at all levels, local to international.

Certificate Overview:

The graduate certificate is available for completion online or on-campus and is designed to accommodate the needs of private, agency and NGO professionals, decision-makers and graduate students in the U.S. and other nations.

Current Graduate Students: You must notify the Department of Fisheries and Wildlife of your intention to pursue this certificate. Upon consultation with the certificate program directors, you will be given instructions regarding listing courses on your program of study and obtaining the required signature for that form.

For more information, please see our program site on the Ecampus website at <http://ecampus.oregonstate.edu/online-degrees/graduate/fisheries-management/> and our departmental website at <http://fw.oregonstate.edu> or contact the program coordinator at fw.gradadvising@oregonstate.edu.

Professionals and other

students: You must notify the Department of Fisheries and Wildlife of your intention to pursue this certificate.

Please contact Certificate Program Director Dr. Selina Heppell, selina.heppell@oregonstate.edu, or Graduate Program Coordinator Lisa Pierson, lisa.pierson@oregonstate.edu.

The certificate requires:

- 18 credits of total course work, taken online and/or on-campus,
- A capstone project (applying knowledge and skills to a fisheries management issue), equivalent in time and effort to a 3-credit course;
- A minimum of two courses from the human dimensions area;
- A minimum of two courses from the fisheries science and ecology area;
- For further information, please see our website or email: fw.gradadvising@oregonstate.edu.

Courses are offered on-campus, at the Hatfield Marine Science Center, and/or online. Check the course catalog and schedule of classes for location and term offered.

Capstone project

FW 506. Projects (3 credits)

Human Dimensions Subject Area

Select at least 2 courses for a minimum 6 credits from below:

ANTH 581. Natural Resources and Community Values (4)

AREC 534. Environmental and Resource Economics (3)

AREC 552. Marine Economics (3)

COMM 540. Theories of Conflict and Conflict Management (3)

COMM 542. Bargaining and Negotiation Processes (3)

COMM 544. Third Parties in Dispute Resolution: Mediation/Arbitration (3)

COMM 546. Communication in International Conflict and Disputes (3)

FW 514. Professional Development: Meeting Communications (1)

FW 515. Fisheries and Wildlife Law and Policy (3)

FW 522. Introduction to Ocean Law (3)

FW 537. Structured Decision Making in Natural Resource Management (2)

FW 585. Consensus and Natural Resources (3)

FW 620. Ecological Policy (3)

MRM 521. Ocean Law (3)

MRM 530. Principles and Practice of Marine Resource Management (3)

MRM 535. Rights-Based Fisheries Management (3)

PS 575. Environmental Politics and Policy (4)

PS 576. Science and Politics (4)

PS 577. International Environmental Politics and Policy (4)

SOC 580. Environmental Sociology (4)

SOC 581. Society and Natural Resources (4)

Fisheries Science and Ecology

Subject Area:

Select at least 2 courses for a minimum 6 credits from below:

FE 530. Watershed Processes (4)

FW 519. The Natural History of Whales and Whaling (3)

FW 520. Ecology and Management of Marine Fishes (3)

FW 521. Aquatic Biological Invasions (4)

FW 524. Introduction to Fisheries Assessment (3)

FW 531. Dynamics of Marine Biological Resources (4)

FW 538. Structured Decision Making in Natural Resource Management Lab (2)

FW/FES 545. Ecological Restoration (4)

FW 554. Fishery Biology (4)

FW 556. Limnology (5)

FW 562. Ecosystem Services (3)

FW 564. Marine Conservation Biology (3)

FW 565. Marine Fisheries (4)

FW 571. Environmental Physiology of Fishes (4)

FW 573. Fish Ecology (4)

FW 574/OC 574. Early Life History of Fishes (4)

FW 576. Fish Physiology (4)

FW 579. Wetlands and Riparian Ecology (3)

FW 580. Stream Ecology (3)

FW 597. Aquaculture (3)

FW 599. Special Topics (2 or 4)

FW 620. Ecological Policy (3)

OEAS 540. The Biogeochemical Earth (4)

TOX 555. Ecotoxicology: Aquatic Ecosystems (3)

Total=18 credits

Other courses may be substituted upon approval of the certificate director.

WILDLIFE MANAGEMENT GRADUATE CERTIFICATE

All courses listed are offered online through Ecampus, and this graduate certificate is designed primarily for online students.

Curriculum

FW 506. Projects: *Capstone Project* (3)

Wildlife Sciences Core (2 courses minimum)

FS 545. Advanced Forest Community Ecology (4)[**Terminated 201401**]

FS 548. Biology of Invasive Plants (3) [**Terminated 201401**]

FW 519. The Natural History of Whales and Whaling (3)

FW 521. Aquatic Biological Invasions (4)

FW 527. Principles of Wildlife Diseases (4)

FW 535. Wildlife in Agricultural Ecosystems (3)

FW 538. Structured Decision Making in Natural Resource Management Lab (2)

FW 540. Vertebrate Population Dynamics (4) (Ecampus Only)

FW 545. Ecological Restoration (4)

FW 551. Avian Conservation and Management (3)

FW 553. Forest Wildlife Habitat Management (4)

FW 558. Mammal Conservation and Management (4)

FW 562. Ecosystem Services (3) *counts as FW core OR Human Dimensions*

FW 563. Conservation Biology of Wildlife (3)

FW 575. Wildlife Behavior (4)

FW 579. Wetlands and Riparian Ecology (3)

FW 581. Wildlife Ecology (4)

SNR 530. Ecological Principles of Sustainable Natural Resources (3) (Ecampus Only)

SNR 540. Global Environmental Change (3) (Ecampus Only)

Human Dimensions Core

(2 courses minimum)

ANTH 581. Natural Resources and Community Values (4)

AREC 532. Environmental Law (4)

AREC 534. Environmental and Resource Economics (3)

AREC 553. Public Land and Resource Law (4)[**Terminated 201201**]

FS 592. Ecosystem Services Ecology, Sociology, Policy (3)[**Terminated 201401**]

FW 515. Fisheries and Wildlife Law and Policy (3)

FW 537. Structured Decision Making in Natural Resource Management (2)

FW 562. Ecosystem Services (3) *Counts as FW core OR Human Dimensions*

FW 585. Consensus and Natural Resources (3)

FW 620. Ecological Policy (3)

PHL 540. Environmental Ethics (3)

PHL 543. World Views and Environmental Values (3)

PS 575. Environmental Politics and Policy (4)

PS 577. International Environmental Politics and Policy (4)

SNR 520. Social Aspects of Sustainable Natural Resources (3) (Ecampus Only)

SNR 521. Economics of Sustainable Natural Resource Management (3) (Ecampus Only)

SNR 522. Basic Beliefs and Ethics in Natural Resources (3) (Ecampus Only)
 SOC 580. Environmental Sociology (4)
 SOC 581. Society and Natural Resources (4)
 WRP 599. Special Topics (3)

Skills Courses (1 course recommended)

BOT 540. Field Methods in Vegetation Science (4)
 FS 523. Natural Resource Data Analysis (4) [Terminated 201401]
 FW 514. Professional Development: Meeting Communications (1)
 GEO 544. Remote Sensing (4)
 GEO 565. Geographic Information Systems and Science (4)
 ST 511. Methods of Data Analysis (4) (Continues as ST 512, 513)

COURSES

FW 107. ORIENTATION TO FISHERIES AND WILDLIFE (1). Information relevant to academic pathways and career planning in the fields of fisheries and wildlife. Graded P/N.

FW 111. INTRODUCTION TO MARINE LIFE IN THE SEA (1). A field-focused learning experience, this inquiry-based course is a basic overview of the marine life and environment on the Oregon coast, including rocky shores, sandy beaches, mud flats, bays, estuaries, and watersheds. Through lectures, lab and field experiences, students will examine important marine organisms in their habitat, exploring their ecological niches and adaptations to their environment along the Oregon coast. Graded P/N. **CROSSLISTED** as BI 111. **PREREQS:** High school biology and chemistry.

FW 199. SPECIAL STUDIES (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

FW 199H. SPECIAL STUDIES (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

FW 209. CAREER SKILLS IN FISHERIES AND WILDLIFE SCIENCES (1). A foundation for life-long career development in fisheries and wildlife sciences. Practice the skills needed to search, apply, and attain internships and jobs. Graded P/N.

FW 251. PRINCIPLES OF FISH AND WILDLIFE CONSERVATION (3). History of conservation and natural resource use; ecological principles, and social and economic limitations of conservation; principles and practices of wildlife and fisheries management; role of research in management. **PREREQS:** Recommend one course in introductory biology.

FW 255. FIELD SAMPLING OF FISH AND WILDLIFE (3). Introduction to sampling populations and communities of vertebrate animals emphasizing sampling design, collection and management of data, and communication of results. Weekend field trips. Laboratory fee assessed. **PREREQS:** WR 121 and familiarity with personal computers.

FW 302. BIOLOGY AND CONSERVATION OF MARINE MAMMALS (4). An examination of the biology of whales, pinnipeds, and other marine mammals, including general adaptations to a marine existence; systematics and biogeography; reproduction; diving physiology; communication and echolocation; feeding and migratory behavior; and marine mammal/human interactions; including conservation issues. **CROSSLISTED** as BI 302. Taught at Hatfield Marine Science Center OR online through Ecampus. **PREREQS:** One year of introductory biology is mandatory.

FW 303. SURVEY OF GEOGRAPHIC INFORMATION SYSTEMS IN NATURAL RESOURCE (3). Concepts underlying geographic information systems, global positioning system, and remote sensing; application to management and research, data quality issues, and case studies. Not a lab/skills class.

FW 307. SPECIALIZATION DEVELOPMENT (1). Students will examine career alternatives, develop career goals, learn what knowledge, skills, and abilities are important for diverse careers in fisheries and wildlife conservation, and develop an academic and lifelong plan for achieving their career goals. This course is intended to assist students in developing a specialization in fisheries and wildlife sciences. Graded P/N.

FW 311. ORNITHOLOGY (3). Survey of the adaptations of birds to a diverse array of habitats. Topics include origins, anatomy, reproductive strategies, migration, flight, behavior, physiology, nutrition, and conservation. **PREREQS:** One year introductory biology.

FW 312. SYSTEMATICS OF BIRDS (2). External anatomy, classification of birds of the world, and field identification of birds by sight and song. Field trips required. **PREREQS:** One year introductory biology.

FW 315. ICHTHYOLOGY (3). A survey of the diversity of biological adaptations of fishes. Topics include physiological and zoogeographical adaptations, reproduction, evolution, cladogenesis, morphology, behavior, and genetics. **PREREQS:** One year introductory biology.

FW 316. SYSTEMATICS OF FISHES (3). Phylogenetic diversity, evolution, relationships and identification of the world's fishes, with particular focus on Oregon fishes. Includes identification, anatomy, use of keys, introduction to the comparative method, systematic theory, taxonomy, field collection and specimen curation. **PREREQS:** (BI 211 or BI 211H) and (BI 212 or BI 212H) and (BI 213 or BI 213H) and Recommended pre- or co-requisite: FW 315 Ichthyology.

FW 317. MAMMALOLOGY (3). A survey of the origins, evolution, diversity, and adaptations of mammals to diverse environments. Topics include taxonomy, reproduction, sensory perception, herbivory, population cycles and behavior. **PREREQS:** One year introductory biology.

FW 318. SYSTEMATICS OF MAMMALS (2). A survey of the phylogenetic diversity of the mammals in Oregon from a habitat/community perspective. Identifying, using keys, and measuring specimens will be stressed. **PREREQS:** One year introductory biology.

FW 320. INTRODUCTORY POPULATION DYNAMICS (4). Principles and concepts of population dynamics related to fish and wildlife populations; methods of estimating abundance, mortality, sustainable harvest levels and extinction risk; hands-on introduction to models for population analysis. Lec/lab. **PREREQS:** (BI 370* or BI 370H* or BI 371*) and Recommended: mathematics equivalent to MTH 245 or higher, introductory statistics.

FW 321. APPLIED COMMUNITY AND ECOSYSTEM ECOLOGY (3). Perspectives in community and ecosystem ecology, and their use in management of fisheries and wildlife resource systems. **PREREQS:** FW 320*

FW 323. MANAGEMENT PRINCIPLES OF PACIFIC SALMON IN THE NORTHWEST (3). Explores the nature of the salmon problem in the Northwest. Experts from diverse disciplines describe principles of salmon biology, habitat ecology and management, socioeconomics of direct and indirect users, and government policies.

FW 325. *GLOBAL CRISES IN RESOURCE ECOLOGY (3). Historical and contemporary implications of the impacts of burgeoning human

populations on rates and patterns of global ecological change. Changes in ecosystem processes and crises of species extinction in the context of cultural and political institutions. (Bacc Core Course).

FW 326. INTEGRATED WATERSHED MANAGEMENT (3). A comprehensive approach to watershed management, one that includes biophysical, socioeconomic, planning and education related topics. Intended for students interested in the sustainable management of natural resources. **PREREQS:** FW 251

FW 328. WILDLIFE CAPTURE AND IMMOBILIZATION (2). Manual and chemical restraint methods are covered with an emphasis on darting equipment, animal and human safety, drug pharmacology and species specific recommendations. **CROSSLISTED** as VMB 328. Lec/lab. This course is repeatable for a maximum of 4 credits.

FW 340. *MULTICULTURAL PERSPECTIVES IN NATURAL RESOURCES (3). Explores multicultural influences on development of natural resources in the American West. Effects of diverse social values on changes in the physical landscape and biodiversity. (Bacc Core Course)

FW 341. FISH AND WILDLIFE LAW ENFORCEMENT (2). Introduction to the philosophy, purposes, and methods of enforcing natural resource laws, emphasizing fish and wildlife laws.

FW 346. TOPICS IN WILDLAND FIRE (3). An interdisciplinary survey of concepts relating to fire science, ecology, management, and policy. Includes case studies of several representative ecosystems, ranging from west- and eastside forests of the Pacific Northwest to shrub steppe ecosystems of the Intermountain West and chaparral ecosystems of southern California. Distance and campus-based delivery using videos, website, and discussion. **CROSSLISTED** as FOR 346, RNG 346. **PREREQS:** Course work in forest biology or ecology (e.g. FOR 240, FOR 341) or equivalent.

FW 350. *ENDANGERED SPECIES, SOCIETY AND SUSTAINABILITY (3). Provides a general background to endangered species biology, and the social and economic implications of the legislation enacted to conserve endangered species (Endangered Species Act, CITES Treaty). (Bacc Core Course) **PREREQS:** FW 251

FW 360. *ORIGINS OF F&W MANAGEMENT-EVOLUTION, GENETICS, AND ECOLOGY (3). Examines genetics and human interactions with fisheries and wildlife from an ecological and evolutionary perspective. Basic principles of environmental interactions, and how humans interact with other species and their environments in the disciplines commonly recognized as fisheries, wildlife and conservation sciences. (Baccalaureate Core Course) **PREREQS:** Two terms of course work at OSU or equivalent.

FW 370. CONSERVATION GENETICS (4). Explores the genetic basis of conservation and management issues concerned with populations and species. Genetic techniques used by conservation biologists are reviewed. Applications of genetic information to natural resource problems are investigated. **PREREQS:** BI 211 and BI 212 and BI 213 and/or 1 year introductory biology.

FW 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

FW 403. THESIS (1-16). This course is repeatable for a maximum of 32 credits. **PREREQS:** Departmental approval required.

FW 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

FW 407. SEMINAR (1-16). Graded P/N. Taught at Hatfield Marine Science Center. This course is repeatable for a maximum of 16 credits.

FW 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

FW 410. INTERNSHIP (1-6). This course is repeatable for a maximum of 99 credits.

FW 415. FISHERIES AND WILDLIFE LAW AND POLICY (3). Provides students with an understanding of the key legal frameworks within which they will work to conserve fish and wildlife resources. Examines federal law and policy relating to allocation and conservation of fish and wildlife resources. **PREREQS:** PS 201 or other introductory political science course.

FW 419. THE NATURAL HISTORY OF WHALES AND WHALING (3). Addresses the natural history of whales as a unique example of adaptation in an evolutionary lineage, and the history of whaling as a general example of the failings of international resource management. Taught at HMSC. **PREREQS:** Some background in vertebrate ecology and evolution or genetics is recommended.

FW 421. AQUATIC BIOLOGICAL INVASIONS (4). An overview of the background, theory, evolution, ecology, politics and conservation of invasions by introduced species in aquatic environments. **CROSSLISTED** as BI 421. Taught at Hatfield Marine Science Center OR online through Ecampus. **PREREQS:** One year of university-level biology.

FW 422. INTRODUCTION TO OCEAN LAW (3). Examination of US law and primary international law focused on fisheries management with coverage of regulation of other ocean resources including energy, marine mammals, endangered species, pollution, and protected areas. Final project is intended to provide students with hands-on exposure to real-world fisheries and ocean management issues.

FW 426. COASTAL ECOLOGY AND RESOURCE MANAGEMENT (5). Study of the ecology and management of coastal marine and freshwater ecosystems as well as natural resources, emphasizing experimental (participatory) learning in a field station setting. Lec/lab. Taught at Hatfield Marine Science Center.

FW 427. PRINCIPLES OF WILDLIFE DISEASES (4). Ecological aspects of important diseases affecting North American wildlife will be discussed. Demonstrations will mainly cover migratory birds, carnivores and ruminants. Lec/lab. Ecampus sections do not use lab demonstrations. **PREREQS:** Junior standing or instructor approval required.

FW 431. DYNAMICS OF MARINE BIOLOGICAL RESOURCES (4). Strategies of marine fishery management. A synthesis of the principles of population dynamics for single- and multi-species systems from the viewpoint of a marine resource manager. Offered alternate years. Taught at Hatfield Marine Science Center OR online through Ecampus. **PREREQS:** BI 370 or BI 371

FW 435. ^WILDLIFE IN AGRICULTURAL ECOSYSTEMS (3). Examines the relationships between agricultural production and fish and wildlife populations and communities. Explores the impacts of agricultural practices on fish and wildlife. Field trips required; transportation fee charged. OSU Ecampus students are not required to attend field trips. (Writing Intensive Course) **PREREQS:** BI 370 and FW 251

FW 439. ^HUMAN DIMENSIONS OF FISHERIES AND WILDLIFE MANAGEMENT (3). Students build an understanding and appreciation for the role of human dimensions (HD) in fisheries and wildlife management. Students work both independently and in groups on assignments with an HD focus. **CROSSLISTED** as FES 439 (Writing Intensive Course) **PREREQS:** Principles of fish and wildlife conservation or natural resources and introductory statistics.

FW 445. ECOLOGICAL RESTORATION (4). Fundamentals of restoring and reclaiming

disturbed landscapes and ecosystems. Topics to be covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. Lec/lab/rec. **CROSSLISTED** as FES 445. **PREREQS:** BI 370 or instructor approval required.

FW 446. WILDLAND FIRE ECOLOGY (3). Coverage of fire histories and ecology of major forest, rangeland and wetland ecosystems. Includes fire interactions with physical and biotic components of ecosystems, role of fire in ecological processes, and utilization in natural resource management. **CROSSLISTED** as FOR 446/FOR 546 and RNG 446/RNG 546. **PREREQS:** Course work in ecology and natural resource management.

FW 451. AVIAN CONSERVATION AND MANAGEMENT (3). Identification, classification, life history strategies, ecology and management of upland and migratory birds. **PREREQS:** FW 311

FW 453. FOREST MANAGEMENT AND WILDLIFE CONSERVATION (3). The ecology and conservation of wildlife in managed forests, the influences of forest management on wildlife and their habitats, and management of forests to achieve wildlife objectives. Field trips required. **CROSSLISTED** as FS 453. **PREREQS:** (FOR 240* or FOR 341* or (BI 370* or BI 370H*)) and / or equivalent course in ecology.

FW 454. ^FISHERY BIOLOGY (4). Principles and methods used in studying the biology of fishes; ecological requirements of freshwater and anadromous fishes; principles and practices in sport fishery management. Taught at Hatfield Marine Science Center OR online through Ecampus. (Writing Intensive Course) **PREREQS:** (FW 315 and FW 320)

FW 456. LIMNOLOGY (5). Physical, chemical, and biological concepts in limnology and techniques related to aquatic resources and their management. Lec/lab. **PREREQS:** Senior standing.

FW 458. MAMMAL CONSERVATION AND MANAGEMENT (4). A thorough understanding of the management, conservation, and ecology of mammals in North America; includes population dynamics, harvest management, techniques to determine abundance, diets, reproduction, and the cultural and political variables that contribute to formulation of management programs. **PREREQS:** 9 credits of upper-division biological sciences.

FW 462. ECOSYSTEM SERVICES (3). Introduces students to the ecological, economic, and social/ethical issues involved in the study of ecosystem services, with a major focus on biological components involved in ecosystem services. Topics covered include: 1) an introduction to the roles that living organisms play in the provision of ecosystem services, 2) the relationship of ecosystem functions and services, 3) the societal factors that influence this relationship, 4) general categories of ecosystem services, 5) identification of potential ecosystem services in terrestrial and aquatic systems, 6) an overview of the methods of valuation, and 7) translating ecosystems functions to services. Case studies will be used to illustrate key concepts and relationships within different ecological and social contexts. **PREREQS:** BI 370

FW 464. MARINE CONSERVATION BIOLOGY (3). Lectures, group library research, and class debates on current issues regarding the conservation of biodiversity in the sea. Topics include overfishing, invasive species, eutrophication, marine pollution, and global warming, as well as means of addressing these threats. **CROSSLISTED** as Z 464/Z 564. **PREREQS:** (BI 370 or BI 370H) and / or equivalent. Seniors, postbacs, and graduate students only.

FW 465. MARINE FISHERIES (4). A global perspective on commercial fish and shellfish

harvesting with emphasis on fishing technology and policy issues. Offered alternate years. Taught at Hatfield Marine Science Center. **PREREQS:** FW 315

FW 467. ANTARCTIC SCIENCE AND CONSERVATION (4). Explores the history, geology, climate, and ecosystems of Antarctica, with special emphasis on current conservation issues. **PREREQS:** Upper-division standing; BI 370 or equivalent recommended.

FW 470. ^ECOLOGY AND HISTORY: LANDSCAPES OF THE COLUMBIA BASIN (3). Integrates environmental history and landscape ecology of the Columbia River Basin from geologic origins to the present, to create an understanding of change caused by natural processes and human activities. **CROSSLISTED** as HSTS 470/HSTS 570. (Bacc Core Course) **PREREQS:** (HST 201 and HST 202 and HST 203) or BI 370

FW 471. ENVIRONMENTAL PHYSIOLOGY OF FISHES (4). Principles of the functional biology of fishes with emphasis on environmental interactions and management implications. **PREREQS:** FW 315 and (BI 370 or BI 371)

FW 472. ADVANCED ICHTHYOLOGY (3). Evolution of fishes with emphasis on the role of ontogeny; cladistic methodology and classification contrasted with traditional taxonomic approaches. **PREREQS:** Two years upper-division fisheries or zoology.

FW 473. FISH ECOLOGY (4). Behavior of fishes as a mode of accommodation to various ecological and evolutionary constraints. Importance of heritable and learned patterns to population and community dynamics. Application of behavioral studies to the solution of management problems. Lec/lab/rec. **PREREQS:** ((BI 370 or BI 370H) and FW 315)

FW 474. EARLY LIFE HISTORY OF FISHES (4). Overview of diversity of development patterns in fishes; emphasis on morphology, life history, and evolution. Offered alternate years. **PREREQS:** FW 315 or equivalent.

FW 475. WILDLIFE BEHAVIOR (4). Adaptive significance of egocentric and social behavior of wildlife species. Implications of behavior in sound management practice. **PREREQS:** 9 credits of upper-division biology.

FW 476. FISH PHYSIOLOGY (4). Physiological specializations and adaptations of major groups of fishes. **PREREQS:** FW 315

FW 477. AGE AND GROWTH OF FISH (3). An overview of the terminology, theory, assumptions, limitations, error, and processing and ageing techniques for different types of calcified structures used to age fishes. **PREREQS:** FW 454 and introductory statistics is highly recommended.

FW 479. WETLANDS AND RIPARIAN ECOLOGY (3). Ecology of riparian freshwater and estuarine wetlands of the Pacific Northwest. Effects of land use on ecosystem structure, function, biodiversity, and restoration will be explored. **PREREQS:** BI 370 or BI 371

FW 481. WILDLIFE ECOLOGY (4). Interrelationships of wildlife, environment and humans. Evaluation of properties and habitats of wildlife populations. **PREREQS:** (BI 370 or BI 370H or BI 371) and FW 311 and FW 320 and ST 351

FW 485. ^CONSENSUS AND NATURAL RESOURCES (3). Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. **CROSSLISTED** as ANS 485/ANS 585, FES 485/FES 585, FS 485/FS 585, SOC 485/SOC 585. (Bacc Core Course)

FW 488. PROBLEM SOLVING IN FISHERIES AND WILDLIFE SCIENCE (3). The first of a two-

course capstone sequence designed to introduce students to the synthesis of scientific information on species, habitats and ecosystems and the use of such data in shaping fisheries and wildlife conservation, management and policy. Includes a group problem solving project and case studies. For FW majors in their senior year. Lec/lab. **PREREQS:** (FW 320 and FW 321*) and 400-level FW course work (e.g. FW 454 or FW 481 or FW 426)

FW 489. EFFECTIVE COMMUNICATIONS IN FISHERIES AND WILDLIFE SCIENCE (3). Second of a two-course capstone sequence centered on analysis, synthesis, and interpretation of data and written and oral communication of management, education or policy statements. **PREREQS:** FW 488

FW 491. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE (4). Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. Lec/lab. **CROSSLISTED** as MB 491/MB 591. **PREREQS:** 9 credits of upper-division fisheries biology.

FW 497. AQUACULTURE (3). Principles and practices for the aquaculture of fish, shellfish, and algae. Taught at Hatfield Marine Science Center. (Writing Intensive Course.) **PREREQS:** 9 credits of upper-division biology.

FW 498. AQUACULTURE LABORATORY (3). Biology and culture requirements of fish, shellfish, and algae. Emphasis on laboratory culture techniques and practical experience in handling organisms. Taught at Hatfield Marine Science Center. **PREREQS:** 9 credits of upper-division biology.

FW 499. SPECIAL TOPICS IN FISHERIES AND WILDLIFE (1-16). Various topics in fisheries science and wildlife science. Taught at Hatfield Marine Science Center and Corvallis campus. This course is repeatable for a maximum of 16 credits.

FW 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

FW 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

FW 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

FW 506. PROJECTS (1-6). Projects are synthesis papers or outreach products that are developed with a mentor from campus, a natural resource agency, or the student's place of employment. The purpose of your project is to contribute to the field of study with a product that reflects the principles and applications learned in your classes. Graded P/N. This course is repeatable for a maximum of 12 credits.

FW 507. SEMINAR (1-16). Selected Topics. Taught at Hatfield Marine Science Center and Corvallis campus. This course is repeatable for a maximum of 16 credits.

FW 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

FW 510. PROFESSIONAL INTERNSHIP (1-16). This course is repeatable for a maximum of 10 credits.

FW 514. PROFESSIONAL DEVELOPMENT: MEETING COMMUNICATIONS (1). Fisheries and wildlife professionals use meetings of scientists, managers and stakeholders to communicate key findings and develop consensus recommendations for policy. This 1-credit experiential learning course will expose students to a scientific or management meeting in their chosen field (fisheries, wildlife, ecology, or conservation biology) and get them to think about how meetings function as well as their content. This course is repeatable for a maximum of 3 credits.

FW 515. FISHERIES AND WILDLIFE LAW AND POLICY (3). Provides students with an understanding of the key legal frameworks within which they will work to conserve fish and wildlife resources. Examines federal law and policy relating to allocation and conservation of fish and wildlife resources. **PREREQS:** PS 201 or other introductory political science course.

FW 519. THE NATURAL HISTORY OF WHALES AND WHALING (3). Addresses the natural history of whales as a unique example of adaptation in an evolutionary lineage, and the history of whaling as a general example of the failings of international resource management. Taught at HMSC. **PREREQS:** Some background in vertebrate ecology and evolution or genetics is recommended.

FW 520. ECOLOGY AND MANAGEMENT OF MARINE FISHES (3). A lecture and lab course that covers the ecology of marine fishes and important ecological principles that guide conservation and management. Life history, behavior, habitat, community dynamics and ecosystem processes are emphasized, along with alternative management strategies. **PREREQS:** FW 320 or equivalent population dynamics class and ichthyology.

FW 521. AQUATIC BIOLOGICAL INVASIONS (4). An overview of the background, theory, evolution, ecology, politics and conservation of invasions by introduced species in aquatic environments. Taught at Hatfield Marine Science Center OR online through Ecampus. **PREREQS:** One year of university-level biology.

FW 522. INTRODUCTION TO OCEAN LAW (3). Examination of US law and primary international law focused on fisheries management with coverage of regulation of other ocean resources including energy, marine mammals, endangered species, pollution, and protected areas. Final project is intended to provide students with hands-on exposure to real-world fisheries and ocean management issues.

FW 524. INTRODUCTION TO FISHERIES ASSESSMENT (3). Fisheries management strategies rely on models that predict a population's responses to exploitation. This course introduces approaches commonly used to assess and evaluate the dynamics and status of a population. Provides an overview of the terminology, data requirements, underlying rationale, assumptions, limitations and uncertainty associated with stock assessments. **PREREQS:** College algebra and introductory statistics are recommended. For those unfamiliar with data collection and analysis methods in fisheries, FW 454/554, Fishery Biology, is a good precursor to this course.

FW 526. COASTAL ECOLOGY AND RESOURCE MANAGEMENT (5). Study of the ecology and management of coastal marine and freshwater ecosystems as well as natural resources, emphasizing experimental (participatory) learning in a field station setting. Lec/lab. Taught at Hatfield Marine Science Center.

FW 527. PRINCIPLES OF WILDLIFE DISEASES (4). Ecological aspects of important diseases affecting North American wildlife will be discussed. Demonstrations will mainly cover migratory birds, carnivores and ruminants. Lec/lab. Ecampus sections do not use lab demonstrations. **PREREQS:** Junior standing or instructor approval required.

FW 531. DYNAMICS OF MARINE BIOLOGICAL RESOURCES (4). Strategies of marine fishery management. A synthesis of the principles of population dynamics for single- and multi-species systems from the viewpoint of a marine resource manager. Offered alternate years. Taught at Hatfield Marine Science Center OR online through Ecampus. **PREREQS:** BI 370 or BI 371

FW 535. WILDLIFE IN AGRICULTURAL ECOSYSTEMS (3). Examines the relationships

between agricultural production and fish and wildlife populations and communities. Explores the impacts of agricultural practices on fish and wildlife. Field trips required; transportation fee charged. OSU Ecampus students are not required to attend field trips. **PREREQS:** BI 370 and FW 251

FW 537. STRUCTURED DECISION MAKING IN NATURAL RESOURCE MANAGEMENT (2). Structured decision making (SDM) is used for making natural resource management and policy decisions. It is an ideal framework for interdisciplinary teams to cooperate and identify the most effective management strategies. Graduate students from diverse backgrounds (natural resources, political science, others) are provided with an understanding of the SDM process. **PREREQS:** One year of college-level mathematics, one quarter of fish and wildlife management or similar course is recommended.

FW 538. STRUCTURED DECISION MAKING IN NATURAL RESOURCE MGMT LAB (2). Students who are taking or have taken FW 537 are provided with the understanding of and ability to employ the techniques needed to build models that are used during the structured decision-making process. The laboratory emphasizes the use of graphical models and basic statistical techniques for building decision-making models. Lec/lab. **PREREQS:** FW 537*

FW 540. VERTEBRATE POPULATION DYNAMICS (4). Concepts in population ecology and quantitative approaches to managing wildlife populations; methods of parameter estimation, model structure, assumptions, and analysis, applications to common management issues. **PREREQS:** Upper-division population ecology and basic statistics courses expected.

FW 542. PHYSIOLOGICAL ECOLOGY OF WILDLIFE (4). An overview of the energy and nutrient requirements of wildlife; fundamental methods and techniques for research; energetic and nutritional constraints for wildlife, and adaptations to these constraints as they relate to wildlife management.

FW 544. QUANTITATIVE DECISION ANALYSIS FOR FISH AND WILDLIFE MGMT (4). Decision analysis allows decision makers to examine the expected effects of different strategies before implementation; incorporate multiple objectives and values of stakeholders; determine the relative influence of various sources of uncertainty; and estimate the value of collecting additional data. Quantitatively oriented graduate students in natural resources are provided with an in-depth overview of decision analysis and adaptive management, emphasizing animal population management. Lec/lab. **PREREQS:** ST 511 and ST 512 or equivalent, basic background in animal population dynamics and management.

FW 545. ECOLOGICAL RESTORATION (4). Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics to be covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. **CROSSLISTED** as FES 545. **PREREQS:** BI 370 or instructor approval required.

FW 546. WILDLAND FIRE ECOLOGY (3). Coverage of fire histories and ecology of major forest, rangeland and wetland ecosystems. Includes fire interactions with physical and biotic components of ecosystems, role of fire in ecological processes, and utilization in natural resource management. **CROSSLISTED** as FOR 446/FOR 546 and RNG 446/RNG 546. **PREREQS:** Course work in ecology and natural resource management.

FW 547. TROPHIC CASCADES (2-3). Theory and empirical analysis of terrestrial carnivore effects on plants and ecosystems as mediated through herbivores. Emphasis on large carnivores,

frequency/strength of trophic cascades, implications for ecosystem function, management, and restoration. Lectures, current literature, discussions, field exercise, term paper, and student presentations. Offered every odd year in spring. **CROSSLISTED** as FOR 547. **PREREQS:** Graduate or post-bac standing and an ecology course.

FW 551. AVIAN CONSERVATION AND MANAGEMENT (3). Identification, classification, life history strategies, ecology and management of upland and migratory birds. **PREREQS:** FW 311

FW 553. FOREST WILDLIFE HABITAT MANAGEMENT (4). Management of terrestrial vertebrates in forest ecosystems. Effects on silvicultural practices and landscape pattern on habitats and populations. **CROSSLISTED** as FS 553. **PREREQS:** FOR 341 or equivalent course in ecology.

FW 554. FISHERY BIOLOGY (4). Principles and methods used in studying the biology of fishes; ecological requirements of freshwater and anadromous fishes; principles and practices in sport fishery management. Taught at Hatfield Marine Science Center OR online through Ecampus. **PREREQS:** FW 315 and FW 320

FW 556. LIMNOLOGY (5). Physical, chemical, and biological concepts in limnology and techniques related to aquatic resources and their management. Lec/lab. **PREREQS:** Senior standing.

FW 558. MAMMAL CONSERVATION AND MANAGEMENT (4). A thorough understanding of the management, conservation, and ecology of mammals in North America; includes population dynamics, harvest management, techniques to determine abundance, diets, reproduction, and the cultural and political variables that contribute to formulation of management programs. **PREREQS:** 9 credits of upper-division biological sciences.

FW 562. ECOSYSTEM SERVICES (3). Introduces students to the ecological, economic, and social/ethical issues involved in the study of ecosystem services, with a major focus on biological components involved in ecosystem services. Topics covered include: 1) an introduction to the roles that living organisms play in the provision of ecosystem services, 2) the relationship of ecosystem functions and services, 3) the societal factors that influence this relationship, 4) general categories of ecosystem services, 5) identification of potential ecosystem services in terrestrial and aquatic systems, 6) an overview of the methods of valuation, and 7) translating ecosystems functions to services. Case studies will be used to illustrate key concepts and relationships within different ecological and social contexts. **PREREQS:** BI 370

FW 563. CONSERVATION BIOLOGY OF WILDLIFE (3). Overview of the field of conservation biology with emphasis on the relationship to conservation and management of wildlife.

FW 564. MARINE CONSERVATION BIOLOGY (3). Lectures, group library research, and class debates on current issues regarding the conservation of biodiversity in the sea. Topics include overfishing, invasive species, eutrophication, marine pollution, and global warming, as well as means of addressing these threats. **CROSSLISTED** as Z 464/Z 564. **PREREQS:** BI 370 or BI 370H or equivalent. Seniors, postbacs, and graduate students only.

FW 565. MARINE FISHERIES (4). A global perspective on commercial fish and shellfish harvesting with emphasis on fishing technology and policy issues. Offered alternate years. Taught at Hatfield Marine Science Center. **PREREQS:** FW 315

FW 570. ECOLOGY AND HISTORY: LANDSCAPES OF THE COLUMBIA BASIN (3). Integrates environmental history and landscape ecology of the Columbia River Basin from geologic origins to the present, to create an understanding

of change caused by natural processes and human activities. **CROSSLISTED** as HSTS 470/HSTS 570. **PREREQS:** (HST 201 and HST 202 and HST 203) or BI 370

FW 571. ENVIRONMENTAL PHYSIOLOGY OF FISHES (4). Principles of the functional biology of fishes with emphasis on environmental interactions and management implications. **PREREQS:** FW 315 and (BI 370 or BI 371)

FW 572. ADVANCED ICHTHYOLOGY (3). Evolution of fishes with emphasis on the role of ontogeny; cladistic methodology and classification contrasted with traditional taxonomic approaches. **PREREQS:** Two years upper-division fisheries or zoology.

FW 573. FISH ECOLOGY (4). Behavior of fishes as a mode of accommodation to various ecological and evolutionary constraints. Importance of heritable and learned patterns to population and community dynamics. Application of behavioral studies to the solution of management problems. Lec/lab/rec. **PREREQS:** BI 370 and FW 315

FW 574. EARLY LIFE HISTORY OF FISHES (4). Overview of diversity of development patterns in fishes; emphasis on morphology, life history, and evolution. Offered alternate years. **CROSSLISTED** as OC 574. **PREREQS:** FW 315 or equivalent.

FW 575. WILDLIFE BEHAVIOR (4). Adaptive significance of egocentric and social behavior of wildlife species. Implications of behavior in sound management practice. **PREREQS:** 9 credits of upper-division biology.

FW 576. FISH PHYSIOLOGY (4). Physiological specializations and adaptations of major groups of fishes. **PREREQS:** FW 315

FW 577. AGE AND GROWTH OF FISH (3). An overview of the terminology, theory, assumptions, limitations, error, and processing and ageing techniques for different types of calcified structures used to age fishes. **PREREQS:** Introductory statistics is highly recommended. Graduate students: FW 554, Fishery Biology, is highly recommended.

FW 579. WETLANDS AND RIPARIAN ECOLOGY (3). Ecology of riparian freshwater and estuarine wetlands of the Pacific Northwest. Effects of land use on ecosystem structure, function, biodiversity, and restoration will be explored. **PREREQS:** BI 370 or BI 371

FW 580. STREAM ECOLOGY (3). Structure and function of stream ecosystems, with emphasis on biological processes; physical and chemical relations; riparian influences and landscape perspectives. **PREREQS:** 9 credits of upper-division science.

FW 581. WILDLIFE ECOLOGY (4). Interrelationships of wildlife, environment and humans. Evaluation of properties and habitats of wildlife populations. **PREREQS:** (BI 370 or BI 371) and FW 311 and FW 320 and ST 351

FW 585. CONSENSUS AND NATURAL RESOURCES (3). Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. **CROSSLISTED** as ANS 485/ANS 585, FES 485/FES 585, FS 485/FS 585, SOC 485/SOC 585.

FW 586. GENETICS AND DEMOGRAPHY OF SMALL POPULATIONS (3). Factors affecting species persistence, viability models, and implications for conservation. Offered alternate years. **PREREQS:** Ecology and genetics

FW 590. COASTAL POPULATION GENETICS AND CONSERVATION (6). Hands-on application of molecular population genetics in coastal fishery management and conservation, study design, DNA extraction, PCR, analysis techniques, paper review and write-up. Taught at Hatfield Marine Science Center. **PREREQS:** BI 311 or equivalent introductory genetics course.

FW 591. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE (4). Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. Lec/lab. **CROSSLISTED** as MB 491/MB 591. **PREREQS:** 9 credits of upper-division fisheries biology.

FW 597. AQUACULTURE (3). Principles and practices for the aquaculture of fish, shellfish, and algae. Taught at Hatfield Marine Science Center. **PREREQS:** 9 credits of upper-division biology.

FW 598. AQUACULTURE LABORATORY (3). Biology and culture requirements of fish, shellfish, and algae. Emphasis on laboratory culture techniques and practical experience in handling organisms. Taught at Hatfield Marine Science Center. **PREREQS:** 9 credits of upper-division biology.

FW 599. SPECIAL TOPICS IN FISHERIES AND WILDLIFE (1-16). Various topics in fisheries science and wildlife science. Taught at Hatfield Marine Science Center and Corvallis campus. This course is repeatable for a maximum of 99 credits.

FW 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

FW 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

FW 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

FW 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

FW 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

FW 620. ECOLOGICAL POLICY (3). Policy issues associated with ecosystem management, risk assessment, biological diversity, ecosystem health, sustainability, invasive species, bioregionalism, globalization and transnational factors, and rights, ethics, and morals. **PREREQS:** Background in natural resources, environmental sciences, ecological sciences, ecological economics, political science, or similar discipline.

FW 661. ANALYSIS OF ANIMAL POPULATIONS (5). Quantitative methods for estimating parameters (abundance, survival, population stability) of animal populations. Emphasis is on vertebrate animals and statistical methods of hypothesis testing, parameter estimation, and inference testing. Offered odd-numbered years. **PREREQS:** ST 511 and ST 512 or equivalent

FW 667. RESEARCH PERSPECTIVES (4). Critical evaluation of philosophical perspectives in resource science and management. The aim of the course is to help students develop their own philosophical views through discussion of dominant perspectives and their problems and suggestion of potentially more adequate views. **PREREQS:** 9 credits of upper-division science, philosophy or natural resources.

FW 699. SPECIAL TOPICS IN FISHERIES AND WILDLIFE (1-4). Various topics in fisheries science and wildlife science. Taught at Hatfield Marine Science Center and Corvallis campus. This course is repeatable for a maximum of 8 credits.

FW 808. WORKSHOP (1-16).

FOOD SCIENCE AND TECHNOLOGY

Robert J. McGorin, *Head*
100 Wiegand Hall
Oregon State University
Corvallis, OR 97331-6602

FACULTY

Professors Daeschel, Goddik, McGorin, Morrissey, Park, Qian, Shay, Shellhammer, Zhao
Associate Professors Bakalinsky, DeWitt, Osborne, Penner, Ross, Su, Torres
Assistant Professors Lim, Tomasino, Waite-Cusic
Senior Instructor Smith

Undergraduate Major

Food Science and Technology
(BS, CRED, HBS)

Options

Enology and Viticulture
Fermentation Science
Food Science

Minors

Fermentation Science
Food Science
Food Technology

Graduate Major

Food Science and Technology
(MAg, MS, PhD)

Graduate Areas of Concentration

Brewing
Enology
Flavor Chemistry
Food Chemistry/Biochemistry
Food Engineering
Food Microbiology/Biotechnology
Food and Seafood Processing
Sensory Evaluation

Graduate Minor

Food Science and Technology

Food science and technology concerns the chemistry and engineering necessary to deliver safe, convenient food products from the farm gate to the food marketer. The academic program integrates principles and concepts in the physical, biological, and engineering sciences, and applies them to the scientific and technological aspects of food and beverage processing. The role of the food scientist is to successfully integrate these disciplines to assure an abundant, high quality, and nutritious food supply.

Graduate programs leading to the MAg, MS, or PhD degree in food science

permit intensified study in subject areas of special interest. Research areas in the department include both basic and applied aspects of chemistry/biochemistry, microbiology/biotechnology, sensory analysis, and food engineering. Research in food processing operations covers a number of food commodities such as cereal products, dairy products, fruits, vegetables, meats, seafoods, wines and beers.

Departmental facilities include well-equipped laboratories, a pilot plant, a winery, a micro-brewery, and an artisan cheese-making plant for instruction and research. Research facilities also are available at the Coastal Oregon Marine Experiment Station Seafood Laboratory at Astoria and the Food Innovation Center in Portland, Oregon.

WORK EXPERIENCE AND INTERNSHIPS

Because of the educational value of professional work experience, the department strongly encourages students to gain practical work experience during summer and fall terms. Students typically work in brewing, wineries, dairy processing, and seasonal fruit and vegetable processing. Students may earn internship credit with prior approval of the department and of the employer. OSU students may also participate in international internship programs.

SCHOLARSHIPS

The College of Agricultural Sciences, the department, the food industry, and the Institute of Food Technologists offer over 25 merit and financial need scholarships to encourage students preparing for careers in the food industry. For more information, contact the department, 541-737-3131, and the Office of Financial Aid and Scholarships, 541-737-2241.

CAREER OPPORTUNITIES

Food science graduates have had excellent success in finding positions (median nationwide entry level salary for bachelor of science degree holders is \$50,000) in an industry that possesses tremendous variety, mobility and opportunity for advancement. Career opportunities in the food, brewing, and enology industries include management, research and development, process and production supervision, quality assurance, distribution, sales, marketing, consulting, and trade associations. Governmental agencies employ food scientists for work in regulatory control, research, and the development of food standards.

Graduates of a master's or doctoral program hold teaching, research and extension positions with colleges and universities.

FOOD SCIENCE AND TECHNOLOGY (BS, CRED, HBS)

A bachelor's degree in Food Science and Technology provides the necessary foundation to pursue any of the many possible food and beverage related career paths. The program integrates principles and concepts in the physical, biological and engineering sciences (including courses in general chemistry, organic chemistry, biology, physics, math and statistics, biochemistry, microbiology, and food engineering) and applies them to the scientific and technical aspects of food and beverage processing. Students who achieve at least a 2.00 GPA in the required foundation courses in chemistry additionally earn a Chemistry minor.

In addition to completing the Food Science and Technology Core, students select from among three options (areas of concentration):

1. Enology and Viticulture
2. Fermentation Science
3. Food Science

All curricula are approved by the Higher Education Committee of the Institute of Food Technologists, making students eligible for national and Oregon IFT scholarships, as well as providing universal degree recognition within the food industry. Beyond choosing an option, students are able to further customize their studies through a menu of elective credits, facilitating the development of additional expertise in food related areas such as microbiology, toxicology, nutrition, horticulture, and animal sciences, and crediting formalized career and professional development experiences. Among minors that complement the Food Science and Technology major are Business and Entrepreneurship, Microbiology, and Nutrition.

Grade Requirements

1. All courses required for completion of the FST major must be passed, graded on the A–F scale. Included are both “core” and “option” courses in FST, as well as supporting courses in math, sciences, and written and oral communication.
2. A C– grade, or better, must be earned in the specified prerequisites for the following courses. (These courses have additional prerequisites, but the C– minimum applies to the prerequisites listed below).
 - a. BEE 472: MTH 112 and (MTH 241 or MTH 251) and PH 201
 - b. FST 420: ST 351
 - c. FST 422: CH 331 and CH 332
 - d. FST 460: BI 212 and CH 331 and CH 332
 - e. FST 466: BI 212 and CH 331 and CH 332
 - f. FST 479: BI 212 and CH 331 and CH 332

3. Students must earn at least a 2.00 "major" GPA. The major GPA is a cumulative GPA calculated on a list of courses particular to each option. Selected core and option courses are included, as specified in the list accompanying requirements of each option.

Food Science and Technology Core (65–69 credits)

Chemistry/Biochemistry Foundation Courses

- BB 350. Elementary Biochemistry (4)
 CH 231, CH 232, CH 233. *General Chemistry (4,4,4)
 CH 261, CH 262, CH 263. *Laboratory for Chemistry 231–233 (1,1,1)
 CH 324. Quantitative Analysis (4)
 CH 331, CH 332. Organic Chemistry (4,4)
 CH 337. Organic Chemistry Laboratory (4)

Physics, Statistics and Mathematics Foundation Courses

- PH 201. *General Physics (5)
 ST 351. Introduction to Statistical Methods (4)

Select either MTH 241 or (MTH 251 and MTH 252):

- MTH 241. *Calculus for Management and Social Science (4)
 or MTH 251. *Differential Calculus (4) and MTH 252. Integral Calculus (4)

Biological Science Foundation Courses

- BI 211. *Principles of Biology (4)
 BI 212. *Principles of Biology (4)
 BI 213. *Principles of Biology (4)
 MB 302. General Microbiology (3)
 MB 303. General Microbiology Laboratory (2)

Communication Foundation Courses

- COMM 111. *Public Speaking (3)

Select one of WR 222, WR 327 or WR 362:

- WR 222. *English Composition (3)
 WR 327. *Technical Writing (3)
 WR 362. *Science Writing (3)

Food Science and Technology Core Courses

- BEE 472. Introduction to Food Engineering Principles (5)
 BEE 473. Introduction to Food Engineering Process Design (3)
 FST 360. Food Safety and Sanitation (3)
 FST 370. Industry Preparation/HACCP (3)
 FST 407. Senior Seminar (1)
 FST 421. *Food Law (3)
 FST 422. Food Chemistry Fundamentals (4)
 FST 425. ^Food Systems Chemistry (4)

Footnotes:

- * Baccalaureate Core Course
 ^ Writing Intensive Course
 A C– or better grade is required in the following courses: BI 212, CH 331–CH 332, MTH 112, MTH 241 or MTH 251, PH 201 and ST 351.

POSTBACCALAUREATE STUDY IN FST

Admission

Students holding a bachelor's degree from an accredited institution who are otherwise admissible to Oregon State

University (see: <http://oregonstate.edu/admissions/main/post-baccalaureate>) will be accepted into the Food Science and Technology major upon meeting the following additional criteria:

All of the following courses (or equivalents) must be completed with a cumulative GPA of 2.25 (4.00 maximum scale). In the case of repeated courses, the second grade earned in the course will be used in the GPA calculation.

- BI 211–BI 213 Principles of Biology
- CH 231–CH 233 General Chemistry and CH 261–CH 263 General Chemistry Laboratory
- MTH 111 College Algebra; MTH 112 Elementary Functions and MTH 241 Calculus for Management and Social Science or MTH 251 Differential Calculus
- PH 201 General Physics

Earning the Degree

To earn a Bachelor of Science (BS) degree in Food Science and Technology, postbaccalaureate students must fulfill all of the FST major requirements, selecting any one of three options: Enology and Viticulture, Fermentation Science, or Food Science (see: <http://oregonstate.edu/foodsci/prospective-undergraduate-students>).

The Baccalaureate Core (general studies) component of an OSU bachelor's degree is considered fulfilled by the student's first degree. Additionally, the university requires that a minimum of 45 credits applied to this degree (32 if the first degree is from OSU) must be completed with Oregon State University course work completed while enrolled in this degree program.

Additional information for prospective postbaccalaureate students is available at the FST undergraduate department website: <http://oregonstate.edu/foodsci/home>.

OPTIONS

ENOLOGY AND VITICULTURE OPTION

The wine industry in the United States is centered on the West Coast, which produces about 95 percent of our nation's wines. Oregon is third in the nation in terms of number of wineries and fourth in the nation in total volume of wine produced. The Oregon wine industry is a rapidly growing industry, and is becoming increasingly important to the larger Oregon economy.

The Enology and Viticulture option within the Department of Food Science and Technology prepares students to become successful winemakers. Courses in enology, taught by food science faculty, provide a scientifically-based understanding of wine production. Supporting course work in horticulture, botany and crop and soil science, helps

students develop an understanding of the interaction between grape production and winemaking. Graduates in this option will possess the necessary breadth and depth of knowledge and associated practical skills to become independently thinking and successful winemakers.

Fermentation and Enology Courses

- FST 466. Wine Production Principles (3)
 FST 467. Wine Production, Analysis, and Sensory Evaluation (5)
 FST/MB 479. Fermentation Microbiology (3)

Plant and Soil Science Courses

- BOT 331. Plant Physiology (4)
 HORT 301. The Biology of Horticulture (3)
 HORT 453. Grapevine Growth and Physiology (3)
 HORT 454. Principles and Practices of Vineyard Production (3)
 SOIL 205. *Soil Science (4)

Enology and Viticulture Option Electives

Complete 12 credits, at least 3 of which must be upper division, from the list below:

- AG 407. Seminar: "Leadership Academy" (3)¹
 BOT 350. Introductory Plant Pathology (4)
 ENT 311. Introduction to Insect Pest Management (4)
 FST 101. Food Science Orientation (1)
 FST 251. Introduction to Wines, Beers, and Spirits (3)
 FST 260. *Food Science and Technology in Western Culture (3)
 FST 273. *Wine in the Western World (3)
 FST 401. Research (3)¹
 FST 410. Internship (3)^{1,2}
 FST 420. Sensory Evaluation of Food (4)
 FST 430. Innovation and Food Product Development (4)
 FST 480. Topics in Fermentation (1) (up to 2 credits of FST480 may be applied)
 HORT 251. Temperate Tree Fruit, Berries, Grapes and Nuts (2)
 HORT 316. Plant Nutrition (4)
 HORT 452. Berry and Grape Physiology and Culture (4)
 MB 440. Food Microbiology (3)
 MB 441. Food Microbiology Laboratory (2)
 NUTR 216. *Food in Non-Western Culture (3)
 TOX 429. Toxic Substances in Food (3)

Total=40

Footnotes:

- * Baccalaureate Core Course
¹ Competitive selection and/or departmental approval required.
² Students may not earn internship credit in all states. Consult with internship coordinator for list of eligible states.
 Students may complete more than one option. Courses must be selected so that at least 12 credits in each option are counted uniquely toward requirements of that option.

FST Major Requirement of 2.00 GPA (Enology and Viticulture Option)

The following courses are included in calculation of the FST major GPA for students in the Enology and Viticulture option:

- BB 350. Elementary Biochemistry (4)

BEE 472. Introduction to Food Engineering Principles (5)
 BEE 473. Introduction to Food Engineering Process Design (3)
 BOT 331. Plant Physiology (4)
 CH 324. Quantitative Analysis (4)
 FST 360. Food Safety and Sanitation (3)
 FST 370. Industry Preparation/HACCP (3)
 FST 407. Senior Seminar (1)
 FST 421. *Food Law (3)
 FST 422. Food Chemistry Fundamentals (4)
 FST 425. *Food Systems Chemistry (4)
 FST 466. Wine Production Principles (3)
 FST 467. Wine Production, Analysis and Sensory Evaluation (5)
 FST 479. Fermentation Microbiology (3)
 HORT 453. Grapevine Growth and Physiology (3)
 HORT 454. Principles and Practices of Vineyard Production (3)
 MB 302. General Microbiology (3)
 MB 303. General Microbiology Laboratory (2)

Plus any of the following utilized in fulfillment of option requirements:
 AG 407. Seminar: Leadership Academy (up to 3 credits)
 BOT 350. Introductory Plant Pathology (4)
 ENT 311. Introduction to Insect Pest Management (4)
 FST 101. Food Science Orientation (1)
 FST 251. Introduction to Wines, Beers and Spirits (3)
 FST 260. Food Science and Technology in Western Culture (3)
 FST 273. Wine in the Western World (3)
 FST 401. Research (up to 3 credits)
 FST 410. Internship (up to 3 credits)
 FST 420. Sensory Evaluation of Food (4)
 FST 430. Innovation and Food Product Development (4)
 FST 480. Topics in Fermentation (up to 2 credits)
 HORT 251. Temperate Tree Fruit, Berries, Grapes and Nuts (2)
 HORT 316. Plant Nutrition (4)
 HORT 452. Berry and Grape Physiology and Culture (4)
 MB 440. Food Microbiology (3)
 MB 441. Food Microbiology Laboratory (2)
 NUTR 216. *Food in Non-Western Culture (3)
 TOX 429. Toxic Substances in Food (3)

FERMENTATION SCIENCE OPTION

The Fermentation Science Option, one of just a handful of such programs in the nation, is a hands-on applied science addressing the biological, chemical and physical processes of fermented foods, including those used in the production of wine and beer, as well as a variety of other fermented foods such as cheese, yogurt, soy sauce, pickles, breads, and fermented vegetables. Graduates enjoy a wide variety of employment opportunities—including some of the nation's largest wineries and breweries, artisan cheese plants, coffee, soy, and pickle companies, among others. Graduates of the Fermentation Science option can readily cross over from the beverage industry to the food industry with good preparedness.

Foundation Science Courses

PH 202. *General Physics (5)
Choose one of NUTR 225 or NUTR 240:
 NUTR 225. General Human Nutrition (3)
 NUTR 240. Human Nutrition (3)

Food Science and Technology Courses

FST 460. Brewing Science (3)
 FST 466. Wine Production Principles (3)
 FST 479. Fermentation Microbiology (3)
 FST 490. Food Processing Calculations (2)
 FST 491. Food Processing Calculations Laboratory (1)
 FST 495. Food Packaging (2)
Complete two courses from among FST 423, FST 461 and FST 467. If all three are selected, credits from one course are applied to the Option Electives requirements below:
 FST 423. Food Analysis (4)
 FST 461. Brewing Analysis (3)
 FST 467. Wine Production, Analysis, and Sensory Evaluation (5)

Fermentation Science Option Electives

Complete 9–11 credits from the list below, to bring the total in the Fermentation Science Option to 40. At least 3 option electives credits must be upper division:

AG 407. Seminar: Leadership Academy (3)¹
 FST 101. Food Science Orientation (1)
 FST 251. Intro to Wines, Beers, and Spirits (3)
 FST 212. Dairy Processing (2)
 FST 213. Dairy Processing Laboratory (1)
 FST 260. *Food Science and Technology in Western Culture (3)
 FST 273. *Wine in the Western World (3)
 FST 401. Research (3)¹
 FST 410. Internship (3)^{1,2}
 FST 420. Sensory Evaluation of Food (4)
 FST 430. Innovation and Food Product Development (4)
 FST 480. Topics in Fermentation (1) (up to 2 credits of FST 480 may be applied)
 MB 440. Food Microbiology (3)
 MB 441. Food Microbiology Laboratory (2)
 NUTR 216. *Food in Non-Western Culture (3)
 TOX 429. Toxic Substances in Food (3)

Total=40

Footnotes:

- ¹ Competitive selection and/or departmental approval required.
- ² Students may not earn internship credit in all states. Consult with internship coordinator for list of eligible states.

Students may complete more than one option. Courses must be selected so that at least 12 credits in each option are counted uniquely toward requirements of that option.

FST Major 2.00 GPA Requirement (Fermentation Science Option)
The following courses are included in calculation of the FST Major GPA for students in the Fermentation Science option:

BB 350. Elementary Biochemistry (4)
 BEE 472. Introduction to Food Engineering Principles (5)

BEE 473. Introduction to Food Engineering Process Design (3)
 CH 324. Quantitative Analysis (4)
 FST 360. Food Safety and Sanitation (3)
 FST 370. Industry Preparation/HACCP (3)
 FST 407. Senior Seminar (1)
 FST 421. *Food Law (3)
 FST 422. Food Chemistry Fundamentals (4)
 FST 425. *Food Systems Chemistry (4)
 FST 460. Brewing Science (3)
 FST 466. Wine Production Principles (3)
 FST 479. Fermentation Microbiology (3)
 FST 490. Food Processing Calculations (2)
 FST 491. Food Processing Calculations Laboratory (1)
 FST 495. Food Packaging (2)
 MB 302. General Microbiology (3)
 MB 303. General Microbiology Laboratory (2)

Plus any of the following utilized in fulfillment of option requirements:
 AG 407. Seminar: Leadership Academy (up to 3 credits)
 FST 101. Food Science Orientation (1)
 FST 212. Dairy Processing (2)
 FST 213. Dairy Processing Laboratory (1)
 FST 251. Introduction to Wines, Beers, and Spirits (3)
 FST 260. *Food Science and Technology in Western Culture (3)
 FST 273. *Wine in the Western World (3)
 FST 401. Research (up to 3 credits)
 FST 410. Internship (up to 3 credits)
 FST 420. Sensory Evaluation of Food (4)
 FST 423. Food Analysis (4)
 FST 430. Innovation and Food Product Development (4)
 FST 461. Brewing Analysis (3)
 FST 467. Wine Production Analysis, and Sensory Evaluation (5)
 FST 480. Topics in Fermentation (up to 2 cr)
 MB 440. Food Microbiology (3)
 MB 441. Food Microbiology Laboratory (2)
 NUTR 216. *Food in Non-Western Culture (3)
 TOX 429. Toxic Substances in Food (3)

FOOD SCIENCE OPTION

Food scientists belong to the world's largest industry—the food industry. From the farm gate to the market, food scientists develop foods and beverages in response to society's needs and demands, working to make foods safe, nutritious, convenient, economical, and tasty. Food scientists look for better ways to select, preserve, process, and package food products, including the ingredients that go into them. Society's focus on food has increased as a heightened awareness of diet, health, and biosecurity (or food safety) has increased worldwide.

Graduates of the Food Science option are typically interested in research and development of new products, food safety, sensory and flavor qualities, quality control or quality assurance. Some even work as freelance food technologists.

Physics/Statistics Courses

PH 202. *General Physics (5)
 ST 352. Introduction to Statistical Methods (4)

Nutrition Courses**Choose one of the following:**

- NUTR 225. General Human Nutrition (3)
NUTR 240. Human Nutrition (3)

Food Science and Technology Courses

- FST 420. Sensory Evaluation of Food (4)
FST 423. Food Analysis (4)
FST 490. Food Processing Calculations (2)
FST 491. Food Processing Calculations Laboratory (1)
FST 495. Food Packaging (2)
MB 440. Food Microbiology (3)

Complete 3 credits from the 200-level processing courses below (an additional 3 credits from this group may be applied to the option electives):

- ANS 251. Principles of Animal Foods Technology (3)
FST 210. Fruit and Vegetable Processing (3)
FST 212. Dairy Processing (2)
FST 213. Dairy Processing Laboratory (1)

Food Science Option Electives

Complete 10 credits, 3 of which must be upper division, from the list below:

- AG 407. Seminar: *Leadership Academy* (3)¹
FST 101. Food Science Orientation (1)
FST 260. *Food Science and Technology in Western Culture (3)
FST 273. *Wine in the Western World (3)
FST 401. Research (3)¹
FST 410. Internship (3)^{1,2}
FST 430. Innovation and Food Product Development (4)
FST 460. Brewing Science (3)
FST 466. Wine Production Principles (3)
FST 479. Fermentation Microbiology (3)
FST 480. Topics in Fermentation (1)
MB 441. Food Microbiology Laboratory (2)
NUTR 216. *Food in Non-Western Culture (3)
TOX 429. Toxic Substances in Food (3)

Total=41**Footnotes:**

* Baccalaureate Core Course

¹ Competitive selection and/or departmental approval required.² Students may not earn internship credit in all states. Consult with internship coordinator for list of eligible states.

Students may complete more than one option. Courses must be selected so that at least 12 credits in each option are counted uniquely toward requirements of that option.

FST Major 2.00 GPA Requirement (Food Science Option)

The following courses are included in calculation of the FST Major GPA for students in the Food Science option:

- BB 350. Elementary Biochemistry (4)
BEE 472. Introduction to Food Engineering Principles (5)
BEE 473. Introduction to Food Engineering Process Design (3)

UNDERGRADUATE MINORS**FERMENTATION SCIENCE MINOR****Required Courses (12)**

- FST 251. Introduction to Wines, Beers and Spirits (3)
MB 302. General Microbiology (3)
MB 303. General Microbiology Lab (2)

Select one of the following two:

- BB 350. Elementary Biochemistry (4)
BI 314. Cell and Molecular Biology (4)

Elective Courses (15)

Select 15 credits from the following:

- BIOE 457. Bioreactors I (3)
FST 360. Food Safety and Sanitation (3)
FST 460. Brewing Science (3)
FST 466. Wine Production Principles (3)
FST 467. Wine Production, Analysis, and Sensory Evaluation (5)
FST 479. Fermentation Microbiology (3)
FST 480. Topics in Fermentation (1–2 credits per class)**
MB 440. Food Microbiology (3)
MB 441. Food Microbiology Lab (2)
**May take up to 4 credits.

Total=27**FOOD SCIENCE MINOR****Required Courses (7 credits)**

- FST 360. Food Safety and Sanitation (3)
FST 422. Food Chemistry Fundamentals (4)

Elective Courses

Select 20 credits from the following (at least 5 credits must be upper division):

- ANS 251. Principles of Animal Foods Technology (3)
BEE 472. Introduction to Food Engineering Principles (5)
BEE 473. Introduction to Food Engineering Process Design (3)
FST 210. Fruit and Vegetable Processing (3)
FST 212. Dairy Processing (2)
FST 213. Dairy Processing Laboratory (1)
FST 251. Introduction to Wines, Beers, and Spirits (3)
FST 260. *Food Science and Technology in Western Culture (3)

FOOD SCIENCE AND TECHNOLOGY (MAG, MS, PhD)

Graduate Areas of Concentration
Brewing, enology, flavor chemistry, food chemistry/biochemistry, food engineering, food microbiology/biotechnology, food and seafood processing, sensory evaluation

The Department of Food Science and Technology offers graduate programs leading toward the Master of Agriculture, Master of Science, and Doctor of Philosophy degrees. A variety of research specializations are available covering the chemical, physical, microbiological, and sensory properties of foods.

Food processing and engineering research deals with basic and applied aspects of contemporary food technologies. Areas of emphasis include the measurement and modeling of thermo-physical properties of foods and the modeling of heat and mass transfer phenomena. Other studies deal with the use of high pressure as a means of food preservation and the use of edible food coatings to enhance the nutritional quality of fresh fruits and vegetables. Wine-related studies emphasize the effects of processing and vineyard practices on quality. Research in brewing focuses on the effects of processing on beer quality and stability. Dairy processing research concerns milk quality, cheese technology and cheese economics. Investigations on seafood processing and by-product utilization are being conducted on campus, and at the Coastal Oregon Marine Experiment Station Seafood Laboratory in Astoria, Oregon. Packaging and sensory evaluation of value-added food products occurs at the Food Innovation Center in Portland, Oregon.

Studies in food microbiology focus on food safety and the application of beneficial microorganisms in food production. Included in this topic area are studies dealing with the effect of processing conditions on microbial viability and the characterization of yeast strains involved in fermented products.

Sensory science projects focus on an understanding of the fundamental nature of sensory phenomena and characterization of the sensory attributes of selected products.

Food chemistry research concerns the occurrence, role, formation, stability and analysis of various food constituents. Studies involving flavor chemistry and sensory evaluation aim to identify the flavor-active compounds of a wide variety of foods and beverages. Other studies focus on understanding the functional properties of cereal grains and development of environmentally-sustainable chemical and biological processes for converting food wastes and related renewable waste streams into useful byproducts.

Students desiring to pursue graduate study must have a BS degree or equivalent. Students from related fields of study (chemistry, microbiology, biology, etc.) should have a strong background in the basic sciences and must have earned at least a B (GPA 3.0) average during their last two years of undergraduate study.

FOOD SCIENCE AND TECHNOLOGY GRADUATE MINOR

For more details, see the departmental advisor.

COURSES**FST 101. FOOD SCIENCE ORIENTATION (1).**

For food science majors. Orientation and academic guidance toward career planning in food science and technology.

FST 199. SPECIAL STUDIES (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

FST 210. FRUIT AND VEGETABLE PROCESSING (3).

Lectures, lab activities and plant tours to help majors and non-majors understand traditional and modern fruit and vegetable processing technologies. **PREREQS:** CH 123 or CH 223 or ((CH 233 or CH 233H) and (CH 263 or CH 263H))

FST 212. DAIRY PROCESSING (2). Methods of processing and preserving milk and milk products and related unit operations. **PREREQS:** CH 123 or CH 223 or CH 233 or CH 233H

FST 213. DAIRY PROCESSING LABORATORY (1). Laboratory and field work to accompany FST 212. Field trip required. **PREREQS:** Concurrent enrollment in FST 212

FST 251. INTRODUCTION TO WINES, BEERS, AND SPIRITS (3). A descriptive introduction to the history, science, sensory, economics, and societal aspects of alcoholic beverages. **PREREQS:** High school biology and chemistry. Open to any major.

FST 260. *FOOD SCIENCE AND TECHNOLOGY IN WESTERN CULTURE (3). Exploring the sciences and technologies of food processing and preservation within the context of their historical, current, and possible future influences on what we eat, the structure of our society, and our day-to-day lives. (Bacc Core Course)

FST 273. *WINE IN THE WESTERN WORLD (3). A study of wine throughout history, from its accidental discovery and refinement through today, with a focus on the profound role wine plays in agriculture, social rituals, human health, economics, and the ambivalent pursuit of pleasure. (Baccalaureate Core Course)

FST 360. FOOD SAFETY AND SANITATION (3). Principles, practices, and regulations governing and ensuring the microbiological safety of our food supply through risk assessment, surveillance, and intervention. **PREREQS:** ((BI 211 or BI 211H or BI 212 or BI 212H or BI 213 or BI 213H) and (CH 121 or CH 221 or CH 221H or CH 231 or CH 231H))

FST 370. INDUSTRY PREPARATION/HACCP (3). Assists students in preparation for internships and employment in the food industry by introducing compliance with food safety regulations, HACCP, and audits. **PREREQS:** One year of chemistry and one year of biology.

FST 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

FST 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

FST 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FST 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FST 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FST 407. SENIOR SEMINAR (1).

FST 410. INTERNSHIP (1-16). A work internship to give students practical on-the-job training in the food processing or related industries. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing. Departmental approval, submission of employer and employee evaluation forms, and written reports.

FST 420. SENSORY EVALUATION OF FOOD (4).

Sensory test methods used in the evaluation of the taste, smell, texture, and color of foods as well as the evaluation of consumer acceptance of foods. This includes methods for measuring sensory qualities, underlying psychological principles, statistical methods for analyzing data, and proper interpretation of these results. Lec/lab. **PREREQS:** ((ST 351 or ST 411) and (ST 352* or ST 412*))

FST 421. *FOOD LAW (3). Concepts, statutes, regulations, and agencies controlling the production, processing, and distribution and promotion of food. (Bacc Core Course)

FST 422. FOOD CHEMISTRY FUNDAMENTALS (4).

An integrated lecture/lab/recitation course applying theories of molecular reactivity to model food systems. Lectures focus on the molecular bases of chemical phenomena that dictate the behavior of foods. Laboratories and recitations provide opportunities for students to observe, manipulate, and explore model food systems. Emphasis on major food components (water, lipids, proteins, and carbohydrates) and their behavior under conditions of particular relevance to food processing. Lec/lab/rec. **PREREQS:** ((CH 332 or CH 336) and BB 350 and (MTH 241 or MTH 252 or MTH 252H))

FST 423. FOOD ANALYSIS (4). An integrated laboratory/lecture course covering methods used for the quantitative analysis of the chemical composition of foods and agricultural products. **PREREQS:** CH 324 and CH 337 and BB 350

FST 425. ^FOOD SYSTEMS CHEMISTRY (4).

The chemistry of food components in real-world food systems. Focused on water, proteins, carbohydrates, lipids, and food polymers, their interactions, and the effects of food processing and storage. Integrates writing as a learning tool and means of professional communication. Lec/lab/rec. (Writing Intensive Course) **PREREQS:** FST 422 and /or equivalent.

FST 430. INNOVATION AND FOOD PRODUCT DEVELOPMENT (4).

Provides technical background and hand-on laboratory experience in food product development and food innovation. Lec/lab. **PREREQS:** CH 331 and CH 332 and FST 360 and FST 421 and FST 422

FST 460. BREWING SCIENCE (3). Chemistry, microbiology and engineering of malting and brewing operations for the production of beer, including the compositional analysis of barley, malt, hops, water, and beer and their effects on beer quality. **PREREQS:** MB 302 and BEE 472

FST 461. BREWING ANALYSIS (3).

Compositional analysis, laboratory techniques and sensory evaluation of barley, malt, hops, water, yeast and beer. Lec/lab. **PREREQS:** (FST 460 and (MB 303 or MB 303H))

FST 466. WINE PRODUCTION PRINCIPLES (3).

Principles of wine production technology from grape berry development through bottling, covering the microbiology and chemistry of fermentation, aging and production practices of red and white table wines, as well as sparkling and dessert wines. **PREREQS:** BB 350 and MB 302

FST 467. WINE PRODUCTION, ANALYSIS, AND SENSORY EVALUATION (5). An integrated lecture/lab course that focuses on the practical fundamentals of red and white wine production. Students will make wine and monitor its progression from the grape to the bottle using standard chemical, microbial, and sensorial techniques. **PREREQS:** (FST 466 and FST 479*)

FST 479. FERMENTATION MICROBIOLOGY (3). An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors. **CROSSLISTED** as MB 479/MB 579. **PREREQS:** ((BB 350 or BB 450) and MB 302)

FST 480. TOPICS IN FERMENTATION (1-2). Selected topics in fermentation science will be presented by department faculty and invited outside experts. Topics and format will change each quarter. Students may take the course for 1 or 2 credits as the topics change. Lec/lab. This course is repeatable for a maximum of 8 credits.

FST 490. FOOD PROCESSING CALCULATIONS (2). Application of engineering principles to produce safe processed foods meeting consumer expectations for safety and quality. Validate process engineering models by comparing predicted values with new experimental data. **PREREQS:** (BEE 472 and FST 360) **COREQS:** FST 491

FST 491. FOOD PROCESSING CALCULATIONS LABORATORY (1). Experiments in a pilot plant supported by a computer laboratory. Prepare samples of novel process technology products. **PREREQS:** Microsoft Excel skills. **COREQS:** FST 490

FST 495. FOOD PACKAGING (2). Fundamentals of food packaging covering the major packaging solutions with a focus on plastic, paper, and paperboard. **PREREQS:** Junior standing in a physical or biological science-based major.

FST 499. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

FST 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FST 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

FST 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FST 507. SEMINAR (1). This course is repeatable for a maximum of 2 credits.

FST 509. PRACTICUM IN TEACHING (1-16). This course is repeatable for a maximum of 16 credits.

FST 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

FST 514. HEALTH BENEFITS OF FUNCT FOODS, NUTRACEUT, DIETARY SUPPLEMEN (3). Functional foods, nutraceuticals and dietary supplements represent a rapidly expanding segment of domestic and international markets. This course will overview the principles and procedures necessary to evaluate and market these products. The chemistry and mechanisms of major nutraceutical ingredient categories and current scientific information supporting their biochemical and physiological efficacy will be addressed. Special dietary products, such as medical, weight control, sport, and herbal supplements, will be addressed. Regulatory aspects of labeling and structure-function claims will be covered. **CROSSLISTED** as NUTR 514. **PREREQS:** BB 350 and CH 332

FST 520. SENSORY EVALUATION OF FOOD (4). Sensory test methods used in the evaluation of the taste, smell, texture, and color of foods as

well as the evaluation of consumer acceptance of foods. This includes methods for measuring sensory qualities, underlying psychological principles, statistical methods for analyzing data, and proper interpretation of these results. Lec/lab. **PREREQS:** ST 511* and/or (ST 351* or ST 411*) **COREQS:** ST 512

FST 521. FOOD LAW (3). Concepts, statutes, regulations, and agencies controlling the production, processing, and distribution and promotion of food.

FST 522. FOOD CHEMISTRY FUNDAMENTALS (4). An integrated lecture/lab/recitation course applying theories of molecular reactivity to model food systems. Lectures focus on the molecular bases of chemical phenomena that dictate the behavior of foods. Laboratories and recitations provide opportunities for students to observe, manipulate, and explore model food systems. Emphasis on major food components (water, lipids, proteins, and carbohydrates) and their behavior under conditions of particular relevance to food processing. Lec/lab/rec. **PREREQS:** (CH 332 or CH 336) and BB 350 and (MTH 241 or MTH 252 or MTH 252H)

FST 523. FOOD ANALYSIS (4). An integrated laboratory/lecture course covering methods used for the quantitative analysis of the chemical composition of foods and agricultural products. **PREREQS:** CH 324 and CH 337 and BB 350

FST 525. FOOD SYSTEMS CHEMISTRY (4). Views molecular reactivities and physical chemistry of food components in real-world food systems. The focus is on macro-components (water, proteins, carbohydrates, lipids, and food polymers in general), foods as multi-component systems, and on the effects of thermal processing and storage on processing, texture, color, and consumption of foods. Lec/lab/rec. **PREREQS:** FST 522 and/or equivalent.

FST 560. BREWING SCIENCE (3). Chemistry, microbiology and engineering of malting and brewing operations for the production of beer, including the compositional analysis of barley, malt, hops, water, and beer and their effects on beer quality. **PREREQS:** MB 302 and BEE 472

FST 561. BREWING ANALYSIS (3). Compositional analysis, laboratory techniques and sensory evaluation of barley, malt, hops, water, yeast and beer. Lec/lab. **PREREQS:** FST 460 and (MB 303 or MB 303H)

FST 566. WINE PRODUCTION PRINCIPLES (3). Principles of wine production technology from grape berry development through bottling, covering the microbiology and chemistry of fermentation, aging and production practices of red and white table wines, as well as sparkling and dessert wines. **PREREQS:** BB 350 and MB 302

FST 567. WINE PRODUCTION, ANALYSIS, AND SENSORY EVALUATION (5). An integrated lecture/lab course that focuses on the practical fundamentals of red and white wine production. Students will make wine and monitor its progression from the grape to the bottle using standard chemical, microbial, and sensorial techniques. **PREREQS:** FST 566 **COREQS:** FST 579

FST 579. FERMENTATION MICROBIOLOGY (3). An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors. **CROSSLISTED** as MB 479/MB 579. **PREREQS:** (BB 350 or BB 450) and MB 302

FST 590. FOOD PROCESSING CALCULATIONS (2). Application of engineering principles to produce safe processed foods meeting consumer expectations for safety and quality. Validate process engineering models by comparing predicted values with new experimental data.

PREREQS: (BEE 572 and MB 540) and Microsoft Excel skills. **COREQS:** FST 591

FST 591. FOOD PROCESSING CALCULATIONS LABORATORY (1). Experiments in a pilot plant supported by a computer laboratory. Prepare samples of novel process technology products. **PREREQS:** Microsoft Excel skills. **COREQS:** FST 590

FST 595. FOOD PACKAGING (2). Fundamentals of food packaging covering the major packaging solutions with a focus on plastic, paper, and paperboard. **PREREQS:** Junior standing in a physical or biological science-based major.

FST 599. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

FST 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FST 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

FST 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FST 607. SEMINAR (1). This course is repeatable for a maximum of 2 credits.

FST 620. ADVANCED TOPICS IN SENSORY SCIENCE (2). Current and/or advanced subjects in human sensory science. Includes 1) topics in human flavor perception that covers human psychophysics, neuroscience, and related fields, and 2) sensory evaluation techniques and data handling methods that are advanced in nature. Different points of view regarding above topics will be discussed. This course is repeatable for a maximum of 4 credits. **PREREQS:** FST 520

FST 628. FLAVOR CHEMISTRY (3). The definition of flavor, analytical methods in flavor chemistry, and mechanisms of odor interaction in food system will be discussed. In addition, an integrated approach will be used to study the flavor chemistry of economically-important agricultural products in the Pacific Northwest such as dairy products, fruits, and alcoholic beverages. **PREREQS:** FST 522 and FST 523

FST 639. FOOD POLYMER SCIENCE (3). Investigates the theoretical principles and structure-function relationships of food macromolecules. The theoretical principles are related, where possible, to observable phenomena during thermal processing and storage of foods. **PREREQS:** (FST 422 or FST 522) and (FST 425 or FST 525) or equivalent

FST 641. PROCESSING WHEAT AND OTHER SMALL GRAINS: A MOLECULAR VIEW (3). Provides a fundamental overview of wheat and other cereals from the perspective of the molecular level events that are important in milling, baking, and other processes. Uses cereal processing (focused primarily on bread-making) as the vehicle for placing elements of food chemistry, food polymer science, physical chemistry, and rheology into the cohesive framework of a single food category. Students will experience how the sciences of chemistry, physics, engineering, microbiology, biochemistry, nutrition, etc. amalgamate in the production of the selected cereal products. Lec/lab.

FST 666. ADVANCED TOPICS IN ENOLOGY (3). An in-depth investigation of advanced wine processing techniques and wine research, focusing on their impact on production and wine quality. **PREREQS:** FST 566 and FST 567* and it is recommended that the student have taken a viticulture course (HORT 454) and have a good understanding of how vineyard practices influence grape quality.

HORTICULTURE

FACULTY

Professors Azarenko, Chen, Long, McGrath, Mehlenbacher, J. Miller, Myers, Olsen, Shearer, Strik, Sugar, VanBuskirk
Associate Professors Braunworth, Bubl, Castagnoli, Detweiler, Kaiser, Lambrinos, Langellotto, McMahan, Nonogaki, Peachey, Regan, Renquist, Rosetta, Skinkis, Stone, Walton, Yang
Assistant Professors Albert, Contreras, DeFrancesco, Deluc, Einhorn, Hooven, Kowalewski, W. Miller, Pagay, Sagili, Wang
Instructors Andrews, Bell, Fick, Finger-McDonald, Garrett, Matthewson, B. Miller, Millison, Powell, Reynolds, Shay, White

COURTESY FACULTY

Abusrewil, Giuma Shebani; Bassil, Nahla Victor; Bruck, Denny Joseph; Bryla, David Roman; Cristofori, Valerio; Dass, Meera Chettri; Finn, Chad E.; Golembiewski, Robert; Griesbach, John; Hummer, Kim Ethel; Lee, Jana; Lee, Jung-Min; Martin, Ruth C.; Owen Jr., James S.; Reed, Barbara Mary; Rivero, Maria Victoria; Scagel, Carolyn Francis; Schreiner, R. Paul; Seiter, Stefan; Tarara, Julie M.

ADJUNCT FACULTY

Bondi, Hays, Kennedy, Stephenson

Undergraduate Major

Horticulture (BS, CRED, HBS)

Options

Ecological and Sustainable Horticultural Production
Ecological Landscape and Urban Forestry
General Horticulture (Online)
Horticultural Research
Plant Breeding and Genetics
Therapeutic Horticulture
Turf Management
Viticulture and Enology

Minors

Entomology

(Administered by the Department of Horticulture in the College of Agricultural Sciences.)

Horticulture

Turf and Landscape Management

Graduate Major

Horticulture (MAg, MAIS, MS, PhD)

Graduate Areas of Concentration

Breeding, Genetics and Biotechnology
Community and Landscape Horticultural Systems
Sustainable Crop Production

Graduate Options

Entomology
Plant Breeding and Genetics

Graduate Minor Horticulture

Horticulture involves the production, genetic improvement, storage, and marketing of fruits, nuts, vegetables, flowers, and vegetable crops; and the design, construction, and management of landscape plantings such as parks, gardens, golf courses, restoration projects, and sports fields. It is a science, an art, an avocation, and a business.

Horticultural and other high value specialty crops are the largest component of Oregon's agricultural industry. Landscape horticulture is a rapidly expanding service industry in the urban areas of the Pacific Northwest and throughout the nation. Excellent and varied career opportunities exist for college graduates in both crop and landscape horticulture.

The undergraduate program provides students with a solid background in the fundamental life and physical sciences, as well as an understanding of the technologies and management systems used in the horticultural industry. Problem-solving and decision-making skills are stressed, as is student involvement. Field trips are an important component of many of the courses.

The program has eight options:

1. Ecological and Sustainable Horticultural Production
2. Ecological Landscape and Urban Forestry
3. General Horticulture (Online)
4. Horticultural Research
5. Plant Breeding and Genetics
6. Therapeutic Horticulture
7. Turf Management
8. Viticulture and Enology

The **Ecological and Sustainable Horticultural Production** option prepares students for careers dealing directly or indirectly with the production, breeding, post-harvest handling, marketing, and scientific study of horticultural crops.

The **Ecological Landscape and Urban Forestry** option prepares students to be practitioners and leaders in the design, construction, and installation of our green spaces.

The **General Horticulture** is an online option and is especially recommended for students already working in the horticultural industry, whose careers will benefit from post-secondary education in the horticultural sciences.

The **Horticultural Research** option prepares students to assist in research or pursue graduate studies.

The **Plant Breeding and Genetics** option provides an interdisciplinary approach to applied plant breeding and practical experience in breeding and genetic analysis working in the greenhouse, field, and laboratory.

The **Therapeutic Horticulture** option prepares students to design healing and adapted gardens and to provide therapy programs used to improve the quality of people's lives.

The **Turf Management** option prepares students for careers in golf course maintenance and park and athletic field maintenance.

The **Viticulture and Enology** option prepares students for careers in Oregon's growing vineyard and winery industry.

All options allow the student considerable flexibility to pursue a minor or to tailor course work to meet individual goals. Qualified students interested in the business aspects of horticulture are encouraged to pursue a minor in business. All undergraduates are required to complete either an approved internship or an undergraduate research project.

A high school student preparing for the program should follow a well-balanced college preparatory curriculum. Course work in biology, chemistry, and mathematics is strongly recommended. Course work in the social sciences, humanities, arts, and foreign languages is also encouraged, and the student should develop public speaking and writing abilities.

The program was designed to facilitate timely completion of degree requirements by transfer and postbaccalaureate students. Students intending to transfer into the program from a two- or four-year institution should complete as many of the lower-division requirements as possible. Some professional-technical courses from community colleges may be equivalent to lower-division horticulture courses. Equivalent credit can be given for such courses. Contact a departmental advisor for further information.

For additional information about the program, contact one of the undergraduate advisors: Kelly Donegan (head advisor, all options), and Autumn Granger (advisor for the General Horticulture option).

GRADE REQUIREMENTS

Students pursuing a major or minor in horticulture are required to receive a grade of C- or better in all horticulture courses that are required for completion of their major and option, or minor. If a grade below C- is received in a horticulture course required for their major and option, or minor, a student will need to

re-take the course and receive a grade of C- or better. If the grade below a C- was received for a course that is part of a group of courses where the student can select which courses to take (i.e., they do not need to take all of the courses, just a specified number of courses or credits) then it would be acceptable for the student to substitute a course for the one that they had received a grade below a C-. For example, in most of our options, a student needs to complete three of four plant identification courses. If a student received a grade lower than a C- in one of the classes, they could either re-take the same course or complete the other three courses with a grade of C- or better.

HORTICULTURE (BS, CRED, HBS)

Also offered via *Ecampus*.

BS Degree Baccalaureate Core Requirements (33)

All students must complete an option and its corresponding core to complete the major, which requires a minimum of 180 credits.

ECOLOGICAL AND SUSTAINABLE HORTICULTURAL PRODUCTION OPTION

Students in the Ecological and Sustainable Horticultural Production option gain the knowledge and skills necessary to plan and manage horticultural production systems for fruit, vegetable, nursery, and greenhouse crops using environmentally sustainable practices. They come to see horticulture as a way to create and maintain vital and productive agro-ecosystems and understand the role of horticulture within a larger societal context which includes issues of ecology, economics, and politics.

The Ecological and Sustainable Horticultural Production option stresses active learning, case studies about real-world situations, and integrating ideas and facts from many different subjects. Ecological and Sustainable Horticultural Production graduates will be active learners, and possess skills prized by employers and useful for establishing their own enterprises. They will have a broad and thorough knowledge of horticulture and the skills and knowledge needed to identify, develop, and practice ecological and sustainable methods. They will be able to think critically. They will be skilled in finding and using information, as well as synthesizing information from many sources to analyze novel situations and solve problems in the field.

ECOLOGICAL LANDSCAPE AND URBAN FORESTRY OPTION

The landscape industry and urban forestry sector are large and diverse, offering careers in landscape design, construction, management, and restoration; conservation; park, botanical and public garden management; urban forestry policy and management; research; consulting; and interior-scaping. Landscape professionals design, build, and manage aesthetically pleasing, functional, and environmentally responsible natural spaces where we all live, work, and play. In recent years, the industry has expanded and rapidly become more sophisticated to meet the challenges of today's urban environment. Consequently, there is great demand for creative, motivated individuals who love the outdoors and enjoy working with plants, soil, water, nature, and people.

In the Ecological Landscape and Urban Forestry option, students will learn about sustainable landscape management, urban forestry, and about the ecosystem services provided by the built environment, such as carbon sequestration and climate regulation, temperature modulation, waste decomposition and detoxification, purification of water and air, storm and rain water management, crop pollination, pest and disease control, nutrient dispersal and cycling, seed dispersal, and intellectual and spiritual inspiration, recreational experiences and scientific discovery.

GENERAL HORTICULTURE OPTION

The General Horticulture option is available on the Corvallis campus and via Ecampus.

The online General Horticulture option curriculum is built on a strong foundation in horticultural science. This option is especially recommended for students already working in the horticultural industry, whose careers will benefit from post-secondary education in the horticultural sciences. Students learn horticultural principles and practices associated with horticultural produc-

tion within the context of plant biology, pest management, soils, ecology, and economics with applications in plant nutrition, pest management, business, and marketing. In addition, students are well-informed about the latest technology and trends in the field. The option provides sufficiently broad electives for the student to build his or her curriculum to meet specific goals.

Our graduates are skilled in finding and using information, as well as synthesizing information from many sources to solve problems. On-campus students benefit from field and lab experiences, and internships. Ecampus students will benefit from these same hands-on opportunities. With departmental support, the online student will identify opportunities for field and internship experiences, which will be vetted by the department. Some lab experiences will be in the form of kits that the student will purchase and receive by mail; others will be virtual lab experiences created collaboratively between Horticulture Department faculty and the curriculum design team in Ecampus.

The internship provides professional-level interaction with growers, managers, field reps, and consultants, and provides hands-on experience. Mentoring and advising will assist online students in taking advantage of departmental strengths. We anticipate that many online students will already be employed in one of the horticultural industries.

 CH 332. Organic Chemistry (4)
 MB 230. Introductory Microbiology (4)

Grade Requirements

Students pursuing a major or minor in horticulture are required to receive a grade of C– or better in all HORT (horticulture) and PBG (plant breeding and genetics) courses that are required for completion of their major and option, or minor. If a grade below C– is received in a HORT or PBG course required for their major and option, or minor, a student will need to re-take the course and receive a grade of C– or better. If the grade below a C– was received for a course that is part of a group of courses where the student can select which courses to take (i.e., they do not need to take all of the courses, just a specified number of courses or credits) then it would be acceptable for the student to substitute a course for the one that they had received a grade below a C–. For example, in most of our options, a student needs to complete three of four plant identification courses. If a student received a grade lower than a C– in one of the classes, they could either re-take the same course or complete the other three courses with a grade of C– or better.

Footnotes:

¹ A full-year biology sequence for science majors must be taken in a classroom setting and must include labs.

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

HORTICULTURAL RESEARCH OPTION

The Horticultural Research option is designed for students interested in graduate school and a career in academic or industrial research. It provides an excellent foundation in the natural sciences and horticulture, and accommodates the specific interests of each student. Graduates of this program will be critical thinkers, and experienced technical communicators. They will be skilled in finding and using information, as well as synthesizing information from many sources to analyze novel situations and solve problems.

The relationship between the student and the research mentor is a key feature of this program. The mentor will assist the student in choosing upper-division

classes that match the student's interests. Each student also completes a research project under the guidance of his or her mentor, and writes an undergraduate thesis. Students can work with horticulture researchers on the OSU campus or at research institutions of their choosing. Our undergraduates have been welcomed at local research institutions including the United States Department of Agriculture-Agricultural Research Service laboratories, the National Clonal Germplasm Repository in Corvallis, the Corvallis Plant Materials Center of the National Resources Conservation Service, and the North Willamette Research and Extension Center.

Grade Requirements

Students pursuing a major or minor in horticulture are required to receive a grade of C- or better in all HORT (horticulture) and PBG (plant breeding and genetics) courses that are required for completion of their major and option, or minor. If a grade below C- is received in a HORT or PBG course required for their major and option, or minor, a student will need to re-take the course and receive a grade of C- or better. If the grade below a C- was received for a course that is part of a group of courses where the student can select which courses to take (i.e., they do not need to take all of the courses, just a specified number of courses or credits) then it would be acceptable for the student to substitute a course for the one that they had received a grade below a C-. For example, in most of our options, a student needs to complete three of four plant identification courses. If a student received a grade lower than a C- in one of the classes, they could either re-take the same course or complete the other three courses with a grade of C- or better.

PLANT BREEDING AND GENETICS OPTION

The Plant Breeding and Genetics (PB&G) option at Oregon State University embodies the Land Grant mission of integrated research, teaching and extension in the context of cultivar development and fundamental genetics. Plant breed-

ing is a collaborative discipline spanning everything from classical field approaches to gene manipulation at the molecular level. Breeders regularly cooperate with pathologists, entomologists, soil scientists, physiologists, food scientists, genomicists, molecular biologists and experts in other fields.

Students in the Plant Breeding and Genetics option will learn an interdisciplinary approach to applied plant breeding by taking courses across a broad spectrum of disciplines. The option may be tailored to meet students' career goals including graduate school, as well as directly entering public or private sector breeding programs. After completing their degree, students will have gained fundamental knowledge in plant breeding that may be applied in a range of crops including annual and perennial horticultural crops, agronomic food and feed crops, and forestry products.

THERAPEUTIC HORTICULTURE OPTION

Horticultural therapy is a rapidly growing area of horticulture. The therapeutic benefits of garden environments have been understood and applied since ancient times. Horticultural therapy is recognized as a practical and effective treatment with wide-ranging benefits for people in therapeutic, vocational, and wellness programs. It is now taught and practiced throughout the world in a wide diversity of settings and cultures including mental health, physical rehabilitation, vocational services, corrections, long-term care and hospice, special education, and youth and community services. Horticultural therapists design garden spaces that accommodate people with a wide range of abilities and assist people with physical, emotional or mental disabilities in gaining skills, adaptations, and coping methods that enhance their lives.

Students in the Therapeutic Horticulture option graduate with a strong foundation in horticultural science and practices. In addition, they acquire the skills and knowledge needed to design healing and adapted gardens and to provide therapy programs used to improve the quality of people's lives.

Grade Requirements

Students pursuing a major or minor in horticulture are required to receive a grade of C– or better in all HORT (horticulture) and PBG (plant breeding and genetics) courses that are required for completion of their major and option, or minor. If a grade below C– is received in a HORT or PBG course required for their major and option, or minor, a student will need to re-take the course and receive a grade of C– or better. If the grade below a C– was received for a course that is part of a group of courses where the student can select which courses to take (i.e., they do not need to take all of the courses, just a specified number of courses or credits) then it would be acceptable for the student to substitute a course for the one that they had received a grade below a C–. For example, in most of our options, a student needs to complete three of four plant identification courses. If a student received a grade lower than a C– in one of the classes, they could either re-take the same course or complete the other three courses with a grade of C– or better.

TURF MANAGEMENT OPTION

Turf is the central feature of golf courses, sports fields, parks, cemeteries, and landscapes in cities and neighborhoods throughout the United States. More than 200 golf course superintendents in Oregon and 1,500 in Washington, California, and Idaho manage turf as the focal

point of their facilities. Professional lawn care is a thriving industry in Oregon communities that is complemented by a vibrant sports turf and grass seed industry, all of which adds millions of dollars to local economies. This continually growing industry offers more career track jobs than any other area in horticulture.

Students in turf management become golf course superintendents, athletic field and park managers, and lawn care professionals with commensurate responsibilities and salaries. Students in this curriculum must have a passion for the outdoors, for turf maintenance, and for working with other people in a team context. Prior practical work experience and a willingness to work summers and/or extended internships while at OSU is a characteristic shared by our students. The curriculum focuses on science, technology, ‘in-field’ hands-on experience, and decision making in real world settings. Active participation in student clubs, class field labs, and out-of-class internship work experiences is critical to success. Activities stress networking and exposure to multiple work environments to help students integrate quickly into the industry.

Major Core Requirements

General Science

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)

Choose 1 of the following chemistry series:

CH 121. General Chemistry (5) **and**
 CH 122, CH 123. *General Chemistry (5,5)

OR

CH 231, CH 232, CH 233. *General Chemistry (4,4,4)
and CH 261, CH 262, CH 263.
 *Laboratory for Chemistry 231, 232, 233 (1,1,1)

MTH 112. *Elementary Functions (4)
 or MTH 241. *Calculus for Management and Social Science (4)
 or MTH 245. *Calculus for Management, Life, and Social Sciences (4)

Orientation

VITICULTURE AND ENOLOGY OPTION

The Oregon winegrape industry has experienced steady growth since its beginning in 1961. Oregon now ranks third nationally in number of wineries, and fourth in wine production and vineyard acreage. Vineyards and wineries have also become an integral part of the Oregon tourism industry.

The viticulture and enology curriculum addresses the educational needs of students planning to enter the winegrape industry as viticulturists, vineyard managers, consultants and professionals. The curriculum involves active learning, providing case studies about real-world situations, enhancing critical thinking skills through understanding the art and science of vineyard and winery production. Viticulture and enology students will be active learners in a multi-disciplinary major. Upon graduation, they will possess the skills prized by employers as managers with the ability to think critically and troubleshoot in the vineyard and winery. They will have a thorough knowledge of vine physiology, vineyard production, winery production and related topics. They will understand how their actions in the field affect the quality of the finished wine. They will be skilled in finding resources and using information to analyze novel situations and solve problems in the industry.

UNDERGRADUATE MINORS**HORTICULTURE MINOR****Also available via Ecampus.**

The Horticulture minor is an effective way for students, including majors outside the College of Agricultural Sciences, to meet their interests. The goals of students minoring in horticulture may vary widely. With just 5 credits in the minor core, students will be able to tailor their additional horticulture course work to personal goals.

HORT 112. Introduction to Horticultural Systems, Practices and Careers (2)
 HORT 301. The Biology of Horticulture (3)
 Additional HORT credits (22) (*At least 10 must be upper division*)

Course selection must be approved by the departmental academic advisor.

Total=27 credits

Students are required to earn a grade of C– or better in all HORT courses taken to complete the minor.

TURF AND LANDSCAPE MANAGEMENT MINOR

The Turf and Landscape Management minor is an effective way for students, including majors outside the College of Agricultural Sciences, to meet their interests. The two areas of focus, turf or landscape, allow students to tailor their course work to personal goals.

Requirements

CSS/SOIL 205. *Soil Science (4)
 HORT 112. Introduction to Horticultural Systems, Practices and Careers (2)
 HORT 301. The Biology of Horticulture (3)

Plus courses listed under Turf Focus or Landscape Focus**Turf Focus**

HORT 314. Principles of Turfgrass Maintenance (4)
 HORT 315. Sustainable Landscapes: Maintenance, Conservation, Restore (4)
 HORT 360. Landscape Construction: Irrigation and Drainage (4)
 HORT 405. Reading and Conference: "Turf Pest Management" (3)
 HORT 418. Golf Course Maintenance (4)

Total=28**Landscape Focus****Select two courses from the following:**

HORT 226. Landscape Plant Materials I: Deciduous Hardwoods and Conifers (4)
 HORT 228. Landscape Plant Materials II: Spring Flowering Trees and Shrubs (4)
 HORT 255. Herbaceous Ornamental Plant Materials (3)
Ecampus only

Select 10 to 11 credits from the following, to total a minimum of 27 credits:

HORT 285. Permaculture Design and Theory: Certificate Course (4)
 HORT 314. Principles of Turfgrass Maintenance (4)
 HORT 315. Sustainable Landscapes: Maintenance, Conservation, Restore (4)
 HORT 318. ^Applied Ecology of Managed Ecosystems (3)
 HORT 358. Landscape Construction Techniques (4)
 HORT 360. Landscape Construction: Irrigation and Drainage (4)
 HORT 380. Sustainable Landscape Design (3)

Total=27–28**GRADUATE MAJORS****HORTICULTURE (MAG, MS, PhD, MAIS)****Graduate Areas of Concentration**
Breeding, genetics and biotechnology; community and landscape horticultural systems; sustainable crop production

The Department of Horticulture offers graduate work leading to the Master of Agriculture (MAG), Master of Science (MS) and Doctor of Philosophy (PhD) degrees. The MS and PhD degrees culminate in original research reported in a thesis and are often pursued by students interested in research related careers, or who wish direct training in research methods. The MAG degree provides for broad training in several fields of agriculture, and is usually reserved for those not desiring the specialized research training and experience of the MS degree.

The department of Horticulture has strengths and expertise in three broad areas:

Breeding, Genetics, and Biotechnology. Faculty and students explore fundamental questions related to the control and regulation of plant traits using a variety of techniques and tools including molecular biology, genomics and bioinformatics. Faculty and students also apply fundamental knowledge to make genetic improvements to crop plants and to modify plant growth and productivity. Current breeding programs exist in berry, hazelnut and vegetable systems.

Sustainable Crop Production. Faculty and students explore basic and applied questions related to the design and management of sustainable and productive horticultural cropping and farming systems. The program integrates a diverse set of disciplines and tools including basic plant sciences, applied crop management, and field experimentation and analysis. Program areas include viticulture and enology, berries and small fruit, tree fruit and nuts, vegetables, and nursery and greenhouse production.

Community and Landscape Horticultural Systems. Faculty and students explore basic and applied questions related to the design and function of urban and community landscapes including golf courses, sports fields, gardens, parks and open space. Program areas include turf and landscape management, community food systems, pollinator ecology, and sustainable landscapes.

For more information visit our website at <http://hort.oregonstate.edu/>, contact a member of the graduate faculty or contact **John Lambrinos**, *Graduate Coordinator*, Department of Horticulture, Agricultural and Life Sciences 4017, OSU, Corvallis, OR 97331-7304, email: lambrinj@hort.oregonstate.edu.

ENTOMOLOGY GRADUATE OPTION

The Entomology (ENT) option at Oregon State University embodies the Land Grant mission of integrated research, teaching and extension in the context of understanding the basic biology of insects and with this knowledge then working with insects in natural and/or managed environments. Programs range from basic to applied and can include enhancement of environments to increase insect numbers to management of environments to diminish the numbers of insect pests. Entomologists regularly cooperate with plant scientists, physiologists, pathologists, soil scientists, genomicists, molecular biologists and experts in other fields.

Students in the Entomology option will learn an interdisciplinary approach to entomology by taking courses across a broad spectrum of disciplines. The option may be tailored to meet students' career goals including further graduate

education or directly entering public or private sector positions. After completing their degree, students will have gained fundamental knowledge in entomology that may be applied in a range of agricultural, forested, aquatic, or human environments.

Requirements

Select 12 credits from the following:

- ENT 507. Seminar (1-2)
- ENT/HORT 518. Current Topics in Entomology (2-4)
- ENT 520. Insect Ecology (3)
- ENT 542. Principles of Integrated Pest Management: Systems Design (4)
- ENT 599. Special Topics: *Explorations in OSU Entomology* (2-6)
- Z 540. Insect Physiology (3)

PLANT BREEDING AND GENETICS GRADUATE OPTION

The Plant Breeding and Genetics (PB&G) graduate option at Oregon State University embodies the Land Grant mission of integrated research, teaching and extension in the context of cultivar development and fundamental genetics. Plant breeding is a collaborative discipline spanning everything from classical field approaches to gene manipulation at the molecular level. Breeders regularly cooperate with pathologists, entomologists, soil scientists, physiologists, food scientists, genomicists, molecular biologists and experts in other fields.

Students in the Plant Breeding and Genetics graduate option will learn an interdisciplinary approach to applied plant breeding by taking courses across a broad spectrum of disciplines. The option may be tailored to meet students' career goals including further graduate study, as well as direct entry into public or private sector breeding programs. After completing the degree, students will have fundamental knowledge of plant breeding that may be applied to a range of crops including annual and perennial horticultural crops, agronomic food and feed crops, and forestry products.

Additional Requirements

Select 12 credits from the following list:

- BOT/MCB 575. Comparative Genomics (4)
- CROP 590. Experimental Design in Agriculture (4)
- PBG 507. Seminar (1-2)
- PBG/HORT 519. Current Topics in Plant Breeding and Genetics (2)
- PBG/HORT/CSS 530. Plant Genetics (3)
- PBG/HORT/MCB 541. Plant Tissue Culture (4)
- PBG/HORT/CSS 550. Plant Breeding (4)
- PBG/CSS/MCB 620. DNA Fingerprinting (1)
- PBG/CSS/MCB 621. Genetic Mapping (1)
- PBG/CSS/MCB 622. Mapping Quantitative Trait Loci (1)
- PBG 650. Advanced Plant Breeding and Quantitative Genetics (3)

HORTICULTURE GRADUATE MINOR

For more details, see the departmental advisor.

■ CROP SCIENCE COURSES

CROP 101. INTRODUCTION TO HORTICULTURE, CROP, SOIL, AND INSECT SCIENCE (1). Introduces students with interests in horticulture, crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. Open to all students. CROSSLISTED as ENT 101, HORT 101, SOIL 101.

CROP 199. SPECIAL STUDIES: ISSUES IN SUSTAINABLE AGRICULTURE (1-16). Invited speakers present seminars on specific aspects of agriculture relating to sustainability. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 16 credits.

CROP 199H. SPECIAL STUDIES: ISSUES IN SUSTAINABLE AGRICULTURE (1-16). Invited speakers present seminars on specific aspects of agriculture relating to sustainability. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

CROP 200. CROP ECOLOGY AND MORPHOLOGY (3). An introduction to the concepts and principles of crop ecology and morphology and a foundation for other crop science courses. Examines the dynamics and function of crop communities, and the biotic and environmental interactions that influence productivity. Fundamentals of the developmental morphology of crop seeds, seedlings, and plants. Morphological features of seeds and plants in relation to the identification of crop families and species of economic importance.

CROP 300. CROP PRODUCTION IN PACIFIC NORTHWEST AGROECOSYSTEMS (4). Relation of crop production to human culture and the natural environment. Origins of agriculture and the processes of agricultural change, and productivity and sustainability of specific crop production systems in the Pacific Northwest. History, geography, resource requirements, and key challenges faced are presented. Fundamental crop production practices in relation to productivity and sustainability. Lec/lab/rec. CROSSLISTED as HORT 300 and CSS 300. **PREREQS:** One year of general biology or equivalent.

CROP 310. FORAGE PRODUCTION (4). Importance of, and current production practices for, forage crops. Lec/lab. **PREREQS:** (CSS 300 or CROP 300 or HORT 300) and (CSS 305 or CSS 205 or SOIL 205) or equivalent

CROP 319. PRINCIPLES OF FIELD CROP PRODUCTION (3). Provides students with an understanding of the basic principles of field crop production--tillage, soil testing, fertilization, variety selection, planting, and in-season crop management. Management practices for wheat, corn and soybean as «model» crops will be discussed to assist students in preparing for a career in agriculture or the agricultural sciences. Offered odd years. **PREREQS:** CROP 300 or equivalent and SOIL 205

CROP 325. ^AG AND ENVIRONMENTAL PREDICAMENTS: A CASE STUDY APPROACH (3). Evaluation of controversial agricultural and environmental problems. Production of clear oral and written documents describing and analyzing problems and specific courses of action utilizing team-building skills. (Writing Intensive Course) CROSSLISTED as SOIL 325. **PREREQS:** (CSS 305 or CSS 205 or SOIL 205)

CROP 330. *WORLD FOOD CROPS (3). Origin, production, utilization, and improvement

of the world's major food crops. The role of crop production in global economic and social development; food security and worldwide nutritional requirements. (Bacc Core Course) **PREREQS:** CSS 200 or CROP 200 recommended.

CROP 340. *PENS AND PLOWS: WRITINGS OF WORKING THE LAND (3). A survey of literature from ancient Greece to the twentieth century focusing on the significance of agricultural life and/or the natural world. Students read and discuss writings considered critical in the development of Western culture and receive input on the literary significance and the accuracy of agriculture presented within the readings. (Bacc Core Course) Taught via Ecampus only.

CROP 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CROP 403. THESIS (1-16). Independent, original study and preparation of a senior thesis. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior standing.

CROP 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CROP 405H. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

CROP 407. SEMINAR (1). Senior seminar intended to instruct students on proper techniques for presentation of scientific material. Each student is expected to prepare and present a scientific seminar and to submit written documentation supporting that seminar.

CROP 410. INTERNSHIP (1-6). Professional work experience previously approved and supervised by the department, written report required. This course is repeatable for a maximum of 12 credits. **PREREQS:** Junior standing.

CROP 418. TOXIC PLANTS IN PNW PASTURES (1). Identifying and understanding ecology and biology of harmful weeds and poisonous plants found in Pacific Northwest pastures and rangelands and determining best management and control options. Taught via Ecampus only. **PREREQS:** College-level plant biology and/or taxonomy courses.

CROP 420. SEED SCIENCE AND TECHNOLOGY (3). Seed formation and factors affecting their development and maturation. Seed structure and chemical composition. Physiological and biochemical aspects of seed germination, dormancy, deterioration and storability. The concept of seed quality, its importance in agriculture, its attributes and impact on field performance. Methods of measuring seed quality of conventional and genetically modified seeds. Taught via Ecampus only. **PREREQS:** Biology, plant anatomy and/or physiology courses are recommended.

CROP 433. SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS (4). Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. Offered even years. **CROSSLISTED** as HORT 433/HORT 533. **PREREQS:** (BI 102 or BI 213 or BI 311 or HORT 430 or CSS 430 or PBG 430 or HORT 450 or CSS 450 or PBG 450)

CROP 438. EXPLORING WORLD AGRICULTURE (2). Survey of crop and livestock production in a designated section of the world, including history, culture, and political situation. Course is designed to prepare students for a tour of study area. **CROSSLISTED** as ANS 438, AREC 438, CSS 438, HORT 438. Graded P/N. This course is repeatable for a maximum of 8 credits.

CROP 440. WEED MANAGEMENT (4). Principles of weed control by cultural, biological, and chemical means; weed identification; introduction

to herbicides and factors influencing their use. Lec/lab/rec. **PREREQS:** One year biological science and one course in organic chemistry.

CROP 460. SEED PRODUCTION (3). An introduction to principles and practices of seed-based genetic delivery systems. Fundamentals of seed crop biology, cultivar maintenance and production methods are stressed. Concepts are illustrated using Pacific Northwest seed crops. **PREREQS:** CROP 200 or CSS 200 or equivalent.

CROP 463. SEED BIOLOGY (3). Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years. **CROSSLISTED** as HORT 463/HORT 563. Lec/lab.

CROP 480. CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT (4). Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. **CROSSLISTED** as HORT 480/HORT 580, CSS 480/CSS 580. **PREREQS:** CROP 300 or CSS 300 or HORT 300 and senior standing in agriculture.

CROP 499. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE (1-16). Technical knowledge and skills development courses offered in a wide array of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 16 credits.

CROP 499H. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE (1-16). Technical knowledge and skills development courses offered in a wide array of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

CROP 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CROP 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Masters-level graduate students.

CROP 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CROP 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CROP 507. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 99 credits.

CROP 509. PRACTICUM IN TEACHING (1-3). Developing skills and competence in teaching soil science under staff supervision; organization and presentation of instructional material by assisting in laboratory, recitation, and lectures. This course is repeatable for a maximum of 16 credits.

CROP 520. SEED SCIENCE AND TECHNOLOGY (3). Seed formation and factors affecting their development and maturation. Seed structure and chemical composition. Physiological and biochemical aspects of seed germination, dormancy, deterioration and storability. The concept of seed quality, its importance in agriculture, its attributes and impact on field performance. Methods of measuring seed quality of conventional and genetically modified seeds. Taught via Ecampus only. **PREREQS:** Biology, plant anatomy and/or physiology courses are recommended.

CROP 533. SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS (4). Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh

material is used to illustrate varietal differences and traits of importance. Lec/lab. **CROSSLISTED** as HORT 433/HORT 533. **PREREQS:** BI 102 or BI 213 or BI 311 or HORT 430 or CSS 430 or PBG 430 or HORT 450 or CSS 450 or PBG 450

CROP 540. WEED MANAGEMENT (4). Principles of weed control by cultural, biological, and chemical means; weed identification; introduction to herbicides and factors influencing their use. Lec/lab/rec. **PREREQS:** One year biological science and one course in organic chemistry.

CROP 560. SEED PRODUCTION (3). An introduction to principles and practices of seed-based genetic delivery systems. Fundamentals of seed crop biology, cultivar maintenance and production methods are stressed. Concepts are illustrated using Pacific Northwest seed crops. **PREREQS:** CROP 200 or CSS 200 or equivalent.

CROP 563. SEED BIOLOGY (3). Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered even years. **CROSSLISTED** as HORT 463/HORT 563. Lec/lab.

CROP 580. CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT (4). Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. **CROSSLISTED** as HORT 480/HORT 580, CSS 480/CSS 580. **PREREQS:** CROP 300 or CSS 300 or HORT 300 and senior standing in agriculture.

CROP 590. EXPERIMENTAL DESIGN IN AGRICULTURE (4). Field layout, analysis, and interpretation of basic experimental designs used in agronomy and plant breeding and including field plot techniques such as optimum plot size and shape, factorial arrangement, replication, sub-sampling, randomization, and blocking. Recitation provides practical experience with SAS. **PREREQS:** ST 351 or equivalent.

CROP 599. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE (1-16). Technical knowledge and skills development courses offered in a wide variety of course formats. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 16 credits.

CROP 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CROP 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** PhD-level graduate students.

CROP 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CROP 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CROP 607. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 99 credits.

CROP 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

CROP 660. HERBICIDE SCIENCE (4). Absorption, movement, and mechanism of action in plants; behavior of herbicides in soil. Offered alternate years. **PREREQS:** BOT 331 and (CSS 440 or CSS 540 or CROP 440 or CROP 540)

CROP 670. PHYSIOLOGY OF CROP YIELD (3). Concepts of crop growth and production in relation to environmental and physiological factors and their interactions; current literature. **PREREQS:** BOT 331 or equivalent.

CROP 699. SPECIAL TOPICS IN CROP SCIENCE AND SOIL SCIENCE (1-16). This course is repeatable for a maximum of 16 credits.

■ HORTICULTURE COURSES

HORT 101. INTRODUCTION TO HORTICULTURE, CROP, SOIL, AND INSECT SCIENCE (1). Introduces students with interests in horticulture, crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. Open to all students. **CROSSLISTED** as CROP 101, ENT 101, SOIL 101.

HORT 111. INTRODUCTION TO HORTICULTURAL CROP PRODUCTION (2). Characteristics of commercial horticulture; survey of commercial horticultural systems with emphasis on the Pacific Northwest; career opportunities in horticulture. Required field trips.

HORT 112. INTRODUCTION TO HORTICULTURAL SYSTEMS, PRACTICES AND CAREERS (2). Overview of horticultural systems and practices, with an emphasis on the Pacific Northwest. Exploration of career opportunities in horticulture. Includes viticulture, environmental landscaping, turf management, greenhouse and nursery production, farming, education, and research. Required field trips.

HORT 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HORT 199H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HORT 226. LANDSCAPE PLANT MATERIALS I: DECIDUOUS HARDWOODS AND CONIFER (4). Identification of trees, shrubs, vines, and ground covers used in landscape horticulture. Basic plant taxonomy, nomenclature, anatomy, and use of plants in the landscape. Diverse plant material covered with an emphasis on deciduous hardwoods and conifers.

HORT 228. LANDSCAPE PLANT MATERIALS II: SPRING FLOWERING TREES & SHRUB (4). Identification of trees, shrubs, vines, and ground covers used in landscape horticulture. Basic plant taxonomy, nomenclature, anatomy, and use of plants in the landscape. Diverse plant material covered with an emphasis on spring flowering trees and shrubs. **Lec/rec.**

HORT 251. TEMPERATE TREE FRUIT, BERRIES, GRAPES, AND NUTS (2). Covers fruit and nut crops for temperate zones. Emphasis placed on scientific and common names, plant adaptation, basic morphology, major cultivars, and markets. Offered alternate years.

HORT 255. HERBACEOUS ORNAMENTAL PLANT MATERIALS (3). Identification and culture of herbaceous plants used in the landscape. Offered via Ecampus only.

HORT 260. ORGANIC FARMING AND GARDENING (3). Organic farming and gardening methods are discussed in class and practiced in the field. The philosophical background of organic farming as well as the biological, environmental and social factors involved in organic food production are covered. Emphasis is on hands-on application of scientific principles to create sustainable food production systems. **Lec/lab.**

HORT 270. INTRODUCTION TO THERAPEUTIC HORTICULTURE (2). An introduction to the history, benefits, and methods of therapeutic horticulture. Surveys program models for vocational, social/recreational, wellness and therapeutic applications of horticulture.

HORT 271. TECHNIQUES & ADAPTIVE STRATEGIES IN THERAPEUTIC HORTICULTURE (2). An introduction to the characteristics of therapeutic gardens. Survey of year-round, indoor and outdoor therapeutic

horticultural programming adaptations, strategies and techniques for different special populations. **PREREQS:** HORT 270

HORT 272. BASIC THERAPEUTIC SKILLS I (2). The assessment and evaluation process in therapeutic horticulture. Development of communication strategies, helping skills, and horticultural skills for therapeutic situations. **PREREQS:** HORT 271

HORT 273. BASIC THERAPEUTIC SKILLS II (2). Assessment and documentation tools in therapeutic horticulture. Treatment issues related to different types of physical and mental issues. Conduct and evaluate therapeutic horticultural activity sessions. **PREREQS:** HORT 272

HORT 274. THERAPEUTIC HORTICULTURAL PROGRAMS FOR OLDER ADULTS/CHILDREN (2). Benefits and applications of therapeutic horticulture to older adults and special needs children. **PREREQS:** HORT 273

HORT 275. THERAPEUTIC GARDEN DESIGN, MAINTENANCE AND PROGRAMMING (2). The history, characteristics and design of the therapeutic garden. The use of the garden in therapeutic horticultural programming. **PREREQS:** (HORT 274 and HORT 280)

HORT 285. PERMACULTURE DESIGN AND THEORY: CERTIFICATE COURSE (4). Permaculture design course meets internationally recognized standards for certification. Lectures, hands-on activities, experiential learning, group discussions, readings, student projects and presentations. Two mandatory weekend days. Design intensive, utilizing graphic and verbal presentation skills. Research into other functioning permaculture systems through literature, websites, and as observed on field trips. **Lec/lab.** This course is repeatable for a maximum of 8 credits.

HORT 286. PERMACULTURE CERTIFICATION (1). Permaculture Designer's Certificate issued upon completion by Cascadia Permaculture Institute. Lectures, activities, experiential learning, discussions, readings, projects, presentations. Two mandatory weekend day field trips. Design intensive, utilizing graphic and verbal presentation skills. Research functioning permaculture systems as found in literature, websites, observed on field trips. **COREQS:** HORT 285

HORT 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HORT 299H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HORT 300. CROP PRODUCTION IN PACIFIC NORTHWEST AGROECOSYSTEMS (4). Relation of crop production to human culture and the natural environment. Origins of agriculture and the processes of agricultural change, and productivity and sustainability of specific crop production systems in the Pacific Northwest. History, geography, resource requirements, and key challenges faced are presented. Fundamental crop production practices in relation to productivity and sustainability. **Lec/lab/rec.** **CROSSLISTED** as CSS 300 and CROP 300. **PREREQS:** One year of general biology or equivalent.

HORT 301. THE BIOLOGY OF HORTICULTURE (3). Gain fundamental knowledge of plant growth and development of horticultural crops and understand how manipulation of growth systems affects growth and development. The course will progress from a micro- to macro-level, the last section covering how environmental factors affect growth and development. **PREREQS:** General biology or botany sequence.

HORT 303. HORTICULTURAL PROJECTS (2). Student-managed crop production projects with emphasis on container grown, greenhouse crops. Crop scheduling, propagation and planting, selecting temperature and lighting regimes, specifying growth regulator applications, nutrient management, irrigation management, pest

monitoring, and problem diagnosis and correction. **PREREQS:** HORT 301

HORT 311. PLANT PROPAGATION (4). The regeneration of plants from vegetative and reproductive tissue and organs. Horticultural and physiological principles, methods, and techniques for laboratory, greenhouse nursery, field, and orchard. **PREREQS:** HORT 301

HORT 314. PRINCIPLES OF TURFGRASS MAINTENANCE (4). Identification and adaptation of common turfgrasses. Physiology of turfgrass growth and response to cultural and environmental stresses. Cultural practices including establishment, general maintenance, and pest control. Field trips required. **PREREQS:** (CSS 205 or CSS 305 or SOIL 205)

HORT 315. SUSTAINABLE LANDSCAPES: MAINTENANCE, CONSERVATION, RESTORE (4). Sustainable care and maintenance practices for non-turf landscape areas. Low input pruning, planting, fertilization, and pest control with an emphasis on IPM. Plant responses to stress, particularly those encountered in the urban environment. Outdoor labs required. **PREREQS:** Basic knowledge of plant physiology is recommended.

HORT 316. PLANT NUTRITION (4). Basic concepts and principles of plant mineral nutrition that provide a basis for solving practical nutritional problems in horticultural crops. Areas covered include mineral nutrients, nutrient availability in the soil and plant uptake, nutrient deficiencies and toxicities and their causes and remedies, and plant and soil analysis. **Lec/lab/rec.** **PREREQS:** (CSS 205 or CSS 305 or SOIL 205)

HORT 318. ^APPLIED ECOLOGY OF MANAGED ECOSYSTEMS (3). Survey of ecological processes in managed ecosystems emphasizing ecological management techniques. Ecosystem services; biodiversity management; weed dynamics; agroecology; urban ecology; restoration and mitigation; landscape management. Field trip required. (Writing Intensive Course)

HORT 319. RESTORATION HORTICULTURE (3). As world population increases to some 9 billion plus by 2044, the importance of ecologically sound horticultural practices becomes increasingly apparent. Integration of ecological concepts and theory in management and development of created landscapes is critical for the preservation of many ecological services currently provided by undeveloped areas. Offered via Ecampus only. **PREREQS:** WR 121 or equivalent. Students must be reasonably proficient in writing skills and able to communicate through writing. Basic ecology course or practical experience providing understanding of ecological principals and concepts.

HORT 330. *PLAGUES, PESTS, AND POLITICS (3). Integration and interaction of agricultural and public health aspects of entomology in society and history. **CROSSLISTED** as BI 300 and ENT 300. (Bacc Core Course)

HORT 331. *POLLINATORS IN PERIL (3). Pollinators, human influences on pollination systems, and the potential consequences of pollinator decline. An introduction to the skills needed to investigate media reports and multidisciplinary scientific research. Effects of pesticides, habitat fragmentation, climate change, invasive species, pests, pathogens, and other threats to pollinators in critical natural and agricultural systems around the world. **PREREQS:** Completion of a Baccalaureate Core biological science course. **CROSSLISTED** as ENT 331. (Bacc Core Course)

HORT 349. DIAGNOSING PLANT PROBLEMS (3). Basic principles of problem diagnosis in crop, garden, and landscape plants are covered. Problems caused by cultural and environmental issues, plant diseases, insect pests, and other causes are addressed. Students will gain

familiarity with resources for plant problem diagnosis. Offered via Ecampus only. **PREREQS:** A background in basic biology, plant pathology and/or entomology is recommended. Enrollees from outside the university setting may have gained their experience within a job or other practical setting.

HORT 350. URBAN FORESTRY (3). Introduction to principles and practices of planting and managing trees as a system of urban environment; understanding the economic, environmental, social aspects of urban forests, and an overview of contemporary land use issues and societal perspectives between people and plants. **CROSSLISTED** as FES 350. Offered via Ecampus only. **PREREQS:** Foundational forestry and horticulture courses are recommended.

HORT 351. FLORICULTURE AND GREENHOUSE SYSTEMS (4). For students interested in growing plants in commercial or educational greenhouses. Actively explores the production and scheduling of floriculture crops for various markets. Combines the practical aspects of growing floral crops under environments created by traditional and technologically advanced greenhouses. Greenhouse structures and crop environment manipulation will be emphasized. Students actively manage a floriculture crop and are responsible for developing and implementing production schedules, and for making key decisions on the culture of diverse floral crops. **PREREQS:** HORT 301

HORT 358. LANDSCAPE CONSTRUCTION TECHNIQUES (4). Study of landscape construction process from initial site analysis to finished landscape. Techniques used in building hardscape and landscape areas. Field trips required. Lec/lab.

HORT 360. LANDSCAPE CONSTRUCTION: IRRIGATION AND DRAINAGE (4). Surface grading/drainage techniques and structures; principles and techniques of landscape and turf irrigation. Field trips required. Lec/lab. **PREREQS:** HORT 358 and CSS 305

HORT 361. PLANT NURSERY SYSTEMS (4). Covers how to grow shrubs and trees, and herbaceous annuals and perennials in nurseries for use in urban landscapes and managed ecosystems such as forestry and restoration. Plant nursery systems are diverse and require intensive management involving a dynamic decision making process. This course actively explores field and container production systems as well as the marketing of plants, an overview of plant growth regulation and post-production handling, the influence of efficient production practices on plant quality, integrating pest management strategies, and natural resource utilization. **PREREQS:** HORT 301

HORT 380. SUSTAINABLE LANDSCAPE DESIGN (3). The assessment of design problems/situations, the development of solutions and the communication of those solutions to the client through the design. Specific topics include designing for ecosystem maintenance/enhancement, introduction to computer-aided design (CAD), using color in landscape designs and rendering section/elevation views.

HORT 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HORT 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

HORT 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing. Departmental approval required.

HORT 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

HORT 405H. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HORT 406. PROJECTS: DATA PRESENTATIONS (1). For any student doing research, to learn to develop and evaluate poster and slide presentations containing scientific data. Students are exposed to a variety of scientific disciplines as they prepare and critique their own and other students' posters and oral presentations. Students improve written and oral communication skills. Letter grade is based on participation, improvement, and the quality of a final poster project and oral presentation. Offered winter term. **CROSSLISTED** as BRR 406.

HORT 407. SEMINAR (1). Senior seminar intended to instruct students on proper techniques for presentation of scientific material. Each student is expected to prepare and present a scientific seminar and to attend and evaluate the seminars given by other class members.

HORT 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

HORT 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

HORT 410. INTERNSHIP (1-12). Work internship to acquaint horticulture majors with the practices of the horticulture industry. Under direction of departmental internship committee. Requires approved statement of intent, submission of employer and employee evaluation forms and written report. This course is repeatable for a maximum of 12 credits. **PREREQS:** Junior standing.

HORT 411. HORTICULTURE BOOK CLUB (1). Reading and discussion of noteworthy books and associated topics relating to agriculture, society and the environment. This course is repeatable for a maximum of 2 credits. **PREREQS:** Sophomore standing.

HORT 412. CAREER EXPLORATION: INTERNSHIPS AND RESEARCH PROJECTS (1). Provides orientation to the horticulture major internship and research project requirement. Covers procedures for selecting, performing, and reporting on an internship or research project. Includes guidance and skill development valuable in the pursuit of horticultural career goals, such as cover letter and resume preparation and interviewing experience.

HORT 414. INFORMATION SYSTEMS IN AGRICULTURE (4). Introduction to precision farming tools (GIS, image processing, GPS, and computer-linked agricultural equipment). Students also complete a class project.

HORT 418. GOLF COURSE MAINTENANCE (4). Basic aspects of golf course maintenance under temperate zone conditions. Lec/lab. **PREREQS:** HORT 314

HORT 430. PLANT GENETICS (3). Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes. **CROSSLISTED** as CSS 430/CSS 530 and PBG 430/PBG 530. **PREREQS:** One year of biology and chemistry.

HORT 431. PLANT GENETICS RECITATION (1). Review and demonstration of plant genetics principles. **CROSSLISTED** as CSS 431 and PBG 431.

HORT 433. SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS (4). Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. **CROSSLISTED** as CROP 433/CROP 533. **PREREQS:** BI 102 or BI 213 or BI 311 or HORT 430 or CSS 430 or HORT 450 or CSS 450 or PBG 450

HORT 438. EXPLORING WORLD AGRICULTURE (2). Survey of crop and livestock production in a designated section of the world, including history, culture, and political situation. Course is designed to prepare students for a tour of study area. **CROSSLISTED** as ANS 438, AREC

438, CROP 438, CSS 438. Graded P/N. This course is repeatable for a maximum of 8 credits.

HORT 441. PLANT TISSUE CULTURE (4). Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. Lec/lab. **CROSSLISTED** as PBG 441/PBG 541, MCB 541. **PREREQS:** (BI 311 and BOT 331) or HORT 430 or PBG 430

HORT 447. ARBORICULTURE (4). The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. Lec/lab. **CROSSLISTED** as FES 447. Offered via Ecampus only. **PREREQS:** (FOR 141 or FES 141 or FOR 241 or FES 241 or (HORT 226 and HORT 228)) and (FOR 111 or HORT 112)

HORT 450. PLANT BREEDING (4). An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Examples are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evolution, germplasm preservation, disease resistance, and biotechnology. Lec/lab. **CROSSLISTED** as CSS 450/CSS 550, PBG 450/PBG 550. **PREREQS:** BI 311 or (PBG 430 or CSS 430 or HORT 430)

HORT 451. TREE FRUIT PHYSIOLOGY AND CULTURE (4). Plant growth and development in relation to tree fruit production; emphasis on canopy development and pruning theory, flowering and fruit set, and development, dormancy, and cold acclimation. Field trips required. **PREREQS:** HORT 301* and BOT 331*

HORT 452. BERRY AND GRAPE PHYSIOLOGY AND CULTURE (4). Production of wine grapes, caneberries, strawberries, blueberries, and other miscellaneous berry crops. Emphasis on plant growth and development; pruning and training systems; flower and fruit development and cultivars. Field trips required. Offered in alternate years. **PREREQS:** HORT 301

HORT 453. GRAPEVINE GROWTH AND PHYSIOLOGY (3). The physiological aspects of grapevine growth and development including dormancy, flowering and fruit set, vegetative growth, fruit development and water relations. Additional topics include taxonomy, morphology and physiological influences of vineyard mesoclimate and vine microclimate. Lec/lab. **PREREQS:** HORT 301 or instructor approval.

HORT 454. PRINCIPLES AND PRACTICES OF VINEYARD PRODUCTION (3). The relationship of vineyard and canopy management to grapevine physiology and fruit quality. Nutrient/water relations within the soil/vine continuum. Vineyard microclimate, floor management, and pests will also be discussed. Lec/lab. **PREREQS:** HORT 301 and HORT 453 (need not be taken before HORT 454 but is highly recommended).

HORT 455. URBAN FOREST PLANNING, POLICY AND MANAGEMENT (4). Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. **CROSSLISTED** as FES 455. Taught via Ecampus only. **PREREQS:** FES 350 or FOR 350 or HORT 350

HORT 463. SEED BIOLOGY (3). Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be

covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered every even year fall term. CROSSLISTED as CROP 463/CROP 563. Lec/lab.

HORT 480. CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT (4). Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROSSLISTED as CROP 480/CROP 580 and CSS 480/CSS 580. This course is repeatable for a maximum of 8 credits. **PREREQS:** CROP 300 or CSS 300 or HORT 300 or and senior standing in agriculture.

HORT 481. CASE STUDIES IN HORTICULTURAL SYSTEMS MANAGEMENT (4). Field-based decision cases involving problematical situations encountered in horticultural farming systems including nursery production, orchard and vineyard systems, market gardening, Christmas tree, and row crop production. Required field trips may include weekend trips. This course is repeatable for a maximum of 8 credits. **PREREQS:** (HORT 300 or CSS 300) and HORT 301 and CSS 305

HORT 485. ADVANCED PERMACULTURE DESIGN (3). Course work centers on choice of advanced design project track: broad scale rural farm or ranch, urban neighborhood or community development, educational institution or organization, or commercial property business development. Students conduct in-depth site analysis and draft design document which is reviewed and revised with research-based knowledge to complete design gaps. **PREREQS:** (HORT 285 and HORT 286)

HORT 495. HORTICULTURAL MANAGEMENT PLANS (3). Develop an integrated management plan for a horticultural enterprise. This course is repeatable for a maximum of 6 credits. **PREREQS:** Senior standing.

HORT 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HORT 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HORT 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

HORT 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

HORT 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

HORT 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

HORT 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

HORT 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

HORT 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

HORT 510. INTERNSHIP (1-12). Offered via Ecampus only. This course is repeatable for a maximum of 12 credits.

HORT 511. RESEARCH AND EDUCATIONAL PERSPECTIVES IN HORTICULTURE (2). Introduces beginning graduate students to the faculty in horticulture and provides an in-depth discussion of their research and education programs.

HORT 512. DISCUSSIONS IN PLANT SCIENCE (1). Student presentations dealing with selected topics in the plant sciences and examined in the context of contemporary research. (Students enroll once in each academic year.) This course is repeatable for a maximum of 2 credits.

HORT 514. INFORMATION SYSTEMS IN AGRICULTURE (4). Introduction to precision farming tools (GIS, image processing, GPS, and computer-linked agricultural equipment). Students also complete a class project.

HORT 516. ADVANCED PLANT NUTRITION (4). Factors influencing nutrient absorption and plant composition with an emphasis on plant physiology and soil chemistry. Diagnostic approaches to determining nutritional status are discussed in detail. Current efforts to enhance nutritional efficiency are explained. Offered alternate years. **PREREQS:** BOT 331 and CSS 305

HORT 517. DIAGNOSIS OF NUTRITIONAL DISORDERS (1). Factors influencing the interpretation of soil and plant testing are discussed. Emphasis is placed on horticultural crops. The same information presented in HORT 316 module (b) is available for graduate credit in this course. **PREREQS:** BOT 331 and CSS 305

HORT 518. CURRENT TOPICS IN ENTOMOLOGY (2). This is a core course of the Horticulture graduate program. Provides an advanced understanding of entomology and its relationship to other disciplines through critical analysis of the scientific literature. Students practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. CROSSLISTED as ENT 518. This course is repeatable for a maximum of 12 credits.

HORT 519. CURRENT TOPICS IN PLANT BREEDING AND GENETICS (2). Provides an advanced understanding of plant breeding and genetics and their relationship to other disciplines through critical analysis of the scientific literature. Students practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. CROSSLISTED as PBG 519. This course is repeatable for a maximum of 12 credits.

HORT 520. CURRENT TOPICS IN HORTICULTURAL RESEARCH (2). This is a core course in the horticulture graduate program. Students gain an advanced understanding of horticulture science and its relationship to other disciplines through critical analysis of the scientific literature. Students practice synthesizing information and presenting findings to their peers. Instructors, topics and specific learning objectives vary from term to term. This course is repeatable for a maximum of 12 credits.

HORT 530. PLANT GENETICS (3). Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes. CROSSLISTED as CSS 430/CSS 530 and PBG 430/PBG 530. **PREREQS:** One year of biology and chemistry.

HORT 533. SYSTEMATICS AND ADAPTATION OF VEGETABLE CROPS (4). Covers the botanical and taxonomic relationships, breeding systems and adaptation of vegetable crops. Fresh material is used to illustrate varietal differences and traits of importance. Lec/lab. CROSSLISTED as CROP 433/CROP 533. **PREREQS:** BI 102 or BI 213 or BI 311 or HORT 430 or CSS 430 or HORT 450 or CSS 450

HORT 541. PLANT TISSUE CULTURE (4). Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. Lec/lab. CROSSLISTED as PBG 441/PBG 541, MCB 541. **PREREQS:** (BI 311 and BOT 331) or HORT 430 or PBG 430

HORT 547. ARBORICULTURE (4). The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. Lec/lab CROSSLISTED as FES 447.

HORT 550. PLANT BREEDING (4). An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Examples are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evolution, germplasm preservation, disease resistance, and biotechnology. Lec/lab. CROSSLISTED as CSS 450/CSS 550, PBG 450/PBG 550. **PREREQS:** BI 311 or CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530

HORT 552. BERRY AND GRAPE PHYSIOLOGY AND CULTURE (4). Production of wine grapes, caneberries, strawberries, blueberries, and other miscellaneous berry crops. Emphasis on plant growth and development; pruning and training systems; flower and fruit development and cultivars. Field trips required. Offered in alternate years. **PREREQS:** HORT 301

HORT 555. URBAN FOREST PLANNING, POLICY AND MANAGEMENT (4). Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSLISTED as FES 555. Taught via Ecampus only. **PREREQS:** FOR 350 or FES 350 or HORT 350 for undergraduates.

HORT 563. SEED BIOLOGY (3). Information about reproductive development of plants such as pollination and fertilization, which is important for the initiation of seed formation, will be provided. Embryo and endosperm development as well as accumulation of seed storage materials, which are major events during seed development, will be covered, as well as the dormancy and germination mechanisms in mature seeds. Lectures and discussions (presentations required for graduate students). Offered every even year fall term. CROSSLISTED as CROP 463/CROP 563. Lec/lab.

HORT 580. CASE STUDIES IN CROPPING SYSTEMS MANAGEMENT (4). Decision cases involving the production of field and horticultural crops; individual and group activities; discussion of the decision-making process. Multiple field trips required. A field trip fee will be charged. CROSSLISTED as CROP 480/CROP 580 and CSS 480/CSS 580. **PREREQS:** CROP 300 or CSS 300 or HORT 300 or and senior standing in agriculture.

HORT 591. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HORT 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HORT 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

HORT 603. DISSERTATION (1-16). This course is repeatable for a maximum of 999 credits.

HORT 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

HORT 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

HORT 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

HORT 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

HORT 691. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HORT 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

■ PLANT BREEDING AND GENETICS COURSES

PBG 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 199H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

PBG 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 299H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

PBG 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

PBG 403. THESIS (1-16). This course is repeatable for a maximum of 99 credits.

PBG 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

PBG 405H. READING AND CONFERENCE (1-16). Offered via Ecampus only. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

PBG 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

PBG 409. TEACHING PRACTICUM (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

PBG 410. INTERNSHIP (3-12). This course is repeatable for a maximum of 12 credits.

PBG 430. PLANT GENETICS (3). Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes. **CROSSLISTED** as HORT 430/HORT 530 and CSS 430/530. **PREREQS:** One year of biology and chemistry.

PBG 431. PLANT GENETICS RECITATION (1). Review and demonstration of plant genetics principles. **CROSSLISTED** as HORT 431 and CSS 431.

PBG 441. PLANT TISSUE CULTURE (4). Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. **Lec/lab. CROSSLISTED** as HORT 441/HORT 541, MCB 541. **PREREQS:** (BI 311 and BOT 331) or HORT 430 or PBG 430 or CSS 430

PBG 450. PLANT BREEDING (4). An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Examples are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evaluation, germplasm preservation, disease resistance, and biotechnology. **CROSSLISTED** as HORT 450/HORT 550, CSS 450/CSS 550. **Lec/lab. PREREQS:** BI 311 or (PBG 430 or CSS 430 or HORT 430)

PBG 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

PBG 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

PBG 503. THESIS (1-16). Graded P/N. This course is repeatable for a maximum of 999 credits.

PBG 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

PBG 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 507. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

PBG 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

PBG 509. TEACHING PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

PBG 510. INTERNSHIP (4). This course is repeatable for a maximum of 12 credits.

PBG 513. PLANT GENETIC ENGINEERING (3). Principles, methods, and recent developments in the genetic engineering of higher plants. Offered alternate years. **PREREQS:** (BI 311 and BOT 331) or (CSS 430 or CSS 530) or (HORT 430 or HORT 530) or (PBG 430 or PBG 530)

PBG 519. CURRENT TOPICS IN PLANT BREEDING AND GENETICS (2). Provides an advanced understanding of plant breeding and genetics and their relationship to other disciplines through critical analysis of the scientific literature. Students practice synthesizing information and presenting findings to peers. Instructors, topics, and specific learning objectives vary from term to term. **CROSSLISTED** as HORT 519. This course is repeatable for a maximum of 12 credits.

PBG 530. PLANT GENETICS (3). Introduction to the principles of plant genetics with an emphasis on the structure and function of economically important plant genomes. **CROSSLISTED** as HORT 430/HORT 530 and CSS 430/CSS 530. **PREREQS:** One year of biology and chemistry.

PBG 541. PLANT TISSUE CULTURE (4). Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. **Lec/lab. CROSSLISTED** as HORT 441/HORT 541, MCB 541. **PREREQS:** (BI 311 and BOT 331) or HORT 430 or PBG 430

PBG 550. PLANT BREEDING (4). An introduction to the genetic improvement of self-pollinated, cross-pollinated, and asexually propagated species and the genetic principles on which breeding methods are based. Example are drawn from a wide range of crops, including cereal grains, grasses, fruits, nuts, and vegetables; guest lecturers discuss their breeding programs. Additional topics include crop evaluation, germplasm preservation, disease resistance, and biotechnology. **CROSSLISTED** as HORT 450/HORT 550, CSS 450/CSS 550. **Lec/lab. PREREQS:** BI 311 or CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530

PBG 591. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 598. PLANT CHROMOSOME BIOLOGY (3). Exploration of the relationship between chromosome number, structure, and behavior to gene inheritance, organization, and expression. Discussion of chromosome manipulation strategies for genomics research, genetic analysis, and plant breeding. **PREREQS:** 6 credits of genetics or equivalent.

PBG 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 601. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

PBG 603. DISSERTATION (1-16). Graded P/N. This course is repeatable for a maximum of 999 credits.

PBG 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

PBG 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

PBG 620. DNA FINGERPRINTING (1). Principles and methods for producing and analyzing DNA

fingerprints. Offered even years. **CROSSLISTED** as CSS 620 and MCB 620. **PREREQS:** BI 311 or CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530 or equivalent.

PBG 621. GENETIC MAPPING (1). Principles and methods for constructing genetic maps comprised of molecular and other genetic markers. Offered even years. **CROSSLISTED** as MCB 621 and CSS 621. **PREREQS:** BI 311 or CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530 or equivalent.

PBG 622. MAPPING QUANTITATIVE TRAIT LOCI (1). Principles and methods for mapping genes underlying phenotypically complex traits. Offered even years. **CROSSLISTED** as MCB 622 and CSS 622. **PREREQS:** CROP 590 or CSS 590 or ST 513 or equivalent.

PBG 650. ADVANCED PLANT BREEDING AND QUANTITATIVE GENETICS (3). Pedigree, bulk, single-seed-descent, doubled haploid, backcross, testcross, mass, and half-sib, S-1-, and S-2- family breeding methods; breeding hybrids and selecting sources of alleles for developing superior hybrids; the nature and consequences of genotype by environment interactions; marker-assisted backcross and inbred line breeding; quantitative trait locus mapping; random linear models; designing and analyzing cultivar, line, and family selection experiments. Offered odd years. **PREREQS:** (CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530) and (CSS 450 or CSS 550 or PBG 450 or PBG 550 or HORT 450 or HORT 550) and (ST 411 or ST 511) and (ST 412 or ST 512) and (ST 413 or ST 513)

PBG 691. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PBG 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

■ SOIL SCIENCE COURSES

SOIL 101. INTRODUCTION TO HORTICULTURE, CROP, SOIL, AND INSECT SCIENCE (1).

Introduces students with interests in horticulture, crop, soil, and insect sciences to educational and professional opportunities in these disciplines. Speakers will discuss opportunities in research and academia as well as in the applied professional job market. Open to all students. **CROSSLISTED** as CROP 101, ENT 101, HORT 101.

SOIL 102. *INTRODUCTION TO ENVIRONMENTAL SCIENCE AND SUSTAINABILITY (4). An introduction to the science behind critical environmental issues and the biological basis of creating and maintaining sustainable ecosystems. Focus on such questions as: how do we decide what to believe about environmental issues? How do we quantify, restore, and value biodiversity? What is valid science in the global warming debate? **Lec/lab. (Bacc Core Course)**

SOIL 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 199H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

SOIL 205. *SOIL SCIENCE (4). Introduction to the chemical, physical and biological nature of soils. Examines the functions of soil as a medium of plant growth, a recycling system for nutrients and wastes, a modifier of atmospheric chemistry, a habitat for soil organisms, a system for water purification, and an engineering medium. Field and laboratory projects provide an understanding of fundamental soil science principles and the impact of human activities on soil quality and sustainability. **Lec/lab. Field trips required. (Bacc Core Course)**

SOIL 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 299H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

SOIL 316. NUTRIENT CYCLING IN AGROECOSYSTEMS (3). Nutrient forms, transformations, and cycling. Diagnosis and correction of nutrient deficiencies, pH and salinity. Impact of nutrient management practices on crop production, soil health, nutrient use efficiency, and environmental quality. Organic and inorganic fertilization. Lec/lab. **PREREQS:** CH 121 and SOIL 205 or (CSS 205 or CSS 305)

SOIL 325. ^AG AND ENVIRONMENTAL PREDICAMENTS: A CASE STUDY APPROACH (3). Evaluation of controversial agricultural and environmental problems. Production of clear oral and written documents describing and analyzing problems and specific courses of action utilizing team-building skills. (Writing Intensive Course) **CROSSLISTED** as CROP 325. **PREREQS:** (CSS 305 or CSS 205 or SOIL 205)

SOIL 335. *INTRODUCTION TO WATER SCIENCE AND POLICY (3). Policy and science of the hydrologic cycle. Emphasis on interaction between water's natural time-space fluctuations and human uses. (Bacc Core Course) **CROSSLISTED** as GEO 335.

SOIL 366. ECOSYSTEMS OF WILDLAND SOILS (3). Focuses on soils that occur in relatively undisturbed ecosystems such as forests and rangelands. Topics covered include properties and processes specific to understanding and managing the soil resource in these areas. An overview of US Soil Taxonomy will also be given. **PREREQS:** (SOIL 205 or CSS 205 or CSS 305) and an understanding and appreciation of environmental chemistry, biology, ecology, and physics is needed for this course.

SOIL 395. *WORLD SOIL RESOURCES (3). The properties, global distribution, and agricultural productivity of major world soil groups are described. Potentials for human-accelerated soil degradation are introduced for each soil group, and reasons for conflicting assessments of degradation are discussed. (Bacc Core Course) **CROSSLISTED** as CSS 395. Offered via Ecampus only. **PREREQS:** CH 121 and /or equivalent.

SOIL 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 403. THESIS (1-16). Independent, original study and preparation of a senior thesis. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior standing.

SOIL 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing.

SOIL 405H. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing and Honors College approval required.

SOIL 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing.

SOIL 408. WORKSHOP (1-16). Evaluation and judging of soils in Oregon and other states; directed studies of soil morphology, soil survey, soil fertility, soil physics, soil chemistry, soil biology, and soil information systems. This course is repeatable for a maximum of 16 credits.

SOIL 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 410. INTERNSHIP (1-6). Professional work experience previously approved and supervised by the department, written report required. This course is repeatable for a maximum of 12 credits. **PREREQS:** Junior standing.

SOIL 435. ENVIRONMENTAL SOIL PHYSICS (3). Covers principles of soil physical properties and processes as they relate to agricultural, hydrological and environmental problems. Lec/lab. Offered odd years. **PREREQS:** (CSS 205 or CSS 305 or SOIL 205) and CH 123 and MTH 241 and PH 201 or equivalent.

SOIL 445. ENVIRONMENTAL SOIL CHEMISTRY (3). Structural chemistry of clay minerals and organic matter, cation and anion exchange, and soil solution equilibria of soils. Ion exchange, mineral-solution equilibria, and adsorption reactions of silicate clays, oxides, and organic matter are emphasized. Covers the sorption behavior of environmental contaminants and the weathering reactions that govern the transport of reactive solutes through soils. Lec/rec. Offered odd years.

SOIL 455. BIOLOGY OF SOIL ECOSYSTEMS (4). A detailed study of the organisms that live in the soil and their activities in the soil ecosystems, soil as a habitat for organisms, taxonomy and biology of soil organisms, fundamentals of nutrient cycles, special topics in soil biology, review basis of soil microbial and ecological principles. Lec/rec/lab. **PREREQS:** (CSS 305 or CSS 205 or SOIL 205). Courses in chemistry, physics, and microbiology are recommended.

SOIL 466. SOIL MORPHOLOGY AND CLASSIFICATION (4). Observation and description of soil properties in the field; writing soil profile descriptions; evaluating criteria that define features used to classify soils; using soil classification keys. Lec/lab. **PREREQS:** (SOIL 205 or CSS 205 or CSS 305)

SOIL 468. SOIL LANDSCAPE ANALYSIS (4). Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system and landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab. Offered even years. **PREREQS:** (SOIL 466* or CSS 466*)

SOIL 475. SOIL RESOURCE POTENTIALS (4). Course builds on knowledge from introductory pedology, soil chemistry, soil physics and soil biology to practice the evaluation of nutrient availability and soil moisture storage in the rooting space. Results from the application of pedotransfer functions to observations at the pit wall are translated into quantitative, numerical expressions of soil resource potentials. Lec/lab. **PREREQS:** (SOIL 435 and SOIL 455 and SOIL 466)

SOIL 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing.

SOIL 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing and Honors College approval required.

SOIL 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 503. THESIS/DISSERTATION (1-16). This course is repeatable for a maximum of 999 credits.

SOIL 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 508. WORKSHOP (1-16). Evaluation and judging of soils in Oregon and other states; directed studies of soil morphology, soil survey, soil fertility, soil physics, soil chemistry, soil biology, and soil information systems. This course is repeatable for a maximum of 16 credits.

SOIL 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

SOIL 510. INTERNSHIP (1-6). Professional work experience previously approved and supervised by the department, written report required. This course is repeatable for a maximum of 6 credits.

SOIL 513. PROPERTIES, PROCESSES, AND FUNCTIONS OF SOILS (4). Physical, chemical, biological, and landscape properties; processes of fluid retention and movement, weathering and cation exchange, decomposition and C-N dynamics, erosion and sedimentation; functions of hydrologic regulation, nutrient cycling, environmental protection, ecological habitat. **PREREQS:** CH 223 or CH 233 or CH 233H or equivalent

SOIL 515. SOIL FERTILITY MANAGEMENT (3). Management of plant nutrients in agronomic systems; diagnosis of nutrient availability and prediction of crop response to fertilizers; interactions between nutrient response and chemical, physical and biological properties of soils. **PREREQS:** CSS 315 and courses in statistics, chemistry and plant physiology.

SOIL 523. PRINCIPLES OF STABLE ISOTOPES (3). An introduction to the theory and use of stable isotopes. Applications of stable isotopes to soil science, plant physiology, hydrology, and ecosystem studies. Offered even years.

SOIL 525. MINERAL-ORGANIC MATTER INTERACTIONS (3). Studies the fundamental properties of the mineral-organic interface and the mechanisms of interaction between mineral and organic soil properties. **PREREQS:** CSS 305 or CSS 205 or SOIL 205 or equivalent.

SOIL 535. SOIL PHYSICS (3). Theoretical elements of soil physical properties and processes related to agricultural, hydrological and environmental problems. Requires concurrent weekly laboratory: SOIL 536. Offered even years. **PREREQS:** CSS 305 or CSS 205 or SOIL 205. Recommended are MTH 241 and CH 123 and PH 201 or equivalent. **COREQS:** SOIL 536

SOIL 536. VADOSE ZONE HYDROLOGY LABORATORY (1). Experimental elements of soil physical properties and processes allowing practical experience in the measurement and analysis of soil physical processes related to agricultural, hydrological and environmental problems. Weekly laboratory. Offered even years. **PREREQS:** CH 123 and PH 201 or equivalent.

SOIL 545. ENVIRONMENTAL SOIL CHEMISTRY (3). Structural chemistry of clay minerals and organic matter, cation and anion exchange, and soil solution equilibria of soils. Ion exchange, mineral-solution equilibria, and adsorption reactions of silicate clays, oxides, and organic matter are emphasized. Covers the sorption behavior of environmental contaminants and the weathering reactions that govern the transport of reactive solutes through soils. Lec/rec. Offered odd years.

SOIL 547. NUTRIENT CYCLING (3). Reviews and discusses ecosystem-level biogeochemical concepts for terrestrial and freshwater ecosystems, primarily by reading and discussing classic and current literature to determine the state-of-knowledge and uncertainties associated with it. Topics include root nutrient uptake mechanisms, soil chemical and biochemical transformations in different soil and ecosystems, measuring soil solution and watershed fluxes, soil organic matter formation and structure, the meaning of sustainability, the concept of N saturation in terrestrial ecosystems, and the use of natural abundance and tracer isotopes in ecosystem biogeochemistry. While forest biogeochemical processes will be emphasized, desert, aquatic, wetland, and prairie ecosystems will also be explored. **CROSSLISTED** as BOT 547 and FS 547. **PREREQS:** College-level chemistry and biology and one class in ecology (BI 370 or equivalent) and/or soils (e.g. SOIL 205).

SOIL 555. BIOLOGY OF SOIL ECOSYSTEMS

(4). A detailed study of the organisms that live in the soil and their activities in the soil ecosystems, soil as a habitat for organisms, taxonomy and biology of soil organisms, fundamentals of nutrient cycles, special topics in soil biology, review basis of soil microbial and ecological principles. Lec/rec/lab. **PREREQS:** CSS 305 or CSS 205 or SOIL 205. Courses in chemistry, physics, and microbiology are recommended.

SOIL 566. SOIL MORPHOLOGY AND CLASSIFICATION

(4). Observation and description of soil properties in the field; writing soil profile descriptions; evaluating criteria that define features used to classify soils; using soil classification keys. Lec/lab. **PREREQS:** CSS 305 or CSS 205 or SOIL 205

SOIL 568. SOIL LANDSCAPE ANALYSIS

(4). Principles of soil geomorphology, soil stratigraphy, and surficial processes as applied to understanding the soil system at landscape scales. Emphasis on field observations of soils, geomorphic surfaces, and environment. Field project entails design of soil survey map units, field mapping and GIS cartographic techniques. Lec/lab. Offered odd years. **PREREQS:** (CSS 566* or SOIL 566*)

SOIL 591. SELECTED TOPICS (1-16).

Course content and title will change with each offering. This course is repeatable for a maximum of 16 credits.

SOIL 599. SPECIAL TOPICS (1-16).

This course is repeatable for a maximum of 16 credits.

SOIL 601. RESEARCH (1-16).

Offered via Ecampus only. This course is repeatable for a maximum of 16 credits.

SOIL 603. THESIS/DISSERTATION (1-16).

This course is repeatable for a maximum of 999 credits.

SOIL 605. READING AND CONFERENCE (1-16).

This course is repeatable for a maximum of 16 credits.

SOIL 606. PROJECTS (1-16).

This course is repeatable for a maximum of 16 credits.

SOIL 607. SEMINAR (1-16).

This course is repeatable for a maximum of 16 credits.

SOIL 608. WORKSHOP (1-16).

This course is repeatable for a maximum of 16 credits.

SOIL 635. ADVANCED SOIL PHYSICS (3).

Explores theoretical development of a key topic in soil physics. Topics may include evaporation from porous media, multiphase fluid movement, soil deformation, and soil salinization, with respect to either historical development, present day understanding or future needs of the field. Course structure incorporates lectures and discussion requiring intensive student participation. Offered odd years. **PREREQS:** (CSS 535 or SOIL 535) and a working knowledge of soil physics and a passing grade in a graduate-level soil physics course.

SOIL 645. SOIL MICROBIAL ECOLOGY (3).

An advanced treatment of current topics in soil microbiology, with an emphasis on the ecology of soil microorganisms. Topics include the size, composition, diversity, and activity of soil microbial communities, linkage of microbial community structure to ecosystem functions, and applications of molecular biology to soil microbiology. Offered even years. **PREREQS:** Recommend SOIL 455 or CSS 455 or MB 448.

SOIL 691. SELECTED TOPICS (1-16).

This course is repeatable for a maximum of 16 credits.

SOIL 699. SPECIAL TOPICS (1-16).

This course is repeatable for a maximum of 16 credits.

The College of Business provides nationally recognized research-based education that prepares profession-ready graduates who can excel in an innovative knowledge-based economy. The undergraduate and graduate programs in business and the undergraduate program in accounting are all accredited by the Association to Advance Collegiate Schools of Business.

The School of Design and Human Environment (SDHE) offers nationally recognized academic programs at the undergraduate and graduate level. Students can gain practical experience in their chosen fields through exciting research, internship and/or study abroad opportunities. For specific information about the School of Design and Human Environment, please refer directly to the SDHE section of this catalog or their website: <http://business.oregonstate.edu/sdhe/advising>.

The information below refers only to the undergraduate/graduate business-specific majors offered by the college.

The College of Business offers seven undergraduate degree programs and three graduate degree programs. Curricula lead to bachelor of arts (BA), bachelor of science (BS), master of business administration (MBA), business administration and accountancy (A-MBA), and doctor of philosophy (PhD) in business administration degrees. For advanced degrees see the Graduate School section of this catalog.

Students wanting to earn a bachelor of arts degree in the College of Business will need to:

1. Demonstrate proficiency through the second year of a foreign language (foreign language is defined as completing the 213 level of that language with a C or better or getting a signed letter by the School of Language, Culture, and Society that states they have determined the student has that level of proficiency without needing the course work), and
2. Demonstrate cultural awareness by either:
 1. Completing 6 credits of upper-division course work focusing on the culture of regions that commonly use the foreign language in which the student is proficient, or
 2. Successfully complete a study abroad, global internship, or research experience of at least 10 weeks in a non-English speaking foreign country while enrolled at OSU. This experience must be clearly documented for audit purposes.

The Bachelor of Arts and Bachelor of Science degrees in Business Administration

offer options in General Business (Cascades Campus only), Hospitality Management (Cascades Campus only), International Business, and Entrepreneurship for Business Majors.

Bachelor of Arts and Bachelor of Science degrees are also available in Business Information Systems, Finance, Management, and Marketing. The Accountancy degree is only a Bachelor of Science.

College of Business undergraduate students have the opportunity to participate in student exchange programs around the world.

The College of Business encourages experiential learning through its Arthur Stonehill International Exchange Program, Business Solutions Group, Austin Entrepreneurship Program, Austin Family Business Program, Close to Customer (C2C) Marketing Project, student clubs, and internships.

HIGH SCHOOL PREPARATION

The following high school courses are recommended for students planning to enroll in the College of Business: English, four years; mathematics, four years; history and social studies, three years; foreign language, two years; natural science, two years. In addition, competence in microcomputer word processing, spreadsheet, and database software is recommended.

TRANSFER STUDENTS

Students planning to transfer into the College of Business should do so as early as possible. Those planning to transfer from a community college should consult with an advisor at the community college to determine the most appropriate courses to complete prior to transfer. An advisor in the College of Business should also be contacted for advice.

ADVISING AND EXPERIENTIAL LEARNING

The College of Business has experienced advisors available to assist students in all academic matters, as well as in the areas of career choice, internships, and other experiential learning opportunities. The resources of the **Career Services office** and College of Business Career Success Center (Bexell 209) are available to

all students seeking information concerning career development and interviews with visiting firms.

CONCURRENT DEGREES

Students who wish to earn an undergraduate degree from the College of Business combined with another OSU degree may enroll in a concurrent degree program. Some degrees must be completed in conjunction with a primary degree (see the International Studies major in International Programs, the Sustainability major in the Department of Forest Ecosystems and Society, or the Education major in the College of Education for more information.) The requirements for earning two degrees are listed under Earning a Degree at OSU. Students who intend to obtain one of their degrees from the College of Business should see an advisor in the College of Business as soon as possible.

MINOR PROGRAMS

The College of Business offers one transcript-visible minor for students majoring in other disciplines. The Business and Entrepreneurship minor allows students to enhance their skills in areas such as marketing, management, finance, and entrepreneurship. More information may be obtained from the College of Business Advising Office, 214 Bexell Hall, 541-737-3716.

THE ARTHUR STONEHILL INTERNATIONAL BUSINESS EXCHANGE PROGRAM

The College of Business administers the largest international business exchange program in the state. This opportunity allows qualified students to study abroad in one of 12 carefully selected and approved programs. Successful completion of course work enables students to earn their option in International Business through this one term of study. Current programs are available in Austria, Australia (I.B. option not available here), Czech Republic, Denmark, Germany, Hong Kong, Netherlands, Norway, Singapore, Spain, Sweden and Thailand. A one-credit orientation class is required the term prior to departure, and a reflection paper is due upon return. All courses are taught in English and focus on various aspects of international finance, management and marketing.

AUSTIN ENTREPRENEURSHIP PROGRAM

Sandy Neubaum, Director

The Austin Entrepreneurship Program (AEP) at Weatherford Hall is dedicated to teaching entrepreneurship and developing entrepreneurial thinking. By combining a formal entrepreneurship curriculum with a broad range of informal curricu-

lum activities in a unique residential college facility, students live, study, work and dream together...sharing ideas, thinking creatively and learning practical life skills through hands-on experience.

AUSTIN FAMILY BUSINESS PROGRAM

Sherri Noxel, *Director*

Located within the College of Business since 1985, the Austin Family Business Program fosters family businesses through workshops, checklists, videos, academic courses, and Internet resources. The program helps business-owning families manage day-to-day operations and plan for future generations.

BUSINESS SOLUTIONS GROUP

Carrie Hertel, *Interim Director*

The Business Solutions Group (BSG) is an experiential learning program that provides product testing and custom software solutions to various business partners—including Fortune 500 companies, state agencies, and OSU departments. In a real-world environment, students hone technical and business skills including troubleshooting, networking, problem solving, object oriented programming, team work, project management, and customer relations. BSG leverages emerging technologies to solve business problems, preparing students for the business community of tomorrow. Paid student positions include test engineer, developer, analyst, project manager, and administrative assistant. Paid internships for OSU credit are also available.

CLOSE TO THE CUSTOMER PROJECT (C2C)

Linda Lovett, *Director*

The C2C Project delivers market research to entrepreneurship students, as well as external clients, while providing experiential learning for students.

GRADUATE PROGRAM

Master of Business Administration

The MBA program is an accelerated management program with an experiential component and an emphasis on innovation, sustainability, technology and entrepreneurship. The program is designed to provide our graduates with the necessary skills to solve complex business problems and to successfully compete in the business marketplace. Foundation courses include such fundamentals as business law, accounting, finance, and marketing. Advanced courses explore contemporary business topics in depth, with an emphasis on sustainability, technology, entrepreneurship and innovation in the global economy. Course work is completed in tandem with the experiential component of the program, the Integrated Business Project (IBP).

With the IBP, student teams are tasked with creating fact-based, research-driven business plans for the companies of their choice. Whether developing an entrepreneurial venture from scratch or providing an established business with a new direction and growth potential, students become active in their own education. As the cornerstone of the College of Business MBA, the IBP program has a lasting impact, not only on students, but on commerce and industry in Oregon.

The MBA program is an intensive, fast-paced program designed to guide students through a rigorous foundation and core curriculum, while allowing them to pursue their interests and push their boundaries. Throughout, students learn to build teams, integrate disciplines, work under pressure and multitask. In short, the same skills they will rely on when they leave campus.

COLLEGE OF BUSINESS ACADEMIC AND PROFESSIONAL STANDARDS

The standards set forth below apply to all students enrolled in the College of Business (COB) and are in addition to those standards applicable to all students in the university. Students are responsible for satisfying these requirements.

PREREQUISITE GRADE REQUIREMENTS

A grade of C– or better is required for prerequisites for all classes offered by the College of Business. A higher grade is required in some classes as noted in the catalog.

ACADEMIC PROGRESSION STANDARDS

Academic progression standards specify the requirements a student must meet in order to graduate with a degree from the College of Business. OSU has minimum GPA standards. The College of Business (COB) has additional GPA requirements and standards. Students must satisfy both OSU and COB standards to earn their business degree.

The COB Progression Standards require that students:

- Achieve a minimum grade of C– or better in all classes used to complete their business degree program.

- Maintain a minimum 2.5 GPA over all course work completed within their business degree program.
- Complete over fifty percent of the business program and discipline course work at OSU.
- Resolve all incomplete (I) grades in any classes within the business degree program within one year, or prior to graduation, whichever occurs first.
- Make satisfactory progress toward the completion of the business degree program in a timely fashion.

The business degree program includes all COB classes (BA/ACTG) taken for major and elective credit and non-BA classes that are part of the degree requirements (see table below). Any course used to satisfy business degree requirements must be taken using the A–F grade mode. The Satisfactory/Unsatisfactory (S/U) grade basis may not be used. If a course is completed with the S/U grade basis prior to declaring the business degree program, the original earned grade (A–F) will be used to compute progression standard GPAs.

Transfer grades in business degree program classes may be used to satisfy course work requirements but are not used in the overall COB GPA calculation used to determine graduation. They are, however, used in the All Inclusive Business GPA. Thus, if a course is completed at OSU and must be repeated to earn a higher grade, then the course must be repeated at OSU for the grade to be included in the GPA calculation.

Lower-division classes (100–200 level) completed at any accredited college or university with a grade of C– or higher may be used to satisfy pre-business core requirements, but will not be included in the overall COB GPA calculation. These transfer courses will be used in the All Inclusive Business GPA.

Upper-division classes (300-level and above) completed with a grade of C– or higher at school(s) accredited by the Association to Advance Collegiate Schools of Business may be used to satisfy upper-division business core and discipline-specific course work requirements, but will not be included in the overall COB GPA calculation. These transfer courses will be used in the All-Inclusive Business GPA.

Progression Group	BA Classes	Non-BA Class
Pre-Business Core	BA 101, BA 211, BA 213, BA 233, BA 260, BA 276, BA 302	WR 222/323/327, MTH 241, MTH 245, COMM 111 or COMM 114, ECON 201, ECON 202
Upper-Division Business Core	BA 333, BA/FIN 340 or BA 360, BA 347, BA 352, BA 353, BA 357, BA 370 or ACTG 378, BA 376, BA 390, BA 466	
Discipline-Specific Course Work	All BA/ACTG courses completed as part of the business degree	ECON 330, ECON 340 (Finance Discipline)

Guiding Professional Standards for the College of Business Community

As a member of the College of Business community you should strive to:

- treat others with honesty, respect, and courtesy;
- maintain the highest levels of academic integrity;
- act in accordance with ethical and social responsibilities;
- foster a professional learning environment; and
- act in a professional manner.

You are also expected to comply with the law as well as all university regulations and policies that apply to you. Those university policies include, but are not limited to, the University Student Conduct Regulations, the university's Discrimination and Harassment Policies and the university's Policy on Acceptable Use of Computing Resources. Failure to comply with these laws, regulations, and policies may result in the pursuit of disciplinary action by the college, as detailed further below.

General Statement on Professional Conduct and Academic Integrity

The Guiding Professional Standards for the College of Business community, subscribed to by all members of the College of Business community, are intended to support and implement the values held by the college. Those values encompass the pursuit of excellence in teaching, learning and scholarship. All members of the College of Business community accept our responsibility to strive to meet those standards and to act in an ethically proper manner in our dealings with others. We dedicate ourselves to create and nurture a culture of innovation, cooperation, diversity and mutual respect within the College of Business while recognizing and pursuing the social responsibilities imposed by these values.

A reputation for personal integrity is valuable in the business and broader world. A good reputation is created through personal behavior and performance over time that is observed by friends, colleagues, and business associates, both superiors and subordinates.

The students, faculty, administrators and staff of the College of Business are committed to fostering and creating a positive, professional learning environment. These goals will be pursued by conduct that is honest, civil, courteous and responsible.

Academic and Disciplinary Procedures

The College of Business Academic and Disciplinary Procedures govern the college's response to a student's failure to progress adequately academically in the college or a violation of the law or university regulations and policies that apply to the student, including the Guid-

ing Professional Standards of the college, the university Student Conduct Regulations, the university's Discrimination and Harassment Policies, or the university's Policy on Acceptable Use of Computing Resources. As is the case for all students, College of Business students are also subject to the university's Student Conduct Regulations and the procedures for enforcement of those regulations.

A failure by the student to progress adequately academically or a violation by the student of the Guiding Professional Standards of the college, the university Student Conduct Regulations, the university's Policy on Discrimination and Harassment, or the university's Policy on Acceptable Use of Computing Resources may result in the pursuit of one or more of the actions detailed below, including dismissal of the student from the college. The college will notify a student against whom it pursues such action with information about the effect of the action on the student's status in the college and information regarding how the student may respond to or appeal the action.

A student against whom the college pursues such action will be issued one of the following notices, depending on the student's academic status or the severity or frequency of the behavior resulting in the action:

Warning Notice

"Warning" status is cautionary and is issued for one or more of the following academic reasons:

- Earning a 'D' or 'F' grade in a business program class.
- A small deviation below the minimum 2.5 business GPA.
- Failure to complete business course work in a timely fashion.

A "Warning" may also be issued to identify student behavior which may place a student's enrollment status in the college at risk. The warning status may be removed following satisfactory resolution of behavioral concerns, as determined by the college.

Probation Notice

If a student has larger deviations from the COB progression standards than those defined for a warning, or if the student continues to be out of compliance with any of the COB academic progression standards following a Warning, the student may be placed on probation and may be required to take specific action to correct the problem(s).

Student behavior that is a significant departure from the law or university regulations and policies that apply to the student, including the Guiding Professional Standards of the college, the university Student Conduct Regulations, the university's Discrimination and Harassment Policies, or the university's Policy on Acceptable Use of Computing

Resources may also result in "Probation" status. Such behavior includes, but is not limited to, academic dishonesty, criminal violations, repeated or intentional violation of university policies, or significant breaches of the Guiding Professional Standards of the college, the university Student Conduct Regulations, the university's Policy on Discrimination and Harassment or the university's Policy on Acceptable Use of Computing Resources. Detailed information on university policies can be found at the Student Conduct website at <http://oregonstate.edu/studentconduct/home/>.

A student on probation status must follow recommendations of the college in order to avoid suspension or dismissal. Students on probation status must meet with an advisor following each term to review their progress and standing in the college until the probation status is removed. Students who successfully fulfill the recommendations will be removed from probation status. Students who fail to follow or are unsuccessful in fulfilling the recommendations will be placed on suspension and evaluated for dismissal from the college.

Probation may also be continued if a student is still out of compliance with academic or behavioral requirements but is taking steps to correct the problem(s) identified.

Suspension Notice

A student who has displayed severe or repeated departures from the law or university regulations and policies that apply to the student, including the Guiding Professional Standards of the college, the university Student Conduct Regulations, the university's Discrimination and Harassment Policies, or the university's Policy on Acceptable Use of Computing Resources may be placed on suspension status. The college will place an indefinite hold on the progression of a student placed on suspension status until the college can adequately evaluate whether the student will be allowed to continue in the college.

Students engaged in an appeal of their dismissal from the college will also be placed on suspension status.

A student may also be placed on suspension if a student does not take steps to become compliant with the college's academic progression standards (such as retaking a class the student has failed), or the student is not making adequate progress in correcting the student's academic problems.

A student placed on suspension status will not be allowed to progress in the college. The student must wait a minimum of one term before reapplying for admission to the college and must submit applications in accordance with published guidelines and deadlines. Following

reapplication, the college will review the student's record, including any interim proof of progress. After review, the college may recommend immediate dismissal from the college, recommend that the student be continued on suspension status pending receipt of additional information, or prescribe a plan to address specific concerns that resulted in the student's suspension status. If a plan for progression is developed by the college, the student will be placed on probation status pending satisfactory progress.

If the student was placed on suspension for academic reasons and qualifies for readmission, the student must start in Pre-Business and reapply to ProSchool. If, after readmission, the college's or the university's academic standards or requirements have changed since the student was last a business major, the student will be subject to the more recent standards or requirements.

Dismissal from the College

A student will be dismissed from the college if the student's behavior is a sufficiently severe and significant departure from the law or university regulations and policies that apply to the student, including the Guiding Professional Standards of the college, the university Student Conduct Regulations, the university's Discrimination and Harassment Policies, or the university's Policy on Acceptable Use of Computing Resources or the student fails to constructively address previous behavioral concerns after college action. A student may also be dismissed if the student departs significantly from the college's academic progression standards or if the student fails to follow adequately any plan prescribed while the student is on probation status.

Appeal of Academic or Disciplinary Status

1. Any student who wishes to challenge the student's academic or disciplinary status at the college must submit an appeal in writing to the dean of the college within seven (7) calendar days following the issuance of a notice from the college identifying the student's status. The dean may refer the issue back to the college's standing committee for review, if warranted. Following the review, the dean will notify the affected student of his or her decision by mail or email.
2. The student may appeal the dean's decision to the Oregon State University provost in writing within seven (7) calendar days following issuance of a decision by the dean. The provost's decision on the appeal is the university's final decision.

Minor

Merchandising Management

Graduate Major

Design and Human Environment (MA, MAIS, MS, PhD)

Graduate Areas of Concentration

Cultural/historic aspects of the near environment, design in the near environment, human behavior in the near environment, merchandising management, and textiles

Graduate Minor

Design and Human Environment

The School of Design and Human Environment offers undergraduate instruction in the areas of apparel design, interiors/residential design, housing studies, graphic design, and merchandising management. Advanced courses prepare students for positions in retailing of apparel and textile products, design and development of sewn products for manufacturers and retailers, housing design and policy, design of commercial and residential environments, graphic design and visual communications, and for graduate work leading to research and college and university teaching.

GRADUATE STUDIES

The school offers the MS, MA, MAIS, and PhD degrees. Areas of emphasis for the MS and MA degrees include cultural/historic aspects of the near environment, human behavior and the near environ-

ment, design in the near environment, merchandising management and textiles. Areas of emphasis for the PhD degree include cultural/historic aspects of the near environment, design in the near environment, and human behavior and the near environment.

PRE-PROFESSIONAL STUDIES ADMISSION REQUIREMENTS

To be considered for admission to the professional majors of Apparel Design, Graphic Design, and Interior Design (Interior Design option and Housing Studies option), a student must earn a minimum GPA and complete a list of designated courses. Application information is available in the College of Business Advising and Services Office in Bexell Hall 214.

APPAREL DESIGN (BS, CRED, HBS)

The apparel design program prepares students to work in the diverse field of design. Apparel design and product development professionals design sportswear, suits, dresses, coats, accessories, and just about everything else that people wear. Designers research color and style trends to create concepts and sketches for fashions one to two years in advance of the market. Some create new garment styles while others adapt styles from a previous season.

The Apparel Design major is a professional program (major code 400). Entering students are designated as Pre-Apparel Design majors (major code 453). After completing at least 40 credits, students apply for acceptance into the professional program. Students will not be permitted to take Apparel Design professional course work without acceptance into the professional program. To be considered for admission into the Professional Apparel Design program, all Pre-Apparel Design students must meet the following requirements:

- Declared as Pre-Apparel Design major prior to applying to the professional program.
- A 2.5 cumulative OSU GPA.
- Completed and received a C– or better in all Pre-Apparel Design Core courses. No more than one of the core courses may be in-progress at the time of application and acceptance; acceptance is provisionally granted based on completion of the course.
- Completed at least 40 credits of course work before the first term of the professional program. (Transfer credits: maximum of 30 credits transferred from accredited institution.)

Baccalaureate Core (48)

Courses may include BCC courses in the pre-professional core and professional core.

GRAPHIC DESIGN (BFA, HBFA)

The Bachelor of Fine Arts degree in Graphic Design (GD) is an exciting and rigorous program at OSU. The disciplinary foundations of graphic design are rooted in visual problem solving, design theory and history, as well as professional practices that tie into business and marketing for specific audiences. Examples of the work graphic designers engage in include both printed and electronic media such as the design of:

- branding and visual identities
- publication design (magazines, newspapers, catalogs)
- information design
- package design
- exhibition design
- interactive design (Web, video)

The discipline of graphic design is constantly changing due to new technologies, broader target audiences, and softer boundaries between disciplines. Students learn to be adaptable, flexible and collaborative in how they work. Graphic designers are very creative and often have strengths and interests in drawing, printmaking and photography. Students are encouraged to work both on and off the computer in realizing their final design solutions.

All students entering the BFA degree in Graphic Design must begin as a Pre-Graphic Design major (major code 479). Admission to the Professional Graphic Design major comes at the end of the freshman year, following a year of pre-professional design foundation courses. The program is extremely competitive. There are 25 students chosen each spring for admittance into the professional cohort. It is important to work closely with the SDHE advisor to ensure you are taking the appropriate pre-graphic design courses.

Students must receive a C- or better in courses for the major.

Freshman Year-Foundation Courses

ART 121. Foundations: Computers in Visual Arts (3)

ART 122. Foundations: 4-D (4)
 ART 131. Foundations: Drawing 1 (4)
 DHE 121. Computer Design for Apparel (3)
 DHE 160. Design Perspectives (4)
 DHE 161. Design Explorations (4)
 DHE 162. Design Collaborations (4)

Pre-Professional Portfolio Review

(Admission to Graphic Design program determined end of fall term sophomore year.)

GD 225. Introduction to Graphic Design (4)

Sophomore Year-Professional Graphic Design

ART 204. *Introduction to Art History-Western (3)
 ART 205. *Introduction to Art History-Western (3)
 ART 206. *Introduction to Art History-Western (3)
 ART 261. Photography I (4)
 or ART 263. Digital Photography (4)
 GD 226. Typography: The Letter (4)
 GD 228. Graphic Design Processes (4)

Junior Year

ART 366. History of Art (3)
 ART 367. *History of Design (3)
 GD 325. Graphic Design: Collaborative Processes (4)
 GD 326. Typography: Expressive (4)
 GD 327. Typography: Adv. Structures (4)
 GD 328. New Media (4)
 GD 369. Graphic Design History (3)

Senior Year

GD 412. ^Contemporary Issues in Design (3)
 GD 420. Graphic Design: Pre-Press (4)
 GD 424. Visual Identity Systems (4)
 GD 428. Senior Thesis Project (4)

Electives: Select 2 of the following: (Not all are offered each year.)

GD 419. Portfolio Review (2)
 GD 421. Information and Publication Design (4)
 GD 422. New Media: Interactive (4)
 GD 423. Experimental Typography (4)
 GD 427. Package Design (4)
 GD 429. Graphic Design Studio (4)
 ANTH, ART, BA, CS, DHE, GD, MGMT, MRKT, NMC, PHL, PSY, SOC, WR Electives (27-29)
 (At least 12 credits should be upper division.)

Credits needed to graduate with a BFA in Graphic Design = 180**Upper-Division Credits Required: 60****INTERIOR DESIGN (BS, CRED, HBS)**

The Interior Design major prepares students for careers in commercial and residential interior design with an emphasis on space planning, lighting design, interior construction and documentation planning, business planning, and textile specification.

The Interior Design major is a professional program. Entering students are designated as pre-professional majors. After completing at least 40 credits, students apply for acceptance into the professional program.

New applicants are not being accepted into the Housing Studies option.

Baccalaureate Core (48)

Courses may include BCC courses in the pre-professional core, professional core, support courses, and emphasis area courses.

Pre-Interior Design Core (32)

BI 101. *General Biology (4)
or BI 102. *General Biology (4)
or BI 103. *General Biology (4)
COMM 111. *Public Speaking (3)

MERCHANDISING MANAGEMENT (BS, CRED, HBS)

Students in the Merchandising Management program prepare for positions in management, merchandising, inventory control, sales promotion, public relations, or human resources. This field offers a wide variety of career opportunities with retailers, manufacturers, marketing research firms and product information services. In a global, diverse, and fast-paced, competitive environment, merchandisers are involved in market analysis, product planning, sourcing, procurement, pricing, distribution and visual presentation of apparel and textile products to satisfy consumer needs.

The Merchandising Management major is a professional program (major code 416). Entering students are designated as Pre-Merchandising Management majors (major code 277). After completing at least 40 credits, students apply for acceptance into the professional program. Students will not be permitted to take Merchandise Management professional course work without acceptance into the professional program. To be considered for admission into the Professional Merchandising Management program, all Pre-Merchandising Management students must meet the following requirements:

- Declared as Pre-Merchandising Management prior to applying to the professional program.
- A 2.5 cumulative OSU GPA.
- Completed and received a C– or better in all Pre-Merchandising Management Core courses. No more than one of the core courses may be in-progress at the time of application and acceptance; acceptance is provisionally granted based on completion of the course.
- Completed at least 40 credits of course work before the first term of the professional program. (Transfer credits: maximum of 30 credits transferred from accredited institution.)

Baccalaureate Core (48)

Courses may include BCC courses in the pre-professional core, professional core, support courses, and emphasis area courses.

Pre-Merchandising Management Core

COMM 111. *Public Speaking (3)
or COMM 114. *Argument and Critical Discourse (3)

* Baccalaureate Core Course
^ Writing Intensive Course (WIC)

MERCHANDISING MANAGEMENT MINOR

The Merchandising Management minor emphasizes the merchandising of textile products such as apparel, outdoor gear, and home furnishings.

BA 215 or equivalent, BA 390, and ECON 201, ECON 202 are prerequisites for upper-division courses in the minor.

Core courses (28)

All courses must be taken on a graded (A–F) basis.

DHE 255. Textiles (5)
DHE 255. Textiles (5)
DHE 270. *Appearance, Power and Society (DPD) (4)
DHE 271. Introduction to Retail Buying (3)
DHE 277. Fashion Trend Analysis (3)
DHE 326. Sewn Product Development (5)
DHE 370. ^Textile and Apparel Market Analysis (4)
DHE 470. Retail Merchandising (4)

Select a minimum of 8 credits from the following:

DHE 366. Cross Cultural Aspects of the Near Environment (4)
DHE 461. History of the Near Environment (4)
DHE 462. *History of the Near Environment II (STS) (4)
DHE 463. History of Contemporary Fashion (4)
DHE 472. Merchandise Planning and Control (4)
DHE 473. Assortment Analysis and Management (4)
DHE 475. Global Production and Trade in Textiles and Apparel (4)

Total=36**DESIGN AND HUMAN ENVIRONMENT (MA, MS, PhD)****Graduate Areas of Concentration**

Cultural/historic aspects of the near environment, design in the near environment, human behavior in the near environment, merchandising management, and textiles

The School of Design and Human Environment offers graduate work leading toward Master of Science, Master of Arts, and Doctor of Philosophy degrees in Design and Human Environment.

Areas of concentration for MS and MA degrees include human behavior in the near environment, cultural and historic

aspects of the near environment, design in the near environment, merchandising management, and textiles.

Areas of concentration for the PhD degree include cultural/historic aspects of the near environment, design in the near environment, human behavior in the near environment, merchandising management, and textiles.

Graduate programs in DHE prepare students for college and university teaching, research and creative scholarship; careers in design, product development, product quality assurance or merchandising; historic/cultural research, collection management, and preservation of textile and architectural artifacts; and public policy.

Research is a central component of the DHE graduate program. Students have an opportunity to work on research and creative scholarships with internationally recognized faculty members who have published in the areas of historic costume, human behavior and the near environment, apparel design, interior design, fashion theory, consumer behavior, and housing.

Students who apply for admission to the program must submit GRE scores, a one-page statement of professional goals including a time schedule for completion of the degree as well as the program and area of concentration they wish to pursue, and three letters of reference. Students are encouraged to begin graduate study fall term. Completion of the degree in summers only is not possible because of course offerings.

For further information, contact Laura Scott, laura.scott@bus.oregonstate.edu, School of Design and Human Environment, Oregon State University, Corvallis, OR 97331-5101

DESIGN AND HUMAN ENVIRONMENT GRADUATE MINOR

For more details, see the school advisor.

■ DESIGN AND HUMAN ENVIRONMENT COURSES

DHE 121. COMPUTER DESIGN FOR APPAREL (3). Instruction in drawing, editing, and layout techniques using Adobe Illustrator and Photoshop. Studio.

DHE 160. DESIGN PERSPECTIVES (4). Overview of how design reflects and shapes social, cultural, and temporal values and contexts across many different areas of design specialization. Areas to be explored include design processes, principles, and problem solving.

DHE 161. DESIGN EXPLORATIONS (4). Introduction to principles and theories of design through interactive development and making of project work. Topics include basic design terminology, design principles, and materiality. Lec/studio. **PREREQS:** DHE 160

DHE 162. DESIGN COLLABORATIONS (4). Basic principles of collaborative teamwork within a design context. Team-oriented design project is the focus of this course. **PREREQS:** DHE 161

DHE 170. INTRODUCTION TO THE TEXTILE AND APPAREL INDUSTRY (4). Overview of industry sectors involved in the planning, creation, production, merchandising, distribution, and consumption of textile, apparel, and related products. Overview of various career options within the industry.

DHE 180. INTRODUCTION TO SINGLE FAMILY HOUSING (3). Critical examination of single family housing. Considers space planning fundamentals. Introduces construction principles and methods. Develops a working knowledge of methods used to communicate architectural ideas.

DHE 182. COMPUTER ASSISTED DESIGN AND DRAFTING (3). Instruction in computer assisted design and drafting techniques. **PREREQS:** Enrollment restricted to pre-interiors, pre-housing, and merchandising management majors.

DHE 187. INTRODUCTION TO DESIGN COMMUNICATION (1-3). Fundamentals of design communication including drafting, lettering, illustrative sketching, perspective, and orthographic projections. Lec/studio. **PREREQS:** DHE 180 and enrollment restricted to pre-interiors, pre-housing, and merchandising management majors.

DHE 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

DHE 227. APPAREL CONSTRUCTION (3). Construction techniques and processes used to produce apparel. Analysis of apparel construction related to equipment, cost, quality, end use and customer needs.

DHE 240. SURVEY OF DESIGN IN THE NEAR ENVIRONMENT (3). Introduction to theories of aesthetics and elements and principles of design as related to the fields of apparel, interiors, housing, and merchandising.

DHE 245. APPLICATIONS OF DESIGN THEORY (5). Examines theories of design and aesthetics, application of the elements and principles of design related to apparel, housing, and interior design. Lec/studio. **PREREQS:** Enrollment restricted to pre-interiors, pre-housing and pre-apparel majors.

DHE 255. TEXTILES (5). Properties, identification, selection, use and care of textile fibers and fabrics. Analysis of fiber, yarn, fabric construction, color and finish in textiles. Lec/lab. **PREREQS:** Enrollment restricted to apparel design, merchandising management, pre-interiors, and interior design majors and minors.

DHE 270. *APPEARANCE, POWER AND SOCIETY (4). Survey of the cultural, sociological, psychological, economic, and aesthetic influences on appearance and power. (Bacc Core Course)

DHE 271. INTRODUCTION TO RETAIL BUYING (3). Introduction to soft goods retailing with a focus on the role of the retail buyer. Fundamental retailing and merchandising concepts, sustainable and socially responsible decision-making related to retail buying, basic merchandising mathematics, and Excel skill development. Lec/lab.

DHE 277. FASHION TREND ANALYSIS (3). The fashion trend forecasting process within the soft goods industry; use of information sources and trend analysis in developing and promoting a fashion product. **PREREQS:** Enrollment restricted to merchandising management, pre-apparel and apparel design majors.

DHE 283. BUILDING CONSTRUCTION AND MATERIALS (3). Introduction to the manufacture, characteristics and use of construction materials used in contract and residential construction, including environmentally friendly materials. **PREREQS:** Enrollment restricted to students who have been admitted into the DHE interior design professional program.

DHE 287. STUDIO I: DESIGN COMMUNICATION (4). Design communication through electronic media: 2D and 3D visualizations and

presentations of interior space. Lec/studio. **PREREQS:** DHE 187 and enrollment restricted to housing studies and interior design majors.

DHE 288. ENVIRONMENTAL BUILDING SYSTEMS (3). Lighting, heating, ventilating, air conditioning, and acoustical systems in residential and commercial buildings. Includes sustainable building principles. **PREREQS:** (DHE 283 and DHE 287) and enrollment restricted to housing studies and interior design majors.

DHE 289. STUDIO II: RESIDENTIAL SPACE PLANNING (4). Utilization of space planning principles in the design of residences. Includes rendering, perspective drawing, graphic communication techniques, and model building. **PREREQS:** DHE 287 and enrollment restricted to housing studies and interior design majors.

DHE 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

DHE 300. FIELD EXPERIENCE ORIENTATION AND DEVELOPMENT (1-2). Exploration of career choices, goals, and field experience opportunities; preparation in planning, obtaining, and completing an internship. Graded P/N. Section 1: Apparel Design. Section 2: Interior Design and Housing Studies. Section 3: Merchandising Management. Section 4: Graphic Design. This course is repeatable for a maximum of 3 credits.

DHE 321. TECHNICAL DRAWING, ILLUSTRATION AND FASHION DESIGN (4). Techniques in technical drawing and fashion illustration; use of computer-aided design applications in the design of apparel. **PREREQS:** (DHE 245 and DHE 277) and enrollment restricted to apparel design majors.

DHE 326. SEWN PRODUCT DEVELOPMENT (5). Materials, assembly process, quality factors, and costs in the development of sewn textile products; consideration of consumer product expectations and intended end-use. Lec/lab. **PREREQS:** (DHE 250* or DHE 255*) and enrollment restricted to merchandising management, pre-apparel, and apparel design majors.

DHE 327. FLAT PATTERN DESIGN (4). Pattern design using the flat pattern method; manual and computerized pattern drafting, development and construction of design prototypes. **PREREQS:** DHE 321 and enrollment restricted to apparel design majors.

DHE 328. COMPUTER-AIDED PATTERN DEVELOPMENT (3). Computer-aided flat pattern, grading and marker techniques using pattern development software. **PREREQS:** DHE 327 or previous flat pattern experience.

DHE 331. CONTEMPORARY ISSUES IN HOUSING (3). Introduction to housing as a product, environment, service and process. Emphasizes housing issues that have impact upon the well-being of individuals, families and communities.

DHE 352. TEXTILES FOR INTERIORS (4). Types, qualities, and maintenance of functional and decorative fabrics for homes and public buildings. Use of specifications, standards, and legislation. **PREREQS:** DHE 255 and enrollment restricted to merchandising management and interior design majors.

DHE 366. CROSS CULTURAL ASPECTS OF THE NEAR ENVIRONMENT (4). Sociocultural study of the function and design of clothing, housing, interiors, and textiles. Cultural diversity; impact of cross-cultural contact; ethnicity.

DHE 370. ^TEXTILE AND APPAREL MARKET ANALYSIS (4). Organization, operation, and merchandising activities of the domestic textile and apparel industries. Analysis of the marketing process and the product/service mix of textile and apparel manufacturers. (Writing Intensive Course) **PREREQS:** DHE 277* and BA 390 is recommended. Enrollment restricted to merchandising management, pre-apparel, and apparel design majors.

DHE 387. STUDIO III: ADVANCED DESIGN COMMUNICATION (4). Development of illustrative sketching, perspective drawing, concept model construction, and presentation materials.

PREREQS: DHE 289 and enrollment restricted to housing studies and interior design majors.

DHE 389. STUDIO IV: KITCHEN AND BATH DESIGN (4). Kitchen and bath planning in compliance with building codes and industry standards, with emphasis on resource conservation, safety, and special needs. This course utilizes both CAD and hand drafting.

PREREQS: DHE 387 and enrollment restricted to housing studies and interior design majors.

DHE 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

DHE 400. FIELD EXPERIENCE ORIENTATION AND DEVELOPMENT (1). Exploration of career choices, goals, and field experience opportunities; preparation in planning, obtaining, and completing an internship. Graded P/N. Section 1: Apparel Design. Section 2: Interior Design and Housing Studies. Section 3: Merchandising Management. This course is repeatable for a maximum of 3 credits.

DHE 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

DHE 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

DHE 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 410. FIELD EXPERIENCE (6-12). Integration and application of academic preparation in an on-the-job work situation with supervision by personnel at the participating site and university faculty. Application must be made prior to participation. Section 1: Merchandising Management (12). Section 2: Interior Design (12). Section 3: Apparel Design (12). This course is repeatable for a maximum of 16 credits. **PREREQS:** DHE 400 and junior standing and departmental approval. Sect. 1: BA 215 and DHE 370. Sect. 2: DHE 289. Sect. 3: DHE 321.

DHE 415. RENEWABLE MATERIALS IN THE MODERN AGE (3). Micro-renewable materials anatomy course taught within an interdisciplinary, hands-on format. Suitable for all majors and backgrounds. Course covers the micro- and macro-anatomy of wood and other common renewable materials like bamboo and cellulose fibers. Utilizes studio-based learning. **CROSSLISTED** as WSE 415.

DHE 422. DHE FASHION SHOW AND DESIGN EXHIBITION (1-16). Special topics in design and human environment. This course is repeatable for a maximum of 16 credits.

DHE 427. DRAPING (4). Garment design based on manipulation of fabric on a body form; emphasis on the interrelationships between fabric, garment design, and the human form. **PREREQS:** (DHE 321 and DHE 327) and enrollment restricted to apparel design majors.

DHE 428. APPAREL PRODUCTION PROCESSES (4). Production pattern-making, pattern grading, marker making, garment specifications, and cost analysis. Apparel assembly processes; analysis of equipment capabilities and production processes. **PREREQS:** DHE 327 and enrollment restricted to apparel design majors.

DHE 429. ADVANCED APPAREL DESIGN (4). Design processes and research methods used to develop apparel designs. Students will identify design problems and implement appropriate methods to develop apparel products. **PREREQS:** (DHE 321* and DHE 327* and DHE 427* and DHE 428*) and enrollment restricted to apparel design majors.

DHE 432. STUDIO V: ADVANCED HOUSING STUDIO (4). Problem-solving and design processes to meet or satisfy actual client needs; projects may range from remodeling to new construction design. Professional portfolio preparation. **PREREQS:** DHE 389 and enrollment restricted to interior design majors.

DHE 434. HOUSING THE AGING POPULATION (3). Shelter alternatives and services that address the housing needs of the aging population. Emphasis on the continuum of care and housing options.

DHE 435. HOUSING POLICY (3). Analysis of local, state, and federal housing and community development policies and programs that address the housing issues and needs of individuals, families, and communities.

DHE 436. REAL ESTATE FINANCE AND MANAGEMENT (5). Examines principles and practices used in the purchase, sale and management of real estate. Considers perspectives of consumers, investors, managers, and lenders.

DHE 443. STUDIO VI: COMMERCIAL DESIGN (4). Commercial design, space planning and specifications for facilities such as retail, hospitality, healthcare, public institutions and offices. **PREREQS:** DHE 389 and enrollment restricted to interior design majors.

DHE 445. STUDIO VII: ADVANCED COMMERCIAL DESIGN (4). Interior design project development with emphasis on design of hospitality environments. Application of knowledge of space planning, building codes, and specifications to projects. Studio work includes concept sketches, schematic drawings, contract documents, sample boards, and models. **PREREQS:** DHE 443 and enrollment restricted to interior design majors.

DHE 453. PRODUCT QUALITY ASSURANCE (4). Analysis and evaluation of textile materials and final products in relation to end use. Performance properties and serviceability testing, product specifications and industrial standards. Lec/lab. **PREREQS:** DHE 255 and DHE 326

DHE 461. HISTORY OF THE NEAR ENVIRONMENT I (4). History of clothing, furniture, interiors, textiles, and housing and building styles; primarily Euro-American, from the ancient world to the Renaissance. The influence of social and cultural factors upon design of the near environment. Need not be taken in sequence.

DHE 462. *HISTORY OF THE NEAR ENVIRONMENT II (4). History of clothing, furniture, interiors, textiles, and housing and building styles; primarily Euro-American, from the Renaissance to 1899. The influence of social and cultural factors upon design of the near environment. Need not be taken in sequence. (Bacc Core Course)

DHE 463. HISTORY OF CONTEMPORARY FASHION (4). Historic analysis of fashion change in men's and women's apparel from 1890 to the present. The influence of social and cultural factors upon Euro-American fashion. **PREREQS:** DHE 461 or DHE 462 is recommended.

DHE 464. CONTEMPORARY HISTORY OF INTERIORS AND HOUSING (3). History of housing and interior design from the mid-19th century until the present. **PREREQS:** (DHE 461 or DHE 462)

DHE 470. RETAIL MERCHANDISING (4). Organization, operation, and competitive strategies of soft goods retailers. Planning, procurement, pricing, and promotion of merchandise assortments and inventory management. **PREREQS:** DHE 370

DHE 472. MERCHANDISE PLANNING AND CONTROL (4). Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles. Lec/rec. **PREREQS:** DHE 271 and DHE 470 and (BA 215 or BA 215H) and enrollment restricted to Apparel Design and Merchandising Management majors.

DHE 473. ASSORTMENT ANALYSIS AND MANAGEMENT (4). Analysis of merchandise management processes. Use of technology, computerized databases, and simulations for assortment planning and management decision-making in manufacturing or retailing. **PREREQS:** DHE 472 and enrollment restricted to apparel design and merchandising management majors.

DHE 475. GLOBAL PRODUCTION AND TRADE IN TEXTILES AND APPAREL (4). Trade theory and the effects of trade policy, cultural values, and economics on the global production, distribution, and consumption of textile products. **PREREQS:** DHE 370 and the recommended prereqs of DHE 366 and ECON 201 and ECON 202.

DHE 481. *PROFESSIONAL PRACTICE IN HOUSING AND INTERIOR DESIGN (3). Ethical, business, and legal aspects of the design profession. Development of written documents, schedules, specifications, and other materials typical of the profession. (Writing Intensive Course) **PREREQS:** DHE 389 and enrollment restricted to housing studies and interior design majors.

DHE 490. STUDY TOUR (1-6). Planned study tour with specific professional focus. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval and advanced registration and deposit. Course prerequisites as appropriate to topic.

DHE 499. SPECIAL TOPICS IN DESIGN AND HUMAN ENVIRONMENT (1-16). This course is repeatable for a maximum of 16 credits.

DHE 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

DHE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

DHE 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

DHE 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 515. RENEWABLE MATERIALS IN THE MODERN AGE (3). Micro-renewable materials anatomy course taught within an interdisciplinary, hands-on format. Suitable for all majors and backgrounds. Course covers the micro- and macro-anatomy of wood and other common renewable materials like bamboo and cellulose fibers. Utilizes studio-based learning. **CROSSLISTED** as WSE 515.

DHE 527. DRAPING (4). Garment design based on manipulation of fabric on a body form; emphasis on the interrelationships between fabric, garment design, and the human form. **PREREQS:** DHE 321 and DHE 327

DHE 528. APPAREL PRODUCTION PROCESSES (4). Production pattern-making, pattern grading, marker making, garment specifications, and cost analysis. Apparel assembly processes; analysis of equipment capabilities and production processes. **PREREQS:** DHE 327

DHE 529. ADVANCED APPAREL DESIGN (4). Design processes and research methods used to develop apparel designs. Students will identify design problems and implement appropriate methods to develop apparel products. Lec/studio. **PREREQS:** DHE 327 and DHE 427 and DHE 428 are recommended and may be taken concurrently.

DHE 532. STUDIO V: ADVANCED HOUSING STUDIO (4). Problem-solving and design processes to meet or satisfy actual client needs; projects may range from remodeling to new construction design. Professional portfolio preparation. **PREREQS:** DHE 389

DHE 534. HOUSING THE AGING POPULATION (3). Shelter alternatives and services that address the housing needs of the aging population. Emphasis on the continuum of care and housing options.

DHE 535. HOUSING POLICY (3). Analysis of local, state, and federal housing and community development policies and programs that address the housing issues and needs of individuals, families, and communities.

DHE 536. REAL ESTATE FINANCE AND MANAGEMENT (5). Examines principles and practices used in the purchase, sale and management of real estate. Considers perspectives of consumers, investors, managers, and lenders.

DHE 543. STUDIO VI: COMMERCIAL DESIGN (4). Commercial design, space planning and specifications for facilities such as retail, hospitality, healthcare, public institutions and offices. Includes preparation of a professional portfolio. **PREREQS:** DHE 389

DHE 545. STUDIO VII: ADVANCED COMMERCIAL DESIGN (4). Interior design project development with emphasis on design of hospitality environments. Application of knowledge of space planning, building codes, and specifications to projects. Studio work includes concept sketches, schematic drawings, contract documents, sample boards, and models. **PREREQS:** DHE 443

DHE 553. PRODUCT QUALITY ASSURANCE (4). Analysis and evaluation of textile materials and final products in relation to end use. Performance properties and serviceability testing, product specifications and industrial standards. Lec/lab. **PREREQS:** DHE 255 and DHE 326

DHE 555. FUNCTIONAL TEXTILES (3). Development of functional textiles, functional textiles principles, production, evolution, and performance. Applications of functional textiles in areas such as sports and recreation, medical, protective gear, transportation, etc.

DHE 561. HISTORY OF THE NEAR ENVIRONMENT I (4). History of clothing, furniture, interiors, textiles, and housing and building styles; primarily Euro-American, from the

ancient world to the Renaissance. The influence of social and cultural factors upon design of the near environment. Need not be taken in sequence.

DHE 562. HISTORY OF THE NEAR ENVIRONMENT II (4). History of clothing, furniture, interiors, textiles, and housing and building styles; primarily Euro-American, from the Renaissance to 1899. The influence of social and cultural factors upon design of the near environment. Need not be taken in sequence.

DHE 563. HISTORY OF CONTEMPORARY FASHION (4). Historic analysis of fashion change in men's and women's apparel from 1890 to the present. The influence of social and cultural factors upon Euro-American fashion.

DHE 564. CONTEMPORARY HISTORY OF INTERIORS AND HOUSING (3). History of housing and interior design from the mid-19th century until the present.

DHE 566. RESEARCH IN THE CROSS CULTURAL ASPECTS OF THE NEAR ENVIRONMENT (3). Examines the research methods used to study the cultural aspects of the near environment. Case studies concerning cultural variation in the design and use of fabric, clothing and adornment, housing.

DHE 570. RETAIL MERCHANDISING (4). Organization, operation, and competitive strategies of soft goods retailers. Planning, procurement, pricing, and promotion of merchandise assortments and inventory management.

DHE 572. MERCHANDISE PLANNING AND CONTROL (4). Quantitative analysis of inventory planning, pricing, and control for the profitable management of soft goods; analysis of management problems using quantitative data and merchandising principles. **PREREQS:** DHE 570* and BA 215

DHE 573. ASSORTMENT ANALYSIS AND MANAGEMENT (4). Analysis of merchandise management processes. Use of technology, computerized databases, and simulations for assortment planning and management decision-making in manufacturing or retailing. **PREREQS:** DHE 572

DHE 575. GLOBAL PRODUCTION AND TRADE IN TEXTILES AND APPAREL (4). Trade theory and the effects of trade policy, cultural values, and economics on the global production, distribution, and consumption of textile products.

DHE 577. FASHION THEORY (4). Examination of historical, sociological, psychological, marketing, and economic concepts, theories, and research that contribute to current understanding of the fashion process.

DHE 582. AESTHETIC AND PERCEPTUAL THEORIES OF THE NEAR ENVIRONMENT (2). Aesthetic aspects from the philosophical and theoretical bases formulated in art, art history, and psychology as applied to the near environment.

DHE 585. HUMAN BEHAVIOR AND THE NEAR ENVIRONMENT (3). Application of concepts and theories from cultural anthropology, sociology, psychology, and social psychology to the study of clothing and interiors. The significance of the near environment in the dynamics of social interaction.

DHE 587. TRENDS AND ISSUES IN MERCHANDISING (3). Theoretical approach to the study of merchandising policies and practices. Management issues related to strategic planning, competitive positioning, and operational problems of textile and apparel businesses. This course is repeatable for a maximum of 6 credits.

DHE 588. THEORIES IN HOUSING (3). Basic and applied theories developed and used in the field of housing are analyzed, using a conceptual framework that includes contributions from root disciplines related to housing.

DHE 594. RESEARCH METHODS IN DESIGN AND HUMAN ENVIRONMENT (3). Introduction to theory and research design in Design and Human Environment. Includes sampling, measurement, data collection (both qualitative and quantitative) and data analysis.

DHE 599. SPECIAL TOPICS IN DESIGN AND HUMAN ENVIRONMENT (1-16). This course is repeatable for a maximum of 16 credits.

DHE 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 602. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

DHE 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

DHE 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

DHE 609. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 610. INTERNSHIP/WORK EXPERIENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

DHE 665. HISTORIC/CULTURAL THEORIES & METHODS OF THE NEAR ENVIRONMENT (3). Critical analysis of historical and cultural paradigms, theories, and research methods.

DHE 685. ADVANCED TOPICS IN HUMAN BEHAVIOR AND THE NEAR ENVIRONMENT (3). Critical evaluation of the current literature on human behavior as it relates to aspects of the near environment (clothing, interiors, housing). Latest theoretical developments and research methods. Content varies with each offering. **PREREQS:** DHE 585 or equivalent with a minimum grade of at least C-

DHE 690. THEORY DEVELOPMENT (3). Critical analysis of scientific explanation, research, theory, and paradigms. Focus on theory development, particularly within the area of the near environment.

■ GRAPHIC DESIGN COURSES

GD 126. GRAPHIC DESIGN PRO APPLICATION (1). Required pre-graphic design course. Course will focus on the development of a final portfolio to be reviewed by the graphic design faculty at the end of the spring term. **PREREQS:** GD 160 and GD 161 and ART 120 and ART 122 and ART 131 and DHE 121

GD 226. TYPOGRAPHY: THE LETTER (4). An introductory course in the study of the letterform, focusing on the exploration of formal and conceptual relationships. **PREREQS:** (GD 225 or ART 225) and acceptance into BFA in Graphic Design program.

GD 228. GRAPHIC DESIGN PROCESSES (4). An introductory overview of the pertinent theory, history, and application of graphic design processes with an emphasis on conceptualization and visual diagramming. **PREREQS:** (GD 225 or ART 225) and acceptance into the BFA in Graphic Design program.

GD 325. GRAPHIC DESIGN: COLLABORATIVE PROCESSES (4). Intermediate course in graphic design. Emphasis on collaborative projects

exploring principles of group problem solving in typography. **PREREQS:** sophomore block in graphic design.

GD 326. TYPOGRAPHY: EXPRESSIVE (4). An intermediate course encouraging investigation and interpretation in the expressive possibilities of typography, focusing on processes and emotive results. Lec/studio. **PREREQS:** ((GD 225 or ART 225) and (GD 228 or ART 228)) and must be accepted into the graphic design program.

GD 327. TYPOGRAPHY: ADVANCED STRUCTURES (4). An intermediate course investigating the design of organizational typographic structures; presenting complex information in a clear and engaging manner serving utility and beauty. **PREREQS:** sophomore block in graphic design.

GD 328. NEW MEDIA (4). An intermediate course designing digital informational systems; focusing on conceptualization, diagramming, motion, and user-interaction. **PREREQS:** sophomore block in graphic design.

GD 369. GRAPHIC DESIGN HISTORY (3). An intermediate lecture course providing a historical and theoretical overview of the evolution and innovation in graphic design. **PREREQS:** ART 204 and ART 205 and ART 206 and ART 367

GD 412. ^CONTEMPORARY ISSUES IN DESIGN (3). How contemporary culture shapes the practice of graphic design and how design shapes the culture in which we live. Issues examined through lectures, readings, discussion and writing. (Writing Intensive Course)

GD 419. PORTFOLIO REVIEW (2). A course to advise students during their final portfolio preparation. The objective is to complete the portfolio and hone presentation skills and techniques. Graded P/N. **PREREQS:** junior block in graphic design.

GD 420. GRAPHIC DESIGN: PRE-PRESS (4). The fundamentals of graphic design production, including printing paper specification. **PREREQS:** junior block in graphic design.

GD 421. INFORMATION AND PUBLICATION DESIGN (4). Theoretical and historical issues of organizing and visualizing statistics, numbers, and/or complex relationships. Emphasis on conceptualization, visual diagramming, and analysis of subtle visual relationships. **PREREQS:** junior block in graphic design.

GD 422. NEW MEDIA: INTERACTIVE (4). An advanced course designing digital experiences with emphasis on innovative navigation, architectural structures, theoretical, and historical issues of new media. **PREREQS:** Junior block in graphic design and CS 295.

GD 423. EXPERIMENTAL TYPOGRAPHY (4). An advanced course in experimental typography focusing on intent, meaning, and method. **PREREQS:** junior block in graphic design.

GD 424. VISUAL IDENTITY SYSTEMS (4). Theoretical and studio investigation of the visual and conceptual factors that play a role in the creation and communication of identity. This course is repeatable for a maximum of 12 credits. **PREREQS:** junior block in graphic design.

GD 425. ENVIRONMENTAL AND EXHIBITION DESIGN (4). An advanced studio course investigating the design and presentation of information in large-scale and multidimensional formats. **PREREQS:** junior block in graphic design.

GD 427. PACKAGE DESIGN (4). Theoretical and studio investigation of three-dimensional structural and conceptual principles as they relate to the areas of packaging and point-of-purchase display. **PREREQS:** junior block in graphic design.

GD 428. SENIOR THESIS PROJECT (4). An advanced studio course designed to provide the self-directed student with the opportunity to work on a personal, faculty-approved project in graphic

design. **PREREQS:** junior block in graphic design.

GD 429. GRAPHIC DESIGN STUDIO (4). Provides opportunity for students to work with clients on actual projects in a professional environment. Lec/lab. This course is repeatable for a maximum of 16 credits. **PREREQS:** junior block in graphic design. Admission through portfolio review.

COLLEGE OF BUSINESS PROGRAMS

ACCOUNTANCY (BS, CRED, HBS)

Also available at the OSU-Cascades campus.

The Accountancy major at Oregon State University provides a professionally oriented program to prepare students for successful careers in the major fields of accounting. Accounting students take the seven required courses shown below (beyond the introductory accounting courses that are taken by all business students) plus at least two elective courses from the five elective courses shown below. Accounting students satisfy University Baccalaureate Core course requirements and College of Business core course requirements. In addition to the courses, accounting program students must meet all university and college progression standards as well as a minimum of 60 credits in upper-division courses (300–400 level) and a minimum of 180 credits total to graduate. The Oregon State Board of Accountancy requires a minimum of 225 credits in order to take the Uniform Certified Public Accounting Exam.

Accountancy major requirements are divided into two parts. The first part (the pre-accounting major) usually taken in the first two years must be completed before formal admission into the accountancy major. The second part (Professional School) is usually taken in the last two years after formal admission into the accountancy major.

Summary of Requirements:

Pre-accounting Major (48)
 Business Core Classes (26)
 Math, Economics, Writing and Communications (22)*
 Professional School (64)
 Pro-school business core classes (32)
 Accounting Courses (36)
 University General Education Requirements (36)
 Unrestricted Electives (32)
 *12 credits from Pre-business major satisfy University General Education Requirements.

Total Required for Graduation (180)

Accounting Courses in the Professional Program—Accountancy (BS) (36 credits)

Accounting students must complete 36 credits of accounting courses—28 credits in required courses and 8 credits in two of the five elective courses.

Once in the Accountancy major, students must continue to earn a C or better (not C–) in their ACTG classes for graduation and prerequisite purposes. In the first instance of a student earning lower than a C in an ACTG class, he/she must repeat the class. In the second instance of a student earning lower than a C in an ACTG class, he/she is removed from the Accountancy major and thus should see an advisor to discuss options.

Required:

ACTG 317. External Reporting I (4)
 ACTG 318. External Reporting II (4)
 ACTG 319. External Reporting III (4)
 ACTG 321. Cost Management I (4)
 ACTG 325. Introduction to Taxation (4)
 ACTG 378. Accounting Information Management (4)
 ACTG 427/ACTG 527. Assurance and Attestation Services (4)

Electives:

ACTG 417/ACTG 517. Advanced Accounting (4)
 ACTG 420/ACTG 520. IT Auditing (4)
 ACTG 422/ACTG 522. Strategic Cost Management (4)
 ACTG 425/ACTG 525. Advanced Taxation (4)
 ACTG 429/ACTG 529. Topics in Accounting (4)

The accountancy program typically begins in students' junior year with a lock-step series of accounting courses designed to provide a solid knowledge base in accounting procedures and the accounting profession. During fall term students take ACTG 317, followed by ACTG 318 and either ACTG 321 or ACTG 378 during winter term and ACTG 319 and either ACTG 321 or ACTG 378 during spring term. ACTG 325 and ACTG 427 follow during students' senior year. Also during their senior year, students may take accounting electives that correspond to their career interests.

Students wishing to pursue the Accountancy major must also be accepted into the professional business program. Enrollment into all ACTG courses except ACTG 317 is limited to students accepted into the Accountancy program. A minimum AIB GPA of 2.75 must be earned to be eligible for admission into the Accountancy program, but a 2.75 GPA does not guarantee acceptance as admissions are competitive and subject to capacity constraints. Instructions on how to apply can be found online at the COB Student Services website. Students denied admission to the Accountancy major may reapply for the following fall if they meet minimum eligibility requirements.

Business Administration/Accountancy Curricula

The undergraduate curriculum in business administration reflects the increasingly complex economic, social, and technological aspects of modern business decision-making. Course work emphasizes

es the development of effective decision-making, an understanding of personal values and motivation, and the awareness of the interrelationships between business and society.

Pre-Accounting Program

Newly admitted students to OSU and all current OSU students who seek to complete an undergraduate degree program offered by the College of Business (COB) are designated as pre-business majors (including pre-Accounting, pre-BIS, pre-Business, pre-Finance, pre-Management and pre-Marketing). The pre-accounting program requires completion of courses within the freshman and sophomore year (see core curriculum below) that build a solid foundation for the upper-division business curricula. These courses must be completed before the student is eligible for admission to the professional business program. The pre-business course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

Professional Business Program

Admission to the professional business program is restricted to those students who have demonstrated an ability to achieve the high standards required for professional studies. Enrollment within each academic discipline (major or option) is limited to the number of students who can be served by the faculty and facilities of that major/option.

Therefore students should strive to meet the minimum eligibility standards of their particular major of choice as well as those of the College of Business itself. Minimum standards for a particular major can often be higher. More information on the pro-school process and current competitive GPA levels for each major can be found on the Pro-School Competitive GPA section of the College of Business Advising website.

Students must apply for admission to the professional business program. To be eligible to apply, students must earn COB grades of C– or better, have 90 credits by the end of the application term, have a minimum COB GPA of 2.5, and meet the minimum standards for their particular major of choice in the All-Inclusive Business GPA. The All-Inclusive Business GPA includes all business program course work taken from OSU and transfer institution(s). Students earning an All-Inclusive Business GPA of 3.0 or above will be assured admission to the professional business program, but it does not guarantee admittance into the major of their choice. Students with an All-Inclusive Business GPA less than 3.0 will be admitted to an academic discipline (major or option) with available capacity using the following criteria: compliance with entrance requirements for the

major/option; their rank order based on their All-Inclusive Business GPA; and the contribution of the student to the diversity of viewpoints within the college.

Students who have completed their pre-business courses at a college or university other than OSU must be admitted to pre-business their first term and apply for the professional program during their first term of attendance.

Students may apply to the Accountancy major from any of the pre-business majors, including pre-Accounting, pre-BIS, pre-Business, pre-Finance, pre-Management and pre-Marketing.

Business Administration/

Accountancy Program Requirements (180)

Business Administration Core Curriculum (58)

The business administration core curriculum provides students with a broad overview of business; basic skills in accounting and quantitative methods; an understanding of the legal and social environment of business; a background in management and organizational behavior, marketing, finance, and operations management; an understanding of the entrepreneurial process; and the opportunity to integrate course work and further develop decision-making skills through the analysis of business cases.

Accountancy (36)

Accounting students must complete 36 credits of accounting courses in the accountancy program. See an academic advisor for more information.

Mathematics (8)

Basic mathematics requirements:

MTH 241. *Calculus for Management and Social Science (4)
MTH 245. *Mathematics for Management, Life, and Social Sciences (4)

Economics (8)

ECON 201. *Introduction to Microeconomics (4)
ECON 202. *Introduction to Macroeconomics (4)

Written and Oral Communication (6)

Business students also must take:

COMM 111. *Public Speaking (3)
or COMM 114. *Argument and Critical Discourse (3)
WR 222. *English Composition (3)
or WR 323. *English Composition (3)
or WR 327. *Technical Writing (3)

University General Requirements (36)

MTH 241, ECON 201/ECON 202, WR 222, WR 323 or WR 327, and COMM 111 or COMM 114 meet the university's baccalaureate core requirements for mathematics, social processes and institutions, writing II, and speech, respectively. All students must meet the other baccalaureate core requirements and the other requirements for baccalaureate degrees. (See Requirements for Baccalaureate Degrees.)

Unrestricted Electives (32)

Students are provided elective credits to enable them to achieve a degree of specialization and depth to match their interests. Students are encouraged to choose a non-business university-approved minor that consists of a minimum of 27 credits, with at least 12 credits at the upper-division level. Students are responsible for determining whether the minor has been approved for transcript visibility and to request the notation on their transcript. Students may also choose to complete a coherent set of non-business courses to support their career goals.

Sample Schedule

Pre-Accounting (Major code 770)

Freshman Year

BA 101. Business Now (6)
COMM 111. *Public Speaking (3)
or COMM 114. *Argument and Critical Discourse (3)
MTH 241. *Calculus for Management and Social Science (4)
MTH 245. *Mathematics for Management, Life, and Social Sciences (4)
Baccalaureate core, unrestricted electives (28)

Sophomore Year

BA 211. Financial Accounting (4)
BA 213. Managerial Accounting (4)
BA 233. Legal Environment of Business (2)
BA 260. Introduction to Entrepreneurship (4)
BA 276. Introduction to Statistical Inference (2)
BA 302. Business Process Management (4)
ECON 201. *Introduction to Microeconomics (4)
ECON 202. *Introduction to Macroeconomics (4)
WR 222. *English Composition (3)
or WR 323. *English Composition (3)
or WR 327. *Technical Writing (3)
Baccalaureate core, minor courses, or unrestricted electives (14)

Professional Accountancy (Major code 641)

Required Accountancy Courses

ACTG 317. External Reporting I (4)
ACTG 318. External Reporting II (4)
ACTG 319. External Reporting III (4)
ACTG 321. Cost Management I (4)
ACTG 325. Introduction to Taxation (4)
ACTG 378. Accounting Information Management (4)
ACTG 427/ACTG 527. Assurance and Attestation Services (4)

Two Elective Accountancy Courses from below:

ACTG 417/ACTG 517. Advanced Accounting (4)
ACTG 420. IT Auditing (4)
ACTG 422. Strategic Cost Management (4)
ACTG 425. Advanced Taxation (4)
ACTG 429. Topics in Accounting (4)

Business Core Classes

BA 333. Legal and Ethical Business Solutions (2)
BA 347. International Business (4)

- BA 352. Managing Individual and Team Performance (4)
 BA 353. ^Professional Development (4)
 BA 357. Operations Management (4)
 BA/FIN 340. Finance (4)
 or BA 360. Introduction to Financial Management (4)
 BA 376. Applied Quantitative Methods (2)
 BA 390. Marketing (4)
 BA 466. Integrative Strategic Experience (4)
 Baccalaureate core, minor courses or unrestricted electives (26)

Footnotes:

- * Baccalaureate Core Course
 ^ Writing Intensive Course (WIC)

OPTIONS**ACCOUNTING INFORMATION SYSTEMS OPTION**

The Accounting Information Systems (AIS) option prepares students for entry-level positions and successful careers in the information management or information systems auditing fields. The program builds on the business, accounting and computer skills classes required of all accounting students, and prepares students specifically to apply the information technologies to accounting, auditing and other business tasks.

The program of study that includes the accounting major and these selected courses has been certified by the Information Systems Audit and Control Association. Graduates of this program qualify for one year work experience toward the Certified Information Systems Auditor designation.

Sophomore Year

- BA 272. Business Application Development (4)
 (or equivalent programming course)

Junior Year

- ACTG 378. Accounting Information Management (4)¹
 BA/MGMT 364. Project Management (4)
 BA 371. Business Information Systems Analysis and Design (4)
 BA 372. Business Information Systems Design and Development (4)

Senior Year

- ACTG 420. IT Auditing (4)
 BA 479. Business Telecommunications and Networking (4)
 BA 483. Business Analytics (4)

Total=28**Footnote:**

¹ The professional business program requires completion of either BA 370 or ACTG 378. ACTG 378 is not included in the total credits completed within the option.

INTERNATIONAL BUSINESS OPTION

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political,

geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

Course Requirements

- BA 347. International Business (4)
 BA 348. International Exchange Orientation (1)
 BA 349. Impact of Culture on Business (1)
 BA XXX. Minimum of 18 credits of business or business-related course work completed on an approved international exchange or study abroad program.

Total=24

Students must earn this option with one term of study abroad through an approved College of Business international exchange. Courses in these programs are taught in English.

BUSINESS ADMINISTRATION (BA, BS, CRED, HBA, HBS)**Business Administration Curricula**

The undergraduate curriculum in business administration reflects the increasingly complex economic, social, and technological aspects of modern business decision-making. Course work emphasizes the development of effective decision-making, an understanding of personal values and motivation, and the awareness of the interrelationships between business and society.

Business Administration major requirements are divided into two parts. The first part (the pre-business major), usually taken in the first two years, must be completed before formal admission into the major. The second part (Professional School) is usually taken in the last two years after formal admission into the Business Administration major.

Summary of Requirements:

- Pre-business Major (48)
 Business Core Classes (26)
 Math, Economics, Writing and Communications (22)*
 Professional School (60)
 Pro-school business core classes (36)
 Option Courses (24)
 University General Education Requirements (36)
 Unrestricted Electives (36)
 *12 credits from Pre-business major satisfy University General Education Requirements.

Total Required for Graduation (180)**Pre-Business Program**

Newly admitted students to OSU and all current OSU students who seek to complete an undergraduate degree program offered by the College of Business (COB) are designated as pre-business majors. The pre-business program requires completion of courses within the freshman and sophomore year (see core curriculum below) that build a solid foundation for the upper-division business curricula. These courses must be completed before the student is eligible for admission to the professional business program. The pre-business course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

Professional Business Program

Admission to the professional business program is restricted to those students who have demonstrated an ability to achieve the high standards required for professional studies. Enrollment within each academic discipline (major or option) is limited to the number of students who can be served by the faculty and facilities of that major/option.

Therefore students should strive to meet the minimum eligibility standards of their particular major of choice as well

as those of the College of Business itself. Minimum standards for a particular major can often be higher. More information on the pro-school process and current competitive GPA levels for each major can be found on the Pro-School Competitive GPA section of the College of Business Advising website.

Students must apply for admission to the professional business program. To be eligible to apply, students must earn COB grades of C– or better, have 90 credits by the end of the application term, have a minimum COB GPA of 2.5, and meet the minimum standards for their particular major of choice in the All-Inclusive Business GPA. The All-Inclusive Business GPA includes all business program course work taken from OSU and transfer institution(s). Students earning an All-Inclusive Business GPA of 3.0 or above will be assured admission to the professional business program, but it does not guarantee admittance into the major of their choice. Students with an All-Inclusive Business GPA less than 3.0 will be admitted to an academic discipline (major or option) with available capacity using the following criteria: compliance with entrance requirements for the major/option; their rank order based on their All-Inclusive Business GPA; and the contribution of the student to the diversity of viewpoints within the college.

Students who have completed their pre-business courses at a college or university other than OSU must be admitted to pre-business their first term and apply for the professional program during their first term of attendance.

Business Administration Program Requirements (180)

Business Administration Core Curriculum (62)

The business administration core curriculum provides students with a broad overview of business; basic skills in accounting and quantitative methods; an understanding of the legal and social environment of business; a background in management and organizational behavior, marketing, finance, and operations management; an understanding of the entrepreneurial process; and the opportunity to integrate course work and further develop decision-making skills through the analysis of business cases.

Option (24)

Options are designed to allow students to extend their professional preparation beyond the introductory level in one or more areas. There are four options available to the Business Administration major:

1. Entrepreneurship for Business Majors
2. General Business (Cascades campus only)
3. Hospitality Management (Cascades campus only)

4. International Business

Some options need to be started in the junior year, while others can be completed all during the senior year. See an academic advisor for more information.

Mathematics (8)

Basic mathematics requirements:

MTH 241. *Calculus for Management and Social Science (4)

MTH 245. *Mathematics for Management, Life, and Social Sciences (4)

Economics (8)

ECON 201. *Introduction to Microeconomics (4)

ECON 202. *Introduction to Macroeconomics (4)

Written and Oral Communication (6)

Business students also must take:

COMM 111. *Public Speaking (3)

or COMM 114. *Argument and Critical Discourse (3)

WR 222. *English Composition (3)

or WR 323. *English Composition (3)

or WR 327. *Technical Writing (3)

University General Requirements (36)

MTH 241, ECON 201/ECON 202, WR 222, WR 323 or WR 327, and COMM 111 or COMM 114 meet the university's baccalaureate core requirements for mathematics, social processes and institutions, writing II, and speech, respectively. All students must meet the other baccalaureate core requirements and the other requirements for baccalaureate degrees. (See Earning a Degree at OSU.)

Unrestricted Electives (36)

Students are provided elective credits to enable them to achieve a degree of specialization and depth to match their interests. Students are encouraged to choose a non-business university-approved minor that consists of a minimum of 27 credits, with at least 12 credits at the upper-division level. Students are responsible for determining whether the minor has been approved for transcript visibility and to request the notation on their transcript. Students may also choose to complete a coherent set of non-business courses to support their career goals.

Pre-Business (Major code 180)

First Year

BA 101. Business Now (6)

COMM 111. *Public Speaking (3)

or COMM 114. *Argument and Critical Discourse (3)

MTH 241. *Calculus for Management and Social Science (4)

MTH 245. *Mathematics for Management, Life, and Social Sciences (4)

Baccalaureate core, unrestricted electives (28)

Second Year

BA 211. Financial Accounting (4)

BA 213. Managerial Accounting (4)

BA 233. Legal Environment of Business (2)

BA 260. Introduction to Entrepreneurship (4)

BA 276. Introduction to Statistical Inference (2)

BA 302. Business Management Processes (4)

ECON 201. *Introduction to Microeconomics (4)

ECON 202. *Introduction to Macroeconomics (4)

WR 222. *English Composition (3)

or WR 323. *English Composition (3)

or WR 327. *Technical Writing (3)

Baccalaureate core, minor courses, or unrestricted electives (14)

Professional Business (Major code 181)

Third Year

BA 333. Legal and Ethical Business Solutions (2)

BA 347. International Business (4)

BA 352. Managing Individual and Team Performance (4)

BA 353. ^Professional Development (4)

BA 357. Operations Management (4)

BA 360. Introduction to Financial Management (4)¹

BA 370. Business Systems Analysis (4)²

BA 376. Applied Quantitative Methods (2)

BA 390. Marketing (4)

Baccalaureate core, minor courses, business administration option, or unrestricted electives (13)

Fourth Year

BA 466. Integrative Strategic Experience (4)

Baccalaureate core, minor courses, business administration option or unrestricted electives (41)

Business administration option courses (24–28)

Some option courses for business administration majors are to be taken in the junior year. Students should consult an advisor to plan an appropriate schedule for their chosen option.

Footnotes:

¹Students with a discipline in finance will complete BA/FIN 340 instead of BA 360.

²Students with a discipline in accounting, finance, or business information systems will complete ACTG 378 instead of BA 370.

OPTIONS

ENTREPRENEURSHIP FOR BUSINESS MAJORS OPTION

The Entrepreneurship for Business Majors option prepares students to establish their own business, to operate in growing businesses, to become involved in family-owned businesses, or to work with innovative divisions within larger organizations. The program combines classroom study with case analysis to provide students with the knowledge and skills necessary for success.

Required Courses

BA 363. Technology and Innovation Management (4)

BA 458. Innovation and New Product Development (4)

BA 460. Venture Management (4)

BA 464. New Venture Financing (4)

BA 467. New Venture Lab (4)

Select one additional course from:

- BA 362. Social Entrepreneurship and Social Initiatives (4)
- BA 463. Family Business Management (4)
- BA 468. Technology Commercialization (4)
- BA 491. Personal Selling (4)
- or MRKT 488. Personal Selling (4)

Total=24**GENERAL BUSINESS OPTION****Available only****at OSU-Cascades Campus.**

All students in the General Business option must take 24 credits of upper-division College of Business courses in addition to the undergraduate business core curriculum. A minimum of 12 credits must be 400 level. Courses must be pre-approved by an advisor prior to beginning this option.

HOSPITALITY MANAGEMENT OPTION**Available only****at OSU-Cascades Campus.**

Course work within the Hospitality Management option is aimed at developing the students' knowledge of strategic thinking and its application to the hospitality industry. We define the hospitality industry as including all organizations that provide overnight accommodations and/or food service, to include hotels, destination resorts, hospitals, residence halls, cruise ships, etc.

Through an understanding of scanning techniques, the student will become acquainted with the major trends in the hospitality industries and will develop the analytical skills to interpret their current and future impact. From this understanding of environmental scanning and knowledge of the forces driving change in the hospitality industry, students will develop competitive methods that define the products and services in which hospitality firms need to invest to remain competitive. Students will then identify and evaluate core competencies in terms of overall value addition and competitive advantage to the firm taking into consideration both present and future effects.

Students graduating from the program are required to possess knowledge of forces in the hospitality industry's environment that drive change. Furthermore, they should be able to assess the impact of these forces on the hospitality industry, which will enable them to appreciate the cause and effect relationship between the forces that drive change and the firms within the industry. This in essence will provide students with the tools to be effective leaders in the hospitality industry.

Required Courses

- BA 487. Hospitality Financial Management (4)

BA 488. Advanced Hospitality Management (4)

MRKT 486. Customer Relationship Management (CRM) (4)

Select three from the following for 12 credits:

- BA 460. Venture Management (4)
- MGMT 364. Project Management (4)
- MGMT 453. Human Resources Management (4)
- MRKT 488. Personal Selling (4)
- MRKT 498. Services Marketing (4)

Total=24**INTERNATIONAL BUSINESS OPTION**

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

Course Requirements

- BA 347. International Business (4)
- BA 348. International Exchange Orientation (1)
- BA 349. Impact of Culture on Business (1)
- BA XXX. Minimum of 18 credits of business or business-related course work completed on an approved international exchange or study abroad program.

Total=24

Students must earn this option with one term of study abroad through an approved College of Business international exchange. Courses in these programs are taught in English.

BUSINESS INFORMATION SYSTEMS (BA, BS, CRED, HBA, HBS)

The Business Information Systems (BIS) major provides research-based education that prepares undergraduate students for careers as business system analysts and information systems managers. Graduates of this program will be able to help Oregon businesses take full advantage of information systems technology and keep Oregon's business practices current and in line with rapid changes in the technology and information systems fields. The BIS Program prepares qualified BIS graduates for a variety of professional employment opportunities in private and public organizations.

Business Information Systems (BIS) major requirements are divided into two parts. The first part (the pre-BIS major), usually taken in the first two years, must be completed before formal admission into the BIS major. The second part (Professional School) is usually taken in the last two years after formal admission into the BIS major.

Summary of Requirements:

- Pre-BIS Major (48)
 - Business Core Classes (26)
 - Math, Economics, Writing and Communications (22)*
 - Professional School (60)
 - Pro-school business core classes (32)
 - BIS Courses (28)
 - University General Education Requirements (36)
 - Unrestricted Electives (36)
- *12 credits from Pre-business major satisfy University General Education Requirements.

Total Required for Graduation (180)**Required Courses in the Business Information Systems Major—(28 credits)**

BIS students must complete 28 credits of information systems courses in the professional program.

Required courses include:

- ACTG 378. Accounting Information Management (4)
- BA 272. Business Application Development (4)

- BA 364. Project Management (4)
or MGMT 364. Project Management (4)
- BA 371. Business Information Systems Analysis and Design (4)
- BA 372. Business Info Systems Design and Development (4)
- BA 479. Business Telecommunications and Networking (4)
- BA 483. Business Analytics (4)

Business Administration/ BIS Curricula

The undergraduate curriculum in business administration reflects the increasingly complex economic, social, and technological aspects of modern business decision-making. Course work emphasizes the development of effective decision-making, an understanding of personal values and motivation, and the awareness of the interrelationships between business and society.

Pre-Business Program

Newly admitted students to OSU and all current OSU students who seek to complete an undergraduate degree program offered by the College of Business (COB) are designated as pre-business majors (including pre-Accounting, pre-BIS, pre-Business, pre-Finance, pre-Management and pre-Marketing). The pre-business programs require completion of courses within the freshman and sophomore year (see core curriculum below) that build a solid foundation for the upper-division business curricula. These courses must be completed before the student is eligible for admission to the professional business program. The pre-business course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

Professional Business Program

Admission to the professional business program is restricted to those students who have demonstrated an ability to achieve the high standards required for professional studies. Enrollment within each academic discipline (major or option) is limited to the number of students who can be served by the faculty and facilities of that major/option.

Therefore students should strive to meet the minimum eligibility standards of their particular major of choice as well as those of the College of Business itself. Minimum standards for a particular major can often be higher. More information on the pro-school process and current competitive GPA levels for each major can be found on the Pro-School Competitive GPA section of the College of Business Advising website.

Students must apply for admission to the professional business program. To be eligible to apply, students must earn COB grades of C– or better, have 90 credits by the end of the application term, have a minimum COB GPA of 2.5, and meet the

minimum standards for their particular major of choice in the All-Inclusive Business GPA. The All-Inclusive Business GPA includes all business program course work taken from OSU and transfer institution(s). Students earning an All-Inclusive Business GPA of 3.0 or above will be assured admission to the professional business program, but it does not guarantee admittance into the major of their choice. Students with an All-Inclusive Business GPA less than 3.0 will be admitted to an academic discipline (major or option) with available capacity using the following criteria: compliance with entrance requirements for the major/option; their rank order based on their All-Inclusive Business GPA; and the contribution of the student to the diversity of viewpoints within the college.

Students who have completed their pre-business courses at a college or university other than OSU must be admitted to pre-business their first term and apply for the professional program during their first term of attendance.

Students may apply to the Business Information Systems major from any of the pre-business majors, including pre-Accounting, pre-BIS, pre-Business, pre-Finance, pre-Management and pre-Marketing.

Business Administration/ Business Information Systems Requirements (180)

Business Administration Core Curriculum (58)

The business administration core curriculum provides students with a broad overview of business; basic skills in accounting and quantitative methods; an understanding of the legal and social environment of business; a background in management and organizational behavior, marketing, finance, and operations management; an understanding of the entrepreneurial process; and the opportunity to integrate course work and further develop decision-making skills through the analysis of business cases.

Business Information Systems (28)

BIS students must complete 28 credits of information systems courses in the professional program. See an academic advisor for more information.

Mathematics (8)

Basic mathematics requirements:

- MTH 241. *Calculus for Management and Social Science (4)
- MTH 245. *Mathematics for Management, Life, and Social Sciences (4)

Economics (8)

- ECON 201. *Introduction to Microeconomics (4)
- ECON 202. *Introduction to Macroeconomics (4)

Written and Oral Communication (6)

Business students also must take:

- COMM 111. *Public Speaking (3)
or COMM 114. *Argument and Critical Discourse (3)
- WR 222. *English Composition (3)
or WR 323. *English Composition (3)
or WR 327. *Technical Writing (3)

University General Requirements (36)

MTH 241, ECON 201/ECON 202, WR 222, WR 323 or WR 327, and COMM 111 or COMM 114 meet the university's baccalaureate core requirements for mathematics, social processes and institutions, writing II, and speech, respectively. All students must meet the other baccalaureate core requirements and the other requirements for baccalaureate degrees. (See Earning a Degree at OSU.)

Unrestricted Electives (36)

Students are provided elective credits to enable them to achieve a degree of specialization and depth to match their interests. Students are encouraged to choose a non-business university-approved minor that consists of a minimum of 27 credits, with at least 12 credits at the upper-division level. Students are responsible for determining whether the minor has been approved for transcript visibility and to request the notation on their transcript. Students may also choose to complete a coherent set of non-business courses to support their career goals.

Sample Four-Year Schedule

Pre-BIS (Major code 771)

First Year

- BA 101. Business Now (6)
- COMM 111. *Public Speaking (3)
or COMM 114. *Argument and Critical Discourse (3)
- MTH 241. *Calculus for Management and Social Science (4)
- MTH 245. *Mathematics for Management, Life and Social Sciences (4)
- Baccalaureate core, unrestricted electives (28)

Second Year

- BA 211. Financial Accounting (4)
- BA 213. Managerial Accounting (4)
- BA 233. Legal Environment of Business (2)
- BA 260. Introduction to Entrepreneurship (4)
- BA 272. Business Application Development (4)
- BA 276. Introduction to Statistical Inference (2)
- BA 302. Business Process Management (4)
- ECON 201. *Introduction to Microeconomics (4)
- ECON 202. *Introduction to Macroeconomics (4)
- WR 222. *English Composition (3)
or WR 323. *English Composition (3)
or WR 327. *Technical Writing (3)
- Baccalaureate core, minor courses, or unrestricted electives (10)

Professional Business Information Systems (Major code 183)

Required BIS Courses

- ACTG 378. Accounting Information Management (4)
 BA 364. Project Management (4)
 or MGMT 364. Project Management (4)
 BA 371. Business Information Systems Analysis and Design (4)
 BA 372. Business Information Systems Design and Development (4)

 ^ Writing Intensive Course (WIC)

OPTIONS

INTERNATIONAL BUSINESS OPTION

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within business. These disciplines include the majors in accountancy, business administration (Entrepreneur-

ship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

Course Requirements

- BA 347. International Business (4)
 BA 348. International Exchange Orientation (1)
 BA 349. Impact of Culture on Business (1)
 BA XXX. Minimum of 18 credits of business or business-related course work completed on an approved international exchange or study abroad program.

Total=24

Students must earn this option with one term of study abroad through an approved College of Business international exchange. Courses in these programs are taught in English.

FINANCE

(BA, BS, CRED, HBA, HBS)

The finance program of the College of Business provides nationally recognized research-based education that will prepare profession-ready graduates who: can excel in an innovative knowledge-based economy, can successfully meet certification requirements in specific finance areas (such as the Charter Financial Analyst [CFA], Certificate in Management Accounting [CMA], Certified Financial Planner [CFP]), and have engaged in experiential learning opportunities that involve applying theory to practice. The finance program will accomplish our objectives through the following:

- Rigorous, integrated undergraduate and graduate classes that translate theory to practice and center on innovation and certification preparation.
- Distinctive experiential learning opportunities for students through internships, the investment club, and finance club.
- Nationally-recognized, discipline-based research and contributions to practice.

In addition, the finance program will assist students in achieving and enhancing life-long learning skills through

contact with professional organizations and professionals in the finance field.

Finance major requirements are divided into two parts. The first part (the pre-finance major), usually taken in the first two years, must be completed before formal admission into the Finance major. The second part (Professional School) is usually taken in the last two years after formal admission into the Finance major.

Summary of Requirements:

- Pre-finance Major (48)
 Business Core Classes (26)
 Math, Economics, Writing and Communications (22)*
 Professional School (64)
 Pro-school business core classes (28)
 Finance Courses (36)
 University General Education Requirements (36)
 Unrestricted Electives (32)

*12 credits from Pre-business major satisfy University General Education Requirements.

Total Required for Graduation (180)

Finance Courses in the Professional Program—Finance (36 credits)

Finance students must complete 16 credits in required courses; 12 credits of elective finance courses; one 4-credit required finance-specific course; and 4 credits of elective finance-specific courses.

Required courses include (16):

- FIN 340. Finance (4)
 FIN 341. Investments (4)
 FIN 342. Advanced Financial Management (4)
 FIN 445. International Financial Management (4)
Finance Electives—Select three of the following courses (12):
 FIN 441. Financial Institutions (4)
 FIN 442. Financial Statement Analysis (4)
 FIN 443. Portfolio Management (4)
 FIN 444. Financial Risk Management (4)
 FIN 499. Selected Topics in Finance (4)

Finance-Specific (4):

- ACTG 378. Accounting Information Management (4)

Finance-Specific Electives—Select one of the following courses (4):

- ACTG 317. External Reporting I (4)
 ECON 330. Money and Banking (4)
 ECON 340. International Economics (4)

The finance program typically begins in students' junior year with a lock-step series of finance courses designed to provide a solid knowledge base. During fall term students take FIN 340, followed by FIN 341 and ACTG 378 during winter term and FIN 342 during spring term. FIN 445 follows during students' senior year. Also during their senior year students may take electives that correspond to their career interests.

Business Administration/ Finance Curricula

The undergraduate curriculum in business administration reflects the increasingly complex economic, social, and technological aspects of modern business decision-making. Course work emphasizes the development of effective decision-making, an understanding of personal values and motivation, and the awareness of the interrelationships between business and society.

Pre-Business Program

Newly admitted students to OSU and all current OSU students who seek to complete an undergraduate degree program offered by the College of Business (COB) are designated as pre-Business majors (including pre-Accounting, pre-BIS, pre-Business, pre-Finance, pre-Management and pre-Marketing). The pre-Business program requires completion of courses within the freshman and sophomore year (see core curriculum below) that build a solid foundation for the upper-division business curricula. These courses must be completed before the student is eligible for admission to the professional business program. The pre-business course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

Professional Business Program

Admission to the professional business program is restricted to those students who have demonstrated an ability to achieve the high standards required for professional studies. Enrollment within each academic discipline (major or option) is limited to the number of students who can be served by the faculty and facilities of that major/option.

Therefore students should strive to meet the minimum eligibility standards of their particular major of choice as well as those of the College of Business itself. Minimum standards for a particular major can often be higher. More information on the pro-school process and current competitive GPA levels for each major can be found on the Pro-School Competitive GPA section of the College of Business Advising website.

Students must apply for admission to the professional business program. To be eligible to apply, students must earn COB grades of C– or better, have 90 credits by the end of the application term, have a minimum COB GPA of 2.5, and meet the minimum standards for their particular major of choice in the All-Inclusive Business GPA. The All-Inclusive Business GPA includes all business program course work taken from OSU and transfer institution(s). Students earning an All-Inclusive Business GPA of 3.0 or above will be assured admission to the professional business program, but it does not

guarantee admittance into the major of their choice. Students with an All-Inclusive Business GPA less than 3.0 will be admitted to an academic discipline (major or option) with available capacity using the following criteria: compliance with entrance requirements for the major/option; their rank order based on their All-Inclusive Business GPA; and the contribution of the student to the diversity of viewpoints within the college.

Students who have completed their pre-Business courses at a college or university other than OSU must be admitted to pre-business their first term and apply for the professional program during their first term of attendance.

Students may apply to the Finance major from any of the pre-Business majors, including pre-Accounting, pre-BIS, pre-Business, pre-Finance, pre-Management and pre-Marketing.

Business Administration/ Finance Program Requirements (180)

Business Administration Core Curriculum (54)

The business administration core curriculum provides students with a broad overview of business; basic skills in accounting and quantitative methods; an understanding of the legal and social environment of business; a background in management and organizational behavior, marketing, finance, and operations management; an understanding of the entrepreneurial process; and the opportunity to integrate course work and further develop decision-making skills through the analysis of business cases.

Finance (36)

Finance students must complete 36 credits of finance courses in the professional program. See an academic advisor for more information.

Mathematics (8)

Basic mathematics requirements:

MTH 241. *Calculus for Management and Social Science (4)

MTH 245. *Mathematics for Management, Life, and Social Sciences (4)

Economics (8)

ECON 201. *Introduction to Microeconomics (4)

ECON 202. *Introduction to Macroeconomics (4)

Written and Oral Communication (6)

Business students also must take:

COMM 111. *Public Speaking (3)
or COMM 114. *Argument and Critical Discourse (3)

WR 222. *English Composition (3)
or WR 323. *English Composition (3)
or WR 327. *Technical Writing (3)

University General Requirements (36)

MTH 241, ECON 201/ECON 202, WR 222, WR 323 or WR 327, and COMM 111 or COMM 114 meet the university's baccalaureate core requirements for math-

ematics, social processes and institutions, writing II, and speech, respectively. All students must meet the other baccalaureate core requirements and the other requirements for baccalaureate degrees. (See Earning a Degree at OSU.)

Unrestricted Electives (32)

Students are provided elective credits to enable them to achieve a degree of specialization and depth to match their interests. Students are encouraged to choose a non-business university-approved minor that consists of a minimum of 27 credits, with at least 12 credits at the upper-division level. Students are responsible for determining whether the minor has been approved for transcript visibility and to request the notation on their transcript. Students may also choose to complete a coherent set of non-business courses to support their career goals.

OPTIONS**INTERNATIONAL BUSINESS OPTION**

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work.

The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

Course Requirements

- BA 347. International Business (4)
 BA 348. International Exchange Orientation (1)
 BA 349. Impact of Culture on Business (1)
 BA XXX. Minimum of 18 credits of business or business-related course work completed on an approved international exchange or study abroad program.

Total=24

Students must earn this option with one term of study abroad through an approved College of Business international exchange. Courses in these programs are taught in English.

INNOVATION MANAGEMENT (BA, BS, HBA, HBS)

The Innovation Management major is a double-degree program. It can only be added to a primary OSU non-business major.

Graduates of the IMDD program will gain expertise in developing new ideas and inventions and learn how to take these ideas through the innovation and commercialization process. The intent is to build upon the “technical” skills developed by students in their primary major while giving them the tools to become more productive and innovative members of the organizations where they will work. It will provide students with a foundation in business basics, such as marketing and accounting, while also building students’ expertise in the innovation and commercialization process.

This major is limited to 45 qualified students per year. Interested students should consult with the College of Business Advising Office (541-737-3716/ Bexell 214) for more detail about the declaration requirements and process.

A College of Business GPA of 2.50 (OSU grades only) and a minimum grade of C– or above is required in all completed BA course work that is relevant to the degree program. Students may not S/U courses in this major.

Requirements

- BA 215. Fundamentals of Accounting (4)
 BA 260. Introduction to Entrepreneurship (4)
 BA 351. Managing Organizations (4) or BA 352. Managing Individual and Team Performance (4)
 BA 353. ^Professional Development (4)
 BA 363. Technology and Innovation Management (4)
 BA 390. Marketing (4)

- BA 458. Innovation and New Product Development (4)
 BA 468. Technology Commercialization (4)
 MGMT 452. Leadership (4)

Total=36**Additional course work that may be completed to achieve 24 credits unique to the Innovation Management degree program:**

- BA 460. Venture Management (4)
 BA 464. New Venture Financing (4)
 MRKT 488. Personal Selling (4)

Total=12**Footnotes:**

- * Baccalaureate Core Course
 ^ Writing Intensive Course (WIC)

INTERNATIONAL STUDIES (BA, HBA)

See **International Programs** for information on the International Studies Degree.

MANAGEMENT (BA, BS, CRED, HBA, HBS)

Graduates of the management program have expertise in people, processes and projects gained through experiential learning opportunities that involve applying theory to practice. The management program prepares qualified management graduates for a variety of professional employment opportunities in the private and public sectors (government and not-for-profit).

Management major requirements are divided into two parts. The first part (the pre-management major), usually taken in the first two years, must be completed before formal admission into the management major. The second part (Professional School) is usually taken in the last two years after formal admission into the management major.

Summary of Requirements:

- Pre-management Major (48)
 Business Core Classes (26)
 Math, Economics, Writing and Communications (22)*
 Professional School (64)
 Pro-school business core classes (36)
 Management Courses (28)
 University General Education Requirements (36)
 Unrestricted Electives (32)

*12 credits from Pre-business major satisfy University General Education Requirements.

Total Required for Graduation (180)

Management students must complete 28 credits in the professional program: 24 credits in required courses and 4 credits in one of the six elective courses.

Required courses include:

- MGMT 364. Project Management (4)
 MGMT 452. Leadership (4)
 MGMT 453. Human Resources Management (4)
 MGMT 455. Influence and Negotiation (4)

MGMT 457. Supply Chain Strategy (4)
MGMT 459. Managing Ethics and
Corporate Social Responsibility (4)

Electives:

BA 362. Social Entrepreneurship and Social
Initiatives (4)
BA 363. Technology and Innovation
Management (4)
BA 432. Environmental Law and Business (4)
BA 447. Topics in International Business (4)
BA 460. Venture Management (4)
BA 463. Family Business Management (4)
MGMT 456. Management Field Practicum (4)

Business Administration/ Management Curricula

The undergraduate curriculum in business administration reflects the increasingly complex economic, social, and technological aspects of modern business decision-making. Course work emphasizes the development of effective decision-making, an understanding of personal values and motivation, and the awareness of the interrelationships between business and society.

Pre-Business Program

Newly admitted students to OSU and all current OSU students who seek to complete an undergraduate degree program offered by the College of Business (COB) are designated as pre-business majors (including pre-Accounting, pre-BIS, pre-Business, pre-Finance, pre-Management and pre-Marketing). The pre-business program requires completion of courses within the freshman and sophomore year (see core curriculum below) that build a solid foundation for the upper-division business curricula. These courses must be completed before the student is eligible for admission to the professional business program. The pre-business course work may be completed at OSU or any accredited college or university that offers equivalent courses transferable to OSU.

Professional Business Program

Admission to the professional business program is restricted to those students who have demonstrated an ability to achieve the high standards required for professional studies. Enrollment within each academic discipline (major or option) is limited to the number of students who can be served by the faculty and facilities of that major/option.

Therefore students should strive to meet the minimum eligibility standards of their particular major of choice as well as those of the College of Business itself. Minimum standards for a particular major can often be higher. More information on the pro-school process and current competitive GPA levels for each major can be found on the Pro-School Competitive GPA section of the College of Business Advising website.

Students must apply for admission to the professional business program. To be

eligible to apply, students must earn COB grades of C– or better, have 90 credits by the end of the application term, have a minimum COB GPA of 2.5, and meet the minimum standards for their particular major of choice in the All-Inclusive Business GPA. The All-Inclusive Business GPA includes all business program course work taken from OSU and transfer institution(s). Students earning an All-Inclusive Business GPA of 3.0 or above will be assured admission to the professional business program, but it does not guarantee admittance into the major of their choice. Students with an All-Inclusive Business GPA less than 3.0 will be admitted to an academic discipline (major or option) with available capacity using the following criteria: compliance with entrance requirements for the major/option; their rank order based on their All-Inclusive Business GPA; and the contribution of the student to the diversity of viewpoints within the college.

Students who have completed their pre-business courses at a college or university other than OSU must be admitted to pre-business their first term and apply for the professional program during their first term of attendance.

Students may apply to the Management major from any of the pre-business majors, including pre-Accounting, pre-BIS, pre-Business, pre-Finance, pre-Management and pre-Marketing.

Business Administration/ Management Program Requirements (180)

Business Administration Core Curriculum (62)

The business administration core curriculum provides students with a broad overview of business; basic skills in accounting and quantitative methods; an understanding of the legal and social environment of business; a background in management and organizational behavior, marketing, finance, and operations management; an understanding of the entrepreneurial process; and the opportunity to integrate course work and further develop decision-making skills through the analysis of business cases.

Management (28)

Management students must complete 28 credits of management courses in the professional program. See an academic advisor for more information.

Mathematics (8)

Basic mathematics requirements:

MTH 241. *Calculus for Management and Social Science (4)
MTH 245. *Mathematics for Management, Life, and Social Sciences (4)

Economics (8)

ECON 201. *Introduction to Microeconomics (4)
ECON 202. *Introduction to Macroeconomics (4)

Written and Oral Communication (6) Business students also must take:

COMM 111. *Public Speaking (3)
or COMM 114. *Argument and Critical Discourse (3)
WR 222. *English Composition (3)
or WR 323. *English Composition (3)
or WR 327. *Technical Writing (3)

University General Requirements (36)

MTH 241, ECON 201/ECON 202, WR 222, WR 323 or WR 327, and COMM 111 or COMM 114 meet the university's baccalaureate core requirements for mathematics, social processes and institutions, writing II, and speech, respectively. All students must meet the other baccalaureate core requirements and the other requirements for baccalaureate degrees. (See Earning a Degree at OSU.)

Unrestricted Electives (32)

Students are provided elective credits to enable them to achieve a degree of specialization and depth to match their interests. Students are encouraged to choose a non-business university-approved minor that consists of a minimum of 27 credits, with at least 12 credits at the upper-division level. Students are responsible for determining whether the minor has been approved for transcript visibility and to request the notation on their transcript. Students may also choose to complete a coherent set of non-business courses to support their career goals.

 BA 349. Impact of Culture on Business (1)
 BA XXX. Minimum of 18 credits of business or business-related course work completed on an approved international exchange or study abroad program.

Total=24

Students must earn this option with one term of study abroad through an approved College of Business international exchange. Courses in these programs are taught in English.

MARKETING (BA, BS, CRED, HBA, HBS)

The marketing program of the College of Business provides nationally recognized research-based education that will prepare profession-ready graduates who can excel in an innovation economy. Graduates of our program will have expertise in marketing, promotion, product management and planning and branding gained through experiential learning opportunities that involve applying theory to practice. In addition, the marketing program will assist marketing students in achieving and enhancing lifelong learning skills through contact with professional organizations and professionals in the marketing field.

Marketing major requirements are divided into two parts. The first part (the pre-Marketing major), usually taken in the first two years, must be completed before formal admission into the Marketing major. The second part (Professional School) is usually taken in the last two years after formal admission into the Marketing major.

Business Administration/Marketing Curricula

The undergraduate curriculum in business administration reflects the increasingly complex economic, social, and technological aspects of modern business decision-making. Course work emphasizes the development of effective decision-making, an understanding of personal values and motivation, and the awareness of the interrelationships between business and society.

Professional Marketing (Major code 799)**Professional Business Program**

Admission to the professional business program is restricted to those students who have demonstrated an ability to achieve the high standards required for professional studies. Enrollment within each academic discipline (major or option) is limited to the number of students who can be served by the faculty and

facilities of that major/option.

Therefore students should strive to meet the minimum eligibility standards of their particular major of choice as well as those of the College of Business itself. Minimum standards for a particular major can often be higher. More information on the pro-school process and current competitive GPA levels for each major can be found on the Pro-School Competitive GPA section of the College of Business Advising website.

Students must apply for admission to the professional business program. To be eligible to apply, students must earn COB grades of C– or better, have 90 credits by the end of the application term, have a minimum COB GPA of 2.5, and meet the minimum standards for their particular major of choice in the All-Inclusive Business GPA. The All-Inclusive Business GPA includes all business program course work taken from OSU and transfer institution(s). Students earning an All-Inclusive Business GPA of 3.0 or above will be assured admission to the professional business program, but it does not guarantee admittance into the major of their choice. Students with an All-Inclusive Business GPA less than 3.0 will be admitted to an academic discipline (major or option) with available capacity using the following criteria: compliance with entrance requirements for the major/option; their rank order based on their All-Inclusive Business GPA; and the contribution of the student to the diversity of viewpoints within the college.

Students who have completed their pre-business courses at a college or university other than OSU must be admitted to pre-business their first term and apply for the professional program during their first term of attendance.

Third and Fourth Year

Admission to the Marketing major is restricted to those students who have demonstrated an ability to achieve the high standards required for professional studies. Enrollment within each academic discipline (major or option) is limited to the number of students who can be served by the faculty and facilities of that major/option.

Students must apply for admission to the professional business program. To be eligible to apply, students must earn COB grades of C– or better, have 90 credits by the end of the application term, and have a minimum All-Inclusive Business GPA of 2.5. The All-Inclusive Business GPA includes all business program course work taken from OSU and transfer institution(s). Students earning an All-Inclusive Business GPA of 3.0 or above will be assured admission to the professional business program, but it does not guarantee admittance into the major of their choice. Students with an All-Inclusive

Business GPA less than 3.0 will be admitted to an academic discipline (major or option) with available capacity using the following criteria: their rank order based on their All-Inclusive Business GPA; compliance with entrance requirements for the major/option; and the contribution of the student to the diversity of viewpoints within the college.

Students who have completed their pre-business courses at a college or university other than OSU must be admitted to the pre-business major in their first term and apply for the professional school with the major of their choice during their first term of attendance.

Students may apply to the Marketing major from any of the pre-business majors, including pre-Accounting, pre-BIS, pre-Business, pre-Finance, pre-Management and pre-Marketing.

Marketing Major Requirements (68)**Pro-school Core Curriculum (36)**

The pro-school business core curriculum provides students with a broad overview of business; basic skills in accounting and quantitative methods; an understanding of the legal and social environment of business; a background in management and organizational behavior, marketing, finance, and operations management; an understanding of the entrepreneurial process; and the opportunity to integrate course work and further develop decision-making skills through the analysis of business cases.

Pro-Business Core Courses (36)

BA 333. Legal and Ethical Business Solutions (2)

BA 347. International Business (4)

BA 352. Managing Individual and Team Performance (4)

BA 353. ^Professional Development (4)

BA 357. Operations Management (4)

BA 360. Introduction to Financial Management (4)

BA 370. Business Information Systems Overview (4)

BA 376. Applied Quantitative Methods (2)

BA 390. Marketing (4)

BA 466. Integrative Strategic Experience (4)

Marketing Major Courses (32)

Marketing major courses provide students with expertise in marketing, promotion, product management and planning and branding gained through learning marketing theory then applying that theory in experiential learning opportunities that involve applying theory to practice.

Required Courses Include (24):

MRKT 396. Fundamentals of Marketing Research (4) *C or better required.*

MRKT 488. Personal Selling (4)

MRKT 489. Personal Selling Skills Development (4)

MRKT 492. Consumer Behavior (4)

MRKT 496. Marketing Research Practicum (4)

or MRKT 486. Customer Relationship Management (CRM) (4)
MRKT 499. Marketing Policy (4)

Marketing Electives (8)
Select two courses from the following:

BA 458. Innovation and New Product Development (4)
MRKT 493. Advertising Management (4)
MRKT 495. Retail Management (4)
MRKT 497. Global Marketing (4)
MRKT 498. Services Marketing (4)

In addition, 22 credits of baccalaureate core, minor or unrestricted electives should be taken in the junior and senior years to achieve the 180 credits required for graduation.

Sample Schedule - Professional School: Marketing Major (Major code 799)

Junior Year (45 credits)

BA 333. Legal and Ethical Business Solutions (2)
BA 347. International Business (4)
BA 352. Managing Individual and Team Performance (4)
BA 353. ^Professional Development (4)
BA 357. Operations Management (4)

OPTIONS

INTERNATIONAL BUSINESS OPTION

The International Business option prepares students for positions in organizations engaged in international trade. Students study the economic, political, geographical, and socio-cultural factors that impact business across national boundaries. Areas of greatest opportunity for overseas assignments are with service organizations such as banks, consulting firms and accounting firms; with import/export firms; with governmental organizations; and in marketing and financial management areas of multinational firms. A career in international business can lead to exciting and rewarding opportunities abroad. Most multinational business firms, however, hire new employees first for domestic assignments in order to provide them with a thorough knowledge of the firm, its products, and its policies, or for specific assignments in one of the functional areas of the business, before providing overseas opportunities.

Because the majority of employees who eventually hold high-level positions in international business start in entry-level positions within business areas, all international business students must also complete requirements for a primary discipline within business. These disciplines include the majors in accountancy, business administration (Entrepreneurship, General Business, and Hospitality Management options), business information systems, finance, management and marketing.

Students earn this option with a minimum of one quarter term of study abroad through an international exchange or study abroad program approved by the College of Business. Students must complete a minimum of 18 quarter credits in business or business-related course work. The successfully completed course work must articulate back to OSU as courses that extend the knowledge and skills attained within the business core (that is, they cannot be used as a direct substitute for a business core course). Within the Arthur Stonehill International Business Exchange program offered through the College of Business, all courses offered by the partner schools are taught in English.

Course Requirements

BA 347. International Business (4)
BA 348. International Exchange Orientation (1)
BA 349. Impact of Culture on Business (1)
BA XXX. Minimum of 18 credits of business or business-related course work completed on an approved international exchange or study aboard program.

Total=24

Students must earn this option with one term of study abroad through an ap-

proved College of Business international exchange. Courses in these programs are taught in English.

BUSINESS AND ENTREPRENEURSHIP MINOR

Also available via Ecampus.

The Business and Entrepreneurship minor teaches students to recognize business opportunities, equips them with skills to secure funding, and provides insight on how to manage the commercialization of the business opportunity. Fundamental business classes are combined with those designed to specifically address the challenges of launching a new venture or an idea within an existing organization. With an innovative curriculum taught by dedicated professors, the Business and Entrepreneurship minor provides a fundamental stepping stone on the road to identifying and commercializing business opportunities in any type of organization.

Interested students must view an on-line orientation and meet requirements stated therein before they can declare the minor.

Required Courses

BA 215. Fundamentals of Accounting (4)
or [BA 211. Financial Accounting (4)
and BA 213. Managerial Accounting (4)]
BA 260. Introduction to Entrepreneurship (4)
BA 351. Managing Organizations (4)
or BA 352. Managing Individual and Team Performance (4)
BA 360. Introduction to Financial Management (4)
or BA/FIN 340. Finance (4)
or ENGR 390. Engineering Economy (3)
BA 390. Marketing (4)
ECON 201. *Introduction to Microeconomics (4)
or AREC 250. *Introduction to Environmental Economics and Policy (3)
and AREC 311. Intermediate Microeconomic Theory I (4)

Note: Registration access to these substitutes is generally not allowed for minors. However, some students may have access to them via Honors College or previous status as a business major.

Elective: Select one of the following courses

BA 230. Business Law I (4)
BA/FIN 341. Investments (4)
BA/FIN 342. Advanced Financial Management (4)
BA 357. Operations Management (4)
BA 362. Social Entrepreneurship and Social Initiatives (4)
BA 363. Technology and Innovation Management (4)
BA/MGMT 364. Project Management (4)
BA 365. Family Business Management (4)
BA/MRKT 396. Fundamentals of Marketing Research (4)
BA/MGMT 452. Leadership (4)
BA/MGMT 453. Human Resources Management (4)

- BA 460. Venture Management (4)
- BA 463. Family Business Management (4)
- BA 467. New Venture Laboratory (4)
- BA 468. Technology Commercialization (4)
- BA/MRKT 492. Consumer Behavior (4)
- BA/MRKT 495. Retail Management (4)
- BA/MRKT 497. Global Marketing (4)

Any other upper-division ACTG or BA course may be used as the elective IF prior approval is obtained from the College of Business Advising Office.

Total=27

To earn the minor upon graduation, students must meet all of the following:

- Earn a minimum of C- in each of their minor courses (all courses must be taken A-F grading)
- Complete over 50 percent of their minor with OSU credits
- Have minimum 2.5 GPA (OSU grades) in all required minor course work

For further information, please contact the Office of Student Services, 214 Bexell Hall, 541-737-3716.

POSTBACCALAUREATE CERTIFICATE IN ACCOUNTING

Available on the OSU-Cascades Campus only.

Students holding a bachelor's degree and interested in an accounting education at OSU, may look into earning a second bachelor's degree in Accountancy by contacting the College of Business Office of Student Services in 214 Bexell Hall, 541-737-3716. Another option is to contact the College of Business Graduate Programs Office for information about how to specialize one's MBA in Accounting (300 Bexell Hall or 541-737-5510).

GRADUATE MAJORS

BUSINESS ADMINISTRATION (MBA, PhD)

Graduate Areas of Concentration
Clean technology, commercialization, executive leadership, global operations, marketing, research thesis, wealth management

The MBA program represents a broad, yet responsive, general management curriculum with an entrepreneurial focus that crosses the functional disciplines of business and is enhanced by advanced management and contemporary topics course work. The MBA program is open to both business and nonbusiness undergraduates. Its advanced management emphasis creates practical value-added content for all students.

The MBA program is intended to provide the broad knowledge and skills necessary to become competent and responsible managers. As a result of completing the OSU MBA program, you will be able to create, build and manage

innovative, socially responsible, and sustainable enterprises in a global business environment. The OSU MBA program will also give you an understanding of how sustainable business meets economic, social and environmental needs without compromising the future of any of them. Sustainability is woven into our curriculum—so that when you leave, you'll be able to be smart, daring and make a positive impact on your world.

Persons interested in the MBA Program should write: Graduate Business Programs, College of Business, Bexell 209, OSU, Corvallis, OR 97331-2603, or email: osumba@bus.oregonstate.edu.

The MBA is an accelerated management program with an experiential component and an emphasis on innovation, sustainability, technology and entrepreneurship. The program is designed to provide our graduates with the necessary skills to solve complex business problems and to successfully compete in the business marketplace. Foundation courses include such fundamentals as business law, accounting, finance, operations, management, and marketing. Advanced courses explore contemporary business topics in depth, with an emphasis on sustainability, technology, entrepreneurship and innovation in the global economy. Course work is completed in tandem with the experiential component of the program, the Integrated Business Project (IBP).

With the IBP, student teams are tasked with creating fact-based, research-driven business plans for the companies of their choice. Whether developing an entrepreneurial venture from scratch or providing an established business with new direction and growth potential, students become active in their own education. As the cornerstone of the College of Business MBA, the IBP program has a lasting impact, not only on students, but on commerce and industry in Oregon.

The MBA program is an intensive, fast-paced program designed to guide students through a rigorous foundation and core curriculum, while allowing them to pursue their interests and push their boundaries. Throughout, students learn to build teams, integrate disciplines, work under pressure and multitask. In short, the same skills they will rely on when they leave campus.

GRADUATE OPTIONS UNDER MASTER OF BUSINESS ADMINISTRATION DEGREE

COMMERCIALIZATION OPTION

The Commercialization graduate option, within the Master of Business Administration (MBA) program, emphasizes innovation, technology commercialization, and entrepreneurship to prepare graduates to assume leadership roles in emerg-

ing business organizations. Working with a cross-disciplinary, multinational team over a nine-month period, graduates create a research-driven, investor-ready business plan to take an innovative idea to market. Your team will participate in a business plan competition judged by seasoned entrepreneurs, executives, and venture capitalists who will provide valuable feedback from an investor perspective. You will also have weekly meetings with faculty advisors and industry mentors to guide the development of your business plan.

The Commercialization graduate option requires 45 credits of course work, including 30 credits of general MBA courses, 12 credits within the Commercialization graduate option and 3 credits of elective course work.

General MBA Course Work (30)

- BA 528. Financial and Cost Analysis (3)
- BA 540. Corporate Finance (3)
- BA 543. Financial Markets and Institutions (3)
- BA 550. Organization Leadership and Management (3)
- BA 555. Practical Business Analysis (3)
- BA 561. Supply Chain Management (3)
- BA 562. Managing Projects (3)
- BA 569. Advanced Strategic Management (3)
- BA 572. Advanced Information Systems (3)
- BA 590. Marketing Management (3)

Commercialization Graduate Option Course Work (12)

- BA 531. Business Law – Technology/New Ventures (3)
- BA 560. Venture Planning (3)
- BA 567. Special Topics in Management: Colloquium (3)
- BA 568. Integrated Business Project (3)

GLOBAL OPERATIONS OPTION

The Global Operations graduate option, within our existing Master of Business Administration (MBA) program, offers students an alternative focus for their MBA that includes acquiring a solid mastery of international operations and supply chain management concepts and methods. This MBA option prepares graduates for operations and supply chain management in the service and manufacturing industries.

The Global Operations graduate option requires a total of 45 credits, including 9 credits of track-specific course work and 6 credits of track-related elective courses.

General MBA Course Work (30)

- BA 528. Financial and Cost Analysis (3)
- BA 531. Business Law-Technology/New Ventures (3)
- or BA 533 Business Law for Managers (3)
- BA 540. Corporate Finance (3)
- BA 550. Organization Leadership and Management (3)
- BA 555. Practical Business Analysis (3)
- BA 561. Supply Chain Management (3)
- BA 562. Managing Projects (3)
- BA 569. Advanced Strategic Management (3)

BA 572. Advanced Information Systems (3)
BA 590. Marketing Management (3)

Option-Specific Courses (15–17)

BA 551. Global Supply and Sourcing (3)
BA 552. Global Service Operations and Logistics (3)
BA 554. Global Operations Capstone (3)

Complete at least two of the following restricted electives:

BA 532. Environmental Law and Business (4)
MGMT 553. Human Resources Management (4)
MGMT 559. Managing Ethics and Corporate Social Responsibility (4)
MGMT 571. Ethical Leadership (3)
MGMT 574. Negotiations (3)
MRKT 592. Consumer Behavior (4)
MRKT 594. Marketing Channels (4)
MRKT 595. Retail Management (4)
MRKT 597. Global Marketing (4)

Total=45

RESEARCH THESIS OPTION

The Research Thesis graduate option, within the Master of Business Administration (MBA) program, is intended to offer students and College of Business faculty with joint research interests, an opportunity to engage in research as part of the student's MBA program. Students can design, execute, and report on business research problems and their solutions. These may include an analysis of existing academic literature and the formulation of research questions and research plans. Students may also collect and analyze data and report on research findings in both an oral and written format.

The Research Thesis graduate option requires a minimum of 46 credits of course work, including 33 credits of general MBA courses and a minimum of 13 credits within the Research Thesis option.

General MBA Course Work (33)

BA 528. Financial and Cost Analysis (3)
BA 531. Business Law–Technology/New Ventures (3)
BA 540. Corporate Finance (3)
BA 543. Financial Markets and Institutions (3)
BA 550. Organization Leadership and Management (3)
BA 555. Practical Business Analysis (3)
BA 561. Supply Chain Management (3)
BA 562. Managing Projects (3)
BA 569. Advanced Strategic Management (3)
BA 572. Advanced Information Systems (3)
BA 590. Marketing Management (3)

Research Thesis Option (13)

BA 503. Thesis (6)
BA 505. Reading and Conference (4)
MRKT 596. Marketing Research Design and Methods (3)

WEALTH MANAGEMENT OPTION

The Wealth Management graduate option within the Master of Business Administration (MBA) program, helps

prepare graduates for careers in financial planning and wealth management. The curriculum includes course work required by the Certified Financial Planner (CFP) certification and also provides students with greater depth of knowledge in asset valuation and portfolio management required in the wealth management industry and for the Chartered Financial Analyst (CFA) designation.

The Wealth Management graduate option requires 54 credits of course work, including 24 credits of general MBA courses, 26 credits within the WM option and 4 credits of option-specific elective course work.

General MBA Course Work (24)

BA 528. Financial and Cost Analysis (3)
BA 540. Corporate Finance (3)
BA 543. Financial Markets and Institutions (3)
BA 550. Organization Leadership and Management (3)
BA 555. Practical Business Analysis (3)
BA 569. Advanced Strategic Management (3)
BA 572. Advanced Information Systems (3)
BA 590. Marketing Management (3)

Wealth Management Option Course Work (26)

FIN 542. Investments (3)
FIN 543. Portfolio Management (4)
FIN 544. Financial Risk Management (4)
FIN 551. Financial Planning I (6)
(Prerequisites: BA 528, FIN 542)
FIN 552. Financial Planning II (3)
(Prerequisites: FIN 551)
FIN 553. Financial Planning III (6)
(Prerequisites: FIN 552)

Elective course options (4)

MRKT 588. Personal Selling (4)
ST 541. Probability, Computing, and Simulation in Statistics (4)

GRADUATE OPTIONS UNDER PHD IN BUSINESS ADMINISTRATION

BUSINESS ADMINISTRATION AND ACCOUNTANCY (MBAA)

The Master of Business Administration and Accountancy is a one-year master's program for students with an undergraduate degree in accounting. It allows accounting students to receive an undergraduate degree and a master's degree during their five years of university study required to become a CPA. As an integrated program, the MBAA is designed to allow students the opportunity to plan early enough in their accounting education program to enable them to receive both an undergraduate degree and a graduate degree. The MBAA is also designed to accommodate postbaccalaureate students wishing to prepare for accounting careers by completing a two-year plan of study.

Fall Term

ACTG 516. Accounting Research and Analysis (3)
 ACTG 522. Strategic Cost Management (4)
 BA 555. Practical Business Analysis
 BA 569. Advanced Strategic Management (3)
 BA 590. New Product Development (3)

Winter Term

ACTG 517. Advanced Accounting (4)
 BA 531. Business Law–Technology/New Ventures (3)
 BA 540. Corporate Finance (3)
 BA 561. Supply Chain Management (3)
 BA 562. Managing Projects (3)

Total=81**Summary of Programs in Accountancy**

Both the one-year and two-year MBAA programs require 53 total accounting related credits (32 undergraduate accounting credits and 21 graduate accounting credits) and 24 business related total credits in the MBA program.

ACCOUNTING COURSES

ACTG 317. EXTERNAL REPORTING I (4). Examines the theory and practice of financial accounting, the processing and controls phases of the accounting system, and reporting to external parties. Emphasis is placed on the accounting cycle and financial statement structure and content. The emphasis on the accounting cycle includes the processing and tracing of transaction data from source documents to financial statements. **PREREQS:** BA 211 and BA 213 and grade of C or better in the prereqs and departmental approval.

ACTG 318. EXTERNAL REPORTING II (4). Continuation from ACTG 317 and the theory and practice of financial accounting and the reporting to external parties. Covers financial reporting objectives to provide information that is useful in investment and credit decisions, in assessing cash flow prospects, and about company resources and claims to those resources. **PREREQS:** ACTG 317 and grade of C or better in the prereqs and junior standing and departmental approval.

ACTG 319. EXTERNAL REPORTING III (4). Continuation from ACTG 318 and the theory and practice of financial accounting and the reporting to external parties. Covers financial reporting objectives to provide information that is useful in investment and credit decisions, in assessing cash flow prospects, and about company resources and claims to those resources. **PREREQS:** ACTG 318 and grade of C or better in the prereq and departmental approval.

ACTG 321. COST MANAGEMENT I (4). Reinforces and builds on the language and concepts of management accounting. Emphasizes different models for product costing and examines their effects on profit planning, budgeting, motivation, and control. **PREREQS:** ACTG 317 and grade of C or better in the prereqs or departmental approval.

ACTG 325. INTRODUCTION TO TAXATION (4). Provides a broad overview of the federal tax system as it applies to business entities that includes fundamental concepts related to tax compliance, tax planning, tax research, and other specialized topics. Emphasis is placed on the role of taxes in decision making and the ability to derive and communicate solutions to tax-related problems. **PREREQS:** ACTG 319 and grade of C or better in the prereqs or acceptance into either the Accounting Certificate Program or the MBA Program. Departmental approval required.

ACTG 378. ACCOUNTING INFORMATION MANAGEMENT (4). Introduces students to the field of information management. Topics include information systems technology, the strategic role of IT, the business applications of networks, databases and Internet technologies, the system life cycle model, systems analysis and design methodologies, and the development and implementation of information systems. Lec/rec. **PREREQS:** (BA 213 and (BA 271 or BA 302) and (BA 275 or BA 276)) and grade of C or better in the prereqs and junior standing and departmental approval required.

ACTG 417. ADVANCED ACCOUNTING (4). An advanced course in financial accounting theory. Covers corporate combinations, consolidated financial statements, and government and not-for-profit accounting. **PREREQS:** ACTG 319 and grade of C or better in the prereqs and departmental approval required.

ACTG 420. IT AUDITING (4). Explores key information systems issues such as planning, acquisition, delivery, and monitoring from a risk and control perspective. Students learn to use IT audit standards, guidelines, and frameworks and build data analysis tool skills. **PREREQS:** ((ACTG 317 or BA 372) and ACTG 378) and grade of C or better in the prereqs and departmental approval required.

ACTG 422. STRATEGIC COST MANAGEMENT (4). Continuation of concepts and processes of management accounting. Emphasizes relevant costs, cost accumulation and allocation, segment performance measurement and control and quantitative techniques. **PREREQS:** ACTG 321 and BA 357 and grade of C or better in the prereqs and departmental approval.

ACTG 425. ADVANCED TAXATION (4). Examination of the federal tax system as it applies to corporations, partnerships, and estates and trusts. Emphasis is placed on understanding tax planning for business owners and refining the ability to research tax issues. **PREREQS:** ACTG 325 and grade of C or better in the prereqs and departmental approval.

ACTG 427. ASSURANCE AND ATTESTATION SERVICES (4). Assertions of enterprises gain credibility when examined by an independent third party. Assurance and attestation provide credibility. Coverage includes ethics, risk, materiality, internal control, evidence and reporting. **PREREQS:** ACTG 319 and grade of C or better in the prereqs or acceptance into either the Accounting Certificate Program or the MBA Program. Departmental approval required.

ACTG 429. TOPICS IN ACCOUNTING (1-4). Analysis of current topics in accounting. Topics will vary from term to term. **PREREQS:** Departmental approval required.

ACTG 516. ACCOUNTING RESEARCH AND ANALYSIS (3). Emphasis on financial accounting, tax and auditing research and analysis and communication of conclusions in the context of accounting case studies. **PREREQS:** Acceptance into the OSU MBAA or approval of the director of the Accounting Program.

ACTG 517. ADVANCED ACCOUNTING (4). An advanced course in financial accounting theory. Corporate combinations, consolidated financial statements, foreign operations and subsidiaries, partnerships, and sole proprietorships; contemporary issues in financial accounting. **PREREQS:** ACTG 319 and grade of C or better in the prereqs and departmental approval required.

ACTG 518. ACCOUNTING THEORY AND PRACTICE I (3). Expands and integrates knowledge of US and international generally accepted accounting principles (GAAP) in a rigorous study of the design, selection, and consequences of various models of financial reporting. **PREREQS:** (ACTG 516 and ACTG 517) and Acceptance into the OSU MBAA or approval by the Director of the Accounting Program.

ACTG 519. ACCOUNTING THEORY AND PRACTICE II (3). Study of the design, selection, and consequences of various models of financial reporting. Research accounting treatments for complex facts and circumstances with ambiguous accounting guidance. Build on financial reporting models to develop in-depth understanding and application of accounting practice. **PREREQS:** ACTG 518 and Acceptance into the OSU Accountancy MBA program or approval of the director of the Accounting Program.

ACTG 520. IT AUDITING (4). Explores key information systems issues such as planning, acquisition, delivery, and monitoring from a risk and control perspective. Students learn to use IT audit standards, guidelines, and frameworks and build data analysis tool skills. **PREREQS:** Grade of "C" or better in (ACTG 317 or BA 372) and ACTG 378. Departmental approval required.

ACTG 522. STRATEGIC COST MANAGEMENT (4). Continuation of concepts and processes of management accounting. Emphasizes relevant costs, cost accumulation and allocation, segment performance measurement and control and quantitative techniques. **PREREQS:** ACTG 321 and BA 357 with a C or better and departmental approval required.

ACTG 524. ENVIRONMENTAL ACCOUNTING AND REPORTING (3). Covers economic and

accounting issues relating to corporate social responsibility and environmental performance. Designed to foster an understanding of how the measurement of social and environmental performance contributes to business goals and strategies. The course provides a framework to help understand the nature, purpose and importance of decision-useful and decision-facilitating CSR and environmental information. **PREREQS:** BA 528

ACTG 525. ADVANCED TAXATION (4). Examination of the federal tax system as it applies to corporations, partnerships, and estates and trusts. Emphasis is placed on understanding tax planning for business owners and refining the ability to research tax issues. **PREREQS:** ACTG 325 with grade of C or better and departmental approval required.

ACTG 527. ASSURANCE AND ATTESTATION SERVICES (4). Assertions of enterprises gain credibility when examined by an independent third party. Assurance and attestation provide credibility. Coverage includes ethics, risk, materiality, internal control, evidence and reporting. **PREREQS:** ACTG 319 and grade of C or better in the prereqs and departmental approval required.

ACTG 529. TOPICS IN ACCOUNTING (1-4). Analysis of current topics in accounting. Topics will vary from term to term. **PREREQS:** Instructor approval required.

ACTG 620. FOUNDATIONS OF ACCOUNTING RESEARCH (3). Introduces first-year doctoral students to accounting research by discussing the development of modern accounting theory, relating it to theories in economics and finance, and exposing students to the different areas of and methodologies used in accounting research. Also begins a survey of classic and contemporary literature in the area of financial accounting research. Specific financial accounting topics may change from quarter to quarter, but sample topics include earnings management, earnings quality, and voluntary disclosure. **PREREQS:** Doctoral student status and departmental approval.

ACTG 621. FINANCIAL ACCOUNTING RESEARCH (3). Surveys classic and contemporary research in the area of financial accounting. Specific topics may change from quarter to quarter, but sample topics include the value relevance of accounting information, post earnings announcement drift, the residual income model, analysts' use accounting information, and market-based assessments of the usefulness and limitations of alternative accounting measurements and disclosures. **PREREQS:** Doctoral student status and departmental approval.

ACTG 623. TAX RESEARCH (3). Surveys classic and contemporary research in the area of taxation. Specific topics may change from quarter to quarter, but sample topics include tax vs. nontax costs in business decisions, book-tax differences, taxes and financial reporting, multijurisdictional tax issues, and tax avoidance. **PREREQS:** Doctoral student status and departmental approval

■ BUSINESS ADMINISTRATION COURSES

BA 101. BUSINESS NOW (6). Presents an integrated view of both established and entrepreneurial business organizations by studying their common processes and characteristics. Introduces theory and develops basic skills in the areas of management, finance, accounting and marketing. Lec/lab/rec.

BA 150. EXPLORING ENTREPRENEURSHIP (1). Participants are challenged with economic concepts and projects. Inspirational speakers address key topics concerning all aspects of business and leadership development. Students must be registered for Young Entrepreneurs Business Week Camp to receive credit for the course. Graded P/N.

BA 151. EXPLORING INVESTING (1). Students participating in Investing Week will learn about basic investment vehicles and the principles of evaluating a potential investment. Students will also learn how to understand the financial market system and how it affects their personal and business life. Students will be assigned a role as a junior analyst with "Toots, Toots and Peabody," and critically assess the benefits and strengths of individual investment vehicles. Graded P/N.

BA 152. EXPLORING SOCIAL ENTREPRENEURSHIP (1). Provides an immersive experience regarding responsible business practices. In addition, from an entrepreneurial perspective, students have the opportunity to explore ways in which real social change is being conducted worldwide. Graded P/N.

BA 160. B-ENGAGED (2). Understand and accomplish college-level academic work and explore OSU resources and options that will enhance your college experience and success. Opportunity to connect with faculty and peers with common interests in a supportive learning environment. **PREREQS:** Students must live in Weatherford Residential College or have instructor approval.

BA 161. WEATHERFORD GARAGE-- AWARENESS TO ACTION (3). First course in a two-course sequence. Begins a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today's global market. Builds a foundation of entrepreneurial knowledge and gaining a competitive edge while becoming aware of your role in managing your own career. **PREREQS:** Students must live in Weatherford Residential College or have instructor approval.

BA 162. WEATHERFORD GARAGE-- IDEAS TO REALITY (3). Second course in a two-course sequence. Topics include evaluating entrepreneurial capabilities, creativity and innovation, opportunity recognition, impression management, and responsible business practices. Continues a conversation on self-management, offering opportunities for active reflection on critical skill sets necessary for success in today's global market. **PREREQS:** BA 161 and Students must live in Weatherford Residential College or have instructor approval.

BA 199. SPECIAL STUDIES (1-4). Graded P/N. This course is repeatable for a maximum of 4 credits.

BA 211. FINANCIAL ACCOUNTING (4). Accounting information from the perspective of external users, principally investors and creditors. Emphasis on the preparation and interpretation of financial statements, income recognition and determination, and asset valuation. **PREREQS:** (MTH 111 or MTH 241 or MTH 251 or MTH 251H) or Placement Test and a minimum grade of C- or better. Sophomore standing.

BA 213. MANAGERIAL ACCOUNTING (4). Accounting information from the perspective of management users with an emphasis on data accumulation for product costing, planning, and performance evaluation and control. **PREREQS:** BA 211 and a minimum grade of C- or better.

BA 215. FUNDAMENTALS OF ACCOUNTING (4). Looks at how the accounting model reflects business transactions and events. Students are introduced to both financial and managerial accounting and the creation, interpretation, and analysis of financial statements. In addition, students obtain an understanding of the determination, organization, and management of costs and revenues including management decisions based upon this information.

BA 215H. FUNDAMENTALS OF ACCOUNTING (4). Looks at how the accounting model reflects business transactions and events. Students are introduced to both financial and managerial accounting and the creation, interpretation, and analysis of financial statements. In addition,

students obtain an understanding of the determination, organization, and management of costs and revenues including management decisions based upon this information.

PREREQS: Honors College approval required.

BA 230. BUSINESS LAW I (4). Nature and function of law in our business society. Obligations arising out of agency, contract formation and breach, crimes, torts, warranty, regulation of competition, and international aspects thereof.

PREREQS: Sophomore standing. Not open to business majors.

BA 233. LEGAL ENVIRONMENT OF BUSINESS (2). Nature and function of U.S. law in our business society. Obligations arising out of agency and employment law, contract formation and breach, warranty, crimes and torts. **PREREQS:** Sophomore standing.

BA 260. INTRODUCTION TO ENTREPRENEURSHIP (4). Topics include evaluating entrepreneurial capabilities, creativity, business plan creation, opportunity assessment and feasibility analysis, business implementation, new product introduction, and seeking funds. **PREREQS:** Sophomore standing.

BA 260H. INTRODUCTION TO ENTREPRENEURSHIP (4). Topics include evaluating entrepreneurial capabilities, creativity, business plan creation, opportunity assessment and feasibility analysis, business implementation, new product introduction, and seeking funds. **PREREQS:** Sophomore standing and Honors College approval required.

BA 272. BUSINESS APPLICATION DEVELOPMENT (4). Introduction to business programming with C#.NET. Beginning programming skills and concepts, .NET programming environment, object-oriented and event-oriented models, and console applications.

BA 276. INTRODUCTION TO STATISTICAL INFERENCE (2). An introductory level statistics course on data analysis and statistical inference with an emphasis on business applications. Coverage includes descriptive statistics, random variables, probability distributions, sampling and sampling distributions, statistical inference for means and proportions using one and two samples. It serves as a prerequisite to BA 376. **PREREQS:** (MTH 245 or MTH 251 or MTH 251H) and a minimum grade of C- or better. Sophomore standing.

BA 302. BUSINESS PROCESS MANAGEMENT (4). Integrates core concepts from Business Information Systems (BIS) with those of Operations Management and introduces a process-oriented view of the flows of materials, information and services through and across organizations. The course helps students identify information-bearing events, assess and improve process efficiency, learn to model and analyze business processes, and understand the interactions between human behavior and process design. Hands-on, case-based assignments and labs allow students to practice the principles addressed. **PREREQS:** (MTH 245 or MTH 251 or MTH 251H) and a minimum grade of C- or better. Sophomore standing.

BA 333. LEGAL AND ETHICAL BUSINESS SOLUTIONS (2). Legal and ethical regulations of U.S. and global business organizations including financial, human resources, operations and marketing functions. Emphasizes legal and ethical strategies for entrepreneurs including business entity selection, raising capital and managing intellectual property. **PREREQS:** ((BA 230 or BA 233) and (ECON 201 or ECON 201H)) and a minimum grade of C- or better. Junior standing.

BA 347. INTERNATIONAL BUSINESS (4). Integrated view of international business including current patterns of international business, socioeconomic and geopolitical systems within countries as they affect the conduct of business, major theories explaining international business

transactions, financial forms and institutions that facilitate international transactions, and the interface between nation states and the firms conducting foreign business activities. **PREREQS:** (ECON 202 or ECON 202H) and a minimum grade of C- or better. Junior standing.

BA 348. INTERNATIONAL EXCHANGE ORIENTATION (1). Consists of large-group sessions as well as small-group break-out sessions for each country individually. It is vital to attend all sessions as valuable information pertaining to your study abroad opportunity will be presented. Graded P/N.

BA 349. IMPACT OF CULTURE ON BUSINESS (1). A requirement of all students participating in a College of Business-approved international exchange program and for completing the College of Business International Business option. The major emphasis is for students to reflect on their experience while studying, living and traveling in a foreign culture and for them to determine how the foreign culture impacts how they would conduct business in that country. Graded P/N. **PREREQS:** BA 348* and a minimum grade of C- or better.

BA 351. MANAGING ORGANIZATIONS (4). A systems perspective to understanding the management functions of planning, organizing, leading and controlling. Ethical and diversity issues are addressed as they are relevant in entrepreneurial and established ventures. **PREREQS:** Junior standing. No credit for business administration majors.

BA 352. MANAGING INDIVIDUAL AND TEAM PERFORMANCE (4). Diagnose individual and small-group behavior and develop skill in improving individual and small-group performance in entrepreneurial and established ventures. Emphasis on professional skill development and the practical application of theory and research. Concepts of ethics, diversity and cross-cultural relations are integrated throughout the course. **PREREQS:** (COMM 111 or COMM 111H or COMM 114 or COMM 114H) and a minimum grade of C- or better. Junior standing.

BA 352H. MANAGING INDIVIDUAL AND TEAM PERFORMANCE (4). Diagnose individual and small-group behavior and develop skill in improving individual and small-group performance in entrepreneurial and established ventures. Emphasis on professional skill development and the practical application of theory and research. Concepts of ethics, diversity and cross-cultural relations are integrated throughout the course. **PREREQS:** (COMM 111 or COMM 111H or COMM 114 or COMM 114H) and a minimum grade of C- or better. Junior standing. Honors College approval required.

BA 353. ^PROFESSIONAL DEVELOPMENT (4). Designed to improve the ability of students to describe their accomplishments and sell themselves in situations like professional networking, company meetings, response to proposals for services, and interviews. Emphasizes writing skills, workplace integration, verbal communication, and preparation of developmental roadmaps that will lead students to success within their chosen profession. (Writing Intensive Course) **PREREQS:** ((COMM 111 or COMM 111H or COMM 114 or COMM 114H) and (WR 222 or WR 323 or WR 327)) and BA 101 and a minimum grade of C- or better. Junior standing.

BA 357. OPERATIONS MANAGEMENT (4). Decision making in managing the production of goods and services: product planning, process planning, facility planning, control of quantity, cost and quality. Special emphasis on exponential forecasting, inventory management, work methods, project management, productivity improvement, and international comparisons. **PREREQS:** (BA 275 or BA 276) and a minimum grade of C- or better. Junior standing.

BA 360. INTRODUCTION TO FINANCIAL MANAGEMENT (4). Explore the issues facing a financial manager in new business ventures,

small businesses, and corporations. Focus on the role of the financial manager in business settings, explores the functions of a financial manager in financial analysis, forecasting, planning, and control; asset and liability management; capital budgeting; and raising funds for new business ventures, small businesses, and corporations. **PREREQS:** ((BA 213 or BA 215 or BA 215H) and (ECON 201 or ECON 201H or AREC 250)) and a minimum grade of C- or better.

BA 360H. INTRODUCTION TO FINANCIAL MANAGEMENT (4). Explore the issues facing a financial manager in new business ventures, small businesses, and corporations. Focus on the role of the financial manager in business settings, explores the functions of a financial manager in financial analysis, forecasting, planning, and control; asset and liability management; capital budgeting; and raising funds for new business ventures, small businesses, and corporations. **PREREQS:** ((BA 213 or BA 215 or BA 215H) and (ECON 201 or ECON 201H or AREC 250)) and a minimum grade of C- or better. Honors College approval required.

BA 362. SOCIAL ENTREPRENEURSHIP AND SOCIAL INITIATIVES (4). The core concepts of entrepreneurship, using entrepreneurship to craft innovative responses to social problems. Entrepreneurial skills are as valuable in the social sector as they are in business. Includes both profit and non-profit firms that have programs designed to create social value. **PREREQS:** Junior standing.

BA 363. TECHNOLOGY AND INNOVATION MANAGEMENT (4). Introduces students to the fundamentals of managing innovation and technology toward the production of intellectual assets; how innovations are created, evaluated and leveraged within business strategy; and how innovation is managed within various business environments. **PREREQS:** (BA 260 or BA 260H) and a minimum grade of C- or better.

BA 364. PROJECT MANAGEMENT (4). Covers the tools available to project managers, the human and organizational dimensions in different project environments, some computer applications, cases, and a project. **PREREQS:** (BA 351 or BA 352 or BA 352H) and a minimum grade of C- or better.

BA 365. FAMILY BUSINESS MANAGEMENT (4). Focuses on the opportunities and the problems characteristic of family businesses: entrepreneurship, management succession, transfer of ownership, mixing family and business roles, family conflicts, personnel issues, non-family employees, and outside advisors. Taught via Ecampus only. **PREREQS:** Junior standing or instructor permission.

BA 370. BUSINESS INFORMATION SYSTEMS OVERVIEW (4). Introduce students to the field of information management. Topics include information systems technology, the strategic role of IT, the business applications of networks, databases and Internet technologies, and the development and implementation of information systems. Use relational database models to design a real-world case study. **PREREQS:** BA 302 and a minimum grade of C- or better. Junior standing.

BA 371. BUSINESS INFORMATION SYSTEMS ANALYSIS AND DESIGN (4). Explore systems analysis, logical design and documentation of information system (IS) applications with process-oriented methodologies. **PREREQS:** (BA 272 and ACTG 378) and a minimum grade of C- or better. Junior standing.

BA 372. BUSINESS INFORMATION SYSTEMS DESIGN AND DEVELOPMENT (4). Logical and physical design of computer-based information systems; tools and techniques that underlie the design processes. Design of an enterprise information system with CASE tools. Alternative approaches to systems design with emphasis on object-orientation. **PREREQS:** BA 371 and a minimum grade of C- or better. Junior standing.

BA 376. APPLIED QUANTITATIVE METHODS (2). An in-depth discussion on advanced quantitative methods most relevant to business students. Topics may include regression analysis, time series and forecasting, design of experiments, simulations, decision analysis, survey data analysis, data mining and computationally intensive statistical methods. **PREREQS:** BA 276 and a minimum grade of C- or better. Available to business majors only.

BA 390. MARKETING (4). Consumer and industrial markets, and activities and enterprises involved in distributing products to those markets. Objective is to develop an understanding of distribution processes, marketing problems, and marketing principles. **PREREQS:** (ECON 201 or ECON 201H or AREC 250) and a minimum grade of C- or better. Junior standing.

BA 390H. MARKETING (4). Consumer and industrial markets, and activities and enterprises involved in distributing products to those markets. Objective is to develop an understanding of distribution processes, marketing problems, and marketing principles. **PREREQS:** (ECON 201 or ECON 201H or AREC 250) and a minimum grade of C- or better. Junior standing. Honors College approval required.

BA 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

BA 405. READING AND CONFERENCE (1-16). Supervised individual work in some field of special application and interest. Subjects chosen must be approved by professor in charge. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior standing and departmental approval required.

BA 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

BA 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

BA 407H. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

BA 410. BUSINESS INTERNSHIP (1-12). Planned and supervised work experience at selected cooperating business firms. Supplementary training, conference, reports, and appraisals. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Upper-division standing and departmental approval required.

BA 432. ENVIRONMENTAL LAW AND BUSINESS (4). Covers environmental laws and regulation. Explores fundamental legal and policy issues raised by environmental law and clean energy policies and their impact on business management. **PREREQS:** Junior level standing.

BA 447. TOPICS IN INTERNATIONAL BUSINESS (1-4). Analysis of current topics in international business. Topics will vary from term to term. **PREREQS:** BA 347 and a minimum grade of C- or better.

BA 458. INNOVATION AND NEW PRODUCT DEVELOPMENT (4). Strategic management of an organization's system and technologies in support of innovation and new product/service development. Application experience with new product/service development process using problem solving skills, information management, and critical thinking. **PREREQS:** (BA 390 or BA 390H) and a minimum grade of C- or better.

BA 460. VENTURE MANAGEMENT (4). Entrepreneurial and innovation processes applied to new business start-ups, existing small businesses, and new ventures within larger organizations; new venture planning, project management, and productivity improvement. Cases and projects are used to apply concepts and to develop communication skills. **PREREQS:** ((BA 260 or BA 260H) and (BA 351 or BA 352

or BA 352H) and (BA 390 or BA 390H)) and a minimum grade of C- or better. Senior standing.

BA 463. FAMILY BUSINESS MANAGEMENT (4). Focuses on the opportunities and the problems characteristic of family businesses: entrepreneurship, management succession, transfer of ownership, mixing family and business roles, family conflicts, personnel issues, non-family employees, and outside advisors. **PREREQS:** Senior standing and instructor approval.

BA 464. NEW VENTURE FINANCING (4). Explore financial issues facing entrepreneurial business ventures: cash flow and budgets, financial analysis, financial statement forecasting, financial controls, asset management, and understanding the funding options at different points in the business life cycle including SBA loans, angel investment, venture capital, bank loans, and going public. **PREREQS:** ((BA 260 or BA 260H) and (BA 340 or FIN 340 or BA 340H or FIN 340H or BA 360)) and a minimum grade of C- or better.

BA 465. *SYSTEMS THINKING AND PRACTICE (4). Hard and soft system theories examined, methods and techniques for dealing with real-world problems; skills and dialogue techniques to identify mindsets, define problems, and explore alternative pathways for solutions. (Bacc Core Course)

BA 465H. *SYSTEMS THINKING AND PRACTICE (4). Hard and soft systems theories are examined, including methods and techniques for dealing with real-world problems; skills and dialogue techniques to identify mindsets, define problems, and explore alternative pathways for solutions. **PREREQS:** Honors College approval required.

BA 466. INTEGRATIVE STRATEGIC EXPERIENCE (4). Provides students with an overview of the basic concepts in strategic management. Students learn frameworks and models to understand and analyze a firm's external environment and internal resources in an effort to create sustainable competitive advantages. Analysis and critique of conventional conceptions of business ethics. Evaluation of ethical issues involving businesses at firm, national, and international levels. **PREREQS:** ((BA 340 or BA 340H or FIN 340 or FIN 340H or BA 360) and (BA 352 or BA 352H) and BA 357 and (BA 390 or BA 390H)) and a minimum grade of C- or better. Senior standing.

BA 467. NEW VENTURE LABORATORY (4). Entrepreneurship capstone course. Fully develop a business plan including product specs with prototype, financial analysis, market analysis, marketing plan, management structure and proposed financing. **PREREQS:** (BA 357 and BA 458) and a minimum grade of C- or better.

BA 468. TECHNOLOGY COMMERCIALIZATION (4). "Hands on" class in which students will exercise commercialization concepts on recently awarded Oregon State University patents. Students will learn a process and tools to assess the business viability of a technical idea, and to develop the best business approach for commercialization. **PREREQS:** BA 363 and a minimum grade of C- or better. Or instructor permission.

BA 479. BUSINESS TELECOMMUNICATIONS AND NETWORKING (4). Provide a fundamental understanding of the five-layer Internet model and its effects on the business environment. Planning and managing networks in support of enterprise-wide computing. Assignments involve server hardware and software configurations including DNS/DHCP server configurations, addition of clients to a network, and creating/managing user accounts. **PREREQS:** ACTG 378 and a minimum grade of C- or better. Or instructor approval.

BA 482. SMALL-BUSINESS MANAGEMENT (4). Covers the management and building of small- to mid-sized businesses that are past the

initial start-up phase. Topics such as promotion and marketing, human resource management, operations and quality control, budgeting, and risk management will be discussed in a small-business context. **PREREQS:** BA 260 (undergraduate); none for graduate course. Junior standing.

BA 483. BUSINESS ANALYTICS (4). Presents how organizations can successfully "collect, evaluate and apply information" for better decision making. Technologies such as transaction processing systems, RFID, weblogs, social networks, website usage, and online communities have the potential to reveal market trends, suppliers' preferences, and competitors' next moves. The success of an organization largely depends on its ability to take advantage of those data sets that are already available to it. **PREREQS:** BA 371 and BA 479 and a minimum grade of C- or better. Senior standing.

BA 487. HOSPITALITY FINANCIAL MANAGEMENT (4). Introduces students to the evaluation of investments in competitive products and services as sustainable strategies for the hospitality industry. **PREREQS:** (BA 360 and BA 486) and a minimum grade of C- or better in BA 360 and C- in BA 486 and senior standing.

BA 488. ADVANCED HOSPITALITY MANAGEMENT (4). Designed to provide students with an in-depth understanding of the importance of core competencies in the hospitality industry in terms of overall value addition, competitive methods, and competitive advantage, taking into consideration both present and future effects. **PREREQS:** BA 352 and a minimum grade of C- or better.

BA 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

BA 503. THESIS (1-16). This course is repeatable for a maximum of 32 credits.

BA 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

BA 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

BA 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

BA 510. BUSINESS INTERNSHIP (1-6). Planned and supervised work experience at selected cooperating business firms. Supplementary training, conferences, reports, and appraisals. This course is repeatable for a maximum of 16 credits. **PREREQS:** Graduate standing, departmental approval required.

BA 512. BUSINESS ANALYSIS AND COMMUNICATION (6). Students will be guided through a process of determining business issues or challenges given specific situations, providing reasons/justifications why these are important, proposing solutions to the identified business problems, and communicating this analysis through in-class discussions and writing. **PREREQS:** ALS 162 and/or instructor approval.

BA 513. THE ESSENCE OF BUSINESS-BUSINESS LEGAL ENVIRONMENT (3). Provides essential legal foundation for business managers in companies operating in the U.S. Emphasizes effective strategies for managers to prevent and resolve legal disputes against companies. Topics include legal issues related to the corporate form of doing business, forming and enforcing contracts, minimizing tort liability, and retaining and managing company employees and independent contractors.

BA 514. THE ESSENCE OF BUSINESS-SUSTAINABLE BUSINESS OPERATIONS (4). Provides a foundation for business managers in statistics and operations management. Emphasis on quantitative tools for sampling, interval estimation and hypothesis testing as well as operations management concepts for processes, quality systems, supply chain management,

inventory management, resource planning, and sustainable lean systems. **PREREQS:** College algebra (including probabilities).

BA 515. THE ESSENCE OF BUSINESS--ACCOUNTING AND FINANCE (4). A graduate-level survey course that provides a foundation for business managers in the concepts of accounting and finance. Emphasis on the preparation and interpretation of financial statements, income recognition and determination, data accumulation for product costing, and financial analysis, forecasting, planning, and control. **PREREQS:** College algebra.

BA 516. THE ESSENCE OF BUSINESS--MANAGEMENT AND MARKETING (4). A graduate-level survey course that provides a foundation for business managers in the concepts of management and marketing. Diagnose individual and small-group behavior and develop skill in improving individual and small-group performance in entrepreneurial and established ventures. Develop an understanding of marketing principles and an awareness of marketing challenges. **PREREQS:** Microeconomics.

BA 528. FINANCIAL AND COST ANALYSIS (3). Analysis of the balance sheet and income statement to determine profitability, risk, and rate of return; preparation of pro forma financial statements; cost measurement for products, projects, jobs, customers, and markets; strategic cost decision making for pricing and resource allocation. **PREREQS:** BA 213 with C- or higher and graduate standing.

BA 531. BUSINESS LAW - TECHNOLOGY/NEW VENTURES (3). An integrative course on managing legal and ethical issues for new ventures. Focuses on business law for founders of start-up companies including formation of new business entities, protecting intellectual property, workforce management and global issues. Topics presented from an entrepreneurial perspective and include technology law, e-commerce law and government regulation. Students develop skills to identify and resolve legal and ethical issues, deal with administrative agencies, and proactively manage legal liability. Considerations of ethics and corporate responsibility are emphasized. **PREREQS:** BA 230 and BA 233 and BA 513 or equivalent with a minimum grade of C- or better, graduate standing.

BA 532. ENVIRONMENTAL LAW AND BUSINESS (4). Covers environmental laws and regulation. Explores fundamental legal and policy issues raised by environmental law and clean energy policies and their impact on business management. **PREREQS:** Graduate standing.

BA 533. BUSINESS LAW FOR MANAGERS (3). Develops knowledge and skills about business law used by managers in global organizations. Topics covered include establishing lawful and ethical business practices; preventing and responding to compliance failures, infringement and other legal threats; effective use of contracts; and resolving disputes through litigation and alternative dispute resolution. **PREREQS:** BA 230 and BA 233 and BA 513 and PHAR 707 and PHAR 708 or equivalent.

BA 540. CORPORATE FINANCE (3). Emphasizes analytical tools to measure and manage firm value, through corporate strategies such as mergers and acquisitions, leveraged buyouts, international expansion, and new venture development. **PREREQS:** (BA 340 or FIN 340 or FIN 340H) with a minimum grade of C- or better and graduate standing.

BA 543. FINANCIAL MARKETS AND INSTITUTIONS (3). Investigates the five major financial markets: common stock, bond, derivatives, mortgage, and currency. The course examines the agents in each of these markets, the rules of trading, and the rationale of the agents participating in the different markets. **PREREQS:** (BA 340 or FIN 340 or FIN 340H) with a minimum grade of C- or better and graduate standing.

BA 550. ORGANIZATION LEADERSHIP AND MANAGEMENT (3). Organization-wide implementation issues driven by change. Provides a balanced view of the structural and human sides of organization design. **PREREQS:** BA 352 a minimum grade of C- or better and graduate standing.

BA 551. GLOBAL SUPPLY AND SOURCING (3). Focus on effectively using operations and supply chain management to make sourcing and supply decisions in international business contexts. Topics include purchasing/procurement procedures and policy, supply organization, specifications, sourcing strategy, supplier evaluation, competitive bidding, and e-procurement. Global contexts and environmentally and socially responsible supply management are emphasized. **PREREQS:** BA 561 and BA 561 Supply Chain Management (may be completed concurrently) and graduate standing.

BA 551X. PROJECT METHODOLOGY FOR SCIENTISTS (3). Integrates best practices from project management to improve leadership, quality, resource use, and productivity of projects in natural resources. Students will employ concepts, tools, and techniques from project management in a class project. Students will also analyze their experiences and evaluate the methods used.

BA 552. GLOBAL SERVICE OPERATIONS AND LOGISTICS (3). Focus on the management of global service operations including designing and managing systems to coordinate global information and material flows within and between firms in a supply chain. Covers planning operations, evaluating system alternatives, designing and researching global supply networks, examining complex adaptive systems and evaluating value stream synchronization. **PREREQS:** BA 555 and graduate standing.

BA 554. GLOBAL OPERATIONS CAPSTONE (3). Analyze business cases that address global value creation and production/delivery systems. Complete integrated business projects to identify critical operations and supply chain management issues, apply multidisciplinary knowledge, analyze and evaluate alternative solutions and write and present reports recommending firm strategies. International business and cross-cultural competencies are emphasized. **PREREQS:** BA 551 and BA 561 and graduate standing; Global Operations Track of MBA Program.

BA 555. PRACTICAL BUSINESS ANALYSIS (3). Advanced survey of quantitative business methods useful for aiding management decisions. Topics include a review of basic statistics, mathematical programming, business simulation, statistical process control, advanced regression analysis and forecasting. **PREREQS:** BA 275 with a minimum grade of C- or better graduate standing.

BA 560. VENTURE PLANNING (3). Entrepreneurial and innovation processes applied to new business start-ups, existing small businesses, and new ventures within larger organizations; emphasis on venture planning with project management. Lec/rec. **PREREQS:** ((BA 340 or BA 340H or FIN 340 or FIN 340H) and (BA 390 or BA 390H)) with a minimum grade of C- or better and graduate standing. Restricted to MBA students who are completing the Integrated Business Project (IBP).

BA 561. SUPPLY CHAIN MANAGEMENT (3). Covers tools and concepts needed to manage the entire supply chain effectively. Topics include negotiation, purchasing, logistics operations, and applying e-business tools. Emphasis on creating integrated supply chains. **PREREQS:** (BA 357 and BA 555) with a minimum grade of C- or better.

BA 562. MANAGING PROJECTS (3). Covers tools and concepts used by managers to plan and initiate business projects. Computer applications, cases and a project. **PREREQS:** (BA 352 and BA 357) with a minimum grade of C- or better and graduate standing.

BA 563. FAMILY BUSINESS MANAGEMENT (4). Focuses on the opportunities and the problems characteristic of family businesses: entrepreneurship, management succession, transfer of ownership, mixing family and business roles, family conflicts, personnel issues, non-family employees, and outside advisors. **PREREQS:** Graduate standing and instructor approval.

BA 565. SYSTEMS THINKING AND PRACTICE (4). Hard and soft system theories examined, methods and techniques for dealing with real-world problems; skills and dialogue techniques to identify mindsets, define problems, and explore alternative pathways for solutions. **PREREQS:** Graduate standing.

BA 566. CLEAN TECHNOLOGY COMMERCIALIZATION (3). Students will exercise commercialization concepts on recently awarded clean technology patents. Students will learn process and tools to assess the business viability of a technical idea, and to develop the best business approach for commercialization. Lec/rec. **PREREQS:** Graduate standing.

BA 567. SELECTED TOPICS IN MANAGEMENT (1-4). Examination of the impact of recent advances in management on contemporary business. Topic will vary from term to term. Lec/rec. This course is repeatable for a maximum of 16 credits. **PREREQS:** Graduate standing.

BA 568. INTEGRATED BUSINESS PROJECT (3). The project requires students to complete a business plan, as a means of directing the development of a business. A business plan can help focus a business idea, chart a course for strategic business development, and facilitate setting objectives and creating evaluative benchmarks of progress. To be taken during the last year of the MBA program.

BA 569. ADVANCED STRATEGIC MANAGEMENT (3). Advanced integrative case-based course on the process of systematically developing and managing firm strategies. Topics are covered from a general management perspective and include setting corporate goals and objectives, analyzing external competitive environments, understanding business models, identifying strategy options, and designing appropriate organization systems and structure for implementation of plans. International and e-business issues are integrated throughout. **PREREQS:** Graduate standing. All foundation courses.

BA 572. ADVANCED INFORMATION SYSTEMS (3). The development, implementation and management of information technology applications will be addressed. Topics will address the development and application of technology to support linkages within the organization and outside the organization. Projects will be assigned to illustrate the topics. **PREREQS:** Graduate standing.

BA 582. SMALL-BUSINESS MANAGEMENT (4). Covers the management and building of small- to mid-sized businesses that are past the initial start-up phase. Topics such as promotion and marketing, human resource management, operations and quality control, budgeting, and risk management will be discussed in a small-business context. **PREREQS:** BA 260 (undergraduate); none for graduate course. Junior standing.

BA 590. MARKETING MANAGEMENT (3). Provides students with an understanding of how a market-orientation can help firms to profitably deliver value to their targeted customers. Through a combination of lectures, in-class exercises, and case discussions, students will learn how to analyze complex marketing challenges, and make strategic decisions based on established marketing management principles. **PREREQS:** BA 390 with a minimum grade of C- or better and graduate standing.

BA 601. RESEARCH AND SCHOLARSHIP (1-16). Graded P/N. This course is repeatable for a maximum of 32 credits.

BA 602. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 32 credits.

BA 603. THESIS/DISSERTATION (1-16). Graded P/N. This course is repeatable for a maximum of 32 credits.

BA 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 32 credits.

BA 607. SEMINAR (1-16). This course is repeatable for a maximum of 32 credits.

BA 611 TEACHING EFFECTIVENESS (1-6). Provides an overview of a broad range of effective teaching techniques and common issues associated with teaching at the college level (e.g. defining learning outcomes, common pitfalls, assessing of student learning, etc.). This course is repeatable for a maximum of 6 credits. **PREREQS:** Doctoral student status.

BA 613 SEMINAR IN BUSINESS RESEARCH METHODS (3). Provides first-year business PhD students with an in-depth introduction to the most common research methodologies used by current business faculty across multiple functional disciplines. Specific research methods covered may change from quarter to quarter, but sample topics include use of basic econometric models for analysis of archival data, experimental methodologies, qualitative research techniques, and survey research. **PREREQS:** Doctoral student status and departmental approval.

BA 660. FOUNDATIONS OF ENTREPRENEURSHIP RESEARCH (3). Provides a broad overview of the foundations of entrepreneurship research, including theoretical underpinnings of the field as well as some of the common and/or promising approaches to the study of entrepreneurial phenomena. **PREREQS:** Doctoral student status and departmental approval.

BA 661. DOCTORAL SEMINAR IN ORGANIZATIONAL THEORY (3). Surveys research on classic and contemporary developments in basic organizational theory. **PREREQS:** Doctoral student status and departmental approval.

BA 662. CORPORATE ENTREPRENEURSHIP AND NEW VENTURES (3). Surveys research in the area of corporate entrepreneurship and venturing, focusing on relevant theoretical underpinnings and core concepts in the corporate entrepreneurship, entrepreneurship, and strategy literatures. **PREREQS:** Doctoral student status and departmental approval.

BA 664. TECHNOLOGY AND INNOVATION MANAGEMENT (3). Surveys research on the management of innovation and technology in organizations, focusing on innovation as an outcome (product, service, technology, practice) and on the process of generation, adoption, and implementation of innovation in organizations. **PREREQS:** Doctoral student status and departmental approval.

BA 808. WORKSHOP (1-16). Workshops aimed at practicing professionals in the discipline. Topics may vary.

■ FINANCE COURSES

FIN 340. FINANCE (4). Role and functions of a financial manager in the modern business environment in which a manager operates; formulation of financial objectives and policies; financial analysis, forecasting, planning, and control; asset management; capital budgeting; acquisition of funds through borrowing, stock issue, and by internal means; dividend policy; and international aspects of finance. **PREREQS:** ((BA 213 or BA 215 or BA 215H) and (ECON 201 or ECON 201H)) and a minimum grade of C- or better. Junior standing.

FIN 340H. FINANCE (4). Role and functions of a financial manager in the modern business

environment in which a manager operates; formulation of financial objectives and policies; financial analysis, forecasting, planning, and control; asset management; capital budgeting; acquisition of funds through borrowing, stock issue, and by internal means; dividend policy; and international aspects of finance. **PREREQS:** ((BA 213 or BA 215 or BA 215H) and (ECON 201 or ECON 201H)) and a minimum grade of C- or better. Junior standing. Honors College approval required.

FIN 341. INVESTMENTS (4). Risk and reward characteristics of investments; sources of investment information; domestic and international security markets; investment characteristics of common stocks, debt securities, convertible securities, option contracts, and investment companies; real property investment; economic market analysis; technical market analysis; tax aspects of investments; and investment management. **PREREQS:** (FIN 340 or FIN 340H or BA 340 or BA 340H or BA 360) and a minimum grade of C- or better.

FIN 342. ADVANCED FINANCIAL MANAGEMENT (4). Capital market theory and the valuation of risky assets, capital budgeting, valuing the firm's securities, capital structure theory, long-term financing alternatives, cost of capital, dividend policy, working capital management, financial analysis and planning, mergers, and takeovers. **PREREQS:** (FIN 340 or FIN 340H or BA 340 or BA 340H or BA 360) and a minimum grade of C- or better.

FIN 434. CFA PREPARATION (2-4). Provides students with structure and guidance in their preparation for the Chartered Financial Analyst (CFA) Level exam. Students systematically prepare for and are tested on the 18 sections of the exam. This course is repeatable for a maximum of 4 credits.

FIN 437. APPLIED PORTFOLIO MANAGEMENT I (2). Hands-on experience of managing two investment portfolios. Each member in the Oregon State Investment Group (OSIG) should act as a financial analyst to analyze a chosen company by performing the Discounted Cash Flow (DCF) or Residual Income Model (RIM), the relative valuation, and the SWOT analyses. The weekly seminar offers opportunities for students to present their analyses and offer comments and suggestions to other's presentations. **PREREQS:** Junior standing, instructor approval required.

FIN 438. APPLIED PORTFOLIO MANAGEMENT II (1). Each student will act as a financial analyst to analyze a chosen company using models learned in FIN 437. Provides students with an opportunity to practice security valuation and get familiar with the tools. In addition, this course will focus on various measures of portfolio performance. **PREREQS:** FIN 437 or BA 437 and a minimum grade of C- or better. Junior standing and instructor approval required.

FIN 439. APPLIED PORTFOLIO MANAGEMENT III (1). Each student will act as a financial analyst to analyze a chosen company using models learned from FIN 437. Provides students additional opportunity to practice security valuation and strengthen their understanding of the tools. In addition, this course will introduce ways to develop an efficient portfolio. **PREREQS:** FIN 437 or BA 437 and a minimum grade of C- or better. Junior standing and instructor approval required.

FIN 441. FINANCIAL INSTITUTIONS (4). Introduction of markets and institutions that form the economic system of trading financial and real assets both domestically and internationally. The introduction of concepts of financial theory, institutional detail, regulatory environments, and the history of financial markets. Topics include legal, ethical, technological, and global issues facing financial managers, markets, and institutions. **PREREQS:** FIN 341 or BA 341 or AREC 465 and with a minimum grade of C- or better. Senior standing.

FIN 442. FINANCIAL STATEMENT ANALYSIS (4). Student develop the understanding and skill to use financial statements for investment decisions, credit decisions, performance analysis, and forecasting. Three main topic areas: analysis overview, accounting analysis, and financial analysis. **PREREQS:** ACTG 317 and (BA 341 or FIN 341) and a minimum grade of C- or better. Senior standing.

FIN 443. PORTFOLIO MANAGEMENT (4). An introduction to the construction, revision, and performance evaluation of financial asset portfolios. **PREREQS:** FIN 341 or BA 341 and a minimum grade of C- or better.

FIN 444. FINANCIAL RISK MANAGEMENT (4). Investigation of financial hedging activities for corporations and financial institutions using futures, options, and other derivative securities. Identification of risk attributes, valid hedging rationales, and management of hedging programs. **PREREQS:** FIN 341 or BA 341 and a minimum grade of C- or better.

FIN 445. INTERNATIONAL FINANCIAL MANAGEMENT (4). International monetary environment; foreign exchange risk management; source and availability of funds to finance trade and multinational operations; taxation planning and control; international portfolio diversification; international banking; capital budgeting; political risk evaluation of performance. **PREREQS:** (FIN 342 or BA 342) and (BA 347 or ECON 340) and (FIN 441 or FIN 444 or BA 441 or BA 444) and a minimum grade of C- or better.

FIN 499. SELECTED TOPICS IN FINANCE (1-4). Examination to the impact of recent advances in finance on contemporary business. Topic will vary from term to term. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior standing and departmental approval.

FIN 542. INVESTMENTS (3). Introduction to the tools and concepts of security analysis and investments; basic security types, including stocks, bonds, options and futures, respective markets and to how these securities are traded; fundamental valuation techniques and theory for stocks and bonds. **PREREQS:** BA 360 or equivalent.

FIN 543. PORTFOLIO MANAGEMENT (4). An introduction to the construction, revision, and performance evaluation of financial asset portfolios. **PREREQS:** FIN 542

FIN 544. FINANCIAL RISK MANAGEMENT (4). Investigation of financial hedging activities for corporations and financial institutions using futures, options, and other derivative securities. Identification of risk attributes, valid hedging rationales, and management of hedging programs. **PREREQS:** FIN 542 and .

FIN 545. INTERNATIONAL FINANCIAL MANAGEMENT (4). International monetary environment; foreign exchange risk management; source and availability of funds to finance trade and multinational operations; taxation planning and control; international portfolio diversification; international banking; capital budgeting; political risk evaluation of performance. **PREREQS:** (FIN 342 or BA 342) and (BA 347 or ECON 340) and (FIN 441 or FIN 444 or BA 441 or BA 444) and a minimum grade of C- or better. Junior standing.

FIN 551. FINANCIAL PLANNING I (6). Fundamentals of financial planning; regulations in the financial services industry; income and debt management techniques; risk management process in financial planning; insurance planning; income tax fundamentals; tax management strategies. **PREREQS:** BA 528 and FIN 542

FIN 552. FINANCIAL PLANNING II (3). Retirement planning; qualified and non-qualified retirement plans; IRAs; legal, tax, financial and non-financial aspects of estate planning; trusts; wills; wealth transfers. **PREREQS:** FIN 551

FIN 553. FINANCIAL PLANNING III (6).

Synthesis and integration of financial planning fundamentals to develop a comprehensive financial plan; client communication. **PREREQS:** FIN 552

FIN 640. FOUNDATIONS OF FINANCIAL RESEARCH (3). Provides an in-depth introduction to the foundations of financial research with an emphasis on theoretical developments and empirical research methods. Specific topics may change from quarter to quarter, but sample topics include theory of the firm, capital structure theory, dividend policy, and event study methodology. **PREREQS:** Doctoral student status and departmental approval.

FIN 641. CORPORATE FINANCE SEMINAR (3). Survey classic and contemporary research in the area of corporate finance. Specific topics may change from quarter to quarter, but sample topics include capital structure, dividend policy, agency theory, adverse selection and signaling, and non-cooperative games with and without complete information. **PREREQS:** Doctoral student status and departmental approval.

FIN 642. CAPITAL MARKETS (3). Surveys research on capital markets. Specific topics may change from quarter to quarter, but sample topics include asset pricing models, efficient markets vs behavioral finance, market volatility, volume, new issues market, and emerging markets. **PREREQS:** Doctoral student status and departmental approval.

■ MANAGEMENT COURSES

MGMT 364. PROJECT MANAGEMENT (4). Covers the tools available to project managers, the human and organizational dimensions in different project environments, some computer applications, cases, and a project. **PREREQS:** BA 351 or BA 352 or BA 352H and a minimum grade of C- or better.

MGMT 452. LEADERSHIP (4). In-depth study of leadership research, theory and skills. Emphasis on analysis of organizational leadership situations and application of leadership skills in the workplace. **PREREQS:** BA 351 or BA 352 or BA 352H and a minimum grade of C- or better.

MGMT 453. HUMAN RESOURCES MANAGEMENT (4). Personnel administration for line supervisors and managers. Integrates systems approach to understanding government regulation of employment, resolution of workplace personnel problems, and performance-based personnel management. **PREREQS:** BA 351 or BA 352 or BA 352H

MGMT 455. INFLUENCE AND NEGOTIATION (4). Focuses on analysis, skill development and application of management research to real-life organizational influence, persuasion, negotiation and conflict management situations. **PREREQS:** BA 352 or BA 352H and a minimum grade of C- or better.

MGMT 456. MANAGEMENT FIELD PRACTICUM (4). An innovative application of key management principles and tools to real-life projects is provided. Students will be responsible for developing, designing, executing, and evaluating projects. **PREREQS:** MGMT 364 or BA 364 and a minimum grade of C- or better. Senior standing.

MGMT 457. SUPPLY CHAIN STRATEGY (4). Covers tools and concepts needed to manage the supply chain effectively. Topics include negotiation, purchasing, logistics operations, and applying e-business tools. Emphasis on creating integrated supply chains. **PREREQS:** BA 357 and a minimum grade of C- or better.

MGMT 459. MANAGING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY (4). Introduces students to contemporary issues managers face making ethical and socially-responsible decisions in an increasingly competitive, transparent, and global environment. Practical examples and cases, as well as

contemporary behavioral ethics research and theory are incorporated throughout the course. **PREREQS:** (BA 352 or BA 352H) and senior standing and a minimum passing grade of C- or better.

MGMT 499. SELECTED TOPICS IN MANAGEMENT (1-4). Examination of the impact of recent advances in management on contemporary business. Topic will vary from term to term. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior standing and departmental approval.

MGMT 553. HUMAN RESOURCES MANAGEMENT (4). Personnel administration for line supervisors and managers. Integrates systems approach to understanding government regulation of employment, resolution of workplace personnel problems, and performance-based personnel management. **PREREQS:** (BA 350 or BA 352 or BA 352H) with a minimum grade of C- or better and graduate standing.

MGMT 559. MANAGING ETHICS AND CORPORATE SOCIAL RESPONSIBILITY (4). Introduces students to contemporary issues managers face making ethical and socially-responsible decisions in an increasingly competitive, transparent, and global environment. Practical examples and cases, as well as contemporary behavioral ethics research and theory are incorporated throughout the course. **PREREQS:** (BA 352 or BA 352H) and senior standing

MGMT 571. ETHICAL LEADERSHIP (3). Students will learn the theoretical paradigms of ethical conduct and decision making and consider the role of business in society. **PREREQS:** BA 550 and graduate standing.

MGMT 572. MANAGING HUMAN RESOURCES (3). Students will learn the theories of human resource management, the legal requirements for human resource practices and the practical skills to execute human resource management activities. **PREREQS:** BA 516 or equivalent with a minimum grade of C- or better and graduate standing.

MGMT 574. NEGOTIATIONS (3). Students will learn the theories of negotiation and the techniques to develop an effective negotiation style. **PREREQS:** BA 516 with a minimum grade of C- or better and graduate standing.

MGMT 650. ORGANIZATIONAL BEHAVIOR (3). Surveys research on individual differences, psychological states, and team processes related to work motivation, decision-making and performance. **PREREQS:** Doctoral student status and departmental approval.

■ MARKETING COURSES

MRKT 396. FUNDAMENTALS OF MARKETING RESEARCH (4). Introduction to the fundamentals of market research. Provides a basic understanding of marketing research and relevant decisions in the process. **PREREQS:** ((BA 275 or BA 276 or ST 202) and (BA 390 or BA 390H)) and a minimum grade of C- or better.

MRKT 486. CUSTOMER RELATIONSHIP MANAGEMENT (CRM) (4). An integration of people, process and technology. Students will learn how individuals and companies can gain the return on investment that they expect through technology implementation, service and business process mapping, employee training, customer relationship, customer life time value, technology solutions that track customer data and employee performance. **PREREQS:** BA 390 or BA 390H and senior standing.

MRKT 488. PERSONAL SELLING (4). An introductory course that focuses on two areas: the principles and theory of personal selling, and on understanding and developing the interpersonal communication skills needed for successful

personal selling. **PREREQS:** BA 390 or BA 390H and a minimum grade of C- or better.

MRKT 489. PERSONAL SELLING SKILLS DEVELOPMENT (4). Learn and develop the skills necessary for persuasive encounters in personal selling settings, such as making sales calls, preparing and delivering presentations, writing documents (sales proposals, cover letters, and resumes) and structuring logical, persuasive, prioritized arguments. **PREREQS:** MRKT 488 or BA 491 and with a minimum grade of C- or better. Senior standing.

MRKT 492. CONSUMER BEHAVIOR (4). Understanding the processes that lead to purchase, so as to improve decisions on segmentation and the appropriate marketing mix for each segment. How consumers and households make decisions, and why different individuals/groups make different decisions. Application of behavioral science concepts at individual, subcultural and cultural levels. Effects of consumerism and regulation also are considered. **PREREQS:** BA 390 or BA 390H and a minimum grade of C- or better.

MRKT 493. ADVERTISING MANAGEMENT (4). Analysis of the influence of marketing communications on the attitudes and behaviors of consumer and industrial buyers. Identification and examination of the major decisions made by marketing/advertising managers in implementing the promotional mix. **PREREQS:** BA 390 or BA 390H and a minimum grade of C- or better.

MRKT 494. MARKETING CHANNELS (4). Various channel institutions, channel design, channel coordination and implementation, and performance evaluation with special reference to business-to-business markets and technology. **PREREQS:** BA 390 or BA 390H and a minimum grade of C- or better. Senior standing.

MRKT 495. RETAIL MANAGEMENT (4). Management of retail business with emphasis on strategic planning, analysis, and control, focused on middle- and upper-middle management decisions. **PREREQS:** BA 390 or BA 390H and a minimum grade of C- or better.

MRKT 496. MARKETING RESEARCH PRACTICUM (4). Provides the student with practical experience in the collection, analysis and interpretation of primary data. **PREREQS:** MRKT 396 or BA 396 and a minimum grade of C or better. Departmental approval. Marketing majors or instructor approval required.

MRKT 497. GLOBAL MARKETING (4). Consideration of cultural, political, regulatory, economic and trade barriers in the design of marketing plans for product development, pricing, channels of distribution; and promotion alternatives in a global market. **PREREQS:** (BA 347 and (BA 390 or BA 390H)) and a minimum grade of C- or better.

MRKT 498. SERVICES MARKETING (4). Formulation of strategic and tactical marketing plans for organizations (both profit and not-for-profit) in the service sector of the economy. Projects or cases are used to provide a comprehensive experience. **PREREQS:** BA 390 or BA 390H or BA 590 and a minimum grade of C- or better.

MRKT 499. MARKETING POLICY (4). Market and competitive analysis for developing overall strategies and tactics to achieve the marketing objectives of the business enterprise. Projects or cases are used to provide a comprehensive experience. **PREREQS:** MRKT 396 or BA 396 and a minimum grade of C or better.

MRKT 581. APPLIED QUANTITATIVE MARKETING ANALYSIS (4). Includes a comprehensive presentation of quantitative methods used in marketing management. It is designed to prepare students to use quantitative techniques in making marketing decisions. Topics include ANOVA, regression, discriminant and logit

analysis, factor analysis, cluster analysis, and structural equation modeling. **PREREQS:** BA 596 or MRKT 596

MRKT 582. APPLIED QUALITATIVE

MARKETING ANALYSIS (3). Explores the uses and application of qualitative research methods to inform and improve marketing decision-making. Students will be introduced to such methods as focus group interviews, individual in-depth interviews, observational research methods, participant observation, and ethnographic immersion. Students will learn appropriate analytic strategies and reporting methodologies. **PREREQS:** BA 596 or MRKT 596

MRKT 588. PERSONAL SELLING (4). An introductory course that focuses on two areas: the principles and theory of personal selling, and on understanding and developing the interpersonal communication skills needed for successful personal selling.

MRKT 589. PERSONAL SELLING SKILLS DEVELOPMENT (4). Learn and develop the skills necessary for persuasive encounters in personal selling settings, such as making sales calls, preparing and delivering presentations, writing documents (sales proposals, cover letters, and resumes) and structuring logical, persuasive, prioritized arguments. **PREREQS:** BA 491 or MRKT 488 with a minimum grade of C- or better. Senior standing.

MRKT 592. CONSUMER BEHAVIOR (4). Understanding the processes that lead to purchase, so as to improve decisions on segmentation and the appropriate marketing mix for each segment. How consumers and households make decisions, and why different individuals/groups make different decisions. Application of behavioral science concepts at individual, subcultural and cultural levels. Effects of consumerism and regulation also are considered. **PREREQS:** (BA 390 or BA 390H or BA 590) and a minimum grade of C- or better and graduate standing.

MRKT 593. ADVERTISING MANAGEMENT (4). Analysis of the influence of marketing communications on the attitudes and behaviors of consumer and industrial buyers. Identification and examination of the major decisions made by marketing/advertising managers in implementing the promotional mix. **PREREQS:** (BA 390 or BA 390H or BA 590) and a minimum grade of C- or better and graduate standing.

MRKT 594. MARKETING CHANNELS (4).

Various channel institutions, channel design, channel coordination and implementation, and performance evaluation with special reference to business-to-business markets and technology. **PREREQS:** (BA 390 or BA 390H) with C- or higher and graduate standing.

MRKT 595. RETAIL MANAGEMENT (4).

Management of retail business with emphasis on strategic planning, analysis, and control, focused on middle- and upper-management decisions. **PREREQS:** (BA 390 or BA 390H or BA 590) and a minimum grade of C- or better and graduate standing.

MRKT 596. MARKETING RESEARCH DESIGN

AND METHODS (3). Focuses on articulating research problems, creating appropriate research design to address information needs (i.e., understanding markets, competitors, and customers), ethics (to include IRB training), and the application of diverse data collection methods, including secondary, qualitative, and quantitative methods. Measurement, sampling, and data preparation will also be addressed. **PREREQS:** BA 390 or equivalent.

MRKT 597. GLOBAL MARKETING (4).

Consideration of cultural, political, regulatory, economic and trade barriers in the design of marketing plans for product development, pricing, channels of distribution; and promotion alternatives in a global market. **PREREQS:** (BA 347 and (BA 390 or BA 309H or BA 590) with a minimum grade of C- or better and graduate standing

MRKT 599. SELECTED TOPICS IN MARKETING

(1-4). Concepts and methods in advanced marketing management practice. Latest theoretical developments and quantitative methods in marketing, with particular relevance to managerial applications. Topics will vary from term to term. This course is repeatable for a maximum of 16 credits. **PREREQS:** Graduate standing.

MRKT 690. MARKETING AND COMMERCIALIZATION (3).

Surveys marketing research related to innovation. Specific topics may change from quarter to quarter, but sample topics include research on marketing strategy, consumer behavior, brand equity, brand management, and product management, each from the perspective of the consumer and the firm. **PREREQS:** Doctoral student status and departmental approval.

The College of Earth, Ocean, and Atmospheric Sciences (CEOAS) has a three-fold mission: to pursue basic and applied research; educate undergraduate and graduate students; and to extend information to society about Earth, oceans and atmosphere, including their interactions and the interrelationships with humans and ecosystems. The college offers undergraduate degrees, graduate degrees, and certificate programs that prepare students for careers in environmental sciences, geography, geology, geophysics, marine resource management, oceanography, atmospheric sciences, geographic information sciences, science education, and related fields. The college prepares students and enables faculty to seek out new ideas and innovative approaches to the complex issues of planetary-scale science.

Please see <http://ceoas.oregonstate.edu/> for more information about the college.

HISTORY

In 2011, the College of Science and the College of Oceanic and Atmospheric Sciences (COAS) committed to a joint enterprise that merged the Department of Geosciences and the Environmental Sciences Undergraduate Program in the College of Science with COAS to form the College of Earth, Ocean, and Atmospheric Sciences (CEOAS). The creation of the College of Earth, Ocean, and Atmospheric Sciences was at the heart of a 10-year process to define a new research and education enterprise organized around the interdisciplinary sciences of the Earth, ocean, and atmosphere. It spans the natural science disciplines and creates strong linkages with the social sciences both within the college as well as around the university.

The college is now Oregon's principal source of expert knowledge about the Earth, ocean and the atmosphere, especially in the Pacific Northwest region, which has long been the focus of major research efforts by OSU researchers. It conducts the only comprehensive oceanographic and atmospheric research programs in Oregon, as well as major programs in geology, geography and geospatial studies. Today, research activities of the college extend throughout the world, and to all oceans. Its advanced-degree graduates hold Earth science, oceanographic, atmospheric research, and marine resource management positions in the United States and many other countries, as well as leadership positions in science and resource management, education, regulatory agencies, and the private sector.

The college educates undergraduate students from across the university in geology, geography, earth systems,

geographic information sciences and environmental sciences. BS degrees are offered in Environmental Sciences and Earth Sciences with options of specialization with hundreds of students enrolled. The college fosters experiential learning through labs and field experience.

FACULTY

Professors Abbott, Barnes, Barth, Bloomer, Brook, Campana, Clark, Colwell, Conway, Davis, de Silva, Dever, Dilles, Egbert, Falkner, Fisk, Freilich, Goldfinger, Goñi, Graham, Grunder, Haggerty, Hales, Harris, Harte, Jones, Kent, Koppers, Kosro, Letelier, Levine, Matano, McManus, Meigs, R. Miller, Mix, Mote, Moum, Nabelek, Nash, Nielsen, Nolin, Prael, Reimers, Samelson, Schultz, Skyllingstad, Smyth, Spinrad, Spitz, Strub, Torres, Trehu, Twohy, Wheatcroft, Wolf
Associate Professors Becker, Benoit-Bird, Carlson, Cianelli, Corcoran, Crump, Gosnell, Grubestic, Haller, Kirby, Kurapov, Lancaster, Lerczak, Özkan-Haller, Ruggiero, Santelmann, Schmittner, Shearman, Shell, Stoner, Tepley, Tuffillaro, Vincent, Vong

Assistant Professors Bernard, de Szoeki, Durland, Fram, Graham, Haley, Hutchings, Jarvis, B. Jenny, Juranek, Kurapov, Lintz, McKay, Schmittner, Shroyer, Thomas, Vardaro, Waldbusser, Wettstein, White

Senior Instructor Cook, K. Yalcin

Instructors L. Becker, Campbell, Hommel, Hyrapiet, Keller, Meyers, Milstein, Narayanaraj, Tilt, Walsh, R. Yalcin

Academic Advisors: Gaid, Hall (Head Advisor), Johnson, Ullman

EMERITI

Allen, Bennett, Byrne, Caldwell, Carey, Chelton (Distinguished) Coakley, Collier, Couch, Cowles, Dalrymple, Dearnorff, de Szoeki, Dillon, Duncan, Esbensen, Frenkel, Gates, Gonor, Good, Gordon (Associate), Holman, Huyer, Jackson, Keller, Kimerling, Klinkhammer, Komar, Kulm, Lawrence, Levi, Lillie, Mahrt, Maresh, Matzke, Miller, Morris, Muckleston, Nelson, Neshyba, Niem, Nolan, Oles, Paulson, Pearcy, Pease, Pillsbury (Associate), Pisas, Rosenfeld, B. Sherr, E. Sherr, Simoneit, Small, Smith, Taubeneck, Taylor, Unsworth, Wheeler (Distinguished), Yeats, Zaneveld

Please see the college website at <http://ceoas.oregonstate.edu> for updated listings that include adjunct faculty, research faculty, courtesy faculty, and research associates.

Biological Oceanography
Chemical Oceanography
Geological Oceanography
Geophysics
Physical Oceanography

Graduate Minors**Geography****Geology****Marine Resource Management****Ocean, Earth and Atmospheric Sciences****Water Conflict Management and Transformation****Graduate Certificates****Geographic Information Science****Marine Resource Management****Water Conflict Management and Transformation****REQUIREMENTS FOR UNDERGRADUATE PROGRAMS IN THE COLLEGE:**

The University Baccalaureate Core requirements are explained in a separate section, "Earning a Degree at Oregon State University". The major and option requirements are explained below. If you want to add a minor program or certificate, you will also need to complete the requirements for that minor or certificate. Specific requirements for interdisciplinary minors are listed in the Interdisciplinary Programs section of this catalog.

Academic Advising

Undergraduates within CEOAS are assigned a professional advisor based on major program of study. Advisors help to monitor academic progress through the degree programs, assist students with defining goals within the major, help in navigating university policies and regulations, and provide referrals to campus-wide resources. Faculty within CEOAS are involved as mentors for undergraduates—to guide students on professional and career-related decisions and to help connect students with research opportunities.

Internships and Experiential Learning

CEOAS places a strong emphasis in gaining experience outside of the classroom and offers specialized support to all students for experiential learning opportunities and internships through a designated internship coordinator available to all undergraduates within the college.

Teacher Education

The Earth Sciences and Environmental Sciences majors provide excellent scientific preparation for teaching middle school and high school science. All professional teacher licensure certification occurs in the College of Education.

Double Degrees in Education or International Studies or Sustainability

Undergraduates with majors in CEOAS can earn a second degree in education or international studies or sustainability. See the College of Education or International Programs or Department of Forest

Ecosystems and Society sections of this catalog for more information.

COLLEGE UNDERGRADUATE GRADUATION REQUIREMENTS

Along with fulfilling the university-level, baccalaureate core, and major requirements for BS degrees within CEOAS, students must meet the following college requirements:

- **A grade of at least C- minus is required for all upper-division (300 level and above) courses taken to fulfill major requirements.**
- A minimum 2.00 GPA in major requirement courses (excluding baccalaureate core and electives) is required for all CEOAS majors.
- "S/U" grading is not allowed for courses taken to fulfill major requirements.

REQUIREMENTS FOR ADMISSION TO THE GRADUATE PROGRAMS IN THE COLLEGE:

1. A bachelor's degree with a major (40 quarter credits or more) in a basic natural science (such as physics, mathematics, chemistry, biology, geology, atmospheric science, or computer science) or engineering. Geography and Marine Resource Management applicants must also have a bachelor's degree in the social or political sciences, geography, economics, business administration, fisheries, or engineering.
2. A minimum cumulative grade-point average of 3.00 on a 4.00 scale for the last 90 quarter credits of undergraduate work.
3. A solid foundation in physics, chemistry, and calculus. Qualified applicants deficient in these prerequisites may be admitted conditionally.
4. Graduate Record Examination (GRE) scores (general).
5. Three letters of recommendation.
6. For TOEFL requirements, please see the OSU Admissions Web pages for graduate requirements and contact the CEOAS Student Services Office for specific information.

Early January is the deadline to apply for the following fall term admission. Early application is strongly recommended.

MASTER'S PROGRAMS

All students in College of Earth, Ocean, and Atmospheric Sciences graduate majors must satisfy the minimum program requirements (45 credits including 6 credits of thesis) established by the Graduate School. Some graduate credits earned at other institutions may be approved for inclusion in the program. The Marine Resource Management gradu-

ate program requires additional course work credits. Please contact the Student Services for more information.

A two-hour, final oral examination is required for completion of the master's program (thesis option only).

DOCTOR OF PHILOSOPHY PROGRAM

In graduate programs in the college, the content of PhD programs, other than core requirements, is determined by individual students and their committees. Specific university requirements are formulated by the Graduate School. Approximately 80 credits of courses in the graduate major (including the core courses and 30 to 35 credits of thesis) are usually included in the major. A first and second minor or an integrated minor totaling about 40 credits are common. Graduate credits earned at other institutions may be accepted in the major and minor. The dissertation is based on an original investigation in some area of the graduate major.

Courses taken as a part of the master's program at OSU are normally transferable into the PhD program.

EARTH SCIENCES (BS, CRED, HBS)

The Earth Sciences major program is among the nation's premier undergraduate programs, providing students with a broad range of interests and career aspirations. The program will engage both science and society in critical issues facing the region, the nation, and the international community.

The Earth Sciences major offers four options: Geology, Geography, Earth Systems, and Ocean Science. The Geography and Earth Systems options include tracks designed to train students for career paths in research, education, and human-Earth interactions. The Geology option emphasizes field experiences and hands-on learning in integrated laboratories. Training is suitable in geology, environmental sciences, and science education, among others. The Ocean Science option is suitable for students interested in careers in all aspects of marine science, environmental science, science education, and in advanced graduate studies in a range of subjects.

The Geology option includes the topics covered by the test for the state Geologist Practice Examination conducted by the Board of Geologist Examiners (<http://www.oregon.gov/OSBGE/>).

Required Baccalaureate Core Courses (33)

Earth Sciences Major Requirements (42–43)

ATS 320. *The Changing Climate (3)
CH 231. *General Chemistry (4) *and*
CH 261. *Laboratory for Chemistry 231 (1)
or CH 121. General Chemistry (5)

PH 211. *General Physics with Calculus (4)
or PH 201. *General Physics (5)
GEO 201. *Physical Geology (4)
GEO 202. *Earth Systems Science (4)
GEO 365. Introduction to Geographic Information Systems (4)
GEO 409. Contemporary Earth Science Issues (3)
OC 331. Introduction to Oceanography (3)
MTH 112. *Elementary Functions (4)
MTH 251. *Differential Calculus (4)
ST 351. Introduction to Statistical Methods (4)
or ST 201. Principles of Statistics (4)

EARTH SCIENCES OPTIONS

All students must complete one of four options:

- Earth Systems
- Geography
- Geology
- Ocean Science

Footnote:

* Baccalaureate Core Course

EARTH SYSTEMS OPTION

Requirements

Earth Systems Option: Climate Science

ATS 210. Introduction to the Atmospheric Sciences (3)
ATS 420. Principles of Climate (4)
ATS 421. Climate Modeling (4)
CH 232. *General Chemistry (4)
and CH 262. *Laboratory for Chemistry 232 (1)
or CH 122. *General Chemistry (5)
GEO 295. Introduction to Field Geology (3)
or GEO 296. Introduction to Geographic Field Research (3)
GEO 308. *Global Change and Earth Sciences (3)
GEO 323. ^Climatology (4)
GEO/SOIL 335. *Introduction to Water Science and Policy (3)
GEO 484. Introduction to Biogeochemistry (3)
GEO 486. Quaternary Paleoclimatology (3)
MTH 252. Integral Calculus (4)
PH 212. *General Physics with Calculus (4)
or PH 202. *General Physics (5)

Experiential Learning:

12 credits from the following:
GEO 401. Research (12)
or GEO 403. Thesis (12)
or GEO 410. Internship (12)

Subtotal 55–56

Plus at least 13 credits from the electives below:

ATS 411. Thermodynamics and Cloud Microphysics (4)
ATS 412. Atmospheric Radiation (3)
ATS 413. Atmospheric Chemistry (3)
GEO 306. *Minerals, Energy, Water, and the Environment (3)
GEO 324. Geography of Life: Species Distributions and Conservation (4)
GEO 424. International Water Resources Management (3)
GEO 481. Glacial Geology (4)

GEO 483. Snow Hydrology (3)
GEO 487. Hydrogeology (4)
GEO 488. Quaternary Stratigraphy of North America (3)
MTH 253. Infinite Series and Sequences (4)
MTH 254. Vector Calculus I (4)
MTH 255. Vector Calculus II (4)
MTH 256. Applied Differential Equations (4)
OC 332. Coastal Oceanography (3)
OC 333. Oceans, Coasts, and People (3)
PH 213. *General Physics with Calculus (4)

Total 68–69

GEOGRAPHY OPTION

Requirements (29–30)

ANTH 110. *Introduction to Cultural Anthropology (3)
or PS 204. *Introduction to Comparative Politics (3)
or SOC 204. *Introduction to Sociology (3)
BI 213. Principles of Biology (4)
CS 161. Introduction to Computer Science I (4)
GEO 296. Introduction to Geographic Field Research (3)
GEO 301. Map and Image Interpretation (4)
GEO 323. ^Climatology (4)
or GEO 330. *^Geography of International Development and Globalization (3)
GEO 360. Cartography (4)
ST 202. Principles of Statistics (4)
or ST 352. Introduction to Statistical Methods (4)

Plus 32 credits, including one resource geography, one physical geography, and one GIScience course from the list below:

Physical Geography

GEO 322. Surface Processes (4)
GEO 323. ^Climatology (4)
GEO 324. Geography of Life: Species Distributions and Conservation (4)
GEO 432. Applied Geomorphology (3)
GEO 483. Snow Hydrology (3)
GEO 484. Introduction to Biogeochemistry (3)
GEO 486. Quaternary Paleoclimatology (3)
GEO 487. Hydrogeology (4)

Geography of Resources, Planning, Hazards

GEO 335. *Introduction to Water Science and Policy (3)
GEO 420. Geography of Resource Use (3)
GEO 423. Land Use in the American West (3)
GEO 424. International Water Resources Management (3)
GEO 425. Water Resources Management in the United States (3)
GEO 426. Global Resources and Development (3)
GEO 451. Environmental Site Planning (3)
OC 333. Oceans, Coasts and People (3)

GIScience

FE 208. Forest Surveying (4)
GEO 444. Remote Sensing (4)
GEO 445. Computer-Assisted Cartography (3)
GEO 460. Multimedia Cartography (4)
GEO 465. Geographic Information Systems and Science (4)
GEO 466. Digital Image Processing (3)

GEO 480. Advanced GIS Applications in the Geosciences (**Pending approval #88403**)

Regional Geography/Globalization

GEO 325. *Geography of Africa (3)
 GEO 326. *Geography of Europe (3)
 GEO 327. *Geography of Asia (3)
 GEO 328. *Geography of Latin America (3)
 GEO 329. *Geography of the United States and Canada (3)
 GEO 330. *^Geography of International Development and Globalization (3)
 GEO 350. *Population Geography (3)

Footnotes:

* Baccalaureate Core Course
 ^ Writing Intensive Courses (WIC)

GEOLOGY OPTION

The Geology option is suitable for students interested in careers in applied geology, environmental sciences, science education, and in research. The Geology option includes the topics covered by the test for the state Geologist Practice Examination conducted by the Board of Geologist Examiners (<http://www.oregon.gov/OSBGE/>).

Requirements

CH 232. *General Chemistry (4)
and CH 262. *Laboratory for Chemistry 232 (1)
or CH 122. *General Chemistry (5)
 PH 212. *General Physics with Calculus (4)
or PH 202. *General Physics (5)

In addition, complete a third term of either chemistry or physics:

CH 233. *General Chemistry (4) **and**
 CH 263. *Laboratory for Chemistry 233 (1)
or CH 123. *General Chemistry (5)

OR

PH 213. *General Physics with Calculus (4)
or PH 203. *General Physics (5)
 GEO 203. *Evolution of Planet Earth (4)
 GEO 295. Introduction to Field Geology (3)
 GEO 310. Earth Materials I: Mineralogy (4)
 GEO 315. Earth Materials II: Petrology (4)
 GEO 322. Surface Processes (4)
 GEO 340. Structural Geology (4)
 GEO 370. Stratigraphy and Sedimentology (4)
 GEO 415. Earth Materials III: Igneous Petrography (4)
 GEO 430. Geochemistry (4)
 GEO 463. ^Geophysics and Tectonics (4)
 GEO 487. Hydrogeology (4)
 GEO 495. Advanced Field Geology (6)
 MTH 252. Integral Calculus (4)

Elective Specializations

Choose 9–12 credits from any courses below:

GEO 403. Thesis (3) may count toward the 9–12 credits.

Solid Earth

GEO 412. Igneous Petrology (4)
 GEO 440. Economic Geology (4)
 GEO 497. Field Mapping of Ore Deposits (3)

Earth Surface

GEO 432. Applied Geomorphology (3)
 GEO 481. Glacial Geology (4)
 GEO 483. Snow Hydrology (3)
 GEO 484. Introduction to Biogeochemistry (3)

GEO 486. Quaternary Paleoclimatology (3)
 GEO 488. Quaternary Stratigraphy of North America (3)

SOIL 466. Soil Morphology and Classification (4)

SOIL 468. Soil Landscape Analysis (4)
 Z 427. Paleobiology (3)

Natural Hazards

GEO 427. ^Volcanology (4)
 GEO 433. Coastal Geomorphology (3)
 GEO 461. Geology of Earthquakes (3)

GIScience

GEO 444. Remote Sensing (4)
 GEO 445. Computer-Assisted Cartography (3)
 GEO 460. Multimedia Cartography (4)
 GEO 465. Geographic Information Systems and Science (4)
 GEO 466. Digital Image Processing (3)

Option Total=76–81

OCEAN SCIENCE OPTION

Because of its interdisciplinary scope and quantitative rigor, the Ocean Science option is suitable for students interested in careers in all aspects of marine science, environmental sciences, science education, and in advanced graduate studies in a range of subjects.

CH 232. *General Chemistry (4) **and**
 CH 262. *Laboratory for Chemistry 232 (1)
or CH 122. *General Chemistry (5)
 PH 212. *General Physics with Calculus (4)
and PH 222. Recitation for Physics 212 (1)
or PH 202. *General Physics (5)

In addition, complete a third term of either chemistry or physics:

CH 233. *General Chemistry (4) **and** CH 263. *Laboratory for Chemistry 233 (1)
or CH 123. *General Chemistry (5)

OR

PH 213. *General Physics with Calculus (4)
and PH 223. Recitation for Physics 213 (1)
or PH 203. *General Physics (5)

Plus an additional course in biology; one of the following:

BI 211. *Principles of Biology (4)
 BI 212. *Principles of Biology (4)
 BI 213. *Principles of Biology (4)

An additional college-level mathematics:

MTH 252. Integral Calculus (4)
 MTH 254. Vector Calculus I (4)

GEO 308. *Global Change and Earth Sciences (3)

OC 295. Field Oceanography (3) [**Pending approval**]

OC 332. Coastal Oceanography (3)

OC 333. Oceans, Coasts, and People (3)

OC 334. ^Polar Oceanography (3)

[**Pending approval**]
 OC 430. Principles of Physical Oceanography (4)

OC 440. Introduction to Biological Oceanography (3) [**Pending approval to 4 credits**]

OC 450. Chemical Oceanography (3) [**Pending approval to 4 credits**]

OC 460. Geological Oceanography (3) [**Pending approval to 4 credits**]

Experiential Learning

The program must contain at least 12 credits of experiential learning that may include internship, research or senior thesis. Combinations of these are allowed (e.g., 6 credits of internship and 6 credits of research). Students are urged to work with advisors and the program head at an early stage of their study to plan their experiential learning.

Select one from the following:

OC 401. Research Projects (12)

OC 403. Thesis (12)

OC 410. Internship (12)

Plus two terms (2 credits total) of enrollment in a marine-oriented seminar series:

OC 407. Seminar (1)

Plus at least 12 credits from the electives below:

Students could choose to focus on a specific area or sample from a wide range. Additional MTH courses would be appropriate for some students planning on graduate studies in ocean science.)

Biological

BI 370. Ecology (3)

GEO 484. Introduction to Biogeochemistry (3)

OC 4XX. Global Fisheries (3) [**Pending approval**]

Z 351. Marine Ecology (3)

Z 464. Marine Conservation Biology (3)

Climate

ATS 420. Principles of Climate (4)

ATS 421. Climate Modeling (4)

GEO 323. ^Climatology (4)

GEO 481. Glacial Geology (4)

GEO 486. Quaternary Paleoclimatology (3)

Fluids

CE 311. Fluid Mechanics (4)

CE 412. Hydrology (4)

OC 433. Coastal and Estuarine Oceanography (3)

Geological

GEO 370. Stratigraphy and Sedimentology (4)

GEO 433. Coastal Geomorphology (3)

GEO 463. ^Geophysics and Tectonics (4)

Remote Sensing

GEO 301. Map and Image Interpretation (4)

GEO 360. Cartography (4)

GEO 444. Remote Sensing (4)

Education

HDFS 313. Adolescent Development (4)

SED 407. Seminar: Introduction to Science Education and Outreach (3)

SED 412. Technology Foundations for Teaching Math and Science (3)

SED 413. Inquiry in Science and Science Education (3)

TCE 309. Field Practicum: Science and Math (3)

or TCE 409. Practicum/Clinical Experience (3)

Environmental Sciences

Graduate Major

**Environmental Sciences
(MA, MS, PhD, PSM)**

(See the Graduate School.)

An Environmental Sciences degree provides a rigorous education that can lead to helping to understand and resolve some of today's most challenging scientific and policy issues—including global climate change, pollution, biodiversity conservation, sustainability, and balancing resource use and preservation. To help reach these objectives, the Bachelor of Science in Environmental Sciences offers an interdisciplinary approach to environmental problem solving. As an Environmental Sciences major, a student completes course work in four general areas:

1. OSU's general education courses (the baccalaureate core)
2. Basic science and math
3. Environmental sciences and humanities core
4. A specialization area

In addition, each student completes a minimum of 3 credits of experiential learning as an internship, research, study abroad, or field course. The BS degree in Environmental Sciences provides excellent training for a variety of careers—

including work with federal, state, and local agencies, industry, non-profits, and education—or for graduate school. Students can pursue the BS degree either at the Corvallis campus or online through OSU Ecampus.

Major Curriculum

The Environmental Sciences major requires credits in seven categories: 48 credits of baccalaureate core; 51–53 credits of basic science and math; 27–36 credits of environmental sciences and humanities; 27–31 credits of specialization; 3 credits writing intensive course; 3 credits minimum of experiential learning; and 4–53 credits of elective courses (depends on the number of baccalaureate core electives that will also meet requirements in the major).

Baccalaureate Core (48)

The university baccalaureate core course (BCC) requirement is met with 48 credits and a writing intensive course (WIC). The environmental sciences student satisfies the general education requirement by selecting 27 unrestricted credits from the general list of approved courses and 21 credits from a restrictive list of BCC courses, which simultaneously satisfy requirements for the Environmental Sciences major. The WIC and Synthesis requirements are satisfied by courses taken as part of the environmental sciences core curriculum.

Orientation

ENSC 101. Environmental Sciences
Orientation (1)

**Basic Science and Math Courses
(51–53 credits)**

BI 211, BI 212, BI 213. *Principles of
Biology (4,4,4)

CH 121, CH 122, CH 123. General
Chemistry (5,5,5)

or CH 231, CH 232, CH 233. *General
Chemistry (4,4,4) and CH 261, CH 262,
CH 263. *Laboratory for Chemistry 231,
232, 233 (1,1,1)

MTH 251. *Differential Calculus (4)

MTH 268. Mathematical Ideas in Biology
(4)

or MTH 252. Integral Calculus (4)

PH 201, PH 202. *General Physics (5,5)

or PH 211, PH 212. *General Physics with

 SOC 480. *Environmental Sociology (4)
 SOC 481. *Society and Natural Resources (4)
 WGSS 440. *Women and Natural Resources (3)

Experiential Learning (3 credits)

The program must contain at least one course, internship, or research experience that provides opportunities for hands-on experience in design and collection of observations in the physical, biological or social environment. Students are urged to work with advisors at an early stage in their study to identify courses or experiences that are appropriate.

Specialization Area (27+ credits)

This requirement can be met by completing an approved certificate, option, or minor from a participating program in the environmental or closely related sciences, or working with advisors to develop an innovative course cluster to analyze environmental systems.

Approved Certificates:

- Certificate of Applied Ethics
- Geographic Information Science

Approved Options:

(All options under the Environmental Sciences major):

- Applied Ecology and Resource Management (for Ecampus students only)
- Aquatic Biology
- Environmental Chemistry for the Environmental Sciences
- Environmental Conservation and Sustainability
- Environmental Policy
- Land-Air Interaction
- Pre-Education Environmental Science
- Terrestrial Ecosystems
- Water Science and Resources

Approved Minors:

- Botany
- Business and Entrepreneurship (Also available via Ecampus)
- Environmental Engineering
- Environmental Geosciences
- Environmental Safety and Health
- Fisheries and Wildlife Sciences (Also available via Ecampus)
- Forestry
- Geography (Also available via Ecampus)
- Horticulture (Also available via Ecampus)
- Natural Resource and Environmental Law and Policy
- Oceanography
- Resource Economics (Also available via Ecampus)
- Soil Science
- Zoology

^ Writing Intensive Course (WIC)

APPLIED ECOLOGY AND RESOURCE MANAGEMENT OPTION**Via Ecampus Only.**

This option was designed for students wishing to complete a BS degree in Environmental Sciences from **off-campus locations**. Many of the courses are Web or video based.

Applied Ecology Core (7)

- BOT 440. Field Methods in Plant Ecology (4)
or RNG 353. Wildland Plant Identification (4)
or FES 341. Forest Ecology (3)
or FES 342. Forest Types of the Northwest (3)
RNG 341. Rangeland Ecology and Management (3)
or RNG 455. Riparian Ecology and Management (3)
FOR 446. Wildland Fire Ecology (3)
FW 479. Wetland Riparian Ecology (3)

**Resource Management Core
Choose any 3 of the following:**

- AREC 351. *Natural Resource Economics and Policy (3)
FES 365. Issues in Natural Resource Conservation (3)
FES 352. Wilderness Management (3)
FES 355. Management for Multiple Resource Values (3)
FES 435. *Genes and Chemicals in Agriculture: Value and Risk (4)
FW 323. Management Principles of Pacific Salmon in the Northwest (3)
FW 435. ^Wildlife in Agricultural Ecosystems (3)
GEO 424. International Water Resources Management (3)
GEO 425. Water Resources Management in the U.S. (3)
HORT/FES 350. Urban Forestry (3)
HORT/FES 455. Urban Forest Planning, Policy and Management (4)
NR 455. Natural Resource Decision Making (3)
RNG 355. Desert Watershed Management (3)
RNG 490. Rangeland Management Planning (4)

The Land and its Interpretation (6–7)**Choose any 2 of the following:**

- FW 303. Survey of Geographic Information Systems in Natural Resources (3)
GEO 301. Map and Image Interpretation (4)
GEO 365. Introduction to Geographic Information Systems (4)
GEO 444. Remote Sensing (4)
GEO 465. Geographic Information Systems and Science (4)

Electives (3–5)**Additional courses above or:**

- FES 493. Environmental Interpretation (4)
FS 439. Human Dimensions in Wildlife (3)
FS 492. Ecosystem Services Ecology, Sociology, Policy (3)
FW 251. Principles of Fish and Wildlife Conservation (3)

- FW 462. Ecosystem Services (3)

Total Credits=27+**AQUATIC BIOLOGY OPTION****Option I—Hatfield Term (27+credits)**

- BI 450. ^Marine Biology (*Taught at Hatfield Marine Science Center*) (16)
Plus 11 credits of electives chosen from the list for Option 2, below, in consultation with ENSC advisor.

Option II**Choose 27 credits or more from below:**

- BI 358. Symbioses and the Environment (3)
BOT 416. Aquatic Botany (4)
FW 315. Ichthyology (3)
FW 316. Systematics of Fishes (2)
FW 421. Aquatic Biological Invasions (4)
FW 431. Dynamics of Marine Biological Resources (4)
FW 454. ^Fishery Biology (4)
FW 456. Limnology (5)
FW 465. Marine Fisheries (4)
FW 473. Fish Ecology (4)
FW 499. Special Topics in Fisheries and Wildlife (4)
OC 440. Introduction to Biological Oceanography (3)
TOX 455. Ecotoxicology: Aquatic Ecosystems (3)
Z 351, Z 352. Marine Ecology and Lab (3,2)
Z 361, Z 362. Invertebrate Biology and Lab (3,2)
Z 477. Aquatic Entomology (4)
Hatfield summer term classes (these vary each year, must be approved by advisor)
Galapagos term abroad classes (these vary each year, must be approved by advisor)

Total Credits=27**ENVIRONMENTAL CHEMISTRY FOR THE ENVIRONMENTAL SCIENCES OPTION**

Environmental chemistry focuses on the basic principles that control the fate of chemicals in the environment. A bewildering variety of chemicals, an inevitable result of modern industrial civilization, are released daily; some of them persist in soil, water, or air. The extent to which these chemicals are a health hazard depends in part on where, how much, and in what form they accumulate. Students will acquire laboratory skills that will be in high demand as worldwide public concern with environmental quality increases.

Substituted Courses

- PH 211, 212. *General Physics with Calculus (4,4)
for PH 201, 202. *General Physics (5,5)

Required Courses

- CH 334, CH 335, CH 336. Organic Chemistry (3,3,3)
CH 390. Environmental Chemistry (3)
CH 440. Physical Chemistry (3)
MTH 254. Vector Calculus I (4)

- PH 213. *General Physics with Calculus (4)

Select two courses from below:

- CH 324. Quantitative Analysis (4)
CH 421. Analytical Chemistry (3)
CH 435. Structural Determination by Spectroscopic Methods (3)
CH 461. Experimental Chemistry II (3)
TOX 430. Chemical Behavior in the Environment (3)
TOX 490. Environmental Forensic Chemistry (3)

Total Credits greater than or = 29 (not including substitute courses)**ENVIRONMENTAL CONSERVATION AND SUSTAINABILITY OPTION**

(**Note:** Most classes are offered through Ecampus; those offered on Corvallis campus only are marked with “cc”)

Core courses (12–13):**Choose at least 1 from:**

- BI/Z 349. *Biodiversity: Causes, Consequences, and Conservation (3)
FES 365. *Issues in Natural Resources Conservation (3)
FW 251. Principles of Fish and Wildlife Conservation (3)

Choose at least 2 from:

- ANTH 481. *Natural Resources and Community Values (3)
AREC 351. *Natural Resource Economics and Policy (3)
AREC 352. *Environmental Economics and Policy (3)
GEO 300. *Sustainability for the Common Good (3)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)

Choose at least 1 from:

- ATS 320. *The Changing Climate (3)
BI 306H. ^^Environmental Ecology (3)cc
FW 325. *Global Crises in Resource Ecology (3)
GEO 300. *Sustainability for the Common Good (3)

Electives (14–15):

Students must choose at least 5 credits from both the natural science group and the social science group in consultation with an advisor.

Natural Sciences

- ATS 320. *The Changing Climate (3)
BEE 439. Irrigation Principles and Practices (4)
BI 301. *Human Impacts on Ecosystems (3)cc
BI 306. ^^Environmental Ecology (3)cc

ENVIRONMENTAL POLICY OPTION

Students should select PHL 440, Environmental Ethics (3), for the environmental ethics and politics requirement and AREC 351, Natural Resource Management and Policy (3), for the conservation and management requirement found in the environmental sciences core curriculum. These are the best choices for core requirements; they do not count toward specialization requirements.

Core Courses (11)

AREC 352. *Environmental Economics and Policy (3)
 HST 481. *Environmental History of the United States (4)
 PS 475. Environmental Politics and Policy (4)

Electives (16)

It is recommended that all courses be selected from the same group.

Agricultural Resources/Economics Group

AREC 351. *Natural Resource Economics and Policy (3)
 AREC 407. Seminar (1)
 AREC 434. ^Measuring Resource and Environmental Impacts (4)
 AREC 454. Rural Development Economics and Policy (3)
 AREC 461. ^Agricultural and Food Policy Issues (4)
 AREC 550. Environmental Economics (3)
 AREC 551. Applications of Environmental and Natural Resource Economics (4)
 ECON 311. Intermediate Microeconomic Theory (4)
 ECON 315. Intermediate Macroeconomic Theory (4)
 ECON 428. ^Introduction to Economic Research (4)
 ECON 435. The Public Economy (4)
 ECON 439. ^Public Policy Analysis (4)
 ECON 455. Economic Development (4)
 FES 435. *Genes and Chemicals in Agriculture: Value and Risk (3)

Forest Resources Group

FES 365. *Issues in Natural Resources Conservation (3)
 FES 435. *Genes and Chemicals in Agriculture: Value and Risk (3)
 FES 444. Ecological Aspects of Park Management (3)
 FES 451. History and Cultural Aspects of Recreation (4)
 FOR 457. Techniques for Forest Resource Analysis (4)

FOR 460. ^Forest Policy (4)
 FOR 462. Natural Resource Policy and Law (3)
 FOR 563. Environmental Policy and Law Interactions (3)

Political Science and Communication Group

AREC 432. Environmental Law (4)
 COMM 426. Intercultural Communication: Theories and Issues (3)
 COMM 440. Theories of Conflict and Conflict Management (3)
 COMM 442. Bargaining and Negotiation Processes (3)
 ECON 439. ^Public Policy Analysis (4)
 PS 321. American Constitutional Law (4)
 PS 331. State and Local Government and Politics (4)
 PS 475. Environmental Politics and Policy (4)
 PS 414. ^Interest Groups (4)
 PS 415. Politics and the Media (4)
 PS 449. ^Topics in Comparative Politics (4)
 PS 461. Environmental Political Theory (4)
 PS 476. *Science and Politics (4)
 PS 477. International Environmental Politics and Policy (4)

Resource Ecology Group

FW 325. Global Crises in Resource Ecology (3)
 FW/SOC 485. *Consensus and Natural Resources (3)
 GEO 300. *Sustainability for the Common Good (3)
 GEO 309. *Environmental Justice (3)
 GEO 335. *Introduction to Water Science and Policy (3)
 GEO 423. Land Use in the American West (3)
 GEO 424. International Water Resources Management (3)
 GEO 425. Water Resource Management in the U.S. (3)
 GEO 426. Third World Resource Development (3)

Sociology Group

SOC 360. *Population Trends and Policy (4)
 SOC 421. Social Change and Modernization (3)
 SOC 466. International Development: Gender Issues (4)
 SOC 480. *Environmental Sociology (4)
 SOC 481. *Society and Natural Resources (4)
 SOC/FW 485. *Consensus and Natural Resources (3)

Total Credits=27

Footnotes:

* Bacc Core Course
 ^ Writing Intensive Course

LAND-AIR INTERACTION OPTION

Basic Science Core Requirement
 PH 211, 212, 213. *General Physics with Calculus (4,4,4)

Core (minimum of 28)

ATS 320. *The Changing Climate (3)

Total Credits=28 minimum

PRE-EDUCATION ENVIRONMENTAL SCIENCE OPTION

This option prepares students to apply for a graduate teacher licensure program in science and math education.

The core courses for the Environmental Sciences major and for this option, plus electives from the appropriate track below, can complete a student's preparation for a first subject area endorsement in biology or integrated science. The core plus courses listed under the mathematics track below provide partial preparation for a second subject area endorsement in mathematics (to teach at the middle/high school level).

Core Courses (5 credits)

SED 407. Seminar: Introduction to Science Education (2)

SED 406. Projects (3)

or TCE 309. Field Practicum (3)

or TCE 409. Practicum/Clinical

Experience "Winter Break or September Experience" (1–3)

Education Courses (6 credits)

SED 412. Technology Foundations for Teaching Math and Science (3)

SED 413. Inquiry in Science and Science Education (3)

SED 414. Inquiry in Mathematics and Mathematics Education (3)

TCE 216. Purpose, Structure, and Function of Education in a Democracy (3)

TCE 219. Civil Rights and Multicultural Issues in Education (3)

Human Development Course (3–4 credits)

HDFS 313. Adolescent Development (4)

TCE 253. Learning Across the Lifespan (3)

TCE 512. Psychology of the Adolescent (3)

Students should consult with their advisor regarding course selection for the Education and Human Development courses.

Electives selected from one of the endorsement areas listed below:

- **Integrated science first subject area endorsement:** Add the following to the BI, CH and PH courses taken for the Environmental Sciences core, and take GEO 202 for the lithosphere requirement in the Environmental Sciences core:
GEO 201. *Physical Geology (4)
GEO 203. *Evolution of Planet Earth (4)
Select 1–2 additional upper-division course(s) from the

following departments: BB, BI, BOT, CH, GEO, MB or Z

Total credits from core and endorsement area: 27

- **Mathematics Endorsement (for middle-level mathematics teaching; partial preparation)**

MTH 211. *Foundations of Elementary Mathematics (4)

MTH 212. Foundations of Elementary Mathematics (4)

MTH 361. Introduction to Probability (3)

MTH 390. Foundations of Elementary Mathematics (4)

Total credits from core and endorsement area: 29

- **Biology first subject area endorsement:**

BI 311. Genetics (4)

BI 445/BI 545. Evolution (3)

Select 2 additional upper-division courses from the following departments: BB, BI, BOT, HSTS, MB, OC or Z

Total Credits from core and endorsement area: 27

TERRESTRIAL ECOSYSTEMS OPTION

Core Courses (18)

BI 371. ^Ecological Methods (3)

Advanced Ecology (9)

BI 349. *Biodiversity: Causes, Consequences and Conservation (3)

BOT 440. Field Methods in Plant Ecology (4)

BOT 442. Plant Population Ecology (3)

ENT 420. Insect Ecology (3)

FES/FW 445. Ecological Restoration (4)

FW 320. Introductory Population Dynamics (4)

FW 479. Wetland and Riparian Ecology (3)

GEO 324. Geography of Life: Species Distribution and Conservation (4)

RNG 341. Rangeland Ecology and Management (3)

RNG 455. Riparian Ecology and Management (3)

Z 423. Environmental Physiology (4)

Land/Air Processes (6)

ATS 412. Atmospheric Radiation (3)

ATS 413. Atmospheric Chemistry (3)

ATS 420. Principles of Climate (4)

ATS 564. Interactions of Vegetation and Atmosphere (3)

BOT/FS 547. Nutrient Cycling (3)

FE 430. Watershed Processes (4)

or FE 434. Forest Watershed Management (4)

FE 537. Hillslope and Watershed Hydrology (4)

GEO 322. Surface Processes (4)

GEO 323. ^Climatology (4)

GEO 430. Geochemistry (4)

GEO 432. Applied Geomorphology (3)

Principles of Terrestrial Ecosystem Management (9)

Select three courses from one of the following groups for a total of 9 credits.

Courses may be substituted with advisor's written consent.

Forest Group

BOT 415. Forest Insect and Disease Management (5)

FOR 346. Topics in Wildland Fire (3)

FES 435. *Genes and Chemicals in Agriculture: Value and Risk (3)

FES/HORT 350. Urban Forestry (3)

FES/HORT 455. Urban Forest Planning, Policy and Management (4)

FES 493. Environmental Interpretation (4)

FES 444. Ecological Aspects of Park Management (3)

FES/FW 445. Ecological Restoration (4)

FOR 441. Silviculture Principles (4)

FOR 446. Wildland Fire Ecology (3)

FOR 457. Techniques for Forest Resource Analysis (4)

FOR 459. Forest Resource Planning and Decision Making (4)

FS 453. Forest Management and Wildlife Conservation (3)

FS 548. Biology of Invasive Plants (3)

Soils Group

CSS 315. ^Nutrient Management and Cycling (4)[*Taught only at EOU*]

CSS/CROP 330. *World Food Crops (3)

CSS/SOIL 455. Biology of Soil Ecosystems (4)

CSS/SOIL 466. Soil Morphology and Classification (4)

CSS/SOIL 468. Soil Landscape Analysis (4)

CSS/CROP 480. Case Studies in Cropping Systems Management (4)

CSS/SOIL 525. Mineral-Organic Matter Interactions (3)

CSS/SOIL 535. Soil Physics (3)

CSS/SOIL 536. Vadose Zone Hydrology Lab (1)

CSS/SOIL 545. Geochemistry of Soil Ecosystems (4)

GEO 335. *Introduction to Water Science and Policy (3)

Fisheries and Wildlife Group

FW 321. Applied Community and Ecosystem Ecology (3)

FW 446. Wildland Fire Ecology (3)

FW 453/FS 453. Forest Management and Wildlife Conservation (3)

FW 458. Mammal Conservation and Management (4)

FW 462. Ecosystem Services (3)

FW 479. Wetlands and Riparian Ecology (3)

FW 481. Wildlife Ecology (4)

Range Group

RNG 346. Topics in Wildland Fire (3)

RNG 355. Desert Watershed Management (3)

RNG 421. Wildland Restoration and Ecology (4)

RNG 441. Rangeland Analysis (4)

RNG 442. Rangeland-Animal Relations (4)

RNG 446. Wildland Fire Ecology (3)

RNG 455. Riparian Ecology and Management (3)

GIS and Mapping Group

FE 257. GIS and Forest Engineering Applications (3)

FOR 421. Spatial Analysis of Forested Landscapes (3)

GEO 301. Map and Image Interpretation (4)

- GEO 360. Cartography (4)
 GEO 365. Introduction to Geographic Information Systems (4)
 GEO 444. Remote Sensing (4)
 GEO 445. Computer-Assisted Cartography (3)
 GEO 465. Geographic Information Systems and Science (4)
 GEO 466. Digital Imaging Processing (3)

Total Credits=27+

WATER SCIENCE AND RESOURCES OPTION

The Water Science and Resources option focuses on water as a resource and on hydrological sciences. It requires a minimum of 27 credits.

Core Courses (10–12)

GEO 335. *Introduction to Water Science and Policy (3)

Select one hydrological science (4)

- CE 412 Hydrology (4)
 GEO 487. Hydrogeology (4)
 FE 430. Watershed Processes (4)
 or FE 434. Forest Watershed Management (4)

Select one resource ecology/management (3–5)

- FW 456. Limnology (5)
 FW 479. Wetlands and Riparian Ecology (3)
 RNG 355. Desert Watershed Management (3)
 RNG 455. Riparian Ecology and Management (3)

Choose courses from one track listed below (15–17 credits, to bring total to 27 or more)

Water Resources and Policy Track (15–17)

- AREC 351. *Natural Resource Economics and Policy (3)
 FE 535. Water Quality and Land Use (3)
 FW 431. Dynamics of Marine Biological Resources (4)
 FW 464. Marine Conservation Biology (3)
 GEO 306. *Minerals, Energy, Water, and the Environment (3)
 GEO 420. Geography of Resource Use (3)
 GEO 424. International Water Resources Management (3)
 GEO 425. Water Resources Management in the U.S. (3)
 GEO 451. Environmental Site Planning (3)
 GEO 534. Field Geography of Oregon (3)

Hydrological Sciences and Engineering Track (15–17)

Select from courses not used to fulfill the hydrological sciences portion of the core and from the following:

- BEE 439. Irrigation Principles and Practices (4)
 BEE 458. Nonpoint Source Pollution Assessment and Control (3)
 CE 311. Fluid Mechanics (4)
 CE 313. Hydraulic Engineering (4)
 CE 412. Hydrology (4)
 CE 417. Hydraulic Engineering Design (4)
 FE 430. Watershed Processes (4)
 or FE 434. Forest Watershed

- Management (4)
 GEO 322. Surface Processes (4)
 GEO 432. Applied geomorphology (3)
 GEO 487. Hydrogeology (4)

Graduate-level Courses

The following graduate-level courses in hydrological sciences and engineering may be appropriate for strong students. One or more of these may be substituted for courses listed above in this track. Advisor approval is required for such substitution.

- BEE 512. Physical Hydrology (3)
 BEE/CE/GEO 514. Groundwater Hydraulics (3)
 BEE 525. Stochastic Hydrology (3)
 BEE 542. Vadose Zone Transport (4)
 BEE 544. Open Channel Hydraulics (4)
 BEE 546. River Engineering (4)
 CE 543. Applied Hydrology (4)
 CSS/SOIL 535. Soil Physics (3)
 FE 535. Water Quality and Forest Land Use (3)
 GEO 582. Geomorphology of Forests and Streams (3)

Total Credits=27

Footnotes:

 ^ Writing Intensive Course (WIC)

INTERNATIONAL STUDIES (BA, HBA)

See International Programs for information on the International Studies Degree.

SUSTAINABILITY (BS, HBS)

The Sustainability Double Degree includes core, practicum and individualized study components. Courses from a student's major course of study will not count towards double-degree requirements. Completion of the double degree will require 36 credits beyond the 180-credit minimum for graduation.

OSU Main Campus Contact:

Kate Lajtha, 3059 Ag Life Sciences Building, Oregon State University, Corvallis, OR 97331; 541-737-5674; kate.lajtha@oregonstate.edu or Fox Peterson, Lead Advisor, fox.peterson@oregonstate.edu

OSU-Cascades Campus Contact:

Matt Shinderman, Forest Ecosystems and Society, Oregon State University Cascades; 541-322-3159; matt.shinderman@osucascades.edu.

Sustainability Core (17)

- NR 350. *Sustainable Communities (4)
 SUS 304. *Sustainability Assessment (4)
 SUS 420. Social Dimensions of Sustainability (3)
 SUS 430. Ecological Dimensions of Sustainability (3)[**Pending submission & approval of a proposal**]
 or BI 301. *Human Impacts on Ecosystems (3)
 or BI 306H. *^Environmental Ecology (3)
 SUS 440. Economic Dimensions of Sustainability (3)[**Pending submission & approval of a proposal**]

- or AREC 352/ECON 352. *Environmental Economics and Policy (3)
 or AREC 434. ^Measuring Resource and Environmental Impacts (4)

Practicum (3)

- SUS 410. Sustainability Internship (3)
 or SUS 499. Sustainable Workshop/Service Learning (3)

Note: SUS 410. Credits may be achieved by participation in an IE3 Global Internship with advisor approval.

Remaining Credits (16)

In addition to the 20 credits specified above, students must work with the sustainability program advisor to select courses relevant to their discipline and career path interests (16 credits total).

Credit total=36

Classes that can be used to fulfill remaining requirements are listed below. Students are NOT limited to taking courses within their primary major of study. The sustainability advisor(s) will approve courses not listed here if they have an obvious link to sustainability and fulfill the intent of the double degree. See the OSU Sustainability Office list of sustainability-related courses.

Business

ENVIRONMENTAL GEOSCIENCES MINOR

Required core courses (16–20 credits)

Earth Science (8)

GEO 101. *The Solid Earth (4)
 or GEO 201. *Physical Geology (4)
 GEO 102. *The Surface of the Earth (4)
 or GEO 202. *Earth Systems Science (4)
 or GEO 221. *Environmental Geology (4)

Geosciences (11)

GEO 301. Map and Image Interpretation (4)
 GEO 322. Surface Processes (4)
 GEO 409. Contemporary Earth Science Issues (3)

And 8–12 credits of advanced courses, all in one of four tracks:

Track A. Humans, Resources and Planning

GEO 306. *Minerals, Energy, Water and the Environment (3)
 GEO 307. Geology of National Parks (3)
 GEO 309. *Environmental Justice (3)
 GEO 335. *Introduction to Water Science and Policy (3)

GEO 350. *Population Geography (3)
 GEO 420. Geography of Resource Use (3)
 GEO 423. Land Use in the American West (3)
 GEO 424. International Water Resources Management (3)
 GEO 425. Water Resources Management in the U.S. (3)
 GEO 426. Third-World Resource Development (3)
 GEO 440. Economic Geology (4)
 GEO 452. Principles and Practices of Rural and Resource Planning (3)
 GEO 453. Resource Evaluation Methods/ EIS (3)

Track B. Surface Processes and Climate

GEO 308. *Global Change and Earth Sciences (3)
 GEO 323. ^Climatology (4)
 GEO 324. Geography of Life: Species Distribution and Conservation (4)
 GEO 370. Stratigraphy and Sedimentology (4)
 GEO 431. Applied Climatology (3)
 GEO 432. Applied Geomorphology (3)
 GEO 439. Topics in Physical Geography (3)
 GEO 451. Environmental Site Planning (3)
 GEO 481. Glacial Geology (4)
 GEO 582. Geomorphology of Forests and Streams (3)

Track C. Geology and Geologic Hazards

GEO 306. *Minerals, Energy, Water and the Environment (3)
 GEO 310. Earth Materials I: Mineralogy (4)
 GEO 315. Earth Materials II: Petrology (4)
 GEO 340. Structural Geology (4)
 GEO 427. Volcanology (4)
 GEO 430. Geochemistry (4)
 GEO 451. Environmental Site Planning (3)
 GEO 458. Plate Tectonics of Continental Collision (3)
 GEO 461. Geology of Earthquakes (3)
 GEO 463. Geophysics and Tectonics (4)

Track D. Water

CE 412. Hydrology (3)
 FE 430. Watershed Processes (4)
 GEO 306. *Minerals, Energy, Water and the Environment (3)
 GEO 335. *Introduction to Water Science and Policy (3)
 GEO 424. International Water Resources Management (3)
 GEO 425. Water Resources Management in the U.S. (3)
 GEO 430. Geochemistry (4)
 GEO 451. Environmental Site Planning (3)
 GEO 487. Hydrogeology (4)

Total=43–51

ENVIRONMENTAL SCIENCES MINOR

Also available via Ecampus.

Course substitutions must be selected in consultation with an environmental sciences advisor. Substitutions must cover material in the same course category (natural environmental systems or humans and the environment) at a similar

or higher level. Credits must sum to a minimum of 27.

Core: Natural Environmental Systems (12–14)

ATS 210. Introduction to the Atmospheric Sciences (3)

or ATS 420. Principles of Climate (4)

or GEO 323. ^Climatology (4)

BI 370. Ecology (3)

GEO 202. *Earth Systems Science (4)

or GEO 221. *Environmental Geology (4)

or GEO 352. *Oregon: Geology, Place and Life on the Ring of Fire (4)

or CSS 305. Principles of Soil Science (4) [Offered at EOU LaGrande campus only.]

or CSS 395. *World Soil Resources (3)

[Offered at EOU LaGrande campus only.]

or SOIL 205. *Soil Science (4)

or SOIL 395. *World Soil Resources (3)

OC 331. Introduction to Oceanography (3)

or GEO 335. *Introduction to Water Science and Policy (3)

or FE 532. Forest Hydrology (4)

or FW 456. Limnology (5)

or GEO 487. Hydrogeology (4)

Humans and the Environment (15–19)

Select at least one course in each of the following five categories to bring the total number of credits to 27 or more.

One course in economics, selected from the following:

AREC 250. *Introduction to Environmental Economics and Policy (3)

ECON 201. *Introduction to Microeconomics (4)

One course in environmental law and policy, selected from the following:

AREC 253. *Environmental Law, Policy, and Economics (4)

AREC 351. *Natural Resource Economics and Policy (3)

AREC 352. *Environmental Economics and Policy (3)

AREC 353. Public Land Statutes and Policy (4)

AREC 432. Environmental Law (4)

AREC 434. ^Measuring Resource and Environmental Impacts (4)

AREC 453. Public Land and Resource Law (4)

AREC 454. Rural Development Economics and Policy (3)

AREC 461. ^Agricultural and Food Policy Issues (4)

FOR/RNG/FW 346. Topics in Wildland Fire (3)

FOR 462. Natural Resource Policy and Law (3)

FES/BI/TOX 435. *Genes and Chemicals in Agriculture: Value and Risk (4)

FS 492. Ecosystem Services Ecology, Sociology, Policy (3)

FW 325. *Global Crises in Resource Ecology (3)

Total Credits=Minimum of 27**GEOGRAPHY MINOR****Also available via Ecampus.**

The Geography minor will allow interested non-majors to explore:

- how the Earth works,
- the people who live on its surface,
- the value of accessing and properly using geographic information, and
- how to bring concepts of relative location, pattern and spatial process to bear on key societal questions.

The minor consists of 14 credits of core courses and at least 13 credits of elective courses for a total of 27 credits.

Core Requirements (14)

One course in each of the following areas:

World Regional Geography (choose one)

GEO 105. *Geography of the Non-Western World (3) *EC*
 or GEO 106. *Geography of the Western World (3) *EC*

Physical Geography (choose one)

GEO 101. *The Solid Earth (4) *EC*
 GEO 102. *The Surface of the Earth (4) *EC*
 GEO 201. *Physical Geology (4)
 GEO 202. *Earth Systems Science (4)
 GEO 203. *Evolution of Planet Earth (4)
 GEO 221. *Environmental Geology (4) *EC*
 OC 103. *Exploring the Deep: Physical Geography of the World's Oceans (4) *EC*

Sustainability

GEO 300. *Sustainability for the Common Good (3) *EC*

Geographic Techniques

GEO 301. Map and Image Interpretation (4) *EC*

Electives (13)

Select any combination of additional courses from the list below totaling at least 13 credits. Courses are grouped below by focus area; students may choose courses from one or more focus areas.

Regional Geography:

GEO 105. *Geography of the Non-Western World (3) *EC*
 or GEO 106. *Geography of the Western World (3) *EC* (whichever was not taken as part of the core requirements above)
 GEO 307. *National Park Geology and Preservation (3) *EC*
 GEO 325. *Geography of Africa (3)

GEO 326. *Geography of Europe (3) *EC*
 GEO 327. *Geography of Asia (3) *EC*
 GEO 328. *Geography of Latin America (3)
 GEO 329. *Geography of U.S. and Canada (3) *EC*

Earth Processes and Hazards:

GEO 305. *Living with Active Cascade Volcanoes (3) *EC*
 GEO 308. *Global Change and Earth Sciences (3) *EC*
 GEO 323. ^Climatology (4) *EC*
 GEO 380. *Earthquakes in the Pacific Northwest (3) *EC*

Resource Development:

GEO 306. *Minerals, Energy, Water, and the Environment (3) *EC*
 GEO 309. *Environmental Justice (3) *EC*
 GEO 330. *^Geography of International Development and Globalization (3)
 GEO 350. *Population Geography (3) *EC*
 GEO 420. Geography of Resource Use (3)
 GEO 423. Land Use in the American West (3) *EC*
 GEO 426. Third-World Resource Development (3)

Water Policy and Management:

GEO 335. *Introduction to Water Science and Policy (3) *EC*
 GEO 424. International Waters Resources Management (3) *EC*
 GEO 425. Water Resources Management in the United States (3) *EC*
 GEO 487. Hydrogeology (4) *EC*

Total = 27**Footnotes:**

* Baccalaureate Core Course
 EC Also available via Extended Campus

GEOLOGY MINOR

The undergraduate Geology minor provides a means for students majoring in physics, chemistry, civil engineering, forest engineering, and related fields to develop a strong geology background as part of their program.

Required

GEO 201. *Physical Geology (4)
 or GEO 101. *The Solid Earth (4)
 GEO 202. *Earth Systems Science (4)
 or GEO 102. *The Surface of the Earth (4)
 GEO 203. *Evolution of Planet Earth (4)
 GEO 301. Map and Image Interpretation (4)
 GEO 310. Earth Materials I: Mineralogy (4)
 GEO 315. Earth Materials II: Petrology (4)

Plus one geology course from below:

GEO 322. Surface Processes (4)
 GEO 340. Structural Geology (4)
 GEO 370. Stratigraphy and Sedimentology (4)
 GEO 412. Igneous Petrology (4)
 GEO 415. Earth Materials III: Igneous Petrography (4)
 GEO 427. ^Volcanology (4)
 GEO 430. Geochemistry (4)
 GEO 432. Applied Geomorphology (3)
 GEO 463. ^Geophysics and Tectonics (4)
 GEO 481. Glacial Geology (4)
 GEO 487. Hydrogeology (4)
 GEO 488. Quaternary Stratigraphy of North America (3)

The following courses are recommended for students interested in advanced geology degrees:

GEO 295. Introduction to Field Geology (3)
 GEO 340. Structural Geology (4)

Total=27–28**OCEANOGRAPHY MINOR**

Undergraduates interested in the marine sciences can complete an Oceanography minor by following the curriculum below. This minor will add interdisciplinary breadth to undergraduate programs, broaden employment prospects, and enhance chances for gaining admission to graduate programs.

The undergraduate Oceanography minor is suggested for students in any of the major programs of the College of Science, in fisheries and wildlife or in engineering. The minor also provides a broad environmental sciences background for students planning to become high school teachers of earth or life sciences. The Oceanography minor is administered under the dean by the College of Earth, Ocean, and Atmospheric Sciences' Student Services Office.

Required (18–19)

OC 331/OC 331H. Introduction to Oceanography (3)
 OC 332/OC 332H. Coastal Oceanography (3)[Prereq: OC 331]
 OC 430. Principles of Physical Oceanography (4)
 or OC 433. Coastal and Estuarine Oceanography (3)
 OC 440. Introduction to Biological Oceanography (3)
 OC 450. Chemical Oceanography (3)
 OC 460. Geological Oceanography (3)

Research and Internships (3)

OC 401. Research Project (1–4)
 or OC 405. Reading and Conference (1–4)
 or OC 499. Special Topics in Oceanography (1–4)

Electives (6–8)**Choose two from the following:**

Additional course in oceanography (3)¹
 Additional course in marine resource management (3)¹
 Z 351. Marine Ecology (3)
 FW 431. Dynamics of Marine Biological Resources (4)
 Other approved course (3)¹

Total=27**Footnotes:**

¹ Oceanography and MRM courses should be discussed with Oceanography minor advisors Drs. Ted Strub, tstrub@coas.oregonstate.edu, and Rob Wheatcroft raw@coas.oregonstate.edu. Drs. Strub or Wheatcroft need to approve courses outside OC and MRM. Questions can also be addressed to the CEOAS Associate Dean Dr. Anita Grunder, grundera@science.oregonstate.edu.

[^] Writing Intensive Course (WIC)

GEOGRAPHY (MA, MS, PhD, MAIS)**Graduate Areas of Concentration**
Geographic information science, physical geography, resource geography

Geography is the study of human use and interaction with the Earth and the identification of spatial and temporal variation in natural and human processes. Geography uses principles of mathematics, social science, and natural science to analyze and interpret change in the environment. Many geographic studies require a combination of field, laboratory and computational work. Geography plays an important role in urban and land use planning, resource evaluation, environmental analysis, education and cartography.

Majors in geography develop a background in regional geography, resource geography, geographic information science, and physical geography and in statistics and disciplines related to geography like geology, forestry, and anthropology. Course offerings combined with excellent facilities and supportive electives allow students to develop particular interests such as resource management, environmental analysis, land use planning and cartography/geographic information systems/remote sensing.

The program has an applied orientation, placing emphasis on the application of geographic information science to environmental and resource utilization and problem solution. Master's degree candidates may elect a thesis or nonthesis option. Geography participates as one of the minors in Master of Arts in Interdisciplinary Studies degree programs. No foreign language is required for the MS degree. One foreign language is required for the MA and PhD degrees.

Contact Stacey Schulte, 541-737-1221, stacey.schulte@oregonstate.edu, for additional information.

GEOLOGY (MA, MS, PhD, MAIS)**Graduate Areas of Concentration**
Solid Earth processes and history (volcanology, igneous petrology, economic geology); surface Earth processes and history (Earth system history, hydrogeology and hydrology, geomorphology and surface processes, climate and biogeochemical cycles)

Geology is the study of the materials, processes, and history of the solid Earth and its fluid envelopes. Geology is an integrative field, drawing on mathematics, chemistry, physics and biology to understand the interactions of the lithosphere, biosphere, atmosphere and hydrosphere. Studies in geology commonly combine observations and measurements from field, laboratory, and computational studies. Geology plays an important role in decisions about resource use, slope stability and the safety of build-

ing projects, natural hazards standards, mineral exploration and extraction, the basic workings of the Earth, and the understanding of the effects and rates of natural and human-induced change in the environment.

Most graduate research in the geology program includes field study. An approved field course of at least 9 quarter credits or equivalent experience is prerequisite to candidacy for a graduate degree. No foreign language is required.

Contact Stacey Schulte, 541-737-1221, stacey.schulte@oregonstate.edu, for additional information.

Students who seek training in a combination of field and laboratory techniques applying a variety of scientific problems will find very few places with the number of opportunities or the variety of facilities that are available at Oregon State. Research in the department falls under three broad areas: Solid Earth Processes and History; Surface Earth Processes and History; and Human Interaction with the Earth.

Programs of study in the Geology graduate major lead to the Master of Science or Master of Arts and Doctor of Philosophy degrees

Master of Science (MS) and Master of Arts (MA) Degrees:

The master's degree requires successful completion of at least 45 credits of appropriate courses including a thesis. The thesis presents a written summary of research findings and conclusions. All master's programs include a final oral examination. Each graduate program is supervised by a committee of at least three members of the graduate faculty who collaborate with the student in developing a program of study and research leading to the final oral examination. The examination is conducted and approved by the student's graduate committee.

The MA degree requires a foreign language proficiency equivalent to that attained at the end of a second year university course in that language with a grade of C (2.00) or better.

Doctor of Philosophy (PhD) Degree:

The doctor of philosophy (PhD) degree is granted for proven ability in research and mastery of an area within the discipline of geology. This is demonstrated through successful performance in at least 108 credits of appropriate course work and research. Pursuit of the PhD also requires passing qualifying exams that advance a student to candidacy. The doctoral program includes original research in a major topic in one of the department's areas of specialization submitted as a dissertation that is presented and defended orally. A committee of at least four members of the graduate faculty assist the major professor in supervising and examining the PhD student. PhD candi-

dates must complete at least three of four consecutive terms with at least 36 credits taken on the OSU campus.

Graduate Minor

Advanced degree programs in geology may include an optional minor subject area. It may be in a single discipline or an integrated grouping of courses organized around a theme. In developing minors, students commonly combine courses from several campus departments.

MARINE RESOURCE MANAGEMENT (MA, MS)**Graduate Areas of Concentration**
Marine resource management

Marine Resource Management (MRM) is a science-based, interdisciplinary master's program based in College of Earth, Ocean, and Atmospheric Sciences (CEOAS). The program provides students with the interdisciplinary training necessary to function confidently and effectively in professional resource management positions. Marine and coastal issues are technically and politically complex, involving many interests, perspectives and stakeholders. To deal effectively with these issues, marine resource managers need a broad-based background in both physical and social sciences. Graduates from the program are trained to bridge the gap between science and policy.

The program offers two tracks, professional and a thesis:

Professional track students develop a project and defend a report on that work, based on either an internship or a research project.

Thesis track students are expected to produce a more extensive and rigorous piece of original work and analysis, and must meet additional requirements set by the Graduate School and advisor. Applicants must meet the general admission requirements of the college.

More than 40 faculty from CEOAS, other university departments and outside institutions participate in MRM. These partnerships include departments of Fisheries and Wildlife, Applied Economics, and Anthropology; the School of Public Policy; Sea Grant Extension specialists; and scientists and management professionals from state and federal agencies. The program consists of required courses in oceanography, atmospheric science, and marine law. Typical elective courses include resource economics, fisheries science, political science, anthropology, sociology, and communications. Each program of study is adjusted to the needs of the individual. Applicants must meet the general admission requirements of the college.

Contact Flaxen Conway, 541-737-1339, fconway@coas.oregonstate.edu, for more information.

OCEAN, EARTH AND ATMOSPHERIC SCIENCES (MA, MS, PhD, MAIS)

Graduate Areas of Concentration

Atmospheric sciences, biological oceanography, chemical oceanography, geological oceanography, geophysics, physical oceanography

Ocean, Earth and Atmospheric Sciences (OEAS) is an interdisciplinary graduate major that first introduces students to the elements of the Earth system and the processes of mass and energy flow among them through a set of core/breadth courses:

- OEAS 500. Cascadia Field Trip (3)
- OEAS 520. The Solid Earth (4)
- OEAS 530. The Fluid Earth (4)
- OEAS 540. The Biogeochemical Earth (4)

Students then pursue focused graduate course work and research in the following concentration areas, directed by their program committee.

OEAS Concentration Areas Atmospheric Sciences

The atmospheric sciences are concerned with dynamics, physics and processes, including the interactions of the atmosphere with soil physics, hydrology and oceanic circulation. The atmospheric sciences concentration in the College of Earth, Ocean, and Atmospheric Sciences prepares students for careers in teaching and research through advanced study and participation in research projects directed by faculty members. MA, MS and PhD degrees are offered.

Applicants should have an undergraduate degree in physics, mathematics, engineering, chemistry or atmospheric science, with strength in mathematics. All applicants should have completed one year each of chemistry and physics with calculus, and courses in vector calculus and in differential equations.

Students perform thesis research on a wide range of problems including the study of global climate change, clouds and the earth's radiation budget, the structure and dynamics of turbulent flows, air-sea interaction, planetary atmospheres, the optimal use and economic value of weather and climate forecasts, and the study of acid rain and its effects on terrestrial ecosystems. In addition to theoretical, numerical, and observational methods of analysis, approximately one-fourth of the research projects either use or are developing methods for obtaining meteorological information from satellites.

Opportunities exist for PhD candidates to conduct some of their thesis research in Europe or at the National Center for Atmospheric Research. Most research projects involve collaboration with other scientists, either on the Oregon State University campus or at major domestic or international research centers.

Geophysics

Geophysics is concerned with physical processes within and on Earth, especially the internal physical constitution of the planet, and seismic, gravitational, geothermal, geoelectrical, geomagnetic phenomena and their relation to geological processes. The geophysics concentration offers graduate work toward MA, MS and PhD degrees. Candidates should have an undergraduate degree in physics, mathematics, engineering, geology, or geophysics. Mathematics through differential equations is required and mathematical physics is desirable. Graduate Record Exam scores are required of all applicants. Opportunities for research exist on a wide range of geophysical problems in marine and continental regimes, emphasizing experimental, applied, and theoretical aspects.

Oceanography

Oceanography, the application of the sciences to the study of the oceans, is an interdisciplinary environmental science concerned with all processes: biological, chemical, geological, and physical, as well as the interactions between the ocean. The College of Earth, Ocean, and Atmospheric Sciences graduate major offers MA, MS and PhD degrees with a concentration in oceanography.

For all areas in oceanography, applicants should have a strong quantitative background and an undergraduate degree in a relevant field of science or engineering and one year each of chemistry, physics, and calculus. Prior background in oceanography is not essential.

In geological oceanography (marine geology), a broad range of geological processes that influence the ocean is studied. Fields of interest include plate tectonics and the structure of the ocean basins, igneous petrology and geochemistry, paleoceanography and paleoclimatology, and coastal sedimentary processes. Candidates show strength in one or more of these fields: earth science, chemistry, physics, biology or mathematics.

Physical oceanography research covers the physical processes in the sea, exchange of energy and momentum at the air-sea interface, and the transmission and absorption of energy in the sea (e.g., light, heat, and sound). Circulation, tides, waves, heat content, and density distributions are some of the other phenomena of particular interest. Candidates should have an undergraduate major in physics, mathematics, or engineering.

WATER CONFLICT MANAGEMENT AND TRANSFORMATION GRADUATE MINOR

Graduate Areas of Concentration *Water conflict management and transformation*

The graduate minor in Water Conflict Management and Transformation is designed to accommodate the needs of professionals and graduate students. It offers an integrative approach that explicitly integrates human and policy dimensions of water resources within the framework of scientific and technological solutions. The graduate minor is a flexible, coherent program that offers critical and underemphasized skills essential to preventing and resolving water conflicts. It helps facilitate dialogue on critical water issues across diverse values and perspectives, and it serves OSU students, citizens and officials in Oregon, the United States and internationally.

The curriculum centers around case-based, interactive course and field work to provide an in-depth look at water conflict, conflict transformation, and prevention issues and strategies across four distinct and overlapping themes: water governance, water and ecosystems, water and society, and water and economics. Each theme incorporates several topics critical to understanding water conflicts. A highlight of the minor is the capstone course coupled with an intersession practicum working with watershed councils, landowners, and agencies in Northeast Oregon; and a guided and critiqued project in which two teams take on, for example, the roles of Jordan and Israel to negotiate a treaty for water resource allocation in a simulated water negotiation. These techniques will hone student skills, understanding and thought development. Students will also take part in fieldwork in a watershed or basin at risk of, or in, water conflict.

Through this minor, students will learn about and practice conflict transformation skills, explore what new insti-

tutional networks and relationships are needed, and how these can be achieved through role-playing, in-class exercises, and guest lectures. Students will also be introduced to leadership skills for guiding this type of change.

Contact Lynette deSilva, 541-737-7013, desilval@geo.oregonstate.edu, for additional information.

All students seeking a graduate minor are subject to all general policies governing the courses for the master's degree. As such, these students will be required to take a minimum of 50 percent graduate stand-alone courses. The remaining credits may be the 500-component of 400/500 slash courses.

Required Courses (6 credits)

Capstone Courses

(Select a minimum of 3 credits)

COMM 442/COMM 542. Bargaining and Negotiation Processes (3)
COMM 446/COMM 546. Communication in International Conflict and Disputes (3)
WRP 521. Water Governance and Conflict Management (3)

Practicum/Internship

(Select a minimum of 3 credits)

WRP 509. Practicum (3)
WRP 510. Internship (3)

Elective Courses (Minimum 12 credits)

Water Governance

(Select a minimum of 3 credits)

AREC 432/AREC 532. Environmental Law (4)
AREC 599. Special Topics (Law and Policy) (4)
COMM 440/COMM 540. Theories of Conflict and Conflict Management (3)
FOR 462/FOR 562. Natural Resource Policy and Law (3)
FOR 463/FOR 563. Environmental Policy and Law Interactions (3)
GEO 424/GEO 524. International Water Resources Management (3)
GEO 425/GEO 525. Water Resource Management in the U.S. (3)
PS 454/GEO 554. International Law and Organizations (4)
PS 475/PS 575. Environmental Politics and Policy (4)
PS 577. International Environmental Politics and Policy (4)
WRP 599. Special Topics (*Seminar: Oregon Water Law and Policy*) (3)

Water and Society

(Select a minimum of 3 credits)

ANTH 477/ANTH 577. Ecological Anthropology (4)
ANTH 481/ANTH 581. Natural Resources and Community Values (4)
CE 548. Water Quality Dynamics (3)
ENVE 456/ENVE 556. Sustainable Water Resources Development (3)
ENVE 531. Fate and Transport of Chemicals in Environmental Systems (4)
ENVE 532. Aqueous Environmental Chemistry (4)
ENVE 554. Groundwater Remediation (4)
FE 535. Water Quality and Forest Land Use (3)

GEO 420/GEO 520. Geography of Resource Use (3)
H 427/H 527. Case Studies in International Health (3)
H 429/H 529. International Health (3)
H 512. Introduction to Environmental and Occupational Health Sciences (3)
H 514. Environment, Safety and Health Seminar (1)
H 528. Global Health Issues (3)
H 540. Water and Human Health (3)
H 541. Air Quality and Human Health (3)
MRM 515. Coastal Resources Management (4)
PHL 440/PHL 540. Environmental Ethics (3)
PHL 443/PHL 543. World View and Environmental Values (3)
PS 577. International Environmental Politics and Policy (4)
SOC 481/SOC 581. Society and Natural Resources (3-4)
SOC 580. Society and Natural Resources (4)
SOC 585. Consensus and Natural Resources (4)
WRP 599. Special Topics (*Seminar: Socio-technical Aspects of Water Resources*) (3)

Water and Ecosystems

(Select a minimum of 3 credits)

BEE 458/BEE 558. Nonpoint Source Pollution Assessment and Control (3)
BEE 512. Physical Hydrology (3)
FE 430/530. Watershed Processes (4)
FE 532. Forest Hydrology (3)
FE 537. Hillslope and Watershed Hydrology (4)
FE 538. Field Hydrology (3)
FW 426/FW 526. Coastal Ecology and Resource Management (5)
FW 479/FW 579. Wetlands and Riparian Ecology (3)
GEO 582. Geomorphology of Forests and Streams (3)
GEO 583. Snow Hydrology (3)

Water and Economics

(Select a minimum of 3 credits)

AREC 505. Reading and Conference (3) or AREC 507. Seminar (3)
AREC 534. Environmental and Resource Economics (3)
AREC 543. International Trade (4)
AREC 550. Environmental Economics (3)
AREC 551. Applications of Environmental and Natural Resource Economics (4)

Total=18 credits (Minimum)

GEOGRAPHIC INFORMATION SCIENCE CERTIFICATE

Kuipo Walsh, Director

GIScience Certificate Program
134 Wilkinson Hall
College of Earth, Ocean, and Atmospheric Sciences
Oregon State University
Corvallis, OR 97331
541-737-3795
FAX 541-737-1200
Email: kuipo.walsh@oregonstate.edu
Website: <http://ceoas.oregonstate.edu/giscience>

Oregon State University offers an un-

dergraduate and graduate certificate in Geographic Information Science. Geographic information science (GIScience) includes the existing technologies and research areas of geographic information systems (GIS), cartography, remote sensing, photogrammetry, and surveying (also termed geomatics in the U.S.). GIScience therefore addresses fundamental issues surrounding the use of digital technology to handle geographic information; namely, information about places, activities, and phenomena on and near the surface of the Earth that are stored in maps or images. GIScience includes questions of data structures, analysis, accuracy, meaning, cognition, visualization, and many more, and thus overlaps with the domains of many traditional disciplines (e.g., Earth science, mathematics, computer science, physics, cognitive science, and ethics). However, GIScience is not central to any of these, representing instead a new kind of scientific collaboration that is defined by researchers from many distinct backgrounds working together on particular sets of interrelated problems. The use of GIScience technologies (including, but definitely not limited to GIS) has become pervasive throughout the scientific community, natural resource management, government, industry, and business. Even small advancements in geographic information science are having broad effects in improving day-to-day tasks throughout all sectors of society.

Background Courses

MTH 112. Elementary Functions (4)
or Equivalent high school or university course
ST 201, ST 202. Principles of Statistics (4,4)
or ST 351, ST 352. Introduction to Statistical Methods (4,4)
or ST 314. Introduction to Statistics for Engineers (3)
or ECE 353. Introduction to Probability and Random Signals (3)

Required Core (19-20 credits)

FE 208. Forest Surveying (4)
GEO 301. Map and Image Interpretation (4)
GEO 360. Cartography (4)
GEO 365. Introduction to Geographic Information Systems (4)
or FE 257. GIS and Forest Engineering Applications (3)
or CE 202. Civil Engineering: Geospatial Information and GIS (3)
GEO 444. Remote Sensing (4)

Electives (7-8)

Elective courses may be in one of four tracks: cartography, GIS, remote sensing, geomatics. See advisor.

CE 413. GIS in Water Resources (3)
CSS/SOIL 468. Soil Landscape Analysis (4)
ECE 468. Digital Image Processing (3)
FE 209. Forest Photogrammetry and Remote Sensing (4)
FE 310. Forest Route Surveying (4)

FE 422. Forest Geomatics (4)
 FOR 421. Spatial Analysis of Forested Landscapes (3)
 FW 303. Survey of Geographic Information Systems in Natural Resources (3)
 GEO 410. Internship (1–5)
 GEO 445. Computer-Assisted Cartography (3)
 GEO 460. Multimedia Cartography (4)
 GEO 465. Geographic Information Systems and Science (4)
 GEO 466. Digital Image Processing (3)
 HORT 414. Information Systems in Agriculture (4)

GEOGRAPHIC INFORMATION SCIENCE GRADUATE CERTIFICATE

 GEO 566. Digital Image Processing (3)
 GEO 580. Advanced GIS Applications in the Geosciences (4)
 HORT 514. Information Systems in Agriculture (4)
 OC 678. Ocean Remote Sensing (4)
 RNG 550. Landscape Ecology and Analysis (3)
 ST 565. Time Series (3)

WATER CONFLICT MANAGEMENT AND TRANSFORMATION GRADUATE CERTIFICATE

Lynette de Silva, *Director*

Program in Water Conflict Management and Transformation
 Oregon State University
 College of Earth, Ocean, and Atmospheric Sciences
 256 Wilkinson Hall
 Corvallis, OR 97331
 Phone: 541-737-7013
 Fax: 541-737-1200
 Email: desilval@geo.oregonstate.edu
 Web: <http://www.transboundarywaters.orst.edu/>

The graduate certificate in Water Conflict Management and Transformation is an 18-credit interdisciplinary program. It is designed to provide graduate students, non-degree students, water professionals and decision-makers with the required specialized resources and skills to address the water demands and challenges of the 21st Century, in Oregon, across the United States and internationally.

The curriculum centers around case-based, interactive course and field work to provide an in-depth look at water conflict, conflict transformation, and prevention issues and strategies across four

distinct and overlapping themes:

- Water Governance
- Water and Ecosystems
- Water and Society
- Water and Economics

Each theme incorporates several topics critical to understanding water conflicts.

The curriculum for the graduate certificate in Water Conflict Management and Transformation is as follows:

Capstone Course Work (3 credits required)

COMM 442/COMM 542. Bargaining and Negotiation Processes (3)
 COMM 446/COMM 546. Communication in International Conflict and Disputes (3)
 WRP 599. Special Topic: Water Governance and Conflict Management (3)

Capstone Practicum/Internship (3 credits required)

WRP 509. Practicum (3)
 WRP 510. Internship (3)

Water Governance (3 credits required)

AREC 432/AREC 532. Environmental Law (4)
 COMM 440/COMM 540. Theories of Conflict and Conflict Management (3)
 FOR 462/FOR 562. Natural Resource Policy and Law (3)
 FOR 463/FOR 563. Environmental Policy and Law Interactions (3)
 GEO 424/GEO 524. International Water Resources Management (3)
 GEO 425/GEO 525. Water Resources Management in the U.S. (3)
 PS 454/PS 554. International Law and Organizations (4)
 PS 475/PS 575. Environmental Politics and Policy (4)
 PS 577. International Environmental Politics and Policy (4)

Water and Society (3 credits required)

ANTH 477/ANTH 577. Ecological Anthropology (4)
 ANTH 481/ANTH 581. Natural Resources and Community Values (3)
 CE 548. Water Quality Dynamics (3)
 ENVE 456/ENVE 556. Sustainable Water Resources Development (3)
 ENVE 531. Fate and Transport of Chemicals in Environmental Systems (4)
 ENVE 532. Aquatic Chemistry: Natural and Engineered Systems (4)
 ENVE 554. Groundwater Remediation (4)
 FE 535 Water Quality and Forest Land Use (3)
 GEO 420/GEO 520. Geography of Resource Use (3)
 H 427/H 527. Case Studies in International Health (3)
 H 429/H 529. International Health (3)
 H 512. Introduction to Environmental and Occupational Health Sciences (3)
 H 514. Environment, Safety and Health Seminar (1)
 H 528. Global Health Issues (3)
 H 540. Water and Human Health I (3)
 H 541. Air Quality and Human Health (3)
 PHL 440/PHL 540 Environmental Ethics (3)
 PHL 443/PHL 543. World Views and Environmental Values (3)

- PS 577. International Environmental Politics and Policy (4)
 SOC 481/SOC 581. Society and Natural Resources (4)
 SOC 580. Environmental Sociology (4)
 SOC 585. Consensus and Natural Resources (3)

Water and Ecosystems (3 credits required)

- BEE 458/BEE 558. Nonpoint Source Pollution Assessment and Control (3)
 BEE 512. Physical Hydrology (3)
 FE 430/FE 530. Watershed Processes (4)
 FE 532. Forest Hydrology (4)
 FE 537. Hillslope and Watershed Hydrology (4)
 FE 538. Field Hydrology (3)
 FW 426/FW 526. Coastal Ecology and Resource Management (5)
 FW 479/FW 579. Wetlands and Riparian Ecology (3)
 GEO 582. Geomorphology of Forests and Streams (3)
 GEO 583. Snow Hydrology (3)

Water and Economics (3 credits required)

- AREC 505. Reading and Conference (3)
 or AREC 507. Seminar (3)
 AREC 534. Environmental and Resource Economics (3)
 AREC 543. International Trade (4)
 AREC 550. Environmental Economics (3)
 AREC 551. Applications of Environmental and Natural Resource Economics (4)

Total=18

Advisor guidance and approval is required for each student's certificate program of study. All students seeking a graduate certificate are subject to all general policies governing the courses for the master's degree. As such, these students will be required to take a minimum of 50% graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.

Non-degree students, and those requiring additional information and advising should contact Lynette de Silva at desilval@geo.oregonstate.edu.

MARINE RESOURCE MANAGEMENT GRADUATE CERTIFICATE

The management of our marine resources encompass both biophysical and human dimensions. Marine management professionals need to understand these dimensions, utilizing both physical and social sciences to tackle challenging issues, and effectively communicate best management practices to scientists, decision makers, and stakeholders.

The Marine Resource Management graduate certificate offers a blend of science- and management-oriented courses that prepare participants (professionals, decision-makers, and graduate students) to become leaders in marine resource management.

Certificate Overview and Requirements:

- Completion of core courses in marine policy and law,
- Two courses from the human dimensions area, and
- Two courses from ocean and coastal science area.

Course Examples:

- Ocean Law
- Rights-Based Fisheries Management
- Ecological Policy
- Physical Oceanography
- Marine Pollution

Current graduate students must notify the Marine Resource Management program of their intention to pursue this certificate. Upon consultation with MRM faculty, they will be given instructions regarding listing courses on their programs of study and obtaining the required signature for that form.

Professionals and other students must notify the Marine Resources Management program of their intention to pursue this certificate.

Contact Robert Allan, 541-737-1340, rallan@coas.oregonstate.edu, for more information.

Required Courses

- MRM 520. Coastal Law (3)
 or MRM 521. Ocean Law (3)
 MRM 530. Principles and Practice of Marine Resource Management (3)

Human Dimensions Subject Area Select 2 courses for at least 6 credits from below:

- ANTH 581. Natural Resources and Community Values (4)
 AREC 534. Environmental and Resource Economics (3)
 COMM 540. Theories of Conflict and Conflict Management (3)
 COMM 542. Bargaining and Negotiation Processes (3)
 COMM 544. Third Parties in Dispute Resolution: Mediation/Arbitration (3)
 FW 520. Ecology and Management of Marine Fishes (3)
 FW 564. Marine Conservation Biology (3)
 FW 620. Ecological Policy (3)
 MRM 535. Rights-Based Fisheries Management (3)
 PS 575. Environmental Politics and Policy (4)
 PS 577. International Environmental Politics and Policy (4)
 SOC 580. Environmental Sociology (4)
 SOC 581. Society and Natural Resources (4)

Ocean and Atmospheric Systems Science Subject Area

Select 2 courses for at least 6 credits from below:

- ATS 520. Principles of Climate (4)
 FW 531. Dynamics of Marine Biological Resources (4)
 OC 533. Coastal and Estuarine Oceanography (3)
 OC 654. Marine Pollution (3)
 OEAS 520. The Solid Earth (4)

- OEAS 530. The Fluid Earth (4)
 OEAS 540. The Biogeochemical Earth (4)

Total=18 credits

Other courses may be substituted upon approval of the certificate director.

Note: The Marine Resource Management graduate certificate is not eligible for federal financial aid if it is not part of a master's degree-seeking program. The certificate is not eligible if taken as a stand-alone program. The MRM graduate certificate is eligible for federal financial aid if it is part of a master's degree-seeking program.

■ ATMOSPHERIC SCIENCES COURSES

ATS 210. INTRODUCTION TO THE ATMOSPHERIC SCIENCES (3). Physical basis of atmospheric phenomena on small, medium and large scales; introduction to atmospheric dynamics and thermodynamics; examination of atmospheric circulation systems; introduction to atmospheric physics and chemistry. Offered every term. **PREREQS:** College algebra and elementary functions.

ATS 210H. INTRODUCTION TO THE ATMOSPHERIC SCIENCES (3). Physical basis of atmospheric phenomena on small, medium and large scales; introduction to atmospheric dynamics and thermodynamics; examination of atmospheric circulation systems; introduction to atmospheric physics and chemistry. Offered every term. **PREREQS:** College algebra and elementary functions. Honors College approval required.

ATS 320. *THE CHANGING CLIMATE (3). Survey of Earth's climate and the factors that influence climate. Examine causes of changes in atmospheric composition, the expected consequences of these changes, problems predicting future changes, and what can be done about the changes. Offered annually in fall. (Bacc Core Course)

ATS 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ATS 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

ATS 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

ATS 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits.

ATS 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

ATS 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

ATS 407. SEMINAR (1). One-credit sections. Graded P/N. This course is repeatable for a maximum of 99 credits.

ATS 411. THERMODYNAMICS AND CLOUD MICROPHYSICS (4). Thermodynamic processes in the atmosphere, and an introduction to cloud microphysics. Offered annually. **PREREQS:** ((MTH 254 or MTH 254H) and PH 213)

ATS 412. ATMOSPHERIC RADIATION (3). Radiative transfer in the earth and planetary atmospheres, absorption and scattering of sunlight, absorption and emission of terrestrial radiation, absorption and scattering cross sections for molecules, cloud droplets and aerosols. Applications include enhancement of photochemical reaction rates in clouds, remote sensing, and the earth's radiation budget, radiative-convective equilibrium, radiative forcing due to changes in atmospheric composition and climate change. **PREREQS:** ((MTH 254 or MTH 254H) and (MTH 256 or MTH 256H) and PH 213)

ATS 413. ATMOSPHERIC CHEMISTRY (3). Principles of atmospheric chemistry; chemical fundamentals, sampling principles, sources, reactions, scavenging, and deposition of sulfur, nitrogen, ozone, and carbon compounds. Atmospheric aerosol size distribution, mechanics, optics, and scavenging. Offered annually. **PREREQS:** (CH 121 or CH 201 or CH 221 or CH 224) and (MTH 251 or MTH 241)

ATS 420. PRINCIPLES OF CLIMATE (4). Physics of climate past, present and future. Covers radiative processes, thermodynamics, cloud physics, and dynamics affecting the earth's climate. Paleoclimate record and mechanisms driving this variability will be presented, along with modes of climate variability and various climate models. **PREREQS:** One year of college physics and college calculus.

ATS 421. CLIMATE MODELING (4). Numerical models of the physics, chemistry, biology, and geology of the climate system. A range of climate models from a simple, single equation to complex state-of-the-science systems used for future projections. Theoretical concepts will be linked to practical applications through hands-on programming exercises and data analysis. Lec/lab. **PREREQS:** ATS 420/ATS 520 (recommended, talk to instructor if not taken); no prior programming knowledge required.

ATS 475. PLANETARY ATMOSPHERES (3). Origin and evolution of planetary atmospheres; vertical structure of atmospheres; hazes and clouds; atmospheric motions and general circulation. Presentation of recent observations and current research issues, focusing on Venus, Earth, Mars, Jupiter, Saturn, and Titan. Emphasis on comparative aspects and simple models. **PREREQS:** ((MTH 254 or MTH 254H) and PH 213)

ATS 499. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 99 credits.

ATS 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

ATS 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ATS 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

ATS 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

ATS 507. SEMINAR (1). One-credit sections. Graded P/N. This course is repeatable for a maximum of 99 credits.

ATS 511. THERMODYNAMICS AND CLOUD MICROPHYSICS (4). Thermodynamic processes in the atmosphere, and an introduction to cloud microphysics. Offered annually. **PREREQS:** MTH 254 and PH 213

ATS 512. ATMOSPHERIC RADIATION (3). Radiative transfer in the earth and planetary atmospheres, absorption and scattering of sunlight, radiation, absorption and emission of terrestrial absorption and scattering cross sections for molecules, cloud droplets and aerosols. Applications include enhancement of photochemical reaction rates in clouds, remote sensing, and the earth's radiation budget, radiative-convective equilibrium, radiative forcing due to changes in atmospheric composition and climate change. **PREREQS:** MTH 254 and MTH 256 and PH 213

ATS 513. ATMOSPHERIC CHEMISTRY (3). Principles of atmospheric chemistry; chemical fundamentals, sampling principles, sources, reactions, scavenging, and deposition of sulfur, nitrogen, ozone, and carbon compounds. Atmospheric aerosol size distribution, mechanics, optics, and scavenging. Offered annually. **PREREQS:** (CH 121 or CH 201 or CH 221 or CH 224) and (MTH 251 or MTH 241)

ATS 515. ATMOSPHERIC DYNAMICS I (4). Derivation of equations governing atmospheric motions; shallow atmosphere approximation and the primitive equations. Simple balanced flows; vertical motion, circulation, vorticity and potential vorticity; Ekman layer dynamics; prototypical atmospheric waves; geostrophic adjustment; quasi-geostrophic motions; analysis of structure of synoptic-scale systems; baroclinic instability. Offered alternate years. **PREREQS:** MTH 256 and PH 213

ATS 516. ATMOSPHERIC DYNAMICS II (4). Review of basic equations; scale analysis and approximations. Turbulence and boundary layers. Dry and moist convection; convective storms. Frontogenesis; symmetric instability; internal gravity waves and mountain waves; differentially heated circulations including sea breezes. Slope flows and urban circulations. Offered alternate years. **PREREQS:** ATS 515 and/or equivalent.

ATS 520. PRINCIPLES OF CLIMATE (4). Physics of climate past, present and future. Covers radiative processes, thermodynamics, cloud physics, and dynamics affecting the earth's climate. Paleoclimate record and mechanisms driving this variability will be presented, along with modes of climate variability and various climate models. **PREREQS:** One year of college physics and college calculus.

ATS 521. CLIMATE MODELING (4). Numerical models of the physics, chemistry, biology, and geology of the climate system. A range of climate models from a simple, single equation to complex state-of-the-science systems used for future projections. Theoretical concepts will be linked to practical applications through hands-on programming exercises and data analysis. Lec/lab. **PREREQS:** ATS 420/ATS 520 (recommended, talk to instructor if not taken); no prior programming knowledge required.

ATS 546. EXPERIMENTAL ENERGY AND GAS EXCHANGE (4). Experimental methods to quantify the atmospheric carbon dioxide, water, methane, heat, momentum, and radiative exchange at the vegetation-land-ocean-air interface. Techniques include bulk and gradient approaches, and eddy covariance. The central activity consists of student teams designing and conducting a field experiment, analyzing and interpreting observations, and presenting results. Lec/lab/discussion/activity. **PREREQS:** (ATS 516 or ATS 564 or FS 564 or ATS 516) or equivalent. Talk to instructor when no theoretical and conceptual background exists; basic programming skills in Matlab or IDL desirable.

ATS 564. INTERACTIONS OF VEGETATION AND ATMOSPHERE (3). Quantitative treatment of radiation, heat, mass, and momentum exchange between vegetation and atmosphere; forest, natural and agricultural ecosystem examples. Physical and biological controls of carbon dioxide and water vapor exchange; remote sensing of canopy processes; models of stand-scale evaporation, photosynthesis and respiration; landscape and regional scale exchanges; vegetation and planetary boundary layer coupling; vegetation in global climate models. **PREREQS:** MTH 251 and PH 201

ATS 575. PLANETARY ATMOSPHERES (3). Origin and evolution of planetary atmospheres; vertical structure of atmospheres; hazes and clouds; atmospheric motions and general circulation. Presentation of recent observations and current research issues, focusing on Venus, Earth, Mars, Jupiter, Saturn, and Titan. Emphasis on comparative aspects and simple models. **PREREQS:** MTH 254 and PH 213

ATS 590. SELECTED TOPICS (1-4). Maximum of 12 credits may be used in a graduate program. This course is repeatable for a maximum of 12 credits.

ATS 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

ATS 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ATS 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

ATS 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

ATS 607. SEMINAR (1). One-credit sections. Graded P/N. This course is repeatable for a maximum of 99 credits.

ATS 613. AEROSOL AND CLOUD PHYSICS (3). Formation, composition and Brownian coagulation of atmospheric aerosol. Nucleation, composition, growth and evaporation of cloud droplets and ice crystals; precipitation processes. Scavenging of aerosol by cloud droplets. **PREREQS:** (ATS 511 and ATS 513)

ATS 615. LARGE-SCALE INTERACTIONS OF THE OCEAN AND ATMOSPHERE (3). Ocean-atmosphere circulations in the time-mean and seasonal cycles, equatorial wave modes, El Niño-Southern Oscillation, Madden-Julian oscillation, teleconnections and atmospheric bridges, mid-latitude air-sea interactions, Pacific and Atlantic decadal variability, the North Atlantic oscillation/Arctic oscillation. **PREREQS:** (ATS 515 or OC 670) and/or instructor approval.

ATS 630. CLIMATE DYNAMICS (3). Physical basis of climate and climatic change; radiation budget, surface energy budget, atmosphere and ocean circulation; energy balance models and their application to problems in climate change. Offered alternate years. **PREREQS:** MTH 254 and PH 213

ATS 655. MESOSCALE NUMERICAL MODELING (3). Review and classification of governing equations, finite difference approaches, Galerkin methods, truncation error and accuracy of solutions. Analysis of numerical stability, boundary conditions, and gridding methods focusing on issues relevant to mesoscale modeling such as nesting and terrain-following coordinate systems. Discussion of elliptical systems and methods for pressure solution. Study of current models with emphasis on turbulence parameterization, microphysics and initialization. Development of simple models and application of existing model systems. **PREREQS:** ((ATS 515 and ATS 516) or OC 671) and/or instructor approval.

ATS 690. SELECTED TOPICS (1-16). Maximum of 12 credits may be used in a graduate program. This course is repeatable for a maximum of 12 credits.

■ ENVIRONMENTAL SCIENCES COURSES

ENSC 101. ENVIRONMENTAL SCIENCES ORIENTATION (1). Introduction to the Environmental Sciences Program and related professional and educational opportunities. Recommended for all freshman and first-year transfer environmental sciences majors, but open to all students interested in learning about career options in the environmental sciences. Graded P/N.

ENSC 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ENSC 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor and departmental approval required.

ENSC 402. INDEPENDENT STUDIES (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 405. READING AND CONFERENCE (1-12). This course is repeatable for a maximum of 12 credits. **PREREQS:** Instructor and

departmental approval required.

ENSC 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 410. INTERNSHIP (1-12). Supervised practical experience working with professionals at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N. This course is repeatable for a maximum of 12 credits. **PREREQS:** Instructor and departmental approval required.

ENSC 479. *^ENVIRONMENTAL CASE STUDIES (3). Improves students' ability to ask questions, gather and synthesize information, and communicate ideas on environmental topics. Instruction and information necessary for the course is entirely Web based. (Bacc Core Course) (Writing Intensive Course) **PREREQS:** One year of college biology or chemistry and junior standing required.

ENSC 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ENSC 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ENSC 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

ENSC 510. INTERNSHIP (1-12). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

ENSC 515. ENVIRONMENTAL PERSPECTIVES AND METHODS (3). Unique perspective or method each quarter. Possibilities include: remote sensing, modeling over a range of scales in time, space, and levels of system organization; and risk analysis.

ENSC 520. ENVIRONMENTAL ANALYSIS (3). Develop analytical thinking, explore analytical approaches, enhance writing skills, and gain experience in oral communication about environmental issues.

ENSC 530. RESEARCH PROFILES (1-2). Faculty and graduate student environmental research presentations.

ENSC 599. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ENSC 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ENSC 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

PREREQS: Departmental approval required.

ENSC 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 630. RESEARCH PROFILES (1-2). Faculty and graduate student environmental research presentations.

ENSC 699. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

■ GEOSCIENCES COURSES

GEO 101. *THE SOLID EARTH (4). Solid earth processes and materials. Earthquakes, volcanoes, earth structure, rocks, minerals, ores. Solid earth hazard prediction and planning. Geologic time. Lec/lab. (Bacc Core Course)

GEO 102. *THE SURFACE OF THE EARTH (4). Processes that shape the earth's surface. Weathering mass movement, ice dynamics, biogeography, climate, surface and ground water flow. Use of maps and imagery. Lec/lab. (Bacc Core Course)

GEO 105. *GEOGRAPHY OF THE NON-WESTERN WORLD (3). An introduction to the rich variety of environments, population and settlement dynamics, cultures, geopolitical changes, and economies in Africa, the Middle East, and Asia. Lec/lab/rec. (Bacc Core Course)

GEO 105H. *GEOGRAPHY OF THE NON-WESTERN WORLD (3). An introduction to the rich variety of environments, population and settlement dynamics, cultures, geopolitical changes, and economies in Africa, the Middle East, and Asia. Lec/lab/rec. (Bacc Core Course) **PREREQS:** Honors College approval required.

GEO 106. *GEOGRAPHY OF THE WESTERN WORLD (3). An introduction to the rich variety of environments, population and settlement dynamics, cultures, geopolitical changes, and economies in Europe and Russia, Australia and Oceania, and the Americas. (Bacc Core Course)

GEO 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

GEO 201. *PHYSICAL GEOLOGY (4). Study of earth's interior. Tectonic processes and their influence on mountains, volcanoes, earthquakes, minerals, and rocks. Field trip(s) required; transportation fee charged. Lec/lab. (Bacc Core Course)

GEO 201H. *PHYSICAL GEOLOGY (4). Study of earth's interior. Tectonic processes and their influence on mountains, volcanoes, earthquakes, minerals, and rocks. Field trip(s) required; transportation fee charged. Lec/lab. (Bacc Core Course) **PREREQS:** Honors College approval required.

GEO 202. *EARTH SYSTEMS SCIENCE (4). Surficial processes (glaciers, rivers), climate, soils, vegetation, and their interrelationships. Field trip(s) required; transportation fee charged. Lec/lab. (Bacc Core Course)

GEO 203. *EVOLUTION OF PLANET EARTH (4). History of earth and life as interpreted from fossils and the rock record. Field trip(s) required; transportation fee charged. Lec/lab. (Bacc Core Course)

GEO 221. *ENVIRONMENTAL GEOLOGY (4). Introductory geology emphasizing geologic hazards (volcanoes, earthquakes, landslides, flooding), geologic resources (water, soil, air, mineral, energy), and associated environmental problems and mitigation strategies. Lec/lab. (Bacc Core Course)

GEO 295. INTRODUCTION TO FIELD GEOLOGY (3). Two-week course taught in the fall program in various locations throughout the west. Collect field data to make geological maps, cross-sections, columns, and reports. Serves as an introduction to upper-level course work for Geology degree. Lec/lab. **PREREQS:** (GEO 201 and GEO 202)

GEO 296. INTRODUCTION TO GEOGRAPHIC FIELD RESEARCH (3). Two-week course taught in the fall program in various locations throughout the west. Collect and analyze data associated with both human and physical geography. Lec/lab. **PREREQS:** GEO 201 and GEO 202

GEO 300. *SUSTAINABILITY FOR THE COMMON GOOD (3). Geography of human relationships to earth's systems with an emphasis on individual impacts and collective efforts to achieve environmental sustainability. Lec/rec. (Bacc Core Course) **PREREQS:** Upper-division standing.

GEO 300H. *SUSTAINABILITY FOR THE COMMON GOOD (3). Geography of human relationships to earth's systems with an emphasis on individual impacts and collective efforts to achieve environmental sustainability. Lec/rec. (Bacc Core Course) **PREREQS:** Upper-division standing. Honors College approval required.

GEO 301. MAP AND IMAGE INTERPRETATION (4). Reading, analysis, and interpretation of maps/remote sensing images used by geoscientists. Use of topographic, geologic, nautical and other geoscience maps; basic air photo interpretation. Lec/lab.

GEO 305. *LIVING WITH ACTIVE CASCADE VOLCANOES (3). The impact of volcanic activity on people, infrastructure, and natural resources; how and why volcanic activity in the Cascade Range occurs; volcano monitoring and hazard assessment. Field trip required, transportation fee charged. (Bacc Core Course)

GEO 306. *MINERALS, ENERGY, WATER, AND THE ENVIRONMENT (3). Geologic occurrences, environmental consequences, and future of non-renewable earth resources, including metals, materials, oil, soil, and groundwater. (Bacc Core Course)

GEO 307. *NATIONAL PARK GEOLOGY AND PRESERVATION (3). National parks as classrooms to study geological processes and the importance of preserving natural landscapes. Field trip(s) required; transportation fee charged. (Bacc Core Course)

GEO 307H. *NATIONAL PARK GEOLOGY AND PRESERVATION (3). National parks as classrooms to study geological processes and the importance of preserving natural landscapes. Field trip(s) required; transportation fee charged. (Bacc Core Course) **PREREQS:** Honors College approval required.

GEO 308. *GLOBAL CHANGE AND EARTH SCIENCES (3). Study of global change over different time scales during the history of the earth, with emphasis on evolution of its atmosphere, plate tectonics, paleoclimates, and mass extinctions. (Bacc Core Course)

GEO 309. *ENVIRONMENTAL JUSTICE (3). Technical and social issues surrounding the unequal exposure to environmental hazards based on race and the environmental justice movement that has grown to address charges of such environmental racism. (Bacc Core Course) **PREREQS:** (WR 121 or WR 121H) and sophomore standing

GEO 310. EARTH MATERIALS I: MINERALOGY (4). Principles of crystal morphology, and structure. Characteristics, identification, and origins of minerals. Lec/lab. **PREREQS:** (GEO 201 or GEO 221) and students should concurrently enroll in CH 121 or CH 221 or ((CH 231 and CH 261) or (CH 231H and CH 261H))

GEO 315. EARTH MATERIALS II: PETROLOGY (4). Origin, identification and classification of igneous, sedimentary, and metamorphic rocks. Field trip(s) required, transportation fee charged. Lec/lab. **PREREQS:** GEO 310

GEO 322. SURFACE PROCESSES (4). Examination of surficial processes and terrestrial landforms of the earth, including slopes, rivers, glaciers, deserts, and coastlines. Field trip(s)

required; transportation fee charged. Lec/lab.
PREREQS: (GEO 102 or GEO 102H or GEO 202)

GEO 323. ^CLIMATOLOGY (4). Systematic analysis of global and regional climates. Physical principles of climate, climate classifications, and distribution and characteristics of climate regimes. Lec/lab. (Writing Intensive Course) **PREREQS:** GEO 101 and GEO 202

GEO 324. GEOGRAPHY OF LIFE: SPECIES DISTRIBUTIONS AND CONSERVATION (4). Plant, animal, and biotic community distribution and dynamics. Effect of climate, tectonics, disturbance on extinction, speciation, and succession. Field trip(s) required; transportation fee charged. Lec/lab.

GEO 325. *GEOGRAPHY OF AFRICA (3). An introduction to the physical, historical, cultural, political, and development geography of Africa south of the Sahara. Offered alternate years. (NC) (Bacc Core Course)

GEO 326. *GEOGRAPHY OF EUROPE (3). A regional overview precedes a topical examination of Europe's diverse physical and cultural landscapes and lifestyles. (Bacc Core Course)

GEO 327. *GEOGRAPHY OF ASIA (3). Geographic analysis of Asia's lands and peoples. Emphasis on regional physical environments, resources and development potentials, population trends, and international importance to the United States. May not be offered each year. (NC) (Bacc Core Course)

GEO 328. *GEOGRAPHY OF LATIN AMERICA (3). Focuses on the diverse landscapes, peoples and cultural traditions of Latin America, a vast region extending from the United States-Mexican border to the southern tip of South America. (NC) (Bacc Core Course)

GEO 329. *GEOGRAPHY OF THE UNITED STATES AND CANADA (3). Cultural, economic, political, and settlement geography. Emphasis on regional patterns and problems. Analysis of recent and projected changes. (Bacc Core Course)

GEO 330. *^GEOGRAPHY OF INTERNATIONAL DEVELOPMENT AND GLOBALIZATION (3). Introduction to the geography of global wealth and inequality with a focus on contemporary development, underdevelopment, and globalization problems in Asian, African, Caribbean, Latin American, and Pacific Island countries. (Bacc Core Course) (Writing Intensive Course) **PREREQS:** GEO 105 or GEO 106 or instructor approval.

GEO 335. *INTRODUCTION TO WATER SCIENCE AND POLICY (3). Policy and science of the hydrologic cycle. Emphasis on interaction between water's natural time-space fluctuations and human uses. (Bacc Core Course) **CROSSLISTED** as SOIL 335.

GEO 335H. *INTRODUCTION TO WATER SCIENCE AND POLICY (3). Policy and science of the hydrologic cycle. Emphasis on interaction between water's natural time-space fluctuations and human uses. (Bacc Core Course) **PREREQS:** Honors College approval required.

GEO 340. STRUCTURAL GEOLOGY (4). Analysis of geometry and kinematics of geologic structures including brittle and ductile faults, folds, joints, deformation fabrics. Field trip(s) required; transportation fee charged. Lec/lab. **PREREQS:** GEO 201

GEO 350. *POPULATION GEOGRAPHY (3). Patterns of spatial distribution of human populations, data sources, data display, population structure and dynamics, relationship between population, resources, and quality of life. Problems of growth and alternative futures. Offered alternate years. (SS) (Bacc Core Course) **PREREQS:** Upper-division standing.

GEO 352. *OREGON: GEOLOGY, PLACE, AND LIFE ON THE RING OF FIRE (4). Provides an overview of the geology of Oregon in the context

of the Pacific Northwest including tectonic setting, geologic features and landscapes, as well as topics and concepts of interest to society in general. Lessons will include discussion of the relationship between people and the landscape, incorporating the concept of ethnographic landscapes—geologic structures, natural resources and geologic hazards that are part of the identity of a place. Emphasizes written and graphic communication skills. Field trip required, transportation fee charged. Lec/lab. (Bacc core course) **PREREQS:** Introductory science course recommended.

GEO 360. CARTOGRAPHY (4). Basic cartographic principles. Design, compilation, and construction of maps. Lec/lab.

GEO 365. INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS (4). Introduction to the principles of geographic information systems (GIS) and experience using a widely popular geographic information system for spatial data input, analysis, and display. **PREREQS:** (GEO 301 or GEO 360) strongly recommended.

GEO 370. STRATIGRAPHY AND SEDIMENTOLOGY (4). Basic principles of sedimentology and stratigraphy. Sedimentology is largely concerned with classifying and interpreting the origin of sedimentary rocks. Stratigraphy provides formal rules and strategies for organizing sedimentary (and other) rocks into a temporal framework. Reconstruction of Earth history with various approaches centered on paleoclimatology, paleogeography, paleoceanography, and tectonics. Lec/lab. **PREREQS:** GEO 201

GEO 380. *EARTHQUAKES IN THE PACIFIC NORTHWEST (3). Earthquake hazards in the Northwest; responses to reducing earthquake risk at state, local, and personal levels. (Bacc Core Course)

GEO 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

GEO 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

GEO 400. FIELD TRIPS (1-16). Participation in group field trips that are not a part of any other course. Transportation fee is charged. Students may prepare guides for trips. Faculty sponsor must be prearranged. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GEO 401. RESEARCH (1-16). Independent, original research subjects guided by faculty conferences and resulting in a brief written report. Faculty sponsor must be prearranged. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GEO 403. THESIS (1-16). Independent, original study that culminates in a senior thesis. Faculty sponsor must be prearranged. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GEO 405. READING AND CONFERENCE (1-16). Independent reading in specialized topics guided by and discussed in faculty conferences. Faculty sponsor must be prearranged. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GEO 407. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GEO 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GEO 409. CONTEMPORARY EARTH SCIENCE ISSUES (3). In-depth examination of selected significant issues in the geosciences. Topics vary. Emphasis on problem solving and collaborative research. **PREREQS:** Senior standing in geology, geography, earth science, or natural resources.

GEO 410. INTERNSHIP (1-15). Pre-career professional experience under joint faculty and employer supervision. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** 12 credits of upper-division geosciences and departmental approval required.

GEO 412. IGNEOUS PETROLOGY (4). Petrogenesis of igneous rocks. Petrographic analysis using polarizing microscopes. Field trip may be required, transportation fee charged. Lec/lab. **PREREQS:** GEO 315 and GEO 415

GEO 415. EARTH MATERIALS III: IGNEOUS PETROGRAPHY (4). Microscope-based study of minerals and igneous, sedimentary and metamorphic rocks. Representation and interpretation of geological processes based on microscopic observation. Lec/lab. **PREREQS:** GEO 201 and GEO 310 and GEO 315

GEO 420. GEOGRAPHY OF RESOURCE USE (3). Functional concepts of resources, institutions affecting resource use, role of resources; resource supply, bases of controversy. Field trip(s) may be required; transportation fee charged. **PREREQS:** 9 credits of upper-division geography.

GEO 423. LAND USE IN THE AMERICAN WEST (3). Development of a conceptual framework for land use study; analysis of land as a resource, land use trends, land use principles, and management issues as related to planning, focusing on the American West, the fastest growing region in the nation.

GEO 424. INTERNATIONAL WATER RESOURCES MANAGEMENT (3). An investigation of the various approaches to water resources geography at the international level. Explores the interaction between water science and policy through issues of current "hydropolitics" and water resources development. Topics include water quality, dams and development, conflict and cooperation, climate change, and water institutions. Offered separately as GEO 424 and GEO 524. **PREREQS:** 9 credits of upper-division geography and any course dealing with the hydrologic cycle.

GEO 425. WATER RESOURCES MANAGEMENT IN THE UNITED STATES (3). An investigation of the various approaches to water resources geography within the U.S. Explores the disciplines that address water resources management, their tools, and their limitations. Topics include engineering, law, economics, risk assessment, game theory, conflict resolution, and the fine arts. Offered separately as GEO 425 and GEO 525. **PREREQS:** 9 credits of upper-division geography and any course dealing with the hydrologic cycle.

GEO 426. GLOBAL RESOURCES AND DEVELOPMENT (3). Examines resource development issues and strategies in the Global South. Issues and strategies from agriculture, forestry, fisheries, energy, wildlife management, mineral development, land use, and health are examined. Offered every other odd year in spring.

GEO 427. ^VOLCANOLOGY (4). A survey of volcanoes: their distribution, forms, composition, eruptive products, eruptive styles, and associated phenomena. Field trip may be required; transportation fee charged. Offered alternate years. Lec/lab. (Writing Intensive Course) **PREREQS:** GEO 315

GEO 429. TOPICS IN RESOURCE GEOGRAPHY (3). Fundamental problems with stress upon methods of analysis. Topics vary. Not offered every year. This course is repeatable for a maximum of 6 credits. **PREREQS:** 9 credits of upper-division geography.

GEO 430. GEOCHEMISTRY (4). Principles of geochemistry applied to problems of earth science. Field trip(s) may be required; transportation fees charged. Lec/rec. **PREREQS:** GEO 315 and (CH 121 and CH 122) or (CH 221 and CH 222)

GEO 432. APPLIED GEOMORPHOLOGY (3). Effect of landform processes upon human activity; consequences of resource management strategies on erosional balance within landscape; identification of mitigation of natural hazards; role of geomorphic process studies in environmental planning. Taught as seminar, themes TBA. Field trip(s) may be required; transportation fee charged. **PREREQS:** GEO 322

GEO 433. COASTAL GEOMORPHOLOGY (3). Morphodynamic approach to coastal landforms, processes and evolution including the impacts and response of humans to coastal change. **PREREQS:** ((PH 211 or PH 211H) and (PH 212 or PH 212H) and GEO 322) and MTH 251 and MTH 252 or equivalent.

GEO 439. TOPICS IN PHYSICAL GEOGRAPHY (3). Fundamental problems with stress upon methods of analysis. Topics vary. Not offered every year. This course is repeatable for a maximum of 6 credits.

GEO 440. ECONOMIC GEOLOGY (4). Principles of the origin, distribution, and importance of metallic mineral deposits formed by magmatic, hydrothermal, and sedimentary processes. Lec/lab. **PREREQS:** GEO 315 and GEO 340

GEO 444. REMOTE SENSING (4). Fundamentals of satellite remote sensing and image analysis. Topics include physical principles of remote sensing from the ultraviolet to the microwave, sensors and sensor technology, and environmental applications of remote sensing through image analysis. Lec/lab. **PREREQS:** GEO 301 is recommended.

GEO 445. COMPUTER-ASSISTED CARTOGRAPHY (3). Concepts and techniques underlying the production of maps by computer. Practical experience with a variety of computer mapping packages. Lec/lab. **PREREQS:** GEO 360 and MTH 112

GEO 451. ENVIRONMENTAL SITE PLANNING (3). The use of geographic concepts/techniques in land use and site planning; especially natural area inventory, classification and analysis. Findings-of-fact presentation and report writing. Two local field trips may be required; transportation fee charged. Offered alternate years.

GEO 452. PRINCIPLES AND PRACTICES OF RURAL AND RESOURCE PLANNING (3). Principles, techniques, and current practices of land use planning for rural areas. Emphasis on resource issues, organization of data, policy development, and decision-making. Offered alternate years. **PREREQS:** GEO 423 or GEO 523

GEO 453. RESOURCE EVALUATION METHODS/EIS (3). Methods of resource analysis for land use planning; resource rating systems; environmental impact assessment: laws, procedures, and methods. Field trip(s) may be required; transportation fee charged. Offered alternate years. **PREREQS:** GEO 452

GEO 460. MULTIMEDIA CARTOGRAPHY (4). Map design principles and technology for multimedia cartography, especially interactive and animated mapping. Laboratory experience with interactive and animated mapping software. Lec/lab. **PREREQS:** GEO 360

GEO 461. GEOLOGY OF EARTHQUAKES (3). Tectonics of the present day as based on surface geology, geodesy, seismicity, and crustal structure; description of active faults and folds; use of neotectonics in evaluation of earthquake hazard. Field trip(s) may be required; transportation fee charged. Offered alternate years. **PREREQS:** GEO 340

GEO 463. ^GEOPHYSICS AND TECTONICS (4). Geophysical observations as constraints on geologic interpretation. Lec/lab. (Writing Intensive Course) **PREREQS:** MTH 251 and (PH 202 or PH 212) or equivalent.

GEO 465. GEOGRAPHIC INFORMATION SYSTEMS AND SCIENCE (4). Introduces

students to the theory and techniques of geospatial analysis within a GIS. Focuses on developing a foundation in geospatial reasoning skills. Building upon the introductory material presented in GEO 365, this course will guide students through the process of developing and carrying out geospatial analyses using various spatial data structures, techniques and models. It will culminate in the completion of a geospatial analysis project developed by the student. Lec/lab. **PREREQS:** GEO 365 or instructor approval.

GEO 466. DIGITAL IMAGE PROCESSING (3). Digital analysis of remote sensor data. Image display enhancement, classification, and rectification principles. Practical experience with an image processing system. Offered alternate years. Lec/lab. **PREREQS:** GEO 444

GEO 469. TOPICS IN GEOGRAPHIC TECHNIQUES (3). Advanced and specialized geographic information processing techniques, procedures, and applications. Topics vary. Not offered every year. This course is repeatable for a maximum of 6 credits.

GEO 481. GLACIAL GEOLOGY (4). Mass balance of glaciers, physics of glacial flow, processes of glacial erosion and deposition, glacial meltwater, glacial isostasy and eustasy, and Quaternary stratigraphy. Field trip(s) may be required; transportation fee charged. Lec/lab. Offered alternate years. **PREREQS:** GEO 202

GEO 483. SNOW HYDROLOGY (3). Fundamentals of snow hydrology. Physical principles of snow formation, snowpack accumulation, energy balance, snowcover-climate interactions, snow metamorphism, snowpack ablation, snowpack/snowmelt chemistry, remote sensing of snow, avalanches, field methods, snowmelt/runoff modeling techniques, and watershed processes. **PREREQS:** GEO 202 and MTH 111

GEO 484. INTRODUCTION TO BIOGEOCHEMISTRY (3). Interdisciplinary course, applying concepts from chemistry, physics, biology and geology to Earth systems including terrestrial, ocean and freshwater environments; water and energy cycles; carbon, nitrogen, phosphorus and sulfur cycles; biogeochemical cycles through Earth history. **PREREQS:** MTH 111 and ((CH 121 and CH 122) or (CH 231 and CH 261 and CH 232 and CH 262))

GEO 486. QUATERNARY PALEOCLIMATOLOGY (3). Introduction to geochronology, climate proxies, climate forcing, and climate modeling applied to paleoclimate problems. Emphasis on Quaternary climate history. **PREREQS:** (GEO 202 or GEO 203) and (CH 122 or CH 222 or ((CH 232 or CH 232H) and (CH 262 or CH 262H or CH 272)) and PH 201 or PH 211 or equivalent.

GEO 487. HYDROGEOLOGY (4). Movement of water through porous media. Darcy's Law and groundwater flow equation. Development of groundwater resources. Computer models. Lec/lab. **PREREQS:** (MTH 252 or MTH 252H) and GEO 202

GEO 488. QUATERNARY STRATIGRAPHY OF NORTH AMERICA (3). Stratigraphic principles applied to Quaternary deposits. Survey Quaternary dating methods. Proxy records of glaciation and climate change. Quaternary stratigraphy of North America, emphasizing stratigraphic records of ice sheets, glaciers, and pluvial lakes. Offered alternate years. **PREREQS:** (GEO 481 or GEO 581) or instructor approval required.

GEO 495. ADVANCED FIELD GEOLOGY (6). Six-week summer program in central Oregon. Collect field data to make geological maps, cross-sections, columns, and reports. Fee charged. **PREREQS:** GEO 315 and GEO 340 and GEO 295

GEO 497. FIELD MAPPING OF ORE DEPOSITS (3). Eight-day field trip over spring vacation to a mineral district in the western United States,

emphasizing detailed mapping of outcrops, trenches, and underground workings. Students prepare final maps and a report suitable for presentation to management or publication during spring term. Transportation fee charged. Not offered every year. **PREREQS:** (GEO 440 or GEO 540) and GEO 495

GEO 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

GEO 500. FIELD TRIPS (1-16). Participation in group field trips that are not a part of any other course. Transportation fee is charged. Students may prepare guides for trips. Faculty sponsor must be prearranged. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GEO 501. RESEARCH (1-16). Independent, original research subjects guided by faculty conferences and resulting in a brief written report. Faculty sponsor must be prearranged. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GEO 503. THESIS (1-16). Independent, original study that culminates in a senior thesis. Faculty sponsor must be prearranged. This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

GEO 505. READING AND CONFERENCE (1-16). Independent reading in specialized topics guided by and discussed in faculty conferences. Faculty sponsor must be prearranged. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GEO 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GEO 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GEO 510. INTERNSHIP (1-15). Pre-career professional experience under joint faculty and employer supervision. May not be used to meet minimum credit hour requirements for graduate degrees in geosciences. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** 12 credits of upper-division geosciences.

GEO 512. IGNEOUS PETROLOGY (4). Petrogenesis of igneous rocks. Petrographic analysis using polarizing microscopes. Field trip may be required, transportation fee charged. Lec/lab. **PREREQS:** GEO 315 and GEO 415

GEO 514. GROUNDWATER HYDRAULICS (3). Principles of groundwater flow and chemical transport in confined and unconfined aquifers, aquifer testing and well construction. Design of dewatering and contaminant recovery systems. CROSSLISTED as BEE 514 and CE 514. **PREREQS:** MTH 252

GEO 515. HISTORY AND PHILOSOPHY OF GEOGRAPHY (3). The historical development of research traditions in the discipline of geography. This includes an examination of changes in conceptual structures and current trends. **PREREQS:** Graduate standing in geography.

GEO 516. INTERPRETATION OF GEOLOGIC MAPS (2). Development of skills in formulating geologic problems, using geologic maps, and developing solutions by the scientific method. **PREREQS:** GEO 495

GEO 518. GEOSCIENCE COMMUNICATION (3). Professional development of the skills of technical editing and writing for geoscientists. Practice the craft of presentation development and delivery, and the broader issues of problem development, and manuscript and proposal writing specific to geoscience graduate students.

GEO 520. GEOGRAPHY OF RESOURCE USE (3). Functional concepts of resources, institutions affecting resource use, role of resources; resource

supply, bases of controversy. Field trip(s) may be required; transportation fee charged. **PREREQS:** 9 credits of upper-division geography.

GEO 523. LAND USE IN THE AMERICAN WEST (3). Development of a conceptual framework for land use study; analysis of land as a resource, land use trends, land use principles, and management issues as related to planning, focusing on the American West, the fastest growing region in the nation.

GEO 524. INTERNATIONAL WATER RESOURCES MANAGEMENT (3). An investigation of the various approaches to water resources geography at the international level. Explores the interaction between water science and policy through issues of current “hydropolitics” and water resources development. Topics include water quality, dams and development, conflict and cooperation, climate change, and water institutions. Offered separately as GEO 424 and GEO 524. **PREREQS:** 9 credits of upper-division geography and any course dealing with the hydrologic cycle.

GEO 525. WATER RESOURCES MANAGEMENT IN THE UNITED STATES (3). An investigation of the various approaches to water resources geography within the U.S. Explores the disciplines that address water resources management, their tools, and their limitations. Topics include engineering, law, economics, risk assessment, game theory, conflict resolution, and the fine arts. Offered separately as GEO 425 and GEO 525. **PREREQS:** 9 credits of upper-division geography.

GEO 526. GLOBAL RESOURCES AND DEVELOPMENT (3). Examines resource development issues and strategies in the Global South. Issues and strategies from agriculture, forestry, fisheries, energy, wildlife management, mineral development, land use, and health are examined. Offered every other odd year in spring.

GEO 527. VOLCANOLOGY (4). A survey of volcanoes: their distribution, forms, composition, eruptive products, eruptive styles, and associated phenomena. Field trip may be required; transportation fee charged. Offered alternate years. Lec/lab. **PREREQS:** GEO 315

GEO 529. TOPICS IN RESOURCE GEOGRAPHY (3). Fundamental problems with stress upon methods of analysis. Topics vary. Not offered every year. This course is repeatable for a maximum of 6 credits. **PREREQS:** 9 credits of upper-division geography.

GEO 530. GEOCHEMISTRY (4). Principles of geochemistry applied to problems of earth science. Field trip(s) may be required; transportation fees charged. Lec/rec. **PREREQS:** GEO 315* and ((CH 122 or CH 222) or (CH 221 and CH 222))

GEO 532. APPLIED GEOMORPHOLOGY (3). Effect of landform processes upon human activity; consequences of resource management strategies on erosional balance within landscape; identification of mitigation of natural hazards; role of geomorphic process studies in environmental planning. Taught as seminar, themes TBA. Field trip(s) may be required; transportation fee charged. **PREREQS:** GEO 322

GEO 533. COASTAL GEOMORPHOLOGY (3). Morphodynamic approach to coastal landforms, processes and evolution including the impacts and response of humans to coastal change. **PREREQS:** MTH 251 and MTH 252 and PH 211 and PH 212 or equivalent and GEO 322 or equivalent.

GEO 534. FIELD GEOGRAPHY OF OREGON (3). Designed to introduce students to the widest possible range of topics on all aspects of Oregon geography within a limited time, then turn that experience into a viable research proposal. While physical processes are the primary topic, resource and environmental effects are stressed.

GEO 535. GEOCHEMICAL ANALYSIS TECHNIQUES (3). An introduction to the theory, techniques and instrumentation used for the chemical analysis of earth materials, with emphasis on analysis of solid earth material samples (predominantly, but not restricted to, rocks). Includes discussions of laboratory safety, relevant statistical approaches, basic physical and chemical principles of analysis, sample preparation techniques and data processing and reporting. Course also includes a large component of hands-on experience with instrumentation available in-house in the College of Earth, Ocean, and Atmospheric Sciences. Lec/lab. **PREREQS:** GEO 530 and /or equivalent.

GEO 536. STRUCTURAL AND NEOTECTONIC FIELD METHODS (3). Field-intensive mapping experience emphasizing a topical issue in active tectonics, neotectonics, earthquake geology, or structural geology. One-week field trip required; transportation fee charged. Weekly discussions during quarter. Offered alternate years. **PREREQS:** GEO 495

GEO 537. TECTONIC GEOMORPHOLOGY (3). Exploration of linkages between patterns of erosion, crustal deformation, and landscape evolution from geomorphic, geologic, geophysical, and modeling perspectives. Field trip required; transportation fee charged. Offered alternate years. **PREREQS:** GEO 322 and GEO 340

GEO 539. TOPICS IN PHYSICAL GEOGRAPHY (3). Fundamental problems with stress upon methods of analysis. Topics vary. Not offered every year. This course is repeatable for a maximum of 9 credits.

GEO 540. ECONOMIC GEOLOGY (4). Principles of the origin, distribution, and importance of metallic mineral deposits formed by magmatic, hydrothermal, and sedimentary processes. Lec/lab. **PREREQS:** GEO 315 and GEO 340

GEO 541. SPATIO-TEMPORAL VARIATION IN ECOLOGY AND EARTH SCIENCE (4). Objectives and techniques of spatial and temporal analysis. Point patterns, geostatistics, spectral analysis, wavelet analysis, interpolation, and mapping. Lec/lab. **PREREQS:** ST 411 or ST 511

GEO 544. REMOTE SENSING (4). Fundamentals of satellite remote sensing and image analysis. Topics include physical principles of remote sensing from the ultraviolet to the microwave, sensors and sensor technology, and environmental applications of remote sensing through image analysis. **PREREQS:** GEO 301 is recommended.

GEO 545. COMPUTER-ASSISTED CARTOGRAPHY (3). Concepts and techniques underlying the production of maps by computer. Practical experience with a variety of computer mapping packages. Lec/lab. **PREREQS:** GEO 360 and MTH 112

GEO 546. ADVANCED LANDSCAPE AND SEASCAPE ECOLOGY (4). Pattern-process interactions in large scale ecological and physical systems, including terrestrial, aquatic, and marine/ocean ecosystems. Principles of pattern-process interactions from genetic to community levels of ecological organization applied to design of conservation reserves. Hypothesis testing, field techniques, spatial models/statistics, GIS/remote sensing. Lec/lab.

GEO 548. FIELD RESEARCH IN GEOMORPHOLOGY AND LANDSCAPE ECOLOGY (3). Natural history interpretation of disturbance and recovery processes and management implications in forest-stream landscapes of western Oregon. Course consists of field experience and several seminars. Transportation and lodging fee charged. **PREREQS:** 9 graduate credits of sciences or engineering.

GEO 551. ENVIRONMENTAL SITE PLANNING (3). The use of geographic concepts/techniques in land use and site planning; especially natural area

inventory, classification and analysis. Findings-of-fact presentation and report writing. Two local field trips may be required; transportation fee charged. Offered alternate years.

GEO 552. PRINCIPLES AND PRACTICES OF RURAL AND RESOURCE PLANNING (3). Principles, techniques, and current practices of land use planning for rural areas. Emphasis on resource issues, organization of data, policy development, and decision-making. Offered alternate years. **PREREQS:** GEO 423 or GEO 523

GEO 553. RESOURCE EVALUATION METHODS/EIS (3). Methods of resource analysis for land use planning; resource rating systems; environmental impact assessment: laws, procedures, and methods. Field trip(s) may be required; transportation fee charged. Offered alternate years. **PREREQS:** GEO 452

GEO 560. MULTIMEDIA CARTOGRAPHY (4). Map design principles and technology for multimedia cartography, especially interactive and animated mapping. Laboratory experience with interactive and animated mapping software. Lec/lab. **PREREQS:** GEO 360

GEO 561. GEOLOGY OF EARTHQUAKES (3). Tectonics of the present day as based on surface geology, geodesy, seismicity, and crustal structure; description of active faults and folds; use of neotectonics in evaluation of earthquake hazard. Field trip(s) may be required; transportation fee charged. Offered alternate years. **PREREQS:** GEO 340

GEO 563. GEOPHYSICS AND TECTONICS (4). Geophysical observations as constraints on geologic interpretation. Lec/lab. **PREREQS:** MTH 251 and (PH 202 or PH 212) or equivalent

GEO 565. GEOGRAPHIC INFORMATION SYSTEMS AND SCIENCE (4). Introduction to modern spatial data processing, development, and functions of geographic information systems (GIS); theory, concepts and applications of geographic information science (GISci). Lec/lab.

GEO 566. DIGITAL IMAGE PROCESSING (3). Digital analysis of remote sensor data. Image display enhancement, classification, and rectification principles. Practical experience with an image processing system. Offered alternate years. Lec/lab. **PREREQS:** GEO 544

GEO 567. RESPONSIBLE GIS PRACTICE: ETHICS FOR FUTURE GEOSPATIAL PROS (3). Prepares current and aspiring professionals to recognize, analyze and address ethical issues in geographic information science and technology. **PREREQS:** Instructor approval required.

GEO 568. INTERACTIVE CARTOGRAPHY AND GEOVISUALIZATION (4). An overview of methods and applications in interactive, dynamic cartographic visualization, including the skills of designing, building, and evaluating customized user-interfaces to geographic information. Introduces students to a working knowledge of web programming to create interactive mapping applications, focusing on client-side technology. **PREREQS:** Basic programming experience (any language) and one GIS course; or instructor approval required.

GEO 569. TOPICS IN GEOGRAPHIC TECHNIQUES (3). Advanced and specialized geographic information processing techniques, procedures, and applications. Topics vary. Not offered every year. This course is repeatable for a maximum of 6 credits.

GEO 580. ADVANCED GIS APPLICATIONS IN THE GEOSCIENCES (4). Advanced geographic information science theory, analysis, and projects involving geosciences, coastal/marine, and other natural resource studies. Advanced training in a professional grade GIS package. Lec/lab. **PREREQS:** GEO 465 or GEO 565 or equivalent

GEO 581. GLACIAL GEOLOGY (4). Mass balance of glaciers, physics of glacial flow,

processes of glacial erosion and deposition, glacial meltwater, glacial isostasy and eustasy, and Quaternary stratigraphy. Field trip(s) may be required; transportation fee charged. Lec/lab. Offered alternate years. **PREREQS:** GEO 202

GEO 582. GEOMORPHOLOGY OF FORESTS AND STREAMS (3). Physical processes (erosion, transport, deposition, hydraulics, morphology) and biotic interactions on hillslopes, riparian zones, and fluvial systems at multiple spatial and temporal scales. Offered alternate years. **PREREQS:** 9 graduate credits of sciences or engineering.

GEO 583. SNOW HYDROLOGY (3). Fundamentals of snow hydrology. Physical principles of snow formation, snowpack accumulation, energy balance, snowcover-climate interactions, snow metamorphism, snowpack ablation, snowpack/snowmelt chemistry, remote sensing of snow, avalanches, field methods, snowmelt/runoff modeling techniques, and watershed processes.

GEO 586. QUATERNARY PALEOCLIMATOLOGY (3). Introduction to geochronology, climate proxies, climate forcing, and climate modeling applied to paleoclimate problems. Emphasis on Quaternary climate history. **PREREQS:** ((GEO 202 or GEO 203) and (CH 122 or CH 222 or (CH 232 and CH 262) or (CH 232H and CH 262H))) and (PH 201 or PH 211) or equivalent

GEO 588. QUATERNARY STRATIGRAPHY OF NORTH AMERICA (3). Stratigraphic principles applied to Quaternary deposits. Survey Quaternary dating methods. Proxy records of glaciation and climate change. Quaternary stratigraphy of North America, emphasizing stratigraphic records of ice sheets, glaciers, and pluvial lakes. Offered alternate years. **PREREQS:** (GEO 481 or GEO 581) or instructor approval required

GEO 593. TOPICS IN QUATERNARY GEOLOGY (2). Survey of current ideas and issues relating to Quaternary-age geologic environments. Topics may include advances in geochronology, causes of climate change, modeling of ice age geodynamics. This course is repeatable for a maximum of 10 credits.

GEO 597. FIELD MAPPING OF ORE DEPOSITS (3). Eight-day field trip over spring vacation to a mineral district in the western United States, emphasizing detailed mapping of outcrops, trenches, and underground workings. Students prepare final maps and a report suitable for presentation to management or publication during spring term. Transportation fee charged. Not offered every year. **PREREQS:** (GEO 440 or GEO 540) and GEO 495

GEO 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

GEO 600. FIELD TRIPS (1-16). Participation in group field trips that are not part of any other course. Transportation fee charged. Students may prepare guide for trips. Faculty sponsors must be arranged. Graded P/N. This course is repeatable for a maximum of 16 credits.

GEO 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

GEO 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

GEO 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

GEO 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

GEO 607. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

GEO 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

GEO 622. IGNEOUS PETROLOGY (3). Controls on the distribution of major and trace elements;

theory, applications, and examples. Field trip(s) may be required; transportation fee charged. Offered alternate years. **PREREQS:** GEO 412 or GEO 512

GEO 633. GEOCHRONOLOGY AND ISOTOPE GEOLOGY (3). Measurements of cosmic and geologic time by radioactive decay. Use of radiogenic and stable isotopic tracers in geology. Offered alternate years. **PREREQS:** Graduate standing in geology or related fields.

GEO 691. MASS AND HEAT TRANSPORT IN THE ENVIRONMENT (4). Quantitative treatment of processes affecting transport in lakes, streams, and groundwater: advection; diffusion; dispersion. Lec/lab. Offered alternate years. **PREREQS:** (GEO 487 or CE 412) or equivalent and MTH 256

GEO 694. TOPICS IN ORE GENESIS (1-3). In-depth examination of published research on selected mineral deposits to build an understanding of environments and processes of ore formation. Offered alternate years. This course is repeatable for a maximum of 6 credits.

GEO 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

■ GEOPHYSICS COURSES

GPH 501. RESEARCH (1-16). Original research work that will not be part of the data used in a thesis. Graded P/N. This course is repeatable for a maximum of 16 credits.

GPH 503. THESIS (1-16). Thesis research and writing. This course is repeatable for a maximum of 999 credits.

GPH 505. READING AND CONFERENCE (1-16). Independent reading and library research on specialized topics in geophysics, guided by discussions with supervising faculty. A written report may be required. This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor and topic approval required before registration.

GPH 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

GPH 601. RESEARCH (1-16). Original research work that will not be part of the data used in a thesis. Graded P/N. This course is repeatable for a maximum of 16 credits.

GPH 603. THESIS (1-16). Thesis research and writing. This course is repeatable for a maximum of 999 credits.

GPH 605. READING AND CONFERENCE (1-16). Independent reading and library research on specialized topics in geophysics guided by discussions with supervising faculty. A written report may be required. This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor and topic approval required before registration.

GPH 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

GPH 620. PHYSICS OF THE EARTH (3). Effects of confining pressure, temperature, time, and solutions on properties of rocks; earth and moon in solar system; source materials and their reliabilities for determining nature and composition of the earth; composition of core, crust, and mantle; geodynamics; processes within the earth with special reference to their effect on earthquakes, isostasy, crustal structure, island arcs.

GPH 630. ELEMENTS OF SEISMOLOGY (4). Survey of basic concepts in global seismology: world seismicity; elastic structure of the earth; seismic wave paths in the earth; locating earthquakes; earthquake focal mechanisms, magnitudes, stress drop, energy; stress and strain, elasticity, wave equation, plane waves in homogeneous and layered media, surface waves, free oscillations; ray theory; seismometry; earthquake prediction. Laboratory

exercises include interpretation and analysis of seismograms from global seismographic networks. **PREREQS:** Differential equations.

GPH 631. THEORETICAL SEISMOLOGY (3). Representation of seismic sources, moment tensors, wave radiation from point and finite sources; wave propagation in attenuating medium; reflection and refraction of spherical waves, Lamb's problem, Cagniard-De Hoop methods; surface waves in a vertically heterogeneous medium; free oscillations of the earth. **PREREQS:** GPH 630 and Differential equations, complex analysis.

GPH 632. CRUSTAL SEISMOLOGY (3). Structure of the earth's crust and upper mantle from seismic reflection and large offset (refraction, wide-angle reflection) data. Methods of data collection, data processing theory and practice, modeling and interpretation techniques, correlation of seismic results with laboratory measurements of rock properties, and regional case studies. **PREREQS:** GPH 630

GPH 640. GEODESY (4). Physical and observational geodesy, including the Earth's gravity field and potential and determination of the Earth's geoid. Interpretation of geoid, geoid anomalies, and isostatic compensation. Gravity, point-position and remote sensing geodetic measurement techniques, including GPS, InSAR, VLBI, leveling, triangulation/trilateration, and low-Earth orbit gravity satellite missions are covered as are geodetic reference frames. Offered alternate years. **PREREQS:** .

GPH 641. ELECTROMAGNETIC METHODS IN GEOPHYSICS (3). Survey of electromagnetic (EM) methods in geophysics. Review of electromagnetic theory, Maxwell's equations in the quasi-static limit, the diffusion of EM fields in a layered conductor, qualitative discussion of EM fields in 2- and 3-D conductors. EM techniques, including DC resistivity, magnetotellurics, controlled source EM, induced polarization, and long-period magnetometer array methods. Applications to exploration, to basic research on crustal structure and to studies of upper-mantle conductivity. **PREREQS:** Upper-division EM course.

GPH 642. EARTH MAGNETISM (3). Geomagnetism and magnetic potential: general morphology and secular change; internal and external sources; principles of paleomagnetism, including field and laboratory procedures; origin of remnant magnetism in rocks and the controlling physical and chemical processes; the origin of the Earth's magnetic field. **PREREQS:** Instructor approval required.

GPH 650. GEOPHYSICAL INVERSE THEORY (4). Survey of the theory and applications of inverse methods currently used in the geophysical sciences for the interpretation of inaccurate and inadequate data. Backus-Gilbert inverse theory, resolution, regularization methods (such as damped least squares) for linear and non-linear problems, stochastic inversion, and extremal models. Applications to seismic, gravity, magnetic and electromagnetic data. **PREREQS:** Linear algebra, instructor approval required.

GPH 651. GEODYNAMICS I (3). Application of the techniques of continuum mechanics to geological problems. Thermal and subsidence history of the lithosphere; stress and strain in the earth; elasticity and flexure of the lithosphere; gravitational compensation. Offered alternate years. **PREREQS:** Instructor approval required.

GPH 652. GEODYNAMICS II (3). Application of the techniques of continuum mechanics to geological problems. Rheology of earth materials; fluid mechanics applied to the earth's mantle and to magma chambers; fluid flow in porous media. Offered alternate years. **PREREQS:** Instructor approval required.

GPH 665. GEOPHYSICAL FIELD TECHNIQUES (3). Instrumentation, field methods and

interpretation of gravimetric, magnetic, electrical and seismic prospecting techniques. Students will be required to collect, reduce, analyze, and interpret data.

GPH 689. SPECIAL TOPICS IN GEOPHYSICS (1-4). Special topics of current interest in geophysics, not covered in detail in other courses. May be repeated on different topics for credit. This course is repeatable for a maximum of 16 credits.

■ MARINE RESOURCES MANAGEMENT COURSES

MRM 501. RESEARCH AND SCHOLARSHIP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

MRM 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

MRM 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

MRM 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

MRM 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

MRM 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

MRM 510. INTERNSHIP (1-9). Planned and supervised resource management experience with selected cooperating governmental agencies, private organizations, or business firms. Supplementary conferences, reports and evaluations. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** For marine resource management majors only.

MRM 515. COASTAL RESOURCES MANAGEMENT (4). Survey of coastal zone and nearshore ocean management institutions, policies, decision-making processes, and management tools, with a United States emphasis. Using the public policy process as an organizing framework, issues addressed include natural hazards, water quality, habitat protection, public access, and the management of coastal development. Management processes and tools include information technologies, planning, regulation, protected areas, restoration, and coordination. Offered annually.

MRM 520. COASTAL LAW (3). Examines federal and state judicial and legislative protection of public beach access rights; ownership and use of tide and submerged lands, including the public trust doctrine and the federal and state navigation servitudes; federal and state protection of wetlands; and the Federal Coastal Zone Management Act.

MRM 521. OCEAN LAW (3). Utilizing the framework of the international Law of the Sea Convention, this course covers United States law regarding renewable and non-renewable ocean energy resources, fisheries, marine mammal and marine endangered species protection, marine pollution, and marine protected areas including marine reserves.

MRM 525. SPECIAL TOPICS IN MARINE RESOURCE MANAGEMENT (1-4). Subjects of current interest in marine resource management not covered in depth in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 99 credits.

MRM 530. PRINCIPLES AND PRACTICE OF MARINE RESOURCE MANAGEMENT (3). Introduction to the policy skills required for the sustainable management of marine and coastal resources. Core skills required of managers such as policy analysis, cost-benefit analysis, and risk assessment are applied to topical issues that illustrate the complexity of social, economic, and natural system interactions in the marine environment.

MRM 535. RIGHTS-BASED FISHERIES MANAGEMENT (3). Clear, appropriate and enforceable fishing entitlements and responsibilities are a cornerstone of sustainable fisheries management. Rights-based management tools such as dedicated access privileges, community quotas, co-management and cost recovery will be explored as ways of promoting individual and collective responsibility for sustainable fisheries management. High seas fisheries will also be addressed.

MRM 552. MARINE ECONOMICS (3). Economic aspects of marine resource utilization and management will be analyzed. Topics include open access aspect of marine resources; conflict and allocation of marine resources, marine resource markets, marine recreation, pollution, and aquaculture, with special emphasis on commercial fisheries. Offered every fall in odd years. **CROSSLISTED** as AREC 552 **PREREQS:** AREC 351 or AREC 352

MRM 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

■ OCEANOGRAPHY COURSES

OC 103. *EXPLORING THE DEEP: GEOGRAPHY OF THE WORLD'S OCEANS (4). Introduces non-science students to the oceans, including marine geology and chemistry, ocean currents, coastal and biological processes. Field trip required, transportation fee charged. Lec/lab. (Bacc Core Course)

OC 199. SPECIAL TOPICS IN OCEANOGRAPHY (1-4). Introduction to topics of current interest in oceanography for lower-division undergraduates. May be repeated for credit when topic varies. This course is repeatable for a maximum of 99 credits.

OC 201. OCEANOGRAPHY (4). Plate tectonics and the geological structure of ocean basins; physical and chemical properties of seawater; Earth's energy budget; large-scale circulation of the atmosphere and ocean; marine sediment properties and transport; Earth history recorded in marine sediments; the carbon cycle in the atmosphere and sea; and the ecology of pelagic and benthic systems. Lec/lab.

OC 332. COASTAL OCEANOGRAPHY (3). Physics, geology, biology and hydrology of coastal oceans. How coastal waters respond to forcing by heating, cooling, winds, tides, waves, rain, evaporation, river runoff and freezing. Geography and geology of coastlines: erosion and deposition processes, beach dynamics. Coastal equilibrium cells as sources and sinks of sediment. Rocky shore, beach, mudflat, estuarine, and coastal biotic communities; animal migrations. Law of the Sea rights and responsibilities of coastal states. Fisheries and mariculture in coastal seas. Pollution and coastal ocean resources. Using a matrix to define environmental problems; pathways that pollutants take through the coastal ecosystem. Offered annually.

OC 332H. COASTAL OCEANOGRAPHY (3). Physics, geology, biology and hydrology of coastal oceans. How coastal waters respond to forcing by heating, cooling, winds, tides, rain, evaporation, river runoff and freezing. Geography and geology of coastlines: erosion and deposition processes, beach dynamics. Coastal equilibrium cells as sources and sinks of sediment. Rocky shore, beach, mudflat, estuarine, and coastal biotic communities; animal migrations. Law of the Sea rights and responsibilities of coastal states. Fisheries and mariculture in coastal seas. Pollution and coastal ocean resources. Using a matrix to define environmental problems; pathways that pollutants take through the coastal ecosystem. Offered annually. **PREREQS:** Honors College approval required.

OC 333. OCEANS, COASTS, AND PEOPLE (3). Contemporary issues related to human interactions with the oceans and coastal zones, including living and energy resources, geohazards

and impacts of global change. Content presented in lectures, readings and group discussions, with project oral presentations. **PREREQS:** OC 331. A full-year sequence, OC 331, OC 332, OC 333 is recommended but not required.

OC 334. ^POLAR OCEANOGRAPHY (3). Explores the physical, chemical and biological oceanography of the Arctic and Antarctic and examines the impacts of mans' activities both directly through resource utilization, and indirectly through climate change. Introduction to polar oceanography through a series of lectures, interactive classes, written assignments and a case study. (Writing Intensive Course) **PREREQS:** OC 331

OC 399. SPECIAL TOPICS IN OCEANOGRAPHY (1-4).

OC 399H. SPECIAL TOPICS IN OCEANOGRAPHY (1-4).

OC 401. RESEARCH PROJECTS (1-4). Field and laboratory research in oceanography for undergraduates, resulting in a written report. This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor and topic approval required before registration.

OC 403. THESIS (1-16). Independent, original study that culminates in a senior thesis. Faculty sponsor must be prearranged. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** College approval required.

OC 405. READING AND CONFERENCE (1-4). Independent library research and reading in specialized topics in oceanography for undergraduates, guided by discussions in conferences with faculty. A written report may be required. This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor and topic approval required before registration.

OC 407. SEMINAR (1-3). Undergraduate seminar on current developments in the oceanographic research literature, with student presentations and group discussions. A written report may be required. This course is repeatable for a maximum of 16 credits.

OC 407H. SEMINAR (1-3). Undergraduate seminar on current developments in the oceanographic research literature, with student presentations and group discussions. A written report may be required. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

OC 410. INTERNSHIP (1-16). Pre-career professional experience under joint faculty and employer supervision. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** 12 credits of upper-division college courses and approval required.

OC 430. PRINCIPLES OF PHYSICAL OCEANOGRAPHY (4). Fundamental principles of physical oceanography; conservation of mass, heat, momentum and vorticity; equations governing motion in the ocean; geostrophy; planetary boundary layers; wind-driven and thermohaline circulation. Descriptive oceanography; application of the fundamental principles to the ocean; examination of the major current systems; water mass analysis. Offered annually. **PREREQS:** One year each of college physics and college calculus.

OC 433. COASTAL AND ESTUARINE OCEANOGRAPHY (3). Circulation of the coastal ocean including continental shelf circulation, upwelling, coastal jets, undercurrents, coastal-trapped waves. Fundamentals of surface waves and tides; tsunamis, wind generation, breaking waves. Estuary classification and circulation patterns; shallow-water processes and beach morphology. Offered alternate years. **PREREQS:** One year of college physics and one year of calculus.

OC 440. INTRODUCTION TO BIOLOGICAL OCEANOGRAPHY (3). Introduction to the ocean as an ecosystem, with emphasis on the processes affecting productivity and structure of oceanic communities. Interactions of biological processes with chemical, physical, and geological processes in the ocean. Effects of light and nutrients on phytoplankton, grazing by zooplankton, microbial activity and recycling, distributional patterns of zooplankton and nekton, ecology of benthic animals, marine fisheries, and pollution problems. Offered annually.

OC 450. CHEMICAL OCEANOGRAPHY (3). Chemical properties and processes in the oceans. Composition, origin and evolution of sea water; thermodynamic and kinetic predictions for reactions in sea water; major and minor element reservoirs and fluxes; vertical and horizontal transport of materials; isotopic clocks and tracers; nutrients; chemical processes and fluxes across major marine interfaces, including estuaries, atmosphere, sediments, suspended particles and hydrothermal systems. Offered annually. **PREREQS:** One year of college-level general chemistry.

OC 460. GEOLOGICAL OCEANOGRAPHY (3). Structure of ocean basins, plate tectonics and sea floor spreading, marine sedimentation, history of ocean basins, and analysis of geological and geophysical data. Offered annually. **PREREQS:** One year each of physics and chemistry or science background.

OC 499. SPECIAL TOPICS IN OCEANOGRAPHY (1-4). Subjects of current interest in oceanography, not covered in depth in other courses. May be repeated for credit when topic varies. Graded P/N. This course is repeatable for a maximum of 99 credits. **PREREQS:** Varies with current topic. For upper-division undergraduates.

OC 501. RESEARCH (1-16). Original research work that will not be part of the data used in a thesis. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor approval required.

OC 503. THESIS (1-16). Thesis research and writing. This course is repeatable for a maximum of 999 credits.

OC 505. READING AND CONFERENCE (1-16). Independent reading and library research on specialized topics in oceanography, guided by discussions with supervising faculty. A written report may be required. This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor and topic approval required before registration.

OC 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

OC 507. SEMINAR (1-3). Student presentations and discussions of current research literature or personal research results. Original research presentations by visiting scientists, OSU faculty and graduate students presenting final thesis results. Other sections and specific topics by arrangement. This course is repeatable for a maximum of 16 credits.

OC 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

OC 512 BASIC MATLAB FOR ENVIRONMENTAL SCIENTISTS AND ENGINEERS (2). MATLAB desktop environment will be introduced and basic programming and data analysis skills will be developed, with an emphasis on writing optimized routines to analyze data sets utilizing matrix algebra and vectorization of functions. Basic graphics and visualization will be covered, including two-dimensional and three-dimensional graphing, contouring and movies.

OC 515 OREGON COAST MATH CAMP (3). Selected topics from differential calculus, integral calculus, ordinary and partial differential equations, statistics, linear algebra and vector calculus. Two-week course taught at Hatfield

Marine Science Center in Newport, Oregon, before fall term begins. Graded P/N. **PREREQS:** Differential and integral calculus and linear algebra highly recommended or consent of instructor.

OC 521 APPLICATIONS IN OCEAN ECOLOGY AND BIOGEOCHEMISTRY (4). Methodological underpinnings of marine ecology and biogeochemistry. Students will learn about both new and traditional methods of seawater analysis and biological rate determinations. They will evaluate methods by analyzing observations and samples, and assessing the interpretive effectiveness of approaches. Lec/lab. **PREREQS:** OC 540 **COREQS:** OC 522, OC 523

OC 522. OCEAN BIOGEOCHEMICAL DYNAMICS (4). Examines what keeps ocean systems in balance, and determines their response to perturbation. The course relies on connections between physical transport and biogeochemical reaction rates and energetics, taught from the perspective of key ocean biogeochemical cycles. **PREREQS:** Bachelor's degree in scientific field or consent of instructor. OEB students are required to also take OC 523, Ocean Ecological Dynamics, and OC 521, Applications in Ocean Ecology and Biogeochemistry, as part of first-year Tier Two curriculum. **COREQS:** OC 521, OC 523

OC 528. MICROPROBE ANALYSIS (3). Theory and application of electron microprobe analysis to problems in geology, engineering, chemistry, physics, and biology.

OC 530. PRINCIPLES OF PHYSICAL OCEANOGRAPHY (4). Fundamental principles of physical oceanography; conservation of mass, heat, momentum and vorticity; equations governing motion in the ocean; geostrophy; planetary boundary layers; wind-driven and thermohaline circulation. Descriptive oceanography application of the fundamental principles to the ocean; examination of the major current systems; water mass analysis. Offered annually. **PREREQS:** One year each of college physics and college calculus.

OC 532. AQUATIC CHEMISTRY: NATURAL AND ENGINEERED SYSTEMS (4). Low temperature thermodynamic and selective kinetic treatments primarily of the inorganic chemistry groups, but also organic ligands and surface active groups, of natural and engineered waters; thermodynamic principles and computational techniques for prediction of equilibrium speciation; comparison of predictions to observations; computer laboratory. Lec/rec. **CROSSLISTED** as ENVE 532 **PREREQS:** One year of college-level chemistry (CH 221, CH 222, CH 223 or equivalent), plus a minimum of one year organic or physical chemistry. Recommended corequisites: ENVE 536, Aqueous Environmental Laboratory, and/or OC 652, Chemical Oceanography Laboratory.

OC 533. COASTAL AND ESTUARINE OCEANOGRAPHY (3). Circulation of the coastal ocean including continental shelf circulation, upwelling, coastal jets, undercurrents, coastal-trapped waves. Fundamentals of surface waves and tides; tsunamis, wind generation, breaking waves; shallow-water processes and beach morphology. Offered alternate years. **PREREQS:** One year of college physics and one year of calculus.

OC 540. BIOLOGICAL OCEANOGRAPHY (3). The ocean as an ecosystem, with emphasis on the processes affecting productivity and structure of oceanic communities. Interactions of biological processes with chemical, physical and geological processes in the ocean. Effects of light and nutrients on phytoplankton, grazing by zooplankton, microbial activity and recycling, distributional patterns of zooplankton and nekton, ecology of benthic animals, marine fisheries and pollution problems. Offered annually.

OC 541. MARINE ZOOPLANKTON (4). Small animal life in the sea; population biology, biogeography, migrations, life cycles, physiology.

Role of zooplankton in pelagic ecosystem dynamics is examined through modeling. Offered alternate years. **PREREQS:** OC 540

OC 550. CHEMICAL OCEANOGRAPHY (3). Chemical properties and processes in the oceans. Composition, origin and evolution of sea water; thermodynamic and kinetic predictions for reactions in the sea water; major and minor element reservoirs and fluxes; vertical and horizontal transport of materials; isotopic clocks and tracers; nutrients; chemical processes and fluxes across major marine interfaces, including estuaries, atmosphere, sediments, suspended particles and hydrothermal systems. Offered annually. **PREREQS:** One year of college-level general chemistry.

OC 560. GEOLOGICAL OCEANOGRAPHY (3). Structure of ocean basins, plate tectonics and sea floor spreading, marine sedimentation, history of ocean basins, and analysis of geological and geophysical data. Offered annually. **PREREQS:** One year each of physics and chemistry or science background.

OC 561. IGNEOUS AND TECTONIC PROCESSES IN THE OCEAN (3). An integrated view of the igneous and tectonic processes responsible for the formation and evolution of the ocean basins. The course is organized by tectonic environment including ridge crest, ridge flank, ocean basins, seamounts, and active and passive margins. **PREREQS:** One year each physics, calculus and geology.

OC 562. SEDIMENTARY PROCESSES IN THE OCEAN BASINS (3). An integrated view of sediment processes in the ocean basins from a source to sink perspective, with a special emphasis on the interpretation of the historical record. **PREREQS:** OC 550 and one year each physics and calculus and geology.

OC 574. EARLY LIFE HISTORY OF FISHES (4). Overview of diversity of development patterns in fishes; emphasis on morphology, life history, and evolution. Offered alternate years. **CROSSLISTED** as FW 574. **PREREQS:** FW 315 or equivalent.

OC 599. SPECIAL TOPICS IN OCEANOGRAPHY (1-4). Subjects of current interest in oceanography, not covered in depth in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits. **PREREQS:** Varies with current topic.

OC 601. RESEARCH (1-16). Original research work that will not be part of the data used in a thesis. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor approval required.

OC 603. THESIS (1-16). Thesis research and writing. This course is repeatable for a maximum of 999 credits.

OC 605. READING AND CONFERENCE (1-16). Independent reading and library research on specialized topics in oceanography, guided by discussions with supervising faculty. A written report may be required. This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor and topic approval required before registration.

OC 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

OC 607. SEMINAR (1-3). Student presentations and discussion of current research literature or personal research results. Original research presentations by visiting scientists, OSU faculty and graduate students presenting final thesis results. Other sections and specific topics by arrangement. This course is repeatable for a maximum of 16 credits.

OC 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

OC 630. OCEAN WAVE MECHANICS I (3). Linear wave boundary value problem formulation and solution, water particle kinematics, shoaling,

refraction, diffraction, and reflection. Linear long wave theory with applications to tides, seiche, and storm surge. CROSSLISTED as CE 630. Lec/lab.

OC 631. OCEAN WAVE MECHANICS II (3). Second in the sequence of ocean engineering wave mechanics, covers the following topics: introduction to long wave theory, wave superposition, wave height distribution, and the wind-wave spectrum, introduction to wave forces, and basic nonlinear properties of water waves. May include additional selected topic in wave mechanics. CROSSLISTED as CE 631. **PREREQS:** (CE 630 or OC 630)

OC 634. LONG WAVE MECHANICS (3). Theory of long waves. Depth-integrated Euler's equation and its jump conditions. Evolution equations and their solutions. Nonlinear shallow-water waves, the Korteweg-deVries equation and Boussinesq equation. Boundary-layer effects. Shallow-water waves on beaches. Applications of the fundamentals to problems of tsunamis. CROSSLISTED as CE 634. **PREREQS:** (OC 630 and CE 631) and OC 670 or equivalent.

OC 635. APPLIED MODELING OF NEARSHORE PROCESSES (4). An introduction to numerical modeling of the nearshore ocean, providing hands-on experience with state-of-the-art numerical models for wave propagation, nearshore circulation, planform shoreline evolution and bathymetric profile evolution. Focuses on review of model requirements, detailed study of several specific models for several domains of interest, application to coastal phenomena, interpretation of model results. Lec/lab. Offered alternate years. CROSSLISTED as CE 635.

OC 644. MARINE PHYTOPLANKTON ECOLOGY (4). Ecology of photosynthetic plankton in the oceans; autotrophic, heterotrophic, and mixotrophic nutrition; limitation of growth and photosynthesis by light, nutrients and trace elements; grazing and other removal processes; primary productivity and its control in major ocean provinces and the global ocean; role of the marine phytoplankton in the global carbon balance on time scales ranging from seasonal to glacial/interglacial. Offered alternate years. **PREREQS:** OC 540 and/or two years of biology.

OC 646. PHYSICAL/BIOLOGICAL INTERACTIONS IN THE UPPER OCEAN (4). Variability in physical oceanic processes in the upper ocean and relationship to spatial and temporal variations in biomass, growth rates, and other biological patterns in the organisms of ocean surface waters. The relationship between variability in ocean physical phenomena and ecosystem dynamics, including the requirements of sampling design for upper ocean ecological studies. Time and space scales of physical and biological phenomena in the upper ocean. Offered alternate years. Offered alternate years, typically fall term. **PREREQS:** (OEAS 530 and OEAS 540) and/or instructor approval required.

OC 647. MARINE MICROBIAL PROCESSES (4). Roles of prokaryotic and eukaryotic microbes in the biological and chemical processes of the sea, with emphasis on pelagic ecosystems. Functional and taxonomic types and distribution of marine micro-organisms. Biochemical and physiological processes of major groups of microbes as these relate to geochemical cycles of biologically active elements in the sea. Heterotrophic and mixotrophic protists in pelagic foodwebs. Discussion of current experimental approaches to determining aspects of microbial activity and production. Offered alternate years. **PREREQS:** OC 540 and two years of biology or instructor approval required.

OC 648. MARINE BENTHIC ECOLOGY (4). Differences between benthic and water-column biological oceanography. Historical, observational approaches including sedimentology, fluid mechanics and geochemistry. **PREREQS:** OC 540 and two years of biology or instructor approval required.

OC 649. SPECIAL TOPICS IN BIOLOGICAL OCEANOGRAPHY (1-4). Special topics of current interest in biological oceanography not covered in detail in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.

OC 651. ADVANCED CHEMICAL OCEANOGRAPHY (3). Advanced topics in chemical oceanography emphasizing problems and issues of contemporary interest. Descriptive studies of chemical properties and processes in sea water and the oceans; interactions of oceanic circulation and chemical distributions; sea water chemistry in specialized environments; geochemical and biochemical cycles; sea water-sediment interactions; analytical chemical advances. **PREREQS:** OC 550

OC 652. CHEMICAL OCEANOGRAPHY LABORATORY (3). Chemical analytical techniques for seawater and marine sediments. Topics include: salinity; dissolved oxygen; nutrients; the CO₂ system; dissolved and particulate organic materials; trace metals; radionuclides; analytical barriers and recent advances. **PREREQS:** OC 550 and/or instructor approval required.

OC 653. MARINE RADIOCHEMISTRY (3). Basic principles of radioactive decay and growth; marine biogeochemistry of uranium and thorium series radionuclides; release of artificial radionuclides into marine environments; applications of radioisotope techniques to oceanic circulation and mixing, paleoceanography, sediment geochronology, archeometry, and marine pollution. **PREREQS:** OC 550

OC 654. MARINE POLLUTION (3). Identification of sources for organic and inorganic pollutants in estuarine, coastal and oceanic environments; mechanisms of introduction and dispersal; chemical and biological behavior and removal processes; regional and global scale effects; case studies and future research strategies; monitoring programs for pollution assessment. Offered alternate years. **PREREQS:** OC 550

OC 657. SEDIMENT BIOGEOCHEMISTRY (3). An overview of early diagenetic processes in marine sediments and the interdisciplinary approaches used to quantify material transformations at the seafloor. **PREREQS:** OC 550 is recommended.

OC 659. SPECIAL TOPICS IN CHEMICAL OCEANOGRAPHY (1-4). Special topics of current interest in chemical oceanography not covered in detail in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.

OC 660. PALEOCEANOGRAPHY (3). Large-scale changes in the oceanic and atmospheric system, as recorded in marine sediments, and their implications for understanding global environment changes. Chemical, physical, and biological proxies for oceanic and atmospheric processes in the geologic record period. Evidence for changing global climate at time scales longer than the historical record; the oceanic history of the Late-Cenozoic ice ages, long term evolution of climate change patterns, catastrophic global environmental events, and application of quantitative models to the past. Current research topics in paleoceanography. Offered alternate years. **PREREQS:** OC 560 or instructor approval required.

OC 661. PLATE TECTONICS AND STRUCTURE OF OCEAN BASINS (3). Evidence and predictions of plate tectonic model; structure and evolution of divergent and convergent plate margins; petrology of oceanic crust and upper mantle; lithosphere-mantle interaction; evolution of oceanic lithosphere; models for development of continental margins. Offered alternate years. **PREREQS:** One year each of physics, calculus, and geology.

OC 663. GEOCHEMISTRY OF DEEP-SEA SEDIMENT RECORD (3). Nature and distribution of deep-sea deposits; factors controlling the distribution of terrigenous, volcanic, biogenic, and authigenic components; diagenesis and redistribution at the ocean floor.

OC 664. NEARSHORE SEDIMENT TRANSPORT (3). To study the dynamics of a nearshore wave field propagating over a shoaling bathymetry, the response of sediments and morphology to those motions, emergent morphology due to the coupled system, anthropogenic influences and mitigation. **PREREQS:** General physics, integral and differential calculus; nearshore hydrodynamics.

OC 665. APPLIED GEOSTATISTICS (4). Spatial and stratigraphic characteristics of geologic data; geologic data bases; application of matrix theory to the solution of geologic problems; descriptive models, predictive models, spatial models, and stratigraphic and time-series models. Offered alternate years. **PREREQS:** One year of statistics and one year of computer science.

OC 666. ISOTOPIC MARINE GEOCHEMISTRY (3). Radiogenic and light stable isotopes and application to composition and evolution of the suboceanic mantle, petrogenesis of the oceanic crust, sediment provenance and sedimentary processes, geochronology, seawater chemical dynamics and paleoclimatology. Offered alternate years.

OC 667. IGNEOUS PROCESSES IN THE OCEAN BASINS (3). Origin and evolution of oceanic crust including the origin and nature of chemical heterogeneity and igneous rocks in the ocean basins; interaction of mantle and lithosphere as reflected in the topography of ocean basins; hydrothermal processes and the alteration of oceanic crust; geothermometry and geobarometry of oceanic magmas; elementary fractionation patterns and modeling of partial melting; fractional crystallization in oceanic magmas. Offered alternate years.

OC 668. THEORETICAL PETROLOGY (3). Theoretical aspects of igneous petrology in marine petrochemical processes. Igneous and metamorphic geology; hydrothermal solutions. Principles of energy, enthalpy, entropy. Equilibrium processes of melting, crystallization, mineral chemistry, geothermometers, geobarometers. Offered alternate years. **PREREQS:** Petrology.

OC 669. SPECIAL TOPICS IN GEOLOGICAL OCEANOGRAPHY (1-4). Subjects of current interest in geological oceanography not covered in depth in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.

OC 670. FLUID DYNAMICS (4). Fundamentals of fluid dynamics: conservation laws of mass, momentum, and energy; inviscid and viscous flows; boundary layers; vorticity dynamics; irrotational and potential flow. Offered annually. **PREREQS:** One year of college physics; mathematics through differential equations and vector calculus.

OC 671. GEOPHYSICAL FLUID DYNAMICS (4). Dynamics of rotating and stratified fluids, potential vorticity, geostrophic motion; inviscid shallow-water theory, Poincare, Kelvin, and Rossby waves; geostrophic adjustment, quasigeostrophic approximation, Ekman layers, two-layer and continuously stratified models. Offered annually. **PREREQS:** OC 670

OC 672. THEORY OF OCEAN CIRCULATION (4). Theory of steady and time-dependent large-scale circulation in ocean basins. Effects of earth's curvature: the beta-plane approximation. The wind-driven Sverdrup circulation, western boundary currents, eastern boundary upwelling; the effects of friction. Linear theory and nonlinear theory; inertial gyres. Effects of buoyancy forcing; heating, cooling, evaporation, precipitation; density stratification. Wind- and buoyancy-forced circulation in the thermocline; ventilation. Potential

vorticity conservation and homogenization. Offered annually. **PREREQS:** (OC 670 and OC 671)

OC 673. DESCRIPTIVE PHYSICAL OCEANOGRAPHY (4). Fundamental mass, force, and energy balances of the ocean; geostrophy; planetary boundary layers; wind-driven and thermohaline circulation; vorticity; air-sea fluxes of heat, salt, moisture and momentum. Application of these balances through descriptive examination of the ocean-global heat budget; surface current systems; abyssal circulation. Study of variability on a variety of time and space scales. Instrumentation and platforms used for observing the ocean. Offered annually. **PREREQS:** (OC 530 or OC 670 or ATS 515)

OC 674. TURBULENCE (4). Governing equations, turbulent kinetic energy, vorticity dynamics; turbulent transports of mass and momentum; statistical description of turbulent flows, spectral dynamics; turbulent boundary layers, planetary boundary layers in the atmosphere and ocean, convective mixed layers, stable boundary layers; deep ocean turbulence. Offered alternate years. **PREREQS:** OC 670

OC 675. NUMERICAL MODELING IN OCEAN CIRCULATION (4). Review of theoretical models of ocean circulation, including shallow water, barotropic, quasigeostrophic, and primitive equation models; adjustment times, internal length and time scales; the role of advection, bathymetry, and coastlines; global models, basin models, regional models and models of jets, eddies and boundary currents. Review of numerical techniques and problems specific to ocean modeling. Local facilities are used to develop models on remote supercomputers. **PREREQS:** (OC 670 and MTH 625 and MTH 626) and /or equivalent and a working knowledge of FORTRAN.

OC 676. INVERSE MODELING AND DATA ASSIMILATION (4). Survey of methods for combining oceanographic observations and observing systems with numerical models of ocean circulation. Topics include: finite-dimensional least squares theory with inequality constraints; optimal interpolation; the representation theory of smoothing; the Kalman smoother and filter; gradient descent methods for minimization; spatial and temporal regularity of filters and smoothers; linear theory of array design; nonlinear optimization, practical assimilation methods. **PREREQS:** Strong background in linear algebra and advanced calculus, geophysical fluid dynamics, numerical modeling of ocean circulation.

OC 678. OCEAN REMOTE SENSING (4). Theory and applications of satellite remote sensing observations of the ocean with emphasis on strengths and limitations in the measurements. Topics include review of electricity and magnetism, absorption and scattering in the atmosphere (radiative transfer), satellite orbital mechanics, measurements of ocean color, infrared remote sensing, microwave radiometry, scatterometry, and satellite altimetry. Offered alternate years. **PREREQS:** MTH 252 and PH 212

OC 679. SPECIAL TOPICS IN PHYSICAL OCEANOGRAPHY (1-4). Subjects of current interest in physical oceanography, not covered in depth in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.

OC 680. STABILITY OF GEOPHYSICAL FLUID FLOWS (4). Linear perturbation analysis applied to geophysical flows. These methods provide both quantitative and conceptual insight into the formative stages of turbulent flow. Emphasis is on practical numerical methods for the solution of differential eigenvalue problems. Examples are drawn from a wide range of geophysical flow instabilities, based in part upon student interests. **PREREQS:** OC 670 and COREQ: OC 670 and multivariate calculus, matrix calculus, matlab.

OC 681. GEOPHYSICAL WAVES (4). Fundamentals of wave dynamics applied to geophysical fluids. Hyperbolic waves--linear and nonlinear; characteristics; shock waves. Dispersive waves--linear waves, dispersion relations, group velocity; isotropic and anisotropic dispersion; nonlinear solitary waves. Application to geophysical waves--surface gravity, capillary, internal gravity, Kelvin, planetary, coastal. Offered alternate years. **PREREQS:** OC 670

OC 682. DATA ANALYSIS IN THE TIME AND SPACE DOMAINS (4). Theory of classical and modern techniques for analysis of data in the time and space domains with applications to real oceanographic and atmospheric data. Topics include correlation analysis, regression analysis, EOF analysis, objective mapping, interpolation, filtering, sampling errors, and confidence tests. Offered alternate years. **PREREQS:** MTH 341 and MTH 342 and MTH 418 and OC 608 and ST 314 and a working knowledge of Matlab, IDL, or FORTRAN, or consent of instructor.

OC 683. DATA ANALYSIS IN THE FREQUENCY AND WAVE NUMBER DOMAINS (4). Theory of classical and modern techniques for analysis of data in the frequency and wavenumber domains with applications to real oceanographic and atmospheric data. Topics include sampling theory, one-dimensional autospectral analysis, multidimensional autospectral analysis, coherence and phase analysis, bi-spectral analysis, wavelet analysis, and confidence tests. Offered alternate years. **PREREQS:** MTH 341 and MTH 342 and MTH 418 and OC 608 and ST 314 and a working knowledge of Matlab, IDL, or FORTRAN, or consent of instructor.

OC 691. PROPOSAL WRITING (3). Teaches the use of NSF Fastlane. Includes a discussion of ethics and fairness in reviewing, a review of real proposals by faculty, a simulated NSF funding panel, and then development of a real proposal, for review purposes. This will relate directly to the student's current thesis or project. The course enables graduate students from all disciplines to develop rigorous, well thought-out proposals. It should be taken early enough in the program so that the proposal process contributes to their research progress.

OC 808. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

■ OCEAN, EARTH, AND ATMOSPHERIC SCIENCES COURSES

OEAS 500. CASCADIA FIELD TRIP (2-4). A field course to various locations within the Cascade volcanic arc, Coast Range and Oregon Coast. Introduction to the range of physical and biological science topics to be covered in OEAS 520, OEAS 530 and OEAS 540 in field settings; the linkages between these topics, and their impact on humans, with case examples. Students will practice math skills, and collect samples and data to be used in laboratory sessions in the later courses. Offered annually. Transportation fee charged. Graded P/N.

OEAS 520. THE SOLID EARTH (4). Movement of mass and energy within the Earth and into/out of its outer surface, expressed as plate tectonics, earthquakes, heat flow, volcanoes, geomagnetic field; composition, structure, hydrology and aging of ocean crust; lithosphere creation, recycling and mantle overturn. Marine sedimentation, sources and transport, continental weathering, tectonics-climate interactions, glacial history and sea level response. Geohazards, storm events, beach and estuary processes. Offered annually. Lec/lab. **PREREQS:** One year each of physics, chemistry, calculus, or instructor permission.

OEAS 530. THE FLUID EARTH (4). Fundamental principles of fluid circulation in the atmosphere and ocean. Atmospheric chemistry, radiation, thermodynamics, and dynamics. Conservation of

mass, heat, momentum and vorticity in the ocean; equations governing motion; geostrophy; planetary boundary layers; wind-driven and thermohaline circulation. Air-sea fluxes and global circulation models; climate change. Offered annually. Lec/lab. **PREREQS:** One year each of physics, chemistry, calculus, or science background and permission of instructor; field course.

OEAS 540. THE BIOGEOCHEMICAL EARTH (4). Integrating fundamental concepts in biological and chemical oceanography to understand energy and material transformations in estuarine, coastal and open ocean habitats. Topics include structure and function of marine ecosystems, biogeochemical cycles, and human impacts. Offered annually. Lec/lab. **PREREQS:** One year of physics, chemistry, and calculus, or instructor permission.

The College of Education develops multiculturally competent researchers, scholars, learning leaders and practitioners who make a difference by promoting innovation, social justice, and lifelong learning with a focus on STEM and cultural and linguistic diversity. Our research and professional preparation fosters scholarship, intellectual stimulation, openness, flexibility, and a sense of community.

The College of Education offers an undergraduate Education Double Degree and graduate degrees and programs to prepare teachers, counselor educators, and other educational professionals for careers in schools, community colleges, business and industry, and other postsecondary settings. In addition, there are electives for undergraduate students who wish to explore education as a career choice.

All programs reflect research-based approaches to education and counseling developed by university faculty, kindergarten through adult teachers and administrators, counselors and leaders from business and industry. Students gain experience through extensive internships in their field of study.

AUTHORIZATION AND ACCREDITATION

The College of Education is authorized by the State Board of Higher Education to offer teacher education and counseling programs and by the Oregon Teacher Standards and Practices Commission (TSPC) to recommend teacher and counselor candidates for initial, standard, and continuing licensure.

All teacher education programs are fully accredited by the National Council for Accreditation of Teacher Education (NCATE) and by the Oregon Teacher Standards and Practices Commission. Counselor education programs are fully accredited by Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Applicants for teacher and counselor licensure must meet TSPC requirements in effect at the time of admission to a licensure program. **Licensure rules are regulated by TSPC and may change. Students should consult regularly with their advisor.**

ADVISING

Early and continuous advising is an important aspect of an education in both the undergraduate and graduate programs in the College of Education. Students pursuing an undergraduate degree shall meet with a professional academic advisor in the centralized advising office, while graduate students shall be assigned a faculty advisor. Undergraduates pursuing the undergraduate Double Degree in Teacher Education K-12 are urged to declare their interest immediately in order to work for the 3.0 GPA entry requirement and to graduate in a timely manner. It is important for undergraduates to work concurrently with both the College of Education academic advisor and the academic advisor for their primary degree to ensure knowledge of academic progress, degree requirements, and educational opportunities in their chosen field.

SCHOLARSHIPS

The College of Education offers a variety of scholarships and fellowships to deserving students. A listing of the many opportunities can be found at <http://education.oregonstate.edu/education-scholarships-and-fellowships>. Students who have declared their major in education are sent an email application to consider applying during winter term each year. Additional state and private scholarship information is available at the OSU Office of Financial Aid and Scholarships.

UNDERGRADUATE EDUCATION DOUBLE DEGREE

Liz White is the Double Degree program coordinator, 541-737-8583, liz.white@oregonstate.edu.

SCIENCE EDUCATION AND MATHEMATICS EDUCATION

Science and mathematics education provides a rich and stimulating graduate experience designed to prepare future learning leaders and support efforts to build sustainable communities through lifelong learning in science and mathematics. The faculty brings broad experience in facilitating learning at the elementary through college levels, in free-choice learning environments, and in private business and industry. The faculty actively strive to generate an atmosphere of scholarship that blend ideas from a variety of fields including the science and mathematics disciplines represented within the College of Science, psychology, sociology, anthropology, history of science, cognitive science, and education.

The program supports a colloquium series that introduces students and faculty to visiting scholars, innovative programs on and off campus and faculty and graduate student research. Various forms of assistance are available to qualified students through teaching in the professional teacher licensure program, work on externally funded research and evaluation projects, or teaching in other departments in the university. The master's programs can be completed with a thesis or non-thesis option. The program requires a comprehensive written qualifying examination as part of the advancement to candidacy in the PhD program. Doctoral students must complete a dissertation of original research.

FACULTY

Professors Bell, Casbon, Dierking, Engle, Falk, Flick, Ng, Russ-Eft, Stern

Associate Professors Bouwma-Gearhart, Dykeman, Elliot, Rubel, Winograd

Assistant Professors Aaron, Arellano, Bottoms, Ciechanowski, Cowin, Giamellaro, Herrera, Johnson, Rowe, Stroud, Thompson, Weber

Instructors Adams, Aduviri, Bachman,

104 Joyce Collin
Furman Hall
Oregon State University
Corvallis, OR

CAREERS IN SCIENCE AND MATHEMATICS EDUCATION

The master's and PhD programs in Science Education and Mathematics Education provide a gateway to a variety of interesting educational careers. As future learning leaders with a school-based master's degree, students may choose to teach in classrooms at the elementary through secondary level, as an elementary or secondary curriculum specialist or department head, or in another supervisory or research-oriented position. With an area of concentration in free-choice learning students may become educators or managers in such settings as national parks, nature centers, zoos, aquariums, museums, public broadcasting or media.

A PhD in school-based education enables students to become college educators focused on teacher preparation research or researcher/evaluators in not-for-profit/for profit organizations or other settings. A PhD with a collegiate focus, prepares students to become university/community college educators focused on university teaching and research, or educational trainers in science or mathematics education in business/industry or researcher/evaluators in not-for-profit/for profit organizations or other settings. The free-choice learning focus will prepare students to be a future learning researcher/evaluator in a university or free-choice learning environment or a director/administrator.

UNDERGRADUATE MAJOR**EDUCATION (BA, BS, HBA, HBS)
(Double Degree)**

The undergraduate Education Double Degree program enables students to earn two undergraduate degrees concurrently—one in their chosen field and the second in Education (BA or BS degree). The Education Double Degree in teacher education is an undergraduate pathway to teacher preparation available to all OSU students. The BA/BS in Education can only be obtained in conjunction with a BA/BS in a student's chosen field.

The Double Degree Program in teacher education comprises 40 credits, done in the academic year after completion of a first degree. This program includes all the course work and field experiences (e.g., student teaching) necessary to qualify for an Oregon Initial 1 Teaching License granted by the Teacher Standards and Practices Commission (TSPC).

The Double Degree program has two stages. The first stage, Pre-Education, allows students to take foundational education courses and required content specific classes without prerequisites. These classes can meet baccalaureate core requirements and elective credits. The second stage, Professional Level, consists of 40 credits focusing on a particular authorization level. The Professional Level includes pedagogy classes and student teaching. Students earn their second degree (Education BS/BA) and simultaneously earn an Oregon Initial 1 Teaching License in their chosen authorization level.

First-years, sophomores, juniors, and seniors may enroll in one or more of the pre-education courses at any time during any year of their studies. There are no initial prerequisites for these courses and they may help students decide whether teaching is right for them. To enter the Professional Level of the Double Degree students need to have completed required course work, pass a basic skills test in reading, writing, and mathematics, and pass the Civil Rights in the Educational Environment Exam. The full application information is on the College of Education website. It is strongly recommended that students meet with the College of Education Double Degree advisor early in the Pre-Education level and at least a year prior to their application to the Professional Level.

Allyson Dean is the Double Degree program advisor, 541-737-4661, allyson.dean@oregonstate.edu.

Admission to the Professional Level of the Education Double Degree Program is required in the spring of the year prior to beginning the final cohort year of pedagogy classes and student teaching.

Applications and requirements are available on the College of Education website at <http://oregonstate.edu/education/doubledegree/>.

Students select one of four areas (authorization levels):

1. Early childhood education (age 3 through grade 4)
2. Elementary education (grades 3–8 in the self-contained setting)
3. Middle school (grades 5–9)
4. High school (grade 9–12)

The following subject areas (endorsements) are available with the secondary (middle and high school) authorizations:

- Family and Consumer Science
 - Foreign Languages (French, German, Spanish)
 - Health Education
 - Language Arts (English) Education
 - Mathematics (Basic Mathematics)
 - Mathematics (Advanced Mathematics)
 - Science (Biology Education, Chemistry Education, Integrated Science Education, Physics Education)
 - Social Science Education
- Early childhood and Elementary authorizations will have a Multiple Subjects Endorsement.

**EDUCATION (DOUBLE DEGREE)
K-12 CLASSROOMS PATHWAY****Level I: Pre-Education**

Classes Required for Admission to Professional Level—these classes can be taken any time prior to application to Level II.

- TCE 216. *Purpose, Structure, and Function of Education in a Democracy (3)
TCE 219. Civil Rights and Multicultural Issues in Education (3)
TCE 253. Learning Across the Lifespan (3)+
TCE 309. Field Practicum (3)
or TCE 409 Practicum/Clinical Experience (3)
TCE 472. Foundations of ESOL/Bilingual Education (3)
TCE 479. Linguistics for ESOL/Bilingual Teachers (3)
Completion of First Degree
Content Specific Courses for Subject Area Teaching (Content Mastery Forms are available on the College of Education website or in the Student Services Office in Furman Hall.)

Level II: Professional Level Admission (Cohort Year)

Application is due April 1, the spring before beginning cohort year.

Early Childhood/Elementary Authorizations**Fall Term**

- SED 459. Science and the Nature of Inquiry (3)
TCE 340. ^Supportive Differentiated Environments (3)
TCE 409. Practicum/Clinical Experience (3)

- TCE 410. Internship/Work Experience (2)
TCE 457. Teaching Elementary Mathematics for Understanding (3)

Winter Term

- TCE 407. Seminar (2)

or SED 477 Mathematics Pedagogy and Technology II (4)[**Pending submission and approval of a proposal**]
[*Depending on teaching discipline*]
TCE 427. Alternative Assessment for Middle and High School Teaching (2)
TCE 493. Reading, Literature, and Language Development in the Content (2)
or TCE 473. Instructional Approaches for ESOL/Bilingual Education (3) [**Pending approval**]

Spring Term

- TCE 410. Internship/Work Experience (10)
TCE 424. Teacher as Reflective Practitioner (2)

Footnotes:

- + If you have taken HDFS 211/311, 313, 314 and have a 3.0 GPA or higher, you do not need to take TCE 253.
With junior or senior standing
* Baccalaureate Core Course
^ Writing Intensive Course (WIC)

GRADUATE MAJORS

ADULT EDUCATION (EdM, MAIS)

Graduate Areas of Concentration
Organization development and training, work force development, workplace and adult skills development

The EdM in Adult Education degree prepares adult education specialists for the following roles:

Role #1 Instructional Leader

Role Description: Applies contemporary theories of adult learning and development to determine appropriate ways to respond to the needs of adult learners.

Applicable Courses:

AHE 510. Internship (1–18)
AHE 547. Instructional Strategies for Adult Learners (4)
AHE 553. Adult Learning and Development (4)

Role #2 Instructional System Designer

Role Description: Designs and evaluates outcomes-based learning systems, tools, and media that meet identified needs of adult learners.

Applicable Courses:

AHE 510. Internship (1–18)
AHE 531. Instructional Systems Design I (4)
AHE 532. Instructional Systems Design II (4)
AHE 539. Designing Training Documentation (4)
AHE 547. Instructional Strategies for Adult Learners (4)
AHE 553. Adult Learning and Development (4)

Role #3 Organizational Leader

Role Description: Promotes the transformation of traditional organizations into participative learning organizations.

Applicable Courses:

AHE 510. Internship (1–18)
AHE 534. Organizations and Systems Theory (4)
AHE 567. Leadership Development and Human Relations (4)

Role #4 Action Researcher

Role Description: Systematically inquires into, improves, and reports on own professional practice, and disseminates new insights into the field of adult education.

Applicable Courses:

AHE 510. Internship (1–18)
AHE 532. Instructional Systems Design II (4)
AHE 533. Needs Assessment and Research (4)
AHE 547. Instructional Strategies for Adult Learners (4)

Role #5 Instructional Technology Leader

Role Description: Identifies and selects appropriate technologies to assist in the learning and development of organizational processes of institutional settings.

Applicable Courses:

AHE 510. Internship (1–18)
AHE 539. Designing Training Documentation (4)
AHE 547. Instructional Strategies for Adult Learners (4)
AHE 553. Adult Learning and Development (4)
AHE 522–525. Instructional Technology I–IV (1,1,1,1)

Degree Requirements

The EdM in Adult Education degree requires a minimum of 45 credits beyond the baccalaureate degree to complete the program.

Admission

Admission is selective and competitive. Factors considered in making admission decisions include: completion of a bachelor's degree, cumulative grade-point average (3.00 in the last 90 graded credits of the bachelor's degree and all postbaccalaureate course work), written and oral communication skills, career objectives and commitment, career experience, and professional references.

Applicants submit a letter of intent, résumé, transcripts, three letters of recommendation, writing sample, and application questionnaire. Following an initial screening, applicants may be interviewed by a member of the faculty by telephone or in person.

COLLEGE STUDENT SERVICES ADMINISTRATION (EDM, MS)

Graduate Areas of Concentration

College and university characteristics and environments; history, development, and current issues in higher education; leadership and management of administrative departments; program oversight in specialized administrative areas such as financial aid, student activities, career services, multicultural affairs, recreational sports, and student housing; student development theory and application

The College Student Services Administration program offers preparation in the organization, leadership and administration of programs, services, and facilities in postsecondary education, including college union/centers, recreational sports, student government and activities, residence life programs, student housing, financial aid, career services, and general student advising and academic support.

The MS and EdM degrees are offered with a major in CSSA. One year of full-time work experience is recommended for admission. Please refer to the program Web page for specific application deadline dates for fall admission.

Paid assistantships are an important part of the curriculum and the total learning experience. They are strongly encouraged, but not guaranteed, for all full-time master's students.

For more information, access the college's website <http://oregonstate.edu/dept/cssa/> or write CSSA Graduate Program, College of Education, 104 Joyce Collins Furman Hall, Corvallis, OR 97331.

edu/dept/cssa/ or write CSSA Graduate Program, College of Education, 104 Joyce Collins Furman Hall, Corvallis, OR 97331.

COUNSELING (MCoun, MS, PhD)

Graduate Areas of Concentration

Clinical mental health counseling (MS only), counseling (PhD only), school counseling (MS only)

The mission of the Oregon State University graduate program in counseling is to prepare professional leaders who promote the social, psychological and physical well-being of individuals, families, communities and organizations. We believe that such professional leaders stand for social, economic and political justice and therefore must be prepared to be proactive educators, change agents and advocates in the face of injustice. Professional leaders are sensitive to life span developmental issues, demonstrate multicultural awareness, and recognize a global perspective as integral to the preparation of professional leaders.

Two graduate degrees are offered in counseling: the Master of Science and the Doctor of Philosophy.

OSU's counselor education degree programs are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

The school counseling degree program is accredited by the National Council for Accreditation of Teacher Education (NCATE) and by Oregon's Teacher Standards and Practices Commission (TSPC). The PhD in Counseling is accredited by CACREP.

Master of Science in Counseling: Offered via Ecampus

The Master of Science degree in Counseling with a school counseling concentration at OSU-Corvallis is offered through Ecampus and the MS program. The program is a 75-credit program to be completed in three years and is offered in a hybrid format (50% online). Classes will be taught at the Chemeketa Community College Center for Business and Industry in Salem. The Master of Science degree uses a competency-based approach to prepare school counselors. The program prepares the counselor to provide comprehensive school counseling programs that serve all students. Counselors will learn to utilize strategies to work with their students' academic, personal/social, and career development needs. Preparation consists of a sequential program that integrates academic knowledge and theory with closely supervised counseling practice. Self-exploration and personal development are integral components of the program.

Graduates are eligible for the Initial I School Counselor License upon completion of additional steps required by the

Oregon Teacher Standards and Practices Commission.

Admission to the MS in Counseling program at OSU Corvallis — Accepting Students for classes starting in the summer of 2013

Application must be made to the Graduate School and to the Counselor Education Program. The minimal prerequisite is a bachelor's degree. Admission is not based exclusively on academic success in courses. Screening includes a minimum GPA of 3.00 and a personal interview in which the applicant's educational goals, experience, and employment background are reviewed. Academic background, personal and emotional stability, and educational and professional goals of each candidate are evaluated before admission is granted. Prior counseling-related academic work from an accredited institution may meet, in part, the requirements of the program. Admission is competitive and by cohort and begins with the summer session.

Academic performance is not the sole criterion for admission to, and continuation in, certain courses, such as practicum courses and internships. The university may evaluate an individual's background to determine the likelihood that he or she will maintain standards of professional conduct necessary in the discipline. An evaluation may consider current performance along with past experiences and actions that could affect a student's ability to perform in the particular course or program.

It should also be noted that individuals who want to become school counselors but who do not have a teaching license are eligible to apply for the school counselor track.

The OSU Corvallis will not be offering a concentration in clinical mental health. Those desiring to graduate from Oregon State University with an MS degree in Counseling with a concentration in clinical mental health need to apply to and be accepted into the OSU-Cascades MS degree in Counseling program. This is a residential program at OSU-Cascades in Bend, Oregon.

Doctor of Philosophy in Counseling: Offered via Ecampus

The PhD degree in Counseling is designed to prepare experienced counseling professionals to extend their roles in the counseling profession. The doctoral program is appropriate for those whose career path is that of research and teaching in counselor preparation programs, in student development at a college or university level, or in supervisory positions in schools or agencies.

Requirements for the PhD

A minimum of 150 credits is required beyond the baccalaureate degree. The program includes thesis, internship,

and the balance of credits in specialty areas, including participation in doctoral seminars. Doctoral students can meet the majority of their residency and course requirements in two years of full-time study.

Admission to the PhD Program

It is expected that individuals entering the PhD program will have completed a master's degree in counseling that covers the nine areas of concentration required by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The nine areas are human growth and development, social and cultural foundations, helping relationships, groups, career and lifestyle development, appraisal, research and program evaluation, professional orientation, and clinical instruction. Areas not covered in the student's master's program or through continuing higher education must be taken in doctoral study.

Applicants are preferred who have a minimum of two years of post-master's experience as a counselor. Preference will be given to National Certified Counselors (NCCs), state Licensed Professional Counselors (LPCs), and those who are licensed through a school counseling licensing body such as Oregon Teacher Standards and Practices. It is also expected that applicants will have participated in counseling as a client prior to admission to the program. Desirable, but not essential, is work in the field of education such as teaching, school administration, curriculum or instruction, and/or educationally related work in child, youth, or adult development programs.

An application packet may be obtained from the College of Education or downloaded from the website at <http://education.oregonstate.edu/counselor-education-and-supervision>. Included in the application will be demonstrated evidence of counseling competence through submission of a videotaped counseling session. A personal interview is also a final step in the application process.

Admission is by cohort to begin each summer term.

Counseling Major Core (54 credits):

- TCE 513. Counseling Pre-Practicum (3)
- TCE 514. Practicum in Counseling (1–3) (*n.b., taken 2 quarters for 6 credits total*)
- TCE 531. Developmental Perspectives in Counseling (3)
- TCE 532. Social and Cultural Perspectives in Counseling (3)
- TCE 533. Addictive Behavior Counseling (3)
- TCE 541. The Counseling Profession (3)
- TCE 551. Theory and Techniques of Counseling I (3)
- TCE 552. Theory and Techniques of Counseling II (3)
- TCE 562. Introduction to Research Methods in Education (3)
- TCE 567. Appraisal of the Individual (3)

- TCE 568. Lifestyle and Career Development (3)
- TCE 571. Group Counseling Procedures (3)
- TCE 575. Family Counseling (3)
- TCE 577. Applied Psychopathology and Psychodiagnostics (3)
- TCE 578. Crisis, Trauma, and Grief Counseling (3)
- TCE 581. Cross-Cultural Counseling (3)
- TCE 598. Counselor Consultation (3)

CLINICAL MENTAL HEALTH COUNSELING OPTION

Clinical Mental Health Counseling Graduate Option (36 credits):

- TCE 515. Counseling Internship (1–15) (*n.b., taken in clinical mental health setting over multiple quarters for 24 credits total*)
- TCE 536. Applied Psychopharmacology for Counselors (3)
- TCE 550. Foundations of Mental Health Counseling (3)
- TCE 595. Group Counseling II (3)
- TCE 597. Introduction to Counselor Supervision (3)

SCHOOL COUNSELING OPTION

School Counseling Major Option (21 credits):

- TCE 515. Counseling Internship (1–15) (*n.b., taken in school setting over multiple quarters for 15 credits total*)
- TCE 546. Leadership Of School Counseling Programs (3)
- TCE 548. Special Education Issues In Counseling (3)

EDUCATION (EdD, EdM, MS, PhD, MAIS)

Graduate Areas of Concentration

Community college leadership (EdD, PhD); elementary, middle, and secondary education (EdM)

The College of Education offers graduate work leading to the Master of Science in Education, and Master of Education degrees. The Doctor of Education and Doctor of Philosophy degrees are also offered, with a major in education.

Master of Education (EdM) and Master of Science (MS)

The Master of Education (EdM) and the Master of Science (MS) are offered with majors in education. The EdM or the MS with a major in education serves individuals seeking an initial, continuing or standard teaching license. It is also available to anyone interested in a professional degree in education.

EdM Degree (Education Master's)

Applications are considered for acceptance every term. Requirements include:

- Completed bachelor's degree
- 3.0 GPA in the last 90 graded quarter credits
- Teaching credential

Applicants must also submit official transcripts, three letters of recommendation, a résumé, an essay on an

educational topic, a statement regarding knowledge of and/or experience with diversity, and TOEFL and TWE scores (international students only).

The deadline for consideration is five weeks prior to the start of the term in which the applicant would like to begin the course of study

Master of Arts in Teaching (MAT)—NOT ACCEPTING STUDENTS 2013–2014

Immersion Program: This program is a one-year, full-time experience. Students are placed in culturally diverse schools in Salem and Portland. The program leads to initial elementary teaching licensure, an ESOL/Bilingual Endorsement and the master's degree.

Two-Year, Part-Time Program:

This program is a part-time program. Students attend classes on campus approximately one weekend a month for two academic years. The program leads to initial elementary teaching licensure, an ESOL/Bilingual Endorsement and the master's degree.

Master's of Science in Counseling
See the information at Counseling Graduate Major.

Doctor of Education (EdD)

The Doctor of Education (EdD) degree with a major in education prepares professionals for administrative leadership roles in a variety of positions in community college, and/or other higher education settings. This is a part-time, cohort-based program.

Doctor of Philosophy (PhD) Program with Major in Education—NOT ACCEPTING STUDENTS into the Teacher Leadership Area of Concentration in 2013–2014

The Doctor of Philosophy (PhD) program with a major in education prepares professional educators for research and teaching in related programs in higher education. This is a part-time, cohort-based program.

See the College of Education website for application information and dates at <http://oregonstate.edu/education/>.

Admission Requirements EdM Degree (Education Master's)

Applications are considered for acceptance every term. Requirements include:

- Completed bachelor's degree
- 3.0 GPA in the last 90 graded quarter credits
- Teaching credential

Applicants must also submit official transcripts, three letters of recommendation, a résumé, an essay on an educational topic, a statement regarding knowledge of and/or experience with diversity, and TOEFL and TWE scores (international students only).

The deadline for consideration is five weeks prior to the start of the term in

which the applicant would like to begin the course of study.

EdD Degree

Applicants for the EdD degree must have earned a master's degree or the equivalent, a 3.00 GPA, and 3 to 5 years of professional community college experience. Transcripts of previous college work; a résumé; three letters of recommendation; a statement of experiences, goals and philosophy; and a reflection paper on how the application materials submitted address the admission criteria are required for admission consideration. Final applicants are interviewed by the program admissions committee. Admission is selective and competitive. Refer to the program Web page for the specific application deadline for fall term.

The EdD degree requires a minimum of 108 credits beyond the baccalaureate degree. The residency requirement is met by enrolling in a minimum of 3 graduate credits each quarter until completion; enrolling for 9 graduate credits each of three summers; and enrolling at OSU for all 75 graduate credits in the program. The following credits must be completed:

- Foundational Core (15)
- Research Core (9)
- Area of Specialization (48)
- Internship (12)
- Thesis (24)

Total=108

EdD students are admitted into a cohort and proceed through the program together. The program is designed to be completed within a four-year period.

Doctor of Philosophy (PhD) Degree

Applicants must have an earned master's degree or the equivalent, a 3.0 GPA, and two years of professional public school or community college and/or adult education experience or related educational experience. Transcripts of previous college work, a résumé, three letters of recommendation, a statement of experiences, goals and philosophy, and a reflection on how evidence submitted addresses the admission criteria are required for admission consideration. Final applicants are interviewed by the program admissions committee.

A master's degree in education or related field, or equivalent to a master's degree in postbaccalaureate course work is required. In addition, applicants to the PhD program must have significant experience in an education or education-related setting such as teaching, leadership administration, curriculum specialist, supervisor, or in a setting where the primary function is education. Knowledge of educational research methodology is highly desirable.

All Doctor of Philosophy (PhD) students with a major in education must complete a minimum of 114 graduate credits, excluding credits in statisti-

cal analysis, beyond the baccalaureate degree. Minimum number of credits in each category:

- Research Seminar (3)
- Core Courses (9)
- Subcore Seminar (9)
- Area of Specialty (45–48)
- Internship (3–6)
- Research Methods (9)
- Thesis (36)

Total=114–120

Admission to the PhD program is selective and competitive with only a limited number admitted each year. Refer to the program Web page for the specific application deadline for fall term.

MATHEMATICS EDUCATION (MA, MS, PhD)

Graduate Areas of Concentration

Elementary school mathematics, free-choice learning, mathematics education, middle school mathematics, secondary mathematics

Master of Science Program (MS)

The master's program offers three areas of concentration:

1. **Free-Choice Learning**—This degree concentration offers study of learning across the life span in learning environments such as science centers; aquariums; outdoor education; broadcast media; national, state and local parks; and after-school programs.
2. **Professional Teacher Licensure**—In this degree concentration, students earn a professional teaching license in science or mathematics for grades 5 through 12 and a concurrent master of science degree (MS).
3. **School-Based Education**—This degree concentration offers study for specializing in science or mathematics education in schools.

DOCTOR OF PHILOSOPHY PROGRAM (PhD)

The doctoral program offers advanced study and preparation for research in three areas of concentrations.

1. **Collegiate Education**—Advanced study of science and mathematics education at the collegiate level that includes but is not limited to curriculum, assessment, instruction and instructional design, student and teacher learning, psychological factors such as motivation or self-regulation.
2. **Free-Choice Learning**—Advanced study of science and mathematics free-choice learning includes but is not limited to investigations of personal dimensions of learning such as motivation and identity; socio-cultural issues such as gender and culture; and environmental issues

such as the influence of instructional design and setting.

3. **School-Based Education**—Advanced study of science and mathematics education at the pre-college level that includes but is not limited to curriculum, assessment, instruction and instructional design, student and teacher learning, psychological factors such as motivation or self-regulation.

All three options require two years of research content courses and five quarters of research methods courses. A program of study typically involves graduate study in a cognate field. A dissertation is required for all three options.

SCIENCE EDUCATION (MA, MS, PhD)

Graduate Areas of Concentration
Elementary school science, free-choice learning, middle school science, science education, secondary science

Master of Science Program (MS)

The master's program offers three areas of concentration:

1. **School-Based Education**—This degree concentration offers study for specializing in science or mathematics education in schools.
2. **Professional Teacher Licensure**—In this degree concentration, students earn a professional teaching license in science or mathematics for grades 5 through 12 and a concurrent master of science degree (MS).
3. **Free-Choice Learning**—This degree concentration offers study of learning across the life span in learning environments such as science centers; aquariums; outdoor education; broadcast media; national, state and local parks; and after-school programs.

Doctor of Philosophy Program (PhD)

The doctoral program offers advanced study and preparation for research in three areas of concentrations.

1. **Collegiate Education**—Advanced study of science and mathematics education at the collegiate level that includes but is not limited to curriculum, assessment, instruction and instructional design, student and teacher learning, psychological factors such as motivation or self-regulation.
 - **Free-Choice Learning**—Advanced study of science and mathematics free-choice learning includes but is not limited to investigations of personal dimensions of learning such as motivation and identity; socio-cultural issues such as gender and culture; and environmental

issues such as the influence of instructional design and setting.

- **School-Based Education**—Advanced study of science and mathematics education at the pre-college level that includes but is not limited to curriculum, assessment, instruction and instructional design, student and teacher learning, psychological factors such as motivation or self-regulation.

All three options require two years of research content courses and five quarters of research methods courses. A program of study typically involves graduate study in a cognate field. A dissertation is required for all three options.

TEACHING: ADVANCED MATHEMATICS EDUCATION GRADUATE MAJOR (MAT) OR EARN A MATHEMATICS EDUCATION (MS)

For details, see the Science and Mathematics Education advisor in the College of Education.

The MAT in Advanced Mathematics Education program also is available at OSU-Cascades.

TEACHING: AGRICULTURAL EDUCATION GRADUATE MAJOR (MAT)

For details, see the departmental advisor in the College of Agricultural Sciences and/or visit <http://catalog.oregonstate.edu/DepartmentOverview.aspx?code=AED>.

TEACHING: BIOLOGY EDUCATION GRADUATE MAJOR (MAT) OR EARN A SCIENCE EDUCATION (MS)

For details, see the Science and Mathematics Education advisor in the College of Education.

TEACHING: CHEMISTRY EDUCATION GRADUATE MAJOR (MAT) OR EARN A SCIENCE EDUCATION (MS)

For details, see the Science and Mathematics Education advisor in the College of Education.

TEACHING: ELEMENTARY EDUCATION GRADUATE MAJOR (MAT)

For details, please email the College of Education's academic advisor at ask-coed@oregonstate.edu.

TEACHING: FAMILY AND CONSUMER SCIENCES ED GRADUATE MAJOR (MAT)

For details, please email the College of Education's academic advisor at ask-coed@oregonstate.edu.

TEACHING: INTEGRATED SCIENCE EDUCATION GRADUATE MAJOR (MAT) OR EARN A SCIENCE EDUCATION (MS)

For details, see the Science and Mathematics Education advisor in the College of Education.

The MAT in Integrated Science Education program also is available at OSU-Cascades.

TEACHING: LANGUAGE ARTS EDUCATION (MAT)

This degree is offered only on the OSU-Cascades campus.

For details, please e-mail the College of Education's academic advisor at ask-coed@oregonstate.edu.

SOCIAL STUDIES GRADUATE OPTION

For details about this Social Studies Endorsement, please contact the Teacher and Counselor Education Admissions Advisor at OSU-Cascades.

To be admitted to the graduate teaching program, students must demonstrate the following:

1. Completed bachelor's degree.
2. Minimum GPA of 3.0 in the last 90 quarter hours of graded undergraduate work and all work completed thereafter.
3. Subject matter competency (contact an OSU-Cascades advisor for more information, <http://www.osucascades.edu/academics/teaching/secondary/advisor>).
4. At least 60 hours experience working with children at the middle school or high school levels including volunteer work in classroom or other experience (talk to advisor for specific requirement).
5. Demonstrated effectiveness in oral and written communication.
6. Sincere and appropriate desire to become a public school teacher and an understanding of the demands placed on a teacher.
7. Satisfactory answers on the Oregon Teacher Standards and Practices Commission's (TSPC) character questionnaire.
8. Fulfillment of prerequisite course work (contact an OSU-Cascades advisor for more information, <http://www.osucascades.edu/academics/teaching/secondary/advisor>).
9. Successful completion of all testing requirements listed below (prior to beginning course work in June):
 - a. **Essential Academic Skills Test** (EAS subtest 1, 2, and 3) (CBEST may be substituted for EAS, http://www.ctcexams.nesinc.com/about_CBEST.asp)
 - b. **NES Elementary Education I & II** (required for middle school authorization)

- c. **ORELA** Civil Rights exam
- d. **NES** - Content Specific Exam: (for chosen endorsement area only)

TEACHING: MUSIC EDUCATION GRADUATE MAJOR (MAT)

For details, contact the school advisor in the School of Arts and Communication, College of Liberal Arts.

Prerequisites for Professional Music Teacher Education (MAT)

MUED 413. Theory and Practicum: Field (1-4)

MUED 471. Fundamentals of Music for Elementary Classroom Teachers (3)

One of the following courses:

TCE 253. Learning Across the Lifespan (3)

TCE 411. Educational Psychology, Learning and Development (3)

TCE 412. Learning Styles and Needs in Adolescence (2)

TEACHING: PHYSICS EDUCATION GRADUATE MAJOR (MAT) OR EARN A SCIENCE EDUCATION (MS)

For details, see the Science and Mathematics Education advisor in the College of Education.

TEACHING: SPANISH EDUCATION GRADUATE MAJOR (MAT)

For details, please email the College of Education's academic advisor at askcoed@oregonstate.edu.

Graduate Areas of Concentration
Organization development and training, work force development, workplace and adult skills development

The Adult Education graduate minor is offered with focus areas in organization development and training, work force development, and workplace development, and requires a minimum of 15 credits of approved course work.

Course work in adult education may also be used as a pre-service concentration or minor in a variety of other graduate degrees.

The graduate programs in education prepare students for a wide range of positions in research, instruction, and policy making at all levels of education and training. Positions include those in city, state, and federal education offices in educational research and analysis programs; in public schools, community colleges, and universities; and in training programs in education, business, industry, and agencies.

Admission to the graduate minor in Adult Education is selective and competitive. Prior approval to enroll in adult education courses is necessary.

For more information, access the college's website at <http://oregonstate.edu/education/programs/adulted.html> or write the Adult Education Graduate Program, College of Education, 104 Joyce Collins Furman Hall, Corvallis, OR 97331 or email the College of Education's academic advisor at askcoed@oregonstate.edu.

COUNSELING GRADUATE MINOR

This minor is available only to College Student Services Administration (CSSA) students. For more details, see the program advisor.

EDUCATION GRADUATE MINOR

For more details, see an advisor in the College of Education, 104 Furman Hall, 541-737-4661 or email the advisor at askcoed@oregonstate.edu.

MATHEMATICS EDUCATION GRADUATE MINOR

Graduate Areas of Concentration
Elementary school science, free-choice learning, middle school science, science education, secondary science

For more details, see the advisor.

SCIENCE EDUCATION GRADUATE MINOR

Graduate Areas of Concentration
Elementary school science, free-choice learning, middle school science, science education, secondary science

For more details, see the advisor.

ENDORSEMENTS

ADVANCED MATHEMATICS ENDORSEMENT

For details about this endorsement, see the Science and Mathematics Education advisor in the College of Education.

AGRICULTURAL SCIENCE AND TECHNOLOGY ENDORSEMENT

For details about this endorsement, please see a departmental advisor in the College of Agricultural Sciences.

BIOLOGY EDUCATION ENDORSEMENT

For details about this endorsement, please see a departmental advisor in the College of Science.

CHEMISTRY EDUCATION ENDORSEMENT

For details about this endorsement, please see a departmental advisor in the College of Science.

COUNSELING, TRACK I ENDORSEMENT

The MS in Counseling degree leads to initial and continuing licenses for the Oregon Personnel Service License, as well as eligibility for Oregon Licensed Profes-

sional Counselor application. The degree also prepares counseling professionals for careers in community and educationally related agencies and programs.

School counselor licensing can be obtained in one of two ways:

School Counseling with a Teaching License. The program track requires prior public school teaching experience and specific course work leading to an MS in counseling.

School Counseling without a Teaching License. This program track prepares persons without a teacher license or counseling experience and requires completion of the MS degree including specific school-based course work in addition to the state requirements for school counselor preparation. Students must present evidence of a passing score on the CBEST or Praxis PPST as part of their application materials.

Part-time School Counseling with Teaching License. This program track requires prior public school teaching experience and specific course work leading to an MS in counseling and allows students who are employed in educational settings to complete their counseling course work during weekends (Fridays and Saturdays) and summers.

The **Master's in Counseling** degree prepares school counselors to support national standards for counseling and the mission of outreach education region wide. The program is designed to recognize the developmental levels of students with continuing professional development as an integral part of the program.

The **PhD in Counseling degree** is designed to prepare experienced counseling professionals to extend their roles in the counseling profession. The doctoral program is appropriate for those whose career path is that of research and teaching in counselor preparation programs, in student development at a college or university level, or in supervisory positions in schools or agencies.

COUNSELING, TRACK II ENDORSEMENT

The MS in Counseling degree leads to initial and continuing licenses for the Oregon Personnel Service License, as well as eligibility for Oregon Licensed Professional Counselor application. The degree also prepares counseling professionals for careers in community and educationally related agencies and programs.

School counselor licensing can be obtained in one of two ways:

School Counseling with a Teaching License. The program track requires prior public school teaching experience and specific course work leading to an MS in counseling.

School Counseling without a Teaching License. This program track prepares persons without a teacher

license or counseling experience and requires completion of the MS degree and specific school-based course work in addition to the state requirements for school counselor preparation. Students must present evidence of a passing score on the CBEST or Praxis PPST as part of their application materials.

Part-time School Counseling with Teaching License. This program track requires prior public school teaching experience and specific course work leading to an MS in counseling and allows students who are employed in educational settings to complete their counseling course work during weekends (Fridays and Saturdays) and summers.

The **Master's in Counseling** degree prepares school counselors to support national standards for counseling and the mission of outreach education region wide. The program is designed to recognize the developmental levels of students with continuing professional development as an integral part of the program.

The **PhD in Counseling** degree is designed to prepare experienced counseling professionals to extend their roles in the counseling profession. The doctoral program is appropriate for those whose career path is that of research and teaching in counselor preparation programs, in student development at a college or university level, or in supervisory positions in schools or agencies.

EARLY CHILDHOOD TEACHER EDUCATION ENDORSEMENT

For details about this endorsement, see an advisor in the College of Education, 541-737-4661.

ELEMENTARY EDUCATION ENDORSEMENT

For details about this endorsement, please see an advisor in the College of Education, 541-737-4661.

ESOL/BILINGUAL ENDORSEMENT

For details about this endorsement, see an advisor in the College of Education, 541-737-4661.

FAMILY AND CONSUMER SCIENCE ENDORSEMENT

For details about this endorsement, see an advisor in the School of Social and Behavioral Health Sciences, College of Public Health and Human Sciences, and/or visit <http://catalog.oregonstate.edu/DepartmentDetail.aspx?code=SBHS>.

FRENCH LANGUAGE ENDORSEMENT

For details about this endorsement, see an advisor in the School of Language, Culture, and Society in the College of Liberal Arts, and/or visit <http://catalog.oregonstate.edu/DepartmentOverview.aspx?code=SLCS>.

GERMAN ENDORSEMENT

For details about this endorsement, see an advisor in the School of Language, Culture, and Society in the College of Liberal Arts, and/or visit <http://catalog.oregonstate.edu/DepartmentOverview.aspx?code=SLCS>.

HEALTH EDUCATION ENDORSEMENT

For details about this endorsement, please see an advisor in the College of Education.

INTEGRATED SCIENCE EDUCATION ENDORSEMENT

For details about this endorsement, see an advisor in the College of Education, 541-737-4661.

JUNIOR HIGH/MIDDLE SCHOOL ENDORSEMENT

For details about this endorsement, see an advisor in the College of Education, 541-737-4661.

LANGUAGE ARTS EDUCATION ENDORSEMENT

For details about this endorsement, see an advisor in the College of Education, 541-737-4661.

MATHEMATICS, BASIC ENDORSEMENT

For details about this endorsement, see the Science and Mathematics Education advisor in the College of Education.

MUSIC EDUCATION ENDORSEMENT

For details about this endorsement, please see an advisor in the School of Arts and Communication in the College of Liberal Arts.

PHYSICAL EDUCATION ENDORSEMENT

For details about this endorsement, please see an advisor in the College of Education, 541-737-4661, or College of Public Health and Human Sciences, 541-737-5925.

PHYSICAL EDUCATION, ADAPTED ENDORSEMENT

For details about this endorsement, see an advisor in the School of Biological and Population Health Sciences, 541-737-5925, College of Public Health and Human Sciences, and/or visit <http://catalog.oregonstate.edu/MajorDetail.aspx?major=7640&college=23>.

PHYSICS EDUCATION ENDORSEMENT

For details about this endorsement, see the Science and Mathematics Education advisor in the College of Education.

READING ENDORSEMENT

For details about this endorsement, please see an advisor in the College of Education, 541-737-4661.

SECONDARY TEACHER EDUCATION ENDORSEMENT

For details about this endorsement, see an advisor in the College of Education, 541-737-4661.

SOCIAL SCIENCE EDUCATION ENDORSEMENT

For details about this endorsement, please see an advisor in the College of Education.

SPANISH LANGUAGE ENDORSEMENT

For details about this endorsement, see an advisor in the School of Language, Culture, and Society in the College of Liberal Arts, and/or visit <http://catalog.oregonstate.edu/DepartmentOverview.aspx?code=SLCS>.

ADULT EDUCATION AND HIGHER EDUCATION LEADERSHIP COURSES

AHE 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

AHE 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

AHE 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

AHE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

AHE 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.

AHE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

AHE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

AHE 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

AHE 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

AHE 410. INTERNSHIP/WORK EXPERIENCE (1-16). This course is repeatable for a maximum of 16 credits.

AHE 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

AHE 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

AHE 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.

AHE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

AHE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

AHE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

AHE 507. SEMINAR (1-5). This course is repeatable for a maximum of 16 credits.

AHE 508. WORKSHOP (1-3). This course is repeatable for a maximum of 16 credits.

AHE 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

AHE 510. INTERNSHIP (1-18). By special permission and arrangement. This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

AHE 513. RESEARCH IN HIGHER EDUCATION (3). Basic understanding of research and assessment ideas, uses, and practices in higher education and student affairs.

AHE 517. EDUCATION AND WORK (3). Issues related to work in the U.S. and other countries. The role of public, private, corporate, government, military and other education and training programs in meeting changing individual, corporate, and social work-related needs.

AHE 520. MULTICULTURAL ISSUES IN HIGHER EDUCATION (3). Developing understanding, knowledge, and skills of multiculturalism affecting the student affairs profession and careers in student affairs administration.

AHE 521. CROSS-CULTURAL COMMUNICATIONS (3). Cultural diversity in schools, work places and communities; serving all students or clients in a pluralistic society. This course is repeatable for a maximum of 9 credits.

AHE 522. INSTRUCTIONAL TECHNOLOGY I (1). Explores technologies used in distance education to deliver content and meet with students. Participants will learn course management tools, library references, social learning environments, and file management methods.

AHE 523. INSTRUCTIONAL TECHNOLOGY II (1). A review of best practices and common pitfalls in the design and development of a portfolio. Students will design, build, and share their portfolios through Blackboard. **PREREQS:** AHE 522

AHE 524. INSTRUCTIONAL TECHNOLOGY III (1). Students will gather content information, manage materials, and build a rapid online-learning training solution using PowerPoint. **PREREQS:** (AHE 522 and AHE 523)

AHE 525. INSTRUCTIONAL TECHNOLOGY IV (1). Learners research and demonstrate how to use a current e-learning tool. Students will incorporate principles of adult learning theory to align and effectively integrate aspects of an e-learning tool. **PREREQS:** (AHE 522 and AHE 523 and AHE 524)

AHE 530. LEARNING AND WORKPLACE CULTURES (3). Examination of workplace cultures, structures, and processes as they promote and hinder organizational and employee learning and performance, identification of criteria for evaluating a learning environment.

AHE 531. INSTRUCTIONAL SYSTEMS DESIGN I (4). The application of systems thinking in the design of college curriculum and workplace training programs. **PREREQS:** (AHE 533 and AHE 547 and AHE 553)

AHE 532. INSTRUCTIONAL SYSTEMS DESIGN II (4). Assessing learning outcomes in college curriculum and workplace training programs from a systems perspective; evaluation of program effectiveness. **PREREQS:** AHE 531

AHE 533. NEEDS ASSESSMENT AND RESEARCH (4). Introduces workplace learning needs assessment (W/LNA) and research principles and practices for individual and collaborative learning groups. **PREREQS:** AHE 553 and .

AHE 534. ORGANIZATIONS AND SYSTEMS THEORY (4). Introduces principles and practices underlying individual and collaborative work group learning. Participants will learn how to create an environment that promotes effective and efficient workplace learning.

AHE 539. DESIGNING TRAINING DOCUMENTATION (4). Application of instructional systems design, adult learning theory, and instructional strategies to create documents for a

professional training system. **PREREQS:** (AHE 531 and AHE 532 and AHE 533 and AHE 547 and AHE 553)

AHE 540. THE EMERGING COMMUNITY COLLEGE (3). History and philosophy of the community college movement; goals, functions, populations served, faculty and student characteristics, issues confronting the community college in a global economy.

AHE 547. INSTRUCTIONAL STRATEGIES FOR ADULT LEARNERS (4). Exploration of and practice using instructional strategies to enhance adult learning. Acquisition of an instructional strategy tool kit as well as a method for evaluating adult learning events. This course is repeatable for a maximum of 60 credits.

AHE 548. AMERICAN HIGHER EDUCATION (3). The origins and development of higher education in the United States from the colonial colleges to the present.

AHE 551. PROGRAMS AND FUNCTIONS IN COLLEGE STUDENT SERVICES (3). Historical, philosophical, and organizational foundations; operational components and functional areas; overview and analysis of college student services in postsecondary educational institutions; leadership development.

AHE 552. STUDENT DEVELOPMENT IN UNIVERSITIES AND COLLEGES (3). Theoretical and philosophical foundations of student development; analysis of college student characteristics and the student culture; nontraditional student subgroups; student attitudes, values, and beliefs; concepts and models that promote student learning; and assessment of student growth. This course is repeatable for a maximum of 6 credits.

AHE 553. ADULT LEARNING AND DEVELOPMENT (4). Introduce participants to key theories, orientations, models, and principles of learning and development in adulthood.

AHE 554. LEGAL ISSUES IN HIGHER EDUCATION (3). A comprehensive presentation and discussion of the law governing administration within public colleges and universities with a special emphasis on tort liability and freedom of expression.

AHE 557. PROFESSIONAL DEVELOPMENT IN COLLEGE STUDENT SERVICES (1). Self-assessment, goal setting, professional growth, and professional ethics as a practitioner in college student services administration. Graded P/N.

AHE 558. ORGANIZATION AND ADMINISTRATION OF COLLEGE STUDENT SERVICES (3). Legal foundations, governance models, planning, and goal setting, resource acquisition and allocation, personnel and financial management and administrative leadership.

AHE 567. LEADERSHIP DEVELOPMENT AND HUMAN RELATIONS (4). Exploration of multiple theories of leadership in different organizational contexts; synthesize theory with experience to construct a personal framework for leadership practice.

AHE 574. BUDGET AND FINANCE (2). Introduction to budget and finance in student services. Overview of topics with which student affairs practitioners should be familiar, able to use, and to assess.

AHE 575. EDUCATIONAL FINANCE (3). Finance, budgeting and accounting for sources of revenue; deferral, state and local financing, budgeting and accounting models, practical experience combined with examination of theory, trends and issues. Focus in either public schools, community colleges or higher education through practical experience.

AHE 582. LEGAL ISSUES IN HIGHER EDUCATION (3). A comprehensive presentation and discussion of the law governing administration within community colleges and college/universities

with a special emphasis on student services administration.

AHE 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

AHE 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

AHE 602. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

AHE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

AHE 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

AHE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

AHE 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

AHE 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

AHE 609. PRACTICUM/CLINICAL EXPERIENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

AHE 610. INTERNSHIP (1-15). This course is repeatable for a maximum of 15 credits. **PREREQS:** Departmental approval required.

AHE 612. RESEARCH PERSPECTIVES IN EDUCATION (3). Research perspectives, how they are influenced by worldviews, and how these worldviews influence research. **PREREQS:** AHE 562; an introductory statistics course (may be taken concurrently).

AHE 613. RESEARCH ANALYSIS AND INTERPRETATION IN EDUCATION (3). Critical analysis of scholarly studies in education from a variety of research perspectives. **PREREQS:** AHE 612; an intermediate statistics course (may be taken concurrently).

AHE 614. ADVANCED RESEARCH METHODS IN EDUCATION (1-3). Selected topics in research methods as appropriate for research perspectives in education. May be repeated. This course is repeatable for a maximum of 6 credits. **PREREQS:** AHE 613

AHE 615. RESEARCH ISSUES (3). A core course in the College of Education's doctoral program that focuses on research issues. **PREREQS:** (AHE 612 and AHE 613 and AHE 614)

AHE 621. SELECTED TOPICS IN EDUCATION (1-3). This course is repeatable for a maximum of 18 credits.

AHE 638. HISTORY OF HIGHER EDUCATION (3). Surveys American higher education across 200-plus years of American history, with a specific emphasis in this section on the American community college.

AHE 640. COMMUNITY COLLEGE ADMINISTRATION (3). Two-year college funding patterns, state and local systems of organization, management and leadership issues, patterns of internal and external governance, institutional planning, and methods for institutional advancements. **PREREQS:** Community college teaching/administrative experience.

AHE 643. ORGANIZATION THEORY-HIGHER EDUCATION (3). An introduction to organizational theory (OT). The texts allow us to explore how systems thinking is applied to our world, and how we can use it to better understand the nature of human social engagement. Both OT and living systems theories are deeply associated with

improvement and change theories in higher education settings and business.

AHE 645. ETHICAL PRACTICE (3). Reviews major ethical theories with an emphasis on practical applications related to community college professional practice.

AHE 653. INSTRUCTIONAL LEADER I (3). A core course in the College of Education's doctoral program. Introduces major theories, theorists, and theoretical principles that will assist the learner in the understanding and development of systemic frameworks for instructional leadership.

AHE 654. INSTRUCTIONAL LEADER II (3). Focuses on the current realities of instructional leadership in community and technical colleges at present. **PREREQS:** AHE 653

AHE 685. CAREER PLANNING AND PLACEMENT ADMINISTRATION (3). Advanced study of vocational decision making and career planning in colleges and universities, as well as the organization and administration of career services.

AHE 805. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

AHE 808. WORKSHOP (1-4). This course is repeatable for a maximum of 16 credits.

■ SCIENCE AND MATHEMATICS EDUCATION COURSES

SED 321. TEACHING AND LEARNING WITH COMPUTER-BASED TECHNOLOGIES (3). Explore teaching that promotes the use of computer-based technologies as an integral component for learning within the context of academic subject matter. **PREREQS:** Basic computer and computer application knowledge.

SED 321H. TEACHING AND LEARNING WITH COMPUTER-BASED TECHNOLOGIES (3). Explore teaching that promotes the use of computer-based technologies as an integral component for learning within the context of academic subject matter. **PREREQS:** Basic computer and computer application knowledge, Honors College approval required.

SED 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

SED 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

SED 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

SED 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

SED 409. FIELD PRACTICUM: SCIENCE AND MATHEMATICS (3). Placement in middle or high school (grades 7-12) to assist in developing competencies with adolescents in science/mathematics classes. This course is repeatable for a maximum of 18 credits.

SED 410. PROFESSIONAL INTERNSHIP: SCIENCE OR MATHEMATICS EDUCATION (1-16). Supervised teaching experience at the elementary, middle or high school level; students experience general classroom and professional responsibilities common to the regular science or mathematics teacher. This course is repeatable for a maximum of 16 credits.

SED 412. TECHNOLOGY FOUNDATIONS FOR TEACHING MATH AND SCIENCE (3). Integration of instructional technologies with other strategies to teach math and science in elementary, middle, and secondary schools in the 21st century.

SED 412H. TECHNOLOGY FOUNDATIONS FOR TEACHING MATH AND SCIENCE (3). Integration of instructional technologies with other strategies to teach math and science in elementary, middle, and secondary schools in the 21st century. **PREREQS:** Honors College approval required.

SED 413. INQUIRY IN SCIENCE AND SCIENCE EDUCATION (3). Investigation of inquiry and the nature of inquiry in science as it relates to science education. Students will examine issues relating to integrating scientific understandings and practice into K-12 instruction. Lec/lab.

SED 414. INQUIRY IN MATHEMATICS AND MATHEMATICS EDUCATION (3). Investigation of mathematics as it relates to mathematics education. Students will examine issues related to integrating mathematical understanding, mathematics standards/curricula, and mathematics-specific strategies in K-12 instruction. Lec/lab.

SED 417. QUANTITATIVE REASONING IN STEM (3). Provides students an overview of the content requirements in the Common Core Standards for Mathematics and the teaching practices that are central to those standards with a focus on the role of quantitative reasoning. Students experience content lessons and lessons focused on supporting students in developing understanding of that content. **PREREQS:** Participants should be a prospective pre-service teacher at any level, a K-12 teacher, a free-choice learning educator, or have access to an educational setting.

SED 419. TEACHING MATHEMATICAL MODELING IN STEM (3). Provides students an overview of the content requirements in the Common Core Standards for Mathematics and the teaching practices that are central to those standards with a focus on the role of mathematical modeling. Students experience content lessons and lessons focused on supporting students in developing understanding of that content. **PREREQS:** Participants should be a prospective pre-service teacher at any level, a K-12 teacher, free-choice learning educator or have access to an educational setting.

SED 431. OVERVIEW OF FREE-CHOICE LEARNING (3). Examines learning that occurs when people believe they have choices over what and how they learn, how much time they spend learning, and what their sources of information are. Covers current research on learning in museums, aquariums, zoos, botanical gardens, science centers, after-school programs, media and apprenticeships.

SED 459. SCIENCE AND THE NATURE OF INQUIRY (3). Focuses on inquiry approaches to the teaching and learning of science. Development of teaching strategies including materials and resources for teaching science using an inquiry approach as well as more teacher-directed approaches.

SED 473. SCIENCE PEDAGOGY AND TECHNOLOGY I (4). Development of pedagogical content knowledge in grades 6-12 science instruction: learning theory, nature of science, technology integration, and reform recommendations. Lec/lab/rec.

SED 474. MATHEMATICS PEDAGOGY AND TECHNOLOGY I (4). Development of pedagogical content knowledge in grades 6-12 mathematics instruction: learning theory, nature of mathematics, technology integration, and reform recommendations. Lec/lab/rec.

SED 491. SCIENCE/MATH CONTENT STANDARDS AND CURR DEVEL MIDDLE SCHOOL (3). Exploration of curriculum development and teaching strategies appropriate for middle school students as well as a range of organizational structures to effectively organize middle school students for educational experiences. Explore how curriculum, instruction, and assessment are interrelated and how theory and practice must be combined to make appropriate decisions. Development of skills in designing effective curriculum and instruction integrating these methods with existing understandings of their content area, how people learn, and the diverse communities in which they work.

SED 494. SCIENCE/MATH CONTENT STANDARDS AND CURR DEVEL HIGH SCHOOL (3). Exploration of curriculum development and teaching strategies appropriate for high school students as well as a range of organizational structures to effectively organize high school students for educational experiences. Explore how curriculum, instruction, and assessment are interrelated and how theory and practice must be combined to make appropriate decisions. Development of skills in designing effective curriculum and instruction integrating these methods with existing understandings of their content area, how people learn, and the diverse communities in which they work.

SED 499. SPECIAL TOPICS (3). This course is repeatable for a maximum of 18 credits.

SED 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

SED 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

SED 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

SED 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

SED 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

SED 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

SED 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

SED 510. PROFESSIONAL INTERNSHIP: SCIENCE OR MATHEMATICS EDUCATION (1-16). Supervised teaching experience at the elementary, middle or high school level; students experience general classroom and professional responsibilities common to the regular science or mathematics teacher. This course is repeatable for a maximum of 16 credits.

SED 511. ANALYSIS OF CLASSROOMS I (3). Observation and analysis of the complex science/mathematics classroom (grades 3-12) and school culture and their impact on student learning.

SED 512. TECHNOLOGY FOUNDATIONS FOR TEACHING MATH AND SCIENCE (3). Integration of instructional technologies with other strategies to teach math and science in elementary, middle, and secondary schools in the 21st century.

SED 513. INQUIRY IN SCIENCE AND SCIENCE EDUCATION (3). Investigation of inquiry and the nature of inquiry in science as it relates to science education. Students will examine issues relating to integrating scientific understandings and practice into K-12 instruction. Lec/lab.

SED 514. INQUIRY IN MATHEMATICS AND MATHEMATICS EDUCATION (3). Investigation of mathematics as it relates to mathematics education. Students will examine issues related to integrating mathematical understanding, mathematics standards/curricula, and mathematics-specific strategies in K-12 instruction. Lec/lab.

SED 515. ANALYSIS OF CLASSROOMS II (3). Reflection, analysis and problem solving recognizing the complexity of concerns impacting teachers in the science/mathematics classroom (grades 3-12).

SED 517. QUANTITATIVE REASONING IN STEM (3). Provides students an overview of the content requirements in the Common Core Standards for Mathematics and the teaching practices that are central to those standards with a focus on the role of quantitative reasoning. Students experience content lessons and lessons focused on supporting students in developing understanding of that content. **PREREQS:** Participants should be a prospective pre-service teacher at any level, a K-12 teacher, a free-choice learning educator, or have access to an educational setting.

SED 518. ANALYSIS OF CLASSROOMS III (3). Analysis and support of students as learners in the science/math classrooms (grades 3-12): cultural, psychological, sociological, economic, and instructional concerns.

SED 519. TEACHING MATHEMATICAL MODELING IN STEM (3). Provides students an overview of the content requirements in the Common Core Standards for Mathematics and the teaching practices that are central to those standards with a focus on the role of mathematical modeling. Students experience content lessons and lessons focused on supporting students in developing understanding of that content. **PREREQS:** Participants should be a prospective pre-service teacher at any level, a K-12 teacher, free-choice learning educator or have access to an educational setting.

SED 520. INTEGRATING TECHNOLOGY & LITERACY IN LEARNING MATH & SCIENCE (3). Explores teaching integrating multimedia information and communication technologies that support students in becoming critical thinkers and creative producers of their knowledge and understanding in mathematics and science. **PREREQS:** Basic computer literacy.

SED 521. TEACHING MATH & SCIENCE WITH DIGITAL & VIDEO TECHNOLOGIES (3). Examine and incorporate digital image and video technologies to support learners in becoming critical thinkers and creative producers of their knowledge and understanding in mathematics/science. **PREREQS:** Participants must be teachers of mathematics/science in K-12 formal or informal learning environments.

SED 522. DYNAMIC SPREADSHEETS AS LEARNING TOOLS IN SCIENCE AND MATH (3). Provides opportunities to explore the algebraic reasoning involved when engaging students in learning with spreadsheets in science and mathematics classes. Students redesign units of instruction for grades 3-12 that integrate learning about designing dynamic and dependable spreadsheets as learning tools in science and mathematics. Explore how dynamic spreadsheets encourage students to extend problems and considering alternative questions.

SED 523. SCIENCE/MATHEMATICS STRATEGIES AND ORGANIZATIONAL STRUCTURES (4). Builds on content developed in SED 491. Students learn new instructional skills and deepen abilities with basic teaching skills from SED 491. Students develop in-depth lesson plans and coordinate instructional and assessment plans supporting a unit of science or mathematics content for middle level students. **PREREQS:** SED 491 and provisional admission to Professional Education Program

SED 525. SCIENCE/MATHEMATICS CURRICULUM IMPL & INSTRUCT STRATEGIES-HS (4). Exploration of science/mathematics teaching strategies appropriate for high school science/mathematics learners as well as a range of organizational structures to effectively organize high school science/mathematics students for educational experiences. **PREREQS:** SED 494 and provisional admission to Professional Education Program

SED 531. OVERVIEW OF FREE-CHOICE LEARNING (3). Examines learning that occurs when people believe they have choices over what and how they learn, how much time they spend learning, and what their sources of information are. Covers current research on learning in museums, aquariums, zoos, botanical gardens, science centers, after-school programs, media and apprenticeships.

SED 540. FIELD AND ONLINE LEARNING OF GEOSCIENCE CONCEPTS (3). Science content and pedagogy in learning and teaching standards-based geologic content for K-12 teachers. This is a hybrid class combining distance learning and at least one field research trip. **PREREQS:** Participants should be either a K-12 teacher or a

free-choice learning educator. Participants should be prepared to camp during field trips and able to walk moderate distances that may involve off-trail maneuvering. Participants should be able to integrate graphics and images into different media (e.g., PowerPoint, Prezi, video), acquire images from web pages and use Google Earth. Some instruction in using Google Earth will be provided.

SED 541. WEATHER CONCEPTS FOR SCIENCE AND MATH TEACHING (3). Science content and pedagogy in learning and teaching basic weather concepts. **PREREQS:** Participants should be either a K-12 teacher, free-choice learning educator or have access to an educational setting.

SED 552. MATHEMATICS METHODS: PRACTICUM I (3). Theoretical background, practical knowledge, and skills for teaching in mathematics classrooms (grades 3-12). Instructional methods/modes, classroom management, contemporary curriculum goals and instructional planning.

SED 553. SCIENCE METHODS: PRACTICUM I (3). Theoretical background, practical knowledge, and skills for teaching in science classrooms (grades 3-12). Instructional methods/modes, classroom management, contemporary curriculum goals and instructional planning.

SED 554. MATHEMATICS METHODS: PRACTICUM II (3). Methods and problems in planning for mathematics instruction using an activity and laboratory approach; teaching strategies, organizing materials, evaluating student progress, and managing student behavior.

SED 555. SCIENCE METHODS: PRACTICUM II (3). Methods and problems in planning for science instruction using an activity and laboratory approach; teaching strategies, organizing materials, evaluating student progress, and managing student behavior.

SED 556. MATHEMATICS METHODS: PRACTICUM III (3). Planning for mathematics instruction (grades 3-12) using an activity and inquiry laboratory approach; teaching strategies, organizing materials, evaluating student progress, and managing student behavior.

SED 557. SCIENCE METHODS: PRACTICUM III (3). Planning for science instruction (grades 3-12) using an activity and inquiry laboratory approach; teaching strategies, organizing materials, evaluating student progress, and managing student behavior.

SED 562. MATHEMATICS MICROTEACHING LABORATORY (3). Develop, practice, and improve specific instructional skills, strategies, and modes in small-group teaching and learning situations.

SED 563. SCIENCE MICROTEACHING LABORATORY (3). Develop, practice, and improve specific instructional skills, strategies, and modes in small-group teaching and learning situations.

SED 564. ENGINEERING AND SCIENCE IN THE LIVES OF STUDENTS (3). Construction engineering is the vehicle through which participants learn to integrate science and technology using research-based teaching methods. By designing problems and investigations based on the built environment of modern life, concepts in science and engineering are made relevant as genuinely useful ideas in the everyday life of students. **PREREQS:** Assignments assume the participant is a K-12 teacher, free-choice learning educator (in museum, science camp, etc.), enrolled in a graduate licensure program, or has access to an educational setting.

SED 565. INQUIRING INTO SCIENCE AND MATHEMATICS LEARNING AND TEACHING (3). Participants prepare to lead instructional changes in their communities by planning inquiries into the learning they foster in their own contexts, critiquing relevant literature, making connections to national standards, and constructing a documentary

Web site or writing a journal article that reports upon ways to foster science and/or mathematics learning. **PREREQS:** Student must be a licensed teacher, enrolled in a teacher education program, or have experience in working with youth in an educational setting.

SED 566. FOSTERING REFLECTIVE DISCOURSE IN SCIENCE AND MATH CONTEXTS (3). Examines ways of speaking that foster learning in science and mathematics contexts such as K-16 classrooms and free-choice learning settings (i.e. museums, zoos, science camps, etc.). Assignments assume the participant is a K-12 teacher or free-choice learning educator enrolled in a graduate licensure program or has access to an educational setting.

SED 567. DESIGNING PROBLEM-BASED CURRICULA (3). Students in this Ecampus course will learn a framework for designing problem-based activities and curricula around current environmental health science problems through studying units from published problem-based curricula. Participants will gain understanding of curricular design principles, the relationship among curricular design, instruction, and assessment.

SED 568. ENHANCING LITERACY LEARNING IN SCIENCE AND MATH CONTEXTS (3). Examining ways of enhancing literacy learning will include analyzing research on learning to speak clearly, listen closely, write coherently, read with comprehension, and make and critique media resources competently in science and mathematics contexts. Settings include K-12 classrooms and free-choice learning environments such as zoos, museums and science camps.

SED 571. TECHNOLOGY AND PEDAGOGY I (1). Development of pedagogical content knowledge in science and mathematics education focused on the integration of technology in teaching and learning (grades 3-12). Lec/lab/rec.

SED 572. TECHNOLOGY AND PEDAGOGY II (1). Development of pedagogical content knowledge in science and mathematics education focused on the integration of technology in teaching and learning (grades 3-12).

SED 573. SCIENCE PEDAGOGY AND TECHNOLOGY I (4). Development of pedagogical content knowledge in grades 6-12 science instruction: learning theory, nature of science, technology integration, and reform recommendations. Lec/lab/rec.

SED 574. MATHEMATICS PEDAGOGY AND TECHNOLOGY I (4). Development of pedagogical content knowledge in grades 6-12 mathematics instruction: learning theory, nature of mathematics, technology integration, and reform recommendations. Lec/lab/rec.

SED 576. MATHEMATICS PEDAGOGY AND TECHNOLOGY II (4). Development of additional pedagogical content knowledge in grades 6-12; stress on dominant themes of the school mathematics curriculum including problem solving, reasoning, communication, and connections as well as the integration of technology into the mathematics classroom. Lec/rec/lab.

SED 577. SCIENCE PEDAGOGY AND TECHNOLOGY II (4). Development of additional pedagogical content knowledge in grades 6-12; stress on dominant themes in national reforms including inquiry and nature of science, as well as the integration of technology into the science classroom. Lec/lab/rec.

SED 580. RESEARCH AND EVALUATION (3). Analysis of qualitative and quantitative empirical research in science education, mathematics education and education in general. Development of data collection instruments for use by researchers and teachers of science education, mathematics education and education in general, including portfolio and other forms of alternative assessment.

SED 581. PROFESSIONAL DEVELOPMENT AND PRACTICUM IN MATHEMATICS (3).

Developing and implementing a program for continuing learning and evaluation in mathematics education.

SED 582. PERSONAL DIMENSIONS OF FREE-CHOICE LEARNING (3).

Investigates the fundamental roles that identity, motivation, interest, prior knowledge and experience, and choice and control play in supporting learning and how learning leaders can build on these dimensions of learning in order to successfully engage lifelong learners.

SED 583. SOCIO-CULTURAL DIMENSIONS OF FREE-CHOICE LEARNING (3).

Investigates connections between theories of free-choice learning and the fundamental concepts of sociology, social psychology and anthropology: social stratification, social structure and interaction, social institutions, and cultural background. Real world examples will be included to support learning leaders' efforts to facilitate the socio-cultural dimensions of lifelong science and mathematics learning.

SED 584. PHYSICAL DIMENSIONS OF FREE-CHOICE LEARNING (3).

Learning is influenced by the interaction of variables within three contexts--personal, socio-cultural and physical. This course focuses on how macro-scale environmental factors (e.g. space, crowding, novelty) and micro-scale environmental factors (e.g. design elements, real objects, different media) support free-choice learning.

SED 588. MATHEMATICS CURRICULUM (3).

Current trends, history of these trends, and the rationale for mathematics reform.

SED 589. ADVANCED TOPICS: MATHEMATICS EDUCATION (3).

Current issues in mathematics education. May be repeated for credit with different topics. Lec/lab. This course is repeatable for a maximum of 99 credits.

SED 592. PROFESSIONAL DEVELOPMENT AND PRACTICUM IN SCIENCE (3).

Developing and implementing a program for continuing learning and evaluation in science education.

SED 593. ADVANCED STRATEGIES: SCIENCE (3).

Provides additional exposure and development of instructional strategies and models of science teaching. Special emphasis is placed upon promoting critical thinking and decision making.

SED 594. ADVANCED STRATEGIES: MATHEMATICS (3).

Provides additional exposure and development of instructional strategies and models of mathematics teaching. Special emphasis is placed upon promoting critical thinking and decision making.

SED 595. ASSESSMENT AND EVALUATION (3).

Contemporary assessment and evaluation theory and the development of valid cognitive, affective, and psycho-motor assessment items/tasks. In-depth attention is given to the development and scoring of alternative assessment techniques such as portfolios and projects.

SED 596. METHODS OF COLLEGE TEACHING IN MATHEMATICS AND SCIENCE (3).

Focuses on methods and problems in planning and implementing mathematics or science instruction at the college level. Particular emphasis is placed upon selecting teaching strategies, organizing materials, and evaluating student assessment.

SED 597. PROFESSIONAL DEVELOPMENT IN MATHEMATICS AND SCIENCE EDUC (3).

Development of strategies and skills for developing, implementing and evaluating a program of professional development for mathematics or science educators considering various choices of program settings.

SED 598. MATHEMATICS AND SCIENCE CURRICULUM (3).

Current trends, history of these trends, and rationale for mathematics and science curriculum reform.

SED 599. TOPICS IN SCIENCE EDUCATION (3).

Current issues, trends, and topics in science education. May be repeated for credit with different topics. This course is repeatable for a maximum of 18 credits.

SED 601. RESEARCH (1-16).

This course is repeatable for a maximum of 16 credits.

SED 603. DISSERTATION (1-16).

This course is repeatable for a maximum of 999 credits.

SED 605. READING AND CONFERENCE (1-16).

This course is repeatable for a maximum of 16 credits.

SED 606. PROJECTS (1-16).

This course is repeatable for a maximum of 16 credits.

SED 607. SEMINAR (1-16).

This course is repeatable for a maximum of 16 credits.

SED 608. WORKSHOP (1-16).

This course is repeatable for a maximum of 16 credits.

SED 611. SURVEY OF RESEARCH ON TEACHING (3).

Critical analysis of perspectives of research in science/math education with a focus on teaching as the unit of analysis. **PREREQS:** SED 580

SED 612. QUANTITATIVE RESEARCH DESIGN AND CRITICAL ANALYSIS (3).

A study of quantitative research designs and analytical procedures with specific applications in science and mathematics education. **PREREQS:** SED 580*

SED 613. LEARNING THEORY (3).

Provides a critical overview and analysis of current theories of learning and development, beginning with a discussion about what learning is, how it has been viewed and studied over time, and how seminal theories inform an understanding of lifelong learning and its facilitation. **PREREQS:** SED 580*

SED 615. PRACTICUM IN MATHEMATICS/SCIENCE IN COLLEGE TEACHING (3).

Supervised field practicum in college mathematics/science teaching. This course is repeatable for a maximum of 9 credits.

SED 621. SURVEY OF RESEARCH ON LEARNING (3).

Critical analysis of perspectives on student thinking and learning in science/math education. **PREREQS:** SED 580*

SED 622. QUALITATIVE RESEARCH TECHNIQUES (3).

A study of qualitative research designs and analytical procedures with specific applications in science and mathematics education. **PREREQS:** SED 580*

SED 623. CURRICULUM THEORY (3).

Establishes theoretical grounding of curriculum. Includes theoretical background, practical knowledge, and skills related to science and mathematics curriculum, including the history, curriculum theory and practice. **PREREQS:** SED 580*

SED 699. SPECIAL TOPICS (1-16).

This course is repeatable for a maximum of 16 credits.

SED 808. WORKSHOP (1-16).

This course is repeatable for a maximum of 99 credits.

TEACHER AND COUNSELOR EDUCATION COURSES**TCE 199. SPECIAL TOPICS (1-16).**

This course is repeatable for a maximum of 16 credits.

TCE 216. *PURPOSE, STRUCTURE, & FUNCTION OF EDUCATION IN A DEMOCRACY (3).

Examines the system of education in a democratic society-- past, present, and future. Historical, social, philosophical, political, legal, and economic foundations of education in Oregon, the USA, and other countries provide a framework for analyzing contemporary educational issues in schools, communities, and workplaces. (Bacc Core Course)

TCE 216H. *PURPOSE, STRUCTURE, & FUNCTION OF EDUCATION IN A DEMOCRACY

(3). Examines the system of education in a democratic society--past, present, and future. Historical, social, philosophical, political, legal, and economic foundations of education in Oregon, the USA, and other countries provide a framework for analyzing contemporary educational issues in schools, communities, and workplaces. (Bacc Core Course) **PREREQS:** Honors College approval required.

TCE 219. CIVIL RIGHTS AND MULTICULTURAL ISSUES IN EDUCATION (3).

Examination of the context of working with students, schools, communities, and workplaces; the diversity of learning cultures (e.g. urban, suburban, rural) and the diversity among learners within those different cultures; and the influence of culture on one's learning.

TCE 253. LEARNING ACROSS THE LIFESPAN (3).

An exploration of how learning occurs at all ages from early childhood through adulthood. Covers major and emerging theories and styles, self-reflection on implications of how learning occurs for self and others, and the impact of these issues on the development and delivery of instruction.

TCE 299. SPECIAL TOPICS (1-16).

This course is repeatable for a maximum of 16 credits.

TCE 309. FIELD PRACTICUM (3-6).

Placement in either an elementary, middle or secondary school. To assist students to develop competencies in dealing with children or adolescents according to the individual major of the university student. This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

TCE 340. ^SUPPORTIVE DIFFERENTIATED ENVIRONMENTS (3).

Addresses special abilities and needs of learners and helps prepare teachers to develop strategies and instructional practices for diverse learners and students with exceptionalities in a supportive and inclusive classroom. (Writing Intensive Course) **PREREQS:** Provisional Admission to Professional Education Program.

TCE 399. SPECIAL TOPICS (1-16).

This course is repeatable for a maximum of 16 credits.

TCE 401. RESEARCH (1-16).

This course is repeatable for a maximum of 16 credits.

TCE 402. INDEPENDENT STUDY (1-16).

This course is repeatable for a maximum of 16 credits.

TCE 403. THESIS/DISSERTATION (1-16).

This course is repeatable for a maximum of 16 credits.

TCE 405. READING AND CONFERENCE (1-16).

This course is repeatable for a maximum of 16 credits.

TCE 406. PROJECTS (1-3).

This course is repeatable for a maximum of 16 credits.

PREREQS: Departmental approval required.**TCE 407. SEMINAR (1-16).**

This course is repeatable for a maximum of 16 credits.

PREREQS: Departmental approval required.**TCE 408. WORKSHOP (1-3).**

This course is repeatable for a maximum of 16 credits.

TCE 408H. WORKSHOP (1-3).

This course is repeatable for a maximum of 16 credits.

PREREQS: Honors College approval required.**TCE 409. PRACTICUM/CLINICAL EXPERIENCE (1-16).**

This course is repeatable for a maximum of 16 credits.

TCE 410. INTERNSHIP/WORK EXPERIENCE (1-18).

This course is repeatable for a maximum of 18 credits.

TCE 411. EDUCATIONAL PSYCHOLOGY, LEARNING AND DEVELOPMENT (3).

An opportunity to begin the transition from student to teacher. Explores the relationship between human development and learning through the life cycle.

TCE 412. LEARNING STYLES AND NEEDS IN ADOLESCENCE (2).

Exploration of the particular

learning styles and needs of the adolescent, major and emerging learning theories, individual learning styles including one's own learning styles, self-reflection on implications of how learning occurs, and the impact of these issues on the development and delivery of instruction. **PREREQS:** Acceptance into Education Double Degree Program required.

TCE 416. FOUNDATIONAL PERSPECTIVES IN EDUCATION (2). Introduction to historical, philosophical, social, and political foundations of education in America providing the framework for analysis of educational issues. **PREREQS:** Admission to the Professional Teacher Education Program or instructor approval required.

TCE 419. MULTICULTURAL ISSUES IN EDUCATION (2). Overview of issues particular to an increasingly diverse student population in public schools. Implications concerning curriculum design, management, parent/teacher interactions, student/teacher interactions. **PREREQS:** Admission to the Professional Teacher Education Program or instructor approval required.

TCE 424. TEACHER AS REFLECTIVE PRACTITIONER (2-3). Designed to help teachers make complex judgements based upon their knowledge and understanding of their students, the curriculum, and larger social and cultural issues through reflective practice. Problem solving related to teaching with strong focus on generating new knowledge about teaching, learning, and assessment. This course is repeatable for a maximum of 3 credits. **PREREQS:** TCE 407

TCE 425. CURRICULUM IMPLEMENTATION AND INSTRUCTIONAL STRATEGIES 7-12 (4). The relationship of theory to practice in teaching the content areas in grades 7-12 is examined. General curriculum trends as well as content selection in specific endorsement/subject areas are explored. This course is preparation for and is coordinated with part-time student teaching. **PREREQS:** 1) Admission into the Education Double Degree. 2) Student is entering part-time student teaching in high school or middle school.

TCE 427. ALTERNATIVE ASSESSMENT FOR MIDDLE AND HIGH SCHOOL TEACHING (2). Introduces methods of assessment that encourage effective learning. Students will design assessments aligned to national, state, and local standards as they prepare and implement a teaching unit in their practicum. Taken concurrently with TCE 410, Part-Time Student Teaching in Middle or High School. **PREREQS:** Provisional admission (Level II) to the Education Double Degree Program and (TCE 491 or TCE 494). **COREQS:** TCE 407, TCE 410

TCE 456. STRATEGIES FOR TEACHING LANGUAGE ARTS AND SOCIAL STUDIES (2). Exploration of language arts and social studies programs (e.g., children's literature, writing, special needs, spelling, and cultural factors). Development of research-based teaching strategies and assessment. Focuses on the development of inquiry approaches that reflect interdisciplinary curriculum as well as subject-specific pedagogy in the teaching of both social studies and language arts. **PREREQS:** TCE 216 and TCE 219 and TCE 253 and provisional acceptance into the Education Double Degree Program required.

TCE 457. TEACHING ELEMENTARY MATHEMATICS FOR UNDERSTANDING (3). Part of the Education Double Degree. Explores the teaching of mathematics in K-8 classrooms in a manner consistent with state and national standards. Students learn teaching strategies that incorporate the development of mathematical models and mental constructs. **PREREQS:** Admission to Provisional Level (Level II) of the Elementary Double Degree Program. (MTH 211 and MTH 212 and MTH 390)

TCE 458. STRATEGIES FOR TEACHING WELLNESS AND FINE ARTS (2). Exploration of recent trends in wellness and fine arts.

Development of research-based practices in the teaching of wellness and fine arts. Emphasizes the value of developing holistic learners through effective wellness and fine arts programs.

PREREQS: TCE 216 and TCE 219 and TCE 253 and provisional acceptance into the Education Double Degree Program required.

TCE 472. FOUNDATIONS OF ESOL/BILINGUAL EDUCATION (3). Examines characteristics of English language learners (ELLs), key theories in language acquisition, the role of culture in language development, and instructional program models for ELLs, while considering implications for classroom instruction.

TCE 473. INSTRUCTIONAL APPROACHES FOR ESOL/BILINGUAL EDUCATION (3). Examines characteristics of standards-based content-area instruction for emergent bilinguals. Includes integration of content and language development, classroom-based assessment, and use of technology to support student learning. **PREREQS:** TCE 472

TCE 476. PARTNERSHIPS AND IDEOLOGIES IN ESOL/BILINGUAL EDUCATION (3). Considers social and political issues pertaining to educating English language learners. Focuses on exploring multiple ideologies in ESOL and building partnerships across schools, families, and communities. **PREREQS:** TCE 472

TCE 479. LINGUISTICS FOR ESOL/BILINGUAL TEACHERS (3). Explores linguistic categories: phonology, morphology, syntax, semantics, pragmatics, and discourse. Focuses on teaching implications--from psycholinguistic, sociolinguistic and critical perspectives--for emergent bilingual students in P-12 contexts. **PREREQS:** TCE 472

TCE 483. DEVELOPMENTAL READING (3). Development of pedagogy in teaching of reading to elementary-aged students, including teaching of vocabulary, comprehension, phonics, fluency and motivation to read. Use of children's literature, assessment approaches, and special needs students are also addressed. This is a PTCE course in the elementary Double Degree Program. **PREREQS:** Admission to Level II (Provisional Level) of the Education Double Degree Program.

TCE 491. CONTENT STANDARDS AND CURRICULUM DEVELOPMENT FOR MID LEVEL (3). Exploration of content standards, materials, and methods appropriate for middle school students. Develops skills in work sample methodology through the design of effective instruction, integrating a variety of methods with existing understandings of content area, how people learn, and the diverse communities in which they work. **PREREQS:** Provisional acceptance into the Education Double Degree Program required.

TCE 493. READING, LITERATURE, AND LANGUAGE DEVELOPMENT IN THE CONTENT (2). Examination of reading, literature, and language development methods that can be used by middle school and high school teachers to support students' learning of content area information. Development of specific reading strategies in content areas. **PREREQS:** TCE 216 and TCE 219 and TCE 253. Provisional acceptance into the Education Double Degree Program required.

TCE 494. CONTENT STANDARDS AND CURRICULUM DEVELOPMENT FOR HIGH SCHOOL (3). Exploration of content standards, materials and methods appropriate for high school students. Develops skills in work sample methodology through the design of effective instruction, integrating a variety of methods with existing understandings of content area, how people learn, and the diverse communities in which they work. **PREREQS:** Provisional acceptance into the Education Double Degree Program required.

TCE 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

TCE 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

TCE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 506. PROJECTS (1-3). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Admission to program. Departmental approval required.

TCE 510. INTERNSHIP (1-18). By special permission and arrangement. This course is repeatable for a maximum of 18 credits.

TCE 511. HUMAN DEVELOPMENT, LEARNING AND EDUCATION (3). Covers the implications in interdependence of human development and learning on educational processes. **PREREQS:** Admission to Professional Teachers Education Program or instructor approval required.

TCE 512. PSYCHOLOGY OF THE ADOLESCENT (3). Covers the research and influence of social, physical, psychomotor, intellectual, cognitive and peer relations as they relate to learning and development of the middle/secondary school student. Investigates the influence of peer groups and the environment as well as identifies at-risk youth.

TCE 513. COUNSELING PRE-PRACTICUM (3). Designed to develop competencies in basic counseling skills and processes. Self critique, peer critique, and supervisor critique of videotaped interviews with peer clients. A pass requires at least "B" level work. Graded P/N. This course is repeatable for a maximum of 6 credits. **PREREQS:** Admission to program.

TCE 514. PRACTICUM IN COUNSELING (1-3). Designed to develop competencies in basic skills, facilitative dimensions, and counseling process. Self-critique, peer-critique, and supervisor-critique of videotaped interview. Written self-critique, oral case presentation and charting skills are learned. Practicals are graded on a pass/no pass credit basis only. A pass requires at least "B" level work. This course is repeatable for a maximum of 9 credits. **PREREQS:** Admission to program. Departmental approval required.

TCE 515. COUNSELING INTERNSHIP (1-15). The internship is the culminating field experience of the MS in Counseling program. It is designed to provide the student with an on-site placement in a public or private mental health or school setting that will create the necessary bridge between training and professionalism. Graded P/N. This course is repeatable for a maximum of 24 credits.

TCE 516. FOUNDATIONAL PERSPECTIVES IN EDUCATION (2). Introduction to historical, philosophical, social, and political foundations of education in America providing the framework for analysis of educational issues.

TCE 517. ACADEMIC WRITING FOR MASTER'S STUDENTS (1). A writing refresher that addresses academic voice, style, tone, construction, conventions, and writing style appropriate for master's-level research papers and capstones.

This course is repeatable for a maximum of 2 credits.

TCE 519. MULTICULTURAL ISSUES IN EDUCATION (2). Overview of issues particular to an increasingly diverse student population in public schools. Implications concerning curriculum design, management, parent/teacher interactions, student/teacher interactions.

TCE 520. CLASSROOM MANAGEMENT AND DISCIPLINE K-12 (3). Knowledge of discipline and classroom management techniques through examination of the literature and school observations. Explore factors that influence student behavior, including those associated with social and/or multicultural student populations.

TCE 522. RACIAL AND CULTURAL HARMONY IN THE K-12 CLASSROOM (3). An overview of the many issues relevant to the increasingly diverse student population in public schools today. It explores how a culturally competent perspective can be incorporated into curriculum design, teaching strategies, and interactions with students and parents. The course is both self-directed and communal, requiring students to respond to the materials and each other, yet at their own pace.

TCE 523. STRATEGIES AND ORGANIZATIONAL STRUCTURES FOR MID LEVEL (4). Addresses the unique role of the middle school as it responds to the physical, intellectual, social and emotional development of young adolescents. Examines how middle schools can improve teaching, learning, and assessment and create school cultures that support high achievement within the various content disciplines. Incorporates work sample methodology. **PREREQS:** Acceptance into an initial licensure program required. Concurrent requirements include TCE 410/TCE 510 part-time student teaching (2 credits) and TCE 407/TCE 507 student teaching seminar (1 credit).

TCE 524. TEACHER AS REFLECTIVE PRACTITIONER (2-3). Designed to help teachers make complex judgments based upon their knowledge and understanding of their students, the curriculum, and larger social and cultural issues through reflective practice. Problem solving related to teaching with strong focus on generating new knowledge about teaching, learning, and assessment.

TCE 525. CURRICULUM IMPLEMENTATION & INSTRUCTIONAL STRATEGIES FOR HS (4). Content course that focuses on the implementation of effective and appropriate instructional strategies designed for high school students. Explores the integration of curriculum and instruction through consideration of students' diverse needs and work sample methodology. Examines the importance of metacognitive strategies in the teaching of content-related skills and concepts. **PREREQS:** Acceptance into an initial licensure program required. Concurrent requirements include TCE 410/TCE 510 part-time student teaching (2 credits) and TCE 407/TCE 507 student teaching seminar (1 credit).

TCE 527. ALTERNATIVE ASSESSMENT (2). An introduction to issues related to alternative assessment and exploration of effective strategies that holistically assess students.

TCE 528. USING ASSESSMENT TO IMPROVE INSTRUCTION (3). Addresses using assessment data to design, refine, and revise curriculum, instruction, and assessment so that all students have an opportunity to make progress toward meeting standards.

TCE 530. FUNDAMENTALS OF COUNSELING (3). A course designed for students planning on working in a human service profession, such as counseling, teaching, nursing, medicine, law. Exploration of basic helping processes appropriate in a variety of settings. Review of ethical standards of conduct. A variety of skills and techniques are demonstrated and practiced through videotape and role play.

TCE 531. DEVELOPMENTAL PERSPECTIVES IN COUNSELING (3). A study of affective, behavioral, cognitive, physical, and moral development for human growth and maturation. Theories of personality and learning that affect normal and non-normal development. Relationship of understanding human development to the counseling profession.

TCE 532. SOCIAL AND CULTURAL PERSPECTIVES IN COUNSELING (3). Social and cultural factors effecting counseling. Includes studies of change, ethnic groups, subcultures, changing roles of women, sexism, urban and rural societies, population patterns, cultural mores, use of leisure time, and differing life patterns. **PREREQS:** Admission to program.

TCE 533. ADDICTIVE BEHAVIOR COUNSELING (3). Techniques for addictive behavior assessment and counseling. Specific addictions covered include substance abuse, gambling, and eating disorders.

TCE 534. PEDIATRIC PSYCHOPHARMACOLOGY FOR SCHOOL PERSONNEL (1). Introduces schoolteachers, counselors and social workers to the fundamentals of pediatric psychopharmacology. Basics of pharmacology, adverse effects, indications, and drug interactions will be discussed. This course does not purport to prepare the student to be any part of the pharmacological prescriptive process; that is the purview of the medically trained person.

TCE 536. APPLIED PSYCHOPHARMACOLOGY FOR COUNSELORS (3). Acquaints counseling students with the fundamentals of psychotropic drugs. Basics of pharmacology, adverse effects, indications, and drug interactions will be discussed. Boundaries of practice and practical issues of assessment and referral will be covered. The overall aim of the course is to provide information about psychopharmacology to the non-medical mental health care provider so that she or he can be a more informed member of the mental health care team. This course does not purport to prepare the student to be any part of the pharmacological prescriptive process. This is the purview of the medically trained person.

TCE 540. NEW VISION SCHOOL COUNSELING: ACADEMIC ACHIEVEMENT (3). Participants will be able to implement research-based educational practices in: 1. Individual and group academic achievement counseling. 2. Consulting with parents, teachers, and schools regarding academic achievement. 3. Utilizing culturally competent practices in addressing academic achievement issues. 4. Applying the appropriate legal and ethical guidelines to work in the academic domain.

TCE 541. THE COUNSELING PROFESSION (3). Provides the foundation for becoming a counselor and explores the psychological and philosophical ramifications of the counselor in a changing world. Topics will include values in counseling, ethical and legal issues in counseling, research in counseling, and maintaining a professional identity. **PREREQS:** Admission to program.

TCE 542. TEACHER LEADERSHIP (3). Examines current conceptions, research, and philosophies of educational leadership. The goal is to promote teacher-leadership in effective teaching and learning and influence in local educational policies and programs.

TCE 543. POLITICS, POLICY, AND ADVOCACY IN EDUCATION (3). Examines the relationships among local, state, and national educational governing structures, and advocacy strategies and processes.

TCE 544. LITERACY AND READING CURRICULUM DESIGN (3). Examines the theory and practice of curriculum development and related pedagogy in reading, including its integration in the content areas. Included are the study of literacy foundations, culture, development,

planning and organization, teaching heuristics, special needs and assessment.

TCE 545. PLANNING CURRICULUM ALIGNED TO STANDARDS (3). Prepares teachers to develop a yearlong curriculum that reflects level-appropriate instruction, aligned to curriculum frameworks, standards systems and assessments, and theory.

TCE 546. LEADERSHIP OF SCHOOL COUNSELING PROGRAMS (3). Designed to prepare school counselors to lead teams in the development and implementation of comprehensive school counseling programs. Principles of leadership, system change, and advocacy are introduced. State and National Comprehensive School Counseling models are examined. **PREREQS:** Admission to program.

TCE 547. FOUNDATIONS OF COMMUNITY COUNSELING (3). Addresses the foundations of community counseling including: (1) historical, philosophical, societal, cultural, economic, and political dimensions of and current trends in the community human service/mental health movement, (2) roles, functions, preparation standards, credentialing, licensure and professional identity of community counselors, (3) policies, laws, legislation, recognition, reimbursement, right-to-practice, and other issues relevant to community counseling. **PREREQS:** Admission to community counseling program.

TCE 548. SPECIAL EDUCATION ISSUES IN COUNSELING (3). Addresses various educational disability categories, the fundamentals of special education law, the special education assessment process, the special education definition of emotional/behavioral disorders, and the counselor's role in supporting children with special emotional needs. **PREREQS:** Admission to counselor education program.

TCE 549. TEACHING IN A DIFFERENTIATED AND DIVERSE CLASSROOM (3). Addresses the philosophical framework, strategies, and assessment of differentiation to meet the needs of all students in the classroom.

TCE 550. FOUNDATIONS OF MENTAL HEALTH COUNSELING (3). Addresses the foundations of mental health counseling: (1) historical, philosophical, societal, cultural, economic, and political dimensions of, and current trends in, the mental health movement; (2) roles, functions, preparation standards, credentialing, licensure and professional identity of mental health counselors, (3) policies, laws, legislation, recognition, reimbursement, right-to-practice, and other issues relevant to mental health counseling.

TCE 551. THEORY AND TECHNIQUES OF COUNSELING I (3). Basic concepts and facilitative skills of helping relationships. Introduction and overview of counseling theories and their related processes and techniques. **PREREQS:** Admission to program.

TCE 552. THEORY AND TECHNIQUES OF COUNSELING II (3). Continued development of the theories and techniques of counseling including identification of the counseling process. Emphasis on personality development and affective, behavioral and cognitive approaches. **PREREQS:** TCE 551

TCE 553. CRITICAL ISSUES IN THE TEACHING AND LEARNING OF MATHEMATICS (3). Examines National Council of Teachers of Mathematics (NCTM) principles and addresses curriculum and strategies that help ensure that all students meet the benchmarks and standards.

TCE 555. INTEGRATION OF THE DISCIPLINE (3). The student will develop an integrated unit of work for an appropriate grade level, understand how the various academic disciplines in the elementary school are integrated and can plan and teach an integrated lesson.

TCE 557. MATHEMATICS STRATEGIES K-8 (3). Exploration of the teaching of early childhood/elementary school mathematics in a manner consistent with state and national standards. **PREREQS:** Classroom teaching experience or instructor approval required.

TCE 558. CRISIS MANAGEMENT IN SCHOOLS (1). The study of crisis management in schools. Theory and practice will be the course foci.

TCE 559. STRATEGIES: SCIENCE (3). Emerging program in elementary science with emphasis on the interdependence of content and process in scientific inquiry; general, diagnostic, and prescriptive techniques in science instruction. **PREREQS:** Classroom teaching experience or instructor approval required.

TCE 560. RESEARCH IN LEARNING (3). Allows the student, through application, to use their research in learning to better structure the classroom as a learning environment; strategies for transfer; essential skills, and cognitive, affective and psychomotor development.

TCE 561. ACTION RESEARCH (1-3). Examines action research as a vehicle for teacher and administrator professional development. Specific topics of study include problem posing, data collection and analysis, theory building, and writing the report. This course is repeatable for a maximum of 3 credits.

TCE 562. INTRODUCTION TO RESEARCH METHODS IN EDUCATION (3). An introductory course for master's students as well as in-service teachers. Explains quantitative and qualitative research methods in education; classroom action research and understanding of the fundamental statistical procedures used in the interpretation and use of research studies.

TCE 563. STUDENTS WITH SPECIAL NEEDS (2). Strategies and instructional practices for diverse learners in an inclusive classroom; working with specialist, and families having children with special needs.

TCE 564. ADVANCED INSTRUCTIONAL STRATEGIES (3). Addresses research-based teaching strategies and collaboration with colleagues to improve instruction for all students in the standards-based classroom.

TCE 567. APPRAISAL OF THE INDIVIDUAL (3). Development of framework for understanding the individual; methods for data gathering and assessment; individual and group testing; case study approaches; observational, sociometric, and environmental procedures; study of individual differences. Ethnic, cultural, and sex factors are emphasized. **PREREQS:** Basic statistics course.

TCE 568. LIFESTYLE AND CAREER DEVELOPMENT (3). Major theoretical approaches to career development; available resources for educational and occupational assessment; procedures to enhance career exploration, planning and placement. Emphasis is on the decision-making process and issues of career counseling with special populations.

TCE 569. STATISTICS FOR EDUCATORS I (3). Provides education researchers with a strong understanding of basic quantitative statistical methods including probability, sample selection, descriptive statistics, and hypothesis testing in a single population for the purpose of conducting research and data-driven decision making in education settings. Taught via Ecampus only.

TCE 570. STATISTICS FOR EDUCATORS II (3). Provides education researchers with a strong understanding of basic quantitative statistical methods including probability, sample selection, descriptive statistics, and hypothesis testing in a single population for the purpose of conducting research and data-driven decision making in education settings. Taught via Ecampus only.

TCE 571. GROUP COUNSELING PROCEDURES (3). A conceptual and experiential introduction to group dynamics. Group counseling approaches

and models; issues of group leadership; styles of leadership and group facilitation skills. Consideration is given to group counseling goals, composition, phases and research. **PREREQS:** Admission to the program.

TCE 572. FOUNDATIONS OF ESOL/BILINGUAL EDUCATION (3). Examines characteristics of English language learners (ELLs), key theories in language acquisition, the role of culture in language development, and instructional program models for ELLs, while considering implications for classroom instruction.

TCE 573. INSTRUCTIONAL APPROACHES FOR ESOL/BILINGUAL EDUCATION (3). Examines characteristics of standards-based content-area instruction for emergent bilinguals. Includes integration of content and language development, classroom-based assessment, and use of technology to support student learning. **PREREQS:** TCE 572

TCE 575. FAMILY COUNSELING (3). An overview of the major theoretical approaches to family counseling will be covered. Through the use of readings, demonstrations, and videos the student will become familiar with systems foundations, the history of family counseling, family roles, interaction patterns, and decision-making processes.

TCE 576. PARTNERSHIPS AND IDEOLOGIES IN ESOL/BILINGUAL EDUCATION (3). Considers social and political issues pertaining to educating English language learners. Focuses on exploring multiple ideologies in ESOL and building partnerships across schools, families, and communities. **PREREQS:** TCE 572

TCE 577. APPLIED PSYCHOPATHOLOGY AND PSYCHODIAGNOSTICS (3). Addresses the principles of diagnosis of psychopathology and the use of current diagnostic tools, including the current edition of the Diagnostic and Statistical Manual (DSM). Includes psychiatric terminology, treatment, current research, cross-cultural impact, ethical implications, and goal planning related to mental health processes and case management. **PREREQS:** TCE 541 and TCE 551 and TCE 552

TCE 578. CRISIS, TRAUMA, AND GRIEF COUNSELING (3). The theory and pragmatics of crisis, trauma and grief counseling are addressed.

TCE 579. LINGUISTICS FOR ESOL/BILINGUAL TEACHERS (3). Explores linguistic categories: phonology, morphology, syntax, semantics, pragmatics, and discourse. Focuses on teaching implications--from psycholinguistic, sociolinguistic and critical perspectives--for emergent bilingual students in P-12 contexts. **PREREQS:** TCE 572

TCE 581. CROSS-CULTURAL COUNSELING (3). Cognitive and experimental study of social and psychological variables influencing the cross-cultural counseling relationship. Social and psychological experiences of selected subcultures. Relevant assessment instruments and current literature, methods and outcome studies. **PREREQS:** Instructor approval required.

TCE 582. SUPERVISION (3). Problems, issues, theories and practices of supervision, especially for teachers, administrators and counselors. Supervisory roles, styles, goals, and problems conceptually analyzed relative to changing demands of individuals, schools, and society. Theories of leadership, budgeting, curriculum planning, clinical techniques, group processes, teacher evaluation and related approaches to the improvement of education service and programs.

TCE 583. DEVELOPMENTAL READING (3). Developmental reading programs to K-9, specific reading skill needs, techniques, organizational strategies, materials and content area reading. Emphasis on the developmental nature of the reading process as a lifelong activity. **PREREQS:** Elementary teaching experience.

TCE 591. STUDY OF SCHOOLS: K-12 (3). Structured observation in selected K-12 school

sites. Total of 125 hours of observation, as required by the Oregon Teacher Standards and Practices Commission for persons without prior teaching experience. **PREREQS:** Admission to Track II program.

TCE 592. CLASSROOM INSTRUCTION FOR COUNSELORS (3). 75 hours of supervised instruction in a public school setting. **PREREQS:** TCE 591

TCE 593. READING AND WRITING IN THE MIDDLE AND SECONDARY SCHOOL (3). Reading and writing methods that can be used by middle/secondary school teachers to individualize instruction, correct basic reading and writing skills in content area; promote learning and the use of reading materials as supplementary teaching materials.

TCE 595. GROUP COUNSELING II (3). Group counseling theories and pragmatics for clients with mental and emotional disorders.

TCE 596. TECHNOLOGY FOR EDUCATORS (3). Explore the integration of current and emerging technologies into K-12 content areas by engaging students in real world issues and learning in a social context. Integrate technologies that promote critical thinking, communication, collaboration, and creativity. Discuss technologies in terms of cultural linguistic diversity. Gain transferrable skills. Taught via Ecampus only. **PREREQS:** Basic computer literacy.

TCE 597. INTRODUCTION TO COUNSELOR SUPERVISION (3). Introduction to the theory and pragmatics of counselor supervision.

TCE 598. COUNSELOR CONSULTATION (3). Development of consultation skills as a supervisor and counselor educator. Consultation theory and practice are studied. Students practice consultation skills and receive feedback. **PREREQS:** Admission to master's program.

TCE 599. SPECIAL TOPICS (1-3). This course is repeatable for a maximum of 90 credits. **PREREQS:** Departmental approval required.

TCE 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 602. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

TCE 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 609. PRACTICUM/CLINICAL EXPERIENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 610. INTERNSHIP (1-15). This course is repeatable for a maximum of 15 credits. **PREREQS:** Departmental approval required.

TCE 612. RESEARCH PERSPECTIVES IN EDUCATION (3). Research perspectives, how they are influenced by worldviews, and how these worldviews influence research. **PREREQS:** TCE 562 and an introductory statistics course (may be taken concurrently).

TCE 613. RESEARCH ANALYSIS AND INTERPRETATION IN EDUCATION (3). Critical analysis of scholarly studies in education from a variety of research perspectives. **PREREQS:** TCE 612 and an intermediate statistics course (may be taken concurrently).

TCE 614. ADVANCED RESEARCH METHODS IN EDUCATION (1-3). Selected topics in research methods as appropriate for research perspectives in education. This course is repeatable for a maximum of 6 credits. **PREREQS:** TCE 613

TCE 616. UNIVERSITY LEVEL INSTRUCTIONAL THEORY AND METHODS (3). Addresses general university level instructional theory and methods as well as pedagogy specific to counselor education. **PREREQS:** Admission to PhD program in counseling or EdD in education.

TCE 617. ADVANCED COUNSELOR SUPERVISION (3). Advanced theory and techniques in counselor supervision. Pedagogical issues in training supervisors are addressed. **PREREQS:** Admission to PhD program in counseling.

TCE 618. PRACTICUM IN COUNSELING (1-12). Specialized counseling experiences supervised by a professional. Emphasis is on development of advanced skills in counseling specific to a population. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 619. INTERNSHIP IN COUNSELING (1-12). Designed to provide experiences in development of teaching and supervision skills in preparation as a counselor educator and supervisor. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TCE 621. SELECTED TOPICS IN EDUCATION (3). This course is repeatable for a maximum of 18 credits.

TCE 632. ADVANCED COUNSELING THEORY (3). The goal of this course is to develop in each student an advanced level of understanding and skill in emergent counseling methods.

TCE 633. ADVANCED COUNSELING PRACTITIONER I (3). Assists the advanced counseling practitioner with their knowledge and skills in training, leadership, and writing.

TCE 634. ADVANCED COUNSELING PRACTITIONER II (3). Addresses the theory, science, pragmatics and pedagogy of evidence-based practices in professional counseling.

TCE 662. COUNSELOR EDUCATION QUANTITATIVE RESEARCH METHODS I (3). Part I of a three-course sequence designed to prepare students to meet the CACREP doctoral standards for quantitative research methods in counselor education. Topics addressed in course I include application of the following in counselor education research: (1) data scales and scale transformation, (2) frequency distributions and histograms, (3) measures of central position, (4) variability, (5) characteristics of data curves, (6) normality, (7) measures of variability, (8) the statistical hypothesis, (9) statistical errors (Type I/ Type II), (10) power analysis and (11) statistical correlation. **PREREQS:** TCE 562

TCE 663. COUNSELOR EDUCATION QUANTITATIVE RESEARCH METHODS II (3). Part II of a three-part course sequence designed to prepare students to meet the CACREP doctoral standards for quantitative research methods in counselor education. Topics addressed in course II include application of the following in counselor education research: (1) a review of the dependent variable, normal curve, Type I and Type II errors, power analysis, and criteria for selecting statistical tools, (2) significance tests, including Chi-square t-test, one-factor analysis of variance, multiple comparison tests (L.S.D. and Tukey's HSD), two-factor analysis of variance, statistical interaction (ordinal and disordinal), linear regression, factor

analysis, and analysis of covariance.

TCE 664. COUNSELOR EDUCATION QUANTITATIVE RESEARCH METHODS III (3). Part III of a three-course sequence designed to prepare students to meet the CACREP doctoral standards for quantitative research methods in counselor education. Topics addressed in course III include application of the following in counselor education research: (1) multiple regression, (2) path analysis, (3) confirmatory factor analysis, (4) logistic regression, (5) reliability and generalizability theory, (6) cluster analysis, (7) structural equation modeling, and (8) single subject designs.

TCE 665. PUBLICATION METHODS IN COUNSELOR EDUCATION (3). Teaches doctoral students how to write theses, grant reports, peer-reviewed journal articles, and textbook chapters.

TCE 667. ADVANCED ASSESSMENT IN COUNSELING (3). Explores current issues in the use of assessment in counseling, best practices in instrument development, and best practices in assessment pedagogy. **PREREQS:** Admission to PhD program in counselor education.

TCE 668. ADVANCED CAREER DEVELOPMENT AND CONSULTATION IN COUNSELING (3). An advanced course surveying past, current, and possible future technical and philosophical perspectives concerning career development and counseling. Issues in consultation, social change theory, and advocacy action planning are also reviewed in light of their impact on future counseling practitioners. Pedagogical methods for presenting current issues in career development, consultation, social change theory and advocacy action planning are a major focus of the class. **PREREQS:** TCE 568 and TCE 598

TCE 671. ADVANCED GROUP COUNSELING (3). Provides learning experiences beyond the entry-level in group counseling. Theoretical and pedagogical innovations in this area are discussed. **PREREQS:** Admission to doctoral program in counseling.

TCE 681. ADVANCED DIVERSITY AND SOCIAL JUSTICE IN COUNSELOR EDUCATION (3). Addresses pedagogy relevant to multicultural, diversity, and social justice issues and the role of racial, ethnic, and cultural heritage, nationality, socioeconomic status, family structure, age, gender, sexual orientation, religious and spiritual beliefs, occupation, physical, and mental status, local, regional, national, international perspective, and issues of equity such as oppression, power and privilege in counselor education. **PREREQS:** TCE 581

TCE 696. COUNSELOR EDUCATION (3). Orientation to the profession of counselor education. Specific topics include (1) history and organization of the profession, (2) program accreditation standards and practices, (3) instructional theory and methods relevant to counselor education, and (4) ethical and legal considerations in counselor education.

TCE 697. COUNSELOR SUPERVISION (3). Practical experience for counseling professionals who have responsibility for directing personal and professional development of counselors, promoting counselor competency, and developing and implementing counseling services and programs. Theoretical models of supervision are utilized to develop supervisor roles. **PREREQS:** Admission to doctoral program.

TCE 808. WORKSHOP (1-4). This course is repeatable for a maximum of 16 credits.

The College of Engineering at Oregon State University grew out of a department established in 1889. Its purpose is to provide a quality education for students entering the engineering profession. It has awarded more than 30,000 degrees. The reputation that its graduates have established in industry, business, and government through their imaginative work and leadership attests to the accomplishments of the college in providing a sound education.

The College of Engineering offers degrees in engineering, computer science, construction engineering management, energy systems engineering, and radiation health physics. Students may choose engineering majors from biological, chemical, civil, ecological, electrical and computer, environmental, industrial, manufacturing, mechanical, and nuclear engineering. Educational preparation for land surveying, a licensed profession in all states, is offered through civil engineering. Forest engineering is offered by the College of Forestry.

THE ENGINEERING PROFESSION

Engineering is the profession in which knowledge of the mathematical and natural sciences gained through education and practice is applied with judgment to develop ways to economically utilize the materials and forces of nature for the benefit of humankind. It is a licensed profession in all of the states of the USA, and educational programs must meet high professional standards. Engineers are not only responsible for planning, designing, manufacturing, construction, and management, but also for the safety and welfare of the public that relies on their work.

MISSION AND GOALS

The college's undergraduate educational mission is to provide high quality engineering programs that prepare students for successful careers, lifelong learning, and service to their profession and society. OSU engineering graduates will be known for their technical competence and creativity; for their ability to apply, adapt, and extend their knowledge to solve a wide variety of problems; and for their effective communication skills. Their education will provide them with an understanding of the ways in which the humanities, social sciences, basic sciences, and technology interact to affect society. These programs will foster an environment that stimulates learning and promotes diversity.

The college's undergraduate programs have four goals:

1. Educate students thoroughly in mathematics, basic science and engineering sciences relevant to their discipline's professional work, including fundamental concepts, experimental techniques, methods of analysis, and computational applications.
2. Develop the ability of students to communicate effectively and to work collaboratively in diverse team environments.
3. Develop in students an awareness of the historical evolution of knowledge and technical applications, the state of current professional practice,

their need for lifelong learning, contemporary issues, and the impact of engineering actions and solutions in a societal and global context; and to develop an understanding of their professional and ethical responsibilities.

4. Develop the ability of students to formulate and solve problems, to integrate and synthesize knowledge, and to think creatively, leading to the capability to analyze and design components, processes, or systems; plan and carry out experiments effectively; and troubleshoot and modify processes and systems.

PREPARING FOR AN ENGINEERING CAREER

To prepare for the practice of engineering, students complete an accredited program of study leading to a bachelor of science degree in an established engineering field. Most engineering curricula require 180 credits; exceptions include programs in chemical, ecological, environmental and bioengineering. All programs include a balance of course work in mathematics, science, liberal arts, engineering science, and engineering design.

Upon graduation, engineering students are eligible to take the Fundamentals of Engineering Examination of the State Board of Engineering Examiners in any state. After passing the examination and completing four years of progressively responsible engineering work, graduates are eligible to take the professional engineering license examination of the state in which they intend to practice.

Although some fields of industrial and government employment do not require formal professional licensure, the educational preparation for the bachelor's degree is a necessity for virtually all such employment.

Preparation for the professional practice of land surveying follows a pattern of education, experience, examination, and professional licensure similar to that required for professional engineering practice.

Students completing the BS in Radiation Health Physics degree will be eligible to take part I of the Certified Health Physics (CHP) Examination of the American Board of Health Physics after one year of applied health physics practice. After six years of responsible professional experience in health physics, graduates will be eligible to take part II of the CHP examination.

CHOOSING A MAJOR

The selection of a major is often difficult for students who have not had close association with engineering activities. Students should not be overly concerned with this problem since the pre-professional curricula of all engineering programs during the first year are essentially equivalent. This flexibility allows students to change

majors during the first year without loss of progress. Engineering students who are unsure about their choice of a major are advised to register in pre-general engineering until they make a decision.

GRADUATE STUDY

Because of the growing complexity of modern engineering practice, graduate study is important for those students who wish to specialize. Students who have established satisfactory undergraduate records and who are looking for the greatest opportunity in their professional field should consider continuation of their education beyond the baccalaureate degree. Study for the Master of Science (MS) and Master of Engineering (MEng) degrees normally requires one or two years. The Doctor of Philosophy (PhD) degree requires three to four additional years.

ACCREDITATION

The Bachelor of Science degrees in Bioengineering, Chemical, Civil, Ecological, Electrical and Computer, Environmental, Industrial, Manufacturing, Mechanical, and Nuclear Engineering baccalaureate programs are accredited by the Engineering Accreditation Commission of the ABET, Inc. 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; 410-347-7700. The Construction Engineering Management program is accredited by the American Council for Construction Education. The Bachelor of Science degree in Computer Science-Computer Systems option is accredited by the Computing Accreditation Commission of the ABET, Inc. 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; 410-347-7700. The Bachelor of Science degree in Radiation Health Physics is accredited by the Applied Science Accreditation Commission of the ABET, Inc. 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; 410-347-7700.

PRE-PROFESSIONAL PROGRAM

Courses included in the first and sophomore years comprise a pre-professional program of study that produces a solid foundation for professional program studies at the junior, senior, and advanced degree levels. The pre-professional program may be taken at Oregon State University or at any accredited college or university that offers equivalent courses transferable to OSU.

The required pre-professional courses in the program listings are designated with an (E). These courses must be completed before the student is eligible for admission to the professional program. The other courses listed are important and may constitute prerequisites for junior-level courses.

All engineering programs have very similar required pre-professional courses.

This allows the flexibility of selecting a major after one year of study. Other majors offered by the college have different required pre-professional courses appropriate to that major.

PROFESSIONAL PROGRAM

The professional program consists of various curricula offered at the junior and senior levels that are designed to prepare students for a professional career.

Each curriculum provides an opportunity for specialization through judicious selection of elective courses; however, to become fully versed in a specialty requires additional study at the graduate level.

ADMISSION REQUIREMENTS

Pre-professional Program

Admission to the pre-professional program requires that students meet general university admission requirements, as published in the *OSU General Catalog*. Students admitted to the pre-professional program are assigned to the department or school of their choice for advising and program planning.

Professional Program

Enrollment in professional program courses is restricted to those students who have clearly demonstrated an ability to achieve the high standards required for professional studies. It is limited in each curriculum by the number of students who can be served by the faculty and the facilities of that curriculum.

Students must apply to the College of Engineering for admission to the professional program prior to the start of their junior year. To apply, grades of C or better and a minimum of 2.25 cumulative GPA must be earned in required classes. Admission will require a higher GPA if the number of students applying exceeds a program's capacity.

Students who have completed their pre-professional studies at a college or university other than Oregon State University must apply both to the OSU Office of Admissions for admission to OSU and to the College of Engineering for admission to the professional program. Application links and information on policies and programs are available from the College of Engineering.

ENGINEERING SCIENCE

Each engineering curriculum includes a number of courses that are appropriate for all engineering students. Because of their commonality, these are called engineering science courses.

Engineering sciences have their roots in mathematics and basic science and serve as a bridge between science and engineering. They involve the application of scientific methods to practical engineering situations and lead to solu-

tions of problems that are fundamental in analysis, design, and synthesis.

"Sophomore standing in engineering" refers to a student registered in an accepted program, who has completed 45 credits (with minimum grades of C), including MTH 251, MTH 252, plus three additional science or mathematics courses listed in an engineering curriculum. Many engineering courses require sophomore standing in engineering as a prerequisite.

FOREST ENGINEERING

See College of Forestry. Also see College of Forestry for information on the **Forest Engineering-Civil Engineering** program.

GENERAL ENGINEERING

The first year of the general engineering curriculum meets the requirements of all other engineering curricula except bioengineering, chemical engineering, environmental engineering, and ecological engineering, which require a different chemistry sequence. Students who have not decided upon a major are encouraged to register in general engineering during their pre-professional studies.

Curriculum

The pre-general engineering curriculum below will prepare students to enter many of the engineering department or school programs. Students may transfer into another program at any time during the first year; they must transfer by the end of the year.

Pre-General Engineering (One-year Program)

First Year

Footnotes:

* Baccalaureate Core Course

^E Required for entry into the professional program.

¹ Must be selected to satisfy the requirements of the baccalaureate core.

COLLEGE OF ENGINEERING GRADING AND GPA REQUIREMENTS

- All technical, writing and communications courses must be taken for letter grades (A through F): C or better grades are passing.
- Pre-engineering students must have at least a 2.25 Pre-core GPA for admission to the professional program.
- Professional engineering students must have at least a 2.25 Pro-core GPA and a 2.25 institutional GPA for graduation.

The Pre- and Pro-core GPAs are computed based on AR 20 (only second grade used for repeated course). See the College of Engineering advising website for details.

SATISFACTORY ACADEMIC PROGRESS FOR PROFESSIONAL SCHOOL STUDENTS

A student in good academic standing satisfies university, college, and program academic requirements. The university may change a student's status to warning, probation, or suspension following guidelines contained in the Schedule of Classes. The College of Engineering has a similar, but independent, process for students in the professional program.

At the conclusion of each term, pro-core term and cumulative GPA are calculated and academic standings are determined for students according to the criteria outlined below. Students whose standings evidence a lack of satisfactory progress will be warned of this condition and advised to seek help from their academic advisors.

1. **Academic Warning:** Students with a term pro-core GPA below 2.25 and fewer than 10 credits of pro-core course work will be placed on academic warning. The student must meet with their academic program advisor before they will be allowed to register for subsequent terms.
2. **Academic Probation:** Students who have completed 10 or more credits of pro-core course work and have a cumulative pro-core GPA below 2.25 will be placed on academic probation. A registration hold ("dean's hold") will be placed on the student's account until the student meets with an academic program advisor. The student and academic program advisor will complete an academic success agreement.
3. **Academic Suspension:** Students who are on academic probation and fail to meet the terms of their academic success agreement will be placed on academic suspension. Students who are academically suspended are removed from the

professional program and are not allowed to take additional upper-division College of Engineering courses.

4. **Reinstatement to the College:** Suspended students may be reinstated to the professional program after one year, or completion of a minimum of 24 quarter credits of acceptable transferable college-level work at an accredited college or university, with a GPA of 2.5 or above. **These 24 credits must be pre-approved in writing by the program head advisor.** Students reinstated to the professional program who are subsequently suspended may only apply for reinstatement under the "one year" option.

Reinstatement requests from students will be considered by the College Committee on Reinstatement (CCR) made up of three College of Engineering head advisors, the director of undergraduate programs and the dean (or their designee). Reinstatement guidelines are available electronically in the College of Engineering Undergraduate Policy Manual.

GRADUATION REQUIREMENTS

To graduate with a baccalaureate degree in any of the engineering or computer science majors, a student must complete 180 credits; exceptions include programs in chemical, environmental, ecological, and bioengineering, which require 192 credits. In addition, students must have a minimum 2.25 institutional GPA and minimum 2.25 GPA in all professional core course work as defined in the respective major. A student must also meet all university degree requirements published each year in the printed and electronic "Academic Regulations and Procedures" section of the *Registration Information Handbook* and in the *General Catalog*.

INTERNATIONAL ENGINEERING MINOR

The International Engineering minor offers undergraduate engineering students an opportunity to certify their global competencies and demonstrate their understanding of the intercultural needs of modern engineers. By combining an engineering experience abroad, courses from a generalized global core, thematic elective courses, and the signature course for the minor, students may demonstrate their readiness for the increasingly global field of engineering.

Requirements

Global Core (9–12 credits)

Each course in the global core also satisfies a baccalaureate core requirement. Students may complete some of these courses to fulfill their baccalaureate core while also applying those credits to the

International Engineering minor if they choose.

- ANTH 210. *Comparative Cultures (3)
- ANTH 330. *Evolution of People, Technology, and Society (3)
- FW 325. *Global Crises in Resource Ecology (3)
- GEO 105. *Geography of the Non-Western World (3)
- PHL 205. *Ethics (4)
- PS 205. *Introduction to International Relations (4)

Engineering Abroad (0–6 credits)

Study Abroad
International Internship
Service Learning (e.g. EWB)

Thematic Electives (6–15 credits)

Courses related to the location of the abroad experience.

Signature Course (3 credits)

ENGR 399. Special Topics: Cultural Competencies for Engineering (3)

Upper-Division Credits

A minimum of 12 credits in any student's minor must be upper-division courses.

Total=27+

ENGINEERING COURSES

ENGR 111. ENGINEERING ORIENTATION I (3). Engineering as a profession, historical development, ethics, curricula and engineering careers. Introduction to problem analysis and solution, data collection, accuracy and variability. Lec/rec.

ENGR 112. INTRODUCTION TO ENGINEERING COMPUTING (3). Systematic approaches to engineering problem solving using computers. Logical analysis, flow charting, input/output design, introductory computer programming and use of engineering software. Lec/lab/rec.

ENGR 112H. INTRODUCTION TO ENGINEERING COMPUTING (3). Systematic approaches to engineering problem solving using computers. Logical analysis, flow charting, input/output design, introductory computer programming and use of engineering software. Lec/lab/rec.
PREREQS: Honors College approval required.

ENGR 199. SPECIAL TOPICS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

ENGR 201. ELECTRICAL FUNDAMENTALS I (3). Analysis of linear circuits. Circuit laws and theorems. DC responses of circuits. Operational amplifier characteristics and applications. Lec/lab.
PREREQS: ((MTH 251 or MTH 251H) and (MTH 252 or MTH 252H)) and sophomore standing in engineering.

ENGR 202. ELECTRICAL FUNDAMENTALS II (3). Sinusoidal steady-state analysis and phasors. Application of circuit analysis to solve single-phase and three-phase circuits including power, mutual inductance, transformers and passive filters. Lec/lab. **PREREQS:** ENGR 201

ENGR 202H. ELECTRICAL FUNDAMENTALS II (3). Sinusoidal steady-state analysis and phasors. Application of circuit analysis to solve single-phase and three-phase circuits including power, mutual inductance, transformers and passive filters. Lec/lab. **PREREQS:** ENGR 201 and Honors College approval required.

ENGR 203. ELECTRICAL FUNDAMENTALS III (3). Laplace and Fourier transforms, Fourier series, Bode plots, and their application to circuit analysis. Lec/lab. **PREREQS:** (ENGR 201 and (ENGR 202 or ENGR 202H) and (MTH 256 or MTH 256H)) and sophomore standing in engineering.

ENGR 211. STATICS (3). Analysis of forces induced in structures and machines by various types of loading. Lec/rec. **PREREQS:** (MTH 252 or MTH 252H) and sophomore standing in engineering.

ENGR 211H. STATICS (3). Analysis of forces induced in structures and machines by various types of loading. Lec/rec. **PREREQS:** (MTH 252 or MTH 252H) and sophomore standing in engineering. Honors College approval required.

ENGR 212. DYNAMICS (3). Kinematics, Newton's laws of motion, and work-energy and impulse-momentum relationships applied to engineering systems. Lec/rec. **PREREQS:** (ENGR 211 or ENGR 211H) and (PH 211 or PH 211H)

ENGR 212H. DYNAMICS (3). Kinematics, Newton's laws of motion, and work-energy and impulse-momentum relationships applied to engineering systems. Lec/rec. **PREREQS:** (ENGR 211 or ENGR 211H) and (PH 211 or PH 211H) and Honors College approval required.

ENGR 213. STRENGTH OF MATERIALS (3). Properties of structural materials; analysis of stress and deformation in axially loaded members, circular shafts, and beams, and in statically indeterminate systems containing these components. Lec/rec. **PREREQS:** (ENGR 211 or ENGR 211H)

ENGR 213H. STRENGTH OF MATERIALS (3). Properties of structural materials; analysis of stress and deformation in axially loaded members, circular shafts, and beams, and in statically indeterminate systems containing these components. Lec/rec. **PREREQS:** (ENGR 211 or ENGR 211H) and Honors College approval required.

ENGR 221. THE SCIENCE, ENGINEERING AND SOCIAL IMPACT OF NANOTECHNOLOGY (3). Nanotechnology is an emerging engineering field that manipulates atoms and molecules to fabricate new materials and tiny devices. Properties of nanostructured materials, manufacturing methods, characterization methods, and impact on health and safety. Benefits and concerns about nanotechnology will be assessed. Lec/rec. **CROSSLISTED** as MATS 221. **PREREQS:** One year of college science.

ENGR 231. UNDERSTANDING ENERGY (3). Provides a basic knowledge of how the many different types of energy, e.g. mechanical, thermal, chemical, nuclear, potential, kinetic, can be compared, how energy can be converted from one form into another for convenient use, storage, or transmission, and how to assess the validity of energy claims by scientists, engineers, manufacturers, marketers, and hucksters.

ENGR 248. ENGINEERING GRAPHICS AND 3-D MODELING (3). Introduction to graphical communication theory, including freehand sketching techniques, geometric construction, multi-view, pictorial, sectional and auxiliary view representation and dimensioning techniques. Practical application of theoretical concepts using solid modeling software to capture design intent and generate engineering drawings. Lec/Lab.

ENGR 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ENGR 299H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

ENGR 321. INTRODUCTION TO MATERIALS SCIENCE (4). Crystal structure, microstructure, and physical properties of metals, ceramics, polymers, composites, and amorphous materials. Also includes elementary mechanical behavior and phase equilibria. Lec. **CROSSLISTED** as MATS 321. **PREREQS:** (CH 202 or CH 222 or CH 224H or ((CH 232 or CH 232H) and (CH 262 or CH 262H or CH 272))

ENGR 321H. INTRODUCTION TO MATERIALS SCIENCE (4). Crystal structure, microstructure, and physical properties of metals, ceramics, polymers, composites, and amorphous materials. Also includes elementary mechanical behavior and phase equilibria. Lec. **CROSSLISTED** as MATS 321. **PREREQS:** (CH 202 or CH 222 or CH 224H or ((CH 232 or CH 232H) and (CH 262 or CH 262H or CH 272)) and Honors College approval required.

ENGR 322. MECHANICAL PROPERTIES OF MATERIALS (3). Mechanical behavior of materials, relating laboratory test results to material structure, and elements of mechanical analysis. Lec/lab. **CROSSLISTED** as MATS 322. **PREREQS:** ((ENGR 213 or ENGR 213H) and (ENGR 321 or ENGR 321H or MATS 321))

ENGR 350. *SUSTAINABLE ENGINEERING (3). Examination of technological innovations and alternatives required to maintain human quality of life and environmental sustainability. (Bacc Core Course)

ENGR 350H. *SUSTAINABLE ENGINEERING (3). Examination of technological innovations and alternatives required to maintain human quality of life and environmental sustainability. (Bacc Core Course) **PREREQS:** Honors College approval required.

ENGR 363. *ENERGY MATTERS (3). Establishes a basic energy vocabulary, applies the fundamental concepts of identifying energy use and determining efficiency, and studies the implications of energy decisions in the context of traditional, alternative, and sustainable energy resources. (Bacc Core Course) **PREREQS:** MTH 112 or higher

ENGR 363H. *ENERGY MATTERS (3). Establishes a basic energy vocabulary, applies the fundamental concepts of identifying energy and determining efficiency, and studies the implications of energy decisions in the context of traditional, alternative, and sustainable energy resources. (Bacc Core Course) **PREREQS:** MTH 112 or higher

ENGR 390. ENGINEERING ECONOMY (3). Time value of money; economic study techniques, depreciation, taxes, retirement, and replacement of engineering facilities. **PREREQS:** Sophomore standing in engineering.

ENGR 391. ENGINEERING ECONOMICS AND PROJECT MANAGEMENT (3). Critical issues in the management of engineering and high-technology projects are discussed. Economic, time, and performance parameters of engineering projects are analyzed from the organizational and resource perspectives. Network optimization and simulation concepts are introduced. Fundamental engineering economics concepts are introduced and applied to planning and managing projects. **PREREQS:** Sophomore standing in engineering.

ENGR 391H. ENGINEERING ECONOMICS AND PROJECT MANAGEMENT (3). Critical issues in the management of engineering and high-technology projects are discussed. Economic, time, and performance parameters of engineering projects are analyzed from the organizational and resource perspectives. Network optimization and simulation concepts are introduced. Fundamental engineering economics concepts are introduced and applied to planning and managing projects. **PREREQS:** Sophomore standing in engineering. Honors College approval required.

ENGR 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ENGR 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

ENGR 407. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

ENGR 407H. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

ENGR 421. APPLIED ROBOTICS (4). Multidisciplinary teams of students design, build, and demonstrate a robotic system, including all sensing, computation, and actuation. The specific task, such as checkers-playing robots, changes each year, and is designed to be challenging for ambitious students. Robots will compete in a friendly competition at the end of the term. Lec/lab. **PREREQS:** College of Engineering students (pro-school or graduate students) or approval of instructor.

ENGR 440. MODERN ELECTRONICS MANUFACTURING (4). Engineering methods applied to electronics manufacturing. Wafer, semiconductor, printed circuit board, surface mount assembly. Quality systems, environmental stewardship, supply chain management, production and economic analysis. Lec/lab. **PREREQS:** ST 314 or equivalent

ENGR 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ENGR 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

ENGR 521. APPLIED ROBOTICS (4). Multidisciplinary teams of students design, build, and demonstrate a robotic system, including all sensing, computation, and actuation. The specific task, such as checkers-playing robots, changes each year, and is designed to be challenging for ambitious students. Robots will compete in a friendly competition at the end of the term. Lec/lab. **PREREQS:** College of Engineering students (pro-school or graduate students) or approval of instructor.

ENGR 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BIOLOGICAL AND ECOLOGICAL ENGINEERING

FACULTY

Professors Bolte, Cuenca¹, English¹,
Godwin, Selker
Associate Professors Bachelet,
Chaplen¹, Ely¹, Liu, Murthy, Tullos
Assistant Professors Fan, Guzy,
Higgins, Vache

¹Licensed Professional Engineer.

Undergraduate Major

Ecological Engineering (BS, CRED, HBS)

Undergraduate Minor

Irrigation Engineering

Graduate Major

Biological and Ecological Engineering
(MEng, MS, PhD)

Graduate Areas of Concentration

Bio-based Products and Fuels
Biological Systems Analysis
Bioprocessing
Ecosystems Analysis and Modeling
Water Quality
Water Resources

Graduate Minor

Biological and Ecological Engineering

The Department of Biological and Ecological Engineering at OSU is involved in teaching, research and extended education relevant to the application of engineering analysis to biological, ecological and hydrological systems. The department has strength in graduate training and research and offers both an MS and PhD degree in Biological and Ecological Engineering. The graduate degree program is focused on the professional development of engineers and the analysis of environmental systems, hydrology and water resources. Activities within the department include water resource analysis, fate and transport of biologically relevant chemicals, bioreactor design and analysis, watershed analysis and resource management, simulation modeling of ecological and biological systems, regional and global hydrology, geographical information systems for environmental modeling, and the development of bio-based products and fuels.

ECOLOGICAL ENGINEERING (BS, CRED, HBS)

Ecological engineering is the design of sustainable systems consistent with ecological principles that integrate human activities into the natural environment to the benefit of both. This approach emphasizes diversity, resilience and adaptation to maintain sustainability. Ecological engineering deals with both fundamental processes and engineering applications on scales that range from microscopic to watersheds and beyond. This discipline is rapidly developing as an important new area of engineering based on the science of ecological systems, with a number of dedicated journals, national and international professional societies, and new application areas emerging over the last decade. The Biological and Ecological Engineering Department at OSU has considerable expertise in this area and is among the national leaders in this discipline.

The Bachelor of Science degree in Ecological Engineering (EcoE) program is the first of its kind nationally, reflecting Oregon's leadership in this new and exciting multidisciplinary field. The curriculum is divided into an ecological engineering core and a set of option tracks. The ecological engineering core contains the introductory and upper-division course work that provides the common engineering and scientific basis for our students. The core consists of pre-professional courses, baccalaureate core requirements, upper-division engineering courses; and EcoE undergraduate program required science courses.

The program has three tracks:

- Ecosystems Forensics
- Ecosystems Restoration
- Water Resources

Graduates with an Ecological Engineering degree will work to optimize the interface between humankind and the environment. Specific activities undertaken might include riparian restoration, optimizing sensor arrays for ecological monitoring, improving agricultural water quality, mitigating toxic materials migration from landfills, developing sustainable industrial systems (agricultural and otherwise), developing closed systems for space travel, or dealing with issues associated with global climate change. Oregon State University has strong programs in many of the basic and engineering sciences that underpin the Ecological Engineering degree program.

Graduates with an ecological engineering skill set may find employment with industrial clients, engineering consulting companies, governmental agencies, and entrepreneurial start-ups.

Core Requirements

Pre-Professional Courses (87 credits)

(Pre-Ecological Engineering, major code 654)

BEE 101 Ecological Engineering I (3)
BEE 102. Ecological Engineering II (3)
CH 231. *General Chemistry (4)
and CH 261. *Laboratory for Chemistry 231 (1)
COMM 111. *Public Speaking (3)
or COMM 114. *Argument and Critical Discourse (3)
ENGR 211. Statics (3)
ENGR 213. Strength of Materials (3)
ENGR 320. Biosystems Analysis and Modeling (3)
ENGR 390. Engineering Economy (3)
HHS 231. *Lifetime Fitness for Health (2)
and HHS 241–248. *Lifetime Fitness (various activities) (1)
or any PAC course (1–2)
MTH 251. *Differential Calculus (4)
MTH 252. Integral Calculus (4)
MTH 254. Vector Calculus I (4)
MTH 256. Applied Differential Equations (4)
MTH 306. Matrix and Power Series Methods (4)
PH 211, PH 212, PH 213. *General Physics with Calculus (4,4,4)
ST 421/ST 521. Introduction to Mathematical Statistics (4)
WR 121. *English Composition (3)
WR 327. *Technical Writing (3)
Cultural Diversity (3)
Difference, Power, and Discrimination (3)
Literature and the Arts (3)
Social Processes and Institutions (3)
Western Culture (3)

Professional Courses (73 credits)

BEE 320. Biosystems Analysis and Modeling (4)
BEE 322. Thermodynamics and Transfer Processes (4)
BEE 429. Biosystems Modeling Techniques (3)
BEE 461. Ecological Engineering Lab (3)
BEE 469. ^Ecological Engineering Design I (4)
BEE 470. Ecological Engineering Design II (4)
BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)
BI 301. *Human Impacts on Ecosystems (3)
BI 370. Ecology (3)
CE 311. Fluid Mechanics (4)
CE 313. Hydraulic Engineering (4)
CE 412. Hydrology (4)
CH 232, CH 233. *General Chemistry (4,4) and CH 262, CH 263. *Laboratory for Chemistry 232, 233 (1,1)
CSS 305. Principles of Soil Science (4)
[Taught at EOU LaGrande campus only.]
or SOIL 205. *Soil Science (4)
ENGR 350. *Sustainable Engineering (3)
FW 456/556. Limnology (5)

Tracks**Ecosystems Forensics Track****(Select 33 credits from below):**

AREC 351. *Natural Resource Economics and Policy (3)
 AREC 432. Environmental Law (4)
 CE 372. Geotechnical Engineering I (3)
 CE 413. GIS in Water Resources (3)
 CH 331, CH 332. Organic Chemistry (4,4)
 CH 390. Environmental Chemistry (3)
 CSS/SOIL 455. Biology of Soil Ecosystems (4)
 ENVE 321. Environmental Engineering Fundamentals (4)
 ENVE 421. Water and Wastewater Characterization (4)
 ENVE 422. Environmental Engineering Design (4)
 ENVE 431. Fate and Transport Chemicals Environmental Systems (4)
 FE 315. Soil Engineering (4)
 FE 430. Watershed Processes (4)
 FES/FW 445. Ecological Restoration (4)

 OC 440. Introduction to Biological Oceanography (3)
 RNG 341. Rangeland Ecology and Management (3)
 RNG 355. Desert Watershed Management (3)
 RNG 421. Wildland Restoration and Ecology (4)
 RNG 455. Riparian Ecology and Management (3)
 ST 422. Introduction to Mathematical Statistics (4)
 Z 477. Aquatic Entomology (4)

Total Credits for EcoE Degree=192**Baccalaureate Core Course Options****Suggested Cultural Diversity Courses:**

ANTH 210. *Comparative Cultures (3)
 ES 101. *Introduction to Ethnic Studies (3)
 GEO 105. *Geography of the Non-western World (3)
 PHL 160. *Quests for Meaning: World Religions (4)
 WGSS 280. *Women Worldwide (3)

Suggested Difference, Power, and Discrimination Courses:

AG 301. *Ecosystem Science of Pacific NW Indians (3)
 FW 340. *Multicultural Perspectives in Natural Resources (3)
 GEO 309. *Environmental Justice (3)
 PHL 280. *Ethics of Diversity (4)
 SOC 206. *Social Problems and Issues (3)
 SOC 360. *Population Trends and Policy (4)
 SOC 426. *Social Inequality (4)
 WGSS 223. *Women: Self, and Society (3)
 WGSS 224. *Women: Personal and Social Change (3)

Suggested Social Processes and Institutions Courses:

AREC 250. *Introduction to Environmental Economics and Policy (3)
 ECON 201. *Introduction to Microeconomics (3)
 PS 201. *Introduction to United States Government and Politics (4)

PS 204. *Introduction to Comparative Politics (4)
 PSY 201. *General Psychology (3)
 PSY 202. *General Psychology (3)
 SOC 204. *Introduction to Sociology (3)
 SOC 205. *Institutions and Social Change (3)

Suggested Western Culture Courses:

AREC 253. *Environmental Law, Policy, and Economics (4)
 PHL 201. *Introduction to Philosophy (4)
 PHL 205. *Ethics (4)
 PHL 207. *Political Philosophy (4)
 PHL 251. *Knowers, Knowing, and the Known (4)
 PS 206. *Introduction to Political Thought (4)

IRRIGATION ENGINEERING MINOR

The Irrigation Engineering minor is available to any undergraduate student accepted into the professional engineering program. It exposes engineering students to agricultural, biological, and engineering sciences needed to specialize in agricultural and food-related industries.

Engineering (17)**Required**

BEE 433. Irrigation System Design (4)
 CE 311. Fluid Mechanics (4)
 CE 313. Hydraulic Engineering (4)

Electives

BEE 529. Biosystems Modeling Techniques (3)
 CE 412. Hydrology (4)
 CE 417. Hydraulic Engineering Design (4)
 ST 314. Introduction to Statistics for Engineers (3)

Science (13)**Required**

CSS 200. Crop Science Basics (3)
 CSS 305. Principles of Soil Science (4) [Taught at EOU La Grande campus only.] or SOIL 205. *Principles of Soil Science (4)
 CSS 306. Problem Solving: Soil Science Applications (1)[Taught at EOU La Grande campus only.]

 BOT 331. Plant Physiology (5)
 MB 230. *Introductory Microbiology (4)

Total=30**BIOLOGICAL AND ECOLOGICAL ENGINEERING (MEng, MS, PhD)****Graduate Areas of Concentration**

Bio-based products and fuels, bioprocessing, biological systems analysis, ecosystems analysis and modeling, water quality, water resources

The Department of Biological and Ecological Engineering offers graduate programs leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees.

The Biological and Ecological Engineering program serves at the interface of life sciences and engineering. Biore-source engineering is the application of engineering and life science principles

and problem-solving techniques to the optimum use and sustainability of biological resources. The curriculum is engineering-based with strong emphasis on the life sciences. Courses focus on biological systems modeling, bioprocess engineering, thermophysical and molecular properties of biological materials, regional hydrologic analysis, groundwater systems, irrigation and water resource optimization. The department concentrates its research effort on two major thrusts: bioprocess engineering and water resources engineering. Specific research topics include biosensors, molecular-level biosystems analysis, nanosensors, microbial fuel cells, biological hydrogen production, and bio-based products and fuels. Research topics in water resources engineering include constructed wetland treatment systems, crop growth modeling, optimum irrigation management, crop-water requirements, groundwater and subsurface contaminant transport, hydrologic modeling, agricultural and ecological systems analysis, geographical information systems, artificial intelligence technologies, livestock production odor control, livestock waste treatment, and non-point source water pollution control.

For more information write: John P. Bolte, Head, Department of Biological and Ecological Engineering, OSU, Corvallis, OR 97331-3906.

BIOLOGICAL AND ECOLOGICAL ENGINEERING GRADUATE MINOR

For more details, see the departmental advisor.

COURSES

BEE 101. ECOLOGICAL ENGINEERING I (3). Introduction to engineering at OSU and the emerging field of ecological engineering. Topics include engineering analysis and problem solving, professional ethics, the design process and teamwork.

BEE 102. ECOLOGICAL ENGINEERING II (3). Introduction to common problems and solutions in ecological engineering, emphasizing the multiplicity of approaches to constraining, analyzing, and resolving challenges of ecosystem management. Two overnight field trips to local ecological monitoring and engineering sites will be required.

BEE 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BEE 221. FUNDAMENTALS OF ECOLOGICAL ENGINEERING (3). Introduction to the concepts and practice of ecological engineering including characteristics, classification, and modeling of ecosystems; ecosystem protection; and sustainable uses of ecosystems, including treatment wetlands, land treatment systems, and ecologically sensitive stormwater management, to meet the needs of human societies. **PREREQS:** One year of college biology and chemistry and MTH 256 or instructor approval required.

BEE 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BEE 311. ECOLOGICAL FLUID MECHANICS (4). Fluid properties, fluid statics, fluid motion,

conservation of mass, momentum and energy for incompressible fluids, dimensional analysis, ecological engineering applications. Lec/rec. **PREREQS:** Consent of instructor.

BEE 320. BIOSYSTEMS ANALYSIS AND MODELING (4). An introduction to simulation modeling and analysis of a variety of biological and ecological systems. Systems approaches to describing ecological systems. **PREREQS:** MTH 256 and consent of instructor.

BEE 322. ECOLOGICAL ENGINEERING THERMODYNAMICS AND TRANSFER PROCESS (4). A study of the transport processes of fluid flow, heat transfer and mass transfer applied to biological organisms and ecological systems. **PREREQS:** BEE 320

BEE 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BEE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

BEE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

BEE 407. SEMINAR (1-16). Departmental seminars. Graded P/N. This course is repeatable for a maximum of 16 credits.

BEE 407H. SEMINAR (1-16). Departmental seminars. Graded P/N. This course is repeatable for a maximum of 16 credits.

BEE 410. ECOLOGICAL ENGINEERING INTERNSHIP (1-12). Internship in ecological engineering to provide students with an opportunity to apply course work and theory to the real world. Requires internship opportunity identification by student. Graded P/N. This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

BEE 411. GLOBAL ENVIRONMENTAL CHANGE: USING DATA TO INFORM DECISIONS (3). Empowers students interested in global change research to focus on the interactions between changes in human land use and climate. Using an innovative online data and mapping tool called Data Basin, students will explore topics accessing the highest quality datasets available in an all-in-one platform.

BEE 415. PROFESSIONAL DEVELOPMENT (1). Preparation for student professional careers. Students will interact with and hear seminars from professionals working in the ecological engineering field to learn from their experiences. **PREREQS:** Junior or senior standing.

BEE 433. IRRIGATION SYSTEM DESIGN (4). Principles of soil physics and plant water use applied to irrigation system design. Design of gravity, pressurized, and trickle irrigation systems, improving on-farm water management, performance characteristics of pumps and other irrigation equipment. Lec/lab. Offered alternate years.

BEE 439. IRRIGATION PRINCIPLES AND PRACTICES (4). Survey of irrigation systems, system configurations, factors that influence irrigation efficiency, crop water requirements, energy requirements, pumps, irrigation scheduling. For non-engineers. Lec/lab/rec. **PREREQS:** MTH 111

BEE 446. RIVER ENGINEERING (4). Multipurpose river use; natural physical processes in alluvial rivers; channel modification practices; river structures; design practices; impact of river modification; problem analysis; and impact minimization. Offered alternate years. **PREREQS:** CE 313

BEE 453. INTRODUCTION TO PROCESS ENGINEERING DESIGN (4). An integrated lecture/laboratory course focused on process engineering design and scale-up for scientists. Applies fundamental principles from BEE 452/BEE 552. Directed at food scientists and other majors

who need or would like a working knowledge of applied process engineering design. Lec/lab. **PREREQS:** (BEE 452 or BEE 552) and ST 351 and instructor consent.

BEE 458. NONPOINT SOURCE POLLUTION ASSESSMENT AND CONTROL (3). Problem solving in nonpoint source pollution. Methods for evaluating the extent, rate, timing, and fate of Non-Point Source (NPS) pollutants in agricultural and urban environments.

BEE 461. ECOLOGICAL ENGINEERING LABORATORY (3). Introduction to modern measurement methods for ecological applications, includes sensors and systems for measuring soil, water and atmospheric properties. Lec/lab. **PREREQS:** One year college physics.

BEE 468. BIOREMEDIATION ENGINEERING (3). Examines strategies for using a variety of biological processes for treating municipal, agricultural and industrial contaminants. **PREREQS:** MTH 251 and professional school or graduate standing.

BEE 469. ^ ECOLOGICAL ENGINEERING DESIGN I (4). Engineering design processes for ecological engineering applications, including specifications, performance criteria, timelines, and project logistics, principles and practices of working in engineering teams. (Writing Intensive Course) **PREREQS:** BEE 322 and (ENGR 391 or ENGR 391H), senior standing or consent of instructor.

BEE 470. ECOLOGICAL ENGINEERING DESIGN II (4). Engineering design processes for ecological engineering applications, including specifications, performance criteria, timelines, and project logistics, principles and practices of working in engineering teams.

BEE 472. INTRODUCTION TO FOOD ENGINEERING PRINCIPLES (5). Fundamental engineering principles for scientists and non-process engineers. Topics include fluid flow, mass and energy transfer, and material and energy balances. Directed at food scientists and other majors who need or would like a working knowledge of food engineering principles. **PREREQS:** (MTH 241 or MTH 251) and PH 201 or instructor consent.

BEE 473. INTRODUCTION TO FOOD ENGINEERING PROCESS DESIGN (3). Fundamental engineering process design principles for food scientists and non-process engineers. Directed at those who need or would like a working knowledge of applied food engineering process design. Lec/rec. **PREREQS:** (BEE 472 or BEE 572) and consent of instructor.

BEE 480. BIOPRODUCT ENGINEERING (3). Introduction to production of bioethanol, biodiesel, natural fibers and other high value products from renewable resources. Bioprocess systems, system components, bioseparation, purification, and byproduct analysis will be covered.

BEE 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BEE 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

BEE 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

BEE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

BEE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

BEE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

BEE 507. SEMINAR (1). Section 1: Graduate Student Orientation Seminar to acquaint new graduate students with graduate school and departmental requirements, policies and expectations, and departmental research

programs. Section 2: Graduate Research Publication Seminar to expose students to requirements for successful proposals and publication of research results. Section 3: Oral Presentation Improvement--A highly participatory educational effort designed to improve performance in presenting research reports, technical papers and in responding to oral examination questions. Graded P/N. This course is repeatable for a maximum of 99 credits.

BEE 511. GLOBAL ENVIRONMENTAL CHANGE: USING DATA TO INFORM DECISIONS (3). Empowers students interested in global change research to focus on the interactions between changes in human land use and climate. Using an innovative online data and mapping tool called Data Basin, students will explore topics accessing the highest quality datasets available in an all-in-one platform.

BEE 512. PHYSICAL HYDROLOGY (3). Principles of hydrologic processes and the integration of these processes into the hydrologic cycle. Topics include atmospheric processes, precipitation and runoff, storm response in streamflow on a watershed scale, and major concepts in groundwater systems. **PREREQS:** One year of calculus.

BEE 514. GROUNDWATER HYDRAULICS (3). Principles of groundwater flow and chemical transport in confined and unconfined aquifers, aquifer testing and well construction. Design and dewatering and contaminant recovery systems, properties of aquifers. **CROSSLISTED** as CE 514 and GEO 514. **PREREQS:** MTH 252

BEE 525. STOCHASTIC HYDROLOGY (3). Study the elements of randomness embedded in the hydrological processes with emphasis on time series analysis, stationarity, periodic/trend component, stochastic component, time series synthesis, ARMA model, spatial sampling and scale variability. Offered alternate years. **PREREQS:** BEE 512

BEE 529. BIOSYSTEMS MODELING TECHNIQUES (3). Development of mathematical models of biological and ecological systems; linear and nonlinear systems analysis; stochastic modeling and random processes; model solution and analysis techniques.

BEE 533. IRRIGATION SYSTEM DESIGN (4). Principles of soil and plant water use applied to irrigation system design. Design of gravity, pressurized, and trickle irrigation systems, improving on-farm water management, performance characteristics of pumps and other irrigation equipment. Lec/lab. Offered alternate years. **PREREQS:** ENGR 332

BEE 542. VADOSE ZONE TRANSPORT (4). Introduction to the physical and hydraulic properties involved in flow from the soil surface to groundwater. Classical infiltration equations will be derived and presented with exact and approximate solutions. Attention is focused on application to pollutant transport and recent advances in non-ideal flow. **PREREQS:** MTH 254

BEE 544. OPEN CHANNEL HYDRAULICS (4). Steady, uniform, and nonuniform flow in natural and artificial open channels; unsteady flow; interaction of flow with river structures; and computational methods. Offered alternate years. **PREREQS:** CE 313

BEE 545. SEDIMENT TRANSPORT (4). Principles of sediment erosion, transportation and deposition in rivers, reservoirs, and estuaries; measurement, analysis, and computational techniques. Offered alternate years. **PREREQS:** CE 313

BEE 546. RIVER ENGINEERING (4). Multipurpose river use; natural physical processes in alluvial rivers; channel modification practices; river structures; design practices; impact of river modification; problem analysis; and impact minimization. Offered alternate years. **PREREQS:** CE 313

BEE 549. REGIONAL HYDROLOGIC MODELING (3). Challenges in regional-scale water resource analysis and management with emphasis on application to production agriculture. Application of geostatistical techniques to spatially variable systems and remote sensing to large-scale water resource systems. Development of soil-water-atmosphere-plant models. Analysis of evapotranspiration estimating methods. Offered alternate years. **PREREQS:** BEE 512 and MTH 256

BEE 553. INTRODUCTION TO PROCESS ENGINEERING DESIGN (4). An integrated lecture/laboratory course focused on process engineering design and scale-up for scientists. Applies fundamental principles from BEE 452/BEE 552. Directed at food scientists and other majors who need or would like a working knowledge of applied process engineering design. Lec/lab. **PREREQS:** (BEE 452 or BEE 552) and ST 351 and instructor consent.

BEE 558. NONPOINT SOURCE POLLUTION ASSESSMENT AND CONTROL (3). Problem solving in nonpoint source pollution. Methods for evaluating the extent, rate, timing, and fate of Non-Point Source (NPS) pollutants in agricultural and urban environments.

BEE 561. ECOLOGICAL ENGINEERING LABORATORY (3). Introduction to modern measurement methods for ecological applications, includes sensors and systems for measuring soil, water and atmospheric properties. Lec/lab. **PREREQS:** One year college physics.

BEE 568. BIOREMEDIATION ENGINEERING (3). Examines strategies for using a variety of biological processes for treating municipal, agricultural and industrial contaminants. **PREREQS:** MTH 251 and professional school or graduate standing.

BEE 572. INTRODUCTION TO FOOD ENGINEERING PRINCIPLES (5). Fundamental engineering principles for scientists and non-process engineers. Topics include fluid flow, mass and energy transfer, and material and energy balances. Directed at food scientists and other majors who need or would like a working knowledge of process engineering principles. **PREREQS:** (MTH 241 or MTH 251) and PH 201 or instructor consent.

BEE 573. INTRODUCTION TO FOOD ENGINEERING PROCESS DESIGN (3). Fundamental engineering process design principles for food scientists and non-process engineers. Directed at those who need or would like a working knowledge of applied food engineering process design. Lec/rec. **PREREQS:** (BEE 472 or BEE 572) and consent of instructor.

BEE 580. BIOPRODUCT ENGINEERING (3). Introduction to production of bioethanol, biodiesel, natural fibers and other high value products from biorenewable resources. Bioprocess systems, system components, bioseparation, purification, and byproduct analysis will be covered.

BEE 585. METABOLIC ENGINEERING (3). Mathematical and experimental techniques for quantitative descriptions of microbial bioreaction processes and an introduction to the principles and methodologies of metabolic engineering. **PREREQS:** Differential equations and linear algebra and biochemistry.

BEE 590. BIOPROCESS CONTROL SYSTEMS (3). Analysis and control of biological and biochemical systems. Stability, observability, controllability, pole-placement methods. Introduction to optimal control and feed back systems. **PREREQS:** MTH 251 and MTH 306 and BEE 571 or equivalent.

BEE 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BEE 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

BEE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

BEE 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

BEE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

BEE 607. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

BEE 690. ADVANCED BIOPRODUCTS SYSTEMS-FEEDSTOCKS (1). Issues involved in selection of feedstocks based on suitability, availability, sustainability and economic potential. Technologies for bioprocessing for fuels and chemical feedstocks.

BEE 691. MICROBIAL FUEL CELLS (2). Fundamentals of microbial fuel cells. MFC reactor configuration. Potential applications of MFC. Comparison with other H₂ generation technologies.

BEE 693. ADVANCED BIOPRODUCTS SYSTEMS-ETHANOL PRODUCTION (2). Overview of ethanol production from bioproducts. Fermentation technologies for ethanol production. Fermentation of starch-based and lignocellulosic feedstocks.

BEE 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS

Radiation Health Physics

The Department of Nuclear Engineering and Radiation Health Physics at Oregon State University offers BS, MEng, MS, and PhD degrees in Nuclear Engineering. In addition, it offers a BS, MS, MHP (Master of Health Physics) degrees in Radiation Health Physics and an MMP (Master of Medical Physics), MS, and PhD in Medical Physics. The BS in Radiation Health Physics degree may also be taken as a premedical track.

Excellent facilities are available for the instructional and research programs at the Radiation Center, including a TRIGA Mark II nuclear reactor and the AP-600 1/4 scale test facility. Instruction is integrated with an extensive research program, with opportunities to participate at both the undergraduate and graduate levels.

The mission of the Department of Nuclear Engineering and Radiation Health Physics is to educate students to become nuclear engineers and health physicists with the ability to achieve the highest standards of the profession and to support the needs of industry, government, and the nation.

The nuclear engineering undergraduate program objectives are:

1. To produce graduates with a high level of competency in the nuclear engineering core curriculum.
2. To produce graduates with a high level of competency in engineering and science.
3. To produce graduates that can work effectively in both individual and team environments.
4. To produce graduates with effective communication skills.
5. To produce graduates with a high regard for their profession and their responsibility to lifelong learning.

The objectives of the nuclear engineering and radiation health physics undergraduate curricula are to prepare students for careers related to the many beneficial uses of nuclear technology and energy. Nuclear engineers apply scientific principles to the research, design, and operation of a wide variety of nuclear

technology applications including power generation, medicine, and radioactive waste management. Radiation health physicists study methods used to protect people and their environment from radiation hazards while enabling the beneficial uses of radiation and radioactive materials. In addition, emphasis is provided in nuclear instrumentation, nuclear systems and materials, radiation protection, reactor analysis and nuclear power economics and, particularly, safety and regulation in nuclear operations.

The Department of Nuclear Engineering and Radiation Health Physics aims to educate students majoring in radiation health physics to become radiation health physicists with the ability to achieve the highest standards of the profession and to support the needs of industry, government, and the nation.

The radiation health physics undergraduate program objectives are:

1. To produce graduates with a high level of competency in the radiation health physics core curriculum.
2. To produce graduates with a high level of competency in the biological and physical sciences.
3. To produce graduates who can work effectively in both individual and team environments.
4. To produce graduates with effective communication skills.
5. To produce graduates with a high regard for their profession and their responsibility to lifelong learning.

Radiation health physics is a specialized program in the Department of Nuclear Engineering and Radiation Health Physics for students with a professional interest in the field of radiation protection, also known as health physics. It involves an integrated study of the physical aspects of ionizing and nonionizing radiation, their biological effects, and the methods used to protect people and their environment from radiation hazards while still enabling the beneficial uses of radiation and radioactive material.

PRE-MED OPTION

Students in radiation health physics can also pursue a pre-med option in which they fulfill the requirements for the BS in Radiation Health Physics degree, as well as the course work expected for entrance into most medical schools.

CERTIFIED HEALTH PHYSICIST

Students completing the Radiation Health Physics degree will be eligible to take Part I of the Certified Health Physicist (CHP) Examination of the American Board of Health Physics after one year of applied health physics practice. After six years of responsible professional experience in health physics, graduates will be eligible to take Part II of the CHP examination.

UNDERGRADUATE MAJORS WITH OPTIONS**NUCLEAR ENGINEERING (BS, CRED, HBS)**

The objectives of the nuclear engineering and radiation health physics undergraduate curricula are to prepare students for careers related to the many beneficial uses of nuclear technology and energy. Nuclear engineers apply scientific principles to the research, design, and operation of a wide variety of nuclear technology applications including power generation, medicine, and radioactive waste management. Radiation health physicists study methods used to protect people and their environment from radiation hazards while enabling the beneficial uses of radiation and radioactive materials. In addition, emphasis is provided in nuclear instrumentation, nuclear systems and materials, radiation protection, reactor analysis and nuclear power economics and, particularly, safety and regulation in nuclear operations.

GRADUATE MAJORS

MEDICAL PHYSICS (MMP, MS, PhD)

Graduate Areas of Concentration *Medical health physics, therapeutic radiologic physics*

The programs consist of a minimum of 45 credits, 39 of which must be didactic. The following courses are required and the remaining credits can be compiled of any 500- or 600-level course taught in the department or from outside the department if approved by an advisor. A comprehensive oral exam must be passed to complete the degree. MS students, in addition to the exam, must present their work to a committee of graduate faculty.

NUCLEAR ENGINEERING (MEng, MS, PhD)

Graduate Areas of Concentration

Application of nuclear techniques, arms control technology, nuclear instrumentation and applications, nuclear medicine, nuclear power generation, nuclear reactor engineering, nuclear systems design and modeling, nuclear waste management, numerical methods for reactor analysis, radiation shielding, radioisotope production, space nuclear power, thermal hydraulics

The Department of Nuclear Engineering and Radiation Health Physics offers graduate work leading toward the Master of Engineering, Master of Science, and Doctor of Philosophy degrees in Nuclear Engineering, Master of Science, Master of Health Physics, and Doctor of Philosophy degrees in Radiation Health Physics, and Master of Medical Physics, Master of Science, and Doctor of Philosophy in Medical Physics.

The nuclear engineering and radiation health physics graduate degree programs are designed to prepare students for careers involved with the many beneficial applications of nuclear energy, radiation, and radioactive materials. The nuclear engineering and radiation health physics professions are essential to society's well-being since they enable significant public benefits through energy security, national defense, medical health, and industrial competitiveness.

In nuclear engineering particular attention is directed toward application of scientific principles to the safe design and operation of nuclear installations. In addition, emphasis is provided in system safety and thermal hydraulic testing, high performance computa-

tional methods development, nuclear instrumentation, nuclear systems and materials, radiation protection, reactor analysis, nuclear power economics, and the regulation of nuclear operations.

Competitive fellowships and research and teaching assistantships are available to incoming graduate students. The U.S. Department of Energy and National Academy for Nuclear Training support a number of fellowship programs each year. Oregon State University is one of eight participating universities in the U.S. where students may attend graduate school on the Nuclear Engineering, Health Physics, and Applied Health Physics fellowships sponsored by the U.S. Department of Energy. Each year the National Academy for Nuclear Training also supports fellowships for students entering nuclear engineering and radiation health physics at OSU. Research and teaching assistant opportunities are also available for students to support the educational and research programs conducted by the department.

World-class facilities are available for the instructional and research programs of the department. These are housed in the OSU Radiation Center and include a TRIGA Mark II nuclear reactor, the Advanced Thermal Hydraulic Research Laboratory, the APEX nuclear safety scaled testing facility, and laboratories specially designed to accommodate radiation and the use of radioactive materials.

For more information, visit the department's website at <http://ne.oregonstate.edu/>.

RADIATION HEALTH PHYSICS (MA, MHP, MS, PhD)

Graduate Areas of Concentration

Application of nuclear techniques, boron neutron capture therapy, emergency response planning, environmental monitoring, environmental pathways assessment, nuclear medicine, radiation detection and instrumentation, radiation dosimetry, radiation shielding, radioactive material transport, radioactive waste management, research reactor health physics, risk assessment

The Department of Nuclear Engineering and Radiation Health Physics offers graduate work leading toward the Master of Engineering, Master of Science, and Doctor of Philosophy degrees in Nuclear Engineering and Master of Health Physics (MHP), Master of Science, and Doctor of Philosophy degrees in Radiation Health Physics.

The nuclear engineering and radiation health physics graduate degree programs are designed to prepare students for careers involved with the many beneficial applications of nuclear energy, radiation, and radioactive materials. The nuclear engineering and radiation health physics professions are essential to society's

well-being since they enable significant public benefits through energy security, national defense, medical health, and industrial competitiveness.

The radiation health physics graduate curricula and research programs are designed for students with professional interests in the field of radiation protection. This specialized field involves an integrated study of the physical aspects of ionizing and nonionizing radiation, their biological effects, and the methods used to protect people and their environment from radiation hazards while still enabling the beneficial uses of radiation and radioactive materials.

Competitive fellowships and research and teaching assistantships are available to incoming graduate students. The U.S. Department of Energy and National Academy for Nuclear Training support a number of fellowship programs each year. Oregon State University is one of eight participating universities in the U.S. where students may attend graduate school on the Nuclear Engineering, Health Physics, and Applied Health Physics fellowships sponsored by the U.S. Department of Energy. Each year the National Academy for Nuclear Training also supports fellowships for students entering nuclear engineering and radiation health physics at OSU. Research and teaching assistant opportunities are also available for students to support the educational and research programs conducted by the department.

World-class facilities are available for the instructional and research programs of the department. These are housed in the OSU Radiation Center and include a TRIGA Mark II nuclear reactor, the Advanced Thermal Hydraulic Research Laboratory, the APEX nuclear safety scaled testing facility, and laboratories specially designed to accommodate radiation and the use of radioactive materials.

For more details, see the departmental advisor.

■ MEDICAL PHYSICS COURSES

MP 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 99 credits.

MP 503. THESIS/DISSERTATION (1-16). This course is repeatable for a maximum of 999 credits.

MP 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

MP 506. SPECIAL PROBLEMS/SPECIAL PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

MP 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

MP 510. INTERNSHIP/WORK EXPERIENCE (1-16). This course is repeatable for a maximum of 16 credits.

MP 517. RADIONUCLIDES IN LIFE SCIENCES (4). Chemistry of actinides and fission products, radioseparations, selected medical generators, radiolabeling of organic molecules. Designed for majors in medical physics, radiation health physics, chemistry, pharmacy. CROSSLISTED as RHP 517. **PREREQS:** ((RHP 531 or NE 531) and RHP 536)

MP 531. RADIOPHYSICS (3). Expands students' understanding of concepts and applications of atomic and nuclear physics to enable their continued study in nuclear engineering and health physics. Includes fundamental concepts of nuclear and atomic physics, atomic and nuclear shell structure, radioactive decay, radiation interactions, radiation biology, and characteristics of fission. CROSSLISTED as NE 531 and RHP 531. **PREREQS:** Graduate standing.

MP 535. RADIATION SHIELDING AND EXTERNAL DOSIMETRY (4). Theoretical principles of shielding for neutron and gamma radiation; external dosimetry fundamentals for neutrons, photons, and charged particles; applications to problems of practical interest; analytical, numerical, and computer solutions emphasized. CROSSLISTED as NE 535, RHP 535. **PREREQS:** (NE 234 or RHP 234) and (NE 235 or RHP 235) and (NE 481 or RHP 481)

MP 536. ADVANCED RADIATION DETECTION AND MEASUREMENT (4). Principles and mechanisms underlying nuclear radiation detection and measurements; operation of nuclear electronic laboratory instrumentation; application of gas-filled, scintillation and semiconductor laboratory detectors for measurement of alpha, beta, gamma, and neutron radiation, liquid scintillation equipment; use of Bonner spheres for neutron energy profiles; experimental investigation of interactions of radiation with matter. Lec/lab. CROSSLISTED as NE 536, RHP 536. **PREREQS:** (MP 531 or NE 531 or RHP 531)

MP 541. DIAGNOSTIC IMAGING PHYSICS (3). An overview of the physics used in common diagnostic imaging approaches. Conceptually covers methodology and quality assurance of both ionizing and non-ionizing imaging techniques. Topics include X-rays and digital radiography, computed tomography, ultrasound, magnetic resonance imaging, and positron emission tomography. **PREREQS:** MP 535

MP 562. RADIATION THERAPY (3). The physics of radiation generation and delivery relevant to the field of clinical radiation oncology. Topics will include external beam radiation therapy; dosimetric calculations; high dose-rate and low dose-rate brachytherapy; electron beam dosimetry and treatment planning; photon beam dosimetry and treatment planning; special techniques in radiotherapy; and clinical radiation protection and quality assurance. **PREREQS:** (MP 531 or NE 531 or RHP 531) and graduate standing.

MP 563. APPLIED MEDICAL PHYSICS (4). The applied practice of therapeutic radiation physics for clinical radiation oncology. Topics will include current methodologies in treatment delivery and planning algorithms, best practices and protocols for quality assurance, special techniques in radiotherapy, and oncology. Lec/lab. **PREREQS:** MP 562 and/or instructor approval and graduate standing.

MP 582. APPLIED RADIATION SAFETY (4). Application of radiation protection as practiced in the fields of nuclear science and engineering; application of health physics principles to reduce the health hazards at each of the following stages:

design, prevention, assessment, and post-incident. A history of the key nuclear regulatory agencies; early and current radiation protection standards and organizations responsible for their formulation; major nuclear legislation; pertinent nuclear rules and regulations and their application. Lec/lab. CROSSLISTED as NE 582, RHP 582.

MP 583. RADIATION BIOLOGY (4). Biological effects of ionizing radiation at the molecular, cellular, and organismal levels with emphasis on vertebrates; both acute and chronic radiation effects are considered. CROSSLISTED as RHP 583. **PREREQS:** (NE 481 or RHP 481) and graduate standing.

MP 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

MP 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 99 credits.

MP 603. THESIS/DISSERTATION (1-16). This course is repeatable for a maximum of 999 credits.

MP 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

MP 606. SPECIAL PROBLEMS/SPECIAL PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

MP 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

MP 610. INTERNSHIP/WORK EXPERIENCE (1-16). This course is repeatable for a maximum of 16 credits.

■ NUCLEAR ENGINEERING COURSES

NE 114. INTRO TO NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS (2). Introduction to the nuclear engineering and radiation health physics fields; problem-solving techniques; careers in the nuclear industry; engineering ethics; nuclear history; elementary nuclear and reactor physics; basic nuclear fission and fusion theory; reactor types; nuclear safety; nuclear fuel cycle; and radiation protection. CROSSLISTED as RHP 114.

NE 115. INTRO TO NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS (2). Introduction to the nuclear engineering and radiation health physics fields; problem-solving techniques; careers in the nuclear industry; engineering ethics; nuclear history; elementary nuclear and reactor physics; basic nuclear fission and fusion theory; reactor types; nuclear safety; nuclear fuel cycle; and radiation protection. CROSSLISTED as RHP 115.

NE 116. INTRO TO NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS (2). Introduction to the nuclear engineering and radiation health physics fields; problem-solving techniques; careers in the nuclear industry; engineering ethics; nuclear history; elementary nuclear and reactor physics; basic nuclear fission and fusion theory; reactor types; nuclear safety; nuclear fuel cycle; and radiation protection. CROSSLISTED as RHP 116.

NE 234. NUCLEAR AND RADIATION PHYSICS I (3). Relativistic dynamics; basic nuclear physics; basic quantum mechanics; radioactivity; electromagnetic waves; interaction of ionizing radiation with matter; cross sections; basic atomic structure. CROSSLISTED as RHP 234. **PREREQS:** MTH 251 or MTH 251H and MTH 252

NE 235. NUCLEAR AND RADIATION PHYSICS II (3). Radioactivity; radioactive decay modes; decay kinetics; interaction of neutrons with matter; nuclear reactions; fission and fusion basics; cross sections. CROSSLISTED as RHP 235. **PREREQS:** (NE 234 or RHP 234) and MTH 252

NE 236. NUCLEAR RADIATION DETECTION AND INSTRUMENTATION (4). Principles

and mechanisms underlying nuclear radiation detection and measurements; operation of nuclear electronic laboratory instrumentation; application of gas-filled, scintillation and semiconductor laboratory detectors for measurement of alpha, beta, gamma, and neutron radiation; experimental investigation of interactions of radiation with matter. Lec/lab. CROSSLISTED as RHP 236. **PREREQS:** (NE 235 or RHP 235)

NE 311. INTRODUCTION TO THERMAL-FLUID SCIENCES (4). Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as ME 311. **PREREQS:** ((ENGR 212 or ENGR 212H) and (MTH 256 or MTH 256H))

NE 311H. INTRODUCTION TO THERMAL-FLUID SCIENCES (4). Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. CROSSLISTED as ME 311H. **PREREQS:** ((ENGR 212 or ENGR 212H) and (MTH 256 or MTH 256H)) and Honors College approval required.

NE 312. THERMODYNAMICS (4). Energy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312. **PREREQS:** (NE 311 or NE 311H or ME 311 or ME 311H) and (MTH 256 or MTH 256H)

NE 312H. THERMODYNAMICS (4). Energy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. CROSSLISTED as ME 312H. **PREREQS:** (NE 311 or NE 311H or ME 311 or ME 311H) and (MTH 256 or MTH 256H) and Honors College approval required.

NE 319. *SOCIAL ASPECTS OF NUCLEAR TECHNOLOGY (3). Description and discussion of nuclear-related issues as they impact society. (Bacc Core Course)

NE 331. INTRODUCTORY FLUID MECHANICS (4). Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331. **PREREQS:** ((MTH 254 or MTH 254H) and (MTH 256 or MTH 256H) and (ENGR 212 or ENGR 212H) and (ENGR 311 or ENGR 311H or ME 311 or ME 311H or NE 311 or NE 311H))

NE 331H. INTRODUCTORY FLUID MECHANICS (4). Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. CROSSLISTED as ME 331H. **PREREQS:** ((MTH 254 or MTH 254H) and (MTH 256 or MTH 256H) and (ENGR 212 or ENGR 212H) and (ENGR 311 or ENGR 311H or ME 311 or ME 311H or NE 311 or NE 311H)) and Honors College approval required.

NE 332. HEAT TRANSFER (4). A treatment of conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332. **PREREQS:** ((MTH 256 or MTH 256H) and (ENGR 212 or ENGR 212H) and (NE 311 or NE 311H or ME 311 or ME 311H) and (ME 331 or ME 331H or NE 331 or NE 331H))

NE 332H. HEAT TRANSFER (4). A treatment of conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. CROSSLISTED as ME 332H. **PREREQS:** ((MTH 256 or MTH 256H) and (ENGR 212 or ENGR

212H) and (NE 311 or NE 311H or ME 311 or ME 311H) and (ME 331 or ME 331H or NE 331 or NE 331H)) and Honors College approval required.

NE 333. MATHEMATICAL METHOD FOR NUCLEAR ENGINEERING AND RADIATION (3). Development and application of analytical and numerical methods with applications to problems in the NE/RHP field. Major topics will include solution of ODEs and systems of ODEs, root finding techniques and numerical integration and differentiation. Major applications will include solution of the Bateman Equations and solution of the diffusion equation. CROSSLISTED as RHP 333. **PREREQS:** (MTH 256 or MTH 256H)

NE 401. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 99 credits.

NE 403. THESIS/DISSERTATION (1-16). This course is repeatable for a maximum of 16 credits.

NE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

NE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

NE 407. SEMINAR IN NUCLEAR ENGINEERING (1). Lectures on current topics in nuclear engineering. CROSSLISTED as RHP 407. Graded P/N. This course is repeatable for a maximum of 16 credits.

NE 410. INTERNSHIP (1-12). Supervised technical work experience at approved organizations. Graded P/N. This course is repeatable for a maximum of 12 credits. **PREREQS:** Upper-division standing.

NE 415. NUCLEAR RULES AND REGULATIONS (2). An introduction to the key nuclear regulatory agencies; major nuclear legislation; current radiation protection standards and organizations responsible for their implementation. Offered alternate years. CROSSLISTED as RHP 415/RHP 515. **PREREQS:** NE 481 or RHP 481.

NE 429. SELECTED TOPICS IN NUCLEAR ENGINEERING (1-3). Topics associated with nuclear engineering not covered in other undergraduate courses; topics may vary from year to year. This course is repeatable for a maximum of 45 credits. **PREREQS:** Instructor approval required.

NE 435. RADIATION SHIELDING AND EXTERNAL DOSIMETRY (4). Theoretical principles of shielding for neutron and gamma radiation; external dosimetry fundamentals for neutrons, photons, and charged particles; applications to problems of practical interest; analytical, numerical, and computer solutions emphasized. CROSSLISTED as RHP 435. **PREREQS:** ((NE 234 or RHP 234) and (NE 235 or RHP 235) and (NE 481 or RHP 481)) and/or instructor approval.

NE 440. NUCLEAR FUEL CYCLE AND WASTE MANAGEMENT (4). Mining, milling, conversion, enrichment, fuel fabrication, reprocessing, and waste management of nuclear fuel, including disposal of low- and high-level radioactive waste. **PREREQS:** (NE 235 or RHP 235)

NE 451. NEUTRONIC ANALYSIS I (3). Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory, one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions. **PREREQS:** ((MTH 256 or MTH 256H) and NE 235 and NE 333) and NE 451 and NE 452 must be taken in order.

NE 452. NEUTRONIC ANALYSIS II (3). Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory, one speed diffusion theory; numerical methods;

fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions. Lec/lab. **PREREQS:** ((MTH 256 or MTH 256H) and NE 235 and (MTH 351* or ME 373*) and NE 451) and (NE 451, NE 452 must be taken in order.)

NE 455. REACTOR OPERATOR TRAINING I (3). The Oregon State University TRIGA Reactor Operator Training I class is one of a two-course series. Students interested in participating in this course are expected to enroll in both the NE 455/555 and NE 456/556 classes taught during spring and summer terms. Students successfully completing the NE 455/555 and NE 456/556 series will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission. **PREREQS:** ((NE 236 or RHP 236) and (MTH 256 or MTH 256H))

NE 456. REACTOR OPERATOR TRAINING II (4). The Oregon State University TRIGA Reactor Operator Training class is one of a two-course series. Students interested in participating in this course must have already taken and successfully passed NE 455/NE 555. Students successfully completing NE 456/NE 556 will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission. **PREREQS:** NE 455 and Instructor approval required.

NE 457. NUCLEAR REACTOR LABORATORY (2). Experimental investigation of the principles of nuclear reactor operation. Use of the OSU TRIGA Reactor and other laboratory facilities. Preparation and presentation of laboratory reports. Lec/lab. **PREREQS:** ((NE 451 or NE 551) and (NE 452 or NE 552))

NE 467. NUCLEAR REACTOR THERMAL HYDRAULICS (4). Hydrodynamics and conductive, convective and radiative heat transfer in nuclear reactor systems. Core heat removal design; critical heat flux, hot spot factors, single- and two-phase flow behavior. Advanced thermal hydraulic computer codes. **PREREQS:** (ME 332 or NE 332)

NE 468. NUCLEAR REACTOR SAFETY (3). Focused on probability risk assessment and system reliability analysis techniques applied to nuclear reactor safety. Application of these methods will be performed specifically through examination of neutronics and thermal hydraulic transients, effectiveness of emergency systems, accident prevention and mitigation, and assessment of radioactive release to the environment. **PREREQS:** ((NE 451 or NE 551) and (NE 467 or NE 567))

NE 474. NUCLEAR SYSTEMS DESIGN I (4). Practical design of nuclear power systems using fundamental nuclear engineering skills. Design projects involve the integration of reactor neutronics, dynamics and control, thermal hydraulics, transient analysis, safety analysis, power production, nuclear materials, fuel management and economic optimization. Emphasis is placed on designing advanced reactor systems for power production purposes. State-of-the-art computer codes are used for design analysis and evaluation. **PREREQS:** ((NE 332 or ME 332) and NE 451 and NE 467) and NE 474 and NE 475 must be taken in order.

NE 475. ^NUCLEAR SYSTEMS DESIGN II (4). Practical design of nuclear power systems using fundamental nuclear engineering skills. Design projects involve the integration of reactor neutronics, dynamics and control, thermal hydraulics, transient analysis, safety analysis, power production, nuclear materials, fuel management and economic optimization. Emphasis is placed on designing advanced reactor systems for power production purposes. State-of-the-art computer codes are used for design analysis and evaluation. (Writing Intensive Course) **CROSSLISTED** as RHP 475/RHP 575.

PREREQS: (NE 474 and NE 452*) and senior standing. NE 474 and NE 475 must be taken in order.

NE 481. RADIATION PROTECTION (4). Fundamental principles and theory of radiation protection; regulatory agencies; dose units; source of radiation; biological effects and risk; dose limits; applications of external and internal dosimetry; shielding and atmospheric dispersion. **CROSSLISTED** as RHP 481. **PREREQS:** (NE 235 or RHP 235)

NE 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

NE 501. RESEARCH (1-16). This course is repeatable for a maximum of 99 credits.

NE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

NE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

NE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

NE 507. SEMINAR IN NUCLEAR ENGINEERING (1). Lectures on current nuclear engineering topics. **CROSSLISTED** as RHP 507. Graded P/N. This course is repeatable for a maximum of 16 credits.

NE 510. INTERNSHIP (1-12). Supervised technical work experience at approved organizations. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Graduate standing.

NE 515. NUCLEAR RULES AND REGULATIONS (2). An introduction to the key nuclear regulatory agencies; major nuclear legislation; current radiation protection standards and organizations responsible for their implementation. Offered alternate years. **CROSSLISTED** as RHP 415/RHP 515. **PREREQS:** NE 481 or RHP 481

NE 516. RADIOCHEMISTRY (4). Selected methods in radiochemical analysis. Actinide chemistry, activation analysis, radionuclide solvent extraction, and microbial reactions with radionuclides. Designed for majors in chemistry, chemical engineering, nuclear engineering, and radiation health physics. Lec/lab. **CROSSLISTED** as CH 516 and RHP 516. **PREREQS:** ((NE 531 or RHP 531) and RHP 536) and/or instructor approval.

NE 526. NUMERICAL METHODS FOR ENGINEERING ANALYSIS (3). Numerical solutions of linear equations, difference equations, ordinary and partial differential equations. **CROSSLISTED** as ME 526. **PREREQS:** Programming experience and previous exposure to numerical methods, or instructor approval.

NE 531. RADIOPHYSICS (3). Expands understanding of concepts and applications of atomic and nuclear physics to enable continued study in nuclear engineering and health physics. Includes fundamental concepts of nuclear and atomic physics, atomic and nuclear shell structure, radioactive decay, radiation interactions, radiation biology, and the characteristics of fission. **CROSSLISTED** as RHP 531 and MP 531. **PREREQS:** Graduate standing.

NE 535. RADIATION SHIELDING AND EXTERNAL DOSIMETRY (4). Theoretical principles of shielding for neutron and gamma radiation; external dosimetry fundamentals for neutrons, photons, and charged particles; applications to problems of practical interest; analytical, numerical, and computer solutions emphasized. **CROSSLISTED** as MP 535, RHP 535. **PREREQS:** (NE 234 or RHP 234) and (NE 235 or RHP 235) and (NE 481 or RHP 481)

NE 536. ADVANCED RADIATION DETECTION AND MEASUREMENT (4). Principles and mechanisms underlying nuclear radiation detection and measurements; operation of nuclear

electronic laboratory instrumentation; application of gas-filled, scintillation and semiconductor laboratory detectors for measurement of alpha, beta, gamma, and neutron radiation, liquid scintillation equipment; use of Bonner spheres for neutron energy profiles; experimental investigation of interactions of radiation with matter. Lec/lab. **CROSSLISTED** as MP 536, RHP 536. **PREREQS:** (NE 531 or RHP 531 or MP 531)

NE 537. DIGITAL RADIATION MEASUREMENT AND SPECTROSCOPY (3). Principles of digital spectroscopy; application of digital filters in digital processing of detector pulses; hardware implementation of a typical digital spectrometer; introduction of Field-Programmable Gate Array (FPGA) devices programming a digital spectrometer using Hardware Description Language (VHDL); simulation, synthesis and spectroscopy; experimental design tests and evaluation. Lec/lab. **CROSSLISTED** as RHP 537. **PREREQS:** (NE 536 or RHP 536)

NE 539. SELECTED TOPICS IN INTERACTION OF NUCLEAR RADIATION (1-6). Topics associated with interactions of nuclear radiation not covered in other graduate courses; topics may vary from year to year. **CROSSLISTED** as RHP 539. This course is repeatable for a maximum of 45 credits. **PREREQS:** Instructor approval required.

NE 540. NUCLEAR FUEL CYCLE AND WASTE MANAGEMENT (4). Mining, milling, conversion, enrichment, fuel fabrication, reprocessing, and waste management of nuclear fuel, including disposal of low- and high-level radioactive waste.

NE 549. SELECTED TOPICS IN NUCLEAR FUEL CYCLE ANALYSIS (1-6). Topics associated with the nuclear fuel cycle not covered in other graduate courses; topics may vary from year to year. This course is repeatable for a maximum of 45 credits.

NE 551. NEUTRONIC ANALYSIS I (3). Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory, one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions. **PREREQS:** ((MTH 256 or MTH 256H) and NE 235 and NE 333). NE 551 and NE 552 must be taken in order.

NE 552. NEUTRONIC ANALYSIS II (3). Physical models of neutronic systems; nuclear physics; steady state and transient neutronic system behavior; introductory neutron transport theory, one speed diffusion theory; numerical methods; fast and thermal spectrum calculations; multigroup methods; transmutation and burnup; reactor fuel management; reactivity control; perturbation theory; neutronic laboratory sessions. Lec/lab. **PREREQS:** NE 551 and (MTH 256 or MTH 256H) and NE 235 and (MTH 351 or ME 373). NE 551 and NE 552 must be taken in order.

NE 553. ADVANCED NUCLEAR REACTOR PHYSICS (3). Advanced analytic and numerical techniques for the prediction of the neutron population in nuclear reactor systems. Topics will include long characteristic neutron transport, collision probabilities, nodal methods, equivalence theory, and perturbation theory. **PREREQS:** (NE 551 and NE 552) and computer programming experience or instructor approval.

NE 555. REACTOR OPERATOR TRAINING I (3). The Oregon State University TRIGA Reactor Operator Training I class is one of a two-course series. Students interested in participating in this course are expected to enroll in both the NE 455/555 and NE 456/556 classes taught during spring and summer terms. Students successfully completing the NE 455/555 and NE 456/556 series will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission. **PREREQS:** (NE 236 or RHP 236) and (MTH 256 or MTH

256H)

NE 556. REACTOR OPERATOR TRAINING II (4). The Oregon State University TRIGA Reactor Operator Training II class is one of a two-course series. Students interested in participating in this course must have already taken and successfully passed NE 455/NE 555. Students successfully completing NE 456/NE 556 will culminate their course work with the opportunity to take a certification test proctored by the Nuclear Regulatory Commission. **PREREQS:** NE 555 and instructor approval required.

NE 557. NUCLEAR REACTOR LABORATORY (2). Experimental investigation of the principles of nuclear reactor operation. Use of the OSU TRIGA Reactor and other laboratory facilities. Preparation and presentation of laboratory reports. Lec/lab. **PREREQS:** (NE 551 and NE 552)

NE 559. SELECTED TOPICS IN NUCLEAR REACTOR ANALYSIS (1-3). Topics associated with nuclear reactor theory not covered in other graduate courses; topics may vary from year to year. This course is repeatable for a maximum of 45 credits. **PREREQS:** NE 553

NE 561. NUCLEAR REACTOR SYSTEMS LABORATORY (3). Operational aspects of nuclear reactor systems; neutronic and thermal-hydraulic characterization of nuclear reactors; examination of design basis accident prevention and mitigation; loss of coolant accidents; loss of flow accidents; station blackouts. Lec/lab. **PREREQS:** (NE 553 and NE 567)

NE 565. APPLIED THERMAL HYDRAULICS (3). Advanced topics in the computational modeling of the hydrodynamic and heat transfer phenomena of nuclear reactors. Steady-state and transient solutions of one-dimensional nuclear reactor thermal hydraulic models. Nuclear reactor behavior analysis during various accident scenarios. **PREREQS:** CS 151 and ME 373 and NE 467

NE 567. NUCLEAR REACTOR THERMAL HYDRAULICS (4). Hydrodynamics and convective, convective and radiative heat transfer in nuclear reactor systems. Core heat removal design; critical heat flux, hot spot factors, single- and two-phase flow behavior. Advanced thermal hydraulic computer codes. **PREREQS:** ME 332 or NE 332.

NE 568. NUCLEAR REACTOR SAFETY (3). Focused on probability risk assessment and system reliability analysis techniques applied to nuclear reactor safety. Application of these methods will be performed specifically through examination of neutronics and thermal hydraulic transients, effectiveness of emergency systems, accident prevention and mitigation, and assessment of radioactive release to the environment. **PREREQS:** (NE 451 or NE 551) and (NE 467 or NE 567)

NE 569. SELECTED TOPICS IN NUCLEAR REACTOR ENGINEERING (1-6). Advanced nuclear engineering design concepts, reactor systems analysis techniques and innovative nuclear engineering applications. Artificial intelligence and expert system applications to nuclear engineering problems. Topics may vary from year to year. This course is repeatable for a maximum of 30 credits.

NE 574. NUCLEAR SYSTEMS DESIGN I (4). Practical design of nuclear power systems using fundamental nuclear engineering skills. Design projects involve the integration of reactor neutronics, dynamics and control, thermal hydraulics, transient analysis, safety analysis, power production, nuclear materials, fuel management and economic optimization. Emphasis is placed on designing advanced reactor systems for power production purposes. State-of-the-art computer codes are used for design analysis and evaluation. **PREREQS:** (NE 551 and NE 567) and (NE 332 or ME 332). NE 574 and NE 575 must be taken in order.

NE 575. NUCLEAR SYSTEMS DESIGN II (4). Practical design of nuclear power systems using fundamental nuclear engineering skills. Design projects involve the integration of reactor neutronics, dynamics and control, thermal hydraulics, transient analysis, safety analysis, power production, nuclear materials, fuel management and economic optimization. Emphasis is placed on designing advanced reactor systems for power production purposes. State-of-the-art computer codes are used for design analysis and evaluation. **CROSSLISTED** as RHP 475/RHP 575. **PREREQS:** (NE 552 and NE 574) and (NE 574 and NE 575 must be taken in order.)

NE 582. APPLIED RADIATION SAFETY (4). Application of radiation protection as practiced in the fields of nuclear science and engineering; application of health physics principles to reduce health hazards at each of the following stages: design, prevention, assessment, and post-incident. A history of key nuclear regulatory agencies; early and current radiation protection standards and organizations responsible for their formulation; major nuclear legislation; pertinent nuclear rules and regulations and their application. Lec/lab. **CROSSLISTED** as MP 582, RHP 582.

NE 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

NE 601. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 99 credits.

NE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

NE 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

NE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

NE 607. SEMINAR IN NUCLEAR ENGINEERING (1). Lectures on current nuclear engineering topics. **CROSSLISTED** as RHP 607. Graded P/N. This course is repeatable for a maximum of 16 credits.

NE 654. COMPUTATIONAL PARTICLE TRANSPORT (3). Properties of and methods for solution of the linear Boltzmann equation for nuclear reactors; spherical and double-spherical harmonics; integral equation methods; Monte Carlo methods. **PREREQS:** (NE 551 and NE 552)

NE 667. ADVANCED THERMAL HYDRAULICS (3). Advanced topics in single- and two-phase hydrodynamics and heat transfer for nuclear reactors. Two-phase flow patterns, flow instabilities, condensation induced transients, convective boiling heat transfer, and current topics in reactor safety thermal hydraulics. Offered alternate years. **PREREQS:** NE 567

NE 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

NE 808. WORKSHOP (1-4). This course is repeatable for a maximum of 16 credits.

■ RADIATION HEALTH PHYSICS COURSES

RHP 114. INTRO TO NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS (2). Introduction to the nuclear engineering and radiation health physics fields; problem-solving techniques; careers in the nuclear industry; engineering ethics; nuclear history; elementary nuclear and reactor physics; basic nuclear fission and fusion theory; reactor types; nuclear safety; nuclear fuel cycle; and radiation protection. **CROSSLISTED** as NE 114.

RHP 115. INTRO TO NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS (2). Introduction to the nuclear engineering and radiation health physics fields; problem-solving techniques; careers in the nuclear industry; engineering ethics; nuclear history; elementary

nuclear and reactor physics; basic nuclear fission and fusion theory; reactor types; nuclear safety; nuclear fuel cycle; and radiation protection. **CROSSLISTED** as NE 115.

RHP 116. INTRO TO NUCLEAR ENGINEERING AND RADIATION HEALTH PHYSICS (2). Introduction to the nuclear engineering and radiation health physics fields; problem-solving techniques; careers in the nuclear industry; engineering ethics; nuclear history; elementary nuclear and reactor physics; basic nuclear fission and fusion theory; reactor types; nuclear safety; nuclear fuel cycle; and radiation protection. **CROSSLISTED** as NE 116.

RHP 234. NUCLEAR AND RADIATION PHYSICS I (3). Relativistic dynamics; basic nuclear physics; basic quantum mechanics; radioactivity; electromagnetic waves; interaction of ionizing radiation with matter; cross sections; basic atomic structure. **CROSSLISTED** as NE 234. **PREREQS:** MTH 234 or MTH 234H and MTH 252

RHP 235. NUCLEAR AND RADIATION PHYSICS II (3). Radioactivity; radioactive decay modes; decay kinetics, interaction of neutrons with matter; nuclear reactions; fission and fusion basics; cross sections. **CROSSLISTED** as NE 235. **PREREQS:** (NE 234 or RHP 234) and MTH 252

RHP 236. NUCLEAR RADIATION DETECTION AND INSTRUMENTATION (4). Principles and mechanisms underlying nuclear radiation detection and measurements; operation of nuclear electronic laboratory instrumentation; application of gas-filled, scintillation and semiconductor laboratory detectors for measurement of alpha, beta, gamma, and neutron radiation; experimental investigation of interactions of radiation with matter. Lec/lab. **CROSSLISTED** as NE 236. **PREREQS:** (NE 235 or RHP 235)

RHP 333. MATHEMATICAL METHOD FOR NUCLEAR ENGINEERING AND RADIATION (3). Development and application of analytical and numerical methods with applications to problems in the NE/RHP field. Major topics will include solution of ODEs and systems of ODEs, root finding techniques and numerical integration and differentiation. Major applications will include solution of the Bateman Equations and solution of the diffusion equation. **CROSSLISTED** as NE 333. **PREREQS:** MTH 256 or MTH 256H

RHP 401. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 99 credits.

RHP 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

RHP 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

RHP 407. SEMINAR IN RADIATION HEALTH PHYSICS (1). Lectures on current topics in radiation health physics. **CROSSLISTED** as NE 407. Graded P/N. This course is repeatable for a maximum of 16 credits.

RHP 410. INTERNSHIP (1-12). Supervised technical work experience at approved organizations. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Upper-division standing.

RHP 415. NUCLEAR RULES AND REGULATIONS (2). An introduction to the key nuclear regulatory agencies; major nuclear legislation; current radiation protection standards and organizations responsible for their implementation. Offered alternate years. **CROSSLISTED** as NE 415/NE 515. **PREREQS:** NE 481 or RHP 481

RHP 435. RADIATION SHIELDING AND EXTERNAL DOSIMETRY (4). Theoretical principles of shielding for neutron and gamma radiation; external dosimetry fundamentals for neutrons, photons, and charged particles; applications to problems of practical interest; analytical, numerical, and computer solutions emphasized. **CROSSLISTED** as NE 435.

PREREQS: ((NE 234 or RHP 234) and (NE 235 or RHP 235) and (NE 481 or RHP 481)) and /or instructor approval.

RHP 450. PRINCIPLES OF NUCLEAR MEDICINE (3). Basic principles of nuclear medicine; detectors; radiopharmaceutical; dosimetry; imaging procedures.

RHP 475. *NUCLEAR SYSTEMS DESIGN II (4). Part II of a two-part series aimed at developing the student-s ability to transform concepts into practical designs. Students will work with fundamental principles in the areas of statics, materials, dynamics, fluids, heat transfer, radiation, economics and neutronics to create new engineering designs and to solve practical design problems. Students will apply calculational methods and advanced computer codes for design analysis and evaluation. The course will require both individual and group design projects. Each student will be required to develop a design reference notebook that will be used and updated throughout the term. Each student will be involved in writing clear and concise technical memoranda and design reports on a regular basis. Oral presentations will also be required. (Writing Intensive Course) **CROSSLISTED** as NE 475/NE 575. **PREREQS:** Senior standing.

RHP 481. RADIATION PROTECTION (4). Fundamental principles and theory of radiation protection; regulatory agencies, dose units, sources of radiation, biological effects and risk, dose limits, applications of external and internal dosimetry, shielding and atmospheric dispersion. **CROSSLISTED** as NE 481. **PREREQS:** (RHP 235 or NE 235)

RHP 483. RADIATION BIOLOGY (4). Biological effects of ionizing radiation at the molecular, cellular, and organismal levels with emphasis on vertebrates; both acute and chronic radiation effects are considered. **PREREQS:** (RHP 481* or NE 481*) and /or senior standing.

RHP 488. RADIOECOLOGY (3). Radionuclides in the environment; their measurement and identification, uptake and transfer through food chains. Effect of radiation on natural populations of plants and animals. **PREREQS:** Senior standing.

RHP 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

RHP 501. RESEARCH (1-16). This course is repeatable for a maximum of 99 credits.

RHP 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

RHP 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

RHP 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

RHP 507. SEMINAR IN RADIATION HEALTH PHYSICS (1). Lectures on current topics in radiation health physics. **CROSSLISTED** as NE 507. Graded P/N. This course is repeatable for a maximum of 16 credits.

RHP 510. INTERNSHIP (1-12). Supervised technical work experience at approved organizations. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Graduate standing.

RHP 515. NUCLEAR RULES AND REGULATIONS (2). An introduction to the key nuclear regulatory agencies; major nuclear legislation; current radiation protection standards and organizations responsible for their implementation. Offered alternate years. **CROSSLISTED** as NE 415/NE 515. **PREREQS:** NE 481 or RHP 481

RHP 516. RADIOCHEMISTRY (4). Selected methods in radiochemical analysis. Actinide chemistry, activation analysis, radionuclide solvent extraction, and microbial reactions with radionuclides. Designed for majors in chemistry,

chemical engineering, nuclear engineering and radiation, health physics. Lec/lab. **CROSSLISTED** as CH 516 and NE 516. **PREREQS:** ((NE 531 or RHP 531) and RHP 536) and /or instructor approval required.

RHP 517. RADIONUCLIDES IN LIFE SCIENCES (4). Chemistry of actinides and fission products, radioseparations, selected medical generators, radiolabeling of organic molecules. Designed for majors in medical physics, radiation health physics, chemistry, pharmacy. **CROSSLISTED** as MP 517. **PREREQS:** ((RHP 531 or NE 531) and RHP 536)

RHP 531. RADIOPHYSICS (3). Expands students' understanding of concepts and applications of atomic and nuclear physics to enable their continued study in nuclear engineering and health physics. Includes fundamental concepts of nuclear and atomic physics, atomic and nuclear shell structure, radioactive decay, radiation interactions, radiation biology, and characteristics of fission. **CROSSLISTED** as NE 531 and MP 531. **PREREQS:** Graduate standing.

RHP 535. RADIATION SHIELDING AND EXTERNAL DOSIMETRY (4). Theoretical principles of shielding for neutron and gamma radiation; external dosimetry fundamentals for neutrons, photons, and charged particles; applications to problems of practical interest; analytical, numerical, and computer solutions emphasized. **CROSSLISTED** as MP 535, NE 535. **PREREQS:** (NE 234 or RHP 234) and (NE 235 or RHP 235) and (NE 481 or RHP 481)

RHP 536. ADVANCED RADIATION DETECTION AND MEASUREMENT (4). Principles and mechanisms underlying nuclear radiation detection and measurements; operation of nuclear electronic laboratory instrumentation; application of gas-filled, scintillation and semiconductor laboratory detectors for measurement of alpha, beta, gamma, and neutron radiation, liquid scintillation equipment; use of Bonner spheres for neutron energy profiles; experimental investigation of interactions of radiation with matter. Lec/lab. **CROSSLISTED** as NE 536, MP 536. **PREREQS:** (NE 531 or RHP 531 or MP 531)

RHP 537. DIGITAL RADIATION MEASUREMENT AND SPECTROSCOPY (3). Principles of digital spectroscopy; application of digital filters in digital processing of detector pulses; hardware implementation of a typical digital spectrometer; introduction of Field-Programmable Gate Array (FPGA) devices programming a digital spectrometer using Hardware Description Language (VHDL); simulation, synthesis and spectroscopy; experimental design tests and evaluation. Lec/lab. **CROSSLISTED** as NE 537. **PREREQS:** (RHP 536 or NE 536)

RHP 539. SELECTED TOPICS IN INTERACTION OF NUCLEAR RADIATION (1-6). Topics associated with interactions of nuclear radiation not covered in other graduate courses; topics may vary from year to year. **CROSSLISTED** as NE 539. This course is repeatable for a maximum of 45 credits. **PREREQS:** Instructor approval required.

RHP 550. PRINCIPLES OF NUCLEAR MEDICINE (3). Basic principles of nuclear medicine; detectors; radiopharmaceutical; dosimetry; imaging procedures.

RHP 575. NUCLEAR SYSTEMS DESIGN II (4). Part II of a two-part series aimed at developing the student-s ability to transform concepts into practical designs. Students will work with fundamental principles in the areas of statics, materials, dynamics, fluids, heat transfer, radiation, economics and neutronics to create new engineering designs and to solve practical design problems. Students will apply calculational methods and advanced computer codes for design analysis and evaluation. The course will require both individual and group design projects. Each student will be required to develop a design reference notebook that will be used and updated throughout the term. Each student will

be involved in writing clear and concise technical memoranda and design reports on a regular basis. Oral presentations will also be required. **CROSSLISTED** as NE 475/NE 575.

RHP 582. APPLIED RADIATION SAFETY (4). Application of radiation protection as practiced in the fields of nuclear science and engineering; application of health physics principles to reduce the health hazards at each of the following stages: design, prevention, assessment, and post-incident. A history of the key nuclear regulatory agencies; early and current radiation protection standards and organizations responsible for their formulation; major nuclear legislation; pertinent nuclear rules and regulations and their application. Lec/lab. **CROSSLISTED** as MP 582, NE 582. **PREREQS:** .

RHP 583. RADIATION BIOLOGY (4). Biological effects of ionizing radiation at the molecular, cellular, and organismal levels with emphasis on vertebrates; both acute and chronic radiation effects are considered. **CROSSLISTED** as MP 583. **PREREQS:** (NE 481 or RHP 481) and graduate standing.

RHP 588. RADIOECOLOGY (3). Radionuclides in the environment; their measurement and identification, uptake and transfer through food chains. Effect of radiation on natural populations of plants and animals. **PREREQS:** RHP 381 or NE 381 or graduate standing.

RHP 590. INTERNAL DOSIMETRY (3). Further development and more in-depth treatment of internal dosimetry concepts introduced in NE/RHP 582, including the theoretical basis of energy deposition, biokinetics, and estimation of radiation risk from ingested, inhaled, or injected radionuclides. **PREREQS:** ((NE 531 or RHP 531) and (NE 535 or RHP 535)) and /or equivalent or instructor approval.

RHP 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

RHP 601. RESEARCH (1-16). This course is repeatable for a maximum of 99 credits.

RHP 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

RHP 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

RHP 606. PROJECT (1-16). This course is repeatable for a maximum of 16 credits.

RHP 607. SEMINAR IN RADIATION HEALTH PHYSICS (1). Lectures on current topics in radiation health physics. **CROSSLISTED** as NE 607. Graded P/N. This course is repeatable for a maximum of 16 credits.

RHP 610. INTERNSHIP (1-12). Graded P/N. This course is repeatable for a maximum of 16 credits.

RHP 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

SCHOOL OF CHEMICAL, BIOLOGICAL AND ENVIRONMENTAL ENGINEERING

Gregory L. Rorrer, Head

101 Gleeson Hall
Oregon State University
Corvallis, OR 97331-2702
541-737-4791

Chemical Engineering

Environmental Engineering

The School of Chemical, Biological, and Environmental Engineering (CBEE) offers three undergraduate programs: Chemical Engineering (CHE), Bioengineering

(BIOE), and Environmental Engineering (ENVE). The Bachelor of Science degrees in CHE, BIOE, and ENVE are each separately accredited by ABET, the Accreditation Board for Engineering and Technology. The Bachelor of Art degrees in CHE, BIOE, and ENVE are not accredited by ABET.

The goals of the CBEE undergraduate program are consistent with the mission and goals of the College of Engineering, and focus on creating work- and leadership-ready graduates who will be successful in professional careers as a chemical engineer, bioengineer, or environmental engineer in the private or public sectors, including industry, government, and consulting, as well as for continued graduate study in the same or closely related fields.

Chemical engineering (CHE) is the engineering discipline that focuses on the science and engineering of processes to convert raw materials into valued chemicals and products on a manufacturing scale.

Bioengineering (BIOE) is an interdisciplinary field that applies scientific and engineering principles to the development of new biologics, materials, devices, and processes in the broad areas of bioprocess, biomedical, and bioenvironmental technology.

Environmental engineering (ENVE) is the engineering discipline that applies scientific and engineering principles to improve the natural environment, to provide healthy water, air, and land, and to remediate polluted sites.

The educational objectives and curriculum are described separately for each CHE, BIOE, and ENVE program. The school has a core undergraduate curriculum where CHE, BIOE, and ENVE students take common courses in first through senior years, including first-year engineering, process material and energy balances, thermodynamics and transport phenomena, and senior year laboratory.

The school also offers one graduate program in chemical engineering leading to MEng, MS, and PhD degrees.

UNDERGRADUATE MAJORS WITH OPTIONS

BIOENGINEERING (BA, BS, CRED, HBA, HBS)

The School of Chemical, Biological, and Environmental Engineering (CBEE) offers three undergraduate programs: Chemical Engineering (CHE), Bioengineering (BIOE), and Environmental Engineering (ENVE). The Bachelor of Science degrees in CHE, BIOE, and ENVE are each separately accredited by ABET, the Accreditation Board for Engineering and Technology. The Bachelor of Art degrees in CHE, BIOE, and ENVE are not accredited by ABET.

About Bioengineering

Bioengineering is an interdisciplinary field that applies engineering principles and quantitative methods to the development of new and novel biologicals, materials, devices, and processes. In practice, bioengineers address issues surrounding the broad areas of bioprocess, biomedical, and bioenvironmental technology.

About the OSU Bioengineering Undergraduate Program (BIOE)

The Bioengineering Undergraduate Program provides a solid background in biology, chemistry, physics and math, in addition to the engineering sciences. Upper-level course work in bioengineering includes analysis and design of processes involving suspension and immobilized microbial cultures and the recovery of therapeutic products from bioreactors, as well as selection courses in biomedical materials engineering, metabolic engineering, and cell engineering. All students complete course work in drug and medical device regulation as well as a capstone-design experience.

Bioengineering graduates are prepared to contribute to the rapidly growing bioscience-based industries with the ability to formulate and solve problems pertaining to enzyme and microbial process technologies, mammalian cell culture, and downstream processing in biotechnology. They also generate solutions to problems with medical relevance, including the design of devices and systems to replace lost organ function, deliver therapeutic agents, and otherwise improve human health.

The Bioengineering Undergraduate Program aims to create work- and leadership-ready graduates who will be successful in professional careers in the private or public sectors. The educational objectives of the Bioengineering program are:

- Graduates will be work-ready bachelor of science engineers who are successful in obtaining employment in the bioprocess and biotechnology industries, in entering graduate studies in bioengineering, chemical, environmental, and biomedical engineering, and gaining admission to professional schools including health-professional programs and law programs.
- Graduates will be able to solve problems at the interface of engineering and biology, whether in a manufacturing, research or clinical environment.
- Graduates will be motivated to pursue lifelong learning efforts in order to fulfill their professional and ethical responsibilities, and they will recognize their responsibility to understand contemporary questions at the interface of biosciences,

- technology, and society.
- Graduates will be able to effectively communicate with a diverse set of professionals, able to facilitate meaningful collaboration between bioscientists and other engineers.
- Graduates will have careers that significantly contribute to society no matter the direction or environment they choose because of their broad education based in science and engineering.

The Bioengineering undergraduate curriculum is designed to meet these objectives through relevant course content, hands-on laboratory and design experiences at the first year through the senior levels, and structured, collaborative learning experiences. The school has a core curriculum where students from all three programs housed within the school (CHE, BIOE, ENVE) take common courses in the areas of first-year engineering, materials and energy balances, thermodynamics, transport phenomena and senior laboratory.

CHEMICAL ENGINEERING (BA, BS, CRED, HBA, HBS)

The School of Chemical, Biological, and Environmental Engineering (CBEE) offers three undergraduate programs: Chemical Engineering (CHE), Bioengineering (BIOE), and Environmental Engineering (ENVE). The Bachelor of Science degrees in CHE, BIOE, and ENVE are each separately accredited by ABET, the Accreditation Board for Engineering and Technology. The Bachelor of Art degrees in CHE, BIOE, and ENVE are not accredited by ABET.

About the Chemical Engineering Undergraduate Program (CHE):

Chemical engineering is the engineering discipline that focuses on the science and engineering of processes to convert raw materials into valued chemicals and products at a manufacturing scale. These include products found in everyday life such as transportation and heating fuels,

plastics, pharmaceuticals, household and paper products (soaps, cosmetics, health care and cleaning products, etc.), as well as more advanced products like solar cells, computer chips, and advanced composites for jet aircraft.

Chemical engineers find employment in traditional chemical industries such as pulp and paper manufacturing and petroleum refining, high-tech industries such as semiconductor device manufacturing, biopharmaceutical production, aerospace, and emerging industries, particularly in sustainable energy.

The overall goal of the chemical undergraduate engineering program is to create work- and leadership-ready graduates that will be successful in professional careers as a chemical engineer in the private or public sectors. The educational objectives of the chemical engineering undergraduate program are to:

- Provide CHE graduates with the fundamental knowledge, tools, skills, and perspectives to enable success for professional positions as a chemical engineer in industry, government, or for graduate study in chemical engineering or a field related to chemical engineering.
- Provide CHE graduates with a solid academic foundation in mathematics, chemical and physical sciences, and chemical process engineering principles in order to critically integrate and synthesize knowledge, think creatively, and design appropriate solutions to unfamiliar problems, all in a chemical engineering context.
- Develop the ability of CHE graduates to communicate effectively, and to work collaboratively in diverse team environments.
- Develop an awareness and understanding of broader aspects of the engineering profession for our CHE graduates, including: the need for lifelong learning, particularly with respect to acquiring new technical knowledge and information on current professional practices; understanding contemporary issues, including the impact of engineering actions in a societal and global context; understanding of professional and ethical responsibilities.

The chemical engineering undergraduate curriculum is designed to meet these objectives through relevant course content, hands-on laboratory and design experiences at the first year through senior levels, and structured, collaborative learning experiences. The school has a core curriculum where students from all three programs housed within the school (CHE, BIOE, ENVE) take common courses in the areas of first-year engineering,

material and energy balances, thermodynamics, transport phenomena, and senior year laboratory.

Chemical engineering students have opportunities to obtain internships offered through the School of CBEE, and through the Multiple Engineering Cooperative Program (MECOP) program. Many scholarships are also available on a competitive basis for chemical engineering undergraduate students.

The chemical engineering undergraduate program offers four options, which provides students with the opportunity to obtain a 21-credit, transcript-visible concentration in the following areas:

- Biochemical Processes
- Environmental Processes
- Microelectronics Processes and Materials Science
- Nanotechnology Processes

The option is not a requirement for the BS degree in Chemical Engineering. However, students interested in pursuing an option are encouraged to declare the option immediately after admission into the professional program, as many of the courses in a given option are only offered once per year.

^ Writing Intensive Course (WIC)

ENVIRONMENTAL PROCESSES OPTION

CH 324. Quantitative Analysis (4)

or CHE 417. Instrumentation in Chemical, Biological, and Environmental Engineering (4)

ENVE 322. Fundamentals of Environmental Engineering (4)

ENVE 431. Fate and Transport of Chemicals in Environmental Systems (4)

Select three additional courses from the following:

BB 350. Elementary Biochemistry (4)

CE 412. Hydrology (4)

CH 422. Analytical Chemistry (3)

CBEE 416. Chemical Engineering Lab II (3)

ENVE 421. Water and Wastewater Characterization (4)

ENVE 422. Environmental Engineering Design (4)

ENVE 425. Air Pollution Control (3)

ENVE 456. Sustainable Water Resources Development (3)

TOX 430. Chemical Behavior in the Environment (3)

Total=21 Credits

MICROELECTRONICS PROCESSES AND MATERIALS SCIENCE OPTION

CH 324. Quantitative Analysis (4)

or CHE 417. Instrumentation in Chemical, Biological, and Environmental Engineering (4)

CHE 444. Thin Film Materials Processing (4)

CHE 445. Polymer Engineering and Science (4)

Select three additional courses from the following:

BIOE 451. Biomaterials and Biointerfaces (3)

CBEE 416. Chemical Engineering Lab II (3)

CH 411. Inorganic Chemistry (3–4)

CH 421. Analytical Chemistry (3)

CH 422. Analytical Chemistry (3)

CH 445. Physical Chemistry of Materials (3)

CHE 417. Instrumentation in Chemical, Biological, and Environmental Engineering (4)

ECE 416. Electronic Materials and Devices (4)

ECE 417. Basic Semiconductor Devices (3)

ECE 418. Semiconductor Processing (4)

ENGR 221. The Science, Engineering and Social Impact of Nanotechnology (3)

ENGR 321. Materials Science (4)

ENGR 322. Mechanical Properties of Materials (3)

IE 355. Statistical Quality Control (4)

IE 356. Experimental Design for Industrial Processes (4)

Total=21 Credits

NANOTECHNOLOGY PROCESSES OPTION

CBEE 416. Chemical Engineering Laboratory II (3)

CHE 417. Instrumentation in Chemical, Biological, and Environmental Engineering (4)

CHE 444. Thin Films Materials Processing (4)

ENGR 221. The Science, Engineering and Social Impact of Nanotechnology (3)¹

Select one course from the following:

BIOE 451. Biomaterials and Biointerfaces (3)

CH 445. Physical Chemistry of Materials (3)

ECE 416. Electronic Materials and Devices (4)

ECE 418. Semiconductor Processing (3)
 ENGR 321. Materials Science (3)
 IE 355. Statistical Quality Control (4)
 IE 356. Experimental Design for Industrial Processes (4)

Total=21 Credits

Footnote

¹ If ENGR 221 is being used to fulfill the engineering ethics requirement, an additional Nanotechnology Processes option course must be selected.

ENVIRONMENTAL ENGINEERING (BA, BS, CRED, HBA, HBS)

The School of Chemical, Biological, and Environmental Engineering (CBEE) offers three undergraduate programs: Chemical Engineering (CHE), Bioengineering (BIOE), and Environmental Engineering (ENVE). The Bachelor of Science degrees in CHE, BIOE, and ENVE are each separately accredited by ABET, the Accreditation Board for Engineering and Technology. The Bachelor of Art degrees in CHE, BIOE, and ENVE are not accredited by ABET.

The school also offers an undergraduate Environmental Engineering option for civil engineering students and a minor in Environmental Engineering.

About the Environmental Engineering Undergraduate Program (ENVE)

The ENVE program draws upon a strong foundation in the basic sciences and prepares students for environmental engineering careers in consulting, industry, and state and local governments. It is a rigorous program incorporating course work in civil and chemical engineering, water and wastewater treatment, hazardous substance management, air pollution, and environmental health. The concept of environmental engineering design is introduced during the freshman year, with most of the design skills developed at the junior and senior level. Training culminates in a team approach to solution of open-ended, realistic problems that incorporate aspects of economics, process operation and maintenance, process stability and reliability, and consideration of constraints. A more detailed explanation of the design experience and design course sequences is contained in the "Undergraduate Advising Guide for the Environmental Engineering Program," which may be obtained from the school or viewed on the school's website at http://cbee.oregonstate.edu/students/current/advising/enve_advising_guide.pdf.

The educational objectives of the environmental engineering undergraduate program are that our graduates will:

1. Be employable in the field of environmental engineering or prepared for advanced graduate education with a specialty of

- environmental engineering.
2. Be proficient at mathematics, basic sciences, and engineering sciences relevant to environmental engineering, including fundamental concepts, experimental techniques, methods of analysis, and computational applications.
3. Be able to formulate and solve problems, synthesize and evaluate information, and be prepared for modern environmental engineering design.
4. Communicate effectively and work collaboratively in diverse teams.
5. Have awareness of and dedication to life-long learning in their careers by understanding the evolution of knowledge and technical applications, the state of current professional practice, contemporary issues, their professional and ethical responsibilities, and the impact of engineering actions in a societal and global context

The environmental engineering undergraduate curriculum is designed to meet these objectives through relevant course content, hands-on laboratory and design experiences at the first year through senior levels, and structured, collaborative learning experiences. The school has a core curriculum where students from all three programs housed within the school (CHE, BIOE, ENVE) take common courses in the areas of first-year engineering, materials and energy balances, thermodynamics, transport phenomena, and senior year unit operations.
