Our research is interdisciplinary with signature themes in (a) transitions across the life course, (b) risk and resilience across the life span, and (c) developmental and family research methods. Our faculty recognize the critical importance of culture and gender, diversity, and contemporary global perspectives in the discovery of knowledge. We have research emphases in child development, adolescence, adult development and aging, families, rural communities, and cross-national comparison.

Research is an important focus of the Graduate Program in Human Development and Family Studies. The HDFS faculty includes nationally recognized scholars who are widely published in areas such as families and aging; family communication and conflict; child, adolescent, and adult development; intergenerational family relationships; family structure; and gender. We emphasize both quantitative and qualitative methodology.

For more information, contact the Graduate Program in Human Development and Family Studies, College of Public Health and Human Sciences, 437 Waldo Hall, OSU, Corvallis, OR 97331-5102.

PUBLIC HEALTH (MPH, PhD)

Graduate Areas of Concentration *Biostatistics (MPH only); environmental and occupational health and safety (MPH, PhD); epidemiology (MPH only); health management and policy (MPH only); health policy (PhD only); health promotion and health behavior (MPH, PhD); international health (MPH only)*

The PhD and MPH in public health degree programs are summarized below.

For further information about public health graduate programs, contact 541-737-3825 or visit the Public Health major

website at <http://health.oregonstate.edu/degrees/graduate/public-health>.

Doctor of Philosophy (PhD) in Public Health

The PhD in Public Health is for individuals who wish to prepare themselves for careers in university teaching, research, consulting, policy development, or other high-level public health positions. There are currently three areas of concentration offered for the PhD degree:

1. Environmental and occupational health and safety;
2. Health policy;
3. Health promotion and health behavior.

A master's degree in a relevant field is required before admission into the PhD program.

The PhD program consists of a minimum of 109 credits, including at least 36 graduate credits devoted to preparation of the thesis. Doctoral students take courses in research and quantitative methods, theory, ethics, and their area of emphasis. Each student and his or her doctoral committee jointly determine the student's specific program of doctoral study. This process allows students to design a course of study uniquely suited to their particular needs and career goals. Further information about these requirements is available in the PhD in Public Health website and PhD handbook at <http://health.oregonstate.edu/degrees/graduate/public-health/phd-program>.

Master of Public Health (MPH)

The Oregon Master of Public Health (OMPH) program is a joint graduate program offered by Oregon State University (OSU), Oregon Health and Sciences University (OHSU), and Portland State University (PSU). Oregon State University offers six tracks in the OMPH Program:

1. Biostatistics Track
2. Environmental and Occupational Health and Safety Track
3. Epidemiology Track
4. Health Management and Policy Track
5. Health Promotion and Health Behavior Track
6. International Health Track

All students in the OMPH must take a common MPH core of five courses in the following areas:

- Biostatistics
- Environmental health
- Epidemiology
- Health behavior
- Health systems organization

In addition, each OMPH track has specific course requirements. The OMPH tracks offered at OSU are summarized below. The minimum number of credits varies by track.

All MPH students must do a 6-credit internship upon completion of their core and track classes. Upon completion of all required course work and the internship,

all MPH students must schedule a final oral examination. Students must receive approval to take the exam from their academic advisors. For MPH students who choose to do a thesis or project, the oral exam will be included as part of the thesis/project defense.

Further information about the OMPH program and tracks can be found at the OMPH website at <http://www.oregonmph.org/> and MPH handbooks at <http://health.oregonstate.edu/degrees/graduate/public-health/graduate-handbooks>.

GRADUATE MINORS

AGING SCIENCES GRADUATE MINOR

This graduate minor provides interdisciplinary graduate education in the aging sciences through formal course work, research requirements and experiential learning that is aligned with the student's career goals in aging.

The Aging Sciences minor requires 15 credits from the following courses.

Required Courses:

- BB 650. Selected Topics in Biochemistry and Biophysics: *Molecular Mechanisms of Aging* (3)
 CS 607/EXSS 607/HDFS 607. Seminar: *Research and Professional Topics in Aging* (1) *Taken 4 terms*
 GRAD 520. Responsible Conduct of Research (1)
 HDFS 565. Topics in Human Development and Family Sciences: *Behavioral and Social Sciences of Aging* (3)

Select 4 or more credits (1–2 courses) from the following:

Computer Science

- CS 519. Topics in Computer Science: *Data Visualization* (4)
 CS 519. Topics in Computer Science: *Human Computer Interaction* (4)

Exercise and Sport Science

- EXSS 515. Motor Control and Movement Dysfunction (3)
 EXSS 525. Biomechanics of Musculoskeletal Injury (3)
 EXSS 536. Exercise Management of Chronic Disease (3)
 EXSS 550. Health Promotion for People with Disabilities (3)
 EXSS 562. Lifespan Sport and Exercise Psychology (3)
 EXSS/NUTR 599. Special Topics: *Bone Physiology* (3)

Human Development and Family Sciences

- HDFS 518. Adult Development and Aging (4)
 HDFS 587. Social Gerontology (3)
 HDFS 617. Advanced Topics in Adult Development and Aging (3)

Nutrition

- NUTR 514. Health Benefits of Functional Foods, Nutraceuticals, and Dietary Supplements (3)
 NUTR 517. Human Nutrition Science (4)
 NUTR 518. Human Nutrition Science (4)

NUTR 523. Community Nutrition (4)
 NUTR/H 577. Dietary Interventions for Public Health (3)
 NUTR/EXSS 599/699. Special Topics in Nutrition Research: *Bone Physiology* (3)
 NUTR 599/699. Special Topics in Nutrition Research: *Advances in Cancer Research* (3)
 NUTR 599/699. Special Topics in Nutrition Research: *Advances in Metabolic Disease* (3)

Philosophy

PHL 544. Biomedical Ethics (4)
 PHL 555. Death and Dying (3)

Psychology

PSY 540. Cognition Research (4)
 PSY 598. Health Psychology (4)

Public Health

H 522. Health, Aging, and Control of Chronic Diseases (4)
 H 532. Economic Issues in Health and Medical Care (3)
 H 554. Epidemiology of Aging (3)
 H 567. Long-Term Care Alternatives (3)
 H 568. Financing and Administration of Long-Term Care (3)
 H 576. Program Planning/Proposal Writing in Health/Human Services (4)
 H/NUTR 577. Dietary Interventions for Public Health (3)

Sociology

SOC 532. Sociology of Aging (3)

COMMUNITY HEALTH GRADUATE MINOR

Graduate Areas of Concentration Community health

For more details, contact Sheryl Thorburn, Co-Director, 433 Waldo Hall, Oregon State University, Corvallis, OR 97331-6406, 541-737-9493; email: sheryl.thorburn@oregonstate.edu

GERONTOLOGY GRADUATE MINOR

Area of Concentration Gerontology

Gerontology refers to the study of aging, and also includes adult development. The existence of large numbers of individuals over the age of 65 is unprecedented in the history of humankind. In the next ten years, the number of older adults is expected to double in developed countries, and quadruple in the developing world. This growth will pose major challenges for societies in addressing the health, economic, and social needs of this population.

To address these challenges, students, researchers, and practitioners in the field of aging will need to take a multidisciplinary approach to solving these challenges, which will require an understanding of biological, psychological, socio-cultural, and design and engineering factors. Accordingly, we have designed a multidisciplinary minor, drawing upon faculty across campus, which is tailored to individual student needs.

Students are required to have a 3.0

GPA and to have one of the gerontology faculty on their committee. Students must take 18 credits, but can decide the classes in conjunction with their committee. Sample classes include:

H 536. Healthcare Organization Theory and Behavior (3)
 H 558. Reimbursement Mechanisms (3)
 H 576. Program Planning/Proposal Writing in Health/Human Services (4)
 H 568. Financing and Administration of Long-Term Care (3)
 H 599. Special Topics: "Epidemiology of Aging" (3)
 HDFS 518. Adult Development and Aging (4)
 HDFS 519. The Life Course (4)
 HDFS 565. Topics in Human Development and Family Sciences (3): "Psychosocial Factors in Aging", "Stress and Coping Across the Lifespan"
 HDFS 587. Social Gerontology (3)
 HDFS 617. Advanced Topics in Adult Development and Aging (3)
 NUTR 520. Medical Nutrition Therapy (5)
 PHL 544. Biomedical Ethics (4)
 PHL 555. Death and Dying (3)
 SOC 532. Sociology of Aging (3)

HUMAN DEVELOPMENT AND FAMILY STUDIES GRADUATE MINOR

For more details, see the graduate program director.

CERTIFICATES

GERONTOLOGY CERTIFICATE

Carolyn Aldwin, Director

Program on Gerontology
 Waldo Hall 437
 Oregon State University
 Corvallis, OR 97331-5102
 541-737-2024
 Email: Kaycee.headley@oregonstate.edu
 Website: <http://health.oregonstate.edu/sbhs/gerontology>

The Program on Gerontology offers an interdisciplinary approach to the study of aging. Because aging involves physiological, sociological, and psychological processes, gerontology education and research is relevant to many disciplines. Career opportunities in gerontology are extremely diverse and include positions in community services, health sciences, nutrition and dietetics, housing, health and physical education, pharmacy, counseling, health care administration, business, public policy, and many other arenas.

Recognizing the diversity of relevant disciplines and career opportunities, the OSU Program on Gerontology offers course work in gerontology through 10 schools/departments. The program is administered through the School of Social and Behavioral Health Sciences.

To be considered a gerontology course, at least 50 percent of the course content must address gerontology-related issues.

Gerontology courses include:

DHE 434/DHE 534. Housing the Aging Population (3)
 EXSS 414. Physical Activity and Aging (3)
 H 422/H 522. Health, Aging and Control of Chronic Diseases (4)
 H 432/H 532. Economic Issues in Health and Medical Care (3)
 H 436/H 536. Advanced Topics in Health Care Management (3)
 H 458/H 558. Reimbursement Mechanisms (3)
 H 465/H 565. *Public Health and Women: Social and Policy Issues (3)
 H 565. Public Health and Women: Social and Policy Issues (3)
 H 467/H 567. Long-Term Care Alternatives (3)
 H 468/H 568. Financing and Administration of Long-Term Care (3)
 H 536. Healthcare Organization Theory and Behavior (3)
 H 576/H 576. Program Planning/Proposal Writing in Health/Human Services (4)
 HDFS 314. Adult Development and Aging (4)
 HDFS 465/HDFS 565. Topics in Human Development and Family Sciences (3)
 HDFS 518. Adult Development and Aging (4)
 HDFS 519. The Life Course (4)
 HDFS 587. Social Gerontology (3)
 HDFS 617. Advanced Topics in Adult Development and Aging (3)
 NUTR 420/NUTR 520. Medical Nutrition Therapy (5)
 PHL 444/PHL 544. *Biomedical Ethics (4)
 PHL 455H/PHL 555. Death and Dying (3)
 PSY 350. Human Lifespan Development (4)
 SOC 432/SOC 532. Sociology of Aging (3)

Note: Other courses are approved annually by the Gerontology Program.

In addition to gerontology courses, seminars, field study (310/410/510/610), research (401/501/601), and projects (406/506/606) in gerontology are offered through the Gerontology Program. Field study, research, and projects in gerontology may also be available through other schools/departments. Students register for field study, research, or projects credit in the school or department that best meets their needs for supervision given the nature of the experience.

Graduate Study in Gerontology

OSU offers over 20 graduate-level gerontology courses plus field study and research opportunities. There are three ways to pursue significant graduate work in gerontology at OSU:

1. **Gerontology may be selected as an area of concentration for both master's and doctoral degrees in Human Development and Family Studies.** Students choosing this concentration will select adult development and aging course work and research in their major and may choose an integrated minor in gerontology.
2. **Gerontology is an integrated graduate minor (i.e., courses chosen from a variety of schools/departments)**

available to graduate students in any major field. The minor requires 18–36 credits, including HDFS 587, Social Gerontology. The balance of the course work is selected from graduate gerontology courses, field study, and/or research.

3. **Gerontology is an area of study in the Master's of Interdisciplinary Studies (MAIS) program.** MAIS students are required to take a minimum of 15 credits in gerontology, including HDFS 587, Social Gerontology. The balance of courses is selected from graduate gerontology courses, field study, and/or research.

Certificate Curriculum

Students earning a baccalaureate degree in any major at OSU may earn a Certificate in Gerontology. Certificate's increase students' employability in the many professional areas related to aging. Certification in gerontology is a nationally recognized way of identifying professionals' academic study in aging.

The Certificate in Gerontology requires 27 credits and includes a required core through which students study aging as an interactive process of physical, social, and psychological forces.

Gerontology Core (10 credits)

HDFS 314. Adult Development and Aging (4)
Any two of the following selected from two different schools/departments (6–7):

- DHE 434/DHE 534. Housing the Aging Population (3)
- H 422/H 522. Health, Aging and Control of Chronic Diseases (4)
- PSY 350. Human Lifespan Development (3)
- SOC 355. Death and Dying (4)

Field Study or Field Projects in Gerontology (3–6)

May be completed in any school/department:

- 310. Internship/Work Experience
- 401. Research and Scholarship
- 406. Special Problems/Special Projects and/or 410. Internship/Work Experience

Approved Gerontology Electives (12–15)

Additional Requirements

1. A grade of C or better in all gerontology courses. Overall GPA of 2.5.
2. Formal application to the program; forms available from the program office in Waldo Hall 437.
3. Certificate requirements fulfilled within five years following graduation. Students who have not completed certificate requirements upon receipt of the degree may continue as special, postbaccalaureate, or graduate students.

HEALTH MANAGEMENT AND POLICY GRADUATE CERTIFICATE

For more details about this graduate certificate, see the school advisor.

Required (12 credits)

- H 434/H 534. Health Care Law and Regulation (3)
- H 456/H 556. Strategic Management of Health Service Organizations (3)
- H 532. Economic Issues in Health and Medical Care (3)
- H 536. Health Services Administration and Management (3)

Electives (6 credits)

- H 530. Health Policy Analysis (3)
 - H 531. Health Care Marketing (3)
 - H 538. Public and Private Health Insurance (3)
 - H 539. Health Care Information Systems (3)
 - H 557. Financial Management of Health Care Organizations (3)
 - H 558. Reimbursement Mechanisms (3)
 - H 567. Long-Term Care Alternatives (3)
 - H 568. Financing and Administration of Long-Term Care (3)
 - H 599. Selected Topics (1-3)
- Other electives may be chosen with the consent of the student's advisor.

PUBLIC HEALTH GRADUATE CERTIFICATE

The graduate certificate in Public Health also is available via Ecampus.

MPH Core Courses (17 credits)

- H 512. Introduction to Environmental and Occupational Health Sciences (3)
- H 524. Introduction to Biostatistics (4)
- H 525. Principles of Epidemiology (4)
- H 533. Health Systems Organization (3)
- H 571. Principles of Health Behavior (3)

Electives (3 credits)

- H 530. Health Policy Analysis (3)
- H 536. Healthcare Organizational Theory and Behavior (3)

Total=20 credits

■ PUBLIC HEALTH COURSES

H 100. INTRODUCTION TO PUBLIC HEALTH (4).

A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.

H 120. *HEALTH AND CULTURE: USING THEATRE TO PROMOTE HEALTH (3).

A fun and interactive way to promote safer sex and communication with your partner, cultural awareness, healthy body image, responsible drinking, and other health issues. Course work focuses on the major health and social issues facing college students, health disparities, cultural differences in health beliefs and behaviors, acting techniques and performance preparation skills. (Bacc Core Course)

H 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

H 210. *INTRODUCTION TO THE HEALTH CARE SYSTEM (3).

Provides tools to understand and critically assess the health care delivery system, its components, and the challenges created by its structure. The health care system will be considered from the perspective of several main players [e.g., patients, hospitals, doctors, health plans]. (Bacc Core Course)

H 220. INTRODUCTION TO HEALTH DATA ANALYSIS (3). Introduction to the application of biostatistics and probability to the health sciences. Topics include quantitative analysis and inference, statistical methods in the biosciences, and quantitative study to evaluate and control health problems. **PREREQS:** MTH 105 or MTH 111 or higher mathematics.

H 225. *SOCIAL AND INDIVIDUAL HEALTH DETERMINANTS (4). Overview of the macro (social/system/environmental) and micro (individual) contributors to premature disease, disability and population health. Selected behavioral theories supporting health risks and strategies for the prevention of premature disease/disability and the promotion of health. (Bacc Core Course)

H 250. INTRODUCTION TO HEALTH CARE MANAGEMENT (3). Participants will learn key principles, practices and personalities of health care management. The content is broadly applicable to health care enterprises of every kind: public health organizations, physician practices and clinics, hospitals and health systems, agencies and service organizations, for-profit firms, not-for-profit enterprises, etc. **PREREQS:** H 210*

H 309. PRACTICUM IN HEALTH CARE SERVICES (3-6). Supervised work experience in a health care service setting or health-related agency or program. Weekly progress reports and post-experience summary report and evaluation will be expected. Preplanned with instructor approval. Open to health care administration majors. Graded P/N. This course is repeatable for a maximum of 12 credits. **PREREQS:** Junior standing. Instructor consent required.

H 310. HEALTH FIELD EXPERIENCES (3-6). Introductory field experience in a health or health-related worksite. Graded P/N. This course is repeatable for a maximum of 12 credits. **PREREQS:** H 225 and H 210 and H 220 and junior standing.

H 312. *AIDS AND SEXUALLY TRANSMITTED DISEASES IN MODERN SOCIETY (3). Fundamental principles relating to etiology, nature, prevention, and control of AIDS and other sexually transmitted diseases in contemporary society; emphasis on social, psychological, legal, economic, and ethical issues surrounding these diseases. (Bacc Core Course)

H 319. INTRODUCTION TO HEALTH POLICY (3). Describe the policy development process, including problem conceptualization, agenda setting, role of interest groups and public opinion, analysis of alternatives and selection of policy alternative. **PREREQS:** H 210

H 320. INTRODUCTION TO HUMAN DISEASE (3).

Fundamental principles relating to etiology, nature, prevention, and control of communicable and noncommunicable diseases in human populations. Special emphasis on disease prevention and health promotion in the high risk diseases of modern, industrialized society.

H 344. FOUNDATIONS OF ENVIRONMENTAL HEALTH (3). Introductory course examining environmentally-linked disease, and health effects associated with toxic substances, food quality, pesticides, air, water, and noise pollution, and solid/hazardous wastes.

H 349. PEER HELPER SKILLS DEVELOPMENT (3).

Prepares the student for an active role as a peer helper in alcohol and drug abuse prevention and health education. Course work will include: drug, alcohol, addiction and other related health issues, basic listening and communication skills, conflict resolution, crisis recognition and referral. A major component will be affective learning situations designed to promote self-awareness and personal growth.

H 364. DRUGS, SOCIETY AND HUMAN BEHAVIOR (3). Drug use and abuse; theories of addiction; basic principles of drug action regarding

the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual's value orientation, decision-making, and self-responsibility in treatment and educational approaches to prevention. **PREREQS:** (PSY 201 or PSY 202)

H 364H. DRUGS, SOCIETY AND HUMAN BEHAVIOR (3). Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual's value orientation. **PREREQS:** (PSY 201 or PSY 202) and Honors College approval required.

H 385. SAFETY AND HEALTH STANDARDS AND LAWS (3). Emphasis on the Occupational Safety and Health Act; study includes the scope and duties under the act, enforcement, and adjudication procedures and OSHA litigation; components of Oregon-OSHA.

H 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

H 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

H 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor's consent required.

H 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.

H 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor's consent required.

H 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor's consent required.

H 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor's consent required.

H 407. SEMINAR (2). Seminar to prepare students for their internship in public health. This course is repeatable for a maximum of 6 credits. **PREREQS:** HMP (Health Management Promotion) option students are required to take H 436 in preparation and hold junior standing. HPHB (Health Promotion and Health Behavior) option students are required to take H 225 and H 320 and hold junior standing.

H 407H. SEMINAR (2). Seminar to prepare students for their internship in public health. This course is repeatable for a maximum of 6 credits. **PREREQS:** HMP (Health Management Promotion) option students are required to take H 436 in preparation and hold junior standing. HPHB (Health Promotion and Health Behavior) option students are required to take H 225 and H 320 and hold junior standing. Honors College approval required.

H 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor consent required.

H 409. PRACTICUM (1-6). Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior standing and departmental approval.

H 410. INTERNSHIP (1-12). Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N. This course is repeatable for a maximum of 24 credits. **PREREQS:** For Health Promotion and Health Behavior students only: H 225, H 320, H 407, H 449 and H 476; junior standing and instructor approval.

H 417. MEDICAL AND PUBLIC HEALTH ENTOMOLOGY (3). Arthropod pests of man and domestic animals, including biology of pests, disease transmission mechanisms, epidemiology of important arthropod-borne diseases, and prevention and control of pest-related problems. **PREREQS:** Two terms of biology or general zoology.

H 418. PUBLIC HEALTH ETHICS AND ISSUES (3). Current ethical issues in public health, including gender and ethnicity in employment, pharmaceutical controls, product liability, advertising, and export of high technology. **PREREQS:** Senior standing.

H 421. MENTAL HEALTH (3). Examination of social, governmental, legal and individual mental health issues. Brief overview of some major mental disorders. **PREREQS:** (H 225 and H 320) and junior standing.

H 422. HEALTH, AGING AND CONTROL OF CHRONIC DISEASES (4). Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging. **PREREQS:** 9 credits of health course work.

H 425. FOUNDATIONS OF EPIDEMIOLOGY (3). Measures of disease frequency; measures of effect; association and causation; sources of inaccuracy; experimental and observational study designs. **PREREQS:** (H 220 or ST 201) and junior standing.

H 429. INTERNATIONAL HEALTH (3). Overview of the epidemiological, economic, political, sociological, and cultural factors that impact on international health. Special emphasis on the methods of prevention/intervention utilized in coping with health problems on an international level. **PREREQS:** Senior standing.

H 431. HEALTH CARE MARKETING (3). Principles, elements and methods of marketing health care services. Role of the consumer, governing body, administration and medical staff as well as impact of professional ethics.

H 432. ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE (3). Application of economic principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets. **PREREQS:** ((ECON 201 or ECON 201H) and H 210 and H 457) and junior standing.

H 434. ^HEALTH CARE LAW AND REGULATION (3). Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access. (Writing Intensive Course) **PREREQS:** (H 210 and H 250) and Admission to HMP program and junior standing.

H 436. ADVANCED TOPICS IN HEALTH CARE MANAGEMENT (3). Covers how health services are governed and organized; how health care organizations assess and adapt to change; constraints/opportunities in shaping organizational performance; leadership; strategic decision-making and the use of evidence-based management in health care. **PREREQS:** (H 210 and H 250) and junior standing.

H 445. *OCCUPATIONAL HEALTH (3). Current and historical topics in the area of occupational health, with particular emphasis on the types of materials that produce human health effects; clinical and epidemiologic data used to assess the public health importance of occupational pollutants and to evaluate control strategies. (Bacc Core Course)

H 448. ENVIRONMENTAL & OCCUPATIONAL TOXICOLOGY & RISK ASSESSMENT (3). Introduction to the basic principles of

toxicology and risk assessment as they apply to environmental and occupational health. **PREREQS:** One year basic college chemistry and biology and two terms organic chemistry.

H 449. MASS MEDIA AND HEALTH (3). Designed to examine the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public-health campaigns. **PREREQS:** (H 225 and H 320) and junior standing.

H 456. STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS (3). Theories and methodologies of long-range planning and strategic management in health care organizations. **PREREQS:** Admission to HMP program.

H 457. FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS (3). Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies. **PREREQS:** (H 210 and H 250)

H 458. REIMBURSEMENT MECHANISMS (3). Introduces and analyzes the different types of healthcare reimbursement methodologies used in the U.S. health care system. **PREREQS:** H 210 and junior standing.

H 461. SEXUALITY: A HEALTH SCIENCE PERSPECTIVE (3). Exploration of the meaning of sexuality from a variety of contemporary health science perspectives; aspects of sex and sexuality fundamental to total health; issues central to the health educator role examined. **PREREQS:** Senior standing.

H 465. *PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES (3). Public health approach to the identification of women's health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability. (Bacc Core Course) **PREREQS:** 6 credits in public health.

H 467. LONG-TERM CARE ALTERNATIVES (3). Overview of the long-term care alternatives. Comparisons of nursing homes with community based facilities; adult day care centers, respite to hospice facilities, social HMOs and other services; cost, quality of life and practicality are addressed.

H 468. FINANCING AND ADMINISTRATION OF LONG-TERM CARE (3). Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management. **PREREQS:** Admission to HMP program.

H 474. PUBLIC HEALTH AND VIOLENCE IN SOCIETY (3). Examination of violence as a major public health issue. Historical, social, environmental, economic, behavioral and psychological aspects of assaultive violence, spousal abuse, rape and sexual assault, child abuse, child sexual abuse, suicide, the effects of the media on violence, drug abuse and violence, and related public health problems in contemporary American society. Emphasis on health and the efficacy of current efforts aimed at ameliorating these problems and potential for alternative public health models for prevention and intervention.

H 476. ^PLANNING AND EVALUATING HEALTH PROMOTION PROGRAMS (4). A systematic approach to planning, implementing and evaluating health promotion programs in a variety of health related settings. Students will be writing a series of drafts to effectively develop a health promotion program plan. (Writing Intensive Course) **PREREQS:** (H 225 and H 320) and at least junior standing.

H 477. DIETARY INTERVENTIONS FOR PUBLIC HEALTH (3). A public health perspective on the

practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/educators. CROSSLISTED as NUTR 477/NUTR 577. **PREREQS:** NUTR 225

H 489. EMERGENCY AND DISASTER MANAGEMENT (3). Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 491. SELECTED TOPICS (1-3). Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year. This course is repeatable for a maximum of 6 credits. **PREREQS:** Senior standing.

H 491H. SPECIAL TOPICS (1-3). Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year. This course is repeatable for a maximum of 6 credits. **PREREQS:** Senior standing and Honors College approval required.

H 494. APPLIED ERGONOMICS (3). Principles of occupational ergonomics for managing optimal worker performance and well-being.

H 495. DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH (3). Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes. **PREREQS:** Junior or senior standing.

H 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Instructor approval required.

H 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 507. SEMINAR (1-16). Section 1. Internship (1). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 509. PRACTICUM (1-16). Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior standing and departmental approval.

H 510. INTERNSHIP (1-16). Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Graduate standing in Public Health Department, instructor approval required, departmental approval required.

H 512. INTRODUCTION TO ENVIRONMENTAL & OCCUPATIONAL HEALTH SCIENCES (3). Introduction to environmental and occupational health. Hazards affecting human health are examined in the context of current social, political and regulatory pressures.

H 514. ENVIRONMENT, SAFETY AND HEALTH SEMINAR (1). One-credit graduate seminar on current topics of interest and importance to the environmental health and occupational safety

field. Critical reading of research publications, discussion of controversial issues facing ESH professionals, and/or presentation of current ESH research. This course is repeatable for a maximum of 3 credits.

H 515. RESEARCH METHODS IN SOCIAL AND BEHAVIORAL HEALTH SCIENCES (3). Provides an introduction to quantitative research methods and design. Topics include definition of research problems and questions, hypothesis generation, research design, sampling, variable definition and measurement, data collection, and ethical considerations. Also provides a brief introduction to qualitative and mixed methods.

H 517. MEDICAL AND PUBLIC HEALTH ENTOMOLOGY (3). Arthropod pests of man and domestic animals, including biology of pests, disease transmission mechanisms, epidemiology of important arthropod-borne diseases, and prevention and control of pest-related problems. **PREREQS:** Two terms of biology or general zoology.

H 518. PUBLIC HEALTH ETHICS AND ISSUES (3). Current ethical issues in public health, including gender and ethnicity in employment, pharmaceutical controls, product liability, advertising, and export of high technology. **PREREQS:** Graduate standing.

H 520. HEALTH DISPARITIES (3). Health disparities based on race/ethnicity, culture, social class, and rural/urban residence, among others; strategies to reduce disparities, promote health, and prevent disease in diverse populations.

H 521. MENTAL HEALTH (3). Focus upon mental health policy development, in relation to federal and state government services and regulations, implementation of services.

H 522. HEALTH, AGING AND CONTROL OF CHRONIC DISEASES (4). Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging. **PREREQS:** 9 credits of public health course work.

H 523. FOUNDATIONS OF PUBLIC HEALTH (4). Fundamental principles, concepts and tools used in public health to promote the health of populations. Using a combination of case study method, lecture and discussion, students will develop a broad understanding of public health and recognition of how discipline-specializations address the social, behavioral and environmental determinants of public health. **PREREQS:** Graduate standing.

H 524. INTRODUCTION TO BIOSTATISTICS (4). Quantitative analysis and interpretation of health data including probability distributions, estimation of effects, and hypothesis-tests such as Chi-square, one-way ANOVA, and simple linear regression.

H 525. PRINCIPLES OF EPIDEMIOLOGY (4). Introduction to the concepts and methods of epidemiology. Topics include measures of population health, screening, study design, measures of association, and interpretation of epidemiological data.

H 526. EPIDEMIOLOGIC METHODS (3). Principles and methods of epidemiologic analysis; standardization; stratified analysis; confounding and its control; planning and conducting epidemiologic research; role of multivariate analysis in epidemiologic research. **PREREQS:** H 525

H 527. CASE STUDIES IN INTERNATIONAL HEALTH (3). International, public health challenges using case studies from different countries. Includes tropical disease and injury epidemiology in a variety of social, political, and economic contexts. **PREREQS:** Graduate standing.

H 528. GLOBAL HEALTH ISSUES (3). Examines major issues in health developments of global significance, their causes and impacts on international health, and methods and strategies to address them.

H 529. INTERNATIONAL HEALTH (3). Overview of the epidemiological, economic, political, sociological, and cultural factors that impact on international health. Special emphasis on the methods of prevention/intervention utilized in coping with health problems on an international level.

H 530. HEALTH POLICY ANALYSIS (3). Analysis of public policies affecting health care programs, services and organizations and the impact of those programs on citizens; processes by which health policy proposals are generated, promoted, defeated, modified and implemented.

H 531. HEALTH CARE MARKETING (3). Principles, elements and methods of marketing health care services. Role of the consumer, governing body, administration and medical staff as well as impact of professional ethics.

H 532. ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE (3). Application of economics principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets. **PREREQS:** ECON 201

H 533. HEALTH SYSTEMS ORGANIZATION (3). Examines the nature of health and health care services and reviews the role of government and the free market on health services. Alternative ways of organizing, financing, and delivery of health care services are explored.

H 534. HEALTH CARE LAW AND REGULATION (3). Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access.

H 536. HEALTHCARE ORGANIZATION THEORY AND BEHAVIOR (3). Administrative practice in health care settings with emphasis on long-term care and acute care services. Provides a framework for health care systems and managerial process and roles. Focus on operations, planning, marketing, human resources, finance, productivity and control as well as emerging trends in health services.

H 538. PUBLIC AND PRIVATE HEALTH INSURANCE (3). Introduction to the principles and practices of public or social and commercial health insurance, and their financial reimbursement mechanisms.

H 539. HEALTH CARE INFORMATION SYSTEMS (3). Information systems in health care institutions, programs, and services; review of managerial information needs and data collection and reporting mechanisms.

H 540. WATER AND HUMAN HEALTH (3). Critically examine the complex relationship between water quality, human activities, and population health.

H 541. AIR QUALITY AND HUMAN HEALTH (3). Examination of the major sources of air pollution, its impact on ecosystems and climate change, and population health. Will also discuss technologies and introduce regulations that are used to control air pollutants.

H 544. ENVIRONMENTAL AND OCCUPATIONAL EPIDEMIOLOGY (3). Examines exposure assessment methodology and epidemiological study designs that are commonly used in environmental and occupational health science in order to characterize the impact of environmental and occupational exposures on population health. **PREREQS:** H 525 and a graduate level statistics course.

H 545. OCCUPATIONAL HEALTH (3). A broad overview of occupational health including recognizing and preventing risks from toxic chemical, radiation and physical hazards in the workplace.

H 546. ENVIRONMENTAL AND OCCUPATIONAL SAMPLING (4). An overview of environmental and occupational sampling principles and practices for anticipating, recognizing, evaluating, and controlling exposures is provided.

H 548. ENVIRONMENTAL & OCCUPATIONAL TOXICOLOGY & RISK ASSESSMENT (3). Introduction to the basic principles of toxicology and risk assessment as they apply to environmental and occupational health. **PREREQS:** One year basic college chemistry and biology and two terms organic chemistry.

H 549. MASS MEDIA AND HEALTH (3). Examines the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food, to the (hopefully) positive impact of public health campaigns. **PREREQS:** H 571

H 552. DISASTER EPIDEMIOLOGY (3). Describe the impact of natural and manmade disasters on human health, understand epidemiologic methods specific to disasters, and apply fundamental epidemiologic methods to identify and characterize disaster-related adverse health outcomes. **PREREQS:** H 525

H 554. EPIDEMIOLOGY OF AGING (3). An overview of the core principles of the epidemiology of aging is provided. There will be an emphasis on health and disease processes in older adults. Students will learn essential study design and analytic issues that may arise in studies of aging. **PREREQS:** H 525

H 555. CANCER EPIDEMIOLOGY (3). Introduction to basic concepts and methodology in cancer epidemiology. **PREREQS:** H 525

H 556. STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS (3). Theories and methodologies of long-range planning and strategic management in health care organizations.

H 557. FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS (3). Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies. **PREREQS:** H 210 and H 250

H 558. REIMBURSEMENT MECHANISMS (3). Techniques used in cost-effectiveness analysis. Examples are drawn from the public health and health economics literature. **PREREQS:** Graduate standing.

H 559. CONTRACTS AND NEGOTIATION (3). Different negotiation styles and strategies used in healthcare contracting are explored—distributive, integrative, and mixed motive negotiation styles. Students examine various contracts and the role the healthcare administrator plays in a variety of health care settings.

H 560. PUBLIC HEALTH SURVEILLANCE (3). An introduction to public health surveillance systems (national and international) for chronic and infectious diseases. Utility of existing surveillance systems for secondary epidemiological data analysis. **PREREQS:** H 524 and H 525 or instructor's consent.

H 561. SEXUALITY: A HEALTH SCIENCE PERSPECTIVE (3). Exploration of the meaning of sexuality from a variety of contemporary health science perspectives; aspects of sex and sexuality fundamental to total health; issues central to the health educator role examined. **PREREQS:** Graduate standing.

H 562. INFECTIOUS DISEASE EPIDEMIOLOGY (3). Understand epidemiologic methods specific to infectious diseases, apply fundamental epidemiologic methods to infectious disease questions, and describe the broad trends in global infectious disease burden. The application methods and principles will be explored through

lectures, discussions, assignments and writing projects. **PREREQS:** H 525

H 564. COMPUTING TOOLS AND HEALTH DATA ANALYSIS (3). Modern computational biostatistics for analyzing health data, emphasizing important technologies and methods for data processing and understanding of how they work. Topics will evolve over time as new procedures are developed. **PREREQS:** (H 524 or HDFS 530)

H 565. PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES (3). Public health approach to the identification of women's health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability. **PREREQS:** 6 credits in public health.

H 566. DATA MINING IN PUBLIC HEALTH (3). An introduction to high-dimensional data analysis and data mining techniques used as an information technology tool to extract previously unknown and potentially useful information from large databases in biology, medicine, and public health. **PREREQS:** H 581 or permission of instructor; H 564 recommended.

H 567. LONG-TERM CARE ALTERNATIVES (3). Overview of the long-term care alternatives. Comparisons of nursing homes with community based facilities; adult day care centers, respite to hospice facilities, social HMOs and other services; cost, quality of life and practicality are addressed.

H 568. FINANCING AND ADMINISTRATION OF LONG-TERM CARE (3). Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management.

H 569. MATERNAL AND CHILD HEALTH (3). Women's reproductive health and health of children stressing causation, management, and prevention of public health problems. Epidemiological analysis of morbidity and mortality in children and women of childbearing age; impact of social, political and economic influences on the health of women and children; comparison of issues and problems of industrialized versus developing nations. Consideration of health issues of interest to the many diverse racial and ethnic groups of women and children in the U.S. as well as the global village.

H 570. WORKFLOW OF DATA ANALYSIS (3). Covers the management of workflow for studies involving data management and coordination including planning the work, documenting activities, creating, validating, and verifying variables, statistical analyses, replicating findings, and archiving work. Emphasizes tight control of data management: making changes to data in a documented and replicable manner. Lec/rec. **PREREQS:** HDFS 532 and /or equivalent or permission of instructor.

H 571. PRINCIPLES OF HEALTH BEHAVIOR (3). Theoretical approaches to behavior change in health promotion/education research and practice; factors influencing health behaviors, ethical behavior change issues, behavioral interventions for special populations.

H 572. COMMUNITY ORGANIZATION FOR HEALTH PROMOTION AND EDUCATION (3). History, theory, and practice of community organizing for health advocacy; focus on group processes, use of media, leadership, coalitions, grass roots methods and social change.

H 573. INTRODUCTION TO MULTILEVEL/ HIERARCHICAL MODELS (3). Introduction to the theory and application of hierarchical models to problems in epidemiology and public health. Hierarchical models will be dealt with using both frequentist and Bayesian frameworks. **PREREQS:** H 581 or permission of instructor.

H 574. PUBLIC HEALTH AND VIOLENCE IN SOCIETY (3). Examination of violence as a major public health issue. Historical, social, environmental, economic, behavioral and

psychological aspects of assaultive violence, spousal abuse, rape and sexual assault, child abuse, child sexual abuse, suicide, the effects of the media on violence, drug abuse and violence, and related public health problems in contemporary American society. Emphasis on health and the efficacy of current efforts aimed at ameliorating these problems and potential for alternative public health models for prevention and intervention.

H 575. EVALUATION OF HEALTH PROMOTION AND EDUCATION PROGRAMS (3). Provides theoretical and practical bases for program evaluation. Develops basic skills in a variety of approaches to evaluation, including techniques that are particularly suitable for evaluating health promotion, community health improvement, and related health and social services programs. Course learning is synthesized through designing an evaluation framework and methodology for a relevant program. **PREREQS:** H 515 and /or instructor consent.

H 576. PROGRAM PLANNING/PROPOSAL WRITING IN HEALTH/HUMAN SERVICES (4). Planning and preparing of proposals for program initiation, financing, delivery and evaluation in health-related settings; emphasis on funding sources, community, individual, and organizational support. **PREREQS:** 9 credits of graduate course work in public health.

H 577. DIETARY INTERVENTIONS FOR PUBLIC HEALTH (3). A public health perspective on the practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/educators. CROSSLISTED as NUTR 477/NUTR 577. **PREREQS:** NUTR 225

H 578. INTRODUCTION TO MOLECULAR EPIDEMIOLOGY I (3). A survey of and introduction to the methods and issues arising in genetics and molecular epidemiology, including key biostatistical methods, study designs, and technologies used in the conduct of these studies. Students will gain experience conducting critical reviews of research papers with respect to study design and biostatistical analysis. **PREREQS:** (H 524 and H 526) and knowledge of and familiarity with basic concepts of molecular biology (DNA replication, transcription, and translation).

H 579. MOLECULAR EPIDEMIOLOGY II (3). An introduction to the data analysis methods arising in genetics and molecular epidemiology. Students will obtain hands-on experience with the analysis of high-throughput data obtained from population-based molecular studies. Lec/lab. **PREREQS:** (H 578 and H 581) and H 564

H 580. LINEAR REGRESSION AND ANALYSIS OF TIME TO EVENT DATA (4). Multiple linear regression analysis for measurement data and survival analysis methods for time to event health data, including modes of inference, diagnostics, model selection, and reporting conclusions. Lec/lab. **PREREQS:** (H 524 or HDFS 530)

H 581. GENERALIZED LINEAR MODELS AND CATEGORICAL DATA ANALYSIS (4). Biostatistical methods focusing on binary and count data will provide a foundation for understanding and implementing generalized linear regression and categorical data models that are commonly used to analyze epidemiological and public health data from cohort, case-control, and clinical trial study designs. Lec/lab. **PREREQS:** H 580

H 582. ANALYSIS OF CORRELATED HEALTH DATA (3). Biostatistical methods for clustered, repeated measures, and longitudinal correlated health data, with an introduction to applications of linear and generalized linear mixed models and generalized estimating equations. **PREREQS:** H 581

H 583. ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT (3). The management principles and practices in the environment, safety and health profession are examined.

H 584. ANALYSIS OF INTERVENTION STUDIES AND CLINICAL TRIALS (3). Principles of data analysis from intervention studies and clinical trials, including professional graphical and tabular presentation, reproducibility and reliability of measurements, and controlling the Type I error rate when analyzing multiple endpoints. Basic principles of designing experiments are also covered including blocking, stratification, interaction, and control of variability. **PREREQS:** (H 524 or HDFS 530)

H 585. ENVIRONMENT, SAFETY AND HEALTH POLICY AND LAW (3). Survey of the environment, safety and health policy and law in the United States. Furnishes the basic knowledge and general understanding about policy and law-related issues important to all environmental health and safety professionals. **PREREQS:** H 385 or graduate standing.

H 586. BAYESIAN BIOSTATISTICS IN PUBLIC HEALTH (3). An examination of methods for designing and implementing Bayesian analysis to address scientific questions through hands-on experience with health data. This survey course also covers proper interpretation and communication of results from practical Bayesian methods for biostatistics data analysis, with illustrations of the utility of Bayesian ideas in public health. **PREREQS:** H 581

H 587. TIME TO EVENT ANALYSIS OF HEALTH DATA (3). Biostatistical models and methods for survival analysis of time to event data that are routinely encountered in biomedical and health research. **PREREQS:** (H 524 or HDFS 530)

H 588. APPLIED OCCUPATIONAL SAFETY AND HEALTH (3). The management and technical aspects of a workplace safety and health program are identified and assessed. Students completing the course receive a 30-hour OSHA General Industry card.

H 589. EMERGENCY AND DISASTER MANAGEMENT (3). Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 591. SELECTED TOPICS (1-3). Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year. This course is repeatable for a maximum of 9 credits. **PREREQS:** Graduate standing.

H 592. SPATIAL BIOSTATISTICS AND EPIDEMIOLOGY (3). Epidemiologic and biostatistical methods for spatial analysis of health data. Topics include risks and rates, types of spatial data, visualizing spatial data, analysis of spatial point patterns, spatial clustering of health events based on case-control studies and based on regional counts, linking spatial exposure data to health events through regression modeling. **PREREQS:** H 581

H 594. APPLIED ERGONOMICS (3). Principles of occupational ergonomics for managing optimal worker performance and well-being.

H 595. DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH (3). Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes. **PREREQS:** Graduate standing.

H 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 24 credits.

H 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

H 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

H 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 610. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 612. DOCTORAL SEMINAR IN PUBLIC HEALTH: RESEARCH AND PRACTICE (1). Contemporary research and professional issues specific to the discipline of public health. Includes responsible conduct of research, writing for publication, professional development and leadership, and faculty research in public health. This course is repeatable for a maximum of 9 credits. **PREREQS:** Restricted to public health doctoral students.

H 613. INDEPENDENT RESEARCH PROJECT (1-9). Independent research project for PhD students, including research design, execution or research, and the formal presentation of findings in written form. Student will develop an original research topic based on knowledge and review of the literature in a public health-relevant area of inquiry. Graded P/N. This course is repeatable for a maximum of 9 credits.

H 614. RESEARCH MANUSCRIPT (4). PhD students write a manuscript to submit to a peer-reviewed journal as part of the course requirements. Graded P/N.

H 615. ADVANCED EVALUATION AND RESEARCH DESIGN (3). Provides an in-depth examination of advanced research designs and methods for establishing causal statements about the efficacy, effectiveness and generalizability of public health and social service interventions designed to alter public health and social risk or protective factors. **PREREQS:** H 515 and H 575 or instructor permission.

H 630. ADVANCED TOPICS IN HEALTH POLICY ANALYSIS (3). Survey and analyze the healthcare system in the United States, with an emphasis on new and emerging issues. An important aspect of the course will be to analyze past, present and potential solutions to improve the performance of the U.S. health system. **PREREQS:** H 530

H 632. ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE (3). Demonstrate how economists think about healthcare issues. Emphasis on looking at a wide variety of health-related topics from an economist's perspective. By the end of the course, students should have a sense of how to use economic theory and empirical analysis to evaluate health policy issues.

H 635. COST EFFECTIVENESS ANALYSIS IN HEALTH AND MEDICAL CARE (3). The primary objective of this course is to introduce students to cost-effectiveness studies in health and medical care. Covers the core concepts of CEA, quality adjusted life years, cost calculations, and decision rules.

H 639. COMMUNITY-BASED PARTICIPATORY RESEARCH (4). Focuses on initiating and conducting research in partnership with communities. Includes in-depth examination of community-based participatory research (CBPR) elements, principles, theories, and approaches; how researchers can successfully partner with communities; and research with minority and/or underprivileged communities; with examples from environmental health, gerontology, and health promotion. **PREREQS:** 9 credits of public health

(H) or human development and family sciences (HDFS) graduate course work.

H 642. ENVIRONMENTAL AND REGULATORY RISK ASSESSMENT (3). Understand concepts, principles and practices in modern risk analysis and how they are utilized to make evidence-based decisions in public health. Focus will be on real world examples of risk assessment by environmental and occupational regulatory agencies.

H 643. SUSTAINABLE DEVELOPMENT AND ENVIRONMENTAL HEALTH (3). Introduction to the concepts and practices of sustainable development by examining the environmental, social, and economic dimensions of human health.

H 659. HEALTH POLICY RESEARCH METHODS (3). Familiarize doctoral students with the health policy research literature and selected questions in the field. The focus is an in-depth exploration of the research methods and technical details of the research literature. **PREREQS:** (H 515 and H 524)

H 671. ADVANCED THEORIES OF HEALTH BEHAVIOR (3). Provides an in-depth examination of major theories of health behavior (both health compromising and health enhancing). **PREREQS:** H 571 or permission of instructor.

H 672. ADVANCED QUALITATIVE METHODS IN HEALTH BEHAVIOR (3). Provides an in-depth examination of the use of qualitative methods in health behavior research and practice. **PREREQS:** H 515 and SOC 518 and HDFS 538; or permission of instructor.

H 673. MEASUREMENT OF HEALTH BEHAVIOR CONCEPTS (4). Provides in-depth study and field work for graduate students in public health and related fields of the methods used in the conceptualization, development, and evaluation of quantitative measures of health behavior and related concepts. **PREREQS:** H 524, H 515, and 3 credits in other quantitative research methods or social behavioral methods (e.g., in sociology or psychology or health promotion or education programs) or equivalents, or permission of instructor.

H 675. DEVELOPMENT OF HEALTH BEHAVIOR INTERVENTIONS (3). Examines the application of social/behavioral theories in health promotion interventions and in conducting intervention research in diverse populations. The course will focus on program development, on implementation strategies, and on translation into practice. **PREREQS:** (H 571 and H 575 and H 576) or equivalents or consent of instructor.

H 676. ADVANCED TOPICS IN HEALTH PROMOTION AND HEALTH BEHAVIOR (3). Examines topics of relevance to health promotion and health behavior. Specific topics include current issues and emerging research findings, with a focus on social and behavior science perspectives, analysis of public health problems, and application of principles and practices of health promotion and health behavior. This course is repeatable for a maximum of 6 credits. **PREREQS:** H 515 and H 571 or permission of instructor.

H 681. ADV TOPICS IN ENVIRONMENTAL & OCCUPATIONAL HEALTH & SAFETY (3). Advanced topics in the environment, safety and health discipline. Content varies with each offering.

H 682. ENVIR & OCCUP HLTH & SAFE: MOVING FROM RESEARCH TO PRACTICE (3). An examination of research transfer models that can be adapted and implemented to environmental and occupational settings. Case studies and content will vary with each course offering.

H 685. RACE, CLASS, CULTURE AND AGING (4). Examines the diversity among the older population in health status, health beliefs/behaviors, and health care, and explores the interaction of culture and structure as determinants of their life chances. The empirical

literature used in the course is drawn from the experiences of aging of African-American, Latino, and Asian-Pacific Islander elderly. Taught spring term even years. CROSSLISTED as HDFS 685. **PREREQS:** 9 credits of public health or HDFS graduate course work, or permission of instructor. **H 699. SPECIAL STUDIES (1-16).** This course is repeatable for a maximum of 16 credits.

■ HUMAN DEVELOPMENT AND FAMILY SCIENCES

HDFS 107. INTERNSHIP ORIENTATION (1). Exploration of career goals, internship opportunities, and the variety of practice areas in human services professions. Student preparation in planning, obtaining, and completing HDFS internships. Graded P/N.

HDFS 199. SPECIAL PROJECTS (1-16). Special projects designed with instructor Graded P/N. This course is repeatable for a maximum of 16 credits.

HDFS 201. *CONTEMPORARY FAMILIES IN THE U.S. (3). An introduction to families with application to personal life. Focuses on diversity in family structure, social class, race, gender, work and other social institutions. (Bacc Core Course)

HDFS 209. INTRODUCTORY INTERNSHIP (4). Field experience to learn, primarily through observation, how to apply human service intervention strategies and skills to helping individuals and families served by professional agencies and organizations. Supervision by agency and instructor. Requires 90 hours of work on-site. Supplementary bi-weekly seminar, readings, and reports. Graded P/N. This course is repeatable for a maximum of 8 credits. **PREREQS:** HDFS 107 and restricted to students in HDFS or OSU Gerontology Program. Application required.

HDFS 240. *HUMAN SEXUALITY (3). Physiological, psychological, social, and historical influences on sexuality; emphasis on developmental and relationship aspects. (Bacc Core Course)

HDFS 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HDFS 311. INFANT AND CHILD DEVELOPMENT (4). Research and theory on development from infancy through middle childhood. Discussion of biological, familial, and sociocultural influences. Development of skills in observing children's behavior.

HDFS 312. PARENTING RESEARCH AND APPLICATION (4). Research and theory regarding parenting and parent education, including parenting styles and practices, discipline, parent-child interactions, attachment, and the family context with an emphasis on professional implications for promoting child health and well-being.

HDFS 313. ADOLESCENT DEVELOPMENT (4). Advanced theories and research on physical, social and psychological development during adolescence; emphasizes influences of family, peers, schools and community. **PREREQS:** Sophomore standing.

HDFS 314. ADULT DEVELOPMENT AND AGING (4). Advanced theories and research related to developmental changes and stability in early, middle, and late adulthood. Gender issues, personality, cognition, and adaptation. **PREREQS:** Upper-division standing.

HDFS 330. FOSTERING LEARNING IN EARLY CHILDHOOD DEVELOPMENT (4). Development of skills in applying theoretical approaches to observing, recording, and interpreting the behavior of young children in order to design interactions that support learning in group settings. **PREREQS:** (HDFS 211 or HDFS 311)

HDFS 331. DIRECTED EXPERIENCE IN EARLY CHILDHOOD (3). Placement in early childhood program to focus on guidance techniques,

classroom management, and implementation of curricula, based on developmental observation, research, and theory. Supplementary weekly seminar, readings, and reports. Lab/rec. Taught on the OSU-Cascades campus only. **PREREQS:** ((HDFS 311 or HDFS 211) and HDFS 330) and Application required.

HDFS 341. FAMILY STUDIES (4). Study of family forms, family formation, and family change over the human life course is sociohistorical, economic, political, and cultural context.

HDFS 360. CRITICAL THINKING IN HUMAN DEVELOPMENT AND FAMILY SCIENCES (4). Explores foundations of critical thinking, especially methods for sustaining open-minded inquiry and evaluating evidence and arguments. Current controversies in human development and family policy are targets of debate. **PREREQS:** HDFS majors only.

HDFS 361. APPLIED RESEARCH METHODS (4). Basic research methods as they are applied in human development and family studies. This course includes a lab. **PREREQS:** ((ST 201 and ST 202) or H 220 or ST 351)

HDFS 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HDFS 401. RESEARCH (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.

HDFS 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

HDFS 405. READING AND CONFERENCE (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 406. PROJECTS (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

HDFS 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

HDFS 410. ADVANCED INTERNSHIP (10). Field experience to apply theory and empirical research to individual-, family-, and community-level interventions in professional settings. Focus is on analyzing needs of clients, developing goals, and designing and implementing plans of action. Application of human service ethics is emphasized. Supervision by agency and instructor. Requires 270 hours of work on-site. Supplementary bi-weekly seminar, readings, and reports. Graded P/N. This course is repeatable for a maximum of 20 credits. **PREREQS:** (HDFS 209 and HDFS 462) and junior or senior standing. Restricted to students in HDFS and OSU Gerontology Program. Application required.

HDFS 430. ^STUDENT TEACHING IN EARLY CHILDHOOD DEVELOPMENT & EDUCATION (12). Participation in a research-based model early childhood program focused on student teaching, program development and evaluation, parent education and administration. Placement to be reserved one year in advance. Lec/lab. (Writing Intensive Course) **PREREQS:** HDFS 330

HDFS 431. FAMILY, SCHOOL, AND COMMUNITY COLLABORATION (3). Focus on family, school, community environments and interactions for children from infancy to adolescence. Resources and skills for enhancing child development across these settings are emphasized. **PREREQS:** (HDFS 311 or HDFS 313) and HDFS 211 or HDFS 313

HDFS 432. CHILDREN AND YOUTH WITH SPECIAL NEEDS (3). Developmental, educational, and family issues related to children and youth with disabilities and giftedness. **PREREQS:** 6 credits of HDFS, SOC or PSY.

HDFS 444. FAMILY VIOLENCE AND NEGLECT (4). Examination of the causes and consequences of family abuse and neglect, including child abuse, domestic violence and elder abuse. **PREREQS:** 6 credits of HDFS, SOC or PSY.

HDFS 447. *FAMILIES AND POVERTY (4). Examines families in poverty focusing on causes and consequences of family poverty, including global economic factors, migration patterns, discrimination, and policies and programs for families. Community service required. (Bacc Core Course)

HDFS 447H. *FAMILIES AND POVERTY (4). Examines families in poverty focusing on causes and consequences of family poverty, including global economic factors, migration patterns, discrimination, and policies and programs for families. Community service required. (Bacc Core Course) **PREREQS:** Honors College approval required.

HDFS 461. ^PROGRAM DEVELOPMENT AND PROPOSAL WRITING (4). Principles of program development and evaluation applied to the development of a proposal for a human services program; analysis of needs and resources, identification of empirically-based strategies, and assessment. (Writing Intensive Course) **PREREQS:** HDFS 360

HDFS 462. SKILLS FOR HUMAN SERVICES PROFESSIONALS (4). Explores assessment, case management, and advocacy; helping skills; self-care and ethical conduct; organizational dynamics; application through case studies and interactive learning. **PREREQS:** Senior standing, Human Services option specialization.

HDFS 465. TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES (3). Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan. This course is repeatable for a maximum of 18 credits. **PREREQS:** 6 credits of HDFS, SOC or PSY.

HDFS 465H. TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES (3). Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan. This course is repeatable for a maximum of 18 credits. **PREREQS:** 6 credits of HDFS, SOC or PSY and Honors College approval required.

HDFS 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HDFS 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HDFS 501. RESEARCH (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 502. INDEPENDENT STUDY (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

HDFS 505. READING AND CONFERENCE (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 506. SPECIAL PROBLEMS/SPECIAL PROJECTS (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

HDFS 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

HDFS 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

HDFS 510. INTERNSHIP (3-15). This course is repeatable for a maximum of 16 credits.

HDFS 511. THEORIES OF HUMAN DEVELOPMENT (4). Critical examination of significant theories of human development. Emphasizes evolution of theories and impact on current human development research.

HDFS 516. CHILD DEVELOPMENT (4). Study of theories, concepts, and issues related to physical, cognitive, social, and emotional development in infants and children. Covers family contexts, risk and resilience, nature/nurture issues, critical/sensitive periods, the importance of early experience, and the relationship between basic and applied research. **PREREQS:** 15 quarter credits of social and behavioral sciences.

HDFS 517. ADOLESCENT DEVELOPMENT (4). Study of theories, concepts, and issues related to biological, cognitive, social, and emotional development in adolescents. Covers identity formation, family contexts, adolescent sexuality, societal contexts for adolescent development, and risk and resilience processes. **PREREQS:** 15 quarter credits of behavioral and social sciences.

HDFS 518. ADULT DEVELOPMENT AND AGING (4). Study of theories, concepts, and issues related to biological, cognitive, social, and emotional development throughout adulthood. Covers life transitions, stress-related growth, optimal aging, wisdom, and developmental methods. **PREREQS:** 15 quarter credits of behavioral and social sciences.

HDFS 519. THE LIFE COURSE (4). Introduces students to key concepts, principles, and controversies in life-course studies. Emphasizes how the nature and rhythm of the life course is structured by time and place. Examines how the lives of individuals and groups are shaped by history, demography, social institutions, states and policies, and culture.

HDFS 530. RESEARCH IN HUMAN DEVELOPMENT AND FAMILY SCIENCES I (4). An overview of research design, measurement, sampling and evaluation research. Introduces computer applications for data collection and analysis. Lec/lab. **PREREQS:** Undergraduate statistics and 12 credits of social science courses.

HDFS 531. RESEARCH IN HUMAN DEVELOPMENT AND FAMILY SCIENCES II (4). Philosophy and methods of behavioral research including experimental design and advanced evaluation research techniques. Lec/lab/rec. **PREREQS:** H 524 or HDFS 530

HDFS 532. RESEARCH IN HUMAN DEVELOPMENT AND FAMILY SCIENCES III (4). An in-depth study of research methods related to human development and family studies. Covers multivariate procedures, path analysis, causal modeling, and related techniques. **PREREQS:** HDFS 531

HDFS 533. SOCIAL POLICY AND HUMAN DEVELOPMENT (4). Probes how policies and governments affect human development over the life course. Examines experiences in family, education, work, and health. Families are a central lens for examining effects. Offered alternate years.

HDFS 534. SOCIAL PROGRAM AND POLICY EVALUATION (4). Models of evaluation and application of applied research methods to social programs and policies. **PREREQS:** HDFS 531

HDFS 538. QUALITATIVE RESEARCH METHODS I (4). Critical survey of qualitative approaches in social science research. Examines historical roots, epistemological perspectives, and ethical issues. Includes ethnographic and observational methods, interview, grounded theory, case study, and participatory approaches. **PREREQS:** 15 quarter credits of behavioral and social sciences.

HDFS 539. QUALITATIVE METHODS II (4). Critical survey of qualitative approaches in social science research. Examines historical roots, epistemological perspectives, and ethical issues. Includes ethnographic and observational methods,

interview, grounded theory, case study, and participatory approaches. Application of qualitative methods through completion of a qualitative research project. **PREREQS:** HDFS 538

HDFS 541. FAMILY STUDIES (4). Critical survey of current research in family studies with a focus on diverse family structures and processes. **PREREQS:** 15 quarter credits of behavioral and social sciences.

HDFS 546. THEORIES OF FAMILY STUDIES (4). An overview of the major theoretical perspectives used in the study of families. Issues of theory construction and evaluation are also covered. Course goal is to enable the student to apply conceptual frameworks to a particular area of interest.

HDFS 547. FAMILIES AND POVERTY (3). Examines families in poverty focusing on causes and consequences of family poverty, including global economic factors, migration patterns, discrimination, and policies and programs for families.

HDFS 565. TOPICS IN HUMAN DEVELOPMENT AND FAMILY SCIENCES (3). Topics and issues in human development and family sciences. Examples: children and the law; gender and families; parenting; aging; relationship development across the lifespan. This course is repeatable for a maximum of 18 credits. **PREREQS:** 6 credits of HDFS, SOC or PSY.

HDFS 587. SOCIAL GERONTOLOGY (3). An introduction to aging research targeted toward understanding demographics of aging societies, lifespan theories, methods of aging research, psychosocial aging processes, family and caregiving issues, housing and long-term care, and current social policies.

HDFS 601. RESEARCH (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 602. INDEPENDENT STUDY (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 603. DISSERTATION (1-16). This course is repeatable for a maximum of 999 credits.

HDFS 605. READING AND CONFERENCE (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 606. SPECIAL PROJECTS (1-6). This course is repeatable for a maximum of 16 credits.

HDFS 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

HDFS 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

HDFS 610. INTERNSHIP (3-15). This course is repeatable for a maximum of 16 credits.

HDFS 616. ADVANCED TOPICS IN CHILD-ADOLESCENT DEVELOPMENT (3). Advanced critical study of theory and research related to specific topics of social, emotional, and cognitive development during infancy, childhood and/or adolescence. This course is repeatable for a maximum of 6 credits.

HDFS 617. ADVANCED TOPICS IN ADULT DEVELOPMENT AND AGING (3). Advanced critical study of theory and research related to specific topics of social and emotional development and stability in adulthood, including later life. This course is repeatable for a maximum of 9 credits.

HDFS 630. QUANTITATIVE METHODS IN FAMILY AND INDIVIDUAL DEVELOPMENT (3). Advanced quantitative techniques in human development and family studies. Includes longitudinal designs, structural equation modes. Content varies with each offering. This course is repeatable for a maximum of 9 credits. **PREREQS:** HDFS 532

HDFS 639. COMMUNITY-BASED PARTICIPATORY RESEARCH (4). Focuses on initiating and conducting research in partnership

with communities. Includes in-depth examination of community-based participatory research (CBPR) elements, principles, theories, and approaches; how researchers can successfully partner with communities; and research with minority and/or underprivileged communities; with examples from environmental health, gerontology, and health promotions. **PREREQS:** 9 credits of public health or human development and family sciences graduate course work.

HDFS 665. TEACHING IN HUMAN DEVELOPMENT AND FAMILY SCIENCES (1). Principles and practices of pedagogy in human development and family sciences related to both on-campus and Ecampus instruction. Graded P/N. This course is repeatable for a maximum of 6 credits.

HDFS 685. RACE, CLASS, CULTURE AND AGING (4). Examines the diversity among the older population in health status, health beliefs/behaviors, and health care, and explores the interaction of culture and structure as determinants of their life chances. The empirical literature used in the course is drawn from the experiences of aging of African-American, Latino, and Asian-Pacific Islander elderly. Taught spring term even years. CROSSLISTED as H 685. **PREREQS:** 9 credits of public health or HDFS graduate course work, or permission of instructor.

HDFS 699. SPECIAL TOPICS (1-4). This course is repeatable for a maximum of 8 credits.

HDFS 808. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Application to Early Childhood Leadership Directions.

■ 4H YOUTH DEVELOPMENT EDUCATION

YDE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

YDE 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.

YDE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

YDE 406. PROJECTS (1-3). This course is repeatable for a maximum of 3 credits. **PREREQS:** Departmental approval required.

YDE 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

YDE 410. INTERNSHIP/WORK EXPERIENCE (1-16). This course is repeatable for a maximum of 16 credits.

YDE 431. EDUCATIONAL DESIGN FOR COMMUNITY-BASED YOUTH DEVELOPMENT PRO (3). Students will explore how youth and adult development takes place within the community context. Using theories and research-supported practices, student practitioners will examine the standards in effective instructional design/program evaluation and how to apply these standards in their creation of educational programs. **PREREQS:** TCE 216 and TCE 219 and TCE 253 and TCE 320 and TCE 216 and TCE 219 and TCE 253 and TCE 320

YDE 467. ORGANIZATIONAL DEVELOPMENT (3). Students will examine models, theories, and practical examples of organizational development in the context of out-of-school educational program delivery. Course work is designed to provide future youth development professionals with the core competencies necessary to manage organizations, staff, and educational programs. **PREREQS:** TCE 216 and TCE 219 and TCE 253 and TCE 320 and TCE 216 and TCE 219 and TCE 253 and TCE 320

YDE 484. LEADERSHIP AND MANAGEMENT (2). Students will be introduced to the scholarly disciplines of leadership and management and

how they are applied in community or workplace settings. Students will be introduced to various leadership models and theories with the goal of helping them synthesize and apply a personalized approach to leadership. **PREREQS:** TCE 216 and TCE 219 and TCE 253

YDE 492. EXPERIENTIAL PROGRAM

DESIGN (2). Students will obtain an overview of experiential education and its application in various out-of-school settings. They will develop an understanding of how to design experiential education programs for all stages of youth/adult development and different settings based on research, application of «best practices,» and community/organizational needs assessment.

PREREQS: TCE 216 and TCE 219 and TCE 253 and TCE 320 and TCE 216 and TCE 219 and TCE 253 and TCE 320

YDE 493. APPLIED INSTRUCTIONAL

METHODS (2). Students will obtain an overview of instructional techniques and methods and their application to various out-of-school, community settings. Student practitioners will be expected to demonstrate proficiencies in utilizing different methods and in matching instructional delivery with the learning audience. **PREREQS:** TCE 216 and TCE 219 and TCE 253 and TCE 320 and YDE 431 and YDE 492 and TCE 216 and TCE 219 and TCE 253 and TCE 320 and YDE 431

YDE 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

For more than a century, military training has been offered at Oregon State University. Fulfilling a provision of the Morrill Act of 1862, which gave Corvallis College its first public support, an Army Cadet Corps was organized in 1873.

ROTC at Oregon State is made up of the departments of Military Science, Naval Science, and Aerospace Studies. In 1917, the Department of Military Science became responsible for all military training under the National Defense Act of 1916. This act expanded and standardized the training of Army officers by colleges and universities and established the Reserve Officer Training Corps (ROTC). During World War II, OSU became known as the "West Point of the West" for commissioning more officers than any other nonmilitary academy in the nation. At the end of World War II, the secretary of the Navy commissioned the Department of Naval Science (NROTC) on this campus to provide the training of both Navy and Marine Corps officers. On July 1, 1949, the U.S. Air Force activated an AFROTC unit that today is called the Department of Aerospace Studies. OSU is now one of 48 colleges and universities that offers education for all three military departments.

Originally, two years of military science and tactics were required of all able-bodied male students, but since 1962, ROTC has been voluntary. Since 1965, two-year programs have been available for students who have finished two years of college but have not taken ROTC previously.

As opportunities for women to serve as officers in the armed forces grow, opportunities for women to participate in ROTC programs expand. Women have long been eligible to take ROTC course work for credit. Since 1970, they have been enrolled as cadets in Air Force ROTC and, since 1973, have also been enrolled as cadets and midshipmen in the Army and Navy ROTC programs.

MISSION AND OBJECTIVES

The ROTC selects and prepares young men and women, through a program of instruction coordinated with the student's normal academic curriculum, for commissioning and service as officers in the regular and reserve components of the Army, Navy, Air Force, and Marine Corps.

UNIFORMS AND ALLOWANCES

Students in each of the units receive uniforms to be worn at drill periods and on special occasions. Travel to and from any summer camps or cruises is paid. While at camp or on cruise, the members receive food and quarters at government expense in addition to basic pay. (See the individual sections for further information on the various camps and cruises.) Those selected for the scholarship programs receive tuition, books, and fees plus \$250 to \$500 a month subsistence pay for up to 40 months.

FLIGHT TRAINING

Eligible Army, Navy, Marine Corps, and Air Force ROTC students may be selected for flight training upon their successful completion of the program and commissioning. AFROTC cadets may be eligible to receive up to eight hours of flight orientation for free through the Civil Air Patrol.

HOW TO ENROLL

See the Army, Navy, or Air Force sections of this catalog for enrollment details for the various ROTC programs. All three departments have staff available throughout the year during normal school hours to answer any inquiries regarding the ROTC programs.

AEROSPACE STUDIES

Lieutenant Colonel Robb E. Owens,
Commander

308 McAlexander Fieldhouse
Oregon State University
Corvallis, OR 97331-4903

FACULTY

Professor Lt. Col. Robb E. Owens

Assistant Professor Capt. Josh Burnett

Minor

Aerospace Studies

The Aerospace Studies program prepares students for careers as Air Force officers while simultaneously completing any university undergraduate or graduate degree.

Aerospace Studies courses are open to all university students. The courses are taught by Air Force officers. If students desire a career as an Air Force officer, they must complete all Air Force Reserve Officer Training Corps (AFROTC) requirements.

The U.S. Air Force's mission is to "Fly, Fight and Win in Air, Space and Cyberspace." Whether a student's interest lies in flying advanced aircraft, operating sophisticated outer space systems, defending America's cyberspace infrastructure, researching and developing state-of-the-art technology, or working as a language interpreter, defense intelligence officer, medical or legal professional, the Aerospace Studies Department can guide students to exciting and challenging opportunities.

SCHOLARSHIPS

If students qualify, scholarship opportunities are available.

High school students must apply online by December 1, the year before they begin college in order to compete for a scholarship while still in high school. Students will find application procedures and forms at <http://www.afrotc.com/>.

Air Force ROTC scholarships cover up to 100% of tuition, laboratory fees, and incidental expenses. ROTC scholarship students will also receive \$900 annually for textbooks and a monthly tax-free stipend of up to \$500. Students must apply and be accepted into the AFROTC program and agree to accept an Air Force officer commission and service commitment upon graduation.

For details on Air Force scholarships, contact the AFROTC Detachment, McAlexander Fieldhouse, Room 303, 541-737-3291, 800-633-7352 or email: afrotc@oregonstate.edu. Website: <http://flying-beavs.com/> or <http://www.afrotc.com/>.

ALLOWANCES, UNIFORMS, TEXTBOOKS

Students on an Air Force ROTC scholarship or enrolled in the ROTC Professional Officer Course are paid a monthly stipend of up to \$500. Uniforms and textbooks for all Aerospace Studies courses are provided by the Air Force.

AIR FORCE ROTC PROGRAMS

Multiple Air Force ROTC programs are available. Students who qualify may elect to pursue either of these programs.

Four- or Three-Year Program

The four- or three-year program consists of the General Military Course: six quarters of lower-division Aerospace Studies classes, including a laboratory each term, and the Professional Officer Course: six quarters of upper-division Aerospace Studies classes, including a laboratory each term. Four- or three-year cadets attend four weeks of expeditionary summer field training (AS 304) prior to their junior year of college.

Previous military experience—ROTC, academy, or military service—may allow the Professor of Aerospace Studies to waive all or part of the General Military Course (first-year and sophomore years) for students enrolled in the four-year AFROTC program.

Students may enter the first-year class during the fall, winter, or spring term. Sophomore students may take the first-year and sophomore level courses concurrently. Prior to enrolling in the last two years of the program, the Professional Officer Course, the student must meet AFROTC qualification standards and requirements.

Two-Year Program

(Currently not available.)

This program provides an opportunity for students who did not enter ROTC previously. Entry is on a competitive basis. Selectees attend mandatory five-week summer field training (AS 304) two summers before commissioning with a bachelor's, master's or doctorate degree. Applicants must have one year remaining in college after the five-week field

training. The curriculum includes a five-week field training and six quarters of upper-division Aerospace Studies classes, including a laboratory each term.

COMMITMENTS

Students in the four-year program incur no obligation during their first two years in AFROTC unless on scholarship. The student agrees to accept a commission, if offered, only after enrolling in AS 311. High school scholarship students incur a commitment at the beginning of their sophomore year. Upon accepting their commissions, students incur a four-year commitment; pilots incur a 10-year obligation after completion of pilot training; combat systems officers and air battle managers incur a six-year obligation after initial training. Graduates pursuing medical school incur a four-year commitment after medical school.

STANDARDS

Cadets must be U.S. citizens of sound physical condition, maintain academic standards and high moral character. Air Force physical fitness standards must be met prior to attending field training and commissioning.

Cadets must be commissioned as Air Force officers prior to age 30.

FURTHER EDUCATIONAL OPPORTUNITIES

After completion of AFROTC requirements, advanced degrees may be sought by delaying active duty commitments. Some commissioned officers continue advanced studies through fully-funded Air Force Institute of Technology or other DoD-sponsored programs.

FIELD TRAINING

Under the Air Force ROTC program, one summer field training session is required, normally after the AS 200 year. Successful completion of field training is required for all cadets prior to membership in the Professional Officer Course. Students are paid varying amounts during field training.

AEROSPACE STUDIES MINOR

The Department of Air Force Studies offers a minor open to any OSU student. Students gain a broad exposure to the concepts of aerospace power, leadership and management, and general military studies. A student cannot use a course for this minor that is used being for their major.

Required (18)

- AS 311. Leadership Fundamentals, Team Building and Problem Solving (3)
- AS 312. Effective Supervision and Group Conflict Management (3)
- AS 313. Leadership, Ethics, Air Force Core Values and Accountability (3)
- AS 411. National Security Affairs (3)

- AS 412. World Regional Cultural Studies (3)
- AS 413. Preparation for Active Duty (3)

Electives (minimum 9)

- AS 211. The Evolution of Air and Space Power 1860–1945 (1)
- AS 212. The Evolution of Air and Space Power 1945–1990 (1)
- AS 213. The Evolution of Air and Space Power 1991–2025 (1)
- AS 320. Leadership Laboratory (1)
(maximum of 3 credits)
- AS 420. Leadership Laboratory (1)
(maximum of 3 credits)
- COMM 322. Small-Group Problem Solving (3)
- COMM 440. Theories of Conflict and Conflict Management (3)
- COMM 446. *Communication in International Conflict and Disputes (3)
- HST 316. The American Military, 1607–1865 (4)
- HST 317. *Why War? A Historical Perspective (4)
- HST 318. The American Military, 1865–Present (4)
- HST 464. American Diplomatic History (4)
- HST 465. *American Diplomatic History (4)
- MS 211. Military Science II: Foundations of Leadership I (2)
- MS 212. Military Science II: Foundations of Leadership II (2)
- MS 213. Military Science II: Fundamentals of Military Operations (2)

Footnote:

* Baccalaureate Core Course

COURSES

AS 111. FOUNDATIONS OF THE AIR FORCE PART I (1). The introduction to the Air Force mission and organization. Featured topics include Air Force dress and appearance stand standards; military customs and courtesies, Air Force heritage, overview of the Department of the Air Force, and Air Force core values. Basic oral and written communication will be assessed. **PREREQS:** Taken concurrently with AS 120 for fully eligible General Military Course students.

AS 112. FOUNDATIONS OF THE AIR FORCE PART II (1). Second part of the introduction to the Air Force mission and organization. Featured topics include Air Force career opportunities, Air Force benefits, military communication skills, Air Force installations, and look at the basic characteristics of war. Basic oral and written communication will be assessed. **PREREQS:** Taken concurrently with AS 120 for fully eligible General Military Course students.

AS 113. FOUNDATIONS OF THE AIR FORCE PART III (1). Third part of the introduction of what the Air Force is about and what the Air Force has to offer. Featured topics include basic leadership, team building, interpersonal skills, diversity in the Air Force, and the oath of office

and commissioning. Basic oral and written communication will be assessed. **PREREQS:** Taken concurrently with AS 120 for fully eligible General Military Course students.

AS 120. LEADERSHIP LABORATORY (1). Cadets learn officership, leadership, drill and ceremony, and customs and courtesies. Lab. Graded P/N. This course is repeatable for a maximum of 3 credits. **PREREQS:** Departmental approval. Taken concurrently with AS 111, AS 112 and AS 113. Only offered to students enrolled in the AFROTC officer commissioning program.

AS 211. EVOLUTION OF AIR AND SPACE POWER 1860-1945 (1). Study of the development of air power, concepts, and doctrine from its beginnings to the end of World War II. Historical examples examined include balloons, dirigibles, Wright Brothers' first flight, and the role of air power in World War I and II. Oral and written communication skills will be assessed. **PREREQS:** If enrolled in the AFROTC officer commissioning program, must be taken concurrently with AS 220.

AS 212. THE EVOLUTION OF AIR AND SPACE POWER 1945-1990 (1). Study of the development of air power, concepts, and doctrine during the Cold War. Historical examples examined include the Berlin Airlift, nuclear deterrence, and the role of air power employment in the Korean and Vietnam conflicts. Oral and written communication skills will be assessed. **PREREQS:** Taken concurrently with AS 220 if fully eligible General Military Course student.

AS 213. EVOLUTION OF AIR AND SPACE POWER 1991-2025 (1). Study of the factors contributing to the development of air power, concepts, and doctrine from the Persian Gulf War in 1990 to the present and beyond. Historical examples examined include the air campaigns used in the Gulf War, Kosovo crisis, Operations Enduring Freedom, Iraqi Freedom, and the Global War on Terrorism. Oral and written communication skills will be assessed. **PREREQS:** Taken concurrently with AS 220 if fully eligible General Military Course student.

AS 220. LEADERSHIP LABORATORY (1). Cadets are placed in element leadership positions in order to know and comprehend the Air Force concepts of command, discipline, tradition, and courtesies. Lab. Graded P/N. This course is repeatable for a maximum of 3 credits. **PREREQS:** Departmental approval. AS 220 is taken concurrently with AS 211, AS 212, and AS 213. Only offered to students enrolled in the AFROTC officer commissioning program.

AS 299. SPECIAL TOPICS IN AIR FORCE STUDIES (1-16). Supervised individual work. This course is repeatable for a maximum of 99 credits. **PREREQS:** Departmental approval required.

AS 304. FIELD TRAINING (6). Four-week field training (for four-year program students); supplements campus courses in developing leadership and discipline. Mission, organization, and functions of an Air Force base; marksmanship, survival, and physical training; aircrew and aircraft indoctrination; orientation on specific opportunities in career fields. Conducted at an Air Force base. Graded P/N. **PREREQS:** Department head approval required.

AS 306. FIELD TRAINING (6). Five-week field training (for two-year program applicants); education and training comparable to that received by the four-year program cadet during the freshman and sophomore years on campus and the four-week field training period (AS 304). Conducted at an Air Force base. **PREREQS:** Department head approval required.

AS 311. LEADERSHIP FUNDAMENTALS, TEAM BUILDING AND PROBLEM SOLVING (3). Emphasis on leadership and management fundamentals, team building and problem solving. Case studies are used to examine leadership

and management situations as a means of demonstrating and exercising practical application of the concepts being studied. Unique exercises will be utilized to emphasize team building and problem solving. Oral and written communication skills will be assessed. **PREREQS:** Must take concurrently with AS 320 if fully eligible Professional Officer Course student.

AS 312. EFFECTIVE SUPERVISION AND GROUP CONFLICT MANAGEMENT (3). Emphasis on situational leadership, group conflict management, effective supervision, professional knowledge, and communicative skills required of an Air Force officer. Unique case studies on leadership and management situations, and group conflict management will be utilized. Oral and written communication skills will be assessed. **PREREQS:** Taken concurrently with AS 320 if fully eligible Professional Officer Course student.

AS 313. LEADERSHIP, ETHICS, AIR FORCE CORE VALUES AND ACCOUNTABILITY (3). Emphasis on leadership ethics, leadership core values, leadership accountability, and professional knowledge. Unique case studies on leadership ethics and accountability will be utilized. Oral and written communication skills will be assessed. **PREREQS:** Taken concurrently with AS 320 if fully eligible Professional Officer Course Student.

AS 320. LEADERSHIP LABORATORY (1). Cadets are placed in line and staff leadership positions as a preparation for Air Force active duty. Cadet responsibilities include planning, organizing, directing, and controlling the activities of the cadet corps. Lab. Graded P/N. This course is repeatable for a maximum of 3 credits. **PREREQS:** Departmental approval. AS 304 or AS 306. AS 320 is taken concurrently with AS 311, AS 312 and AS 313. Only offered to students enrolled in the AFROTC officer commissioning program.

AS 405. READING AND CONFERENCE (1-16). Supervised individual work. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

AS 411. NATIONAL SECURITY AFFAIRS (3). Emphasis on the needs for national security, evolution of American defense strategy, policy, and organization. Examination of methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues will also be addressed. Refinement of oral and written communication skills will be assessed. **PREREQS:** Taken concurrently with AS 420 if fully eligible Professional Officer Course student.

AS 412. WORLD REGIONAL CULTURAL STUDIES (3). Study key transnational issues and religious or ethnic factors that shape the environment Air Force professionals must operate in. Emphasis will be on national security perspective of Africa, South Asia, East Asia, Latin America, Europe, Middle East and former Soviet Republics in transition. Refinement of oral and written communication skills will be assessed. **PREREQS:** Taken concurrently with AS 420 if fully eligible Professional Officer Course student.

AS 413. PREPARATION FOR ACTIVE DUTY (3). Emphasis on current military issues, evaluation systems, military commission, and operational risk management. Final preparation for the Air Force professional before commissioning. Refinement of oral and written communication skills will be emphasized. **PREREQS:** Taken concurrently with AS 420 if fully eligible Professional Officer Course student.

AS 420. LEADERSHIP LABORATORY (1). The senior-level Leadership Laboratory program places cadets in command, line, and staff positions as a preparation for commissioned Air Force service. Cadet responsibilities include planning, organizing, directing, coordinating, and controlling leadership laboratory and the activities of the cadet corps. Lab. Graded P/N. This course is repeatable for a maximum of 6 credits. **PREREQS:** Departmental approval. AS 304 or AS

306. AS 420 is taken concurrently with AS 411, AS 412 and AS 413. Only offered to students enrolled in the AFROTC officer commissioning program.

Minor

Military Science

The Military Science program is intended for students with the characteristics and attributes of a "scholar-athlete-leader." The program is specifically designed to give college students on-campus instruction and experience in the art of organizing, motivating, and leading others. It includes instruction in leadership to develop self-discipline, physical stamina, and professional bearing.

All courses offered by the Department of Military Science are fully accredited and applicable toward fulfilling academic requirements for graduation. The university offers each eligible student the opportunity to compete for a commission as an officer in the United States Army while earning a college degree. There are both basic and advanced programs with multiple entry points which can be tailored to a student's needs. Merit scholarship opportunities exist for students in any approved academic discipline, particularly in computer science, engineering, math, and science. Uniforms and books are provided free of charge. There are multiple opportunities for cadets to attend funded internships, training with Army units, multi-week trips to foreign countries across the world, Airborne, and Air Assault Training.

BASIC PROGRAM

The basic program is voluntary and is open to all students, comprising the 1- and 2-credit, lower-division courses listed below, and is normally completed during the freshman and sophomore years. Students may also satisfy the advanced program prerequisites or accelerate their progress through previous military experience or by completing MS 214, Military Science: Leader's Training Course (LTC)

(6 credits) held at Fort Knox, Kentucky. No military obligation is incurred for participation in basic program classes, and students can decide whether they want to apply for the advanced program. Additionally, students who only want to attend the lecture portion of the lower-division classes may do so and are not expected to wear uniforms.

ADVANCED PROGRAM

Students who desire to enroll in the two-year advanced program, comprising the 3-credit, upper-division courses listed below, must apply and be accepted. Only those students who have satisfied the basic program requirements described above are eligible.

Students in the advanced program receive \$450 to \$500 per month subsistence allowance during the school year. During the four-week summer Leadership Development Assessment Course (LDAC), they receive room and board, travel expenses to and from the program location, and approximately \$900 for the period involved. Veteran students enrolled in the ROTC program receive these amounts in addition to any other educational benefits.

The LDAC summer program is normally attended between the cadet's junior and senior years. The university awards 6 credits for successful completion.

CAMPUS-BASED SCHOLARSHIP PROGRAM

Each year, the Army ROTC program has dedicated four-, three-, and two-year scholarships awarded to local students attending or planning to attend OSU. Applications are accepted any time during the year. Applicants must meet physical requirements, have a minimum cumulative college GPA of 2.50, SAT score of 920+ or ACT of 19+, no criminal record, and be of good moral character. The scholarship pays full tuition, \$1,200 per year for books, and a stipend of \$300 to \$500 per month while the student is in school. For an application, contact the Department of Military Science at 541-737-3511.

SIMULTANEOUS MEMBERSHIP PROGRAM (SMP)

The Simultaneous Membership Program (SMP) is a voluntary program that allows ROTC students to join the Army National Guard and Army Reserve. Upon graduation from basic training and advanced training, students are eligible for the G.I. Bill, which, combined with tuition assistance, is worth over \$18,000 per year as a full-time student. Upon degree completion, students earn a commission in the active Army, National Guard or Army Reserve.

SERVICE OBLIGATION AND ACADEMIC DELAY

Current laws and regulations require each advanced program graduate to accept a commission upon graduation and to fulfill an eight-year military commitment. This may be satisfied by eight years of reserve forces duty in the USAR or ARNG or by a combination of active duty and reserve forces duty, usually four years active duty and four years reserve forces duty.

Delays in reporting to active duty may also be granted for up to four years to selected students who are enrolled in a full time program of instruction leading to an acceptable advanced degree. No additional service obligation is incurred by this academic delay.

MILITARY SCIENCE MINOR

The Department of Military Science offers a minor which is open to any OSU student. At least 18 of the 27 credits required in the minor must be military science courses.

Military Science (18)

- MS 111. Military Science I: Introduction to Army Leadership and ROTC (1)
- MS 112. Military Science I: Introduction to Basic Military Skills (1)
- MS 113. Military Science I: Introduction to Tactical Leadership (1)
- MS 211. Military Science II: Foundations of Leadership I (2)
- MS 212. Military Science II: Foundations of Leadership II (2)
- MS 213. Military Science II: Fundamentals of Military Operations (2)
- MS 311. Military Science III: Leadership and Management of Military Organization (3)
- MS 312. Military Science III: Leadership and Management of Military Organization (3)
- MS 313. Military Science III: Leadership and Management of Military Organization (3)
- MS 314. Military Science: Leader Development and Assessment Course (6)
- MS 411. Military Science IV: Adaptive Leadership (3)
- MS 412. Military Science IV: Preparation for Officership (3)
- MS 413. Military Science IV: Preparation for Officership (3)

A minimum of one course must be taken from the History list (minimum 3 credits) and two 3-credit courses are required (for a total of 6 credits) from the remaining categories. A student can not use a minor course for this minor that is also part of their major.

History

- HST 317. *Why War? A Historical Perspective (4)
- HST 318. The American Military, 1865–Present (4)
- HST 465. *American Diplomatic History (4)

Footnote:

* Baccalaureate Core Course

COURSES

MS 111. MILITARY SCIENCE I: INTRODUCTION TO ARMY LEADERSHIP AND ROTC (1). Introduction to ROTC, and its relationship to the U.S. Army. Role of the army officer, including leadership and management fundamentals. Introduction to land navigation. Lec/lab.

MS 112. MILITARY SCIENCE I: INTRODUCTION TO BASIC MILITARY SKILLS (1). Basic small unit tactics; land navigation; how to read a topographic map and use a magnetic compass; includes practical exercises.

MS 113. MILITARY SCIENCE I: INTRODUCTION TO TACTICAL LEADERSHIP (1). Customs and traditions of the U.S. Army; unit organization and missions. Types of careers available to army officers. Practical exercises. Lec/lab.

MS 130. MILITARY PHYSICAL CONDITIONING (1). Prepares military science cadets and university students to excel on the Army Physical Fitness Test (AFPT). This course is repeatable for a maximum of 11 credits.

MS 211. MILITARY SCIENCE II: FOUNDATIONS OF LEADERSHIP I (2). An examination of effective leadership. Development of interpersonal skills using practical exercises and case studies. Lec/lab.

MS 212. MILITARY SCIENCE II: FUNDAMENTALS OF LEADERSHIP II (2). History of the American soldier from 1775 to 1919; weaponry and tactics of the American Army. Use of battle analysis and war gaming included.

MS 213. MILITARY SCIENCE II: FUNDAMENTALS OF MILITARY OPERATIONS (2). Basic U.S. Army tactics at the individual, team, and squad levels. Integration of military skills in offensive and defensive operations. Lec/lab.

MS 214. MILITARY SCIENCE: LEADER'S TRAINING COURSE (LTC) (6). Four weeks of classroom and field training at Fort Knox, Kentucky. Can substitute for the first two years of the ROTC program. **PREREQS:** Meet minimum enrollment standards for the advanced ROTC program.

MS 311. MILITARY SCIENCE III: LEADERSHIP AND MANAGEMENT OF MILITARY (3). Study of military leadership, management, theory and dynamics of the military team. Applies principles to advanced military operations. Includes leadership, management, and organizational theory; group dynamics; functions of staff organizations; development of the commander's

estimate; combat orders and plans; troop leading procedures; application of leadership concepts in offensive and defensive operations at the squad, platoon, and company level; and fundamentals of small-unit tactics/patrolling. Lec/lab.

MS 312. MILITARY SCIENCE III: LEADERSHIP AND MANAGEMENT OF MILITARY (3). Study of military leadership, management, theory and dynamics of the military team. Applies principles to advanced military operations. Includes leadership, management, and organizational theory; group dynamics; functions of staff organizations; development of the commander's estimate; combat orders and plans; troop leading procedures; application of leadership concepts in offensive and defensive operations at the squad, platoon, and company level; and fundamentals of small-unit tactics/patrolling. Lec/lab.

MS 313. MILITARY SCIENCE III: LEADERSHIP AND MANAGEMENT OF MILITARY (3). Study of military leadership, management, theory and dynamics of the military team. Applies principles to advanced military operations. Includes leadership, management, and organizational theory; group dynamics; functions of staff organizations; development of the commander's estimate; combat orders and plans; troop leading procedures; application of leadership concepts in offensive and defensive operations at the squad, platoon, and company level; and fundamentals of small-unit tactics/patrolling. Lec/lab.

MS 314. MILITARY SCIENCE: LEADER DEVELOPMENT AND ASSESSMENT COURSE (6). Practical and theoretical instruction and training in soldier skills for four weeks. Practical leadership application and experience in a military environment. **PREREQS:** (MS 311 and MS 312 and MS 313)

MS 405. READING AND CONFERENCE (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor approval required.

MS 411. MILITARY SCIENCE IV: ADAPTIVE LEADERSHIP (3). Train, mentor and evaluate underclass cadets. Learn duties and responsibilities of Army staff office and apply processes. Execute and assess battalion training events. Understand and employ risk management process and use soldier fitness program to reduce and manage stress. Lec/lab.

MS 412. MILITARY SCIENCE IV: PREPARATION FOR OFFICERSHIP (3). Recent military history, national defense policy and its application in current world events. Includes military law; law of land warfare; small-unit administration; and ethics and professionalism with emphasis on applied leadership, management techniques, and ethical decision making. Designed to assist the future army officer with the transition from student to junior officer leader. Lec/lab.

MS 413. MILITARY SCIENCE IV: PREPARATION FOR OFFICERSHIP (3). Recent military history, national defense policy and its application in current world events. Includes military law; law of land warfare; small-unit administration; and ethics and professionalism with emphasis on applied leadership, management techniques, and ethical decision making. Designed to assist the future army officer with the transition from student to junior officer leader. Lec/lab.

Kyler (USN)

Minor

Naval Science

The NROTC program was established to educate and train qualified young men and women for service as commissioned officers in the unrestricted line Naval or Marine Corps Service. As the largest single source of Navy and Marine Corps officers, the NROTC program fills a vital need in preparing mature young men and women for leadership and management positions in an increasingly technical Navy and Marine Corps. NROTC midshipmen compete for selection into various warfare areas: pilot, naval flight officer, submarine officer, surface warfare officer, and special warfare officer. Upon successful completion of the program and graduation from Oregon State University, NROTC midshipmen receive a commission from the president of the United States as an ensign in the U.S. Navy or second lieutenant in the U.S. Marine Corps. The minimum active service requirement upon commissioning is service dependent; it is five years for Navy and four years for the Marines.

NROTC SCHOLARSHIPS

The Navy offers two-year, three-year, and four-year scholarships to qualified students seeking baccalaureate degrees. Students are selected through national competition, and are appointed midshipmen in the United States Naval Reserve by the secretary of the Navy. The Navy provides uniforms and pays tuition, a \$250 per term book stipend, and subsistence allowance of \$250 to \$400 per month depending on the student's undergraduate status. Scholarship students will be required to attend summer training after their freshman, sophomore, and junior years designed to familiarize them with the warfare areas of the Navy and Marine Corps.

To qualify for a national NROTC scholarship you must be a U.S. citizen not less than 17 years old by September 1 of your first year of college and no more than 23 years old that same year. Additionally you must be physically qualified by Naval or Marine Corps standards and have a minimum SAT score of 530 verbal, 520 math or a minimum ACT score of 22 verbal and 22 math. Sophomores not enrolled in the NROTC program can compete nationally for a two-year scholarship by March of their sophomore year. Competitive applicants should have completed three terms of calculus with a grade of C or better and earned a 3.0 cumulative grade-point average or better.

For more information about Naval ROTC scholarship opportunities, visit <http://www.nrotc.navy.mil/> or contact your local Navy-Marine Corps recruiting office. For specific information about OSU NROTC or questions regarding the two-year NROTC scholarships, visit <http://nrotc.oregonstate.edu/> or call the unit at 541-737-5620 or 541-737-6289.

COLLEGE PROGRAM

Students who are not awarded a national scholarship and are accepted to OSU can still participate in Naval ROTC through the college program by applying through the OSU Department of Naval Science. College program midshipmen participate in all aspects of the NROTC program and may be eligible for a scholarship provided they have been active in the program for a minimum of one academic term. To be competitive, a student should not have less than a B (3.0) grade-point average, meet aptitude and physical fitness standards, and receive a favorable recommendation from the professor of naval science. If selected, students receive the same benefits as national scholarship recipients.

College program midshipmen who are not awarded a scholarship must be selected for "advanced standing" status before beginning their junior year to remain in the NROTC program. If selected for "advanced standing" students receive a monthly subsistence allowance of \$350 their junior year and \$400 their senior year. College program midshipmen receive a commission upon graduation and have the same professional opportunities as scholarship midshipmen to select careers in all warfare areas of the Navy and Marine Corps. For specific information about the college program, visit <http://nrotc.oregonstate.edu/> or call the unit at 541-737-5620 or 541-737-6289.

Any university student may take naval science courses for credit. However, such students are classified as naval science students, not enrolled in the NROTC program and are not eligible to take NS 450, At Sea Training.

NAVAL SCIENCE MINOR REQUIREMENTS

NROTC candidates applying for any of the NROTC programs must:

1. be a citizen of the United States or become a citizen before entering the advanced course;
2. be accepted for admission or enrolled in the university;
3. be at least 17 years of age upon enrollment and under 25 years (27 for the college program) on June 30 of the calendar year in which eligible for commissioning;
4. be physically qualified in accordance with the standards established by the Department of the Navy;
5. possess a satisfactory record of moral integrity and have potential officer characteristics;
6. have no moral obligations or personal convictions preventing them from conscientiously bearing arms and supporting and defending the Constitution of the United States against all enemies foreign and domestic.

STATUS AND CURRICULUM

Students enrolled in the NROTC program are not on active duty. They wear the uniform only for drills, on special occasions, and during the summer training periods.

The program of study fits into curricula leading to baccalaureate degrees. Additionally, U.S. Navy-option scholarship students must complete three terms of calculus by the end of their sophomore year and three terms of calculus-based physics by the end of their junior year.

NAVAL SCIENCE MINOR

The Department of Naval Science offers a minor in which the student, including a student not pursuing a commission, may choose between a Navy sequence and a Marine Corps sequence.

A minimum of 30 credits are required for the minor; 18 credits core requirements, and 12 credits from one of the two sequences. Students may elect to have their minor designated on their transcript.

Naval Science Minor Core Requirements (18 credits)

- NS 111. Introduction to Naval Science (3)
 NS 112. U.S. Naval History I (3)
 NS 113. U.S. Naval History II (3)
 NS 211. Leadership and Management (5)
 NS 413. Leadership and Ethics (4)

Navy Sequence (at least 12 credits from list below)

- NS 212. Naval Engineering I (5)
 NS 311. Navigation I (5)
 NS 313. Naval Operations and Seamanship (3)
 NS 411. Naval Weapons Systems (5)

Marine Corps Sequence (12 credits)

- NS 321. Evolution of Warfare I (3)
 NS 322. Evolution of Warfare II (3)
 NS 421. Amphibious Warfare I (3)
 NS 422. Amphibious Warfare II (3)

Total credits = 30

COURSES

NS 111. INTRODUCTION TO NAVAL SCIENCE (3). Naval organization and administration; organization of the Navy or Marine Corps, the Navy and Marine Corps as a career, responsibilities and commitments as an officer in the Navy or Marine Corps.

NS 112. U.S. NAVAL HISTORY I (3). A study of U.S. seapower and maritime affairs from the American Revolution through 1900. Lec/lab. **PREREQS:** NS 112, NS 113 must be taken in order.

NS 113. U.S. NAVAL HISTORY II (3). A study of U.S. seapower and maritime affairs from 1900 through present day. Lec/lab. **PREREQS:** NS 112

NS 211. LEADERSHIP AND MANAGEMENT (5). Overview of the principles, philosophies, and methodologies of effective Naval leadership with emphasis on moral, ethical actions with respect to the principles of authority, responsibility, and accountability as they apply to military organizations.

NS 212. NAVAL ENGINEERING (5). Propulsion, basic engineering systems theory, and concepts application in modern ship and jet propulsion. Course will include auxilliary systems, theory and design of shipboard auxilliaries, ship design, and damage control/safety procedures. Offered every other winter term. **PREREQS:** NS 111 and .

NS 311. NAVIGATION (5). Introduction to navigation including piloting, dead reckoning, and voyage planning. Course includes nautical rules of the road, maneuvering board, relative motion, and shipboard external communications. **PREREQS:** .

NS 313. NAVAL OPERATIONS AND SEAMANSHIP (3). Theory of shiphandling, communications, shipboard evolutions, heavy weather, case study discussions. **PREREQS:** (NS 311 and NS 312)

NS 321. EVOLUTION OF WARFARE I (3). The art and concepts of warfare from the beginning of recorded history to present [the Age of Napoleon]. **PREREQS:** NS 321, NS 322 must be taken in order.

NS 322. EVOLUTION OF WARFARE II (3). The art and concepts of warfare post-WWI (from the beginning of the Industrial Revolution) to present, the current world political situation and U.S. foreign policy and their effects on the Naval services, and forecast for the future. **PREREQS:** NS 321

NS 323. NAVAL SCIENCE III: MARINE CORPS OPTION (3). Preparation for officer candidates school and practical field exercises. For U.S. Marine Corps candidates option. **PREREQS:** NS 322 and /or prior approval required.

NS 405. READING AND CONFERENCE (1-16). To prepare midshipmen returning from a leave of absence from the Naval ROTC program for commissioning and entrance into the fleet. This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor approval required.

NS 411. NAVAL WEAPONS SYSTEMS (5). Introduction to the theory and development of U.S. Naval weapons systems, current weapons systems types, platforms, and employment. Course will include naval weapons systems types, launch platforms, characteristics and employment. **PREREQS:** NS 111

NS 413. LEADERSHIP AND ETHICS (4). Junior Officer administrative responsibilities with emphasis on moral and ethical decision making of Naval leaders. **PREREQS:** NS 211 and approval of Professor of Naval Science required if student has not completed NS 211 with C- or better.

NS 421. AMPHIBIOUS WARFARE I (3). Amphibious warfare from the beginning of recorded history to WW II.

NS 422. AMPHIBIOUS WARFARE II (3). Amphibious warfare post-WW II to present, current world political situation and U.S. foreign policy and their effects on the future of expeditionary warfare.

NS 450. AT-SEA TRAINING (6). Four-week to six-week training cruise taken aboard U.S. Naval ships or submarines as arranged by professor of Naval Science.

One of the largest academic units on campus, with 10 departments and programs, the College of Science offers students undergraduate and graduate degrees in classical disciplines as well as in integrated, cross-disciplinary areas

In addition, the college offers 12 pre-professional programs to prepare students for a career in the medical profession or in science education. The College of Science also teaches basic science courses essential to the education of every student at OSU.

Research and instruction in the College of Science are enhanced by their context within a university of outstanding professional schools in engineering, oceanography, agriculture, forestry, and pharmacy. Science students can enrich their degrees with courses from these areas. They also have opportunities to make original discoveries while working on one of the many research projects under internationally renowned scientists.

MAJORS

The majors of the College of Science are informally divided into the following groups:

Biological Sciences:

Biochemistry and Biophysics, Biology, Microbiology, Molecular and Cellular Biology (graduate only), Zoology.

Physical, Computational, and Mathematical Sciences:

Chemistry, Mathematics, Physics, Statistics (graduate only)

Pre-professional Programs:

General Science

DOUBLE DEGREES IN EDUCATION OR INTERNATIONAL STUDIES OR SUSTAINABILITY

Undergraduates with majors in the College of Science can earn a second degree in education or international studies or sustainability. See the College of Education or International Programs or Department of Forest Ecosystems and Society sections of this catalog for more information.

PRE-PROFESSIONAL PROGRAMS

Special programs in health-related fields are offered by the College of Science to help students meet entrance requirements for professional schools in clinical laboratory science, dentistry, medicine, nursing, occupational therapy, optometry, pharmacy, physical therapy, physician assistant, podiatry, and veterinary medicine.

CURRICULA IN SCIENCE

Curricula in science lead to the degrees of bachelor of arts (BA), bachelor of science (BS), master of arts (MA), master of science (MS), professional science master's (PSM), and doctor of philosophy (PhD). (See the Graduate School for advanced degree requirements.) The college also participates in the Master of Arts in Interdisciplinary Studies (MAIS) program.

TEACHER CERTIFICATION

All professional teacher education occurs in the College of Education. The following majors in the College of Science are suitable for teaching middle school and high school and have a pre-education

option available: biology, chemistry, mathematics, and physics. Students planning to teach in elementary or middle school may use the General Science/Pre-Education option.

Certain mathematics courses (MTH 211, MTH 212, MTH 390) are highly recommended for students who plan to teach elementary or secondary mathematics. See the College of Education section of this catalog for admission to the teacher licensure programs.

SUMMER COURSES FOR SECONDARY SCHOOL SCIENCE AND MATHEMATICS TEACHERS

During the summer session, the College of Science offers a number of courses designed especially for high school teachers of science and/or mathematics. For offerings and full descriptions see the Summer Session website.

SCHOLARSHIPS

The College of Science offers a variety of scholarships to currently enrolled College of Science students who have taken at least 28 credits at OSU. For more information and application forms contact the College of -Science or see <http://www.science.oregonstate.edu/node/108>.

DEGREE REQUIREMENTS

To graduate with a BS degree in the College of Science, undergraduate students must fulfill the following requirements:

University Baccalaureate Core (48)

College of Science Requirements (These credits can also fulfill part of the baccalaureate core requirements.)

- Mathematical sciences (12)
- Physical, earth, and/or biological sciences (15) to include a two-term sequence (At least one term in biological science and one term in physical or earth science. Must include a two-term sequence in one of these sciences.)
- Department requirements (see each department)

Some departments also grant a BA degree that requires a full year of a college-level (200-level or above) foreign language and at least 9 credits of College of Liberal Arts electives in addition to credits required for the baccalaureate core. See the department listings for specific requirements.

DEPARTMENTAL REQUIREMENTS

A minimum 2.00 GPA is required in College of Science majors and minors; (S/U grading is not allowed in science majors or minors).

Mathematics and mathematical sciences degrees have a 2.25 GPA requirement for required upper-division courses.

The curricula are shown for each major; some substitutions can be made with

MANAGEMENT FOR SCIENCE PROFESSIONALS GRADUATE CERTIFICATE

PSM Director
2082 Cordley Hall
Corvallis OR 97331
541-737-5259
Email: kirstin.carroll@oregonstate.edu
Website: <http://psm.science.oregonstate.edu/>

The Management for Science Professionals graduate certificate is designed for individuals in science or science-related fields seeking professional development. Formal training in business management, communication, and ethics allows graduates of this program to broadly communicate with diverse groups of people and move more rapidly into leadership positions within their organizations. This graduate certificate program is ideal for students of professional science tracks like veterinary medicine or pharmacy, current industry or agency employees who want to advance in their careers, or continuing students envisioning careers with future managerial responsibilities.

A graduate certificate is awarded to individuals who complete the professional series of courses (6 courses for 18 credits) offered as part of the Professional Science Master's degree program. If you are not a Professional Science Master's student or enrolled in the graduate certificate program, you can currently only register for these classes through Ecampus. Non-degree seeking students who may later wish to apply to a graduate degree program should be aware that a maximum of 6 credits earned as a non-degree seeking student may be transferred to a graduate certificate or degree program.

Please go to <http://psm.science.oregonstate.edu/graduate-certificate> for additional information and details on how to apply.

Required (18 credits)

COMM 550. Communication and the Practice of Science (3)

PHL 547. Research Ethics (3)

PSM 513. Professional Skills (3)

PSM 565. Accounting and Finance for Scientists (3)

PSM 566. Project Management and Marketing Scientific Technologies (3)

PSM 567. Innovation Management (3)

COURSES

PSM 506. PROJECTS (1 or 16). This course is repeatable for a maximum of 99 credits.

PSM 507. SEMINAR (1-16). This course is repeatable for a maximum of 99 credits.

PSM 513. PROFESSIONAL SKILLS (3). Students will work in teams with off-campus mentors to

address a contemporary problem in a scientific field within the context of an existing business. This collaborative project will provide students with opportunities to integrate and apply their collective knowledge of business management, communication, and science to create innovative solutions. Project management and leadership styles will also be covered, and a final report and presentation are usually required. **PREREQS:** ((COMM 550 or COMM 512) and PHL 547 and PSM 565 and PSM 566 and PSM 567*)

PSM 525. ADVANCED SCIENTIFIC AND TECHNICAL WRITING (4). Combines scientific and technical writing with science journalism. Students will draw on a data set (preferably their own) to draft a scientific journal article, short grant proposal, magazine article, and letter of inquiry. They will also critically evaluate and edit documents by reviewing classmates' drafts. **CROSSLISTED** as WR 525.

PSM 565. ACCOUNTING AND FINANCE FOR SCIENTISTS (3). Students develop business management skills by learning principles of managerial and financial accounting and understanding profit and loss statements, cost analysis, and investment risks. Individuals utilize basic financial tools needed to develop business proposals and successfully manage scientific projects in public and private work sectors.

PSM 566. PROJECT MANAGEMENT AND MARKETING SCIENTIFIC TECHNOLOGIES (3). Students gain an understanding of marketing principles and global markets with a focus on scientific technologies. Project management skills needed to effectively manage diversity, conflict and change in corporate, government and nonprofit environments as well as entrepreneurial ventures will be emphasized. **PREREQS:** PSM 565

PSM 567. INNOVATION MANAGEMENT (3). Students learn about different types of innovation, development and implementation of new technologies, and intellectual property. Student teams develop and present business plans as term projects. Structuring small business enterprises, project planning and management, and commercialization of new products and services prepare individuals for leadership roles in the innovation process. **PREREQS:** (PSM 565 and PSM 566)

PSM 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.

Nuclear Chemistry
Organic Chemistry
Physical Chemistry

Graduate Minor

Chemistry

The Department of Chemistry offers BS, BA, MS, MA, MAIS, and PhD degrees in Chemistry. The facilities, faculty, and curricular offerings in this department are approved by the American Chemical Society.

Chemistry provides a gateway to many professions. An undergraduate chemistry degree may serve as preparation for professional work in chemistry and related sciences; as a foundation to pursue applied fields including pharmaceutical chemistry, forensics, biotechnology, medicine, chemical processing, electronics, agricultural and food science, oceanography, marketing of scientific equipment or supplies, environmental sciences, and atmospheric science. It may also serve as a core for pre-professional students pursuing graduate work in pure or applied chemistry, and for those seeking positions as research chemists and technical experts in commercial laboratories and chemical industries, positions in local, state, and federal government facilities, and for postgraduate work leading to teaching positions in universities, colleges, community colleges, and high schools.

There are several degree programs available to undergraduate chemistry majors. All curricula involve general, organic, analytical, physical, and inorganic chemistry course work, plus two to three years of laboratory work in chemistry.

All chemistry majors take part or all of Experimental Chemistry, a six-term laboratory course sequence consisting of 22 project-style experiments. This program replaces the traditional separate divisional laboratory courses in chemistry taught at many universities. Students in this Integrated Laboratory Program work on two to five projects per term, each of which includes components of synthesis, analysis, theory and report writing spanning all areas of modern chemistry. One goal of the program is to provide students intensive hands-on experience in modern chemical instrumentation and computers as a foundation for both graduate studies and employment in science after graduation.

Most chemistry majors take advantage of the opportunity to become involved in research projects in the department. Working with a research group is an exciting way to apply ideas and skills acquired in formal course work. Students work closely with a faculty member and research group to set up their projects. Undergraduates also have the opportunity to present their research as a poster at the annual departmental poster session entitled "Chemistry in Action." Scheduling research time is flexible but three hours of work per week are required per credit. Areas of research available are highly varied and include synthesis of new compounds and materials, development and applications of chemical instrumentation, laser spectroscopy, surface science, reaction mechanisms, design and synthesis of polymers and optical materials, environmental chemistry, bioanalytical methods, and nuclear chemistry. Research experience is helpful when considering graduate work in chemistry and provides valuable experience for entering the job market. Students may also obtain valuable experience and credits for internships.

GRADUATE STUDIES

The Department of Chemistry offers graduate work leading toward Master of Arts, Master of Science, and Doctor of Philosophy degrees in analytical chemistry, inorganic chemistry, nuclear and radiation chemistry, organic chemistry, physical chemistry, and solid state chemistry. The major emphasis of the PhD program is on research. A nonthesis master's degree is available. Most graduate students working on a thesis in chemistry are supported either as graduate teaching assistants or as graduate research assistants.

CHEMISTRY (BA, BS, CRED, HBA, HBS)

BS Degree in Chemistry

The BS degree in Chemistry features two tracks, each with a chemistry core and a selection of accompanying options. Students in either track or any option with good academic records and letters of recommendation will be well prepared and competitive for continued graduate education in chemistry or related areas.

• **Track One** is well suited for students intending to pursue a graduate degree in chemistry or a closely related area. It provides the most rigorous and complete chemistry background and the most extensive laboratory experience. The curriculum is approved by the American Chemical Society (ACS) and has two options: **advanced biochemistry and advanced chemistry**. Both options include 6–12 credits of career-supportive electives (CSE) in advanced chemistry or related disciplines. These CSE courses are approved by the advisor and are intended to strengthen the student's background in areas related to career goals. Students choosing the advanced chemistry option must take at least 3 credits in advanced laboratory courses or research. Track-One graduates are eligible for ACS certification by the department chair and can become full members of the ACS without the requirement of work experience.

• **Track Two** is suited for chemistry majors who want to gain extensive experience in a secondary area, target a particular career direction or continue with graduate education in chemistry or related areas. **Track Two options include: biochemistry, business, chemistry education, chemical engineering, environmental chemistry, forensic science, materials science, and pre-medicine**. The multidisciplinary approach of Track Two enhances preparation and opportunities for employment in electronics, polymers, or biotechnology (the biochemistry, chemical engineering, or materials science options), for careers in environmental science (environmental chemistry option), work in crime labs (forensic science option), or teaching in high schools (chemistry education option). The Track Two curriculum is not approved by the American Chemical Society. It consists of a core of chemistry courses (79–81 credits) and a combination of 8 to 11 courses (30–37 credits) that defines each option.

BA DEGREE IN CHEMISTRY

The BA degree in Chemistry is appropriate for chemistry students interested in obtaining a broader academic background through a second-language requirement and additional liberal arts

courses (9 credits). It also includes 6–12 credits of approved career-supportive electives to allow students to choose courses in advanced chemistry or related disciplines to support their career goals. At least 3 credits are to be in advanced laboratory courses or research. This degree may lead to international opportunities, especially if coupled with the International Degree Program at OSU.

All Undergraduate Chemistry Degrees

The baccalaureate core requirements are met by:

Fitness: HHS 231, plus one HHS course (3)
or any PAC course
Speech (3)
Writing courses (6)
Perspectives courses (12)
One Biology course (4)
One Difference, Power, and Discrimination course (DPD)(3)
Synthesis courses (6)

The quarters in which these are taken are flexible, except that synthesis courses must be taken at the junior and senior level. Chemistry majors or minors may not use S/U grading in courses that meet Department of Chemistry or College of Science requirements.

The timing of courses for all degrees and options can be critical, especially because of prerequisites. More detailed information and suggestions about when to take courses are found on the Chemistry Department website at <http://www.chemistry.oregonstate.edu/>. Students should meet with their advisor every term. For many options in Track Two, students will also be directed to an additional advisor in another department for courses in that option.

For any option involving biochemistry courses, it is strongly recommended that students select:

BI 212. *Principles of Biology (4), as the biology course to fulfill the baccalaureate core requirement.
BI 314. Cell and Molecular Biology (4), is also recommended. Prereqs for BI 314 are BI 211, BI 212, BI 213.

For options in which CH 462, ^Experimental Chemistry II (3), is the recommended WIC course, it is strongly recommended that CH 422, Analytical Chemistry (3), be taken as a corequisite.

Chemistry offers the following courses through the University Honors College (UHC). Chemistry students in the UHC may substitute these courses for courses in the regular sequences:

CH 224H, CH 225H, CH 226H. *Honors General Chemistry (5,5,5)
CH 361H, CH 362H. Experimental Chemistry I (3,3)
and CH 461H. Experimental Chemistry II (3)
and CH 462H, CH 463H, CH 464H.
^Experimental Chemistry II (3,3,3)

Track-One BS Degree in Chemistry
(See the Advanced Biochemistry option and Advanced Chemistry option)

Chemistry Core (76)

CH 231, CH 232, CH 233. *General Chemistry (4,4,4)

and CH 271, CH 272, CH 273.

*Laboratory for CH 231, 232, 233 for Chemistry Majors (1,1,1)

CH 334, CH 335, CH 336. Organic Chemistry (3,3,3)

CH 361, CH 362. Experimental Chemistry I (3,3)

CH 421, CH 422. Analytical Chemistry (3,3)

OPTIONS**ADVANCED BIOCHEMISTRY OPTION**

This track-one option leads to a degree approved by the American Chemical Society. It is designed for students continuing their chemistry education in graduate school or seeking careers directly in the chemistry workforce. It provides a rigorous chemistry foundation with extensive laboratory experience. The mix of advanced courses in the option is modified to emphasize biochemistry principles and laboratory techniques.

BB 490, BB 491, BB 492. Biochemistry (3,3,3)
 BB 493. Biochemistry Laboratory (3)
 BB 494. Biochemistry Laboratory (3)
 CH 411. Inorganic Chemistry (3)
 or CH 412. Inorganic Chemistry (3)

Select two courses from the following (6):

CH 461. Experimental Chemistry II (3)
 CH 462. ^Experimental Chemistry II (3)
 CH 463. ^Experimental Chemistry II (3)
 CH 464. ^Experimental Chemistry II (3)

Select 6 credits (courses approved by the advisor by the end of the winter quarter of the junior year):

Career-supportive electives (CSE) (6)

Total=33

Footnote:

^ Writing Intensive Course (WIC)

ADVANCED CHEMISTRY OPTION

This track-one option leads to a degree approved by the American Chemical Society. Designed for students continuing their chemistry education in graduate school or seeking careers directly in the chemistry workforce. This provides the most rigorous and complete chemistry foundation with the most extensive laboratory experience. Undergraduate research is strongly encouraged. Knowledge and skills are developed in organic, analytical, physical and inorganic chemistry. Six advanced laboratory courses are required. Students have a choice of electives that support their career goals.

BB 450. General Biochemistry (4)
 or BB 490 and BB 491. Biochemistry (3,3)
 CH 411, CH 412. Inorganic Chemistry (3,3)
 CH 461. Experimental Chemistry II (3)
 CH 462, CH 463, CH 464. ^Experimental Chemistry II (3,3,3)

MTH 256. Applied Differential Equations (4)
 or MTH 341. Linear Algebra (3)

Select 12 credits (courses approved by the advisor by the end of the winter quarter of the junior year; must include 3 credits of upper-division lab, with CH 401 or CH 403 strongly recommended).

Career-supportive electives (CSE) (12)

Note: BB 491, Biochemistry (3), fulfills 2 credits of Career Supported Electives if taken with BB 490, Biochemistry (3).

Total=36–38

BIOCHEMISTRY OPTION

The Biochemistry option is for students interested in working in biotechnology areas. Students can earn a BS degree in Chemistry in four years while targeting a career direction in biotechnology or preparing for graduate studies in chemistry. This option includes nine courses in biology, biochemistry including lab, and genetics and molecular biology.

The Biochemistry option is designed for the Track-Two BS degree in Chemistry.

BB 490, BB 491, BB 492. Biochemistry (3,3,3)

Select two courses from the following:

BB 493. Biochemistry Laboratory (3)
 BB 494. Biochemistry Laboratory (3)

Plus:

BI 212, BI 213. *Principles of Biology (4,4)
 BI 311. Genetics (4)
 BI 314. Cell and Molecular Biology (4)

Total=31

BUSINESS OPTION

The Business option is designed for chemists interested in, for example, opening a small business, working in sales and marketing, or as preparation for entering the MBA program at OSU¹. Students earn a BS degree in Chemistry in four years and can also fulfill course work required as part of the minor in Business and Entrepreneurship². This option is also a good stepping stone for law school or graduate studies in chemistry. The option includes six courses in accounting, law, finance, organizational systems.

The Business option is designed for the Track-Two BS degree in Chemistry.

Required (27–28 credits)

BA 215. Fundamentals of Accounting (4)
 BA 260. Introduction to Entrepreneurship (4)
 BA 351. Managing Organizations (4)
 BA 360. Introduction to Financial Management (4)
 BA 390. Marketing (4)
 ECON 201. *Introduction to Microeconomics (4)
 ST 314. Introduction to Statistics for Engineers (3)
 or ST 351. Introduction to Statistical Methods (4)

Required Electives (4 credits)

Select one course from among the three following suggested sets:

Suggested for emphasis in small business:

BA 362. Social Entrepreneurship and Social Initiatives (4)
 BA 363. Technology and Innovation Management (4)
 BA 460. Venture Management (4)

OR**Suggested for emphasis in sales and marketing:**

BA 491. Personal Selling (4)

OR**Suggested for MBA preparation:**

BA 357. Operations Management (4)³

Total=31–32

Footnotes:

¹ Students who complete these business courses and some additional courses may apply upon graduation to the OSU College of Business to be accepted into a 45-credit, three-term MBA program. All students serious about pursuing an OSU MBA should make an appointment with the College of Business MBA advisor, 541-737-3716, <http://www.business.oregonstate.edu/mba>. Students should also take BA 211, Financial Accounting (4) and BA 213, Managerial Accounting (4) at the undergraduate level.

² There are additional requirements for the minor in Business and Entrepreneurship. For example, the minor also requires an orientation course, GPA requirements, and academic residency requirements. You are advised to meet with an advisor in the College of Business.

³ BA 357 requires a special override from an advisor in the COB because chemistry majors substitute ST 351 or ST 314 for BA 276.

CHEMICAL ENGINEERING OPTION

The Chemical Engineering option offers selected chemical engineering concepts that may enhance career opportunities in areas such as electronics, polymers, and biotechnology, or prepare students for graduate studies in chemistry or related fields. Students can earn a BS degree in Chemistry in four years while targeting a career direction. This option includes nine courses in basic engineering and chemical engineering including mass and fluid transport, reaction engineering, and separations processes.

The Chemical Engineering option is designed for the Track-Two BS degree in Chemistry.

The track-two core requirements are slightly modified for the Chemical Engineering option:

Required/Recommended for Core:

PH 211, PH 212, PH 213. *General Physics with Calculus (4,4,4) *Required*
 CH 462. ^Experimental Chemistry II (3) *Recommended*

Chemical Engineering**Option Requirements**

CHE 211. Material Balances and Stoichiometry (4)
 CHE 212. Energy Balances (4)
 CHE 411. Mass Transfer Operations (4)
 CHE 443. Chemical Reaction Engineering (4)
 ME 331. Introductory Fluid Mechanics (4)
 ME 332. Heat Transfer (4)
 MTH 256. Applied Differential Equations (4)

Select one course from below for 3–4 credits:

CH 401. Research (3)
 or CHE 401. Research (3)
 CHE 213. Process Analysis (4)
 CHE 311. Thermodynamics (3)
 CHE 312. Chemical Engineering Thermodynamics (3)
 CHE 331. Transport Phenomena I (4)
 CHE 332. Transport Phenomena II (3)
 CHE 361. Chemical Process Dynamics and Simulation (3)
 CHE 444. Thin Film Materials Processing (4)
 CHE 445. Polymer Engineering and Science (4)
 or ENGR 213. Strength of Materials (3)
 CHE 461. Process Control (3)
 ENGR 321. Materials Science (3)

Total=33–34**CHEMISTRY EDUCATION OPTION**

The Chemistry Education option is directed at students planning to teach high school chemistry or continuing on with graduate education and teaching careers at community colleges. Students can earn a BS degree in Chemistry in four years and obtain experience that can be useful when applying for the Master of Science in Science Education from OSU. This option includes 11 courses covering teaching methods, a secondary area, and undergraduate teaching internship and seminar in chemistry.

The Chemistry Education option is designed for the Track-Two BS degree in Chemistry.

CH 407. Chemistry Teaching Seminar (1)
 CH 410. Undergraduate Teaching Internship (3)
 PSY 202. *General Psychology (3)
 SED 409. Field Practicum: Science and Mathematics (3)
 SED 412. Technology Foundations for Teaching Math and Science (3)
 SED 413. Inquiry in Science and Science Education (3)
 Second Endorsement electives (15)

Select one elective course from list below for 3 credits:

PSY 350. Human Lifespan Development (3)
 SED 414. Inquiry in Mathematics and Mathematics Education (3)
 TCE 216. Purpose, Structure, and Function of Education in a Democracy (3)
 TCE 253. Learning Across the Lifespan (3)

Note: Courses in the second endorsement area are to be from a list approved by the College of Education and must be different from those required in the

chemistry core. The courses in this option are designed to interface with the Professional Teacher Master of Science Education program for prospective high school teachers through the College of Education at OSU.

Total=34**ENVIRONMENTAL CHEMISTRY OPTION**

The Environmental Chemistry option is structured to provide a quality foundation for working in government, industrial or university labs studying the behavior of chemicals in the environment. It also is suited to graduate education in chemistry or environmental chemistry. Students can earn a BS degree in Chemistry in four years while targeting their career. This option includes 11 courses in biology, microbiology, toxicology, environmental chemistry and health, soil science, and hydrology.

The Environmental Chemistry option is designed for the Track-Two BS degree in Chemistry.

The track-two core requirements are slightly modified for the Environmental Chemistry option:

Required for Core:**Replace CH 324 with:**

CH 421, CH 422. Analytical Chemistry (3,3)
 and CH 461. Experimental Chemistry II (3)

Only one term of inorganic chemistry:

CH 411. Inorganic Chemistry (3)
 or CH 412. Inorganic Chemistry (3)

Requirements

BI 212, BI 213. *Principles of Biology (4,4)
 BI 314. Cell and Molecular Biology (4)
 MB 302, MB 303. General Microbiology and Lab (3,2)
 ST 201. Principles of Statistics (4)
 or ST 314. Introduction to Statistics for Engineers (3)
 TOX 430. Chemical Behavior in the Environment (3)
 TOX 455. Ecotoxicology: Aquatic Ecosystems (3)

Select three courses from below for 9–10 credits:

BI 211. *Principles of Biology (4)
 BI 370. Ecology (3)
 CE 514. Groundwater Hydraulics (3)
 CH 401. Research (3)
 CH 692. Environmental Transformation of Organic Compounds (3)
 CSS 305. Principles of Soil Science (4)
 [Taught at EOU LaGrande campus only.]
 or SOIL 205. *Soil Science (4)
 CSS/SOIL 535. Soil Physics (3)
 CSS/SOIL 545. Geochemistry of Soil Ecosystems (4)
 ENVE 531. Fate and Transport of Chemicals in Environmental Systems (4)
 ENVE 532. Aqueous Environmental Chemistry (4)
 ENVE 541. Microbial Processes in Environmental Systems (4)
 GEO 487. Hydrogeology (4)
 H 412. Air Quality and Public Health (3)

TOX 413/TOX 513. Environmental Toxicology and Risk Assessment (3)
 TOX 490/TOX 590. Environmental Forensic Chemistry (3)

Total=35–36**FORENSIC SCIENCE OPTION**

The Forensic Science option is appropriate for students interested in working in a crime lab or pursuing a graduate degree in forensic science or chemistry. Students can earn a BS degree in Chemistry in four years and also take a combination of courses that enhance a chemistry major's background in biology, biochemistry, and related areas that can be important in forensic science.

The Forensic Science option is designed for the Track-Two BS degree in Chemistry.

The track-two core requirements are slightly modified for the Forensic Science option as follows:

Required for Core:**Replace CH 324 with:**

CH 421, CH 422. Analytical Chemistry (3,3)
 CH 461. Experimental Chemistry II (3)

Only one term of inorganic chemistry:

CH 411. Inorganic Chemistry (3)
 or CH 412. Inorganic Chemistry (3)

Requirements

BI 212, BI 213. *Principles of Biology (4,4)
 BI 314. Cell and Molecular Biology (4)
 BB 450, BB 451. General Biochemistry (4,3)
 or BB 490 and BB 491. Biochemistry (3,3)
 BB 494. Biochemistry Laboratory (3)
 TOX 411/TOX 511. Fundamentals of Toxicology (3)

Select three courses from below for 7–12 credits

BB 492. Biochemistry (3)
 BI 311. Genetics (4)
 CH 401. Research (3)
 CH 410. Internship (2-3)
 CH 424. Bioanalytical Chemistry (3)
 CH 661. Separations: Chromatography and Related Methods (3)
 CH 692. Environmental Transformation of Organic Compounds (3)
 CH 697. Mass Spectroscopy of Organic Compounds (3)
 MB 302. General Microbiology (3)
 MB 303. General Microbiology Lab (2)
 ST 201. Principles of Statistics (4)
 or ST 351. Introduction to Statistical Methods (4)
 TOX 490/TOX 590. Environmental Forensic Chemistry (3)

Z 331. Human Anatomy and Physiology (3)
 Z 341. Human Anatomy and Physiology Lab (2)

Total=31–37**MATERIALS SCIENCE OPTION**

The Materials Science option is customized to include applied courses in a variety of materials areas to enhance career opportunities in, for example, electronics, polymers and biotechnology. Stu-

dents can earn a BS degree in Chemistry in four years while targeting a career in this field or preparing for graduate school in chemistry or related areas.

The Materials Science option is designed for the Track-Two BS degree in Chemistry.

The track-two core requirements are slightly modified for the Materials Science option:

Required/Recommended for Core:
PH 211, PH 212, PH 213. *General Physics with Calculus (4,4,4) *Required*

Requirements

CH 445. Physical Chemistry of Materials (3) or ENGR 321. Material Science (3)

CHE 444. Thin-Film Materials Processing (3)
CHE 445. Polymer Engineering and Science (4)

ENGR 322. Mechanical Properties of Materials (4)

MTH 256. Applied Differential Equations (4)

Select four courses from below for 12–14 credits:

CH 401. Research (3)

CH 413. Solid State Chemistry (3–4)

CHE 401. Research (3)

ECE 416. Electronic Materials and Devices (4)

ENGR 211. Statics (3)

ENGR 212. Dynamics (3)

ENGR 213. Strength of Materials (3)

ENGR 221. The Science, Engineering, and Social Impact of Nanotechnology (3)

ME 316. Mechanics of Materials (3)

PH 475. Introduction to Solid State Physics (3)

WSE 318. Mechanical Behavior of Wood (4)

Total=27–29

PRE-MEDICINE OPTION

The Pre-Medicine option is directed at students planning to apply to medical or dental school who also wish to target chemistry as a career pathway. A degree in chemistry provides a strong foundation for many professions and post-graduate degrees in chemistry or related areas. Students can earn a BS degree in Chemistry in four years while also taking Pre-Medicine option courses in biology, biochemistry, and related areas that are important components for application to medical school.

The Pre-Medicine option is designed for the Track-Two BS degree in Chemistry.

Required

BB 450, BB 451. General Biochemistry (4,3) or BB 490, BB 491. Biochemistry (3,3)

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)

BI 311. Genetics (4)

BI 314. Cell and Molecular Biology (4)

PHL 444. Biomedical Ethics (4)

ST 351. Introduction to Statistical Methods (4)

Total=34–35

CHEMISTRY MINOR

Also available via Ecampus.

The requirements for a minor in Chemistry include a minimum of 27 credits of chemistry (CH) courses.

Choose one of the following complete general chemistry sequences:

1. CH 121, *CH 122, *CH 123. General Chemistry (5,5,5)
2. CH 231, CH 232, CH 233. *General Chemistry (4,4,4) **and** CH 271, CH 272, CH 273. *Laboratory for CH 231, 232, 233 for Chemistry Majors (1,1,1)
3. CH 224H, CH 225H, CH 226H. *Honors General Chemistry (5,5,5)
4. CH 201, CH 202. Chemistry for Engineering Majors (3,3) **and** CH 205. Laboratory for Chemistry 202 (1) **and** CH 123. *General Chemistry (5)
5. CH 201, CH 202. Chemistry for Engineering Majors (3,3) **and** CH 205. Laboratory for Chemistry 202 (1) **and** CH 223. *General Chemistry (5)

In addition, a minimum of four upper-division courses of 3 or more credits in at least two areas of chemistry (organic, physical, analytical, inorganic, or nuclear) and including one laboratory course are required. All courses must be taken for a grade (not S/U) and the overall GPA for all chemistry courses must be 2.0 or higher.

Courses that cannot be used for the minor:

Biochemistry Courses

CH 130. General Chemistry of Living Systems (4)

CH 374. *Technology, Energy, and Risk (3)

CH 401/501/601. Research (1–16)

CH 403/503/603. Thesis (1–16)

CH 407/507/607. Seminar (1–16)

CH 410/510/610. Internship (1–16)

CH 695. Electronics for Scientists (4)

CH 696. Computer Interfacing (4)

See <http://chemistry.oregonstate.edu/node/1727> for more details about the Chemistry minor.

CHEMISTRY (MA, MS, PhD)

Graduate Areas of Concentration
Analytical chemistry, inorganic chemistry, materials chemistry, nuclear chemistry, organic chemistry, physical chemistry

The Department of Chemistry offers graduate work leading toward Master of Arts, Master of Science, and Doctor of Philosophy degrees in Chemistry with concentrations in analytical chemistry, inorganic chemistry, nuclear chemistry, organic chemistry, physical chemistry and solid state chemistry.

All students are required, early in their graduate study, to take a series of graduate courses in their major area. For the PhD, the required written preliminary examinations take the form of a number of “cumulative examinations.” Exceptions to this include the concentration

in nuclear chemistry, which requires only a single written examination, and concentrations in inorganic chemistry, solid state chemistry or physical chemistry, which require only an oral exam. For each field there is a list of courses representing subject matter in which competence is required of those electing that field for PhD work, but the major emphasis of the PhD program is in research rather than formal courses. All degrees require a research thesis except for the Master of Science nonthesis degree. There is no departmental requirement of a foreign language. Most graduate students in chemistry are supported either as graduate teaching assistants or as graduate research assistants.

CHEMISTRY GRADUATE MINOR

For more details, see the departmental advisor.

COURSES

CH 121. GENERAL CHEMISTRY (5). A general chemistry sequence for students who have had no previous training in chemistry and for those whose college aptitude test scores indicate the need for a more elementary introduction to chemistry. Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation. Lec/lab/rec. (CH 122, CH 123 are Bacc Core Courses) **PREREQS:** CH 121, CH 122, CH 123 must be taken in order.

CH 122. *GENERAL CHEMISTRY (5). A general chemistry sequence for students who have had no previous training in chemistry and for those whose college aptitude test scores indicate the need for a more elementary introduction to chemistry. Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation. Lec/lab/rec. (CH 122 and CH 123 are Bacc Core courses.) **PREREQS:** ((CH 121 or CH 201 or CH 221) or ((CH 231 or CH 231H) and (CH 261 or CH 261H or CH 271)) and CH 121, CH 122, CH 123 must be taken in order.

CH 123. *GENERAL CHEMISTRY (5). A general chemistry sequence for students who have had no previous training in chemistry and for those whose college aptitude test scores indicate the need for a more elementary introduction to chemistry. Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation. Lec/lab/rec. (CH 122 and CH 123 are Bacc Core courses.) **PREREQS:** (CH 122 or CH 222 or ((CH 232 or CH 232H) and (CH 262 or CH 262H or CH 272)) or (CH 202 and CH 205) and CH 121, CH 122, CH 123 must be taken in order.

CH 130. GENERAL CHEMISTRY OF LIVING SYSTEMS (4). Introduction to organic chemistry and the chemistry of biological systems. Organic nomenclature and fundamental reactions, emphasizing topics such as amino acids, proteins, biochemical energy, and nucleic acids (DNA and RNA). Intended as a terminal course in chemistry, not to serve as a prerequisite to higher numbered chemistry courses. Lec/lab. Does not count toward a chemistry minor.

CH 140. GENERAL, ORGANIC, AND BIOLOGICAL CHEMISTRY (6). An introduction to general, organic, and biological chemistry. Intended as a terminal course in chemistry, not to serve as a prerequisite to higher numbered chemistry courses. Offered via Ecampus only. **PREREQS:** Entering students are expected to have a working knowledge of high school algebra, logarithms, and scientific notation.

CH 199. SPECIAL TOPICS (1-3). This course is repeatable for a maximum of 3 credits.

PREREQS: Departmental approval required.

CH 201. CHEMISTRY FOR ENGINEERING MAJORS (3). A sequence of selected chemistry topics for pre-engineering students. Lec.

PREREQS: MTH 111 or MTH 112 or (MTH 251 or MTH 251H). CH 201 and CH 202 must be taken in order.

CH 202. CHEMISTRY FOR ENGINEERING MAJORS (3). A sequence of selected chemistry topics for pre-engineering students. Lec.

PREREQS: (CH 121 or CH 201 or CH 221 or ((CH 231 or CH 231H) and (CH 261 or CH 261H or CH 271)) or CH 224H) and CH 201 and CH 202 must be taken in order.

CH 205. LABORATORY FOR CHEMISTRY 202 (1). Three-hour weekly session for the development

of laboratory skills in general chemistry for engineers. Lec/lab. **PREREQS:** CH 202*

CH 211. RECITATION FOR CHEMISTRY 201 (1). 80-minute weekly session for the development

of problem-solving skills in general chemistry for engineers. Rec. **COREQS:** CH 201

CH 212. RECITATION FOR CHEMISTRY 202 (1). One-hour weekly session for the development

of problem-solving skills in general chemistry for engineers. Rec. **COREQS:** CH 202

CH 220. CAREERS IN CHEMISTRY (1). Course

for chemistry majors that discusses strategies for success in the study of chemistry and the varied career opportunities available. Topics range from surviving freshman chemistry to choices of advanced classes, study abroad opportunities, internships, getting into and succeeding in graduate school, choices of chemical careers in academia, industry, government, non-governmental organizations, and using chemistry as a foundation for careers in other areas such as law and business. Graded P/N.

CH 231. GENERAL CHEMISTRY (4). A general

chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 231 is a lecture course; CH 261 is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 261) **PREREQS:** (CH 261* or CH 271*) and one year of high school chemistry and acceptable aptitude test scores. CH 121 is accepted in lieu of high school chemistry as a prerequisite for this sequence. CH 231, CH 232, CH 233 must be taken in order.

CH 231H. GENERAL CHEMISTRY (4). A general

chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 231H is a lecture course; CH 261H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 261H) **PREREQS:** (CH 261H* or CH 271H*) and one year of high school chemistry and acceptable aptitude test scores. CH 121 is accepted in lieu of high school chemistry as a prerequisite for this sequence. CH 231H, CH 232H, CH 233H must be taken in order. Honors College approval required.

CH 232. GENERAL CHEMISTRY (4). A general

chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 232 is a lecture course; CH 262 is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 262) **PREREQS:** ((CH 231 or CH 231H or CH 221) and (CH 262* or CH 272*)) and one year of high school chemistry and acceptable aptitude test scores. CH 121 is accepted in lieu of high school chemistry as a prerequisite for this sequence. CH 231, CH 232, CH 233 must be taken in order.

CH 232H. GENERAL CHEMISTRY (4). A general

chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 232H is a lecture course; CH 262H is the laboratory component. Lec/rec. (Bacc Core Course) **PREREQS:** ((CH 231 or CH 231H or CH 221 or CH 224H) and (CH 262H* or CH 272H*)) and one year of high school chemistry

and acceptable aptitude test scores. CH 121 is accepted in lieu of high school chemistry as a prerequisite for this sequence. CH 231H, CH 232H, CH 233H must be taken in order. Honors College approval required.

CH 233. GENERAL CHEMISTRY (4). A general

chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 233 is a lecture course; CH 263 is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 263) **PREREQS:** ((CH 232 or CH 232H or CH 222 or CH 225H) and (CH 263* or CH 263H* or CH 273* or CH 273H*)) and one year of high school chemistry and acceptable aptitude test scores. CH 121 is accepted in lieu of high school chemistry as a prerequisite for this sequence. CH 231, CH 232, CH 233 must be taken in order.

CH 233H. GENERAL CHEMISTRY (4). A general

chemistry sequence for students majoring in most sciences, pharmacy, and chemical engineering. CH 233H is a lecture course; CH 263H is the laboratory component. Lec/rec. (Bacc Core Course if taken with CH 263H) **PREREQS:** ((CH 232 or CH 232H or CH 222 or CH 225H) and (CH 263* or CH 263H* or CH 273* or CH 273H*)) and one year of high school chemistry and acceptable aptitude test scores. CH 121 is accepted in lieu of high school chemistry as a prerequisite for this sequence. CH 231H, CH 232H, CH 233H must be taken in order. Honors College approval required.

CH 261. *LABORATORY FOR CHEMISTRY 231 (1). A general chemistry laboratory sequence

for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 231) **COREQS:** CH 231

CH 261H. *LABORATORY FOR CHEMISTRY 231H (1). A general chemistry laboratory sequence

for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 231H) **PREREQS:** Honors College approval required. **COREQS:** CH 231H

CH 262. *LABORATORY FOR CHEMISTRY 232 (1). A general chemistry laboratory sequence

for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 232) **PREREQS:** CH 261 or CH 261H or CH 271 or CH 271H or CH 221 or CH 224H **COREQS:** CH 232

CH 262H. *LABORATORY FOR CHEMISTRY 232H (1). A general chemistry laboratory sequence

for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 232H) **PREREQS:** CH 261 or CH 261H or CH 271 or CH 271H or CH 221 or CH 224H and Honors College approval required. **COREQS:** CH 232H

CH 263. *LABORATORY FOR CHEMISTRY 233 (1). A general chemistry laboratory sequence

for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 233) **PREREQS:** CH 262 or CH 262H or CH 272 or CH 272H or CH 222 or CH 225H **COREQS:** CH 233

CH 263H. *LABORATORY FOR CHEMISTRY 233H (1). A general chemistry laboratory sequence

for students majoring in most sciences, pharmacy, and chemical engineering. (Bacc Core Course if taken with CH 233H) **PREREQS:** CH 262 or CH 262H or CH 272 or CH 272H or CH 222 or CH 225H and Honors College approval required. **COREQS:** CH 233H

CH 271. *LABORATORY FOR CH 231 FOR CHEMISTRY MAJORS (1). A general chemistry

laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 231) **COREQS:** CH 231

CH 271H. *LABORATORY FOR CH 231H FOR CHEMISTRY MAJORS (1). A general chemistry

laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 231H) **PREREQS:** Honors College approval required. **COREQS:** CH 231H

CH 272. *LABORATORY FOR CH 232 FOR CHEMISTRY MAJORS (1). A general chemistry laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 232) **PREREQS:** CH 271 or CH 271H or CH 221 or CH 224H **COREQS:** CH 232

CH 272H. *LABORATORY FOR CH 232H FOR CHEMISTRY MAJORS (1). A general chemistry

laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 232H) **PREREQS:** CH 271 or CH 271H or CH 221 or CH 224H and Honors College approval required. **COREQS:** CH 232H

CH 273. *LABORATORY FOR CH 233 FOR CHEMISTRY MAJORS (1). A general chemistry

laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 233) **PREREQS:** CH 272 or CH 272H or CH 222 or CH 225H **COREQS:** CH 233

CH 273H. *LABORATORY FOR CH 233H FOR CHEMISTRY MAJORS (1). A general chemistry

laboratory sequence for students majoring in chemistry. (Bacc Core Course if taken with CH 233H) **PREREQS:** CH 272 or CH 272H or CH 222 or CH 225H and Honors College approval required. **COREQS:** CH 233H

CH 324. QUANTITATIVE ANALYSIS (4). A

basic course in modern chemical analysis. Self-paced laboratory. CH 130 does not meet the prerequisites for this course. **PREREQS:** (CH 123 or CH 223 or CH 226H or ((CH 233 or CH 233H) and (CH 263 or CH 263H or CH 273)) and /or one year of general chemistry or instructor approval.

CH 331. ORGANIC CHEMISTRY (4). Service

course covering aliphatic and aromatic chemistry. Introduction to nomenclature, mechanism and synthesis. Lec/rec. CH 130 does not meet the prerequisites for this course. **PREREQS:** (CH 123 or CH 223 or CH 226H or ((CH 233 or CH 233H) and (CH 263 or CH 263H or CH 273)) and one year of general chemistry or instructor approval. CH 331 and CH 332 must be taken in order.

CH 332. ORGANIC CHEMISTRY (4). Service

course covering aliphatic and aromatic chemistry. Introduction to nomenclature, mechanism and synthesis. Lec/rec. **PREREQS:** CH 331 and one year of general chemistry.

CH 334. ORGANIC CHEMISTRY (3). Professional

course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic approaches. **PREREQS:** (CH 123 or CH 223 or CH 226H or ((CH 233 or CH 233H) and (CH 263 or CH 263H or CH 273)) and one year general chemistry or instructor approval. CH 130 does not meet the prerequisites for this course.

CH 335. ORGANIC CHEMISTRY (3). Professional

course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic approaches. **PREREQS:** CH 334 and one year general chemistry.

CH 336. ORGANIC CHEMISTRY (3). Professional

course for majors in chemistry, biochemistry, chemical engineering and other students who need a year of organic chemistry. In-depth treatment of major classes of organic compounds. Interrelation of mechanistic and synthetic approaches. **PREREQS:** CH 335 and one year of general chemistry.

CH 337. ORGANIC CHEMISTRY LABORATORY (4). Laboratory course in organic chemistry for

nonmajors, designed to supplement CH 331, CH 332 and CH 334, CH 335, CH 336. Lec/lab. **PREREQS:** (CH 331 and CH 332) or (CH 334 and CH 335 and CH 336)

CH 361. EXPERIMENTAL CHEMISTRY I (3).

First term of integrated laboratory program

for chemistry majors highlighting techniques in organic, physical, and analytical chemistry. First-hand experience is gained using specialized glassware, scientific equipment and instrumentation plus computers. Essential technical laboratory standards and technical writing are emphasized. Lec/lab. **PREREQS:** ((CH 221 and CH 222 and CH 223) or (CH 224H and CH 225H and CH 226H) or ((CH 231 or CH 231H) and (CH 261 or CH 261H or CH 271) and (CH 232 or CH 232H) and (CH 262 or CH 262H or CH 272) and (CH 233 or CH 233H) and (CH 263 or CH 263H or CH 273)) and (MTH 251* or MTH 251H*) and (PH 201* or PH 211*) and CH 334*) and departmental approval required. Restricted to chemistry and biochemistry/biophysics majors.

CH 361H. EXPERIMENTAL CHEMISTRY I (3). First term of integrated laboratory program for chemistry majors highlighting techniques in organic, physical, and analytical chemistry. First-hand experience is gained using specialized glassware, scientific equipment and instrumentation plus computers. Essential technical laboratory standards and technical writing are emphasized. Lec/lab. **PREREQS:** ((CH 221 and CH 222 and CH 223) or (CH 224H and CH 225H and CH 226H) or ((CH 231 or CH 231H) and (CH 261 or CH 261H or CH 271) and (CH 232 or CH 232H) and (CH 262 or CH 262H or CH 272) and (CH 233 or CH 233H) and (CH 263 or CH 263H or CH 273)) and (MTH 251* or MTH 251H*) and (PH 201* or PH 211*) and CH 334*) and Restricted to chemistry and biochemistry/biophysics majors. Honors College approval required.

CH 362. EXPERIMENTAL CHEMISTRY I (3). First-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. **PREREQS:** ((CH 361 or CH 361H) and CH 335*)

CH 362H. EXPERIMENTAL CHEMISTRY I (3). First-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. **PREREQS:** ((CH 361 or CH 361H) and CH 335*) and Honors College approval required.

CH 374. *TECHNOLOGY, ENERGY, AND RISK (3). Decision-making in a technical, democratic society. Discussion of current issues such as acid rain, toxic organic chemicals in the environment, energy resources, etc. Does not meet the prereq for any other chemistry course. Does not meet requirements for chemistry minor. (Bacc Core Course) **PREREQS:** Completion of baccalaureate core in physical science.

CH 390. ENVIRONMENTAL CHEMISTRY (3). Sources, reactions, transport, effects, and fates of chemical species in water, soil, air, and living environments and the effects of technology thereon. **PREREQS:** CH 331

CH 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CH 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CH 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CH 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CH 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CH 407H. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required. Honors College approval required.

CH 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CH 411. INORGANIC CHEMISTRY (3-4). Fundamental principles of inorganic chemistry including atomic structure, bonding models for molecules and solids, symmetry, acid/base chemistry, oxidation-reduction, and metal-ligand complexes. **PREREQS:** One year of general chemistry. College-level physics is recommended.

CH 412. INORGANIC CHEMISTRY (3-4). Descriptive chemistry of the elements, focusing on main-group compounds, transition metal complexes, and solid-state chemistry. **PREREQS:** (CH 411 or CH 511) and /or instructor approval.

CH 413. SOLID STATE CHEMISTRY (3-4). Basic principles of chemistry are applied to descriptions of structure-property relationships in inorganic solids. Topics include crystal structure, materials synthesis, chemical bonding, electronic properties, optical properties, and magnetism. Students who register for 4 credits will perform independent study of an advanced topic based on research literature. This course is repeatable for a maximum of 4 credits. **PREREQS:** (CH 442 or CH 542)

CH 416. RADIOCHEMISTRY (3). Selected methods in radiochemical analysis. Actinide chemistry, activation analysis, radionuclide solvent extraction, and microbial reactions with radionuclides. Designed for majors in chemistry, chemical engineering, nuclear engineering, and radiation health physics. **PREREQS:** ((CH 201 and CH 202 and CH 205) or (CH 221 and CH 222 and CH 223) or (CH 224H and CH 225H and CH 226H) or ((CH 231 or CH 231H) and (CH 261 or CH 261H or CH 271) and (CH 232 or CH 232H) and (CH 262 or CH 262H or CH 272) and (CH 233 or CH 233H) and (CH 263 or CH 263H or CH 273)) and /or equivalent or instructor approval required.

CH 418. NUCLEAR CHEMISTRY (3). Radioactive decay, nuclear properties, nuclear structure, alpha, beta, and gamma decay, nuclear reactions, fission, interaction of radiation with matter, chemical techniques, radiation safety, and nuclear instrumentation. **PREREQS:** Should enroll concurrently in (CH 440 or CH 540) or PH 314.

CH 419. RADIOACTIVE TRACER METHODS (4). Radionuclides, radioactivity, and radiotracer methods as research tools in physical and biological science. Lec/lab. **PREREQS:** Two years of college chemistry.

CH 421. ANALYTICAL CHEMISTRY (3). A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, instrumentation, and treatment of data. **PREREQS:** One year of general chemistry and one year of college physics. Should enroll concurrently in CH 440 or CH 540.

CH 422. ANALYTICAL CHEMISTRY (3). A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, basic electronics and instrumentation, and treatment of data. **PREREQS:** One year of general chemistry and one year of college physics. Should enroll concurrently in CH 441 or CH 541.

CH 424. BIOANALYTICAL CHEMISTRY (3). Analytical methods employed in the study of biologically important molecules. Separations (chromatography, electrophoresis), spectroscopy, mass spectrometry, biosensors, and immunoassays. Lec/lab. Not offered every year. **PREREQS:** One year of organic chemistry and one term of organic chemistry laboratory.

CH 435. STRUCTURE DETERMINATION BY SPECTROSCOPIC METHODS (3). Use of ultraviolet, infrared, nuclear magnetic resonance, and mass spectra for determination of structures and stereochemistry of complex organic molecules. **PREREQS:** (CH 336 and (CH 442 or CH 542))

CH 440. PHYSICAL CHEMISTRY (3). Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy. **PREREQS:** (MTH 254 or MTH 254H) and one year of general chemistry and one year of college physics. CH 440, CH 441, CH 442 must be taken in order.

CH 441. PHYSICAL CHEMISTRY (3). Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy. **PREREQS:** (MTH 254 or MTH 254H) and one year of general chemistry and one year of college physics. CH 440, CH 441, CH 442 must be taken in order.

CH 442. PHYSICAL CHEMISTRY (3). Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy. **PREREQS:** (MTH 254 or MTH 254H) and CH 441 and one year of general chemistry and one year of college physics. CH 440, CH 441, CH 442 must be taken in order.

CH 445. PHYSICAL CHEMISTRY OF MATERIALS (3). Structure of solid materials. Relationship between structure and mechanical, thermal, and electrical properties of materials used in high technology. Offered alternate years. **PREREQS:** (CH 442 or CH 542)

CH 450. INTRODUCTORY QUANTUM CHEMISTRY (3). Elementary wave mechanics and matrix mechanics of atoms and molecules. Quantum basis of chemical structure. Not offered every year. **PREREQS:** (CH 442 or CH 542) and one year college physics.

CH 453. CHEMICAL THERMODYNAMICS (3). The laws of chemical thermodynamics applied to analyze properties of gases, gas mixtures, liquid solutions, fluctuations, critical phenomena, and magnetic systems. Not offered every year. **PREREQS:** (CH 442 or CH 542)

CH 461. EXPERIMENTAL CHEMISTRY II (3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. **PREREQS:** ((CH 362 or CH 362H) and CH 421* and CH 440*)

CH 461H. EXPERIMENTAL CHEMISTRY II (3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic and physical chemistry. Lec/Lab. **PREREQS:** ((CH 362 or CH 362H) and CH 421* and CH 440*) and Honors College approval required.

CH 462. ^EXPERIMENTAL CHEMISTRY II (3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course) **PREREQS:** ((CH 362 or CH 362H) and CH 441* and (CH 324 or CH 461H) and CH 422 is recommended.

CH 462H. ^EXPERIMENTAL CHEMISTRY II (3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course) **PREREQS:** ((CH 362 or CH 362H) and CH 441* and (CH 324 or CH 461 or CH 461H)) and CH 422 is recommended. Honors College approval required.

CH 463. ^EXPERIMENTAL CHEMISTRY II (3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course) **PREREQS:** ((CH 362 or CH 362H) and (CH 324 or CH 461 or CH 461H) and CH 442*)

CH 463H. ^EXPERIMENTAL CHEMISTRY II (3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course) **PREREQS:** ((CH 362 or CH 362H) and (CH 324 or CH 461 or CH 461H) and CH 442*) and Honors College approval required.

CH 464. ^EXPERIMENTAL CHEMISTRY II (3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course) **PREREQS:** ((CH 362 or CH 362H) and CH 442*) and CH 461 or CH 324 is recommended.

CH 464H. ^EXPERIMENTAL CHEMISTRY II (3). Second-level integrated laboratory course for majors in chemistry and related disciplines, covering experimental techniques of analytical, inorganic, organic and physical chemistry. Lec/lab. (Writing Intensive Course) **PREREQS:** ((CH 362 or CH 362H) and CH 442*) and CH 461 or CH 324 is recommended. Honors College approval required.

CH 471. ADVANCED ORGANIC CHEMISTRY (3). Principles of synthetic organic chemistry. Particular emphasis will be directed at understanding stereochemical outcomes in carbon-carbon bond-forming reactions (Diels-Alder, aldol, and pericyclic reactions). Other topics will include oxidation/reduction reactions, organometallic chemistry, and enantioselective methodologies. **PREREQS:** (CH 336 or CH 337)

CH 490. COMPUTER PROGRAMMING FOR SCIENTISTS (3). Programming, numerical and graphical analysis, problem solving, simulations and use of databases for information handling and retrieval. Applications to problems in chemistry. **PREREQS:** MTH 252

CH 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

CH 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

CH 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CH 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CH 507. SEMINAR (1-16). Student should enroll in the seminar section that meets the specific divisional requirements for credits and grading scheme or that is designated for teaching or mentoring programs. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CH 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

CH 511. INORGANIC CHEMISTRY (3-4). Fundamental principles of inorganic chemistry including atomic structure, bonding models for molecules and solids, symmetry, acid/base chemistry, oxidation-reduction, and metal-ligand complexes. **PREREQS:** One year of college-level chemistry. College-level physics is recommended.

CH 512. INORGANIC CHEMISTRY (3-4). Descriptive chemistry of the elements, focusing on main-group compounds, transition metal complexes, and solid-state chemistry. **PREREQS:** CH 511 and/or instructor approval.

CH 513. SOLID STATE CHEMISTRY (3-4). Basic principles of chemistry are applied to descriptions of structure-property relationships in inorganic solids. Topics include crystal structure, materials synthesis, chemical bonding, electronic properties, optical properties, and magnetism. Students who register for 4 credits will perform independent study of an advanced topic based on research literature. This course is repeatable for a maximum of 4 credits. **PREREQS:** CH 442 or CH 542

CH 516. RADIOCHEMISTRY (4). Selected methods in radiochemical analysis. Actinide chemistry, activation analysis, radionuclide solvent extraction, and microbial reactions with radionuclides. Designed for majors in chemistry, chemical engineering, nuclear engineering, and radiation health physics. Lec/lab. **CROSSLISTED** as NE 516 and RHP 516. This course is repeatable for a maximum of 12 credits. **PREREQS:** ((NE 531 or RHP 531) and RHP 536) and/or instructor approval required.

CH 518. NUCLEAR CHEMISTRY (3). Radioactive decay, nuclear properties, nuclear structure, alpha, beta, and gamma decay, nuclear reactions, fission, interaction of radiation with matter, chemical techniques, radiation safety, and nuclear instrumentation. **PREREQS:** Should concurrently enroll in (CH 440 or CH 540) or PH 314.

CH 519. RADIOACTIVE TRACER METHODS (4). Radionuclides, radioactivity, and radiotracer methods as research tools in physical and biological science. Lec/lab. **PREREQS:** Two years of college chemistry.

CH 521. ANALYTICAL CHEMISTRY (3). A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, instrumentation, and treatment of data. **PREREQS:** One year of college chemistry, one year of college physics. Should concurrently enroll in CH 540.

CH 522. ANALYTICAL CHEMISTRY (3). A professional sequence for majors in chemistry and related disciplines. Chemical equilibrium, analytical electrochemistry, separations, spectroscopy, basic electronics and instrumentation, and treatment of data. **PREREQS:** One year of college chemistry, one year of college physics. Should concurrently enroll in CH 541.

CH 524. BIOANALYTICAL CHEMISTRY (3). Analytical methods employed in the study of biologically important molecules. Separations (chromatography, electrophoresis), spectroscopy, mass spectrometry, biosensors, and immunoassays. Lec/lab. Not offered every year. **CROSSLISTED** as VMB 524. **PREREQS:** One year of organic chemistry and one term of organic chemistry laboratory.

CH 535. STRUCTURE DETERMINATION BY SPECTROSCOPIC METHODS (3). Use of ultraviolet, infrared, nuclear magnetic resonance, and mass spectra for determination of structures and stereochemistry of complex organic molecules. **PREREQS:** CH 336 and (CH 442 or CH 542)

CH 540. PHYSICAL CHEMISTRY (3). Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy. **PREREQS:** MTH 254 and one year of college chemistry and one year of college physics. CH 540, CH 541, CH 542 must be taken in order.

CH 541. PHYSICAL CHEMISTRY (3). Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy. **PREREQS:** CH 540

CH 542. PHYSICAL CHEMISTRY (3). Thermodynamics, electrochemistry, solutions, kinetic theory of gases, chemical kinetics, quantum theory and statistical mechanics, molecular structure and spectroscopy. **PREREQS:** CH 541

CH 545. PHYSICAL CHEMISTRY OF MATERIALS (3). Structure of solid materials. Relationship between structure and mechanical, thermal, and electrical properties of materials used in high technology. Offered alternate years. **PREREQS:** CH 442 or CH 542

CH 550. INTRODUCTORY QUANTUM CHEMISTRY (3). Elementary wave mechanics and matrix mechanics of atoms and molecules. Quantum basis of chemical structure. Not offered every year. **PREREQS:** CH 542 and one year college physics.

CH 553. CHEMICAL THERMODYNAMICS (3). The laws of chemical thermodynamics applied to analyze properties of gases, gas mixtures, liquid solutions, fluctuations, critical phenomena, and magnetic systems. Not offered every year. **PREREQS:** CH 542

CH 571. ADVANCED ORGANIC CHEMISTRY (3). Principles of synthetic organic chemistry. Particular emphasis will be directed at understanding stereochemical outcomes in carbon-carbon bond-forming reactions (Diels-Alder, aldol, and pericyclic reactions). Other topics will include oxidation/reduction reactions, organometallic chemistry, and enantioselective methodologies. **PREREQS:** CH 336 or CH 337

CH 580X. ELECTRON MICROSCOPY-I (3). Basic Scanning Electron Microscopy (SEM) and Transmission Electron Microscopy (TEM) will be introduced. Includes a brief introduction to TEM and SEM, followed by sample preparation, diffraction, contrast explanation of images obtained from TEM and SEM. Method for chemical composition analysis will also be introduced. **PREREQS:** General physics and general chemistry

CH 582. CHEMISTRY AND MATERIALS OF BATTERIES AND SUPER CAPACITORS (3). Examines the chemistry and materials currently in use and proposed for future primary and secondary batteries and supercapacitors. After a brief historical review, we will examine in detail the state-of-the-art technologies including lithium-ion, lithium, and sodium-sulfur batteries and electrochemical double-layer capacitors, and future technologies such as metal-air and lithium-sulfur. Class discussions will focus on structure/performance relationships and other issues such as environmental impact, safety and costs. Offered via Ecampus only. **PREREQS:** Full year of general chemistry. College-level physics is recommended. Additional chemistry or materials science background is recommended.

CH 584. INSTRUMENTS AND ONLINE INTERACTIONS IN THE SCIENCES (3). Examine methods and technologies for and incorporating virtual instruments and online interactions into laboratory courses to support learners in becoming critical thinkers and creative producers of their knowledge and understanding in science. **PREREQS:** Basic computer literacy and one year of general chemistry, physics or biology

CH 590. COMPUTER PROGRAMMING FOR SCIENTISTS (3). Programming, numerical and graphical analysis, problem solving, simulations and use of databases for information handling and retrieval. Applications to problems in chemistry. **PREREQS:** MTH 252

CH 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CH 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

CH 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CH 607. SEMINAR (1-16). Student should enroll in the seminar section that meets the specific divisional requirements for credits and grading scheme or that is designated for teaching or mentoring programs. This course is repeatable for a maximum of 16 credits.

CH 614. SELECTED TOPICS IN INORGANIC CHEMISTRY (4). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in fields such as solid state chemistry, theoretical inorganic chemistry, spectroscopy and magnetism,

chemistry of coordination compounds, kinetics and mechanisms of inorganic reactions, acid-base theory and reactions in nonaqueous solvents, organometallic chemistry, and chemistry of the less familiar elements. Not offered every year. **PREREQS:** CH 413 or CH 513

CH 615. SELECTED TOPICS IN INORGANIC CHEMISTRY (3). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in fields such as solid state chemistry, theoretical inorganic chemistry, spectroscopy and magnetism, chemistry of coordination compounds, kinetics and mechanisms of inorganic reactions, acid-base theory and reactions in nonaqueous solvents, organometallic chemistry, and chemistry of the less familiar elements. **PREREQ:** CH 413/CH 513. Not offered every year. This course is repeatable for a maximum of 12 credits.

CH 616. SELECTED TOPICS IN INORGANIC CHEMISTRY (4). Nonsequence courses designed to acquaint the advanced graduate student with the principles of X-ray diffraction as applied to the structural characterization of both single crystals and powders. Not offered every year. **PREREQS:** CH 413 or CH 513

CH 630. ADVANCED ORGANIC CHEMISTRY (3). Molecular orbital bonding theory, orbital symmetry, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year. **PREREQS:** CH 336 and (CH 442 or CH 542)

CH 631. ADVANCED ORGANIC CHEMISTRY (4). Carbon-carbon bond forming reactions, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year. **PREREQS:** CH 630

CH 632. ADVANCED ORGANIC CHEMISTRY (3). Molecular orbital bonding theory, orbital symmetry, reaction mechanisms, stereoisomerism, conformational analysis, and advanced methods of synthesis. Not offered every year. **PREREQS:** CH 336 and (CH 442 or CH 542)

CH 633. HYPOTHESIS, EVIDENCE, AND ARGUMENT IN ORGANIC CHEMISTRY (2). Immerses the student in the tools of scientific method as applied to current research topics in the chemical literature. The student will perform an extensive review of a modern topic in organic chemistry, prepare a written summary and analysis of this literature review and make a public oral presentation and discussion. This course is repeatable for a maximum of 4 credits. **PREREQS:** CH 632 and /or instructor permission.

CH 636. SELECTED TOPICS IN ORGANIC CHEMISTRY (3). Nonsequence courses designed to acquaint students with recent advances in organic chemistry and their application to special fields of study. Topics covered vary from term to term and year to year. Topics include: theoretical organic chemistry, recent advances in reaction mechanisms, advanced synthesis, free radical reactions, organic sulfur chemistry, and biosynthesis of natural products. CH 636, CH 637, CH 638 need not be taken in order. Not offered every year. This course is repeatable for a maximum of 12 credits.

CH 637. SELECTED TOPICS IN ORGANIC CHEMISTRY (3). Nonsequence courses designed to acquaint students with advances in organic chemistry, specifically focusing on biosynthesis of natural products and enzyme reaction mechanisms. CH 636, CH 637, CH 638 need not be taken in order. This course is repeatable for a maximum of 12 credits.

CH 638. SELECTED TOPICS IN ORGANIC CHEMISTRY (3). Nonsequence courses designed to acquaint students with recent advances in organic chemistry and their application to special fields of study. Topics covered vary from term to term and year to year. Topics include: theoretical organic chemistry, recent advances in reaction mechanisms, advanced synthesis,

free radical reactions, organic sulfur chemistry, and biosynthesis of natural products. CH 636, CH 637, CH 638 need not be taken in order. Not offered every year. This course is repeatable for a maximum of 12 credits.

CH 651. QUANTUM MECHANICS OF ATOMS AND MOLECULES (3). Not offered every year. **PREREQS:** CH 450 or CH 550

CH 652. QUANTUM MECHANICS OF MOLECULAR SPECTROSCOPY (3). Not offered every year. **PREREQS:** CH 651

CH 660. SPECTROCHEMICAL ANALYSIS (3). Theoretical concepts and methodology of optical spectrochemical methods of analysis, components of spectrometers, flame and electrothermal atomic spectrophotometry, ICP atomic emission spectrometry, molecular absorption and fluorescence spectrometry. **PREREQS:** CH 442 or CH 542

CH 661. SEPARATIONS: CHROMATOGRAPHY AND RELATED METHODS (4). Theory, instrumentation, and practice of modern separation techniques (gas chromatography, liquid chromatography, electrokinetic separations) and sample preparation methods; handling and interpretation of chromatographic and electrophoretic data. **PREREQS:** CH 440 or CH 540 (Thermodynamics) recommended or instructor's permission.

CH 662. ANALYTICAL ELECTROCHEMISTRY (4). Study of current, voltage and time relationships in electrochemical cells. Offered alternate years. **PREREQS:** CH 442 recommended or instructor permission.

CH 680. SELECTED TOPICS IN PHYSICAL CHEMISTRY (2). Nonsequence courses designed to acquaint students with recent advances in physical chemistry. Topics include molecular structure dynamics determination (UV-visible, near-IR light sources, x-ray, electron and neutron diffraction), spectroscopy (ultrafast, nonlinear, multidimensional, multiphoton, magnetic resonance, photoelectron), physical chemistry of condensed phase systems (biomolecules, aqueous solution, novel materials, ionic, molecular and liquid crystals, critical phenomena, mass transport), theoretical chemistry (chemical bonding, scattering theory, group theory, dynamics), electronic structure theory of molecules, structural dynamics of complex systems. Need not be taken in order. Not offered every year. This course is repeatable for a maximum of 12 credits. **PREREQS:** CH 550 and graduate standing.

CH 681. SELECTED TOPICS IN PHYSICAL CHEMISTRY (2). Nonsequence courses designed to acquaint students with recent advances in physical chemistry. Topics include molecular structure determination (x-ray, electron and neutron diffraction), spectroscopy (nonlinear and multiphoton, magnetic resonance, photoelectron, Moessbauer effect), physical chemistry of condensed phases (ionic, molecular and liquid crystals, critical phenomena, mass transport), theoretical chemistry (chemical bonding, scattering theory, group theory, dynamics), electronic structure theory of molecules. Need not be taken in order. Not offered every year. This course is repeatable for a maximum of 12 credits. **PREREQS:** Graduate standing.

CH 682. SELECTED TOPICS IN PHYSICAL CHEMISTRY (2). Nonsequence courses designed to acquaint students with recent advances in physical chemistry. Topics include molecular structure determination (x-ray, electron and neutron diffraction), spectroscopy (nonlinear and multiphoton, magnetic resonance, photoelectron, Moessbauer effect), physical chemistry of condensed phases (ionic, molecular and liquid crystals, critical phenomena, mass transport), theoretical chemistry (chemical bonding, scattering theory, group theory, dynamics), electronic structure theory of molecules. Need not be taken in order. Not offered every year. This

course is repeatable for a maximum of 12 credits. **PREREQS:** Graduate standing.

CH 683. SELECTED TOPICS IN ANALYTICAL CHEMISTRY (2). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year. This course is repeatable for a maximum of 12 credits. **PREREQS:** Graduate standing or instructor approval required.

CH 684. SELECTED TOPICS IN ANALYTICAL CHEMISTRY (2). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year. This course is repeatable for a maximum of 12 credits. **PREREQS:** Graduate standing or instructor approval required.

CH 685. SELECTED TOPICS IN ANALYTICAL CHEMISTRY (2). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in analytical chemistry. Not offered every year. This course is repeatable for a maximum of 12 credits. **PREREQS:** Graduate standing or instructor approval required.

CH 686. SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY (2). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year. This course is repeatable for a maximum of 12 credits. **PREREQS:** Graduate standing or instructor approval required.

CH 687. SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY (2). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year. This course is repeatable for a maximum of 12 credits. **PREREQS:** Graduate standing or instructor approval required.

CH 688. SELECTED TOPICS IN NUCLEAR AND RADIATION CHEMISTRY (2). Nonsequence courses designed to acquaint the advanced graduate student with recent advances in nuclear and radiation chemistry. Not offered every year. This course is repeatable for a maximum of 12 credits. **PREREQS:** Graduate standing or instructor approval required.

CH 692. ENVIRONMENTAL TRANSFORMATION OF ORGANIC COMPOUNDS (3). Chemical, photochemical, and biological transformation reactions of organic compounds in the environment. Test methods and predictive models for determining the persistence of organic compounds in the environment. Offered alternate years. **PREREQS:** CH 336 and CH 440 or instructor approval required.

CH 696. COMPUTER INTERFACING (4). Introduction to the use of microcomputers for data acquisition and data manipulation in the laboratory. The emphasis will be on the use of software and hardware for the IBM-compatible personal computer. Programming in Visual Basic and Windows languages will be covered, as well as use of commercial software and hardware. Familiarity with analog signal conditioning and simple digital circuitry will be assumed.

CH 697. MASS SPECTROMETRY OF ORGANIC COMPOUNDS (4). Physical principles of mass spectrometric instrumentation and interpretation of the mass spectra of organic compounds and biomolecules. Not offered every year.

GENERAL SCIENCE

Theo Dreher, Chair
226 Nash Hall
Oregon State University
Corvallis, OR 97331-3804
541-737-4441
Email: theo.dreher@oregonstate.edu

Undergraduate Major
General Science (BS, CRED, HBS)

Option
Pre-Education

**Pre-professional Options
in Health Sciences**
Pre-Clinical Laboratory Science
Pre-Dentistry
Pre-Medicine
Pre-Optometry
Pre-Pharmacy
Pre-Physical Therapy
Pre-Physician Assistant
Pre-Podiatry
Pre-Veterinary Medicine

Nondegree, Transfer Options
Pre-Nursing Education
Pre-Occupational Therapy

The BS degree in General Science is only granted along with an option. Because of the interdisciplinary nature of the General Science major, students may not obtain a dual major or double degree in General Science concurrently with or subsequent to a degree in biochemistry/biophysics, biology, microbiology, or zoology.

The Pre-Education option provides a degree appropriate for entry into a master's degree program in elementary/middle school education or OSU's double degree in Education. Admission into teacher licensure programs is competitive. See the College of Education for more information.

**PRE-PROFESSIONAL PROGRAMS
IN THE HEALTH SCIENCES**

The College of Science offers specialized programs for students who wish to pursue careers in health-related fields. They provide excellent academic preparation for students who plan to enter medical, pharmacy, veterinary, or dental school, and for those choosing careers in nursing, clinical laboratory science, occupational therapy, optometry, physical therapy, physician assistant, and podiatry. The curricula listed below generally fulfill requirements at the respective professional schools. However, requirements vary from school to school, so it is the student's responsibility to check specific requirements for any school to which the student plans to apply.

Pre-medical students are encouraged to choose a major in an academic department. Majors in biochemistry/biophysics, biology, chemistry, and microbiology include all the courses required by most medical schools. The program for nursing leads to a bachelor's degree obtained at the professional school (for example, the Oregon Health and Science University).

**GENERAL SCIENCE
(BS, CRED, HBS)**

To earn a bachelor's degree in General Science, students must choose one of the options listed below:

- Pre-Clinical Laboratory Science
- Pre-Dentistry
- Pre-Education
- Pre-Medicine
- Pre-Optometry
- Pre-Pharmacy
- Pre-Physical Therapy
- Pre-Physician Assistant
- Pre-Podiatry
- Pre-Veterinary Medicine

The following General Science options are designed to meet prerequisites for nursing and occupational therapy programs at other institutions, but do not lead to an OSU degree:

- Pre-Nursing Education
- Pre-Occupational Therapy

**The General Science major with
the Pre-Education option also is
available on the OSU-Cascades
campus.**

The following is a General Science course plan. Specific degree requirements may be found under the option requirements.

First Year

CH 121, CH 122, CH 123. General Chemistry (5,5,5)

or CH 231, CH 232, CH 233. *General Chemistry (4,4,4) and CH 261, CH 262, CH 263. *Laboratory for Chemistry 231, 232, 233 (1,1,1)

Approved mathematical science (12)

(See the mathematics requirements listed for each option. Some may require more than 12 credits of mathematics, computer science and statistics courses.)

Fitness (3)

Baccalaureate core courses and/or electives (9)

Speech (3)

WR 121. *English Composition (3)

Sophomore Year

General biology (12)

General physics or physical science (12–15)

Baccalaureate core courses and/or electives (15–18)

Writing II (3)

Junior and Senior Years

History of Science (HSTS) course (4), to include one WIC course from below:

Select one WIC course from below (4):

HSTS 415. ^*Theory of Evolution and Foundation of Modern Biology (4)

HSTS 417. ^*History of Medicine (4)

HSTS 419. ^*Studies in Scientific Controversy: Methods and Practices (4)

HSTS 422. ^*Historical Studies of Science and Politics (4)

HSTS 425. ^*History of the Life Sciences (4) Option and baccalaureate core courses and electives (75)¹

Synthesis (6)

Speech (3)

Footnotes:

¹ Students must take a minimum of 24 credits of upper-division science from departments in the College of Science.

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

OPTIONS

**PRE-CLINICAL LABORATORY
SCIENCE OPTION**

Claire Colvin, Chief Advisor

Clinical laboratory scientists (also known as medical laboratory scientists or medical technologists) perform routine and highly specialized diagnostic procedures in clinical laboratories. They must be certified by the American Society of Clinical Pathologists (ASCP) or the National Certification Agency (NCA). Certification requires 12 to 15 months of training at an accredited professional school of clinical laboratory science. Oregon currently has one such school jointly administered by the Oregon Health and Science University (OHSU) and Oregon Institute of Technology (OIT); Washington and California have several; and other schools are located throughout the U.S. Most clinical laboratory science schools require a bachelor of science degree for admission to their educational program; however, some schools (notably OHSU/OIT) accept students who have had three years of appropriate college work.

The curriculum in the OSU Pre-Clinical Laboratory science program was developed in cooperation with nearby clinical laboratory science schools, and OSU students have shown a high success rate in these schools. Most pre-clinical laboratory science students complete the BS degree in a field closely related to clinical laboratory science, such as microbiology, biochemistry, biology, zoology, or general science and then attend clinical laboratory science school (4+1 program).

First Year (45)

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)

CH 121, CH 122, CH 123. General Chemistry (5,5,5)

or CH 231, CH 232, CH 233. *General Chemistry (4,4,4)

and CH 261, CH 262, CH 263.

*Laboratory for Chemistry 231, 232, 233 (1,1,1)

HHS 231. *Lifetime Fitness for Health (2)

HHS 241–HHS 248. *Lifetime Fitness: (various activities) (1)

or any PAC course (1–2)

MB 110. Orientation to Microbiology (1)
 MTH 111. *College Algebra (4)
 MTH 112. *Elementary Functions (4)
 WR 121. *English Composition (3)
 Speech (3)

Sophomore Year (45)

BI 314. Cell and Molecular Biology (4)
 CH 331, CH 332, CH 337. Organic
 Chemistry and Lab (4,4,4)
 MB 302, MB 303. General Microbiology and
 Lab (3,2)
 PHAR 210. Terminology of the Health
 Sciences (2)

Take 4 credits of Statistics:

ST 201. Principles of Statistics (4)
 or ST 351. Introduction to Statistical
 Methods (4)
 Writing II (3)
 Baccalaureate core courses (12)
 Electives (3)

Junior Year (45)

BB 450, BB 451. General Biochemistry (4,3)
 MB 310. Bacterial Molecular Genetics (3)
 MB 311. ^Molecular Microbiology Lab (3)
 MB 416. Immunology (3)
 PH 201, PH 202, PH 203. *General Physics
 (5,5,5)
 Contemporary Global Issues (3)
 Science, Technology, and Society (3)
 Electives (8)

Senior Year (45)

Completion of a one-year clinical
 laboratory science program
 or Z 331, Z 332, Z 333. Human Anatomy
 and Physiology (3,3,3)
 and Z 341, Z 342, Z 343. Human Anatomy
 and Physiology Lab (2,2,2)
 Plus additional electives to total 60 upper-
 division credits.
 Electives (30)

Total=180

PRE-DENTISTRY OPTION

Chere Pereira, Chief Advisor

The College of Science offers a pre-dental curriculum leading to a Bachelor of Science degree in General Science that satisfies the requirements for admission to most dental schools.

Students may wish to declare another major, such as biology, microbiology, or zoology, to gain a broader background should plans to enter dental school change. In this case, students should consult with a departmental advisor as soon as feasible and select electives that will satisfy the requirements in the chosen major.

Admission to dental school is competitive; students are selected on the basis of grades, DAT scores, dental experience, and apparent motivation for dentistry. A member of the pre-dental committee is assigned to each student as an advisor.

First Year (45)

BI 107. Health Professions: Dental (1)
 CH 231, CH 232, CH 233. *General
 Chemistry (4,4,4)
and CH 261, CH 262, CH 263.

*Laboratory for Chemistry 231, 232, 233
 (1,1,1)

MTH 251. *Differential Calculus (4)
 MTH 252. Integral Calculus (4)
 or MTH 268. Mathematical Ideas in
 Biology (4)
 or ST 201. Principles of Statistics (4)
 or ST 351. Introduction to Statistical
 Methods (4)
 Speech (3)
 WR 121. *English Composition (3)
 Baccalaureate core courses and electives (15)

Sophomore Year (45–46)

BI 211, BI 212, BI 213. *Principles of
 Biology (4,4,4)
 CH 331, CH 332, CH 337. Organic
 Chemistry (4,4,4)
 Baccalaureate core courses and electives (14)
 Additional math, computer science, or
 statistics courses (4)
 Writing II (3)

Junior Year (42–48)

BI 314. Cell and Molecular Biology (4)
 BB 450, BB 451. General Biochemistry (4,3)
 or BB 350. Elementary Biochemistry (4)
 BI 311. Genetics (4)

Choose 4 credits of WIC from the following:

HSTS 415. ^Theory of Evolution and
 Foundation of Modern Biology (4)
 HSTS 417. ^History of Medicine (4)
 HSTS 425. ^History of the Life Sciences (4)
 Z 331, Z 332, Z 333. Human Anatomy and
 Physiology (3,3,3)
 Z 341, Z 342, Z 343. Human Anatomy and
 Physiology Labs (2,2,2)
 Electives (12–15)

Senior Year (45)

BI 460. Cell Biology (3)
 PH 201, PH 202, PH 203. *General Physics
 (5,5,5)
 Z 425. Embryology and Development (5)
 Baccalaureate core courses and electives (22)
 Graduation in general science/pre-dentistry
 requires a total of 40 credits of upper-
 division courses in science.

PRE-EDUCATION OPTION

Jen Olarra, Chief Advisor

The BS degree in General Science with a Pre-Education option is now offered at the OSU-Cascades branch campus in Bend. Please contact an OSU-Cascades advisor regarding course articulation from Central Oregon Community College.

The General Science major with the Pre-Education option is designed to prepare students interested in teaching elementary or middle school science to enter teacher licensure programs. The College of Education offers a master's degree with teacher certification while the College of Education offers a concurrent bachelor's degree with teacher certification.

Other pre-education options are offered in the College of Science through the Biology Program and departments of Chemistry, Mathematics, and Physics.

Students wishing to teach at the secondary school level are encouraged to major in their subject area with a pre-education option. It is important to work with an advisor to ensure that all requirements to enter a teacher licensure program are met. Experience in a classroom is required for entry into most teacher education programs.

First Year (45)

CH 121. General Chemistry (5)
 CH 122, CH 123. *General Chemistry (5,5)
 or CH 231, CH 232, CH 233. *General
 Chemistry (4,4,4) **and** CH 261, CH 262,
 CH 263. *Laboratory for Chemistry 231,

BI 101, BI 102, BI 103. *General Biology (4,4,4)
 or BI 211, BI 212, BI 213. *General Biology
 (4,4,4) (*BI 21X series recommended*)
 MTH 390. Foundations Elementary
 Mathematics (4)
 SED 407. Seminar: Introduction to Science
 Education (2) (*Required*)
 WR II. *English Composition (3)
 Literature and Arts—Choose one course
 from Baccalaureate Core Literature and
 Arts category.

Recommended:

ART 101. *Introduction to the Visual Arts (4)
 ENG 106. *Introduction to Literature:
 Poetry (3)
 TA 147. *Introduction to the Theatre (3)

Practicum Experience (Choose 6 credits minimum from the following):

SED 406. Projects (1–16)
 TCE 309. Field Practicum (3) (*Repeatable
 credit*)
 TCE 409. Practicum/Clinical Experience:
 Winter Break or September Experience
 (1–3) (*Repeatable credit*)

Note: All practica must be completed in a science or math classroom.

Earth Science. (Choose 8 credits from the following):

GEO 101. *The Solid Earth (4)
 GEO 102. *The Surface of the Earth (4)
 GEO 201. *Physical Geology (4)
 GEO 202. *Earth Systems Science (4)
 GEO 203. *Evolution of Planet Earth (4)
 Electives (7)

Junior Year (45)**History (Choose one course from each group for a total of 8 credits)**

HST 101, HST 102, or HST 103. *History of Western Civilization (4)

HST 201, HST 202, or HST 203. *History of the U.S. (4)

Physics or physical sciences, choose from below (11–15):

PH 201, PH 202, PH 203. *General Physics (5,5,5)

or PH 211, PH 212, PH 213. *General Physics with Calculus (4,4,4)

or ATS 210. Introduction to the Atmospheric Sciences (3)

or PH 104. *Descriptive Astronomy (4)

or PH 106. *Perspectives in Physics (4)

Human Development (Choose 2–4 credits from the following)

HDFS 313. Adolescent Development (4)

or TCE 253. Learning Across the Lifespan (3)

or TCE 412. Learning Styles and Needs in Adolescence (2)

Education (Choose a minimum of 12 credits in SED or TCE from the recommended list below)

SED 412. Technology Foundations for Teaching Math and Science (3)

SED 413. Inquiry in Science and Science Education (3)

or SED 414. Inquiry in Mathematics and Mathematics Education (3)

TCE 216. *Purpose, Structure, and Function of Education in a Democracy (3)

TCE 219. Multicultural Issues in Educational Settings (3)

Contemporary Global Issues (3)

Electives (3–9)

Senior Year (45)

Must consist of at least 31 credits of upper-division science courses (including 4 credits of history of science) that are pre-approved by the head advisor in the College of Science.

Choose 4 credits of WIC from the following:

HSTS 415. ^Theory of Evolution and Foundation of Modern Biology (4)

HSTS 419. ^Studies in Scientific Controversy: Methods and Practices (4)

HSTS 422. ^Historical Studies of Science and Politics (4)

HSTS 425. ^History of the Life Sciences (4)

No more than 6 credits of unstructured courses numbered 401, 403, 405, 407, and 410 may be included in the major option.

Electives (14)

A foreign language, especially Spanish, is recommended.

PRE-MEDICINE OPTION

Chere Pereira, *Chief Advisor*

Premedical Program

Students can apply to medical school with any major, including non-science areas, as long as they take the required courses listed by the school to which they apply. Since the basic entrance requirements include a year each of biology, general chemistry, organic

chemistry, and physics, this course work can easily be incorporated into many different majors. The most commonly used science majors are biology, biochemistry/biophysics, chemistry, microbiology and zoology. The General Science–Pre-Medicine option is reserved for primarily for post-baccalaureate students who already have a bachelor's degree in another subject and need science course work to apply to medical school. Medical schools have indicated a preference for a departmental major that is pursued in depth; therefore the General Science major is now rarely used. The book, *Medical School Admission Requirements* published by the Association of American Medical Colleges, lists specific entrance requirements for each MD school. The American Association of Colleges of Osteopathic Medicine lists requirements for osteopathic (DO) schools.

Admission to medical schools is very competitive. Students are chosen according to grades, MCAT scores, medical experience, and apparent motivation for medicine. A member of the premedical committee is assigned to each student as an advisor. A list of advisors is available in the College of Science office.

First Year (45)

BB 100. The Molecules of Life (2)

BI 109. Health Professions: Medical (1)

CH 231, CH 232, CH 233. *General Chemistry (4,4,4)

and CH 261, CH 262, CH 263.

*Laboratory for Chemistry 231, 232, 233 (1,1,1)

MTH 251. *Differential Calculus (4)

MTH 252. Integral Calculus (4)

WR 121. *English Composition (3)

Speech (3)

Baccalaureate core courses and electives (13)

Sophomore Year (45–47)

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)

BI 314. Cell and Molecular Biology (4)

CH 331, CH 332, CH 337. Organic Chemistry (4,4,4)

Baccalaureate core courses and electives (14)

Writing II (3)

Junior Year (44–46)

BB 450, BB 451. General Biochemistry (4,3)

BI 311. Genetics (4)

CH 324. Quantitative Chemistry (4)

PH 201, PH 202, PH 203. *General Physics (5,5,5)

ST 201. Principles of Statistics (4)

or ST 351. Introduction to Statistical Methods (4)

Baccalaureate core courses and electives (8–9)

Choose 4 credits of WIC from the following:

HSTS 415. ^Theory of Evolution and Foundation of Modern Biology (4)

HSTS 417. ^History of Medicine (4)

HSTS 425. ^History of the Life Sciences (4)

Senior Year (45)

BI 460. Cell Biology (3)

Z 425. Embryology and Development (5)

Baccalaureate core courses and electives (35)

Students should plan their senior year in consultation with a premedical advisor. Graduation in general science/pre-medicine requires a total of 45 credits of upper-division courses in science.

PRE-NURSING EDUCATION OPTION**(Transfer Program)**

Christopher Wheeler, *Chief Advisor*

The College of Science offers a preparatory curriculum designed to meet the general requirements for admission to a baccalaureate degree nursing program. Two years of pre-nursing followed by two or three years of professional training at a school of nursing lead to a Bachelor of Science degree in Nursing (BSN). Satisfactory completion of the pre-nursing requirements does not guarantee admission to a BSN program, since applicants are accepted on a competitive basis.

BSN programs are available at several colleges and universities in Oregon. Application for admission to these schools is usually made in the sophomore year. Some schools of nursing also offer accelerated BSN programs for students who already hold a BA or BS degree and have completed certain prerequisite courses; application is made after the bachelor's degree is conferred.

Associate degrees in nursing (ADN) are offered by most community colleges in Oregon. Nurses with associate degrees are qualified to provide direct patient care. To become a Registered Nurse, both BSN and ADN graduates must pass a licensing examination administered by the State Board of Nursing.

Nursing Curriculum

The prerequisites and general requirements for admission vary between nursing programs. Students' course selection will vary depending on the nursing schools to which they plan to apply. It is strongly recommended that Pre-Nursing students meet with the Pre-Nursing advisor to help them create an appropriate course schedule. Below is a sample schedule illustrating many of the common nursing school prerequisites. The courses listed below are recommended to fulfill the general requirements for admission to a BSN program. **However, requirements vary from school to school, so students planning a program must check the specific requirements of the BSN programs to which they plan to transfer.**

Nursing Core, First Year

ANTH 110. *Introduction to Cultural Anthropology (3)

or ANTH 210. *Comparative Cultures (3)

CH 121, CH 122, CH 123. General Chemistry (5,5,5)

or CH 231, CH 232, CH 233. *General Chemistry (4,4,4)

and CH 261, CH 262, CH 263.

*Laboratory for Chemistry 231, 232, 233 (1,1,1)

or CH 130. General Chemistry of Living Systems (4)

MTH 095. Intermediate Algebra (3)

or MTH 111. *College Algebra (4)

PSY 201, PSY 202. *General Psychology (3,3)

SOC 204. *Introduction to Sociology (3)

WR 121. *English Composition (3)

WR 222. *English Composition (3)

English literature course (3)

History course (3)

Nursing Core, Second Year

MB 230. *Introductory Microbiology (4)

NUTR 225. Human Nutrition (3)

or NUTR 240. Human Nutrition (3)

and NUTR 241. Applications in Human Nutrition (1)

PSY 350. Human Lifespan Development (3)

ST 201. Principles of Statistics (4)

Z 331, Z 332, Z 333. Anatomy and Physiology (3,3,3)

Z 341, Z 342, Z 343. Anatomy and Physiology Lab (2,2,2)

Nursing Electives, BSN-Program Specific

Pre-Nursing students may need to take some of the classes listed below. Not all classes apply to each BSN program. It is **strongly recommended** that Pre-Nursing students meet with the Pre-Nursing advisor to determine which of these courses they need to complete.

BI 212, BI 213. *Principles of Biology (4,4)

or BI 102, BI 103. *General Biology (4,4)

COMM 111. *Public Speaking (3)

or COMM 218. *Interpersonal Communication (3)

HHS 231. *Lifetime Fitness (2)

Humanities: various courses (16–18)

PAC Courses (2)

PHL 160. *Quests for Meaning: World Religions (4)

PHL 205. *Ethics (4)

WR 327. *Technical Writing (3)

PRE-OCCUPATIONAL THERAPY OPTION

(Transfer Program)

Ariella Wolf, *Chief Advisor*

Occupational therapy uses meaningful activity to help people of all ages prevent, lessen, or overcome disabilities. Occupational therapists work in hospitals, schools, and mental health and community agencies.

The College of Science offers a *transfer program* designed to meet **most** requirements for admission to bachelor's degree programs around the country. For programs at the bachelor's degree level, students must meet both pre-professional requirements and general education requirements at the school to which admission is desired. Therefore, students are

urged to check the prerequisite courses at each school carefully and to work closely with admissions officers to see that these requirements are fulfilled.

Students in the pre-occupational therapy curriculum may choose to complete a Bachelor's degree at OSU and apply to master's level programs in occupational therapy. This is the preferred option for most OSU students. Students considering this option should consult with the pre-OT advisor.

Satisfactory completion of the OSU course work facilitates, but does not guarantee, admission to a school of occupational therapy, since applicants are selected on a competitive basis.

First Year (44–46 credits)

ANTH 110. *Introduction to Cultural Anthropology (3)

BI 101 and BI 102 or BI 103. *General Biology (4,4)

COMM 111. *Public Speaking (3)

Electives (13)

Non-Western Culture course (3)

Footnotes:

¹ 18 Credits of applied art (ceramics, woodworking, etc.) and humanities are required.

² Work experience with an occupational therapist is strongly recommended.

PRE-OPTOMETRY OPTION

Ariella Wolf, *Chief Advisor*

To prepare for a career as an optometrist, students need three or four years of undergraduate work in science, followed by four years at an accredited college of optometry. Completion of the professional program leads to the degree of Doctor of Optometry. The curriculum described below satisfies the entrance requirements to **most** optometry schools in the United States. Applicants to optometry schools are accepted on a competitive basis. Students are encouraged to carefully check the prerequisites at the optometry schools of their interest and to work closely with admissions officers to see that all requirements have been fulfilled. Pre-Optometry students interested in working toward biology or zoology degrees should consult with an advisor in these majors.

First Year (45)

Science Technology and Society (3)

Electives (6) (*PHL 444 recommended*)

Senior Year (45)

BB 450, BB 451. General Biochemistry (4,3)

BI 311. Genetics (4)

BI 314. Cell and Molecular Biology (4)

MB 302, MB 303. General Microbiology and Lab (3,2)

Electives (21) (*PH 332 recommended*)

Choose 4 credits of WIC from the following:

HSTS 415. ^*Theory of Evolution and Foundation of Modern Biology (4)
 HSTS 417. ^*History of Medicine (4)
 HSTS 419. ^*Studies in Scientific Controversy: Methods and Practices (4)
 HSTS 422. ^*Historical Studies of Science and Politics (4)
 HSTS 425. ^*History of the Life Sciences (4)
 Students who undertake a four-year program should plan their senior year in consultation with their advisor. Two study plans are available:

A departmental major may be completed in any department of the College of Science.

Students without a departmental major may earn a Bachelor of Science degree in General Science; a total of 41 credits of approved upper-division courses in science are required.

Recommended electives:

BB 331. *Introduction to Molecular Biology (3)
 BI 460, BI 461. Cell Biology and Lab (3,2)
 BI 370. Ecology (3)
 CH 324. Quantitative Analysis (4)
 CH 440, CH 441, CH 442. Physical Chemistry (3,3,3)
 HSTS 411, HSTS 412, HSTS 413. *History of Science (4,4,4)
 MB 416, MB 417. Immunology, Immunology Lab (3,2)
 MB 430. Bacterial Pathogenesis (3)
 MB 434. Virology (3)
 MB 435. Pathogenic Microbes Lab (2)
 MTH 254. Vector Calculus I (4)
 MTH 256. Applied Differential Equations (4)
 PH 332. *Light, Vision, and Color (3)

 PSY 432. Physiological Psychology (4)
 PSY 442. Perception (4)
 Z 425. Embryology and Development (5)
 Z 431, Z 432. Vertebrate Physiology (4,4)

PRE-PHARMACY OPTION

Alex Aljets, Chief Advisor

The College of Science offers a preparatory program designed to meet most requirements for admission to pharmacy schools across the U.S., including OSU's Doctor of Pharmacy (PharmD) professional program. Students who complete the four-year pre-pharmacy program earn a BS degree in General Science with a Pre-Pharmacy option. Satisfactory completion of the pre-pharmacy course work facilitates, but does not guarantee, admission to pharmacy school; applicants are selected on a competitive basis. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all requirements.

First Year

CH 231, CH 232, CH 233. *General Chemistry (4,4,4)
and CH 261, CH 262, CH 263.

*Laboratory for Chemistry 231, 232, 233 (1,1,1)
 COMM 218. *Interpersonal Communication (3)
 or COMM 114. *Argument and Critical Discourse (3)
 MTH 111. *College Algebra (4)
 or MTH 112. *Elementary Functions (4)
 MTH 241. *Calculus for Management and Social Science (4)
 or MTH 251. *Differential Calculus (4)
 PHAR 201. Pharmacy Orientation (2)
Recommended
 PSY 201. *General Psychology (3)
 WR 121. *English Composition (3)
 Fitness (3)
 Speech (3)—COMM 218. *Interpersonal Communication (3) or COMM 114. *Argument and Critical Discourse (3)
 Baccalaureate Core courses and/or electives (8)

Second Year

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)
 CH 331, CH 332. Organic Chemistry, Lab (4,4)
 CH 337. Organic Chemistry, Lab (4)
 ST 201. Principles of Statistics (4)
 Additional math, statistics, or computer science to total 12 credits.
 Writing II (3)
 Baccalaureate Core courses and/or electives (15)

Third Year

BI 314. Cell and Molecular Biology (4)
 MB 302. General Microbiology (3)
 MB 303. General Microbiology Lab (2)
 PH 201, PH 202, PH 203. *General Physics (5,5,5)
 PHAR 210. Medical Terminology (2)
Recommended
 Z 430. Principles of Physiology (4)
 Z 431, Z 432. Vertebrate Physiology (4,4)
 Baccalaureate Core courses and/or electives (7)

Fourth Year

Contemporary Global Issues (recommend H 312. *Aids and STDs in Modern Society) (3)
 Science, Technology, and Society (3)

Choose one WIC course from the following:

HSTS 415. ^*Theory of Evolution and Foundation of Modern Biology (4)
 HSTS 417. ^*History of Medicine (4)
 HSTS 419. ^*Studies in Scientific Controversy: Methods and Practices (4)
 HSTS 422. ^*Historical Studies of Science and Politics (4)
 HSTS 425. ^*History of the Life Sciences (4)
 PHAR 432. ^*Writing in the Pharmaceutical Sciences (2)

Additional courses from upper-division science or first-year professional pharmacy courses to total 36 credits of upper-division science. A total of 180 credits with 60 upper-division credits (courses numbered 300 and above) are required to graduate.

Additional courses required for entry into OSU's PharmD program:

BB 450. General Biochemistry (4)

BB 451. General Biochemistry (3)
 Certification in Basic First Aid and CPR
 ECON 201. *Introduction to Microeconomics (4)
 or ECON 202. *Introduction to Macroeconomics (4)
 or AREC 250. *Introduction to Environmental Economics and Policy (3)
 Z 441, Z 442, Z 443. Advanced Human Anatomy and Physiology Lab (2,2,2)

PRE-PHYSICAL THERAPY OPTION

Ariella Wolf, Chief Advisor

The College of Science offers a preparatory program designed to meet **most** general requirements for admission to physical therapy schools. Students who complete the four-year pre-physical therapy program earn a BS degree in General Science with a Pre-Physical Therapy option. Satisfactory completion of the OSU course work facilitates, but does not guarantee, admission to a school of physical therapy; applicants are selected on a competitive basis. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all requirements.

First Year (45)

 HSTS 425. ^*History of the Life Sciences (4)

Total=180**PRE-PHYSICIAN ASSISTANT OPTION***Ariella Wolf, Chief Advisor*

The College of Science offers a preparatory program designed to meet **most** general requirements for admission to many physician assistant schools. Students who complete the four-year pre-physician assistant program earn a BS degree in General Science with a Pre-physician Assistant option. Satisfactory completion of the OSU course work facilitates, but does not guarantee, admission to a physician assistant school; applicants are selected on a competitive basis and extensive clinical experience in a health care setting is required. Students are urged to carefully check admission requirements at their schools of interest and work closely with admission representatives in order to make sure they are meeting all requirements.

First Year (45)

EXSS 132. Introduction to the Allied Health Professions (1)
 CH 121, CH 122, CH 123. *General Chemistry (5,5,5)
 or CH 231, CH 232, CH 233. *General Chemistry (4,4,4)
 and CH 261, CH 262, CH 263.
 *Laboratory for Chemistry 231, 232, 233 (1,1,1)
 HHS 231. *Lifetime Fitness for Health (2)
 HHS 241–HHS 248. *Lifetime Fitness: (various activities) (1)
 or any PAC course (1–2)
 MTH 111. *College Algebra (4)
 MTH 112. *Elementary Functions (4)
 PSY 201, PSY 202. *General Psychology (3,3)
 WR 121. *English Composition (3)

Speech (3)
 Baccalaureate core courses and electives (6)

Sophomore Year (45)

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)
 CH 331, CH 332, CH 337. Organic Chemistry and Lab (4,4,4)
 ST 201, ST 202. Principles of Statistics (4,4)
 SOC 206. *Social Problems and Issues (3)
 or SOC 204. *Introduction to Sociology (3)
 WR II. *English Composition (3)
 Baccalaureate core courses and electives (9)

Junior Year (45)

H 312. *AIDS and Sexually Transmitted Diseases in Modern Society (3)
 H 320. Introduction to Human Disease (3)
 PH 201, PH 202, PH 203. *General Physics (5,5,5)
 PSY 350. Human Lifespan Development (4)
 PSY 381. Abnormal Psychology (4)
 Z 331, Z 332, Z 333. Human Anatomy and Physiology (3,3,3)
 Z 341, Z 342, Z 343. Human Anatomy and Physiology Lab (2,2,2)
 Elective (1)

Senior Year (45)

Pre-approved upper-division science, psychology or health (9) excluding internship, practicum special/selected topics courses and courses with 399, 499, and 401–410 numbers.
 BB 350. Elementary Biochemistry (4)
 or BB 450, BB 451. General Biochemistry (4,3)
 BI 311. Genetics (4)
 BI 314. Cell and Molecular Biology (4)
 MB 302, MB 303. General Microbiology and Lab (3,2)
 PHAR 210. Terminology of the Health Sciences (2)
 Baccalaureate core courses and electives (10)
Choose 4 credits of WIC from the following:
 HSTS 415. ^*Theory of Evolution and Foundation of Modern Biology (4)
 HSTS 417. ^*History of Medicine (4)
 HSTS 419. ^*Studies in Scientific Controversy: Methods and Practices (4)
 HSTS 422. ^*Historical Studies of Science and Politics (4)
 HSTS 425. ^*History of the Life Sciences (4)

Total=180**PRE-PODIATRY OPTION***Chere Pereira, Chief Advisor*

Podiatry is a growing and challenging health profession that focuses on the care of the human foot and leg. Podiatrists prevent, diagnose, and treat diseases and disorders of the foot through both medical and surgical methods.

Students wishing to become podiatrists attend a four-year postbaccalaureate training program leading to a Doctor of Podiatric Medicine (DPM) at one of eight schools of podiatric medicine in the United States. These schools are located in Arizona, California, Florida, Illinois, Iowa, New York, Ohio, and Pennsylvania. To practice in Oregon, a DPM must also

take the qualifying examination administered by the State Board of Podiatric Examiners.

Before entering a school of podiatric medicine, students must first complete four years of undergraduate study and fulfill entrance requirements to the school of their choice (note that most podiatry schools require 3 quarters of English/writing). Students who enroll in the Pre-Podiatry option will receive a BS degree in General Science upon completion of the curriculum shown below. The preparatory program at OSU will satisfy requirements for entrance to most podiatry schools.

First Year

CH 231, CH 232, CH 233. *General Chemistry (4,4,4)
and CH 261, CH 262, CH 263.
 *Laboratory for Chemistry 231, 232, 233 (1,1,1)
 Math Sciences at least through MTH 112, *Elementary Functions, (8)
 Baccalaureate core courses and electives (16)
 Speech (3)
 WR 121. *English Composition (3)

Sophomore Year

CH 331, CH 332, CH 337. Organic Chemistry and Lab (4,4,4)
 BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)
 ST 201, ST 202. Principles of Statistics (4,4)
 or ST 351, ST 352. Introduction to Statistical Methods (4,4)
 Writing II (3)
 Baccalaureate core courses and electives (10–12)

Junior Year

BB 450, BB 451. General Biochemistry and Lab (4,3)
 or BB 350. Elementary Biochemistry (4)
 BI 311. Genetics (4)
 BI 314. Cell and Molecular Biology (4)
 PH 201, PH 202, PH 203. *General Physics (5,5,5)
 Baccalaureate core courses and electives (12)

Choose 4 credits of WIC from the following:

HSTS 415. ^*Theory of Evolution and Foundation of Modern Biology (4)
 HSTS 417. ^*History of Medicine (4)
 HSTS 425. ^*History of the Life Sciences (4)

Senior Year

Courses should be planned in consultation with student's advisor; graduation in the General Science major with the Pre-Podiatry option requires a total of 36 credits of upper-division science, to include at least two courses in anatomy, physiology, histology, or embryology.

PRE-VETERINARY MEDICINE OPTIONShawna Harvey, *Chief Advisor*

The College of Science offers a pre-professional program for students who wish to pursue careers in veterinary medicine. This program, especially tailored to the Oregon State University College of Veterinary Medicine, also meets admission requirements for most schools of veterinary medicine in the country.

Pre-veterinary students may major in general science or any other discipline while completing the admission requirements for veterinary school. Scientific disciplines such as biology, microbiology, or zoology are most frequently chosen, but areas outside of science also are acceptable. A student who is accepted into a veterinary school after three years of pre-professional work can apply up to 48 credits of the first year of professional study toward completion of a bachelor's degree in biology, general science, or zoology from OSU.

Admission to schools of veterinary medicine is competitive, and completion of the pre-veterinary requirements facilitates but does not guarantee acceptance. Admission committees look for a combination of academic ability and personal characteristics. Academic ability includes both the grades received in college courses and test scores. Additional information regarding application and professional education may be found in the Veterinary Medicine section of this catalog.

All science courses required for veterinary school admission must be taken for a letter grade. The following courses are required for a Bachelor of Science degree in General Science with a Pre-Veterinary Medicine option.

First Year

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)

CH 121, CH 122, CH 123. General Chemistry (5,5,5)

or CH 231, CH 232, CH 233. *General Chemistry (4,4,4)

and CH 261, CH 262, CH 263.

*Laboratory for Chemistry 231, 232, 233 (1,1,1)

MTH 251, *Differential Calculus (4)

VMB 110. Preveterinary Medicine (1)
(*Recommended*)

Speech (3)

WR 121. *English Composition (3)

Baccalaureate core courses and electives (3)

Sophomore YearANS 121. *Introduction to Animal Science (4) (*Recommended*)

BI 314. Cell and Molecular Biology (4)

CH 331, CH 332, CH 337. Organic Chemistry and Lab (4,4,4)

PH 201, PH 202, PH 203. *General Physics (5,5,5)

Take 4 credits of Statistics:

ST 201. Principles of Statistics (4)

or ST 351. Introduction to Statistical Methods (4)

Additional math, computer science or statistics (4)

Electives (3)

Writing II (3)

Junior/Senior Year

ANS 311. Principles of Animal Nutrition (3)

BB 450, BB 451. General Biochemistry (4,3)

BI 311. Genetics (4)

One of the following courses in animal or human physiology (3-4):

Z 331. Human Anatomy and Physiology (3)

Z 430. Principles of Physiology (4)

Z 431. Vertebrate Physiology (4)

A minimum of at least 6 additional credits of upper-division biological science courses with at least one laboratory.

Recommended courses include:

additional biochemistry, additional physiology and/or anatomy, animal reproduction, cell biology, cell physiology, epidemiology, histology, immunology, microbiology, parasitology, or virology (does not include Z 410) (6).

Choose 4 credits of WIC from the following:

HSTS 415. ^Theory of Evolution and Foundation of Modern Biology (4)

HSTS 417. ^History of Medicine (4)

HSTS 419. ^Studies in Scientific

Controversy: Methods and Practices (4)

HSTS 422. ^Historical Studies of Science and Politics (4)

HSTS 425. ^History of the Life Sciences (4)

Additional courses to total a minimum of 38 credits in upper-division science courses from the College of Science.

Baccalaureate core courses and electives (61-64)

Experience with animals, such as Z 410, Occupational Internship (1-16), is highly recommended.

A bachelor's degree is no longer required to obtain the DVM from Oregon State University's College of Veterinary Medicine. See the College of Veterinary Medicine for the general education prerequisites if the applicant will not have a bachelor's degree upon entering veterinary school.

COURSES

GS 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

GS 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

GS 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GS 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

GS 407. SEMINAR (1-16). One-credit sections. Graded P/N. This course is repeatable for a maximum of 16 credits.

GS 410. SCIENCE INTERNSHIP (1-12). Supervised scientific work experience at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N. This course is repeatable for a maximum of 12 credits. **PREREQS:** Upper-division standing in appropriate major.

Mathematics**

The department offers programs leading to the BS, MA, MS, and PhD degrees in Mathematics. Undergraduate minors are offered in Mathematics and Actuarial Science.

Students interested in teaching mathematics at the secondary level should contact a departmental advisor and

discuss the Secondary Teaching Emphasis option available under the Mathematics major. Likewise, students interested in careers in the area of financial mathematics or as actuaries should meet with a member of the departmental Actuarial Sciences Committee.

Additional information pamphlets about both the undergraduate and graduate programs are available on the Department of Mathematics website.

The Mathematics major requirements at the upper division comprise about 45 credits of course work. This leaves about 45 credits of free electives that can be used to design a degree program in mathematics that is tailored to each major's particular interests.

UNDERGRADUATE MAJORS WITH OPTIONS**MATHEMATICS (BS, CRED, HBS)**

The BS degree in Mathematics requires a common core of courses at the lower-division level and junior-level followed by senior-level breadth courses allowing for some individual choice. The upper-division requirements in the major total 45 credits. Thus, a mathematics major has ample opportunity to take further mathematics courses focused toward specific interests and career goals. Interdisciplinary programs with other departments are strongly encouraged.

What follows are the requirements for the BS degree in Mathematics together with a suggested timeline.

Freshman Year (45)

MTH 251. *Differential Calculus (4)

MTH 252. Integral Calculus (4)

MTH 253. Infinite Series and Sequences (4)

PH 211. *General Physics with Calculus (4)

Baccalaureate core courses (29)

Sophomore Year (45)

MTH 254. Vector Calculus I (4)

MTH 255. Vector Calculus II (4)

MTH 256. Applied Differential Equations (4)

MTH 341. Linear Algebra (3)

Baccalaureate core courses (13)

Other electives (17)

Junior Year (45)

A grade of at least C– and a GPA of 2.25 are required in all upper-division mathematics courses used to fulfill degree requirements.

MTH 311, MTH 312. Advanced Calculus (4,4)

MTH 342. Linear Algebra II (4)

MTH 343. Introduction to Modern Algebra (3)

MTH 355. Discrete Mathematics (3)

Select one course from the following courses (WIC) (3):

MTH 323. ^Mathematical Modeling (3)

MTH 333. ^Fundamental Concepts of Topology (3)

MTH 338. ^Non-Euclidean Geometry (3)

Baccalaureate core courses (6)

Other electives (18)

Senior Year (45)**Five courses from the following (15):**

MTH 430. Metric Spaces and Topology (3)

MTH 434. Introduction to Differential Geometry (3)

MTH 440. Computational Number Theory (3)

MTH 451. Numerical Linear Algebra (3)

MTH 463. Probability I (3)

MTH 480. Systems of Ordinary Differential Equations (3)

MTH 483. Mathematical Methods for Engineers and Scientists (3)

Two additional courses selected from below (6):

Non-blanket numbered (not X99- or X0X-numbered) upper-division MTH courses, 400-level ST courses, or other courses of a mathematical nature approved by the departmental head advisor. MTH 390 is not allowed.

Electives (24)

Total=180**OPTIONS****SECONDARY TEACHING EMPHASIS OPTION**

Students preparing for careers teaching mathematics at the secondary level may major in mathematics with the following transcript-visible option. This option helps prepare students to pursue a teaching licensure program in their fifth year. Option requirements and a suggested timeline follow.

Freshman Year (45)

MTH 251. *Differential Calculus (4)

MTH 252. Integral Calculus (4)

MTH 253. Infinite Series and Sequences (4)

PH 211. *General Physics with Calculus (4)

Baccalaureate core courses (29)

Sophomore Year (45)

MTH 254. Vector Calculus I (4)

MTH 255. Vector Calculus II (4)

MTH 256. Applied Differential Equations (4)

MTH 341. Linear Algebra (3)

Baccalaureate core courses (13)

Other electives (17)

Junior Year (45)

A grade of at least C– and a GPA of 2.25 are required in all upper-division mathematics courses used to fulfill degree requirements.

MTH 311, MTH 312. Advanced Calculus (4,4)

MTH 338. ^Non-Euclidean Geometry (3)

MTH 342. Linear Algebra II (4)

MTH 343. Introduction to Modern Algebra (3)

MTH 355. Discrete Mathematics (3)

MTH 361. Introduction to Probability (3)

TCE 309. Field Practicum (3)

Baccalaureate core courses (6)

Other electives (12)

Senior Year (45)

MTH 491, MTH 492, MTH 493. Algebra and Geometric Transformations (3,3,3)

SED 414. Inquiry in Mathematics and Mathematics Education (3)

ST 351. Introduction to Statistical Methods (4)

Electives (29)

- Students wanting a stronger background in statistics may substitute ST 421 for ST 351.
- Students wanting a stronger background in probability may substitute MTH 463, Probability I, (usually taken in the senior year) for MTH 361.
- Students wanting a stronger background in mathematics should choose some electives from the seven senior courses listed above in the Mathematics major.

STATISTICS OPTION

The Statistics option offers Mathematics majors an opportunity to concentrate their senior level course work in the area of statistics and probability after completing core junior and lower-division mathematics requirements. This degree option is designed to allow a focus on the study of the mathematical theory underlying statistics while simultaneously developing expertise in statistical applications.

The following upper-division requirements for the Statistics option are in place of the required five (from a list of seven) 400-level classes and the additional two upper-division math, 400-level statistics, or other approved courses of a mathematical nature that are specified in the BS in Mathematics.

Required

- MTH 463. Probability I (3)
 MTH 464. Probability II (3)
 ST 411. Methods of Data Analysis (4)
 ST 412. Methods of Data Analysis (4)
 ST 421. Introduction to Mathematical Statistics (4)
 ST 422. Introduction to Mathematical Statistics (4)

One course from the following list is required:

- MTH 465. Probability III (3)
 MTH 467. Actuarial Mathematics (3)
 ST 413. Methods of Data Analysis (4)
 ST 415. Design and Analysis of Planned Experiments (3)
 ST 431. Sampling Methods (3)
 ST 439. Survey Methods (3)
 ST 441. Probability, Computing, and Simulation in Statistics (4)
 ST 443. Applied Stochastic Models (3)

Two courses from the following list are required:

- MTH 351. Introduction to Numerical Analysis (3)
 or MTH 451. Numerical Linear Algebra (3)
 MTH 411. Real Analysis (3)
 MTH 430. Metric Spaces and Topology (3)
 MTH 434. Introduction to Differential Geometry (3)
 MTH 440. Computational Number Theory (3)
 MTH 443. Abstract Linear Algebra (3)
 MTH 480. Systems of Ordinary Differential Equations (3)
 or MTH 481. Mathematical Methods for Engineers and Scientists (3)

- MTH 483. Mathematical Methods for Engineers and Scientists (3)
 MTH 499. Selected Topics: *Models and Methods of Applied Mathematics* (3)

UNDERGRADUATE MINORS

ACTUARIAL SCIENCE MINOR

Required (22)

- MTH 251. *Differential Calculus (4)
 MTH 252. Integral Calculus (4)
 MTH 253. Infinite Series and Sequences (4)
 or MTH 306. Matrix and Power Series Methods (4)
 MTH 254. Vector Calculus I (4)
 MTH 341. Linear Algebra I (3)
 MTH 361. Introduction to Probability (3)
Select at least 2 courses from the following upper-division courses (6–8):
 MTH 351. Introduction to Numerical Analysis (3)
 MTH 463. Probability I (3)
 MTH 464. Probability II (3)
 MTH 465. Probability III (3)
 MTH 467. Actuarial Mathematics (3)
 ST 411. Methods of Data Analysis (4)
 ST 412. Methods of Data Analysis (4)
 ST 413. Methods of Data Analysis (4)
 ST 421. Introduction to Mathematical Statistics (4)
 ST 422. Introduction to Mathematical Statistics (4)
 ST 441. Probability, Computing, and Simulation in Statistics (4)
 ST 443. Applied Stochastic Models (3)

Restriction: The Actuarial Science minor must include 28 credits, at least 12 of which must be upper-division credits.

- Except for MTH 306 and MTH 341, upper-division courses used to satisfy a student's major requirements may not also be used to satisfy requirements for the Actuarial Science minor.
- Except for MTH 306 and MTH 341, upper-division courses used to satisfy a student's additional minor program may not also be used to satisfy requirements for the Actuarial Science minor.

Total=28–30

MATHEMATICS MINOR

Required

- MTH courses numbered 231 or higher (30 credits)
 MTH courses numbered 311 or higher (15 credits)
 MTH 311. Advanced Calculus (4)
 or MTH 341. Linear Algebra I (3)

Strongly Recommended:

- MTH 251. *Differential Calculus (4)
 MTH 252. Integral Calculus (4)
 MTH 254. Vector Calculus I (4)

Note: MTH 390, Foundations of Elementary Mathematics (4), **may not be used** for credit in the Mathematics minor.

MATHEMATICS (MA, MS, PhD, MAIS)

Graduate Areas of Concentration

Actuarial science, algebra, analysis, applied mathematics, computational mathematics, differential equations, financial mathematics, geometry, mathematics education, number theory, numerical analysis, topology, probability

The Department of Mathematics offers graduate work leading to the Master of Science, Master of Arts, and Doctor of Philosophy degrees. Graduate areas of concentration are actuarial science, algebra, analysis, applied mathematics, computational mathematics, differential equations, financial mathematics, geometry, mathematics education, number theory, numerical analysis, topology, probability.

For the MS and MA, a thesis, an expository paper, or successful completion of the PhD qualifying examination is required.

MATHEMATICS GRADUATE MINOR

For more details, see the departmental advisor.

COURSES

MTH 065. ELEMENTARY ALGEBRA (3).

Arithmetic of signed numbers, order of operations, simplifying algebraic expressions, solution of linear equations, and inequalities. Rules of exponents, addition, subtraction, and multiplication of polynomials, factoring, solution of quadratic equations by factoring, reducing rational expressions. Word problems involving linear equations, graphing of linear equations, inequalities.

MTH 095. INTERMEDIATE ALGEBRA (3).

Addition, subtraction, multiplication, and division of rational expressions, long division of polynomials, solution of fractional equations, applications involving linear equations. Fractional equations, inequalities, literal equations, and variations. Negative and fractional exponents, radicals, solution of quadratic equations, and complex numbers. Cartesian coordinates, graphs of linear equations and inequalities, distance formula, slope, equations of lines, solutions of systems of linear equations in two unknowns and inequalities. **PREREQS:** MTH 065

MTH 102. ALGEBRAIC FOUNDATIONS (3).

This course is designed primarily for EOP students. They will use various computing technologies to explore realistic and interesting situations in which algebra is used. As they work through explorations, they will work with many of the fundamental ideas of algebra, ideas they will find important in their daily lives.

MTH 103. ALGEBRAIC REASONING (4).

A combination of cooperative learning and individual instruction is used to promote student development of algebraic reasoning processes and skills. **PREREQS:** Previous algebra course.

MTH 105. *INTRODUCTION TO CONTEMPORARY MATHEMATICS (3).

Elementary linear programming, combinatorics, descriptive statistics, elementary probability, exponential growth and decay, examples of major mathematical ideas and models. Lec/rec. (Bacc Core Course) **PREREQS:** MTH 095 or equivalent high school preparation.

MTH 111. *COLLEGE ALGEBRA (4). Polynomial equations and inequalities, polynomial functions and graphs, inverse functions, exponential and

logarithmic functions, elementary mathematical modeling and applications. Lec/rec. (Bacc Core Course) **PREREQS:** MTH 095 or equivalent high school preparation.

MTH 112. *ELEMENTARY FUNCTIONS (4). Triangle trigonometry, circular functions and graphs, trigonometric equations and identities, inverse trigonometric functions, polar coordinates, vectors and applications. Lec/rec. (Bacc Core Course) **PREREQS:** MTH 111

MTH 199. SPECIAL TOPICS (1-16). Maximum 3 credits per term, 9 credits total. Does not meet university group requirement in physical science. This course is repeatable for a maximum of 9 credits.

MTH 211. *FOUNDATIONS OF ELEMENTARY MATHEMATICS (4). Introduction to problem solving, sets, whole numbers, number theory, fractions, decimals, percent, ratio and proportion, integers. Intended primarily for prospective elementary teachers. (Bacc Core Course) **PREREQS:** (MTH 095 or MTH 103 or MTH 111 or MTH 112) or Placement Test or Placement Test

MTH 212. FOUNDATIONS OF ELEMENTARY MATHEMATICS (4). Rational and real numbers, probability, statistics, and informal geometry. **PREREQS:** MTH 211

MTH 231. ELEMENTS OF DISCRETE MATHEMATICS (4). Elementary logic and set theory, functions, direct proof techniques, contradiction and contraposition, mathematical induction and recursion, elementary combinatorics, basic graph theory, minimal spanning trees. **PREREQS:** Placement in MTH 251

MTH 232. ELEMENTS OF DISCRETE MATHEMATICS (4). Combinatorics, algorithms and complexity, graphs and trees. Lec/rec. **PREREQS:** MTH 231

MTH 241. *CALCULUS FOR MANAGEMENT AND SOCIAL SCIENCE (4). Elementary differential and integral calculus of polynomial, logarithmic, and exponential functions and their applications to business, management and social sciences. Lec/rec. (Bacc Core Course) **PREREQS:** (MTH 111 or MTH 112) or Placement Test and MTH 111

MTH 245. *MATHEMATICS FOR MANAGEMENT, LIFE, AND SOCIAL SCIENCES (4). Techniques of counting, probability and elements of statistics including binomial and normal distributions. Introductory matrix algebra. Elements of linear programming. Lec/rec. (Bacc Core Course) **PREREQS:** MTH 111

MTH 251. *DIFFERENTIAL CALCULUS (4). Differential calculus for engineers and scientists. Rates of change: the derivative, velocity, and acceleration. The algebraic rules of differential calculus and derivatives of polynomial, rational, and trigonometric functions. Maximum-minimum problems, curve sketching, and other applications. Antiderivatives and simple motion problems. (Bacc Core Course) **PREREQS:** MTH 112

MTH 251H. *DIFFERENTIAL CALCULUS (4). Differential calculus for engineers and scientists. Rates of change: the derivative, velocity, and acceleration. The algebraic rules of differential calculus and derivatives of polynomial, rational, and trigonometric functions. Maximum-minimum problems, curve sketching, and other applications. Antiderivatives and simple motion problems. (Bacc Core Course) **PREREQS:** MTH 112 and Honors College approval required.

MTH 252. INTEGRAL CALCULUS (4). Definite integrals, elementary applications to area, force, and work. Integral tables and basic techniques of integration, calculus of logarithmic and exponential functions, polar coordinates, applications to areas, volumes, force, work, and growth and decay problems. Lec/rec. **PREREQS:** MTH 251 or MTH 251H

MTH 252H. INTEGRAL CALCULUS (4). Definite integrals, elementary applications to area, force, and work. Integral tables and basic techniques of integration, calculus of logarithmic and exponential functions, polar coordinates, applications to areas, volumes, force, work, and growth and decay problems. **PREREQS:** (MTH 251 or MTH 251H) and Honors College approval required.

MTH 253. INFINITE SERIES AND SEQUENCES (4). Indeterminate forms. Improper integrals. Sequences and series, especially Taylor's formula and power series. Applications to numerical estimation with error analysis. Series with complex terms and the Euler identities. Lec/rec. **PREREQS:** MTH 252

MTH 254. VECTOR CALCULUS I (4). Vectors, vector functions, and curves in two and three dimensions. Surfaces, partial derivatives, gradients, and directional derivatives. Multiple integrals in rectangular, polar, cylindrical, and spherical coordinates. Physical and geometric applications. Lec/rec. **PREREQS:** MTH 252 or MTH 252H

MTH 254H. VECTOR CALCULUS I (4). Vectors, vector functions, and curves in two and three dimensions. Surfaces, partial derivatives, gradients, and directional derivatives. Multiple integrals in rectangular, polar, cylindrical, and spherical coordinates. Physical and geometric applications. Lec/rec. **PREREQS:** (MTH 252 or MTH 252H) and Honors College approval required.

MTH 255. VECTOR CALCULUS II (4). Brief review of vector functions, space curves, gradients, and directional derivatives. Introduction to vector analysis: vector fields, divergence, curl, line integrals, surface integrals, conservative fields, and the theorems of Gauss and Stokes with applications to force, work, mass, and charge. Lec/rec. **PREREQS:** MTH 254

MTH 255H. VECTOR CALCULUS II (4). Brief review of vector functions, space curves, gradients, and directional derivatives. Introduction to vector analysis: vector fields, divergence, curl, line integrals, surface integrals, conservative fields, and the theorems of Gauss and Stokes with applications to force, work, mass, and charge. **PREREQS:** MTH 254 and Honors College approval required.

MTH 256. APPLIED DIFFERENTIAL EQUATIONS (4). First order linear and nonlinear equations, and second order linear equations. Applications to electric circuits and mechanical oscillators. Introduction to the Laplace transform and higher order equations. Solution methods and applications appropriate for science and engineering. (Familiarity with complex numbers and Euler's identities is highly desirable.) Lec/rec. **PREREQS:** (MTH 254 or MTH 254H) or instructor approval required.

MTH 256H. APPLIED DIFFERENTIAL EQUATIONS (4). First order linear and nonlinear equations, and second order linear equations. Applications to electric circuits and mechanical oscillators. Introduction to the Laplace transform and higher order equations. Solution methods and applications appropriate for science and engineering. (Familiarity with complex numbers and Euler's identities is highly desirable.) **PREREQS:** (MTH 254 or MTH 254H) or instructor approval required. Honors College approval required.

MTH 268. MATHEMATICAL IDEAS IN BIOLOGY (4). Mathematical models of biological systems, with emphasis on population dynamics and ecology. Integral calculus with applications to biology. **PREREQS:** MTH 251

MTH 299. SPECIAL TOPICS (1-16). Maximum 3 credits per term, 9 credits total. This course is repeatable for a maximum of 9 credits.

MTH 306. MATRIX AND POWER SERIES METHODS (4). Introduction to matrix algebra, determinants, systematic solution to linear

systems, and eigenvalue problems. Convergence and divergence of series with emphasis on power series, Taylor series expansions, convergence tests for power series, and error estimates for truncated series used in practical approximations. Lec/rec. **PREREQS:** (MTH 252 or MTH 252H)

MTH 306H. MATRIX AND POWER SERIES METHODS (4). Introduction to matrix algebra, determinants, systematic solution to linear systems, and eigenvalue problems. Convergence and divergence of series with emphasis on power series, Taylor series expansions, convergence tests for power series, and error estimates for truncated series used in practical approximations. Lec/rec. **PREREQS:** (MTH 252 or MTH 252H) and Honors College approval required.

MTH 311. ADVANCED CALCULUS (4). Rigorous development of calculus, axiomatic properties of \mathbb{R} , topology of the real line, convergence of sequences and series of real numbers, functions, limits of functions, basic properties of continuity and derivatives. Brief treatment of Riemann integration, improper integrals, sequences of functions, pointwise and uniform convergence, introductory aspects of multivariable calculus. **PREREQS:** Completion of lower-division calculus sequence (MTH 251 through MTH 255) and MTH 355, Discrete Mathematics.

MTH 312. ADVANCED CALCULUS (4). Rigorous development of calculus, axiomatic properties of \mathbb{R} , topology of the real line, convergence of sequences and series of real numbers, functions, limits of functions, basic properties of continuity and derivatives. Brief treatment of Riemann integration, improper integrals, sequences of functions, pointwise and uniform convergence, introductory aspects of multivariable calculus. **PREREQS:** MTH 311. Concurrent enrollment in MTH 342.

MTH 323. *MATHEMATICAL MODELING (3). A variety of mathematical modeling techniques will be introduced. Students will formulate models in response to practical problems drawn from the literature of ecology, environmental sciences, engineering or other fields. Informal writing assignments in class and formal written presentation of the models will be required. (Writing Intensive Course) **PREREQS:** MTH 256 and MTH 341 or instructor approval.

MTH 333. *FUNDAMENTAL CONCEPTS OF TOPOLOGY (3). Open and closed sets, continuity, compactness, connectedness, winding number, fixed point theorems in the plane. (Writing Intensive Course) **PREREQS:** MTH 341 or MTH 355

MTH 338. *NON-EUCLIDEAN GEOMETRY (3). Introduction to non-Euclidean geometries. Selected topics such as hyperbolic and elliptic geometry, spherical geometry, projective geometry, geometries arising from alternative metrics. (Writing Intensive Course) **PREREQS:** MTH 252

MTH 341. LINEAR ALGEBRA I (3). Matrix algebra, determinants, systems of linear equations, computational aspects of eigenvalues and eigenvectors. **PREREQS:** MTH 254

MTH 342. LINEAR ALGEBRA II (4). Vector spaces, linear transformations, inner product spaces, orthogonality, eigenvalues, diagonalization. **PREREQS:** MTH 341

MTH 343. INTRODUCTION TO MODERN ALGEBRA (3). Introduction to rings and fields with an emphasis on the integers and polynomial rings; selected applications. **PREREQS:** MTH 341 and MTH 355

MTH 351. INTRODUCTION TO NUMERICAL ANALYSIS (3). Introduction to the computation of approximate solutions to mathematical problems that cannot be solved by hand: analysis of errors; rootfinding for nonlinear equations in one variable; interpolation of functions; numerical integration. **PREREQS:** MTH 253 or MTH 306 and programming experience.

MTH 355. DISCRETE MATHEMATICS (3). For mathematics majors beginning upper-division mathematics course work. Topics include elementary combinatorics and basic counting principles such as the sum, product, pigeonhole, and bijection principles; mathematical induction; equivalence relations; introductory aspects of graph theory; generating functions; and the inclusion-exclusion principle. **PREREQS:** MTH 253 required and MTH 341 recommended.

MTH 361. INTRODUCTION TO PROBABILITY (3). Probability problem solving using concepts developed in calculus. Topics include probability models, discrete and continuous random variables, expectation and variance, the law of large numbers, and the central limit theorem. **PREREQS:** MTH 253 or MTH 306

MTH 361H. INTRODUCTION TO PROBABILITY (3). Probability problem solving using concepts developed in calculus. Topics include probability models, discrete and continuous random variables, expectation and variance, the law of large numbers, and the central limit theorem. **PREREQS:** MTH 253 or MTH 306 and Honors College approval required.

MTH 390. FOUNDATIONS OF ELEMENTARY MATHEMATICS (4). Measurement, congruence, similarity, coordinate and transformational geometry. **PREREQS:** MTH 212 and MTH 212

MTH 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

MTH 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 406. PROJECTS (1-3). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 407. SEMINAR (3). This course is repeatable for a maximum of 99 credits. **PREREQS:** Departmental approval required.

MTH 410. OCCUPATIONAL INTERNSHIP (3-12). Planned and supervised training experience at selected government, industrial, or business placement sites. Must be followed by a one-hour post-internship seminar. Consult departmental head advisor. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing in mathematics, cumulative 3.00 GPA in mathematics, head advisor/departmental approval required.

MTH 411. REAL ANALYSIS (3). Topological concepts in metric, normed, and inner-product spaces. Properties of continuous functions, including the Stone-Weierstrass theorem. Introduction to function spaces, contraction mappings, fixed points, and applications. Lebesgue measure and integration in one and several variables, basic convergence theorems, Lebesgue spaces, Fubini's theorem, and applications to Fourier transforms and probability. **PREREQS:** MTH 312 and MTH 341

MTH 412. REAL ANALYSIS (3). Topological concepts in metric, normed, and inner-product spaces. Properties of continuous functions, including the Stone-Weierstrass theorem. Introduction to function spaces, contraction mappings, fixed points, and applications. Lebesgue measure and integration in one and several variables, basic convergence theorems, Lebesgue spaces, Fubini's theorem, and

applications to Fourier transforms and probability. **PREREQS:** MTH 411 or MTH 511

MTH 413. REAL ANALYSIS (3). Topological concepts in metric, normed, and inner-product spaces. Properties of continuous functions, including the Stone-Weierstrass theorem. Introduction to function spaces, contraction mappings, fixed points, and applications. Lebesgue measure and integration in one and several variables, basic convergence theorems, Lebesgue spaces, Fubini's theorem, and applications to Fourier transforms and probability. **PREREQS:** MTH 412 or MTH 512

MTH 430. METRIC SPACES AND TOPOLOGY (3). Fundamental notions of metric space topology. Examples of Euclidean, non-Euclidean and other fundamental metric spaces including the Hilbert Cube and two-dimensional surfaces. Characterization and classification results for metric spaces. Selected applications of topology, possibly including the structure of molecules and/or networks. **PREREQS:** MTH 342 or MTH 355 and /or instructor approval. MTH 311 is recommended.

MTH 434. INTRODUCTION TO DIFFERENTIAL GEOMETRY (3). Curves and surfaces in Euclidean space; geodesics; curvature; introduction to tensor algebra and differential forms; selected applications. **PREREQS:** MTH 312 and MTH 342

MTH 435. DIFFERENTIAL GEOMETRY (3). Differentiable 2-manifolds; curvature; geodesics; tensor algebra and the algebra of exterior differential forms with emphasis on Euclidean space; differentiation of tensors and forms; integration of forms; selected applications. **PREREQS:** (MTH 434 or MTH 534) or instructor approval required.

MTH 436. DIFFERENTIAL GEOMETRY (3). Differentiable 2-manifolds; curvature; geodesics; tensor algebra and the algebra of exterior differential forms with emphasis on Euclidean space; differentiation of tensors, and forms; integration of forms; selected applications. **PREREQS:** (MTH 435 or MTH 535) or instructor approval required.

MTH 437. GENERAL RELATIVITY (3). Geometry of special relativity. Tensor analysis, metrics, geodesics, curvature. Einstein field equations, cosmological models, black holes. Selected topics such as global structure, conserved quantities, spinors. **PREREQS:** MTH 311. MTH 434 or MTH 534 is recommended.

MTH 440. COMPUTATIONAL NUMBER THEORY (3). Development of the number theory used in some basic tests of primality and methods of factoring integers. Applications to cryptology. **PREREQS:** MTH 231 or MTH 343 or MTH 355

MTH 441. APPLIED AND COMPUTATIONAL ALGEBRA (3). Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. **PREREQS:** MTH 342 or (MTH 440 or MTH 540) or instructor approval required.

MTH 442. APPLIED AND COMPUTATIONAL ALGEBRA (3). Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. **PREREQS:** MTH 441 or MTH 541 or instructor approval required.

MTH 443. ABSTRACT LINEAR ALGEBRA (3). Abstract vector spaces. Linear transformations, eigenvalues and eigenvectors, the Jordan canonical form, inner product spaces. **PREREQS:** MTH 342 and MTH 343

MTH 451. NUMERICAL LINEAR ALGEBRA (3). Computation of solutions of linear systems using direct and iterative methods; least-squares solution of overdetermined systems; computation of eigenvalues and eigenvectors. **PREREQS:** MTH 341 and programming experience or instructor approval required. MTH 342 and MTH 351 are recommended.

MTH 452. NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS (3). Numerical solution of initial-value problems using Runge-Kutta methods and linear multistep methods; introduction to boundary-value problems. Analysis of stability, accuracy, and implementation of methods. **PREREQS:** MTH 256 and (MTH 451 or MTH 551) or instructor approval required.

MTH 453. NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS (3). Numerical solution of boundary value problems and initial-boundary value problems using finite difference and finite element methods. Analysis of stability, accuracy, and implementation of methods. **PREREQS:** (MTH 452 or MTH 552) or instructor approval required.

MTH 463. PROBABILITY I (3). An introduction to probability theory; topics covered include: the axioms of probability, probability spaces and models, independence, random variables; densities, distributions, expectation, and variance; probability inequalities, the law of large numbers, and the binomial central limit theorem. **PREREQS:** MTH 312 or instructor approval required.

MTH 464. PROBABILITY II (3). Transformations of random variables; sums of independent random variables, generating functions, characteristic functions, the central limit theorem and other weak limit theorems. **PREREQS:** (MTH 463 or MTH 563) and MTH 341 or instructor approval required.

MTH 465. PROBABILITY III (3). Random variables, central limit theorem; distributions of standard statistics; Markov chains, continuous and discontinuous stochastic processes. **PREREQS:** (MTH 464 or MTH 564) or instructor approval required.

MTH 467. ACTUARIAL MATHEMATICS (3). Foundations of actuarial science from the point of view of mathematical models that arise in the design and management of insurance systems. Most models will be life insurance based. **PREREQS:** (MTH 463 or MTH 563) or ST 421 or instructor approval required.

MTH 480. SYSTEMS OF ORDINARY DIFFERENTIAL EQUATIONS (3). Systems of two first-order differential equations, phase portraits, linearization and the stability of equilibria, conservative systems, reversible systems, limit cycles and the Poincare-Bendixson Theorem. Additional topics selected from Hamiltonian systems, Hopf bifurcation or Lorenz equations and chaos. MTH 480 and MTH 481 cannot both be taken for credit. **PREREQS:** (MTH 256 or MTH 256H) and MTH 341

MTH 481. MATHEMATICAL METHODS FOR ENGINEERS AND SCIENTISTS (3). Linear and nonlinear systems of ordinary differential equations, elementary stability theory, higher order equations, boundary value problems, series solution of ordinary differential equations. **PREREQS:** MTH 256

MTH 482. MATHEMATICAL METHODS FOR ENGINEERS AND SCIENTISTS (3). Partial differential equations, Bessel's and Legendre's equations, Fourier analysis, separation of variables, transform methods. **PREREQS:** MTH 481 or consent of instructor.

MTH 483. MATHEMATICAL METHODS FOR ENGINEERS AND SCIENTISTS (3). Introduction to the complex differential and integral calculus: Cauchy's theorem and formula, the residue calculus, power series and Laurent series, harmonic functions, conformal mapping, and applications. **PREREQS:** MTH 256 or MTH 256H and MTH 256

MTH 490. INTENSIVE SUMMER RESEARCH IN MATHEMATICS (12). Combination of seminar, lectures, and individual research projects designed to introduce students to research mathematics. This course is repeatable for a maximum of 99 credits. **PREREQS:** Open to participants in the OSU Undergraduate Summer Research Program in Mathematics (REU program).

MTH 491. ALGEBRA AND GEOMETRIC TRANSFORMATIONS (3). Ordered fields, number systems (natural, integer, rational, real, and complex), fundamental theorems of arithmetic and algebra, algebraic and transcendental numbers, constructible points and numbers and the classical geometric constructions, Polya's problem solving heuristics and strategies. Intended primarily for prospective mathematics teachers. **PREREQS:** MTH 341

MTH 492. ALGEBRA AND GEOMETRIC TRANSFORMATIONS (3). Major results of Euclidean geometry, axiom systems for Euclidean geometry, dependency tree of Euclidean theorems, groups of geometric transformations with applications to symmetries of plane and solid objects, Euler's formula, tilings and tessellations, isometries and similitudes of the plane (translations, rotations, reflections, glide reflections, dilations). Intended primarily for prospective mathematics teachers. **PREREQS:** MTH 491 or MTH 591

MTH 493. ALGEBRA AND GEOMETRIC TRANSFORMATIONS (3). Geometric transformations as real, complex, and matrix functions, invariants and genealogy of geometric transformations, extensions to transformations of the sphere and of three-dimensional space, selected applications chosen from fractals, analysis of frieze and crystallographic patterns, problem solving, groups of symmetries, computer graphics, and the use of dynamic geometry software. Intended primarily for prospective mathematics teachers. **PREREQS:** MTH 492 or MTH 592

MTH 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

MTH 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 506. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 510. OCCUPATIONAL INTERNSHIP (3-12). Planned and supervised training experience at selected government, industrial, or business placement sites. Must be followed by a one-hour post-internship seminar. Consult departmental head advisor. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 511. REAL ANALYSIS (3). Topological concepts in metric, normed, and inner-product spaces. Properties of continuous functions, including the Stone-Weierstrass theorem. Introduction to function spaces, contraction mappings, fixed points, and applications. Lebesgue measure and integration in one and several variables, basic convergence theorems, Lebesgue spaces, Fubini's theorem, and applications to Fourier transforms and probability. **PREREQS:** MTH 312 and MTH 341

MTH 512. REAL ANALYSIS (3). Topological concepts in metric, normed, and inner-product spaces. Properties of continuous functions, including the Stone-Weierstrass theorem. Introduction to function spaces, contraction mappings, fixed points, and applications.

Lebesgue measure and integration in one and several variables, basic convergence theorems, Lebesgue spaces, Fubini's theorem, and applications to Fourier transforms and probability. **PREREQS:** MTH 411 or MTH 511

MTH 513. REAL ANALYSIS (3). Topological concepts in metric, normed, and inner-product spaces. Properties of continuous functions, including Stone-Weierstrass theorem. Introduction to function spaces, contraction mappings, fixed points, and applications. Lebesgue measure and integration in one and several variables, basic convergence theorems, Lebesgue spaces, Fubini's theorem, and applications to Fourier transforms and probability. **PREREQS:** MTH 412 or MTH 512

MTH 524. DYNAMICAL SYSTEMS THEORY AND APPLICATIONS (3). Theory, models, and problems for discrete and/or continuous dynamical systems. Depending on term, the emphasis may be toward deterministic or stochastic systems. Topics generally include stability theory, periodic behavior, and chaotic systems. Models selected from biology, economics, fluid dynamics, and electrical and mechanical systems. May be repeated once for credit with a different topic. This course is repeatable for a maximum of 6 credits. **PREREQS:** MTH 341-MTH 342, MTH 311-MTH 312, MTH 361 or consent of instructor.

MTH 525. DYNAMICAL SYSTEMS THEORY AND APPLICATIONS (3). Theory, models, and problems for discrete and/or continuous dynamical systems. Depending on term, the emphasis may be toward deterministic or stochastic systems. Topics generally include stability theory, periodic behavior, and chaotic systems. Models selected from biology, economics, fluid dynamics, and electrical and mechanical systems. May be repeated once for credit with a different topic. This course is repeatable for a maximum of 6 credits. **PREREQS:** MTH 341 and MTH 342 and MTH 311 and MTH 312 and MTH 361 or consent of instructor.

MTH 531. GENERAL TOPOLOGY AND FUNDAMENTAL GROUPS (3). Topological spaces and maps. Separation axioms, compactness, convergence, extension theorems, metrizability and compactification. Product spaces and simplicial complexes. Definition and basic properties of the fundamental group functor, with applications to the theory of covering spaces. Selected topics from dimension theory, manifold theory, and other areas of topology. **PREREQS:** MTH 531 and MTH 532 must be taken in order.

MTH 532. GENERAL TOPOLOGY AND FUNDAMENTAL GROUPS (3). Topological spaces and maps. Separation axioms, compactness, convergence, extension theorems, metrizability and compactification. Product spaces and simplicial complexes. Definition and basic properties of the fundamental group functor, with applications to the theory of covering spaces. Selected topics from dimension theory, manifold theory, and other areas of topology. **PREREQS:** MTH 531 and MTH 532 must be taken in order.

MTH 534. INTRODUCTION TO DIFFERENTIAL GEOMETRY (3). Curves and surfaces in Euclidean space; geodesics; curvature; introduction to tensor algebra and differential forms; selected applications. **PREREQS:** MTH 312 and MTH 342 or instructor approval required.

MTH 535. DIFFERENTIAL GEOMETRY (3). Differentiable 2-manifolds; curvature; geodesics; tensor algebra and the algebra of exterior differential forms with emphasis on Euclidean space; differentiation of tensors and forms; integration of forms; selected applications. **PREREQS:** (MTH 434 or MTH 534) or instructor approval required.

MTH 536. DIFFERENTIAL GEOMETRY (3). Differentiable 2-manifolds; curvature; geodesics; tensor algebra and the algebra of exterior differential forms with emphasis on Euclidean space; differentiation of tensors and forms;

integration of forms; selected applications. **PREREQS:** (MTH 434 or MTH 534) or instructor approval required.

MTH 537. GENERAL RELATIVITY (3). Geometry of special relativity. Tensor analysis, metrics, geodesics, curvature. Einstein field equations, cosmological models, black holes. Selected topics such as global structure, conserved quantities, spinors. **PREREQS:** MTH 311. (MTH 434 or MTH 534) is recommended.

MTH 540. COMPUTATIONAL NUMBER THEORY (3). Development of the number theory used in some basic tests of primality and methods of factoring integers. Applications to cryptography. **PREREQS:** MTH 231 or MTH 343 or MTH 355

MTH 541. APPLIED AND COMPUTATIONAL ALGEBRA (3). Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. **PREREQS:** MTH 342 or (MTH 440 or MTH 540) or instructor approval required.

MTH 542. APPLIED AND COMPUTATIONAL ALGEBRA (3). Applications of fundamental algebraic systems to topics such as factorization of polynomials, finding roots of polynomials, error correcting codes. **PREREQS:** (MTH 441 or MTH 541) or instructor approval required.

MTH 543. ABSTRACT LINEAR ALGEBRA (3). Abstract vector spaces. Linear transformations, eigenvalues and eigenvectors, the Jordan canonical form, inner product spaces. **PREREQS:** MTH 342 and MTH 343

MTH 551. NUMERICAL LINEAR ALGEBRA (3). Computation of solutions of linear systems using direct and iterative methods; least-squares solution of overdetermined systems; computation of eigenvalues and eigenvectors. **PREREQS:** MTH 341 and programming experience or instructor approval required. MTH 342 and MTH 351 are recommended.

MTH 552. NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS (3). Numerical solution of initial-value problems using Runge-Kutta methods and linear multistep methods; introduction to boundary-value problems. Analysis of stability, accuracy, and implementation of methods. **PREREQS:** MTH 256 and (MTH 451 or MTH 551) or instructor approval required.

MTH 553. NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS (3). Numerical solution of boundary value problems and initial-boundary value problems using finite difference and finite element methods. Analysis of stability, accuracy, and implementation of methods. **PREREQS:** (MTH 452 or MTH 552) or instructor approval required.

MTH 563. PROBABILITY I (3). An introduction to probability theory; topics covered include: the axioms of probability, probability spaces and models, independence, random variables; densities, distributions, expectation, and variance; probability inequalities, the law of large numbers, and the binomial central limit theorem. **PREREQS:** MTH 312 or instructor approval required.

MTH 564. PROBABILITY II (3). Transformations of random variables; sums of independent random variables, generating functions, characteristic functions, the central limit theorem and other weak limit theorems. **PREREQS:** (MTH 463 or MTH 563) and MTH 341 or instructor approval required.

MTH 565. PROBABILITY III (3). Random variables, central limit theorem; distributions of standard statistics; Markov chains, continuous and discontinuous stochastic processes. **PREREQS:** (MTH 464 or MTH 564) or instructor approval required.

MTH 567. ACTUARIAL MATHEMATICS (3). Foundations of actuarial science from the point of view of mathematical models that arise in the design and management of insurance systems. Most models will be life insurance based. **PREREQS:** (MTH 463 or MTH 563) or ST 421.

MTH 570. DISCRETE TOPICS IN K-8 MATH (3). Key ideas and topics in discrete mathematics critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. **PREREQS:** MTH 390 or instructor approval required.

MTH 574. NUMBER SYSTEMS AND OPERATIONS IN K-8 MATHEMATICS (3). Key ideas and topics in number systems, operations, place value, and algorithms critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. **PREREQS:** MTH 390 or instructor approval required.

MTH 575. COMPARING GEOMETRIES IN K-8 MATHEMATICS (3). Key ideas and topics in Euclidean and non-Euclidean geometries critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. **PREREQS:** MTH 390 or instructor approval required.

MTH 576. ALGEBRA AND FUNCTION IN K-8 MATHEMATICS (3). Key ideas and topics in algebra and function concepts critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. **PREREQS:** MTH 390 or instructor approval required.

MTH 577. MEASUREMENT AND CHANGE IN K-8 MATHEMATICS (3). Key ideas and topics in measurement, units, rates of change, and accumulation of change critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. **PREREQS:** MTH 390 or instructor approval required.

MTH 578. PROBABILITY AND DATA ANALYSIS IN K-8 MATHEMATICS (3). Key ideas and topics in probability, data analysis, and statistics critical for the mathematics content knowledge of elementary teachers in grades K-8. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. **PREREQS:** MTH 390 or instructor approval required.

MTH 581. MATHEMATICAL METHODS FOR ENGINEERS AND SCIENTISTS (3). Linear and nonlinear systems of ordinary differential equations, elementary stability theory, higher order equations, boundary value problems, series solution of ordinary differential equations. **PREREQS:** MTH 256

MTH 582. MATHEMATICAL METHODS FOR ENGINEERS AND SCIENTISTS (3). Partial differential equations, Bessel's and Legendre's equations, Fourier analysis, separation of variables, transform methods. **PREREQS:** MTH 481 or consent of instructor.

MTH 583. MATHEMATICAL METHODS FOR ENGINEERS AND SCIENTISTS (3). Introduction to the complex differential and integral calculus: Cauchy's theorem and formula, the residue calculus, power series and Laurent series, harmonic functions, conformal mapping, and applications. **PREREQS:** MTH 256

MTH 590. DISCRETE TOPICS IN SECONDARY MATHEMATICS (3). Key ideas and topics in discrete mathematics critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. **PREREQS:** MTH 390 or instructor approval required.

MTH 591. ALGEBRA AND GEOMETRIC TRANSFORMATIONS (3). Ordered fields, number systems (natural, integer, rational, real, and complex), fundamental theorems of arithmetic and algebra, algebraic and transcendental numbers, constructible points and numbers and the classical geometric constructions, Pólya's problem solving heuristics and strategies. Intended primarily for prospective mathematics teachers. **PREREQS:** MTH 341

MTH 592. ALGEBRA AND GEOMETRIC TRANSFORMATIONS (3). Major results of Euclidean geometry, axiom systems for Euclidean geometry, dependency tree of Euclidean theorems, groups of geometric transformations with applications to symmetries of plane and solid objects, Euler's formula, tilings and tessellations, isometries and similitudes of the plane (translations, rotations, reflections, glide reflections, dilations). Intended primarily for prospective mathematics teachers. **PREREQS:** MTH 491 or MTH 591

MTH 593. ALGEBRA AND GEOMETRIC TRANSFORMATIONS (3). Geometric transformations as real, complex, and matrix functions, invariants and genealogy of geometric transformations, extensions to transformations of the sphere and of three-dimensional space, selected applications chosen from fractals, analysis of frieze and crystallographic patterns, problem solving, groups of symmetries, computer graphics, and the use of dynamic geometry software. Intended primarily for prospective mathematics teachers. **PREREQS:** MTH 492 or MTH 592

MTH 594. NUMBER SYSTEMS AND OPERATIONS IN SECONDARY MATHEMATICS (3). Key ideas and topics in number systems, operations, place value, and algorithms critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. **PREREQS:** MTH 390 or instructor approval required.

MTH 595. COMPARING GEOMETRIES IN SECONDARY MATHEMATICS (3). Key ideas and topics in Euclidean and non-Euclidean geometries critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. **PREREQS:** MTH 390 or instructor approval required.

MTH 596. ALGEBRA AND FUNCTION IN SECONDARY MATHEMATICS (3). Key ideas and topics in algebra and function concepts critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. **PREREQS:** MTH 390 or instructor approval required.

MTH 597. MEASUREMENT AND CHANGE IN SECONDARY MATHEMATICS (3). Key ideas and topics in measurement, units, rates of change, and accumulation of change critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. **PREREQS:** MTH 390 or instructor approval required.

MTH 598. PROBABILITY AND DATA ANALYSIS IN SECONDARY MATHEMATICS (3). Key ideas and topics in probability, data analysis, and statistics critical for the mathematics content knowledge of middle and high school teachers in grades 6-12. Based on the recommendations of The Mathematical Education of Teachers by the Conference Board of the Mathematical Sciences. **PREREQS:** MTH 390 or instructor approval required.

MTH 599. SPECIAL TOPICS (1-16). Topics may vary. This course is repeatable for a maximum of 18 credits. **PREREQS:** Instructor approval required.

MTH 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

MTH 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 606. SPECIAL PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MTH 611. COMPLEX ANALYSIS (3). Basic theory of analytic functions of a complex variable, including Cauchy's theorem, residue theorem, analytic continuation, conformal mappings, entire, and meromorphic functions. **PREREQS:** (MTH 411 or MTH 511). MTH 611 and MTH 612 must be taken in order.

MTH 612. COMPLEX ANALYSIS (3). Basic theory of analytic functions of a complex variable, including Cauchy's theorem, residue theorem, analytic continuation, conformal mappings, entire, and meromorphic functions. **PREREQS:** MTH 611

MTH 614. FUNCTIONAL ANALYSIS (3). Topological vector spaces, generalized functions, operator theory. Normally offered alternate years. **PREREQS:** MTH 513

MTH 619. TOPICS IN ANALYSIS (1-12). This course is repeatable for a maximum of 12 credits.

MTH 621. DIFFERENTIAL AND INTEGRAL EQUATIONS OF MATHEMATICAL PHYSICS (3). Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is repeatable for a maximum of 6 credits. **PREREQS:** 6 credits of senior-level analysis or instructor consent. MTH 621, MTH 622, MTH 623 must be taken in order.

MTH 622. DIFFERENTIAL AND INTEGRAL EQUATIONS OF MATHEMATICAL PHYSICS (3). Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is repeatable for a maximum of 6 credits. **PREREQS:** MTH 621 and 6 credits of senior-level analysis or instructor consent.

MTH 623. DIFFERENTIAL AND INTEGRAL EQUATIONS OF MATHEMATICAL PHYSICS (3). Partial differential equations of physics, including those of potential theory, wave propagation, and heat flow, treated by classical means, generalized functions and variational principles. Square summable function methods and integral equations. This course is repeatable for a maximum of 6 credits. **PREREQS:** MTH 622 and 6 credits of senior-level analysis or instructor consent.

MTH 627. PARTIAL DIFFERENTIAL EQUATIONS (3). Advanced theory including existence proofs and distributional approach. Normally offered alternate years. **PREREQS:** MTH 413 or MTH 513 or instructor consent.

MTH 628. PARTIAL DIFFERENTIAL EQUATIONS (3). Advanced theory including existence proofs and distributional approach. Normally offered alternate years. **PREREQS:** MTH 627 or consent of instructor.

MTH 634. ALGEBRAIC TOPOLOGY (3).

Simplicial and singular homology, products, and cohomology; applications to fixed-point and separation theorems. Topics selected from homotopy, manifold and obstruction theory. Normally offered alternate years. **PREREQS:** MTH 532. MTH 634, MTH 635, MTH 636 must be taken in order.

MTH 635. ALGEBRAIC TOPOLOGY (3).

Simplicial and singular homology, products, and cohomology; applications to fixed-point and separation theorems. Topics selected from homotopy, manifold and obstruction theory. Normally offered alternate years. **PREREQS:** MTH 532 and MTH 634

MTH 636. ALGEBRAIC TOPOLOGY (3).

Simplicial and singular homology, products, and cohomology; applications to fixed-point and separation theorems. Topics selected from homotopy, manifold and obstruction theory. Normally offered alternate years. **PREREQS:** MTH 532 and MTH 635

MTH 644. ABSTRACT ALGEBRA (3). Group theory, rings and fields, Galois theory. **PREREQS:** Graduate standing in mathematics or a related field, or instructor approval required. MTH 443 or MTH 543 is recommended.

MTH 645. ABSTRACT ALGEBRA (3). Group theory, rings and fields, Galois theory. **PREREQS:** Graduate standing in mathematics or a related field, or instructor approval required. MTH 644 is recommended.

MTH 649. TOPICS IN ALGEBRA AND NUMBER THEORY (3). This course is repeatable for a maximum of 27 credits.

MTH 654. NUMERICAL ANALYSIS (3). Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. **PREREQS:** (MTH 451 or MTH 551) and (MTH 452 or MTH 552) and (MTH 453 or MTH 553) or equivalent or instructor's consent.

MTH 655. NUMERICAL ANALYSIS (3). Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. **PREREQS:** MTH 654 or instructor's consent.

MTH 656. NUMERICAL ANALYSIS (3). Advanced topics in numerical analysis, such as finite volume methods and finite element methods for partial differential equations, numerical methods for inverse problems, and image processing. **PREREQS:** MTH 655 or instructor's consent.

MTH 657. TOPICS IN APPLIED MATHEMATICS (1-12). Previous topics have included turbulence, financial mathematics and probability methods in partial differential equations. This course is repeatable for a maximum of 12 credits.

MTH 658. TOPICS IN MATHEMATICAL MODELING (1-12). Mathematical treatment of topics of current interest in the physical and biological sciences and technology. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits. **PREREQS:** Instructor approval required.

MTH 659. TOPICS IN NUMERICAL ANALYSIS (1-12). This course is repeatable for a maximum of 12 credits.

MTH 664. PROBABILITY THEORY (3). General theory of probability measures and random variables, including weak convergence, characteristic functions, central limit theory, conditional expectations, martingales. **PREREQS:** MTH 411 or MTH 511 or equivalent.

MTH 665. PROBABILITY THEORY (3). General theory of probability measures and random variables, including weak convergence, characteristic functions, the central limit theorem, and the Brownian motion process. **PREREQS:** MTH 664

MTH 669. TOPICS IN STOCHASTIC PROCESSES (1-12). Previous topics have included Markov processes, martingales, branching processes, and stochastic differential equations. This course is repeatable for a maximum of 12 credits.

MTH 674. DIFFERENTIAL GEOMETRY OF MANIFOLDS (3). Differentiable manifolds, tangent bundles, vector fields and flows, submanifolds, Riemannian metrics, differential forms, integration on manifolds. Selected topics such as foliations, Lie groups, and de Rham cohomology. **PREREQS:** MTH 341 and (MTH 411 or MTH 511). MTH 674 or MTH 675 must be taken in order.

MTH 675. DIFFERENTIAL GEOMETRY OF MANIFOLDS (3). Differentiable manifolds, connections in linear bundles, Riemannian manifolds and submanifolds. Selected topics such as variational theory of geodesics, harmonic forms, and characteristic classes. Normally offered alternate years. **PREREQS:** MTH 674

MTH 676. TOPICS IN TOPOLOGY (3). This course is repeatable for a maximum of 27 credits.

MTH 679. TOPICS IN GEOMETRY (1-12). This course is repeatable for a maximum of 12 credits.

MTH 680. MODERN APPROACHES TO CALCULUS (3). Alternative approaches to calculus instruction based on the availability of computers and calculators. Applications of symbolic-graphical calculators, spreadsheets, symbolic algebra systems, and graphics packages to the teaching of calculus. **PREREQS:** MTH 253 and instructor approval required.

MTH 681. MODERN APPROACHES TO EUCLIDEAN GEOMETRY (3). Various aspects of Euclidean geometry, based on research and curriculum efforts of the last 20 years. Familiarity with Euclidean geometry at the level of MTH 337 will be presumed. Topics include partitioning the plane and space, tessellations and tilings, polyhedra, visualization and drawing, polygons and numbers, coordinates, transformations, conic sections, curves and surfaces, and computer graphics. **PREREQS:** Instructor approval required.

MTH 682. TEACHING AND LEARNING PROBABILITY AND STATISTICS (3). Experimental, activity-based approaches to introductory probability and statistics are explored. Topics include computer simulations, exploratory data analysis, misuses of statistics, and misconceptions of probability. **PREREQS:** Instructor approval required.

MTH 683. GRAPHICS CALCULATORS IN PRECALCULUS MATHEMATICS (3). Uses of hand-held graphics technology in algebra, trigonometry, and precalculus. Recommendations from the National Council of Teachers of Mathematics on the use of graphing calculators in the secondary curriculum. **PREREQS:** Instructor approval required.

MTH 684. COMPUTERS AND MATHEMATICS (3). A variety of mathematical problems are investigated with a laboratory approach using microcomputers and a wide variety of software. Problems may be taken from number theory, calculus, geometry, probability, and elementary numerical analysis. **PREREQS:** Ability to program in either BASIC or PASCAL and instructor approval required.

MTH 685. ADVANCED PROBLEM SOLVING (3). Mathematical problem solving using the heuristic approach of George Polya. Problems may be taken from a variety of areas, including number theory, calculus, geometry, probability, abstract and linear algebra. **PREREQS:** Instructor approval required.

MTH 689. TOPICS IN MATHEMATICS EDUCATION (1-12). Topics may vary. This course is repeatable for a maximum of 12 credits.

MTH 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

Graduate Minor

Physics

Physics is the study of the fundamental structure of matter and the interactions of its constituents. Physicists are concerned with the development of concepts needed for a precise description of nature and with experiments to test such concepts.

For students of science and engineering, the study of physics provides the basic foundation needed to understand the complex workings of the material world, from the forces that build atoms to those

that build bridges. For students of the liberal arts, the study of physics provides an introduction to modern ideas about the most fundamental and elemental aspects of nature and how those ideas developed in their cultural and historical context. Physics is a basic and indispensable tool in all technical fields, and its development figures prominently in any discussion of the intellectual history of our civilization.

UNDERGRADUATE DEGREE PROGRAMS

The department offers several programs leading to degrees in physics. A basic physics curriculum in the College of Science stresses the detailed and advanced preparation needed for graduate work or employment in physics.

Options are available within the physics degree program that prepare students for graduate work or employment in an allied field, such as applied physics, biophysics, chemical physics, geophysics, mathematical physics, optical physics, and physics education.

Other programs are offered that train students for careers in physics teaching. A Physics minor is available for students majoring in other areas of science and engineering.

The Department of Physics offers the upper-division curriculum, Paradigms in Physics. Many of the junior-year courses are taught in 2-credit intensive modules, meeting seven hours a week for about three weeks.

GRADUATE DEGREES

Graduate programs leading to the MA, MS, and PhD are offered, emphasizing theoretical or experimental studies in the areas of atomic physics, computational physics, nuclear physics, optical physics, particle physics, and solid state physics. The MS degree has both thesis and nonthesis options. Comprehensive written and oral examinations must be passed before the student can become a candidate for an advanced degree.

CAREERS

A multitude of opportunities exists for students who complete undergraduate degrees in physics. They include employment in technological industries, including electronics, computers, optics, materials science, and aerospace; graduate study leading to an advanced degree in physics or a related area such as mathematics, Earth sciences, computer science, engineering, or astronomy; and degree programs leading to professions such as law or medicine, with specialties in areas in which a physics background is essential.

PREPARATION

Recommended high school preparation for students who plan to major in physics includes one year each of chemistry and physics and four years of mathematics through analytic geometry. Mathematics preparation is especially important; students who are not ready to start calculus (MTH 251, *Differential Calculus) upon entering may be delayed in their progress toward a degree. Students anticipating transfer to OSU from another institution are encouraged to contact the Department of Physics as early as possible to discuss their placement in the course curricula.

ADVISING

Each undergraduate student is assigned an advisor who helps select the most appropriate degree program and assists in planning the curriculum. Minor variations in the requirements for degrees are possible, but must be discussed with the advisor and approved at an early stage in curriculum planning. Near the end of the degree program, the advisor can help the student to apply for employment or admission to graduate programs.

OPTIONS

Students desiring to combine the study of physics with that of another related subject should consider the options below, or should consult with a Department of Physics advisor about substituting upper-division work in a related field for certain of the upper-division physics requirements. All such substitutions must constitute a coherent program in related areas and must be approved in advance by the Department of Physics. In each case, the program must include at least 3 credits of PH 403, ^Thesis, to satisfy the university's writing intensive course (WIC) requirements.

ASTRONOMY

The Department of Physics offers an introductory course, PH 104, *Descriptive Astronomy. Students who desire careers in astronomy can design a curriculum under the Geophysics option, which includes related course work in geology and in atmospheric sciences. This curriculum would qualify the student for graduate work in astronomy.

GRADUATION REQUIREMENTS

All undergraduate students must satisfy the university requirements for graduation (see the description of the **OSU Baccalaureate Core** in this catalog) and the college requirements (see the descriptions in the **College of Science** or **College of Engineering** section). **All physics majors must complete the following lower-division courses:**

CH 231, CH 232, CH 233. *General Chemistry (4,4,4)

and CH 261, CH 262, CH 263.

*Laboratory for Chemistry 231, 232, 233 (1,1,1)

MTH 251. *Differential Calculus (4)

MTH 252. Integral Calculus (4)

MTH 253. Infinite Series and Sequences (4)

MTH 254. Vector Calculus I (4)

MTH 255. Vector Calculus II (4)

MTH 256. Applied Differential Equations (4)
PH 211, PH 212, PH 213. *General Physics with Calculus (4,4,4)

PH 221, PH 222, PH 223. Recitations for PH 211, PH 212, PH 213 (1,1,1)

PH 265 or another approved course in computer programming.

Seniors must complete at least 3 credits of PH 403 to satisfy the WIC requirement.

For graduation under the basic physics option, upper-division course requirements include:

MTH 341. Linear Algebra I (3)

PH 314. Introductory Modern Physics (4)

PH 320. Paradigms in Physics: Symmetries (2)

PH 411. Analog and Digital Electronics (3)

PH 412. Analog and Digital Electronics (3)

PH 421. Paradigms in Physics: Oscillations (2)

PH 422. Paradigms in Physics: Static Vector Fields (2)

PH 423. Paradigms in Physics: Energy and Entropy (2)

PH 424. Paradigms in Physics: Waves in One Dimension (2)

PH 425. Paradigms in Physics: Quantum Measurements and Spin (2)

PH 426. Paradigms in Physics: Central Forces (2)

PH 427. Paradigms in Physics: Periodic Systems (2)

PH 428. Paradigms in Physics: Rigid Bodies (2)

or PH 429. Paradigms in Physics: Reference Frames (2)

PH 431. Capstones in Physics: Electromagnetism (3)

PH 435. Capstones in Physics: Classical Mechanics (3)

PH 441. Capstones in Physics: Thermal and Statistical Physics (3)

PH 451. Capstones in Physics: Quantum Mechanics (3)

PH 461. Capstones in Physics: Mathematical Methods (3)

PH 481. Physical Optics (4)

PH 415. Computer Interfacing and Instrumentation (3)

or PH 464. Scientific Computing II (3)

At least one additional course must be chosen from the following:

PH 415. Computer Interfacing and Instrumentation (3)

PH 464. Scientific Computing II (3)

PH 465. Computational Physics (3)

PH 475. Introduction to Solid State Physics (3)

PH 482. Optical Electronic Systems (4)

PH 483. Guided Wave Optics (4)

PH 485. Atomic, Molecular, and Optical Physics (3)

PH 495. Introduction to Particle and Nuclear Physics (3)

To qualify for the Bachelor of Arts degree in Physics, students must complete:

- PH 314. Introductory Modern Physics (4)
 PH 320. Paradigms in Physics: Symmetries (2)
 PH 421. Paradigms in Physics: Oscillations (2)
 PH 422. Paradigms in Physics: Static Vector Fields (2)
 PH 423. Paradigms in Physics: Energy and Entropy (2)
 PH 424. Paradigms in Physics: Waves in One Dimension (2)
 PH 425. Paradigms in Physics: Quantum Measurements and Spin (2)
 PH 426. Paradigms in Physics: Central Forces (2)
 PH 427. Paradigms in Physics: Periodic Systems (2)
 PH 428. Paradigms in Physics: Rigid Bodies (2)
OR PH 429. Paradigms in Physics: Reference Frames (2)

And at least one of:

- PH 431. Capstones in Physics: Electromagnetism (3)
 PH 435. Capstones in Physics: Classical Mechanics (3)
 PH 441. Capstones in Physics: Thermal and Statistical Physics (3)
 PH 451. Capstones in Physics: Quantum Mechanics (3)
 PH 461. Capstones in Physics: Mathematical Methods (3)

And at least 7 additional credits chosen from among the non-blanket 400-level courses listed for the BS degree in Physics.

In addition, the student must complete 9 credits of approved electives in the College of Liberal Arts and must complete or demonstrate proficiency in the second year of a foreign language.

Grades of C– or better must be attained in all courses required for the Physics major. Courses in which a lower grade is received must be repeated until a satisfactory grade is received.

PHYSICS (BA, BS, CRED, HBA, HBS)**Sample Curriculum in Physics****Freshman Year**

- CH 231, CH 232, CH 233. *General Chemistry (4,4,4)

OPTIONS**APPLIED PHYSICS OPTION**

- PH 314. Introduction to Modern Physics (4)
 PH 320. Paradigms in Physics: Symmetries (2)
 PH 411, PH 412. Analog and Digital Electronics (3,3)
 PH 415. Computer Interfacing and Instrumentation (3)
 PH 421. Paradigms in Physics: Oscillations (2)
 PH 422. Paradigms in Physics: Static Vector Fields (2)
 PH 423. Paradigms in Physics: Energy and Entropy (2)
 PH 424. Paradigms in Physics: Waves in One Dimension (2)
 PH 425. Paradigms in Physics: Quantum Measurements and Spin (2)
 PH 426. Paradigms in Physics: Central Forces (2)
 PH 427. Paradigms in Physics: Periodic Systems (2)
 PH 431. Capstones in Physics: Electromagnetism (3)
 PH 435. Capstones in Physics: Classical Mechanics (3)
or PH 451. Capstones in Physics: Quantum Mechanics (3)
 PH 461. Capstones in Physics: Mathematical Methods (3)
 PH 481. Physical Optics (4)

Plus: 15 credits of upper-division work in an engineering discipline that may include:

- PH 482. Optical Electronic Systems (4)
 and PH 483. Guided Wave Optics (4)

It also may include one of:

- PH 475. Introduction to Solid State Physics (3)
 PH 495. Introduction to Particle and Nuclear Physics (3)

(The engineering courses must be approved in advance by a Department of Physics advisor.)

Engineering science (ENGR) courses cannot be used to satisfy this option.

BIOPHYSICS OPTION**Required Courses**

- BB 450. General Biochemistry (4)
 BB 451. General Biochemistry (3)
 BB 481. Biophysics (3)
 CH 331, CH 332. Organic Chemistry (4,4)
 PH 314. Introductory Modern Physics (4)
 PH 320. Paradigms in Physics: Symmetries (2)
 PH 411, PH 412. Analog and Digital Electronics (3,3)
 PH 415. Computer Interfacing and Instrumentation (3)
 PH 421. Paradigms in Physics: Oscillations (2)
 PH 422. Paradigms in Physics: Static Vector Fields (2)
 PH 423. Paradigms in Physics: Energy and Entropy (2)
 PH 424. Paradigms in Physics: Waves in One Dimension (2)
 PH 425. Paradigms in Physics: Quantum Measurements and Spin (2)
 PH 426. Paradigms in Physics: Central Forces (2)
 PH 427. Paradigms in Physics: Periodic Systems (2)
 PH 428. Paradigms in Physics: Rigid Bodies (2)
 PH 431. Capstones in Physics: Electromagnetism (3)
 PH 435. Capstones in Physics: Classical Mechanics (3)
or PH 451. Capstones in Physics: Quantum Mechanics (3)
 PH 461. Capstones in Physics: Mathematical Methods (3)
 PH 481. Physical Optics (4)

CHEMICAL PHYSICS OPTION

- PH 314. Introduction to Modern Physics (4)
 PH 320. Paradigms in Physics: Symmetries (2)
 PH 411, PH 412. Analog and Digital Electronics (3,3)
 PH 415. Computer Interfacing and Instrumentation (3)
 PH 421. Paradigms in Physics: Oscillations (2)
 PH 422. Paradigms in Physics: Static Vector Fields (2)
 PH 423. Paradigms in Physics: Energy and Entropy (2)
 PH 424. Paradigms in Physics: Waves in One Dimension (2)
 PH 425. Paradigms in Physics: Quantum Measurements and Spin (2)

- PH 426. Paradigms in Physics: Central Forces (2)
 PH 427. Paradigms in Physics: Periodic Systems (2)
 PH 431. Capstones in Physics: Electromagnetism (3)
 PH 435. Capstones in Physics: Classical Mechanics (3)
 PH 441. Capstones in Physics: Thermal and Statistical Physics (3)
or CH 440. Physical Chemistry (3)
 PH 451. Capstones in Physics: Quantum Mechanics (3)
 PH 461. Capstones in Physics: Mathematical Methods (3)

Plus: 12 credits of approved upper-division work in chemistry, including at least one lab course.

COMPUTATIONAL PHYSICS OPTION

- PH 314. Introduction to Modern Physics (4)
 PH 320. Paradigms in Physics: Symmetries (2)
 PH 411, PH 412. Analog and Digital Electronics (3,3)
 PH 415. Computer Interfacing and Instrumentation (3)
 PH 421. Paradigms in Physics: Oscillations (2)
 PH 422. Paradigms in Physics: Static Vector Fields (2)
 PH 423. Paradigms in Physics: Energy and Entropy (2)
 PH 424. Paradigms in Physics: Waves in One Dimension (2)
 PH 425. Paradigms in Physics: Quantum Measurements and Spin (2)
 PH 426. Paradigms in Physics: Central Forces (2)
 PH 431. Capstones in Physics: Electromagnetism (3)
 PH 461. Capstones in Physics: Mathematical Methods (3)
 PH 464. Scientific Computing II (3)
 PH 465. Computational Physics (3)
 PH 481. Physical Optics (4)

Plus: 15 credits of upper-division work constituting a coherent program in computational science.

GEOPHYSICS OPTION

- PH 314. Introduction to Modern Physics (4)
 PH 320. Paradigms in Physics: Symmetries (2)
 PH 411, PH 412. Analog and Digital Electronics (3,3)
 PH 415. Computer Interfacing and Instrumentation (3)
 PH 421. Paradigms in Physics: Oscillations (2)
 PH 422. Paradigms in Physics: Static Vector Fields (2)
 PH 423. Paradigms in Physics: Energy and Entropy (2)
 PH 424. Paradigms in Physics: Waves in One Dimension (2)
 PH 425. Paradigms in Physics: Quantum Measurements and Spin (2)
 PH 426. Paradigms in Physics: Central Forces (2)
 PH 431. Capstones in Physics: Electromagnetism (3)
 PH 435. Capstones in Physics: Classical Mechanics (3)

- PH 441. Capstones in Physics: Thermal and Statistical Physics (3)
 PH 461. Capstones in Physics: Mathematical Methods (3)
 PH 481. Physical Optics (4)
Plus 15 credits selected from below:
 ATS 411. Thermodynamics and Cloud Microphysics (4)
 ATS 412. Atmospheric Radiation (3)
 ATS 475. Planetary Atmospheres (3)
 GEO 463. ^Geophysics and Tectonics (4)
 GEO 487. Hydrogeology (4)
 OC 430. Principles of Physical Oceanography (4)

MATHEMATICAL PHYSICS OPTION

- PH 314. Introduction to Modern Physics (4)
 PH 320. Paradigms in Physics: Symmetries (2)
 PH 411, PH 412. Analog and Digital Electronics (3,3)
 PH 415. Computer Interfacing and Instrumentation (3)
 PH 421. Paradigms in Physics: Oscillations (2)
 PH 422. Paradigms in Physics: Static Vector Fields (2)
 PH 423. Paradigms in Physics: Energy and Entropy (2)
 PH 424. Paradigms in Physics: Waves in One Dimension (2)
 PH 425. Paradigms in Physics: Quantum Measurements and Spin (2)
 PH 426. Paradigms in Physics: Central Forces (2)
 PH 428. Paradigms in Physics: Rigid Bodies (2)
or PH 429. Paradigms in Physics: Reference Frames (2)
 PH 431. Capstones in Physics: Electromagnetism (3)
 PH 435. Capstones in Physics: Classical Mechanics (3)
 PH 441. Capstones in Physics: Thermal and Statistical Physics (3)
 PH 451. Capstones in Physics: Quantum Mechanics (3)
 PH 461. Capstones in Physics: Mathematical Methods (3)
 PH 464. Scientific Computing II (3)

Plus: 12 credits of approved upper-division work in mathematics.

OPTICAL PHYSICS OPTION

- PH 314. Introduction to Modern Physics (4)
 PH 320. Paradigms in Physics: Symmetries (2)
 PH 411, PH 412. Analog and Digital Electronics (3,3)
 PH 415. Computer Interfacing and Instrumentation (3)
 PH 421. Paradigms in Physics: Oscillations (2)
 PH 422. Paradigms in Physics: Static Vector Fields (2)
 PH 423. Paradigms in Physics: Energy and Entropy (2)
 PH 424. Paradigms in Physics: Waves in One Dimension (2)
 PH 425. Paradigms in Physics: Quantum Measurements and Spin (2)
 PH 426. Paradigms in Physics: Central Forces (2)

- PH 427. Paradigms in Physics: Periodic Systems (2)
 PH 428. Paradigms in Physics: Rigid Bodies (2)
or PH 429. Paradigms in Physics: Reference Frames (2)
 PH 431. Capstones in Physics: Electromagnetism (3)
 PH 435. Capstones in Physics: Classical Mechanics (3)

PHYSICS EDUCATION OPTION

Physics Core (49)

- PH 211, PH 212, PH 213. *General Physics with Calculus (4,4,4)
 PH 221, PH 222, PH 223. Recitation for Physics 211, 212, 213 (1,1,1)
 PH 314. Introductory Modern Physics (4)
 PH 320. Paradigms in Physics: Symmetries (2)
 PH 403. ^Thesis (3)
 PH 421. Paradigms in Physics: Oscillations (2)
 PH 422. Paradigms in Physics: Static Vector Fields (2)
 PH 424. Paradigms in Physics: Waves in One Dimension (2)
 PH 425. Paradigms in Physics: Quantum Measurements and Spin (2)
 PH 426. Paradigms in Physics: Central Forces (2)
 PH 431. Capstones in Physics: Electromagnetism (3)
 PH 435. Capstones in Physics: Classical Mechanics (3)
 PH 451. Capstones in Physics: Quantum Mechanics (3)
 400-level physics electives (6)
 Writing Intensive Course (3)

Option requirements (21)

- PH 265. Scientific Computing (3)
 PH 407. Seminar (Teaching) (3)
 SED 409. Field Practicum: Science and Mathematics–Elem, MS (3)
 SED 409. Field Practicum: Science and Mathematics–MS, HS (3)
 SED 412. Technology Foundations for Teaching Math and Science (3)
 SED 413. Inquiry in Science and Science Education (3)

Chemistry (15)

- CH 231, CH 232, CH 233. *General Chemistry (4,4,4)
and CH 261, CH 262, CH 263.
 *Laboratory for Chemistry 231, 232, 233 (1,1,1)

Math (24)

- MTH 251. *Differential Calculus (4)
 MTH 252. Integral Calculus (4)
 MTH 254. Vector Calculus I (4)
 MTH 255. Vector Calculus II (4)
 MTH 256. Applied Differential Equations (4)
 MTH 306. Matrix and Power Series Methods (4)

Baccalaureate Core (37)**Electives (34)****Total=180**

The selected option courses meet the requirements for an option (21 credits, 18 upper division) and are made up of courses not specifically required in the Physics major.

PHYSICS MINOR**Requirements**

PH 211, PH 212, PH 213. *General Physics With Calculus (4,4,4)

PH 314. Introductory Modern Physics (4)

Plus at least 12 credits of upper-division courses selected, after consultation with an advisor, from the following list, and including at least one theory course:

PH 320. Paradigms in Physics: Symmetries (2)

PH 421. Paradigms in Physics: Oscillations (2)

PH 422. Paradigms in Physics: Static Vector Fields (2)

PH 423. Paradigms in Physics: Energy and Entropy (2)

PH 424. Paradigms in Physics: Waves in One Dimension (2)

PH 425. Paradigms in Physics: Quantum Measurements and Spin (2)

PH 426. Paradigms in Physics: Central Forces (2)

PH 427. Paradigms in Physics: Periodic Systems (2)

PH 428. Paradigms in Physics: Rigid Bodies (2)

PH 429. Paradigms in Physics: Reference Frames (2)

PH 431. Capstones in Physics: Electromagnetism (3)

PH 435. Capstones in Physics: Classical Mechanics (3)

PH 441. Capstones in Physics: Thermal and Statistical Physics (3)

PH 451. Capstones in Physics: Quantum Mechanics (3)

PH 461. Capstones in Physics: Mathematical Methods (3)

PH 481. Physical Optics (4)

PH 482. Optical Electronic Systems (4)

PH 483. Guided Wave Optics (4)

And at least one experimental course:

PH 411. Analog and Digital Electronics (3)

PH 412. Analog and Digital Electronics (3)

PH 415. Computer Interfacing and Instrumentation (3)

PH 465. Computational Physics (3)

PH 466. Computational Physics (3)

PH 481. Physical Optics (4)

PH 482. Optical Electronic Systems (4)

PH 483. Guided Wave Optics (4)

GRADUATE MAJORS**APPLIED PHYSICS (MS, PSM)**

Janet Tate, Director
Department of Physics
301 Weniger Hall
Corvallis OR 97331
541-737-1700

Email: tate@physics.oregonstate.edu
Website: <http://psm.science.oregonstate.edu/>

The worlds of science and business are increasingly interconnected, creating strong demand for individuals who can bridge these two disciplines. The Professional Science Master's (PSM) in Applied Physics at OSU is the first program of its kind in the Pacific Northwest and was created with the help of professional affiliates who are leaders in industries dependent on applications of physics either to produce or to exploit contemporary technologies. In Oregon, industries such as semiconductor manufacturing, optical and electronic instrumentation, and software have become the dominant employers, replacing lumbering, fishing and other traditional resource-based industries. Applied physicists study photovoltaic technology, optoelectronics, energy and communication systems, imaging of cells and nanostructures, and many other subjects. An internship providing job experience in a technology-rich environment as well as special training in business management, communications, and ethics to complement core science uniquely qualify PSM Physics graduates for these diverse careers.

The PSM program can usually be completed in two years, based on full-time study and at least 54 credit hours. The technical curriculum is based on a core of graduate courses in the fundamental subjects of physics. Core physics courses (four courses selected from: PH 531, PH 535, PH 541, PH 551, PH 621, PH 631, PH 641, and PH 651) will cover topics such as electromagnetism, statistical and thermal physics and quantum mechanics. Elective courses develop skills in modeling, statistical analysis, and data management or in scientific fields closely related to physics (e.g. materials, energy etc.). Professional courses are required in communication, research ethics, and business management (PSM 513, PSM 565, PSM 566, PSM 567, COMM 550 and PHL 547). These courses are designed to be taken in sequence during the first academic year. Students are required to complete a 3 to 6 month internship (6-12 credits) in lieu of thesis research (PH 510).

For general information about PSM programs, contact the PSM Director, 2082 Cordley Hall, Corvallis OR 97331, 541-737-5259; email: kirstin.carroll@oregonstate.edu.

Degree Requirements (54 credits)

Core physics courses (12)

Electives (18)

Professional courses (18)

Internship (6)

PHYSICS (MA, MS, PhD, MAIS)**Graduate Areas of Concentration**

Atomic physics, computational physics, nuclear physics, optical physics, particle physics, physics education, relativity, solid state physics

The Department of Physics offers courses and research experience leading to the Master of Arts, Master of Science, and Doctor of Philosophy degrees. Advanced-degree candidates may pursue thesis research in experimental, computational, or theoretical AMO (atomic, molecular, and optical) physics, nuclear and particle physics, or solid state physics. Special programs are available for students who are preparing for careers in undergraduate teaching. Thesis and nonthesis programs are offered leading to the MS and MA degrees. A written comprehensive examination must be passed prior to the nonthesis master's final oral or the PhD preliminary oral examination. There are no foreign language requirements.

The department maintains a vigorous colloquium program in which well-known physicists present lectures on current research. Students are invited to participate in topical seminars offered regularly in each of the major research areas for the discussion of research results and for studies of specialized subjects at an advanced level.

Fellowships and assistantships are offered to qualified graduate students. A descriptive brochure is available from the Department of Physics.

PHYSICS GRADUATE MINOR

For more details, see the departmental advisor.

COURSES**PH 104. *DESCRIPTIVE ASTRONOMY (4).**

Historical and cultural context of discoveries concerning planets and stars and their motions. Topics include the solar system, the constellations, birth and death of stars, pulsars and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. Lec/lab. (Bacc Core Course)

PH 104H. *DESCRIPTIVE ASTRONOMY (4).

Historical and cultural context of discoveries concerning planets and stars and their motions. Topics include the solar system, the constellations, birth and death of stars, pulsars and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. Lec/lab. (Bacc Core Course) **PREREQS:** Honors College approval required.

PH 106. *PERSPECTIVES IN PHYSICS (4).

A descriptive and non-mathematical study of the development of physical concepts and their historical and philosophical context. The emphasis is on the origin, meaning, significance, and limitations of these concepts and their role in the

evolution of current understanding of the universe. Concepts to be covered include Copernican astronomy, Newtonian mechanics, energy, electricity and magnetism, relativity, and quantum theory. Intended primarily for non-science students. Lec/lab. (Bacc Core Course)

PH 111. *INQUIRING INTO PHYSICAL PHENOMENA (4). Development of conceptual understandings through investigation of everyday phenomena. Emphasis is on questioning, predicting, exploring, observing, discussing, and writing in physical science contexts. Students document their initial thinking, record their evolving understandings, and write reflections upon how their thinking changed and what fostered their learning. Lec/lab. (Baccalaureate Core Course)

PH 199. SPECIAL STUDIES (1-16). One-credit sections are graded pass/no pass. This course is repeatable for a maximum of 99 credits. **PREREQS:** Departmental approval required.

PH 201. *GENERAL PHYSICS (5). Introductory survey course covering a broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course) **PREREQS:** MTH 111 and MTH 112. PH 201, PH 202, PH 203 must be taken in order.

PH 201H. *GENERAL PHYSICS (5). Introductory survey course covering a broad spectrum of classical and modern applications with physics. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course) **PREREQS:** MTH 111 and MTH 112. PH 201, PH 202, PH 203 must be taken in order. Honors College approval required.

PH 202. *GENERAL PHYSICS (5). Introductory survey course covering broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course) **PREREQS:** MTH 111 and MTH 112 and PH 201

PH 202H. *GENERAL PHYSICS (5). Introductory survey course covering broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. (Bacc Core Course) **PREREQS:** MTH 111 and MTH 112 and PH 201. Honors College approval required.

PH 203. *GENERAL PHYSICS (5). Introductory survey course covering broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. Lec/lab/rec. (Bacc Core Course) **PREREQS:** MTH 111 and MTH 112 and PH 202

PH 203H. *GENERAL PHYSICS (5). Introductory survey course covering a broad spectrum of classical and modern physics with applications. Topics include dynamics, vibrations and waves, electricity and magnetism, optics, and modern physics. Laboratory and recitation sections accompany the lectures. Mathematical preparation should include college algebra and trigonometry. (Bacc Core Course) **PREREQS:** MTH 111 and

MTH 112 and PH 202. Honors College approval required.

PH 205. *SOLAR SYSTEM ASTRONOMY (4). History, laws, and tools of astronomy. Composition, motion, and origin of the sun, planets, moons, asteroids, and comets. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. Lec/lab. (Bacc Core Course)

PH 206. *STARS AND STELLAR EVOLUTION (4). Properties of stars; star formation, evolution, and death; supernovae, pulsars, and black holes. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. Lec/lab. (Bacc Core Course)

PH 207. *GALAXIES, QUASARS, AND COSMOLOGY (4). Nature and content of galaxies, properties of quasars, and the cosmic background radiation. Emphasis on the Big-Bang model and its features. An accompanying laboratory is used for demonstrations, experiments, and projects, as well as for outdoor observations. The courses in the astronomy sequence (PH 205, PH 206, PH 207) can be taken in any order. Lec/lab. (Bacc Core Course)

PH 211. *GENERAL PHYSICS WITH CALCULUS (4). A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec. (Bacc Core Course) **PREREQS:** MTH 251. **COREQ:** MTH 252. Concurrent enrollment in a recitation section is strongly recommended.

PH 211H. *GENERAL PHYSICS WITH CALCULUS (4). A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec. (Bacc Core Course) **PREREQS:** MTH 251. **COREQ:** MTH 252. Concurrent enrollment in a recitation section is strongly recommended. Honors College approval required.

PH 212. *GENERAL PHYSICS WITH CALCULUS (4). A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec. (Bacc Core Course) **PREREQS:** MTH 252 and PH 211. **COREQ:** MTH 254. Concurrent enrollment in a recitation section is strongly recommended.

PH 212H. *GENERAL PHYSICS WITH CALCULUS (4). A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec. (Bacc Core Course) **PREREQS:** MTH 252 and PH 211. **COREQ:** MTH 254. Concurrent enrollment in a recitation section is strongly recommended. Honors college approval required.

PH 213. *GENERAL PHYSICS WITH CALCULUS (4). A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec. (Bacc Core Course) **PREREQS:** MTH 254 and PH 212.

Concurrent enrollment in a recitation section is strongly recommended.

PH 213H. *GENERAL PHYSICS WITH CALCULUS (4). A comprehensive introductory survey course intended primarily for students in the sciences and engineering. Topics include mechanics, wave motion, thermal physics, electromagnetism, and optics. Elementary calculus is used. Laboratory work accompanies the lectures. Lec/lab/rec. (Bacc Core Course) **PREREQS:** MTH 254 and PH 212. Concurrent enrollment in a recitation section is strongly recommended. Honors College approval required.

PH 221. RECITATION FOR PHYSICS 211 (1). One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N. **COREQS:** PH 211

PH 221H. RECITATION FOR PHYSICS 211 (1). One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. **PREREQS:** Honors College approval required. Students must take coreq PH 211 or PH 211H.

PH 222. RECITATION FOR PHYSICS 212 (1). One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Graded P/N. **COREQS:** PH 212

PH 222H. RECITATION FOR PHYSICS 212 (1). One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. **PREREQS:** Honors College approval required. Students must take coreq PH 212 or PH 212H.

PH 223. RECITATION FOR PHYSICS 213 (1). One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. Graded P/N. **COREQS:** PH 213

PH 223H. RECITATION FOR PHYSICS 213 (1). One-hour weekly session for the development of problem-solving skills in calculus-based general physics. Lec/rec. **PREREQS:** Honors College approval required. Students must take coreq PH 213 or PH 213H.

PH 265. SCIENTIFIC COMPUTING (3). Basic computational tools and techniques for courses in science and engineering. Project approach to problem solving using symbolic and compiled languages with visualization. Basic computer literacy assumed. **PREREQS:** Concurrent enrollment in MTH 251.

PH 313. *ENERGY ALTERNATIVES (3). Exploration of the challenges and opportunities posed by dwindling resources; physical and technological basis of our current energy alternatives; new or controversial technologies such as nuclear or solar power; overview of resource availability, patterns of energy consumption, and current governmental policies. (Bacc Core Course) **PREREQS:** Upper-division standing and 12 credits of introductory science.

PH 314. INTRODUCTORY MODERN PHYSICS (4). An elementary introduction to relativity and quantum theory, emphasizing the experiments that revealed the limitations of classical physics. Applications include the properties of atoms, nuclei, and solids. Laboratory work accompanies lectures. Lec/lab. **PREREQS:** PH 213. **COREQ:** MTH 256.

PH 320. PARADIGMS IN PHYSICS: SYMMETRIES (2). Symmetry and idealization in problem-solving. Gauss's and Ampere's laws in orthonormal coordinates, power series as approximations, complex numbers. **PREREQS:** PH 213. **COREQ:** MTH 255

PH 331. *SOUND, HEARING, AND MUSIC (3). Basic course in the physics, technology, and societal implications of sound. Intended for students in nontechnical majors. Topics include wave motion, hearing and the perception of sound, noise pollution, music and musical instruments, architectural acoustics, and sound recording and reproduction. (Bacc Core Course) **PREREQS:**

Upper-division standing and one year of university science, or instructor approval required.

PH 332. *LIGHT, VISION, AND COLOR (3). Basic physics of light, optical instruments (lenses, telescopes, microscopes), the eye and visual perception, colors, photography, environmental lighting, lasers and holography. For nontechnical majors. (Bacc Core Course) **PREREQS:** Upper-division standing and one year of university science or instructor approval required.

PH 365. APPLICATIONS IN COMPUTATIONAL PHYSICS I (1). A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered include classical mechanics and electromagnetism. **PREREQS:** PH 213 and Students should take PH 265 prior to PH 365, or talk with the instructor about whether they have adequate preparation.

PH 366. APPLICATIONS IN COMPUTATIONAL PHYSICS II (1). A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered focus on quantum mechanics. **PREREQS:** PH 213 and Students should take PH 265 prior to PH 366, or talk with the instructor about whether they have adequate preparation.

PH 367. APPLICATIONS IN COMPUTATIONAL PHYSICS III (1). A project-driven laboratory experience in computational physics. Includes the use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered include statistical mechanics and many-body systems. **PREREQS:** PH 213 and Students should take PH 265 prior to PH 367, or talk with the instructor about whether they have adequate preparation.

PH 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PH 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

PH 401. RESEARCH (1-16). A research project under the supervision of a faculty member, whose approval must be arranged by the student in advance of registration. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PH 403. ^THESIS (1-16). A research project leading to a thesis under the supervision of a faculty member, whose approval must be arranged by the student in advance of registration. (Writing Intensive Course) This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PH 405. READING AND CONFERENCE (1-16). An independent study project under the supervision of a faculty member, whose approval must be arranged by the student in advance of registration. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PH 407. SEMINAR (1-16). Departmental seminars or colloquium. Graded P/N. This course is repeatable for a maximum of 16 credits.

PH 407H. SEMINAR (1-16). Departmental seminars or colloquium. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

PH 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PH 411. ANALOG AND DIGITAL ELECTRONICS (3). Circuit theory. Passive dc and ac circuits including filters, resonance, complex impedance

and Fourier analysis. Operational amplifiers, gates and combinational logic. Semiconductor principles, diodes, transistors, BJTs and FETs. Multiplexing, flip-flops and sequential logic, 555 timer, registers and memory, DAC, ADC. **PREREQS:** PH 314*. PH 411 and PH 412 must be taken in order.

PH 412. ANALOG AND DIGITAL ELECTRONICS (3). Circuit theory. Passive dc and ac circuits including filters, resonance, complex impedance and Fourier analysis. Operational amplifiers, gates and combinational logic. Semiconductor principles, diodes, transistors, BJTs and FETs. Multiplexing, flip-flops and sequential logic, 555 timer, registers and memory, DAC, ADC. **PREREQS:** PH 314* and PH 411

PH 415. COMPUTER INTERFACING AND INSTRUMENTATION (3). Applications of computers as scientific instruments, with emphasis on hardware and instrumentation, online data acquisition, and computer control of experiments. **PREREQS:** Upper-division or graduate standing; PH 412/PH 512 or equivalent background in electronics; and instructor approval required. Departmental approval required.

PH 421. PARADIGMS IN PHYSICS: OSCILLATIONS (2). Dynamics of mechanical and electrical oscillations using Fourier series and integrals, time and frequency representations for driven damped oscillators, resonance, coupled oscillators, and vector spaces. **PREREQS:** PH 213

PH 422. PARADIGMS IN PHYSICS: STATIC VECTOR FIELDS (2). Theory of static electric and magnetic fields, including sources, superposition, using the techniques of vector calculus, including Stokes and divergence theorems, and computer visualizations. **PREREQS:** PH 213 and MTH 255*

PH 423. PARADIGMS IN PHYSICS: ENERGY AND ENTROPY (2). Basic thermodynamic methods of simple polymers, magnetic systems and stars. **PREREQS:** PH 212 and (PH 424 or PH 524) or (PH 425 or PH 525)

PH 424. PARADIGMS IN PHYSICS: WAVES IN ONE DIMENSION (2). One-dimensional waves in classical and quantum mechanics, barriers and wells, reflection and transmission, resonance and normal modes, wave packets with and without dispersion. **PREREQS:** PH 314 and (PH 421 or PH 521)

PH 425. PARADIGMS IN PHYSICS: QUANTUM MEASUREMENTS AND SPIN (2). Introduction to quantum mechanics through Stern-Gerlach spin measurements. Probability, eigenvalues, operators, measurement, state reduction, Dirac notation, matrix mechanics, time evolution, spin precession, Rabi oscillations. **PREREQS:** PH 314 and MTH 341*

PH 426. PARADIGMS IN PHYSICS: CENTRAL FORCES (2). Central forces: gravitational and electrostatic, angular momentum and spherical harmonics, separation of variables in classical and quantum mechanics, hydrogen atom. **PREREQS:** PH 314 and (PH 422 or PH 522) and (PH 424 or PH 524)

PH 427. PARADIGMS IN PHYSICS: PERIODIC SYSTEMS (2). Quantum waves in one-dimensional periodic systems; Bloch waves, band structure, phonons and electrons in solids, reciprocal lattice, x-ray diffraction. **PREREQS:** PH 424 or PH 524

PH 428. PARADIGMS IN PHYSICS: RIGID BODIES (2). Rigid body dynamics, invariance, angular momentum, rotational motion, tensors and eigenvalues. **PREREQS:** PH 426 or PH 526

PH 429. PARADIGMS IN PHYSICS: REFERENCE FRAMES (2). Inertial and non-inertial frames of reference, rotations, Galilean and Lorentz transformation, collisions, equivalence principle, special relativity, symmetries and conservation laws, invariants, and electromagnetism. **PREREQS:** PH 314

PH 431. CAPSTONES IN PHYSICS: ELECTROMAGNETISM (3). Static electric and magnetic fields in matter, electrostatics, Maxwell equations, electromagnetic waves, wave guides, dipole radiation. **PREREQS:** (PH 424 or 524) and (PH 426 or PH 526)

PH 435. CAPSTONES IN PHYSICS: CLASSICAL MECHANICS (3). Newtonian, Lagrangian and Hamiltonian formulations of classical mechanics: single-particle motion, collisions, variational methods, and normal coordinate description of coupled oscillators. **PREREQS:** (PH 424 or PH 524) and (PH 426 or PH 526)

PH 441. CAPSTONES IN PHYSICS: THERMAL AND STATISTICAL PHYSICS (3). Entropy and quantum mechanics; canonical Gibbs probability; ideal gas; thermal radiation; Einstein and Debye lattices; grand canonical Gibbs probability; ideal Fermi and Bose gases; chemical reactions and phase transformations. **PREREQS:** (PH 423 or PH 523) and (PH 451 or PH 551)

PH 451. CAPSTONES IN PHYSICS: QUANTUM MECHANICS (3). Wave mechanics, Schrodinger equation, operators, harmonic oscillator, identical particles, atomic fine structure, approximation methods and applications. **PREREQS:** (PH 424 or PH 524) and (PH 425 or PH 525) and (PH 426 or PH 526)

PH 461. CAPSTONES IN PHYSICS: MATHEMATICAL METHODS (3). Complex algebra, special functions, partial differential equations, series solutions, complex integration, calculus of residues. **PREREQS:** (PH 424 or PH 524) and (PH 426 or PH 526) and MTH 256

PH 464. SCIENTIFIC COMPUTING II (3). Mathematical, numerical, and conceptual elements forming foundations of scientific computing: computer hardware, algorithms, precision, efficiency, verification, numerical analysis, algorithm scaling, profiling, and tuning. Lec/lab.

PH 465. COMPUTATIONAL PHYSICS (3). The use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered include models and applications ranging from classical mechanics and electromagnetism to modern solid state and particle physics. **PREREQS:** PH 464 or PH 564

PH 466. COMPUTATIONAL PHYSICS (3). The use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered include models and applications ranging from classical mechanics and electromagnetism to modern solid state and particle physics. **PREREQS:** Mathematical physics such as PH 461, PH 462/PH 562 or MTH 481/MTH 581, MTH 482/MTH 582, MTH 483/MTH 583, plus knowledge of a compiled language such as Pascal, C, or Fortran. A physics background including PH 431/PH 531, PH 435/PH 535, and PH 451/PH 551 is assumed.

PH 481. PHYSICAL OPTICS (4). Wave propagation, polarization, interference, diffraction, and selected topics in modern optics. **PREREQS:** (PH 431 or PH 531) or equivalent.

PH 482. OPTICAL ELECTRONIC SYSTEMS (4). Photodetectors, laser theory, and laser systems. Lec/lab. **CROSSLISTED** as ECE 482/ECE 582. **PREREQS:** ECE 391 or (PH 481 or PH 581) or equivalent.

PH 483. GUIDED WAVE OPTICS (4). Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. **CROSSLISTED** as ECE 483/ECE 583. **PREREQS:** (ECE 391* or PH 481*)

PH 495. INTRODUCTION TO PARTICLE AND NUCLEAR PHYSICS (3). Elementary particles and forces, nuclear structure and reactions. **PREREQS:** (PH 429 or PH 529) and (PH 441 or PH 541) and (PH 451 or PH 551)

PH 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PH 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

PH 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PH 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

PH 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

PH 511. ANALOG AND DIGITAL ELECTRONICS (3). Circuit theory. Passive dc and ac circuits including filters, resonance, complex impedance and Fourier analysis. Operational amplifiers, gates and combinational logic. Semiconductor principles, diodes, transistors, BJTs and FETs. Multiplexing, flip-flops and sequential logic, 555 timer, registers and memory, DAC, ADC. PH 511 and PH 512 must be taken in order. **PREREQS:** PH 314*

PH 512. ANALOG AND DIGITAL ELECTRONICS (3). Circuit theory. Passive dc and ac circuits including filters, resonance, complex impedance and Fourier analysis. Operational amplifiers, gates and combinational logic. Semiconductor principles, diodes, transistors, BJTs and FETs. Multiplexing, flip-flops and sequential logic, 555 timer, registers and memory, DAC, ADC. **PREREQS:** PH 314* and PH 511

PH 515. COMPUTER INTERFACING AND INSTRUMENTATION (3). Applications of computers as scientific instruments, with emphasis on hardware and instrumentation, online data acquisition, and computer control of experiments. **PREREQS:** Upper-division or graduate standing; (PH 412 or PH 512) or equivalent background in electronics; and instructor approval required. Departmental approval required.

PH 521. PARADIGMS IN PHYSICS: OSCILLATIONS (2). Dynamics of mechanical and electrical oscillations using Fourier series and integrals, time and frequency representations for driven damped oscillators, resonance, coupled oscillators, and vector spaces. **PREREQS:** PH 213

PH 522. PARADIGMS IN PHYSICS: STATIC VECTOR FIELDS (2). Theory of static electric and magnetic fields, including sources, superposition, using the techniques of vector calculus, including Stokes and divergence theorems, and computer visualizations. **PREREQS:** PH 213 and MTH 255*

PH 523. PARADIGMS IN PHYSICS: ENERGY AND ENTROPY (2). Basic thermodynamic methods of simple polymers, magnetic systems and stars. **PREREQS:** PH 212 and (PH 424 or PH 524) or (PH 425 or PH 525)

PH 524. PARADIGMS IN PHYSICS: WAVES IN ONE-DIMENSION (2). One-dimensional waves in classical and quantum mechanics, barriers and wells, reflection and transmission, resonance and normal modes, wave packets with and without dispersion. **PREREQS:** PH 314 and (PH 421 or PH 521)

PH 525. PARADIGMS IN PHYSICS: QUANTUM MEASUREMENTS AND SPIN (2). Introduction to quantum mechanics through Stern-Gerlach spin measurements. Probability, eigenvalues, operators, measurement, state reduction, Dirac notation, matrix mechanics, time evolution, spin precession, Rabi oscillations. **PREREQS:** PH 314 and MTH 341*

PH 526. PARADIGMS IN PHYSICS: CENTRAL FORCES (2). Central forces: gravitational and electrostatic, angular momentum and spherical harmonics, separation of variables in classical and quantum mechanics, hydrogen atom. **PREREQS:** PH 314 and (PH 422 or PH 522) and (PH 424 or PH 524)

PH 527. PARADIGMS IN PHYSICS: PERIODIC SYSTEMS (2). Quantum waves in one-dimensional periodic systems; Bloch waves, band structure, phonons and electrons in solids, reciprocal lattice, x-ray diffraction. **PREREQS:** PH 424 or PH 524

PH 528. PARADIGMS IN PHYSICS: RIGID BODIES (2). Rigid body dynamics, invariance, angular momentum, rotational motion, tensors and eigenvalues. **PREREQS:** PH 426 or PH 526

PH 529. PARADIGMS IN PHYSICS: REFERENCE FRAMES (2). Inertial and non-inertial frames of reference, rotations, Galilean and Lorentz transformation, collisions, equivalence principle, special relativity, symmetries and conservation laws, invariants, and electromagnetism. **PREREQS:** PH 314

PH 531. CAPSTONES IN PHYSICS: ELECTROMAGNETISM (3). Static electric and magnetic fields in matter, electrodynamics, Maxwell equations, electromagnetic waves, wave guides, dipole radiation. **PREREQS:** (PH 424 or PH 524) and (PH 426 or PH 526)

PH 535. CAPSTONES IN PHYSICS: CLASSICAL MECHANICS (3). Newtonian, Lagrangian and Hamiltonian formulations of classical mechanics: single-particle motion, collisions, variational methods, and normal coordinate description of coupled oscillators. **PREREQS:** (PH 424 or PH 524) and (PH 426 or PH 526)

PH 541. CAPSTONES IN PHYSICS: THERMAL AND STATISTICAL PHYSICS (3). Entropy and quantum mechanics; canonical Gibbs probability; ideal gas; thermal radiation; Einstein and Debye lattices; grand canonical Gibbs probability; ideal Fermi and Bose gases; chemical reactions and phase transformations. **PREREQS:** (PH 423 or PH 523) and (PH 451 or PH 551)

PH 551. CAPSTONES IN PHYSICS: QUANTUM MECHANICS (3). Wave mechanics, Schrodinger equation, operators, harmonic oscillator, identical particles, atomic fine structure, approximation methods and applications. **PREREQS:** (PH 424 or PH 524) and (PH 425 or PH 525) and (PH 426 or PH 526)

PH 561. MATHEMATICAL PHYSICS (3). Fundamental mathematical techniques needed for graduate students in physics. Topics include vector spaces and operators; fourier series, integrals, and transforms; partial differential equations; special functions, distributions, and delta functions; Green's functions; complex analysis.

PH 562. MATHEMATICAL PHYSICS (3). Fundamental mathematical techniques needed for graduate students in physics. Topics include vector spaces and operators; fourier series, integrals, and transforms; partial differential equations; special functions, distributions, and delta functions; Green's functions; complex analysis.

PH 564. SCIENTIFIC COMPUTING II (3). Mathematical, numerical, and conceptual elements forming foundations of scientific computing: computer hardware, algorithms, precision, efficiency, verification, numerical analysis, algorithm scaling, profiling, and tuning. Lec/lab.

PH 565. COMPUTATIONAL PHYSICS (3). The use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered include models and applications ranging from classical mechanics and electromagnetism to modern solid state and particle physics. **PREREQS:** PH 464 or PH 564

PH 566. COMPUTATIONAL PHYSICS (3). The use of basic mathematical and numerical techniques in computer calculations leading to solutions for typical physical problems. Topics to be covered include models and applications ranging from classical mechanics and electromagnetism to modern solid state and particle physics. **PREREQS:** Mathematical physics

such as PH 461/PH 561, PH 462/PH 562 or MTH 481/MTH 581, MTH 482/MTH 582, MTH 483/MTH 583, plus knowledge of a compiled language such as Pascal, C, or FORTRAN. A physics background including PH 431/PH 531, PH 435/PH 535, and PH 451/PH 551 is assumed.

PH 575. INTRODUCTION TO SOLID STATE PHYSICS (3). Introduction to condensed matter physics for majors in physics, chemistry, and engineering. Topics include band structure, free electron behavior, optical properties, magnetism, and lattice excitations. **PREREQS:** (PH 451 or PH 551) or equivalent. COREQ: PH 427 or PH 527

PH 581. PHYSICAL OPTICS (4). Wave propagation, polarization, interference, diffraction, and selected topics in modern optics. **PREREQS:** (PH 431 or PH 531) or equivalent

PH 582. OPTICAL ELECTRONIC SYSTEMS (4). Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as ECE 482/ECE 582. **PREREQS:** (PH 481 or PH 581) or equivalent

PH 583. GUIDED WAVE OPTICS (4). Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. CROSSLISTED as ECE 483/ECE 583. **PREREQS:** (ECE 391* or PH 481* or PH 581*)

PH 585. ATOMIC, MOLECULAR, AND OPTICAL PHYSICS (3). Atomic and molecular structure, interaction with electromagnetic fields, atomic and molecular spectra, spectroscopic techniques, laser theory, nonlinear optics. **PREREQS:** (PH 431 or PH 531) or (PH 451 or PH 551)

PH 595. INTRODUCTION TO PARTICLE AND NUCLEAR PHYSICS (3). Elementary particles and forces, nuclear structure and reactions. **PREREQS:** (PH 429 or PH 529) and (PH 441 or PH 541) and (PH 451 or PH 551)

PH 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PH 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

PH 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PH 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

PH 621. DYNAMICS OF SINGLE- AND MULTI-PARTICLE SYSTEMS (3). Introduction to theory of non-linear systems. Chaos in Hamiltonian and dissipative systems. Lyapunov exponents, fractal geometries. **PREREQS:** PH 435 or PH 535 or equivalent.

PH 631. ELECTROMAGNETIC THEORY (3). Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields. **PREREQS:** PH 431 or PH 531 or equivalent. PH 631, PH 632, PH 633 must be taken in order.

PH 632. ELECTROMAGNETIC THEORY (3). Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields. **PREREQS:** PH 631 and (PH 431 or PH 531 or equivalent)

PH 633. ELECTROMAGNETIC THEORY (3). Electrostatics; multipole expansion; magnetostatics; radiation fields; dynamics of relativistic particles and electromagnetic fields. **PREREQS:** PH 632 and (PH 431 or PH 531 or equivalent)

PH 641. STATISTICAL THERMOPHYSICS (3). Macroscopic thermodynamics and kinetic theory. Classical and quantum statistical ensembles; partition functions. Applications to atoms and molecules, clustering, solids, radiation. **PREREQS:** PH 435 or PH 535. PH 641, PH 642 must be taken in order.

PH 642. STATISTICAL THERMOPHYSICS (3). Macroscopic thermodynamics and kinetic theory. Classical and quantal statistical ensembles; partition functions. Applications to atoms and molecules, clustering, solids, radiation. **PREREQS:** (PH 435 or PH 535) and PH 641

PH 651. QUANTUM MECHANICS (3). Basic principles of nonrelativistic quantum theory and applications. Schrodinger theory, quantum theory of angular momentum, matrix mechanics, perturbation theory, identical particles, scattering. **PREREQS:** (PH 435 or PH 535) and (PH 451 or PH 551) or equivalents. PH 651, PH 652, PH 653 must be taken in order.

PH 652. QUANTUM MECHANICS (3). Basic principles of nonrelativistic quantum theory and applications. Schrodinger theory, quantum theory of angular momentum, matrix mechanics, perturbation theory, identical particles, scattering. **PREREQS:** (PH 435 or PH 535) and (PH 451 or PH 551) or equivalents and PH 651

PH 653. QUANTUM MECHANICS (3). Basic principles of nonrelativistic quantum theory and applications. Schrodinger theory, quantum theory of angular momentum, matrix mechanics, perturbation theory, identical particles, scattering. **PREREQS:** (PH 435 or PH 535) and (PH 451 or PH 551) or equivalents and PH 652

PH 654. ADVANCED QUANTUM THEORY (3). Scattering theory, second quantization and many body theory, relativistic quantum mechanics, quantization of fields, quantum electrodynamics, and elementary particles. **PREREQS:** PH 653. PH 654, PH 655, PH 656 must be taken in order.

PH 671. SOLID STATE PHYSICS, ELECTRON TRANSPORT (2). Fundamentals of solid state physics, Boltzmann transport, phonon and defect scattering, quantum transport, transport in magnetic field, localization, Mott-insulator transition, electron tunneling, superconductivity. Offered in alternate years. **PREREQS:** Basic knowledge of electromagnetism and quantum mechanics.

PH 672. SOLID STATE PHYSICS, THEORY (2). The many-body problem, density functional theory, excited states properties, BCS theory of superconductivity. Offered in alternate years. **PREREQS:** PH 575 and PH 654 and basic knowledge of electromagnetism and quantum mechanics.

PH 673. SOLID STATE PHYSICS, NANOSCIENCE AND NANOTECHNOLOGY (2). Introduction to nanoscience and nanotechnology; semiconductor quantum wells, wires, and dots; bulk metals vs nanoparticles; molecular ensembles vs single molecules; fabrication of nanoparticles and nanostructured materials; scanning probe microscopy; advanced optical imaging and manipulation. Offered in alternate years. **PREREQS:** Basic knowledge of electromagnetism and quantum mechanics.

PH 674. SOLID STATE PHYSICS, MAGNETISM (2). Magnetism of atoms; interaction between magnetic atoms, magnetic ordering in crystalline solids; excitations in magnetic solids; temperature dependent phenomena in magnetic solids; magnetism of metals, alloys, insulators and semiconductors; topics of considerable interest in contemporary research. **PREREQS:** Basic knowledge of electromagnetism and quantum mechanics.

PH 681. ATOMIC, MOLECULAR AND OPTICAL PHYSICS, MODERN OPTICS (2). Maxwell's equations in matter; refraction, phase and group indices; material and geometry dispersion; effective-medium regime. Not offered every year. **PREREQS:** Basic knowledge of electromagnetism and quantum mechanics.

PH 682. ATOMIC, MOLECULAR, OPTICAL PHYSICS, SEMICONDUCTOR OPTICS (2). Linear response theory; polarization effects; interband excitations and emissions; low dimensional systems; excitons; phonons;

semiconductor lasers; photovoltaics. Offered alternate years. **PREREQS:** Basic knowledge of electromagnetism and quantum mechanics.

PH 683. ATOMIC, MOLECULAR AND OPTICAL PHYSICS, NONLINEAR OPTICS (2). Coherent nonlinear electromagnetic phenomena; harmonic generation and parametric mixing; quantum mechanical description of multi-photon interactions; incoherent multi-photon interactions; coherent nonlinear optical phenomena and spectroscopies. Offered in alternate years. **PREREQS:** Basic knowledge of electromagnetism and quantum mechanics.

PH 684. ATOMIC, MOLECULAR AND OPTICAL PHYSICS, ULTRAFAST OPTICS (2). Introduction of ultrafast optical science; short pulse propagation in linear media; pulse stretching and compressing; Q-switching and mode-locking; characterization of femtosecond lasers; coherent optical effects. Offered in alternate years. **PREREQS:** Basic knowledge of electromagnetism and quantum mechanics.

PH 699. SPECIAL TOPICS: BIOLOGICAL PHYSICS (3).

SCHOOL OF LIFE SCIENCES

Undergraduate Majors Biochemistry and Biophysics Biology

Options
Biotechnology (Biology)
Genetics
Marine Biology
Pre-Education Biology

Microbiology Zoology

Option
Pre-Veterinary Medicine

Undergraduate Minors Biology Microbiology Zoology

Graduate Majors with Options Biochemistry and Biophysics

Graduate Areas of Concentration
Biochemistry, biophysics

Microbiology

Graduate Areas of Concentration
Environmental microbiology, food microbiology, genomics, immunology, microbial ecology, microbial evolution, parasitology, pathogenic microbiology, virology

Zoology

Graduate Areas of Concentration
Behavioral ecology, behavioral endocrinology, cell biology, chemical ecology, conservation biology, developmental biology, evolutionary biology, genetics, genomics, host-microbe interactions, marine ecology, paleontology, physiology, population biology

Graduate Minors Biochemistry and Biophysics Microbiology Zoology

The School of Life Sciences has three departments:

1. Biochemistry and Biophysics
2. Integrative Biology
3. Microbiology

DEPARTMENT OF BIOCHEMISTRY AND BIOPHYSICS

Gary F. Merrill, Chair

2011 Ag and Life Sciences
Oregon State University
Corvallis, OR 97331-7305
541-737-3119

Email: merrillg@oregonstate.edu

Website: <http://biochem.science.oregon-state.edu>

FACULTY

Professors Baird, Barbar, Beckman, Frei, Hagen, Karplus, Merrill
Associate Professors Frietag, Gombart, Greenwood, Hsu, McFadden, Mehl

Assistant Professors Hendrix, Johnson, Perez

Senior Instructors Ahern, Rajagopal, Van Zee

Associate Professor, Senior Research Zhang

Assistant Professor Senior Research Nyarko

The Biochemistry and Biophysics major provides a foundation in both the physical and biological sciences. It is designed to help a student prepare for a career in the health sciences, for technical employment at the BS level, or for graduate study in the life sciences. Graduates of the department's programs have found challenging careers in medicine, dentistry, clinical chemistry, biotechnology, genetics, cell biology, forensic science, pharmacology, physiology, toxicology, and nutrition, as well as in biochemistry or biophysics. Others have used the degree as a springboard to nontechnical careers that benefit from a broad scientific background, including business, intellectual property law, journalism, and health care administration.

UNDERGRADUATE STUDIES

High school students interested in careers in biochemistry or biophysics should prepare for college by taking four years of mathematics and at least one year each of physics and chemistry. Additional course work in biology, computer science, written and spoken English, and foreign languages is highly desirable. Students transferring from a community college should have completed one year each of the following by the end of the sophomore year, if they plan to graduate in four years' total time: general chemistry, organic chemistry, calculus-based physics, and general biology. Three semesters or four quarters of college-level

math should have been taken, starting with calculus.

Biochemists and biophysicists find employment in colleges and universities, in medical schools, in government and private research institutes, in hospitals, and in industry. Industrial employers include chemical companies, food-processing plants, drug manufacturers, the cosmetic industry, and manufacturers of agricultural chemicals (fertilizers, pesticides, etc.). Biochemistry is extensively intertwined with biotechnology, which is the use of modern techniques in biology to achieve practical objectives. This has greatly expanded the industrial market for biochemists and biophysicists. The most rewarding careers require completion of a doctoral degree—PhD or a professional degree. This is essential for anyone who wants to direct an independent research program.

Dr. Kevin Ahern is the primary undergraduate advisor and is the one most familiar with undergraduate program requirements and career opportunities. The alternate advisors are Doctors Karplus, Rajagopal, and Van Zee. Also, students are encouraged to seek out any other member of the faculty for informal advice.

The department has one set of curricular requirements (see below), which lead to the BS degree in Biochemistry and Biophysics. All upper division students are encouraged to take additional elective courses in areas related to their major fields of interest (e.g., chemistry, microbiology, genetics, nutrition, physics, pharmacy, biology, or computer science). All students are strongly encouraged to carry out a research project in the laboratory of a faculty member.

DEPARTMENT OF INTEGRATIVE BIOLOGY

Virginia M. Weis, Co-Chair

3029 Cordley Hall

Oregon State University

Corvallis, OR 97331-2914

541-737-2993

Email: zoology@science.oregonstate.edu

Website: <http://ib.oregonstate.edu/>

FACULTY

Professors Arnold, Blaustein, Blouin, De Leenheer, Giebultowicz, Hacker, Hixon, Houck, Lubchenco, Maddison, Mason, Menge, Sponaugle, Taylor, Weis
Associate Professors Denver, Lytle, Warrick, Zhang

Assistant Professors Chan, Henkel,

Jolles, Meyer, Milligan, Novak, Terry

Senior Instructors Blair, Cheung,

Lavery, Rajagopal

Instructors Kayes, Pepe, Quick, White

Professional Faculty Kneece,

Marshall, McLeod, Olarra

The undergraduate Biology major was created for students who wish to obtain broad, interdisciplinary training in the biological sciences. Biology provides students with a rigorous education coupled with practical scientific experience. The Biology major is ideal preparation for advanced graduate education in the biological sciences and professional schools in fields such as dentistry and medicine. It also prepares students well for a variety of careers in industry, government agencies, nonprofit organizations and academia. Recent graduates have entered such varied areas as biotechnology, pharmaceuticals, environmental policy, teaching, medicine, forensics, conservation, marine biology, biological illustration, field biology, and other environmental sciences.

Because of the interdisciplinary nature of the program, students majoring in biology may not seek a dual major or double degree in general science or zoology.

A major in zoology can prepare students for vocations that require foundations in biological science. It is an ideal major for advanced graduate education in biological science and for pre-professional preparation in medicine, dentistry, optometry, and veterinary medicine. In addition, zoology majors can enter such varied fields as environmental affairs, conservation, laboratory technology, education, scientific journalism, field biology, biomedical illustration, and other areas associated with biomedical and environmental sciences.

Zoology offers BS, MA, MS, and PhD degrees. Excellent opportunities exist for studies at field stations on the Pacific Coast, in the Great Basin Desert, and at other locations. In consultation with advisors, students can plan programs to meet their particular needs.

Because of the interdisciplinary nature of the program, students majoring in zoology may not seek a dual major or double degree in general science or biology.

GRADUATE STUDY

The Department of Integrative Biology has strong programs of graduate study in behavioral ecology, marine biology and ecology, evolutionary biology, physiology, behavioral endocrinology, population biology, genetics, genomics, chemical ecology, cell and developmental biology, host-microbe interactions and paleontology. Detailed information on the graduate faculty and program is available from the Department of Integrative Biology.

DEPARTMENT OF MICROBIOLOGY

Theo Dreher, Chair

220 Nash Hall

Oregon State University

Corvallis, OR 97331-3804

541-737-1834

Email: theo.dreher@oregonstate.edu

FACULTY

Professors Bartholomew, Bermudez, Bottomley, Dreher, Geller, Giovannoni, Kent, Ream, Sarker, Trempy

Associate Professors Field, Schuster

Assistant Professors Halsey, Lowry,

Mueller, Sharpton, Vega-Thurber

Senior Instructor/Advisor Bruslind

Instructor/Advisor Biesinger

Microbiology is concerned with the forms and activities of bacteria, archaea, fungi, protozoa, and viruses. It plays varied roles in the practical applications of technology and medicine, as well as in the most theoretical problems of biology. Microbiologists are involved in activities as different as the study of gene structure, the control of disease, and the industrial processes based on the ability of microorganisms to decompose and synthesize complex organic molecules. Microbiology is one of the most rewarding of professions because it provides the opportunity to be in contact with all the other natural sciences and thus to contribute in many different ways to the betterment of life.

UNDERGRADUATE STUDIES

Many fields of microbiology are available to students and research workers. These include fundamental areas such as the physiology, ecology, and genetics of microorganisms; and the applications of microbiology concerned with soil and water quality, food safety, immunology, and human, animal and plant diseases. Undergraduate studies prepare students for admission to professional schools, graduate programs in microbiology, and for positions in education and as health officers, sanitarians and biotechnicians in private industry, state and federal government.

High school students or community college transferees considering a career in microbiology will find it helpful to have a strong background in mathematics and chemistry. An excellent advising program is available to undergraduates, and prospective students are encouraged to consult with a departmental advisor or with faculty members working in an area of interest to them. Upper-division students are also encouraged to carry out a research project in the laboratory of a faculty member and/or to serve as an

undergraduate teaching assistant. Several partial scholarships are available for microbiology majors. For more information, contact a microbiology advisor.

GRADUATE STUDIES

The Department of Microbiology offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. Major fields of study in the program include molecular biology, microbial physiology, genetics, virology, soil and aquatic microbiology, immunology, pathogenic microbiology, and microbial genomes. The department also participates in the Master of Arts in Interdisciplinary Studies and the Master of Agriculture graduate programs. Students in both the master's and PhD programs are required to complete a research project leading to a thesis. Students pursuing the PhD degree must complete both written and oral qualifying examinations. Teaching and research assistantships are available.

For additional information, contact the department chair or other faculty members conducting research in areas that are of interest.

PROGRAMS UNDER THE SCHOOL OF LIFE SCIENCES

UNDERGRADUATE MAJORS WITH OPTIONS

BIOCHEMISTRY AND BIOPHYSICS (BS, HBS)

Freshman Year (48)

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)
 CH 231, CH 232, CH 233. *General Chemistry (4,4,4)
and CH 261, CH 262, CH 263.
 *Laboratory for Chemistry 231, 232, 233 (1,1,1)
 HHS 231. *Lifetime Fitness for Health (2)
 HHS 241–HHS 248. *Lifetime Fitness: (Various activities) (1)
 or any PAC course (1–2)

 PHL 474. ^Philosophy of Biology (4)
or other WIC courses approved by the program chair.

Two additional 3–5 credit, upper-division (300–400), College of Science courses NOT used for the Biology requirements above and meeting the stipulations below:

Allowed:

- Science courses offered by departments in the College of Science (BB, BI, BOT, CH, GEO, ENSC, MB, MTH, PH, ST, and Z).
- Also College of Science courses taken for a double major, option, or minor.
- Non-History of Science writing intensive courses from the major list above.

Excluded:

- Blanket numbered courses (e.g. 309, 401, 405, 406, 407, 409, 410).
- Courses from the Human Anatomy and Physiology series Z 331–Z 333 and Z 341–Z 343.
- Any of the following: BB 350, BB 450, BB 451, BB 490, BB 491, BB 492, ST 314, Z 345.

Biology Major Field Test

Biology majors are required to take a comprehensive, two-hour Biology Major Field Test in order to graduate: BI 499. Special Topics/Senior Biology Major Field Test (0). For further information, go to <http://biology.science.oregonstate.edu/biology-major-field-test-information>.

Total=180

Footnotes:

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

OPTIONS

BIOTECHNOLOGY (BIOLOGY) OPTION

Required Courses (9)

BB 493. Biochemistry Laboratory (3)
BB 494. Biochemistry Laboratory (3)
MB 310. Bacterial Molecular Genetics (3)

Electives—Select a minimum of 12 credits from the following:

BB 332. *Molecular Medicine (3)
BOT 332. Experimental Plant Physiology (3)
HORT/PBG 441. Plant Tissue Culture (4)
MB 311. ^Molecular Microbiology Lab: A Writing Intensive Course (3)
MB 416, MB 417. Immunology, Immunology Lab (3,2)
MB 430. Pathogenic Microbiology (3)
MB 434. Virology (3)
MB 435. Pathogenic Microbes Laboratory (2)
MB 456. Microbial Genetics and Biotechnology (3)
MB 479. Fermentation Microbiology (3)

Total credits 21–22

Note: Courses used to satisfy the Biotechnology option requirements may only be used to satisfy the additional upper-division College of Science courses in the Biology major.

GENETICS OPTION

Required Courses (14)

BB 493. Biochemistry Laboratory (3)
BB 494. Biochemistry Laboratory (3)
MB 310. Bacterial Molecular Genetics (3)
MB 311. ^Molecular Microbiology Lab: A Writing Intensive Course (3)
MB 456. Microbial Genetics and Biotechnology (3)
MCB 530. Introduction to Population Genetics (3)
Z 425. Embryology and Development (5)

Total=23

Note: Courses used to satisfy the Genetics option requirements may only be used to satisfy the additional upper-division College of Science courses in the Biology major.

MARINE BIOLOGY OPTION

Biology majors can obtain a Marine Biology option by satisfying either Track 1 or Track 2 requirements.

Track I (21)

BI 450. ^Marine Biology (16) *Admission by application only. Taught at Hatfield Marine Science Center.*

Electives—Select a minimum of 5 credits from the following:

OC 331. Introduction to Oceanography (3) or OC 332. Coastal Oceanography (3) or OC 440. Introduction to Biological Oceanography (3)
Z 351. Marine Ecology (3)
Z 352. Marine Ecology Lab (2)
Z 464. Marine Conservation Biology (3)

Other Hatfield Marine Science Center summer courses may be used as electives only if approved by Brock McLeod, mcleodb@science.oregonstate.edu. See <http://hmsc.oregonstate.edu/studentinfo.html> for course offerings.

Track II (21–22)

BOT 416. Aquatic Botany (4)
Z 351. Marine Ecology (3)
Z 352. Marine Ecology Lab (2)
Z 361. Invertebrate Biology (3)
Z 362. Invertebrate Biology Lab (2) or Z 461. Marine and Estuarine Invertebrate Zoology (4)

Electives—Select a minimum of 5 credits from the following:

BI 358. Symbioses and the Environment (3)
FW 315. Ichthyology (3)
FW 316. Systematics of Fishes (2)
Z 464. Marine Conservation Biology (3)

And one of the OC courses below to complete electives (3):

OC 331. Introduction to Oceanography (3)
OC 332. Coastal Oceanography (3)
OC 440. Introduction to Biological Oceanography (3)

Other Hatfield Marine Science Center summer courses may be used as electives only if approved by Brock McLeod, mcleodb@science.oregonstate.edu. See <http://hmsc.oregonstate.edu/studentinfo.html> for course offerings.

Note: Courses used to satisfy the Marine Biology option requirements may

only be used to satisfy the additional upper-division College of Science courses in the Biology major.

PRE-EDUCATION BIOLOGY OPTION

CAUTION: The Pre-Education Biology option meets the requirements for most graduate teacher licensure programs. Students must check prerequisites at any school to which they apply for up-to-date information.

Required Courses (10–12 credits)

SED 407. Seminar: Science and Mathematics Education Orientation (2)
SED 412/SED 512. Technology Foundations for Teaching Math and Science (3)
SED 413/SED 513. Inquiry in Science and Science Education (3)
Select one adolescent psychology course from below:
HDFS 313. Adolescent Development (4)
TCE 412. Learning Styles and Needs in Adolescence (2)
TCE 512. Psychology of the Adolescent (3)

Practicum Experience

Select 3 or more credits involving middle and/or high school experience—this must total 60 hours or more of classroom experience:

SED 406. Projects: Fall Classroom Experience (1–3) *(Enrollment by permission of instructor)*
SED 409. Field Practicum: Science and Mathematics (3)
TCE 409. Practicum Experience (2–4)

PRE-EDUCATION BIOLOGY OPTION

Students must also complete additional courses from *at least one* of the specific tracks below to total 21 credits.

Chemistry Track (Middle and High School Endorsement)

Choose at least 6 credits from below:

BB 493. Biochemistry Laboratory (3)
CH 324. Quantitative Analysis (4)
CH 390. Environmental Chemistry (3)
CH 440. Physical Chemistry (3)

Integrated Science Track (Middle and High School Endorsement) (11–12 credits)

Choose two of the following courses:

GEO 201. *Physical Geology (4)
GEO 202. *Earth Systems Science (4)
GEO 203. *Evolution of Planet Earth (4)
Choose one of the following courses:
ATS 210. Introduction to Atmospheric Sciences (3)
GEO 201, GEO 202 or GEO 203 if not taken above
GEO 323. ^Climatology (4)
OC 331. Introduction to Oceanography (3)

Note: Courses used to satisfy the Pre-Education Biology option requirements may only be used to satisfy the additional upper-division College of Science courses in the Biology major.

MICROBIOLOGY (BS, HBS)

To receive the **BS degree in Microbiology**, a student must complete all university baccalaureate core requirements plus departmental requirements included in the list below.

- Majors must have 36 credits in microbiology with a minimum GPA of 2.00.
- Research (MB 401), Thesis (MB 403), and Reading and Conference (MB 405) cannot account for more than 3 of the required 36 microbiology credits.
- Special Projects (MB 406) can account for an additional 3 microbiology credits.
- Additional credits in these subjects will count toward elective credits.
- All required science courses must be taken for a grade.
- CH 324 may be taken with S/U grading; however, if taken S/U, the student will not receive a chemistry minor.
- 22 credits must come from the approved 400-level microbiology courses; to include MB 490 (2 credits) and 2 credits from 400-level laboratory courses.

Freshman Year (45)

BI 211, 212, 213. *Principles of Biology (4,4,4)
CH 231, CH 232, CH 233. *General Chemistry (4,4,4)
and CH 261, CH 262, CH 263.
*Laboratory for Chemistry 231, 232, 233 (1,1,1)

MB 110. Orientation to Microbiology (1)
MTH 251. *Differential Calculus (4)
MTH 252. Integral Calculus (4)
or MTH 268. Mathematical Ideas in Biology (4)
Fitness (3)
Speech (3)
Writing I (3)

Sophomore Year (46)

BI 314. Cellular and Molecular Biology (4)
CH 331, CH 332. Organic Chemistry (4,4)
CH 337. Organic Chemistry Laboratory (4)
MB 302. General Microbiology (3)
MB 303. General Microbiology Laboratory (2)
PH 201, PH 202, PH 203. *General Physics (5,5,5)
ST 351. Introduction to Statistical Methods (4)
Electives (3)
Writing II (3)

Junior Year (44)

BB 450. General Biochemistry (4)
BB 451. General Biochemistry (3)
CH 324. Quantitative Analysis (4)
MB 310. Bacterial Molecular Genetics (3)
MB 311. ^Molecular Microbiology Lab: A Writing Intensive Course (3)
MB 312. Bacterial Physiology and Metabolism (3)
Perspectives (15)
Synthesis (6)
Electives (3)

Senior Year (45)

MB 490. Microbiology Capstone Experience (2)

Select 20 credits from the approved 400-level microbiology courses below (2 credits of which must come from 400-level laboratory courses):

MB 401. Research (1–16)
MB 405. Reading and Conference (3)
MB 406. Special Projects (2–3)
MB 407. Seminar (1)
MB 410. Occupational Internship (3)
MB 416. Immunology (3)
MB 417. Immunology Laboratory (2)
MB 420. Microbial Genomes, Biogeochemistry, and Diversity (3)
MB 430. Bacterial Pathogenesis (3)
MB 434. Virology (3)
MB 435. Pathogenic Microbes Laboratory (2)
MB 440. Food Microbiology (3)
MB 441. Food Microbiology Laboratory (2)
MB 448. Microbial Ecology (3)
MB 456. Microbial Genetics and Biotechnology (3)
MB 479. Fermentation Microbiology (3)
MB 480. General Parasitology (3)
MB 491. Fish Diseases in Conservation Biology and Aquaculture (4)
MB 499. Special Topics (2)

Total=180

Note: Microbiology majors planning advanced professional training in medicine, should consult a pre-medical, clinical lab science or other appropriate advisor.

ZOOLOGY (BA, BS, HBA, HBS)

All students majoring in zoology are required to take a common core of courses.

Baccalaureate Core Courses (33 total credits)**Zoology Core Courses****Non-Biological Sciences Requirements (52 credits)**

BB 450, BB 451. General Biochemistry (4,3)
CH 231, CH 232, CH 233. *General Chemistry (4,4,4)
and CH 261, CH 262, CH 263.
*Laboratory for Chemistry 231, 232, 233 (1,1,1)
or an acceptable chemistry substitute
CH 331, CH 332. Organic Chemistry (4,4)
MTH 251. *Differential Calculus (4)
MTH 252. Integral Calculus (4)
PH 201, PH 202. *General Physics (5,5)
ST 351. Introduction to Statistical Methods (4)

Biological Sciences Requirements (40 credits)

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)
BI 311. Genetics (4)
BI 314. Cell and Molecular Biology (4)
BI 370. Ecology (3)
BI 445. Evolution (3)
Z 361. Invertebrate Biology (3)
Z 362. Invertebrate Biology Lab (2)
Z 371. Vertebrate Biology (3)
Z 372. Vertebrate Biology Lab (2)

Z 430. Principles of Physiology (4)
or Z 431. Vertebrate Physiology (4)
or Z 432. Vertebrate Physiology (4)

Writing Intensive Course (WIC) (3 credits)

Choose one of the following:

BI 371. ^Ecological Methods (3)
BI 388. ^Special Topics in Biology (3)
HSTS 415. ^Theory of Evolution and Foundation of Modern Biology (4)
HSTS 417. ^History of Medicine (4)
HSTS 419. ^Studies in Scientific Controversy: Methods and Practices (4)
HSTS 422. ^*Historical Studies of Science and Politics (4)
HSTS 425. ^History of the Life Sciences (4)
HSTS 437. ^History of Animals in Science (4)

Biological Science Electives (18 credits)

Choose upper-division biological sciences courses in consultation with your advisor. These must be approved by your advisor.

Required Courses:

Choose from the following course selections to reach a total of 18 credits.

Cell/Molecular area (6–9):

BI 358. Symbioses and the Environment (3)
BI 460. Cell Biology (3)
BI 461. Cell Biology Lab (2)
MB 302. General Microbiology (3)
MB 303. General Microbiology Lab (2)
MB 416. Immunology (3)
MB 420. Microbial Genomes, Biogeochemistry, and Diversity (3)
Z 425. Embryology and Development (5)
Z 440. Insect Physiology (3)

Organismal/Physiology area (6–9):

BI 350. Animal Behavior (3)
or Z 350. Animal Behavior (3)
BOT 321. Plant Systematics (4)
FW 311. Ornithology (3)
FW 315. Ichthyology (3)
FW 317. Mammalogy (3)
Z 315. Dinosaur Biology (3)
Z 365. Biology of Insects (4)
Z 422. Comparative Anatomy (5)
Z 423. Environmental Physiology (4)
Z 425. Embryology and Development (5)
Z 430. Principles of Physiology (4)
or Z 431. Vertebrate Physiology (4)
or Z 432. Vertebrate Physiology (4)
Z 440. Insect Physiology (3)
Z 473. Herpetology (3)
Z 474. Systematic Herpetology (2)
Z 477. Aquatic Entomology (4)

Ecology/Evolution/Conservation Biology areas (6–9):

BOT 341. Plant Ecology (4)
ENT 420. Insect Ecology (3)
HSTS 415. *Theory of Evolution and Foundation of Modern Biology (4)
Z 351. Marine Ecology (3)
Z 352. Marine Ecology Lab (2)
Z 427. Paleobiology (3)
Z 464. Marine Conservation Biology (3)
Z 477. Aquatic Entomology (4)
Z 481. Biogeography (3)

Electives (35 credits)**Total Credits for BS in Zoology=180****PRE-VETERINARY MEDICINE OPTION**

ANS 121. Introduction to Animal Science (4)
 ANS 311. Principles of Animal Nutrition (3)
 CH 337. Organic Chemistry Laboratory (4)
 MB 302. General Microbiology (3)
 MB 303. General Microbiology Laboratory (2)
 PH 203. *General Physics (5)
 VMB 110. Preveternary Medicine (1)
 (Recommended)
 Z 410. Occupational Internship (at least 3 credits)
 or relevant experience

Total=25**UNDERGRADUATE MINORS****BIOLOGY MINOR**

The minor in Biology includes a required introductory biology sequence with a chemistry prerequisite or corequisite (BI 211, BI 212, BI 213, *Principles of Biology), a required course in cell and molecular biology (BI 314) and 13 or more credits of upper-division courses offered under the elective areas listed below. Equivalent courses taken at other institutions may be substituted. Any substitutions must be approved by the Biology Program office. **No upper-division course used to satisfy a major requirement may be used to fulfill the physiology, ecology and systematics, evolution, or genetics elective areas below.**

Required (16)

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)

BI 314. Cell and Molecular Biology (4)

Electives:

Choose one course in each of the following subject areas:

Physiology:

BOT 331. Plant Physiology (4)
 Z 423. Environmental Physiology (4)
 Z 425. Embryology and Development (5)
 Z 430. Principles of Physiology (4)
 Z 431. Vertebrate Physiology (4)
 Z 432. Vertebrate Physiology (4)

Ecology and Systematics:

BI 370. Ecology (3)
 BOT 341. Plant Ecology (4)
 BOT 425. Flora of the Pacific Northwest (3)
 ENT 420. Insect Ecology (3)
 MB 448. Microbial Ecology (3)
 Z 351. Marine Ecology (3)
 Z 361. Invertebrate Biology (3)
 Z 365. Biology of Insects (4)
 Z 371. Vertebrate Biology (3)

Evolution:

BI 445. Evolution (3)
 HSTS 415. *^Theory of Evolution and Foundation of Modern Biology (4)
 Z 345. *Introduction to Evolution (3)

Genetics:

BI 311. Genetics (4)
 MB 310. Bacterial Molecular Genetics (3)
 MCB 530. Introduction to Population Genetic (3)

Total=29 or more credits**MICROBIOLOGY MINOR**

The Microbiology minor is designed for students from other majors who have an additional interest in microbiology.

Required Core

MB 302. General Microbiology (3)
 MB 303. General Microbiology Lab (3)
 MB 310. Bacterial Molecular Genetics (3)
 MB 311. ^Molecular Microbiology Lab: A Writing Intensive Course (3)
 MB 312. Bacterial Physiology and Metabolism (3)

Plus 13 additional credits of upper-division microbiology courses selected after consultation with the head advisor in the Department of Microbiology.

Two of the 13 credits must come from 400-level laboratory courses. Not more than 3 of the 13 upper-division credits can consist of MB 401, Research. Other blanket courses cannot be used to satisfy the minor requirement. All of these courses must be graded, not S/U.

Total=27**ZOOLOGY MINOR**

The Zoology minor is designed for students from other majors who have an additional interest in zoology. Students may be assigned a minor advisor in the Department of Zoology if they request. Completion of the minor is certified on the student's academic transcript.

Core Requirements

BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)
 Z 361, Z 362. Invertebrate Biology and Lab (3,2)
 Z 371, Z 372. Vertebrate Biology and Lab (3,2)

Add two or more courses from the following list:

BI 311. Genetics (4)
 BI 350. Animal Behavior (3)
 or Z 350. Animal Behavior (3)
 BI 370. Ecology (3)
 BI 445. Evolution (3)
 BI 460. Cell Biology (3)
 Z 351. Marine Ecology (3)
 Z 365. Biology of Insects (4)
 Z 422. Comparative Anatomy (5)
 Z 423. Environmental Physiology (4)
 Z 425. Embryology and Development (5)
 Z 427. Paleobiology (3)
 Z 430. Principles of Physiology (4)
 or Z 431. Vertebrate Physiology (4)
 or Z 432. Vertebrate Physiology (4)
 Z 440. Insect Physiology (3)
 Z 473. Herpetology (3)
 Z 477. Aquatic Entomology (4)

GRADUATE MAJORS**BIOCHEMISTRY AND BIOPHYSICS (MA, MS, PhD, MAIS)****Graduate Areas of Concentration**
Biochemistry, biophysics

The Department of Biochemistry and Biophysics offers graduate work leading to the Master of Science, Master of Arts, and Doctor of Philosophy degrees. Most graduate students are admitted for study toward the PhD.

The PhD program requires course work in biochemistry and biophysics, passing written and oral examinations, participating in the departmental seminar program, and research leading to a doctoral thesis. Although most students in the department receive financial support in the form of research assistantships, all students are expected to participate to a limited amount in the teaching program of the department, regardless of the source of support. In general, financial support is provided for PhD candidates only.

MICROBIOLOGY (MA, MS, PhD)**Graduate Areas of Concentration**
Environmental microbiology, food microbiology, genomics, immunology, microbial ecology, microbial evolution, parasitology, pathogenic microbiology, virology

The Department of Microbiology offers graduate programs leading to the Master of Science, Master of Arts, and Doctor of Philosophy degrees. Major fields of study are diverse and include basic and applied aspects of virology and bacteriology; immunology and pathogenic microbiology; environmental and applied microbiology, and microbial evolution. Students may minor in a variety of related disciplines in the life sciences, such as molecular and cellular biology and biochemistry. Integrated minors are often selected in order to allow students to develop a program that best serves their needs.

The principal objectives of the graduate major in Microbiology are completion of a comprehensive research project and preparation of a thesis. Student programs and research projects are developed with the major professor and are subject to approval by a committee of graduate faculty members. Microbiology research facilities are excellent and well-equipped.

For more information, write to Jerri Bartholomew, Professor, Department of Microbiology, 220 Nash Hall, OSU, Corvallis OR 97331-3804 or email: jerri.bartholomew@oregonstate.edu.

Students in the Microbiology Graduate Program are required to take the following core sequence of courses during their first year of enrollment in the program:

GRAD 520. Responsible Conduct of Research (1)

MB 511. Scientific Skills (1)

MB 512. Highlights of Microbiology (1)

MB 513. Microbial Systems (3)

ZOOLOGY (MA, MS, PhD)

Graduate Areas of Concentration

Behavioral ecology, behavioral endocrinology, cell biology, chemical ecology, conservation biology, developmental biology, evolutionary biology, genetics, genomics, host-microbe interactions, marine ecology, paleontology, physiology, population biology

The Department of Zoology offers graduate work leading toward the Master of Arts, Master of Science, and Doctor of Philosophy degrees in all areas of biology ranging from molecular to community levels.

At present there are active research programs involving graduate students in the study of comparative immunobiology and pathology; cellular interactions and tissue differentiation; neuronal development; cytogenetics; behavioral biology at the neurophysiological, endocrinological, and ecological levels; environmental physiology; vertebrate functional morphology; reproductive biology; natural products chemistry; marine biology; physiologic and biochemical adaptation; genetics and evolution of populations; experimental marine, terrestrial, and freshwater population and community ecology; biodiversity and conservation biology.

Research is conducted in laboratories on campus, at the Malheur Field Station in southeastern Oregon, at the Hatfield Marine Science Center in Newport, the H.J. Andrews Experimental Forest, and in natural areas of the Cascade Mountains and Willamette Valley. Students also have entered into cooperative research programs in other departments, with the Oregon Health and Science University in Portland, and with the Primate Research Center in Beaverton.

As part of their training, all students participate in the departmental seminar program, and doctoral students spend at least one year as teaching assistants. Most students are supported by graduate teaching or research assistantships. Students are expected to have broad competency in biology. The master's program leads to a thesis or research report (nonthesis option) on a specific problem; the PhD program emphasizes independent thesis research on a major topic at the forefront of the chosen field.

BIOCHEMISTRY AND BIOPHYSICS GRADUATE MINOR

Required (15)

BB 550, BB 551. General Biochemistry (4,3) or BB 590, BB 591, BB 592. Biochemistry (3,3,3)

Plus BB-related graduate level courses with BB graduate advisor approval (6–8)

Pre-approved Courses

BB 581. Biophysics (3)

BB 582. Biophysics (3)

BB 583. Biophysics (3)

BB 593. Biochemistry Laboratory (3)

BB 594. Biochemistry Laboratory (3)

BB 650. Selected Topics in Biochemistry and Biophysics: *Cell cycle and cancer* (3)

BB 650. Selected Topics in Biochemistry and Biophysics: *Protein evolution* (3)

BB 651. Selected Topics in Biochemistry and Biophysics: *Epigenetics* (3)

BB 651. Selected Topics in Biochemistry and Biophysics: *Macromolecular Interactions* (3)

BB 651. Selected Topics in Biochemistry and Biophysics: *Membrane Biochemistry* (3)

BB 651. Selected Topics in Biochemistry and Biophysics: *Protein NMR Spectroscopy* (3)

BB 651. Selected Topics in Biochemistry and Biophysics: *Protein Homeostasis, Aging, Disease* (3)

BB 652. Selected Topics in Biochemistry and Biophysics: *Oxidative Stress* (3)

BB 652. Selected Topics in Biochemistry and Biophysics: *Protein X-ray Crystallography* (3)

BB 654. Proteins (3)

MCB 525. Techniques in Molecular and Cellular Biology (3)

MCB 554. Genome Organization, Structure, and Maintenance (4)

MCB 555. Genome Expression and Regulation (4)

MCB 556. Cell and Developmental Biology (4)

MICROBIOLOGY GRADUATE MINOR

For more details, see the departmental advisor.

ZOOLOGY GRADUATE MINOR

For more details, see the departmental advisor.

BIOCHEMISTRY AND BIOPHYSICS COURSES

BB 100. THE MOLECULES OF LIFE (2).

A brief introduction to molecular biology for nonspecialists. Subjects vary, but have included biochemical basis of the origin of life, biochemical genetics, biochemical aspects of memory and behavior, mutagenesis, bioenergetics and nutrition, and environmental biochemistry.

BB 111. INTRODUCTION TO BIOCHEMISTRY AND BIOPHYSICS RESEARCH (1). Designed to introduce biochemistry and biophysics students to departmental research opportunities and advisors.

BB 317. ^SCIENTIFIC THEORY AND PRACTICE (3). Teaches students the practice of biological science. Topics cover scientific theory, communications, and critical evaluation. **CROSSLISTED** as BI 317. (Writing Intensive Course) **PREREQS:** (BI 213 or BI 213H) and/or equivalent.

BB 331. *INTRODUCTION TO MOLECULAR BIOLOGY (3). Course dealing with the molecular

basis of cellular function, with emphasis upon modern developments, and the foundation for practical applications of this knowledge. The course will involve the conceptual background necessary to appreciate the applications of molecular biology. Throughout the course opportunities will be given to discuss public policy issues and questions: What are the moral and practical problems that flow from identification of an individual as being at risk for a late-appearing genetic disorder, such as Huntington's disease or certain cancers? Does the scientific or public value of knowing the entire DNA sequence of the human genome justify a situation in which individual or small-scale research cannot be supported? What issues arise when the fruits of biological research, mostly publicly funded, are commercialized? Should a novel organism be patented? How can biotechnology be applied to environmental problems? (Bacc Core Course) **PREREQS:** (CH 122 or CH 202 or CH 222 or CH 225H or (CH 232 or CH 232H) or (CH 262 or CH 262H or CH 272))

BB 332. *MOLECULAR MEDICINE (3). Provides students an understanding of medical advances from a rapidly evolving molecular point of view. Advances in knowledge of the human genome arising from DNA sequencing efforts and major leaps in understanding of the regulating cellular growth and division are presented in an easy-to-understand fashion appropriate for students in all majors. Course discussions and assignments will cover implications of advances in molecular medicine from ethical, economic, technical and societal standpoints. The aim of the course is to present technical material in a way that non-scientists will understand and conversely to summarize ethical, economic, and philosophical considerations in a way that the scientists understand the implications of these technologies. (Bacc Core Course) **PREREQS:** Any biology course.

BB 350. ELEMENTARY BIOCHEMISTRY (4). Service course for students desiring a short introduction to biochemistry. Four lectures weekly. **PREREQS:** (CH 331 and CH 332*) and/or equivalent.

BB 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BB 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

BB 401. UNDERGRADUATE RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

BB 401H. UNDERGRADUATE RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

BB 403. THESIS (1-16). **PREREQS:** Departmental approval required.

BB 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

BB 405H. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

BB 407. BIOCHEMISTRY/BIOPHYSICS SEMINAR (1-16). Informal seminars presenting information about research problems and careers and research programs on campus in biochemistry or biophysics. This course is repeatable for a maximum of 99 credits.

BB 407H. BIOCHEMISTRY/BIOPHYSICS SEMINAR (1-16). Informal seminars presenting information about research problems and careers and research programs on campus in biochemistry or biophysics. This course is repeatable for a maximum of 99 credits. **PREREQS:** Honors College approval required.

BB 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

BB 450. GENERAL BIOCHEMISTRY (4). Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551, three lectures. **PREREQS:** (CH 332 or CH 336) and BB 450 and BB 451 must be taken in order.

BB 450H. GENERAL BIOCHEMISTRY (4). Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551, three lectures. **PREREQS:** (CH 332 or CH 336) and BB 450 and BB 451 must be taken in order. Honors College approval required.

BB 451. GENERAL BIOCHEMISTRY (3). Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551, three lectures. **PREREQS:** (BB 450 or BB 450H) and BB 450 and BB 451 must be taken in order.

BB 451H. GENERAL BIOCHEMISTRY (3). Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551, three lectures. **PREREQS:** (BB 450 or BB 450H) and BB 450 and BB 451 must be taken in order. Honors College approval required.

BB 481. BIOPHYSICS (3). Sequence professional course covering quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics. **PREREQS:** CH 442

BB 482. BIOPHYSICS (3). Sequence professional course covering quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics. **PREREQS:** (BB 481 and CH 442)

BB 483. BIOPHYSICS (3). Sequence professional course covering quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics. **PREREQS:** (BB 482 and CH 442)

BB 490. BIOCHEMISTRY (3). Sequence professional course to meet the requirements of majors in biochemistry and biophysics. **PREREQS:** (CH 332 or CH 336) and BB 490, BB 491, BB 492 must be taken in order.

BB 491. BIOCHEMISTRY (3). Sequence professional course to meet the requirements of majors in biochemistry and biophysics. **PREREQS:** (BB 490 or BB 590)

BB 492. BIOCHEMISTRY (3). Sequence professional course to meet the requirements of majors in biochemistry and biophysics. **PREREQS:** BB 491 and CH 441. Should concurrently enroll in CH 440 and CH 441 and CH 442.

BB 493. BIOCHEMISTRY LABORATORY (3). Laboratory course to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab/rec. **PREREQS:** Need not be taken in sequence.

BB 494. BIOCHEMISTRY LABORATORY (3). Laboratory to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab. **PREREQS:** Need not be taken in sequence.

BB 496. BIOCHEMISTRY LABORATORY MOLECULAR MODELING (1). A computer-based course to introduce students from biochemistry and related fields to the fundamentals of protein structure and to hands-on manipulation of three-dimensional images. **COREQS:** BB 493

BB 497. BASIC NUCLEIC ACID AND PROTEIN SEQUENCE ANALYSIS (1). Computer-based course teaching students how to analyze nucleic acid and protein sequences. **COREQS:** BB 494

BB 499. SPECIAL TOPICS (3).

BB 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

BB 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

BB 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

BB 507. SEMINAR (1-2). Section 1: Descriptions of campus research programs in biochemistry and biophysics, 1 credit fall. Graded P/N. Student presentations of current research literature, 1 credit winter and spring. Should be taken by all entering departmental graduate students. Section 2: Presentation of departmental research seminar, 2 credits any term. PhD candidates in biochemistry and biophysics present a departmental research seminar in the third or fourth year. One registers in the term the seminar is presented. This course is repeatable for a maximum of 16 credits.

BB 550. GENERAL BIOCHEMISTRY (4). Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551 and BB 452, three lectures. **PREREQS:** CH 332, BB 550, BB 551 must be taken in order.

BB 551. GENERAL BIOCHEMISTRY (3). Sequence course for students with a limited background in physical chemistry. BB 450/BB 550, three lectures and one recitation. BB 451/BB 551 and BB 452, three lectures. **PREREQS:** BB 550

BB 581. BIOPHYSICS (3). Sequence professional course covering quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics. **PREREQS:** CH 442

BB 582. BIOPHYSICS (3). Sequence professional course covering quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics. **PREREQS:** BB 581 and CH 442

BB 583. BIOPHYSICS (3). Sequence professional course covering quantitative properties of biological systems and biological phenomena using concepts derived from mathematics and physics. **PREREQS:** BB 582 and CH 442

BB 590. BIOCHEMISTRY (3). Sequence professional course to meet the requirements of majors in biochemistry and biophysics. **PREREQS:** BB 590, BB 591, BB 592 must be taken in order.

BB 591. BIOCHEMISTRY (3). Sequence professional course to meet the requirements of majors in biochemistry and biophysics. **PREREQS:** BB 590 and/or BB 490

BB 592. BIOCHEMISTRY (3). Sequence professional course to meet the requirements of majors in biochemistry and biophysics. **PREREQS:** CH 591. Concurrent registration in CH 440 and CH 441 and CH 442 is recommended but not required.

BB 593. BIOCHEMISTRY LABORATORY (3). Laboratory course to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab/rec. **PREREQS:** Need not be taken in sequence.

BB 594. BIOCHEMISTRY LABORATORY (3). Laboratory to accompany BB 450, BB 451 or BB 490, BB 491, BB 492. Lec/lab. **PREREQS:** Need not be taken in sequence.

BB 596. BIOCHEMISTRY LABORATORY MOLECULAR MODELING (1). A computer-based course to introduce students from biochemistry and related fields to the fundamentals of protein structure and to hands-on manipulation of three-dimensional images. **COREQS:** BB 593

BB 597. BASIC NUCLEIC ACID AND PROTEIN SEQUENCE ANALYSIS (1). Computer-based course teaching students how to analyze nucleic acid and protein sequences. **COREQS:** BB 594

BB 599. SPECIAL TOPICS (3).

BB 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

BB 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

BB 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

BB 607. SEMINAR (1-2). Section 1: Descriptions of campus research programs in biochemistry and biophysics, 1 credit fall. Graded P/N. Student presentations of current research literature, 1 credit winter and spring. Should be taken by all entering departmental graduate students. Section 2: Presentation of departmental research seminar, 2 credits any term. PhD candidates in biochemistry and biophysics present a departmental research seminar in the third or fourth year. One registers in the term the seminar is presented. This course is repeatable for a maximum of 16 credits.

BB 650. SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS (3). Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include enzyme kinetics, cell cycle and cancer, neurochemistry, oxidative stress, cell adhesion and motility. Most courses offered alternate years. This course is repeatable for a maximum of 18 credits.

BB 651. SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS (3). Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include cell surfaces, enzyme kinetics, metabolism, neurochemistry, trace element metabolism, biological oxidations, and bioenergetics. Most courses offered alternate years. This course is repeatable for a maximum of 18 credits.

BB 652. SELECTED TOPICS IN BIOCHEMISTRY AND BIOPHYSICS (3). Nonsequence courses designed to acquaint student with current research in biochemistry and biophysics. Courses include enzyme kinetics, metabolism, neurochemistry, trace element metabolism, biological oxidations, and bioenergetics. Most courses offered alternate years. This course is repeatable for a maximum of 18 credits.

BB 654. PROTEINS (3). Advanced treatment of protein structure and function. **PREREQS:** (BB 451 or BB 551) and (BB 492 or BB 592) or equivalent

BB 662. HORMONE ACTION (3). Mechanisms of action of peptide and steroid hormones and related compounds at the cellular level. **CROSSLISTED** as ANS 662, MCB 662, PHAR 662. **PREREQS:** BB 451 or BB 551 or BB 492 or BB 592

BB 664. PHYSICAL METHODS IN BIOPHYSICS AND BIOCHEMISTRY (3). Important techniques for studying biopolymers and biological systems. Not offered every year. **PREREQS:** BB 483 or BB 583

■ BIOLOGY COURSES

BI 101. *GENERAL BIOLOGY (4). Diversity of life, ecology, population biology, and human environmental impacts. An introductory course in the principles and methods of biology, intended for majors in fields other than the biological sciences. Lec/lab/rec. (Bacc Core Course)

BI 102. *GENERAL BIOLOGY (4). Mendelian genetics, molecular genetics, human genetics, genetic engineering, evolution, and behavior. An introductory course in the principles and methods of biology, intended for majors in fields other than the biological sciences. Lec/lab. (Bacc Core Course)

BI 103. *GENERAL BIOLOGY (4). Human anatomy and physiology, and human diseases. An introductory course in the principles and methods of biology, intended for majors in fields other than the biological sciences. Lec/lab. (Bacc Core Course)

BI 107. HEALTH PROFESSIONS: DENTAL (1). Discussion of matters relating to a dental career. Includes application procedures, the importance of various requirements, admissions, professional school curricula, financing education and related matters. Speakers are included. Graded P/N.

BI 109. HEALTH PROFESSIONS: MEDICAL (1). Discussion of matters relating to a medical career. Includes application procedures, the importance of various requirements, admissions, professional school curricula, financing education, and related matters. Speakers are included. Graded P/N.

BI 111. INTRODUCTION TO MARINE LIFE IN THE SEA (1). A field-focused learning experience, this inquiry-based course is a basic overview of the marine life and environment on the Oregon coast, including rocky shores, sandy beaches, mud flats, bays, estuaries, and watersheds. Through lectures, lab and field experiences, students will examine important marine organisms in their habitat; exploring their ecological niches and adaptations to their environment along the Oregon coast. Graded P/N. **CROSSLISTED** as FW 111. **PREREQS:** High school biology and chemistry.

BI 150. INTRODUCTION TO MARINE BIOLOGY (4). Survey of marine organisms, evolution of marine life, habitats and communities of ocean zones, productivity and marine resources along the Oregon coast. Hands-on course explores unique adaptations, diversity and ecological importance of organisms in the marine environment. Field trips. Lec/lab. Taught at Hatfield Marine Science Center.

BI 198. BIOLOGY FRESHMAN SEMINAR (1). Presentations made by eminent teachers and researchers who will discuss various aspects of biology. Open to first-year students and sophomores in biology, undeclared science, and UESP. Graded P/N.

BI 199. SELECTED TOPICS (1-8). This course is repeatable for a maximum of 8 credits.

BI 199H. SELECTED TOPICS (1-8). This course is repeatable for a maximum of 8 credits. **PREREQS:** Honors College approval required.

BI 211. *PRINCIPLES OF BIOLOGY (4). Origins of life, energy transformations, plant and animal diversity. Lec/lab. (Bacc Core Course) **PREREQS:** For life science majors and pre-professional students.

BI 211H. *PRINCIPLES OF BIOLOGY (4). Origins of life, energy transformations, plant and animal physiology. Lec/lab. (Bacc Core Course) **PREREQS:** For life science majors and pre-professional students. Honors College approval required.

BI 212. *PRINCIPLES OF BIOLOGY (4). Cell biology, organ systems, plant and animal physiology. Lec/lab. (Bacc Core Course) **PREREQS:** (CH 121* or CH 201* or CH 221* or CH 224H* or ((CH 231* or CH 231H*) and (CH 261* or CH 261H* or CH 271*)) and for life science majors and pre-professional students.

BI 212H. *PRINCIPLES OF BIOLOGY (4). Cell biology, organ systems, plant and animal physiology. Lec/lab. (Bacc Core Course) **PREREQS:** (CH 121* or CH 201* or CH 221* or CH 224H* or ((CH 231* or CH 231H*) and (CH 261* or CH 261H* or CH 271*)) and for life science majors and pre-professional students. Honors College approval required.

BI 213. *PRINCIPLES OF BIOLOGY (4). Genetics, evolution, natural selection, and ecology. Lec/lab. (Bacc Core Course) **PREREQS:** (CH 121 or CH 201 or CH 221 or CH 224H or ((CH 231 or CH 231H) and (CH 261 or CH 261H or CH 271)) and for life science majors and pre-professional students.

BI 213H. *PRINCIPLES OF BIOLOGY (4). Genetics, evolution, natural selection, and ecology. Lec/lab. (Bacc Core Course) **PREREQS:** (CH 121 or CH 201 or CH 221 or CH 224H or ((CH 231 or

CH 231H) and (CH 261 or CH 261H or CH 271)) and for life science majors and pre-professional students. Honors College approval required.

BI 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BI 300. *PLAGUES, PESTS, AND POLITICS (3). Integration and interaction of agricultural and public health aspects of entomology in society and history. **CROSSLISTED** as ENT 300 and HORT 330. (Bacc Core Course)

BI 301. *HUMAN IMPACTS ON ECOSYSTEMS (3). Selected human impacts on ecosystems are examined in depth, including air quality, global climate change, management of agricultural and forest resources, and threats to biological diversity. The causes, approaches to investigating, and potential solutions for each issue are discussed from a scientific and social perspective. Adverse effects on ecosystems that result from each environmental problem are examined. (Bacc Core Course) **PREREQS:** One year of college biology or chemistry and junior standing required.

BI 302. BIOLOGY AND CONSERVATION OF MARINE MAMMALS (4). An examination of the biology of whales, pinnipeds, and other marine mammals, include general adaptations to a marine existence; systematics and biogeography; reproduction; diving physiology; communication and echolocation; feeding and migratory behavior; and marine mammal/human interactions, including conservation issues. **CROSSLISTED** as FW 302. Taught at Hatfield Marine Science Center, OR online through Ecampus. **PREREQS:** One year of introductory biology is mandatory.

BI 306. *ENVIRONMENTAL ECOLOGY (3). Biological, physical, and chemical nature of both natural and human-disturbed ecosystems. Topics include population and conservation ecology, toxins in the food chain and in the environment, forest decline and acid rain, eutrophication of terrestrial and aquatic ecosystems, and ecosystem restoration. Offered alternate years. (Bacc Core Course) (Writing Intensive Course) **PREREQS:** One year of college biology and chemistry.

BI 306H. *ENVIRONMENTAL ECOLOGY (3). Biological, physical, and chemical nature of both natural and human-disturbed ecosystems. Topics include population and conservation ecology, toxins in the food chain and in the environment, forest decline and acid rain, eutrophication of terrestrial and aquatic ecosystems, and ecosystem restoration. Offered alternate years. (Bacc Core Course) (Writing Intensive Course) **PREREQS:** One year of college biology and chemistry. Honors College approval required.

BI 311. GENETICS (4). Fundamentals of Mendelian, quantitative, population, molecular, and developmental genetics. Lec/rec. **PREREQS:** ((BI 211 or BI 211H) and (BI 212 or BI 212H) and (BI 213 or BI 213H))

BI 314. CELL AND MOLECULAR BIOLOGY (4). Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec. **PREREQS:** ((BI 211 or BI 211H) and (BI 212 or BI 212H) and (BI 213 or BI 213H) and (CH 331* or CH 334**))

BI 314H. CELL AND MOLECULAR BIOLOGY (4). Fundamental concepts of prokaryotic and eukaryotic cell biology. Emphasizes cell structure and function at the molecular level. Lec/rec. **PREREQS:** ((BI 211 or BI 211H) and (BI 212 or BI 212H) and (BI 213 or BI 213H) and (CH 331* or CH 334**)) and Honors College approval required.

BI 315. *MOLECULAR BIOLOGY LABORATORY (3). Laboratory experiments will introduce students to basic molecular biological techniques, such as restriction analysis of DNA, introduction of recombinant plasmids into bacteria, expression of foreign genes in bacteria, polymerase chain reaction and protein analysis. Lec/lab. (Writing Intensive Course) **PREREQS:**

Concurrent or prior registration in (BI 314 or BI 314H) or BB 331.

BI 317. ^SCIENTIFIC THEORY AND PRACTICE (3). Teaches students the practice of biological science. Topics cover scientific theory, communications, and critical evaluation. **CROSSLISTED** as BB 317. (Writing Intensive Course) **PREREQS:** One year of college biology.

BI 349. *BIODIVERSITY: CAUSES, CONSEQUENCES AND CONSERVATION (3). The earth's biodiversity is a precious inheritance that is threatened by an unprecedented extinction crisis. This course examines the evolutionary and ecological processes that have created this unique diversity of life, the importance of biodiversity in maintaining the earth's ecosystems, and methods used to conserve biodiversity for future generations. **CROSSLISTED** as Z 349. (Bacc Core Course)

BI 350. ANIMAL BEHAVIOR (3). Concepts of behavior; sensory receptors, internal mechanisms, governing responses; learning and habituation; social organization and communication. **CROSSLISTED** as Z 350. **PREREQS:** BI 211 and BI 212 and BI 213

BI 358. SYMBIOSES AND THE ENVIRONMENT (3). Overview of the diversity of mutualistic symbioses and their roles in the natural environment. Integrative approach, from ecosystem to molecule, to the examination of certain key mutualisms. Lec. Offered alternate years. **PREREQS:** BI 211 and BI 212 and BI 213 and (CH 123 or (CH 233 or CH 233H) and (CH 263 or CH 263H))

BI 370. ECOLOGY (3). The study of interactions between organisms and their biotic and abiotic environments at the population, community, ecosystem, and biosphere levels of organization. **PREREQS:** BI 211 and BI 212 and BI 213

BI 371. ^ECOLOGICAL METHODS (3). Experimental design, data collection, analysis and synthesis in ecological studies; local ecosystems emphasized. May have field trip fee. Lec/lab. (Writing Intensive Course) **PREREQS:** (BI 370 or BI 370H)

BI 385. ^EMERGING INFECTIOUS DISEASES AND EPIDEMICS (3). Emerging and reemerging infectious disease is a contemporary global issue of great concern. To understand and evaluate the issue, the course covers germ theory, disease history and ecology, microbial pathogenesis and the immune response, historic plagues, and the biological, environmental, population and social changes that contribute to disease emergence. (Writing Intensive Course) **CROSSLISTED** as MB 385 **PREREQS:** BI 211 and BI 212 and BI 213

BI 388. ^SPECIAL TOPICS IN BIOLOGY (3). Studies of contemporary subjects of interest and importance in biology. (Writing Intensive Course) This course is repeatable for a maximum of 15 credits. **PREREQS:** One year of college biology or departmental approval required.

BI 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Requirements vary. Consult with department.

BI 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

BI 401H. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

BI 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

BI 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

BI 405H. READING AND CONFERENCE (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

BI 407. SEMINAR (1).

Departmental seminar. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

BI 407H. SEMINAR (1).

Departmental seminar. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required. Honors College approval required.

BI 410. INTERNSHIP (1-16).

Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

BI 420. *VIRUSES IN MODERN SOCIETY (3).

Impact of viruses on modern civilization. Molecular mechanisms of viral infectivity. Approaches to the prevention and cure of viral diseases. Role of viruses in agriculture and industry. Offered alternate years. (Bacc Core Course) **PREREQS:** (BI 311 or BI 314 or BI 314H)

BI 421. AQUATIC BIOLOGICAL INVASIONS (4).

An overview of the background, theory, evolution, ecology, politics and conservation of invasions by introduced species in aquatic environments. Taught at Hatfield Marine Science Center. **CROSSLISTED** as FW 421. **PREREQS:** One year of university-level biology.

BI 435. *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK (3).

A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/lab/rec. **CROSSLISTED** as FES 435/FES 535, MCB 535, TOX 435/TOC 535. (Bacc Core Course)

BI 435H. *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK (3).

A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/lab/rec. **CROSSLISTED** as FES 435/FES 535, MCB 535, TOX 435/TOC 535. (Bacc Core Course) **PREREQS:** Honors College approval required.

BI 445. EVOLUTION (3). Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution. **PREREQS:** BI 311

BI 450. ^MARINE BIOLOGY (16).

A comprehensive lecture and laboratory introduction to the flora and fauna of the marine environment approached from the level of the organism to ecosystem. Ecological patterns and processes characteristic of marine communities will be emphasized. Taught at Hatfield Marine Science Center, Newport, OR. (Writing Intensive Course) **PREREQS:** BI 370 or equivalent. Departmental approval required. Admission to BI 450 is by application in fall of the academic year students plan to attend.

BI 460. CELL BIOLOGY (3).

In-depth study of eukaryotic cells with emphasis on relationships between structural components and functional processes within and between cells. Topics include nuclear and cytoplasmic compartments, organization and assembly of the cytoskeleton, and abnormal cell development. **PREREQS:** BB 350* or (BB 450* and BB 451*) and BI 211 and BI 212 and BI 213 and /or an equivalent one year introductory biology sequence.

BI 461. CELL BIOLOGY LABORATORY (2).

Laboratory experiments to study the structure and functions of eukaryotic cells. **PREREQS:** BI 460*

BI 499. SPECIAL TOPICS/SENIOR BIOLOGY MAJOR FIELD TEST (0).

A comprehensive, two-hour test to assess the biological knowledge of seniors in the Biology Program. A pass will be given to all students who complete the exam. Contact the Biology Program Office in 3029 Cordley Hall for more information. **PREREQS:** Biology majors with senior standing. Summer graduates register their final spring term. All other students register their final OSU term.

BI 499H. SPECIAL TOPICS (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

BI 501. RESEARCH AND SCHOLARSHIP (1-16).

This course is repeatable for a maximum of 16 credits.

BI 503. THESIS/DISSERTATION (1-16).

This course is repeatable for a maximum of 999 credits.

BI 505. READING AND CONFERENCE (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

BI 535. GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK (3).

A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/lab/rec. **CROSSLISTED** as FES 435/FES 535, MCB 535, TOX 435/TOX 535.

BI 545. EVOLUTION (3).

Formal analysis of genetic and ecological mechanisms producing evolutionary change; special topics include speciation, ecological constraints, adaptive radiations, paleontology, biogeography, the origin of life, molecular evolution, and human evolution. **PREREQS:** BI 311 or equivalent genetics course.

BI 560. CELL BIOLOGY (3).

In-depth study of eukaryotic cells with emphasis on relationships between structural components and functional processes within and between cells. Topics include nuclear and cytoplasmic compartments, organization and assembly of the cytoskeleton, and abnormal cell development. **PREREQS:** (BI 211, BI 212, BI 213) or an equivalent one year introductory biology sequence. BB 350* or (BB 450* and BB 451*)

BI 570. COMMUNITY STRUCTURE AND ANALYSIS (4).

Quantitative methods for the analysis of biotic communities, including community concepts, estimation of community composition parameters, theoretical aspects of multivariate methods of analyzing species-importance data, and overview of multivariate tools; hands-on computer analysis of data sets. Lec/lab. **PREREQS:** BI 370 and (ST 412 or ST 512) and calculus or equivalent.

BI 599. SPECIAL TOPICS (1-16).

This course is repeatable for a maximum of 16 credits.

BI 601. RESEARCH AND SCHOLARSHIP (1-16).

This course is repeatable for a maximum of 16 credits.

BI 670. COMMUNITY STRUCTURE AND ANALYSIS (4).

Quantitative methods for the analysis of biotic communities, including community concepts, estimation of community composition parameters, theoretical aspects of multivariate methods of analyzing species-abundance data, and overview of multivariate tools; hands-on computer analysis of data sets. Lec/lab. **PREREQS:** BI 370 and (ST 412 or ST 512) or equivalent and calculus.

BI 808. WORKSHOP (1-16).

This course is repeatable for a maximum of 16 credits.

■ MICROBIOLOGY COURSES**MB 110. ORIENTATION TO MICROBIOLOGY (1).**

Introduction of incoming microbiology students to college life with an emphasis on faculties, facilities,

services, and curricula in microbiology. Exposure to career opportunities in microbiology. Graded P/N.

MB 230. *INTRODUCTORY MICROBIOLOGY (4).

Microbiology as it affects our everyday lives. The impact of microorganisms on health, food/water sanitation, environment, industry, and genetic engineering. Lec/lab. (Bacc Core Course)

MB 230H. *INTRODUCTORY MICROBIOLOGY (4).

Microbiology as it affects our everyday lives. The impact of microorganisms on health, food/water sanitation, environment, industry, and genetic engineering. Lec/lab. (Bacc Core Course) **PREREQS:** Honors College approval required.

MB 299. SPECIAL TOPICS (1-16).

May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.

MB 299H. SPECIAL TOPICS (1-16).

May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

MB 302. GENERAL MICROBIOLOGY (3).

Emphasis on cytology, physiology, virology, growth and control of growth with coverage of the role of microorganisms in nature, in disease, and as useful tools. **PREREQS:** (CH 332 or CH 335) and (BI 212 or BI 212H) and (BI 213 or BI 213H)

MB 303. GENERAL MICROBIOLOGY LABORATORY (2).

Development of laboratory techniques; exercises designed to reinforce concepts covered in MB 302. MB 302 is a prereq that may be taken prior to or concurrently with MB 303. Lec/lab. **PREREQS:** MB 302* and two terms organic chemistry.

MB 310. BACTERIAL MOLECULAR GENETICS (3).

Introductory concepts of bacterial molecular genetics. Topics include DNA replication, mutation, DNA repair, DNA recombination, transposons, bacteriophages, genetic manipulation, and gene regulation. **PREREQS:** MB 302 and (BI 314 or BI 314H) and (BB 450 or BB 490) and (BB 451* or BB 491*)

MB 311. ^MOLECULAR MICROBIOLOGY LAB: A WRITING INTENSIVE COURSE (3).

Scientific writing, laboratory notebook composition, experimental design, and laboratory experiments in bacterial molecular biology. (Writing Intensive Course) **PREREQS:** ((MB 303 or MB 303H) and MB 310*)

MB 312. BACTERIAL PHYSIOLOGY AND METABOLISM (3).

Molecular structure and function, macromolecular assembly, energy production and use, and cellular growth. **PREREQS:** (MB 310 and BB 451) and BB 450

MB 330. *DISEASE AND SOCIETY (3).

Infectious disease has many effects on the development of society, and likewise, human interactions affect the development of disease. The course examines these interactions with a focus on the role of race, class, and economic status in the development of epidemics. (Bacc Core Course)

MB 385. ^EMERGING INFECTIOUS DISEASES AND EPIDEMICS (3).

Emerging and reemerging infectious disease is a contemporary global issue of great concern. To understand and evaluate the issue, the course covers germ theory, disease history and ecology, microbial pathogenesis and the immune response, historic plagues, and the biological, environmental, population and social changes that contribute to disease emergence. (Writing Intensive Course) **CROSSLISTED** as BI 385 **PREREQS:** BI 211 and BI 212 and BI 213

MB 399. SPECIAL TOPICS (1-16).

This course is repeatable for a maximum of 16 credits.

MB 399H. SPECIAL TOPICS (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

MB 401. RESEARCH (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MB 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MB 405. READING AND CONFERENCE (1-16). Conference: Instruction in microbiology. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MB 406. SPECIAL PROJECTS (1-16). Reading and Conference/Instructor in Microbiology. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MB 407. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

MB 410. OCCUPATIONAL INTERNSHIP (1-10). Supervised work experience at selected cooperating institutions, agencies, laboratories, clinics or companies. Maximum of 10 credits allowed but no more than 3 credits may be used to satisfy microbiology major requirement of 36 credits. Graded P/N. This course is repeatable for a maximum of 10 credits. **PREREQS:** Departmental approval required.

MB 416. IMMUNOLOGY (3). Basic theory and applications of immunochemistry, immunogenetics, and cellular immunology. Examination of immunologically related diseases. **PREREQS:** (BB 450 or BB 490)

MB 417. IMMUNOLOGY LABORATORY (2). Laboratory on the applications of current immunological techniques. **PREREQS:** ((MB 303 or MB 303H) and MB 416*) and MB 310

MB 420. MICROBIAL GENOMES, BIOGEOCHEMISTRY, AND DIVERSITY (3). A survey of microbial diversity from the earliest lifeforms to the modern role of bacteria and archaea in global biogeochemical cycles. Topics covered include molecular evolution, microbial genomics, biochemical diversity, and metabolic pathways that adapt cells to extreme environments. Particular emphasis is placed on marine systems, from photosynthesis in surface waters to life in the ocean crust. **PREREQS:** BB 451

MB 430. BACTERIAL PATHOGENESIS (3). Bacteria pathogenic for humans, emphasizing the structural, physiological and genetic mechanisms of pathogenesis. Role of the immune system in pathogenesis and protection. **PREREQS:** MB 302 and MB 310 and (BB 451 or BB 491)

MB 434. VIROLOGY (3). Properties of viruses, their biology and pathogenesis. Emphasis on viruses causing human disease. **PREREQS:** (BB 451 and MB 310*)

MB 435. PATHOGENIC MICROBES LABORATORY (2). Laboratory experiments to illustrate concepts presented in MB 430 and/or MB 434, focusing on pathogenic microorganisms. **PREREQS:** ((MB 303 or MB 303H) and MB 302 and (MB 430* or MB 434))

MB 440. FOOD MICROBIOLOGY (3). Role of microorganisms in food spoilage, infection, and intoxication; also basic principles in contamination control and germicidal treatment during processing, preparing, and distributing food for consumption. **PREREQS:** MB 302 and / or equivalent.

MB 441. FOOD MICROBIOLOGY LABORATORY (2). Laboratory techniques to accompany MB 440/MB 540. **PREREQS:** ((MB 303 or MB 303H) and MB 440*) and MB 302

MB 448. MICROBIAL ECOLOGY (3). A comparison of soil sediments and freshwater as microbial habitats. Discussion of the role of microorganisms in nutrient cycles, effects of microbial activity on plant and animal life. **PREREQS:** MB 302

MB 456. MICROBIAL GENETICS AND BIOTECHNOLOGY (3). General biology of natural, genetically engineered, and composite plasmids. Major topics include extrachromosomal

DNA replication, plasmid transmission, insertion elements, transposons, gene expression, and recombinant DNA vectors. Biotechnological applications and molecular genetic tools are emphasized. **PREREQS:** ((BB 351 or BB 451) and (BB 350 or BB 450) and MB 302 and MB 310*)

MB 479. FERMENTATION MICROBIOLOGY (3). An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. FST students need to take BB 350 and MB students need to take BB 450 for their respective majors. **CROSSLISTED** as FST 479/FST 579. **PREREQS:** ((BB 350 or BB 450) and MB 302)

MB 480. GENERAL PARASITOLOGY (3). Introduction to parasitology. The course emphasizes medical parasitology, but will cover a broad overview of parasitology, covering important groups and host/parasite relationships among all taxa from invertebrates to vertebrates, including mammals. **PREREQS:** BI 314 or BB 450 or equivalent or Z 361 or MB 302 or equivalent.

MB 490. MICROBIOLOGY CAPSTONE EXPERIENCE (2). Capstone experience for microbiology students to practice professional skills necessary to sustain a career in science. Students will work in teams to analyze research data and communicate this analysis, in addition to explore career opportunities and learn how to successfully compete for jobs. Graded P/N. **PREREQS:** MB 302 and junior or senior status.

MB 491. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE (4). Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. Lec/lab. **CROSSLISTED** as FW 491/ FW 591. **PREREQS:** 9 credits of upper-division fisheries or biology.

MB 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

MB 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

MB 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

MB 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MB 507. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 99 credits.

MB 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MB 511. SCIENTIFIC SKILLS (1). Foundational skills for success in graduate school. Students will also become familiar with ongoing research programs in three active programs in the Microbiology Program.

MB 512. HIGHLIGHTS OF MICROBIOLOGY (1). Designed for students to gain familiarity with the history of microbiology through reading, reviewing and writing about great papers in the field. Students also meet the Microbiology Program faculty and students, and learn about some of the research in the Microbiology Program through attending colloquium.

MB 513. MICROBIAL SYSTEMS (3). Presentation of a modern view of microbiology through the lens of microbes' influences on our planet's habitats and inhabitants. Discusses current research and the use of advanced techniques to illustrate how microbiology is contributing to many cross-disciplinary problems that can involve engineering, public health, sociology, ecology, geology, etc.

MB 516. IMMUNOLOGY (3). Basic theory and applications of immunochemistry, immunogenetics, and cellular immunology.

Examination of immunologically related diseases. **PREREQS:** BB 450 or BB 490

MB 517. IMMUNOLOGY LABORATORY (2). Laboratory on the applications of current immunological techniques. **PREREQS:** MB 303 and MB 310. Concurrent enrollment in MB 516.

MB 520. MICROBIAL GENOMES, BIOGEOCHEMISTRY, AND DIVERSITY (3). A survey of microbial diversity from the earliest lifeforms to the modern role of bacteria and archaea in global biogeochemical cycles. Topics covered include molecular evolution, microbial genomics, biochemical diversity, and metabolic pathways that adapt cells to extreme environments. Particular emphasis is placed on marine systems, from photosynthesis in surface waters to life in the ocean crust. **PREREQS:** BB 451 or BB 551

MB 530. BACTERIAL PATHOGENESIS (3). Bacteria pathogenic for humans, emphasizing the structural, physiological and genetic mechanisms of pathogenesis. Role of the immune system in pathogenesis and protection. **PREREQS:** MB 302 and MB 310 and (BB 451 or BB 491)

MB 534. VIROLOGY (3). Properties of viruses, their biology and pathogenesis. Emphasis on viruses causing human disease. **PREREQS:** MB 310 and BB 451

MB 540. FOOD MICROBIOLOGY (3). Role of microorganisms in food spoilage, infection, and intoxication; also basic principles in contamination control and germicidal treatment during processing, preparing, and distributing food for consumption. **PREREQS:** MB 302 or equivalent.

MB 541. FOOD MICROBIOLOGY LABORATORY (2). Laboratory techniques to accompany MB 440/MB 540. **PREREQS:** MB 540* and MB 302 and MB 303

MB 548. MICROBIAL ECOLOGY (3). A comparison of soil sediments and freshwater as microbial habitats. Discussion of the role of microorganisms in nutrient cycles, effects of microbial activity on plant and animal life. **PREREQS:** MB 302

MB 555. BIOLOGY OF THE PROKARYOTES (3). An integrative graduate course examining bacterial and archaeal life at different levels of biological organization, emphasizing current research and analysis of primary literature. The various life styles of prokaryotes are the common theme of the course. Topics include biofilms, cooperation and communication, development, stress responses, metabolic interactions involved in global nutrient cycling. Offered every even year in winter term. **PREREQS:** BB 450 and MB 310 and MB 312 or equivalent

MB 556. MICROBIAL GENETICS AND BIOTECHNOLOGY (3). General biology of natural, genetically engineered, and composite plasmids. Major topics include extrachromosomal DNA replication, plasmid transmission, insertion elements, transposons, gene expression, and recombinant DNA vectors. Relevance to Biotechnological applications and molecular genetic tools are emphasized. **PREREQS:** (BB 350 or BB 450) and (BB 314 or BB 451) and MB 302 MB 310*

MB 579. FERMENTATION MICROBIOLOGY (3). An introduction to industrial microbiology with a focus on the physiology of fermentation and use of microorganisms for the production of food ingredients, fermented foods, and beverages. **CROSSLISTED** as FST 479/FST 579. **PREREQS:** (BB 350 or BI 314) and MB 302

MB 580. GENERAL PARASITOLOGY (3). Introduction to parasitology. The course emphasizes medical parasitology, but will cover a broad overview of parasitology, covering important groups and host/parasite relationships among all taxa from invertebrates to vertebrates, including mammals. **PREREQS:** BI 314 or BB 450 or equivalent or Z 361 or MB 302 or equivalent.

MB 591. FISH DISEASES IN CONSERVATION BIOLOGY AND AQUACULTURE (4). Introduction to diseases of fish including pathogens important to aquaculture and ornamental industries as well as to wild fish populations and conservation programs. Lec/lab. **CROSSLISTED** as FW 491/ FW 591. **PREREQS:** 9 credits of upper-division fisheries or biology.

MB 599. SELECTED TOPICS (1-6). This course is repeatable for a maximum of 24 credits.

MB 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MB 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

MB 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MB 607. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 99 credits.

MB 610. INTERNSHIP (1-9). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

MB 668. MICROBIAL BIOINFORMATICS AND GENOME EVOLUTION (4). Theoretical and practical issues in microbial genome sequencing and annotation, with an emphasis on evolutionary theory and comparative analysis of microbial genome sequences. Metabolic prediction from genomes, with a population genetics perspective on comparative microbial genomics. Exploration of applications of genomics and allied tools to microbial populations, including metagenomics, metaproteomics, and metatranscriptomics.

MB 699. SPECIAL TOPICS (1-16). Lec/lab. This course is repeatable for a maximum of 16 credits.

■ ZOOLOGY COURSES

Z 315. DINOSAUR BIOLOGY (3). In-depth examination of our current understanding of dinosaur systematics, physiology, and ecology. Possible factors associated with dinosaur extinction (i.e., natural catastrophes, global climate change, diseases, etc.) will also be covered. Lec. **PREREQS:** Sophomore standing.

Z 331. HUMAN ANATOMY AND PHYSIOLOGY (3). Lecture course on structure and functions of the human body. Tissues, organ systems, homeostatic mechanisms, patho-physiology and pathomorphology. **PREREQS:** Z 331 is a prerequisite for Z 332 and Z 333.

Z 332. HUMAN ANATOMY AND PHYSIOLOGY (3). Lecture course on structure and functions of the human body. Tissues, organ systems, homeostatic mechanisms, patho-physiology and pathomorphology. **PREREQS:** Z 331

Z 333. HUMAN ANATOMY AND PHYSIOLOGY (3). Lecture course on structure and functions of the human body. Tissues, organ systems, homeostatic mechanisms, patho-physiology and pathomorphology. **PREREQS:** Z 332

Z 341. HUMAN ANATOMY AND PHYSIOLOGY LABORATORY (2). Dissection of preserved specimens and study of prepared human prosection materials. Physiology demonstrations illustrate functions of organ systems. F-skeletal muscular; W-neural; S-gastric, vascular, renal. Lab fee. Lab. **PREREQS:** Concurrent enrollment in Z 331

Z 342. HUMAN ANATOMY AND PHYSIOLOGY LABORATORY (2). Dissection of preserved specimens and study of prepared human prosection materials. Physiology demonstrations illustrate functions of organ systems. F-skeletal muscular; W-neural; S-gastric, vascular, renal. Lab fee. Lab. **PREREQS:** Concurrent enrollment in Z 332

Z 343. HUMAN ANATOMY AND PHYSIOLOGY LABORATORY (2). Dissection of preserved specimens and study of prepared human prosection materials. Physiology demonstrations illustrate functions of organ systems. F-skeletal muscular; W-neural; S-gastric, vascular, renal. Lab fee. Lab. **PREREQS:** Concurrent enrollment in Z 333

Z 345. *INTRODUCTION TO EVOLUTION (3). Elements of evolutionary theory; origin and history of life; evolutionary controversy; origins of species, sex, and humans. Lec. (Bacc Core Course)

Z 348. *HUMAN ECOLOGY (3). The impact of humans on the environment, emphasizing the political, sociological, and ecological consequences of human population growth. Topics of current critical importance will include global warming trends, destruction of the ozone layer, consequences of pollution, habitat destruction, the loss of biodiversity, and conservation biology. Lec. (Bacc Core Course)

Z 349. *BIODIVERSITY: CAUSES, CONSEQUENCES, AND CONSERVATION (3). The earth's biodiversity is a precious inheritance that is threatened by an unprecedented extinction crisis. This course examines the evolutionary and ecological processes that have created this unique diversity of life, the importance of biodiversity in maintaining the earth's ecosystems, and methods used to conserve biodiversity for future generations. **CROSSLISTED** as BI 349. (Bacc Core Course)

Z 350. ANIMAL BEHAVIOR (3). Concepts of behavior; sensory receptors, internal mechanisms governing responses; learning and habituation; social organization and communication. **CROSSLISTED** as BI 211 and BI 212 and BI 213

Z 351. MARINE ECOLOGY (3). Ecological interactions and principles in different marine habitats. Topics include the organisms (plants, invertebrates, vertebrates) found in major habitats and interactions between organisms. Habitats discussed include coral reefs, rocky shores, kelp forests, near-shore waters, open-ocean waters, and the deep sea. Emphasis is placed on how organism-organism interactions produce varying patterns of distribution, abundance, body size, diversity, stability, and succession. Lec. **PREREQS:** One year of biology. Z 351 may be taken alone or concurrently with Z 352.

Z 352. MARINE ECOLOGY LABORATORY (2). Laboratory and field exposure to many of the organisms and processes discussed in Z 351. Research projects provide students with the opportunity to experience the process by which information about marine ecology is obtained. Field trip fee. Lab fee. Lec/lab. **PREREQS:** Z 351*

Z 361. INVERTEBRATE BIOLOGY (3). Phylogeny of invertebrates; structure, function, life histories, evolution of aquatic and terrestrial species. Interdependence of form, ecology, physiology and behavior. Lec. **PREREQS:** ((BI 211 or BI 211H) and (BI 212 or BI 212H) and (BI 213 or BI 213H))

Z 362. INVERTEBRATE BIOLOGY LABORATORY (2). Morphology and anatomy of representative invertebrates introduced in Z 361; diversity within phyla. Study is by dissections and both microscopic and macroscopic examination; field trip fee. Lab fee. Lec/lab. **PREREQS:** ((BI 211 or BI 211H) and (BI 212 or BI 212H) and (BI 213 or BI 213H) and Z 361*)

Z 365. BIOLOGY OF INSECTS (4). Introduction to the study of insects, stressing the biological attributes responsible for the success and dominance of insects. Emphasis on taxonomy, morphology, behavior, ecology, and coevolutionary interrelationships. Lec/lab.

Z 371. VERTEBRATE BIOLOGY (3). Overview of vertebrate origins and phylogeny, structural and functional adaptations, behavior, and ecology. Lec. **PREREQS:** BI 211 and BI 212 and BI 213 and

may be taken alone or concurrently with Z 372.

Z 372. VERTEBRATE BIOLOGY LABORATORY (2). Classification, identification, and natural history of vertebrates. Includes laboratory examination of specimens and frequent field trips (fee charged) emphasizing Oregon fauna. Lab fee. **PREREQS:** BI 211 and BI 212 and BI 213 and Z 371*

Z 401. RESEARCH (1-16). Undergraduate research completed under faculty supervision. This course is repeatable for a maximum of 99 credits. **PREREQS:** Departmental approval required.

Z 403. THESIS (1-16). Undergraduate thesis, completed under faculty supervision. Required of honors students. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

Z 405. READING AND CONFERENCE (1-16). For undergraduates, to be arranged with individual faculty. Readings and discussions on topics of mutual interest. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

Z 407. SEMINAR (1-16). Undergraduate enrichment seminars, as offered by faculty. Graded P/N. This course is repeatable for a maximum of 16 credits.

Z 407H. SEMINAR (1-16). Undergraduate enrichment seminars, as offered by faculty. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

Z 410. OCCUPATIONAL INTERNSHIP (1-16). Practical experience working with professionals. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

Z 422. COMPARATIVE ANATOMY (5). Descriptive, experimental and historical approach to the study of evolution and anatomy of all organ systems of vertebrates. Laboratory emphasizes vertebrate developmental anatomy. Lec/lab. **PREREQS:** BI 211 and BI 212 and BI 213

Z 423. ENVIRONMENTAL PHYSIOLOGY (4). Comparative environmental physiology of vertebrates with emphasis on adaptations to such aspects of the physical environment as temperature, water, ions, and gases. Consideration given to interactions between physiology and environment that influence the local and geographic distribution of animals. Lec/rec. **PREREQS:** BI 211 and BI 212 and BI 213

Z 425. EMBRYOLOGY AND DEVELOPMENT (5). An integrated molecular, cellular and whole organism approach. Sequential embryonic events from gametogenesis through organogenesis. Discussion of experiments into mechanisms of these events; cellular interactions, pattern formation, regulation of gene expression, and cellular differentiation. Lab emphasizes descriptive vertebrate embryology with introduction to experimental methods. Lab fee. Lec/lab. **PREREQS:** BI 311 and (BI 314 or BI 314H) and Three years of biology.

Z 427. PALEOBIOLOGY (3). Considers those aspects of the fossil record of potential use to life scientists, including the following topics: community history, biogeographic history, rates of evolution (taxonomic, phyletic, cladogenetic, behavioral, quantum), species problem as viewed with fossils, coevolution, overall history of life, speciation mechanisms. Lec. **PREREQS:** BI 211 and BI 212 and BI 213

Z 430. PRINCIPLES OF PHYSIOLOGY (4). Concepts and mechanisms of physiology, especially membrane physiology, muscle function, sensory mechanisms, neural integration. First in the Z43X series, although courses may be taken in any order. Lec/rec. **PREREQS:** BI 211 and BI 212 and BI 213 and CH 332*

Z 431. VERTEBRATE PHYSIOLOGY (4).

Systems/concepts covered include the autonomic nervous system, digestion/metabolism, renal and osmoregulatory, endocrine and reproductive systems. Second in Z43X series, although courses may be taken in any order. Lec/rec. **PREREQS:** BI 211 and BI 212 and BI 213 and CH 332*

Z 432. VERTEBRATE PHYSIOLOGY (4).

Systems/concepts covered include blood, immune, lymphatic, cardiovascular, and pulmonary. Third in the Z43X series, although courses may be taken in any order. Lec/rec. **PREREQS:** BI 211 and BI 212 and BI 213 and CH 332*

Z 437. VERTEBRATE ENDOCRINOLOGY (4).

An exploration of vertebrate endocrinology that examines principles of hormone action, inter- and intracellular signaling mechanisms within endocrine axes, and comparative endocrine physiology, emphasizing concepts of homeostasis and methodologies for evaluating normal and pathological function. Students are provided multiple forums for class participation, in the form of scientific presentations and «mini-reports.» **PREREQS:** BI 314 or BI 314H and BI 314

Z 440. INSECT PHYSIOLOGY (3).

Fundamentals of insect physiology from the behavioral to the molecular level. Cellular physiology and hormonal control of molting, metamorphosis and reproduction. Overview of body functions: respiration, circulation, digestion, metabolism, and osmoregulation. Physiological basis of behavior: muscles and flight, structure and functions of the nervous system, sensory physiology and chemical communication. During the course the contributions of insect physiology to (1) an understanding of general physiological principles and (2) biorational methods of insect pest control are discussed. **PREREQS:** ENT 311 and (BI 211 or BI 211H or BI 213 or BI 213H) or instructor approval required.

Z 441. ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY (2).

Dissection of preserved specimens and study of prepared human prosection materials. Functions illustrated by physiology exercises. Organ systems emphasized: F-skeleto-muscular; W-neural; S-gastric, vascular, renal. Lab write-ups required. Lab fee. Lec/lab. **PREREQS:** Concurrent enrollment in Z 430 and Z 431 or Z 432.

Z 442. ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY (2).

Dissection of preserved specimens and study of prepared human prosection materials. Functions illustrated by physiology exercises. Organ systems emphasized: F-skeleto-muscular; W-neural; S-gastric, vascular, renal. Lab write-ups required. Lab fee. Lec/lab. **PREREQS:** Concurrent enrollment in Z 430 and Z 431 or Z 432

Z 443. ADVANCED HUMAN ANATOMY AND PHYSIOLOGY LABORATORY (2).

Dissection of preserved specimens and study of prepared human prosection materials. Functions illustrated by physiology exercises. Organ systems emphasized: F-skeleto-muscular; W-neural; S-gastric, vascular, renal. Lab write-ups required. Lab fee. Lec/lab. **PREREQS:** Concurrent enrollment in Z 430 and Z 431 or Z 432

Z 451. FUNCTIONAL ANATOMY OF THE HUMAN MUSCULAR SYSTEM (4).

In-depth dissection of the orientation, innervation, and functional significance of muscles and muscle groups. Topics include muscle identification, joint anatomy and variation of human form. Z 551 student expectations include vascularization and detailed joint anatomy. The laboratory component will consist of the dissection of the muscular anatomy of a human cadaver. Lab fee. Lec/lab. **PREREQS:** Z 331 and Z 332 and Z 333 and Z 341 and Z 342 and Z 343 and department approval required. Admission to Z 451/Z 551 is by application in spring of the academic year students plan to attend.

Z 453. ^SCIENTIFIC WRITING AND BEHAVIORAL OBSERVATIONS (3).

Students will be introduced to the writing style of scientific research papers in the context of reporting on behavioral observations. Lec/lab. (Writing Intensive Course)

Z 461. MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY (4).

Comparative survey of eight major invertebrate phyla and many lesser-known phyla. Areas of emphasis will be 1) invertebrate identification, 2) natural history (diversity, habitat, feeding, behavior), and 3) comparative anatomy (adaptive significance of morphological structures). Laboratories and field trips will strongly supplement lecture material. Lec/lab. Taught at Hatfield Marine Science Center. **PREREQS:** BI 211 and BI 212 and BI 213

Z 464. MARINE CONSERVATION BIOLOGY (3).

Lectures, group library research, and class debates on current issues regarding the conservation of biodiversity in the sea. Topics include overfishing, invasive species, eutrophication, marine pollution, and global warming, as well as means of addressing these threats. **CROSSLISTED** as FW 464/FW 564. **PREREQS:** (BI 370 or BI 370H) and / or equivalent. Seniors, postbacs, and graduate students only.

Z 473. HERPETOLOGY (3).

World families and distribution of amphibians and non-avian sauroptods; evolution, population biology, life histories, current literature. **PREREQS:** (BI 211 or BI 211H) and (BI 212 or BI 212H) and (BI 213 or BI 213H)

Z 474. SYSTEMATIC HERPETOLOGY (2).

A survey of the phylogenetic diversity of amphibians and reptiles of the United States. Identification through the use of keys will be stressed. Field trip fee. Lab fee. Lec/lab. **PREREQS:** One year of introductory biology and/or vertebrate biology.

Z 477. AQUATIC ENTOMOLOGY (4).

Biology, ecology, collection, and identification of aquatic insects. Not offered every year. **PREREQS:** Upper-division standing.

Z 481. BIOGEOGRAPHY (3).

Covers the principles on which biogeography is based, past and present, plus a historical account of changing biogeography from the past to the present. Marine and nonmarine aspects are dealt with, involving what is known concerning both plants and animals. Offered alternate years. **PREREQS:** Instructor approval required.

Z 495. DISEASE ECOLOGY (3).

An introduction to disease ecology—the study of disease processes in natural populations and communities. The course focuses on (I) the role parasites play in the ecology and evolution of animal populations, including humans; and (II) the relevance of ecological and evolutionary considerations in managing infectious diseases. **PREREQS:** BI 370

Z 499. SPECIAL TOPICS (1-16).

Topics and credits vary. Grading mode TBA. This course is repeatable for a maximum of 16 credits.

Z 499H. SPECIAL TOPICS (1-16).

Topics and credits vary. Grading mode TBA. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

Z 501. RESEARCH (1-16).

Graduate-level research completed under faculty supervision. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

Z 503. THESIS (1-16).

Master's thesis, completed under faculty supervision. This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

Z 505. READING AND CONFERENCE (1-16).

For graduate students working toward a master's degree. After arrangements with individual faculty, readings and discussions on topics of mutual interest. This course is repeatable for a maximum

of 16 credits. **PREREQS:** Departmental approval required.

Z 507. SEMINAR (1). Graded P/N. This course is repeatable for a maximum of 16 credits.

Z 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

PREREQS: Departmental approval required.

Z 522. COMPARATIVE ANATOMY (5).

Descriptive, experimental and historical approach to the study of evolution and anatomy of all organ systems of vertebrates. Laboratory emphasizes vertebrate developmental anatomy. Lec/lab. **PREREQS:** Graduate or postbac standing.

Z 523. ENVIRONMENTAL PHYSIOLOGY (4).

Comparative environmental physiology of vertebrates with emphasis on adaptations to such aspects of the physical environment as temperature, water, ions, and gases. Consideration given to interactions between physiology and environment that influence the local and geographic distribution of animals. Lec/rec. **PREREQS:** Graduate or postbac standing.

Z 525. EMBRYOLOGY AND DEVELOPMENT (5).

An integrated molecular, cellular and whole organism approach. Sequential embryonic events from gametogenesis through organogenesis. Discussion of experiments into mechanisms of these events; cellular interactions, pattern formation, regulation of gene expression, and cellular differentiation. Lab emphasizes descriptive vertebrate embryology with introduction to experimental methods. Lab fee. Lec/lab. **PREREQS:** Graduate or postbac standing.

Z 527. PALEOBIOLOGY (3).

Considers those aspects of the fossil record of potential use to life scientists, including the following topics: community history, biogeographic history, rates of evolution (taxonomic, phyletic, cladogenetic, behavioral, quantum), species problem as viewed with fossils, coevolution, overall history of life, speciation mechanisms. Lec. **PREREQS:** One year of biology and upper-division standing.

Z 530. PRINCIPLES OF PHYSIOLOGY (4).

Concepts and mechanisms of physiology, especially membrane physiology, muscle function, sensory mechanisms, neural integration. First in the Z43X series, although courses may be taken in any order. Lec/rec. **PREREQS:** (BI 211 or BI 211H) and (BI 212 or BI 212H) and (BI 213 or BI 213H) and CH 332*

Z 531. VERTEBRATE PHYSIOLOGY (4).

Systems/concepts covered include the autonomic nervous system, digestion/metabolism, renal and osmoregulatory, endocrine and reproductive systems. Second in Z43X series, although courses may be taken in any order. Lec/rec. **PREREQS:** (BI 211 or BI 211H) and (BI 212 or BI 212H) and (BI 213 or BI 213H) and CH 332*

Z 532. VERTEBRATE PHYSIOLOGY (4).

Systems/concepts covered include blood, immune, lymphatic, cardiovascular, and pulmonary. Third in the Z43X series, although courses may be taken in any order. Lec/rec. **PREREQS:** (BI 211 or BI 211H) and (BI 212 or BI 212H) and (BI 213 or BI 213H) and CH 332*

Z 537. VERTEBRATE ENDOCRINOLOGY (4).

An exploration of vertebrate endocrinology that examines principles of hormone action, inter- and intracellular signaling mechanisms within endocrine axes, and comparative endocrine physiology, emphasizing concepts of homeostasis and methodologies for evaluating normal and pathophysiological function. Students are provided multiple forums for class participation, in the form of scientific presentations and «mini-reports.» **PREREQS:** (BI 314 or BI 314H) and graduate status or instructor approval required.

Z 540. INSECT PHYSIOLOGY (3).

Fundamentals of insect physiology from the behavioral to the molecular level. Cellular physiology and hormonal control of molting, metamorphosis and reproduction. Overview of body functions:

respiration, circulation, digestion, metabolism, and osmoregulation. Physiological basis of behavior: muscles and flight, structure and functions of the nervous system, sensory physiology and chemical communication. During the course the contributions of insect physiology to (1) an understanding of general physiological principles and (2) biorational methods of insect pest control are discussed. **PREREQS:** Graduate standing.

Z 551. FUNCTIONAL ANATOMY OF THE HUMAN MUSCULAR SYSTEM (4). In-depth dissection of the orientation, innervation, and functional significance of muscles and muscle groups. Topics include muscle identification, joint anatomy and variation of human form. Z 551 student expectations include vascularization and detailed joint anatomy. The laboratory component will consist of the dissection of the muscular anatomy of a human cadaver. Lab fee. Lec/lab. **PREREQS:** Z 331 and Z 332 and Z 333 and Z 341 and Z 342 and Z 343 and department approval required. Admission to Z 451/Z 551 is by application in spring of the academic year students plan to attend.

Z 556. PHYLOGENETICS (4). Explores the theory and practice of modern phylogenetic analysis. Emphasis placed on tree reconstruction algorithms, assessment of statistical support, and contemporary issues in phylogenetics. Lab will focus on the use of phylogenetic software and the analysis of molecular data sets. Lec/lab. **CROSSLISTED** as BOT 556. **PREREQS:** ST 511

Z 561. MARINE AND ESTUARINE INVERTEBRATE ZOOLOGY (4). Comparative survey of eight major invertebrate phyla and many lesser-known phyla. Areas of emphasis will be 1) invertebrate identification, 2) natural history (diversity, habitat, feeding, behavior), and 3) comparative anatomy (adaptive significance of morphological structures). Laboratories and field trips will strongly supplement lecture material. Lec/lab. Taught at Hatfield Marine Science Center. **PREREQS:** Graduate standing.

Z 564. MARINE CONSERVATION BIOLOGY (3). Lectures, group library research, and class debates on current issues regarding the conservation of biodiversity in the sea. Topics include overfishing, invasive species, eutrophication, marine pollution, and global warming, as well as means of addressing these threats. **CROSSLISTED** as FW 464/FW 564. **PREREQS:** BI 370 or BI 370H or equivalent. Seniors, postbacs, and graduate students only.

Z 565. MARINE CONSERVATION SCIENCE AND POLICY (3). Introduces the science-policy interface of ocean resource management. Through discussions, lectures, and independent projects, students will learn how policy is formulated at the state and federal levels, and the role of science in that process. Emphasizes current topics, such as ecosystem-based management. Graded P/N. Taught at Hatfield Marine Science Center. **PREREQS:** Graduate standing.

Z 573. HERPETOLOGY (3). World families and distribution of amphibians and non-avian sauropods; evolution, population biology, life histories, current literature. **PREREQS:** Graduate or postbac standing.

Z 574. SYSTEMATIC HERPETOLOGY (2). A survey of the phylogenetic diversity of amphibians and reptiles of the United States. Identification through the use of keys will be stressed. Field trip fee. Lab fee. Lec/lab. **PREREQS:** Graduate or postbac standing.

Z 577. AQUATIC ENTOMOLOGY (4). Biology, ecology, collection, and identification of aquatic insects. Not offered every year. **PREREQS:** Graduate or postbac standing.

Z 581. BIOGEOGRAPHY (3). Covers the principles on which biogeography is based, past and present, plus a historical account of changing biogeography from the past to the present. Marine and nonmarine aspects are dealt with, involving what is known concerning both plants and animals. Offered alternate years. **PREREQS:** Graduate or postbac standing.

Z 585. GRANT WRITING AND ETHICS (3). Participants will write and submit a grant proposal by the end of the term. We discuss the main components of a typical grant proposal. Participants read and critique proposal drafts written by participants in the workshop. Ethical issues are discussed as they are encountered. Graded P/N. This course is repeatable for a maximum of 6 credits.

Z 587. SCIENTIFIC WRITING AND ETHICS (3). Participants will write a scientific paper based on their own research and submit it for publication. Topics to be covered include writing skills (e.g., making a good argument, choice of a journal, reviewing the literature) and ethical issues (e.g., citation, plagiarism, disclosure, data archiving, and acknowledgment). This course is repeatable for a maximum of 6 credits. **PREREQS:** Graduate standing.

Z 593. BEHAVIORAL ECOLOGY (5). Behavioral ecology with emphasis on both theoretical and empirical approaches. Offered alternate years. **PREREQS:** Graduate or postbac standing.

Z 594. COMMUNITY ECOLOGY (5). Theory and analysis of multispecies associations. Emphasis on extent to which existing ecological theory is supported by natural phenomena. Course considers how biotic and abiotic mechanisms interact to regulate community organization and stability in marine, freshwater, and terrestrial habitats. Offered alternate years. **PREREQS:** Graduate or postbac standing.

Z 595. DISEASE ECOLOGY (3). An introduction to disease ecology--the study of disease processes in natural populations and communities. The course focuses on (I) the role parasites play in the ecology and evolution of animal populations, including humans; and (II) the relevance of ecological and evolutionary considerations in managing infectious diseases. **PREREQS:** Graduate standing.

Z 599. SPECIAL TOPICS (1-16). Topics and credits vary. Grading mode TBA. Taught at Hatfield Marine Science Center and Corvallis campus. This course is repeatable for a maximum of 16 credits.

Z 601. RESEARCH (1-16). Doctoral-level research under faculty supervision. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval.

Z 603. THESIS (1-16). Doctoral thesis completed under faculty supervision. This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval.

Z 605. READING AND CONFERENCE (1-16). For graduate students working toward doctoral degree. After arrangements with individual faculty, readings and discussions on topics of mutual interest. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval.

*Statistics***Graduate Minor****Statistics**

The Department of Statistics offers undergraduate service courses and an undergraduate minor, as well as graduate courses and programs leading to the MA, MS, and PhD degrees or to a minor for an advanced degree in other fields. Students planning to major in statistics at the graduate level should have a minimum of mathematics through multivariable calculus, linear algebra, and an upper-division sequence in mathematical statistics.

STATISTICS MINOR

The undergraduate minor in Statistics requires a minimum of 27 credits in statistics, including:

*ST 201. Principles of Statistics (4)

or ST 314. Introduction to Statistics for Engineers (3)

or ST 351. Introduction to Statistical Methods (4)

ST 352. Introduction to Statistical Methods (4)

ST 407. Seminar: Sect. 1 Attendance at Consulting Practicum (1)

ST 421, ST 422. Introduction to Mathematical Statistics (4,4)

and at least 10 credits of additional approved courses.

Approved courses include:

BOT 440. Field Methods in Plant Ecology (4)

ECE 461. Introduction to Analog and Digital Communications (4)

ECON 424. Introduction to Econometrics (4)

FOR 321. Forest Mensuration (5)

H 425. Foundations of Epidemiology (3)

IE 355. Statistical Quality Control (4)

IE 356. Experimental Design for Industrial Processes (4)

MTH 464. Probability II (3)

MTH 465. Probability III (3)

MTH 467. Actuarial Mathematics (3)

PSY 301. Research Methods in Psychology (4)

SOC 315. ^Methods I: Research Design (4)

ST 411, ST 412, ST 413. Methods of Data Analysis (4,4,4)

ST 415. Design and Analysis of Planned Experiments (3)

ST 431. Sampling Methods (3)

ST 435. Quantitative Ecology (3)

ST 439. Survey Methods (3)

ST 441. Probability, Computing, and Simulation in Statistics (4)

ST 443. Applied Stochastic Models (3)

ST 473. Ecological Sampling (3)

ST 499. Special Topics (1–4)

Other statistics-related courses may be substituted, subject to departmental approval.

*** ST 314 or ST 351 may be taken in place of ST 201.****Footnotes:**

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

STATISTICS (MA, MAg, MS, PhD, MAIS)**Graduate Areas of Concentration**
Statistics

The Department of Statistics offers Master of Arts, Master of Science, and Doctor of Philosophy degrees in Statistics. Students can concentrate on theory or applications, and programs can be tailored to emphasize such areas of interest as ecology, engineering, forestry, finance, mathematics, or oceanography. The thesis is optional for MS and MA degrees. Statistical consulting is part of the program, enabling the student to gain a deeper appreciation of the need, power, and applicability of statistical tools through exposure to real problems.

MS in Statistics

The MS program is designed to prepare a candidate for a career in industry or government or for further study at the PhD level. Recent MS graduates have found employment with the U.S. Environmental Protection Agency, U.S. Census Bureau, Abt Associates, state of Oregon, Fred Hutchinson Cancer Research Center, Kaiser Permanente, Mayo Clinic, Bureau of Labor Statistics, Department of Veteran's Affairs, NOAA, MRI Global, and Capital One.

Prerequisites

- Single-variable and multivariable calculus (approximately 4 quarters).
- Linear algebra.
- An undergraduate sequence in mathematical statistics. Typical textbook: *Mathematical Statistics with Applications* by Mendenhall, et al.
- One or more applied statistics courses

(recommended, but not required).

Students who meet all of the requirements except for one or two courses may be granted provisional admission so they can begin their graduate studies while completing the remaining required courses. When the remedial course work is completed the Graduate School will remove the provisional status.

Required

ST 501. Research (3)

ST 506. Projects: (Sect 2) Teaching Experience (1)

ST 507. Seminar: (Sect 1) Attendance at Consulting Seminar (1)

ST 507. Seminar: (Sect 3) Attendance at Research Seminar (1,1)

ST 509. Consulting Practicum (2)

ST 541. Probability, Computing, and Simulation in Statistics (4)

ST 551, ST 552, ST 553. Statistical Methods (4,4,4)

ST 561, ST 562, ST 563. Theory of Statistics (3,3,3)

ST 623. Generalized Regression Models I (3) Additional approved courses* (15)

Total=52 credits

* Approved courses include all 500- and 600-level courses in the Statistics Department except:

ST 511, ST 512, ST 513. Methods of Data Analysis (4,4,4)

ST 515. Design and Analysis of Planned Experiments (3)

ST 521, ST 522. Introduction to Mathematical Statistics (4,4)

Courses with a zero middle digit and courses in other departments may be used only with the consent of the major professor (and minor professor if the course is listed in the minor).

A student intending to pursue the PhD in Statistics should review the mathematics prerequisites and requirements for that program and plan a course of study to satisfy them.

Other Requirements

- Pass written comprehensive exams in statistical methods and in statistical theory. These exams are given each year in September.
- Pass a final oral exam.

PhD in Statistics

The PhD program is designed to prepare a candidate for a career in teaching and research. Recent PhD graduates have found employment with US Geological Survey, Chase Bank, Bureau of Labor Statistics, USDA Forest Service, Weyerhaeuser, as well as with universities in the U.S. and abroad.

Prerequisites

- Equivalent to the OSU Master's degree in Statistics.
- Pass the MS comprehensive exams in methods and theory.
- Apply for admission to PhD program. (Evaluation is by the entire faculty. The evaluation criteria for

admission are: course work, grades, MS comprehensive exam results, and any information you provide in your application giving evidence of capability to do original research.)

- Course work equivalent to MTH 311, Advanced Calculus (4) and MTH 312, Advanced Calculus (4).

Required Course Work

MTH 511. Real Analysis (3)
 MTH 664. Probability Theory (3)
 ST 509. Consulting (2 credits annually)
 ST 541. Probability, Computing, and Simulation in Statistics (4)
 ST 551, ST 552, ST 553. Statistical Methods (3,3,3)
 ST 561, ST 562, ST 563. Theory of Statistics (3,3,3)
 ST 603. Thesis: PhD Research (36 credit minimum)
 ST 623, ST 525. Generalized Regression Models I, II (3,3)
 ST 651, ST 652. Linear Model Theory (3,3)
 ST 661, ST 662, ST 663. Advanced Theory of Statistics (3,3)

Total of about 120 credits of course work.

Credits completed for an MS degree as well as the 36 or more credits of ST 603 count toward this total. The specific courses to be taken are decided at a meeting of the PhD committee.

Other Requirements:

- Pass the preliminary exam over PhD course work.
- Write a thesis describing the results of original research.
- Pass the final examination over thesis and related material.

STATISTICS GRADUATE MINOR

MS Minor in Statistics

Required

ST 521, ST 522. Introduction to Mathematical Statistics (4,4)
 ST 511, ST 512. Methods of Data Analysis (4,4)

The student and/or minor professor may wish to add one or two additional courses from below:

ST 513. Methods of Data Analysis (4)
 ST 515. Design and Analysis of Planned Experiments (3)
 ST 531. Sampling Methods (3)
 ST 535. Quantitative Ecology (3)
 ST 557. Applied Multivariate Analysis (3)
 ST 565. Time Series (3)
 ST 573. Ecological Sampling (3)

PhD Minor in Statistics

A PhD minor program in statistics should include:

ST 521, ST 522. Introduction to Mathematical Statistics (4,4)
 or ST 561, ST 562, ST 563. Theory of Statistics (3,3,3)
 ST 551, ST 552, ST 553. Statistical Methods (4,4,4)
 or ST 511, ST 512, ST 513. Methods of Data Analysis (4,4,4)

Additional statistics-related courses approved by the minor professor.

- If ST 551, ST 552, and ST 553 are taken, the additional courses should total at least 3 credits.
- If ST 511, ST 512, and ST 513 are taken, they should total at least 6 credits.

All programs must be approved by the student's minor professor.

COURSES

ST 201. PRINCIPLES OF STATISTICS (4). Study design, descriptive statistics, the use of probability in statistical arguments, sampling, hypothesis tests and confidence intervals for means and proportions. Lec/rec. **PREREQS:** High school algebra. ST 201 and ST 202 must be taken in order.

ST 202. PRINCIPLES OF STATISTICS (4). Comparisons of means and proportions between two populations (t-tests, chi-square tests, nonparametric tests), simple linear regression, correlation. Lec/rec. **PREREQS:** ST 201

ST 314. INTRODUCTION TO STATISTICS FOR ENGINEERS (3). Probability, common probability distributions, sampling distributions, estimation, hypothesis testing, control charts, regression analysis, experimental design. **PREREQS:** (MTH 252 or MTH 252H)

ST 314H. INTRODUCTION TO STATISTICS FOR ENGINEERS (3). Probability, common probability distributions, sampling distributions, estimation, hypothesis testing, control charts, regression analysis, experimental design. **PREREQS:** (MTH 252 or MTH 252H) and Honors College approval required.

ST 351. INTRODUCTION TO STATISTICAL METHODS (4). Study designs, descriptive statistics, collecting and recording data, probability distributions, sampling distributions for means and proportions, hypothesis testing and confidence intervals for means and proportions in one- and two-sample inference, and chi-square tests. Lec/lab. **PREREQS:** High school algebra with statistics. ST 351 and ST 352 must be taken in order.

ST 351H. INTRODUCTION TO STATISTICAL METHODS (4). Study designs, descriptive statistics, collecting and recording data, probability distributions, sampling distributions for means and proportions, hypothesis testing and confidence intervals for means and proportions in one- and two-sample inference, and chi-square tests. **PREREQS:** High school algebra with statistics. ST 351 and ST 352 must be taken in order. Honors College approval required.

ST 352. INTRODUCTION TO STATISTICAL METHODS (4). Randomization tests and other nonparametric tests for one- and two-sample inference, simple and multiple linear regression, correlation, one- and two-way analysis of variance, logistic regression. Lec/lab. **PREREQS:** (ST 351 or ST 351H) and ST 351 and ST 352 must be taken in order.

ST 406. PROJECTS (1-16). Section 1: Projects, graded P/N. Section 2: Teaching Experience, graded P/N. Section 3: Directed Work, graded P/N. This course is repeatable for a maximum of 16 credits.

ST 407. SEMINAR (1). Attendance at consulting practicum. Graded P/N.

ST 410. INTERNSHIP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

ST 411. METHODS OF DATA ANALYSIS (4). Graphical, parametric and nonparametric methods for comparing two samples; one-way and two-way analysis of variance; simple linear regression. Lec/lab. **PREREQS:** ST 209 or ST 351 or the equivalent. ST 411, ST 412 and ST 413 must be taken in order.

ST 412. METHODS OF DATA ANALYSIS (4). Multiple linear regression, including model checking, dummy variables, using regression to fit analysis of variance models, analysis of covariance, variable selection methods. Lec/lab. **PREREQS:** ST 411 and ST 209 or ST 351 or the equivalent.

ST 413. METHODS OF DATA ANALYSIS (4). Principles of experimental design; randomized block and factorial designs; repeated measures; categorical data analysis, including comparison of proportions, tests of homogeneity and independence in cross-classified frequency tables, Mantel-Haenszel test, logistic regression, log-linear regression. Introduction to multivariate statistics. Lec/lab. **PREREQS:** ST 412 and ST 351 or the equivalent.

ST 415. DESIGN AND ANALYSIS OF PLANNED EXPERIMENTS (3). Principles of experimental design; uses, construction and analysis of completely randomized, randomized block and Latin square designs; covariates; factorial treatments, split plotting; random effects and variance components. **PREREQS:** (ST 352 or ST 411 or ST 511)

ST 421. INTRODUCTION TO MATHEMATICAL STATISTICS (4). Probability, random variables, expectation, discrete and continuous distributions, multivariate distributions. **PREREQS:** MTH 253. ST 421 and ST 422 must be taken in order.

ST 422. INTRODUCTION TO MATHEMATICAL STATISTICS (4). Sampling distributions, Central Limit Theorem, estimation, confidence intervals, properties of estimators, and hypothesis testing. **PREREQS:** ST 421 and MTH 253

ST 431. SAMPLING METHODS (3). Estimation of means, totals and proportions; sampling designs including simple random, stratified, cluster, systematic, multistage and double sampling; ratio and regression estimators; sources of errors in surveys; capture-recapture methods. **PREREQS:** ST 411 or ST 511

ST 435. QUANTITATIVE ECOLOGY (3). Overview of statistical methods that are useful for analyzing ecological data, including spatial pattern analysis, multivariate techniques, logistic regression, Bayesian statistics and computer-intensive methods. Consideration of special topics such as population dynamics, food webs and ecological indicators. Not offered every year. **PREREQS:** (ST 412 or ST 512)

ST 439. SURVEY METHODS (3). Survey design, sampling, data collection and analysis, general methodology. Not offered every year. **PREREQS:** (ST 201 or ST 351)

ST 441. PROBABILITY, COMPUTING, AND SIMULATION IN STATISTICS (4). Review of probability, including univariate distributions and limit theorems. Random-number generation and simulation of statistical distributions. Bootstrap estimates of standard error. Variance reduction techniques. Emphasis on the use of computation in statistics using the MATLAB programming language. Lec/lab. **PREREQS:** (ST 422 or ST 522)

ST 443. APPLIED STOCHASTIC MODELS (3). Development of stochastic models commonly arising in statistics and operations research, such as Poisson processes, birth-and-death processes, discrete-time and continuous-time Markov chains, renewal and Markov renewal processes. Analysis of stochastic models by simulation and other computational techniques. **PREREQS:** (ST 421 or ST 521) and experience with a high-level programming language or mathematical computation package.

ST 499. SPECIAL TOPICS (1-4). This course is repeatable for a maximum of 8 credits.

ST 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ST 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

ST 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ST 506. PROJECTS (1-16). Section 1: Projects. Section 2: Teaching Experience. Section 3: Directed Work. This course is repeatable for a maximum of 16 credits.

ST 507. SEMINAR (1). Section 1: Attendance at consulting practicum, 1 credit. Section 3: Research Seminar, 1 credit. Section 4: Computing Facilities, 1 credit. All sections graded P/N. This course is repeatable for a maximum of 99 credits.

ST 509. CONSULTING PRACTICUM (2). The student provides statistical advice, under faculty guidance, on university-related research projects. This course is repeatable for a maximum of 99 credits. **PREREQS:** ST 507, section 1 and ST 553, or instructor approval required.

ST 510. INTERNSHIP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

ST 511. METHODS OF DATA ANALYSIS (4). Graphical, parametric and nonparametric methods for comparing two samples; one-way and two-way analysis of variance; simple linear regression. Lec/lab. **PREREQS:** ST 209 or ST 351 or the equivalent. ST 511, ST 512, and ST 513 must be taken in order.

ST 512. METHODS OF DATA ANALYSIS (4). Multiple linear regression, including model checking, dummy variables, using regression to fit analysis of variance models, analysis of covariance, variable selection methods. Lec/lab. **PREREQS:** ST 511 and ST 209 or ST 351 or the equivalent.

ST 513. METHODS OF DATA ANALYSIS (4). Principles of experimental design; randomized block and factorial designs; repeated measures; categorical data analysis, including comparison of proportions, tests of homogeneity and independence in cross-classified frequency tables, Mantel-Haenszel test, logistic regression, log-linear regression. Introduction to multivariate statistics. Lec/lab. **PREREQS:** ST 512 and ST 351 or the equivalent.

ST 515. DESIGN AND ANALYSIS OF PLANNED EXPERIMENTS (3). Principles of experimental design; uses, construction and analysis of completely randomized, randomized block and Latin square designs; covariates; factorial treatments, split plotting; random effects and variance components. **PREREQS:** ST 352 or (ST 411 or ST 511)

ST 521. INTRODUCTION TO MATHEMATICAL STATISTICS (4). Probability, random variables, expectation, discrete and continuous distributions, multivariate distributions. **PREREQS:** MTH 253. ST 521 and ST 522 must be taken in order.

ST 522. INTRODUCTION TO MATHEMATICAL STATISTICS (4). Sampling distributions, Central Limit Theorem, estimation, confidence intervals, properties of estimators, and hypothesis testing. **PREREQS:** ST 521 and MTH 253

ST 531. SAMPLING METHODS (3). Estimation of means, totals and proportions; sampling designs including simple random, stratified, cluster, systematic, multistage and double sampling; ratio and regression estimators; sources of errors in surveys; capture-recapture methods. **PREREQS:** ST 411 or ST 511

ST 535. QUANTITATIVE ECOLOGY (3). Overview of statistical methods that are useful for analyzing ecological data, including spatial pattern analysis, multivariate techniques, logistic regression, Bayesian statistics and computer-intensive methods. Consideration of special topics such as population dynamics, food webs and ecological indicators. Not offered every year. **PREREQS:** ST 412 or ST 512

ST 539. SURVEY METHODS (3). Survey design, sampling, data collection and analysis, general methodology. Not offered every year. **PREREQS:** ST 201 or ST 351

ST 541. PROBABILITY, COMPUTING, AND SIMULATION IN STATISTICS (4). Review of probability, including univariate distributions and limit theorems. Random-number generation and simulation of statistical distributions. Bootstrap estimates of standard error. Variance reduction techniques. Emphasis on the use of computation in statistics using the S-Plus or MATLAB programming language. Lec/lab. **PREREQS:** ST 422 or ST 522

ST 543. APPLIED STOCHASTIC MODELS (3). Development of stochastic models commonly arising in statistics and operations research, such as Poisson processes, birth-and-death processes, discrete-time and continuous-time Markov chains, renewal and Markov renewal processes. Analysis of stochastic models by simulation and other computational techniques. **PREREQS:** (ST 421 or ST 521) and experience with a high-level programming language or mathematical computation package.

ST 551. STATISTICAL METHODS (4). Properties of t , chi-square and F tests; randomized experiments; sampling distributions and standard errors of estimators, delta method, comparison of several groups of measurements; two-way tables of measurements. **PREREQS:** ST 422 or ST 522. Should concurrently enroll in MTH 341. ST 551, ST 552 and ST 553 must be taken in order.

ST 552. STATISTICAL METHODS (4). Simple and multiple linear regression including polynomial regression, indicator variables, weighted regression, and influence statistics, nonlinear regression and linear models for binary data. **PREREQS:** ST 551 and ST 422 or ST 522. Concurrent enrollment in MTH 341.

ST 553. STATISTICAL METHODS (4). Principles and analysis of designed experiments, including factorial experiments, analysis of covariance, random and mixed effect models. Lec/lab. **PREREQS:** ST 552 and concurrent enrollment in MTH 341.

ST 555. ADVANCED EXPERIMENTAL DESIGN (3). Designs leading to mixed models including split plots, repeated measures, crossovers and incomplete blocks. Introduction to experimental design in industry including confounding, fractional factorials and response surface methodology. Analysis of unbalanced data. **PREREQS:** ST 553

ST 557. APPLIED MULTIVARIATE ANALYSIS (3). Multivariate data structures, linear combinations; principal components, factor and latent structure analysis, canonical correlations, discriminant analysis; cluster analysis, multidimensional scaling. Not offered every year. **PREREQS:** (ST 412 or ST 512) and (MTH 252 or MTH 245)

ST 559. BAYESIAN STATISTICS (3). Bayesian statistics for data analysis. Characterizations of probability; comparative (Bayesian versus frequentist) inference; prior, posterior and predictive distributions; hierarchical modeling. Computational methods include Markov Chain Monte Carlo for posterior simulation. **PREREQS:** ST 562

ST 561. THEORY OF STATISTICS (3). Distributions of functions of random variables, joint and conditional distributions, sampling distributions, convergence concepts, order statistics. **PREREQS:** (ST 422 or ST 522), ST 561, ST 562, and ST 563 must be taken in order.

ST 562. THEORY OF STATISTICS (3). Sufficiency, exponential families, location and scale families; point estimation: maximum likelihood, Bayes, and unbiased estimators; asymptotic distributions of maximum likelihood estimators; Taylor series approximations. **PREREQS:** ST 561 and ST 422 or ST 522

ST 563. THEORY OF STATISTICS (3). Hypothesis testing: likelihood ratio, Bayesian, and uniformly most powerful tests; similar tests in exponential families; asymptotic distributions of likelihood ratio test statistics; confidence intervals. **PREREQS:** ST 562 and ST 422 or ST 522

ST 565. TIME SERIES (3). Analysis of serially correlated data in both time and frequency domains. Autocorrelation and partial autocorrelation functions, autoregressive integrated moving average models, model building, forecasting; filtering, smoothing, spectral analysis, frequency response studies. Offered winter term in even years. **PREREQS:** (ST 412 or ST 512) and (ST 422 or ST 522)

ST 567. SPATIAL STATISTICS (3). The analysis of spatial data. Graphical tools for exploring spatial data, geostatistics, variogram estimation, kriging, areal models, hierarchical spatial models, and spatio-temporal modelling. Offered winter term in odd years. **PREREQS:** (ST 412 or ST 512) and (ST 422 or ST 522)

ST 573. ECOLOGICAL SAMPLING (3). Sampling of animal populations, frameless sampling, detectability, line transects, circular plots, mark-recapture, line intercept sampling; spatial sampling, quadrats, kriging; adaptive sampling designs. Not offered every year. **PREREQS:** (ST 412 or ST 512) and (ST 421 or ST 521)

ST 599. SPECIAL TOPICS (1-4). May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.

ST 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor approval required.

ST 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Instructor approval required.

ST 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

ST 623. GENERALIZED REGRESSION MODELS I (3). Maximum likelihood analysis for frequency data; regression-type models for binomial and Poisson data; iterative weighted least squares and maximum likelihood; analysis of deviance and residuals; overdispersion and quasi-likelihood models; log-linear models for multidimensional contingency tables. **PREREQS:** (ST 553 and ST 563)

ST 625. GENERALIZED REGRESSION MODELS II (3). Parametric methods for the analysis of censored survival data, based mostly on large-sample likelihood theory. Specific topics include the Kaplan-Meier estimator, the log-rank test, partial likelihood, and regression models, including the Cox proportional-hazards model and its generalizations. **PREREQS:** (ST 553 or ST 563)

ST 651. LINEAR MODEL THEORY (3). Least squares estimation, best linear unbiased estimation, parameterizations, multivariate normal distributions, distributions of quadratic forms, testing linear hypotheses, simultaneous confidence intervals. Offered alternate years. **PREREQS:** ST 553 and ST 563. ST 651 and ST 652 must be taken in order.

ST 652. LINEAR MODEL THEORY (3). Advanced topics including classification models, mixed-effects models and multivariate models. Offered alternate years. **PREREQS:** ST 651 and ST 553 and ST 563

ST 661. ADVANCED THEORY OF STATISTICS (3). Exponential families, sufficient statistics; unbiased, equivariant, Bayes, and admissible estimation. Offered alternate years. **PREREQS:** ST 563 and MTH 511. ST 661, ST 662, and ST 663 must be taken in order.

ST 662. ADVANCED THEORY OF STATISTICS (3). Uniformly most powerful, unbiased, similar, and invariant tests. Offered alternate years. **PREREQS:** ST 661 and ST 563 and MTH 511

ST 663. ADVANCED THEORY OF STATISTICS (3). First-order and higher-order asymptotics; likelihood ratio, score, and Wald tests; Edgeworth and saddlepoint approximations. Offered alternate years. **PREREQS:** ST 662 and ST 563 and MTH 511

Students who complete the requirements of the University Honors College (UHC) receive OSU's most prestigious academic recognition for undergraduates: an honors baccalaureate degree (HBA, HBFA or HBS) in their major, jointly awarded by the University Honors College and the college of their major.

The University Honors College is about enrichment: How high can you dream? The UHC provides challenging curricula, personal attention, and enhanced learning experiences in general education and in the student's primary academic interest. The University Honors College offers courses consisting of small groups taught by OSU's finest faculty, specifically selected for their undergraduate teaching abilities. Through seminars, colloquia, and their own thesis research, students enjoy the benefits of a small college within a large, diverse, and comprehensive university.

Both a four-year and a two-year track are available. The two-year track is designed for transfer students or for students already enrolled at OSU. Interested students should contact the University Honors College for information.

The University Honors College, in cooperation with University Housing and Dining Services, maintains an Honors living-learning community, West Residence Hall.

Undergraduate Degrees

Honors Bachelor of Arts (HBA)

Honors Bachelor of Fine Arts (HBFA)

Honors Bachelor of Science (HBS)

MAJORS AND DEGREES

Students enrolled in the University Honors College can pursue any one of OSU's wide range of undergraduate majors. Students who complete the requirements of the University Honors College receive OSU's most prestigious undergraduate academic recognition: an honors baccalaureate degree in their major, jointly awarded by the Honors College and the college in which their major is located.

ADMISSION

Admission is competitive and selective—only a small percentage of all entering students join the University Honors College and space is limited. UHC students are exceptionally able, highly motivated, and intellectually curious. They have a highly developed social consciousness and a sense of responsibility. Admission decisions are based on grade-point averages, SAT or ACT scores, and responses to an essay question that reveal the student's ability to think deeply and creatively. High school applicants must have a minimum of 3.75 GPA or a score of 1820 SAT, 27 ACT to be considered for admission.

Entering first-year students interested in beginning the UHC fall term should submit an application by either November 1 or February 1. UHC applicants must also apply for admission to OSU by that time. Admission decisions are made approximately 45 days after the submission deadlines. Responses to current year UHC essay questions are required.

Transfer or advanced-standing applicants should submit an application by March 15th and will be notified no later than April 30th. Personal visits are encouraged.

DEGREE REQUIREMENTS

The honors degree is jointly awarded by the University Honors College and by the college of the student's major. Therefore, additional credit requirements beyond the total required by the college of the student's major must be completed. UHC students must satisfy all university and major requirements, as well as Honors requirements. A student who completes a 30-credit track of University Honors College courses will be designated an Honors Scholar. A student who completes a 15-credit track will be designated as an Honors Associate. In either instance successful completion leads to receipt of an honors baccalaureate degree. Transcripts will also reflect Honors College completion and will denote UHC course work.

Many honors classes satisfy dual requirements; please check details with an Honors College advisor. For students in majors that require a senior thesis project, the honors thesis requirements may complement those majors.

RETENTION CRITERIA

All UHC students must maintain a 3.25 cumulative OSU GPA and make timely progress toward fulfilling the requirements of the UHC and their major. All UHC student grades will be reviewed each term. Students below, or at risk of falling below the specified 3.25 cumulative OSU GPA, will be notified to come in for advising. Students whose cumulative GPA remains below the standard will be removed from the college.

All students must maintain contact with Honors College advisors through regularly scheduled appointments.

HONORS COURSES

See the Schedule of Classes each term under Honors College (HC) and under departmental listings for courses with an H suffix. The UHC publishes its own schedule, which is available each term in the UHC office and on the UHC website. Honors courses change annually; many are offered under departmental designators.

See the UHC website for additional information, <http://honors.oregonstate.edu>.

HONORS ASSOCIATE (HBA, HBFA, HBS)

The honors degree is jointly awarded by the University Honors College and by the college of the student's major. Therefore additional credit requirements beyond the total required by the college of the student's major must be completed. UHC students must satisfy all university and major requirements, as well as Honors

requirements. A student who completes a 15-credit track will be designated as an Honors Associate. Successful completion leads to receipt of an honors baccalaureate degree. Transcripts will also reflect Honors College completion and will denote UHC course work. Interested students please contact the University Honors College at 541-737-6400 or email honors.college@oregonstate.edu.

The requirements for the Honors Associate track include:

- Honors colloquia (minimum 6 credits)
- Honors electives (minimum 6 credits)
- Thesis/Research/Projects (minimum 3 credits)
- At least 12 honors credits must be upper division.
- Bound thesis

HONORS SCHOLAR (HBA, HBFA, HBS)

The honors degree is jointly awarded by the University Honors College and by the college of the student's major. Therefore additional credit requirements beyond the total required by the college of the student's major must be completed. UHC students must satisfy all university and major requirements, as well as Honors requirements. A student who completes a 30-credit track of University Honors College courses will be designated an Honors Scholar. Successful completion leads to receipt of an honors baccalaureate degree. Transcripts will also reflect Honors College completion and will denote UHC course work. Interested students please contact the University Honors College at 541-737-6400 or email honors.college@oregonstate.edu.

The requirements for the Honors Scholar track include:

- Honors baccalaureate core courses (minimum 6 credits)
- Honors colloquia (minimum 6 credits)
- Honors electives (minimum 12 credits)
- Thesis/Research/Projects (minimum 6 credits)
- At least 12 honors credits must be upper division.
- Bound thesis

COURSES

HC 199. *HONORS WRITING (3). Through a range of assignments, texts, and guest speakers, Honors College students will develop critical thinking skills and a strategy for writing in their discipline. (Bacc Core Course) This course is repeatable for a maximum of 3 credits. **PREREQS:** WR 121 and Honors College approval required.

HC 299. SELECTED TOPICS (1-16). Selected topics for University Honors College students. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HC 399. SELECTED TOPICS (1-16). Upper-division special topics for University Honors College students. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HC 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HC 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HC 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HC 404. WRITING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HC 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HC 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HC 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HC 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HC 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HC 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

The College of Veterinary Medicine at Oregon State University was established in 1975 with three major areas of responsibility—teaching, research, and public service. The college is fully accredited by the American Veterinary Medical Association's Council on Education.

Professional Program
Veterinary Medicine (DVM)

Graduate Major
Comparative Health Sciences (MS, PhD)

Graduate Minor
Comparative Health Sciences

TEACHING

The college was established in 1975 and began its professional education program in 1979. Approximately 40 residents of Oregon and 16 nonresident students are selected to enter the OSU College of Veterinary Medicine. These students will complete all four years of their professional education in Corvallis. Completion of the professional program leads to the Doctor of Veterinary Medicine (DVM) degree.

There are two departments supporting the DVM doctoral program: Biomedical Sciences and Clinical Sciences.

Comprehensive research training is provided through graduate programs leading to the MS degree in Comparative Health Sciences.

Post-DVM residency training leading to board eligibility in several clinical disciplines and pathology is also available.

RESEARCH

Biomedical research is conducted in the college, supported by federal agencies such as NIH, USDA, DOE, as well as by a number of foundations. Collaboration with the OSU Agricultural Experiment Station, colleges of Pharmacy, Public Health and Human Sciences, Engineering and many other colleges, is part of the program. The research is of economic and public health significance, aimed at improving the health of animals and people.

The college emphasizes research of infectious diseases, such as those caused by *Mycobacteria*, *Chlamydia*, *Clostridia*, *Vibrio*, *Mycoplasma*, *Cryptosporidium*, herpesvirus, respiratory syncytial virus, influenza virus, and HIV-1 virus. Research is also conducted on immunity and nutrition, neuroscience, cancer, cardiovascular diseases, diabetes, reproductive diseases, and diseases of terrestrial and aquatic wildlife.

PUBLIC SERVICE

The service programs focus on the diagnosis, prevention, treatment, and control and prevention of animal diseases. The college assists veterinary practitioners, animal owners, and the general public through the Veterinary Diagnostic Laboratory and the Veterinary Teaching Hospital.

The Veterinary Diagnostic Laboratory is a full-service facility providing a wide

range of animal disease diagnostic testing services to veterinarians, animal owners, and public agencies. The laboratory offers testing and expertise in pathology, clinical pathology, bacteriology, and virology, and is accredited by the American Association of Veterinary Laboratory Diagnosticians.

The Veterinary Teaching Hospital is designed and equipped for diagnosis and medical and surgical treatment of canine, feline, equine, food animal, and camelid patients. Patients are admitted directly from animal owners and through referrals from practicing veterinarians in Oregon and the Pacific Northwest. Imaging (radiology, ultrasonography, fluoroscopy, CAT scan, MRI, and scintigraphy), anesthesiology, pharmacy, intensive care, and other services are available to support the hospital functions.

The Veterinary Diagnostic Laboratory and the Veterinary Teaching Hospital serve as learning centers where senior veterinary students and residents study animal disease, diagnosis, treatment, and prevention.

Providing continuing education for veterinarians is also considered a major responsibility of the college. One- to three-day intensive courses of instruction on specific topics are offered periodically.

**CAREER OPPORTUNITIES
IN VETERINARY MEDICINE**

Opportunities for employment in veterinary medicine are excellent. Nearly 70 percent of the professionally active veterinarians in the United States are engaged in private practice. Some practices are limited to types of animals, such as food animal, equine, or companion animal practices. Others involve specialties such as surgery, ophthalmology, cardiology, or radiology. In addition to private practice, there are numerous teaching and research opportunities in academic, government, and industrial settings. Expanding areas include laboratory animal medicine and public health.

**VETERINARY
STUDENT EXPENSES**

Oregon resident students registered in the College of Veterinary Medicine will pay tuition and fees of approximately \$7,106 per term. Students from the WICHE states will pay the same fees as Oregon resident students. Nonresident student fees currently are \$13,733 per term.

Veterinary students must provide required professional attire, as well as dissection, surgical, and diagnostic instruments, and notes and books.

Occasional field trips are scheduled in the veterinary curriculum. Transportation is provided by the university for required trips, but students must provide their own food and lodging. For optional trips, the student is usually expected to provide transportation, lodging, and food. All other expenses, such as residence hall and

POLICY ON LABORATORY AND DUTY HOURS

During the professional curriculum, several laboratory exercises in the preclinical years require the use of live animals. The exercises are designed to complement didactic lectures and demonstrations through hands-on experience with various species of animals. In all instances, the animals are humanely treated and anesthetized if the procedures are potentially painful.

During the clinical years, animals are used in laboratory exercises in the teaching of basic surgical skills and medical procedures. In most instances, the animals are anesthetized. Strict protocol is enforced regarding the animals' well-being in exercises requiring post-operative recovery. All use of animals in teaching is approved by the university's Institutional Animal Care and Use committee.

During the fourth year of the veterinary curriculum, students complete rotations in sections of the Veterinary Teaching Hospital and Veterinary Diagnostic Laboratory. Emergency services are offered to the public on a 24-hour basis, seven days a week. Student assignments in the clinical blocks are demanding, and students are required to spend time at night, weekends, and holidays in the delivery of health care to patients. Hospital operations continue seven days per week, and students are responsible for their assigned tasks regardless of time and day of week.

VETERINARY MEDICINE (DVM)

Graduation Requirements

To be awarded the Doctor of Veterinary Medicine degree, candidates must have passed all required courses in the veterinary curriculum, have a minimum of a 2.00 grade-point average in the veterinary curriculum, satisfactorily complete a senior paper and a required veterinary procedures list.

Preveterinary Curriculum

Typical preveterinary curriculum at Oregon State University follows. Oregon State University courses that will meet the preveterinary academic requirements:

ANS 314. Animal Physiology (4)
 or Z 331. Human Anatomy and Physiology (3)
 BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)

BB 450, BB 451. General Biochemistry (4,3)
 BI 311. Genetics (4)

or ANS 378. Animal Genetics (4)

CH 121, CH 122, CH 123. General Chemistry (5,5,5)

or CH 231, CH 232, CH 233. *General Chemistry (4,4,4)

and CH 261, CH 262, CH 263.

*Laboratory for Chemistry 231, 232, 233 (1,1,1)

CH 331, CH 332. Organic Chemistry (4,4)

MTH 111. *College Algebra (4)

and MTH 112. *Elementary Functions (4)

PH 201, PH 202. *General Physics (5,5)

ST 351. Introduction to Statistical Methods (4)

English Writing (6)

Humanities/Social Sciences (12)

Public Speaking (3)

Upper-Division Biological Sciences with Lab (6)

*Baccalaureate core courses

STATE OF OREGON DVM LICENSING REGULATIONS

Oregon Veterinary Medical Examining Board

Requirements

1. Graduate of a veterinary medical school accredited by the AVMA, or if a foreign graduate, have a certificate from ECFVG, PAVE or other equivalency program approved by the board.
2. Passed the NBC/CCT or NAVLE and Juris Prudence exams.
3. If you have less than one year's U.S. experience, you must obtain an intern permit and practice under the supervision of an Oregon-licensed veterinarian for one year (or the balance of a year).

*If you meet the following conditions, you may include a letter requesting waiver of the CCT. Your letter must cite compliance with each of these requirements:

- Graduate of an accredited veterinary school or earned ECFVG certificate prior to 1991;
- Engaged in five contiguous years of active veterinary clinic practice immediately preceding date of application;
- Have held license(s) in good standing in other US states or provinces since graduation; and

- Have continuing education of at least 10 hours per year during the five years immediately preceding date of application.

EXAMINATIONS

Scores must be reported directly to the board from VIVA. If you tested in Oregon, you do not need to request a score transfer.

North American Veterinary Licensing Examination (NAVLE): Administered via computer during two periods in spring and winter. Passing score as established by National Board Examination Committee.

NBE/CCT: Passing score before December 1992 is 75.00 based on 1.5 standard deviations. After December 1992, passing score is the criterion referenced score of 425.

Jurisprudence Exam: An open-book 40-question test on veterinary laws and rules of Oregon. The exam and regulations will be sent to applicants upon receipt of the license application and \$75 fee. A passing score of 95 percent (38 correct answers) is required.

LICENSING

Complete and submit the application and fee. The Jurisprudence Exam will be sent to you to complete and return. When you pass the JP exam, you will be sent an activation form. You may not practice in Oregon until you activate your license or intern permit. Complete and send in the activation form, along with the \$100 fee. Your permanent license or intern permit will be issued upon receipt of all necessary documentation.

Permanent Licenses: If you have at least one year's documented veterinary clinical experience, you may activate your permanent license.

Intern Permits: New graduates or veterinarians with less than one year's experience must obtain an intern permit. This permit expires one year after date of issue or less if prior experience is documented. Renewal notices are sent approximately six weeks prior to expiration date, at which time interns may activate their permanent license or request another intern permit if one year's experience has not been acquired. Current veterinary school seniors may submit application materials prior to graduation; however an intern permit will not be issued until the board receives either a dean's letter confirming graduation or a diploma copy.

Continuing Education: Active licensees are required to report 30 credits of CE every odd year, i.e. '11, '13, '15, etc.

COMPARATIVE HEALTH SCIENCES (MS, PhD)

The Comparative Health Sciences graduate major is an interdisciplinary program administered by the Graduate School. Participating colleges include Veterinary Medicine, Public Health and Human Sciences, Pharmacy, and the Graduate School.

For further information about the graduate major, see the proposal at <https://secure.oregonstate.edu/ap/cps/proposals/view/84096> and contact the Graduate School and College of Veterinary Medicine.

MS degree students complete a total of 45 graduate credits, including 12 thesis credits.

PhD degree students complete a total of 108 graduate credits beyond the bachelor's or professional (DVM, MD) degree, including at least 36 credits of non-blanket course work.

All students complete the core curriculum and at least two electives for a total of 12 credits. Student must also complete the Biomedical Sciences option.

Required Core

Research Perspectives Lab Rotations (3) (PhD only)

Introduction to the profession's role in society. Graded P/N.

VMB 309. CAPTURE AND IMMOBILIZATION TECHNIQUES (2).

Manual and chemical restraint methods are covered with an emphasis on darting equipment, animal and human safety, drug pharmacology and species-specific recommendations. Lec/lab.

VMB 328. WILDLIFE CAPTURE AND IMMOBILIZATION (2).

Manual and chemical restraint methods are covered with an emphasis on darting equipment, animal and human safety, drug pharmacology and species specific recommendations. CROSSLISTED as FW 328. Lec/lab. This course is repeatable for a maximum of 4 credits.

VMB 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.**VMB 503. THESIS (1-12).** This course is repeatable for a maximum of 999 credits.**VMB 505. READING AND CONFERENCE (1-16).** Graded P/N. This course is repeatable for a maximum of 16 credits.**VMB 507. SEMINAR (1-16).** Graded P/N. This course is repeatable for a maximum of 16 credits.**VMB 517. VETERINARY PHYSIOLOGY (5).**Physiology of body fluids, muscles, membranes, intermediary metabolism, cardiovascular system, and metabolism. **PREREQS:** One year of inorganic chemistry, including a lab; one upper-division course in biochemistry; one term physics; one-year sequence in general biological sciences or equivalent; instructor approval required.**VMB 518. VETERINARY PHYSIOLOGY (5).**Physiology of gastrointestinal, endocrine and reproductive systems. **PREREQS:** VMB 517 and instructor approval required.**VMB 519. VETERINARY PHYSIOLOGY (4).**Physiology of respiratory and renal systems and acid-base balance. **PREREQS:** VMB 518 and instructor approval required.**VMB 521. ANIMAL MODELS (3).**Selection/use criteria for models describing animal or human diseases or processes with emphasis on experimental design, validation, transgenic technology, population dynamics, husbandry, and ethics. **PREREQS:** Graduate standing or advanced undergraduate in science or engineering, with permission of the instructor.**VMB 523. ZONOOSES (3).**Interactive examination of the molecular basis of diseases that are transmissible between animals and humans. Emphasis on bacterial, viral and parasitic pathogens of animals and humans. **PREREQS:** Graduate standing or advanced undergraduate in science or engineering, with permission of instructor.**VMB 524. BIOANALYTICAL CHEMISTRY (3).**Analytical methods employed in the study of biologically important molecules. Separations (chromatography, electrophoresis), spectroscopy, mass spectrometry, biosensors, and immunoassays. Lec/lab. Not offered every year. CROSSLISTED as CH 524. **PREREQS:** One year of organic chemistry and one term of organic chemistry laboratory.**VMB 601. RESEARCH (1-16).** Graded P/N. This course is repeatable for a maximum of 16 credits.**VMB 603. THESIS (1-16).** This course is repeatable for a maximum of 999 credits.**VMB 605. READING AND CONFERENCE (1-16).**

This course is repeatable for a maximum of 16 credits.

VMB 606. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.**VMB 607. SEMINAR (1-16).** One-credit section; VMB 607 Sect. 1. Graded P/N. This course is repeatable for a maximum of 16 credits.**VMB 611. VETERINARY GROSS ANATOMY (4).**Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. **PREREQS:** One year of inorganic chemistry, including a lab; one upper-division course in biochemistry; one term of physics; one year sequence in general biological sciences or equivalent. Instructor approval required. VMB 611, VMB 612, VMB 613 must be taken in sequence.**VMB 612. VETERINARY GROSS ANATOMY (4).**Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. **PREREQS:** VMB 611; one year of inorganic chemistry, including a lab; one upper-division course in biochemistry; one term in physics; one-year sequence in general biological sciences or equivalent; instructor approval required.**VMB 613. VETERINARY GROSS ANATOMY (4).**Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. **PREREQS:** VMB 612; one year of inorganic chemistry, including a lab; one upper-division course in biochemistry; one term of physics; one-year sequence in general biological sciences or equivalent; instructor approval required.**VMB 614. VETERINARY MICROSCOPIC ANATOMY (4).**Structure and development of cells, tissues, organs, and organ systems of animals. **PREREQS:** One year of inorganic chemistry, including a lab; one upper-division course in biochemistry; one term of physics; one-year sequence in general biological sciences or equivalent; instructor approval required. VMB 614 and VMB 615 must be taken in sequence.**VMB 615. VETERINARY MICROSCOPIC ANATOMY (3).**Structure and development of cells, tissues, organs, and organ systems of animals. **PREREQS:** VMB 614; one year of inorganic chemistry, including a lab; one upper-division course in biochemistry; one term of

physics; one-year sequence in general biological sciences or equivalent; instructor approval required.

VMB 620. VETERINARY IMMUNOLOGY (5).Clinical and diagnostic aspects of immunological mechanisms, serological reactions; hypersensitivity, allergy, and disorders of the immune system. **PREREQS:** One upper-division course in biochemistry; one year of physics; one-year sequence in general biological sciences or equivalent; instructor approval required.**VMB 621. GENERAL PATHOLOGY (4).**General principles of pathology, cell injury and death, inflammation and tissue repair, abnormalities of cell growth, and structures and mechanisms of disease. **PREREQS:** One year of inorganic chemistry, including a lab; one upper-division course in biochemistry; one term of physics; one-year sequence in general biological sciences or equivalent; must be taken in sequence. Instructor approval required.**VMB 622. PATHOLOGY LABORATORY (1).**Laboratory instruction to complement VMB 621. **PREREQS:** VMB 611* and one course in histology and instructor approval required.**VMB 627. ORNAMENTAL FISH MEDICINE (2).**An introduction to the basic principles of ornamental fish medicine including basic husbandry, handling and clinical procedures. This is a 1-week intensive course held at the Hatfield Marine Science Center in Newport, Oregon. Graded P/N. **PREREQS:** Graduate standing and instructor's permission.**VMB 630. MECHANISMS OF DISEASE (3).**Cellular and molecular events that contribute to the pathogenesis of disease in animals, including humans. Host interactions with infectious agents and the environment. **PREREQS:** Graduate status in a biomedical discipline. Prior courses in biochemistry, immunology, microbiology, and physiology are recommended. Instructor approval required.**VMB 631. MATHEMATICAL MODELING OF BIOLOGICAL SYSTEMS (3).**The use of mathematical modeling in biological sciences is studied. A variety of modeling techniques are covered including implementing the methods computationally. **PREREQS:** Graduate standing or permission of instructor.**VMB 640. SEMINARS IN LABORATORY ANIMAL MEDICINE (2).**Prepares students for careers in laboratory animal medicine. Provides a review of medical conditions, diagnosis and treatment of research animals. **PREREQS:** DVM degree or equivalent or permission of instructor.**VMB 641. SEMINARS IN LABORATORY ANIMAL MEDICINE (2).**Prepares students for careers in laboratory animal medicine. Provides a review of medical conditions, diagnosis and treatment for research animals. **PREREQS:** DVM or equivalent required or permission of instructor.**VMB 642. SEMINARS IN LABORATORY ANIMAL MEDICINE (2).**Prepares students for careers in laboratory animal medicine. Provides a review of medical conditions, diagnosis and treatment for research animals. **PREREQS:** DVM or equivalent required or permission of instructor.**VMB 651. SELECTED TOPICS IN VETERINARY MEDICINE (3).**Topics vary; check Schedule of Classes for particular topics. **PREREQS:** Graduate standing and instructor approval required.**VMB 653. VETERINARY VIROLOGY (4).**Virology for the professional and graduate student. **PREREQS:** Graduate standing or advanced undergraduate in science or engineering, with permission of instructor.**VMB 659. VETERINARY BACTERIOLOGY AND MYCOLOGY (5).**Veterinary bacteriology and mycology for the veterinary graduate student. **PREREQS:** Graduate standing or advanced undergraduate in science or engineering, with permission of instructor.

VMB 660. VETERINARY PARASITOLOGY (5). A study of the parasitic diseases of domestic animals with an emphasis on diagnosis and treatment. Fundamentals in host-parasite interactions, taxonomy and life cycle strategies are covered. **PREREQS:** Graduate standing or advanced undergraduate in science or engineering, with permission of instructor.

VMB 663. VETERINARY DIAGNOSTIC PATHOLOGY (6). Practical hands-on course training students in the diagnostic pathology utilizing case material received at the OSU Veterinary Diagnostic Lab. Graded P/N. **PREREQS:** DVM degree or equivalent required.

VMB 664. COMPARATIVE MICROSCOPIC PATHOLOGY (1). Case-based discussion course to train participants in the recognition, description, and pathogenesis of a wide variety of disease processes with an emphasis on microscopic features. Graded P/N. This course is repeatable for a maximum of 4 credits. **PREREQS:** DVM degree or equivalent.

VMB 665. READINGS IN VETERINARY PATHOLOGY (1). Group discussions of assigned readings central to understanding of veterinary pathology, including recent advances. Graded P/N. This course is repeatable for a maximum of 6 credits. **PREREQS:** DVM degree or equivalent.

VMB 666. VETERINARY MEDICINE AND PUBLIC HEALTH (3). Covers aspects of veterinary medicine that affect human health. An understanding of the contribution of the veterinary profession to human (public) health will enable students to play an effective role in this area, regardless of career direction. **PREREQS:** Instructor permission or admission to MPH degree program.

VMB 667. VETERINARY EPIDEMIOLOGY (3). A course for veterinary students describing the factors determining the frequency and distribution of diseases, in a defined population of animals for the purpose of establishing programs to prevent and control their development and spread in this population. **PREREQS:** Graduate standing and instructor approval required.

VMB 671. MOLECULAR TOOLS (3). Intended for personnel with some scientific background who are seeking basic- and advanced-level molecular biology knowledge and who wish to become involved with molecular biology-related and biotechnological research. **CROSSLISTED** as MCB 671. **PREREQS:** Graduate standing or advanced undergraduate in science or engineering, with permission of instructor.

VMB 672. MOLECULAR APPROACH TO CANCER (1). Overview of cancer pathogenesis and current molecular techniques to diagnose and treat various neoplasms is provided. Content will include both veterinary and human data and concepts. Discussion/Lab. Graded P/N.

VMB 673. COMPARATIVE IMMUNOLOGY (3). Examines immune system function in animals other than mice and men with a focus on adapting cutting-edge technologies. **PREREQS:** Baccalaureate degree or instructor permission

VMB 701. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

VMB 705. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

VMB 706. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

VMB 709. VETERINARY MEDICINE ORIENTATION (1). An overview of veterinary medicine with emphasis on historical development, current veterinary medical issues, employment opportunities, and professionalism. Graded P/N. **PREREQS:** First-year standing in veterinary medicine.

VMB 711. VETERINARY GROSS ANATOMY (4). Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. **PREREQS:** First-year standing in veterinary medicine. VMB 711, VMB 712, VMB 713 must be taken in sequence.

VMB 712. VETERINARY GROSS ANATOMY (4). Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. **PREREQS:** VMB 711 and first-year standing in veterinary medicine. VMB 711, VMB 712, VMB 713 must be taken in sequence.

VMB 713. VETERINARY GROSS ANATOMY (4). Systematic and topographic study and dissection of the dog, cat, horse, ruminant, pig, and chicken. Lec/lab. **PREREQS:** VMB 712 and first-year standing in veterinary medicine. VMB 711, VMB 712, VMB 713 must be taken in sequence.

VMB 714. VETERINARY MICROSCOPIC ANATOMY (4). Structure and development of cells, tissues, organs, and organ systems of animals. **PREREQS:** First-year standing in veterinary medicine.

VMB 715. VETERINARY MICROSCOPIC ANATOMY (3). Structure and development of cells, tissues, organs, and organ systems of animals. **PREREQS:** VMB 714 and first-year standing in veterinary medicine.

VMB 716. VETERINARY NEUROSCIENCES (4). Structural and functional relationships of the nervous system and organs of special sense with emphasis on general clinical application. **PREREQS:** First-year standing in veterinary medicine.

VMB 717. VETERINARY PHYSIOLOGY (5). Physiology of body fluids, excretion, respiration, acid-base balance, blood, muscle, bone, cardiovascular system, digestion, metabolism, endocrine system, reproduction, and lactation. **PREREQS:** First-year standing in veterinary medicine. VMB 717, VMB 718, VMB 719 must be taken in sequence.

VMB 718. VETERINARY PHYSIOLOGY (5). Physiology of body fluids, excretion, respiration, acid-base balance, blood, muscle, bone, cardiovascular system, digestion, metabolism, endocrine system, reproduction, and lactation. **PREREQS:** VMB 717 and first-year standing in veterinary medicine.

VMB 719. VETERINARY PHYSIOLOGY (4). Physiology of body fluids, excretion, respiration, acid-base balance, blood, muscle, bone, cardiovascular system, digestion, metabolism, endocrine system, reproduction, and lactation. Lec/lab. **PREREQS:** VMB 718 and first-year standing in veterinary medicine.

VMB 720. VETERINARY IMMUNOLOGY (5). Clinical and diagnostic aspects of immunological mechanisms, serological reactions, hypersensitivity, allergy, and disorders of the immune system. Lec/lab. **PREREQS:** First-year standing in veterinary medicine.

VMB 721. VETERINARY PATHOLOGY (5). Basic mechanisms and concepts relating to reaction of cells and tissues to disease, with emphasis on cellular and tissue degeneration, inflammatory reaction, circulatory disturbance and neoplasia. Lec/lab. **PREREQS:** First-year standing in veterinary medicine.

VMB 726. PET BIRD AND SMALL MAMMAL MEDICINE AND SURGERY (2). Medicine and surgery of pet birds and small animals. Graded P/N. **PREREQS:** Third-year standing in veterinary medicine.

VMB 727. ORNAMENTAL FISH MEDICINE (2). An introduction to the basic principles of ornamental fish medicine including basic husbandry, handling and clinical procedures. Graded P/N. **PREREQS:** Fourth-year standing in veterinary medicine.

VMB 728. SPECIAL ANIMAL MEDICINE (4). Diagnosis, treatment, and management of special animals, including the common laboratory animals. This course is repeatable for a maximum of 8 credits. **PREREQS:** Third-year standing in veterinary medicine.

VMB 729. LAB ANIMAL/PRIMATE MEDICINE AND SURGERY (3-12). Designed to provide hands-on experience with a variety of laboratory animal species including primates, rodents, ungulates, fish, and reptiles. May be repeated up to 4 times for 3, 6, 9 or 12 credits per term. 12 credits maximum apply toward graduation. Graded P/N. This course is repeatable for a maximum of 12 credits. **PREREQS:** Completion of first year of veterinary medicine.

VMB 736. DIAGNOSTIC CLINICAL PATHOLOGY (2). One week clinical experience in clinical pathology, cytology, urinalysis, clinical chemistry interpretation and hematology. Lec/lab.

VMB 740. VETERINARY INTEGRATED PROBLEM SOLVING (1). The first of three 1-credit courses in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. **PREREQS:** First-year professional standing.

VMB 741. VETERINARY INTEGRATED PROBLEM SOLVING (1). The second of three 1-credit courses in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. **PREREQS:** First-year professional standing.

VMB 742. VETERINARY INTEGRATED PROBLEM SOLVING (1). The third of three 1-credit courses in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Graded P/N. **PREREQS:** First-year professional standing.

VMB 743. VETERINARY INTEGRATED PROBLEM SOLVING (1). A course in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Students learn through interaction with their peers and with independent study outside of class. Graded P/N. This course is repeatable for a maximum of 4 credits.

VMB 744. VETERINARY INTEGRATED PROBLEM SOLVING (1). A course in problem solving and integration of clinical cases and basic sciences in the veterinary curriculum. Students learn through interaction with their peers and with independent study outside of class. Graded P/N. **PREREQS:** Second-year professional standing.

VMB 745. COMMUNICATIONS FOR VETERINARIANS (1). Communications and problem solving for the third-year veterinary student. Graded P/N. **PREREQS:** Third-year standing in veterinary medicine.

VMB 749. WILDLIFE SAFARI (2). Clinical training in the care of exotic and zoo animal species. Graded P/N. **PREREQS:** Fourth-year standing in veterinary medicine.

VMB 750. SYSTEMIC PATHOLOGY I (4). Examines the principles of system and organ responses to injury and the consequent effects of these changes on the host. **PREREQS:** Second-year professional standing.

VMB 751. SYSTEMIC PATHOLOGY II (5). Examines the principles of system and organ responses to injury and the consequent effects of these changes on the host. **PREREQS:** Second-year professional standing.

VMB 753. VETERINARY VIROLOGY (4). Virology for the professional DVM student. **PREREQS:** Second-year professional standing.

VMB 756. CLINICAL SERVICE II (6). Advanced clinical experience in radiology, clinical pathology, microbiology, or necropsy. Graded P/N. **PREREQS:** VMB 736 and Fourth-year standing in veterinary medicine.

VMB 759. VETERINARY BACTERIOLOGY AND MYCOLOGY (5). Bacteriology and mycology for the professional DVM student. **PREREQS:** Second-year professional standing.

VMB 760. VETERINARY PARASITOLOGY (5). A study of the parasitic diseases of domestic animals with an emphasis on diagnosis and treatment. Fundamentals in host-parasite interactions, taxonomy and life cycle strategies are covered. **PREREQS:** Second-year professional standing.

VMB 761. VETERINARY PHARMACOLOGY (2). Fundamentals of pharmacology as related to veterinary medicine presented in a systems-oriented approach with drug therapy in domestic animals. **PREREQS:** Second-year professional standing.

VMB 762. VETERINARY PHARMACOLOGY II (4). Fundamentals of pharmacology as related to veterinary medicine presented in a systems-oriented approach with drug therapy in domestic animals. **PREREQS:** Second-year professional standing.

VMB 763. VETERINARY CLINICAL PATHOLOGY (4). Clinical pathology for the professional DVM student. **PREREQS:** Second-year professional standing.

VMB 765. VETERINARY TOXICOLOGY (4). A study of toxic agents, mechanisms of action, toxicosis and treatments, especially as related to domestic and wild animals, with principles of toxicity testing, clinical diagnosis, and identification of poisonous plants. Lec/lab. **PREREQS:** Second-year professional standing.

VMB 766. VETERINARY MEDICINE AND PUBLIC HEALTH (3). Examines aspects of veterinary medicine that affect human health. An understanding of the contributions of the veterinary profession to human health will enable you to play an effective role in this area, regardless of your career direction. **PREREQS:** Second-year professional standing.

VMB 767. VETERINARY EPIDEMIOLOGY (3). Examines factors determining the frequency and distribution of diseases in a defined population of animals for the purpose of establishing programs to prevent and control their development and spread in this population.

VMB 768. BASIC HISTOPATHOLOGY (1). A rotation in histopathology at the Veterinary Diagnostic Laboratory. Emphasis is placed on case evaluation, diagnosis and report writing of biopsies of all species. Graded P/N. **PREREQS:** VMB 751 and third-year standing in veterinary medicine.

VMB 769. ANIMAL GENOMICS (1). Discussion about the dog and cow genomes, susceptibility to diseases, and the possibilities and techniques for treatment of medical conditions by gene transfer and modification. **PREREQS:** Mandatory graduate standing in science or third- or fourth-year student in the College of Veterinary Medicine.

VMB 772. INTERNATIONAL VETERINARY MEDICINE (2). Veterinary students work with veterinarians and domestic animals in international settings. Graded P/N. This course is repeatable for a maximum of 4 credits.

VMB 774. LABORATORY ANIMAL MEDICINE (6). Clinical experience related to diagnosis, treatment, and management of laboratory animals. Graded P/N. **PREREQS:** Fourth-year professional standing.

VMB 775. PRACTICE MANAGEMENT (2). Examines the world of work and career development theories using career assessment, literature, media and computer resources. Graded P/N. This course is repeatable for a maximum of 2 credits. **PREREQS:** Third-year professional standing.

VMB 786. ADVANCED HISTOPATHOLOGY (2). A rotation in histopathology at the Veterinary Diagnostic Laboratory. Emphasis is placed on case evaluation, diagnosis and report writing of biopsies of all species. **PREREQS:** Fourth-year standing in veterinary medicine, VMB 751 is mandatory.

VMB 795. DIAGNOSTIC SERVICES (2). Students will perform service duty in the necropsy area of the Veterinary Diagnostic Laboratory and will perform necropsies on delivered specimens. Other activities.

COURSES

VMC 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

VMC 503. THESIS (1-12). This course is repeatable for a maximum of 999 credits.

VMC 505. READING AND CONFERENCE (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

VMC 507. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

VMC 601. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

VMC 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

VMC 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

VMC 606. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

VMC 607. SEMINAR (1-16). One-credit section; VMC 607 Sect. 1. Graded P/N. This course is repeatable for a maximum of 16 credits.

VMC 632. POSTGRADUATE MEDICINE (3-7). An interactive, practical course on the role of scholarship in clinical medicine, including techniques to develop and conduct research in

a clinical setting. This course is repeatable for a maximum of 16 credits. **PREREQS:** Enrollment in a clinical residency and DVM degree or equivalent and graduate standing.

VMC 634. POSTGRADUATE SURGERY (3-7). An interactive, practical course on the role of scholarship in clinical surgery, including techniques to develop and conduct research in a clinical setting. This course is repeatable for a maximum of 16 credits. **PREREQS:** Enrolled in CVM residency program and graduate standing.

VMC 637. POSTGRADUATE CARDIOLOGY (3-7). An interactive, practical course on the role of scholarship in clinical cardiology, including techniques to develop and conduct research in a clinical setting. This course is repeatable for a maximum of 16 credits. **PREREQS:** Enrollment in a clinical residency and DVM degree or equivalent and graduate standing.

VMC 651. SELECTED TOPICS IN VETERINARY MEDICINE (3). Topics vary; check Schedule of Classes for particular topics. **PREREQS:** Graduate standing and instructor approval required.

VMC 680. VETERINARY MEDICAL PRECEPTORSHIP (1-16). Clinical experience in veterinary medicine for students in the combined DVM-MPH program. Graded P/N. This course is repeatable for a maximum of 16 credits.

VMC 682. TOPICS IN INTERNAL MEDICINE (2-4). In-depth investigation of important topics in physiology, pathophysiology, treatment, diagnosis, and other aspects of internal medicine through investigation of primary literature and recent reviews. This course is repeatable for a maximum of 16 credits. **PREREQS:** Enrollment in a clinical residency and DVM degree or equivalent.

VMC 684. TOPICS IN SURGERY (2-4). In-depth investigation of important topics in physiology, pathophysiology, treatment, diagnosis, and other aspects of surgery through investigation of primary literature and recent reviews. This course is repeatable for a maximum of 16 credits. **PREREQS:** Enrollment in a clinical residency and DVM degree or equivalent.

VMC 701. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

VMC 705. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

VMC 706. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

VMC 711. CLINICAL CARDIOLOGY (1-4). A one-week clinical elective rotation in cardiology at the Veterinary Teaching Hospital. May be repeated up to 4 times, two weeks or more is encouraged. This course is repeatable for a maximum of 4 credits. **PREREQS:** Fourth-year standing in veterinary medicine required.

VMC 712. CLINICAL ONCOLOGY (1-4). A one-week clinical elective rotation in clinical oncology at the Veterinary Teaching Hospital. May be repeated up to 4 times, two weeks or more is encouraged. This course is repeatable for a maximum of 4 credits. **PREREQS:** VMC 778 and fourth-year standing in veterinary medicine.

VMC 714. SMALL ANIMAL DENTISTRY (1). A clinical course designed to provide students with hands-on training in diagnosis, treatment and prophylaxis of dental diseases of dogs and cats. **PREREQS:** 4th-year standing in the professional veterinary curriculum.

VMC 715. CASE STUDIES IN SMALL ANIMAL MEDICINE I (1). A case-based course involving diseases and conditions of the endocrine, gastrointestinal and hepatobiliary systems as well as neoplastic and infectious diseases of small animals. **PREREQS:** Third-year professional standing in veterinary medicine.

VMC 716. CASE STUDIES IN SMALL ANIMAL MEDICINE II (1). A case-based course involving diseases and conditions of the cardiovascular, respiratory and urogenital systems as well as emergent diseases and conditions. **PREREQS:** Third-year professional standing in veterinary school.

VMC 717. CASE STUDIES IN SMALL ANIMAL MEDICINE III (1). A case-based course involving diseases and conditions of the dermatologic, neurologic, ophthalmologic, and hemolympathic systems. **PREREQS:** Third-year professional standing in veterinary school.

VMC 718. SMALL ANIMAL PREVENTIVE MEDICINE (2). Introductory course to basic concepts in small animal preventive medicine including vaccine immunology, vaccine strategies, internal/external parasite control, nutrition in disease prevention, and wellness programs for dogs and cats. **PREREQS:** Third-year standing in veterinary school.

VMC 720. VETERINARY CLINICAL NUTRITION (2). To examine the nutritional needs of many species of veterinary importance. Emphasis is placed on designing feeding programs to optimize health and animal performance. **PREREQS:** First-year standing in the professional veterinary curriculum.

VMC 721. SMALL ANIMAL CLINICAL NUTRITION (1). Introduction to the concepts of small animal clinical nutrition and is designed for the third-year veterinary student. **PREREQS:** Third-year standing in veterinary medicine recommended.

VMC 723. ADVANCED FELINE MEDICINE (2). A one-week elective for senior students in the DVM curriculum. The course emphasizes aspects of internal medicine specific to the domestic cat. Graded P/N.

VMC 724. LARGE ANIMAL SURGERY (6). Selected surgical techniques and procedures related to equine and food animal species. This course is repeatable for a maximum of 6 credits. **PREREQS:** Third-year standing in veterinary medicine.

VMC 725. PRINCIPLES OF SURGERY (4). A basic course in the principles and techniques of surgery for the professional veterinary student. Lec/lab. **PREREQS:** Second-year standing in veterinary medicine.

VMC 726. SMALL ANIMAL THERIOGENOLOGY (1). Advanced clinical experience in small animal (canine) reproduction. Graded P/N. **PREREQS:** VMC 783

VMC 727. ADVANCED SMALL ANIMAL SURGERY (2). One-week of additional lectures and laboratories to improve surgical skills and acquire more advanced knowledge of specific surgical conditions. Lec/lab. Graded P/N. **PREREQS:** Fourth-year standing in veterinary medicine is mandatory.

VMC 731. SMALL ANIMAL EMERGENCY CARE-DOVE LEWIS (3). A two-week clinical rotation at the Dove Lewis Memorial Emergency Clinic in Portland, OR. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 732. CLINICAL LARGE ANIMAL MEDICINE I (6). Clinical medicine training in diseases of food animals and horses; clinic rounds and diagnostic procedures. This course is repeatable for a maximum of 12 credits. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 734. CLINICAL LARGE ANIMAL SURGERY I (6). Clinical surgery, treatment, and care of food animals and horses; clinical rounds; training in surgery, lameness, and diagnostic procedures. This course is repeatable for a maximum of 12 credits. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 735. RURAL VETERINARY PRACTICE I (6). Rural practice training in diseases of food animals and horses. This course is repeatable for a maximum of 12 credits. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 737. LARGE ANIMAL ANESTHESIOLOGY (4). A three-week rotation in veterinary anesthesiology utilizing patients presented to the veterinary teaching hospital. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 738. INTRODUCTION TO ANIMAL CARE (3). Feeding, housing, breeding and marketing systems related to animal care. This course is repeatable for a maximum of 6 credits. **PREREQS:** First-year standing in veterinary medicine.

VMC 739. VETERINARY MEDICAL ETHICS (1). Introduction of ethics in veterinary medicine, with specific attention to ethical theories, ethical decision making, moral status of animals, professional ethics, and practice issues.

VMC 740. SHEEP AND GOAT MEDICINE AND SURGERY (3). Discussions of economically important sheep and goat diseases, practical surgeries, and a review of nutrition and husbandry. Graded P/N. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 741. LARGE ANIMAL GI SURGERY (2). A one-week course for 4th year veterinary students, with particular interest in gastrointestinal surgery. Graded P/N. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 742. CAMELID MEDICINE AND SURGERY (4). Designed to give students an in-depth introduction to camelid health care via hands-on work, lectures, and discussion sections. Graded P/N. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 743. ADVANCED EQUINE REPRODUCTION (3). A two-week course in advanced clinical experience in equine reproduction. Graded P/N. **PREREQS:** Third-year standing in veterinary medicine recommended.

VMC 744. ADVANCED LAMENESS IN EQUINE (3). Application of anatomy, lameness examination, nerve and joint anesthesia, diagnostic radiology, ultrasound and nuclear scintigraphy to diagnosis of lameness in horses. Graded P/N. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 746. CAINE CENTER FOOD ANIMAL MEDICINE (6). Food animal production medicine providing experience with field investigation and clinical cases. Graded P/N. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 747. VETERINARY ANESTHESIOLOGY II (3). An additional two-week clinical rotation in veterinary anesthesiology utilizing patients presented to the Veterinary Teaching Hospital. Graded P/N. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 748. EQUINE DENTISTRY (2). Utilizing modern, motorized equipment, cadaver specimens, and live hospital and client horses, students will learn and perform modern methods of equine dental prophylaxis and treatment. Graded P/N. **PREREQS:** Third-year standing in veterinary medicine.

VMC 749. CLINICAL IMAGING II (3). Advanced clinical course for 4th-year veterinary students in which they will assume additional responsibility for performing common radiographic procedures. Graded P/N. **PREREQS:** VMC 796 and fourth-year standing in veterinary medicine.

VMC 750. EQUINE CLINICAL NUTRITION (1). A one-week course for veterinary students focusing on equine nutrition that can be used in veterinary practice. Graded P/N. **PREREQS:** Third-year standing in veterinary medicine.

VMC 751. RUMINANT NUTRITION (2). An advanced course in clinical ruminant nutrition dealing with nutritional problems of ruminants that might be encountered by a practicing veterinarian. Graded P/N. **PREREQS:** Third-year standing in veterinary medicine and basic nutrition recommended.

VMC 752. CLINICAL LARGE ANIMAL MEDICINE II (3-6). Additional clinical medicine training. Graded P/N. This course is repeatable for a maximum of 6 credits. **PREREQS:** VMC 732

VMC 754. CLINICAL LARGE ANIMAL SURGERY II (3 or 6). Additional clinical surgery training. Graded P/N. This course is repeatable for a maximum of 6 credits. **PREREQS:** VMC 734

VMC 755. RURAL VETERINARY PRACTICE II (3-6). One additional rural practice training. Graded P/N. This course is repeatable for a maximum of 6 credits. **PREREQS:** VMC 735

VMC 757. SMALL ANIMAL SURGERY (6). Small animal medicine and surgical techniques and procedures. Graded P/N. **PREREQS:** Fourth-year professional standing.

VMC 758. CATTLE PRODUCTION MEDICINE (3). Clinical application of production medicine practices to dairy and beef cattle practice. Graded P/N. **PREREQS:** VMC 735 and fourth-year professional standing or instructor approval required.

VMC 759. LARGE ANIMAL PALPATION (1). A laboratory for additional experience in rectal palpation of large animals, for third-year veterinary students. Graded P/N. **PREREQS:** Third-year standing in veterinary medicine recommended.

VMC 763. ADVANCED CLINICAL CARDIOLOGY (1). An elective course for junior veterinary students detailing diagnosis and management of the common congenital and acquired cardiac diseases of domestic animals. **PREREQS:** Third-year standing in veterinary medicine.

VMC 764. DIAGNOSTIC IMAGING (4). A lecture and laboratory course in diagnostic imaging covering physics or radiography and ultrasonography, radiation safety and image interpretation for small and large animals, presented by body systems. **PREREQS:** Second-year professional standing.

VMC 765. ADVANCED CLINICAL RADIOLOGY (1). An elective advanced radiology case-based course for Year 3 veterinary medicine students that focuses on radiographic findings of commonly encountered clinical disease. **PREREQS:** VMC 764 or equivalent course.

VMC 768. PRINCIPLES OF ANESTHESIA (4). A basic course in the principles and techniques of surgery and anesthesia for the professional veterinary student. Lec/lab. **PREREQS:** Second-year professional standing.

VMC 769. GENERAL MEDICINE (2). An introduction to medicine with a discussion of the principles of medicine that would be applicable to all species. Physical examination, clinical diagnosis, pathophysiology of signs of disease in domestic animals, therapeutic principles and diagnostic procedures. **PREREQS:** Second-year professional standing.

VMC 770. LARGE ANIMAL MEDICINE I (4). The first of three courses in large animal medicine for third-year professional veterinary students covering diagnosis and treatment of domestic large animals.

VMC 771. LARGE ANIMAL MEDICINE II (4). Diagnosis, treatment and control of diseases of large domestic animals, specifically gastrointestinal, hepatobiliary diseases, weight loss, and introduction to production medicine, and some swine diseases. **PREREQS:** VMC 770

VMC 772. LARGE ANIMAL MEDICINE III (4). Diagnosis, treatment and control of diseases of large domestic animals, specifically central nervous system, mastitis, musculoskeletal, sudden death, skin, and some swine diseases. **PREREQS:** VMC 770 and VMC 771

VMC 773. MEDICINE LABORATORY I (1). Laboratory experience for third-year veterinary students concurrent with the large and small animal medicine courses. **PREREQS:** Third-year standing in veterinary medicine.

VMC 774. MEDICINE LABORATORY II (1). Laboratory experience for third-year veterinary students concurrent with the large and small animal medicine courses. **PREREQS:** Third-year standing in veterinary medicine.

VMC 776. SMALL ANIMAL MEDICINE I (5). A course for veterinary students describing major topics of small animal internal medicine, using both a systems-based approach and a problem-based approach.

VMC 777. SMALL ANIMAL MEDICINE II (5). A course for veterinary students describing major topics of small animal internal medicine, using both a systems-based approach and a problem-based approach. **PREREQS:** VMC 776

VMC 778. SMALL ANIMAL MEDICINE III (5). A course for veterinary students describing major topics of small animal internal medicine, using both a systems-based approach and a problem-based approach. **PREREQS:** VMC 776 and VMC 777

VMC 779. CANINE/EQUINE SPORTS MEDICINE (1). One-week elective encompassing basic exercise physiology, sports-related injuries, injury rehabilitation, training and nutrition of equine athletes. **PREREQS:** Fourth-year standing in the DVM program.

VMC 780. VETERINARY MEDICAL PRECEPTORSHIP (1-16). Theory of practice of veterinary medicine in a non-university situation. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Fourth-year professional standing.

VMC 781. SEMINAR IN VETERINARY MEDICINE (1-16). Seminars and case discussions on selected topics by students, staff, and others. Graded P/N. This course is repeatable for a maximum of 16 credits.

VMC 782. EMERGENCY CARE (1). One-week rotation in the Veterinary Teaching Hospital during non-regular hours. Practice and instruction in caring for critically ill patients. **PREREQS:** Fourth-year professional standing.

VMC 783. THERIOGENOLOGY I (4). To present the clinical applications of reproductive physiology, anatomy, embryology, pathology and microbiology in domesticated animals.

VMC 785. SMALL ANIMAL SURGERY (7). A lecture and laboratory course covering the diagnosis, operative methods, and aftercare of common small animal surgical conditions.

VMC 786. ANIMAL BEHAVIOR (1). Diagnosis and treatment of feline, canine and equine problem behaviors including aggression, anxiety, house-soiling and compulsive behaviors.

VMC 787. THIRD-YEAR CLINICS (1). An introductory clinical experience for third-year veterinary students.

VMC 788. BUSINESS APPLICATIONS IN PRIVATE SMALL ANIMAL PRACTICE (1). A hands-on elective course exploring the business of small animal general practice in a case-based approach. This course is repeatable for a maximum of 2 credits. **PREREQS:** 4th year standing in veterinary school.

VMC 789. PET PRACTICE (3). Additional clinical training in primary care pet practice at a Banfield Pet Hospital. Graded P/N. This course is repeatable for a maximum of 6 credits. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 790. CLINICAL EXPERIENCE (1-16). One- to four-week periods. Section 1: Large Animal Clinical Experience/Topics (1-16). Section 2: Small Animal Clinical Experience/Topics (1-16). Section 3: Mixed Animal Clinical Experience/Topics (1-16). Section 4: Small Animal Private Practice (1-16). Section 5: Special Studies (1-16). Some sections graded P/N. Lec/lab. This course is repeatable for a maximum of 48 credits. **PREREQS:** Fourth-year professional standing.

VMC 791. CLINICAL SMALL ANIMAL MEDICINE (6). A clinical rotation in small animal internal medicine at the Veterinary Teaching Hospital. Emphasis will be placed on patient evaluation, diagnosis and treatment of diseases of dogs and cats. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 792. CLINICAL SMALL ANIMAL MEDICINE II (3-6). A two-week, three-credit clinical elective rotation in small animal internal medicine at the Veterinary Teaching Hospital. Emphasis will be placed on patient evaluation, diagnosis and treatment of diseases of dogs and cats. This course is repeatable for a maximum of 6 credits. **PREREQS:** VMC 791 is recommended.

VMC 793. CLINICAL SMALL ANIMAL SURGERY (6). Clinical training in small animal surgery in the Veterinary Teaching Hospital. **PREREQS:** VMC 725 and VMC 785 and fourth-year standing in veterinary medicine.

VMC 794. OHS SMALL ANIMAL PRIMARY CARE (4). Three-week rotation at OHS to gain experience with an emphasis on surgery, medical case workup, exam room protocol and behavior basics. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 795. NECROPSY AND EMERGENCY (3). Clinical experience in necropsy to learn proper necropsy and sample collection techniques. Students also will assist in the Veterinary Teaching Hospital during evening hours, learning to care for critically ill patients. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 796. CLINICAL IMAGING (3). A clinical course for 4th-year veterinary students in which they will assume primary responsibility for performing common radiographic procedures. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 797. SMALL ANIMAL CRITICAL CARE AND HOSPITAL SERVICE ROTATION (1). A one-week clinical rotation in small animal critical care managing small animal cases in the intensive care unit at the Veterinary Teaching Hospital. **PREREQS:** Fourth-year standing in veterinary medicine.

VMC 798. CLINICAL SMALL ANIMAL SURGERY II (3-6). Clinical training in small animal surgery in the College of Veterinary Medicine, Lois B. Acheson Veterinary Teaching Hospital. This course is repeatable for a maximum of 6 credits. **PREREQS:** VMC 725 and VMC 785 and VMC 793 recommended.

VMC 799. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

THE RESEARCH OFFICE

Oregon State is one of only two land, sea, space and sun grant institutions in the U.S., holds a top tier research designation from the Carnegie Foundation, and is the state's largest public research university. Oregon State research totaled almost \$263 million in fiscal year 2013, and private sector financing reached nearly \$36 million, a 42 percent increase in the past two years.

The OSU Research Agenda, integrated with the university's strategic plan, guides faculty inquiry in OSU's three signature areas of distinction: Advancing the Science of Sustainable Earth Ecosystems; Improving Human Health and Wellness; and Promoting Economic Growth and Social Progress.

Headed by the vice president for research, the Research Office serves faculty involved in research, innovation, scholarship, and creativity in all OSU colleges and in a variety of multidisciplinary centers, institutes and programs. The office provides support to secure funding, comply with regulations, partner with industry, establish collaborations across the university and raise the profile of OSU.

INCENTIVE PROGRAMS

Website: <http://oregonstate.edu/research/incentive/>

The Research Office provides funding for faculty success. The General Research Fund is for projects not otherwise supported by organized or directed programs. Faculty Release Time provides funding for developing external grant proposals or furthering scholarly activities. Research Equipment Reserve Funds help acquire, repair, renovate, or improve equipment. The Undergraduate Research, Innovation, Scholarship and Creativity Fund enables students to initiate scholarly relationships with faculty early in their academic careers.

OSU ADVANTAGE

Website: <http://oregonstate.edu/advantage/home>

The Oregon State University Advantage connects business with faculty expertise, student talent and world-class facilities to research solutions, bring ideas to market and launch companies. The OSU Advantage helps faculty take their research and projects into the marketplace where they can have real-world impacts, and provides opportunities to new sources of funding to carry on important and impactful work. Three aligned organizations offer this opportunity: Advantage Accelerator, Advantage Partnerships, and Advantage Impact.

OFFICE OF RESEARCH INTEGRITY

Website: <http://oregonstate.edu/research/ori/>

The Office of Research Integrity (ORI) works with OSU faculty, staff, and students to help assure proper conduct of research in areas pertaining to the use of

human subjects, and non-human vertebrate animals. The office also works with faculty and Academic Affairs to identify and appropriately manage issues that could be perceived to present financial conflicts of interest. The university's Small Boat and Diving Safety programs are overseen by the office, as are issues related to technology export controls. The ORI's purpose is to facilitate the research efforts of OSU faculty, staff and students by helping them to remain compliant with the many federal and state research regulations that assure the integrity of research, the safety of all, and the ethical treatment of human and animal subjects.

OFFICE OF SPONSORED PROGRAMS

Website: <http://oregonstate.edu/research/osp/>

The Office of Sponsored Programs (OSP) has central responsibility for proposal submission for sponsored research, scholarship, instructional and other activities at Oregon State and contractual compliance as it relates to sponsored activities. OSP balances service to OSU faculty and staff, university administration, and the numerous organizations that sponsor Oregon State University activities. Functions include proposal review, monitoring institutional compliance with terms and conditions, official institutional signatory, policy and procedure development, training, compliance activities related to research administration, and general funding opportunity assistance.

OFFICE FOR COMMERCIALIZATION AND CORPORATE DEVELOPMENT (OCCD)

Website: <http://oregonstate.edu/research/occd>

The OCCD leads OSU's industry-sponsored research efforts and the commercialization of OSU innovations by evaluating markets, developing an intellectual property protection strategy and executing research, confidentiality, materials transfer, licensing and other industry agreements. The OCCD is the bridge to commercial entities—from Oregon-based startups to large international companies, the OCCD facilitates OSU research to impact the world.

OFFICE FOR RESEARCH DEVELOPMENT (ORD)

Website: <http://oregonstate.edu/research/office-research-development>

The ORD provides leadership in strategic planning, implementation, coordination, and review of large research proposals across campus, and manages the University Limited Submission process. The primary responsibilities of the ORD are to identify and develop new external funding sources, increase funding support for the university, facilitate the development of research

partnerships, research future grant opportunities, and provide education for faculty and administrators to encourage applications for grant funding.

MULTIDISCIPLINARY CENTERS AND INSTITUTES

Website: <http://oregonstate.edu/research/ci>

Addressing many of the world's most pressing challenges requires collaborative efforts of scientists, engineers, social scientists, and humanists to attain long-lasting, high impact results. OSU fosters these dynamic transdisciplinary collaborations through a variety of centers, institutes and programs. With particular strengths in material sciences, ocean and earth sciences, enterprise innovation and economic development, health sciences, and natural resources, OSU investigators, representing virtually every college on campus, team to conduct cutting-edge research, provide undergraduate and graduate education, and proactively engage communities throughout Oregon and the world in helping them address their greatest needs.

The following centers and institutes are administered by the OSU Research Office.

1. Center for Genome Research and Biocomputing
2. Center for Latin@ Studies and Engagement (CL@SE)
3. Center for Research on Lifelong STEM Learning
4. Center for the Humanities
5. Cooperative Institute for Marine Resources Studies (CIMRS)
6. Environmental Health Sciences Center
7. Hatfield Marine Science Center
8. Institute for Natural Resources (INR)
9. Institute for Water and Watersheds (IWW)
10. Laboratory Animal Resources Center (LARC)
11. Linus Pauling Institute
12. Native American Collaborative Institute (NACI)
13. Northwest National Marine Renewable Energy Center (NNMREC)
14. Oregon NASA Space Grant Consortium
15. Oregon Sea Grant
16. Radiation Center
17. Superfund Research Center

OSU RESEARCH OFFICE CENTERS AND INSTITUTES

CENTER FOR GENOME RESEARCH AND BIOCOMPUTING

Brett Tyler, Director

Website: <http://www.cgrb.oregonstate.edu/>

Mission Statement

The Center for Genome Research and Biocomputing facilitates the development, application and training in computationally intensive, genome-enabled research at OSU and across the state. Research in the CGRB and faculty affiliate laboratories seeks to improve health, better utilize natural and agricultural resources, understand our global environment, and develop new bio-based products and energy sources. The center offers leadership and services to faculty, staff and students through core laboratories, computational facilities, seminars and technology workshops, and conferences. It also provides a focal point for researchers to establish contacts, initiate collaborations, and apply new technologies in their own laboratories.

Functions of the CGRB

Over 100 OSU faculty, all holding primary appointments in academic departments of the colleges of Agricultural Sciences; Engineering; Forestry; Pharmacy; Science; Veterinary Medicine; or Earth, Ocean, and Atmospheric Sciences; are affiliate members of the center. The center was established in 1983 as a university resource to develop cell and molecular biology research. Today, the CGRB facilitates development, application and training in computationally intensive, genome-enabled research at OSU and across the state. The CGRB functions and facilities include:

1. Staffed Core Laboratory facilities that provide a variety of services in genomics, functional genomics, imaging and genotyping;
2. Staffed biocomputing facilities with an extensive hardware infrastructure, which includes a managed cluster and shared resources;
3. Computational scientists and staff to facilitate implementation of a computationally intensive research program;
4. Seminar Series that features leading scientists in molecular and genomic biosciences, and frequent technology training workshops that feature cutting-edge technologies;
5. Annual Fall Conference that brings together faculty, staff and students from across OSU;
6. Coordination of the OSU Computational and Genome Biology Initiative.

CGRB Core Laboratories

A key part of the center is the CGRB Core Laboratories that provide services, technical expertise, collaborative functions and share-use equipment for molecular bioscience research at OSU. The core labs are a fully staffed facility that serves as a focal point for acquisition and development of new instrumentation and technologies. A professional staff of five provides service in four areas:

- *Genomics*—DNA sequencing, high throughput sequencing (Illumina), genotyping and fragment analysis;
- *Functional genomics*—NimbleGen and Affymetrix GeneChip microarray services for analysis of global gene expression patterns in all types of organisms;
- *Biocomputing and bioinformatics*—advanced computational resources for data mining, data analysis and database development;
- *Imaging and image analysis*—a confocal laser scanning microscope facility for high resolution analysis of a wide variety of specimens. In addition, the center maintains a set of common-use instruments and computers for research and data presentation.
- In addition, the CGRB provides shared instrumentation, including real time PCR, scanners, robotics, and computational facilities for use by walk-in users.
- *Seminars, conferences, training*—Bi-weekly CGRB seminar, annual conference, Gene D. Knudson Lectures in Molecular Genetics, technology training (e.g. high-throughput sequencing, bioinformatics training, etc.). The center coordinates a seminar program in which faculty, staff and students can interact with outstanding scientists from other institutions and organizations. The center also sponsors a yearly conference for scientific exchange, building collaborations, strengthening ties across departmental and college boundaries, and social interaction.
- *Consolidation and coordination of bioscience faculty*—over 100 faculty are affiliated with the CGRB. The CGRB provides a consolidating function to organize large equipment grant proposals and other activities that require participation by several faculty. In addition, the CGRB is perceived by the administration to represent the interests of these faculty, who are spread across eight colleges.
- *Research*—In the past, the CGRB has not had an in-house research program. This is changing as the focus of the center shifts away

from simple service to more of a collaborative, enabling technology entity. In particular, the CGRB has developed significant capacity for genomic and computational biology. The CGRB director reports to the vice president for research. Scientific and administrative oversight and guidance are provided by a scientific advisory board, which has two external members, and an administrative advisory board.

THE CENTER FOR THE HUMANITIES

David M. Robinson, *Director*

Wendy Madar, *Associate Director*
Website: <http://oregonstate.edu/dept/humanities/>

The Center for the Humanities, established in 1984 through a grant from the National Endowment for the Humanities, is primarily concerned with the advancement of interdisciplinary humanities research. The Humanities Center provides fellowships to visiting scholars and OSU faculty members engaged in research and writing projects in literature, history, philosophy, foreign languages, and related humanities fields. Its programs are supported by the OSU Office of Research and the Oregon State University Foundation. Fellowship applications are screened by an advisory board made up of former fellows and OSU faculty from the College of Liberal Arts. The Humanities Center also hosts or sponsors research conferences, seminars, films, lectures, and other public programs in the humanities. The Humanities Center's fundamental concern is advancement in humanities research, teaching, and public presence at OSU. It is located in Autzen House, a gracious and historic building on the east edge of campus, 811 SW Jefferson Avenue. Contact: Center for the Humanities, 541-737-2450.

CENTER FOR LATIN@ STUDIES AND ENGAGEMENT (CL@SE)

Ronald L. Mize, *Director*
Website: <http://liberalarts.oregonstate.edu/centers-and-initiatives/center-latin-studies-and-engagement>

Mission Statement

The mission of the Center for Latin@ Studies and Engagement is to promote engaged research and outreach devoted to advancing knowledge and understanding of Latin@ life chances and the issues shaping their lived experiences in our state, region and beyond.

Overarching Goals

- To promote excellence in engaged research, teaching, and outreach in Latin@ Studies.

- To establish an action-based agenda which will promote the economic, political, physical, and educational well-being and development of the Latin@ community in rural and urban Oregon.
- To serve as a model for enhancing the university's capabilities in similarly targeted research and engagement efforts.
- To foster engaged research that is collaborative, trans-disciplinary, and community oriented; furthering both theoretical and applied knowledge to solve real-world problems.

Established Areas of Expertise

- Youth and Community Empowerment
- Socio-Economic Well-Being
- Health and Wellness
- Education
- Cultural and Historical Awareness

COOPERATIVE INSTITUTE FOR MARINE RESOURCES STUDIES

Michael A. Banks, *Director*
Website: <http://oregonstate.edu/groups/cimrs/>

The Cooperative Institute for Marine Resources Studies was established in 1982 to foster collaborative research between the National Oceanic and Atmospheric Administration (NOAA) and Oregon State University in fisheries, aquaculture, oceanography, and related fields. It also encourages education and training of scientists in disciplines related to marine resources.

Administered through the Vice President for Research, the institute is the academic home for a staff of 35 to 40 (total) research assistant, associate and full professors, research associates, and faculty research assistants and students. Headquartered at the Hatfield Marine Science Center in Newport, the institute hosts collaborative research with various NOAA investigators within OAR, NOS and NMFS, specifically, the Pacific Marine Environmental Laboratory, the Northwest Fisheries Science Center and the Alaska Fisheries Science Center, the West Coast Regional Office, as well as researchers from a broad range of colleges and departments within the entire OUS system.

Currently, the broad goal of the Cooperative Institute for Marine Resources Studies is to coordinate research focused on living and nonliving marine resources, under four primary themes:

- Marine Ecosystems and Habitat
- Protection and Restoration of Marine Resources
- Seafloor Processes
- Marine Bioacoustics

The institute works with projects that emphasize basic science and environmental impacts. The geographic area of interest extends over the eastern Pacific Ocean from northern California to the Bering Sea. The institute promotes cooperative projects between government and the university. Its cooperative agreements with NOAA laboratories provide a mechanism for OSU faculty, staff and students to work with federal scientists on research that leads to the understanding of global ocean processes and fisheries resource issues.

ENVIRONMENTAL HEALTH SCIENCES CENTER

Joseph Beckman, *Director*
Website: <http://www.ehsc.orst.edu/>

The Environmental Health Sciences Center was established in 1967 with funding by the National Institute of Environmental Health Sciences (NIEHS). As an organizational unit under the vice president for research, it provides resources for coordination and stimulation of interdisciplinary basic research and training related to the effects of environmental factors on human health.

Environmental quality problems and their resultant effects continue to challenge people's health and their ability to understand and manage the evolving impact of environmental agents. Solutions to environmental problems require the interdisciplinary scientific efforts of professionals in many fields, both to generate new knowledge and to develop a qualified cadre of scientists who can provide an improved basis for risk assessment.

The EHS Center currently brings together and uses a variety of professional capabilities of research and teaching faculty, staff, and students from numerous OSU departments, schools, and colleges within OSU. Academic areas include chemistry, biochemistry and biophysics, environmental and molecular toxicology, microbiology, molecular and cell biology, food science and technology, fisheries and wildlife, veterinary medicine, pharmacology, zoology, and statistics. The center's visiting scientists program complements research expertise in these areas.

The broad mission of the EHS Center encompasses coordinated ongoing research of its faculty and encourages research by the training and support of qualified graduate students, predoctoral candidates, and postdoctoral research associates. As one of 26 national research centers designated by NIEHS, the EHS Center at OSU enhances the collaborative scientific research of its investigators with specialized core facilities. The center serves as an interdisciplinary resource on

human health as related to the environment; it periodically awards funding for pilot projects submitted by OSU faculty to encourage new approaches in environmental health research. Selected proposals receive funding for preliminary studies, many of which have led to agency funding as major projects. It sponsors conferences, symposia, seminars, and meetings for student training, faculty consultations, and public communication. The EHS Center, through the OSU Cooperative Extension Service and other existing mechanisms, has developed a Community Outreach and Education Program to communicate and heighten public awareness about environmental issues and the related recognition of risk to human health.

Examples of specific research areas include toxicology of environmental chemicals, cellular and biochemical toxicology, immunotoxicology, naturally occurring toxins, carcinogenesis of environmental chemicals, genetic toxicology, mass spectrometric ionization processes and methodologies, heteronuclear NMR studies, the chemical basis for solid waste and chemical waste disposal, and statistical studies, e.g., temporal aspects of cancer risks.

Federal environmental health legislation, particularly the Toxic Substances Control Act, has created a greater need for qualified toxicologists. To help meet this need, many EHS Center investigators serve as faculty within the OSU MS/PhD interdisciplinary graduate Toxicology Program, as well as being faculty for the ongoing predoctoral and postdoctoral training program supported by the NIEHS and administered by the center. The focus of the training and research in environmental toxicology emphasizes determination of the mode of action of environmental chemicals; the curricula encourage use of biochemical, pathological, and pharmacological approaches to acquire a mastery in aquatic, biochemical, comparative, environmental, food, as well as general toxicology.

The administrative office of the EHS Center is in the Agricultural and Life Sciences (ALS) building; the research and teaching facilities are in the cooperating departments on campus. The EHS Center office has information available upon request.

HATFIELD MARINE SCIENCE CENTER

Robert Cowen, Director

2030 SE Marine Science Drive, Newport, OR 97365

541-867-0212, Director's Office

Email: robert.cowen@oregonstate.edu

Website: <http://hmsc.oregonstate.edu/>

The Hatfield Marine Science Center has more than 45 years of accomplishment in research, education, and outreach. Originally established as a marine laboratory for Oregon State University, it has grown to encompass a large group of partners on its 49-acre site on Yaquina Bay in Newport, Oregon. Within OSU, HMSC includes researchers, students, and faculty from six colleges. It serves as home to several university programs, including the Coastal Oregon Marine Experiment Station, the Cooperative Institute for Marine Resources Studies, and the Marine Mammal Institute. It also includes important components of the Oregon Sea Grant program and the Northwest National Marine Renewable Energy Center. Our onsite partners include six state and federal agencies involved in research and management of the marine environment, and our cooperation includes faculty appointments for agency staff, as well as opportunities for students to work with agency scientists. We work closely with local coastal communities, including the fishing industry. HMSC's Visitor Center is a key site for public education.

The dynamic nature of HMSC's programs is reflected in our mission statement:

The Hatfield Marine Science Center is Oregon State University's campus for research, education, and outreach in marine and coastal sciences. Through its partnerships, HMSC improves scientific understanding of marine systems, coastal processes and resources, and applies this knowledge to social, economic, and environmental issues.

HMSC brings OSU's diverse marine science programs together for effective collaboration and higher national and international visibility. The center plays an integral role in marine and estuarine research and instruction, as a unique laboratory facility serving resident scientists and students, and as a base for oceanographic research. With a combined budget in excess of \$45M, HMSC also plays an important economic role on the Oregon Coast.

Research facilities on the HMSC campus serve students and staff of OSU, partnering state and federal agencies, and visiting scientists from other institutions. Main buildings provide 200,000 square feet of office, library, classroom, wet and dry laboratory space and a Visitor

Center. Ship support facilities and dock areas of the College of Earth, Ocean, and Atmospheric Sciences serve the *R/V Oceanus*, *R/V Elakha*, *R/V Pacific Storm* and other research vessels. There are also housing and kitchen facilities for up to 82 students and visiting scientists on the HMSC campus.

The university encourages all marine science research, instruction, or extension activities to take advantage of the center's unique facilities.

Partners represented on the HMSC campus in Newport, Oregon:

- National Oceanic and Atmospheric Administration (NOAA)
 - Northwest Fisheries Science Center
 - Alaska Fisheries Science Center
 - Pacific Marine Environmental Laboratory
- US Environmental Protection Agency
- US Fish and Wildlife Service
- US Geological Survey
- USDA Agricultural Research Service
- Oregon Department of Fish and Wildlife
- Oregon State University
 - College of Agricultural Sciences
 - College of Education
 - College of Engineering
 - College of Forestry
 - College of Earth, Ocean, and Atmospheric Sciences
 - College of Science
 - College of Veterinary Medicine
 - Extension Service and Oregon Sea Grant
- Coastal Oregon Marine Experiment Station
- Cooperative Institute for Marine Resources Studies
- Marine Mammal Institute
- Northwest National Renewable Energy Center (NNMREC)

INSTITUTE FOR NATURAL RESOURCES

Lisa Gaines, Interim Director

Main Office: 541-737-9918

Website: <http://oregonstate.edu/inr>

Created by the Oregon Legislature with the Oregon Sustainability Act of 2001, the Institute for Natural Resources (INR) is a cooperative enterprise bringing the scientific knowledge and expertise of the Oregon University System and other Oregon higher education institutions to bear on natural resource management.

Designated as the lead university to administer INR, Oregon State University (OSU) established INR as a research institute within OSU to help decision-makers identify and use relevant science in making policy choices. At INR's foundation is the land grant mission — building bridges between theory and practice and effectively communicating knowledge to

decision-makers. As such, INR seeks to:

- provide Oregonians with ready access to current, science-based information and methods for better understanding and making informed decisions about our natural resource management challenges;
- increase the utility of integrated, science-based information in the development and understanding of natural resource and environmental policy by bridging science and decision-making efforts;
- focus on interdisciplinary natural resource and environmental problems and develop new collaborative relationships to solve them;
- identify and investigate controversial natural resource issues that challenge resource management and/or governance; and,
- identify opportunities for applied policy-related research that benefits Oregon's natural resources and environment.

INR's success depends upon a clear sense of our values and principles: ensuring integrity and objectivity, building partnerships, maintaining relevance, providing service, and creating excellence.

INR's focus areas, programs, and projects address Oregon natural resource issues in the local, regional, national, and international context.

INSTITUTE FOR WATER AND WATERSHEDS

Todd Jarvis, *Interim Director*

Kathryn Motter, *Laboratory Manager*
541-737-9918

Email: iww@oregonstate.edu
Website: <http://water.oregonstate.edu/>

Oregonians are beginning to witness the difficulties caused by water quantity and quality constraints and face critical choices about fresh water. Earlier melting of the Cascades snowpack is changing "free water storage," which has implications for snowmelt out of phase with existing water resource systems and ecosystems. Sustainable water supplies for development, ecosystem maintenance, and hydroelectric power generation may be adversely affected by increased population, climate change, and renegotiation of the Columbia River Treaty. Since water is "virtually" embedded in all Oregon products, whether natural or manufactured, the state's economic vitality is tied directly to water. Water quantity and quality issues in the Willamette and Klamath Basins are two of the state's top environmental priorities.

The aforementioned challenges are on an unprecedented scale and require solutions obtained by integrating several

or more disciplines. The Institute for Water and Watersheds (IWW), Oregon's federally-designated water resources research institute, has over 125 affiliated faculty and pursues solutions to Oregon's water problems by assembling research teams from a broad spectrum of disciplines. The institute utilizes educational and outreach models to communicate the latest water science and policy options to stakeholders so that they can make informed, intelligent decisions. The IWW's Water Collaboratory, an open analytical chemistry laboratory, provides faculty, staff, and students with a variety of analytical capabilities.

LABORATORY ANIMAL RESOURCES CENTER

Helen E. Diggs, MEd, DVM, DACLAM
Director and Campus Attending Veterinarian

101 Laboratory Animal Resources Center
Corvallis, Oregon 97331
541-737-6213

Email: larc@oregonstate.edu
Website: <http://www.oregonstate.edu/dept/larc>

The Laboratory Animal Resources Center (LARC) supports and manages the care and veterinary oversight of vertebrate animals used in instruction, research, and testing on the Oregon State University campus.

As the leading public research university in Oregon, the campus community is held to the highest standards for conducting responsible animal research. The LARC is managed and operated in compliance with the U.S. Public Health Service (PHS) Policy on Humane Care and Use of Laboratory Animals and the United States Department of Agriculture (USDA) Animal Welfare Act Regulations. The university is fully accredited by the Association for Assessment and Accreditation of Laboratory Animal Care, International (AAALAC). All LARC policies and procedures adhere firmly to the recommendations of the Guide for the Care and Use of Laboratory Animals (NRC 2011) and the Guide for the Care and Use of Agricultural Animals in Research and Teaching (FASS 2010).

The LARC staff is composed of animal care technicians, veterinarians, and veterinary technicians with specialty training and certifications specific to laboratory animal medicine and care. LARC employees are committed to providing an exemplary animal care and use program. This includes assuring humane care and use of animals through quality veterinary oversight, husbandry, social housing and environmental enrichment; facilitating campus research and instructional programs through collaboration, consultation, training, and provision

of professional technical and clinical services; maintaining compliance with applicable federal and state regulations, and upholding the university's academic mission, research agenda and commitment to public service.

LINUS PAULING INSTITUTE

Balz Frei, *Director*
307 Linus Pauling Science Center
541-737-5075

Email: lpi@oregonstate.edu
Website: <http://lpi.oregonstate.edu/>

The Linus Pauling Institute was co-founded in 1973 by Linus Pauling, the only individual to win two unshared Nobel Prizes (Chemistry, 1954; Peace, 1962). The institute moved to the campus of Oregon State University (Dr. Pauling's undergraduate *alma mater*) in 1996 and now operates as one of the university's research centers and institutes. The program is principally supported by gifts from individuals, private corporations, and foundations; grants from federal and private agencies; and Oregon State University.

The basic premise that an optimum diet is the key to optimum health is the foundation of the Linus Pauling Institute. Researchers investigate the function and role of vitamins and essential minerals (micronutrients) and phytochemicals (chemicals from plants) in promoting health and preventing disease throughout life. They also study the role of oxidative stress and inflammation in disease and the protective effect of dietary antioxidants and anti-inflammatory compounds.

LPI's research is organized into three major areas: Cardiovascular and Metabolic Diseases, the Healthy Aging Program, and the Cancer Chemoprotection Program. Specific research projects address:

- Dietary antioxidants, vascular inflammation, and heart disease
- Vitamin E in human health
- Metabolism of dietary and endogenous fats
- Vitamin C, lipid peroxidation, and oxidative stress
- Role of lipoic acid in vascular inflammation and atherosclerosis
- Aging, stress response, and mitochondrial decay
- Lou Gehrig's disease (ALS), peroxynitrite, and superoxide dismutase
- Vitamin D and immune function
- Aging and memory
- Rapamycin, protein homeostasis, and aging
- Cancer chemoprotection for the fetus and infant
- Zinc and antioxidants in cancer chemoprevention
- Dietary interventions for cancer prevention

- Role of drug-metabolizing enzymes in health and disease
- Vitamin E metabolism and mechanisms for chemoprotection and chemotherapy

The goals of these studies are to understand the mechanisms by which nutrition affects disease initiation and progression and how nutritional factors can be used in the prevention and treatment of diseases. Such an understanding will allow an increase in the human health span — the period in which people enjoy a healthy and productive life, full of vitality, with minimal suffering, and free of cancer and other debilitating diseases.

LPI maintains three core laboratories that provide analytical services to intramural and extramural researchers:

- **Cancer Chemoprotection Program Core Laboratory**
The Cancer Chemoprotection Program (CCP) Core Laboratory provides genetic toxicology testing services. Its mission is to help investigators identify dietary compounds with chemoprotective properties and to elucidate their inhibitory mechanism(s). Several techniques, including the *Salmonella* mutagenicity assay (Ames test), single-cell gel electrophoresis assay (Comet assay), and micronucleus assay, enable investigators to assess the mutagenic, DNA-damaging, and clastogenic effects of chemicals. Using known mutagens or clastogens as positive controls, we study the potential beneficial activities of dietary compounds or other chemicals against those DNA-damaging agents. We also recently implemented a Histone Deacetylase (HDAC) assay to identify dietary HDAC inhibitors, which are of interest in cancer chemoprotection.
- **Oxidative/Nitrative Stress Core Laboratory**
Oxidative and nitrative stress can be produced by inflammation, disease, or environmental exposure, including tobacco smoke. The resulting reactive oxygen and nitrogen species can react with lipids, proteins, and nucleic acids in the body to form molecules measurable by sensitive chemical analytical methods. These molecules can serve as “biomarkers” to reveal an individual’s state of health or the effectiveness of dietary or pharmaceutical interventions. For example, F₂-isoprostanes and their metabolites are considered good biomarkers of free radical-induced lipid peroxidation. The Oxidative/Nitrative Stress Core Laboratory (ONSL) has several high-performance liquid chromatographs (HPLCs)

coupled to UV, fluorescence, electrochemical, and single- and triple-quadrupole mass spectrometer detectors. ONSL also has several solid-phase extraction robots for sample preparation. These facilities provide LPI investigators with state-of-the-art chemical analysis of biomarkers, antioxidants, and drug metabolites.

- **Food Composition Laboratory**
The Food Composition Laboratory provides chemical analyses of food composition and nutritional factors. We provide analyses of food, feed, or dietary supplement samples for vitamins, phytochemicals, and other compositional factors.

In addition to our research, we publish a free, semiannual research newsletter; maintain a website; provide peer-reviewed information about nutritional factors on our online Micronutrient Information Center, <http://lpi.oregonstate.edu/infocenter/>; organize and sponsor scientific meetings, including the biennial Diet and Optimum Health Conference; and respond to inquiries from the public and the media as our means of building on Dr. Pauling’s legacy. The Healthy Youth Program (<http://lpi.oregonstate.edu/healthyyouth>) is designed to provide education and activities on diet and exercise to school children and their teachers and families to promote optimum health.

NATIVE AMERICAN COLLABORATIVE INSTITUTE (NACI)

The Native American Collaborative Institute provides a means for Oregon Tribes and Oregon State University to fulfill the land, sea, and space grant mission to serve Oregon Native Americans as well as all citizens. The institute facilitates collaboration between tribal business, economic, natural resource, cultural resource, and education programs and Oregon State University faculty and staff, to identify areas of research, education, and outreach that will affect the quality of life of tribal peoples. The collaborations will be based on concepts of respect, relevancy, responsibility and reciprocity, and will:

- develop research and disseminate findings that provide policy makers with trustworthy information regarding tribal concerns
- act as a clearinghouse for information and access to issues of concern to Oregon Tribes
- create reciprocal agreements that increase Oregon Tribes access to Oregon State University research, education, and outreach efforts, and

communicate tribal perspectives that enable OSU to better respond to tribal needs, in a manner respecting cultural values

- facilitate tribal and Oregon State University access to funding from private foundations and public sources available through tribal and Oregon State University collaboration
- provide student, faculty and program staff internships on a reciprocal basis to further knowledge and understanding about topics of importance to both Oregon Tribes and Oregon State University.

NACI will develop a database of the research and extension needs of Oregon tribes, to develop and formalize productive methods of exchange between Oregon tribes and OSU, to identify potential sources of other, long term funding, and to build communications resources to approach these potential sources. Specifically, these projects will:

- invite the Oregon tribes to share their strategic plans and use this information to build a searchable data base of the possible research and extension service needs of tribes
- make on-site visits to Oregon tribes to discuss the tribes’ possible research and extension service needs with tribal leadership
- assemble Oregon tribal leadership with OSU college and research unit leadership to develop procedures and roles to be played by an NACI Advisory Council
- use IRIS and other data bases to compile information on potential funding sources, including the parameters of these sources’ funding decisions, areas of special interest, past funded projects, contact names, and deadline.

NORTHWEST NATIONAL MARINE RENEWABLE ENERGY CENTER

Belinda Batten, *Director*
541-737-9492, belinda.batten@oregonstate.edu

Brian Polagye, *Co-Director*
206-543-7544, bpolagye@u.washington.edu

Brenda Langley, *Program Coordinator*
541-737-6138, brenda.langley@oregonstate.edu
Website: <http://nnmrec.oregonstate.edu/>

The Northwest National Marine Renewable Energy Center (NNMREC) is a U.S. Department of Energy-sponsored partnership between Oregon State University (OSU) and the University of Washington (UW). OSU primarily investigates wave energy, UW investigates tidal energy, and

the two universities collaborate together with national laboratories on research, education, outreach, and engagement.

NNMREC's mission is to facilitate commercialization of marine energy technology, inform regulatory and policy decisions, and close key gaps in scientific understanding with a focus on student growth and development. We work closely with a variety of stakeholders, including device developers, community members, ocean users, federal and state regulators, and government officials, to conduct research about wave energy, provide test sites for prototype devices, and assist developers with planning and permitting activities.

NNMREC's objectives are to:

- Develop facilities to serve as an integrated, standardized test center for U.S. and international developers of wave and tidal energy;
- Evaluate potential environmental, ecosystem, and human dimension impacts, focusing on the compatibility of marine energy technologies in areas with sensitive environments and existing users;
- Facilitate and conduct research to inform adaptive management of marine energy technologies;
- Study and consult on device and array optimization for effective deployment of wave and tidal energy technologies;
- Improve forecasting of the wave energy resource; and
- Increase reliability and survivability of marine energy systems.

OREGON NASA SPACE GRANT CONSORTIUM

Jack Higginbotham, *Director*
B092 Kerr Administration Building
Corvallis, OR 97331-2103
541-737-2414
Website: <http://spacegrant.oregonstate.edu/>

The National Aeronautics and Space Administration (NASA) established Oregon Space Grant in 1991 as a part of the National Space Grant College and Fellowship Program. The objectives of the program are to establish a national network of universities with interest and capabilities in aeronautics, space, and related fields; encourage cooperative programs among universities, aerospace industry, and federal, state, and local governments; encourage interdisciplinary training, research, and public service programs related to aeronautics, space science, and technology; recruit and train professionals, especially women, underrepresented minorities, and persons with disabilities, for careers in aerospace-related science and engineering; and develop a strong science mathematics,

and technology education base from elementary through university levels.

Oregon NASA Space Grant maintains a diverse array of programs to support space science and engineering education. Connecting educators with professional development opportunities, Oregon Space Grant aims to help develop a strong science, mathematics, and technology education base at all levels while fostering communication and continuity between the K–12 community and higher education. Through various research award programs available to students and faculty, Oregon Space Grant supports STEM education and development within the higher education community. Undergraduate scholarships are available for students at affiliate campuses statewide. Participation in a wide array of internship programs administered by the Oregon Space Grant offers undergraduate and graduate level students opportunities to develop research skills while conducting hands-on projects at NASA centers nationwide. Additionally, graduate fellowships attract excellent students to aerospace related research programs at affiliate institutions across Oregon.

OREGON SEA GRANT

George R. (Rich) Holdren, *Interim Director*

Website: <http://seagrant.oregonstate.edu/>

Oregon Sea Grant's mission is to develop and support an integrated program of research, outreach, and education that helps people understand, rationally use, and conserve marine and coastal resources. Our activities respond to the needs of ocean users and act to stimulate the Oregon economy.

Funding for Sea Grant comes from federal and state appropriations as well as contributions from local governments and industry. The major support is a grant from the National Oceanic and Atmospheric Administration.

Program activities are conducted in several interdependent and critical topical areas including healthy coastal ecosystems; sustainable fisheries and aquaculture; resilient communities and economies; and environmental literacy and workforce development.

Oregon Sea Grant's very competitive grants program addresses issues of high importance and potential benefit to society and places priority on prediction (rather than explanation) and meaningful collaboration with industry, agencies, communities, and other stakeholders. In addition, Sea Grant supports undergraduate and graduate students as Sea Grant Scholars to study important marine and coastal problems.

Everything the program does, finally, is driven by an ethic of public service,

and the program uses various approaches to engage our constituents. An advisory council of coastal community leaders provides external review and counsel to the program. Interactions with a wide range of coastal stakeholders are continuous. The Sea Grant Extension program offers professional, technical, and public education. Free-choice learning and education faculty and staff provide educational opportunities for school-age through adult learners. Oregon Sea Grant communication faculty and staff work collaboratively with program Extension faculty and educators to engage, inform, and assist a range of stakeholders with research-based information, using print, digital, and electronic media.

Sea Grant manages the Visitor Center of the Hatfield Marine Science Center as a public science learning facility and laboratory for studying how people learn in such settings.

Multidisciplinary and interdisciplinary in operation, the program involves faculty and students in several Oregon institutions of higher education. Recent participants in the program also include the University of Oregon, Oregon Health and Science University, Portland State University, and Western Oregon University. In addition, Oregon Sea Grant maintains close relationships with several research facilities on the Oregon coast: the OSU Seafood Laboratory in Astoria, the Hatfield Marine Science Center in Newport, and the Oregon Institute of Marine Biology in Charleston.

RADIATION CENTER

Steve Reese, *Director*

Website: <http://radiationcenter.oregonstate.edu/>

The Radiation Center is a campus-wide instructional and research facility especially designed to accommodate programs involving the use of radiation and radioactive materials. Located in the center are major items of specialized equipment and unique teaching and research facilities, including a TRIGA Mark II nuclear research reactor (licensed to operate at 1,100 kilowatts when running at a steady power level and at 2,500 megawatts in the pulsing mode); a cobalt-60 gamma irradiator; a number of gamma radiation spectrometers and associated germanium detectors; and a variety of instruments for radiation measurements and monitoring. Facilities for radiation work include teaching and research laboratories with up-to-date instrumentation and related equipment for performing neutron activation analysis and radiotracer studies; laboratories for plant experiments involving radioactivity; an instrument calibration facility for radiation protection instrumentation;

and facilities for packaging radioactive materials for shipment to national and international destinations.

The Radiation Center staff is available to provide a wide variety of services including instruction and/or consultation associated with the feasibility, design, and execution of experiments using radiation and radioactive materials, and with safety evaluations relating to experiments or devices involving the use of radioisotopes or other radiation sources. In addition, the center provides direct support and assistance to teaching and research programs involving nuclear engineering, nuclear and radiation chemistry, radiation health physics, neutron activation analysis, neutron radiography, radiation effects on biological systems, radiation dosimetry, production of short-lived radioisotopes, radiation shielding, nuclear instrumentation, emergency response, transportation of radioactive materials, instrument calibration, and radioactive waste disposal.

The center's laboratories and instruments are available to all campus instructional and research programs requiring such support. The center also accommodates instructional and nuclear research and development programs requested by other universities, by federal and state agencies, and by industrial organizations. In addition, a special neutron activation analysis service for forensic studies is available to law enforcement agencies.

SUPERFUND RESEARCH CENTER

Dave Williams, *Director*

Email: david.williams@oregonstate.edu
541-737-3277

Website: <http://oregonstate.edu/superfund/>

The Superfund Research Center oversees the NIEHS-funded Superfund Research Program grant at Oregon State University. This grant supports a multidisciplinary research effort to address the re-emerging health threat of polycyclic aromatic hydrocarbons (PAHs) in the environment. PAHs are considered a re-emerging threat to environmental health due to the increased burning of fossil fuels (e.g., coal and petroleum products) for energy production. The SRP grant supports five research projects and six support cores at Oregon State University and Pacific Northwest National Laboratory in Richland, WA, in a range of efforts involving human exposure to PAHs. In addition, research partners are located at San Diego State University, the Confederated Tribes of the Umatilla Indian Reservation and Pennsylvania State University. These research projects focus on determining the effect of PAHs on a variety of adverse human health outcomes employing

animal models such as zebrafish to detect developmental toxicities. An additional collaboration with Lawrence Livermore National Laboratories allows for following the fate of PAHs in humans as well as animals. Research efforts are also aimed at developing passive sampling devices to identify, measure and track PAHs in the atmosphere and foods to assess exposure of Native American populations to PAHs through wood smoke used in food preservation. Following the Deep Water Horizon oil spill, we were one of the first research groups to determine the levels of PAHs in the Gulf of Mexico at multiple sites over time. We partner with the U.S. EPA through the Partners in Technical Assistance Program to assist communities in dealing with concerns of environmental pollutants at Brownfields, Superfund sites or Conservation and Recovery Act sites. Support cores provide expertise in analytical chemistry, and in biostatistics and bioinformatics. The SRP grant also has programs aimed at translating research results to stakeholders and outreach to the public and in training the next generation of environmental health scientists.

SIGNATURE RESEARCH CENTERS

Nanoscience. Drug discovery. Sustainable "green" technologies. These are the focus of OSU's increasing collaboration with other Oregon research universities, the private sector, and state and federal agencies.

OREGON NANOSCIENCE AND MICROTECHNOLOGIES INSTITUTE (ONAMI)

Skip Rung, *President and Executive Director*

541-713-1331
Email: skip@onami.us

Website: <http://www.onami.us/>

ONAMI is Oregon's first "signature research center" for the purpose of sustaining and growing Oregon's innovation economy. As is true of only three other states, technology is Oregon's largest employer, with an average wage twice the statewide average. Growth of these kinds of job opportunities is the single most effective thing we can do for state financial health, schools, public safety and human services.

Our strategy has been 10 years in the making, and the selection of "nanoscience and microtechnologies" was based on a careful analysis intended to discover the largest possible intersection among:

- nationally competitive research in our universities,
- future commercial opportunities/growing sectors of the national

economy,

- the existing skills of Oregon industry and its surrounding value chain ecosystem.

ONAMI is now a nationally recognized model for state innovation initiatives, and is frequently featured at events and in publications by the National Science Foundation, National Governors Association, and other organizations concerned with keeping the United States competitive in the global innovation economy.

The state of Oregon so far has invested \$47 million in ONAMI, including \$5.2 million from the Oregon Innovation Council (OECD) for fiscal year 2012-2013. These funds are invested in OSU research and commercialization capacity in the form of matching funds for competitive extramural proposals, facility operations, and "gap" grants to assist in the formation of successful new products and startup companies.

ONAMI Staff and Leadership

ONAMI's leadership (executive director, research co-directors, 501c3 board) combines senior-level executive experience in both industry and academia.

President and Executive Director Robert D. "Skip" Rung worked for Hewlett-Packard for 25 years, most recently as director of Advanced Research and Development for HP's Corvallis, OR, facility, which is both the headquarters for HP's world-leading inkjet technology, as well as HP's most advanced and capable facility.

Working with Mr. Rung are **Vice President of Operations Cindy L. Dahl** (formerly area director for CH2M Hill), **High-Tech Extension Director Janet M. Teshima** (formerly Semiconductor Business VP for FEI Company), and **Gap Fund Manager Jay M. Lindquist** (formerly Corporate Development VP for FEI Company) and **Office Manager/Webmaster Danielle Z. Clair** (shared with the Microproducts Breakthrough Institute).

ONAMI Leadership Team Core Members:

Prof. Brian Paul, OSU/PNNL Microproducts Breakthrough Institute co-director. Dr. Paul is a professor of mechanical, industrial and manufacturing engineering at OSU, and a specialist in microfabrication technologies for MECS (Microtechnology-based Energy and Chemical Systems).

Prof. Goran Jovanovic, OSU/PNNL Microproducts Breakthrough Institute co-director. Dr. Jovanovic is a professor of chemical, biological and environmental engineering at OSU, and a specialist in chemical processes for fuel production, medical devices (e.g. hemodialysis filters) and many other applications.

Dr. Ward TeGrotenhuis, OSU/PNNL Microproducts Breakthrough

Institute co-director. Dr. TeGrotenhuis is a senior scientist and team leader for hydrocarbon processing at the Pacific Northwest National Laboratory.

Prof. Douglas Keszler, OSU Distinguished Professor of Chemistry and Principle Investigator for the NSF Center for Sustainable Materials Chemistry (CSMC), is a pioneer in the preparation and characterization of new solid-state inorganic materials. Current efforts are directed to the development and study of laser hosts, nonlinear optical materials, phosphors, transparent conductors, wide band-gap semiconductors, and low-temperature deposition and crystallization of thin films. Professor Keszler's pioneering work is the basis for Brilliant Technologies, Deep Photonics, Inpria and Amorphix all local start-up companies.

Prof. David Johnson, University of Oregon professor of chemistry and CSMC co-PI, is a solid-state chemist who has pioneered new method of synthesizing valuable new materials which cannot occur naturally. He is equally a pioneer in developing graduate student programs geared to the real career needs of students (most of whom will not become academics) and shared user facilities, which maximize the public value realized from investments in sophisticated equipment.

Dr. John Carruthers, Portland State University distinguished professor of physics, has worked at Bell Laboratories, NASA, Hewlett-Packard Laboratories, and most recently Intel Corporation, where he was director of components research and development at Intel's Hillsboro, OR, facility—the world's most advanced semiconductor facility, e.g. the first to achieve 32nm production on 300mm substrates, now poised to take the lead on sub-20nm technology in its recently announced D1X facility.

Prof. Jim Hutchison, University of Oregon professor of chemistry and UO Associate VP for Research, is a pioneer of green chemistry and leading innovator in nanofabrication and assembly processes that maximize material yields and minimize use and release of harmful reagents. Professor Hutchison is the leader of ONAMI's Safer Nanomaterials and Nanomanufacturing Initiative (SNNI), and also a founder of Dune Sciences, LLC.

ONAMI Inc. (501c3) board of directors members are senior executives from CH2MHill, Intel Corporation, Hewlett-Packard Company, FEI Company, Life Technologies Corporation, PNNL/Battelle, Sharp Laboratories, and all four of Oregon's major research universities. Ron Adams, dean of the College of Engineering at OSU, was formerly director of research and development at Tektronix' color printing operation (now Xerox), which is the world leader in solid inkjet

printing, and Xerox's most successful division.

Four Major Research and Commercialization Thrusts
Microtechnology-based energy and chemical systems ONAMI researchers are developing and fabricating unique bulk fluidic microsystems that accelerate, miniaturize and distribute energy, chemical and biomedical processes. Applications include:

- Compact, highest-performance heat exchangers
- Novel miniaturized HVAC cycles
- Medical devices, e.g. dialysis filters
- Fuel processing, e.g. hydrogen reforming
- Fuel atomization for small engines using greener fuels
- Continuous production and direct deposition of nanomaterials
- Water sterilization

This work is based on the principle that mass and heat transfer are best accomplished in microchannels which, when fabricated (typically via micro-lamination) into massively parallel structures, enable "bulk" throughputs without pressure drop penalties. Revolutionary results—in terms of component size, weight and energy efficiency—can be applied to military energy, medical devices and other specialty chemical products.

A dedicated facility, the Microproducts Breakthrough Institute (<http://mbi-online.org/>), supports project activity for research and development by both institutional researchers and numerous companies. A good overview of several applications and fabrication capabilities may be found at <http://mbi-online.org/our-research>.

Professors Goran Jovanovic, Brian Paul, and Kendra Sharp of Oregon State University and Dr. Ward TeGrotenhuis of the Pacific Northwest National Laboratory, jointly lead this team.

Nanoelectronics, Nanobiotechnology, and Nanometrology. ONAMI and Oregon's strong industrial and academic experience in semiconductor electronics, microscopy and microanalysis, analytical tools, and test and measurement, remains engaged on key semiconductor industry challenges (new devices, more demanding measurement challenges). They are also being leveraged to enable large opportunities and confront serious measurement challenges in the emerging field of nanomedicine (the application of engineered nanomaterials and nanoscale electronic, magnetic, and optical devices for medical diagnostics and therapeutics). The long history of equipment and instrumentation advances in the engineering and physical sciences, enabling great breakthroughs in the medical and life sciences, suggest that this is a very opportune time for the

physical, engineering and medical sciences to collaborate closely on developments in nanobiotechnology. Applications are emerging in single cell analysis at the point-of-use in real time for cancer and other disease diagnosis.

N3I research projects span the following areas:

Nanoelectronics

1. Carbon-based nanoelectronics
2. Analog memory applications of nanoscale devices
3. Nanoscale energy conversion and storage

Nanobiotechnology

1. Imaging/sensing/diagnostics at the nanoscale
2. Drug delivery/cell membrane behavior
3. Intracellular behavior and regenerative medicine

Nanometrology

1. Nanoscale optical near-field nanoscopy and photo-electron emission
2. Spatio-temporal-compositional imaging at the nanometer and femtosecond scales
3. Nanoscale electron crystallography
4. Nanoparticle characterization

Dr. John Carruthers, Distinguished Professor of Physics at Portland State University and former director of Components Research at Intel Corporation, heads up this research collaboration.

Safer Nanomaterials and Nanomanufacturing Initiative. The goals of ONAMI's Safer Nanomaterials and Nanomanufacturing Initiative (SNNI) are to develop new nanomaterials and nanomanufacturing approaches that offer a high level of performance, yet pose minimal harm to human health or the environment. Research under the initiative merges the principles of green chemistry and nanomaterials design and synthesis strategies to produce safer nanomaterials and more efficient nanomanufacturing (including critical purification steps) processes in the context of producing nanoparticles and nanostructured materials for applications in fields such as photovoltaics, nanoelectronics, and sensors.

In addition to greening the production of nanomaterials, SNNI seeks to understand the biological and environmental impacts of nanoparticles. As part of an international research community, it is [i] working with organizations to develop reference materials and standard practices, [ii] creating well-characterized nanomaterial libraries and [iii] developing effective methods protocols for both physico-chemical characterization and biological effects assays for many different types of engineered nanomaterials. Distinctive features of our research portfolio are the critical importance of using

only well-characterized nanomaterials and acquiring rich information sets from biological impacts studies. This approach establishes a foundation of fundamental knowledge and advances predictive strategies based upon structure-activity relationships. A long-term commitment to this strategy is required because it is simply not practical to test all significant permutations of nanoparticles (composition, size, shape, surface functionalization, etc.) in bioassays to assess safety.

Professor Jim Hutchison of the University of Oregon leads this initiative that is bringing together key scientists in the life sciences, materials sciences and engineering. Visit the Safer Nanomaterials and Nanomanufacturing website at <http://www.greennano.org>.

Since 2005, SNNI has spearheaded the highly regarded Greener Nano series of annual conferences, with "GN11" coming in the late spring of 2011: <http://www.greennano.org/GN11>.

Center for Sustainable Materials Chemistry. ONAMI member researchers and collaborators in both academia and industry are leading a growing collaboration in the study and design of environmentally benign chemistry platforms for the fabrication of high-performance inorganic electronic devices. Beginning from groundbreaking work on transparent electronics and atomic-precision synthesis using both low-temperature solution chemistry and gas-phase assembly techniques, the range of applications for these greener (i.e. benign and earth-abundant elements, lower cost fabrication methods) materials platforms includes many aspects of electronics manufacturing, optics, sensors, thermoelectrics, magnetics, coatings and metrology standards.

ONAMI researchers have recently demonstrated atomically dense and atomically smooth solution processed inorganic films, functionally graded materials from modulated elemental reactants, and a growing range of composite electronic materials.

This work has direct implications for:

- Nanoscale patterning for semiconductors and other applications
- High-performance thin film electronic elements, e.g. MIM electronics
- Printed electronics on non-traditional substrates
- Large area and lower cost display backplanes
- High-performance thermoelectric cooling
- Low cost thin-film photovoltaics

Learn more about the NSF Phase I Center for Sustainable Materials Chemistry at <http://sustainablematerialschemistry.com/>.

Professors Douglas Keszler at Oregon State University and David Johnson at

the University of Oregon lead this collaborative research initiative.

Facilities (NWNanoNet™)

Twenty million dollars of Oregon's initial investment in ONAMI and several million dollars in matching funds have been applied to three user facilities, which are open to all Oregon academic users on equal terms, and to industrial collaborators at commercially competitive rates. The open/shared facility model not only supports diverse research projects with advanced and well-maintained fabrication and characterization tools, it provides an essential resource to Oregon companies, the vast majority of which cannot afford to buy such capabilities for dedicated in-house usage.

Among the many users of the ONAMI-affiliated facilities are the ONAMI gap fund portfolio companies, which, led by Home Dialysis Plus, have raised over \$70 million in leveraged investment since late 2006.

The NWNanoNet™ facilities are:

The Microproducts Breakthrough Institute

(<http://mbi-online.org>) in Corvallis enables research and product development for microchannel devices and other microfluidics-related fields. Laser micromachining, nano-imprinting/hot embossing, microlamination, diffusion bonding, nano-particle injection micromolding, electroplating, atomic layer deposition, and high temperature sintering under precision loads are among the staple processes.

The **Center for Advanced Materials Characterization** (<http://camcor.uoregon.edu/>) in Eugene is the most capable university-based materials analysis and microscopy facility in the Pacific Northwest, offering user access and/or expert operator service for SEM (with e-beam lithography), HR-TEM, dual-beam FIB, Electron Microprobe, XRD, XPS, AFM, TOF-SIMS, UPS, FTIR, NMR, Mass Spec, and basic semiconductor device fabrication. CAMCOR serves clients all over the U.S.

The **Center for Electron Microscopy and Nanofabrication** (<http://www.pdx.edu/cemn/>) in downtown Portland has been home to one of the most advanced TEMs (200Kev) dual-beam FIBs in the Pacific Northwest. CEMN regularly serves over 40 companies in the silicon forest high-tech region centered around Portland, and also holds regular user training workshops.

The **OSU Electron Microscopy Facility** (<http://www.science.oregonstate.edu/emfacility/>) at Oregon State University. The Electron Microscopy Facility (EMF) provides service to the research community of both life sciences and materials science related studies. The facility was first established in the Department of Botany and Plant Pathology in 1967,

and has been in continuous operation. In addition to supporting faculty and students, the facility welcomes external academic and government institutions and industry. The facility maintains and operates the following instruments:

- FEI Quanta 3D Field Emission Dual Beam Scanning Electron Microscope (SEM/FIB)
- FEI Quanta 600F Field Emission Environmental SEM
- FEI Nova NanoSEM 230 High Resolution SEM
- FEI Titan 80-200/ChemSTEM Transmission Electron Microscope (TEM)

All microscopes are equipped with X-ray Energy Dispersive Spectrometers (EDS) to conduct chemical analysis. The OSU EMF is located in the Linus Pauling Science Center, room 145, 2900 SW Campus Way, Oregon State University, Corvallis, OR 97331.

Corporate Partners

ONAMI is uniquely situated in the midst of the world's most advanced collection of "small tech" research and development assets: Intel, Hewlett-Packard, FEI Company, CH2M Hill, ON Semiconductor Corp., Electro Scientific Industries, Xerox, Maxim, IDT, Sharp Labs, Microchip, Life Technologies/Invitrogen, Planar Systems, Wafertech, Flir, Mentor Graphics, Synopsys, Novellus, TriQuint, Siltronic, SEH America, Solarworld, Sanyo, Solaicx, Peak Sun Silicon and many exciting startup companies.

We have many opportunities to do joint research with nearby industries only a few minutes' drive away for research faculty and graduate students, and it is quite possible that highly capable corporate partners can be found to participate in new ONAMI federal projects.

OREGON TRANSLATIONAL RESEARCH AND DEVELOPMENT INSTITUTE (OTRADI)

Jennifer E. Fox, Executive Director
503-227-1814

Email: jfox@otradi.org

Website: <http://www.otradi.org>

About OTRADI

OTRADI is a nonprofit research and development organization, supported in part by the state of Oregon that strives to promote bioscience industry growth and job creation in Oregon. OTRADI achieves this goal via collaboration with private and public sector entities in the bioscience community to discover, develop, and commercialize therapeutics, vaccines, diagnostics and other life sciences products important for human health. OTRADI's specialized high-throughput drug discovery robotic equipment is

unique in the Northwest, offering previously out-of-reach drug screening capabilities as well as the expertise necessary to analyze results and quickly identify the best products to commercialize. OTRADI uses its equipment and expertise to rapidly screen thousands of chemical compounds developed by Oregon research laboratories and companies to identify new potential drugs, speeding progress on global health concerns, and bringing more economic development and scientific talent to Oregon.

A Unique Opportunity for Oregon Researchers

OTRADI brings the lab to the market via partnerships with Oregon universities, private bioscience companies, the life science industry, and public and private funders. Collaborating with OTRADI offers many advantages:

Collaboration

- OTRADI partners with university researchers and small biotech companies to help produce preliminary data in new areas and helps develop strategies and helps write grants.
- When grants are funded, OTRADI continues working with the investigator as a subcontractor on the grant.
- Investigators have access to opportunities for licensing and commercialization of novel chemicals and drug targets.

Training

- Researchers, faculty, postdocs and students
- Internships and fellowships

Expertise

- Experience and knowledge in assay development for cell biology, pharmacology, infectious diseases, cancer, inflammatory diseases, etc.

Specialized Equipment and Resources

- State-of-the-art drug discovery robotic equipment for high-throughput screening and high-content analysis
- Novel and commercially available chemical compound libraries comprised of more than 90,000 compounds for screening

Grant Partnering

- Actively involved in grant writing and attracting follow-on and new federal and private funding to Oregon universities and small businesses
- Supplied with the new experimental data that OTRADI produces, university researchers can provide federal granting agencies and/or pharmaceutical companies with the crucial evidence and support necessary (e.g., preliminary data)

to prove that their discoveries have increased value and worth as possible drugs, drug targets or diagnostic agents. OTRADI's activities have and will continue to increase federal grant funding success, spark small-business development in Oregon, foster student involvement in applicable research, accelerate connections between Oregon university researchers and biopharmaceutical companies and lead to the creation of high-paying jobs in Oregon.

How OTRADI Works

Every day, Oregon researchers make progress in the fields of biology, medicine, agriculture, marine biology and chemistry that may lead to promising new therapeutics or drug targets. While university researchers are experts within their own fields of science, they often lack the specialized scientific equipment and/or expertise necessary to translate their discoveries into potential new therapeutics. OTRADI brings the lab to the market by providing its partners with access to scientific expertise and equipment. It works to accelerate a product's development and commercialization through strategic partnerships and access to its wealth of resources. OTRADI forms the integral connection or "glue" that links the scientific with the commercial, energizing and simplifying the connection to move medical advances forward, and helping to translate scientific research into tomorrow's discoveries.

The OTRADI Bioscience Incubator

Operated by Oregon Translational Research and Development Institute (OTRADI), the OTRADI Bioscience Incubator (OBI) is the state's first and only bioscience-specific incubator. Located in Portland, Oregon, the multi-client company bioscience complex provides startups and scientists with access to entrepreneurial mentoring and state-of-the-art bioscience facilities, meeting space and shared equipment.

The OBI serves emerging companies and scientists who have outgrown existing space, but who want to dedicate resources to commercializing their research rather than investing in build-out and equipment. The OBI provides scientists with access to a state-of-the-art facility while their companies reach the next phase of expansion and growth.

How to Partner with OTRADI

Oregon university researchers and small businesses are encouraged to join OTRADI as OTRADI-Affiliated Researchers and Companies. As such, Affiliated Researchers are pre-qualified to collaborate with OTRADI and utilize our resources. Partnering with OTRADI provides researchers and Oregon companies access to unique expertise and drug-discovery equipment as well as assistance with

assay development, grant writing, business development, biomentoring and incubation. To learn more about OTRADI or the OTRADI Bioscience Incubator, see our website at <http://www.otradi.org> or contact OTRADI's Executive Director, Jennifer E. Fox, PhD, at jfox@otradi.org or 503-227-1814.

OREGON BEST

David Kenney, *President and Executive Director*

503-725-9849

Email: david.kenney@oregonbest.org

Website: <http://oregonbest.org>

Fueling Innovation and Commercialization for Oregon's Cleantech Economy

An economic development

catalyst, Oregon BEST is the nexus for clean technology innovation—building capability, convening collaborations, and accelerating solutions to environmental challenges that deliver prosperity to all corners of Oregon.

By connecting Oregon startup companies and existing businesses with a range of programs, university lab facilities, and research experts, Oregon BEST plays a key role in growing the state's clean technology economic sector. Fostering and supporting public-private collaborations, Oregon BEST sparks innovation that leads to cleantech solutions and commercialization of research—resulting in on-the-ground products, services, and jobs that power Oregon's economy.

Oregon BEST's work not only adds value and enhances competitiveness for Oregon businesses, it also grows the state's research revenue, expands research programs, enhances workforce development, and positions Oregon to recruit new cleantech companies.

Since its establishment as an independent, nonprofit organization by the Oregon Legislature in 2007, Oregon BEST's 230-plus Member Faculty have attracted more than \$100 million in research revenue to Oregon from federal, industry, and foundation sources. Building on Oregon's international reputation as a sustainability innovator, Oregon BEST offers a range of programs, expertise, and research facilities described below.

Oregon BEST Research Labs

Oregon BEST supports a statewide, university-based network of shared-user research labs worth millions of dollars that offers Oregon industry access to cutting-edge research tools, faculty expertise, and workforce development opportunities. This unique, distributed network of labs, managed by Oregon BEST Member Faculty, helps Oregon firms compete globally and Oregon universities grow research revenue and educational opportunities.

To date, Oregon BEST Labs includes the following facilities:

- SuNRISE Photovoltaics Laboratory at the University of Oregon
- Oregon Process Innovation Center (OPIC) for Sustainable Solar Cell Manufacturing at Oregon State University
- Green Building Research Laboratory at Portland State University
- Green Building Materials Laboratory—a 5,000 sq. ft. shared resource laboratory of Oregon Built Environment and Sustainable Technologies Center (Oregon BEST). Equipment for characterizing, developing and testing high performance sustainable materials for a wide variety of applications including buildings and transportation infrastructure. A new multi-chamber modular environment conditioning (MCMEC) system was added in 2014. The MCMEC is designed for durability testing of full-scale building assemblies. One test configuration allows exterior and interior conditions to be imposed simultaneously on an 8ft by 8ft wall, including sunlight simulation and water spray. The solar array operates in the range of 400 to 1200 W/m² over the 8ft by 8ft area. Temperature range is -30 to 40C and humidity range is 10 to 95%. Two full-size walls may be tested simultaneously.
- Energy Studies in Buildings Laboratory with locations at the University of Oregon in Eugene and in Portland
- infraStructure Testing and Applied Research (iSTAR) Laboratory at Portland State University
- High Performance Environments (HiPE) Lab at the University of Oregon

People throughout Oregon benefit from Oregon BEST Labs. These range from architects and construction firms engaged in sustainable built environment materials and design, to farmers and forest products companies producing biomass for clean fuels and bioproducts, to large and small companies generating solar, wind, geothermal, and wave energy. And many others.

Oregon BEST Researchers (Member Faculty)

A statewide network of 230+ Oregon BEST Researchers across four universities offer expertise and advice to industry to help Oregon companies—ranging from startups to existing firms—compete in the cleantech economy. The research expertise of Oregon BEST Researchers covers clean technologies of all kinds, as well as cleantech business expertise.

Oregon BEST Commercialization Program

This program accelerates the commercialization of technologies developed by universities and small businesses in Oregon. The program focuses on creating commercialization partnerships between industry and Oregon universities or leveraging existing collaborations between Oregon companies and Oregon BEST's Member Faculty.

The commercialization collaborations that are catalyzed by Oregon BEST create much-needed jobs for Oregonians in the cleantech sector, which is expected to experience significant growth for decades to come. Simultaneously, the technologies commercialized help address the challenges of climate change, our nation's dependence on fossil fuels, the environmental impacts of energy generation and building materials production, and the quality of our indoor environments.

The Commercialization Program has two main elements:

- **Oregon BEST Commercialization Grants** help bridge the gap between traditional R&D funding sources and the availability of private investment – a gap commonly known as the “valley of death.” By working with Oregon BEST Member Faculty at our partner universities, the university tech transfer offices, and small businesses, we identify opportunities for small investments to make a big impact in moving products and services to market and to achieving success in securing follow-on financing and initial customer traction.
- **Commercialization acceleration support services** connect experienced Entrepreneurs-in-Residence on the Oregon BEST team with researchers and startups that need assistance in making the transition from “technology readiness” to “investment readiness” and “commercial viability.” Oregon BEST provides consulting and mentorship to assist in the areas of business strategy, product strategy, acquisition of private capital, strategic business development, management team formation, and federal funding opportunities through the Oregon BEST SBIR/ STTR Support Center. Oregon BEST leverages the wide range of entrepreneur support services available from other entities and provides a focal point for the development of cleantech products and cleantech companies.

Oregon BEST Research Agenda Development Series

Oregon BEST convenes the ongoing Agenda Development Series to provide a forum and a venue where industry leaders collaboratively develop a prioritized research agenda. Expert presentations from practitioners frame the issues at each event, stimulating attendees in facilitated dialogues culminating in a set of research projects that Oregon BEST will publish and work to have funded. The resulting Research Agendas are published by Oregon BEST with attendees recognized as co-authors.

Proposal Matching Program

The Oregon BEST Proposal Matching Program assists Oregon BEST Member Faculty and research teams win competitive proposals for research grants/ contracts, research equipment acquisition, and product development/commercialization. The Oregon BEST matching funds provide support of activities that strengthen the competitiveness of proposals that might otherwise be difficult to fund. This program has leveraged more than \$17 million in new research dollars for the state.

Investment Opportunities: Oregon BEST Companies

Through a competitive process, Oregon BEST has awarded Commercialization Funding to more than 20 high-potential Oregon companies with strong technology, viable business strategies, and passionate entrepreneurs. Many of these Oregon BEST Companies are strong investment candidates for angel investors, venture capitalists and corporate strategic investors.

Visionary Leadership

Oregon BEST's leadership includes executives from some of the world's most respected sustainable built environment and renewable energy companies: SolarWorld, Portland General Electric, Gerding Edlen Development, CH2M HILL, Pacific Northwest National Laboratory, National Energy Technology Lab, and The Baker Group.

These executives join research leadership from Oregon BEST's founding partner universities (*see below*), venture capital and corporate investors, and members of the Oregon Legislature to make up a visionary Board of Directors, a Commercialization Advisory Board, and staff—all committed to advancing Oregon's cleantech economy.

History and Founding Universities

Oregon BEST was established as an independent, nonprofit organization in 2007 as part of the Oregon Innovation Council's legislative recommendations. Initial funding came from the Oregon Legislature, with additional support from the Oregon University System and the

Meyer Memorial Trust. Founding partner universities include the Oregon Institute of Technology, Oregon State University, Portland State University, and the University of Oregon.

ADDITIONAL RESEARCH UNITS AND CONSORTIA AT OSU

These additional research units are organized under OSU's colleges.

AGRICULTURAL EXPERIMENT STATION

Daniel J. Arp, *Director*

William G. Boggess, *Executive Associate Director*

Stella M. Coakley, *Associate Director*

Larry R. Curtis, *Associate Director*

John R. Talbott, *Assistant Director*

Jack Breen, *Agricultural Sciences and Marine Sciences Business Center Manager*
Email: AESsupport@oregonstate.edu
Website: <http://agsci.oregonstate.edu/research/>

The Oregon Agricultural Experiment Station is a statewide research network of Oregon State University scientists working on the Corvallis campus and at 11 branch stations in the major crop, climate, and marketing areas of Oregon. These diverse locations ensure that the station's research program is close to the people and the needs of Oregon's agricultural and natural resources. Founded July 1, 1888, in accordance with the federal Hatch Act of 1887, the mission of the Oregon Agricultural Experiment Station is to conduct research and demonstrations in the agricultural, biological, social, and environmental sciences that contribute to the economic, environmental, and social welfare of Oregon. We are committed to:

- Helping build a sustainable economy by fostering economic growth and sustainability;
- Addressing ecological concerns by generating knowledge and information to improve and protect Oregon's natural resources; and
- Expanding fundamental knowledge by advancing fundamental science relating to the environment, agriculture, and natural resources;
- Partnering with and enabling people and their communities to address a variety of issues including urban-rural economic dependencies, community food systems, land use, food security, poverty, and others

Current research emphases in the station are in five signature program

areas that sustain and build on the College of Agricultural Sciences' traditional strengths and link to stakeholder needs, but also look to key future opportunities. These signature areas also address contemporary and emerging forces or drivers facing Oregon's people and landscape. Overarching contemporary drivers comprise water, energy, climate change, health, and demographics. The signature program areas are:

- Sustainable food and agricultural systems;
- Environmental and human well-being;
- Plant sciences and systems biology;
- Natural resources stewardship;
- Bioproducts, biomaterials, and bioenergy for a sustainable bioeconomy.

The station conducts research in 12 academic departments (Applied Economics (formerly *Agricultural and Resource Economics*), Animal and Rangeland Sciences, Biological and Ecological Engineering, Botany and Plant Pathology, Chemistry, Crop and Soil Science, Environmental and Molecular Toxicology, Fisheries and Wildlife, Food Science and Technology, Horticulture, Microbiology, and Statistics), and colleges of Forestry, Public Health and Human Sciences, Science, and Veterinary Medicine. Research is supported in other units such as the Center for Genome Research and Bio-computing, Linus Pauling Institute, the Environmental Health Sciences Center, Agricultural Education and Agricultural Sciences, and Extension and Experiment Station Communications.

Branch stations provide opportunities for basic and applied field research programs at the following locations:

- Central Oregon Agricultural Research Center (Madras and Powell Butte)
- Columbia Basin Agricultural Research Center (Pendleton and Moro)
- Eastern Oregon Agricultural Research Center (Burns and Union)
- Food Innovation Center Experiment Station (Portland)
- Hermiston Agricultural Research and Extension Center (Hermiston)
- Klamath Basin Research and Extension Center (Klamath Falls)
- Malheur Experiment Station (Ontario)
- Mid-Columbia Agricultural Research and Extension Center (Hood River)
- North Willamette Research and Extension Center (Aurora)
- Southern Oregon Research and Extension Center (Medford)
- Coastal Oregon Marine Experiment Station (Newport and the Seafood Laboratory at Astoria)

The station collaborates with the OSU Extension Service, instructional programs within Oregon State University, Oregon

state agencies, federal departments of Agriculture, Commerce, Energy, Interior, and Transportation, and other federal and state agencies on research programs of interest to the state, the Pacific Northwest, the nation, and other countries.

ENGINEERING EXPERIMENT STATION

James R. Lundy, *Director*

Websites: <http://engineering.oregonstate.edu/research-centers-and-institutes>

By act of the Board of Regents of Oregon State College on May 4, 1927, the Engineering Experiment Station was established at Corvallis to serve the state in a manner broadly outlined by the following policy:

1. To serve the industries, utilities, professional engineers, public departments, and engineering teachers by making investigations of significance and interest to them.
2. To stimulate and elevate engineering education by developing the research spirit in faculty and students.
3. To publish and distribute through bulletins, circulars, and technical articles in periodicals the results of such studies, surveys, tests, investigations, and research as will be of greatest benefit to the people of Oregon, and particularly to the state's industries, utilities, and professional engineers.

The Engineering Experiment Station (also referred to as the Engineering Research Office) coordinates research in the College of Engineering. The associate dean of engineering is the director of the Engineering Experiment Station.

Research is conducted by faculty and students from the following schools:

- School of Chemical, Biological and Environmental Engineering
 - School of Civil and Construction Engineering
 - School of Electrical Engineering and Computer Science
 - School of Mechanical, Industrial and Manufacturing Engineering
- And the following departments:
- Department of Biological and Ecological Engineering
 - Department of Nuclear Engineering and Radiation Health Physics

Collaborative research is conducted in six research clusters:

Large Scale Energy Systems

Creating safer, super-efficient ways of generating energy to meet the world's growing demand—from harnessing the power of wind and waves to innovating new nuclear reactor designs.

Oregon Nanosciences and Microtechnology Institute at OSU

Putting nanotechnology to work in

micro systems for homeland security, clean and efficient energy systems, new medical devices, and the next generation of integrated circuits.

Biological and Environmental Systems

Employing Earth's smallest microorganisms in toxic waste cleanup and the development of more efficient manufacturing processes.

The Kiewit Center for Infrastructure and Transportation

Making the world's infrastructure safe, reliable, and efficient—from better tsunami warning systems to smarter transportation systems.

Information Systems

Making the world's vast amounts of information both easily accessible and highly useful—from more powerful Internet searches to more efficient databank management.

Mixed Signal Integration

Converting real-world signals like sound, light, and motion into digital data that computers can quickly process, resulting in technology breakthroughs that improve everything from communications to medicine.

FEED THE FUTURE INNOVATION LAB FOR COLLABORATIVE RESEARCH ON AQUACULTURE & FISHERIES (AQUAFISH INNOVATION LAB)

Hillary S. Egna, *Director*

Website: <http://aquafishcrsp.oregonstate.edu/>

The AquaFish Innovation Lab (formerly CRSP) is one of 10 Feed the Future Innovation Labs for Collaborative Research funded by the U.S. Agency for International Development (USAID) and participating U.S. and host country institutions. The mission of the AquaFish Innovation Lab is to enrich livelihoods and promote health by cultivating international multidisciplinary partnerships that advance science, research, education, and outreach in aquaculture and fisheries. Oregon State University leads this flagship program designed to reduce poverty in developing countries by improving access by the poor to fish and water resources. AquaFish research and outreach work focuses on developing comprehensive, sustainable, and economically viable aquaculture and fisheries management systems in developing countries that contribute to food safety and food security. Challenges poorer countries face include pressures from global trade, environmental degradation, climate change, water use conflicts, and the distribution

of benefits. The AquaFish Innovation Lab concentrates its efforts on reducing the number of constraints its host countries face in order to promote local economies. OSU partners with U.S. and host country universities, government, private companies, and non-governmental organizations to support research, development, and outreach activities in over 20 countries. AquaFish participating countries have included Bangladesh, Brazil, Cambodia, China, Ghana, Guyana, Honduras, Indonesia, Kenya, Mali, Mexico, Nicaragua, Nepal, Philippines, South Africa, Thailand, Tanzania, Uganda, Vietnam, and the U.S. The AquaFish Innovation Lab also has a grant to enhance the profitability of small aquaculture operations in Kenya, Ghana, and Tanzania, as part of the U.S. Government's new Feed the Future initiative.

FOREST RESEARCH LABORATORY

Thomas Maness, *Director*

Steve D. Tesch, *Associate Director*

Roger D. Admiral, *Associate Director*

Website: <http://www.cof.orst.edu/frl/>

The Forest Research Laboratory (FRL) is Oregon's research agency that helps solve problems, create opportunities, and develop new understanding and innovation about forest ecosystems, forest management and forest-derived renewable materials; its director is the dean of Oregon State University's College of Forestry. Established by the Oregon Legislature in 1941, the program is supported by state and federal appropriations and by research grants from public and private sources. In addition to research in campus laboratories and university forests, studies are conducted cooperatively in public and private forests and in laboratories and manufacturing facilities throughout Oregon and the world.

Faculty, staff, and students from the College of Forestry's departments of Forest Engineering, Resources, and Management; Forest Ecosystems and Society; and Wood Science and Engineering contribute to a diverse portfolio of fundamental and applied research and outreach activities. Activities benefit from collaboration with many other departments and colleges at Oregon State and elsewhere. Communication of results to science peers, land managers, policy makers, and the public is a high priority.

Faculty are providing leadership in addressing many of society's challenges at scales ranging from molecules to the globe, including topics such as:

- Supporting the economic and social viability of rural communities
- Determining the impacts of climate change on forests and how forests

can lessen the severity of change

- Protecting the sustainability of forests and the ecosystem services they provide, including water, wildlife habitat, recreation, and wood
- Facilitating development and use of renewable "green" materials and energy
- Fostering operations and manufacturing processes that are environmentally and socially acceptable, and economically feasible
- Expanding the understanding and value of forests to society, especially in urban environments

The laboratory's programs are designed to provide information that supports scientifically informed decisions about the management, conservation and use of Oregon's public and private forest resources, and to enhance the competitiveness of Oregon's forest-resource-based industries and businesses. Through its research and outreach education efforts, Oregon's forests produce more wood products, water, forage, fish, wildlife, and recreation; green materials such as wood are harvested and used more efficiently and innovatively; some forests are used more intensively while others are conserved more effectively; employment, production, and profitability in forest-resource-related businesses are strengthened; and assistance is provided in maintaining a quality environment for Oregonians.

The FRL, the Corvallis Forestry Sciences Laboratory of the U.S. Forest Service, the Corvallis-based Forest and Rangelands Ecosystem Science Center of the U.S. Geological Service, and related research conducted elsewhere on campus combine to form the largest concentration of forest sciences research in North America.

INTEGRATED PLANT PROTECTION CENTER

Paul Jepson, *Director*

Website: <http://www.ipmnet.org/>

The Integrated Plant Protection Center (IPPC) was established in 1991, to expand upon the range of activities of the International Plant Protection Center, that was chartered by Oregon State University in 1969 (see <http://www.ipmnet.org/>). The IPPC is partially supported by the Agricultural Experiment Station, and the Cooperative Extension Service. The IPPC focuses upon research, education and outreach activities associated with the adoption of sustainable integrated pest management (IPM) practices in agriculture. It is the home for a number United States Department of Agriculture (USDA)-funded programs associated with pest control and pesticide management, including the state IPM program,

the Regional Pest Management Center program, the Pesticide and Environmental Stewardship program, and the Farm Safety program.

The IPPC provides leadership, coordination and support for scientists at OSU, in the Pacific Northwest region, and internationally, in the field of IPM. Its activities encompass pest, disease and weed management, and the rational management and use of pesticides. It also provides news and facilitates communications between university, state, and federal agencies through a number of media, including an electronic news alert system, and a newsletter (see <http://oregonipm.ippc.orst.edu/>).

IPPC activities include the provision of electronic tools that assist growers and their advisors in making pest management decisions within their crops. This includes online weather data and degree-day models, which forecast the developmental stages and epidemiology of a number of important crops pests and diseases (see <http://pnwpest.org/wea/>). In addition, the IPPC works collaboratively with scientists throughout the state, to manage online pest alerts to growers. These can be accessed via the IPPC home page (see <http://www.ipmnet.org/>).

The IPPC maintains a large and important collection of documents, monographs and books on IPM, much of which is searchable via the OSU Valley library online database. It also supports a unique service in international outreach, IPMnet, which includes, among a number of other resources, IPMnet NEWS, a monthly electronic newsletter that is distributed to scientists in 127 countries (see <http://www.ipmnet.org/>). IPMnet NEWS is supported by the Consortium for International Crop Protection (CICP) and a grant from the USDA.

The IPPC is expanding its activities in four areas at present, (1) biological control/biologically-based pest management, (2) enhanced diagnostic and forecasting tools, (3) pesticide management, rational use, risk mitigation and (4) information delivery, decision support and outreach. For further details please contact the director.

INTER-UNIVERSITY CONSORTIUM FOR POLITICAL AND SOCIAL RESEARCH (ICPSR)

Valery King, *Official Representative (OSU Libraries)*

Amanda Whitmire, *Designated Representative (OSU Libraries)*
Website: <http://www.icpsr.umich.edu/icpsrweb/ICPSR/>

Through funding provided by OSU Libraries, Oregon State University is a member of ICPSR, the Inter-University Consortium for Political and Social Research. A unit within the Institute for Social Research at the University of Michigan, ICPSR was established in 1962 and maintains and provides access to a vast archive of social science data for research and instruction. OSU students, faculty and staff may access these data at no charge and may also deposit their own data into the collection.

ICPSR offers members reduced fees to attend the *Summer Training Program in Quantitative Methods of Social Research*, a comprehensive curriculum of intensive courses in research design, statistics, data analysis, and social methodology. Additionally ICPSR leads several initiatives that encourage use of data in teaching, particularly for undergraduate instruction, and offers user support to assist researchers in identifying relevant data for analysis and in conducting their research projects.

KIEWIT CENTER FOR INFRASTRUCTURE AND TRANSPORTATION

Scott Ashford, *Director*

Email: kiewit.center@oregonstate.edu
Website: <http://kiewit.oregonstate.edu/>

Background

The Kiewit Center for Infrastructure and Transportation was initially established in 1962 as the Transportation Research Institute. The Kiewit Center serves as the umbrella organization all research within the School of Civil and Construction Engineering. The center is a key component in the College of Engineering's drive to become a top 25 engineering program, coordinating multi- and interdisciplinary research projects.

For the last 150 years, civil engineers have built the infrastructure upon which American prosperity rests. Roads, bridges, aviation, dams, schools, and safe drinking water form the foundation for our quality of life. Today that foundation is crumbling. Americans experience this deterioration every day. A recent report by the American Society of Civil Engineers confirms what most Americans already

know—the ASCE report gave the U.S. infrastructure an overall grade of D+.

The center is an interdisciplinary unit that provides research, education and public service related to the built environment and the systems that operate in that environment.

Facilities

- Geotechnical Testing Laboratory
 - Testing in support of both practice-oriented investigations and state-of-the-art research
 - Advanced geo-mechanical modeling of soil-structure interaction
 - Full scale, well-instrumented testing of field geo-systems
- Highway Materials Laboratory
 - Investigation of innovative highway construction materials
 - Evaluation of recycled materials for use in construction
- O.H. Hinsdale Wave Research Laboratory
 - Impact of tsunamis and storm waves on coastal infrastructure
 - Nearshore processes related to coastal erosion
 - Tsunami and coastal hazard mitigation
- Large Scale Structural Strong-Floor Facility
 - Structural evaluation of full size beams and columns
 - Development of earthquake resistant structural systems
- National Center for Accessible Transportation
 - Investigation of advanced technologies for accessible transportation systems

MICROPRODUCTS BREAKTHROUGH INSTITUTE

Goran Jovanovic, *OSU Co-Director*

541-713-1348 (office-MBI)
Email: goran.jovanovic@oregonstate.edu
Website: <http://mbi-online.org/>

The MBI is a 45,000 square foot facility located on the Hewlett-Packard Corvallis campus containing offices, laboratories, fabrication facilities and laydown space for the research, development and commercialization of arrayed microfluidic systems and related nanomanufacturing technology. This facility is focused on accelerating the discovery, development and commercial deployment of new nano- and micro-scale phenomena and their technology embodiments.

The MBI is collaboration between the Pacific Northwest National Laboratory (PNNL) and Oregon State University (OSU). The MBI is one of three shared-user facilities within the Oregon Nanoscience and Microtechnologies Institute (ONAMI, <http://www.onami.us/>).

PNNL and OSU are leaders in the science, engineering, and technology development of nano- and micro-scale processes and systems. Collaboratively they conduct research and development projects ranging from fundamental science and technology investigations to assistance with commercial development and production. Areas of current research and development include photovoltaic manufacturing, hydrogen storage, nanomaterials synthesis, biofuel processing, miniature heat pumps and artificial kidneys among others.

Both PNNL and OSU are well established in arrayed microfluidic systems development. PNNL's thrust is Micro Chemical and Thermal Systems (MICROCATS) while OSU concentrates on Micro Energy and Chemical Systems (MECS). Together, OSU and PNNL seek to model, through the MBI, the way in which technology can be developed and commercialized through the collaboration of federal laboratories and universities.

The MBI is performing research and development in arrayed microfluidics and nanomanufacturing for:

- U.S. Department of Energy (DOE)
- National Institute of Health (NIH)
- Defense Advanced Research Projects Agency (DARPA)
- U.S. Army
- National Aeronautics and Space Administration (NASA)
- National Science Foundation (NSF)
- Private companies and corporations

O.H. HINSDALE WAVE RESEARCH LABORATORY

David Trejo, *Interim Director*
541-737-9304

Email: david.trejo@oregonstate.edu
Website: <http://wave.oregonstate.edu/>

The O.H. Hinsdale Wave Research Laboratory, together with the Coastal and Ocean Engineering Program within the School of Civil and Construction Engineering, is a leading center for research and education in coastal engineering and nearshore science. Its strengths include:

- An active faculty specializing in physical, numerical, and theoretical modeling of coastal processes
- An interdisciplinary graduate program offering MS, ME and PhD degrees
- One of the largest and technically most advanced laboratories for coastal research
- Expertise in tsunami and coastal hazard mitigation

The O.H. Hinsdale Wave Research Laboratory is the largest experimental facility for coastal research at an academic institution in the U.S. The two-acre building is situated on the main campus and houses the Large Wave Flume (LWF),

Tsunami Wave Basin (TWB), and 2,000 sq. ft. of office space for staff, graduate students, visiting researchers, and clients. The HWRL is partially supported by the George E. Brown Jr. Network for Earthquake Engineering Simulation (NEES) consortium of the National Science Foundation. The laboratory conducts research on coastal and nearshore processes involving:

- Wave-structure interaction
- Nearshore hydrodynamics and sediment transport
- Wave energy
- Tsunami and coastal hazards
- Fixed and floating structures

The O.H. Hinsdale Wave Research Laboratory and the Coastal and Ocean Engineering Program are committed to providing outstanding education and research opportunities to reduce risks associated with coastal hazards and tsunamis, to improve the sustainability of coastal areas, and to develop innovative solutions to the design of coastal infrastructure.

OREGON CLIMATE CHANGE RESEARCH INSTITUTE (OCCRI)

Philip W. Mote, *Director*

Kathie Dello, *Associate Director, OCCRI*

Gustavo Bisbal, *Director, DOI PNW Climate Science Center*

Websites: <http://occri.net/> and <http://pnwclimate.org>

The Oregon State Legislature established the Oregon Climate Change Research Institute (OCCRI) within the Department of Higher Education in 2007. OCCRI is a network of over 150 researchers at Oregon State University (OSU), the University of Oregon, Portland State University, Southern Oregon University, and affiliated federal and state labs.

OCCRI is administered by OSU and its institutional partners within the Oregon University System (OUS).

OCCRI is tasked with:

- facilitating research by OUS faculty on climate change and its effects on natural and human systems in Oregon
- serving as a clearinghouse for climate change information
- providing climate change information to the public in integrated and accessible formats
- supporting the Oregon Global Warming Commission in developing strategies to prepare for and to mitigate the effects of climate change on natural and human systems, and
- providing technical assistance to local governments to assist them in developing climate change policies, practices, and programs.

At least every two years, the institute will also develop an assessment of climate change science as it relates to Oregon and the likely effects of climate change on the state. OCCRI helps Oregonians, government agencies, and the private sector understand the potential impacts of climate variability and change on the state. The institute also helps individuals, agencies, and companies develop new strategies to prepare for climate change.

In September of 2010, OCCRI was named as the anchor institution for two federally funded regional climate science centers. The Department of the Interior's (DOI) Pacific Northwest Climate Science Center (CSC) is one of eight planned CSC's. The CSC will serve as a resource for DOI agencies in providing necessary science in advising policy decisions. The National Oceanic and Atmospheric Administration's (NOAA) Pacific Northwest Climate Impacts Research Consortium (CIRC) is one of 11 Regional Integrated Sciences and Assessments (RISA) projects. The CIRC is engaging a broad number of stakeholders, including municipalities, utilities, emergency management organizations, irrigators, agricultural and Sea Grant extension, and state and federal agencies. In support of these stakeholders, CIRC is working on developing regional downscaled climate scenarios using integrated climate, hydrological, and vegetation models; PNW region and basin scale climate impacts assessments; social science and network analysis; coastal climate hazard, risk and vulnerability assessments; decision scenario visualization and planning tools; climate extension; public health risk management guidance; and community level adaptation approaches (see <http://pnwclimate.org>).

OREGON WOOD INNOVATION CENTER

Scott Leavengood, *Director*
541-737-4212

Chris Knowles, *Assistant Director*
541-737-1438

Kent Davis, *Undergraduate Student Research Project Coordinator*
541-737-4252

Corvallis, OR 97331-5751
Email: owic@oregonstate.edu
Website: <http://owic.oregonstate.edu/>

The Oregon Wood Innovation Center (OWIC) is a joint initiative of Oregon State University's College of Forestry and Extension Service. OWIC's mission is to improve the competitiveness of Oregon's wood products industry by fostering innovation in products, processes, and business systems. A key function of the

center is to serve as the primary link between university research and needs and opportunities in the forest industry.

Why an Innovation Center?

The forest products industry has undergone dramatic changes in recent years. The industry responded to reductions in raw material supply and the forces of globalization by consolidating, retooling production systems, and by focusing on improving efficiencies in manufacturing processes. However, it is clear that focusing solely on process innovation will be insufficient to maintain future competitive advantage. Firms must also focus on product and business systems innovation. OWIC helps foster such innovation by serving as a 'clearinghouse' to connect manufacturers to the research community, to other organizations that provide assistance to businesses, and to facilitate networking within the industry.

Facilities and Services

OWIC is housed within OSU's Department of Wood Science and Engineering, a department with established capabilities in research, outreach, and technology transfer in a broad array of disciplines. Disciplines and accompanying laboratories and services include:

- **Anatomy and Quality of Renewable Materials**—laboratories for wood fiber characterization and wood identification; equipment including microscopes and an X-ray densitometer.
- **Biodeterioration, Protection and Durability of Renewable Materials**—pressure cylinder for impregnating materials with preservatives; equipment for assessing insect and decay resistance.
- **Biomass and Biofuels**—equipment for analyzing the physical characteristics and energy value (e.g., particle size distribution, ash content and composition, and calorimetric heating values) of biomass feed stocks; a ½-meter diameter dryer for biomass.
- **Chemistry**—adhesives development, testing, and troubleshooting; research and testing of plant materials for value-added chemical products.
- **Nanotechnology**—research in nanocomposites for advanced textiles, barrier films, membranes, coatings and sensors
- **Composite Materials**—development and testing of wood and wood/non-wood composites; equipment including presses (hot and cold), glue spreader, refiner, digester, blender, former, and wood-plastic extruder.
- **Wood Drying**—a 100 BF kiln for measuring volatile organic

compound (VOC) emissions and 2,000 BF dry kiln for research in lumber drying.

- **Timber Engineering and Structural Design**—equipment for assessing strength properties of wood-based materials; scale varies from small specimens up to large members such as beams and full-scale wall systems.
- **Green Building Materials Laboratory**—a 5,000 sq. ft. shared resource laboratory of Oregon Built Environment and Sustainable Technologies Center (Oregon BEST). Equipment for characterizing, developing and testing high performance sustainable materials for a wide variety of applications including buildings and transportation infrastructure.
- **Forest Products Business and Marketing**—research and outreach on innovation in the forest industry and assessment of market potential for new products.
- **Environmental Impacts of Renewable Materials**—research on the environmental impacts of renewable materials from 'cradle to grave' (life cycle inventory and analysis).
- Other facilities include environmental conditioning chambers (hot-dry, hot-wet, cold room, standards room) and state-of-the-art classrooms for onsite or distance education programs.

SUN GRANT WESTERN REGIONAL CENTER

John R. Talbott, *Director*

541-737-2194

Email: john.talbott@oregonstate.edu

Email: sungrant@oregonstate.edu

Website: <http://sungrant.oregonstate.edu/>

The mission of the Sun Grant Initiative is to:

1. Enhance national energy security through development, distribution and implementation of biobased energy technologies;
2. Promote diversification in and the environmental sustainability of, agricultural production in the United States through biobased energy and products technologies;
3. Promote economic diversification in rural areas of the United States through biobased energy and product technologies; and
4. Enhance the efficiency of bioenergy and biomass research and development programs through improved coordination and collaboration among the Department of Agriculture, the Department of

Energy, and the land grant colleges and universities.

A network of five land grant universities serve as regional Sun Grant Centers. These universities include Oregon State University (Western Region), South Dakota State University (North-Central), Oklahoma State University (South-Central), the University of Tennessee-Knoxville (Southeastern), and Cornell University (Northeastern). The centers facilitate federally funded research, extension, and education programs in their respective regions.

The Sun Grant Western Regional Center, located at Oregon State University in Corvallis, is the administrative unit for the region composed of the states of Alaska, Arizona, California, Hawaii, Idaho, Nevada, Oregon, Utah, and Washington, and the Pacific Territories and associated Pacific island nations, including American Samoa, Commonwealth of the Northern Mariana Islands, Guam, Federated States of Micronesia, the Republic of Palau, and the Republic of the Marshall Islands.

The current program area priorities for the Western region include biomass production, conversion and processing technologies, the development and enhancement of bio-based products, and evaluation of the bioproduct supply chain and life cycle analyses.

Important aims for the center include distributed energy production, diversity of feedstocks and processing approaches, crop suitability assessment, co-product and local human capital development, and system approaches.

SURVEY RESEARCH CENTER

Virginia Lesser, *Director*

Website: <http://www.stat.oregonstate.edu/src>

The Survey Research Center, established in 1973, operates as a center for research in survey methodology, and to provide research support with regard to survey design, sample selection, questionnaire construction, data collection and reduction, statistical analysis, and the reporting of results.

The center is available to departments of the Oregon State System of Higher Education and to other organizations serving the public interest. Charges are made for all work in the center except preliminary consulting. Estimates for project proposals can be obtained upon request. For proposals to be submitted to funding agencies, the center can either submit a joint proposal or act as a subcontractor.

The center's interests include surveys of human populations, and other populations such as plants, animals, land areas, and other populations for which surveys can provide useful information.

**UNIVERSITY CORPORATION
FOR ATMOSPHERIC
RESEARCH (UCAR)**

Jeffrey R. Barnes, *OSU Member
Representatives*

Website: <https://www2.ucar.edu/>

Through its membership in this national research consortium, Oregon State University has access to extensive facilities and services in support of its research in atmospheric, oceanic, and related sciences. Chief among these is the National Center for Atmospheric Research (NCAR) in Boulder, Colorado. Under the support of the National Science Foundation, this national laboratory conducts significant programs of atmospheric, oceanographic, and solar research in cooperation with member universities, and operates a state-of-the-art super computer facility, which is accessible to member institutions. UCAR also operates facilities for scientific ballooning, and through NCAR, maintains instrumented research aircraft and an extensive research and data library.

In addition to using these facilities, OSU faculty and graduate students participate in numerous seminars, workshops, and scientific meetings and conferences that are held at NCAR throughout the year. Through the corporation, Oregon State also cooperates in various national and international initiatives for research, service, and training in the atmospheric and related sciences.

EMERITUS FACULTY

Emeritus status is given to eligible tenured Oregon State University faculty members upon their retirement, in recognition for their years of effective service. As leaders in their fields, many emeritus faculty members continue to serve the university throughout their retirement. The year listed after each name is the year the faculty member began service at Oregon State.

A

Abrassart, Arthur E 1966 Emeritus Associate Professor College of Business.
 Acock, Alan C 1990 Emeritus Professor Sch of Soc/Bhav Hlth Sci.
 Adair, John 1953 Emeritus Senior Instructor I Animal & Rnglnd Sciences.
 Adams, Darius M 1995 Emeritus Professor Forest Eng/Resources/Mgmt.
 Adams, David G 1972 Emeritus Professor Horticulture Extension.
 Adams, Frank W 1953 Emeritus Assistant Professor Enviro/Molecular Toxic.
 Adams, Richard M 1983 Emeritus Professor Applied Economics.
 Adams, Wesley 1978 Emeritus Professor Forest Ecosyst & Society.
 Ahearn, Kerry D 1976 Emeritus Associate Professor Sch of Wrtg Lit & Film.
 Aldrich-Markham, Susan 1983 Emeritus Professor Crop and Soil Science.
 Ali Niazee, Mohammed T 1972 Emeritus Professor Horticulture.
 Allen Jr, John S 1973 Emeritus Professor Earth, Ocean & Atmo Sci.
 Allen Jr, Thomas C 1962 Emeritus Professor Ag Botany/Plant Path.
 Amano, Matthew M 1967 Emeritus Professor College of Business.
 Amort, Donald L 1958 Emeritus Associate Professor Sch Elect Engr/Comp Sci.

Hagen, Ivan J 1969 Emeritus Senior Instructor - LEGACY Crop/Soil Sci Extension.

Hall, James D 1963 Emeritus Professor Fisheries and Wildlife.

Hall, Roberta L 1975 Emeritus Professor Anthropology.

Hamilton, Margaret E 1957 Emeritus Professor Extension Service Prgram.

Hamilton, Robert R 1968 Emeritus Professor Extension Service Prgram.

Hamm, Philip B 1975 Emeritus Professor Ag Botany/Plant Path.

Hancock, Astrid F 1963 Emeritus Assistant Professor Sch of Bio/Pop Hlth Sci.

Hanna, Susan S 1977 Emeritus Professor Applied Economics.

Hansen, Everett M 1972 Emeritus Professor Ag Botany/Plant Path.

Hansen, Herbert E 1974 Emeritus Associate Professor College of Ag Admin.

Hansen, N J 1998 Emeritus Professor College of Ag Extension.

Hardesty, David P 1970 Emeritus Professor Art.

Harger, Virginia F 1967 Emeritus Professor Sch of Bio/Pop Hlth Sci.

Harper, James A 1942 Emeritus Professor Animal & Rnglnd Sciences.

Harris, Irwin C 1947 Emeritus Professor Memorial Union.

Harrison, William L 1974 Emeritus Professor College of Business-Adm.

Hart, Dianne W 1981 Emeritus Senior Instructor I Foreign Langs and Lits.

Hart, John M 1984 Emeritus Professor Crop and Soil Science.

Hart, Ralph D 1969 Emeritus Professor Crop/Soil Sci Extension.

Harward, Moyle E 1964 Emeritus Professor Crop and Soil Science.

Hashimoto, Andrew G 1986 Emeritus Professor Biol & Ecol Engineering.

Hathaway, Ronald L 1972 Emeritus Animal & Rnglnd Sci Extn.

Haun, James F 1964 Emeritus Professor Office of the Registrar.

Haverson, Wayne W 1978 Emeritus Professor College of Education.

Hawkes, Stephen J 1968 Emeritus Professor Chemistry.

Hay, James W 1977 Emeritus Senior Instructor I Horticulture.

Hayes, Wilson C 1998 Emeritus Professor Sch of Bio/Pop Hlth Sci.

Heath, Kathleen F 1967 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.

Hedberg, Kenneth W 1955 Emeritus Professor Chemistry.

Heikkila, Paul A 1969 Emeritus Associate Professor Fisheries and Wildlife.

Hellickson, Martin L 1975 Emeritus Associate Professor Biol & Ecol Engineering.

Helmick, Sandra A 1991 Emeritus Professor Sch of Soc/Bhav Hlth Sci.

Hemphill, Delbert D 1976 Emeritus Professor Horticulture.

Hendricks, Jerry D 1975 Emeritus Professor Enviro/Molecular Toxic.

Hendricks, Jon A 1988 Emeritus Professor Univ Honors College.

Hendricks, Jon A 1988 Emeritus Professor Sociology.

Hermann, Richard K 1961 Emeritus Professor Forest Eng/Resources/Mgmt.

Herzog, James H 1967 Emeritus Associate Professor Sch Elect Engr/Comp Sci.

Hetherington, William M 1987 Emeritus Associate Professor Physics.

Hibbs, David E 1983 Emeritus Professor Forest Ecosyst & Society.

Hicks, Russell G 1975 Emeritus Professor College of Engineering.

Higgins, Karen 1986 Emeritus Associate Professor College of Education.

Hildebrandt, Emery V 1954 Emeritus Professor Speech Communication.

Hilderbrand, Kenneth S 1969 Emeritus Associate Professor Food Science and Techno.

Hisaw, Frederick L 1958 Emeritus Associate Professor Zoology.

Hixon, Mark A 1984 Emeritus Professor Zoology.

Hobbs, Beverly B 1989 Emeritus Professor EXT 4-H YouthDev OnCmps.

Hobbs, Stephen D 1978 Emeritus Professor Forest Eng/Resources/Mgmt.

Holman, Robert A 1979 Emeritus Professor Earth, Ocean & Atmo Sci.

Holmes, Zoe A 1974 Emeritus Professor Sch of Bio/Pop Hlth Sci.

Holtan, Donald W 1975 Emeritus Associate Professor Animal & Rnglnd Sciences.

Holyoak, Arlene 1981 Emeritus Associate Professor Sch of Soc/Bhav Hlth Sci.

Horne, Frederick H 1986 Emeritus Professor Chemistry.

Horowitz, Irwin A 1994 Emeritus Professor Sch of Psychological Sci.

Horton, Howard F 1958 Emeritus Professor Fisheries and Wildlife.

Hosoi, Yasuharu T 1969 Emeritus Associate Professor Philosophy.

Hovland, Clarence W 1949 Emeritus Professor Liberal Arts Admin.

Howell, Michael E 1973 Emeritus Professor Animal & Rnglnd Sciences.

Huber, Wayne C 1991 Emeritus Professor Sch of Civil/Constr Engr.

Huddleston, J H 1975 Emeritus Professor Crop and Soil Science.

Hudspeth, Robert T 1974 Emeritus Professor Sch of Civil/Constr Engr.

Hutton, Norman E 1977 Emeritus Professor Veterinary Medicine.

Huyer, Adriana 1972 Emeritus Professor Earth, Ocean & Atmo Sci.

I

Ingle Jr, James D 1971 Emeritus Professor Chemistry.

Ingram, Patricia C 1970 Emeritus Assistant Professor Sch of Bio/Pop Hlth Sci.

Irvin, Richard F 1967 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.

Isley, Arleigh G 1969 Emeritus Associate Professor Extension Service Prgram.

J

Jacks, Clinton C 1970 Emeritus Professor Animal & Rnglnd Sciences.

Jackson, Philip L 1978 Emeritus Professor Earth, Ocean & Atmo Sci.

Jackson, Royal G 1970 Emeritus Associate Professor Forest Ecosyst & Society.

Jacobson, Robert W 1967 Emeritus Professor Extension Service Prgram.

Jarvis, Robert L 1971 Emeritus Professor Fisheries and Wildlife.

Jeffers, Ronald H 1974 Emeritus Associate Professor Music.

Jeffrey Jr, Hugh F 1950 Emeritus Professor Business Affairs.

Jensen, Harold J 1950 Emeritus Professor Ag Botany/Plant Path.

Johnson, Arthur G 1966 Emeritus Professor Radiation Center.

Johnson, Arthur G 1966 Emeritus Professor Nuclear Engineering.

Johnson, Douglas E 1982 Emeritus Professor Animal & Rnglnd Sciences.

Johnson, Duane P 1959 Emeritus Professor College of Education.

Johnson, Sharon D 2000 Emeritus Associate Professor Sch of Soc/Bhav Hlth Sci.
 Johnson, Simon S 1971 Emeritus Associate Professor Sch of Wrtg Lit & Film.
 Johnson Jr, W C 1968 Emeritus Professor Biochem/Biophysics.
 Johnston, Alberta B 1963 Emeritus Professor Extension Service Admin.
 Johnston, LaRea D 1960 Emeritus Senior Instructor I Ag Botany/Plant Path.
 Johnston, Richard S 1966 Emeritus Professor Applied Economics.
 Jolliff, Gary D 1976 Emeritus Professor Crop and Soil Science.
 Jones, Robert W 1962 Emeritus Assistant Professor Sch of Wrtg Lit & Film.
 Jordan, Cheryl L 1976 Emeritus Assistant Professor College of Business.

K

Kanury, Anjaneya M 1985 Emeritus Professor Sch of Mech/Ind/Mfg Engr.
 Karchesy, Joseph J 1979 Emeritus Associate Professor Wood Science/Engr.
 Keller, George H 1975 Emeritus VP for Research.
 Keller, George H 1975 Emeritus Professor Earth, Ocean & Atmo Sci.
 Kelsey, Mary W 1958 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.
 Kemp, Patrick S 1974 Emeritus Professor College of Business.
 Kennedy, Timothy C 1976 Emeritus Professor Sch of Mech/Ind/Mfg Engr.
 Kenneke, Larry J 1970 Emeritus Professor College of Education.
 Kerkvliet, Nancy I 1977 Emeritus Professor Enviro/Molecular Toxic.
 Ketchum, Lynn G 1988 Emeritus Professor Ext/Exp S Communications.
 Kiekel, Robert D 1966 Emeritus Associate Professor Foreign Langs and Lits.
 Kiigemagi, Ulo 1954 Emeritus Senior Instructor I Enviro/Molecular Toxic.
 Kimerling, A J 1976 Emeritus Professor Earth, Ocean & Atmo Sci.
 Kimura, Shoichi 1989 Emeritus Professor Sch of Chem/Bio/Envr Eng.
 Kinch, Michael P 1969 Emeritus Professor Information Services.
 King, Charles E 1977 Emeritus Professor Zoology.
 King, David B 1963 Emeritus Professor History.
 King, Jonathan B 1980 Emeritus Associate Professor College of Business.
 King, Keith I 1969 Emeritus Senior Instructor I Biology.
 King, Lynda J 1986 Emeritus Professor Foreign Langs and Lits.
 Kingsley, Kenneth 1974 Emeritus Professor Ext/Exp S Communications.
 Kirk, Dale E 1954 Emeritus Professor Biol & Ecol Engineering.
 Klemke, Lloyd W 1970 Emeritus Professor Sociology.
 Kling, Gerald F 1974 Emeritus Associate Professor Crop and Soil Science.
 Klingeman, Peter C 1966 Emeritus Professor Sch of Civil/Constr Engr.

Klinkhammer, Gary P 1990 Emeritus Professor Earth, Ocean & Atmo Sci.
 Knothe, Carol A 1972 Emeritus Associate Professor Ext Malheur Co Office.
 Knutson, Devon D 1994 Emeritus Associate Professor Animal & Rnglnd Sciences.
 Kocher, Carl A 1973 Emeritus Professor Physics.
 Koepsell, Paul A 1969 Emeritus Professor Ag Botany/Plant Path.
 Koester, Ardis W 1974 Emeritus Professor EXT Fam/CommHlth OnCmps.
 Kogan, Marcos 1991 Emeritus Professor Horticulture.
 Kolbe, Edward R 1974 Emeritus Professor Biol & Ecol Engineering.
 Kolding, Mathias F 1968 Emeritus Senior Instructor I Hermiston Exp Sta.
 Komar, Paul D 1970 Emeritus Professor Earth, Ocean & Atmo Sci.
 Koong, Ling-Jung 1987 Emeritus Professor Animal & Rnglnd Sciences.
 Kozlik, Charles J 1961 Emeritus Associate Professor Wood Science/Engr.
 Kradjan, Wayne A 1998 Emeritus Professor Pharmacy.
 Kradjan, Wayne A 1998 Dean Emeritus Professor College of Pharmacy-Adm.
 Krahmmer, Robert L 1961 Emeritus Professor Wood Science/Engr.
 Krane, Kenneth S 1974 Emeritus Professor Physics.
 Krantz, Gerald W 1955 Emeritus Professor College of Science Admin.
 Krueger, James H 1961 Emeritus Professor Chemistry.
 Krueger, Judith C 1966 Emeritus Senior Instructor I Music.
 Krueger, William C 1971 Emeritus Professor Animal & Rnglnd Sciences.
 Kulm, Laverne D 1964 Emeritus Professor Earth, Ocean & Atmo Sci.

L

Landau, Rubin H 1974 Emeritus Professor Physics.
 Landforce, Andrew S 1998 Emeritus Associate Professor College of Ag Extension.
 Langford, Charles C 1970 Emeritus Associate Professor Sociology.
 Larsen, Knud S 1969 Emeritus Professor Sch of Psychological Sci.
 Larson, Milton B 1969 Emeritus Professor Sch of Mech/Ind/Mfg Engr.
 Larson, Robert E 1965 Emeritus Professor Pharmacy.
 Larwood, Lillian L 1988 Emeritus Professor EXT 4-H YouthDev OnCmps.
 Lattin, John D 1955 Emeritus Professor College of Science Admin.
 Laursen, Harold I 1963 Emeritus Professor Sch of Civil/Constr Engr.
 Lavender, Denis P 1961 Emeritus Professor Forest Ecosyst & Society.
 Laver, Murray L 1969 Emeritus Associate Professor Wood Science/Engr.
 Law, Duncan K 1944 Emeritus Professor COMES - Newport Exp Sta.

Lawrence, Robert D 1970 Emeritus Associate Professor Earth, Ocean & Atmo Sci.
 Lawrence, Robert E 1974 Emeritus Associate Professor Information Services.
 Lawson, David C 1969 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.
 Lawton, Stephen J 1976 Emeritus Associate Professor College of Business.
 Layton, Robert D 1972 Emeritus Professor Sch of Civil/Constr Engr.
 Le Sueur, Billie 1965 Emeritus Professor Extension Service Prgam.
 Lee, John W 1969 Emeritus Professor Mathematics.
 Leeson, Theodore A 1984 Emeritus Senior Instructor I Sch of Wrtg Lit & Film.
 Leffel, John A 1962 Emeritus Professor Extension Service Prgam.
 Leklem, James E 1975 Emeritus Professor Sch of Bio/Pop Hlth Sci.
 Leman, Nancy F 1971 Emeritus Instructor Sch of Wrtg Lit & Film.
 Leno, Janice R 1988 Emeritus Associate Professor EXT Fam/CommHlth OnCmps.
 Leong, Joann C 1975 Emeritus Professor Microbiology (Science).
 Levenspiel, Octave 1969 Emeritus Professor Sch of Chem/Bio/Envr Eng.
 Levi, Shaul 1977 Emeritus Professor Earth, Ocean & Atmo Sci.
 Levine, Shepard 1954 Emeritus Professor Art.
 Lewis, Margaret J 1971 Emeritus Assistant Professor EXT Fam/CommHlth OnCmps.
 Libbey, Leonard M 1961 Emeritus Professor Food Science and Techno.
 Lillie, Robert J 1984 Emeritus Professor Earth, Ocean & Atmo Sci.
 Liss, William J 1977 Emeritus Professor Fisheries and Wildlife.
 List, Peter C 1967 Emeritus Professor Philosophy.
 Locke, Kerry A 1985 Emeritus Professor Crop and Soil Science.
 Loeb, Barbara E 1985 Emeritus Associate Professor Art.
 Lombard, Porter B 1963 Emeritus Professor Horticulture.
 Lomonte, Rosemarie 1959 Emeritus Associate Professor Information Services.
 Lovell, Ronald P 1972 Emeritus Professor Sch of Wrtg Lit & Film.
 Lowrie, Miriam J 1971 Emeritus Professor Ext Polk County Office.
 Ludwig, Martin J 1952 Emeritus Assistant Professor Sch of Wrtg Lit & Film.
 Lunch, William M 1984 Emeritus Professor Political Science.
 Lund, Steve 1975 Emeritus Professor Columbia Basin Exp Sta.
 Lundin, Fredrick M 1985 Emeritus Assistant Professor Extension Service Prgam.
 Lunner, Marilyn J 1968 Emeritus Associate Professor Extension Service Prgam.
 Lyford, John H 1966 Emeritus Associate Professor College of Science Admin.

Sharrow, Steven H 1976 Emeritus Professor
Animal & Rnglnd Sciences.
Shearer, Marvin 1968 Emeritus Professor Biol
& Ecol Engineering.
Sheets, Willis A 1959 Emeritus Professor
Extension Service Prgram.
Sherr, Barry F 1990 Emeritus Professor Earth,
Ocean & Atmo Sci.
Sherr, Evelyn B 1990 Emeritus Professor Earth,
Ocean & Atmo Sci.
Shibley, Gloria O 1965 Emeritus Professor
Extension Service Prgram.
Shindler, Bruce A 1988 Emeritus Professor
Forest Ecosyst & Society.
Shirley, Robert E 1967 Emeritus Associate
Professor College of Business-Adm.
Shively, Stanley E 1970 Emeritus Associate
Professor Sociology.
Shumway, Sallyann M 1963 Emeritus Associate
Professor EXT Fam/CommHlth OnCmps.
Siemens, Philip J 1988 Emeritus Professor
Physics.
Simko, Benedict C 1978 Emeritus Professor
Crop and Soil Science.
Simmons, Dale D 1963 Emeritus Professor Sch
of Psychological Sci.
Simon-Brown, Viviane M 1994 Emeritus
Professor Forest Ecosyst & Society.
Simoneit, Bernd R 1981 Emeritus Professor
Earth, Ocean & Atmo Sci.
Simonson, Gerald H 1961 Emeritus Professor
Crop and Soil Science.
Sisson, Carol F 1975 Emeritus Associate
Professor College of Education.
Sjogren, Christine O 1960 Emeritus Professor
Foreign Langs and Lits.
Skubinna, Tammy K 1983 Emeritus Professor
Sch of Soc/Bhav Hlth Sci.
Sleight, Arthur W 1989 Emeritus Professor
Chemistry.
Slocombe, Edmond N 1986 Emeritus Associate
Professor Extension Service Prgram.
Slotta, Larry S 1962 Emeritus Professor Sch of
Civil/Constr Engr.
Small, Lawrence F 1961 Emeritus Professor
Earth, Ocean & Atmo Sci.
Smiley, William E 1987 Emeritus Associate
Professor College of Education.
Smith, Alvin W 1980 Emeritus Professor
Veterinary Medicine.
Smith, Bradford B 1983 Emeritus Professor
Veterinary Medicine.
Smith, Charles E 1961 Emeritus Professor Sch
of Mech/Ind/Mfg Engr.
Smith, Courtland L 1969 Emeritus Professor
Anthropology.
Smith, Frederick J 1964 Emeritus Professor Sea
Grant.
Smith, J W 1965 Emeritus Professor
Mathematics.
Smith, Margaret M 1977 Emeritus Associate
Professor Sch of Soc/Bhav Hlth Sci.
Smith, Orrin E 1980 Emeritus Professor
Horticulture Extension.
Smith, Robert L 1979 Emeritus Professor
Extension Service Prgram.
Smith, Robert L 1964 Emeritus Professor Earth,
Ocean & Atmo Sci.
Smythe, Robert T 1998 Emeritus Professor
Statistics (Science).
Snow, Christine M 1990 Emeritus Professor Sch
of Bio/Pop Hlth Sci.
Snyder, Stanley P 1985 Emeritus Professor
Veterinary Medicine.
Soeldner, Alfred H 1966 Emeritus Senior
Instructor I Ag Botany/Plant Path.
Sollins, Phillip 1976 Emeritus Professor Forest
Ecosyst & Society.
Sollitt, Charles K 1972 Emeritus Professor Sch
of Civil/Constr Engr.
Solmon, Donald C 1977 Emeritus Professor
Mathematics.
Sorenson, Gary W 1968 Emeritus Associate
Professor Economics.
Soule, B L 1967 Emeritus Associate Professor
College of Business.
Spencer, James B 1963 Emeritus Associate
Professor History.
Sponenburgh, M R 1961 Emeritus Professor
Art.
Spotts, Robert A 1978 Emeritus Professor Ag
Botany/Plant Path.
Sredl, Henry J 1983 Emeritus Professor College
of Education.
Stadsvold, Cyril V 1963 Emeritus Associate
Professor Art.
Stang, Jack R 1976 Emeritus Associate Professor
Horticulture.
Stanger Jr, Charles E 1973 Emeritus Professor
Malheur Exp Sta.
Staton, Maryanne K 1964 Emeritus Professor
Sch of Soc/Bhav Hlth Sci.
Stebbins, Robert L 1962 Emeritus Professor
Horticulture.
Steggell, Carmen D 1998 Emeritus Associate
Professor College of Business.
Stehr, Christian P 1969 Emeritus Professor
Foreign Langs and Lits.
Stennett, Douglass J 1974 Emeritus Professor
Pharmacy.
Stephen, William P 1953 Emeritus Professor
Crop and Soil Science.
Stetz, Albert W 1976 Emeritus Professor
Physics.
Stevens, Joe B 1966 Emeritus Professor Applied
Economics.
Stiehl, Ruth E 1972 Emeritus Professor College
of Education.
Stoltz, Michael A 1979 Emeritus Professor Crop
and Soil Science.
Stone, Solon A 1957 Emeritus College of
Engineering.
Stone, Solon A 1957 Emeritus Professor Sch
Elect Engr/Comp Sci.
Stonehill, Arthur I 1966 Emeritus Professor
College of Business.
Storm, Robert M 1946 Emeritus Professor
Zoology.
Stormshak, Fredrick 1968 Emeritus Professor
Animal & Rnglnd Sciences.
Strandberg, Lee R 1975 Emeritus Professor
Pharmacy.

Sugawara, Alan I 1968 Emeritus Professor Sch of Soc/Bhav Hlth Sci.

Sullivan, David R 1981 Emeritus Associate Professor College of Business.

Sunderland, Paul L 1986 Emeritus Associate Professor General Agriculture.

Suttie, Sandra J 1969 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.

Swan, Patricia L 1978 Emeritus Associate Professor EXT Fam/CommHlth OnCmps.

Swanson, Lloyd V 1970 Emeritus Professor Animal & Rnglnd Sciences.

Swenson, L W 1968 Emeritus Professor Physics.

T

Tappeiner, John C 1980 Emeritus Professor Forest Eng/Resources/Mgmt.

Taubeneck, William H 1955 Emeritus Professor Earth, Ocean & Atmo Sci.

Taylor, Edward M 1966 Emeritus Professor Earth, Ocean & Atmo Sci.

Taysom, Wayne P 1951 Emeritus Professor Art.

Tentchoff, Dorice M 1977 Emeritus Assistant Professor Anthropology.

Thienes, John R 1968 Emeritus Professor Extension Service Prgam.

Thies, Richard W 1968 Emeritus Professor Chemistry.

Thomas, Darrah 1971 Emeritus Professor Chemistry.

Thomas, David R 1967 Emeritus Professor Statistics (Science).

Thompson, James M 1989 Emeritus Associate Professor Animal & Rnglnd Sci Extn.

Thompson, Maxine M 1964 Emeritus Professor Horticulture.

Thornburgh, George E 1952 Emeritus Professor Sch of Mech/Ind/Mfg Engr.

Tillson, Gregory D 1970 Emeritus Professor Extension Service Admin.

Timm, Karen I 1983 Emeritus Associate Professor Veterinary Medicine.

Tinsley, Ian J 1957 Emeritus Professor Enviro/Molecular Toxic.

Todd, Rodney M 1974 Emeritus Professor Crop and Soil Science.

Torbeck, Frances M 1958 Emeritus Associate Professor Extension Service Prgam.

Torpey, James E 1971 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.

Towey, Richard E 1962 Emeritus Professor Economics.

Tricker, Raymond 1989 Emeritus Associate Professor Sch of Soc/Bhav Hlth Sci.

Trow, Clifford W 1970 Emeritus Professor History.

Trow, Jo Anne 1965 Vice Provost Emeritus Professor Vice Prov/Student Aff.

Trow, Jo Anne 1965 Emeritus Professor College of Education.

Tubb, Richard A 1975 Emeritus Professor Fisheries and Wildlife.

Tucker, Sylvia B 1975 Dean Emeritus Professor College of Education.

Turner, Harley A 1974 Emeritus Associate Professor EOARC - Burns Exp Sta.

U

Ullman, David G 1984 Emeritus Professor Sch of Mech/Ind/Mfg Engr.

Unsworth, Michael H 1992 Emeritus Professor Earth, Ocean & Atmo Sci.

V

Valenti, Paul B 1949 Emeritus Professor Intercolleg Athletics.

VanDehey, Norbert J 1998 Emeritus Professor College of Ag Extension.

VanDyke, Henry 1960 Emeritus Professor Biology.

VanHolde, Ken E 1967 Emeritus Professor Biochem/Biophysics.

VanVliet, Antone C 1959 Emeritus Professor Career Services.

Vandewater, John G 1976 Emeritus Professor Int'l Degree & Ed Abroad.

Vanvechten, James A 1985 Emeritus Professor Sch Elect Engr/Comp Sci.

Vars Jr, R C 1966 Emeritus Professor Economics.

Vavra, Martin 1971 Emeritus Professor Animal & Rnglnd Sciences.

Verzasconi, Ray A 1967 Emeritus Professor Foreign Langs and Lits.

Vinson, Ted S 1976 Emeritus Professor Sch of Civil/Constr Engr.

Volk, Veril V 1966 Emeritus Professor Crop and Soil Science.

Vomocil, James A 1967 Emeritus Professor Crop and Soil Science.

Vonborstel Jr, Frank 1952 Emeritus Professor Extension Service Prgam.

W

Wagener, Joseph M 1969 Emeritus Professor Counseling Center.

Walstad, John D 1980 Emeritus Professor Forest Eng/Resources/Mgmt.

Ward, Chris L 1986 Emeritus Associate Professor College of Education.

Waring, Richard H 1963 Emeritus Professor Forest Ecosyst & Society.

Warren Jr, William W 1991 Emeritus Professor Physics.

Wasserman, Allen L 1965 Emeritus Professor Physics.

Watrous, Barbara J 1981 Emeritus Professor Vet Clinical Sciences.

Wax, Darold D 1963 Emeritus Professor History.

Weaver, Roger K 1962 Emeritus Professor Sch of Wrtg Lit & Film.

Weber, Dale W 1976 Emeritus Professor Animal & Rnglnd Sciences.

Weber, Lavern J 1969 Associate Dean Emeritus College of Ag Admin.

Weber, Lavern J 1969 Emeritus Professor Fisheries and Wildlife.

Weber, Leonard J 1957 Emeritus Professor College of Engineering.

Weinman, Richard J 1967 Emeritus Professor Speech Communication.

Weiser, Conrad J 1971 Emeritus Professor Horticulture.

Weiser, Conrad J 1971 Dean Emeritus College of Ag Admin.

Wess, Robert V 1977 Emeritus Associate Professor Sch of Wrtg Lit & Film.

West, Thomas M 1976 Emeritus Professor Sch of Mech/Ind/Mfg Engr.

Westall, John C 1980 Emeritus Professor Chemistry.

Westwood, Melvin N 1960 Emeritus Professor Horticulture.

Whanger, Philip D 1966 Emeritus Professor Enviro/Molecular Toxic.

Wheeler, Patricia A 1982 Emeritus Professor Earth, Ocean & Atmo Sci.

Wheeler, William P 1956 Emeritus Professor Forest Ecosyst & Society.

White, James D 1971 Emeritus Professor Chemistry.

Widicus, Wilbur W 1964 Emeritus Professor College of Business.

Wilcox, Bert G 1962 Emeritus Professor Extension Service Admin.

Wilkins, Bill 1961 Emeritus Professor Economics.

Wilkins, Bill 1961 Dean Emeritus Liberal Arts Admin.

William, Ray D 1979 Emeritus Professor Horticulture Extension.

Williamson, Kenneth J 1972 Emeritus Professor Sch of Civil/Constr Engr.

Willis, David L 1962 Emeritus Professor Biology.

Wilson, Howard L 1973 Emeritus Professor Mathematics.

Wilson, James B 1973 Emeritus Professor Wood Science/Engr.

Wilson, Mark V 1983 Emeritus Associate Professor Ag Botany/Plant Path.

Wilson, Robert E 1959 Emeritus Professor Sch of Mech/Ind/Mfg Engr.

Winkler Jr, William 1957 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.

Winters, Eugene P 1963 Emeritus Professor Extension Service Prgam.

Wiprud, Theodore F 1964 Emeritus Professor Art.

Wirth, Donald S 1971 Emeritus Associate Professor Alumni Relations.

Witt, James M 1966 Emeritus Professor Enviro/Molecular Toxic.

Witters, Robert E 1977 Emeritus Professor College of Ag Admin.

Wogaman, Mariol R 1968 Emeritus Associate Professor Library.

Wong, Allen Q 1967 Emeritus Professor Art.

Wong, Sally 1973 Emeritus Assistant Professor Counseling Center.

Wood, Terence M 1985 Emeritus Associate Professor Sch of Bio/Pop Hlth Sci.

Woodard, Ernest S 1974 Emeritus Associate Professor Extension Service Prgam.

Woodburn, Margy J 1969 Emeritus Professor Sch of Bio/Pop Hlth Sci.

Wrolstad, Ronald E 1965 Emeritus Professor Food Science and Techno.

Y

- Yates, Tom 1963 Emeritus Professor Information Services.
- Yeats, Robert 1977 Emeritus Professor Earth, Ocean & Atmo Sci.
- Yonker, Nicholas J 1962 Emeritus Professor Philosophy.
- Yost, Melvin L 1967 Emeritus Assistant Professor Information Services.
- Youmans, Russell C 1966 Emeritus Professor Applied Economics.
- Young, John A 1972 Emeritus Professor Anthropology.
- Young, Roy A 1948 Emeritus Professor Ag Botany/Plant Path.
- Young, William C 1977 Emeritus Professor Crop and Soil Science.
- Youngberg, Harold W 1960 Emeritus Professor Crop and Soil Science.
- Yungen, John A 1950 Emeritus Professor Southern Oregon Exp Sta.

Z

- Zaerr, Joe B 1965 Emeritus Professor Forest Ecosyst & Society.
- Zaneveld, J Ronald V 1971 Emeritus Professor Earth, Ocean & Atmo Sci.
- Zimmerman, Martin J 1960 Emeritus Professor Crop/Soil Sci Extension.
- Zinn, Thomas G 1962 Emeritus Professor Extension Service Admin.
- Zobel, Donald B 1968 Emeritus Professor Ag Botany/Plant Path.
- Zollinger, William A 1985 Emeritus Associate Professor Animal & Rnglnd Sciences.

FACULTY

This faculty roster includes the Oregon State University faculty who serve the university, its students, and constituents through one or more of the following activities: instruction, research, extension, and administration. Also listed are a few on-campus staff members with faculty appointments in other state system agencies. The names of courtesy faculty members, individuals who provide voluntary services to the instructional and research programs of the university, appear in the faculty listings of individual departments or colleges.

The following abbreviations are used: Prof-Professor; Assoc Prof-Associate Professor; Asst Prof-Assistant Professor; Inst-Instructor; Res Assoc-Research Associate; Sr Inst-Senior Instructor; Sr Faculty Res Asst-Senior Faculty Research Assistant; Faculty Res Asst-Faculty Research Assistant; Extn-Oregon State University Extension Service.

A

- Aaron, Wendy R 2012 Assistant Professor College of Education. BA Univ of Cal-Santa Cruz 2001; MA Univ of Cal-Los Angeles 2004; PHD Univ of Michigan-Ann Arbor 2011
- Abbott, Mark R 1988 Dean Earth, Ocean & Atmo Sci. BS Univ of Cal-Berkeley 1974; PHD Univ of California-Davis 1978
- Abbott, Mark R 1988 Professor Earth, Ocean & Atmo Sci. BS Univ of Cal-Berkeley 1974; PHD Univ of California-Davis 1978
- Ackers, Steven H 2000 Senior Faculty Research Asst I Fisheries and Wildlife. PHD Northern Arizona University 1997
- Adams, Paul W 1980 Ext Watershed Spec Professor Forest Eng/Resources/Mgmt. BS University of Vermont 1975; MS Univ of Michigan-Ann Arbor 1978; PHD Univ of Michigan-Ann Arbor 1980
- Adams, Terry 1986 Instructor College of Education. BA University of Oklahoma Norman 1978; BA Oregon State University 1989; JD University of Oklahoma Norman 1981
- Adkins, Jessica Y 1999 Senior Faculty Research Asst I Fisheries and Wildlife. BS Western Washington University 1997; MS Oregon State University 2003
- Adler, Rebecca A 2014 Instructor- ESL INTO OSU Program. BA Cal State Univ-Sacramento 2005; MA Cal State Univ-Sacramento 2011
- Aduviri, Amas 2005 Dir-CAMP Educ Opportunities Prgm. BA Foreign Institution 1989; MBA Andrews University 2000
- Aduviri, Cheridy L 2006 Instructor College of Education. BA Eastern Washington University 1996; MA Andrews University 2000
- Agne, Michelle C 2010 Faculty Research Assistant Forest Eng/Resources/Mgmt. BS Western Washington University 2009
- Ahern, Katherine 2011 Instructor Ext Deschutes Co Office. BS University of Puget Sound 1987; MA Oklahoma State Univ-Main 1993
- Ahern, Kevin G 1989 Dir-Undergraduate Research Acad Success & Engage Adm University Honors College Faculty. BS Oklahoma State Univ-Main 1976; MS Oklahoma State Univ-Main 1981; PHD Oregon State University 1986
- Ahern, Kevin G 1989 Senior Instructor I Biochem/Biophysics University Honors College Faculty. BS Oklahoma State Univ-Main 1976; MS Oklahoma State Univ-Main 1981; PHD Oregon State University 1986
- Ahluwalia, Sangeeta 2013 Assistant Professor Sch of Soc/Bhav Hlth Sci. MPH Univ of Cal-Los Angeles 2001; MA Univ of Cal-Berkeley 2007; PHD Univ of Cal-Berkeley 2009
- Ahrens, Glenn R 2001 Instructor Ext Clackamas Co Office. BS Humboldt State University 1982; MS Oregon State University 1990
- Akan, Cigdem 2012 Research Associate (Post Doc) Earth, Ocean & Atmo Sci. BS Foreign Institution 2005; MS Foreign Institution 2007; PHD University of South Florida 2012
- Akins, Brielyn N 2010 Instructor Women Studies. BA Washington State University 1998; MA Victoria University of Welling 2006
- Akins, Scott M 2004 Associate Professor Sociology University Honors College Faculty. BA Northern Arizona University 1994; MA Washington State University 1999; PHD Washington State University 2002
- Akkaraju, Padmaja 1999 Coordinator/ Advisor Sch Elect Engr/Comp Sci. BS Sri Venkateswara University 1983; MS Sri Venkateswara University 1985; PHD Indian Institute of Technology 1991
- Akroyd, Christopher L 2012 Assistant Professor College of Business. MS University of Sydney 1995; MBA Kobe University 2000; PHD Univ of Auckland 2007
- Al-Hawamdeh, Imad 2012 Instructor INTO OSU Program. BA Unknown College 2001; MA Indiana Univ of Pennsylvania 2010
- Alani, Wathah G 2010 Assistant Professor Pharmacy. BS University of Baghdad 1989; MS University of Baghdad 1995; PHD Univ of Wisconsin-Madison 2007
- Albers, Heidi J 2004 Professor Forest Ecosyst & Society. BS Duke University 1985; MED Yale University 1987; PHD Berkeley City College 2002
- Albert, Dennis A 2004 Assistant Professor (Sr Res) Horticulture. BS Univ of Michigan-Ann Arbor 1981; MS Univ of Michigan-Ann Arbor 1983; PHD Univ of Michigan-Ann Arbor 1990
- Albertani, Roberto 2010 Associate Professor Sch of Mech/Ind/Mfg Engr University Honors College Faculty. MS Foreign Institution 1980; PHD University of Florida 2005
- Albrecht, Andrew S 2004 Faculty Research Assistant Ag Botany/Plant Path. BA Pacific Lutheran University 2006
- Albrecht, Kristin Frost B 2009 Instructor Ext Clatsop Co Office. BA Willamette University 1979; MA Pacific University 1991

- Alcantar, Benjamin E 2011 Instructor Vet Biomedical Science. DVM Autonomous Univ St of Mexico 2005
- Alcorn, Kay A 2013 Instructor- ESL INTO OSU Program. BS San Diego State University 1986; MS School for Internatl Training 1997
- Alden, Catherine A 2006 Instructor College of Education. BA University of Oregon 1970; MA University of Oregon 1974
- Aldwin, Carolyn M 2004 Professor Sch of Soc/ Bhav Hlth Sci University Honors College Faculty. BA Clark University 1974; PHD Univ of Cal-San Francisco 1982
- Alexander, Rise J 1990 Head Coach-Women's Golf Intercolleg Athletics. BS Oregon State University 1977
- Alger, Marlys L 2012 Instructor Acad Prog/ Student Aff. BS Oregon State University 1986; MS Oregon State University 1993
- Aljets, Alexandria D 2007 Advisor-Academic/ Pre-Health College of Science Admin. BS Oregon State University 2010; MA The Ohio State Univ Main 2012
- Allan, Andrea M 2005 Research Associate (Post Doc) Earth, Ocean & Atmo Sci. BS Penn State Univ-Main Campus 2005; MS Oregon State University 2007; PHD Oregon State University 2012
- Allan, Robert S 2004 Dir-Student Services Earth, Ocean & Atmo Sci. BA Wittenberg University 1995; MA Minnesota State Univ-Mankato 2000
- Alleau, Yvan 1999 Senior Faculty Research Asst I Earth, Ocean & Atmo Sci. BS Universite of Poitiers 1997; MOCE Oregon State University 2002
- Allen, Nancy L 1999 Head Advisor Fisheries and Wildlife. BS Oregon State University 1985; MS Oregon State University 2001
- Allred, Ann H 2010 Instructor Acad Prog/ Student Aff. BA Ohio University-Main Campus 1968; MAT Eastern Oregon University 2001
- Altshin, Andrew M 2013 Instructor Crop/Soil Sci Extension. BS Oregon State University 2006
- Alvarez, Jackie 2008 Director-Counseling/ Psych Svcs Counseling Center. BA Unknown College 1985; MA Ohio Dominican University 1989; PHD Ohio Dominican University 1992
- Amarasekare, Kaushalya G 2009 Research Associate (Post Doc) Mid-Columbia Exp Sta. BS University of Peradeniya 1993; MS Oklahoma State Univ-Main 2002; PHD University of Florida 2007
- Amarasinghe, Vindhya 2008 Research Associate Ag Botany/Plant Path. BS Unknown College 10 1983; PHD Australian National University 1989
- Amele, Melinda R 1999 Instructor (PAC) Physical Activity Courses. BS Oregon State University 1980; MS Portland State University 1988
- Amon, Ean A 2004 Assistant Professor (Sr Res) Sch Elect Engr/Comp Sci. BS Oregon State University 2004; MS Oregon State University 2007; PHD Oregon State University 2010
- Anchell, Stephen G 2012 Instructor Art.
- Andersen, Daniel 2012 Instructor Political Science. BS Western Washington University 2005; MS University of Oregon 2008; PHD University of Oregon 2012
- Andersen, Jayne 2006 Advisor-Academic College of Business. BS Purdue University Main Campus 1983; MBA Oregon State University 1992
- Anderson, Ashleigh N 2007 Advisor-Academic Liberal Arts Admin. BA Univ of Cal-Riverside 2007
- Anderson, Kim A 1999 Professor Enviro/ Molecular Toxic. BS University of Oregon 1981; BS Boise State University 1985; PHD Washington State University 1989
- Anderson, Lorinda W 2011 Instructor Pharmacy. D PHAR University of Utah 2010
- Anderson, Nicole 2009 Assistant Professor Ext Yamhill Co Office. BS Xavier University 2003; MS Washington State University 2006
- Anderson, T Anne 2010 Professional Instructor Speech Communication. BS Portland State University 1997; MA Oregon State University 2013
- Anderson, Wayne C 1986 Professor Sch of Wrtg Lit & Film University Honors College Faculty. BA Gonzaga University 1977; MA University of Washington 1979; MA Mount Angel Seminary 1997; PHD University of Washington 1983
- Anderson, William J 2011 Instructor Applied Economics. BS University of Rhode Island 2011; MS Oregon State University 2013
- Andrew, Isaac D 2010 Instructor Music. BMUS Azusa Pacific University 2005; MM Cal State Univ-Long Beach 2010
- Andrews, Lawrence S 1993 Senior Faculty Research Asst I Fisheries and Wildlife. BS University of New Mexico 1988
- Andrews, Nicholas 2005 Senior Instructor I Ext No Willamette Co Off. BS Oregon State University 1991; MS Univ of Reading 1995
- Angelo, Giana 2011 Research Associate Linus Pauling Institute. BA Cornell University-Ithaca 1995; MS Tufts University 2000; PHD Tufts University 2005
- Angima, Sam 2006 Associate Professor Ext Lincoln Co Office. BS Andrews University 1991; MS Kenyatta Univ 1996; PHD Purdue University Main Campus 2000
- Angima, Sam 2006 Regional Administrator Extension Service Admin. BS Andrews University 1991; MS Kenyatta Univ 1996; PHD Purdue University Main Campus 2000
- Antle, John 2008 Professor Applied Economics. BA Albion College 1976; MA University of Chicago 1979; PHD University of Chicago 1980
- Anzinger, Dawn L 1998 Senior Instructor I Forest Ecosyst & Society. BS Oregon State University 1999; MS Oregon State University 2002
- Apte, Sourabh V 2005 Associate Professor Sch of Mech/Ind/Mfg Engr University Honors College Faculty. BS University of Pune 1994; MS Indian Institute of Science 1996; PHD Penn State Univ-Main Campus 2000
- Arbuckle, Nancy 2013 Faculty Research Assistant Fisheries and Wildlife. BS Long Island Univ-Southampton 2003; PHD Texas A&M Univ-College Station 2012
- Arbuckle, Nancy 2013 Instructor Fisheries and Wildlife. BS Long Island Univ-Southampton 2003; PHD Texas A&M Univ-College Station 2012
- Arrellano, Lucy 2013 Assistant Professor College of Education. BA Univ of Michigan-Ann Arbor 2000; MA Univ of Michigan-Ann Arbor 2005; PHD Univ of Cal-Los Angeles 2011
- Argerich, Alba 2009 Assistant Professor (Sr Res) Forest Eng/Resources/Mgmt. BS Foreign Institution 1998; MS Foreign Institution 2002; PHD Univ of Barcelona 2009
- Arismendi, Ivan D 2010 Assistant Professor (Sr Res) Fisheries and Wildlife. PHD Universidad Austral De Chile 2010
- Arispe, Sergio A 2014 Assistant Professor Ext Malheur Co Office. PHD Univ of California-Davis 2012
- Armington, Amanda D 2010 Faculty Research Assistant Sch of Bio/Pop Hlth Sci. BS University of Georgia 2003; MPH Oregon State University 2012
- Arnadottir, Liney 2009 Assistant Professor Sch of Chem/Bio/Envr Eng. BS University of Iceland 2001; MS University of Washington 2003; PHD University of Washington 2007
- Arnesen, Erik 2011 Faculty Research Assistant Earth, Ocean & Atmo Sci. BS Sonoma State University 2010
- Arnold, David S 2002 Instructor Philosophy. BS Oregon State University 1972; MA University of Oregon 1977; PHD Emory University 1983
- Arnold, Mary E 2000 Professor EXT 4-H YouthDev OnCmps. BA Western Washington University 1984; MS Oregon State University 1992; PHD Oregon State University 1994
- Arnold, Stevan J 1997 Professor Zoology University Honors College Faculty. BA Univ of Cal-Berkeley 1966; PHD Univ of Michigan-Ann Arbor 1972
- Arp, Daniel J 1990 Dean/Director-CAS College of Ag Admin University Honors College Faculty. BS Univ of Nebraska-Lincoln 1976; PHD Univ of Wisconsin-Madison 1980
- Arp, Daniel J 1990 Distinguished Professor Ag Botany/Plant Path University Honors College Faculty. BS Univ of Nebraska-Lincoln 1976; PHD Univ of Wisconsin-Madison 1980
- Arras, Tracy L 2000 Senior Instructor I Sch of Civil/Constr Engr. BS Cal State Polytechnic - Pomona 1986; MS Cal State Univ-Fresno 1996
- Arredondo, Felipe D 2012 Faculty Research Assistant Ag Botany/Plant Path. BS Univ of California-Davis 1987
- Arthenayake, Kavinda G 2003 Director Univ Conference Services. BS Southern Oregon University 1990; MS Southern Oregon University 1992
- Arthurs, Jonathan D 2013 Associate Professor College of Business. BBA Texas A&M Univ-College Station 1991; MBA Texas A&M Univ-College Station 1998; PHD University of Oklahoma Norman 2004
- Artus, Mike L 2011 Instructor Acad Prog/ Student Aff. MA Oregon State University

- Ashford, Scott A 2007 Dean College of Engineering. BS Oregon State University 1983; MS Univ of Cal-Berkeley 1986; PHD Univ of Cal-Berkeley 1994
- Ashford, Scott A 2007 Professor Sch of Civil/Constr Engr. BS Oregon State University 1983; MS Univ of Cal-Berkeley 1986; PHD Univ of Cal-Berkeley 1994
- Ashkenas, Linda R 1979 Senior Faculty Research Asst I Fisheries and Wildlife. BA Cornell University-Ithaca 1976; MS Boston University 1979
- Ashton, Carolyn 2005 Associate Professor Ext Benton County Office. BA University of Arizona 1989; MA Michigan State University 1994
- Atchley, Elizabeth E 2005 Instructor Music.
- Atre, Sundar V 2003 Associate Professor Sch of Mech/Ind/Mfg Engr University Honors College Faculty. BS Indian Institute of Technology 1987; PHD Penn State Univ-Main Campus 1995
- Atthowe, Helen E 2012 Faculty Research Assistant Horticulture. MS Rutgers University-New Brunswi 1983
- Atwater, Kristen C 2005 Instructor (PAC) Physical ActivityCourses. BS Oregon State University 2007
- Atwater, Ty F 2005 Instructor (PAC) Physical ActivityCourses. BS Oregon State University
- Auerbach, Marisha 2011 Lecturer Horticulture. BA Evergreen State College 1998
- Ault, Kori K 2010 Faculty Research Assistant Forest Ecosyst & Society. BA Cornell College 2007; MS Central Washington University 2010
- Austin, William E 1991 Senior Faculty Research Asst I Crop and Soil Science. BS Western Oregon University 1978; MS Oregon State University 1993
- Austin Haney, Angela R 1999 Head Advisor Pharmacy. BS University of Idaho 1997; EDM Oregon State University 2001
- Azarenko, Anita N 1986 Associate Dean Graduate School Admin. BS Univ of Maryland System 1981; MS Univ of Maryland System 1983; PHD Univ of Maryland System 1986
- Azarenko, Anita N 1986 Professor Horticulture. BS Univ of Maryland System 1981; MS Univ of Maryland System 1983; PHD Univ of Maryland System 1986
- Azizian, Mohammad F 1987 Research Associate Sch of Chem/Bio/Envr Eng University Honors College Faculty. BS University of Tehran 1978; MS University of Tehran 1983; PHD Oregon State University 1993

OSU BOARD OF TRUSTEES

The Board of Trustees of Oregon State University governs Oregon's only university with a statewide presence and helps guide OSU's mission to serve the state and the needs of its citizens in a growing global economy.

The board harnesses the talent and energy of education, civic and business leaders to help govern OSU's future as a leader and innovator in excellence in teaching, discovery and service as an internationally recognized public research university. The first 14 members of the board were confirmed by the Oregon Senate in November 2013. OSU President Ed Ray is also a trustee (ex officio and non-voting), for a total of 15 members.

The following list contains the members of the Oregon State University Board of Trustees, as of February 12, 2014:

- Mark Baldwin, analyst programmer, OSU, Corvallis
- Patricia Biedent, executive vice president/chief financial officer, Weyerhaeuser Co., Federal Way, Wash.
- Rani Borkar, corporate vice president/general manager, Intel Architecture Development Group, Hillsboro
- Darald Callahan, president (retired), Chevron Chemical Co., San Rafael, Calif.
- Michele Longo Eder, attorney, Newport
- Elson Floyd, president, Washington State University, Pullman, Wash.
- Orcilia Forbes, vice president (retired) OSU, Portland
- Paul Kelly, Jr., attorney (retired), Portland
- Brenda McComb, dean, OSU Graduate School, Corvallis
- Laura Naumes, vice president, Naumes Inc., Medford
- Patricia Reser, chairman of the board, Reser's Fine Foods, Inc., Beaverton
