Environmental engineering students have opportunities to obtain internships offered through the School of CBEE, and through the College of Engineering Multiple Engineering Cooperative Program (MECOP) program. Many scholarships are also available on a competitive basis for environmental engineering undergraduate students.

Pre-professional Environmental Engineering

First Year

- CBEE 101. Chemical, Biological, and Environmental Engineering Orientation (3)⁵
 CBEE 102. Engineering Problem Solving and Computations (3)^E
 CH 231^E, CH 232, CH 233. *General Chemistry (4,4,4)⁵
 and CH 261, CH 262, CH 263.
 *Laboratory for Chemistry 231, 232, 233 (1,1,1)
 COMM 111. *Public Speaking (3)^E
 or COMM 114. *Argument and Critical Discourse (3)^E
 HHS 231. *Lifetime Fitness for Health (2)¹
 HHS 241–HHS 248. *Lifetime Fitness (various options) (1)¹
 or any PAC course (1–2)
 MTH 251. *Differential Calculus (4)^E
 MTH 252. Integral Calculus (4)^E
 MTH 254. Vector Calculus I (4)^E

PH 211. *General Physics with Calculus (4)^E
 WR 121. *English Composition (3)^E

Second Year

CBEE 211. Material Balances and Stoichiometry (3)⁵
 CBEE 212. Energy Balances (3)⁵
 CBEE 213. Process Data Analysis (4)⁵
 CH 331, CH 332. Organic Chemistry (4,4)
 ENGR 211. Statics (3)^E
 ENGR 212. Dynamics (3)^E
 ENGR 213. Strength of Materials (3)⁵
 GEO 221. Environmental Geology (4)
 MTH 256. Applied Differential Equations (4)^E
 MTH 306. Matrix and Power Series Methods (4)^E
 PH 212, PH 213. *General Physics with Calculus (4,4)^E
 Perspective (3)¹

Professional Environmental Engineering

Third Year

CBEE 320. Professionalism and Engineering Ethics (3)
 CCE 201. Civil and Construction Engineering Graphics and Design (3)⁵
 CE 313. Hydraulic Engineering (4)
 or CE 372. Geotechnical Engineering I (4)
 CE 412. Hydrology (4)
 CHE 311. Thermodynamics (3)
 CHE 331. Transport Phenomena I (3)
 CHE 332. Transport Phenomena II (3)
 CHE 333. Transport Phenomena III (3)
 CHE 334. Transport Laboratory (2)
 ENVE 322. Fundamentals of Environmental Engineering (4)
 MB 230. *Introductory Microbiology (4)
 WR 327. *Technical Writing (3)¹
 Perspectives (9)¹

Fourth Year

BIOE 457. Bioreactors I (3)
 CBEE 414. Process Engineering Laboratory (3)
 ENVE 415. Environmental Engineering Laboratory (3)
 ENVE 421. Water and Wastewater Characterization (4)
 ENVE 422. Environmental Engineering Design (4)
 ENVE 425. Air Pollution Control (3)
 ENVE 431. Fate and Transport of Chemicals in Environmental Systems (4)
 ENVE 456. Sustainable Water Resources Development (3)
 ENVE 490. Environmental Engineering Capstone Design (4)
 Perspective (3)¹
 Synthesis (6)¹
 Technical electives (7)

Total Credits=192

Footnotes:

^E Required for entry into the professional program.

¹ Must be selected to satisfy the requirements of the baccalaureate core.

⁵ Prerequisite for several upper-division courses. Recommended for completion prior to entry into the professional program or in fall term of junior year.

**ENVIRONMENTAL
ENGINEERING MINOR****Minor Core Courses (21)**

CH 123. *General Chemistry (5)
or CH 233. *General Chemistry (4) *and*
CH 263. *Laboratory for Chemistry 233 (1)
ENVE 421. Water and Wastewater
Characterization (4)
ENVE 422. Environmental Engineering
Design (4)
ENVE 431. Fate and Transport of Chemicals
in Environmental Systems (4)

Additional core courses (6)

ENVE 321. ^Environmental Engineering
Fundamentals (4)

and Environmental Engineering for a
list of approved elective courses.

GRADUATE MAJORS**CHEMICAL ENGINEERING
(MEng, MS, PhD)****Graduate Areas of Concentration**
Chemical engineering

The School of Chemical, Biological and
Environmental Engineering offers gradu-
ate programs leading to the Master of En-
gineering, Master of Science, and Doctor
of Philosophy degrees. All programs are
tailored to individual student needs and
professional goals. A diversity of faculty
interests, broadened and reinforced by
cooperation between the school and oth-
er engineering departments and schools
and research centers on campus, makes
tailored individual programs possible.
The school originates and encourages
programs ranging from those that are
classically chemical engineering to those
that are distinctly interdisciplinary.

For more information, contact Dr.
Gregory Rorrer, School Head, School of
Chemical, Biological and Environmental
Engineering, Oregon State University,
Corvallis, OR 97331-2904, or email
cbee@oregonstate.edu.

MEng Degree (45 credits)**Chemical Engineering Core (21)**

CHE 514. Fluid Flow (4)
CHE 520. Mass Transfer I (4)
CHE 525. Chemical Engineering Analysis
CHE 537. Chemical Engineering
Thermodynamics I (4)
CHE 540. Chemical Reactors I (4)
CHE 507. Seminar (1)

Engineering Electives (9)

Graduate level courses offered through the
College of Engineering

Minor Course Work/Electives (15)

Courses approved by graduate program
advisor on Graduate Program of Study

MS Degree (45 credits)**Chemical Engineering Core (21)**

CHE 514. Fluid Flow (4)
CHE 520. Mass Transfer I (4)

CHE 525. Chemical Engineering Analysis
(4)
CHE 537. Chemical Engineering
Thermodynamics I (4)
CHE 540. Chemical Reactors I (4)
CHE 507. Seminar (1)

Minor Course Work/Electives (15)

Courses approved by MS Thesis advisor on
Graduate Program of Study

Thesis (9)**PhD Degree (108 credits)****Chemical Engineering Core (21)**

CHE 514. Fluid Flow (4)
CHE 520. Mass Transfer I (4)
CHE 525. Chemical Engineering Analysis (4)
CHE 537. Chemical Engineering
Thermodynamics I (4)
CHE 540. Chemical Reactors I (4)
CHE 507. Seminar (1)

Minor Course Work/Electives (15+)

Courses approved by student PhD Com-
mittee on Graduate Program of Study

Thesis (36–72)**Prerequisite and Corequisite
Course Work for Non-engineering
Undergraduates**

MEng or MS students without undergrad-
uate degrees in chemical engineering or
a related engineering discipline, or PhD
students without undergraduate degrees
or graduate degrees in chemical engineer-
ing or a related engineering discipline,
must take the following courses in addi-
tion to the CHE core:

CBEE 211. Material Balances and
Stoichiometry (3)
CBEE 212. Energy Balances (3)
CHE 312. Chemical Engineering
Thermodynamics (3)
CHE 331. Transport Phenomena I (4)
CHE 332. Transport Phenomena II (3)
CHE 443. Chemical Reaction Engineering (4)

**ENVIRONMENTAL ENGINEERING
(MEng, MS, PhD, MAIS)****Graduate Areas of Concentration**

*Bioremediation, environmental fluid
mechanics, environmental microbiology,
environmental modeling, multiphase
phenomena, subsurface flow and
transport, water and wastewater
treatment*

The School of Chemical, Biological
and Environmental Engineering offers
graduate curricula leading to the Master
of Engineering, Master of Science, and
Doctor of Philosophy degrees in Environ-
mental Engineering. The ENVE program
prepares individuals to apply mathemat-
ical and scientific principles to the design,
development and operational evaluation
of systems for controlling contained
living environments and for monitoring
and controlling factors in the external
natural environment. Specific application
areas include pollution control, waste
and hazardous material disposal, health
and safety protection, conservation, life
support, and requirements for protec-

tion of special materials and related work
environments, as well as emerging areas
including sustainability, detection and
treatment of emerging contaminants
and their fate in the natural environ-
ment, water supply for a growing world
population, and mitigation of the ef-
fects of climate change, among others.
All programs are tailored to individual
student needs and professional goals. A
diversity of faculty interests, broadened
and reinforced by cooperation between
the school and other engineering depart-
ments and schools, and research centers
on campus, makes tailored individual
programs possible.

For more information, contact Dr.
Gregory Rorrer, School Head, School of
Chemical, Biological and Environmental
Engineering, Oregon State University,
Corvallis, OR 97331-2904, or email
cbee@oregonstate.edu.

MEng Degree (45 credits)**Environmental Engineering Core (20)**

ENVE 532. Aquatic Chemistry: Natural and
Engineered Systems (4)
ENVE 535. Physical and Chemical Processes
for Hazardous Waste Treatment (4)
ENVE 536. Aqueous Environmental
Chemistry Laboratory (1)
ENVE 541. Microbial Processes in
Environmental Systems (4)
CHE 507. Seminar (F, W, S) (3)
CHE 525. Chemical Engineering Analysis (4)
**Engineering electives include at least
one of the following (10)**
ENVE 525. Air Pollution Control (3)
ENVE 531. Fate and Transport of
Chemicals in Environmental Systems (4)
ENVE 556. Sustainable Water Resources
Development (3)

Minor Course Work/Electives (15)**MS Degree (45 credits)****Environmental Engineering Core
Courses (20)**

ENVE 532. Aquatic Chemistry: Natural and
Engineered Systems (4)
ENVE 535. Physical and Chemical Processes
for Hazardous Waste Treatment (4)
ENVE 536. Aqueous Environmental
Chemistry Laboratory (1)
ENVE 541. Microbial Processes in
Environmental Systems (4)
CHE 507. Seminar (F, W, S) (3)
CHE 525. Chemical Engineering Analysis (4)

Minor Course Work/Electives (16–19)**Thesis (6–9)****PhD Degree (108 credits)****Environmental Engineering Core (20)**

ENVE 532. Aquatic Chemistry: Natural and
Engineered Systems (4)
ENVE 535. Physical and Chemical Processes
for Hazardous Waste Treatment (4)
ENVE 536. Aqueous Environmental
Chemistry Laboratory (1)
ENVE 541. Microbial Processes in
Environmental Systems (4)
CHE 507. Seminar (F, W, S) (3)
CHE 525. Chemical Engineering Analysis (4)

Minor Course Work/Electives (16+)

(Exact requirement determined by the student's program committee)

Thesis (36-72)**Prerequisite and Corequisite Course Work for Non-engineering Undergraduates**

MEng, MS, or PhD students without undergraduate degrees in environmental engineering or a related engineering discipline must take the following courses in addition to the ENVE core:

Prerequisite Courses:**Completion required before taking ENVE core courses:**

Math through differential equations

One year of general chemistry

One year of physics

CBEE 211. Material Balances and Stoichiometry (3)

Corequisite Courses:

CE 547. Water Resources Engineering I: Principles of Fluid Mechanics (4)

ENVE 521. Water and Wastewater Characterization (4)

ENVE 522. Environmental Engineering Design (4)

ENVE 531. Fate and Transport of Chemicals in Environmental Systems (4)

Note: ENVE 521 and ENVE 522 will not count towards the credit requirements for the MEng, MS, and PhD degrees.

CHEMICAL ENGINEERING GRADUATE MINOR

For more details, see the school advisor.

ENVIRONMENTAL ENGINEERING GRADUATE MINOR

For more information, contact Dr. Gregory Rorrer, School Head, School of Chemical, Biological and Environmental Engineering, Oregon State University, Corvallis, OR 97331-2904, or email cbee@oregonstate.edu.

BIOLOGICAL ENGINEERING COURSES

BIOE 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BIOE 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BIOE 340. BIOMEDICAL ENGINEERING PRINCIPLES (3). Application of engineering concepts (mass and energy conservation, thermodynamics, and transport phenomena) to cellular- and system-level human physiology; design considerations for biomedical interventions and devices. Lec/lab. **PREREQS:** CHE 332 and Z 331 and Z 333

BIOE 390. BIOENGINEERING PRODUCT DESIGN (4). Design of biomedical products. Development of process flow diagrams, control strategies, process simulators, and financial analysis of processes. This course focuses on a term-long report. **PREREQS:** CHE 332

BIOE 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BIOE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

BIOE 403. THESIS (1-16). **PREREQS:** Departmental approval required.

BIOE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

BIOE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

BIOE 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

BIOE 415. BIOENGINEERING LABORATORY (3). Laboratory performance of unit operations and processes in bioseparations; preparation of technical reports. **PREREQS:** ((CHE 414 or CHE 414H) or (BIOE 414 or BIOE 414H) or (ENVE 414 or ENVE 414H) or CBEE 414)

BIOE 420. SOCIAL JUSTICE, ETHICS, AND ENGINEERING (3). Examination of difference, power, and discrimination in engineering education and practice. Lec/rec. **PREREQS:** Upper-division standing in engineering.

BIOE 451. BIOMATERIALS AND BIOINTERFACES (3). Material interactions with human tissue, with emphasis on the role of interfacial chemistry and physics in cell adhesion, infection, blood coagulation and thrombosis. Preparation of functional hydrogels, material coatings, and derivatizations, including immobilized bio-active molecules. Issues surrounding regulation of implants and device failure. Lec/rec. **PREREQS:** BB 451 and CHE 332

BIOE 457. BIOREACTORS I (3). Design and analysis of bioreactors using suspension and immobilized microbial cultures. **PREREQS:** (BB 451 and CHE 332) and .

BIOE 459. CELL ENGINEERING (3). Application of engineering methods and principles to the study of mammalian cells. Emphasis on mathematical models of cellular processes (e.g. cellular mass transport, protein-ligand interactions, cellular mechanics) and methods for probing the physical characteristics of biological molecules and cells. **PREREQS:** BB 451 and CHE 332

BIOE 462. BIOSEPARATIONS (3). Application of basic mass transfer, reaction kinetics and thermodynamic principles to understanding, selection, and development of strategies for the recovery of products from bioreactors. **PREREQS:** (BB 451 and CHE 332) and .

BIOE 470. REGULATION OF DRUGS AND MEDICAL DEVICES (2). Overview of regulations for pharmaceutical products and medical devices. Food and Drug Administration's approval process. Current good manufacturing practices and process validation is emphasized. Quality control and assurance, compliance, and important analytical methods will be introduced. **PREREQS:** Upper-division standing in engineering.

BIOE 490. ^BIOENGINEERING PROCESS DESIGN (4). Design of bioprocesses.

Development of process flow diagrams, control strategies, process simulators, and financial analysis of processes. Focuses on a term-long design report. (Writing Intensive Course) **PREREQS:** BIOE 457 and BIOE 462

BIOE 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

BIOE 520. SOCIAL JUSTICE, ETHICS, AND ENGINEERING (3). Examination of difference, power, and discrimination in engineering education and practice. Lec/rec. **PREREQS:** Upper-division standing in engineering.

BIOE 551. BIOMATERIALS AND BIOINTERFACES (3). Material interactions with human tissue, with emphasis on the role of interfacial chemistry and physics in cell adhesion, infection, blood coagulation and thrombosis. Preparation of functional hydrogels, material coatings, and derivatizations, including immobilized bio-active molecules. Issues surrounding regulation of implants and device failure. Lec/rec. **PREREQS:** BB 451 and CHE 332

BIOE 557. BIOREACTORS I (3). Design and

analysis of bioreactors using suspension and immobilized microbial cultures. **PREREQS:** BB 451 and CHE 332

BIOE 559. CELL ENGINEERING (3). Application of engineering methods and principles to the study of mammalian cells. Emphasis on mathematical models of cellular processes (e.g. cellular mass transport, protein-ligand interactions, cellular mechanics) and methods for probing the physical characteristics of biological molecules and cells. **PREREQS:** BB 451 and CHE 332

BIOE 562. BIOSEPARATIONS (3). Application of basic mass transfer, reaction kinetics and thermodynamic principles to understanding, selection, and development of strategies for the recovery of products from bioreactors. **PREREQS:** BB 451 and CHE 332

BIOE 570. REGULATION OF DRUGS AND MEDICAL DEVICES (2). Overview of regulations for pharmaceutical products and medical devices. Food and Drug Administration's approval process. Current good manufacturing practices and process validation is emphasized. Quality control and assurance, compliance, and important analytical methods will be introduced. **PREREQS:** Upper-division standing in engineering.

BIOE 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

CHEMICAL, BIOLOGICAL AND ENVIRONMENTAL ENGINEERING COURSES

CBEE 101. CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGR ORIENTATION (3). Introduction to the engineering profession in general and in particular the CHE, BIOE, and ENVE programs; development of problem solving strategies and teamwork; analysis and presentation of experimental data, basic process calculations, and design methodologies. Lec/rec/lab.

CBEE 101H. CHEMICAL, BIOLOGICAL, AND ENVIRONMENTAL ENGR ORIENTATION (3). Introduction to the engineering profession in general and in particular the CHE, BIOE, and ENVE programs; development of problem solving strategies and teamwork; analysis and presentation of experimental data, basic process calculations, and design methodologies. Lec/rec/lab. **PREREQS:** Honors College approval required.

CBEE 102. ENGINEERING PROBLEM SOLVING AND COMPUTATIONS (3). Elementary programming and problem-solving concepts implemented using MATLAB and Excel software; emphasis on problem analysis and development of algorithms in engineering. Lec/lab. **PREREQS:** MTH 112 or MTH 251 or MTH 251H

CBEE 102H. ENGINEERING PROBLEM SOLVING AND COMPUTATIONS (3). Elementary programming and problem-solving concepts implemented using MATLAB and Excel software; emphasis on problem analysis and development of algorithms in engineering. Lec/lab. **PREREQS:** MTH 112 or MTH 251 or MTH 251H

CBEE 211. MATERIAL BALANCES AND STOICHIOMETRY (3). Material balances, thermophysical, and thermochemical calculations. Lec/rec. **PREREQS:** (MTH 252 or MTH 252H) and general chemistry and second-year standing in engineering.

CBEE 212. ENERGY BALANCES (3). Energy balances, thermophysical and thermochemical calculations. Lec/rec. **PREREQS:** (CBEE 211 or BIOE 211 or CHE 211 or ENVE 211) and one year general chemistry and second-year standing in engineering.

CBEE 213. PROCESS DATA ANALYSIS (4). Applications of material and energy balances, with an emphasis on data analysis important to chemical engineers, bioengineers, and environmental engineers. Contextual learning is

emphasized through the laboratory component and the use of process flow simulation modeling and analysis software. Lec/lab/rec. **PREREQS:** (CBEE 212 or BIOE 212 or CHE 212 or ENVE 212)

CBEE 320. PROFESSIONALISM AND ENGINEERING ETHICS (3). Introduction to engineering ethics. Topics include ethical theory, professional engineering responsibility, codes of ethics, ethical assessment, conflicts of interest, risk and safety, loyalty and dissent, as well as overarching professional concerns. **PREREQS:** WR 121

CBEE 414. ^PROCESS ENGINEERING LABORATORY (3). Unit operations and unit processes; preparation of technical reports. Lec/lab/rec. (Writing Intensive Course) **PREREQS:** Fourth-year standing in BIOE/CHE/ENVE.

CBEE 416. CBEE LABORATORY II (3). Integration of overall knowledge of chemical, biological, and environmental engineering through group project activities culminating with public demonstration or display of project results. **PREREQS:** (CHE 415 or CHE 415H or BIOE 415 or ENVE 415)

■ CHEMICAL ENGINEERING COURSES

CHE 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.

CHE 199H. SPECIAL TOPICS (1-16). **PREREQS:** Honors College approval required.

CHE 299. PROFESSIONAL WORKSKILLS (1-16). This course is repeatable for a maximum of 99 credits.

CHE 311. THERMODYNAMICS (3). Entropy, the second law of thermodynamics, equations of state, and thermodynamic network. **PREREQS:** ((CBEE 212 or CHE 212 or BIOE 212 or ENVE 212) and (MTH 256 or MTH 256H))

CHE 312. CHEMICAL ENGINEERING THERMODYNAMICS (3). Thermodynamic mixtures, fugacity, phase equilibrium, and chemical reactions equilibrium. **PREREQS:** CHE 311

CHE 320. SAFETY, ENGINEERING ETHICS AND PROFESSIONALISM (3). Introduction to engineering ethics and safety concepts. Topics include professional engineering responsibility, codes of ethics, ethical assessment, conflicts of interest, loyalty and dissent, life-long learning, hazard identification, risk and safety, and process safety management. Lec/rec. **PREREQS:** Engineering Professional School Standing (+16)

CHE 331. TRANSPORT PHENOMENA I (4). Fundamentals and application of momentum and energy transfer phenomena to fluid flow for the design of industrial chemical engineering equipment. **PREREQS:** ((MTH 256 or MTH 256H) and (CBEE 212* or BIOE 212 or CHE 212 or ENVE 212))

CHE 332. TRANSPORT PHENOMENA II (3). A unified treatment using control volume and differential analysis of heat transfer, prediction of heat transport properties, and introduction to heat transfer operations. **PREREQS:** (CHE 311 and CHE 331)

CHE 333. TRANSPORT PHENOMENA III (3). A unified treatment using control volume and differential analysis of binary mass transfer, prediction of mass transport properties, and introduction to mass transfer operations. Lec/studio. **PREREQS:** (CHE 331 or CHE 332)

CHE 334. TRANSPORT PHENOMENA LABORATORY (2). Engineering lab practices and the application of the macroscopic balances of mass, energy, and chemical species; fluid flow, heat and mass transfer experiments by teams for demonstrations of principles established in previous transport phenomena courses.

PREREQS: (CHE 331 and CHE 332)

CHE 361. CHEMICAL PROCESS DYNAMICS AND SIMULATION (3). Fundamental principles for process dynamic modeling used in the control of process variables such as pressure, temperature, flow rate and chemical composition. **PREREQS:** (MTH 256 or MTH 256H) and CHE 331* and CBEE 102 recommended.

CHE 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

CHE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CHE 403. THESIS (1-16). **PREREQS:** Departmental approval required.

CHE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CHE 405H. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

CHE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CHE 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

CHE 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

CHE 411. MASS TRANSFER OPERATIONS (4). Mass transfer operations; design of separation processes. Lec/rec. **PREREQS:** (CHE 312 and CHE 333)

CHE 415. CHEMICAL ENGINEERING LABORATORY I (3). Theoretical and empirical analysis of several unit operations, use of formal work processes, safety, teamwork, oral and written communication, and personal accountability. Lec/lab/rec. **PREREQS:** CBEE 414

CHE 415H. CHEMICAL ENGINEERING LABORATORY I (3). Theoretical and empirical analysis of several unit operations, use of formal work processes, safety, teamwork, oral and written communication, and personal accountability. Lab/rec. **PREREQS:** CBEE 414 and Honors College approval required.

CHE 417. INSTRUMENTATION IN CHEMICAL, BIOLOGICAL, & ENVIRONMENTAL ENG (4). Equips students with a toolbox of instrumental techniques important in chemical, biological, and environmental engineering and the background required to determine the appropriate instrumental technique to address a specific problem. Lec/lab/rec. **PREREQS:** (CH 231 and CH 261 and CH 232 and CH 262 and CH 233 and CH 263) and enrollment in chemical, biological or environmental engineering professional programs.

CHE 431. CHEMICAL PLANT DESIGN I (3). Short-cut techniques and other abbreviated and useful methods for specifying equipment sufficient for the preliminary design of processes and equipment; estimating capital and manufacturing costs based on equipment specifications. **PREREQS:** (CHE 312 and CHE 411 and CHE 443)

CHE 432. CHEMICAL PLANT DESIGN II (3). Transformation of preliminary design to detailed design; introduction to safety, ethical, economical, and environmental considerations in chemical plant design. Lec/rec. **PREREQS:** CHE 431

CHE 443. CHEMICAL REACTION ENGINEERING (4). Design of chemical reactors for economical processes and waste minimization. Contacting patterns, kinetics and transport rate effects in single phase and catalytic systems. **PREREQS:** ((MTH 256 or MTH 256H) and CHE 312 and CHE 332) and CHE graduate students may not enroll.

CHE 444. THIN FILM MATERIALS PROCESSING (4). Solid state devices are based on the patterning of thin films. This lecture and lab course

is primarily an introduction to the technology associated with processing thin films. Topics include chemical vapor deposition, physical vapor deposition, plasma etching, and thin-film characterization. Lec/lab/rec. **PREREQS:** CHE 443

CHE 445. POLYMER ENGINEERING AND SCIENCE (4). Polymer engineering and science with an emphasis on practical applications and recent developments. Topics include polymer synthesis, characterization, mechanical properties, rheology, and processing at a level suitable for most engineering and science majors. Lec/lab/rec. **PREREQS:** CH 334 and CH 335 and CH 336 or equivalent and MTH 256 and/or junior standing in engineering or science.

CHE 450. CONVENTIONAL AND ALTERNATIVE ENERGY SYSTEMS (3). Principles of energy conversion from chemical/mechanical energy to electrical energy including an overview of conventional energy systems and of likely renewable energy systems with a focus on the fundamental physico-chemical and thermodynamic concept for each technology. The economics of energy systems will also be discussed.

CHE 451. SOLAR ENERGY TECHNOLOGIES (3). A foundation in the principles of solar energy processes is provided. Topics covered include photovoltaics and solar thermal, and will cover the fundamental solid state physics of semiconductors to applied heat transfer analysis of solar collectors. The course objective is to equip students with an adequate depth of understanding of the operational principles of solar energy systems, and to cover the breadth of the various approaches employed in active solar energy systems. **PREREQS:** CHE 311 or equivalent.

CHE 461. PROCESS CONTROL (3). Principles of PID feedback control based on models of chemical processes; analysis and implementation of proportional, integral and derivative tuning; cascade, feedforward, ratio and deadtime compensation; multivariable control and control system design issues and methods. **PREREQS:** (CHE 331 and CHE 332* and CHE 361)

CHE 499. SPECIAL TOPICS (1-4). This course is repeatable for a maximum of 8 credits.

CHE 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CHE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

CHE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CHE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CHE 507. SEMINAR (1-16). One-credit seminar. Graded P/N. This course is repeatable for a maximum of 16 credits.

CHE 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

CHE 514. FLUID FLOW (4). Fundamentals of fluid dynamics for Newtonian and non-Newtonian fluids; flow through porous media; two-phase flow. Lec/rec.

CHE 517. INSTRUMENTATION IN CHEMICAL, BIOLOGICAL, & ENVIRONMENTAL ENG (4). Equips students with a toolbox of instrumental techniques important in chemical, biological, and environmental engineering and the background required to determine the appropriate instrumental technique to address a specific problem. Lec/lab/rec. **PREREQS:** (CH 231 and CH 261 and CH 232 and CH 262 and CH 233 and CH 263) and enrollment in chemical, biological or environmental engineering professional programs.

CHE 520. MASS TRANSFER (4). Diffusion in gases, liquids, solids, membranes, and between phases. Effects of reactions on mass transfer.

Mass transfer rates by convection and dispersion. Rates of dispersion. Rates of combined heat and mass transfer.

CHE 525. CHEMICAL ENGINEERING ANALYSIS (4). Modeling of physical and chemical processes; mathematical analysis of models with appropriate advanced techniques.

CHE 537. CHEMICAL ENGINEERING THERMODYNAMICS I (4). Applications of the fundamental laws of thermodynamics to complex systems. Properties of solutions of non-electrolytes. Phase and chemical equilibrium.

CHE 540. CHEMICAL REACTORS I (4). Catalysis, reactions coupled with transport phenomena. Reactors for high tech applications.

CHE 543. CHEMICAL REACTION ENGINEERING (4). Design of chemical reactors for economical processes and waste minimization. Contacting patterns, kinetics and transport rate effects in single phase and catalytic systems. **PREREQS:** CHE 312 and CHE 332 and MTH 256. CHE graduate students may not enroll.

CHE 544. THIN FILM MATERIALS PROCESSING (4). Solid state devices are based on the patterning of thin films. This lecture and lab course is primarily an introduction to the technology associated with processing thin films. Topics include chemical vapor deposition, physical vapor deposition, plasma etching, and thin-film characterization. Lec/lab/rec. **PREREQS:** CHE 443 or CHE 543

CHE 545. POLYMER ENGINEERING AND SCIENCE (4). Polymer engineering and science with an emphasis on practical applications and recent developments. Topics include polymer synthesis, characterization, mechanical properties, rheology, and processing at a level suitable for most engineering and science majors. Lec/lab/rec. **PREREQS:** CH 334 and CH 335 and CH 336 or equivalent and MTH 256 and/or junior standing in engineering or science.

CHE 550. CONVENTIONAL AND ALTERNATIVE ENERGY SYSTEMS (3). Principles of energy conversion from chemical/mechanical energy to electrical energy including an overview of conventional energy systems and of likely renewable energy systems with a focus on the fundamental physico-chemical and thermodynamic concept for each technology. The economics of energy systems will also be discussed. **PREREQS:** (CHE 311 or ME 311 or ME 311H) and CHE 311 or ME 311 or ME 311H

CHE 551. SOLAR ENERGY TECHNOLOGIES (3). A foundation in the principles of solar energy processes is provided. Topics covered include photovoltaics and solar thermal, and will cover the fundamental solid state physics of semiconductors to applied heat transfer analysis of solar collectors. The course objective is to equip students with an adequate depth of understanding of the operational principles of solar energy systems, and to cover the breadth of the various approaches employed in active solar energy systems. **PREREQS:** CHE 311 or equivalent.

CHE 581. SELECTED TOPICS (3). Non-sequence course designed to acquaint students with recent advances in chemical engineering. Topics vary from term to term and from year to year. May be repeated for credit. This course is repeatable for a maximum of 9 credits.

CHE 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

CHE 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CHE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

CHE 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CHE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CHE 611. ELECTRONIC MATERIALS PROCESSING (3). Technology, theory, and analysis of processing methods used in integration circuit fabrication. Offered alternate years. **CROSSLISTED** as ECE 611. **PREREQS:** Graduate standing or instructor approval.

CHE 612. PROCESS INTEGRATION (3). Process integration, simulation, and statistical quality control issues related to integrated circuit fabrication. Offered alternate years. **CROSSLISTED** as ECE 612. **PREREQS:** CHE 611 or ECE 611 or instructor approval.

CHE 613. ELECTRONIC MATERIALS AND CHARACTERIZATION (3). Physics and chemistry of electronic materials and methods of materials characterization. Offered alternate years. **CROSSLISTED** as ECE 613. **PREREQS:** Graduate standing or instructor approval.

■ ENVIRONMENTAL ENGINEERING COURSES

ENVE 199. SPECIAL TOPICS (1-16). Seminar course that includes invited speakers. Open to all students interested in learning about the Environmental Engineering undergraduate program and potential career opportunities. Graded P/N. This course is repeatable for a maximum of 16 credits.

ENVE 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 299H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

ENVE 321. ENVIRONMENTAL ENGINEERING FUNDAMENTALS (4). Application of engineering principles to the analysis of environmental problems. Topics include water, wastewater, solid wastes, and air pollution. **PREREQS:** (MTH 256 or MTH 256H)

ENVE 322. FUNDAMENTALS OF ENVIRONMENTAL ENGINEERING (4). Application of engineering principles to the analysis of environmental problems. Topics include water, wastewater, solid wastes, and air pollution. **PREREQS:** ((CH 222 or CH 225H) and (MTH 256 or MTH 256H)) and environmental engineering majors only.

ENVE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 403. THESIS (1-16). **PREREQS:** Departmental approval required.

ENVE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 406. SPECIAL PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 407H. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

ENVE 410. OCCUPATIONAL INTERNSHIP (1-12). This course is repeatable for a maximum of 12 credits.

ENVE 415. ENVIRONMENTAL ENGINEERING LABORATORY (3). Theoretical and empirical analysis of several unit operations, use of formal work processes, safety, teamwork, oral and written communication, and personal accountability. Lec/lab/rec. **PREREQS:** CBEE 414

ENVE 421. WATER AND WASTEWATER CHARACTERIZATION (4). Measurement of physical and chemical characteristics of water and wastewater. Engineering principles for the selection and design of treatment processes. **PREREQS:** (ENVE 321 or ENVE 322)

ENVE 422. ENVIRONMENTAL ENGINEERING DESIGN (4). Design of water and wastewater treatment facilities including physical, chemical, and biological processes. **PREREQS:** ENVE 421

ENVE 425. AIR POLLUTION CONTROL (3). Study of air pollution sources, transport, and control, including engineering, chemical, meteorological, social, and economic aspects. Lec/rec. **PREREQS:** (ENVE 321 or ENVE 322)

ENVE 431. FATE AND TRANSPORT OF CHEMICALS IN ENVIRONMENTAL SYSTEMS (4). Fundamentals of organic chemistry and engineering principles applied to the movement and fate of xenobiotic compounds. Lec/lab/rec. **PREREQS:** ((CH 123 or CH 223 or CH 226H) and (CH 440 or CHE 331) and (ENVE 321 or ENVE 322) and ENVE 421) and .

ENVE 456. SUSTAINABLE WATER RESOURCES DEVELOPMENT (3). Sustainable water resources engineering principles, assessing the impact of engineering practices. Use of engineering analyses and sustainable principles to design projects and minimize their environmental impact.

ENVE 490. ENVIRONMENTAL ENGINEERING DESIGN (4). Open-ended design of environmental processes including development of process flow diagrams, control strategies, process simulators, and financial analysis of processes. **PREREQS:** (ENVE 421 and ENVE 422)

ENVE 499. SPECIAL TOPICS IN ENVIRONMENTAL ENGINEERING (1-4). A critical examination of topics selected by the instructor from among topics not covered in other environmental engineering courses. This course is repeatable for a maximum of 4 credits.

ENVE 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Graduate standing.

ENVE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 507. SEMINAR (1-16). One-credit seminar. Graded P/N. This course is repeatable for a maximum of 16 credits.

ENVE 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 521. WATER AND WASTEWATER CHARACTERIZATION (4). Measurement of physical and chemical characteristics of water and wastewater. Engineering principles for the selection and design of treatment processes. **PREREQS:** ENVE 321 or ENVE 322

ENVE 522. ENVIRONMENTAL ENGINEERING DESIGN (4). Design of water and wastewater treatment facilities including physical, chemical, and biological processes. **PREREQS:** ENVE 421

ENVE 525. AIR POLLUTION CONTROL (3). Study of air pollution sources, transport, and control, including engineering, chemical, meteorological, social, and economic aspects. Lec/rec. **PREREQS:** ENVE 321 or ENVE 322

ENVE 531. FATE AND TRANSPORT OF CHEMICALS IN ENVIRONMENTAL SYSTEMS (4). Fundamentals of organic chemistry and engineering principles applied to the movement and fate of xenobiotic compounds. Lec/lab/rec. **PREREQS:** ((CH 123 or CH 223 or CH 226H) and (CH 440 or CHE 331) and (ENVE 321 or ENVE 322) and ENVE 421

ENVE 532. AQUATIC CHEMISTRY: NATURAL AND ENGINEERED SYSTEMS (4). Low temperature thermodynamic and selective kinetic treatments primarily of the inorganic chemistry

groups, but also organic ligands and surface active groups, of natural and engineered waters; thermodynamic principles and computational techniques for prediction of equilibrium speciation; comparison of predictions to observations; computer laboratory. Lec/rec. **CROSSLISTED** as OC 532. **PREREQS:** One year of college-level chemistry (CH 221, CH 222, CH 223 or equivalent), plus a minimum of one year organic or physical chemistry. Recommended corequisites: ENVE 536 Aqueous Environmental Laboratory and/or OC 652 Chemical Oceanography Laboratory.

ENVE 535. PHYSICAL & CHEMICAL PROCESSES FOR HAZARDOUS WASTE TREATMENT (4). Principles and design of unit operations and processes for the treatment of hazardous waste and contaminated soils. **PREREQS:** ENVE 532

ENVE 536. AQUEOUS ENVIRONMENTAL CHEMISTRY LABORATORY (1). Laboratory investigation of acid/base equilibria, coordination chemistry, and precipitation/dissolution chemistry. **COREQS:** ENVE 532

ENVE 541. MICROBIAL PROCESSES IN ENVIRONMENTAL SYSTEMS (4). Energetics kinetics and stoichiometry of microbial transformations of organic and inorganic compounds. Mathematical models of biodegradation.

ENVE 542. MICROBIAL PROCESS DESIGN FOR MUNICIPAL AND HAZARDOUS WASTES (4). Principles and design of microbial processes for treatment of municipal and hazardous wastes. **PREREQS:** ENVE 541

ENVE 554. GROUNDWATER REMEDIATION (4). Theory and practice of groundwater remediation. Environmental site assessments. Physical, chemical, and biological methods for in situ treatment of contaminated aquifers. Modeling of remediation technologies. **PREREQS:** CE 514

ENVE 556. SUSTAINABLE WATER RESOURCES DEVELOPMENT (3). Sustainable water resources engineering principles, assessing the impact of engineering practices. Use of engineering analyses and sustainable principles to design projects and minimize their environmental impact.

ENVE 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

ENVE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** PhD only.

ENVE 699. SELECTED TOPICS IN ENVIRONMENTAL ENGINEERING (1-4). A critical examination of topics selected by the instructors from among topics not covered in other environmental engineering courses. This course is repeatable for a maximum of 8 credits. **PREREQS:** Instructor approval required.

Graduate Minor

Civil Engineering

The mission of the School of Civil and Construction Engineering is that of the College of Engineering (see college statement on mission and goals), as well

as providing a comprehensive, state-of-the-art education to prepare students for professional and responsible engineering and constructor positions with business, industry, consulting firms, or government.

Education in the basic sciences occurs primarily in the freshman and sophomore years. Engineering science is introduced at the sophomore year and continues through to graduation with a combination of required courses and technical electives. Completion of the OSU Baccalaureate Core provides experience in the humanities, social sciences, and other nontechnical areas as additional preparation for a student's profession and life.

The CCE School offers an undergraduate option in environmental engineering that provides education in water pollution, air pollution, solid wastes, and hazardous wastes.

The growing complexity of modern engineering practice requires further specialization in one or more engineering disciplines. This is generally attained through postgraduate study. The CCE School offers MEng, MS, and PhD programs with concentrations in civil engineering, coastal and ocean engineering, construction engineering management, geomatics, geotechnical engineering, infrastructure materials, structural engineering, transportation engineering, and water resources engineering.

Areas of concentration may be combined to form an integrated civil engineering MS program, MEng program, or MEng, MS, and PhD minors.

The school also participates in the Master of Arts in Interdisciplinary Studies program.

The Bachelor of Science degree in Civil The Bachelor of Science degree in Civil Engineering is accredited by the Engineering Commission of ABET, <http://www.abet.org>.

Civil engineering is a diverse professional field with discipline specialties in structures, transportation, water supply and water pollution control, geotechnical engineering, hydrology, hydraulics and water resources, geomatics, ocean engineering, construction, and engineering planning and economics. All CE

students receive basic instruction in the various disciplines, with the option for additional elective courses in desired areas. The program is supported by highly qualified faculty and staff that maintain the programs and facilities at the highest level of quality.

The civil engineering curriculum within the School of Civil and Construction Engineering (CCE) includes the basic sciences, social sciences, humanities, communication skills, engineering sciences, and engineering design in order to teach students an integrated approach to practical solutions.

The mission of the civil engineering program is to provide a comprehensive, state-of-the-art education to prepare students for professional and responsible engineering positions with business, industry, consulting firms or government.

Program Educational Objectives—Civil Engineering

Note: The Bachelor of Science degree in Civil Engineering is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>), which requires stated program educational objectives and student outcomes to support these.

OSU Civil Engineering graduates receive a compelling education and are able to demonstrate all of the following within a few years of graduation:

1. Ability to apply the natural sciences; mathematics; engineering sciences; and the fundamental paradigms, concepts, understandings, applications, and knowledge of civil engineering.
2. Ability to analyze, synthesize, and evaluate information; solve engineering problems; and perform modern civil engineering design.
3. Preparation for modern professional practice, including abilities for effective communication, collaborative work in diverse teams, ethical decision-making, successful management of personal and professional career objectives, and continual development through lifelong learning and professional involvement.
4. Preparation for employment or continuation into a graduate program in a specialty area of civil engineering. Recognition of the importance of professional licensure and preparation to achieve this significant accomplishment. Consideration of the public health, welfare and safety to be the paramount priority.
5. Understanding of public policy and contemporary societal issues and sensitivity to the challenge of meeting social, environmental, and economic constraints within a global community.

Student Outcomes for Civil Engineering Programs

The OSU Civil Engineering program prepares its graduates to achieve the Program Educational Objectives above several years into their careers. This is achieved by having students able to perform the following on graduation, well preparing them for active immediate and lifelong service in the profession:

1. Ability to apply knowledge of mathematics, science, and engineering to solve engineering problems
2. Ability to design and conduct experiments as well as analyze and interpret data
3. Ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, social, political, ethical, health and safety, manufacturability and sustainability
4. Ability to function on multi-disciplinary teams
5. Ability to identify, formulate, and solve engineering problems
6. Understanding of professional and ethical responsibility
7. Ability to communicate effectively
8. Broad education necessary to understand impact of engineering solutions in global, economic, environmental and societal context
9. Recognition of need for and ability to engage in lifelong learning
10. Knowledge of contemporary issues
11. Ability to use techniques, skills and modern engineering tools necessary for engineering practice
12. Knowledge of basic concepts in leadership
13. Ability to include non-engineering considerations, including business, regulatory and safety issues in problem solving
14. Ability to incorporate effective negotiation or consensus-gaining in group decision making
15. Knowledge and application of project planning and management practices and tools
16. Ability to assess imperfect or incomplete data conditions, risks and alternatives into problem-solving decisions
17. Exposure to current industry design practices, construction methods and materials, and overall project delivery considerations

Design is the essence of civil engineering. Junior and senior level courses include extensive design content, culminating in a team approach to solution of open-ended, realistic problems, including capstone design and professional practice courses. Courses with design content include those with “design” in their titles. A more detailed explanation of

the design experience and design course sequences is contained in the “Civil Engineering Advising Guide,” which may be viewed on the school’s website at <http://cce.oregonstate.edu/academic-advising>.

Pre-Civil Engineering

Freshman Year (45)

- Approved biological science (4)⁵
- CCE 101. Civil and Construction Engineering Orientation (2)⁵
- CCE 102. Civil and Construction Engineering: Problem Solving and Technology (3)^E
- CH 201. Chemistry for Engineering Majors (3)^E

 *Synthesis (6)¹
 Technical Electives (11)

Total=180

Footnotes:

^E Required for entry into the professional program.

¹ Must be selected to satisfy the requirements of the baccalaureate core.

⁵ Prerequisite for several upper-division courses. Recommended for completion prior to entry into the professional program.

CIVIL ENGINEERING-FOREST ENGINEERING

A five-year dual-degree program in civil engineering and forest engineering is offered jointly by the School of Civil and Construction Engineering in the College of Engineering and Forest Engineering in the College of Forestry. Advising is done through either academic unit. See Forest Engineering, Resources and Management in the College of Forestry.

GEOMATICS (SURVEYING AND MAPPING)

Graduates of civil engineering are eligible to take the Fundamentals of Land Surveying Examination in pursuit of the Professional Land Surveying license by selecting courses as follows.

CE 361. Surveying Theory (4)

Plus 12 credits from the following:

CE 365. Highway Location and Design (3)
 CE 461/CE 561. Photogrammetry (3)
 CE 463/CE 563. Control Surveying (4)
 CE 465/CE 565. Oregon Land Survey Law (3)
 CE 469/CE 569. Property Surveys (3)
 CE 562. Digital Terrain Modeling (4)

OPTIONS

ENVIRONMENTAL ENGINEERING OPTION

CCE students may elect a transcript-visible Environmental Engineering option. A minimum of 21 credits is required.

Core Courses (21)

CH 123. *General Chemistry (5)
 or CH 223. *General Chemistry (5)
 CE 407. Seminar: Water Resource Issues (1)
 ENVE 421. Water and Wastewater Characterization (4)
 ENVE 422. Environmental Engineering Design (4)
 ENVE 431. Fate and Transport of Chemicals in Environmental Systems (4)
 ENVE 456. Sustainable Water Resources Development (3)

CONSTRUCTION ENGINEERING MANAGEMENT (BA, BS, CRED, HBA, HBS)

David Rogge, Assistant School Head
 201D Kearney Hall

Oregon State University
 Corvallis, OR 97331-3212
 541-737-4934

Email: cce@engr.orst.edu

Website: <http://cce.oregonstate.edu/>

The School of Civil and Construction Engineering offers BA and BS degrees in Construction Engineering Management (CEM). This unique program blends principles of basic science, engineering, and technology with a strong component of business subjects to prepare graduates for a productive career in the construction industry. The BS in Construction Engineering Management is ACCE accredited.

The CEM program is built on a rigorous four-year curriculum that emphasizes practical applications as well as basic principles. Students are given hands-on experiences in the laboratory and are involved in field trips as a supplement to their classroom activities. A more detailed explanation of the CEM Program is contained in the "Construction Engineering Management Advising Guide," which may be viewed on the school's website at <http://cce.oregonstate.edu/academic-advising>.

The mission of the CEM program is to provide a comprehensive, state-of-the-art education to prepare students for professional and responsible constructor positions with business, industry, consulting firms or government. The program's educational objectives are to:

1. Provide a compelling education based in the natural sciences, mathematics, engineering sciences, and business, and in the fundamental paradigms, concepts, understandings, applications, and knowledge of civil and construction engineering and construction management.
2. Develop students' abilities through their education to analyze, synthesize, and evaluate information, solve engineering problems, and be prepared to effectively perform project engineering and management tasks for effective execution of construction projects.
3. Provide education for modern professional practice including the abilities for effective communication, collaborative work in diverse teams, ethical decision-making, successful management of personal and professional career objectives, and continual development through lifelong learning and professional involvement.
4. Prepare our graduates for either immediate employment or for graduate school opportunities in construction or business.

5. Provide students with knowledge of contemporary societal issues and a sensitivity to the challenge of meeting social, environmental, and economic constraints within a global community.

Construction Engineering Management (BA, BS, HBA, HBS)

Pre-Construction Engineering Management

Freshman Year (46)

CCE 101. Civil and Construction Engineering Orientation (2)⁵
 CCE 102. Civil and Construction Engineering: Problem Solving and Technology (3)^E

GRADUATE MAJORS

CIVIL ENGINEERING (MEng, MS, PhD, MAIS)

Graduate Areas of Concentration
Civil engineering, coastal and ocean engineering, construction engineering management, geomatics, geotechnical engineering, infrastructure materials, structural engineering, transportation engineering, and water resources engineering

The School of Civil and Construction Engineering offers graduate work leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees. The MEng, MS, and PhD degrees offer concentrations in civil engineering, coastal and ocean engineering,

construction engineering and management, geomatics, geotechnical engineering, infrastructure materials, structural engineering, transportation engineering, water resources engineering, and interdisciplinary areas. Areas of concentration can also be combined to form an integrated civil engineering MS program or MS and PhD minors. The MEng is a course work-only degree requiring a final oral exam. For the MS degree, a thesis or project is required. The PhD degree requires a dissertation.

Degree programs prepare the student for advanced-level entry into professional engineering practice and for careers in research and teaching. Majors within the department constitute approximately two-thirds of the total program. Minor fields may be selected from departmental offerings in different subject areas, from other engineering disciplines, or from other fields of study that support the major. The school also participates in the Master of Arts in Interdisciplinary Studies program.

CIVIL ENGINEERING GRADUATE MINOR

For more details, see the school advisor.

■ CIVIL AND CONSTRUCTION ENGINEERING COURSES

CCE 101. CIVIL AND CONSTRUCTION ENGINEERING ORIENTATION (2). Introduction to civil and construction engineering professions; problem solving, communication skills. This course is required by the CE, CEM and FE programs. **PREREQS:** (MTH 112* or MTH 251*) and MTH 111

CCE 102. CIVIL & CONSTRUCTION ENGR: PROBLEM-SOLVING AND TECHNOLOGY (3). A skills-based course that focuses on introducing freshman students to the use of technology in solving civil engineering problems. Topics to be covered include units, homework professionalism, professional presentations, Internet tools, software for numeric methods and programming. Students use laptop computers during class. Some class involvement with professional societies or chapters. Projects from the areas of civil and construction engineering. Lec/lab. **PREREQS:** (MTH 112* or MTH 251*) and MTH 111

CCE 201. CIVIL AND CONSTRUCTION ENGINEERING GRAPHICS AND DESIGN (3). Introduces the engineering design process and graphic skills that are used by civil and construction engineers. Topics include design process, geometric construction, multiviews, auxiliary views, sections, dimensioning, tolerances and engineering drawing standards. Students participate in team design projects and presentations. Graphic and design projects from the areas of civil and construction engineering. Lec/lab. **PREREQS:** (MTH 111 or MTH 112* or MTH 241* or MTH 251*)

CCE 203. INTRODUCTION TO VIRTUAL DESIGN AND CONSTRUCTION (3). Basic principles of virtual design and construction (VDC) focusing on skills required for generating design and construction information models. Parametric modeling and design constraints are introduced. Students will utilize construction drawings and documentation to create accurate 3D models. Use of design and construction information models for making estimates of quantities and cost, and for determination of constructability problems. Lec/lab. **PREREQS:** CCE 201

CCE 321. CIVIL AND CONSTRUCTION ENGINEERING MATERIALS (4). Highway materials; aggregate, concrete and asphalt. Standard test methods. **PREREQS:** ((ENGR 213 or ENGR 213H) and (ST 314 or BA 276))

CCE 421. ADVANCED CONCRETE PROPERTIES AND PERFORMANCE (4). Cement production, hydration, supplementary cementitious materials, mixture design and proportioning, heat of hydration, volume stability, shrinkage, cracking, expansion, creep, relaxation, admixtures, alternative binders, strength gain, durability. **PREREQS:** CCE 321 and senior standing.

CCE 422. GREEN BUILDING MATERIALS (3). Introduces concepts of construction with green building materials. Specific concepts include evaluation of what truly makes a material "green", long-term performance (e.g. durability) of materials, material production and life cycle cost analysis. Concepts of green building programs, guidelines and specifications will be introduced. **PREREQS:** (CE 321 or CCE 321) and (ECON 201 or ECON 201H or ECON 202 or ECON 202H) and ST 314 or equivalent.

CCE 520. SELECTED TOPICS IN INFRASTRUCTURE MATERIALS (1-4). A critical examination of in-depth topics selected by the instructor from among topics not covered in other infrastructure materials courses. This course is repeatable for a maximum of 16 credits. **PREREQS:** Depending on the selected topic covered there may be prerequisites such as "graduate standing" or "undergraduate materials course such as CCE 321"

CCE 522. GREEN BUILDING MATERIALS (3). Introduces concepts of construction with green building materials. Specific concepts include evaluation of what truly makes a material "green", long-term performance (e.g. durability) of materials, material production and life cycle cost analysis. Concepts of green building programs, guidelines and specifications will be introduced. **PREREQS:** (CE 321 or CCE 321) and (ECON 201 or ECON 201H or ECON 202 or ECON 202H) and ST 314 or equivalent.

CCE 523. CONCRETE DURABILITY (4). Cement production, supplementary cementitious materials, mixture proportioning, concrete durability, freeze-thaw attack, sulfate attack, corrosion, alkali-silica reaction, long-term performance, durability prediction and modeling, durability of alternative cement, multi-scale assessment, dimensional stability. **PREREQS:** CCE 321, Civil and Construction Engineering Materials or similar introductory materials course or CCE 421, Advanced Concrete Properties and Performance.

CCE 525. CONSTRUCTION SITE SYSTEMS ENGINEERING (3). Design and planning of construction site field operations and engineered systems. Systems analysis and design as it applies to civil engineering projects. Design of construction systems: blasting; rock crushing and conveying; dewatering; cranes, pile driving, and rigging; and concrete pumping and placement. Construction site design and process design. **PREREQS:** Graduate standing or consent of instructor.

■ CIVIL ENGINEERING COURSES

CE 199. SPECIAL TOPICS (1-4).

CE 202. CIVIL ENGINEERING: GEOSPATIAL INFORMATION AND GIS (3). Introductory design principles presented with the use of GIS and geospatial information (remote sensing, GPS, surveying, and aerial photography) for civil engineering problem solving. Introduction to the integration of geospatial data and analysis for decision making and management for site selection, mitigation, change analysis, modeling and assessment. Standard software and custom programming used in course. Students participate in both individual and team projects

and presentations. Projects from the area of civil engineering. Lec/lab. **PREREQS:** (CE 201 or CCE 201 or ENGR 248)

CE 299. SPECIAL TOPICS (1-4). Graded P/N.

CE 299H. SPECIAL TOPICS (1-4). Graded P/N. **PREREQS:** Honors College approval required.

CE 311. FLUID MECHANICS (4). Fluid properties, fluid statics, fluid motion, conservation of mass, momentum and energy for incompressible fluids, dimensional analysis, civil engineering applications.

CE 313. HYDRAULIC ENGINEERING (4). Analysis of large civil engineering fluid systems including conduit flow, multiple reservoirs, pipe networks, pumps, turbines, open channel flow, and hydraulic structures. **PREREQS:** (CE 311 or CHE 331)

CE 361. SURVEYING THEORY (4). Use of surveying equipment, Gaussian error theory applied to measurements, calculations of position on spherical and plane surfaces, state plane coordinate systems, introduction to global positioning systems.

CE 365. HIGHWAY LOCATION AND DESIGN (3). Curve problems in highway design, including circular, vertical, compound curves and spirals; earth distribution analysis; preliminary office studies; paper location procedures and field layout problems. **PREREQS:** (CE 361 or CEM 263 or FE 308)

CE 372. GEOTECHNICAL ENGINEERING I (4). Basic soil mechanics including the identification and classification of soil, principles of compaction and consolidation, flow through porous media, effective stress, and shear strength. Lec/lab. **PREREQS:** (ENGR 213 and (CE 311* or CEM 311* or CHE 331*))

CE 373. GEOTECHNICAL ENGINEERING II (4). Application of fundamental soil mechanics principles to analyses of slope stability, retaining structures, and foundation support. Lec/rec. **PREREQS:** (CE 372 or FE 315)

CE 381. STRUCTURAL THEORY I (4). Analysis of statically determinate structures (beams, frames, trusses, arches, and cables). Approximate analysis, influence lines, deflections. **PREREQS:** (ENGR 213 or ENGR 213H)

CE 382. STRUCTURAL THEORY II (4). Analysis of statically determinate structures (beams, frames, trusses). Deflections. Energy methods, introduction to matrix methods. **PREREQS:** CE 381

CE 383. DESIGN OF STEEL STRUCTURES (4). Introduction to design of steel members, connections and structural systems. Lec/lab. **PREREQS:** CE 382

CE 392. INTRODUCTION TO HIGHWAY ENGINEERING (4). Highway engineering standards, geometric design, cross section and roadside design, highway surfaces, pavement design, highways and the environment, highway construction and maintenance. **PREREQS:** ((ENGR 212 or ENGR 212H) and CE 361)

CE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CE 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CE 407. SEMINAR (1-3). Understanding complexity and systems thinking. This course is repeatable for a maximum of 16 credits.

CE 407H. SEMINAR (1-3). Understanding complexity and systems thinking. This course is repeatable for a maximum of 16 credits.

PREREQS: Honors College approval required.

CE 408. WORKSHOP (1-3).

CE 410. INTERNSHIP (1-12). This course is repeatable for a maximum of 16 credits.

CE 411. OCEAN ENGINEERING (4). Introduction to linear wave theory and wave forces on piles. Guided design of wave gauge facility at Coos Bay, Oregon, that requires synthesizing fluid mechanics, structural design and foundation design. **PREREQS:** CE 313 or CEM 311

CE 412. HYDROLOGY (4). Fundamentals of hydrology, the hydrologic cycle, precipitation, streamflow, hydrograph analysis and hydrologic measurements.

CE 413. GIS IN WATER RESOURCES (3). Course presents Geographic Information System (GIS) technology for developing solutions to water resource problems: water quality, availability, flooding, the natural environment, and management of water resources. Typical GIS data models for hydrologic information are presented. Synthesis of geospatial and temporal water resources to support hydrologic analysis and modeling are covered. **PREREQS:** Senior or graduate standing in engineering or a previous introductory GIS course.

CE 415. COASTAL INFRASTRUCTURE (3). Planning and design criteria of coastal infrastructure, including breakwaters, jetties, sea walls, groins, piers, submerged pipelines, harbor design, and tsunami defense. Use of laboratory models, numerical simulations, and field observations for design. **PREREQS:** CE 313

CE 417. HYDRAULIC ENGINEERING DESIGN (4). Theory, planning, analysis, and design of hydraulic structures. Application of basic principles detailed analysis and design. Engineering planning and design of water resource systems. **PREREQS:** CE 313

CE 418. CIVIL ENGINEERING PROFESSIONAL PRACTICE (3). Engineering career paths; ethics and professionalism, project planning, execution and delivery; team building/management; marketing proposals; engineering overseas; dispute resolution; partnering; effective decision making; uncertainty and risk analysis; and current industry design and construction methods. (Writing Intensive Course) **PREREQS:** Civil and environmental engineering majors within three terms of graduation.

CE 419. CIVIL INFRASTRUCTURE DESIGN (4). A capstone design project experience exposing students to problems and issues similar to those encountered in the practice of civil engineering. Students should have completed ALL other required courses in their degree program prior to registering for this course. Lec/lab/rec. **PREREQS:** CE 418

CE 420. ENGINEERING PLANNING (4). The application of systems analysis to structuring, analyzing, and planning for civil engineering projects. Concept of the system and its environment; setting goals, objectives, and standards; evaluation criteria; solution generation and analysis; evaluation and optimization. Project management using precedence node diagramming; resource allocation and leveling; time-cost trade-off; and PERT.

CE 424. CONTRACTS AND SPECIFICATIONS (4). Fundamentals of construction industry contracts, including technical specifications, and issues related to time, money, warranty, insurance, and changed conditions.

CE 427. TEMPORARY CONSTRUCTION STRUCTURES (4). Design and construction of temporary structures including formwork, shoring, and earth retaining structures. **PREREQS:** ((CE 321 or CCE 321) and (FE 315 or CE 372) and (CEM 383 or CE 383))

CE 428. PROJECT MANAGEMENT FOR CIVIL ENGINEERS (4). Provides the prospective civil engineer with the technical knowledge and familiarity necessary to successfully and confidently manage projects of different sizes and complexity levels. It relies on basic knowledge and techniques developed by the Project Management Institute (PMI) and real-world examples (through lectures, example projects, case studies, and guest speakers) from the public and private sectors.

CE 461. PHOTOGRAMMETRY (3). Geometry of terrestrial and vertical photographs, flightline planning, stereoscopy and parallax, stereoscopic plotting instruments, analytical photogrammetry, orthophotography, introduction to photo interpretation, and aerial cameras. **PREREQS:** (CE 361 or CEM 263 or FE 308)

CE 463. CONTROL SURVEYING (4). Global Positioning Systems (GPS) theory, networks, and fieldwork; control specifications, methods and problems in obtaining large area measurements; precise leveling; network adjustments using least square techniques; field instrument adjustments. **PREREQS:** (CE 361 or CEM 263 or FE 308)

CE 465. OREGON LAND SURVEY LAW (3). Introduction to U.S. public land survey; Oregon state statutes, common law decisions, and administrative rules dealing with boundary law; case studies; unwritten land transfers; original and resurvey platting laws; guarantees of title; deed descriptions. **PREREQS:** (CE 361 or CEM 263 or FE 308)

CE 469. PROPERTY SURVEYS (3). U.S. public land survey: restoration of corners, subdivision of sections; topographic mapping; subdivision and partition plats, resurvey plats, subdivision design; introduction to LIS/GIS; field astronomy. **PREREQS:** (CE 361 or CEM 263 or FE 308)

CE 471. FOUNDATIONS FOR STRUCTURES (4). Criteria, theory, and practice of design and construction for foundations of structures; staged embankment construction and design of preload fills; case history analysis; use of in situ tests for geotechnical engineering. **PREREQS:** CE 373

CE 481. REINFORCED CONCRETE I (4). Basic principles of reinforced concrete design; strength, stability, and serviceability criteria; design of reinforced concrete members for flexure and shear. Detailing, development length and splices. **PREREQS:** CE 382 and /or equivalent.

CE 482. MASONRY DESIGN (3). A critical examination in depth of masonry design topics. **PREREQS:** CE 481 and /or equivalent.

CE 484. WOOD DESIGN (4). Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glued laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab. **CROSSLISTED** as WSE 458. **PREREQS:** CE 383 or CE 481 and senior or graduate standing.

CE 486. PRESTRESSED CONCRETE (3). Prestressed concrete analysis and design, systems of prestressing, materials, economics. **PREREQS:** CE 481

CE 491. TRANSPORTATION ENGINEERING (3). Introduction to transportation engineering systems characteristics, traffic estimation, comprehensive transportation planning, highway economics, driver and vehicle characteristics, highway operations and capacity, signalization and control. Introduction to intelligent transportation. **PREREQS:** (CE 392 and ST 314)

CE 492. PAVEMENT STRUCTURES (3). Design and rehabilitation of pavement structures for streets, highways, and airports. **PREREQS:** CE 392

CE 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

CE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CE 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

CE 508. WORKSHOP (1-3). Graded P/N.

CE 510. INTERNSHIP (1-12). This course is repeatable for a maximum of 16 credits.

CE 511. OCEAN ENGINEERING (4). Introduction to linear wave theory and wave forces on piles. Guided design of wave gauge facility at Coos Bay, Oregon, that requires synthesizing fluid mechanics, structural design and foundation design. **PREREQS:** CE 313 or CEM 311

CE 512. HYDROLOGY (4). Fundamentals of hydrology, the hydrologic cycle, precipitation, streamflow, hydrograph analysis and hydrologic measurements.

CE 513. GIS IN WATER RESOURCES (3). Course presents Geographic Information System (GIS) technology for developing solutions to water resource problems: water quality, availability, flooding, the natural environment, and management of water resources. Typical GIS data models for hydrologic information are presented. Synthesis of geospatial and temporal water resources to support hydrologic analysis and modeling are covered. **PREREQS:** Senior or graduate standing in engineering or a previous introductory GIS course.

CE 514. GROUNDWATER HYDRAULICS (3). Principles of groundwater flow and chemical transport in confined and unconfined aquifers, aquifer testing and well construction. Design of dewatering and contaminant recovery systems. **CROSSLISTED** as BEE 514 and GEO 514. **PREREQS:** MTH 252

CE 515. COASTAL INFRASTRUCTURE (3). Planning and design criteria of coastal infrastructure, including breakwaters, jetties, sea walls, groins, piers, submerged pipelines, harbor design, and tsunami defense. Use of laboratory models, numerical simulations, and field observations for design. **PREREQS:** CE 313

CE 517. HYDRAULIC ENGINEERING DESIGN (4). Theory, planning, analysis, and design of hydraulic structures. Application of basic principles detailed analysis and design. Engineering planning and design of water resource systems. **PREREQS:** CE 313

CE 518. GROUNDWATER MODELING (4). Application of numerical methods to the solution of water flow and solute transport through saturated and unsaturated porous media. Analysis of confined and unconfined aquifers. Computer solution of large-scale field problems including groundwater contamination and aquifer yield. **PREREQS:** CE 514

CE 520. ENGINEERING PLANNING (4). The application of systems analysis to structuring, analyzing, and planning for civil engineering projects. Concept of the system and its environment; setting goals, objectives, and standards; evaluation criteria; solution generation and analysis; and evaluation and optimization. Project management using precedence node diagramming; resource allocation and leveling; time-cost trade-off; and PERT.

CE 524. CONTRACTS AND SPECIFICATIONS (4). Fundamentals of construction industry contracts, including technical specifications, and issues related to time, money, warranty, insurance, and changed conditions.

CE 526. ADVANCED CONCRETE MATERIALS (3). Cement hydration, supplementary cementing materials, micro to macro scale property development, mixture design and proportioning including material selection for sustainable design

practices, durability aspects including freeze-thaw attack, corrosion of reinforcing steel, sulfate attack and alkali-silica reaction, recent advances in concrete technology. **PREREQS:** (CE 321 or CCE 321) or equivalent.

CE 527. TEMPORARY CONSTRUCTION STRUCTURES (4). Design and construction of temporary structures including formwork, shoring, and earth retaining structures. **PREREQS:** (CE 321 or CCE 321) and (FE 315 or CE 372) and (CEM 383 or CE 383)

CE 528. PROJECT MANAGEMENT FOR CIVIL ENGINEERS (4). Provides the prospective civil engineer with the technical knowledge and familiarity necessary to successfully and confidently manage projects of different sizes and complexity levels. It relies on basic knowledge and techniques developed by the Project Management Institute (PMI) and real-world examples (through lectures, example projects, case studies, and guest speakers) from the public and private sectors.

CE 530. SELECTED TOPICS IN STRUCTURAL ANALYSIS AND MECHANICS (3). A critical, in-depth examination of topics selected by the instructor from among topics not covered in other structural analysis and mechanics courses. This course is repeatable for a maximum of 9 credits. **PREREQS:** CE 585

CE 531. STRUCTURAL MECHANICS (3). Theories of failure, multi-axial stress conditions, torsion, shear distortions, energy methods of analysis, beams on elastic foundations. Nonlinear and inelastic behavior. **PREREQS:** Graduate standing.

CE 532. FINITE ELEMENT ANALYSIS (4). Applications of the finite element method to structural analysis, fluid flow and elasticity problems. Use and development of large finite element computer programs. **PREREQS:** (CE 585 or ME 520) and /or equivalent.

CE 533. STRUCTURAL STABILITY (3). Stability theory and applications, with emphasis on design of steel structures. **PREREQS:** CE 383 or equivalent.

CE 534. STRUCTURAL DYNAMICS (4). Analytical and numerical solutions for single, multi-degree of freedom and continuous vibrating systems. Behavior of structures, dynamic forces and support motions. Seismic response spectra analysis. **PREREQS:** CE 382 or equivalent.

CE 535. INTRODUCTION TO RANDOM VIBRATIONS (4). Introduction to probability theory and stochastic processes. Correlation and spectral density functions. Response of linear systems to random excitations. First excursion and fatigue failures. Applications in structural and mechanical system analysis and design. **PREREQS:** CE 534 or (ME 422 or ME 522) and CE 534 or ME 422 or ME 522 or equivalent.

CE 537. NONLINEAR STRUCTURAL ANALYSIS (4). Material and geometric nonlinear analysis of frame and truss structures. Solution strategies for nonlinear structural analysis. Nonlinear constitutive models of steel and reinforced concrete members. Development and use of computer programs for nonlinear analysis. **PREREQS:** CE 585

CE 540. SPECIAL TOPICS IN HYDRAULIC ENGINEERING (3-4). This course is repeatable for a maximum of 16 credits.

CE 543. APPLIED HYDROLOGY (4). Advanced treatment of hydrology covering major components of the hydrological cycle with special emphasis on surface water; hydrologic analysis and design of water resource systems; runoff prediction; and simulation of surface water systems. Offered alternate years. **PREREQS:** BEE 512 and CE 412 or equivalent.

CE 544. OPEN CHANNEL FLOW (3). Steady, uniform, and nonuniform flow in natural and artificial open channels; unsteady flow; interaction of flow with river structures; and computational

methods. **PREREQS:** (CE 311 and CE 313) or CE 547 or equivalent.

CE 547. WATER RESOURCES ENGINEERING I: PRINCIPLES OF FLUID MECHANICS (4). Fluid mechanics for water resources engineers, classifications of fluid flows; fluid statics and dynamics, incompressible viscous flows; dimensional analysis; applications to fluid machinery, flow through porous media, fluid motion in rivers, lakes, oceans. **PREREQS:** Graduate standing.

CE 548. WATER QUALITY DYNAMICS (3). Mass balance, advection and diffusion in streams, lakes and estuaries; thermal pollution, heat balance, oxygen balance, and eutrophication; mathematical models; and numerical solutions.

CE 551. COMPUTER-AIDED SITE AND ROAD DESIGN (4). Site development and road design principles and application to a comprehensive design project using computer-based digital terrain model software tools. Lec/lab/rec. **PREREQS:** CE 392*

CE 552. ISOLATED SIGNALIZED INTERSECTIONS (3). Relationships between signal display, user response, vehicle detection, and signal timing parameters are examined in detail. Traffic simulation is introduced to visualize and design the various elements of isolated signalized intersections. **PREREQS:** CE 595, Traffic Operations and Design, is recommended but not required.

CE 561. PHOTOGRAMMETRY (3). Geometry of terrestrial and vertical photographs, flightline planning, stereoscopy and parallax, stereoscopic plotting instruments, analytical photogrammetry, orthophotography, introduction to photo interpretation, and aerial cameras. **PREREQS:** CE 361 or CEM 263 or FE 308

CE 562. DIGITAL TERRAIN MODELING (4). Fundamentals of LIDAR and creating digital terrain models. Computational geometry, Delaunay triangulations, spline interpolations, statistical gridding methods, ground filtering, data optimizations, and advanced topics in 3D modeling. **PREREQS:** CE 361 or CEM 263 or equivalent surveying or GIS course.

CE 563. CONTROL SURVEYING (4). Global Positioning Systems (GPS) theory, networks, and fieldwork; control specifications, methods and problems in obtaining large area measurements; precise leveling; network adjustments using least square techniques; field instrument adjustments. **PREREQS:** CE 361 or CEM 263 or FE 308

CE 565. OREGON LAND SURVEY LAW (3). Introduction to U.S. public land survey; Oregon state statutes, common law decisions, and administrative rules dealing with boundary law; case studies; unwritten land transfers; original and resurvey platting laws; guarantees of title; deed descriptions. **PREREQS:** CE 361 or CEM 263 or FE 308

CE 569. PROPERTY SURVEYS (3). U.S. public land survey: restoration of corners, subdivision of sections; topographic mapping; subdivision and partition plats, resurvey plats, subdivision design; introduction to LIS/GIS; field astronomy. **PREREQS:** CE 361 and CEM 263 or FE 308

CE 570. GEOTECHNICAL SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

CE 571. ADVANCED FOUNDATION ENGINEERING (4). Presents the planning, analysis, and design of shallow and deep foundations. Topics supporting course objectives include aspects of subsurface investigations, in-situ testing, factors of safety, margin of safety, reliability, and Load and Resistance Factor Design. Advances in foundation engineering practice in the Pacific Northwest are discussed. **PREREQS:** CE 373 and CE 471 or equivalent, or consent of instructor.

CE 572. ADVANCED GEOTECHNICAL LABORATORY (4). Examination of soil composition and engineering properties of soils including volume change, pore pressure generation, strength, and deformation behavior of soils in the laboratory. Advanced static and cyclic shear strength testing of soils will also be discussed. Lec/lab. **PREREQS:** (CE 373 and CE 471) or equivalent, or consent of instructor.

CE 573. SEEPAGE AND CONSOLIDATION (4). The fundamentals of effective stress, capillarity, theory of fluid flow in porous media, isotropic and anisotropic seepage analysis, the theory of consolidation, and advanced consolidation settlement analyses are presented. Advanced numerical techniques are implemented for the solution to complex seepage and consolidation problems. **PREREQS:** CE 372 and CE 471

CE 574. ENGINEERING PROPERTIES OF SOILS (5). Advanced laboratory experimental methods for measurement of soil properties. Analysis of experimental data, and methods to display data for 2D and 3D experiments. Compositional and environmental factors affecting the stress-strain, volume change, compressibility, shear strength behavior of sand, clay, and compacted soils in 2D and 3D. Stress and strain invariants and modeling of failure criteria. **PREREQS:** CE 471

CE 575. EARTH RETENTION AND SUPPORT (4). Practical application of earth pressure theories to retaining walls, bulkheads, culverts, and braced excavations. Use of geosynthetics for earth retention. **PREREQS:** CE 373

CE 576. SOIL AND SITE IMPROVEMENT (3). The application of soil reinforcement and treatment methods for improving the performance of soils in foundations, earth retention, and drainage systems. Classification of geosynthetics, functions, properties and tests, as well as ground treatment methods for improving the strength and volume change behavior of soils in situ. **PREREQS:** CE 373 or FE 316

CE 577. SHEAR STRENGTH AND SLOPE STABILITY (4). An introduction to the analysis of generalized stress states and theoretical failure theories for soils, soil behavior in drained and undrained shear, stress paths to failure, total and effective stress analysis, and critical state soil mechanics. Shear strength concepts are applied to the stability of natural and man-made slopes, using simplified and advanced numerical solutions. **PREREQS:** CE 373 and CE 417 or equivalent or consent of instructor.

CE 578. GEOTECHNICAL EARTHQUAKE ENGINEERING (4). A practice-oriented overview and treatment of the major areas involved in the geotechnical aspects of earthquake engineering. In addition to the introduction and application of conventional engineering analysis and design methods, the course will also include discussion of ongoing developments, current areas of debate, evolving seismic codes and current standards of practice, and the current state of knowledge regarding seismic hazards in the Pacific Northwest. **PREREQS:** CE 373 and CE 471 or equivalent, or consent of the instructor.

CE 580. SELECTED TOPICS IN STRUCTURAL DESIGN (3). A critical examination in depth of topics selected by the instructor from among topics not covered in other structural design courses. This course is repeatable for a maximum of 18 credits.

CE 581. REINFORCED CONCRETE I (4). Basic principles of reinforced concrete design; strength, stability, and serviceability criteria; design of reinforced concrete members for flexure and shear. Detailing, development length and splices. **PREREQS:** CE 382 or equivalent.

CE 582. MASONRY DESIGN (3). A critical examination in depth of topics selected by the instructor from among topics not covered in other structural design courses. **PREREQS:** CE 581 or equivalent.

CE 583. BRIDGE DESIGN (3). AASHTO specifications for bridge design; load models; design for moving loads; design and analysis of bridge decks and simple and continuous bridge spans. **PREREQS:** CE 381 and CE 382 and (CE 481 or CE 581). It's recommended that students take CE 383 concurrently with CE 583.

CE 584. WOOD DESIGN (4). Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glued laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab. **CROSSLISTED** as WSE 558. **PREREQS:** CE 383 or CE 481 with a minimum grade of C, senior or graduate standing.

CE 585. MATRIX STRUCTURAL ANALYSIS (4). Development of matrix methods for linear structural analysis. Force and displacement methods of analysis. Virtual work principles. Use of computer programs to analyze structures. Introduction to finite-element method. **PREREQS:** CE 382 or equivalent.

CE 586. PRESTRESSED CONCRETE (3). Prestressed concrete analysis and design, systems of prestressing, materials, economics. **PREREQS:** CE 581

CE 588. PROBABILITY-BASED ANALYSIS AND DESIGN (4). Application of probability and statistics in the analysis and design of civil and mechanical engineering systems. Probabilistic modeling of loading and resistance. Probability-based design criteria including load and resistance factor design. **PREREQS:** ST 314 or equivalent.

CE 589. SEISMIC DESIGN (4). Design of structures to resist the effects of earthquakes. Introduction to structural dynamics, dynamic analysis, seismic design philosophy, code requirements, and detailing for steel and reinforced concrete. **PREREQS:** CE 383 or CE 481 or equivalent.

CE 590. SELECTED TOPICS IN TRANSPORTATION ENGINEERING (1-3). Selected topics on contemporary problems in transportation engineering; application of ongoing research from resident and visiting faculty. This course is repeatable for a maximum of 9 credits.

CE 591. TRANSPORTATION SYSTEMS ANALYSIS, PLANNING, AND POLICY (3). The systems approach and its applications to transportation engineering and planning. The making of transportation plans and policies. Development of transportation models. Transportation system performance. Decision analysis. Evaluation of transportation projects. Environmental and social impacts of transportation.

CE 592. PAVEMENT STRUCTURES (3). Design and rehabilitation of pavement structures for streets, highways, and airports. **PREREQS:** CE 392

CE 593. TRAFFIC FLOW ANALYSIS AND CONTROL (4). Traffic operations and control systems; traffic flow theory and stream characteristics; capacity analysis; traffic models and simulation; accident and safety improvement. Offered alternate years.

CE 594. TRANSPORTATION FACILITY DESIGN (4). Location and design of highways, and other surface transportation terminals; design for safety, energy efficiency, and environmental quality. Offered alternate years. Lec/rec. **PREREQS:** CE 392

CE 595. TRAFFIC OPERATIONS AND DESIGN (3). Traffic operations and engineering; human and vehicular characteristics; traffic stream characteristics; highway capacity analysis; intersection operation, control and design. **PREREQS:** CE 491*

CE 596. PAVEMENT EVALUATION AND MANAGEMENT (3). Advanced topics in pavement evaluation techniques and pavement management procedures. **PREREQS:** CE 492

CE 597. PUBLIC TRANSPORTATION (3). Characteristics and nature of public transportation systems, including bus, light and heavy rail; financing policy considerations; planning transit service; managing and operating transit systems for small and large urban areas. Offered alternate years.

CE 598. AIRPORT PLANNING AND DESIGN (3). Characteristics and nature of the air transport system. Airport financing, air traffic control. Analysis and design of airports and the airport planning processes. Airport appurtenances. Airport pavement design, environmental facilities and drainage. Offered alternate years.

CE 599. INTELLIGENT TRANSPORTATION SYSTEMS (3). Introduction to intelligent transportation systems, including enabling surveillance, navigation, communication and computer technologies. Application of technologies for monitoring, analysis evaluation and prediction of transportation system performance. Intervention strategies, costs and benefits, safety, human factors, institutional issues and case studies. Offered alternate years. **PREREQS:** CE 491 is a corequisite for new graduate students.

CE 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

CE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

CE 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CE 607. OCEAN ENGINEERING SEMINAR (1). Presentations from on-campus and off-campus speakers discussing state of technology topics in ocean engineering research, development, and construction. Graded P/N. This course is repeatable for a maximum of 16 credits.

CE 630. OCEAN WAVE MECHANICS I (3). Linear wave boundary value problem formulation and solution, water particle kinematics, shoaling, refraction, diffraction, and reflection. Linear long wave theory with applications to tides, seicheing, and storm surge. **CROSSLISTED** as OC 630. Lec/lab.

CE 631. OCEAN WAVE MECHANICS II (3). Second in the sequence of ocean wave engineering mechanics, covers the following topics: introduction to long wave theory, wave superposition, wave height distribution, and the wind-wave spectrum, introduction to wave forces, and basic nonlinear properties of water waves. May include additional selected topic in wave mechanics. **CROSSLISTED** as OC 631. **PREREQS:** (CE 630 or OC 630)

CE 634. LONG WAVE MECHANICS (3). Theory of long waves. Depth-integrated Euler's equation and its jump conditions. Evolution equations and their solutions. Nonlinear shallow-water waves, the Korteweg-deVries equation and Boussinesq equation. Boundary-layer effects. Shallow-water waves on beaches. Applications of the fundamentals to problems of tsunamis. **CROSSLISTED** as OC 634. **PREREQS:** (CE 630 and CE 631) and OC 670 or equivalent.

CE 635. APPLIED MODELING OF NEARSHORE PROCESSES (4). An introduction to numerical modeling of the nearshore ocean, providing hands-on experience with state-of-the-art numerical models for wave propagation, nearshore circulation, planform shoreline evolution and bathymetric profile evolution. The focus is on review of model requirements, detailed study of several specific models for several domains of interest, application to coastal phenomena, and the interpretation of model results. Offered alternate years. **CROSSLISTED** as OC 635.

CE 639. DYNAMICS OF OCEAN STRUCTURES (3). Dynamic response of fixed and compliant structures to wind, wave and current loading;

Morison equation and diffraction theory for wave and current load modeling, time and frequency domain solution methods; application of spectral and time series analyses; system parameter identification; and stochastic analysis of fatigue and response to extreme loads. Offered alternate years.

CE 640. SELECTED TOPICS IN OCEAN AND COASTAL ENGINEERING (1-3). Selected topics on contemporary problems in ocean and coastal engineering; application of ongoing research from resident and visiting faculty. Offered alternate years. This course is repeatable for a maximum of 9 credits. **PREREQS:** CE 630

CE 642. RANDOM WAVE MECHANICS (3). Random wave theories, probability and statistics of random waves and wave forces, time series analyses of stochastic processes, ocean wave spectra. Offered alternate years. **PREREQS:** CE 630

CE 643. COASTAL ENGINEERING (3). Coastal sediment transport including nearshore currents, longshore onshore-offshore transport, and shoreline configuration; equilibrium beach profile concept with application to shore protection; shoreline modeling; tidal inlet hydrodynamics and inlet stabilization; design criteria for soft structures. Offered alternate years. **PREREQS:** CE 630

CE 645. WAVE FORCES ON STRUCTURES (3). Wave forces on small and large members, dimensional analyses and scaling of equations, identification and selection of force coefficients for Morison equation; compatibility of wave kinematics and force coefficients in Morison equation, diffraction and radiation of surface gravity waves by large floating bodies, wavemaker problem, and reciprocity relations. **PREREQS:** CE 630

CE 647. OCEAN AND COASTAL ENGINEERING MEASUREMENTS (3). Hands-on experience in the conduct of field and laboratory observations, including waves, currents, wind, tides, tsunamis, sediments, bathymetry, shore profiles, wave forces on structures, and structural response. Online data archival and retrieval systems. **PREREQS:** CE 630

CE 808. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

■ CONSTRUCTION ENGINEERING MANAGEMENT COURSES

CEM 263. PLANE SURVEYING (3). Use of field surveying equipment; error analysis; plane surveying methods applied to construction; plane coordinate computations; topographic mapping; and introduction to GPS. Lec/lab. **PREREQS:** (ENGR 211 or ENGR 211H) and sophomore standing in engineering.

CEM 311. HYDRAULICS (4). Pressure and energy concepts of fluids, fluid measurements, flow in pipes and open channels. **PREREQS:** (ENGR 211 or ENGR 211H)

CEM 341. CONSTRUCTION ESTIMATING I (4). Fundamentals of estimating and bidding construction projects; plan reading, specification interpretation; quantity take-off; types of estimates; estimating and methods of construction for sitework, concrete, and carpentry; estimating subcontracts, estimating job overhead and home office overhead; estimating profit, and computer-aided estimating. **PREREQS:** CE 102 and CE 201. CEM 341 and CEM 342 must be taken in order.

CEM 342. CONSTRUCTION ESTIMATING II (4). Fundamentals of estimating and bidding construction projects; plan reading, specification interpretation; quantity take-off; types of estimates; estimating and methods of construction for sitework, concrete, and carpentry; estimating subcontracts, estimating job overhead and home office overhead; estimating profit, and computer-aided estimating. **PREREQS:** CEM 341

CEM 343. CONSTRUCTION PLANNING AND SCHEDULING (4). Principles of construction planning, scheduling, and resource optimization;

scheduling techniques and calculations; methods for integrating project resources (materials, equipment, personnel, and money) into the schedule. **PREREQS:** CEM 342*

CEM 381. STRUCTURES I (4). Introduction to statically determinate analysis and design of steel structures. Lec/rec. **PREREQS:** (ENGR 213 or ENGR 213H)

CEM 383. STRUCTURES II (4). Analysis and design of building elements of concrete and timber; detailing and fabrication. Lec/rec. **PREREQS:** CEM 381

CEM 403. THESIS (1-16). **PREREQS:** Departmental approval required.

CEM 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

CEM 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

CEM 407. SEMINAR (1). Professional practices of construction engineering management.

CEM 431. OBTAINING CONSTRUCTION CONTRACTS (4). Preparing and effectively presenting detailed and complete proposals for the execution of construction projects. **PREREQS:** CEM 341

CEM 441. HEAVY CIVIL CONSTRUCTION MANAGEMENT (4). Heavy civil construction management methods. Construction equipment types, capabilities, costs, productivity, and the selection and planning of equipment needed for a project. Soil characteristics, quantity analysis, and movement on construction sites. **PREREQS:** (FE 315 or CE 372)

CEM 442. BUILDING CONSTRUCTION MANAGEMENT (4). Building construction management and methods. **PREREQS:** .

CEM 443. PROJECT MANAGEMENT FOR CONSTRUCTION (4). Project management concepts for construction; concepts, roles and responsibilities, labor relations and supervision, administrative systems, documentation, quality management, and process improvement. (Writing Intensive Course)

CEM 471. ELECTRICAL FACILITIES (4). Principles and applications of electrical components of constructed facilities; basic electrical circuit theory, power, motors, controls, codes, and building distribution systems. Lec/lab.

CEM 472. MECHANICAL FACILITIES (3). Principles and applications of mechanical components of constructed facilities; heating, ventilating, air conditioning, plumbing, fire protection, and other mechanical construction.

CEM 541. HEAVY CIVIL CONSTRUCTION MANAGEMENT (4). Heavy civil construction management methods. Construction equipment types, capabilities, costs, productivity, and the selection and planning of equipment needed for a project. Soil characteristics, quantity analysis, and movement on construction sites. **PREREQS:** FE 315 or CE 372

CEM 543. PROJECT MANAGEMENT FOR CONSTRUCTION (4). Project management concepts for construction; concepts, roles and responsibilities, labor relations and supervision, administrative systems, documentation, quality management, and process improvement.

CEM 550. CONTEMPORARY TOPICS IN CONSTRUCTION ENGINEERING MANAGEMENT (4). Contemporary topics of emerging technologies and processes, construction engineering and management, how industry environmental change causes development of new technologies, and the applications of the technologies in the field. **PREREQS:** CEM or CE degree or 3 years professional construction experience or instructor approval required.

CEM 551. PROJECT CONTROLS (4). Advanced methods of project controls including advanced technologies and methodologies for quality, time, and cost management; project management organization models, and intra-organizational relationships. **PREREQS:** Graduate standing and CEM or CE degree or 3 years professional construction experience, or instructor approval.

CEM 552. RISK MANAGEMENT IN CONSTRUCTION (4). An introduction to the concept of risk in construction projects and construction firms, including risk definition, identification, assessment and management techniques; contractual risk control, sharing and shedding; and contingency management. **PREREQS:** Graduate standing and CEM or CE degree or 3 years of professional construction experience or instructor approval required.

CEM 553. CONSTRUCTION BUSINESS MANAGEMENT (4). Introduction to concepts of business structures associated with the construction industry; enterprise-level management techniques; extra-organizational risk management; and operational management structuring. **PREREQS:** Graduate standing and CEM or CE degree or three years professional construction experience or instructor approval.

SCHOOL OF ELECTRICAL ENGINEERING AND COMPUTER SCIENCE

Bella Bose, Associate Director
1148 Kelley Engineering Center
Oregon State University
Corvallis, OR 97331-5501
541-737-3617
Website: <http://eecs.oregonstate.edu/>

FACULTY

Professors Bailey, Bose, Burnett, Conley, Cull (Emeritus), Dieterich, Erwig, Fiez, Lee, Liu, Mayaram, Moon, Pancake, Tadepalli, Temes, von Jouanne, Wager, Weisshaar

Associate Professors Brekken, Budd (Emeritus), Chiang, Dhagat, A. Fern, X. Fern, Hamdaoui, Hanumolu, Jander, Jensen, Magaña, Metoyer, Minoura (Emeritus), Nguyen, Plant, Raiich, Wong, E. Zhang

Assistant Professors Borradaile, Cheng, Cotilla-Sanchez, Dig, Groce, Hendrix, Natarajan, Nayyeri, Ramsey, Rosulek, Scaffidi, Termehchy, Todorovic, Wang, J. Zhang

Senior Instructor Traylor

Instructors Chaney, Jess, McGrath, O'Hara, Parham-Mocello, Rooker, Shuman, Sweet, Van Londen, Wolford

Research Assistant Heer

Assistant Professor Senior

Research Amon, Y. Zhang

Undergraduate Majors

Computer Science
(BA, BS, CRED, HBA, HBS)

Options

Applied Computer Science

*Computer Science Double Degree
(to be renamed CS Professional Degree)*

Computer Systems

Information Systems

Electrical and Computer Engineering

Computer Science

Electrical and Computer Engineering

Consistent with the mission of the university and college, the mission of the School of Electrical Engineering and Computer Science at Oregon State University is to provide a comprehensive, state-of-the-art education that prepares our students to be successful in engineering and computing practice and advanced studies.

The school has traditionally strong undergraduate programs and one of the largest graduate programs within the university, with internationally recognized research programs in the areas of mixed signal integration, artificial intelligence and machine learning, computer graphics and vision, energy systems, multimedia and networking, materials and devices, end-user software, human computer interaction, and signal processing and communications systems.

ELECTRICAL AND COMPUTER ENGINEERING

The School of EECS offers programs leading to the BS, MS, MEng, and PhD degrees in Electrical and Computer Engineering (ECE).

Electrical and computer engineers engage in the design, construction and programming, and applications of electronic and integrated circuits, digital computers and embedded systems, power generation and utilization, communication and computer networks, electronic materials and devices, electromagnetic, microwave and optical circuits and systems, control systems and signal processing and conditioning.

Course work leading to the BS degree consists of courses in many of these topics, as well as courses in the supporting disciplines of mathematics, physical sciences, and computer science. Students select further study beyond the required courses, for either more depth in a subdiscipline or further breadth across engineering. Students fulfill humanities and social science requirements as specified by the university's baccalaureate core program. The BS program is supported by well-equipped laboratories providing direct experience with electronic circuits, digital logic, electronic materials, electric machines, IC design, optoelectronics, RF techniques, instrumentation, and microprocessors.

The program incorporates engineering design principles throughout the undergraduate curriculum. This includes the integration of societal, economic, legal, regulatory, ethical, environmental and other factors into the technical aspects of engineering design. Design activities begin in the freshman orientation sequence, which incorporates open-ended design problems, and continues throughout the curriculum. The design experience culminates with a yearlong senior design project. Within the senior design experience, students working in teams complete all phases of a design project under the supervision of a faculty member.

Graduates of this program are prepared either to seek industrial employment or to pursue advanced graduate degrees.

The BS degree in Electrical and Computer Engineering (ECE) is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone 410-347-7700.

The electrical and computer engineering graduate program provides opportunities for both MS and PhD thesis programs and an MEng course work-based program in the following areas: analog and mixed signals, communications and signal processing, computer systems and networking, energy systems, materials and devices, RF/microwaves. Graduate work is supported by the school's well-equipped laboratory facilities. Opportunities exist for graduate students to participate in many research projects sponsored by private industry and government agencies.

The School of Electrical and Computer Science faculty, advising procedures, undergraduate programs' educational objectives, graduate program application procedures, research areas, and many other aspects may be found at the school's website: <http://eecs.oregonstate.edu/>.

The Multiple Engineering Cooperative Program (MECOP) offers industrial internships to selected students in the discipline areas of computer science, electrical engineering, and computer engineering.

COMPUTER SCIENCE

The School of EECS offers programs leading to BA, BS, MA, MAIS, MEng, MS, and PhD degrees in Computer Science (CS).

Computer science is the heart of cutting-edge computing software. Computer scientists invent software that enables computers to do new things. They design programming languages, compilers, operating systems, games, databases, computer networks, and user interfaces. They solve complex challenging problems in a wide range of fields that can make a positive difference in the world.

Computer science majors learn skills to create realistic graphics, design new problem-solving tools that anyone can use, and create new solutions for business, medical diagnoses, games and entertainment. Their programming skills enable computers to “learn” as they process data, as well as assist in social communication and technologies for the disadvantaged.

Computer science offers a foundation that permits graduates to learn how to make software work well, how to make it fast, how to make it correct, how to find where innovation is needed, and how to understand the people who will be using it, so as to make it genuinely useful and compelling to people. Much of computer science course work is carried out in teams, and students gain experience in teamwork, in professionalism in writing, in working with clients, and in making presentations of their teams’ efforts.

Course work leading to the BS degree consists of required courses in many of these topics, as well as courses in supporting disciplines such as mathematics. The BS program is supported by well-equipped computer laboratories. Students select further study beyond the required core courses, opting for either more depth in computer science, for breadth in business and entrepreneurship, or for grounding in an applications area for their computing skills. The BS program culminates with a yearlong senior capstone project. Within the senior capstone experience, students working in teams complete all phases of a software project under the supervision of a faculty member.

Graduates of this program are prepared either to pursue advanced graduate degrees or to seek employment in business, industry or government.

The BS degree in Computer Science (CS) with Computer Systems option is accredited by Computing Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone 410-347-7700. The BA degree is not ABET accredited.

The computer science graduate program provides opportunities for MS and PhD thesis, MS non-thesis, and MEng course work-based programs in the following areas: artificial intelligence and machine learning, computer systems and networking, graphics and visualization, human-computer interaction, programming languages, software engineering, algorithms. Graduate work is supported by the school’s well-equipped laboratory facilities. Opportunities exist for graduate students to participate in many research projects sponsored by private industry and government agencies.

The School of Electrical and Computer Science faculty, advising procedures,

undergraduate programs’ educational objectives, graduate program application procedures, research areas, and many other aspects may be found at the school’s website: <http://eecs.oregonstate.edu/>.

The Multiple Engineering Cooperative Program (MECOP) offers internships to selected students in the discipline areas of computer science, electrical engineering, and computer engineering.

UNDERGRADUATE MAJORS WITH OPTIONS

COMPUTER SCIENCE (BA, BS, CRED, HBA, HBS)

Also offered at OSU-Cascades campus.

The computer science undergraduate curriculum has the following objectives:

- 1. Depth.** Graduates will be able to identify, formulate, analyze, and solve computing problems by applying fundamental and advanced mathematical and computer science knowledge and skills. Modern methods and tools will be used to analyze, design, implement and evaluate computer-based systems and processes, emphasizing the role that theoretical underpinnings play in computing practice. Graduates will have developed the discipline required for lifelong learning.
- 2. Breadth.** Graduates will demonstrate a broad understanding at both system and component levels through realistic computing experience. These will include current issues, influences, and trends needed to understand the impact of computing solutions in global and societal contexts.
- 3. Professionalism.** To prepare for the complexity of modern work environments, graduates will have established a foundation of responsible teamwork as well as clear communication skills. They will demonstrate project management capabilities, professional attitudes, and a clear understanding of the ethical issues faced by our profession.
- 4. Trouble-shooting.** Through authentic software engineering experiences in the curriculum, graduates will be able to integrate their knowledge and skills to solve real-world problems. They will be capable of insight and judgment, based on experience in debugging and testing, as well as design to meet quality, reliability and performance constraints.
- 5. Community.** Graduates will emerge as part of a professional and educational community, providing support for their own professional

growth and development, as well as providing avenues for professional service in contributing to the growth and development of future computer scientists. Their community experiences will have included pre-college, undergraduate, and graduate students, faculty, practicing computer scientists, and other professionals, providing avenues for building skills in mentoring, communication, and networking, as well as appreciation for diverse perspectives.

- 6. Innovation.** Graduates will possess a comprehensive computer science education from meeting the first five objectives, providing a solid foundation for developing and applying intuition. In addition, graduates will understand the importance of innovation and how it emerges through the excitement of discovery and associated creativity.

Entering students are able to choose one of four different options:

1. Applied Computer Science (BA, BS, HBA, HBS)
2. Computer Systems (BA, BS, HBA, HBS)
3. Information Systems (BA, BS, HBA, HBS)
4. Computer Science Professional Degree (BS, HBS)

For students entering the undergraduate program, the recommended high school preparation is four years of mathematics, science, and English. High school programming or computer applications courses should not be taken in place of other college preparatory courses.

OPTIONS

APPLIED COMPUTER SCIENCE OPTION

Also offered at OSU-Cascades campus.

The Applied Computer Science option is for students who want to combine the study of computer science with an in-depth examination of a field in which computer science plays an important role. This option requires an approved program of study for each student. Students build their own program of study to include their choice of CS electives plus an Applied CS program. The Computer Science Undergraduate Curriculum Committee reviews these programs of study for approval. Existing OSU minors may be proposed for use both as an Applied CS program and as a minor.

Pre-approved Applied CS programs are available in software systems for sustainability and renewable energy; simulation and game programming; and multimedia. Further details can be found on the

EECS website (<http://eecs.oregonstate.edu/undergraduate/advising.html>), which lists the pre-approved Applied CS programs and their requirements.

¹ Must be selected to satisfy the requirements of the baccalaureate core.

COMPUTER SCIENCE DOUBLE DEGREE OPTION

The Computer Science Double Degree option is for students who want to combine a bachelor's degree in computer science with a bachelor's degree in another field. Since computer science is relevant in so many diverse disciplines, students can obtain a computer science degree in combination with virtually any other degree. The program of study includes the core courses in computer science, and also includes courses at the leading edge of computing technologies, software design, web development, and mobile/cloud computing.

All of the courses in the Double Degree option are offered through Ecampus, and most of the courses are also offered on-campus.

Second bachelor's degree in another discipline

Students who choose the Computer Science Double Degree option may pursue a degree in computer science concurrently while earning a second bachelor's degree, or may pursue the computer science degree as a post-baccalaureate degree.

Required Computer Science Courses

CS 161. Introduction to Computer Science I (4)
CS 162. Introduction to Computer Science II (4)
CS 225. Discrete Structures in Computer Science (4) [via Ecampus only]
CS 261. Data Structures (4)

INFORMATION SYSTEMS OPTION

The Information Systems option includes the core classes in computer science, but also incorporates the Business and Entrepreneurship minor. In addition to providing a solid grounding in both fields, this program prepares the student for entry into the one-year MBA program offered by OSU's College of Business. By following both of these programs, a student can complete the BS in Computer Science and the MBA in five years.

ELECTRICAL AND COMPUTER ENGINEERING (BS, CRED, HBS)

EAC/ABET Accredited

The curriculum in electrical and computer engineering provides a wide range of opportunities in undergraduate study in the electrical engineering areas of communications, signal processing and controls, electronics and integrated circuits, power electronics and energy systems, materials and devices, electromagnetism, microwaves and optics, and the computer engineering areas of computer architecture, digital hardware design, and computer networks.

The electrical and computer engineering undergraduate program has the following objectives:

1. Depth. Graduates will be able to identify, formulate, analyze and solve ECE problems by applying fundamental and advanced mathematical, scientific, and engineering knowledge and skills. Modern engineering techniques, skills and tools (hardware and software) will be used, emphasizing

the role that computers play in engineering practice. Graduates will have developed the discipline required for lifelong learning.

2. Breadth. Graduates will demonstrate a broad understanding at both system and component levels through realistic engineering experiences. These will include current issues, influences, and trends needed to understand the impact of ECE solutions in global and societal contexts.

3. Professionalism. To prepare for the complexity of modern work environments, graduates will have established a foundation of responsible teamwork as well as clear communication skills. They will demonstrate project management capabilities, professional attitudes, and a clear understanding of the ethical issues faced by our profession.

4. Trouble-shooting. Through authentic engineering experiences in the curriculum, graduates will be able to integrate their knowledge and skills to solve real-world problems. They will be capable of engineering insight and judgment, based on experience in trouble-shooting as well as design to meet quality, reliability and manufacturing constraints.

5. Community. Graduates will emerge as part of a professional and educational community, providing support for their own professional growth and development, as well as providing avenues for professional service in contributing to the growth and development of future engineers. Their community experiences will have included pre-college, undergraduate, and graduate students, faculty, practicing engineers, and other professionals, providing avenues for building skills in mentoring, communication, and networking, as well as appreciation for diverse perspectives.

6. Innovation. Graduates will possess a comprehensive engineering education from meeting the first five objectives, providing a solid foundation for developing and applying engineering intuition. In addition, graduates will understand the importance of innovation and how it emerges through the excitement of discovery and associated creativity.

The electrical and computer engineering undergraduate program includes a common set of core courses that provides a solid foundation plus a 30-credit non-transcript-visible concentration. The concentrations allow students to prepare for industry, graduate study, or other

career paths, specializing or broadening further their knowledge and skills. The concentrations currently offered are 'Computer and Network,' 'Energy Systems,' 'Integrated Circuits,' 'Systems, Signals and Communications,' 'Materials and Devices,' 'RF/Microwaves and Optoelectronics,' and 'Robotics and Control.'

Restricted electives must be selected from 300- or 400-level College of Engineering or College of Science courses (but not baccalaureate core perspective or synthesis courses), and ENGR 211, ENGR 212, ENGR 213 (if not required). Restricted electives *must* have technical prerequisites. Except as approved by the ECE curriculum committee, all concentrations will include a minimum of 16 credits of additional 300- or 400-level ECE courses.

The ECE curriculum has been designed to meet the following minimum requirements, which still must be met if specific courses are waived:

- Mathematics and basic sciences: 45 credits
- Engineering science and design: 67.5 credits
- Upper-division courses: 60 credits

Non-MECOP Sample Program for ECE Majors

Pre-Professional Electrical and Computer Engineering Curriculum

Freshman Year (46–49)

CH 201. Chemistry for Engineering Majors (3)^E

or CH 231. *General Chemistry (4) *and* CH 261. *Laboratory for Chemistry 231 (1)^E

CS 161. Introduction to Computer Science I (4)⁵

or ECE 152. Introduction to Programming II with Embedded Control Lab (4)⁵

ECE 111. Introduction to ECE: Tools (3)

ECE 112. Introduction to ECE: Concepts (3)^E

ECE 271. Digital Logic Design (3)⁵

ECE 272. Digital Logic Design Laboratory (1)⁵

HHS 231. *Lifetime Fitness for Health (2)¹

HHS 241–HHS 248. *Lifetime Fitness: (various activities) (1)¹

or any PAC course (1–2)

MTH 231. Elements of Discrete Mathematics (4)⁵

MTH 251. *Differential Calculus (4)^E

MTH 252. Integral Calculus (4)^E

MTH 254. Vector Calculus I (4)^E

PH 211. *General Physics with Calculus (4)^E

WR 121. *English Composition (3)^E

Perspectives course (3)¹

Sophomore Year (44)

COMM 111. *Public Speaking (3)^E

or COMM 114. *Argument and Critical Discourse (3)^E

CS 162. Introduction to Computer Science II (4)⁵

CS 261. Data Structures (4)⁵

ENGR 201. Electrical Fundamentals I (3)^E

ENGR 202. Electrical Fundamentals II (3)^E

ENGR 203. Electrical Fundamentals III (3)⁵

MTH 255. Vector Calculus II (4)

MTH 256. Applied Differential Equations (4)^E

MTH 306. Matrix and Power Series Methods (4)^E

PH 212. *General Physics with Calculus (4)^E

PH 213. *General Physics with Calculus (4)^E

WR 327. *Technical Writing (3)

Elective (1)

Professional Electrical and Computer Engineering Curriculum

Junior Year (45–46)

ECE 322. Electronics I (4)

ECE 323. Electronics II (4)

ECE 351. Signals and Systems I (3)

ECE 352. Signals and Systems II (4)

ECE 353. Introduction to Probability and Random Signals (3)

ECE 391. Transmission Lines (3)⁶

or ECE/CS 372. Introduction to Computer Networks (4)⁶

ECE 375. Computer Organization and Assembly Language Programming (4)

ENGR 391. Engineering Economics and Project Management (3)

Biological Science course with lab (4)¹

Perspectives courses (6)¹

Concentration-Specific courses (7)

Senior Year (46–47)

ECE 391. Transmission Lines (3)⁶

or ECE/CS 372. Introduction to Computer Networks (4)⁶

ECE 441, ECE 442, ECE 443. ^Engineering Design Project (3,3,2)

Difference, Power and Discrimination course (3)¹

Perspectives course (3)¹

Concentration-Specific courses (23)

Contemporary Global Issues course (3)¹

CS 391. *Social and Ethical Issues in Computer Science (3)

Total=180

Footnotes:

* Baccalaureate Core Course

^ Writing Intensive Core Course (WIC)

^E Required for entry into the professional program.

¹ Must be selected to satisfy the requirements of the baccalaureate core.

⁵ Prerequisite for required upper-division courses. Recommended for completion prior to entry into the professional engineering program.

⁶ Which of these courses a student takes in which academic year depends on their chosen concentration.

COMPUTER SCIENCE MINOR

Computing has become pervasive, touching nearly every aspect of our lives. A minor in Computer Science can open up opportunities for employment in the software development industry, but also in many areas including healthcare, business, science, medicine, graphics, utilities and education. Courses will teach theory, problem-solving skills, and to program.

Computer Science Minor

Requirements (36 credits total)

To earn the minor upon graduation, students must meet all of the following:

1. Earn a C in each of their minor courses (all courses must be taken A–F grading)
2. Have a minimum 2.25 GPA in all required minor course work (36 credits)

Lower-Division Computer Science Minor Requirements (20 credits)

CS 161. Introduction to Computer Science I (4)

CS 162. Introduction to Computer Science II (4)

CS 261. Data Structures (4)

CS 271. Computer Architecture and Assembly Language (4)¹

MTH 231. Elements of Discrete Mathematics (4)

or CS 225. Discrete Structures in Computer Science (4)

Students may declare the Computer Science minor after completing the lower-division required courses with a GPA of 2.25 or higher and after becoming eligible to take 300-level courses in their major. Please speak with an EECs advisor to declare the minor.

Upper-Division Computer Science Minor Requirements (16 credits)^{2, 3}

CS 362. Software Engineering II (4)

Recommended elective courses might include (but not limited to) (12 credits):

CS 344. Operating Systems (4) [*Pending approval*]

CS 352. Introduction to Usability Engineering (4)

CS 361. ^Software Engineering I (4)

CS 440. Database Management Systems (4)

CS 475. Introduction to Parallel Computing (4)

CS 496. Mobile and Cloud Software Development (4)

Other upper-division courses are acceptable; please speak with an advisor about which courses might create the best path for your goals.

Courses that cannot be used for minor requirements:

CS 391. *Social and Ethical Issues in Computer Science (3)

CS 395. Interactive Multimedia (4)

CS 401. Research (1–16)

CS 405. Reading and Conference (1–16)

CS 407. Seminar (1–16)

CS 410. Occupational Internship (1–16)

CS 461. Senior Software Engineering Project (3)

or CS 462. Senior Software Engineering Project (3)

or CS 463. Senior Software Engineering Project (2)

CS 494. Web Development (4)

CS 495. Interactive Multimedia Projects (4)

Footnotes:

¹ Electrical and Computer Engineering (ECE) students who wish to minor in Computer Science must take ECE 271 (3) and ECE 272 (1), instead of CS 271.

² Electrical and Computer Engineering (ECE) students will take ECE 375. Computer Organization and Assembly Language Programming (4) and CS/ECE 372. Introduction to Computer Networks (4) plus 4 credits of upper-division computer science courses.

³ Electrical and Computer Engineering (ECE) students can take the following courses that will count both as an ECE restrictive elective for the ECE major and as well as towards the CS minor: CS 344 [Pending approval], CS 325, CS 331, CS 444 [Pending approval], CS 434, CS 450, CS/ECE 472, CS/ECE 476

* Baccalaureate Core Course

^ Writing Intensive Course

GRADUATE MAJORS

COMPUTER SCIENCE (MA, MEng, MS, PhD, MAIS)

Graduate Areas of Concentration
Algorithms and cryptography; artificial intelligence and machine learning; computer systems and networking; human-computer interaction; programming languages; software engineering

See EECS website for complete information: <http://eecs.oregonstate.edu/> research.

The master's program provides advanced instruction beyond the undergraduate degree. It prepares students for careers in which a higher level of experience is required. The PhD program prepares students for work in government or industry research laboratories or industry research laboratories or for careers at universities.

Additional areas of concentration may be arranged with other departments. For example, numerical analysis or computer algebra with the Department of Mathematics.

For additional information, contact Nicole Thompson, Graduate Coordinator, School of EECS, OSU, Corvallis, OR 97331-5501, 541-737-7234, email: eecs.gradinfo@oregonstate.edu. Additional information concerning courses, advising, procedures, faculty and many other aspects of the program may be found in the school's website at <http://eecs.oregonstate.edu/>.

ELECTRICAL AND COMPUTER ENGINEERING (MEng, MS, PhD)

Graduate Areas of Concentration
Analog and mixed signal; artificial intelligence and machine learning; communications and signal processing; computer systems; energy systems; materials and devices; RF/microwaves

See EECS website for complete information: <http://eecs.oregonstate.edu/> research.

The School of Electrical and Computer Engineering offers graduate programs leading to Master of Engineering, Master of Science, and Doctor of Philosophy degrees focusing on the major areas listed below. The master's program provides advanced instruction beyond the undergraduate degree. It prepares students for careers in which a higher level of experience is required. The Master of Engineer-

ing degree is a course work-only degree with no required thesis or project report. The PhD program prepares students for work in government or industry research laboratories or careers at universities. Students are encouraged to develop programs of study in close cooperation with the faculty members in their areas of interest.

Graduate work is supported by the school's well-equipped laboratory facilities. Opportunities exist for graduate students to participate in many research projects sponsored by private industry and government agencies.

For more information, contact Nicole Thompson, Graduate Coordinator, School of Electrical Engineering and Computer Science, OSU, Corvallis, OR 97331-5501; 541-737-7234; email: eecs.gradinfo@oregonstate.edu.

Additional information concerning courses, advising procedures, faculty, and many other aspects of the school may be found in the school's website at <http://eecs.oregonstate.edu/>.

COMPUTER SCIENCE GRADUATE MINOR

For more details, see the school advisor.

ELECTRICAL AND COMPUTER ENGINEERING GRADUATE MINOR

For more details, see the school advisor.

COMPUTER SCIENCES COURSES

CS 101. COMPUTERS: APPLICATIONS AND IMPLICATIONS (4). The varieties of computer hardware and software. The effects, positive and negative, of computers on human lives. Ethical implications of information technology. Hands-on experience with a variety of computer applications. Lec/lab.

CS 151. INTRODUCTION TO PROGRAMMING I WITH EMBEDDED CONTROL LAB (4). Thorough treatment of the basic elements of C, bitwise operations, flow of control, input/output, functions, arrays, strings, and structures. Lec/lab. CROSSLISTED as ECE 151. **PREREQS:** (MTH 111 or MTH 112 or (MTH 251 or MTH 251H)) or Placement Test

CS 160. COMPUTER SCIENCE ORIENTATION (3). Introduction to the computer science field and profession. Team problem solving. Introduction to writing computer programs. Lec/lab. **PREREQS:** Wireless laptop required.

CS 161. INTRODUCTION TO COMPUTER SCIENCE I (4). Overview of fundamental concepts of computer science. Introduction to problem solving, software engineering, and object-oriented programming. Includes algorithm design and program development. Lec/lab. **PREREQS:** MTH 112* or Placement Test or Placement Test and for CS Double Degree students: BA/BS and (MTH 111 or MPT>=24 or MPAL>=061)

CS 162. INTRODUCTION TO COMPUTER SCIENCE II (4). Basic data structures. Computer programming techniques and application of software engineering principles. Introduction to analysis of programs. Lec/lab. **PREREQS:** (CS 161 and (MTH 231* or CS 225*))

CS 165. ACCELERATED INTRODUCTION TO COMPUTER SCIENCE (8). Overview of the fundamental concepts of computer science.

Introduction to problem solving, algorithm development, data types, and basic data structures. Introduction to analysis of algorithms and principles of software engineering. System development and computer programming using procedural/object-oriented paradigms. (Note: Students may take either the CS 161/162 sequence or CS 165, but cannot receive credit for both.) Offered via Ecampus only. **PREREQS:** (MTH 111 or Placement Test) or Placement Test and (CS 225* or MTH 231*) and Ecampus students must have a BA or BS.

CS 195. INTRODUCTION TO WEB AUTHORING (4). Techniques and tools for designing and publishing on the World Wide Web; hypertext and HTML; site and page design; media integration; issues raised by Internet publishing. **PREREQS:** CS 101 or equivalent.

CS 199. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

CS 225. DISCRETE STRUCTURES IN COMPUTER SCIENCE (4). An introduction to the discrete mathematics of computer science, including logic, set and set operations, methods of proof, recursive definitions, combinatorics, and graph theory. (Note: Students may take either MTH 231 or CS 225, but cannot receive credit for both.) **PREREQS:** MTH 111 or Placement Test or Placement Test or MTH 112* and for CS Double Degree students: BA/BS and (MTH 111 or MPT>=24 or MPAL>=61)

CS 261. DATA STRUCTURES (4). Abstract data types, dynamic arrays, linked lists, trees and graphs, binary search trees, hash tables, storage management, complexity analysis of data structures. Lec/rec. **PREREQS:** (CS 162 or CS 165 or EECS 162) and (CS 225 or MTH 231)

CS 262. PROGRAMMING PROJECTS IN C++ (4). Learning a second computer programming language. Elements of C++. Object-oriented programming. Experience team work on a large programming project. **PREREQS:** CS 261

CS 271. COMPUTER ARCHITECTURE AND ASSEMBLY LANGUAGE (4). Introduction to functional organization and operation of digital computers. Coverage of assembly language; addressing, stacks, argument passing, arithmetic operations, decisions, macros, modularization, linkers and debuggers. **PREREQS:** (CS 151 or CS 161 or CS 165 or ECE 151)

CS 275. INTRODUCTION TO DATABASES (4). Design and implementation of relational databases, including data modeling with ER or UML diagrams, relational schema, SQL queries, relational algebra, user interfaces, and administration. **PREREQS:** (CS 162 or CS 165 or ECE 152)

CS 295. INTERMEDIATE WEB AUTHORING (4). Designing, developing, publishing, and maintaining dynamic websites; Web security and privacy issues; emerging Web technologies. **PREREQS:** CS 195 or equivalent (i.e., basic HTML and CSS)

CS 312. LINUX SYSTEM ADMINISTRATION (4). Introduction to LINUX system administration. Network administration and routing. Internet services. Security issues. **PREREQS:** CS 311 or CS 344 and /or instructor approval.

CS 321. INTRODUCTION TO THE THEORY OF COMPUTATION (3). Survey of models of computation including finite automata, formal grammars, and Turing machines. **PREREQS:** (CS 261 and MTH 232)

CS 321H. INTRODUCTION TO THEORY OF COMPUTATION (3). Survey of models of computation including finite automata, formal grammars, and Turing machines. **PREREQS:** (CS 261 and MTH 232) and Honors College approval required.

CS 325. ANALYSIS OF ALGORITHMS (4). Recurrence relations, combinatorics, recursive algorithms, proofs of correctness. **PREREQS:** (CS 261 and (MTH 232 or CS 225))

CS 325H. ANALYSIS OF ALGORITHMS (4). Recurrence relations, combinatorics, recursive algorithms, proofs of correctness. **PREREQS:** (CS 261 and (MTH 232 or CS 225)) and Honors College approval required.

CS 331. INTRODUCTION TO ARTIFICIAL INTELLIGENCE (4). Fundamental concepts in artificial intelligence using the unifying theme of an intelligent agent. Topics include agent architectures, search, games, logic and reasoning, and Bayesian networks. **PREREQS:** (CS 325 or CS 325H)

CS 352. INTRODUCTION TO USABILITY ENGINEERING (4). Basic principles of usability engineering methods for the design and evaluation of software systems. Includes the study of human-machine interactions, user interface characteristics and design strategies, software evaluation methods, and related guidelines and standards. **PREREQS:** (CS 151 or CS 161 or CS 165 or CS 295 or ECE 151)

CS 361. ^SOFTWARE ENGINEERING I (4). Introduction to the “front end” of the software engineering lifecycle; requirements analysis and specification; design techniques; project management. (Writing Intensive Course)

CS 362. SOFTWARE ENGINEERING II (4). Introduction to the «back end» of the software engineering lifecycle implementation; verification and validation; debugging; maintenance. **PREREQS:** CS 261 and Experience with object-oriented programming and data structures (e.g. CS 161, CS 162, CS 261). CS 361 is recommended but not required.

CS 372. INTRODUCTION TO COMPUTER NETWORKS (4). Computer network principles, fundamental networking concepts, packet-switching and circuit switching, TCP/IP protocol layers, reliable data transfer, congestion control, flow control, packet forwarding and routing, MAC addressing, multiple access techniques. Lec. **CROSSLISTED** as ECE 372. **PREREQS:** CS 261 and (ECE 271 or CS 271) and C programming and Unix familiarity.

CS 381. PROGRAMMING LANGUAGE FUNDAMENTALS (4). An introduction to the concepts found in a variety of programming languages. Programming languages as tools for problem solving. A brief introduction to languages from a number of different paradigms. **PREREQS:** (CS 261 and MTH 232)

CS 391. *SOCIAL AND ETHICAL ISSUES IN COMPUTER SCIENCE (3). In-depth exploration of the social, psychological, political, and ethical issues surrounding the computer industry and the evolving information society. (Bacc Core Course) **PREREQS:** CS 101 or computer literacy.

CS 391H. *SOCIAL AND ETHICAL ISSUES IN COMPUTER SCIENCE (3). In-depth exploration of the social, psychological, political, and ethical issues surrounding the computer industry and the evolving information society. (Bacc Core Course) **PREREQS:** CS 101 or computer literacy and Honors College approval required.

CS 395. INTERACTIVE MULTIMEDIA (4). Technological, aesthetic, and pedagogical issues of communication using interactive multimedia and hypermedia; techniques for authoring interactive multimedia projects using a variety of digital media tools. **PREREQS:** ART 120 and CS 101

CS 401. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CS 403. THESIS (1-16). **PREREQS:** Departmental approval required.

CS 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of

16 credits. **PREREQS:** Departmental approval required.

CS 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CS 407. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

CS 407H. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

CS 410. OCCUPATIONAL INTERNSHIP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CS 419. SELECTED TOPICS IN COMPUTER SCIENCE (1-5). Topics of special and current interest not covered in other courses. This course is repeatable for a maximum of 99 credits. **PREREQS:** Varies by class offering, senior standing in computer science.

CS 419H. SELECTED TOPICS IN COMPUTER SCIENCE (1-5). Topics of special and current interest not covered in other courses. This course is repeatable for a maximum of 99 credits. **PREREQS:** Varies by class offering, senior standing in computer science. Honors College approval required.

CS 420. GRAPH THEORY WITH APPLICATIONS TO COMPUTER SCIENCE (3). Directed and undirected graphs; paths, circuits, trees, coloring, planar graphs, partitioning; computer representation of graphs and graph algorithms; applications in software complexity metrics, program testing, and compiling. **PREREQS:** (CS 325 or CS 325H) and MTH 232

CS 434. MACHINE LEARNING AND DATA MINING (4). Introduction to machine learning and data mining algorithms (supervised learning, unsupervised learning, and reinforcement learning) tools that are widely employed in industrial and research settings. **PREREQS:** (CS 325 or CS 325H)

CS 440. DATABASE MANAGEMENT SYSTEMS (4). Relational database design, normalization, file structures, disk storage, query processing and optimization, team development of database applications. **PREREQS:** CS 261 and CS 275

CS 450. INTRODUCTION TO COMPUTER GRAPHICS (4). 2-D and 3-D graphics APIs. Modeling transformations. Viewing specification and transformations. Projections. Shading. Texture mapping. Traditional animation concepts. 3-D production pipeline. Keyframing and kinematics. Procedural animation. **PREREQS:** (CS 261 and (MTH 306 or MTH 306H or MTH 341))

CS 461. SENIOR SOFTWARE ENGINEERING PROJECT (3). Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. Three-term sequence required. **PREREQS:** CS 361

CS 462. SENIOR SOFTWARE ENGINEERING PROJECT (3). Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. Three-term sequence required. **PREREQS:** (CS 362 and CS 461)

CS 463. SENIOR SOFTWARE ENGINEERING PROJECT (2). Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality

assurance, documentation, and delivery. Three-term sequence required. **PREREQS:** CS 462

CS 466. WEB-BASED START-UP PROJECT (4). Real-world, hands-on learning in a high-tech web/mobile-based company environment. Research in the development of product ideas, hypotheses, and business models to create customer experiments. Prototyping and statistical analysis to develop, optimize, and evaluate solutions. Rapid iteration/refactoring based on customer input, web analytics, and user engagement metrics. Offered at OSU-Cascades only. **COREQS:** CS 461

CS 472. COMPUTER ARCHITECTURE (4). Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. **CROSSLISTED** as ECE 472/ECE 572. **PREREQS:** ECE 375

CS 475. INTRODUCTION TO PARALLEL COMPUTING (4). Theoretical and practical survey of parallel processing, including a discussion of parallel architectures, parallel programming language, and parallel algorithms. Programming one or more parallel computers in a higher-level parallel language. **PREREQS:** (CS 325 or CS 325H)

CS 476. ADVANCED COMPUTER NETWORKING (4). Advanced networking concepts: congestion control and avoidance, multimedia and QoS, queueing theory, buffer management, scheduling and fairness policies, wireless and mobile networks, service models, network security. **CROSSLISTED** as ECE 476/ECE 576. **PREREQS:** (CS 372 or ECE 372)

CS 480. TRANSLATORS (4). An introduction to compilers; attribute grammars, syntax-directed translation, lex, yacc, LR(1) parsers, symbol tables, semantic analysis, and peep-hole optimization. **PREREQS:** (CS 311 or CS 344) and CS 321)

CS 491. COMPUTER SCIENCE SKILLS FOR SIMULATION AND GAME PROGRAMMING (4). Game and simulation development is very much a data and math-intensive activity. A certain number of actions must be produced, and producing them by hand is hard. This is a middleware CS course that fills in many of the missing pieces for those wanting to enter the simulation and game development worlds in a software tool-building capacity. **PREREQS:** CS 261 and MTH 232 and MTH 251 and MTH 252

CS 494. WEB DEVELOPMENT (4). Techniques and tools for designing developing, publishing, and maintaining dynamic websites on the World Wide Web. Hypertext/HTML, scripting, media integration, emerging web technologies. Web security and issues raised by Internet publishing. **PREREQS:** CS 101 or equivalent. Computer literacy required.

CS 495. INTERACTIVE MULTIMEDIA PROJECTS (4). Students apply principles and procedures of digital art, design, communication, and software authoring while working on large integrated media projects. **PREREQS:** CS 395

CS 496. MOBILE AND CLOUD SOFTWARE DEVELOPMENT (4). Introduction to the concepts and techniques for developing mobile and cloud applications. **PREREQS:** CS 311 or CS 344 and students need a working knowledge of at least one operating system in order to be successful in developing mobile and cloud software.

CS 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

CS 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 99 credits. **PREREQS:** Departmental approval required.

CS 503. CS MS THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Instructor's consent required.

CS 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 20 credits. **PREREQS:** Departmental approval required.

CS 506. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 99 credits. **PREREQS:** Departmental approval required.

CS 507. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Graduate standing.

CS 515. ALGORITHMS AND DATA STRUCTURES (4). Greedy algorithms, divide and conquer, dynamic programming, network flow, data structures. **PREREQS:** Graduate standing in computer science and an undergraduate course in algorithms.

CS 516. THEORY OF COMPUTATION AND FORMAL LANGUAGES (4). Models of computation. Universal machines. Unsolvable problems. Nondeterministic computation. Chomsky hierarchy: regular, context-free, context-sensitive and unrestricted grammars; characterization, closure properties, algorithms, and limitations. **PREREQS:** Graduate standing in computer science.

CS 517. THEORY OF COMPUTATION (4). Turing machines, decidability, NP-completeness, complexity classes, randomized computation, relativization, circuit complexity, interactive proof systems, lower bounds, cryptography. **PREREQS:** Graduate standing in computer science.

CS 519. TOPICS IN COMPUTER SCIENCE (1-5). Topics of special and current interest not covered in other courses. May not be offered every year. This course is repeatable for a maximum of 99 credits. **PREREQS:** Varies by class offering.

CS 520. GRAPH THEORY WITH APPLICATIONS TO COMPUTER SCIENCE (3). Directed and undirected graphs; paths, circuits, trees, coloring, planar graphs, partitioning; computer representation of graphs and graph algorithms; applications in software complexity metrics, program testing, and compiling. **PREREQS:** CS 325 and MTH 232

CS 521. COMPUTABILITY (4). Recursive functions. Turing machines. Undecidability. Relativized computation. Complexity classes. **PREREQS:** CS 516

CS 523. ADVANCED ALGORITHMS (4). Approximation algorithms, randomized and probabilistic algorithms, online algorithms. **PREREQS:** CS 515

CS 524. NP-COMPLETE AND HARDER PROBLEMS (4). Complexity classes and reducibilities. NP-Complete problems, proof techniques, and heuristics, approximation algorithms. Provably hard problems. Hierarchies. **PREREQS:** CS 523

CS 527. ERROR-CORRECTING CODES (4). Hamming codes, linear codes, cyclic codes, BCH and Reed-Solomon codes. Introduction to Galois fields. Encoding and decoding algorithms. Burst error correcting codes, asymmetric and unidirectional codes. Applications of codes for computer systems. **PREREQS:** Discrete math and probability

CS 529. SELECTED TOPICS IN THEORETICAL COMPUTER SCIENCE (1-5). Topics of interest in algorithms and theory of computation. Topics include approximation algorithms, planar graph algorithms, distributed algorithms, combinatorial optimization, computational geometry. This course is repeatable for a maximum of 99 credits. **PREREQS:** CS 515

CS 531. ARTIFICIAL INTELLIGENCE (4). Intelligent agents. Problem-solving as heuristic search. Adversarial search. Constraint satisfaction methods; Arc-consistency. Knowledge representation and reasoning. Propositional logic. Reasoning with propositional logic: algorithms for satisfiability. First-order logic. Proof theory, model

theory, resolution refutation, forward and backward chaining, representing events and actions. Lec/lab. **PREREQS:** Graduate standing in computer science.

CS 532. ADVANCED ARTIFICIAL INTELLIGENCE (4). Knowledge representation, reasoning, and learning with relational and first-order representations. First-order logic: proof theory, model theory, resolution refutation, Prolog-style resolution. Inductive logic programming. Complex belief networks: Hidden Markov models, Viterbi algorithm, Forward-backward algorithm. Learning HMMs with EM. Probabilistic relational models: exact and stochastic inference algorithms. Learning methods for probabilistic relational models. **PREREQS:** CS 531

CS 533. INTELLIGENT AGENTS AND DECISION MAKING (4). Representations of agents, execution architectures. Planning: non-linear planning, graphplan, SATplan. Scheduling and resource management. Probabilistic agents. Dynamic belief networks. Dynamic programming (value iteration and policy iteration). Reinforcement learning: Prioritized sweeping, Q learning, value function approximation and SARSA (lambda), policy gradient methods. **PREREQS:** CS 531

CS 534. MACHINE LEARNING (4). Continuous representations. Bias-variance tradeoff. Computational learning theory. Gaussian probabilistic models. Linear discriminants. Support vector machines. Neural networks. Ensemble methods. Feature extraction and dimensionality reduction methods. Factor analysis. Principle component analysis. Independent component analysis. Cost-sensitive learning. **PREREQS:** Graduate standing.

CS 535. CYBERNETICS (4). Control and communication organisms and machines; neural nets, cellular automata, L-systems, genetic algorithms. **PREREQS:** Graduate standing.

CS 536. PROBABILISTIC GRAPHICAL MODELS (4). Representation of probabilistic graphical models, both directed (Bayesian networks) and undirected (Markov networks). Exact and approximate inference techniques. Parameter and structure learning from data. **PREREQS:** Graduate standing with strong programming skills.

CS 539. SELECTED TOPICS IN ARTIFICIAL INTELLIGENCE (1-5). Advanced topics in artificial intelligence. Typical topics include machine learning for sequential and spatial data, knowledge representation and inference, probabilistic modeling of complex systems, data mining and information extraction. This course is repeatable for a maximum of 12 credits. **PREREQS:** Instructor's approval required.

CS 540. DATABASE MANAGEMENT SYSTEMS (4). Purpose of database systems, levels of data representation. Entity-relationship model. Relational systems: data definition, data manipulation, query language (SQL), relational calculus and algebra, data dependencies and normal forms. DBTG network model. Query optimization, recovery, concurrency control. **PREREQS:** CS 261 or graduate standing in computer science.

CS 549. SELECTED TOPICS IN INFORMATION-BASED SYSTEMS (1-5). Current topics in information-based systems, e.g. information management for CAD, geographical information systems, distributed information systems, data models for complex applications. This course is repeatable for a maximum of 99 credits. **PREREQS:** CS 540

CS 550. INTRODUCTION TO COMPUTER GRAPHICS (4). 2-D and 3-D graphics APIs. Modeling transformations. Viewing specification and transformations. Projections. Shading. Texture mapping. Traditional animation concepts. 3-D production pipeline. Keyframing and kinematics. Procedural animation. **PREREQS:** CS 261 and (MTH 306 or MTH 306H or MTH 341)

CS 551. COMPUTER GRAPHICS (4). 3-D graphics hardware: Line and polygon scan conversion, modeling transformations, viewing transformations, matrix stacks, hierarchical models, perspective and orthographic projections, visible surface determination, illumination models, shading models, texture mapping, ray tracing. **PREREQS:** CS 450 or CS 550

CS 552. COMPUTER ANIMATION (4). Traditional animation concepts: production pipeline, keyframing implementation, interpolation, point-mass dynamics, spring-mass systems, rigid body dynamics, forward and inverse kinematics, human motion control, motion capture. **PREREQS:** CS 551

CS 553. SCIENTIFIC VISUALIZATION (4). Open GLUT, GLUT, and GLUT graphics APIs; hyperbolic projections; mapping scalar values to a variety of color spaces; color gamuts; data visualization using range sliders; scalar visualization; vector visualization; chromaDepth; interpolating splines; Delauney triangulation; magic lenses; volume visualization; texture mapping; terrain mapping; performance graphics programming. **PREREQS:** Prior experience with Unix or Windows, programming experience.

CS 554. GEOMETRIC MODELING IN COMPUTER GRAPHICS (4). Advanced topics in computer graphics focusing on representation and processing of polygonal models and their application. Surface fundamentals; discrete differential geometry and topology; data structures for representing 3-D surfaces; surface subdivision and smoothing; mesh simplification and multi-resolution representation of 3-D surfaces; geometry compression; surface parameterization; geometry remeshing; topological simplification; implicit surfaces. **PREREQS:** CS 450

CS 555. SIGNAL AND IMAGE PROCESSING (4). Fundamental aspects of signal and image processing including image acquisition and display, histograms, level-set and geometric operations, convolutions, Fourier transform, image filtering, sampling theory, image transforms, human vision, color, morphological operations, and image compression. **PREREQS:** Graduate standing and knowledge of C/C++.

CS 556. COMPUTER VISION (4). Algorithm development for automatic interpretation of the three-dimensional world that is captured in a set of images; cameras and image formation; color; keypoint and edge detection; perceptual grouping; segmentation; shape representation; texture; object recognition; optical flow; motion estimation and tracking; and 3-D scene reconstruction from motion and stereo. **PREREQS:** Basic statistics, probability, calculus, linear algebra, good programming skills, machine learning or AI (recommended).

CS 559. SELECTED TOPICS IN COMPUTER GRAPHICS AND VISION (1-5). Advanced topics in graphics, animation, and vision. Topics include distribution ray tracing, global-illumination, radiosity, image-based modeling and rendering, vision-assisted image and video editing, 3-D vision, 3-D virtual environments, 3-D interaction, control for physical simulation, motion graphs, computational geometry, etc. This course is repeatable for a maximum of 12 credits. **PREREQS:** Instructor approval and graduate standing.

CS 561. SOFTWARE ENGINEERING (4). Utilize software engineering methodology in a team environment to develop a real-world application. Teams will be responsible for all phases of software development, including project planning, requirements analysis, design, coding, testing, configuration management, quality assurance, documentation, and delivery. Two-term sequence required. **PREREQS:** CS 362

CS 562. APPLIED SOFTWARE ENGINEERING (4). Application of software engineering methodology to the development of a complete software system. **PREREQS:** CS 561

CS 569. SELECTED TOPICS IN SOFTWARE ENGINEERING (1-5). Topics include new programming methodologies, productivity, software development, software complexity metrics. This course is repeatable for a maximum of 99 credits. **PREREQS:** CS 561

CS 570. HIGH PERFORMANCE COMPUTER ARCHITECTURE (4). Advanced concepts in computer architecture. Performance improvement employing advanced pipelining and multiple instruction scheduling techniques. Issues in memory hierarchy and management. **CROSSLISTED** as ECE 570. **PREREQS:** ECE 472 or ECE 572

CS 572. COMPUTER ARCHITECTURE (4). Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. **CROSSLISTED** as ECE 472/ECE 572. **PREREQS:** ECE 375

CS 575. INTRODUCTION TO PARALLEL COMPUTING (4). Theoretical and practical survey of parallel processing, including a discussion of parallel architecture, parallel programming language, and parallel algorithms. Programming one or more parallel computers in a higher-level parallel language. **PREREQS:** CS 325

CS 576. ADVANCED COMPUTER NETWORKING (4). Advanced networking concepts: congestion control and avoidance, multimedia and QoS, queuing theory, buffer management, scheduling and fairness policies, wireless and mobile networks, service models, network security. **CROSSLISTED** as ECE 476/ECE 576. **PREREQS:** CS 372 or ECE 372

CS 579. TOPICS IN COMPUTER ARCHITECTURE AND PARALLEL PROCESSING (1-5). Current topics in advanced computer architecture and parallel processing. This course is repeatable for a maximum of 99 credits. **PREREQS:** CS 575 or CS 572 or ECE 572

CS 581. PROGRAMMING LANGUAGES (4). A study of the concepts of modern programming and paradigms. **PREREQS:** CS 381

CS 582. OBJECT-ORIENTED ANALYSIS AND PROGRAMMING (4). Introduction to the elements of object-oriented analysis, design and programming techniques. Topics are introduced in a programming language-independent fashion. Topics covered include object-oriented design, classes, methods, inheritance, software reuse.

CS 583. FUNCTIONAL PROGRAMMING (4). Introduction to advanced features of modern functional programming languages and to advanced functional programming techniques. Topics to be covered include monads, type and constructor classes, functional/persistent data structures, advanced topics in type systems, program analysis techniques, program transformation. **PREREQS:** CS 581

CS 584. HUMAN FACTORS PROGRAMMING LANGUAGES (4). Principles and evaluation methods for designing and evaluating programming languages to emphasize human productivity. Overall goals are (a) to enable students to understand and apply these principles and methods, and (b) to introduce at least four programming languages that aim specifically at supporting human problem solving. **PREREQS:** Graduate standing in computer science or instructor approval required.

CS 589. SELECTED TOPICS IN PROGRAMMING LANGUAGES (1-5). An in-depth examination of a specific topic of interest in programming language design and implementation. Example topics include object-oriented programming, parallel programming, compiler optimization, programming language semantics. This course is repeatable for a maximum of 99 credits.

CS 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

CS 601. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 99 credits. **PREREQS:** Departmental approval required.

CS 603. CS PhD THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Instructor's consent required.

CS 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CS 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

■ ELECTRICAL AND COMPUTER ENGINEERING COURSES

ECE 111. INTRODUCTION TO ECE: TOOLS (3). Introduction to the electrical and computer engineering professional practice. Covers the foundations of engineering problem solving and other skills necessary for success. Students will be taught engineering practice through hands-on approaches. Recommended for electrical and computer engineering majors, and for those interested in engineering as a profession. Lec/lab. Has extra fees. **PREREQS:** MTH 111 recommended (concurrent OK if needed)

ECE 112. INTRODUCTION TO ECE: CONCEPTS (3). Basic electrical and computer engineering concepts, problem solving and hands-on laboratory project. Topics include electronic circuit and device models, digital logic, circuit analysis, and simulation tools. Lec/lab. Has extra fees. **PREREQS:** (MTH 111 or MTH 112 or MTH 251 or MTH 251H) or Placement Test

ECE 151. INTRODUCTION TO PROGRAMMING I WITH EMBEDDED CONTROL LAB (4). Thorough treatment of the basic elements of C, bitwise operations, flow of control, input/output, functions, arrays, strings, and structures. Lec/lab. **CROSSLISTED** as CS 151. **PREREQS:** (MTH 111 or MTH 112 or MTH 251 or MTH 251H) or Placement Test

ECE 152. INTRODUCTION TO PROGRAMMING II WITH EMBEDDED CONTROL LAB (4). Control using microcontrollers with the C language. Interfacing to PCs using on Object Oriented Programming language. Lec/lab. **PREREQS:** ((ECE 151 or CS 151) and MTH 231*)

ECE 199. SPECIAL STUDIES (1-16). One-credit section. Graded P/N. This course is repeatable for a maximum of 16 credits.

ECE 271. DIGITAL LOGIC DESIGN (3). A first course in digital logic design. Data types and representations, Boolean algebra, state machines, simplification of switching expressions, and introductory computer arithmetic. Lec/rec. **PREREQS:** (MTH 251* or MTH 251H* or MTH 231*)

ECE 272. DIGITAL LOGIC DESIGN LABORATORY (1). Laboratory to accompany ECE 271, Digital Logic Design. Illustrates topics covered in the lectures of ECE 271 using computer-aided design, verification tools, and prototyping hardware. Lec/lab. **PREREQS:** ((ECE 112 or ENGR 201) and ECE 271*)

ECE 322. ELECTRONICS I (4). Fundamental device characteristics including diodes, MOSFETs and bipolar transistors; small- and large-signal characteristics and design of linear circuits. Lec/lab. **PREREQS:** ENGR 203

ECE 323. ELECTRONICS II (4). Transient operation of MOSFETs and bipolar transistors; multistage amplifiers; frequency response; feedback and stability. Lec/lab. **PREREQS:** ECE 322

ECE 331. ELECTROMECHANICAL ENERGY CONVERSION (4). Voltage generation and energy conversion principles for electric motors. Steady-

state characteristics of induction, synchronous and direct machines. Magnetic circuits. Lec/lab. **PREREQS:** ((ENGR 202 or ENGR 202H) and ECE 390) and (ENGR 211 or ENGR 211H)

ECE 351. SIGNALS AND SYSTEMS I (3). Analytical techniques for continuous-time and discrete-time signal, system, and circuit analysis. Lec. **PREREQS:** (ENGR 203 and (MTH 256 or MTH 256H))

ECE 352. SIGNALS AND SYSTEMS II (4). Analytical techniques for continuous-time and discrete-time signal, system, and circuit analysis. Lec/lab. **PREREQS:** (ECE 351 and (MTH 306 or MTH 306H))

ECE 353. INTRODUCTION TO PROBABILITY AND RANDOM SIGNALS (3). Introductory discrete and continuous probability concepts, single and multiple random variable distributions, expectation, introductory stochastic processes, correlation and power spectral density properties of random signals, random signals through linear filters. Lec. **PREREQS:** ((MTH 254 or MTH 254H) and ECE 351)

ECE 372. INTRODUCTION TO COMPUTER NETWORKS (4). Computer network principles, fundamental networking concepts, packet-switching and circuit-switching, TCP/IP protocol layers, reliable data transfer, congestion control, flow control, packet forwarding and routing, MAC addressing, multiple access techniques. Lec. **CROSSLISTED** as CS 372. **PREREQS:** CS 261 and (ECE 271 or CS 271) and C programming and Unix familiarity.

ECE 375. COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE PROGRAMMING (4). Introduction to computer organization, how major components in a computer system function together in executing a program, and assembly language programming. Lec/lab. **PREREQS:** ECE 271 and C/C++ programming (e.g. CS 261).

ECE 390. ELECTRIC AND MAGNETIC FIELDS (4). Static and quasi-static electric and magnetic fields. **PREREQS:** ((MTH 255 or MTH 255H) and ENGR 203*)

ECE 391. TRANSMISSION LINES (3). Transient and steady-state analysis of transmission line circuits with application to engineering problems. **PREREQS:** (ENGR 203 and (MTH 254 or MTH 254H) and (MTH 256 or MTH 256H) and ECE 322*)

ECE 399. SPECIAL TOPICS (1-16). Course work to meet students' needs in advanced or specialized areas and to introduce new, important topics in electrical and computer engineering at the undergraduate (junior/senior) level. This course is repeatable for a maximum of 16 credits.

ECE 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECE 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECE 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECE 411. ENGINEERING MAGNETICS (3). Application of magnetic materials in the design of magnetic devices. Properties of magnetic materials; engineering design of actuators, sensors and data storage devices. Introduction to spintronics. **PREREQS:** ECE 390

ECE 413. SENSORS (3). Overview of sensor technologies including materials, physics of

operation, applications and system integration.

PREREQS: (ECE 322 and ECE 323)

ECE 415. MATERIAL SCIENCE OF NANOTECHNOLOGY (3).

Introductory physical chemistry of solid surfaces, thermodynamics, and kinetics applied to synthesis of nanomaterials such as nanoparticles, nanowires, thin films, carbon nanotubes, fullerenes, graphene, etc. Characterization of nanomaterials, applications of nanomaterials, nano-synthesis techniques, integration of nanotechnology, and emerging nanotechnology topics. **PREREQS:** (ECE 317 or ECE 416 or ENGR 321 or ENGR 321H)

ECE 416. ELECTRONIC MATERIALS AND DEVICES (4).

Semiconductor fundamentals and physical principles of pn junctions and Schottky barrier diodes. **PREREQS:** ENGR 201

ECE 417. BASIC SEMICONDUCTOR DEVICES (4).

Theory and physical principles of bipolar junction and field-effect transistors. Lec/rec. **PREREQS:** (ECE 317 or ECE 416)

ECE 418. SEMICONDUCTOR PROCESSING (4).

Theory and practice of basic semiconductor processing techniques. Introduction to process simulation. Lec/lab/rec. **PREREQS:** (ECE 317 or ECE 416) and/or equivalent.

ECE 422. CMOS INTEGRATED CIRCUITS I (4).

Analysis and design of analog integrated circuits in CMOS technology; current mirrors, gain stages, single-ended operational amplifier, frequency response, and compensation. **PREREQS:** (ECE 322 and ECE 323*)

ECE 423. CMOS INTEGRATED CIRCUITS II (4).

Analysis and design of analog integrated circuits in CMOS technology; cascaded current mirrors, cascaded gain stages, single-ended and fully differential operational amplifier, common-mode feedback, noise, and distortion. Lec/lab. **PREREQS:** ECE 422

ECE 428. DATA CONVERTERS (4).

The functions, characterization, algorithms, architectures and implementation of A/D and D/A data converters. Lec/lab. **PREREQS:** (ECE 323 and ECE 352)

ECE 431. POWER ELECTRONICS (4).

Fundamentals and applications of devices, circuits and controllers used in systems for electronic power processing. Lec/lab. **PREREQS:** (ECE 322 and ECE 323* and ECE 351)

ECE 432. DYNAMICS OF ELECTROMECHANICAL ENERGY CONVERSION (4).

Generalized machine theory. Techniques for dynamic analysis of electromechanical machines: dq representations of machines. Lec/lab. **PREREQS:** ECE 331 and (ENGR 212 or ENGR 212H)

ECE 433. POWER SYSTEMS ANALYSIS (4).

Fundamentals and control of real and reactive power, steady-state load flow studies, unbalance, stability and transient system analysis. **PREREQS:** (ECE 323 and ECE 352) and three-phase power

ECE 438. ELECTRIC AND HYBRID VEHICLES (4).

History of electric traction. Introduction to electric and hybrid-electric vehicle configurations. Vehicle mechanics. Energy sources and storage. Range prediction. Motors for HEVs. Electric drive components. Vehicle transmission systems. Lec. Taught alternate years. **PREREQS:** ((ENGR 202 or ENGR 202H) and (ENGR 212 or ENGR 212H))

ECE 441. ^ENGINEERING DESIGN PROJECT (3).

First term of an extended, 3-term team design project to expose students to problem situations and issues in engineering design similar to those encountered in industry. (Writing Intensive Courses) **PREREQS:** (ECE 322 and ECE 351) and senior standing in ECE.

ECE 442. ^ENGINEERING DESIGN PROJECT (3).

Second term of an extended, 3-term team design project to expose students to problem situations and issues in engineering design similar

to those encountered in industry. (Writing Intensive Courses) **PREREQS:** ECE 441

ECE 443. ^ENGINEERING DESIGN PROJECT (2).

An extended team design project to expose students to problem situations and issues in engineering design similar to those encountered in industry. (Writing Intensive Courses) **PREREQS:** ECE 442 and senior standing in electrical or computer engineering.

ECE 451. SYSTEMS DYNAMICS AND CONTROL (4).

Modeling and analysis of linear continuous systems in time and frequency domains. Fundamentals of single-input-single-output control system design. CROSSLISTED as ME 430. **PREREQS:** (ME 317 or (ECE 351 and ECE 352 and (ENGR 212 or ENGR 212H))

ECE 461. INTRODUCTION TO ANALOG AND DIGITAL COMMUNICATIONS (4).

Fundamental concepts of analog and digital telecommunication systems: modeling, analysis, and design of analog amplitude and angle modulation systems; probabilistic performance assessment of modulated signals over noisy channels; introduction to baseband digital modulation techniques such as binary pulse amplitude modulation and pulse position modulation and their demodulation in the presence of random noise. Lec. **PREREQS:** (ECE 351 and ECE 352 and ECE 353)

ECE 462. DIGITAL COMMUNICATIONS AND CHANNEL CODING (4).

Modeling, analysis, design of baseband and passband digital communications systems: geometric representation of signals; correlator receivers for M-ary digital communications systems; decision theory and its application to digital communication systems in additive white Gaussian noise environment; generation, transmission, and reception of passband digital modulated signals (BPSK, QPSK, FSK PAM); basics of information theory and channel encoding. Lec. **PREREQS:** (ECE 461 and ECE 351 and ECE 352 and ECE 353)

ECE 463. WIRELESS COMMUNICATIONS NETWORK (4).

Wireless networks: personal area (IEEE 802.15.4a), local area (IEEE 802.11), metropolitan area (IEEE 802.16), and mobile cellular networks (e.g., CDMA); physical-layer techniques for data modulation and multiple access; RF system engineering aspects of mobile cellular networks (e.g., RF coverage for a certain propagation environment.) Lec. **PREREQS:** (ECE 351 and ECE 352) and probability background. Recommended: ECE 461.

ECE 464. DIGITAL SIGNAL PROCESSING (4).

Analysis and design of discrete-time linear-time invariant systems for processing discrete-time signals: DT-LTI system properties, DT signal analysis using Discrete-Time Fourier Transform, Discrete Fourier Transform and z-Transform, frequency response and transfer function. Signal sampling and reconstruction, digital processing of continuous-time signals, FIR and IIR digital filter design, and filter structures. **PREREQS:** (ECE 351 and ECE 352)

ECE 468. DIGITAL IMAGE PROCESSING (3).

Introduction to digital image processing including fundamental concepts of visual perception, image sampling and quantization, image enhancement in spatial and frequency domains (through 2D Fourier transform), image restoration, and color image processing. Implementation of algorithms using Matlab Image Processing Toolbox. **PREREQS:** (ECE 351 and ECE 352)

ECE 471. ENERGY-EFFICIENT VLSI DESIGN (4).

Combinational and sequential logic design using CMOS transistors; analysis of power consumption and logic delay of digital logic; clock design including skew, jitter, and dynamic clock energy consumption; supply voltage and power supply noise sources; dynamic voltage frequency scaling (DVFS); sub-threshold logic design and effect on energy/robustness;

custom digital integrated circuit design including transistor layouts and CAD entry; CMOS scaling and the effect on process variability and power consumption. Lec/lab. **PREREQS:** (ECE 271 and ECE 322 and ECE 323*)

ECE 472. COMPUTER ARCHITECTURE (4).

Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining, and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as CS 472/CS 572. **PREREQS:** ECE 375

ECE 473. MICROPROCESSOR SYSTEM DESIGN (4).

Implementation of embedded computer systems focusing on the development of hardware and software for an embedded RISC microcontroller system. Topics include internal microcontroller architecture, interfacing peripheral devices, mixed analog and digital systems, and hardware and software implementation of several systems using an 8-bit microcontroller and peripherals. **PREREQS:** (ECE 322 and ECE 375 and CS 261)

ECE 474. VLSI SYSTEM DESIGN (4).

Introduction to custom and semi-custom digital integrated circuit design as used in VLSI systems. The use of CAD/CAE tools, design management, and design methodology are introduced. **PREREQS:** (ECE 322 and ECE 375)

ECE 476. ADVANCED COMPUTER NETWORKING (4).

Advanced networking concepts: congestion control and avoidance, multimedia and QoS, queuing theory, buffer management, scheduling and fairness policies, wireless and mobile networks, service models, network security. CROSSLISTED as CS 476/CS 576. **PREREQS:** (CS 372 or ECE 372)

ECE 477. MULTIMEDIA SYSTEMS (4).

Design of multimedia systems used in information technology covering the hardware, software, applications, and networks. Components covered include multimedia representation, coding and compression techniques, wireless networks, networking for multimedia, and embedded system for multimedia. Lec. **PREREQS:** ECE 375

ECE 478. NETWORK SECURITY (4).

Security principles, models, and attacks. Overview of cryptography. Building secure systems and security evaluation criteria. Security in operating systems and computer networks. Management and analysis of security. Legal and ethical issues in computer security.

ECE 482. OPTICAL ELECTRONIC SYSTEMS (4).

Photodetectors, laser theory, and laser systems. Lec/lab. CROSSLISTED as PH 482/PH 582. **PREREQS:** ECE 391 or (PH 481 or PH 581) or equivalent.

ECE 483. GUIDED WAVE OPTICS (4).

Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. CROSSLISTED as PH 483/PH 583. **PREREQS:** (ECE 391* or PH 481*)

ECE 484. ANTENNAS AND PROPAGATION (4).

Introduction to antennas and radiowave propagation. Offered alternate years. **PREREQS:** (ECE 390 and ECE 391) and/or equivalent.

ECE 485. MICROWAVE DESIGN TECHNIQUES (4).

Introduction to basic design techniques required for the design of high-frequency circuits and systems. Lec/Lab. **PREREQS:** (ECE 390 and ECE 391) and/or equivalent.

ECE 499. SPECIAL TOPICS (1-16).

Course work to meet students' needs in advanced or specialized areas and to introduce new important topics in electrical and computer engineering at the undergraduate level. This course is repeatable for a maximum of 16 credits.

ECE 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECE 503. ECE MS THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ECE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECE 507. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Graduate standing.

ECE 511. ELECTRONIC MATERIALS PROCESSING (3). Technology, theory, and analysis of processing methods used in integration circuit fabrication. Offered alternate years. **PREREQS:** Graduate standing or instructor approval required.

ECE 516. ELECTRONIC MATERIALS AND DEVICES (4). Semiconductor fundamentals and physical principles of pn junctions and Schottky barrier diodes. **PREREQS:** ENGR 201

ECE 517. BASIC SEMICONDUCTOR DEVICES (4). Theory and physical principles of bipolar junction and field-effect transistors. Lec/rec. **PREREQS:** ECE 317 or ECE 416

ECE 518. SEMICONDUCTOR PROCESSING (4). Theory and practice of basic semiconductor processing techniques. Introduction to process simulation. Lec/lab/rec. **PREREQS:** ECE 317 or ECE 416 or equivalent.

ECE 520. ANALOG CMOS INTEGRATED CIRCUITS (4). Principles and techniques of design of electronic circuits with focus on a design methodology for analog integrated circuits. Practical aspects of using CAD tools in analyzing and laying out circuits will be discussed.

ECE 521. ANALOG CIRCUIT SIMULATION (4). Formulation/solution of circuit equations; sparse matrix techniques; DC, transient, sensitivity, noise and Fourier analyses; RF circuit simulation. **PREREQS:** ECE 423 or ECE 520

ECE 522. CMOS INTEGRATED CIRCUITS I (4). Analysis and design of analog integrated circuits in CMOS technology; current mirrors, gain stages, single-ended operational amplifier, frequency response, and compensation. **PREREQS:** ECE 322 and ECE 323*

ECE 523. CMOS INTEGRATED CIRCUITS II (4). Analysis and design of analog integrated circuits in CMOS technology; cascaded current mirrors, cascaded gain stages, single-ended and fully differential operational amplifier, common-mode feedback, noise, and distortion. Lec/lab. **PREREQS:** ECE 422 or ECE 522

ECE 528. DATA CONVERTERS (4). The functions, characterization, algorithms, architectures and implementation of A/D and D/A data converters. Lec/lab. **PREREQS:** ECE 323 and ECE 352

ECE 530. CONTEMPORARY ENERGY APPLICATIONS (4). Contemporary energy issues and applications; fundamental physics of renewable energy sources (e.g. wind, wave, and solar), devices used to harvest energy from these sources, state-of-the-art renewable energy technology, power transmission, transformers, and energy storage. **PREREQS:** Graduate standing in engineering; Matlab, basic circuit analysis with RLC components and diodes.

ECE 531. POWER ELECTRONICS (4). Fundamentals and applications of devices, circuits and controllers used in systems for electronic power processing. Lec/lab. **PREREQS:** ECE 322 and ECE 323* and ECE 351

ECE 532. DYNAMICS OF ELECTROMECHANICAL ENERGY CONVERSION (4). Generalized machine theory. Techniques for dynamic analysis of electromechanical machines: dq representations of machines. Lec/lab. **PREREQS:** (ENGR 212 or ENGR 212H)

ECE 533. POWER SYSTEMS ANALYSIS (4). Fundamentals and control of real and reactive power, steady-state load flow studies, unbalance, stability and transient system analysis. **PREREQS:** ECE 323 and ECE 352 and three-phase power

ECE 534. ADVANCED ELECTRICAL MACHINES (3). Development of models for the dynamic performance of all classes of electrical machines; synchronous, induction, permanent magnet and reluctance motors. Dynamic motor simulations. **PREREQS:** ECE 530

ECE 535. ADJUSTABLE SPEED DRIVES AND MOTION CONTROL (3). Adjustable speed drives, associated power electronic converters, simulation and control. Lec. **PREREQS:** ECE 530

ECE 538. ELECTRIC AND HYBRID VEHICLES (4). History of electric traction. Introduction to electric and hybrid-electric vehicle configurations. Vehicle mechanics. Energy sources and storage. Range prediction. Motors for HEVs. Electric drive components. Vehicle transmission systems. Lec. Taught alternate years. **PREREQS:** ENGR 202 and ENGR 212

ECE 550. LINEAR SYSTEMS (4). Linear dynamic systems theory and modeling. **PREREQS:** ECE 351 and ECE 352 or equivalent

ECE 560. STOCHASTIC SIGNALS AND SYSTEMS (4). Stochastic processes, correlation functions, spectral analysis applicable to communication and control systems. **PREREQS:** ECE 461 or ECE 561

ECE 561. INTRODUCTION TO ANALOG AND DIGITAL COMMUNICATIONS (4). Fundamental concepts of analog and digital telecommunication systems: modeling, analysis, and design of analog amplitude and angle modulation systems; probabilistic performance assessment of modulated signals over noisy channels; introduction to baseband digital modulation techniques such as binary pulse amplitude modulation and pulse position modulation and their demodulation in the presence of random noise. Lec. **PREREQS:** ECE 351 and ECE 352 and ECE 353

ECE 562. DIGITAL COMMUNICATIONS AND CHANNEL CODING (4). Modeling, analysis, design of baseband and passband digital communications systems: geometric representation of signals; correlator receivers for M-ary digital communications systems; decision theory and its application to digital communication systems in additive white Gaussian noise environment; generation, transmission, and reception of passband digital modulated signals (BPSK, QPSK, FSK PAM); basics of information theory and channel encoding. Lec. **PREREQS:** ECE 461 and ECE 351 and ECE 352 and ECE 353

ECE 563. WIRELESS COMMUNICATIONS NETWORK (4). Wireless networks: personal area (IEEE 802.15.4a), local area (IEEE 802.11), metropolitan area (IEEE 802.16), and mobile cellular networks (e.g., CDMA); physical-layer techniques for data modulation and multiple access; RF system engineering aspects of mobile cellular networks (e.g., system capability for voice and packet data traffics, RF coverage for a certain propagation environment.) Lec. **PREREQS:** Probability background. Recommended: ECE 461

ECE 564. DIGITAL SIGNAL PROCESSING (4). Analysis and design of discrete-time linear-time invariant systems for processing discrete-time signals: DT-LTI system properties, DT signal analysis using Discrete-Time Fourier Transform, Discrete Fourier Transform and z-Transform,

frequency response and transfer function. Signal sampling and reconstruction, digital processing of continuous-time signals, FIR and IIR digital filter design, and filter structures. **PREREQS:** ECE 351 and ECE 352

ECE 565. ESTIMATION, FILTERING, AND DETECTION (4). Principles of estimation, linear filtering, and detection. **PREREQS:** ECE 353 or equivalent.

ECE 566. INFORMATION THEORY (4). Introduction to information theory: entropy, differential entropy, entropy rates, mutual information, data compression, channel capacity, source coding, channel coding, network information theory. **PREREQS:** ECE 353 or equivalent; strong mathematical background.

ECE 567. DIGITAL SIGNAL PROCESSING (3). Advanced methods in signal processing, optimum filter design, decimation and interpolation methods, quantization error effects, spectral estimation. **PREREQS:** ECE 464 or ECE 564 or instructor approval required

ECE 568. ADVANCED DIGITAL IMAGE PROCESSING (3). Advanced topics in digital image processing including wavelet and multi-resolution image processing, image compression, image segmentation, image representation and description, and object recognition. Implementation of digital image processing algorithms using Matlab Image Processing Toolbox. **PREREQS:** ECE 468 or CS 555

ECE 570. HIGH PERFORMANCE COMPUTER ARCHITECTURE (4). Advanced concepts in computer architecture. Performance improvement employing advanced pipelining and multiple instruction scheduling techniques. Issues in memory hierarchy and management. CROSSLISTED as CS 570. **PREREQS:** ECE 472 or ECE 572

ECE 571. ENERGY-EFFICIENT VLSI DESIGN (4). Combinational and sequential logic design using CMOS transistors; analysis of power consumption and logic delay of digital logic; clock design including skew, jitter, and dynamic clock energy consumption; supply voltage and power supply noise sources; dynamic voltage frequency and scaling (DVFS); sub-threshold logic design and effect on energy/robustness; custom digital integrated circuit design including transistor layouts and CAD entry; CMOS scaling and the effect on process variability and power consumption. Lec/lab. **PREREQS:** ECE 271 and ECE 323 and ECE 323 with a minimum grade of C.

ECE 572. COMPUTER ARCHITECTURE (4). Computer architecture using processors, memories, and I/O devices as building blocks. Issues involved in the design of instruction set architecture, processor, pipelining, and memory organization. Design philosophies and trade-offs involved in Reduced Instruction Set Computer (RISC) architectures. Lec/lab. CROSSLISTED as CS 472/CS 572. **PREREQS:** ECE 375

ECE 573. MICROPROCESSOR SYSTEM DESIGN (4). Implementation of embedded computer systems focusing on the development of hardware and software for an embedded RISC microcomputer system. Topics include internal microcomputer architecture, interfacing peripheral devices, mixed analog and digital systems, and hardware and software implementation of several systems using an 8-bit microcomputer and peripherals. **PREREQS:** ECE 322 and ECE 375 and CS 261

ECE 574. VLSI SYSTEM DESIGN (4). Introduction to custom and semi-custom digital integrated circuit design as used in VLSI systems. The use of CAD/CAE tools, design management, and design methodology are introduced. **PREREQS:** ECE 322 or ECE 375

ECE 575. DATA SECURITY AND CRYPTOGRAPHY (3). Secret-key and public-key cryptography, authentication and digital signatures, protocols, implementation issues, privacy enhanced mail, data and communication security standards. **PREREQS:** Graduate standing.

ECE 576. ADVANCED COMPUTER NETWORKING (4). Advanced networking concepts: congestion control and avoidance, multimedia and QoS, queuing theory, buffer management, scheduling and fairness policies, wireless and mobile networks, service models, network security. **CROSSLISTED** as CS 476/CS 576. **PREREQS:** CS 372 or ECE 372

ECE 577. MULTIMEDIA SYSTEMS (4). Design of multimedia systems for information technology covering the hardware, software, applications, and networks. Components covered include multimedia representation, coding and compression techniques, wireless networks, networking for multimedia, and embedded system for multimedia. Lec. **PREREQS:** ECE 375

ECE 580. NETWORK THEORY (4). Linear graphs, multiport networks, and other topics in advanced network theory. **PREREQS:** Graduate standing in ECE.

ECE 582. OPTICAL ELECTRONIC SYSTEMS (4). Photodetectors, laser theory, and laser systems. Lec/lab. **CROSSLISTED** as PH 482/PH 582. **PREREQS:** (PH 481 or PH 581) or equivalent

ECE 583. GUIDED WAVE OPTICS (4). Optical fibers, fiber mode structure and polarization effects, fiber interferometry, fiber sensors, optical communication systems. Lec/lab. **CROSSLISTED** as PH 483/PH 583. **PREREQS:** (ECE 391* or PH 481* or PH 581*)

ECE 584. ANTENNAS AND PROPAGATION (4). Introduction to antennas and radiowave propagation. Offered alternate years.

ECE 585. MICROWAVE DESIGN TECHNIQUES (4). Introduction to basic design techniques required for the design of high-frequency circuits and systems. Lec/Lab.

ECE 590. ANALYTICAL TECHNIQUES IN ELECTROMAGNETIC FIELDS (4). Basic analytical techniques required to solve meaningful field problems in engineering. **PREREQS:** Graduate standing in ECE.

ECE 591. ADVANCED ELECTROMAGNETICS (3). Advanced techniques for analyzing problems in electromagnetics, primarily numerical. Offered alternate years. **PREREQS:** ECE 590

ECE 592. ADVANCED OPTOELECTRONICS (3). Principles of quantum exchange devices, field-material interaction and theory, and applications of optical circuits and devices. Offered alternate years. **PREREQS:** (ECE 482 or ECE 582) and ECE 590

ECE 593. RF MICROWAVE CIRCUIT DESIGN (3). Active/passive RF and microwave circuit design with emphasis to wireless systems. **PREREQS:** ECE 390 and ECE 391 or equivalent

ECE 599. SPECIAL TOPICS (1-16). Course work to meet students' needs in advanced or specialized areas and to introduce new important topics in electrical and computer engineering at the undergraduate level. This course is repeatable for a maximum of 16 credits.

ECE 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECE 603. ECE PhD THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ECE 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECE 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

ECE 611. ELECTRONIC MATERIALS PROCESSING (3). Technology, theory, and analysis of processing methods used in integration circuit fabrication. Offered alternate years. **CROSSLISTED** as CHE 611. **PREREQS:** Graduate standing or instructor approval.

ECE 612. PROCESS INTEGRATION (3). Process integration, simulation, and statistical quality control issues related to integrated circuit fabrication. Offered alternate years. **CROSSLISTED** as CHE 612. **PREREQS:** ECE 611 or CHE 611 or instructor approval.

ECE 613. ELECTRONIC MATERIALS AND CHARACTERIZATION (3). Physics and chemistry of electronic materials and methods of materials characterization. Offered alternate years. **CROSSLISTED** as CHE 613. **PREREQS:** Graduate standing or instructor approval.

ECE 614. SEMICONDUCTORS (3). Essential aspects of semiconductor physics relevant for an advanced understanding of semiconductor materials and devices. Offered alternate years. **PREREQS:** Exposure to quantum mechanics and solid state physics.

ECE 615. SEMICONDUCTOR DEVICES I (3). Advanced treatment of two-terminal semiconductor electronic devices. Offered alternate years. **PREREQS:** Graduate standing or instructor approval; ECE 614 recommended.

ECE 616. SEMICONDUCTOR DEVICES II (3). Advanced treatment of three-terminal semiconductor electronic devices. Offered alternate years. **PREREQS:** ECE 615 or instructor approval.

ECE 619. SELECTED TOPICS IN SOLID STATE (3). Special courses taught on various topics in solid state as interests and demands vary. This course is repeatable for a maximum of 99 credits.

ECE 621. RADIO FREQUENCY IC DESIGN (3). Radio frequency (RF) circuits. Principles, analysis, and design of bipolar and MOS RF IC building blocks: low noise amplifiers, mixers, oscillators, frequency synthesizers. **PREREQS:** (ECE 422 or ECE 522) and (ECE 423 or ECE 523) or ECE 520

ECE 626. ANALOG CMOS CIRCUIT DESIGN (3). Switched-capacitor circuit design, on-chip filters, data converters. Practical aspects of analog CMOS IC design.

ECE 627. OVERSAMPLED DELTA-SIGMA DATA CONVERTERS (3). Noise-shaping theory in first, second, and higher-order modulators. Design, simulation, and realization in hardware of converters using this popular architecture.

ECE 659. SELECTED TOPICS IN SYSTEMS AND CONTROL (3). Course work to meet students' needs in advanced or specialized areas and to introduce the newest important results in systems and control. This course is repeatable for a maximum of 18 credits. **PREREQS:** Graduate standing in ECE.

ECE 662. COMMUNICATION SYSTEMS--CODING AND INFORMATION THEORY (3). Various aspects of information theory, with particular emphasis on the coding process; data compression problems, and the development of rate distortion theory. **PREREQS:** (ECE 462 or ECE 562) and ECE 560

ECE 669. SELECTED TOPICS IN COMMUNICATIONS AND SIGNAL PROCESSING (3). Course work to meet students' needs in advanced or specialized areas and to introduce the newest important results in signal processing. This course is repeatable for a maximum of 18 credits. **PREREQS:** Graduate standing in ECE.

ECE 679. SELECTED TOPICS IN COMPUTER ENGINEERING (1-16). Topics to be presented at various times include information storage and retrieval, computer architecture, fault-tolerant computing, asynchronous sequential circuits, automata, data transmission, coding theory. This course is repeatable for a maximum of 99 credits. **PREREQS:** Graduate standing in ECE.

ECE 699. SPECIAL TOPICS (3). Advanced studies in field and wave theories and special devices. Topic examples are microwave and acoustic devices, advanced lasers and masers, electron beam interactions with traveling waves, MHD device dynamics. This course is repeatable for a maximum of 99 credits. **PREREQS:** Graduate standing in ECE.

SCHOOL OF MECHANICAL, INDUSTRIAL, AND MANUFACTURING ENGINEERING

EAC/ABET Accredited

Robert B. Stone, Head
David P. Cann, Associate Head for
 Graduate Programs
Brady J. Gibbons, Associate Head for
 Undergraduate Programs
 204 Rogers Hall
 Oregon State University
 Corvallis, OR 97331-6001
 541-737-3441
 Email: info-mime@oregonstate.edu
 Website: http://mime.oregonstate.edu/

FACULTY

Professors Batten, Campbell, Cann, Doolen, Liburdy, Logendran, Paasch, B. Paul, Pence, Stone, I. Tumer, K. Tumer
Associate Professors Albertini, Apte, Atre, Bay, Funk, Gibbons, Grimm, Kim, Kruzic, Narayanan, Porter, Sharp, Smart, Warnes

Assistant Professors

Balasubramanian, Blunck, Calvo, DuPont, Eseonu, Feuerbacher, Greaney, Haapala, Hagen, Hatton, Hollinger, Hoyle, Hurst, Malhotra, Parmigiani, Tucker, Vergara

PROFESSIONAL FACULTY

Barber, Borntrager, DeAdder, Finn, Helvie, Jensen, McAllister, G. Newcomb, L. Paul, J. Robinson, T.A. Robinson, White

Undergraduate Majors

Energy Systems Engineering (BS, HBS)
 [OSU-Cascades/COCC only]
Industrial Engineering (BS, CRED, HBS)

Option
Business Engineering

Manufacturing Engineering
 (BS, CRED, HBS)

Mechanical Engineering (BS, CRED, HBS)

Graduate Majors

Industrial Engineering
 (MAIS, MEng, MS, PhD)

Option
Engineering Management

Graduate Areas of Concentration
Human Systems Engineering
Information Systems Engineering
Manufacturing Systems Engineering
Nano/Micro Fabrication

Materials Science (MS, PhD)

Graduate Areas of Concentration
Chemistry
Chemical Engineering
Civil Engineering
Electrical and Computer Engineering

Forest Products
Mathematics
Mechanical Engineering
Nuclear Engineering
Physics

Mechanical Engineering (MEng, MS, PhD)

Options
Design
Materials Mechanics
Robotics
Thermal Fluids

Graduate Areas of Concentration

Applied Mechanics
Applied Thermodynamics
Biomechanics
Combustion
Design
Design and Analysis of Mechanical and Thermal Fluid Systems
Dynamics
Energy
Fluid Mechanics
Heat Transfer
Materials Science
Mechanical Engineering
Physical and Mechanical Metallurgy
Solid Mechanics
Stress Analysis
Systems and Control

Graduate Minors

Industrial Engineering
Mechanical Engineering

The School of Mechanical, Industrial, and Manufacturing Engineering (MIME) at OSU offers three ABET-accredited undergraduate degrees: Mechanical Engineering, Industrial Engineering, and Manufacturing Engineering.

The mission of the School of MIME is two-fold:

- To prepare our students as entrepreneurial, team-oriented, work-ready graduates and lifelong learners in mechanical, industrial and manufacturing engineering, and
- To engage in collaborative, cutting-edge research whose applications lead to greater prosperity and a sustainable future for Oregon and the world.

MIME PROGRAM OBJECTIVES

ABET requires that each program establish educational objectives defined as “broad statements that describe the career and professional accomplishments that the program is preparing graduates to achieve.” The three broad areas of student participation and graduate achievement on which all MIME programs focus, and the specific educational objectives associated with each of these three areas are:

1. **Our graduates will be systems thinkers.** MIME graduates will be able to analyze, evaluate, improve, and design engineered systems and processes using modern engineering tools (hardware and software) and approaches. They will demonstrate in-depth knowledge of mechanical, industrial and/or manufacturing systems.
2. **Our graduates will be global collaborators.** MIME graduates will be able to communicate effectively across disciplines and cultures. They will provide management and leadership skills within their organizations and work effectively in diverse environments.
3. **Our graduates will be innovative designers and problem solvers.** MIME graduates will use both structured and unstructured methodologies to innovate systems and processes. They will apply technical knowledge and creativity in solving real-world problems. They will demonstrate sound understanding of engineering and project management fundamentals and breadth of experience with engineering design and problem-solving processes.

MECHANICAL ENGINEERING

Mechanical engineers design and develop small devices, large equipment and processes for society. They play major roles in the design, testing and operation of mechanisms, machines, and systems, including processes for energy conversion and equipment used in households, businesses, transportation and manufacturing.

In addition to the university baccalaureate core, the mechanical engineering curriculum has its base in mathematics, science, engineering science, and design. Mathematics and science courses occur primarily in the first two years. Engineering science is a major component, which is treated from the sophomore year to graduation in a combination of required and technical elective sources.

OSU’s Mechanical Engineering Program has all the attributes needed for the best learning environment: ABET accredited curriculum, excellent faculty, modern facilities, quality students, and strong industrial interaction.

Engineering design is an integral element of the program. The philosophy is to “plant the seed” for design at the freshman level and grow it throughout the program. Most of the skills are developed at the junior and senior levels, when students have achieved proficiency in the basic technical requirements. At the junior level, the design process is extensively developed in three courses. At the senior year, design experiences occur

in several areas, culminating in the two-term senior project in which students in small teams carry out the design of some product or process under the supervision of a faculty advisor. Attention to hands-on activity adds a very desirable “feel” for many aspects of the design process.

A good choice of senior electives enables students to achieve a degree of specialization and depth to match their interests. The areas include applied stress analysis; design, dynamics and analysis of mechanical and thermal/fluid systems; concurrent engineering; control system design; mechatronics; heat transfer; and metallurgy and materials.

The faculty encourages a vibrant extracurricular program for professional and leadership experiences. Students are encouraged to obtain at least three months of work experience through an industrial or research internship or to participate in a foreign exchange program. The school’s goal is to have more than 95 percent of its students graduate with such experience. In addition to students having general internships, many of the professional-level students participate in the industry-driven Multiple Engineering Cooperative Program (MECOP). This program provides two paid six-month internships at over 60 Pacific Northwest companies where interns work with a company mentor and improve their capabilities for the work environment.

Mechanical engineers can be found in a wide variety of industries including aerospace, electronics, biomedical, transportation, manufacturing, energy, automotive, and government labs. Because of the increasing complexity of mechanical engineering, graduate study for the MS and PhD degrees is advisable for students who wish to specialize in depth in any of the above areas. The undergraduate curriculum provides an excellent foundation for graduate study.

INDUSTRIAL ENGINEERING

Industrial engineers (IEs) apply science, mathematics, and engineering methods to complex system integration and operation. Because the systems with which they work are often large and complex, IEs utilize knowledge and skills in a wide variety of disciplines, have the ability to work well with people, and take a broad, systems perspective. The Industrial Engineering degree is a very flexible degree that allows students to tailor their program of study to meet their individual career goals. A large number of restricted elective credits allows students to pursue the Business Engineering option or to customize their program to a field of interest.

IEs are key players in the integration and operation of systems in all sectors of industry and government including the following (with examples):

- aerospace (NASA space shuttle pre-launch processing systems)
- automotive (automobile final assembly plants)
- communications (telephone services)
- computers (factory information systems)
- electronics/semiconductors (silicon wafer fabrication facilities)
- food (canneries and fast food restaurant chains)
- government (department of motor vehicles service centers)
- health care (hospital central stores and operating rooms)
- manufacturing (circuit board fabrication facilities)
- retail (product distribution centers)
- transportation (airlines, overnight delivery services)

In their role as system integrators, IEs analyze and design systems. For example:

- facilities layout,
- material handling systems,
- manufacturing and other production systems,
- information systems,
- individual and group workplaces.

In the operations realm, IEs analyze, design and manage processes. For example:

- manufacturing processes-service processes,
- production system planning and control,
- resource allocation and scheduling,
- personnel assignment and scheduling,
- quality assurance,
- inventory control,
- system and personnel safety.

MANUFACTURING ENGINEERING

The Manufacturing Engineering degree is a more specialized degree, focusing on both high-tech manufacturing and traditional manufacturing. In particular, it is a specialization of industrial engineering that focuses on the making of physical products. The Manufacturing Engineering degree offers a hands-on education, and manufacturing engineering students are encouraged to participate in the college’s MECOP program, a nationally recognized industrial cooperative education program.

Students who complete the requirements for the Manufacturing Engineering degree plus 32 additional credits (at least 16 of these credits must be from the list of industrial engineering restricted electives) can earn two separate degrees, one in manufacturing engineering and the other in industrial engineering. The additional 32 credits typically take two additional quarters to complete.

UNDERGRADUATE MAJORS WITH OPTIONS

ENERGY SYSTEMS ENGINEERING (BS, CRED)

Offered at OSU-Cascades only.

The Energy Systems Engineering major provides students with the knowledge necessary to understand and make appropriate decisions about the design, construction, operation, and maintenance of energy systems. It emphasizes fundamental skills in engineering analysis, business, and project management. These skills are taught in the context of energy conversion systems such as power plants and solar collectors, energy storage such as batteries and hydrogen, energy distribution systems, and the efficient use of energy in building, manufacturing, and processing systems.

A part of this program includes the study of secondary effects of energy use such as local environmental impacts, national economic impacts, and global climate change. Throughout the curriculum, an important emphasis and distinctive feature is the treatment of these energy technologies as complex systems that require management with an eye to both business concerns and environmental issues, as well as the traditional technical challenges of energy engineering.

Note: The Pre-Energy Systems Engineering major (major code 257) is available on the Corvallis campus, but the pro-school courses for the Energy Systems Engineering major (major code 293) are only offered on the OSU-Cascades campus.

Baccalaureate Core (35 at OSU or 37 at COCC)

INDUSTRIAL ENGINEERING (MEng, MS, PhD, MAIS)

Graduate Areas of Concentration

Human systems engineering, information systems engineering, manufacturing systems engineering, nanol/micro fabrication

Industrial engineering is the application of science, mathematics, and engineering methods to complex system integration and operation. Because the systems with which they work are so large and complex, industrial engineers (IEs) must

develop expertise in a wide variety of disciplines, the ability to work well with people, and a broad, systems perspective. All IE graduate students learn advanced methods of system integration and operation. As practitioners, MEng and MS graduates analyze and design facilities, material handling systems, manufacturing processes, information systems, and workstations. They also develop, apply, and oversee policies, procedures, and algorithms for production planning, inventory control, resource allocation and scheduling, quality assurance, and supply chain management. As researchers, MS and PhD graduates advance the field of industrial and manufacturing engineering by their work in industrial corporations and government agencies. As educators, PhD graduates teach and perform research in industrial and manufacturing engineering in universities around the world.

GRADUATE OPTION

ENGINEERING MANAGEMENT OPTION

Available via Ecampus only.

The graduate option in Engineering Management at Oregon State University is designed for engineers and scientists who are conversant in the language and methods of engineering and technology, and motivated to become managers and leaders. The curriculum will equip practicing engineers and scientists with the knowledge and skills necessary to effectively manage technical resources to accomplish complex technical tasks.

Required

- IE 581. Operations Management (4)
- IE 582. Introduction to Management for Engineers and Scientists (4)
- IE 583. Advanced Engineering Economics Analysis (4)

MATERIALS SCIENCE (MS, PhD)

Graduate Areas of Concentration
Chemistry, chemical engineering, civil engineering, electrical and computer engineering, forest products, mathematics, mechanical engineering, nuclear engineering, physics

The discipline of materials science is inherently interdisciplinary, involving fundamental aspects of chemistry, physics, biology, geoscience, agricultural science, mathematics, and engineering.

Reflecting this characteristic, the Materials Science Program at Oregon State University, initiated in the 1980s, is distributed over nine departments spanning three OSU colleges. This allows students to earn MS and PhD degrees in Materials Science in many different areas of concentration, including all classes of materials, and in a wide range of materials behavior. The course work

requirements are extremely flexible to allow students to tailor their program of study to directly support their research activities.

Applications and other inquiries should be forwarded to: Prof. Bill Warnes, Materials Science Program Director, 204 Rogers Hall, Oregon State University, Corvallis, OR, 97331, USA. Email: william.warnes@oregonstate.edu.

For more information, visit the website at <http://matsci.oregonstate.edu/>

MECHANICAL ENGINEERING (MEng, MS, PhD)

Graduate Areas of Concentration

Applied mechanics, applied thermodynamics, biomechanics, combustion, design, design and analysis of mechanical and thermal fluid systems, dynamics, energy, fluid mechanics, heat transfer, materials science, mechanical engineering, physical and mechanical metallurgy, solid mechanics, stress analysis, systems and control

The School of Mechanical, Industrial, and Manufacturing Engineering offers graduate programs leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees. Master's degree candidates may pursue thesis or nonthesis options; students in the nonthesis option must complete additional course work where an individual project may be included.

The mechanical engineering field is diverse, therefore research activities in the school encompass a broad range of technical endeavors. Areas of research include applied mechanics, solid mechanics, biomechanics, dynamics, stress analysis, design, systems and control, energy, applied thermodynamics, heat transfer, fluid mechanics, metallurgy, and materials science.

In addition, research activities have been directed toward areas of current interest and need, including wind energy, microscale energy conversion, combustion, composite materials, superconductors, advanced materials, impact dynamics, mechatronics, microscale fluid mechanics, diagnostics in design, design for manufacture and computer-aided design and manufacturing, design and control of complex systems.

GRADUATE OPTIONS

DESIGN OPTION

Required

ME 507. Seminar: Design and Mechanics (1)
Choose 15 credits from the following courses:

- ME 511. CAD/CAM III (3)
- ME 512. Design of Mechanisms (4)
- ME 515. Risk and Reliability Analysis in Engineering Design (4)
- ME 516. Modeling and Analysis of Complex Systems (4)

- ME 517. Optimization in Design (3)
- ME 518. The Concurrent Design of Products (3)
- ME 611. Modern Product Design (4)
- MFGE 536. Lean Manufacturing Systems Engineering (4)

Total=16

MATERIALS MECHANICS OPTION

Required

- ME 507. Seminar: Materials Science (1)
- ME 520. Applied Stress Analysis (4)
- ME 570. Structure Property Relations in Materials (4)

Choose one course from the following (mechanical behavior):

- ME 583. Composite Materials (3)
- ME 584. Advanced Fracture of Materials (4)
- ME 585. Fatigue of Materials (4)
- ME 587. Dislocations, Deformation, and Creep (4)

Choose one course from the following (mechanics):

- ME 523. Advanced Stress Analysis (4)
- ME 524. Finite Element Modeling of Mechanical Engineering Systems (4)
- ME 553 Structure and Mechanics Laboratory (4)

Total=16–17

ROBOTICS OPTION

Required:

- ME 507. Seminar: Robotics and Control (1)

Choose 16 credits from the following:

- ENGR 521. Applied Robotics (4)
- ME 531. Linear Multivariable Control Systems I (4)
- ME 532. Linear Multivariable Control Systems II (4)
- ME 533. Nonlinear Dynamic Analysis (4)
- ME 536. Actuator Dynamics (4)
- ME 537. Learning-Based Control (4)
- ME 538. Autonomous Agents and Multi-Agent Systems (4)

Total=17

THERMAL FLUID SCIENCES OPTION

Required:

- ME 507. Seminar: Thermal Fluid Science Seminar (1)
- ME 526. Numerical Methods for Engineering Analysis (4)
- ME 550. Applied Heat Transfer (4)
- ME 552. Measurements in Fluid Mechanics and Heat Transfer (4)
- ME 560. Intermediate Fluid Mechanics (4)

Total=17

INDUSTRIAL ENGINEERING GRADUATE MINOR

For more details, see the school advisor.

MATERIALS SCIENCE GRADUATE MINOR

For more details, see the school advisor.

MECHANICAL ENGINEERING GRADUATE MINOR

For more details, see the school advisor.

■ ENERGY SYSTEMS ENGINEERING COURSES

ESE 355. ENERGY REGULATION (4).

Introductory course to the policies and laws governing energy generation and transmission in the United States with a focus on electricity. History of regulations give context to understand current regulation and potential future policies. Laws regulating the use of alternative energy resources covered in a practical setting. Offered at OSU-Cascades only. **PREREQS:** BA 360* or ENGR 390* and junior standing in ESE pro school.

ESE 360. ENERGY CONSUMPTION ANALYSIS (4).

Analysis of energy use in transportation, residential and industrial sectors to understand how new technologies improve energy efficiency. Tradeoff techniques applied to decide between less efficient, less expensive systems versus more efficient, more expensive systems. International energy consumption compared, and energy losses evaluated for heating, cooling and electronic systems. Offered at OSU-Cascades only. **PREREQS:** (BA 360* or ENGR 390*) and ME 311 and junior standing in ESE pro school.

ESE 450. ENERGY GENERATION SYSTEMS (4).

Survey of technical fundamentals and operational principles of conventional and renewable energy conversion systems to understand the environmental and sustainable issues for energy systems currently in use or may be used in the future to power our industrial society. Offered at OSU-Cascades only. **PREREQS:** ME 312

ESE 470. ENERGY DISTRIBUTION SYSTEMS (4).

Detailed coverage of the electrical energy distribution system, its operation, control and design. Design considerations and impacts to meet emerging and evolving customer needs. Broader understanding of natural gas and oil pipeline distribution for these infrastructure commodities. Offered at OSU-Cascades only. **PREREQS:** ENGR 202 and ME 311

ESE 471. ENERGY STORAGE SYSTEMS (4).

Coverage of energy storage techniques involving electrochemical, mechanical and emerging options. Integration of the energy storage media, its effects on the bulk power system, and design tradeoffs to understand environmental impacts, cost, reliabilities, and efficiencies for commercialization of bulk energy storage. Offered at OSU-Cascades only. **PREREQS:** ENGR 202 and ME 312

ESE 497 MIME CAPSTONE DESIGN (4).

Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. **CROSSLISTED** as IE 497 and ME 497. (Writing Intensive Course) **PREREQS:** ((IE 355 and IE 356 and IE 366 and IE 367 and IE 368 and WR 327) or ((ENGR 322 and (ENGR 391 or ENGR 391H) and ME 250 and (ME 312 or ME 312H) and (ME 317 or ME 317H) and (ME 332* or ME 332H*) and ME 383 and WR 327 and (ST 314 or ST 314H)(ENGR 390 or BA 360) and IE 425 and (ME 331* or ME 331H*) and ESE 355 and ESE 360

ESE 498. ^MIME CAPSTONE DESIGN (4).

Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. **CROSSLISTED** as IE 498 and ME 498. (Writing Intensive Course) **PREREQS:** ESE 497 or IE 497 or ME 497

■ INDUSTRIAL ENGINEERING COURSES

IE 199. SPECIAL TOPICS (1-16). Special topics in industrial engineering. This course is repeatable for a maximum of 16 credits.

IE 212. COMPUTATIONAL METHODS FOR INDUSTRIAL ENGINEERING (4). Engineering

problem solving using computational methods. Data structures. Modular programming. Sorting and search algorithms. Algorithms for inventory models, production scheduling, production line analysis, and optimization. **PREREQS:** ENGR 112 and algebra, calculus, differentiation and integration.

IE 285. INTRODUCTION TO INDUSTRIAL AND MANUFACTURING ENGINEERING (3).

Introduction to selected topics in industrial and manufacturing engineering, including history and philosophy, product design and manufacturing cycle, integrate role of engineering and business, and multi-objective nature of organizations. Surveys of selected design problems in resource allocation, operations and quality management, and production engineering. **CROSSLISTED** as MFGE 285.

IE 299. SPECIAL TOPICS (1-16). Special topics in industrial engineering. This course is repeatable for a maximum of 16 credits.

IE 355. STATISTICAL QUALITY CONTROL (4). Control of quality through the use of statistical analysis; typical control techniques and underlying theory. Development of reliability models and procedures for product assurance. Lec/lab. **PREREQS:** ST 314

IE 356. EXPERIMENTAL DESIGN FOR INDUSTRIAL PROCESSES (4). Systematic analysis of processes through the use of statistical analysis, methods, and procedures. Application of statistical techniques including use of classic process analysis techniques, regression and design of experiments. Lec/rec. **PREREQS:** ST 314

IE 366. WORK SYSTEMS ENGINEERING (4).

Principles and techniques of work measurement, methods engineering, workplace design, work sampling, and predetermined time systems. Basic human factors engineering and ergonomics principles applied to workplace design. The work systems engineering process. Lec/lab/rec. **PREREQS:** ST 314

IE 367. PRODUCTION PLANNING AND CONTROL (4). Forecasting techniques, inventory analysis, master production scheduling, material and capacity requirements, planning and scheduling methods. **PREREQS:** ST 314 or equivalent statistical material.

IE 368. FACILITY DESIGN AND OPERATIONS MANAGEMENT (4).

Design and analysis of industrial facilities including just-in-time systems, queuing, material handling systems, material flow analysis, line balancing, systematic layout planning, design of warehouse facilities, and facilities location. **PREREQS:** ST 314 or equivalent.

IE 380. *THE RESPONSIBLE ENGINEER (3).

The idea of responsibility and the ethical responsibilities of the engineer. Introduction to value, ethics, and ethical systems. Engineering as value creation and the ethical ramifications of engineering. Codes of engineering ethics. Recognizing and addressing ethical dilemmas in engineering. Examination of the individual, social, and environmental effects of engineering and technology. (Baccalaureate Core Course)

IE 399. SPECIAL TOPICS (1-16). Special topics in industrial engineering. This course is repeatable for a maximum of 16 credits.

IE 403. THESIS (1-16). **PREREQS:** Departmental approval required.

IE 405. READING AND CONFERENCE (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

IE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

PREREQS: Departmental approval required.

IE 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

IE 410. INTERNSHIP (1-16).

IE 411. VISUAL PROGRAMMING FOR INDUSTRIAL APPLICATIONS (4). Object-oriented modeling, Unified Modeling Language, software development concepts, file and database connectivity, and visual programming skills (Microsoft Visual Basic) for use in developing industrial applications, such as process monitoring and supply chain management. **PREREQS:** IE 212

IE 412. INFORMATION SYSTEMS ENGINEERING (4).

Framework for enterprise information systems. Engineering and scientific systems. Requirements definition, enhanced entity relationship modeling, logical modeling, structured query language, relational model, referential integrity. Lec/lab.

IE 415. SIMULATION AND DECISION SUPPORT SYSTEMS (4).

Analysis and design of integrated manufacturing systems through the application of computer modeling techniques. Model validation and verification. Application of simulation and decision support systems to management and engineering. Lec/lab. **PREREQS:** ST 314

IE 418. TELECOMMUNICATION CONCEPTS (3).

Telecommunication concepts for industrial applications. OSI reference model, local area networks, wide area networks, internet architecture. Taught fall in even years. **PREREQS:** IE 212 and previous programming experience.

IE 419. WIRELESS NETWORKS (3).

RF fundamentals, ISO 802.11 standards, spread spectrum technology, narrow band technology, direct sequence and frequency hopping transmission schemes, electromagnetic interference, design of indoor wireless networks. **PREREQS:** IE 418

IE 425. INDUSTRIAL SYSTEMS OPTIMIZATION (4).

A first course in operations research. Topics include mathematical programming formulations and solutions, the simplex method, network optimization, introduction to metaheuristics, and probability models. **PREREQS:** (ST 314 and (MTH 306 or MTH 341))

IE 437. VIRTUAL AND AUTOMATED MANUFACTURING SYSTEMS (4).

Automated manufacturing system design and operations-sensors, actuators, programmable controls. Concepts for integrated design/verification of virtual system models, control and hardware implementation.

IE 470. MANAGEMENT SYSTEMS ENGINEERING (4).

Improvement of organizational performance through the design and implementation of systems that integrate personnel, technological, environmental, and organizational variables. Topics include performance assessment and measurement as well as improvement methodologies. **PREREQS:** Senior standing.

IE 471. PROJECT MANAGEMENT IN ENGINEERING (3).

Critical issues in the management of engineering and high-technology projects are discussed. Time, cost, and performance parameters are analyzed from the organizational, people, and resource perspectives. Network optimization and simulation concepts are introduced. Resource-constrained project scheduling case discussions and a term project are included. **PREREQS:** Junior standing in engineering.

IE 475. ADVANCED MANUFACTURING COSTING TECHNIQUES (3).

Costing techniques applicable in advanced manufacturing enterprises: activity-based costing, economic value added, Japanese cost management techniques, life cycle costing, throughput accounting, cost of quality, and financial versus operational performance measures. Emphasis on linkages to such advanced manufacturing systems as cellular manufacturing, flexible manufacturing, JIT, Lean, and ERP. **PREREQS:** ENGR 390

IE 497. ^MIME CAPSTONE DESIGN (4). Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. **CROSSLISTED** as ESE 497 and ME 497. (Writing Intensive Course) **PREREQS:** ((IE 355 and IE 356 and IE 366 and IE 367 and IE 368 and WR 327)) or ((ENGR 322 and (ENGR 391 or ENGR 391H) and ME 250 and (ME 312 or ME 312H) and (ME 317 or ME 317H) and (ME 332 or ME 332H) and ME 383 and WR 327 and (ST 314 or ST 314H)(ENGR 390 or BA 360) and IE 425 and (ME 331 or ME 331H) and ESE 355 and ESE 360

IE 498. ^MIME CAPSTONE DESIGN (4). Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. **CROSSLISTED** as ESE 498 and ME 498. (Writing Intensive Course) **PREREQS:** ESE 497 or IE 497 or ME 497

IE 499. SELECTED TOPICS IN SYSTEM STUDIES (1-5). Recent advances in industrial engineering pertaining to the theory and application of system studies. Analysis and design of natural resource systems; evaluation; detection extraction; processing and marketing systems; advanced design of production systems with reference to social, economic, and regional planning; human engineering studies of man-machine systems; applications of operations research techniques. Nonsequence course. Not offered every term. This course is repeatable for a maximum of 99 credits.

IE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

IE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

IE 506. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

IE 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

IE 511. VISUAL PROGRAMMING FOR INDUSTRIAL APPLICATIONS (4). Object-oriented modeling, Unified Modeling Language, software development concepts, file and database connectivity, and visual programming skills (Microsoft Visual Basic) for use in developing industrial applications, such as process monitoring and supply chain management. **PREREQS:** IE 212

IE 512. INFORMATION SYSTEMS ENGINEERING (4). Framework for enterprise information systems. Engineering and scientific systems. Requirements definition, enhanced entity relationship modeling, logical modeling, structured query language, relational model, referential integrity. Lec/lab.

IE 515. SIMULATION AND DECISION SUPPORT SYSTEMS (4). Analysis and design of integrated manufacturing systems through the application of computer modeling techniques. Model validation and verification. Application of simulation and decision support systems to management and engineering. Lec/lab. **PREREQS:** ST 314

IE 518. TELECOMMUNICATION CONCEPTS (3). Telecommunication concepts for industrial applications. OSI reference model, local area networks, wide area networks, internet architecture. Taught fall in even years. **PREREQS:** IE 212 and previous programming experience.

IE 519. WIRELESS NETWORKS (3). RF fundamentals, ISO 802.11 standards, spread spectrum technology, narrow band technology, direct sequence and frequency hopping transmission schemes, electromagnetic

interference, design of indoor wireless networks. **PREREQS:** IE 518

IE 521. INDUSTRIAL SYSTEMS OPTIMIZATION I (3). Techniques for analysis and solution of problems in industrial and management systems. Emphasis on application of linear and integer programming and extensions. **PREREQS:** MTH 341

IE 522. INDUSTRIAL SYSTEMS OPTIMIZATION II (3). Techniques for analysis and solution of problems in industrial and management systems. Emphasis on applications of dynamic programming, Markovian processes, and questions as applied to industrial problems. **PREREQS:** ST 314

IE 531. MESO-SCALE MANUFACTURING (3). Meso-scale processing techniques for fabricating microfluidic devices, especially microtechnology-based energy, chemical and biological systems. Introduction to microlamination and techniques for lamina patterning, registration and bonding. Lec/lab. **PREREQS:** Graduate standing in science or engineering.

IE 534. CERAMICS PROCESSING (3). Introduction to materials, manufacturing methods, properties and applications of ceramics. The emphasis of the course is on understanding and exploring the inter-relationships between material characteristics, processing variables and component geometry in the context of ceramics. **PREREQS:** Graduate standing in engineering or science, or senior standing in manufacturing engineering.

IE 536. LEAN MANUFACTURING SYSTEMS ENGINEERING (4). The planning, evaluation, deployment, and integration of lean manufacturing theory and methods. Examines manufacturing processes/equipment and systems, e.g. planning/control, product design, supply chain resource management. Lec/lab.

IE 537. VIRTUAL AND AUTOMATED MANUFACTURING SYSTEMS (4). Automated manufacturing system design and operations-sensors, actuators, programmable controls. Concepts for integrated design/verification of virtual system models, control and hardware implementation. **PREREQS:** Graduate standing in engineering.

IE 545. HUMAN FACTORS ENGINEERING (4). Analysis and design of work systems considering human characteristics, capabilities and limitations. Analysis and design of displays, controls, tools, and workstations. Human performance analysis. Human factors research methods. **PREREQS:** Graduate standing.

IE 546. HUMAN-MACHINE SYSTEMS ENGINEERING (3). Development of safe, high performance human-machine systems. System/function/task analysis, function allocation, design, mockups and rapid prototyping, human factors test and evaluation. Critical examination of the human-factors and domain-specific literature to identify human factors problems, and knowledge and methods to address those problems. **PREREQS:** IE 545

IE 548. COGNITIVE ENGINEERING (3). Theories and models of human sensory, cognitive, and motor performance pertaining to the operation of complex systems. Applications to human-machine systems engineering. Research topics and methods related to cognitive engineering. **PREREQS:** Graduate standing in science or engineering and IE 545

IE 552. DESIGN OF INDUSTRIAL EXPERIMENTS (3). A first course in design of experiments with an emphasis on applications and fundamental data analysis methods. Basic statistical inference, analysis of variance, blocking, general factorial designs, and two-level factorial designs are covered. **PREREQS:** ST 314

IE 553. DESIGN OF INDUSTRIAL EXPERIMENTS II (3). This second course in design of experiments is a continuation of IE

552. The same textbook is used. Topics covered include two-level fractional factorial designs, regression models, response surface methods, rules for expected sum of squares and expected mean squares, a summary of the "no-name" approach to DOE, and analysis of experiments with unbalanced data (time permitting). **PREREQS:** IE 552

IE 563. ADVANCED PRODUCTION PLANNING AND CONTROL (3). Application of quantitative and heuristic methods to problems of production, material, and capacity planning. Mathematical models for inventory systems, sequencing, and scheduling. Assembly line balancing methods. Just-in-time manufacturing. **PREREQS:** IE 521 and ST 314

IE 564. DESIGN AND SCHEDULING OF CELLULAR MANUFACTURING SYSTEMS (3). Designing manufacturing cells. Impact of alternate process plan on cell design. Part-machine assignment to cells. Disaggregated manufacturing cells. Group scheduling. **PREREQS:** Graduate standing, computer experience.

IE 570. MANAGEMENT SYSTEMS ENGINEERING (4). Improvement of organizational performance through the design and implementation of systems that integrate personnel, technological, environmental, and organizational variables. Topics include performance assessment and measurement as well as improvement methodologies. **PREREQS:** Graduate standing.

IE 571. PROJECT MANAGEMENT IN ENGINEERING (3). Critical issues in the management of engineering and high-technology projects are discussed. Time, cost, and performance parameters are analyzed from the organizational, people, and resource perspectives. Network optimization and simulation concepts are introduced. Resource-constrained project scheduling case discussions and a term project are included. **PREREQS:** Junior standing in engineering.

IE 581. OPERATIONS MANAGEMENT (4). Critical and current issues on the implementation of operations management strategies for the engineering manager. Includes aspects of operations in an engineering management environment such as work systems design, forecasting, strategy, facilities location and design, management of quality and resources planning and management. **PREREQS:** IE 571

IE 582. INTRODUCTION TO MANAGEMENT FOR ENGINEERS AND SCIENTISTS (4). An introduction to concepts, tools, and practices necessary for a broad understanding of the roles of engineering and technical managers. A mix of research results, case studies, and experiential learning is used to bolster theories of management, with focus on technical organizations.

IE 583. ADVANCED ENGINEERING ECONOMICS ANALYSIS (4). Examines the economics dimension of engineering management, from costing techniques to financial analysis. Topics include industrial cost analysis and estimation, economic planning, forecasting, and budgeting, and financial analysis for engineering and engineering management. **PREREQS:** Basic courses in engineering economic analysis (ENGR 390) or instructor's consent.

IE 592. SELECTED TOPICS IN SYSTEM STUDIES (1-5). Recent advances in industrial engineering pertaining to the theory and application of system studies. Analysis and design of natural resource systems; evaluation; detection extraction; processing and marketing systems; advanced design of production systems with reference to social, economic, and regional planning; human engineering studies of man-machine systems; applications of operations research techniques. Nonsequence course. Not offered every term.

IE 594. RESEARCH METHODS IN ENGINEERING (3). Introduction to research methodologies including surveys, interviews, quasi-experimentation, and case studies. Methods for research design, and collection and analysis of data. **PREREQS:** Graduate standing or instructor approval.

IE 599. SELECTED TOPICS IN SYSTEM STUDIES (1-5). Recent advances in industrial engineering pertaining to the theory and application of system studies. Analysis and design of natural resource systems; evaluation; detection extraction; processing and marketing systems; advanced design of production systems with reference to social, economic, and regional planning; human engineering studies of man-machine systems; applications of operations research techniques. Nonsequence course. Not offered every term. This course is repeatable for a maximum of 99 credits.

IE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

IE 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

IE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

IE 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

■ MATERIALS SCIENCE COURSES

MATS 221. THE SCIENCE, ENGINEERING AND SOCIAL IMPACT OF NANOTECHNOLOGY (3). Nanotechnology is an emerging engineering field that manipulates atoms and molecules to fabricate new materials and tiny devices. Properties of nanostructured materials, manufacturing methods, characterization methods, and impact on health and safety. Benefits and concerns about nanotechnology will be assessed. Lec/rec. **CROSSLISTED** as ENGR 221. **PREREQS:** One year of college science.

MATS 321. INTRODUCTION TO MATERIALS SCIENCE (4). Crystal structure, microstructure, and physical properties of metals, ceramics, polymers, composites, and amorphous materials. Also includes elementary mechanical behavior and phase equilibria. Lec. **CROSSLISTED** as ENGR 321. **PREREQS:** (CH 202 or CH 222 or CH 231 or CH 231H or CH 224H)

MATS 322. MECHANICAL PROPERTIES OF MATERIALS (3). Mechanical behavior of materials, relating laboratory test results to material structure, and elements of mechanical analysis. Lec/lab. **CROSSLISTED** as ENGR 322. **PREREQS:** (ENGR 213 or ENGR 213H) and (ENGR 321 or ENGR 321H or MATS 321)

MATS 455. EXPERIMENTAL TECHNIQUES IN MATERIAL SCIENCE (4). Materials processing, characterization, computational and data analysis techniques in materials science. Focus on processing-structure-property relationships. Lec/lab. **CROSSLISTED** as ME 455. This course is repeatable for a maximum of 8 credits. **PREREQS:** (ENGR 321 or ENGR 321H) and ME 570 or equivalent.

MATS 478. THIN FILM MATERIALS CHARACTERIZATION AND PROPERTIES (3). Processing of thin films and characterization of the microstructure; diffusion and solid state reactions; mechanical, magnetic and electronic properties of thin films. **CROSSLISTED** as ME 478. **PREREQS:** ((ENGR 311 or ENGR 311H or ME 311) and (ENGR 321 or MATS 321) and (ENGR 322 or MATS 322))

MATS 509. MATERIALS SCIENCE SEMINAR (1). Student participation seminar experience for one credit; students will listen to seminars concerning ongoing research activities within materials

science. Students will also have the opportunity to present their own research results periodically. Graded P/N. **CROSSLISTED** as ME 509.

MATS 555. EXPERIMENTAL TECHNIQUES IN MATERIAL SCIENCE (4). Materials processing, characterization, computational and data analysis techniques in materials science. Focus on processing-structure-property relationships. Lec/lab. **CROSSLISTED** as ME 555. This course is repeatable for a maximum of 8 credits. **PREREQS:** ME 570 and (ENGR 321 or ENGR 321H)

MATS 570. STRUCTURE PROPERTY RELATIONS IN MATERIALS (4). Fundamentals of the interactions between the structure and properties of materials. Atomic bonding and atom interactions. Geometric and algebraic representations of symmetry. Introduction to phase equilibria. Phenomenological background of elasticity and plasticity in materials. Anisotropic materials and tensor representations. Influence of structure on thermal, electrical, and optical properties of materials. **CROSSLISTED** as ME 570.

MATS 571. ELECTRONIC PROPERTIES OF MATERIALS (4). Development of a quantitative description of the electronic structure of solids starting with the quantum mechanical model of the atom, atomic bonding, and band theory of solids. Quantitative description of the electronic properties of metals, semiconductors, and insulators. **CROSSLISTED** as ME 571. **PREREQS:** CH 545 or ME 570 or equivalent.

MATS 578. THIN FILM MATERIALS CHARACTERIZATION AND PROPERTIES (3). Processing of thin films and characterization of the microstructure; diffusion and solid state reactions; mechanical, magnetic and electronic properties of thin films. **CROSSLISTED** as ME 578. **PREREQS:** (ENGR 311 or ENGR 311H or ME 311 or ME 311H) and (ENGR 321 or ENGR 321H or MATS 321) and (ENGR 322 or MATS 322)

MATS 580. MATERIALS SELECTION (3). Selecting materials for engineering applications. The major families of materials, their properties, and how their properties are controlled; case studies and design projects emphasizing materials selection. Lec/lab. **CROSSLISTED** as ME 580. **PREREQS:** ENGR 322

MATS 581. THERMODYNAMICS OF SOLIDS (4). Thermodynamics of solutions and phase equilibrium. Phase diagrams and invariant reactions. Order and disorder in solutions. Applications to advanced materials development. Lec/lab. **CROSSLISTED** as ME 581.

MATS 582. RATE PROCESSES IN MATERIALS (4). Diffusion in solids, including vacancy and interstitial and short-circuit diffusion. Phase transformations including classic nucleation and growth theory. Applications to materials development. Laboratory will emphasize microstructural evaluation and quantitative metallography. Lec/lab. **CROSSLISTED** as ME 582.

MATS 584. ADVANCED FRACTURE OF MATERIALS (4). Fracture mechanics will be used as a basis for predicting failure of materials, understanding failure mechanisms, and identifying causes of failure. Course will include discussion of recent journal articles, experimental demonstrations, and analysis of real fracture data. **CROSSLISTED** as ME 584. **PREREQS:** ENGR 322 or equivalent is recommended.

MATS 587. DISLOCATIONS, DEFORMATION, AND CREEP (4). The effects of point, line, and planar defects on plastic deformation and creep behavior in solids will be discussed with emphasis on the role of dislocations and vacancies. **CROSSLISTED** as ME 587. **PREREQS:** ENGR 322 or equivalent.

MATS 588. COMPUTATIONAL METHODS IN MATERIALS SCIENCE (4). A broad introduction to important materials science simulation methods. These include molecular dynamics, density functional theory, and Monte Carlo

methods. Learning is through a mixture of lecture and hands-on lab projects in which students use computational methods to explore and reinforce fundamental concepts in materials science. Lec/lab. **CROSSLISTED** as ME 588. **PREREQS:** Experience with Matlab or Mathematica or an equivalent numerical and programming environment.

MATS 671. ELECTRONIC PROPERTIES OF OXIDES (4). Band theory of solids applied to metal oxide materials. Includes metallic oxides, non-stoichiometric semiconductors and associated defect chemistry, high temperature superconductors, electrostatics, linear dielectrics, non-linear dielectrics, piezoelectrics, and the optical properties of oxides. **CROSSLISTED** as ME 671. **PREREQS:** ME 571 or MATS 571 or PH 575

■ MECHANICAL ENGINEERING COURSES

ME 101. INTRODUCTION TO MECHANICAL ENGINEERING (3). Orientation to mechanical engineering; methods used in solving engineering problems; experience with typical mechanical engineering projects and problems; ethics, curricula and engineering careers. Lec/rec. **PREREQS:** Trigonometry.

ME 206. PROJECTS (1-16). **PREREQS:** Sophomore standing.

ME 250. INTRODUCTION TO MANUFACTURING PROCESSES (1). Use of measuring and layout tools, interpretation of blueprints and drawings, identification of engineering materials. Operation of machine tools, including calculation of machining parameters. Operation of gas and MIG welding equipment. Lec/lab. Graded P/N. **PREREQS:** ENGR 248 and ME or IE professional school admission.

ME 299. SPECIAL TOPICS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

ME 306. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing.

ME 311. INTRODUCTION TO THERMAL-FLUID SCIENCES (4). Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. **CROSSLISTED** as NE 311. **PREREQS:** ((ENGR 212 or ENGR 212H) and (MTH 256 or MTH 256H))

ME 311H. INTRODUCTION TO THERMAL-FLUID SCIENCES (4). Basic concepts of fluid mechanics, thermodynamics and heat transfer are introduced. Conservation of mass, energy, moment and the second law of thermodynamics are included. **CROSSLISTED** as NE 311H. **PREREQS:** ((ENGR 212 or ENGR 212H) and (MTH 256 or MTH 256H)) and Honors College approval required.

ME 312. THERMODYNAMICS (4). Exergy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. **CROSSLISTED** as NE 312. **PREREQS:** (MTH 256 or MTH 256H) and (ME 311 or ME 311H or NE 311 or NE 311H)

ME 312H. THERMODYNAMICS (4). Exergy destruction, machine and cycle processes, law of corresponding states, non-reactive gas mixtures, reactive mixtures, thermodynamics of compressible fluid flow. **CROSSLISTED** as NE 312H. **PREREQS:** (MTH 256 or MTH 256H) and (ME 311 or ME 311H or NE 311 or NE 311H) and Honors College approval required.

ME 316. MECHANICS OF MATERIALS (3). Determination of stresses, deflections, and stability of deformable bodies with an introduction to finite element analysis. **PREREQS:** (ENGR 213 or ENGR 213H) and (MTH 256 or MTH 256H)

ME 317. INTERMEDIATE DYNAMICS (4). Continuation of the study of kinematics and kinetics of particles and rigid bodies, with applications to mechanical systems of current interest to engineers. **PREREQS:** ((ENGR 212 or ENGR 212H) and (MTH 256 or MTH 256H))

ME 317H. INTERMEDIATE DYNAMICS (4). Continuation of the study of kinematics and kinetics of particles and rigid bodies, with applications to mechanical systems of current interest to engineers. **PREREQS:** ((ENGR 212 or ENGR 212H) and (MTH 256 or MTH 256H)) and Honors College approval required.

ME 331. INTRODUCTORY FLUID MECHANICS (4). Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. **CROSSLISTED** as NE 331. **PREREQS:** ((MTH 254 or MTH 254H) and (MTH 256 or MTH 256H) and (ENGR 212 or ENGR 212H) and (ENGR 311 or ENGR 311H or ME 311 or ME 311H or NE 311 or NE 311H))

ME 331H. INTRODUCTORY FLUID MECHANICS (4). Introduces the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. **CROSSLISTED** as NE 331H. **PREREQS:** ((MTH 254 or MTH 254H) and (MTH 256 or MTH 256H) and (ENGR 212 or ENGR 212H) and (ENGR 311 or ENGR 311H or ME 311 or ME 311H or NE 311 or NE 311H)) and Honors College approval required.

ME 332. HEAT TRANSFER (4). A treatment of conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. **CROSSLISTED** as NE 332. **PREREQS:** ((MTH 256 or MTH 256H) and (ENGR 212 or ENGR 212H) and (ME 311 or ME 311H or NE 311 or NE 311H) and (ME 331 or ME 331H or NE 331 or NE 331H))

ME 332H. HEAT TRANSFER (4). A treatment of conductive, convective and radiative energy transfer using control volume and differential analysis and prediction of transport properties. **CROSSLISTED** as NE 332H. **PREREQS:** ((MTH 256 or MTH 256H) and (ENGR 212 or ENGR 212H) and (ME 311 or ME 311H or NE 311 or NE 311H) and (ME 331 or ME 331H or NE 331 or NE 331H)) and Honors College approval required.

ME 348. ADVANCED SOLID MODELING (1). Practical application of graphical communication theory using advanced solid modeling software to capture design intent and generate engineering drawings. Lec/lab. Graded P/N. **PREREQS:** ENGR 248

ME 373. MECHANICAL ENGINEERING METHODS (3). Analytical and numerical methods for solving representative mechanical engineering problems. Lec/rec. **PREREQS:** (ENGR 112 or ENGR 112H) and (MTH 256 or MTH 256H) and / or equivalent.

ME 373H. MECHANICAL ENGINEERING METHODS (3). Analytical and numerical methods for solving representative mechanical engineering problems. Lec/rec. **PREREQS:** (ENGR 112 or ENGR 112H) and (MTH 256 or MTH 256H) and / or equivalent. Honors College approval required.

ME 382. INTRODUCTION TO DESIGN (4). Organization, planning, economics, and the use of creativity and optimization in solving mechanical design problems. Case studies and/or industrial design problems. Lec/lab. **PREREQS:** ENGR 248 and ME 250* and ME 316*

ME 382H. INTRODUCTION TO DESIGN (4). Organization, planning, economics, and the use of creativity and optimization in solving mechanical design problems. Case studies and/or industrial design problems. Lec/lab. **PREREQS:** ENGR 248

and ME 250* and ME 316* and Honors College approval required.

ME 383. MECHANICAL COMPONENT DESIGN (4). Failure analysis and design of machine components. Lec/lab. **PREREQS:** (ME 316 and (ME 382 or ME 382H))

ME 383H. MECHANICAL COMPONENT DESIGN (4). Failure analysis and design of machine components. Lec/lab. **PREREQS:** (ME 316 and (ME 382 or ME 382H)) and Honors College approval required.

ME 401. RESEARCH (1-16). This course is repeatable for a maximum of 9 credits.

ME 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ME 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 9 credits.

ME 405H. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 9 credits. **PREREQS:** Honors College approval required.

ME 406. PROJECTS (1-16). This course is repeatable for a maximum of 15 credits.

ME 407. SEMINAR (1-16). This course is repeatable for a maximum of 2 credits.

ME 410. INTERNSHIP (1-16). Credits may not apply toward BS degree in Mechanical Engineering. Graded P/N. **PREREQS:** Departmental approval required.

ME 412. DESIGN OF MECHANISMS (4). Analysis and study of the function, classification, position, velocity, and acceleration of multi-element mechanical linkages and mechanisms. Synthesis of mechanisms for specified multiple point paths, quick return, dwell, and straight-line motion. The lecture will instruct students in the kinematic analysis and synthesis of mechanisms through the use of theory and software packages. The laboratory will familiarize students with a modern mechanism design and animation software package. Lec/lab. **PREREQS:** ME 317

ME 413. COMPUTER-AIDED DESIGN AND MANUFACTURING (4). Introduces students to the use of computers in several extended areas of product design and manufacturing. These areas include product data management in a sustaining engineering environment; computer-aided manufacturing (CAM) and computer numerical control (CNC) operations and technology; the use of programmable logic controllers (PLCs) for industrial control systems; and the use of simulation software for virtual prototyping for Design/Manufacturing/Validation. Lec/lab. **PREREQS:** (ME 382 or ME 382H or IE 366)

ME 420. APPLIED STRESS ANALYSIS (4). Elasticity theory, failure theories, energy methods, finite element analysis. **PREREQS:** ME 316

ME 422. MECHANICAL VIBRATIONS (4). Dynamic response of single and multiple degree-of-freedom systems. **PREREQS:** ME 317

ME 424. FINITE ELEMENT MODELING OF MECHANICAL ENGINEERING SYSTEMS (3). Application of modern finite element code in the analysis of complex mechanical engineering systems. Extensive use of engineering workstations. Lec/lab. **PREREQS:** (ME 420 or ME 520)

ME 430. SYSTEMS DYNAMICS AND CONTROL (4). Modeling and analysis of linear continuous systems in time and frequency domains. Fundamentals of single-input-single-output control system design. **CROSSLISTED** as ECE 451. **PREREQS:** (ME 317 or (ECE 351 and ECE 352 and (ENGR 212 or ENGR 212H))

ME 430H. SYSTEMS DYNAMICS AND CONTROL (4). Modeling and analysis of linear continuous systems in time and frequency

domains. Fundamentals of single-input-single-output control system design. **CROSSLISTED** as ECE 451. **PREREQS:** (ME 317 or (ECE 351 and ECE 352 and (ENGR 212 or ENGR 212H)) and Honors College approval required.

ME 441. INTEGRATED THERMAL/FLUID SYSTEM DESIGN (2). Comprehensive design of systems consisting of modular heat exchanger(s) and piping flow networks. Pump/compressor/fan selection, mechanical and design analyses, and material selection for compatibility considered in design. Lec/rec. **PREREQS:** ((ME 332 or ME 332H) and (ME 373 or ME 373H) and (ME 382 or ME 382H) and (ENGR 321 or ENGR 321H))

ME 444. ADVANCED POWER GENERATION SYSTEMS (4). Thermal mechanical evaluation of modern power generation technologies, including fossil and nuclear Rankine cycle power plants, gas turbines, cogeneration power plants, distributed power generation and fuel cells. Lec/rec. **PREREQS:** (ME 312 or ME 312H) and (ME 332 or ME 332H)

ME 445. INTRODUCTION TO COMBUSTION (3). Study of combustion science based on the background of chemistry, thermodynamics, fluid mechanics and heat transfer. Stoichiometry, energetics of chemical reactions, flame temperature, equilibrium product analyses, chemical kinetics, and chain reactions. **PREREQS:** (ME 312 and (ME 332 or ME 332H))

ME 450. APPLIED HEAT TRANSFER (4). An intermediate heat transfer course seeking to lay a foundation for determining the heating and cooling characteristics with a variety of modern and classical processes. Included is design of multi-component heat transfer systems. Lecture, 110 minutes twice per week. **PREREQS:** (ME 332 or ME 332H)

ME 451. INTRODUCTION TO INSTRUMENTATION AND MEASUREMENT SYSTEMS (4). Function, operation, and application of common mechanical engineering instruments, measurement principles, and statistical analysis. Major elements of measurement systems, including transduction, signal conditioning, and data recording. Function and operation of digital data acquisition systems. Lec/lab. **PREREQS:** ((ENGR 202 or ENGR 202H) and (ME 311 or ME 311H) and ME 316 and ME 317 and (ME 373 or ME 373H) and (ST 314 or ST 314H))

ME 452. THERMAL AND FLUIDS SCIENCES LABORATORY (4). Course emphasis is on experiments related to thermodynamics, heat transfer, and fluid mechanics. Proper experimental methods, data and uncertainty analysis related to thermal and fluids measurements are discussed. **PREREQS:** (ME 311 or ME 311H) and (ME 331 or ME 331H) and (ME 332 or ME 332H)

ME 452H. THERMAL AND FLUIDS SCIENCES LABORATORY (4). Course emphasis is on experiments related to thermodynamics, heat transfer, and fluid mechanics. Proper experimental methods, data and uncertainty analysis related to thermal and fluids measurements are discussed. **PREREQS:** (ME 311 or ME 311H) and (ME 331 or ME 331H) and (ME 332 or ME 332H) and Honors College approval required.

ME 453. STRUCTURE AND MECHANICS LABORATORY (4). Techniques for measurement of structural response and material properties. Proper use of rosette strain gauges, load cells, and displacement transducers. Full-field strain measurement using photoelasticity and digital image correlation. Proper implementation of material testing standards. Characterization of anisotropic composite materials. **PREREQS:** ME 451

ME 454. DYNAMIC MECHANICAL SYSTEMS LABORATORY (4). Design, implementation, and use of portable digital data acquisition systems for characterization and control of dynamic mechanical systems. Emphasis on durable

systems developed for harsh environments. Lec/lab. **PREREQS:** ME 451

ME 455. EXPERIMENTAL TECHNIQUES IN MATERIAL SCIENCE (4). Materials processing, characterization, computational and data analysis techniques in materials science. Focus on processing-structure-property relationships. Lec/lab. **CROSSLISTED** as MATS 455. This course is repeatable for a maximum of 8 credits. **PREREQS:** (ENGR 321 or ENGR 321H) and ME 570 or equivalent.

ME 456. INTELLIGENT ROBOTICS (4). Foundations of probabilistic reasoning for robotics. Topics include state estimation, robot motion, perception, localization and decision making under uncertainty. **PREREQS:** ME 373 or ME 373H or ECE 353 or CS 331

ME 460. INTERMEDIATE FLUID MECHANICS (4). Ideal fluid flow including potential flow theory. Introduction to compressible flow. Viscous flow and boundary layer theory. Introduction to turbulence. **PREREQS:** (ME 331 or ME 331H)

ME 461. GAS DYNAMICS (4). Studies one-dimensional isentropic flow, nozzles, diffusers, normal and oblique shocks, compressible flow with friction and heating, and an introduction to propulsion systems. **PREREQS:** (ME 312 and (ME 331 or ME 331H))

ME 478. THIN FILM MATERIALS CHARACTERIZATION AND PROPERTIES (3). Processing of thin films and characterization of the microstructure; diffusion and solid state reactions; mechanical, magnetic and electronic properties of thin films. **CROSSLISTED** as MATS 478. **PREREQS:** ((ENGR 311 or ENGR 311H or ME 311 or ME 311H) and (ENGR 321 or ENGR 321H or MATS 321) and (ENGR 322 or MATS 322))

ME 480. MATERIALS SELECTION (3). Selecting materials for engineering applications. The major families of materials, their properties, and how their properties are controlled; case studies and design projects emphasizing materials selection. **PREREQS:** ENGR 322

ME 483. COMPOSITE MATERIALS (3). Fibers and matrices, mechanics of composites, reinforcement and failure mechanisms, properties and applications. Lec/lab. **PREREQS:** ENGR 322

ME 484. FRACTURE OF MATERIALS (3). Fracture mechanics and fatigue mechanisms: mechanisms of ductile and brittle fracture. Environmentally induced fracture and fatigue. Considerations in design of engineering materials and structures will be discussed. **PREREQS:** ENGR 322

ME 497. ^MIME CAPSTONE DESIGN (4). Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. **CROSSLISTED** as ESE 497 and IE 497. (Writing Intensive Course) **PREREQS:** ((IE 355 and IE 356 and IE 366 and IE 367 and IE 368 and WR 327)) or ((ENGR 322 and (ENGR 391 or ENGR 391H) and ME 250 and (ME 312 or ME 312H) and (ME 317 or ME 317H) and (ME 332 or ME 332H) and ME 383 and WR 327 and (ST 314 or ST 314H)(ENGR 390 or BA 360) and IE 425 and (ME 331 or ME 331H) and ESE 355 and ESE 360

ME 498. ^MIME CAPSTONE DESIGN (4). Product design; selection and replacement of major tools, processes, and equipment; paperwork controls; subsystem revision; system or plant revision; selection and training of personnel; long-run policies and strategy. **CROSSLISTED** as ESE 498 and IE 498. (Writing Intensive Course) **PREREQS:** ESE 497 or IE 497 or ME 497

ME 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ME 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

ME 502. INDEPENDENT STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

ME 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ME 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

ME 506. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

ME 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

ME 508. THERMAL FLUID SCIENCE SEMINAR (1). Student participation seminar experience for 1 course credit. Students will present and listen to seminars concerning ongoing research within the thermal fluid sciences.

ME 509. MATERIALS SCIENCE SEMINAR (1). Student participation seminar experience for one credit; students will listen to seminars concerning ongoing research activities within materials science. Students will also have the opportunity to present their own research results periodically. Graded P/N. **CROSSLISTED** as MATS 509.

ME 511. CAD/CAM III (3). Tolerance analysis and application in design/manufacturing practice. Tolerance specification, analysis, ANSI and ISQ standards, computer-based metrology for qualification of parts, management of imperfect geometry through geometric dimensioning and tolerancing. **PREREQS:** Advanced engineering undergraduate or graduate standing.

ME 512. DESIGN OF MECHANISMS (4). Analysis and study of the function, classification, position, velocity, and acceleration of multi-element mechanical linkages and mechanisms. Synthesis of mechanisms for specified multiple point paths, quick return, dwell, and straight-line motion. The lecture will instruct students in the kinematic analysis and synthesis of mechanisms through the use of theory and software packages. The laboratory will familiarize students with a modern mechanism design and animation software package. Lec/lab. **PREREQS:** ME 317

ME 514. MECHATRONICS (4). Focuses on the integration of electronics and use of digital control and microcontroller technology with mechanical systems. Topics cover sensors, actuators, data acquisition and microcontrollers. Lec/lab. **PREREQS:** ME 373 and ME 430

ME 515. RISK AND RELIABILITY ANALYSIS IN ENGINEERING DESIGN (4). Fundamentals of risk, uncertainty, and reliability. Methods to analyze and quantify the risk of failures, and the reliability of complex systems, including fault tree analysis, reliability block diagrams, probabilistic risk assessment. Introduction to research methods for risk and reliability analysis during the early design stages.

ME 516. MODELING AND ANALYSIS OF COMPLEX SYSTEMS (4). Introduction to challenges and considerations when designing complex systems. Fundamentals of systems engineering and methods used in practice. Models and tools used to enable the use of models for trade studies during the design of complex systems. Model-based design environments and methodologies. Introduction to decision support tools in design.

ME 517. OPTIMIZATION IN DESIGN (3). Optimization methods as applied to engineering design, theory and application of nonlinear optimization techniques for multivariate unconstrained and constrained problems. Model boundedness and sensitivity. Not offered every year.

ME 518. THE CONCURRENT DESIGN OF PRODUCTS (3). Concurrent design requires the systematic communication of information across the entire product development and manufacturing enterprise. Focuses on the structure and methods to enable concurrent design. These methods

include the management of design information, quality function deployment (QFS), functional modeling, design for assembly (DFA), parametric design, and others.

ME 519. SELECTED TOPICS IN DESIGN (3-4). Topics in mechanical design selected from the following: design processes, quality engineering, design for assembly, statistical machine design, the Taguchi method, and parametric design. This course is repeatable for a maximum of 32 credits.

ME 520. APPLIED STRESS ANALYSIS (4). Elasticity theory, failure theories, energy methods, finite element analysis. **PREREQS:** ME 316

ME 522. MECHANICAL VIBRATIONS (4). Dynamic response of single and multiple degree-of-freedom systems. **PREREQS:** ME 317

ME 523. ADVANCED STRESS ANALYSIS (4). Analytical and finite element techniques applied to plate/shell structures and to nonlinear problems in stress analysis including plasticity effects, creep, large deflections, buckling and contact mechanics. **PREREQS:** ME 520

ME 524. FINITE ELEMENT MODELING OF MECHANICAL ENGINEERING SYSTEMS (3). Application of modern finite element code in the analysis of complex mechanical engineering systems. Extensive use of engineering workstations. Lec/lab. **PREREQS:** ME 520

ME 526. NUMERICAL METHODS FOR ENGINEERING ANALYSIS (3). Numerical solutions of linear equations, difference equations, ordinary and partial differential equations. **CROSSLISTED** as NE 526. **PREREQS:** Programming experience and previous exposure to numerical methods, or instructor approval.

ME 529. SELECTED TOPICS IN SOLID MECHANICS (3-4). Advanced topics in solid mechanics emphasizing research applications of current interest. This course is repeatable for a maximum of 32 credits.

ME 531. LINEAR MULTIVARIABLE CONTROL SYSTEMS I (4). Theoretical design of control systems for systems modeled by linear multivariable differential equations. Topics covered include controllability, observability, state feedback control, pole placement, output feedback, estimator design, and control designs that include both estimators and regulators.

ME 532. LINEAR MULTIVARIABLE CONTROL SYSTEMS II (4). Focuses on designing control systems where the device to be controlled is an uncertain system, yet can be described by a set of linear differential equations. Lec. **PREREQS:** ME 531 and/or equivalent.

ME 533. NONLINEAR DYNAMIC ANALYSIS (4). Course focuses on understanding the behavior of nonlinear dynamic systems of interest to mechanical engineers. Lec. **PREREQS:** ME 317 or equivalent.

ME 534. NONLINEAR MULTIVARIABLE CONTROL SYSTEMS (4). Focuses on designing control systems when the device to be controlled is mathematically described by a nonlinear set of differential equations. Lec. **PREREQS:** ME 533 and/or equivalent.

ME 535. ADVANCED DYNAMICS (4). A graduate course focused on dynamics of rigid bodies using Newtonian mechanics. Lec. **PREREQS:** ME 317 or equivalent.

ME 536. ACTUATOR DYNAMICS (4). Focuses on how inertia, spring compliance, and other passive dynamics affect highly dynamic, software-controlled systems. Examples include robotic manipulation tasks, robot-human interaction, CNC machines, or legged locomotion. **PREREQS:** ME 535 and Graduate standing or with approval of instructor.

ME 537. LEARNING-BASED CONTROL (4). Provides an introduction to learning systems and their application to the control of nonlinear

systems. Covered topics include neural networks, reinforcement learning, and evolutionary algorithms. Includes project component in which students write a technical paper and give a conference style presentation based on their project.

ME 538. AUTONOMOUS AGENTS AND MULTI-AGENT SYSTEMS (4). Provides an introduction to autonomous agents and multi-agent systems. In particular, it focuses on how to use agents as building blocks for different autonomous systems. Covered topics include reinforcement learning, game theory, swarms, auctions, and collectives. Because this course covers a constantly evolving field, there will be a significant paper reading component in addition to the regular lectures. Students are expected to spend at least three hours a week reading, discussing and critiquing assigned papers.

ME 539. SELECTED TOPICS IN DYNAMICS (1-16). Advanced topics in dynamics emphasizing research applications of current interest. This course is repeatable for a maximum of 30 credits.

ME 544. ADVANCED POWER GENERATION SYSTEMS (4). Thermal mechanical evaluation of modern power generation technologies, including fossil and nuclear Rankine cycle power plants, gas turbines, cogeneration power plants, distributed power generation and fuel cells. Lec/rec. **PREREQS:** ME 312 and (ME 332 or ME 332H)

ME 545. INTRODUCTION TO COMBUSTION (3). Study of combustion science based on the background of chemistry, thermodynamics, fluid mechanics and heat transfer. Stoichiometry, energetics of chemical reactions, flame temperature, equilibrium product analyses, chemical kinetics, and chain reactions. **PREREQS:** ME 312 and (ME 332 or ME 332H)

ME 546. CONVECTION HEAT TRANSFER (3). An advanced treatment of forced and natural convection heat transfer processes emphasizing underlying physical phenomena. Current topical literature will be considered; analytical and numerical problem solving is included. **PREREQS:** (ME 332 or ME 332H) and ME 373

ME 547. CONDUCTIVE HEAT TRANSFER (3). Analytical and numerical solutions to steady state and transient conduction problems. **PREREQS:** (ME 332 or ME 332H) and ME 373

ME 548. RADIATION HEAT TRANSFER (3). Analytical and numerical methods of solution of thermal radiation problems. **PREREQS:** (ME 332 or ME 332H) and ME 373

ME 549. SELECTED TOPICS IN HEAT TRANSFER (3). Topics in heat transfer including advanced problems in conduction, radiation, and convection. Additional examination of heat transfer in multiphase systems, inverse problems, combined modes, equipment design, solution techniques and other topics of current interest considered, including extensive use of current literature. Not all topics covered each year. This course is repeatable for a maximum of 9 credits.

ME 550. APPLIED HEAT TRANSFER (4). An intermediate heat transfer course seeking to lay a foundation for determining the heating and cooling characteristics with a variety of modern and classical processes. Included is design of multi-component heat transfer systems. Lecture, 110 minutes twice per week. **PREREQS:** ME 332 or ME 332H

ME 552. MEASUREMENTS IN FLUID MECHANICS AND HEAT TRANSFER (4). Course emphasis is on measurement techniques and data analysis methods related to fluid mechanics and heat transfer. Proper experimental methods, data and uncertainty analyses related to thermal and fluids measurements are discussed. Local and spatial mapping of fluid and thermal fields are highlighted. **PREREQS:** (ME 331 or ME 331H) and (ME 332 or ME 332H) and ME 451.

ME 553. STRUCTURE AND MECHANICS LABORATORY (4). Techniques for measurement of structural response and material properties. Proper use of rosette strain gauges, load cells, and displacement transducers. Full-field strain measurement using photoelasticity and digital image correlation. Proper implementation of material testing standards. Characterization of anisotropic composite materials. **PREREQS:** ME 451

ME 555. EXPERIMENTAL TECHNIQUES IN MATERIALS SCIENCE (4). Materials processing, characterization, computational and data analysis techniques in materials science. Focus on processing-structure-property relationships. Lec/lab. **CROSSLISTED** as MATS 555. This course is repeatable for a maximum of 8 credits. **PREREQS:** ME 570 and (ENGR 321 or ENGR 321H)

ME 560. INTERMEDIATE FLUID MECHANICS (4). Ideal fluid flow including potential flow theory. Introduction to compressible flow. Viscous flow and boundary layer theory. Introduction to turbulence. **PREREQS:** ME 331 or equivalent.

ME 561. GAS DYNAMICS (4). Studies one-dimensional isentropic flow, nozzles, diffusers, normal and oblique shocks, compressible flow with friction and heating, and an introduction to propulsion systems. **PREREQS:** ME 312 and (ME 331 or ME 331H)

ME 565. INCOMPRESSIBLE FLUID MECHANICS (3). Generalized fluid mechanics; kinematics; methods of description; geometry of the vector field, dynamics of nonviscous fluids, potential motion, two-dimensional potential flow with vorticity.

ME 566. VISCOUS FLOW (3). Boundary layer, stability, transition prediction methods, computational methods in fluid mechanics, recent developments.

ME 567. ENGINEERING APPLICATIONS OF COMPUTATIONAL FLUID DYNAMICS (4). Basic concepts of computational fluid dynamics, a technique used for solving fully three-dimensional fluid flow problems with no exact solution, will be discussed and applied to general engineering applications using commercially available software. Lec. **PREREQS:** ME 312 and (ME 331 or ME 331H)

ME 569. SELECTED TOPICS IN FLUID MECHANICS (2-4). Topics in fluid mechanics emphasizing research applications of current interest. This course is repeatable for a maximum of 32 credits.

ME 570. STRUCTURE PROPERTY RELATIONS IN MATERIALS (4). Fundamentals of the interactions between the structure and properties of materials. Atomic bonding and atom interactions. Geometric and algebraic representations of symmetry. Introduction to phase equilibria. Phenomenological background of elasticity and plasticity in materials. Anisotropic materials and tensor representations. Influence of structure on thermal, electrical, and optical properties of materials. **CROSSLISTED** as MATS 570.

ME 571. ELECTRONIC PROPERTIES OF MATERIALS (4). Development of a quantitative description of the electronic structure of solids starting with the quantum mechanical model of the atom, atomic bonding, and band theory of solids. Quantitative description of the electronic properties of metals, semiconductors, and insulators. **CROSSLISTED** as MATS 571. **PREREQS:** CH 545 or ME 570 or equivalent.

ME 575. NUMERICAL METHODS FOR ENGINEERING ANALYSIS (3). Numerical solutions of linear equations, difference equations, ordinary and partial differential equations. Emphasis on partial differential equation solution techniques relevant to mechanical engineering. **PREREQS:** ME 373

ME 578. THIN FILM MATERIALS CHARACTERIZATION AND PROPERTIES (3). Processing of thin films and characterization of the microstructure; diffusion and solid state reactions; mechanical, magnetic and electronic properties of thin films. **CROSSLISTED** as MATS 578. **PREREQS:** (ENGR 311 or ENGR 311H or ME 311 or ME 311H) and (ENGR 321 or ENGR 321H or MATS 321) and (ENGR 322 or MATS 322)

ME 580. MATERIALS SELECTION (3). Selecting materials for engineering applications. The major families of materials, their properties, and how their properties are controlled; case studies and design projects emphasizing materials selection. Lec/lab. **CROSSLISTED** as MATS 580. **PREREQS:** ENGR 322

ME 581. THERMODYNAMICS OF SOLIDS (4). Thermodynamics of solutions and phase equilibrium. Phase diagrams and invariant reactions. Order and disorder in solutions. Applications to advanced materials development. Lec/lab. **CROSSLISTED** as MATS 581.

ME 582. RATE PROCESSES IN MATERIALS (4). Diffusion in solids, including vacancy and interstitial and short-circuit diffusion. Phase transformations including classic nucleation and growth theory. Applications to materials development. Laboratory will emphasize microstructural evaluation and quantitative metallography. Lec/lab. **CROSSLISTED** as MATS 582.

ME 583. COMPOSITE MATERIALS (3). Fibers and matrices, mechanics of composites, reinforcement and failure mechanisms, properties and applications. Lec/lab. **PREREQS:** ENGR 322

ME 584. ADVANCED FRACTURE OF MATERIALS (4). Fracture mechanics will be used as a basis for predicting failure of materials, understanding failure mechanisms, and identifying causes of failure. Course will include discussion of recent journal articles, experimental demonstrations, and analysis of real fracture data. **CROSSLISTED** as MATS 584. **PREREQS:** ENGR 322 or equivalent is recommended.

ME 585. FATIGUE OF MATERIALS (4). Analyzes the failure of materials by fatigue including how fatigue behavior is characterized, how fatigue failure is predicted, the physical mechanisms responsible for fatigue failure of various materials, and how such behavior is related to the atomic structure and microstructure of the material. **PREREQS:** (ME 570 or MATS 570)

ME 587. DISLOCATIONS, DEFORMATION, AND CREEP (4). The effects of point, line, and planar defects on plastic deformation and creep behavior in solids will be discussed with emphasis on the role of dislocations and vacancies. **CROSSLISTED** as MATS 587. **PREREQS:** ENGR 322 or equivalent.

ME 588. COMPUTATIONAL METHODS IN MATERIALS SCIENCE (4). A broad introduction to important materials science simulation methods. These include molecular dynamics, density functional theory, and Monte Carlo methods. Learning is through a mixture of lecture and hands-on lab projects in which students use computational methods to explore and reinforce fundamental concepts in materials science. Lec/lab. **CROSSLISTED** as MATS 588. **PREREQS:** Experience with Matlab or Mathematica or an equivalent numerical and programming environment.

ME 589. SELECTED TOPICS IN MATERIALS (3). Topics in materials science to correspond to areas of graduate research. Topics will be chosen from the following list: optical materials, dielectrics, oxidation and corrosion, ceramics, thermophysical properties, polymers and viscoelasticity, coatings and thin films. Lec/rec. This course is repeatable for a maximum of 32 credits.

ME 596. SELECTED TOPICS IN THERMODYNAMICS (3). Topics in thermodynamics including advanced problems in classical thermodynamics and statistical thermodynamics of current interest. Topics will likely be considered, including extensive use of literature. Not all topics covered each year. This course is repeatable for a maximum of 32 credits.

ME 597. RESEARCH IN MECHANICAL ENGINEERING (3). Research topics in mechanical engineering that are of current interest and that may involve multiple specialty areas. Not offered every year. This course is repeatable for a maximum of 6 credits.

ME 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 32 credits.

ME 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

ME 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** PhD students only.

ME 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** PhD students only.

ME 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** PhD students only.

ME 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** PhD students only.

ME 611. MODERN PRODUCT DESIGN (4). Modern product development, design and prototyping are covered. Product development and prototyping is examined from a research standpoint in this course. Customer outcomes gathering, functional modeling, product architecture, modern techniques for concept generation and selection are explored. Also covered are recently developed theories and techniques for prototyping. The topics' place in the overall design process is shown through a product development and prototyping project.

ME 667. COMPUTATIONAL FLUID DYNAMICS (3). Application of modern computational techniques to solve a wide variety of fluid dynamics problems including both potential and viscous flow with requirements for computer code development. **PREREQS:** ((ME 560 or ME 565 or ME 566) and ME 575) and /or equivalent.

ME 671. ELECTRONIC PROPERTIES OF OXIDES (4). Band theory of solids applied to metal oxide materials. Includes metallic oxides, non-stoichiometric semiconductors and associated defect chemistry, high temperature superconductors, electrostatics, linear dielectrics, non-linear dielectrics, piezoelectrics, and the optical properties of oxides. **CROSSLISTED** as MATS 671. **PREREQS:** ME 571 or MATS 571 or PH 575

■ MANUFACTURING ENGINEERING COURSES

MFGE 285. INTRODUCTION TO INDUSTRIAL AND MANUFACTURING ENGINEERING (3). Introduction to selected topics in industrial and manufacturing engineering, including history and philosophy, product design and manufacturing cycle, integrated role of engineering and business, and multi-objective nature of organizations. Surveys of selected design problems in resource allocation, operations and quality management, and production engineering. **CROSSLISTED** as IE 285.

MFGE 336. PRODUCTION ENGINEERING (4). Students will develop a general understanding of the production engineering function within industry. Geometric dimensioning and tolerancing, process design, and fixture and a gauge design will be introduced and explored through the application of machining processes. Students will also develop an understanding of sustainable manufacturing.

Lec/lab. **PREREQS:** (ENGR 213 and ENGR 248 and (ENGR 321 or ENGR 321H) and ME 250 and ME 382)

MFGE 337. MATERIALS AND MANUFACTURING PROCESSES (4). Materials only become useful when they are made into products. Course focuses on introduction to methods by which materials can be processed into different shapes. The overall goal is to develop an understanding of how a process involves considering the shape of a product as well as the materials it is to be made from. Lec/lab. **PREREQS:** ((ENGR 321 or ENGR 321H) and ME 250)

MFGE 436. LEAN MANUFACTURING SYSTEMS ENGINEERING (4). The planning, evaluation, deployment, and integration of lean manufacturing theory and methods. Examines manufacturing processes/equipment and systems, e.g. planning/control, product design, supply chain resource management. Lec/lab.

MFGE 438. COMPOSITES MANUFACTURING (4). Introduction to fiber-reinforced composite materials and their applications. Topics include matrices and reinforcement; open and closed molding processes; filament winding, quality, testing, damage assessment; basics of factory operations and sustainability of composites. Students will complete laboratory projects using fiber-reinforced laminates. Lec/lab. **PREREQS:** (ENGR 213 or ENGR 213H)

MFGE 499. SPECIAL TOPICS (1-5). This course is repeatable for a maximum of 99 credits.

MFGE 531. MESO-SCALE MANUFACTURING (3). Meso-scale processing techniques for fabricating microfluidic devices, especially microtechnology-based energy, chemical and biological systems. Introduction to microlamination and techniques for lamina patterning, registration and bonding. Lec/lab. **PREREQS:** Graduate standing in science or engineering.

MFGE 534. CERAMICS PROCESSING (3). Introduction to materials, manufacturing methods, properties and applications of ceramics. The emphasis of the course is on understanding and exploring the inter-relationships between material characteristics, processing variables and component geometry in the context of ceramics. **PREREQS:** Graduate standing in engineering or science, or senior standing in manufacturing engineering.

MFGE 535. INDUSTRIAL SUSTAINABILITY ANALYSIS (3). Students are exposed to the role of business and engineering in the design and implementation of sustainable industrial systems. Drivers, metrics, and analysis concepts, methods, and tools are introduced. Students incorporate business and engineering considerations in making product, manufacturing process, and supply chain design considerations. **PREREQS:** Graduate standing or instructor approval.

MFGE 536. LEAN MANUFACTURING SYSTEMS ENGINEERING (4). The planning, evaluation, deployment, and integration of lean manufacturing theory and methods. Examines manufacturing processes/equipment and systems, e.g. planning/control, product design, supply chain resource management. Lec/lab.

MFGE 538. COMPOSITES MANUFACTURING (4). Introduction to fiber-reinforced composite materials and their applications. Topics include matrices and reinforcement; open and closed molding processes; filament winding, quality, testing, damage assessment; basics of factory operations and sustainability of composites. Students will complete laboratory projects using fiber-reinforced laminates. Lec/lab. **PREREQS:** (ENGR 213 or ENGR 213H)

MFGE 599. SPECIAL TOPICS (1-5). This course is repeatable for a maximum of 99 credits. **PREREQS:** Graduate standing only.

■ MECH/IND/MFG COURSES

MIME 101. INTRODUCTION TO MIME (3). Provides students with an overview of mechanical, industrial, manufacturing, and energy systems engineering careers and an introduction to technical areas of study. Skills necessary for success in both the academic curriculum and in the engineering profession will also be emphasized, including communication and ethics. Lec/rec.

MIME 199. SPECIAL TOPICS (1-4).

The College of Forestry at Oregon State University is one of the world's premier education, research, and outreach institutions that focuses on broad areas related to forest resources, terrestrial systems, wood products, ecosystem services, recreation, tourism, and their management.

We provide our graduates with an understanding of the complexity of forests and the economic and social systems that depend upon them; to work with nature to keep land healthy for future generations; to know the science, technology and business associated with managing, and using forests and related resources; and to work effectively with others in a culturally diverse, global society.

The OSU College of Forestry has educated students for over 100 years. We offer a breadth of undergraduate and graduate programs that prepare students for a variety of careers in the public and private sectors. Our programs are ranked among the very best in the world. Our world-class faculty and modern facilities, combined with remarkable access to local forests, private industries, public agencies, international travel, and research through paid internships, cooperative education, and mentored work experiences, provide our students with necessary knowledge and skills for fulfilling careers.

DEGREES AND ACCREDITATIONS

The college offers Bachelor of Science (BS, HBS) degrees in Forest Engineering, Forestry, Recreation Resource Management, Renewable Materials, and Tourism and Outdoor Leadership; and, in coordination with the College of Engineering, a double degree in Forest Engineering-Civil Engineering. We also coordinate the interdisciplinary degree in Natural Resources.

The college also offers forestry specializations within the BS degrees in Environmental Sciences and Bioresource Research.

BS degrees in Forestry, Forest Engineering, and Forest Engineering-Civil Engineering are accredited by the Society of American Foresters (SAF). In addition, the BS degree in Forest Engineering and the BS double degree in Forest Engineering-Civil Engineering are accredited by the Engineering Accreditation Commission of ABET, www.abet.org. The BS degree in Renewable Materials is accredited by the Society of Wood Science and Technology (SWST).

Graduate programs in Sustainable Forest Management, Forest Ecosystems and Society, and Wood Science and Engineering include the Master of Forestry (MF), Master of Science (MS), and Doctor of Philosophy (PhD). Each department also participates in the Master of Arts in

Interdisciplinary Studies (MAIS). The college also offers an online-only Master of Natural Resources (MNR) and an online-only graduate certificate in Sustainable Natural Resources (SNR). We also actively participate in the Peace Corps Master's International (PCMI) program for students interested in combining Peace Corps experience with a master's degree.

CONCURRENT DEGREES: INTERNATIONAL, EDUCATION, AND SUSTAINABILITY

Undergraduates with majors in the College of Forestry also can earn secondary degrees in International Studies, Sustainability, or Education. For additional information, see the International Programs section or the College of Education section of this catalog.

MINORS

The college offers minors in Forestry, Recreation Resource Management, Natural Resources, Renewable Materials, and Tourism and Outdoor Leadership.

HIGH SCHOOL PREPARATION

Students planning to study at Oregon State University should include the following subjects in their high school programs: English, 4 years; mathematics, 3 years; science, 3 years (to include at least one year each of two different sciences—biology, chemistry, physics, etc.); social studies, 3 years; and foreign language, 2 years.

TRANSFER STUDENTS

Because of the technical and professional nature of the college's curricula, the college reserves the right to determine whether courses taken at another institution satisfy the college's curricular requirements. In general, equivalent college-level courses successfully completed at an accredited college or university are accepted. OSU students requesting transfer to the College of Forestry must be a student in good academic standing at the university. Please contact the Student Services Office at 541-737-1594 for additional information.

ADVISING

The College of Forestry is committed to helping students succeed. Students meet with an advisor each term. Advisors are valuable sources of information about degree program options and choices, mentoring, and other special opportunities in line with students' interests. Advising personnel in the college's Student Services Office are also available to help with university rules and regulations, job placement, exchange programs, and referrals to cross-campus programs and services. Students are encouraged to take an active role in their program planning, and to use their time at OSU to develop themselves both academically and professionally.

The college and the OSU Career Services Center provide up-to-date information for both seasonal and permanent work and offer a full array of career services to prepare undergraduates and graduates for jobs.

EDUCATION FACILITIES

Peavy and Richardson Halls contain modern classroom, laboratory, computer, and study facilities that support learning. We also offer a Self-Learning Center where students have access to educational materials, computers, and group study sessions. Our Wood Innovation Center promotes great relationships between students, employers, and faculty.

Classes use the nearby college forests for field instruction and research projects. In addition to the 11,500 acres in the McDonald-Dunn Forests, the college manages other forests in Oregon for education and research.

The college also makes extensive use of various public and private programs and facilities for student benefit. Numerous field trips to forests, wood processing and manufacturing operations, recreation facilities, and research sites enable students to observe contemporary problems and practices.

Corvallis is one of the largest forestry and wood science research centers in the world. An innovative research program is conducted by the college through its Forest Research Laboratory and by the campus-based Forest Sciences Laboratory of the U.S. Forest Service. These organizations offer state-of-the-art facilities for educational and employment opportunities for superior students.

A Forest Products Collection contains approximately 2,500 species of wood, primarily from North and South America, Southeast Asia, and Africa, while the grounds around the college are planted with an extensive collection of Pacific Northwest trees and shrubs.

STUDENT ACTIVITIES

Numerous opportunities exist for students to get involved in social and academic forestry activities, sports logging, and international travel. Clubs and student chapters of several professional societies are active in the college, as well as Xi Sigma Pi and Alpha Zeta, two national honorary societies to which College of Forestry students may belong. These clubs offer students the chance to develop leadership and team-building skills.

SCHOLARSHIPS

The College of Forestry offers scholarships to our most commendable undergraduate students. Most are merit-based and range in value from \$1,000 to \$9,000, with total awards averaging approximately \$500,000 per year. Online applications are available at <http://studentservices.forestry.oregonstate.edu/scholarships> and are due February 15 of each year.

Graduate students are commonly supported with teaching and research assistantships, as well as fellowships with awards totaling an average of \$100,000 per year. Information is available at <http://www.forestry.oregonstate.edu/fellowships>.

Scholarships and fellowships are awarded each spring for the following academic year.

GRADUATION

Academic Requirements

To earn a bachelor of science degree, a student must complete 180 quarter credits of university-level courses for the Forestry, Recreation Resource Management, Renewable Materials, and Tourism and Outdoor Leadership programs, 192 quarter credits of university-level courses for the BS in Forest Engineering, and 242 for the BS in Forest Engineering and Civil Engineering. These curricula include:

- Written and oral communications, 13 credits including a senior writing intensive course.
- OSU Baccalaureate Core curriculum.
- Completion of an approved departmental curriculum.
- Students majoring in, Recreation Resource Management, Renewable Materials, and Tourism and Outdoor Leadership must earn grades of C- or better in all required forestry courses (with FE, FOR, FES, FS, TOL, WSE course designators or crosslisted courses or approved substitutions for majors, minors and options). Students majoring in Natural Resources must earn a C- or better in upper-division core or breadth courses.
- Forestry, Forest Engineering, and Forest/Civil Engineering majors must earn grades of C or better in all required forestry courses or approved substitutions for majors, minors and options.

- No courses used to complete major requirements in Forest Engineering, Forest/Civil Engineering, Forestry, Recreation Resource Management, Tourism and Outdoor Leadership, and Renewable Materials can be taken with S/U grading. Natural Resources majors can take up to two S/U graded courses in their core, breadth, or option.
- All undergraduate College of Forestry courses serving as prerequisites for other undergraduate College of Forestry courses must be completed with a grade of C, C- or better, depending on the program.
- Approved work experience as noted below.

PROFESSIONAL AND PERSONAL REQUIREMENTS

Those majoring in Forest Engineering, Forest Engineering-Civil Engineering, Forestry, Recreation Resource Management, and Renewable Materials must complete six months of satisfactory employment in an area related to their major. Forestry students may opt into our Cooperative Education program, which requires two six-month internships with our external partners. Those majoring in Tourism and Outdoor Leadership must satisfactorily complete a supervised internship.

Students are personally responsible for fulfilling all curricular requirements in proper sequence. Work performance and personal conduct are thoroughly appraised by the college. Since the profession of forestry is highly regarded for its ethical and academic standards, students are responsible for observing the Professional Code of Conduct of the college in its entirety. Departure from these ethical requirements may be reason for removing a student from the college.

FOREST ECOSYSTEMS AND SOCIETY

FACULTY

Professors Albers, Bliss, Bondi, Doescher, Harmon, Hibbs, Jensen, Lachenbruch, Law, Oester, Puettmann, K.N. Johnson, R. Johnson, Nelson, Ripple, Ross, Salwasser, Shelby, Shindler, Strauss, Turner

Associate Professors Betts, Creighton, Ganio, Howe, Krankina, Lindberg, Needham, Reuter, Rosenberger, Tynon, Withrow-Robinson

Assistant Professors Campbell, Grotta, Luoma, Morzillo, Schulze, Still

Senior Instructors Anzinger, Reed, Strong, Zahler

Instructors Ahrens, Bishaw, Gassner, Grimm-Greenblatt, Mangla, Olsen, Perry, Stemper, Tilt, Wheeler

ADJUNCT FACULTY

Achterman, J. Jones, Joslin, Klemm, Lach, Lajtha, Lunch, McIver, Myrold, Tesch, Unsworth, Walker

COURTESY/AFFILIATE FACULTY

Alexander, Bormann, Brooks, Castellano, Cazes-Gonzalez, Cohen, Cotton, Endress, Erickson, Fischer, Gray, Greathouse, Hollenbeck, Joseph, R. Kennedy, Lurie, Mc Culloh, McCullon, McKane, Meinzer, Perakis, Phillips, Pyke, Ries, Schmieding, Spies, Swanson, Taylor, Tinus, Wallin, Wondzell, Woodruff

Undergraduate Majors

Natural Resources (BS, CRED, HBS)

This program is an interdisciplinary offering of the colleges of Agricultural Sciences, Forestry, Liberal Arts, and Science but is administered within Forestry.

Options

*Arid Land Ecology
Ecological Restoration
Fish and Wildlife Conservation
Forest Ecosystems
Geosciences and Natural Resources
Human Dimensions in Natural Resources
Individualized Specialty Option
Law Enforcement in Natural Resources
Native Americans and Natural Resources
Natural Resource Education
Natural Resources Conservation and Technology
Natural Resource Policy and Management
Recreation and Tourism Management*

*Resource Conservation
Soil Resources
Sustainable Agroforestry
Urban Forest Landscapes
Watershed Management
Wildland Fire Ecology*

Recreation Resource Management (BS, CRED, HBS)

Options

*Cultural Resource Management
Environmental Resource Interpretation
Forest Resources
Law Enforcement
Park Landscapes
Public Policy
Resource Planning
Sociology
Tourism*

Sustainability (BS, HBS)

This program is available from all colleges that offer undergraduate majors. It is managed by the Department of Forest Ecosystems and Society.

Tourism and Outdoor Leadership (BS)

(Offered only on OSU-Cascades Campus.)

Options

*Adventure Leadership and Education
Eco and Adventure Tourism
International Ecotourism
Recreation Management*

Undergraduate Minors

Natural Resources

(See Interdisciplinary Programs)

Recreation Resource Management

Tourism and Outdoor Leadership

Graduate Majors

Forest Ecosystems and Society

(MAIS, MF, MS, PhD)

Graduate Areas of Concentration

*Forest Biology (MF only)
Forest, Wildlife and Landscape Ecology
Genetics and Physiology
Integrated Social and Ecological Systems
Silviculture (MF only)
Science of Conservation, Restoration and Sustainable Management
Social Science, Policy, and Natural Resources
Soil-Plant-Atmosphere Continuum
Sustainable Recreation and Tourism*

Master of Natural Resources (MNR)

Graduate Areas of Concentration

*Fisheries Management
Geographic Information Systems
Marine Resources Management
Sustainable Natural Resources
Water Conflict Management and Transformation*

Affiliated Interdisciplinary Graduate Major

Applied Economics (MA, MS, PhD)

(See Graduate School)

Graduate Minor

Forest Science

Graduate Certificate

Sustainable Natural Resources

The faculty, staff and students in the Department of Forest Ecosystems and Society are dedicated to the discovery and dissemination of knowledge related to the interactions among forests, people and other organisms. Humans are dependent on forests in many ways. We seek to understand the diversity of benefits derived from forests and expand our knowledge of how forests function to provide those benefits. We provide the expertise needed by scientists, managers, and the general public as they jointly decide how these values can be sustained in the face of climate change, land use pressures and economic uncertainties. Our goal is to contribute to decisions that lead to sustaining these important values on forestlands in Oregon, in the U.S., and around the globe now and into the foreseeable future.

The Department of Forest Ecosystems and Society offers a graduate program in Forest Ecosystems and Society. The program includes Master of Forestry (MF), Master of Science (MS), and Doctor of Philosophy (PhD) degrees. The department also offers an online-only Master of Natural Resources (MNR) degree and an online-only graduate certificate in Sustainable Natural Resources.

RESEARCH

Research in the Department of Forest Ecosystems and Society focuses on fundamental and applied research to support forest resource management decisions. All biological levels of organization within natural and managed forest communities, including interactions with human populations, are addressed by current departmental research projects. Emphasis in graduate education is placed on the ability to define and solve researchable problems. Graduate students are encouraged to participate actively in the department's large, diverse program of seminars, continuing education courses and workshops, international research, and other professional and educational activities.

FOREST ECOSYSTEMS AND SOCIETY GRADUATE DEGREE PROGRAMS

The **MS and PhD degrees in Forest Ecosystems and Society** are structured specifically for those interested in careers in research, teaching, and specialized areas of forest science, social science, and the interface of the two. The degrees are available in seven areas of concentration: forest, wildlife and landscape ecol-

ogy; genetics and physiology; integrated social and ecological systems; science of conservation, restoration and sustainable management; social science, policy, and natural resources; soil-plant-atmosphere continuum; sustainable recreation and tourism.

The **Master of Forestry degree** is a nonthesis degree that supports advancement in non-research professional forestry and forestry-related professional positions. The degree emphasizes one of two areas: biology or silviculture. Students in either area prepare for careers as professional forest biologists, silviculturists, or pest managers capable of analyzing opportunities for natural resource management for landowners. This degree typically takes 12–15 months to complete and requires the student work on a capstone project.

The **Master of Natural Resources (MNR) degree** is offered as a non-thesis option only, similar to a Master of Business Administration, Master of Agriculture, or Master of Forestry. The MNR curriculum facilitates learning by natural resource professionals who work in settings that require cross-disciplinary competency to find solutions to natural resource problems. The MNR is taught entirely online through OSU Ecampus (although it may be possible for some students to work toward the MNR degree while in-residence at OSU).

INTERDISCIPLINARY GRADUATE DEGREE PROGRAMS

The Department of Forest Ecosystems and Society participates in a number of other interdisciplinary graduate degree programs at OSU, including the Master of Arts in Interdisciplinary Studies (MAIS), Environmental Sciences, Water Resources, and Applied Economics.

UNDERGRADUATE MAJORS WITH OPTIONS

NATURAL RESOURCES (BS, CRED, HBS)

Minor

Natural Resources

Students who graduate with a BS degree in Natural Resources from OSU should be able to integrate technical “field” skills with analytical skills to solve important natural resource problems. The curriculum is designed to help students acquire knowledge enabling them to understand a range of natural resource issues, work with experts in a variety of resource fields, and deal with social and political components of resource management. This program is an interdisciplinary offering supported by the colleges of Agricultural Sciences, Forestry, Liberal Arts, and Science. It is administered by the College of Forestry.

In addition to the baccalaureate core, the three main areas for course work include: the natural resources core (74 credits), breadth requirements (21 credits), and the specialty option (40 credits). Within these areas, students have a number of courses to choose from to fulfill requirements. Students acquire knowledge and background in physical and biological systems, math and statistics, natural resource policy, ecology, economics, and decision making. Breadth is acquired in seven key areas of resource management. Finally, students develop depth in the specialty option, choosing from a number of pre-approved options, or creating an individualized specialty option.

Only two courses used to complete the natural resources major requirements may be taken S/U. Grades of C– or better are required in upper-division natural resources core courses, plus all breadth requirements.

The Natural Resources major is also available at the OSU-Cascades Campus in Bend, the OSU Agricultural Program at

Eastern Oregon University, and through the OSU Extended Campus program.

Core and Breadth Requirements for the Natural Resources (BS):

Natural Resources Core (74)

Animal ID

Choose one course from below:

FW 312. Systematics of Birds (2)
FW 316. Systematics of Fishes (2)
FW 318. Systematics of Mammals (2)
Z 477. Aquatic Entomology (4)

Atmospheric Science

Choose one course from below:

ATS 210. Introduction to the Atmospheric Sciences (3)
ATS 320. *The Changing Climate (3)
GEO 323. ^Climatology (4)

Biology

BI 101, BI 102, BI 103. *General Biology (4,4,4)
or BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)

Career Development

FES 207. Career Development (1)

Chemistry

CH 121. General Chemistry (5)
or CH 231. *General Chemistry (4) **and**
CH 261. *Laboratory for Chemistry 231 (1)

Communications

Choose one course from below:

COMM 321. Introduction to Communication Theory (3)
COMM 328. Nonverbal Communication (3)
COMM 385. Communication and Culture in Cyberspace (3)
COMM 440. Theories of Conflict and Conflict Management (3)
COMM 442. Bargaining and Negotiation Processes (3)
FES 360. Collaboration and Conflict Management (3)
FES 493. Environmental Interpretation (4)

Earth Science

Choose one course from below:

GEO 101. *The Solid Earth (4)
GEO 102. *The Surface of the Earth (4)
GEO 201. *Physical Geology (4)
GEO 202. *Earth Systems Science (4)
GEO 221. *Environmental Geology (4)

Environmental Assessment and Planning

Choose one course from below:

ANS/FES/FW/SOC 485. *Consensus and Natural Resources (3)
FES 356. Recreation Resource Planning (4)
FES/FW 445. Ecological Restoration (4)
FOR 459. Forest Resource Planning and Decision Making (4)
FW 435. ^Wildlife in Agricultural Ecosystems (3)
GEO 423. Land Use in the American West (3)
NR 350. *Sustainable Communities (4)
PS 449. ^Topics in Comparative Politics (4)
PS 477. International Environmental Politics and Policy (4)
RNG 421. Wildland Restoration and Ecology (4)
RNG 490. Rangeland Management Planning (4)

General Ecology**Choose one course from below:**

- BI 370. Ecology (3)
 BI 306H. [^]Environmental Ecology (3)
 BOT 341. Plant Ecology (4)
 FES 240. ^{*}Forest Biology (4)
 FES 341. Forest Ecology (3)

GIS**Choose one course from below:**

- FE 257. GIS and Forest Engineering Applications (3)
 FOR 421. Spatial Analysis of Forested Landscapes (3)
 FW 303. Survey of Geographic Information Systems in Natural Resource (3)
 GEO 365. Introduction to Geographic Information Systems (4)
 GEO 465. Geographic Information Systems and Science (4)
 HORT 414. Information Systems in Agriculture (4)

Managing Natural Resources for the Future

- NR 201. Managing Natural Resources for the Future (3)
 or Seminars—Natural Resources (1)+(1)

Mathematics**Choose one course from below:**

- MTH 112. ^{*}Elementary Functions (4)
 MTH 241. ^{*}Calculus for Management and Social Science (4)
 MTH 245. ^{*}Mathematics for Management, Life, and Social Sciences (4)
 MTH 251. ^{*}Differential Calculus (4)

Measurements**Choose one course from the area most related to student's interests:****Biological/Physical Science**

- BI 371. [^]Ecological Methods (3)
 BOT 440. Field Methods in Plant Ecology (4)
 FES 422. Research Methods in Social Science (4)
 FOR 321. Forest Mensuration (5)
 FW 255. Field Sampling of Fish and Wildlife (3)
 GEO 451. Environmental Site Planning (3)
 HDFS 361. Applied Research Methods (4)
 RNG 441. Rangeland Analysis (4)
 SOC 418. Qualitative Research Methods (4)

Social Science

- FES 422. Research Methods in Social Science (4)
 HDFS 361. Applied Research Methods (4)
 SOC 418. Qualitative Research Methods (4)

Natural Resource Decision Making

- NR 455. Natural Resource Decision Making (4)

Natural Resource Policy**Choose one course from below:**

- FOR 460. [^]Forest Policy (4)
 FOR 462. Natural Resource Policy and Law (3)
 GEO/SOIL 335. ^{*}Introduction to Water Science and Policy (3)
 PS 475. Environmental Politics and Policy (4)
 PS 477. International Environmental Politics and Policy (4)

Resource Economics**Choose one course from below:**

- AREC 351. ^{*}Natural Resource Economics and Policy (3)
 AREC 352. ^{*}Environmental Economics and Policy (3)
 FES 432. Economics of Recreation Resources (4)
 FOR 330. Forest Resource Economics I (4)

Society and Natural Resources**Choose one course from below:**

- ANTH 110. ^{*}Introduction to Cultural Anthropology (3)
 FES 251. Recreation Resource Management (4)
 FES 355. Management for Multiple Resource Values (3)
 FES/FS 492. Ecosystem Services Ecology, Sociology, Policy (3)

Soil Science

- CSS 205. ^{*}Soil Science (4) [*Taught at EOU LaGrande campus only.*]
 or CSS 305. Principles of Soil Science (4) [*Taught at EOU La Grande campus only.*]
 or SOIL 205. ^{*}Soil Science (4)

Statistics**Choose one course from below:**

- ST 201. Principles of Statistics (4)
 ST 351. Introduction to Statistical Methods (4)

Vegetation ID**Choose one course from below:**

- BOT 321. Plant Systematics (4)
 BOT 414. Agrostology (4)
 BOT 425. Flora of the Pacific Northwest (3)
 FES 141. Tree and Shrub Identification (3)
 FES 241. Dendrology (5)
 HORT 226. Landscape Plant Materials I: Deciduous Hardwoods and Conifers (4)
 HORT 228. Landscape Plant Materials II: Spring Flowering Trees and Shrubs (4)
 RNG 353. Wildland Plant Identification (4)

Water Science**Choose one course from below:**

- FE 430. Watershed Processes (4)
 FW 326. Integrated Watershed Management (3)
 RNG 355. Desert Watershed Management (3)
 OC 331. Introduction to Oceanography (3)
 OC 332. Coastal Oceanography (3)

Note: Particular option programs may specify additional core courses to assure that students meet prerequisites for option courses, or develop background in fields important for the option. Students should not assume that the core courses listed above include all of the necessary background in science or math for every option.

Breadth (21)**Students must complete one course from each of the following groups:****Fisheries and Wildlife (Choose one)**

- FOR/FW/RNG 346. Topics in Wildland Fire (3)
 FES/FW 445. Ecological Restoration (4)
 FOR/FW/RNG 446. Wildland Fire Ecology (3)
 FW 311. Ornithology (3)
 FW 315. Ichthyology (3)

- FW 317. Mammalogy (3)
 FW 320. Introductory Population Dynamics (4)
 FW 321. Applied Community and Ecosystem Ecology (3)
 FW 323. Management Principles of Pacific Salmon in the NW (3)
 FW 350. ^{*}Endangered Species, Society and Sustainability (3)
 FW 427. Principles of Wildlife Diseases (4)
 FW 435. [^]Wildlife in Agricultural Ecosystems (3)
 FW 451. Avian Conservation and Management (5)
 FW 453. Forest Management and Wildlife Conservation (3)
 FW 454. [^]Fishery Biology (4)
 FW 458. Mammal Conservation and Management (4)
 FW 465. Marine Fisheries (4)
 FW 473. Fish Ecology (4)
 FW 481. Wildlife Ecology (4)

Forestry (Choose one)

- BOT/FES 415. Forest Insect and Disease Management (5)
 FE 370. Harvesting Operations (4)
 FES 341. Forest Ecology (3)
 FES 342. Forest Types of the Northwest (3)
 FES/HORT 350. Urban Forestry (3)
 FES/FW 445. Ecological Restoration (4)
 FOR/FW/RNG 346. Topics in Wildland Fire (3)
 FOR/RNG 436. Wildland Fire Science and Management (4)
 FOR 441. Silviculture Principles (4)
 FOR/FW/RNG 446. Wildland Fire Ecology (3)
 FOR/FE 456. ^{*}International Forestry (3)
 FOR 457. Techniques for Forest Resource Analysis (4)
 FOR 459. Forest Resource Planning and Decision Making (4)
 FOR 460. [^]Forest Policy (4)
 FS/NR/RNG 477. ^{*}Agroforestry (3)
 FW 453. Forest Management and Wildlife Conservation (3)
 WSE 470. ^{*}Forests, Wood, and Civilization (3)

Land and Water (Choose one)

- CSS/SOIL 395. ^{*}World Soil Resources (3)
 CSS/SOIL 466. Soil Morphology and Classification (4)
 FE 430. Watershed Processes (4)
 FW 456. Limnology (5)
 FW 479. Wetlands and Riparian Ecology (3)
 GEO 306. ^{*}Minerals, Energy, Water, and the Environment (3)
 GEO 307. ^{*}National Park Geology and Preservation (3)
 GEO 308. ^{*}Global Change and Earth Sciences (3)
 GEO/SOIL 335. ^{*}Introduction to Water Science and Policy (3)
 GEO 424. International Water Resources Management (3)
 GEO 425. Water Resources Management in U.S. (3)
 GEO 429. Topics in Resource Geography (3)
 RNG 355. Desert Watershed Management (3)
 RNG 455. Riparian Ecology and Management (3)

Political Dimensions (Choose one)

- ANS/FES/FW/SOC 485. ^{*}Consensus and Natural Resources (3)

AREC 432. Environmental Law (4)
 AREC/PS/SOC 407. Seminar: Current Issues in Rural Policy (4)
 BI 301. *Human Impacts on Ecosystems (3)
 FES 351. Recreation Behavior and Management (4)
 FES 352. Wilderness Management (3)
 FES 365. *Issues in Natural Resources Conservation (3)
 FES 454. Managing at the Wildland-Urban Interface (3)
 FOR 462. Natural Resource Policy and Law (3)
 FW 325. *Global Crises in Resource Ecology (3)
 FW 350. *Endangered Species, Society and Sustainability (3)
 GEO 300. *Sustainability for the Common Good (3)
 GEO/SOIL 335. *Introduction to Water Science and Policy (3)
 GEO 423. Land Use in the American West (3)
 HST 481. *Environmental History of the United States (4)
 PS 449. ^Topics in Comparative Politics: Environmental Politics and Policy (4)
 PS 475. Environmental Politics and Policy (4)
 PS 476. *Science and Politics (4)
 PS 477. International Environmental Politics and Policy (4)
Range (Choose one)
 FOR/FW/RNG 346. Topics in Wildland Fire (3)
 FOR/RNG 436. Wildland Fire Science and Management (4)
 FES/FW 445. Ecological Restoration (4)
 FOR/FW/RNG 446. Wildland Fire Ecology (3)
 RNG 341. Rangeland Ecology and Management (3)
 RNG 351. Range Ecology I-Grasslands (3)
 RNG 352. Range Ecology II-Shrublands (3)
 RNG 421. Wildland Restoration and Ecology (4)
 RNG 441. Rangeland Analysis (4)
 RNG 442. Rangeland-Animal Relations (4)
 FS/NR/RNG 477. *Agroforestry (3)
 RNG 490. Rangeland Management Planning (4)
Resource Values/Philosophy (Choose one)
 AG 301. *Ecosystem Science of Pacific NW Indians (3)
 ANTH 481. *Natural Resources and Community Values (3)
 ANTH 482. *Anthropology of International Development (4)

Footnotes:

* Baccalaureate Core Course
 ^ Writing Intensive Course (WIC)

OPTIONS**ARID LAND ECOLOGY OPTION**

The student pursuing this option will develop the skills and knowledge necessary to manage natural resources in the arid lands of western North America.

No more than 20 credits from one department; no more than 20 lower-division credits.

Courses in Rangeland Resources (18 credits)

RNG 341. Rangeland Ecology and Management (3)
 RNG 352. Range Ecology II-Shrublands (3)
 RNG 353. Wildland Plant Identification (4)
 RNG 421. Wildland Restoration and Ecology (4)
 RNG 442. Rangeland-Animal Relations (4)

Courses in Animals, Plants, Soils, and Ecology (23 credits)

BOT 313. Plant Structure (4)
 BOT 321. Plant Systematics (4)
 BOT 414. Agrostology (4)
 CSS/SOIL 466. Soil Morphology and Classification (4)
 FOR/RNG 436. Wildland Fire Science and Management (4)
 FOR/FW/RNG 446. Wildland Fire Ecology (3)

Additional courses required in Natural Resources Core and Breadth:

RNG 441. Rangeland Analysis (4)
 RNG 490. Rangeland Management Planning (4)

Total=41**ECOLOGICAL RESTORATION OPTION**

This option will help students understand complexities associated with restoration of terrestrial and aquatic ecosystems, and how restoration decisions involve significant interactions between ecological and social systems.

No more than 20 credits from one department; no more than 20 lower-division credits.

Required Courses (29–30 credits)

BOT 321. Plant Systematics (4)
 CSS/SOIL 466. Soil Morphology and Classification (4)
 FES/FW 445. Ecological Restoration (4)
 GEO 423. Land Use in the American West (3)
 CH 122. *General Chemistry (5)
 or CH 232. *General Chemistry (4) and CH 262. *Laboratory for Chemistry 232 (1)
 FOR/RNG 436. Wildland Fire Science and Management (4)
 or FOR/FW/RNG 446. Wildland Fire Ecology (3)
 FW 479. Wetlands and Riparian Ecology (3)
 or RNG 455. Riparian Ecology and Management (3)
 Z 345. *Introduction to Evolution (3)
 or CSS/PBG 430. Plant Genetics (3)

Social and Ethical Considerations Choose one course from below:

PHL 440. Environmental Ethics (3)
 PHL 443. *World Views and Environmental Values (3)
 SOC 480. *Environmental Sociology (4)
 SOC 481. *Society and Natural Resources (4)

Ecological and Natural Resource Electives**Choose a minimum of 8 credits:**

BOT/FES 415. Forest Insect and Disease Management (5)
 BOT 488. Environmental Physiology of Plants (3)
 CSS/CROP 440. Weed Management (4)
 CSS/SOIL 468. Soil Landscape Analysis (4)
 FOR 441. Silviculture Principles (4)
 FW 320. Introductory Population Dynamics (4)
 FW 321. Applied Community and Ecosystem Ecology (3)
 FW 426. Coastal Ecology and Resource Management (5)
 FW 451. Avian Conservation and Management (3)
 FW 453. Forest Management and Wildlife Conservation (3)
 FW 454. ^Fishery Biology (4)
 FW 456. Limnology (5)
 FW 458. Mammal Conservation and Management (4)
 FW 464. Marine Conservation Biology (3)
 FW 473. Fish Ecology (4)
 FW 481. Wildlife Ecology (4)
 RNG 421. Wildland Restoration and Ecology (4)
 Z 351. Marine Ecology (3)

Total=40–42**FISH AND WILDLIFE CONSERVATION OPTION**

This option prepares the student for a career in the broad arena of natural resource and wildlife conservation, with an emphasis on understanding of the relationship between animal species and their habitat requirements and the ability to apply this knowledge to the management of ecosystems as a means of conserving fish and wildlife.

No more than 20 credits from one department; no more than 20 lower-division credits.

- FOR 111. Introduction to Forestry (3)
or FES 342. Forest Types of the Northwest (3)
 FOR/FW/RNG 346. Topics in Wildland Fire (3)
or FOR/RNG 436. Wildland Fire Science and Management (4)
or FOR/FW/RNG 446. Wildland Fire Ecology (3)
 FW 323. Management Principles of Pacific Salmon in the Northwest (3)
or FW 470. *Ecology and History: Landscapes of the Columbia Basin (3)
or FW 360. *Origins of Fish and Wildlife Management-Evolution, Genetics, and Ecology (3)
 FES/FW 445. Ecological Restoration (4)
 FW 251. Principles of Fish and Wildlife Conservation (3)
 RNG 341. Rangeland Ecology and Management (3)
 RNG 455. Riparian Ecology and Management (3)

Fish and Wildlife Biology

Choose three of the following:

- FW 311. Ornithology (3)
 FW 315. Ichthyology (3)
 FW 317. Mammalogy (3)
 FW 320. Introductory Population Dynamics (4)
 FW 321. Applied Community and Ecosystem Ecology (3)

Habitat Management

Choose two of the following:

- FW 326. Integrated Watershed Management (3)
 FW 435. ^Wildlife in Agricultural Ecosystems (3)
 FW 479. Wetlands and Riparian Ecology (3)

Natural Resources Policy

Choose one of the following:

- PS 475. Environmental Politics and Policy (4)
 SOC 481. *Society and Natural Resources (4)

Total=41

Footnotes:

- * Baccalaureate Core Course
 ^ Writing Intensive Course (WIC)

FOREST ECOSYSTEMS OPTION

This option will assist students in understanding the nature of forest ecosystems and the processes by which they function. Course work includes an understanding of the multiple resources and values associated with forest ecosystems and some of the techniques involved in managing them.

Ecological Foundations (21 credits)

- BOT/FES 415. Forest Insect and Disease Management (5)
 FES 341. Forest Ecology (3)
 FOR/FW/RNG 346. Topics in Wildland Fire (3)
 FOR 441. Silviculture Principles (4)
 FW 251. Principles of Fish and Wildlife Conservation (3)

- FW 453. Forest Management and Wildlife Conservation (3)

Ecology Breadth Courses (Choose at least 9 credits)

- BOT 321. Plant Systematics (4)
 BOT 442. Plant Population Ecology (3)
 FOR/RNG 436. Wildland Fire Science and Management (4)
or FOR/FW/RNG 446. Wildland Fire Ecology (3)
 FES/FW 445. Ecological Restoration (4)
 FS/NR/RNG 477. *Agroforestry (3)
 FW 458. Mammal Conservation and Management (4)
 RNG 351. Range Ecology I-Grasslands (3)
 RNG 352. Range Ecology II-Shrublands (3)
 RNG 455. Riparian Ecology and Management (3)

Technical Electives

(Choose at least 10 credits)

- BOT 425. Flora of the Pacific Northwest (3)
 FE 208. Forest Surveying (4)
 FE 209. Forest Photogrammetry and Remote Sensing (4)
 FE 370. Harvesting Operations (4)
 FOR 321. Forest Mensuration (5)
 ST 352. Introduction to Statistical Methods (4)

Total=40

GEOSCIENCES AND NATURAL RESOURCE OPTION

This option provides the student with a basic grounding in geosciences and a more specialized knowledge of monitoring environmental changes related to natural resources management.

Courses within the College of Earth, Ocean, and Atmospheric Sciences: (minimum of 33 credits)

Techniques courses within the Geography program (12 credits):

- GEO 301. Map and Image Interpretation (4)
 GEO 360. Cartography (4)
 GEO 444. Remote Sensing (4)

Natural Resources courses within the Geography program (minimum of 6 credits):

- GEO 420. Geography of Resource Use (3)
And any one of the following courses:
 GEO 323. ^Climatology (4)
 GEO 324. Geography of Life: Species Distributions and Conservation (4)
 GEO 330. *^Geography of International Development and Globalization (3)
 GEO 423. Land Use in the American West (3)
 GEO 424. International Water Resources Management (3)
 GEO 425. Water Resources Management in the U.S. (3)

Courses within the Geology program (minimum of 15 credits)

- GEO 201. *Physical Geology (4)
 GEO 202. *Earth Systems Science (4)
 GEO 322. Surface Processes (4)

Choose any one of the following courses:

- GEO 310. Earth Materials I: Mineralogy (4)

- GEO 432. Applied Geomorphology (3)
 GEO 433. Coastal Geomorphology (3)
 GEO 486. Quaternary Paleoclimatology (3)
 GEO 487. Hydrogeology (4)

Courses from other programs (minimum 7 credits)

Any two of the following courses:

- ANTH 477. Ecological Anthropology (4)
 ANTH 481. *Natural Resources and Community Values (3)
 PS 475. Environmental Politics and Policy (4)
 PS 477. International Environmental Politics and Policy (4)

Total=40

HUMAN DIMENSIONS IN NATURAL RESOURCES OPTION

The student will develop an understanding of the interconnectedness of human behavior and natural resource issues. Includes skills and knowledge to better understand the cultural, social, and philosophical issues associated with natural resources.

No more than 20 credits from one department; no more than 20 lower-division credits.

Ethical Issues

Select 6 credits from the following:

- ANTH 110. *Introduction to Cultural Anthropology (3)
 BI/FES/TOX 435. *Genes and Chemicals in Agriculture: Value and Risk (3)
 PHL 201. *Introduction to Philosophy (4)
 PHL 205. *Ethics (4)
 PHL 439. Philosophy of Nature (3)
 PHL 440. Environmental Ethics (3)
 PHL 443. *World Views and Environmental Values (3)
 PHL 470. Philosophy of Science (3)

Management and Communication Issues

Select 13 credits from the following:

- ANS/FES/FW 485/SOC. *Consensus and Natural Resources (3)
 AREC 253. *Environmental Law, Policy, and Economics (4)
 AREC 351. *Natural Resource Economics and Policy (3)
 AREC 352. *Environmental Economics and Policy (3)
 FES 351. Recreation Behavior and Management (4)
 FES 352. Wilderness Management (3)
 FES 355. Management for Multiple Resource Values (3)
 FES 365. *Issues in Natural Resources Conservation (3)
 FOR/FW/RNG 446. Wildland Fire Ecology (3)
 FW 251. Principles of Fish and Wildlife Conservation (3)
 FW 326. Integrated Watershed Management (3)

Social Issues (21 credits)

Required background course

SOC 204. *Introduction to Sociology (3)

Select 18 credits from the following:

- ANTH 481. *Natural Resources and Community Values (3)
 AREC 432. Environmental Law (4)

FW 340. *Multicultural Perspectives in Natural Resources (3)
 FW 350. *Endangered Species, Society, and Sustainability (3)
 GEO 300. *Sustainability for the Common Good (3)
 HST 481. *Environmental History of the U.S. (4)
 PS 475. Environmental Politics and Policy (4)
 SOC 360. *Population Trends and Policy (4)
 SOC 454. *Leisure and Culture (4)
 SOC 456. *Science and Technology in Social Context (4)
 SOC 480. *Environmental Sociology (4)
 SOC 481. *Society and Natural Resources (4)
 WGSS 440. *Women and Natural Resources (3)
 WGSS 450. Ecofeminism (3)

Total=40

INDIVIDUALIZED SPECIALTY OPTION

Natural Resources Specialty Option (40 credits)

Incorporated in a student's course of study is the Specialty option – 40 credits supporting an academic theme related to natural resources. It is in the specialty option that the student develops depth and a particular focus on natural resources.

Individualized Specialty Options

If you are interested in creating your own specialty area, discuss this with your advisor as soon as possible. The advisor will be able to guide you in creating an option that works for you and satisfies the program requirements.

Student-designed specialty options must:

- contain at least 20 credits of upper-division courses
- consist of a minimum of 40 credits, encompassing at least three departments, with not more than 20 credits from one department
- have course work that reflects stated knowledge and skill "goals"
- not come close to "duplicating" existing majors

LAW ENFORCEMENT NATURAL RESOURCES OPTION

The student will develop skills and knowledge necessary to practice natural resource law enforcement.

No more than 20 credits from one department; no more than 20 lower-division credits.

COMM 440. Theories of Conflict and Conflict Management (3)
or FES 360. Collaboration and Conflict Management (3)
 FES 251. Recreation Resource Management (4)
 FW 251. Principles of Fish and Wildlife Conservation (3)
 FW 316. Systematics of Fishes (2)
 FW 318. Systematics of Mammals (2)

FW 341. Fish and Wildlife Law Enforcement (2)
 FW 453. Forest Management and Wildlife Conservation (3)
 FW 458. Mammal Conservation and Management (4)
 SOC 204. *Introduction to Sociology (3)

Choose four of the following classes:

SOC 340. Deviant Behavior and Social Control (4)
 SOC 440. Juvenile Delinquency (4)
 SOC 441. Criminology and Penology (4)
 SOC 442. Sociology of Drug Use and Abuse (4)
 SOC 448. Law and Society (3)

Recommended additional training (not required): Students may consider attending an approved law enforcement training program.

Total=41

NATIVE AMERICANS AND NATURAL RESOURCES OPTION

The student will develop an understanding of how native populations used and managed the natural resources of the Northwest in prehistoric (prior to the arrival of Europeans), historic, and contemporary time periods; how Native Americans view the usage of natural resources today; and to learn the various methods by which this information is developed.

No more than 20 credits from one department; no more than 20 lower-division credits.

Required Background Course

ANTH 330. *Evolution of People, Technology, and Society (3)

General Requirements (12 credits—6 in Prehistoric; 6 in Contemporary)

Prehistoric Use of Natural Resources in Native North America (6 credits):

ANTH 433. First Americans, Last Frontiers (3)
 ANTH 434. North America after the Ice Age (3)
 ANTH 436. Northwest Prehistory (3)
 FW 470. *Ecology and History: Landscapes of the Columbia Basin (3)
 HST 469. History of the Pacific Northwest (4)
 HST 481. *Environmental History of the U.S. (4)

Contemporary Uses of Natural Resources in Native North America (6 credits):

AG 301. *Ecosystem Science of Pacific NW Indians (3)
 ANTH 311. *Peoples of the World—North America (3)
 ANTH 472. Contemporary Indian Issues (4)
 ENG 360. *Native American Literature (4)
 ES 445. *Native American Science and Technology (3)
 ES/PHL 448. Native American Philosophies (3)

Methods (6 credits)

ANTH 490. Topics in Methodology (3)
 ANTH 497. Archeological Field Methods (3)
 ANTH 498. Oral Traditions (3)
 COMM 414. Communication Research Methods (3)
 FW 255. Field Sampling of Fish and Wildlife (3)

Disciplinary Perspectives in Native Americans and Natural Resource Issues (Choose 20 credits)

ANTH 435. Cultural Resources: Policy and Procedures (3)
 ANTH 477. Ecological Anthropology (4)
 ANTH 481. *Natural Resources and Community Values (3)
 ES 243. *Native American Experience in the 20th Century U.S. (3)
 ES 345. Native Americans in Oregon (3)
 ES 444. Native American Law: Tribes, Treaties, and the United States (3)
 FW 340. *Multicultural Perspectives in Natural Resources (3)
 GEO 300. *Sustainability for the Common Good (3)
 GEO 324. Geography of Life: Species Distributions and Conservation (4)
 GEO 420. Geography of Resource Use (3)

Total=41

NATURAL RESOURCE EDUCATION OPTION

This option will prepare students for careers as educators within the broad field of natural resources and to help them learn to bridge the gap in knowledge that exists between experts and others. The focus is on youth or community education that occurs outside of formal school settings. Those interested in becoming K-12 teachers should explore options offered by the College of Education, including their dual degree option.

No more than 20 credits from one department; no more than 20 lower-division credits.

Natural Resource Base (17 credits)

FES 251. Recreation Resource Management (4)
 FW 251. Principles of Fish and Wildlife Conservation (3)
 RNG 341. Rangeland Ecology and Management (3)

Plus 7 additional credits from AG, FE, FOR, FS, FW, GEO or another area of natural resources.

Education/Communication Processes (23 credits)

FES 493. Environmental Interpretation (4)
 SOC 450. Sociology of Education (4)
 TCE 216. *Purpose, Structure, and Function of Education in a Democracy (3)
 TCE 219. Civil Rights and Multicultural Issues in Education (3)
 TCE 253. Learning Across the Lifespan (3)
 WR 327. *Technical Writing (3)

Plus 3 upper-division credits in speech communication, education (see especially Teacher and Counselor Education), agriculture education, writing,

or an allied communication/education field; supervised internships can be used to meet this requirement, if approved in advance.

Additional courses required in Natural Resources Core and Breadth:

From the Vegetation ID area of the Natural Resources Core:

FES 141. Tree and Shrub Identification (3) or FES 241. Dendrology (5)

Note: Writing I, Writing II, and Speech are required by the baccalaureate core, and may not be used toward the “3 additional credits” requirement above. WR 327 must be taken in addition to Writing I, Writing II, and Speech.

Total=40

NATURAL RESOURCE POLICY AND MANAGEMENT OPTION

This option will prepare students for careers in the broad arena of natural resource and environmental conservation, with an emphasis on the social and political aspects of resource issues.

No more than 20 credits from one department; no more than 20 lower-division credits.

Social Science Foundation

Students must take at least two courses from the following. [PS and SOC are prerequisites for certain upper-division courses]

PHL 201. *Introduction to Philosophy (4)
PS 201. *Introduction to United States Government and Politics (4)
PSY 201. *General Psychology (3)
or PSY 202. *General Psychology (3)
SOC 204. *Introduction to Sociology (3)

Social Sciences and Natural Resources

Students must take at least three courses from the following, with no more than two from any one department:

AG 301. *Ecosystem Science of Pacific NW Indians (3)
AG 421. ^Leadership Development (3)
ANS/FES/FW 485/SOC. *Consensus and Natural Resources (3)
COMM 321. Introduction to Communication Theory (3)
FOR 111. Introduction to Forestry (3)
FW 251. Principles of Fish and Wildlife Conservation (3)
FW 323. Management Principles of Pacific Salmon in the Northwest (3)
FW 340. *Multicultural Perspectives in Natural Resources (3)
FW 470. *Ecology and History: Landscapes of the Columbia Basin (3)
GEO 300. *Sustainability for the Common Good (3)
SOC 360. *Population Trends and Policy (4)
SOC 454. *Leisure and Culture (4)
SOC 456. *Science and Technology in Social Context (4)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)

Natural Resource Policy and Management

Students choose 25 credits from the list of courses below.

AREC 253. *Environmental Law, Policy, and Economics (4)
BOT 440. Field Methods in Plant Ecology (4)
ENSC 479. ^*Environmental Case Studies (3)
FES 342. Forest Types of the Northwest (3)
FOR/FW/RNG 346. Topics in Wildland Fire (3)
FES 365. *Issues in Natural Resources Conservation (3)
FES/FW 445. Ecological Restoration (4)
FOR/RNG 436. Wildland Fire Science and Management (4)
FOR/FW/RNG 446. Wildland Fire Ecology (3)
FW 303. Survey of Geographic Information Systems in Natural Resources (3)
FW 311. Ornithology (3)
FW 315. Ichthyology (3)
FW 317. Mammalogy (3)
FW 320. Introductory Population Dynamics (4)
FW 321. Applied Community and Ecosystem Ecology (3)
FW 325. *Global Crises in Resource Ecology (3)
FW 326. Integrated Watershed Management (3)
FW 350. *Endangered Species, Society, and Sustainability (3)
FW 427. Principles of Wildlife Diseases (4)
FW 435. ^Wildlife in Agricultural Ecosystems (3)
FW 479. Wetlands and Riparian Ecology (3)
GEO 301. Map and Image Interpretation (4)
GEO 308. *Global Change and Earth Sciences (3)
GEO 365. Introduction to Geographic Information Systems (4)
GEO 465. Geographic Information Systems and Science (4)
PS 449. ^Topics in Comparative Politics (4)
PS 475. Environmental Politics and Policy (4)
RNG 455. Riparian Ecology and Management (3)
RNG 490. Rangeland Management Planning (4)

Total=40

NATURAL RESOURCES CONSERVATION AND TECHNOLOGY OPTION

Students will develop the skills necessary to apply natural resources techniques and ecological concepts on the ground and to acquire the knowledge necessary to assist management within both the ecosystem and socio-political components of natural resource management.

Note: This option is designed for the OSU-Cascades Campus. Students utilize course work from the Cascades campus partner institution Central Oregon Community College. The option may be modified to provide appropriate transfer of courses from other community colleges

with forest technology degree programs.

No more than 20 credits from one department; no more than 20 lower-division credits.

Conservation Courses (3 courses, 9 credits)

FES 365. *Issues in Natural Resources Conservation (3)
FW 251. Wildlife Conservation (3)[COCC]
FW 325. *Global Crises in Resource Ecology (3)
FW 350. *Endangered Species, Society and Sustainability (3)

Technology Courses (3 courses, 9–10 credits)

BI 371. ^Ecological Methods (3)
FOR 220A. Aerial Photo (3)[COCC]
FOR 230A. Map, Compass, and GPS (3)[COCC]
FOR 230B. Forest Surveying (3)[COCC]

Sustainability (2 courses, 7 credits)

NR 350. *Sustainable Communities (4)
NR 499. Special Topics: Sustainable Community Practicum (3)

Ecology and Ecosystems

Choose 15+ credits from the following, no more than 2 courses in the same department:

CSS/SOIL 466. Soil Morphology and Classification (4)
FOR 240B. Wildlife Ecology (3)[COCC]
FES 342. Forest Types of the Northwest (3)
FES 444. Ecological Aspects of Park Management (3)
FES/FW 445. Ecological Restoration (4)
FW 311. Ornithology (3)
FW 317. Mammalogy (3)
FW 320. Introductory Population Dynamics (4)
FW 479. Wetlands and Riparian Ecology (3)
FW 481. Wildlife Ecology (4)
PS 475. Environmental Politics and Policy (4)
RNG 351. Range Ecology I–Grasslands (3)

Total=40

RECREATION AND TOURISM MANAGEMENT OPTION

This option prepares students for careers managing people and natural resource areas to provide high quality recreation and tourism opportunities.

No more than 20 credits from one department; no more than 20 lower-division credits.

Recreation and Tourism Management Foundation (19–20 credits)

FES 251. Recreation Resource Management (4)
FES 351. Recreation Behavior and Management (4)
FES 356. Recreation Resource Planning (4)
FES 422. Research Methods in Social Science (4)

- FES 352. Wilderness Management (3)#
 or FES 453. Nature-Based Tourism (3)#
 or FES 493. Environmental Interpretation (4)#
 # Of these three courses, the two courses not taken for this option must be taken in the Natural Resources Breadth sections (e.g., Social Issues, Resource Values/Philosophy, Political Dimensions).

Technical/Field Skills (choose 10–11 credits)

- COMM 382. Telemedia Design and Production (4)
 CS 195. Introduction to Web Authoring (4)
 FE 208. Forest Surveying (4)
 FW 255. Field Sampling of Fish and Wildlife (3)
 FW 341. Fish and Wildlife Law Enforcement (2)
 GEO 301. Map and Image Interpretation (4)
 GEO 360. Cartography (4)
 GEO 445. Computer-Assisted Cartography (3)

Applications in Recreation and Social Science (choose 10–11 credits)

- ANTH 477. Ecological Anthropology (4)
 ANTH 480. Topics in Applied Anthropology (1–4)
 AREC 253. *Environmental Law, Policy, and Economics (4)
 COMM 324. Communication in Organizations (3)
 COMM 326. Intercultural Communication (3)
 PS 475. Environmental Politics and Policy (4)
 SOC 454. *Leisure and Culture (4)
 SOC 481. *Society and Natural Resources (4)

Total=40

RESOURCE CONSERVATION OPTION

This option will prepare students for careers in natural resources and conservation. It is offered on the Corvallis campus and is designed for transfer students from the Forest Technology program at Central Oregon Community College. The option may be modified to provide appropriate transfer of courses from other community colleges with forest technology academic programs.

No more than 20 credits from one department; no more than 20 lower-division credits.

Central Oregon Community College/Forest Resource Technology (20 credits)

- FOR 202. Forest Entomology/Pathology (3)
 FOR 205. Silviculture and Harvesting Processes (5)
 FOR 230A. Map, Compass and GPS (3)
 FOR 230B. Forest Surveying (3)
 FOR 240B. Wildlife Ecology (3)
 FOR 260. Conservation of Natural Resources (3)

OSU/Natural Resources (Choose 20 credits)

- CSS/SOIL 466. Soil Morphology and Classification (4)
 FE 370. Harvesting Operations (4)
 FOR/RNG 436. Wildland Fire Science and Management (4)
 FOR 441. Silviculture Principles (4)
 FES/FW 445. Ecological Restoration (4)
 FOR/FW/RNG 446. Wildland Fire Ecology (3)
 FOR/FE 456. *International Forestry (3)
 FS 432. Planning Agroforestry Projects (2)
 FS 439. ^Human Dimensions of Fisheries and Wildlife Management (3)
 or FW 439. ^Human Dimensions of Fisheries and Wildlife Management (3)
 FS/NR/RNG 477. *Agroforestry (3)
 FW 341. Fish and Wildlife Law Enforcement (2)
 FW 453. Forest Management and Wildlife Conservation (3)

Total=40

SOIL RESOURCES OPTION

The student will develop an understanding of soil ecosystems and become skilled at their inventory and management.

No more than 20 credits from one department; no more than 20 lower-division credits.

Soil System Science (12 credits)

- CSS 306. Problem Solving: Soil Science Applications (1) [*CSS taught at EOU La Grande campus only.*]
 CSS 375. Soil Resource Potentials (3)
 CSS/SOIL 455. Biology of Soil Ecosystems (4)
 CSS/SOIL 466. Soil Morphology and Classification (4)

Agroecosystems (choose 8 credits)

- BEE 433. Irrigation System Design (4)
 BEE 439. Irrigation Principles and Practices (4)
 HORT 300. Crop Production in Pacific Northwest Agroecosystems (4)
 RNG 341. Rangeland Ecology and Management (3)
 RNG 351. Range Ecology I-Grasslands (3)
 RNG 352. Range Ecology II-Shrublands (3)

Soil Resource Studies (20 credits) Soil Landscapes (8 credits)

- CSS/SOIL 468. Soil Landscape Analysis (4)
 GEO 322. Surface Processes (4)

Geomatics and Landscape Analysis (12 credits)

- FE 209. Forest Photogrammetry and Remote Sensing (4)
 GEO 301. Map and Image Interpretation (4)
 RNG 441. Rangeland Analysis (4)

Additional courses required in the Natural Resources Core and Breadth

- CSS 305. Principles of Soil Science (4)

[*Taught at EOU La Grande campus only.*]
 or SOIL 205. *Soil Science (4)

Total=40

SUSTAINABLE AGROFORESTRY OPTION

The student pursuing this option will develop skills and knowledge necessary to design and manage integrated sustainable land management systems involving co-production of woody plants and agricultural plants and animals.

No more than 20 credits from one department; no more than 20 lower-division credits.

Required Courses

- BOT 488. Environmental Physiology of Plants (3)
 CH 122. *General Chemistry (5)
 or CH 232. General Chemistry (4) **and**
 CH 262. *Laboratory for Chemistry 232 (1)
 CSS/CROP/HORT 300. Crop Production in Pacific Northwest Agroecosystems (4)
 CSS 306. Problem Solving: Soil Science Applications (1) [*CSS taught at EOU La Grande campus only.*]
 CSS 315. ^Nutrient Management and Cycling (4)
 or HORT 316. Plant Nutrition (4)
 CSS/CROP 440. Weed Management (4)
 or FES/FW 445. Ecological Restoration (4)
 FOR 441. Silviculture Principles (4)
 or HORT 301. The Biology of Horticulture (3)
 FS 432. Planning Agroforestry Projects (2)
 FS/NR/RNG 477. *Agroforestry (3)
 HORT 311. Plant Propagation (4)
 RNG 442. Rangeland-Animal Relations (4)
Choose one of the following courses:
 ANS 215. Beef/Dairy Industries (3)
 ANS 216. Sheep/Swine Industries (3)
 CSS/CROP 310. Forage Production (4)
 HORT 451. Tree Fruit Physiology and Culture (4)
 HORT 452. Berry and Grape Physiology and Culture (4)

Additional Courses Required in Natural Resources Core and Breadth:

- CSS 305. Principles of Soil Science (4)
 [*Taught at EOU La Grande campus only.*]
 or SOIL 205. *Soil Science (4)
 RNG 441. Rangeland Analysis (4)

Total=40–41

URBAN FOREST LANDSCAPES OPTION

Available via Ecampus.

This option will help students understand the complexities surrounding the culture and management of urban forest ecosystems. It includes an examination of the economic, social, and environmental benefits and values of trees in urban areas, and the relationship between people and trees.

No more than 20 credits from one department; no more than 20 lower-division credits.

**Urban Forest Foundations
(21–22 credits)**

FES/HORT 350. Urban Forestry (3)
 FES/HORT 447. Arboriculture (4)
 FES/FW 445. Ecological Restoration (4)
 FES/HORT 455. Urban Forest Planning,
 Policy and Management (4)
 HORT 226. Landscape Plant Materials I:
 Deciduous Hardwoods and Conifers (4)
 HORT 318. ^Applied Ecology of Managed
 Ecosystems (3)
or HORT 316. Plant Nutrition (4)

**Social/Political/Community
Integration (20–21 credits)**

ANS/FES/FW/SOC 485. *Consensus and
 Natural Resources (3)
 ANTH 481. *Natural Resources and
 Community Values (3)
 FS 492. Ecosystem Services Ecology,
 Sociology, Policy (3)
 SOC 481. *Society and Natural Resources (4)
 FOR 462. Natural Resource Policy and Law (3)
or PS 475. Environmental Politics and
 Policy (4)
 GEO 423. Land Use in the American West (3)
or FW 435. ^Wildlife in Agricultural
 Ecosystems (3)

Total=41–43**Footnotes:**

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

**WATERSHED
MANAGEMENT OPTION**

Students will obtain skills and knowl-
 edge about natural water systems and
 water quality, specifically management
 of surface water in forest and rangeland
 ecosystems.

No more than 20 credits from one
 department; no more than 20 lower-
 division credits.

CH 122. *General Chemistry (5)
or CH 232. *General Chemistry (4) **and**
 CH 262. *Laboratory for Chemistry 232 (1)
 CSS/SOIL 466. Soil Morphology and
 Classification (4)
 FE 208. Forest Surveying (4)
 FW 315. Ichthyology (3)
and FW 316. Systematics of Fishes (2)
or just GEO 487. Hydrogeology (4)
 FW 456. Limnology (5)
 MTH 251. *Differential Calculus (4)
 MTH 252. Integral Calculus (4)
 PH 201, PH 202. *General Physics (5,5)
 RNG 455. Riparian Ecology and
 Management (3)
or FW 479. Wetlands and Riparian
 Ecology (3)

**Additional Courses Required
in Natural Resources Core and
Breadth:**

CSS 305. Principles of Soil Science (4)
 [Taught at EOU La Grande campus only.]
 or SOIL 205. *Soil Science (4)
 FE 430. Watershed Processes (4)
 GEO 102. *The Surface of the Earth (4)
 RNG 355. Desert Watershed Management
 (3)

Total=43–44**WILDLAND FIRE
ECOLOGICAL OPTION**

This option will help students under-
 stand the nature of fire in wildland
 ecosystems. It includes an understanding
 of the dynamics of fire behavior and post
 fire response.

No more than 20 credits from one
 department; no more than 20 lower-
 division credits.

**Foundations in Wildland Fire and
Recovery (21 Credits)**

FES 454. Managing at the Wildland-Urban
 Interface (3)
 FES/FW 445. Ecological Restoration (4)
or RNG 421. Wildland Restoration and
 Ecology (4)
 FOR/FW/RNG 346. Topics in Wildland Fire
 (3)
 FOR/RNG 436. Wildland Fire Science and
 Management (4)
 FOR 441. Silviculture Principles (4)
 FOR/FW/RNG 446. Wildland Fire Ecology (3)

**Ecological and Natural Resource
Electives (Choose 19 credits)**

BOT/FES 415. Forest Insect and Disease
 Management (5)
 BOT 442. Plant Population Ecology (3)
 CSS/CROP 440. Weed Management (4)
 CSS/SOIL 466. Soil Morphology and
 Classification (4)
 CSS/SOIL 468. Soil Landscape Analysis (4)
 FES 342. Forest Types of the Northwest (3)
 FW 453. Forest Management and Wildlife
 Conservation (3)
 FW 458. Mammal Conservation and
 Management (4)

in Natural Resources Core and
Breadth**

CSS 305. Principles of Soil Science (4)
 [Taught at EOU La Grande campus only.]
 or SOIL 205. *Soil Science (4)

Total=40**Footnotes:**

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

**RECREATION RESOURCE
MANAGEMENT (BS, CRED, HBS)**

The BS in Recreation Resource Manage-
 ment prepares students to meet the chal-
 lenges of providing quality recreation
 opportunities while maintaining the eco-
 logical integrity of natural resources. The
 curriculum produces students proficient
 in recreation behavior, recreation plan-
 ning and management, environmental
 interpretation, wilderness management,
 resource economics, communication,
 and resource analysis and policy. The
 Society of American Foresters-accredited
 curriculum provides a solid mix of physi-
 cal and social sciences, resource man-
 agement (including wildlife, range, and
 forestry), and quantitative methods.

Completion of an approved option or
 minor is **required** for the Recreation
 Resource Management degree. Declara-
 tion of the option or minor should be

done by the end of the sophomore year.
 Courses for an option or minor are in
 addition to the core curriculum. Some
 courses may require prerequisites not
 included in the core curriculum. Choice
 of option or minor must be approved by
 an academic advisor.

Currently approved minors include
 Business and Entrepreneurship, Fisher-
 ies and Wildlife, Forest Management
 (27 credits required), Natural Resources,
 Philosophy, Rangeland Ecology and Man-
 agement, and Resource Economics.

Courses required for an option may
 not count toward a minor. Students may
 not take an option and a minor from the
 same field of study.

The following **nine** options are only
 available to students majoring in Recre-
 ation Resource Management:

- Cultural Resource Management
- Environmental Resource
 Interpretation
- Forest Resources
- Law Enforcement
- Park Landscapes
- Public Policy
- Resource Planning
- Sociology
- Tourism

Students may work with an academic
 advisor to develop their own individual-
 ized option.

All students pursuing the BS in Recre-
 ation Resource Management degree must
 earn grades of C– or better in all required
 forestry courses (with FE, FOR, FS, WSE
 course designators) or approved substitu-
 tions for majors, minors and options.

 ANTH 435. Cultural Resources: Policy and Procedures (3)
 ANTH 452. Folklore and Expressive Culture (4)

BI 301. *Human Impacts on Ecosystems (3)
 ES/PHL 448. Native American Philosophies (3)
 FW 302. Biology and Conservation of Marine Mammals (*Taught at HMSC*) (3)
 GEO 102. *The Surface of the Earth (4)
 GEO 307. *National Park Geology and Preservation (3)
 HST/HSTS. Upper-Division Course (3–4)
 HST/HSTS. Upper-Division Course (3–4)
 Z 345. *Introduction to Evolution (3)
 Z 348. *Human Ecology (3)
 Z 349. *Biodiversity: Causes, Consequences and Conservation (3)
 Z 351. Marine Ecology (3)

Total=21

Students who have taken one or more of these courses for their major may not also count those courses toward their Environmental Resource Interpretation option (i.e., no double counting).

Forest Resources Option

FOR 321. Forest Mensuration (5)
 FOR 331. Forest Resource Economics II (4)
 FOR 441. Silviculture Principles (4)
Select 8 credits from the following:
 FE 370. Harvesting Operations (4)
 FE 430. Watershed Processes (4)
 FOR/RNG 436. Wildland Fire Science and Management (4)
 FOR/FW/RNG 446. Wildland Fire Ecology (3)
 FOR 443. Silvicultural Practices (5)
 FOR 456. *International Forestry (3)
 FOR 462. Natural Resource Policy and Law (3)

Total=21

Students who have taken one or more of these courses for their major may not also count those courses toward their Forest Resources option (i.e., no double counting).

INDIVIDUALIZED SPECIALTY OPTION

Students may work with an academic advisor to develop their own individualized option.

LAW ENFORCEMENT OPTION

COMM 440. Theories of Conflict and Conflict Management (3)
 FW 341. Fish and Wildlife Law Enforcement (2)
 PHL 205. *Ethics (4)
 SOC 340. Deviant Behavior and Social Control (4)
 SOC 441. Criminology and Penology (4)
Plus 1 to 2 courses from the following:
 FW 415. Fisheries and Wildlife Law and Policy (3)
 SOC 421. Social Change and Modernization (3)
 SOC 424. Social Psychology (4)
 SOC 426. *Social Inequality (4)
 SOC 437. Race and Ethnic Relations (4)
 SOC 440. Juvenile Delinquency (4)
 SOC 448. Law and Society (3)

Recommended Additional Requirements:

Completion of a departmentally approved, off-campus law enforcement training program such as the Santa Rosa, California, Training Center (NPS oriented) or Skagit Valley College in Washington (state park oriented) is recommended.

Total=21–24**PARK LANDSCAPES OPTION**

HORT 226. Landscape Plant Materials (3)
 HORT 301. The Biology of Horticulture (3)
 HORT 315. Principles and Practices of Landscape Maintenance (4)
 HORT 318. ^Applied Ecology of Managed Ecosystems (3)
 HORT 358. ^Landscape Construction Techniques (4)

Total=21

Students who have taken one or more of these courses for their major may not also count those courses toward their Park Landscapes option (i.e., no double counting).

Footnotes:

* Baccalaureate Core Course
 ^ Writing Intensive Course (WIC)

PUBLIC POLICY OPTION

PS 201. *Introduction to U.S. Government and Politics (4)
Plus 5 courses from the following:
 ECON 435. The Public Economy (4)
 PS 371. Public Policy Problems (4)
 PS 414. Interest Groups (4)
 PS 415. Politics and the Media (4)
 PS 416. Public Opinion and Politics (4)
 PS 475. Environmental Politics and Policy (4)
 PS 476. *Science and Politics (4)
 PS 477. International Environmental Politics and Policy (4)
 PS 479. Topics in Public Policy and Public Administration (4)

Total=24

Students who have taken one or more of these courses for their major may not also count those courses toward their Public Policy option (i.e., no double counting).

RESOURCE PLANNING OPTION

GEO 301. Map and Image Interpretation (4)
 GEO 420. Geography of Resource Use (3)
 GEO 423. Land Use in the American West (3)
Select two of the following courses:
 AREC/ECON 352. *Environmental Economics and Policy (3)
 FOR 421. Spatial Analysis of Forested Landscapes (3)
 GEO 360. Cartography (4)
 GEO 451. Environmental Site Planning (3)
 GEO 452. Principles and Practices of Rural and Resource Planning (3)
 GEO 465. Geographic Information Systems and Science (3)
Select two additional courses from the Social Science and Policy block from

the Recreation Resource Management major OR two upper-division GEO courses (GEO courses must be pre-approved by the FOR academic advisor).

Total=22-25

Students who have taken one or more of these courses for their major may not also count those courses toward their Resource Planning option (i.e., no double counting).

SOCIOLOGY OPTION

SOC 204. *Introduction to Sociology (3)
SOC 360. *Population Trends and Policy (4)
SOC 480. *Environmental Sociology (4)
SOC 481. *Society and Natural Resources (4)
Plus two more upper-division SOC courses (8)

Total=23

Footnote:

* Baccalaureate Core Course

TOURISM OPTION

ANTH 478. Anthropology of Tourism (4)
BA 260. Introduction to Entrepreneurship (4)
BA 390. Marketing (4)
MRKT 492. Consumer Behavior (4)

Plus two courses from the following:

BA 463. Family Business Management (4)
BA/MRKT 498. Services Marketing (4)
TOL 371. Eco and Adventure Tourism (3)
(Offered at OSU-Cascades Campus)
TOL 475. Hospitality and Tourism Marketing (3) (Offered at OSU-Cascades Campus)
GEO 423. Land Use in the American West (3)
GEO 426. Third-World Resource Development (3)
GEO 451. Environmental Site Planning (3)
GEO 452. Principles and Practices of Rural and Resource Planning (3)
PS 475. Environmental Politics and Policy (4)

Students who have taken one or more of these courses for their major may not also count those courses toward their Tourism option (i.e., no double counting).

Total=22-24

TOURISM AND OUTDOOR LEADERSHIP (BS, CRED)

The Bachelor of Science in Tourism and Outdoor Leadership (TOL) is an interdisciplinary degree that gives students the conceptual and applied skills needed to provide high-quality visitor experiences while sustaining the natural resources where recreation and tourism occurs.

Completion of an approved option is required for the BS in TOL degree. Four options are currently available:

1. Adventure Leadership and Education
2. Eco and Adventure Tourism focuses on developing and managing businesses in eco and adventure tourism.
3. International Ecotourism focuses on

the special aspects of nature-based tourism in foreign countries.

4. Recreation Management focuses on the management of visitors by land management agencies.

Lower-division courses are from Central Oregon Community College (COCC) or equivalents from other institutions. Upper-division courses are from OSU-Cascades.

For information, contact OSU-Cascades, 541-322-3100, or visit the Tourism and Outdoor Leadership program in the OSU-Cascades website.

Option (29)

Electives (28)

Total for Degree=180

Courses are offered at OSU-Cascades unless otherwise noted.

COCC Course Catalog: <http://www.cocc.edu/admissions/catalog/>

All students pursuing the BS in Tourism and Outdoor Leadership must earn grades of C- or better in all required forestry courses (with FE, FES, FOR, FS, WSE course designators) or approved substitutions for majors, minors and options.

OPTIONS

ADVENTURE LEADERSHIP AND EDUCATION OPTION

The Adventure Leadership and Education option focuses on developing effective teachers and leaders who will have the ability to competently manage a wide range of outdoor experiences.

Graduates of this option will be well suited for careers in outdoor leadership, adventure education, camp management, eco or adventure tour leadership, and other settings that require strong technical, teaching, and management skills.

Lower-division courses are from Central Oregon Community College (COCC) or equivalents from other institutions. Upper-division courses are from OSU-Cascades.

For information, contact OSU-Cascades, 541-322-3100 or visit the Tourism and Outdoor Leadership and program in the OSU-Cascades website.

FOR 372. Ethics in Adventure Leadership (3)

FOR 373. Wilderness and Adventure Education (4)

FOR 377. Expeditions I (4)

FOR 379. Expeditions II-Land (10)

FOR 380. Expeditions III-Water (3)

TCE 411. Educational Psychology, Learning, and Development (3)

One additional TOL skills course (3) (COCC)

Total=30 credits

All College of Forestry credits must be completed with a grade of C- or higher.

ECO AND ADVENTURE TOURISM OPTION

The Eco and Adventure Tourism option focuses on developing and managing businesses in eco and adventure tourism.

Graduates of this option will be well-suited for management positions in exist-

ing companies or for starting their own eco and adventure tourism business.

Lower-division courses are from Central Oregon Community College (COCC) or equivalents from other institutions. Upper-division courses are from OSU-Cascades.

For more information, contact OSU-Cascades, 541-322-3100 or visit the Tourism and Outdoor Leadership program in the OSU-Cascades website.

BA 217. Accounting Fundamentals (3) (COCC)

BA 224. Human Resources Management (4) (COCC)

BA 390. Marketing (4) (OSU)

EC 201. *Microeconomics (4) (COCC)

Plus additional approved courses (14 credits of upper-division courses)

Total=29

Courses are from OSU-Cascades unless otherwise noted.

All College of Forestry credits must be completed with a grade of C– or higher.

INTERNATIONAL ECOTOURISM OPTION

The International Ecotourism option focuses on the special aspects of nature-based tourism in foreign countries.

Students will:

- Develop language skills
- Use their internship for an international experience
- Develop business skills
- Within the TOL major, attain fundamental knowledge of protected-area management

Students who choose this option will be well suited for careers as international tour guides and managers, protected-area tourism managers, and tourism policy analysts.

Lower-division courses are from Central Oregon Community College (COCC) or equivalents from other institutions. Upper-division courses are from OSU-Cascades.

For information, contact OSU-Cascades, 541-322-3100 or visit of the Tourism and Outdoor Leadership program in the OSU-Cascades website.

BA 217. Accounting Fundamentals (COCC) (3)

BA 224. Human Resource Management (COCC) (4)

BA 390. Marketing (4) (OSU)

EC 201. Microeconomics (COCC) (4)

Upper-division foreign language (9)

Additional approved upper-division courses (5)

Total=29

RECREATION MANAGEMENT OPTION

The Recreation Management option will allow TOL students to specialize in content relevant to the management of visitors by land management agencies.

Lower-division courses are from Central Oregon Community College (COCC) or equivalents from other institutions. Upper-division courses are from OSU-Cascades.

For information, contact OSU-Cascades, 541-322-3100 or visit the Tourism and Outdoor Leadership and program in the OSU-Cascades website.

FES 352. Wilderness Management (3)

FES 356. Recreation Resource Planning (4)

FES 493. Environmental Interpretation (4)

FOR 240A. Forest Ecology (3)(COCC)

FOR 241A. Field Dendrology (3)(COCC)

FOR 251. Recreation Resource Management (4)(COCC)

Plus 2 courses selected from the following:
COMM 326. Intercultural Communication (3)

PS 475. Environmental Politics and Policy (4)

Or any upper-division course(s) with one of the following designators: AREC, CSS, FES, FOR, FW, NR, or RNG

Total=30

UNDERGRADUATE MINORS

NATURAL RESOURCES MINOR

Also available via Ecampus.

Students majoring in other programs at OSU can choose to complete the Natural Resources minor. The minor is intended to provide a broad exposure to the natural resources field. It offers course work that integrates a number of natural resource disciplines.

Choose four of the following five courses:

FES 251. Recreation Resource Management (4)

FOR 111. Introduction to Forestry (3)

FW 251. Principles of Fish and Wildlife Conservation (3)

NR 201. Managing Natural Resources for the Future (3)

RNG 341. Rangeland Ecology and Management (3)

One upper-division course from each of the following breadth requirements courses list:

Land and Water (3–5)

Political Dimensions (3–4)

Resource Values/Philosophy (3)

Any additional classes from the breadth requirements course list to total 28 credits.

Total=28

RECREATION RESOURCE MANAGEMENT MINOR

Students may elect to earn the Recreation Resource Management minor. This minor provides basic knowledge about recreation resource planning and management.

Core

FES 251. Recreation Resource Management (4)

FES 351. Recreation Behavior and Management (4)

FES 352. Wilderness Management (3)

FES 356. Recreation Resource Planning (4)

Select 9 credits from:

FES 432. Economics of Recreation Resources (4)

FES 444. Ecological Aspects of Park Management (3)

FES 453. Nature-Based Tourism (3)

FES 493. Environmental Interpretation (4)

FES 495. Interpretive Projects (2)

Total=27

TOURISM AND OUTDOOR LEADERSHIP MINOR

The Tourism and Outdoor Leadership program is only available at the OSU-Cascades Campus. Corvallis Campus students may enroll in the program but will have to attend some courses in Bend.

All lower-division courses listed below are Central Oregon Community College courses.

Lower Division (12 credits)

FOR 255. Resource Interpretation (3) (COCC course)

Plus 9 credits from the following COCC courses:

HHP 253. Wilderness Advanced First Aid (3)

or HHP 255. Outdoor Living Skills (3)

or HHP 294RC. Teaching Rock Climbing (3)

or HHP 294CC. Challenge Course Practices (3)

or HTRM 233. Event Planning (3)

or HHP 294WG. Whitewater Raft Guiding (3) (*only one of these skills courses can be taken in the minor*)

HHP 111. Introduction to Outdoor Leadership (3)

HHP 244. Psychology of Risk and Adventure (3)

HHP 271. Facilitating Group Experiences (3)

HHP 273. Outdoor Recreation Leadership (3)

Upper Division (15 credits)

FOR 371. Eco and Adventure Tourism (3)

or FOR 373. Wilderness and Adventure Education (4)

Both of the above may be taken, with the additional credits counting toward the 15 required.

Plus additional credits from other upper-division TOL courses for a total of 15 credits:

FOR 372. Ethics in Adventure Leadership (3)

FOR 375. ^Experiential Education (4)

FOR 377. Expeditions I (4)

FOR 378. Tourism and Recreation Data Analysis (3)

FOR 471. Sustainability in Tourism and Outdoor Leadership (3)

FOR 474. Entrepreneurship in Tourism and Outdoor Leadership (3)

FOR 476. Risk Management in Tourism and Outdoor Leadership (3)

FOR 478. Legal Issues in Tourism and Outdoor Leadership (3)

FOR 479. *Nature and the Human Experience (3)

^ Writing Intensive Course (WIC)

GRADUATE MAJORS**FOREST ECOSYSTEMS AND SOCIETY (MF, MS, PhD, MAIS)****Graduate Areas of Concentration**

Forest biology (MF only); forest, wildlife and landscape ecology; genetics and physiology; integrated social and ecological systems; silviculture (MF only); science of conservation, restoration and sustainable management; social science, policy, and natural resources; soil-plant-atmosphere continuum; sustainable recreation and tourism

This graduate program combines a strong social science faculty with a strong biological and ecological science faculty and so provides an unusual opportunity to focus on the interface of social science and ecology. The FES graduate program provides specific disciplinary opportunities in both ecological and social sciences in the natural resource setting but also strives to develop interdisciplinary skills and knowledge. *Our program objective is to develop interdisciplinary thinkers, highly capable scientists, and natural resource leaders who are prepared to solve complex socio-ecological problems.* The students will be able to identify and contribute to collaborative solutions in ecology and natural resources-related social science.

All Forest Ecosystems and Society graduate majors and master's level areas of concentration can be utilized by students in the College of Forestry's Peace Corps Master's International Program.

Master of Forestry (MF) in Forest Ecosystems—Areas of Concentration

1. **Forest Biology.** Management of natural resources is an increasingly complex and technical undertaking. In some cases, breadth or depth of specialization beyond the BS degree is required or is highly desirable in entry-level professional forestry positions or for advancement in non-research professional forestry positions. The MF in Forest Biology program emphasizes graduate course work in one of five areas of emphasis in forest biology, with supporting work in another area. The program can be completed in 12 months, but it may be extended in accordance with personal needs and the policies of the OSU Graduate School.
2. **Silviculture.** The MF in Silviculture program provides graduate-level preparation in the full range of disciplines essential for analyzing opportunities, solving problems, and making decisions in silviculture and forest resource management. Graduates from

this program must demonstrate competence in the preparation of well-documented silvicultural prescriptions and in the supervision of prescription implementation. The program also provides the background for sustained career development in forest resource management.

Master of Science and Doctor of Philosophy in Forest Ecosystems and Society—Areas of Concentration

MS and PhD students may focus their work in one of these areas of concentration or a hybrid of them: forest, wildlife and landscape ecology; genetics and physiology; integrated social and ecological systems; science of conservation, restoration and sustainable management; social science, policy, and natural resources; soil-plant-atmosphere continuum; sustainable recreation and tourism

1. **Forest, Wildlife and Landscape Ecology.** The many dimensions of biodiversity are the topic of this area of concentration. Species and communities of species, act, react and interact at many spatial and temporal scales. These dynamics take place in an environment that can change gradually or quite rapidly and that can have a large impact on dynamics through direct and indirect effects on species and inter-specific relationships.
2. **Genetics and Physiology.** The genetic and physiological mechanisms, from the scale of molecules and tissues to whole organisms, populations, and species, that determine how plants grow, reproduce, respond to environment, and are managed and modified for human benefit.
3. **Integrated Social and Ecological Systems.** Many issues in the broad natural resources arena are truly interdisciplinary across the biophysical and the social sciences. This area of concentration focuses on the integration of these sciences in developing basic concepts and in resolving management issues.
4. **Science of Conservation, Restoration and Sustainable Management.** The bases for these integrated sciences are found in the more basic biophysical and social sciences but their application to these complex goals generates new scientific challenges. This area of concentration seeks to develop these new scientific understandings.
5. **Social Science, Policy, and Natural Resources.** Exploration of social, human dimensions, and policy aspects of natural resource issues by examining linkages among

humans, society, and the natural resources on which humans and society depend.

6. **Soil-Plant-Atmosphere Continuum.** The movement of energy and matter within and among ecosystems controls how these systems function and the services they provide. This area of concentration investigates the mechanisms controlling ecosystem behavior over a range of levels from the whole-plant to the globe.
7. **Sustainable Recreation and Tourism.** Social and/or ecological topics in sustainable recreation and tourism including recreation and tourism behavior; social and/or ecological impacts; and planning, management, and policy.

For more information, contact the head of the department or any faculty member.

NATURAL RESOURCES (MNR)**Graduate Areas of Concentration**

Fisheries management, geographic information science (GIScience), marine resources management, sustainable natural resources, water conflict management and transformation

The MNR is a 45-credit online degree program with curriculum organized into three sections: core (18 credits), area of emphasis (18 credits), and capstone project (9 credits). **It will be taught entirely online through OSU Ecampus, although it may be possible for some students to work toward the MNR degree while in-residence at OSU.** Most of the courses for the MNR degree are already taught both in-residence and online, although some modification to certain in-residence courses will be necessary to be included in the proposed online curriculum.

The MNR degree will be offered as a non-thesis option only, similar to a Master of Business Administration, Master of Agriculture, or Master of Forestry. The MNR curriculum will facilitate learning by natural resource professionals who work in settings that require cross-disciplinary competency to find solutions to natural resource problems. Integration of multiple disciplines occurs through the curriculum, assignments, and a case study project. All MNR students will integrate concepts and approaches developed throughout the entire program to complete a final case study project.

Core Courses

18 credits are required from three thematic areas. These must be courses that are not already being used to satisfy units in the area of emphasis.

Theme: Overview/Introduction (3)
MNR 511. Introduction to Sustainable Natural Resources (3)

Theme: Ecology/Production (6)

- CSS 599. Special Topics in Crop Science and Social Science (1–3)
 FES 537. Belowground Ecosystems (3)
 FES 536. Carbon Sequestration in Forests (2)
 FES/FW 545. Ecological Restoration (4)
 FS 548. Biology of Invasive Plants (3)
 FW 527. Principles of Wildlife Diseases (4)
 FW 535. Wildlife in Agricultural Ecosystems (3)
 FW/HSTS 570. Ecology and History: Landscapes of the Columbia Basin (3)
 FW 579. Wetlands and Riparian Ecology (3)
 FW 581. Wildlife Ecology (4)
 MNR 530. Tropical Forest Ecology and Management (3)
 RHP 583. Radiation Biology (4)
 RHP 588. Radioecology (3)
 SNR 530. Ecological Principles of Sustainable Natural Resources (3)
 SNR 531. Sustainable Silviculture (1)
 SNR 532. Planning Agroforestry Projects (2)
 SNR 533. Alternative Forest Products (1)
 SNR 534. Reduced Impact Timber Harvest (1)
 SNR 535. Sustainable Management of Aquatic/Riparian Resources (1)

Theme: Human Systems (6 credits from at least 3 of the 5 areas)**Economics**

- AREC 534. Environmental and Resource Economics (3)
 SNR 521. Economics of Sustainable Natural Resources (3)

Policy

- FW 620. Ecological Policy (3)
 GEO 599. Special Topics (1–3)
 PS 575. Environmental Politics and Policy (4)
 PS 577. International Environmental Politics and Policy (4)

Sociology

- FW/SOC 585. Consensus and Natural Resources (3)
 SOC 526. Social Inequality (4)
 SOC 580. Environmental Sociology (4)
 SOC 581. Society and Natural Resources (4)
 SNR 520. Socially Sustainable Natural Resources (3)

Ethics

- PHL 540. Environmental Ethics (3)
 PHL 543. World View and Environmental Values (3)
 SNR 522. Basic Beliefs and Ethics in Natural Resources (1)
 WGSS 550. Ecofeminism (3)
 WGSS 525. Gender and Technology (3)

Communication

- COMM 59X. Environmental Conflict Resolution (3) **[Pending submission and approval of a proposal]**
 FES 593. Environmental Interpretation (4)
 GEO 518. Geosciences Communication (3)
 PS 515. Politics and the Media (4)

Theme: Methodology (select 3 cr)

- BOT 540. Field Methods in Plant Ecology (4)
 CH 590. Computer Programming for Scientists (3)
 FS 523. Natural Resources Data Analysis (4)
 GEO 565. Geographic Information Systems and Science (3)

- GEO 580. Advanced GIS Applications in the Geosciences (4)
 ST 511. Methods of Data Analysis (4)
 ST 512. Methods of Data Analysis (4)

Area of Emphasis (18 credits)

Students may select a certificate listed below or design their own option. A certificate may not be used to satisfy core requirements.

Master of Natural Resources

Capstone Project (9 credits)**Choose one option below:**

- Option 1:** MNR 560. Master's Case Study (9)
Option 2: 6–7 credits of MNR plus 2–3 credits from independent study project that was completed as part of an 18-credit graduate certificate.

CERTIFICATES**SUSTAINABLE NATURAL RESOURCES GRADUATE CERTIFICATE****Available Online Only.**

The Sustainable Natural Resources graduate certificate is an 18-credit interdisciplinary program offered online through OSU Extended Campus. Students have a choice among 12 courses designed to build personal and organizational capacity to examine the many aspects of natural resource problems—environmental, economic, and social—in the search for innovative solutions. *The courses are organized into three main sections: integration, human dimensions, and ecology and management of sustainable natural resources.* All courses in the certificate program are integrated through an independent capstone project that addresses a specific sustainability problem in the student's own organization or region. Throughout the program, students will work with faculty members and other students, and under the guidance of an assigned mentor to design and complete the project's work plan.

Traditional university training provides rigor in individual disciplines. However, natural resource problems require synthesis of multiple perspectives and fields of knowledge. In addition, natural resource problems can be international in scope. Globalization clearly reveals how decisions and practices in any part

of the world affect natural resources elsewhere, and highlights a need for natural resource professionals who can apply multidisciplinary systems-thinking to address these complex issues. The SNR graduate certificate program is designed to meet that need.

By offering this program as an online series of courses, it is possible for people from around the world to participate and to receive their graduate certificate without having to take a leave of absence from their work. The opportunity to collaborate with natural resource managers or graduate students from other regions or countries offer all participants a broader perspective on management issues and potential solutions.

For additional information and advising, contact **Badege Bishaw**, Program Director, 208 Richardson Hall, Oregon State University, Corvallis, OR 97331; 541-737-9495, badege.bishaw@oregonstate.edu.

More information, including international admissions requirements, may also be found at <http://ecampus.oregonstate.edu/online-degrees/graduate/sustainability>.

■ FOREST ECOSYSTEM AND SOCIETY COURSES**FES 115. ECOLOGY OF OREGON COAST FOREST (1).**

A combination of lecture, lab, and field exercises to explore the ecology and development of Oregon coastal forests. Lec/lab. Graded P/N.

FES 141. TREE AND SHRUB IDENTIFICATION (3).

Learn to identify the principal forest trees of North America, and the principal trees and shrubs of the Pacific Northwest. Also learn about forested regions of the world, and the structure and function of forest plants. Lec/lab/rec.

FES 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

FES 207. CAREER DEVELOPMENT (1).

Provides an opportunity to explore natural resource-focused careers in an informal, discussion-based class. Skills include job searching, resume/interview preparation, and considering the range of career possibilities. **PREREQS:** Recreation Resource Management, Forest Management, or Natural Resources majors only.

FES 240. *FOREST BIOLOGY (4). Forest plants and animals, communities, and ecosystems, their functioning and their relationship to resource management. Field trips required. Lec/lab/rec. (Bacc Core Course)

FES 241. DENDROLOGY (5). Learn to identify the principal forest trees of North America, and the principal trees and shrubs of the Pacific Northwest, including the ranges over which they grow, important ecological characteristics, and principal uses. Also learn about forested regions of the world, and the structure and function of forest plants. Lec/lab/rec.

FES 242. FOREST PLANTS OF THE PACIFIC NORTHWEST (4).

Field course on the identification and ecology of forest trees, shrubs, and herbs of the Pacific Northwest. Hybrid course with online course work and five required weekend field trips.

FES 251. RECREATION RESOURCE MANAGEMENT (4).

Overview of recreation resource management including study of land and water resources used for outdoor recreation. The

planning and management of natural and cultural resources for long-term resource productivity, with a focus on rural and wildlife areas of the forest, range and coast.

FES 341. FOREST ECOLOGY (3). Basic physiological characteristics of trees, succession, climax, and related concepts. Vegetation classification. Stand structure, diversity, competition, growth, soils-forests interactions, biomass and nutrient distribution, energy relations, nutrient element dynamics, ecology of disturbances.

FES 342. FOREST TYPES OF THE NORTHWEST (3). Forest trees in nature are aggregated into stable or transitory associations known as forest cover types. Knowledge of forest cover types, their species composition and ecology, is applicable to the fields of forestry, fire management, wildlife management, and forest ecology.

FES 350. URBAN FORESTRY (3). Introduction to principles and practices of planting and managing trees as a system of urban environment; understanding the economic, environmental, social aspects of urban forests, and an overview of contemporary land use issues and societal perspectives between people and plants. **CROSSLISTED** as HORT 350. **PREREQS:** Foundational forestry and horticulture courses are recommended.

FES 351. RECREATION BEHAVIOR AND MANAGEMENT (4). Principles of human behavior as used in the analysis of recreation management issues. Sociological and psychological approaches are emphasized.

FES 352. WILDERNESS MANAGEMENT (3). Wilderness as land use concept. Wilderness history, preservation, planning and management. Wilderness in the context of other land uses.

FES 355. MANAGEMENT FOR MULTIPLE RESOURCE VALUES (3). Management of a variety of resource attributes in multiple use context, including considerations for recreation, fish, wildlife, aesthetics, watersheds, and forest products. This course is repeatable for a maximum of 6 credits.

FES 356. RECREATION RESOURCE PLANNING (4). Theory and function of recreation resource planning. Techniques for collection, storage, analysis and display of planning data. Practice in use of recreation planning models. Lec/lab. **PREREQS:** (FES 251 or FOR 251) and (ST 351* or ST 351H*)

FES 360. COLLABORATION AND CONFLICT MANAGEMENT (3). Conflict assessment, negotiation, and consensus building in contentious forest resource situations. Topics addressed include conflict and negotiation theory, collaboration principles, analysis techniques to determine when collaboration might be fruitful, and approaches to joint fact-finding and mutual learning in public and private forest management. Specific cases of real conflicts in forest management will be examined.

FES 365. *ISSUES IN NATURAL RESOURCES CONSERVATION (3). Background of major current issues in natural resources conservation with emphasis on forests, soils, and water and potential sustainable carrying capacity. Focus on evaluating facts and opinions related to issues. Basics of terrestrial and aquatic ecology, recent and current issues of soil, water, and forest use and management. (Bacc Core Course)

FES 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

FES 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FES 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

FES 415. FOREST INSECT AND DISEASE MANAGEMENT (5). Effects of insects and diseases on forest ecosystems. Recognition of important groups, prediction of pest responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab/rec. **CROSSLISTED** as BOT 415. **PREREQS:** BI 213 or BI 213H

FES 422. RESEARCH METHODS IN SOCIAL SCIENCE (4). An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results. Lec/lab. **CROSSLISTED** as TOL 422. **PREREQS:** ST 351 or ST 351H

FES 432. ECONOMICS OF RECREATION RESOURCES (4). Application of economic concepts to forest recreation management and resource allocation. Demand, supply, and valuation of both market and non-market forest recreation resources. Benefit-cost analysis applied to a recreation management project. **PREREQS:** (ECON 201 or ECON 201H) and (ST 351 or ST 351H)

FES 435. *GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK (3). A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/rec. **CROSSLISTED** as BI 435/BI 535, MCB 535, TOX 435/TOX 535. (Bacc Core Course)

FES 439. ^HUMAN DIMENSIONS OF FISHERIES AND WILDLIFE MANAGEMENT (3). Students build an understanding and appreciation for the role of human dimensions (HD) in fisheries and wildlife management. Students work both independently and in groups on assignments with an HD focus. **CROSSLISTED** as FW 439. (Writing Intensive Course) **PREREQS:** Principles of fish and wildlife conservation or natural resources and introductory statistics.

FES 444. ECOLOGICAL ASPECTS OF PARK MANAGEMENT (3). Ecological principles applied to the management of park recreation uses. The relationship between biological and physical science information and recreation management decisions is explored. **CROSSLISTED** as TOL 444. **PREREQS:** (FES 251* or FOR 251*) plus an ecology course.

FES 445. ECOLOGICAL RESTORATION (4). Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics to be covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic, biotic, and soil functions and their importance in restoration; and measures of successful restoration. Lec/lab/rec. **CROSSLISTED** as FW 445. **PREREQS:** BI 370 or BI 370H and /or instructor approval required.

FES 447. ARBORICULTURE (4). The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. Lec/lab. **CROSSLISTED** as HORT 447. **PREREQS:** (FES 141 or FES 241 or HORT 226 or HORT 228) and (FOR 111 or HORT 112)

FES 451. HISTORY AND CULTURAL ASPECTS OF RECREATION (4). Role of conservation and outdoor recreation in U.S. environmental history. American attitudes toward nature. Evaluation of major governmental land and water policies. Evolution of the national parks and forests systems. Significant leaders in the parks movement. Role of cultural resources in recreation and parks.

FES 452. BIODIVERSITY CONSERVATION IN MANAGED FORESTS (3). Designed for students in forestry, wildlife, fisheries and related fields. Introduces the concepts of, and approaches to,

managing forest stands, landscapes and regions to achieve desired habitat conditions for indicator species and conservation of biological diversity. **CROSSLISTED** as FW 452. **PREREQS:** FES 240 or FES 341 or BI 370

FES 453. NATURE-BASED TOURISM (3). The relationship between natural resource-based recreation and tourism. Issues of tourism planning, management and impacts are explored.

FES 454. MANAGING AT THE WILDLAND-URBAN INTERFACE (3). Course targets fire-prone communities where resource professionals need to work cooperatively with local and federal agencies and citizens to gain acceptance for fire management programs and build joint responsibility for fuel reduction activities. **PREREQS:** FOR 111 (Not required of Ecampus students)

FES 455. URBAN FOREST PLANNING, POLICY AND MANAGEMENT (4). Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. **CROSSLISTED** as HORT 455. **PREREQS:** FES 350 or HORT 350

FES 470. INTERORGANIZATIONAL ISSUES IN NATURAL RESOURCE MANAGEMENT (3). Understanding the motivations of organizational actors around shared problem solving is important for anyone anticipating a career in natural resources management. The study of organizations can provide important insights regarding various actors' behaviors and perspectives in joint planning. Knowledge gained from the class is transferable to other multi-organizational management settings. **PREREQS:** Junior undergraduate standing.

FES 485. *CONSENSUS AND NATURAL RESOURCES (3). Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. **CROSSLISTED** as ANS 485/ANS 585, FS 485/FS 585, FW 485/FW 585, SOC 485/SOC 585. (Bacc Core Course)

FES 492. ECOSYSTEM SERVICES ECOLOGY, SOCIOLOGY, POLICY (3). Ecosystem services such as clean water provision, carbon sequestration, and biodiversity protection are increasingly valued by society. This course explores the complex ecological, policy, and sociological dimensions of ecosystem services, especially relative to private lands. This course is repeatable for a maximum of 6 credits. **PREREQS:** Senior standing.

FES 493. ENVIRONMENTAL INTERPRETATION (4). Interpretation of natural and cultural features in parks, museums, and similar settings. Emphasis on learning and applying effective communication techniques in the development of brochures, exhibits, talks, museums, and visitor centers.

FES 495. INTERPRETIVE PROJECTS (2). Development of specific natural and cultural resource interpretive projects including interpretive plans, brochures, audiovisual programs and displays. **PREREQS:** FOR 493 or FES 493

FES 499. SELECTED TOPICS IN FOREST SCIENCE (1-16). In-depth studies of specific topics within a field of specialization. Examples include biotechnology in forestry, mycorrhizal ecology, tree improvement, landscape ecology, global climatic change in relation to forestry, advanced silviculture prescriptions, agroforestry, and others. This course is repeatable for a maximum of 16 credits.

FES 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

FES 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

FES 505. READING AND CONFERENCE (1-16). Some sections graded P/N. This course is repeatable for a maximum of 16 credits.

FES 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

FES 507. SEMINAR (1-16). Some sections graded A-F. This course is repeatable for a maximum of 16 credits.

FES 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

FES 511. COMMUNITIES AND NATURAL RESOURCES (5). Provides students from diverse backgrounds with interdisciplinary, experiential learning exposure to contemporary community and natural resource issues in rural Oregon. Social science concepts are employed to critically appraise current conditions and future prospects for rural, natural resource-dependent communities. This course is repeatable for a maximum of 15 credits.

FES 515. FOREST INSECT AND DISEASE MANAGEMENT (5). Effects of insects and diseases on forest ecosystems. Recognition of important groups, prediction of pest responses to environmental changes, and management strategies for protection of forest resources. Field trips. Lec/lab/rec. CROSSELLISTED as BOT 515. **PREREQS:** BI 213 or BI 213H

FES 520. POSING RESEARCH QUESTIONS (3). Acquaints beginning graduate students in the natural resources to the scientific method and formation of good researchable questions. The course consists of lectures, readings and discussions. Concepts in the course are reinforced and amplified by discipline-specific companion modules. Students prepare and orally present a researchable question in their area of interest that is critiqued by the class and instructors.

FES 521. NATURAL RESOURCE RESEARCH PLANNING (3). Research planning and study plan development, investigative procedures, the principles and ethics of natural resource science, principles and practices in scientific communication.

FES 522. RESEARCH METHODS SOCIAL SCIENCE (4). An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results. Lec/lab. **PREREQS:** Upper-division or graduate level statistics.

FES 523. QUANTITATIVE ANALYSIS IN SOCIAL SCIENCE (4). Application and interpretation of statistical approaches to human dimensions of natural resources, recreation, and other social sciences. Emphasis is on an applied approach focusing on understanding data, selecting appropriate statistics for theoretical and managerial problems, using statistical software for analyses, and interpreting findings. **PREREQS:** (FES 522 or FOR 522) or equivalent and ST 511 or equivalent. Discuss course equivalency with professor.

FES 524. NATURAL RESOURCES DATA ANALYSIS (4). Hands-on experience in applied statistical modeling and data analysis for natural resources. Emphasis is on understanding of statistical models and the application and actual implementation of statistical analysis techniques, use of statistical software for analyses (e.g., R), and interpretation of findings. Students analyze data from their own research for final projects. **PREREQS:** ST 511 and ST 512

FES 532. ECONOMICS OF RECREATION RESOURCES (4). Application of economic concepts to forest recreation management and resource allocation. Demand, supply, and valuation of both market and non-market forest recreation resources. Benefit-cost analysis applied

to a recreation management project. **PREREQS:** ECON 201 and ST 351

FES 535. GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK (1-3). A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/lab/rec. CROSSELLISTED as BI 435/BI 535, MCB 535, TOX 435/TOX 535.

FES 536. CARBON SEQUESTRATION IN FORESTS (2). Examines processes controlling the sequestration of carbon in the forest system including the forest itself and wood products. Also examines how forests can be managed to sequester carbon as well as the important economic, policy, and other constraints. Lectures, readings, discussion, simulation models, and home work will be used to cover the material. **PREREQS:** Undergraduate-level biology or ecology.

FES 537. BELOWGROUND ECOSYSTEMS (3). Physical and biological components and their interactions in different soil ecosystems with description and examination of the relationships between producers and decomposers in the soil. **PREREQS:** Undergraduate level Biology or Ecology courses. BS degree in arts, humanities or science.

FES 543. ADVANCED SILVICULTURE (3). The scientific basis of forest regeneration and silvicultural practices and prescriptions in immature and mature stands. Field trips are required. Lec/lab. **PREREQS:** FOR 442 and FOR 443

FES 544. ECOLOGICAL ASPECTS OF PARK MANAGEMENT (3). Ecological principles applied to the management of park recreation uses. The relationship between biological and physical science information and recreation management decisions is explored. **PREREQS:** (FES 251 or FOR 251) and an ecology course.

FES 545. ECOLOGICAL RESTORATION (4). Fundamentals of restoring and reclaiming disturbed landscapes and ecosystems. Topics to be covered include types and assessment of site conditions; determining restoration goals and feasibility; hydrologic; biotic, and soil functions and their importance in restoration; and measures of successful restoration. CROSSELLISTED as FW 545. **PREREQS:** BI 370 or instructor approval required.

FES 546. ADVANCED FOREST COMMUNITY ECOLOGY (4). Fundamental concepts of community including disturbance, diversity and succession. Strong emphasis on field skills and data interpretation. Saturday field trip required. Lec/lab.

FES 547. ARBORICULTURE (1-4). The principles and practices of arboriculture, the art and science of selecting, planting, establishing and maintaining trees in urban, suburban, commercial and residential landscapes. Lec/lab. CROSSELLISTED as HORT 547.

FES 548. BIOLOGY OF INVASIVE PLANTS (3). Concepts of plant physiology, genetics and population dynamics are used to understand how plant invasions occur and some communities continue to exist. Management implications are explored. **PREREQS:** One year biological science; BOT 341 and BOT 442 recommended.

FES 551. HISTORY AND CULTURAL ASPECTS OF RECREATION (4). Role of conservation and outdoor recreation in U.S. environmental history. American attitudes toward nature. Evaluation of major governmental land and water policies. Evolution of the national parks and forests systems. Significant leaders in the parks movement. Role of cultural resources in recreation and parks.

FES 553. NATURE-BASED TOURISM (3). The relationship between natural resource-based recreation and tourism. Issues of tourism planning,

management and impacts are explored.

FES 554. MANAGING AT THE WILDLAND-URBAN INTERFACE (3). Course targets fire-prone communities where resource professionals need to work cooperatively with local and federal agencies and citizens to gain acceptance for fire management programs and build joint responsibility for fuel reduction activities. **PREREQS:** FOR 111 (Not required of Ecampus students)

FES 555. URBAN FOREST PLANNING, POLICY AND MANAGEMENT (4). Examination of planning, policy, and management strategies used in the stewardship of urban natural resources. Fundamentals for developing effective programs to maximize the economic, environmental, and social values and benefits of urban forest landscapes. CROSSELLISTED as HORT 555. **PREREQS:** FES 350 or HORT 350 for undergraduates.

FES 558. CONCEPTS OF FOREST RECREATION PLANNING AND MANAGEMENT (3). Examines research that forms the conceptual basis for tools, techniques, and approaches used in recreation planning and management. **PREREQS:** Senior or graduate standing.

FES 561. PHYSIOLOGY OF WOODY PLANTS (3). The structure, growth and physiological processes of trees and shrubs. **PREREQS:** CH 221 and CH 222 and CH 223 and CH 331 and CH 332 and BOT 331

FES 570. INTERORGANIZATIONAL ISSUES IN NATURAL RESOURCE MANAGEMENT (3). Understanding the motivations of organizational actors around shared problem solving is important for anyone anticipating a career in natural resources management. The study of organizations can provide important insights regarding various actors' behaviors and perspectives in joint planning. Knowledge gained from the class is transferable to other multi-organizational management settings. **PREREQS:** Junior undergraduate standing.

FES 585. CONSENSUS AND NATURAL RESOURCES (3). Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. CROSSELLISTED as ANS 485/ANS 585, FW 485/585, SOC 485/SOC 585.

FES 592. ECOSYSTEM SERVICES ECOLOGY, SOCIOLOGY, POLICY (3). Ecosystem services such as clean water provision, carbon sequestration, and biodiversity protection are increasingly valued by society. This course explores the complex ecological, policy, and sociological dimensions of ecosystem services, especially relative to private lands. This course is repeatable for a maximum of 6 credits. **PREREQS:** Senior standing.

FES 593. ENVIRONMENTAL INTERPRETATION (4). Interpretation of natural and cultural features in parks, museums, and similar settings. Emphasis on learning and applying effective communication techniques in the development of brochures, exhibits, talks, museums, and visitor centers.

FES 595. INTERPRETIVE PROJECTS (2). Development of specific natural and cultural resource interpretive projects including interpretive plans, brochures, audiovisual programs and displays. **PREREQS:** FES 593

FES 599. SELECTED TOPICS IN FOREST SCIENCE (1-16). In-depth studies of specific topics within a field of specialization. Examples include biotechnology in forestry, mycorrhizal ecology, tree improvement, landscape ecology, global climatic change in relation to forestry, advanced silviculture prescriptions, agroforestry, and others. This course is repeatable for a maximum of 16 credits.

FES 600. GLOBAL CHANGE ECOLOGY (3).

An interdisciplinary discourse on what is known about global change and dynamics of the earth system, including principles of climate, influences on ecosystem functioning and connectivity needed to understand responses of the earth system to human activities.

FES 601. RESEARCH AND SCHOLARSHIP (1-16).

This course is repeatable for a maximum of 16 credits.

FES 603. THESIS (1-16). This course is repeatable for a maximum of 255 credits.

FES 605. READING AND CONFERENCE (1-16).

This course is repeatable for a maximum of 16 credits.

FES 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

FES 629. TEACHING PRACTICUM IN FOREST SCIENCE (1).

Preparation of graduate students in forest science and related disciplines for their first teaching experiences. Using concepts and information introduced in the class, students will develop the curriculum for one credit of college-level instruction (or an equivalent approved by the instructor) in a topic of their choice.

FES 641. SUSTAINABLE DEVELOPMENT AND RENEWABLE RESOURCE ECONOMICS (3).

Economic models and analyses of renewable resource management and policy in developing countries. Concepts of sustainable development. Topics include incomplete markets, agricultural households, soils, deforestation, marine/fisheries, non-timber forest products, water resources, and biodiversity. **PREREQS:** AEC 613 or equivalent advanced microeconomic theory.

FES 646. FOREST ECOSYSTEMS ANALYSIS AND APPLICATION (4).

The structure and function of forests and associated streams in natural and managed landscapes; application of ecosystem analysis to policy management decisions; roles of models; scaling from individual processes to ecosystems, landscapes, and beyond. Required classroom discussions, field trip. **PREREQS:** College-level ecology/biology, chemistry, and math; familiarity with Excel.

FES 699. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

■ FOREST SCIENCE COURSES**FS 432. PLANNING AGROFORESTRY PROJECTS (2).**

Helps forestry and other natural resource students understand various agroforestry concepts, systems and technologies and practices world wide. Lays the groundwork for students to identify different systems, characterize socio-economic conditions and plan sustainable agroforestry systems. Class activities examine how biological, economic and social factors influence agroforestry farming decisions. **PREREQS:** BOT 341 and /or equivalent course in ecology.

FS 477. *AGROFORESTRY (3). Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. **CROSSLISTED** as NR 477/NR 577, RNG 477/RNG 577. (Bacc Core Course) **PREREQS:** Any basic ecology course.

FS 485. *CONSENSUS AND NATURAL RESOURCES (3). Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. **CROSSLISTED** as ANS 485/585, FW 485/585, SOC 485/585. (Bacc Core Course)

FS 532. PLANNING AGROFORESTRY PROJECTS (2). Helps forestry and other

natural resource students understand various agroforestry concepts, systems and technologies and practices world wide. Lays the groundwork for students to identify different systems, characterize socio-economic conditions and plan sustainable agroforestry systems. Class activities examine how biological, economic and social factors influence agroforestry farming decisions. **PREREQS:** BOT 341 or equivalent course in ecology.

FS 547. NUTRIENT CYCLING (3). Reviews and discusses ecosystem-level biogeochemical concepts for terrestrial and freshwater ecosystems, primarily by reading and discussing classic and current literature to determine the state-of-knowledge and uncertainties associated with it. Topics will include root nutrient uptake mechanisms, soil chemical and biochemical transformations in different soil and ecosystems, measuring soil solution and watershed fluxes, soil organic matter formation and structure, the meaning of sustainability, the concept of N saturation in terrestrial ecosystems, and the use of natural abundance and tracer isotopes in ecosystem biogeochemistry. While forest biogeochemical processes will be emphasized, desert, aquatic, wetland, and prairie ecosystems will also be explored. **CROSSLISTED** as BOT 547 and SOIL 547. **PREREQS:** College-level chemistry and biology and one class in ecology (BI 370 or equivalent) and/or soils (e.g. SOIL 205).

FS 553. FOREST WILDLIFE HABITAT

MANAGEMENT (4). Management of terrestrial vertebrates in forest ecosystems. Effects on silvicultural practices and landscape pattern on habitats and populations. **CROSSLISTED** as FW 553. **PREREQS:** FOR 341 or equivalent course in ecology.

FS 577. AGROFORESTRY (3). Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. **CROSSLISTED** as NR 477/NR 577, RNG 477/RNG 577. **PREREQS:** Any basic ecology course.

FS 585. CONSENSUS AND NATURAL RESOURCES (3). Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. **CROSSLISTED** as ANS 485/ANS 585, FS 485/FS 585, FW 485/FW 585, SOC 485/SOC 585. (Bacc Core Course)

■ MASTER OF NATURAL RESOURCES COURSES

MNR 511. INTRODUCTION TO SUSTAINABLE NATURAL RESOURCES (3). Overview of economic, environmental, social, cultural, ethical, and policy considerations of sustainable natural resource management. International collaborative efforts to address global natural resource issues. Key policy drivers, key stressors, balancing competing interests. Introductory course required for all Master of Natural Resources students; open to other graduate students. Taught via Ecampus only. **PREREQS:** Bachelor's degree. Recommended: Undergraduate biology or ecology course.

MNR 522. RESEARCH METHODS SOCIAL SCIENCE (4). An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results. Lec/lab. **CROSSLISTED** as FES 522. **PREREQS:** Upper-division or graduate level statistics.

MNR 530. TROPICAL FOREST ECOLOGY AND MANAGEMENT: A GLOBAL PERSPECTIVE (3). Study of tropical forest ecology and the common

ecological patterns found within tropical forests. The threats and challenges that tropical forests face in the 21st century and the issues of human use and their impacts. Developing strategies for sustainable management and restoration approaches to alleviate pressure on remaining tropical forests. Taught via Ecampus only. **PREREQS:** Graduate standing. Highly recommended: Basic ecology course. Recommended: Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years of experience working in a natural resources-related field. Instructor approval required for students not meeting prerequisites.

MNR 560. MASTER'S CASE STUDY (1-9).

Capstone project integrating course work, readings, and assignments to address complex natural resource problems of local or regional importance. Taught via Ecampus only. Graded P/N. This course is repeatable for a maximum of 9 credits.

■ NATURAL RESOURCES COURSES**NR 201. MANAGING NATURAL RESOURCES FOR THE FUTURE (3).**

Overview of the complexities involved in managing natural resources of the Pacific Northwest. Exposure to major natural resource issues of the region. Development of critical thinking skills useful in seeking solutions.

NR 350. *SUSTAINABLE COMMUNITIES (4).

Introduction to the concept of sustainable communities from a multidisciplinary perspective. Instructors from a broad array of disciplines and professions. Development of holistic thinking skills and innovative solutions to complex problems. (Baccalaureate Core Course)

NR 401. RESEARCH AND SCHOLARSHIP (1-16).

This course is repeatable for a maximum of 16 credits.

NR 403. THESIS (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

NR 405. READING AND CONFERENCE (1-9).

This course is repeatable for a maximum of 18 credits.

NR 406. PROJECTS (1-9). This course is repeatable for a maximum of 16 credits.

NR 407. SEMINAR (1-9).

This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

NR 410. INTERNSHIP (1-6). This course is repeatable for a maximum of 12 credits.

NR 455. NATURAL RESOURCE DECISION MAKING (4).

Students will participate on collaborative planning teams that effectively engage stakeholders in the decision making process, and offer sound natural resource decisions that are supported by multiple interests. **PREREQS:** Senior standing.

NR 477. *AGROFORESTRY (3). Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products. Biological, economic, social, and political factors that underlie the application of agroforestry technology. **CROSSLISTED** as RNG 477/RNG 577, FS 477/FS 577. (Bacc Core Course) **PREREQS:** Any basic ecology course.

NR 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

NR 499H. SPECIAL TOPICS (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

NR 577. AGROFORESTRY (3). Theory and worldwide practice of multiple-crop low input sustainable systems involving concurrent production of tree and agricultural products.

Biological, economic, social, and political factors that underlie the application of agroforestry technology. CROSSLISTED as RNG 477/RNG 577, FS 477/FS 577. **PREREQS:** Any basic ecology course.

■ SUSTAINABLE NATURAL RESOURCES COURSES

SNR 506. INDEPENDENT PROJECT IN NATURAL RESOURCE SUSTAINABILITY (2). Student identify, pose, frame, and analyze the various components of an important natural resource sustainability problem within their country, region, or organization and, at the end of term, present a workplan for its resolution. Oral and written reports are expected. Graded P/N. **PREREQS:** Admission to SNR Graduate Certificate Program and non-degree/credential seeking students.

SNR 511. SUSTAINABLE NATURAL RESOURCE DEVELOPMENT (1). Using readings, class discussions, and field trips, we introduce the program sessions and pedagogical methods, familiarize students with basic working definitions of sustainability, and build capacity to work as group on a common project. **PREREQS:** This is an introduction to the 18-credit Graduate Certificate in Sustainable Natural Resources (SNR) and is also open to other graduate students and non-degree/credential seeking students. For students who have been admitted to the SNR Graduate Certificate Program, this course should be taken during the first term.

SNR 520. SOCIAL ASPECTS OF SUSTAINABLE NATURAL RESOURCES (3). Using readings, personal experiences, and class discussions, students explore five principles of socially sustainable natural resource management, and review the role they play in creating natural resource-based sustainable communities. **PREREQS:** Graduate standing. Highly recommended: SNR 511. Recommended: Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years experience working in a natural resources-related field. Students seeking the SNR Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals. There are no prerequisites for non-degree seeking students other than graduate standing. Part of the Sustainable Natural Resources Graduate Certificate program; also open to other graduate students and non-degree/credential seeking students.

SNR 521. ECONOMICS OF SUSTAINABLE NATURAL RESOURCE MANAGEMENT (3). Focuses on the sources of market failure, the means of correcting market failure, and the real-world examples of making progress toward sustainable resource use by means of market mechanisms. **PREREQS:** Recommended: Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years experience working in a natural resources-related field. Students seeking the SNR Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals. There are no prerequisites for non-degree seeking students other than graduate standing. Part of the Sustainable Natural Resources Graduate Certificate program; also open to other graduate students and non-degree/credential seeking students.

SNR 522. BASIC BELIEFS AND ETHICS IN NATURAL RESOURCES (3). Examines basic philosophies and ethical systems in American forestry, including Pinchot's agricultural/utilitarian approach and Leopold's biotic/ecological model, compares them to contemporary public attitudes and considers their implications for sustainability. **PREREQS:** Part of SNR Graduate Certificate, and also open to other graduate students and non-degree/credential seeking students.

SNR 530. ECOLOGICAL PRINCIPLES OF SUSTAINABLE NATURAL RESOURCES (3). Focus an ecological sustainability and ecological concepts and principles, with examples drawn from forests and arid lands. Exploration of global ecosystems, ecological processes and services, factors that create and maintain diversity, ecosystem health and integrity. Principles for sustainable natural resource management and use. **PREREQS:** Graduate standing. Highly recommended: Basic ecology course. Recommended: Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years experience working in a natural resources-related field. Students seeking the SNR Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals. There are no prerequisites for non-degree seeking students other than graduate standing. Part of the Sustainable Natural Resources Graduate Certificate program; also open to other graduate students and non-degree/credential seeking students.

SNR 531. SUSTAINABLE SILVICULTURE AND FOREST CERTIFICATION (3). Strategies for sustainable silviculture, and measuring and verifying environmental performance (including certification systems) are examined using classroom lectures, case studies, and field exercises. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students. **PREREQS:** Graduate standing. Recommended: Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years experience working in a natural resources-related field. Students seeking the SNR Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals. There are no prerequisites for non-degree seeking students other than graduate standing. Part of the Sustainable Natural Resources Graduate Certificate program; also open to other graduate students and non-degree/credential seeking students.

SNR 532. PLANNING AGROFORESTRY PROJECTS (2). Develop basic understanding and appreciation of agroforestry concepts, systems, technologies and practices as used and applied in tropical and temperate zones of the world. **PREREQS:** SNR 530 or equivalent course in ecology and SNR 511 are corequisites. Part of SNR Graduate Certificate; also open to other graduate students and non-degree/credential seeking students.

SNR 533. ALTERNATIVE (NONTIMBER) FOREST PRODUCTS (2). Explores the economic, environmental, and sociocultural components of understanding and managing alternative forest products, also known as nontimber forest products (NTFPs), while considering other natural/social resources. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students. **PREREQS:** Graduate standing. Recommended: Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years experience working in a natural resources-related field. Students seeking the SNR Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals. There are no prerequisites for non-degree seeking students other than graduate standing. Part of the Sustainable Natural Resources Graduate Certificate program; also open to other graduate students and non-degree/credential seeking students.

SNR 534. REDUCED IMPACT TIMBER HARVEST (2). Explores planning, implementation, monitoring, and evaluation of reduced impact timber harvesting. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students. **PREREQS:** Graduate standing. Recommended: Students should have a bachelor's degree in the arts,

humanities, or science and preferably at least two years experience working in a natural resources-related field. Students seeking the SNR Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals. There are no prerequisites for non-degree seeking students other than graduate standing and non-degree/credential seeking students.

SNR 535. SUSTAINABLE MANAGEMENT OF AQUATIC AND RIPARIAN RESOURCES (3). Explores integrated strategies for sustainable management of watersheds, estuaries, coastal zones, and aquatic resources. Special emphasis given to links between land uses and aquatic environments. Part of the 18-credit Sustainable Natural Resources (SNR) Graduate Certificate; also open to other graduate students. **PREREQS:** Graduate standing. Recommended: Students should have a bachelor's degree in the arts, humanities, or science and preferably at least two years experience working in a natural resources-related field. Students seeking the SNR Graduate Certificate should take SNR 511 their first term because it explains overall certificate program goals. There are no prerequisites for non-degree seeking students other than graduate standing. Part of the Sustainable Natural Resources Graduate Certificate program; also open to other graduate students and non-degree/credential seeking students.

SNR 540. GLOBAL ENVIRONMENTAL CHANGE (3). Explore biophysical and social sciences that underlie contemporary global change issues: global biogeochemical cycles, climate system, climate change, threats to biodiversity; human dimensions of climate change, globalization, land cover and land use change, global environmental governance and management tools. **PREREQS:** Graduate standing. Highly recommended: Basic biology course. Recommended: Bachelor's degree in arts, sciences, or humanities; preferably at least two years working in a natural resources-related field. Part of the SNR Graduate Certificate Program; also open to other graduate students and non-degree/credential seeking students.

SNR 808. WORKSHOP (1-4). This course is repeatable for a maximum of 4 credits.

SUS 304. *SUSTAINABILITY ASSESSMENT (4). Explores theories and application of sustainability assessment techniques and analysis methods. Practical application of globally recognized assessment protocol, including checklists, footprinting, life-cycle analysis and the indicators used to conduct these analyses. Emphasis on ecological and social indicators, although economic indicators are explored. (Bacc Core Course) **PREREQS:** NR 350 and NR 350

SUS 330. ECOLOGICAL DIMENSIONS OF SUSTAINABILITY (3). Students will explore regulating factors in ecosystems and major ecological goods and services that contribute to human welfare globally. Additional topics include biological diversity; ecological processes; disturbance; productivity; nutrient cycling; cumulative effects and lag times; carrying capacity; extinctions, land use/land cover change; and connections between ecological integrity and economic/social prosperity.

SUS 350. SUSTAINABLE COMMUNITIES (4). Introduction to the concept of sustainable communities from a multidisciplinary perspective. Instructors from a broad array of disciplines and professions. Development of holistic thinking skills and innovative solutions to complex problems. (Bacc Core Course)

SUS 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SUS 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

SUS 420. SOCIAL DIMENSIONS OF SUSTAINABILITY (3). Focuses on the social aspects of sustainability, including how the

environment, the economy, social life interact to create the world we live in. Explores how social institutions (school, government, business, family) contribute to sustainability and promote or discourage social and environmental justice at local and global scales. Taught at OSU-Cascades only. **PREREQS:** NR 350

SUS 499. SPECIAL TOPICS (3). Taught at OSU-Cascades only. This course is repeatable for a maximum of 15 credits.

■ TOURISM AND OUTDOOR LEADERSHIP COURSES

TOL 371. ECO AND ADVENTURE TOURISM (3). Introduces students to eco and adventure tourism, including definitions and historical development, visitor motivations and market issues, business issues (including ethics and risk management), positive and negative impacts, and planning and management issues. Both domestic and international issues and examples will be covered.

TOL 372. ETHICS IN ADVENTURE TOURISM (3). Examines ethical issues and situations inherent in adventure leadership and other experiential education settings. Leading adventure programs entails judgment-laden decisions that are made every hour of every day with regards to participants, leaders, and programs. Students will become familiar with predominant ethical theories and apply these theories to practical situations with a view to assessing the values that influence their decisions and subsequent actions. Students will better understand how their decisions influence their professional work and those of others within the context of adventure leadership. **PREREQS:** FOR 375 or other writing intensive course

TOL 373. WILDERNESS AND ADVENTURE EDUCATION (4). Rationale for and methods used in the application of wilderness and outdoor adventure education programs in education, recreation, corporate and human service settings. Covers historical and contemporary philosophies and practices in adventure education, with a primary emphasis on outdoor adventure education. Explores the educational, social, and ethical consequences of outdoor adventure education programs. Also explores the role of wilderness in the context of the United States and differing views of what constitutes wilderness from an international perspective. **PREREQS:** FOR 375

TOL 374. TOURISM INFORMATION TECHNOLOGY (3). Covers the information technology needs of tourism and outdoor recreation businesses. Emphasis is placed on providing a thorough understanding of how e-marketing, e-commerce, and online information distribution are keys to commercial success. Students will develop, publish, and present a tourism-related e-newsletter, website, or PowerPoint presentation relating to a topic or company.

TOL 375. ^EXPERIENTIAL EDUCATION (4). Theory, techniques, and practice of experiential education. Students will define learning objectives, design curriculum, develop teaching materials, and effectively teach a variety of audiences. (Writing Intensive Course)

TOL 376. TOURISM AND OUTDOOR RECREATION FOR SPECIAL POPULATIONS (4). Introduces students to current philosophies of tourism and recreation programming and its application with groups of special populations. Students will explore the educational, social, and ethical implications of outdoor programs for special populations, while investigating cultural attitudes and behaviors toward selected special populations.

TOL 377. EXPEDITIONS I (4). Students will research, design, and plan a three- to four-week extended backcountry expedition. Content includes determination of expedition purpose, length, and location, followed by planning and

programming. Includes logistical arrangements, risk management procedures, and required permits. Students will design skill and knowledge progressions for participants. **PREREQS:** Instructor approval

TOL 378. TOURISM AND RECREATION DATA ANALYSIS (3). Introduces students to descriptive and inferential statistics. The focus is on 1) applying relevant statistical analyses to tourism and recreation data and 2) interpreting results. **PREREQS:** MTH 111

TOL 379. EXPEDITIONS II-LAND (10). Field-based course that develops the knowledge, skills, and dispositions needed to safely and effectively lead and participate in an extended land-based backcountry expedition of three weeks or longer. Includes a service component tied to a relevant local organization. **PREREQS:** FOR 377 and (HHP 253 (WAFSA) or Wilderness First Responder (WFR)) and HHP 111 and HHP 255 and HHP 271 and HHP 273 and (HHP 294WG or HHP 294RC) and instructor approval.

TOL 380. EXPEDITIONS II-WATER (3). Field-based course that develops the knowledge, skills, and dispositions needed to safely and effectively lead and participate in an extended water-based backcountry expedition of one week or longer. Includes a service component tied to a relevant local organization. **PREREQS:** FOR 377 and (HHP 253 (WAFSA) or Wilderness First Responder (WFR)) and HHP 111 and HHP 255 and HHP 271 and HHP 273 and (HHP 294WG or HHP 294RC) and instructor approval.

TOL 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

TOL 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

TOL 410. INTERNSHIP (1-16). Full-time supervised professional experience emphasizing functional proficiency under joint sponsorship of university and agency personnel. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** FOR 251 and FOR 351 and FOR 356 and FOR 391 and FOR 407-Section 020 are recommended and may be taken concurrently. Departmental approval required.

TOL 422. RESEARCH METHODS IN SOCIAL SCIENCE (4). An introduction to research methods applied to social science issues and problems. Emphasis is on the nature of the research process, how to conduct research, and how to interpret and disseminate research results. Lec/lab. **CROSSLISTED** as FES 422. **PREREQS:** FOR 251 and (ST 351 or ST 351H)

TOL 444. ECOLOGICAL ASPECTS OF PARK MANAGEMENT (3). Ecological principles applied to the management of park recreation uses. The relationship between biological and physical science information and recreation management decisions is explored. **CROSSLISTED** as FES 444. **PREREQS:** FOR 251* plus an ecology course.

TOL 471. SUSTAINABILITY IN TOURISM AND OUTDOOR LEADERSHIP (3). Covers the concept and application of sustainability in tourism and outdoor leadership (TOL). The history, concept, and definitions of sustainability in this field will be described. Students will learn the range of positive and negative impacts from TOL activities, as well as strategies and tools for managing them.

TOL 474. ENTREPRENEURSHIP IN TOURISM AND OUTDOOR LEADERSHIP (3). Creation and management of tourism and outdoor leadership businesses. Covers principles of running a successful business and includes special considerations for operations on public lands (e.g. concessionaires). **PREREQS:** BA 101

TOL 475. HOSPITALITY AND TOURISM MARKETING (3). Development and management of marketing in the hospitality and travel industry sectors, and positioning products or destinations to capture customers. Addresses differences between tourism and other industries. Students will develop a marketing plan.

TOL 476. RISK MANAGEMENT IN TOURISM AND OUTDOOR LEADERSHIP (3). Risk management in tourism and outdoor leadership from an operational perspective. Focuses on risk in tourism and outdoor education programs as a contributing factor for learning, growth, and satisfaction of client motivations. Covers the nature of accidents in outdoor settings, addresses the practitioner's perspective of risk in the field, and describes theories and methods of implementing risk management. Covers the ethics of utilizing risk and potentially dangerous activities as a basis for enhancing client education and experience. **PREREQS:** FOR 478

TOL 477. ADVENTURE THERAPY (3). Provides students with an overview of adventure therapy, including its history, theory, current status and future trends. Includes program design, ethical issues, and best practices in the field.

TOL 478. LEGAL ISSUES IN TOURISM AND OUTDOOR LEADERSHIP (3). Covers the legal dimensions of tourism and outdoor leadership activities. Students will learn about the civil and criminal judicial system from a tourism and outdoor leadership perspective. They will learn to apply risk management methodologies and instruments, such as contracts, insurance, waivers and releases to address legal liability. The basic principles of intentional and negligent torts will be discussed, with an emphasis on practical applications. Also covers employment issues and general business law, including business structure and the use of entities as liability shields. **PREREQS:** FOR 375

TOL 479. *NATURE AND THE HUMAN EXPERIENCE (3). Examines the human experience with (and within) nature from biological, psychological, spiritual, and international/cultural perspectives. Identifies opportunities for fostering the human-nature connection to achieve organizational goals and individual and societal health. (Bacc Core Course) **PREREQS:** FOR 375 or other equivalent WIC course.

TOL 499. SPECIAL TOPICS (1-16). Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section 8: Social aspects of natural resource management (3 credits) graded. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior or graduate standing.

FOREST ENGINEERING, RESOURCES AND MANAGEMENT

Sustainable Forest Management

The mission of the Department of Forest Engineering, Resources and Management (FERM) is to develop, communicate, and teach the science, knowledge and engineering necessary for the sustainable management of forest, land, and water resources to achieve economic, environmental, and social objectives. Teaching and research focus on support and enhancement of active forest management across the full range of owner objectives, from ecosystem restoration to timber production. FERM includes biologists, engineers, economists, biometricians, hydrologists, silviculturists and applied ecologists.

The Department of Forest Engineering, Resources and Management offers undergraduate degree programs leading to professional practice in forestry and forest engineering. It also offers more broadly defined graduate programs at the master's and doctorate levels in Sustainable Forest Management, including six areas of concentration.

FORESTRY UNDERGRADUATE PROGRAM

The forest management profession requires an understanding of natural resource systems and the management of forest resources for multiple uses. The Bachelor of Science (BS) degree in Forestry provides a broad-based education with the goal of preparing students to be successful forest managers. Graduates must understand biological and physical processes occurring in forests, the social and economic forces that influence policies and actions affecting forests, natural resource systems, and management of forest resources for multiple uses. Students also learn how values affect forest management planning so they can communicate effectively with others and make relevant decisions.

The core curriculum provides a broad-based education which includes basic courses in the biological, physical, social

sciences, as well as professional courses designed to prepare students to manage forest resources. The Forestry BS also requires six months of relevant work experience intended to provide enhanced understanding of the professional workplace. Strength in a specific area is obtained by selecting one of two options and serves to fulfill the 180 credits for graduation:

- **Forest Management**
- **Forest Operations Management**

Graduates are employed by private and public organizations. The private sector includes the timber and forest products industry, forestry consulting firms, environmental organizations, and self-employment. Public employers include federal, state, and local government agencies such as the U.S. Forest Service, Bureau of Land Management, National Park Service, and state departments of forestry and natural resources.

The Bachelor of Science degree in Forestry is accredited by the Society of American Foresters.

FOREST ENGINEERING UNDERGRADUATE PROGRAM

The Forest Engineering Undergraduate Program provides an engineering education within a strong forestry context. The program is founded on fundamental principles in forest science and engineering science. Forest Engineering program objectives are to prepare graduates to plan and implement complex forestry and natural resource operations that help meet global demands for wood products while sustaining water, habitat, and other forest resources. It provides "work ready" graduates for entry into the diverse professional field of forest engineering. Early career accomplishments include harvest unit design, forest road location and design, contract inspection and administration, cost analysis, and forest transportation system design and management. Mid-career accomplishments commonly expand to involve aspects of engineering management, including planning and budgeting, supervision, wood procurement, harvest and road design reviews, and scheduling and controlling forest operations.

Specifically, the Forest Engineering Undergraduate Program provides fundamental coverage of the following:

- Fundamental engineering and forestry principles
- Physical and biological aspects of soil and water resources
- Surveying and measurement of land and forest resources
- Analysis and design of the forest transportation system
- Analysis and design of harvesting operations

- Economics and operational planning principles

Integration of these topics enables forest engineering graduates to develop and manage safe, economical, and environmentally sound forest operations. Design experiences that integrate the topics listed above and steadily build on previous course material are distributed throughout the upper-division portion of the program. The Forest Engineering capstone sequence during the senior year provides an opportunity for students to bring together all the topics from the curriculum in a project framework that includes the field and office engineering tasks associated with the planning and design of forest operations. The capstone sequence is integrated with the Forestry capstone sequence to provide realistic interdisciplinary planning and design experience.

Forest engineering graduates are employed by private forestry firms, public forestry agencies, logging and construction companies, engineering consulting firms, and surveying firms. Some graduates establish their own consulting businesses after a few years of field experience. Career progression following graduation can be quite varied. Some graduates gravitate toward technical positions while others move quickly toward management of harvesting and other forest operations, or more broadly defined management of the forest land base.

The Bachelor of Science degree in Forest Engineering can be earned through completion of the Forest Engineering program or the Forest Engineering-Civil Engineering double degree program. The BS degree in Forest Engineering is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>.

The BS in Forest Engineering is also accredited by the Society of American Foresters.

Completion of the five-year, double-degree Forest Engineering-Civil Engineering program results in a BS in Forest Engineering and a BS in Civil Engineering, offered by the School of Civil and Construction Engineering. The BS in Civil Engineering is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>.

Forest engineering is a licensed profession in the state of Oregon. The BS in Forest Engineering meets the administrative rules established by the Oregon State Board of Examiners for Engineering and Land Surveying (OSBEELS) as evidence of adequate preparation for the Fundamentals of Engineering Examination, the first of two examinations required for professional engineering licensing. The BS in Forest Engineering, with the completion of appropriate program electives, also

meets the OSBEELS administrative rules for evidence of adequate preparation for the Fundamentals of Land Surveying Examination, the first of two examinations required for professional land surveyor licensing.

UNDERGRADUATE MAJORS WITH OPTIONS

FOREST ENGINEERING (BS, CRED, HBS)

The BS degree in Forest Engineering is offered through a four-year resident curriculum, a four-year and two-term Cooperative Education program, and as part of a five-year double degree program from which graduates receive two bachelor of science degrees, one in forest engineering and one in civil engineering. The BS degree in Forest Engineering is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. The BS degree in Forest Engineering is also accredited by the Society of American Foresters. The double degree program is offered in cooperation with the School of Civil and Construction Engineering. Curricula for the double degree program is listed under a separate heading. Both programs begin with basic science and mathematics, progress on through engineering science and forest science, to arrive at professional-level courses in forest engineering that include surveying, soil and water resources, timber harvesting, operations analysis, road design, and planning. Graduates are eligible to take the Fundamentals of Engineering Examination.

In addition to the listed courses, all students are required to complete a total of six months of satisfactory employment in an area related to their major. This is usually accomplished by two or more summers of work, but it may include work during the academic year. An optional Cooperative Education program that includes two 6-month internships is available. Students in the Cooperative Education Program satisfy the six months satisfactory employment requirement by virtue of one internship. Work performance and personal conduct are thoroughly appraised by the College of Forestry.

Pre-Professional Forest Engineering Program

Admission to the pre-professional program requires that students be admitted as a degree-seeking undergraduate or post-baccalaureate level student at Oregon State University. Courses included in the first and sophomore years comprise a pre-professional program of study that produces a solid foundation for professional program studies at the junior, senior, and advanced degree levels. The pre-professional program may be taken

at Oregon State University or at any accredited college or university that offers equivalent courses transferable to OSU in conjunction with foundation forestry available via OSU Ecampus.

Professional Forest Engineering Program

Students must be admitted to the professional Forest Engineering program following completion of the pre-professional forest engineering course work in order to progress to the junior year in forest engineering. Students in the double degree program also must be admitted to the College of Engineering professional program following completion of the pre-engineering course work.

Enrollment in professional program courses is restricted to those students who have clearly demonstrated an ability to achieve the standards required for professional studies. The number of students admitted to the program is based on available resources. Students meeting the minimum pre-forest engineering GPA of 2.25 may or may not be admitted depending on available resources.

Admission to the professional program will be granted for students meeting the admission requirements prior to fall term of the junior year. Application for the professional program will be made as of the end of winter term for the following fall term. For admission, students must earn:

1. a grade of "C" or better in all pre-professional courses listed below. Grade repeat (replacement) policy will follow OSU Academic Regulation #20.
2. a minimum GPA of 2.25 based on the pre-professional courses (or transfer equivalents) satisfactorily completed.

Students who have completed their pre-professional studies at a college or university other than Oregon State University must apply both to the OSU Office of Admissions for admission to OSU as a degree-seeking undergraduate or post-baccalaureate level student and to the College of Forestry for admission to the professional program. Application forms for the Forest Engineering professional program and information on policies and programs are available from the College of Forestry.

Students who have not satisfactorily completed all of the pre-professional courses when they apply may be provisionally accepted. Final acceptance is contingent on completion of any remaining pre-professional course work with grade of "C" or better by the end of the summer term prior to entrance into the professional program. Students who receive provisional acceptance and then fail to attain a grade of "C" or better in remaining pre-professional course work prior to the beginning of fall term will be

re-directed to the pre-professional forest engineering program.

All required courses for admission to the professional program must be completed before entering the professional program. Students may only enter the professional program in the fall term each academic year.

The professional program begins with Forestry Field School prior to fall term of the professional program.

Pre-Professional Forest Engineering Program (Major code 825)

Grade standards for the pre-professional program as listed in the program description apply.

Professional Forest Engineering Program (Major code 380)

Grade standards for the professional program as listed in the program description apply.

All students pursuing the BS in Forest Engineering;

1. must earn grades of “C” or better in all required professional forestry courses (with FE, FOR, FS course designators) or cross listed

course designators, or approved substitutions for majors and options, and;

2. must maintain a 2.0 GPA in all major course work, defined as courses listed by prefix (e.g. FE, FOR, SOIL) and number, and cross listed course designators, and courses used for substitution of required courses.

FOREST ENGINEERING - CIVIL ENGINEERING (BS, CRED, HBS)

The Forest Engineering-Civil Engineering program results in a BS degree in Forest Engineering and a BS degree in Civil Engineering. The BS degree in Forest Engineering is accredited by the Engineering Accreditation Commission

of ABET, (<http://www.abet.org>). The BS degree in Civil Engineering is also accredited by the Engineering Accreditation Commission of ABET, Inc. The BS in Forest Engineering is also accredited by the Society of American Foresters. This unique five-year, double degree program is offered in cooperation with the School of Civil and Construction Engineering. This program begins with basic science and mathematics and progresses on through engineering science and forest science to arrive at professional-level courses in forest engineering that include surveying, soil and water resources, timber harvesting, operations analysis, road design, and planning. Graduates are eligible to take the Fundamentals of Engineering Examination.

In addition to the listed courses, all students are required to complete a total of six months of satisfactory employment in an area related to their major. This is usually accomplished by two or more summers of work, but it may include work during the academic year. An optional Cooperative Education program that includes two 6-month internships is available.

Students in the Cooperative Education program satisfy the six months satisfactory employment requirement by virtue of one internship. Work performance and personal conduct are thoroughly appraised by the College of Forestry.

Admission to the Pre-Professional Forest Engineering-Civil Engineering Program

Admission to the pre-professional program requires that a student be admitted as a degree-seeking undergraduate or post-baccalaureate level student at Oregon State University. Courses included in the first and sophomore years comprise a pre-professional program of study that produces a solid foundation for professional program studies at the junior, senior, and advanced degree levels. The pre-professional program may be taken at Oregon State University or at any accredited college or university that offers equivalent courses transferable to OSU in conjunction with foundation forestry available via OSU Ecampus.

Professional Forest Engineering-Civil Engineering Program

Students must be admitted to the professional forest engineering program following completion of the pre-professional forest engineering course work in order to progress to the junior year in forest engineering. Students in the double degree program must also be admitted to the College of Engineering professional program prior to beginning the civil engineering junior year. Students should consult the College of Engineering for requirements of the College of Engineering professional program.

Enrollment in professional forest engineering program courses is restricted to those students who have clearly demonstrated an ability to achieve the standards required for professional studies. The number of students admitted to the program is based on available resources. Students meeting the minimum pre-forest engineering GPA of 2.25 may or may not be admitted depending on available resources.

Admission to the professional forest engineering program will be granted for students meeting the admission requirements prior to fall term of the junior year. Application for the professional program will be made as of the end of winter term for the following fall term. For admission, students must earn:

1. a grade of "C" or better in all pre-professional courses listed below. Grade repeat (replacement) policy will follow OSU Academic Regulation #20.
2. a minimum GPA of 2.25 based on the pre-professional courses (or transfer equivalents) satisfactorily completed.

Students who have completed their pre-professional studies at a college or university other than Oregon State University must apply both to the OSU Office of Admissions for admission to OSU as a degree-seeking undergraduate or post-baccalaureate level student and to the College of Forestry for admission to the professional program. Application forms for the forest engineering professional program and information on policies and programs are available from the College of Forestry.

Students who have not satisfactorily completed all of the pre-professional courses when they apply may be provisionally accepted. Final acceptance is contingent on completion of any remaining pre-professional course work with grade of "C" or better by the end of the summer term prior to entrance into the professional program. Students who receive provisional acceptance and then fail to attain a grade of "C" or better in remaining pre-professional course work prior to the beginning of fall term will be re-directed to the pre-professional forestry program.

All required courses for admission to the professional program must be completed before entering the professional program. Students may only enter the professional program in the fall term of each academic year.

The professional forest engineering program begins with Forestry Field School prior to fall term of the professional program.

Pre-Professional Forest Engineering-Civil Engineering Program (Major code 825)

Grade standards for the pre-professional

program as listed in the program description apply.

First Year (46)

CCE 101. Civil and Construction Engineering Orientation (2)^{E++}

 ST 314. Introduction to Statistics for Engineers (3)^{E++}

Professional Forest Engineering-Civil Engineering Program (Major code 380)

Grade standards for the professional program as listed in the program description apply.

All students pursuing the BS in Forest Engineering-Civil Engineering:

1. must earn grades of "C" or better in all required professional forestry courses (with FE, FOR, FS, course designators), or cross listed course designators, or approved substitutions for majors and options, and;
2. must maintain a 2.0 GPA in all major course work, defined as courses listed by prefix (e.g. FE, FOR, SOIL) and number, and cross listed course designators, and courses used for substitution of required courses.

Forest Engineering Junior Year (49)

FE 307. Junior Seminar (1)
 FE 310. Forest Route Surveying (4)
 FE 312X. Forestry Field School (2)

- ¹ Must be selected to satisfy baccalaureate core requirements.

FORESTRY (BS, HBS)

The successful forester must understand the biological and physical processes of forest ecosystems, as well as the social, economic, and operational forces that influence forest policies and management actions. The forestry core curriculum includes basic courses in the biological, physical, social sciences, and six months of work experience as well as professional courses designed to prepare students to manage forest resources.

Strength in a specific area is obtained by selecting one of the following options:

- Forest Management
 - Forest Operations Management
- The Bachelor of Science degree in Forestry is accredited by the Society of American Foresters (SAF).

In addition to the listed courses, all students are required to complete a total of six months of satisfactory employment in an area related to their major. This is usually accomplished by two or more summers of work, but it may include work during the academic year. An optional Cooperative Education program that includes two 6-month internships is available. Students in the Cooperative Education Program satisfy the six months satisfactory employment requirement by virtue of one internship. Work performance and personal conduct are thoroughly appraised by the College of Forestry.

Six months of forestry or related natural resource work experience and completion of an option is required in the forestry degree program. The option courses compliment the forestry core and serve to fulfill the 180 credits for graduation.

Pre-Professional Forestry Program

Admission to the pre-professional program requires that a student be admitted as a degree-seeking undergraduate or post-baccalaureate level student at Oregon State University. Courses included in the first and sophomore years comprise a pre-professional program of study that produces a solid foundation for professional program studies at the junior, senior, and advanced degree levels. The pre-professional program may be taken at Oregon State University or at any accredited college or university that offers equivalent courses transferable to OSU in conjunction with foundation forestry available via OSU Ecampus.

Professional Forestry Program

Successful completion of the pre-professional program will result in acceptance into the professional program. This requires selection of an option and:

1. a grade of "C" or better in all pre-professional courses listed below. Grade repeat (replacement) policy will follow OSU Academic Regulation 20.

2. a minimum GPA of 2.25 based on the pre-professional courses (or transfer equivalents) satisfactorily completed.

Admission to the professional program will be granted for students meeting the admission requirements prior to fall term of the junior year. Application for the professional program will be made as of the end of winter term for the following fall term.

Enrollment in professional program courses is restricted to those students who have clearly demonstrated an ability to achieve the standards required for professional studies. The number of students admitted to the program is determined based on available resources. Students meeting the minimum Pre-Forestry GPA of 2.25 may or may not be admitted depending on available resources.

Students who have completed their pre-professional studies at a college or university other than Oregon State University must apply both to the OSU Office of Admissions for admission to OSU as a degree-seeking undergraduate or post-baccalaureate level student and to the College of Forestry for admission to the professional program. Application forms and information on policies and programs are available from the College of Forestry.

Students who have not satisfactorily completed all of the pre-professional courses when they apply may be provisionally accepted. Final acceptance is contingent on completion of any remaining pre-professional coursework with grade of "C" or better by the end of the summer term prior to entrance into the professional program. Students who receive provisional acceptance and then fail to attain "C" or better grades in any remaining pre-professional course work prior to the beginning of fall term will be re-directed to the pre-professional forestry program.

All courses required for admission to the professional program must be completed before entering the professional program. Students may only enter the professional program for fall term each academic year.

The professional program begins with Forestry Field School during the two weeks prior to the first fall term of the professional program.

GRADUATE MAJORS

SUSTAINABLE FOREST MANAGEMENT (MF, MS, PhD, MAIS)

Graduate Areas of Concentration

Engineering for sustainable forestry; forest biometrics and geomatics; forest operations planning and management; forest policy analysis and management; forest watershed management; silviculture, fire, and forest health

The Sustainable Forest Management (SFM) graduate program emphasizes the conservation of forest-dominated landscapes to meet a defined set of ecological, economic and social criteria over long time frames. The program follows the sustainable principles outlined by the Montreal Process Criteria and Indicators. These principles have been adopted by the state of Oregon.

The program provides a strong grounding in the principles and techniques of active management of forests to improve forest health and condition while producing a full range of products and ecosystem services. It consists of a common core in the principles and criteria of sustainable forest management; statistics for design and interpretation of experiments; and specialization in one of six areas of concentration. The MF degree requires a project, MS a thesis, and PhD a dissertation.

**Areas of Concentration
Engineering for Sustainable Forestry**

Designing forest operations to achieve sustainable forest management objectives; ecological restoration operations; road design and construction. Supporting course work often draws from forest transportation systems, forest hydrology, forest geomatics, forest road engineering, forest road management, water quality and forest land use, forest operations analysis, production planning, strategic and tactical planning, harvest design, forest operations regulations and policy issues, advanced logging mechanics, harvesting management, wildland fire ecology, forest policy analysis, advanced silviculture, forest wildlife habitat management, remote sensing, advanced GIS applications in forestry, forest erosion processes, mathematical programming, heuristics for combinatorial optimization, economics of the forest resource, human resources management, and human factors engineering. Contacts: P. Adams, Boston, Chung, Leshchinsky, Segura, Sessions, Skaugset

Forest Biometrics and Geomatics

Modeling tree and stand development; forest data sampling and monitoring methods; forest measurements and assessments; mapping and data management technologies. Supporting course work often draws from forest biometrics, forest geomatics, forest models, statisti-

cal methods, advanced aerial photos and remote sensing, advanced GIS applications in forestry, forest policy analysis, advanced silviculture, digital image processing, advanced GIS applications in the geosciences, photogrammetry, aerial and terrestrial LiDAR applications. **Contacts:** Hailemariam, Hilker, Maguire, Wing

Forest Operations Planning and Management—Planning, organizing, and executing forest plans; enhancing supply chain efficiency and improving international competitiveness. Supporting course work often draws from tactical and operational planning, forestry supply chain management, forest geomatics, production planning, forest transportation systems, forest operations regulations and policy analysis, heuristics for combinatorial optimization, mathematical programming, advanced GIS applications in forestry, economics of the forestry resource, forest wildlife habitat management, industrial systems optimization, statistical methods, forest products marketing, forest biometrics, forest modeling, lean systems manufacturing, advanced production planning and control, human resources management, and organizational management. **Contacts:** Boston, Chung, Kellogg, Sessions

Forest Policy Analysis and Management—Analyzing tradeoffs in the forest and resource policy decision process; public land use policy; interpretations of regulations; markets for forest products; forest certification; theoretical and applied research related to ecosystem services. Supporting course work often draws from natural resource policy and law, economics of the forest resource, spatial analysis of forested landscapes, economic theory, applied econometrics, environmental economics, markets and prices in the forest sector, valuation of non-market resources, analytic techniques for forest managers, mathematical programming, heuristics for combinatorial optimization; and work in other fields to support thesis or dissertation research. This area of concentration is jointly sponsored by FERM, the Applied Economics Graduate Program and the Applied Economics Department.

Contacts: Latta, Maness, Montgomery, White

Forest Watershed Management—Understanding watershed conditions and processes in forested ecosystems and the effects of management activities; evaluating and improving soil and water quality and related practices and policies for forest operations. Supporting course work often draws from forest hydrology, stream ecology, mineral-organic matter interactions, physics of soil ecosystems, biology of soil ecosystems, geochemistry of soil

ecosystems, soil morphology and classification, limnology, water quality and forest land use, forest erosion processes, hillslope and watershed hydrology, forest transportation systems, forest operations regulations and policy issues, harvesting management, forest policy analysis, physiology of woody plants, design and analysis of experiments, statistical methods, riparian ecology and management, groundwater hydraulics, groundwater modeling, sediment transport, water quality dynamics, principles of stable isotopes, advanced chemical processes in soil systems, advanced soil biology and biochemistry, advanced soil genesis and classification. **Contacts:** P. Adams, Bladon, Hatten, Segura, Skaugset

Silviculture, Fire, and Forest Health—Manipulating vegetation to achieve management objectives, from restoration to intensive timber production; fire ecology and fire management; forest ecosystem health. Supporting course work often draws from advanced silviculture, advanced GIS applications in forestry, forest biometrics, forest modeling, economics of the forest resource, wildland fire science and management, ecological restoration, forest policy analysis, statistical methods, sampling methods, forest hydrology, watershed quality and forest land use, forest insect and disease management, natural resource data analysis, advanced forest community ecology, wildland fire ecology, biology of invasive plants, forest wildlife habitat management, physiology of woody plants, global change ecology, ecosystem analysis and application, weed management, and wildlife ecology. **Contacts:** Bailey, Fitzgerald, Maguire, Powers, Rose, Shaw

Students choose their specialization during their first year of study. Programs are often interdisciplinary, drawing from a wide range of departments on campus. Incoming students without a prior degree in forestry management are usually required to undertake an additional set of forestry core courses.

The Department of Forest Engineering, Resources and Management at Oregon State University is internationally known for its excellent teaching, research and Extension faculty and programs, including the 11,500 acre McDonald/Dunn Research Forest within a few minutes drive from campus. Emphasis is on Pacific Northwest conditions, but graduates are actively serving in many regions of the world. The department maintains close ties with industry, appropriate government agencies, and academic centers nationally and internationally. More detailed information, including sample curricula, can be found in the graduate advising guide on our website at <http://ferm.forestry.oregonstate.edu/sites/ferm>.

forestry.oregonstate.edu/files/Grad%20SFM%20Advising%20Guide%20December2013.pdf.

■ FOREST ENGINEERING COURSES

FE 101. INTRODUCTION TO FOREST ENGINEERING (2). Introduction to the forest engineering discipline. Discussion of critical issues, available resources, career opportunities and professional opportunities. Overview of field instruments and analytical approaches.

FE 102. FOREST ENGINEERING PROBLEM SOLVING AND TECHNOLOGY (3). A technology applications course designed to introduce students to formulating and implementing computational solutions to engineering analysis and design problems in a digital environment. Students will learn to evaluate engineering problems, formulate one or more solution techniques or algorithms, and code the solution using spreadsheet and/or programming software. Professionalism in completing and presenting laboratory exercises is emphasized. Laboratory examples draw from a variety of engineering topics. This course may be substituted for CE 102, Civil Engineering I: Problem Solving and Technology. **PREREQS:** Calculus

FE 208. FOREST SURVEYING (4). Introduction to theory and practice of surveying methods and measurements as applied to the specifics of forestry problems and their solutions. This is the first of a four-course sequence (FE 208, 209, 310, 311). Together with FE 257 it is designed to prepare students for the Fundamentals of Land Surveying exam, which is necessary to become a professional land surveyor. **PREREQS:** (MTH 112 or MTH 241 or MTH 251 or MTH 252) and (FOR 111 or NR 201)

FE 209. FOREST PHOTOGRAMMETRY AND REMOTE SENSING (4). Management and conservation of natural resources with the fundamentals of spatial data acquisition from airborne and spaceborne sensors. Introduction to theory of spectral reflectance properties of vegetation, the principles of photographic analysis and aerial photo-interpretation and new advances such as LIDAR. **PREREQS:** MTH 112 or MTH 241 or MTH 251 or MTH 251H or MTH 252 or MTH 252H

FE 257. GIS AND FOREST ENGINEERING APPLICATIONS (3). An introduction to the appropriate use and potential applications of geographic information systems (GIS) and related technologies (GPS and remote sensing) in forest management and operational planning and problem solving. Students are presented with lectures and exercises that cover a wide range of GIS and GIS-related topics and issues including spatial database creation, structure, analysis, and modeling.

FE 307. JUNIOR SEMINAR (1). College is the time to develop the skills necessary for the transition between academics and career. In conjunction with the expertise already available on campus, this course will guide students through career planning, exploration, placement, and employer expectations. **CROSSLISTED** as FOR 307. **PREREQS:** Professional forestry students only.

FE 310. FOREST ROUTE SURVEYING (4). Route surveying and site surveying applied to forestry problems. Use of surveying equipment; traversing; computations; leveling; horizontal, vertical, compound, reverse and spiral curves; earthwork; construction staking as applied to new road and existing road P-line survey. Includes rapid survey techniques. Lec/lab. **PREREQS:** (FE 308 and FE 309)

FE 312X. FORESTRY FIELD SCHOOL (2). A hands-on experience in the major aspects of forestry, including regeneration surveys, silviculture, cruising, recreation, forest

disturbances, logging site and mill visits, east and west of the Cascades Range. **CROSSLISTED** as FOR 312X. **PREREQS:** Admission into a professional school in the Forestry, Forest Engineering, or Forest Engineering/Civil Engineering program.

FE 315. SOIL ENGINEERING (4). Use of soil in engineering and construction. Identification and classification. Engineering properties of soil: permeability, compressibility, and strength. Compaction principles and methods. Field control of soil engineering projects. **PREREQS:** ENGR 213* and CE 311 or CEM 311 or FE 330

FE 316. SOIL MECHANICS (4). Soil strength and soil mechanics theories applied to analysis of slope stability, retaining structures, foundations, and pavements. Lec/lab. **PREREQS:** (FE 315* or CE 372*)

FE 330. FOREST ENGINEERING FLUID MECHANICS AND HYDRAULICS (3). Fluid properties, pressure, fluid statics, continuity, energy equation, single and series pipe flow, open channel hydraulics, peakflow estimates for culvert design, stream crossing design. Lec/lab. **PREREQS:** (ENGR 213* and FE 102*)

FE 370. HARVESTING OPERATIONS (4). Timber harvesting and transport methods from the forest to the mill. Technical feasibility, economic, and environmental relationships in forestry operations. **PREREQS:** Junior standing in forestry. For non-forest engineering students.

FE 371. HARVESTING PROCESS ENGINEERING (4). Timber harvesting equipment and systems. Harvesting process evaluation and decisions aided by forest engineering analysis. **PREREQS:** ENGR 211 and FE 102. **COREQS:** FE 308 and FE 357

FE 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits.

FE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

FE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

FE 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

FE 411. COOPERATIVE EDUCATION MENTORED WORK EXPERIENCE (1). College is the time to develop the skills necessary for the transition between academics and career. Cooperative Education Mentored Work Experience is a graded field experience in which the student protegee will apply academic study in a "real world" career setting. **CROSSLISTED** as FOR 411. This course is repeatable for a maximum of 4 credits. **PREREQS:** Professional forestry students only.

FE 415. FOREST ROAD ENGINEERING (3). Location, surveying, design, cost estimation, and construction practices for forest roads. Lecture on principles, and laboratory field practice in locating, surveying, designing, and cost estimating. **PREREQS:** FE 310

FE 416. FOREST ROAD SYSTEM MANAGEMENT (4). Structural characteristics of bridges, load rating, structural design of culverts, aggregate testing and evaluation, environmental assessment of forest road systems, road maintenance cycles and management. **PREREQS:** ((ENGR 211 or ENGR 211H) and ENGR 213 and FE 316 and FE 415)

FE 422. FOREST GEOMATICS (4). Topics include digital techniques for geospatial database creation, computer programming techniques for database manipulation and analysis, and applications of geospatial data for natural resource measurement and analysis. Class meetings include lectures and applied spatial analysis laboratory assignments. A final term project must be designed, conducted, and presented. Lec/lab. **PREREQS:** (CE 202 or FE 357 or GEO 365 or (GEO 465 or GEO 565))

FE 430. WATERSHED PROCESSES (4). Effects of land use practices on the physical hydrology (interception, infiltration, evapotranspiration, subsurface flow and surface runoff, water yields, and peak flows) of forested watersheds. Surface erosion, mass soil movements, stream temperatures, nutrient levels and effects of management activities upon riparian systems; forest practice rules. Lec/lab. **PREREQS:** Junior standing.

FE 434. FOREST WATERSHED MANAGEMENT (4). Physical hydrology, erosion processes, streams, and riparian areas of forested ecosystems. The material can be widely applied, but is applicable primarily to the humid, temperate rainforests of the Pacific Northwest. **PREREQS:** (CH 121 or CH 201 or CH 231) and (SOIL 205 or CSS 305 or CSS 205) and (MTH 241 or MTH 251 or MTH 251H)

FE 435. FOREST WATERSHED MANAGEMENT IMPACTS (3). Impacts of forest disturbance, timber harvest, wildfire, insect outbreaks, and low frequency storms and floods on watershed hydrology and streams. **PREREQS:** FE 434 and / or equivalent

FE 440. FOREST OPERATIONS ANALYSIS (3). Identification and measurement of production components in harvesting systems. Methods analysis, productivity improvement and engineering economics. Report writing skills emphasized. Lec/lab. **PREREQS:** (FE 102 and (FE 370 or FE 371)) and basic statistics

FE 441. PRODUCTION PLANNING (3). Resource planning using critical path analysis, tactical approaches and regulations. Business planning including bidding, budgeting, scheduling, equipment replacement analysis, and fleet maintenance. **PREREQS:** FE 440 and senior standing

FE 447. TACTICAL AND OPERATIONAL PLANNING TECHNIQUES (3). Use of linear, mixed integer, heuristic methods, and simulation to solve forest operations management problems with emphasis on harvest scheduling, transportation planning, crew, and truck scheduling. Lec/lab. **PREREQS:** (FOR 330 and FE 371) and /or equivalent or instructor approval.

FE 448. ^FOREST OPERATIONS PLANNING AND SCHEDULING (3). Development of operational forest management plans. Evaluate logistical options. Develop budgets, crew, and contractors' schedules. Lec/rec. (Writing Intensive Course) **PREREQS:** (FE 449 and FOR 331)

FE 449. STRATEGIC AND TACTICAL PLANNING TECHNIQUES (3). Use of linear, mixed integer, heuristic methods, and simulations to solve complex forest management problems with emphasis on intertemporal multiple use scheduling, spatial analysis, and transportation planning. Lec/lab. **PREREQS:** FOR 330 and FOR 441 or equivalent or instructor approval

FE 450. ^FOREST OPERATIONS DESIGN I (3). Timber harvest planning. Establishing goals, data collection, identifying values and limitations, establishing plan expectations, identifying feasible harvesting systems and making assessments applying technical, economic, and social conditions. (Writing Intensive Course) **PREREQS:** (FE 434 and FE 470)

FE 451. ^FOREST OPERATIONS DESIGN II (3). Timber harvest planning. Evaluation of alternative harvest system choices, formulating and scheduling harvest units to meet goals and objectives, communicating and implementing harvest plans, monitoring plans and communicating long term results. (Writing Intensive Course) **PREREQS:** FE 450

FE 456. *INTERNATIONAL FORESTRY (3). An introduction to the biological, physical, and sociological factors that shape the world's forests and the activities used to manage those forests. What influence these factors have on forest policies, practices, and outcomes. **CROSSLISTED**

as FOR 456. (Bacc Core Course) **PREREQS:** Introductory course in biology.

FE 457. TECHNIQUES FOR FOREST RESOURCE ANALYSIS (4). Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple-use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Filed trips required. **CROSSLISTED** as FOR 457/FE 557. **PREREQS:** AREC 351 or FOR 330

FE 460. ^FOREST OPERATIONS REGULATIONS AND POLICY ISSUES (3). Reviews regulations and other policies that affect timber harvesting and other forest practices, particularly policies that address concerns of environment, safety, employment and transportation. Discusses how such rules and other policies evolve, including the role of public perceptions, forestry professionals and other key policy players. (Writing Intensive Course) **PREREQS:** Senior standing.

FE 470. LOGGING MECHANICS (4). Relationship of torque, power, and thrust to the operation of cable and ground-based harvesting systems. On-highway and off-highway heavy truck performance. **PREREQS:** (ENGR 211 or ENGR 211H) and ENGR 213 and FE 371)

FE 471. HARVESTING MANAGEMENT (3). Verification of harvesting assessment plans and operational planning/field layout. Practical logging skills related to harvest planning, operations monitoring, and designing worker training programs. Lec/lab. **PREREQS:** (FE 371 and FE 470)

FE 480. FOREST ENGINEERING PRACTICE AND PROFESSIONALISM (1). Personal and professional skills, attributes, and issues in forest engineering practice. Includes topics such as ethics, land stewardship, media relations and risk management. **PREREQS:** Senior standing.

FE 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 8 credits.

FE 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

FE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

FE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

FE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

FE 507. SEMINAR (1-16). Subject matter as required by graduate programs. This course is repeatable for a maximum of 16 credits.

FE 515. FOREST ROAD ENGINEERING (3). Location, surveying, design, cost estimation, and construction practices for forest roads. Lecture on principles, and laboratory field practice in locating, surveying, designing, and cost estimating. **PREREQS:** Basic surveying and permission of instructor.

FE 516. FOREST ROAD SYSTEM MANAGEMENT (4). Structural characteristics of bridges, load rating, structural design of culverts, aggregate testing and evaluation, environmental assessment of forest road systems, road maintenance cycles and management. **PREREQS:** FE 415 or FE 515

FE 522. FOREST GEOMATICS (4). Topics include digital techniques for geospatial database creation, computer programming techniques for database manipulation and analysis, and applications of geospatial data for natural resource measurement and analysis. Class meetings include lectures and applied spatial analysis laboratory assignments. A final term project must be designed, conducted, and presented. Lec/lab. **PREREQS:** CE 202 or FE 357 or GEO 365 or

(GEO 465 or GEO 565)

FE 530. WATERSHED PROCESSES (4). Effects of land use practices on the physical hydrology (interception, infiltration, evapotranspiration, subsurface flow and surface runoff, water yields, and peak flows) of forested watersheds. Surface erosion, mass soil movements, stream temperatures, nutrient levels and effects of management activities upon riparian systems; forest practice rules. Lec/lab. **PREREQS:** Junior standing.

FE 532. FOREST HYDROLOGY (4). Physical hydrology, erosion processes, and attributes of stream ecosystems for forested watersheds. Material can be widely applied, but is applicable primarily to the humid, temperate rainforests of the Pacific Northwest. Lec/rec. **PREREQS:** BEE 512 or equivalent Intro to Hydrology course.

FE 535. WATER QUALITY AND FOREST LAND USE (3). Influence of natural and land-use factors on water quality; monitoring strategies and analytical methods; municipal watershed management. **PREREQS:** FE 430 or FE 530

FE 536. WATERSHED IMPACTS OF FOREST DISTURBANCE (4). Impacts of forest disturbances that include timber harvest; wildfire; insect outbreaks; and large, low frequency storms and floods on the watershed hydrology, erosion processes, and stream ecosystems of forested watersheds. Lec/rec. **PREREQS:** FE 532

FE 537. HILLSLOPE AND WATERSHED HYDROLOGY (4). Advanced course on hillslope hydrology covering the physical, chemical and isotopic nature of runoff generation from the pore scale to the catchment scale.

FE 540. FOREST OPERATIONS ANALYSIS (3). Identification and measurement of production components in harvesting systems. Methods analysis, productivity improvement and engineering economics. Report writing skills emphasized. Lec/lab. **PREREQS:** FE 102 and (FE 370 or FE 371) and basic statistics.

FE 541. PRODUCTION PLANNING (3). Resource planning using critical path analysis, tactical approaches and regulations. Business planning including bidding, budgeting, scheduling, equipment replacement analysis, and fleet maintenance. **PREREQS:** (FE 440 or FE 540) and senior standing

FE 547. TACTICAL AND OPERATIONAL PLANNING TECHNIQUES (3). Use of linear, mixed integer, heuristic methods, and simulation to solve forest operations management problems with emphasis on harvest scheduling, transportation planning, crew, and truck scheduling. Lec/lab. **PREREQS:** FOR 330 and FE 371 or equivalent or instructor approval.

FE 549. STRATEGIC AND TACTICAL PLANNING TECHNIQUES (3). Use of linear, mixed integer, heuristic methods, and simulations to solve complex forest management problems with emphasis on intertemporal multiple use scheduling, spatial analysis, and transportation planning. Lec/lab. **PREREQS:** FOR 441 or equivalent or instructor approval. **COREQS:** FOR 330.

FE 550. FOREST OPERATIONS DESIGN I (3). Timber harvest planning. Establishing goals, data collection, identifying values and limitations, establishing plan expectations, identifying feasible harvesting systems and making assessments applying technical, economic, and social conditions. **PREREQS:** FE 434 and FE 470

FE 551. FOREST OPERATIONS DESIGN II (3). Timber harvest planning. Evaluation of alternative harvest system choices, formulating and scheduling harvest units to meet goals and objectives, communicating and implementing harvest plans, monitoring plans and communicating long term results. **PREREQS:** FE 450 or FE 550

FE 552. FOREST TRANSPORTATION SYSTEMS (4). Analysis of interactions between harvesting and road systems. Advanced topics in road and landing spacing, determination of road standards, analysis of logging road networks, transfer and sort yard facility location. Simultaneous resource scheduling and transportation planning. **PREREQS:** FE 102 and (FE 440 or FE 540)

FE 555. FOREST SUPPLY CHAIN MANAGEMENT (3). Develop and implement operational planning and logistics scheduling systems to manage a forestry supply chain for typical forest organizations in the Pacific Northwest. Once developed, these supply chain plans will be implemented using simulation software that will allow students to view the results of their forest operations plans. **PREREQS:** (CS 151 or FE 102) and FE 357 and FOR 457

FE 557. TECHNIQUES FOR FOREST RESOURCE ANALYSIS (4). Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple-use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. **CROSSLISTED** as FOR 457/FE 557. **PREREQS:** AREC 351 or FOR 330

FE 560. FOREST OPERATIONS REGULATIONS AND POLICY ISSUES (3). Reviews regulations and other policies that affect timber harvesting and other forest practices, particularly policies that address concerns of environment, safety, employment and transportation. Discusses how such rules and other policies evolve, including the role of public perceptions, forestry professionals and other key policy players. **PREREQS:** Senior standing.

FE 570. LOGGING MECHANICS (4). Relationship of torque, power, and thrust to the operation of cable and ground-based harvesting systems. On-highway and off-highway heavy truck performance. **PREREQS:** ENGR 211 and ENGR 213 and FE 371

FE 571. HARVESTING MANAGEMENT (3). Verification of harvesting assessment plans and operational planning/field layout. Practical logging skills related to harvest planning, operations monitoring, and designing worker training programs. **PREREQS:** FE 371 and FE 470

FE 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

FE 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

FE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

FE 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

FE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

FE 607. SEMINAR (1-16). Subject matter is required by graduate programs. This course is repeatable for a maximum of 16 credits.

FE 640. SPECIAL TOPICS IN FOREST ENGINEERING (1-3). Recent advances in logging engineering, forest engineering, and forest operations. Content will vary with instructor. May be retaken for credit. This course is repeatable for a maximum of 99 credits.

■ FORESTRY COURSES

FOR 111. INTRODUCTION TO FORESTRY (3). Forest resources in the world; forests and human well-being; where and how forests grow; environmental and human values; products, characteristics, and uses; basic elements of use, planning and management. Interpretation of forestry literature; professional origins in the U.S. Field trips required.

FOR 112. COMPUTING APPLICATIONS IN FORESTRY (3). An overview of computing applications used in all aspects of forestry work, but largely focused on development of intermediate and advanced spreadsheet skills using Microsoft Excel (e.g., complex formulas and functions, charting, and pivot tables). Additionally, the course rounds out essential skills in document formatting and presentation development.

FOR 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

FOR 220. AERIAL PHOTO INTERPRETATION AND FOREST MEASUREMENTS (4). An introduction to the field collection of forest measurements and the aerial photos used to assess the forest resource. The spatial relationship of field and photo-based data are emphasized and related to the building of a geographic information system. Successful completion of FOR 220 should help students compete for summer jobs requiring measurements skills. Lec/lab. **PREREQS:** ((MTH 105* or MTH 111* or MTH 112* or MTH 241* or MTH 245*) and FOR 111*)

FOR 307. JUNIOR SEMINAR (1). College is the time to develop the skills necessary for the transition between academics and career. In conjunction with the expertise already available on campus, this course will guide students through career planning, exploration, placement, and employer expectations. **CROSSLISTED** as FE 307.

FOR 312X. FORESTRY FIELD SCHOOL (2). A hands-on experience in the major aspects of forestry, including regeneration surveys, silviculture, cruising, recreation, forest disturbances, logging site and mill visits, east and west of the Cascades Range. **CROSSLISTED** as FE 312X. **PREREQS:** Admission into a professional school in the Forestry, Forest Engineering, or Forest Engineering/Civil Engineering program.

FOR 321. FOREST MENSURATION (5). Theory and practice of sampling and cruising techniques; stratified and nonstratified sampling systems with fixed plots, variable plots, and 3-P designs. **PREREQS:** (FOR 220 or (FE 308 and FE 309) and (MTH 241 or MTH 245 or MTH 251 or MTH 251H) and (ST 314 and FE 314) or (ST 351 or ST 351H) and ST 352)

FOR 322. FOREST MODELS (3). Introduction to static and dynamic forest models: defining what they are, how they might be used, and, in general terms, how they are developed. **PREREQS:** (FOR 321 and MTH 241 and (ST 351 or ST 351H) and ST 352)

FOR 330. FOREST CONSERVATION ECONOMICS (4). Basic arithmetic of interest and capital budgeting. Basic wood products markets. Forest resource markets and market failures. Nonmarket valuation and multiple-use forestry. Impacts of forest management and policy decisions on forest resource use. Lec/lab. **PREREQS:** ((AREC 250 or ECON 201 or ECON 201H) and (MTH 241 or MTH 245 or MTH 251 or MTH 251H))

FOR 331. FOREST RESOURCE ECONOMICS II (4). Forest products markets, appraisal, rotation, thinning, uneven-aged management and forest regulation. Economics of timber management and harvest scheduling. **PREREQS:** ((ECON 201* or ECON 201H*) and FOR 330* and MTH 241* and ST 352*) and/or instructor approval.

FOR 346. TOPICS IN WILDLAND FIRE (3). An interdisciplinary survey of concepts relating to fire science, ecology, management, and policy. Includes case studies of several representative ecosystems, ranging from west- and eastside forests of the Pacific Northwest to shrub steppe ecosystems of the Intermountain West and chaparral ecosystems of southern California. Distance and campus-based delivery using videos, website, and discussion. **CROSSLISTED** as FW 346, RNG 346. **PREREQS:** Course work in forest biology or ecology (e.g. FOR 240 or FOR

341) or equivalent.

FOR 390. FORESTRY FOR TEACHERS (3).

Cooperative learning and critical thinking skills used in discussions and labs to introduce forestry concepts to pre-teachers of K-12 students. Includes forest ecology, forest products, management practices, and conservation of forest resources. Field trips to Cascades and Coast Range required. Lec/lab.

FOR 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

FOR 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

FOR 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

FOR 403. THESIS (1-16). PREREQS: Departmental approval required.

FOR 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

FOR 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

FOR 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

FOR 408. WORKSHOP (1-3). This course is repeatable for a maximum of 16 credits.

FOR 410. INTERNSHIP (1-16). Full-time supervised professional experience emphasizing functional proficiency under joint sponsorship of university and agency personnel. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** FOR 251 and FOR 351 and FOR 356 and FOR 391 and FOR 407-Section 020 are recommended and may be taken concurrently. Departmental approval required.

FOR 411. COOPERATIVE EDUCATION MENTORED WORK EXPERIENCE (1). College is the time to develop the skills necessary for the transition between academics and career. Cooperative Education Mentored Work Experience is a graded field experience in which the student protegee will apply academic study in a "real world" career setting. **CROSSLISTED** as FE 411. This course is repeatable for a maximum of 4 credits. **PREREQS:** Professional forestry students only.

FOR 417X. ADVANCED FOREST SOILS (4). Synthesize current information on fundamental properties and processes of forest soils with emphasis on applications to silviculture, soil conservation, and sustainable management of forested ecosystems. **PREREQS:** SOIL 205 and ((CH 231 and CH 261) or CH 201) and (MTH 241 or MTH 251 or MTH 252) and /or instructor's permission.

FOR 421. SPATIAL ANALYSIS OF FORESTED LANDSCAPES (3). Geographic information systems (GIS), literature review, seminars, and project work involving forest resources, wildlife habitat, and landscape ecology using remotely sensed data, digital elevation models, and other spatial data. Lec/rec. Offered even years, during winter term. **PREREQS:** A GIS course (GEO 265 or FE 357 or GEO 465 or GEO 565) or the equivalent.

FOR 429. INTEGRATED PRESCRIPTIONS (3). Using an actual stand and real data, we will cultivate systematic approaches for: 1) characterizing site conditions and limiting factors; 2) harmonizing multiple management objectives; 3) modeling long-term responses to silvicultural manipulations; 4) assessing environmental impacts; 5) building public acceptance; and 6) communicating alternatives and rationales for decisions. This expanded course will allow a deeper project experience and more integration among the faculty in the co-requisite course, and providing the lab component of three other inter-

related forest management courses. **PREREQS:** (FOR 240 and FOR 321) and /or equivalents. **COREQS:** FOR 443

FOR 436. WILDLAND FIRE SCIENCE AND MANAGEMENT (4). Principles and applications of fire as a natural resource management tool; the role of fire in conservation management, restoration, and preservation of ecosystems. Covers basic techniques and current research used to describe fire behavior and spread, fuels and fuel manipulation, and fire effects on the biota. Focus will be on fire as a natural process in ecosystem dynamics. Lec/lab. **CROSSLISTED** as RNG 436/RNG 536.

FOR 441. SILVICULTURE PRINCIPLES (4). Nursery operation, vegetation management, herbivores, fire, seeding and planting techniques. Introduction to principles and techniques involving vegetation control, thinning, fertilizing, and harvesting. Environmental considerations related to forest stand treatments. Lec/lab. **PREREQS:** (FOR 240 and (FOR 141 or FOR 241))

FOR 442. SILVICULTURE REFORESTATION (4). Seed, seedlings, and cuttings. Nursery operation, planting techniques, seeding and vegetation management. Herbivores, uses of fire in reforestation. Field trips required. Lec/lab. **PREREQS:** ((CSS 205 or SOIL 205 or CSS 305) and (FOR 240 or BOT 331 or BOT 341))

FOR 443. SILVICULTURAL PRACTICES (5). Manipulation of immature and mature forest stands for various resource management objectives. Principles and techniques involving vegetation control, thinning, fertilizing, and harvesting. Environmental considerations related to stand treatments. Two-day field trips required. Lec/lab. **PREREQS:** (FOR 240 and FOR 321) and /or equivalents. **COREQS:** FOR 429

FOR 456. *INTERNATIONAL FORESTRY (3). An introduction to the biological, physical, and sociological factors that shape the world's forests and the activities used to manage those forests. What influence these factors have on forest policies, practices, and outcomes. **CROSSLISTED** as FE 456. (Bacc Core Course) **PREREQS:** Introductory course in biology.

FOR 457. TECHNIQUES FOR FOREST RESOURCE ANALYSIS (4). Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. **CROSSLISTED** as FE 457/FE 557. **PREREQS:** AREC 351 or FOR 330

FOR 459. FOREST RESOURCE PLANNING AND DECISION MAKING (4). Integration of biological, economic, and amenity characteristics of the forest system in resource management planning and decision making. Senior capstone class projects. Field trips required. Lec/lab. **PREREQS:** Senior standing or departmental approval required.

FOR 460. ^FOREST POLICY (4). Policy formulation and analysis for forest resources. Consideration of policy affecting land management approaches to planning, management, and social and economic development. Major forestry policy areas covered include outdoor recreation, range, timber, wilderness, and wildlife and fish. Lec/lab. (Writing Intensive Course) **PREREQS:** Senior standing.

FOR 462. NATURAL RESOURCE POLICY AND LAW (3). First of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on mechanisms governing resource allocation within the constraints of private property rights. Emphasis is placed on the federal Endangered Species Act and its relation

to water allocation and public trust doctrines. Students will also gain a broad understanding of regulatory «takings» law and the evolving dynamic of government-imposed constraints on private property rights in the context of natural resource and species protection.

FOR 499. SPECIAL TOPICS (1-16). Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section 8: Social aspects of natural resource management (3 credits) graded. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior or graduate standing.

FOR 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

FOR 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

FOR 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

FOR 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

FOR 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

FOR 508. WORKSHOP (1-3). This course is repeatable for a maximum of 16 credits.

FOR 510. INTERNSHIP (1-9). This course is repeatable for a maximum of 16 credits.

FOR 517X. ADVANCED FOREST SOILS (4). Synthesize current information on fundamental properties and processes of forest soils with emphasis on applications to silviculture, soil conservation, and sustainable management of forested ecosystems. **PREREQS:** SOIL 205 and ((CH 231 and CH 261) or CH 201) and (MTH 241 or MTH 251 or MTH 252) or instructor's permission.

FOR 521. SPATIAL ANALYSIS OF FORESTED LANDSCAPES (3). Geographic information systems (GIS), literature review, seminars, and project work involving forest resources, wildlife habitat, and landscape ecology using remotely sensed data, digital elevation models, and other spatial data. Lec/rec. Offered even years, during winter term. **PREREQS:** A GIS course (GEO 265 or FE 357 or GEO 465 or GEO 565) or the equivalent.

FOR 524. FOREST BIOMETRICS (3). Advanced topics in forest biometrics, including measurement of forest structure and dynamics, application of sampling theory and methods, and statistical techniques for interpreting forestry data. **PREREQS:** FOR 322 and ST 511

FOR 525. FOREST MODELING (3). Examination of regression techniques and assumptions used to develop static and dynamic equations of tree and stand attributes. **PREREQS:** ST 552 and /or instructor approval.

FOR 534. ECONOMICS OF THE FOREST RESOURCE (3). Economic aspects of forest production, regulation, and silvicultural applications. Microeconomic interactions of forest production and regulation and environmental constraints. Offered alternate years. **PREREQS:** FOR 330 and FOR 331 or equivalent

FOR 536. WILDLAND FIRE SCIENCE AND MANAGEMENT (4). Principles and applications of fire as a natural resource management tool; the role of fire in conservation management, restoration, and preservation of ecosystems. Covers basic techniques and current research used to describe fire behavior and spread, fuels and fuel manipulation, and fire effects on the biota. Focus will be on fire as a natural process in ecosystem dynamics. Lec/lab. **CROSSLISTED** as RNG 436/RNG 536.

FOR 537. VALUATION OF NON-MARKET RESOURCES (3). Focuses on the theory and methods for estimating the economic value of non-market resources (e.g. clean air and water, biodiversity, nature-based recreation, etc.). Blends the theory and econometrics of non-market valuation through hands-on applications of methods with real datasets. The valuation of non-market resources is a burgeoning field within applied economics and should continue to grow in both importance and applications. **PREREQS:** AREC 512 or ECON 512 or equivalent

FOR 543. SILVICULTURAL PRACTICES (5). Manipulation of immature and mature forest stands for various resource management objectives. Principles and techniques involving vegetation control, thinning, fertilizing, and harvesting. Environmental considerations related to stand treatments. Two-day field trips required. **PREREQS:** FOR 240 and FOR 321 or equivalents. **COREQS:** FOR 429.

FOR 546. WILDLAND FIRE ECOLOGY (3). Coverage of fire histories and ecology of major forest, rangeland and wetland ecosystems. Includes fire interactions with physical and biotic components of ecosystems, role of fire in ecological processes, and utilization in natural resource management. **CROSSLISTED** as FW 446/FW 546 and RNG 446/RNG 546. **PREREQS:** Course work in ecology and natural resource management.

FOR 547. TROPHIC CASCADES (2-3). Theory and empirical analysis of terrestrial carnivore effects on plants and ecosystems as mediated through herbivores. Emphasis on large carnivores, frequency/strength of trophic cascades, implications for ecosystem function, management, and restoration. Lectures, current literature, discussions, field exercise, term paper, and student presentations. Offered every odd year in spring. **CROSSLISTED** as FW 547. **PREREQS:** Graduate or post-bac standing and ecology course.

FOR 550. SUSTAINABLE FOREST MANAGEMENT (3). An overview of the role of forests in providing products and ecosystem services around the world and criteria and indicators of sustainable forest management, forest policy, and regulations. **PREREQS:** Graduate student standing or permission of instructor.

FOR 557. TECHNIQUES FOR FOREST RESOURCE ANALYSIS (4). Use of linear programming, nonlinear programming, dynamic programming, and simulation to solve complex forest management problems, with emphasis on intertemporal multiple use scheduling. Forestry transportation problems, multiple-use allocation, and investment analysis. Field trips required. **CROSSLISTED** as FE 457/FE 557. **PREREQS:** AREC 351 or FOR 330

FOR 561. FOREST POLICY ANALYSIS (3). Basic elements of forest policy problems, including resource allocation and efficiency, distribution, and interpersonal equity, taxation, regulation, and control, and planning and uncertainty. Emphasis on policy and analysis and its uses in policy decision.

FOR 562. NATURAL RESOURCE POLICY AND LAW (3). First of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on mechanisms governing resource allocation within the constraints of private property rights. Emphasis is placed on the federal Endangered Species Act and its relation to water allocation and public trust doctrines. Students will also gain a broad understanding of regulatory «takings» law and the evolving dynamic of government imposed constraints on private property rights in the context of natural resource and species protection.

FOR 563. ENVIRONMENTAL POLICY AND LAW INTERACTIONS (3). Second of two offerings designed to provide an introduction to current environmental and natural resource law issues and disputes for students who will have to meet, consult, and work with lawyers throughout their professional career. Focus is on the arena of regulatory environmental laws. Environmental torts, regulation of point and non-point source pollution under the federal Clean Water Act, wetlands protection, and laws governing agricultural and forest practices will be examined as examples of regulatory frameworks for achieving resource protection. Students will be exposed to the basic framework of federal laws regulating air and hazardous waste pollutants.

FOR 599. SPECIAL TOPICS (1-16). Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. Section 8: Social aspects of natural resource management (3 credits) graded. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior or graduate standing.

FOR 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

FOR 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

FOR 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

FOR 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

FOR 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

FOR 699. SPECIAL TOPICS (1-16). Topics of current importance in forest resources issues, education, policies, economics, management, business, social values, silviculture, and biometrics. Topics will change from term to term. May be repeated with different topics for credit. This course is repeatable for a maximum of 16 credits.

FOR 808. WORKSHOP (1-9). This course is repeatable for a maximum of 16 credits.

Wood Science

Use of renewable materials is increasing as the world becomes more concerned about climate change and population growth. Americans use thousands of different products from renewable wood each year—by weight more than we do of steel, cement and plastic combined. To meet the growing demand for renewable materials and to maximize the benefits of bio-energy and renewable products we must be smarter in how and where

we use them. New opportunities for the world through renewable materials is the core of wood science and engineering at OSU.

The department is a world leader in research, outreach and education related to renewable wood-based materials and products. It offers an undergraduate degree program that prepares students for diverse careers in the private sector that is a major component of the Pacific Northwest economy and around the world. Graduates are in high demand as climate change concerns and advanced technology accelerate the transformation to a globally competitive, green renewable materials-based industry.

The department also offers MS and PhD degrees in Wood Science. These graduate programs ensure a foundation in science that is supplemented with programs tailored to student interest. Many students pursue dual majors in science or engineering fields. Interested students should see the department Web page for more information or contact the department head.

RENEWABLE MATERIALS (BS, CRED, HBS)

The Bachelor of Science degree in Renewable Materials program is a multi-disciplinary professional program that prepares students to work with renewable, plant-based materials to solve challenging world problems. Renewable materials such as wood, bamboo, canes, and agricultural fibers are examined to understand their characteristics and how to make useful products. Students gain broad perspectives on current issues associated with the sustainable utilization of renewable materials, including global trade, business innovation, energy production, and environmental impacts.

The curriculum includes a lower-division core in science and math with a choice of upper-division option tracks in either marketing and management (M&M) or science and engineering (S&E). The M&M option is designed for students interested in business. Completion of the M&M option and meeting additional grade requirements of the College of Business will fulfill the requirements for a transcript-visible Business and Entrepreneurship minor. The S&E option is a flexible program that allows technically oriented students to design a personalized curriculum that opens doors to jobs that solve complex problems or to graduate school. Students select courses (often minors) that complement their interests.

In addition to the course work, all students must have six months of work experience in an area related to their major. This is usually accomplished by two summers of employment in business or industry, but it may include work during the academic year. The department has

an established network of connections to help place students in internships and summer employment.

Graduates with degrees in renewable materials are highly sought after to work in business, manufacturing operations, and technical support where they use their knowledge and expertise to help develop sustainable products, industrial systems, and economies.

Baccalaureate Core Requirements (30)

(Not satisfied by the Renewable Materials core or an option.)

Fitness: HHS 231. *Lifetime Fitness for Health (2)
and HHS 241–HHS 248. *Lifetime Fitness: (various activities) (1)
or any PAC course (1–2)
Writing I: WR 121. *English Composition (3)
Writing II: WR 214. *Writing in Business (3)
or WR 327. *Technical Writing (3)
Speech: COMM 111. *Public Speaking (3)
or COMM 114. *Argument and Critical Discourse (3)
Cultural Diversity elective (3)
Difference, Power, and Discrimination elective (3)
Literature and Arts elective (3)
Western Culture elective (3)
Science, Technology, and Society Synthesis elective (3)
Global Issues Synthesis elective (3)

Renewable Materials Core (63)

BI 101. *General Biology (4)
or BI 212. *Principles of Biology (4)
or FES 240. *Forest Biology (4)

MANAGEMENT AND MARKETING OPTION

This option provides students with the skills to manage organizations to be competitive in the global renewable materials marketplace or develop innovative and effective marketing programs for green products.

BA 211. Financial Accounting (4)
BA 213. Managerial Accounting (4)
BA 230. Business Law I (4)
BA 260. Introduction to Entrepreneurship (4)
BA 351. Managing Organizations (4)
BA 360. Introduction to Financial Management (4)
BA 390. Marketing (4)
CH 121. General Chemistry (5)
CH 122. *General Chemistry (5)
MTH 111. *College Algebra (4)
MTH 241. *Calculus for Management and Social Science (4)
ST 351, ST 352. Introduction to Statistical Methods (4,4)
Free Electives (11)

Restricted Electives (min. of 24)
Select a minimum of 12 credits from the following list, and develop an approved "Area of Concentration" as described below:

AREC 352. Environmental Economics and Policy (3)
BA 357. Operations Management (4)
BA/MGMT 364. Project Management (4)
BA/MRKT 396. Fundamentals of Marketing Research (4)
BA/MGMT 452. Leadership (4)
BA 458. Innovation and New Product Development (4)
BA 460. Venture Management (4)
BA/MRKT 497. Global Marketing (4)
ECON 340. International Economics (4)

Approved "Area of Concentration" (minimum of 12 approved credits including 8 upper-division credits) may be satisfied by completing a program of study approved by the department's lead advisor.

Total=89

Note: Completion of the M&M option and meeting additional grade requirements of the College of Business will fulfill the requirements for a transcript-visible Business and Entrepreneurship minor. Students who graduate and complete the minor may also apply to the College of Business to enroll in a 58-credit, four-term MBA degree program.

* Baccalaureate Core Course

RENEWABLE MATERIALS MINOR

The minor in Renewable Materials exposes students to the world of renewable materials science and technology and will enable students in other majors to gain a specialization that will make them more competitive for careers associated with green materials and allied industries.

Core Courses (16 credits)

CH 122. *General Chemistry (5)
 WSE 210. *Renewable Materials Technology and Utilization (4)
 WSE 321. Chemistry of Renewable Materials (3)
 WSE 322. Physical and Mechanical Properties of Renewable Materials (4)

Select from the following courses (minimum of 11 credits)

FOR 111. Introduction to Forestry (3)
 WSE 324. Renewable Materials Lab (3)
 WSE 415. Renewable Materials in the Modern Age (3)
 WSE 453. ^Global Trade in Renewable Materials (3)
 WSE 455. Marketing and Innovation in Renewable Materials (4)
 WSE 461. Manufacturing with Renewable Materials I (4)
 WSE 462. Manufacturing with Renewable Materials II (4)
 WSE 465. Renewable Materials Manufacturing Experience (2)
 WSE 471. Renewable Materials in Building Construction (3)
 WSE 473. Bioenergy and Environmental Impact (3)

Students must complete a minimum of 27 credits for the minor, at least 12 of which must be upper division.

WOOD SCIENCE (MS, PhD, MAIS)

Graduate Areas of Concentration

Biodeterioration and materials protection, chemistry and chemical processing, forest products business and marketing, physics and moisture relations, process modeling and analysis, renewable materials science and engineered composites, wood anatomy and quality, wood engineering and mechanics

The Department of Wood Science and Engineering offers graduate programs leading toward the Master of Science and Doctor of Philosophy degrees in Wood Science. Thesis research and academic programs can be developed in the many special disciplines represented by the faculty. Minors are most commonly selected from statistics, engineering, chemistry, botany, plant pathology, or business.

Many students pursue a dual major degree in wood science and a field of engineering or science. A wide variety of science, engineering and business opportunities are available.

Graduate students in wood science come from a wide range of undergraduate degree programs in science, engineering and business.

Excellent laboratories are available for teaching and research in Richardson Hall, Peavy Hall, and the Oak Creek Laboratory. Student research involves seeking solutions to current problems in renewable materials science, other sciences such as chemistry, physics and biology, engineering, business or related fields. Most graduate students are employed as part-time graduate research assistants.

Graduates with advanced degrees find employment in research and development, management or technical positions in the private sector, as university faculty or in technical public service positions.

WOOD SCIENCE GRADUATE MINOR

For more details, see the departmental advisor or major professor.

COURSES

WSE 111. RENEWABLE MATERIALS FOR A GREEN PLANET (2). Renewable materials are an integral part of modern lifestyles, and current societal trends point to increased use of renewable materials. This course provides an overview of renewable materials and their current applications in society. As an overview course, it covers a breadth of renewable material uses and exposes students to life-cycle thinking.

WSE 210. RENEWABLE MATERIALS TECHNOLOGY AND UTILIZATION (4). Characteristics and uses of renewable fiber products including wood, bamboo and grasses; manufacturing processes; effect of tree growth and harvesting on renewable products manufacturing and properties. Wood identification. Lec/lab.

WSE 266. *INDUSTRIAL HEMP (3). Introduction to the botany, biology and agronomy of the hemp plant, and the origins, historical contexts and implications of contemporary legal and social issues surrounding its use for food, fiber, and building products. Taught via Ecampus only. (Bacc Core Course)

WSE 321. CHEMISTRY OF RENEWABLE MATERIALS (3). Chemical structures and chemical properties of renewable plant-based materials will be taught at molecular levels. Chemical compositions of different renewable materials will be covered. Chemical and biochemical modifications and applications or renewable materials will be discussed in detail. Lec/lab. **PREREQS:** CH 122 or CH 202 or CH 232 or CH 232H and .

WSE 322. PHYSICAL AND MECHANICAL PROPERTIES OF RENEWABLE MATERIALS (4). Introduction to thermodynamics and mechanics of plant fibers, solid wood and bio-based composites: hygroscopicity; heat and mass transport; statics, elasticity and strength of materials; mechanical properties. **PREREQS:** WSE 321

WSE 324. RENEWABLE MATERIALS LABORATORY (3). Integrates the knowledge gained in the core science courses (WSE 321 and WSE 322) to help students obtain a deeper understanding of how chemistry, physics, and anatomy affect renewable material properties. The course uses renewable fiber materials such as hardwoods, softwoods, natural fibers, bamboo, composite wood products (e.g. OSB, plywood, MDF, etc.) and fiber-based products (e.g. wood-plastic composites, natural fiber composites, straw panels, paper, etc.) to examine the intricate relationships between fundamental properties and performance. Lec/lab. **PREREQS:** (WSE 321 and WSE 322)

WSE 373. WOOD MACHINING I (3). Familiarizes students with precision, accuracy standards and procedures necessary in the manufacture of value-added secondary wood products. Lab fee. Lec/lab.

WSE 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

WSE 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

WSE 403. THESIS (1-16). PREREQS: Departmental approval required.

WSE 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

WSE 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

WSE 415. RENEWABLE MATERIALS IN THE MODERN AGE (3). Micro-renewable materials anatomy course taught within an interdisciplinary, hands-on format. Suitable for all majors and backgrounds. Course covers the micro- and macro-anatomy of wood and other common renewable materials like bamboo and cellulose fibers. Utilizes studio-based learning. **CROSSLISTED AS DHE 415.**

WSE 453. ^GLOBAL TRADE IN RENEWABLE MATERIALS (3). Provides basic skills to operate in the global business environment. To include understanding the role of culture in international business, types of international business, policy considerations, ethics, trade barriers, exchange rates, shipping, global industry structure, and other current issues. Examines specific examples from renewable materials industries. (Writing Intensive Course) **PREREQS:** ECON 201 and ECON 202 or instructor consent.

WSE 455. MARKETING AND INNOVATION IN RENEWABLE MATERIALS (4). Marketing, innovation and their application in the renewable products industries.

WSE 458. WOOD DESIGN (4). Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glue laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab. CROSSLISTED as CE 484.
PREREQS: CE 383 or CE 484 and with minimum grade of C, senior standing or graduate

WSE 461. MANUFACTURING WITH RENEWABLE MATERIALS I (4). Manufacturing renewable materials such as wood, bamboo, hemp, and cereal straws into products requires size reduction and separation of components. The components are then further processed, in many cases by joining with glue or fasteners, to create a usable product. The major processing steps for the conversion of raw materials into products will be discussed. **PREREQS:** WSE 210 and WSE 321 and WSE 324

WSE 462. MANUFACTURING WITH RENEWABLE MATERIALS II (4). The second of a two-term series exploring technologies and management practices associated with manufacturing products from renewable materials. Subjects covered include process automation, quality control, safety, and preventive maintenance programs. **PREREQS:** WSE 461 or WSE 561; may be waived with instructor approval.

WSE 465. RENEWABLE MATERIALS MANUFACTURING EXPERIENCE (2). Learning about and visiting a number of renewable materials industrial and commercial operations representing all parts of the renewable materials value chain. The class will meet daily for one 5-day week immediately prior to the start of fall term. During the week, the students and at least one instructor will meet daily. Lectures will precede visits to industrial plants, mills and sites. At the end of the day, an instructor will participate in a debriefing session, reiterating what was learned during the day. Students will then submit a report on the day's activities. The class includes daily travel and overnight stays. This course is repeatable for a maximum of 4 credits.

WSE 470. *FORESTS, WOOD, AND CIVILIZATION (3). Multidisciplinary examination of issues related to the roles of forests, trees, and wood in civilization, as providers of commodities, ecosystem services, and spiritual and artistic inspiration. Issues include global supply and demand, wood ownership and political power, and perceptions and uses of forest resources in different societies. (Bacc Core Course)

WSE 470H. *FORESTS, WOOD, AND CIVILIZATION (3). Multidisciplinary examination of issues related to the roles of forests, trees, and wood in civilization, as providers of commodities, ecosystem services, and spiritual and artistic inspiration. Issues include global supply and demand, wood ownership and political power, and perceptions and uses of forest resources in different societies. (Bacc Core Course)
PREREQS: Honors College approval required.

WSE 471. RENEWABLE MATERIALS IN BUILDING CONSTRUCTION (3). Building construction is a major application of renewable materials, primarily wood. This course explores material selection options, applications, and performance characteristics. Residential construction is emphasized, but non-residential construction applications will also be discussed. Concepts and interpretation of life cycle assessment are introduced. **PREREQS:** Junior standing.

WSE 473. BIOENERGY AND ENVIRONMENTAL IMPACT (3). Explores world's use of woody biomass fuels, their potential to contribute to our region's energy supply, and conversion technologies such as direct combustion, pyrolysis, and thermochemical modification. Also examines emissions and other environmental impacts of utilizing renewable materials to generate energy and manufacture products. **PREREQS:** ((MTH 111

or MTH 112 or MTH 231 or MTH 241 or MTH 255 or MTH 251 or MTH 251H) and (CH 122 or CH 222)) and/or graduate standing.

WSE 475. ENVIRONMENTAL ASSESSMENT OF BUILDING MATERIALS (4). Study of sustainability in the built environment from a building material perspective. Understanding the ecology of building materials and assessing their environmental sustainability performance using life cycle analysis. Critical discussion of case studies and future of LCA in the built environment. **PREREQS:** Junior in good academic standing.

WSE 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.

WSE 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

WSE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

WSE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

WSE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

WSE 507. SEMINAR (1). Section 1: Beginning Seminar. Section 2: Seminar. Graded P/N. This course is repeatable for a maximum of 99 credits.

WSE 515. RENEWABLE MATERIALS IN THE MODERN AGE (3). Micro-renewable materials anatomy course taught within an interdisciplinary, hands-on format. Suitable for all majors and backgrounds. Course covers the micro- and macro-anatomy of wood and other common renewable materials like bamboo and cellulose fibers. Utilizes studio-based learning. CROSSLISTED as DHE 515.

WSE 520. THE GLOBAL CONTEXT OF THE FOREST SECTOR (3). Provides a broad knowledge base of business and marketing practices in the global forest industry. Includes a module on research ethics that fulfills OSU Graduate School requirements.

WSE 521. WOOD SCIENCE I (4). A comprehensive overview and integration of wood anatomy, wood physics, wood chemistry and wood mechanics; global contemporary issues impacting the wood and fiber sector; integration of basic wood sciences to understand the complex relationships between environment and wood material properties, and the influence of both on the use of wood-based materials.

WSE 522. WOOD SCIENCE II (4). Continuation of the comprehensive overview and integration of wood and fiber anatomy, physics, chemistry, and mechanics; integration of basic wood science to understand relationships with wood and fiber properties and their impact on final use. Focus on biological, chemical and physical degradation of wood; adhesion; and physical and engineering properties of wood. Lec/lab.

WSE 530. POLYMER COMPOSITES (3). A comprehensive survey of the material and mechanical properties of polymer-based composite materials including failure mechanisms, interfacial and nanoscale effects, and transport and thermal properties. **PREREQS:** CHE 545. Recommended: multivariable calculus.

WSE 535. POLYMER SYNTHESIS AND STRUCTURE (3). A comprehensive overview of various synthetic methods for various synthetic polymers; structures of various synthetic and natural polymers. **PREREQS:** 3 credits of undergraduate organic chemistry or CH 331 or CH 334 are recommended.

WSE 553. GLOBAL TRADE IN RENEWABLE MATERIALS (3). Provides basic skills to operate in the global business environment. To include understanding the role of culture in international business, types of international business, policy considerations, ethics, trade barriers, exchange rates, shipping, global industry structure, and

other current issues. Examines specific examples from renewable materials industries. **PREREQS:** ECON 201 and ECON 202 or instructor consent.

WSE 555. MARKETING AND INNOVATION IN RENEWABLE MATERIALS (4). Marketing, innovation and their application in the renewable products industries.

WSE 558. WOOD DESIGN (4). Study of basic wood properties and design considerations. Design and behavior of wood connectors, beams, columns and beam columns. Introduction to plywood and glue laminated members. Analysis and design of structural diaphragms and shear walls. Lec/lab. CROSSLISTED as CE 584.
PREREQS: CE 383 or CE 481 with minimum grade of C, senior standing or graduate

WSE 561. MANUFACTURING WITH RENEWABLE MATERIALS I (4). Manufacturing renewable materials such as wood, bamboo, hemp, and cereal straws into products requires size reduction and separation of components. The components are then further processed, in many cases by joining with glue or fasteners, to create a usable product. The major processing steps for the conversion of raw materials into products will be discussed. **PREREQS:** WSE 210 and WSE 321 and WSE 324

WSE 562. MANUFACTURING WITH RENEWABLE MATERIALS II (4). The second of a two-term series exploring technologies and management practices associated with manufacturing products from renewable materials. Subjects covered include process automation, quality control, safety, and preventive maintenance programs. Graduate students are responsible for preparing case studies to demonstrate how manufacturing management programs are integrated into operations. **PREREQS:** WSE 461 or WSE 561; may be waived with instructor approval.

WSE 571. RENEWABLE MATERIALS IN BUILDING CONSTRUCTION (3). Building construction is a major application of renewable materials, primarily wood. This course explores material selection options, applications, and performance characteristics. Residential construction is emphasized, but non-residential construction applications will also be discussed. Concepts and interpretation of life cycle assessment are introduced. **PREREQS:** Junior standing.

WSE 573. BIOENERGY AND ENVIRONMENTAL IMPACT (3). Explores world's use of woody biomass fuels, their potential to contribute to our region's energy supply, and conversion technologies such as direct combustion, pyrolysis, and thermochemical modification. Also examines emissions and other environmental impacts of utilizing renewable materials to generate energy and manufacture products. **PREREQS:** (MTH 111 or MTH 112 or MTH 231 or MTH 241 or MTH 245 or MTH 251 or MTH 251H) and (CH 122 or CH 222) or graduate standing.

WSE 575. ENVIRONMENTAL ASSESSMENT OF BUILDING MATERIALS (4). Study of sustainability in the built environment from a building material perspective. Understanding the ecology of building materials and assessing their environmental sustainability performance using life cycle analysis. Critical discussion of case studies and future of LCA in the built environment. **PREREQS:** Junior in good academic standing.

WSE 592. ADVANCED WOOD DESIGN (4). Study of advanced concepts in wood properties and design. Design and analysis of specialty wood connectors. Design of wood members for adverse conditions including fire design. Common failure mechanisms and forensic engineering concepts. Design for durability. Lec/lab. **PREREQS:** Graduate only. Undergraduates can take it for graduate credits. Understanding of basic concepts in mechanics and timber design is preferred.

WSE 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.

WSE 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

WSE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

WSE 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

WSE 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

WSE 607. SEMINAR (1). Section 1: Beginning Seminar. Section 2: Graduate Seminar. This course is repeatable for a maximum of 99 credits.

WSE 611. SELECTED TOPICS IN WOOD AND FIBER SCIENCE (1-3). May be taken more than once. This course is repeatable for a maximum of 6 credits.

WSE 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

Exciting and diverse educational opportunities are offered through the graduate programs of Oregon State University's 11 colleges which encompass 80 major disciplines. A land, sea, space, and sun grant university, OSU enrolls more than 4,000 graduate students, representing more than 90 countries and every state in the nation.

At OSU, maximum opportunity is provided for the integration of graduate instruction and research. The graduate faculty (1,800 members) is selected on the basis of training, experience, research, and evidence of the ability to successfully direct and supervise graduate students.

All study beyond the bachelor's degree at Oregon State University is conducted through the Graduate School. The establishment of departmental graduate programs and the formulation and direction of individual student programs are responsibilities of the departments, under the general rules and requirements of the Graduate School.

See the **Graduate Student Information section** of this catalog for complete details regarding graduate education and the policies governing graduate study.

INTRODUCTION TO GRADUATE STUDY AT OREGON STATE UNIVERSITY

Oregon State University has a global reputation for excellence in teaching, research, and engagement.

OSU is one of only two American universities to hold the land, sea, sun and space grant designations (Cornell University in Ithaca, NY, is the other) and is the only Oregon institution recognized for its "very high research activity" (RU/VH) by the Carnegie Foundation for the Advancement of Teaching. In 2012, OSU was also awarded the Community Engagement classification, again by the Carnegie Foundation. OSU is comprised of 11 academic colleges with strengths in natural resources, earth dynamics and sustainability, life sciences, innovation and entrepreneurship, and the arts and sciences. OSU has facilities and/or programs in every county in the state, including 11 regional experiment stations, 35 county extension offices, a branch campus in Bend, a major marine science center in Newport, and a range of programs and facilities in Portland. OSU is Oregon's largest public research university, conducting more than 60 percent of the research funded throughout the state's university system.

A dedicated and highly regarded graduate faculty, a well-equipped library, comprehensive special collections, and exceptional research facilities keep Oregon State at the leading edge of graduate education. Linus Pauling, an Oregon State alumnus and the only person to win individual Nobel prizes in two different categories, selected OSU as the repository for his papers.

Research and teaching assistantships are available to allow you the opportunity to work with people who are leaders in their fields while furthering your

education. In addition to being outstanding teachers, many OSU faculty members are internationally renowned for their research. In fiscal year 2012, Oregon State University received more than \$81 million in external support for research and scholarship.

With these strengths in research and teaching, Oregon State produces degree holders who can compete successfully with the best in their fields.

But life isn't all study and research, and when you're ready to take a break, you'll find that Oregon State is the ideal location for that as well. Whether you want to be active or relax, attend a sports event or a lecture, go to a concert or a play, or do just about anything else, you're likely to find what you want at Oregon State or just a short distance away.

OSU is located in Corvallis, a community of 54,670 people situated in the Willamette Valley between Portland and Eugene. Ocean beaches, lakes, rivers, forests, high desert, the rugged Cascade and Coast Ranges, and the urban amenities of the Portland metropolitan area are all within a 100 mile drive of Corvallis. Nearly 22,000 undergraduate, 590 first professional, and 4,000 graduate students are enrolled at OSU, including over 5,200 students of color and 2,360 international students.

The stunning, park-like setting of the OSU campus is comprised of 400 acres of stately buildings, seasonal landscaping and green, open spaces. Housing for many OSU undergraduate and graduate students is provided by residence halls on campus, and cooperatives, sororities, fraternities, and family student housing just off the central campus.

In addition to the main campus, the state owns and leases many acres of forest and farmland that are used by the university for instruction and research. OSU's Hatfield Marine Science Center at Newport serves as the main coastal facility for Sea Grant, oceanography, and fisheries programs. For many graduate students, study and research through these off-campus facilities means a direct look at the natural resources and characteristics of the Pacific Northwest.

The institution that is now OSU opened in 1858 as Corvallis College, a small academy. College-level study began about 1865, and the first three baccalaureate degrees were awarded in 1870. Graduate programs began a short time later. In 1868, Corvallis College was designated by the Oregon Legislature as the "agricultural college of the state of Oregon." From 1868 until 1885, the college continued under the direction of the Methodist Episcopal Church but was partly state supported. In 1885, the state of Oregon assumed full control of the institution.

ADMINISTRATION

Brenda McComb,
Dean,
541-737-4881

Anita Azarenko,
Associate Dean,
541-737-4881

Rosemary Garagnani,
Assistant Dean,
541-737-1465

Kimberly Johnson,
Director of International Relations and Student Affairs,
541-737-4652

Fran Saveriano,
Director of Graduate Student Financial Support and Recruitment,
541-737-1459

Barbara Bond,
Director of Post-doctoral Programs,
541-737-2681

Viki Meink,
Executive Assistant to the Dean,
541-737-1456

Oregon State granted its first advanced degree (A.M.) in 1876. Residence requirements for the master's degree were announced in 1897.

Responsibility for graduate study at OSU has changed a number of times over the years. In 1910 it was placed under a standing committee of the faculty. In 1933 all graduate work in the State System of Higher Education was placed in an interinstitutional graduate division. At Oregon State, an associate dean and an institutional graduate council were put in immediate charge of graduate study. The first doctor of philosophy degrees were conferred by Oregon State in 1935. In October 1946, the State Board of Higher Education again gave the institutions direct responsibility for their graduate programs and assigned graduate work at Oregon State to the Graduate School.

The primary aims of the Oregon State University Graduate School are to prepare students to use the disciplinary techniques necessary for the creation of new knowledge and to assist students in acquiring specialized knowledge in one or more fields. At the same time, graduate programs may provide the student with the opportunity to acquire an educational background broader than his or her specialty.

The graduate educational process is designed to help the student attain a high level of scholarship. The student is assisted in developing the skills of assimilation, interpretation, organization, evaluation, and application of knowledge. Such scholarship increases the student's breadth of learning and prepares him or her for roles of leadership and participation in the broader areas of culture and society. The ideal graduate program permits the student to specialize, but at the same time develop a broad educational base.

The communication of new knowledge is an important part of the educational process. Creating, interpreting, and communicating knowledge are related processes at OSU. The Graduate School provides opportunities for students to develop skills to carry out these processes.

GRADUATE DEGREES AND CERTIFICATES BY COLLEGE OR SCHOOL

COLLEGE OF AGRICULTURAL SCIENCES

Agricultural Education, MAG, MS
Agriculture, MAG
Animal Science, MAG, MS, PhD
Applied Economics, MA, MS, PhD
Applied Systematics in Botany, PSM
Botany and Plant Pathology, MA, MAG, MS, PhD
Crop Science, MAG, MS, PhD
Entomology, MA, MAG, MS, PhD
Fisheries Management, Graduate Certificate
Fisheries Science, MAG, MS, PhD
Fisheries and Wildlife Administration, PSM
Food Science and Technology, MAG, MS, PhD
Horticulture, MAG, MS, PhD
Rangeland Ecology and Management, MAG, MS, PhD
Soil Science, MAG, MS, PhD
Toxicology, MAG, MS, PhD
Wildlife Science, MAG, MS, PhD

COLLEGE OF BUSINESS

Business Administration, MBA, PhD
(administered by the College of Business)
Business Administration and Accountancy
(MBAA) (administered by the College of
Business)
Design and Human Environment, MA, MS,
PhD

COLLEGE OF EDUCATION

Adult Education, EdM
College Student Services Administration,
EdM, MS
Counseling, MS, PhD
Education, EdM, MS, EdD, PhD
Mathematics Education, MA, MS, PhD
Science Education, MA, MS, PhD
Teaching, MAT

COLLEGE OF EARTH, OCEAN, AND ATMOSPHERIC SCIENCES

Geographic Information Science, Graduate
Certificate
Geography, MA, MS, PhD
Geology, MA, MS, PhD
Marine Resource Management, MA, MS,
Graduate Certificate
Ocean, Earth and Atmospheric Sciences,
MA, MS, PhD
Water Conflict Management and
Transformation, Graduate Certificate

COLLEGE OF ENGINEERING

Biological and Ecological Engineering,
MEng, MS, PhD
Chemical Engineering, MEng, MS, PhD
Civil Engineering, MEng, MS, PhD
Computer Science, MA, MEng, MS, PhD
Electrical and Computer Engineering,
MEng, MS, PhD

Environmental Engineering, MEng, MS, PhD
Industrial Engineering, MEng, MS, PhD
Materials Science, MS, PhD
Mechanical Engineering, MEng, MS, PhD
Medical Physics, MMP, MS, PhD
Nuclear Engineering, MEng, MS, PhD
Radiation Health Physics, MA, MHP, MS, PhD

COLLEGE OF FORESTRY

Forest Ecosystems and Society, MF, MS, PhD
Natural Resources, MNR
Sustainable Forest Management, MF, MS, PhD
Sustainable Natural Resources, Graduate
Certificate
Wood Science, MS, PhD

COLLEGE OF LIBERAL ARTS

Applied Anthropology, MA, PhD
Applied Ethics, MA
Contemporary Hispanic Studies, MA
Creative Writing, MFA
English, MA
History of Science, MA, MS, PhD
Public Policy, MPP, PhD
Women, Gender, and Sexuality Studies, MA

COLLEGE OF PHARMACY

Pharmaceutical Sciences, MS, PhD

COLLEGE OF PUBLIC HEALTH AND HUMAN SCIENCES

Exercise and Sport Science, MS, PhD
Health Management and Policy, Graduate
Certificate
Human Development and Family Studies,
MS, PhD
Nutrition, MS, PhD
Public Health, Graduate Certificate
Public Health, MPH, PhD

COLLEGE OF SCIENCE

Applied Physics, PSM
Biochemistry and Biophysics, MA, MS, PhD
Chemistry, MA, MS, PhD
Management for Science Professionals,
Graduate Certificate
Mathematics, MA, MS, PhD
Microbiology, MA, MS, PhD
Physics, MA, MS, PhD
Statistics, MA, MS, PhD
Zoology, MA, MS, PhD

INTERDISCIPLINARY/ INSTITUTIONAL PROGRAMS

Applied Biotechnology, PSM
College and University Teaching, Graduate
Certificate
Comparative Health Sciences, MS, PhD
Environmental Sciences, MA, MS, PhD, PSM
Interdisciplinary Studies, MAIS
Molecular and Cellular Biology, MS, PhD
Water Resources Engineering, MS, PhD
Water Resources Policy and Management, MS
Water Resources Science, MS, PhD

GRADUATE MAJORS, MINORS, AND ACADEMIC UNITS

Graduate Major Note: Most graduate majors may be used as a graduate minor. Also see Graduate Minor chart for additional fields approved as graduate minors only.	Graduate Degrees	Academic Unit Note: The academic unit is responsible for directing and managing the majors and minors.	Graduate Areas of Concentration Note: Areas of concentration are for reference only. They do not appear on transcripts or diplomas.
Adult Education	EdM	College of Education	Organization development and training, work force development, workplace and adult skills development
Agricultural Education	MAG, MS	Dept. of Agricultural Education and General Agriculture	Teacher preparation, leadership and communication in agriculture
Agriculture	MAG	College of Agricultural Sciences	Three agriculturally related areas are required. Areas may be applied economics, agricultural education, animal science, botany and plant pathology, crop science, entomology, fisheries science, food science and technology, horticulture, rangeland ecology and management, soil science, toxicology, wildlife science, or other areas approved by the College of Agricultural Sciences
Animal Science	MAG, MS, PhD	Dept. of Animal and Rangeland Sciences	Animal nutrition, dairy production (MS only), embryo physiology, endocrinology, growth and development, livestock management (MS only), nutritional biochemistry, reproductive physiology
Applied Anthropology	MA, PhD	School of Language, Culture, and Society	Native Americans—past and present, biocultural medical anthropology, cultural resource management, globalization/localization, historic archaeology, language and cross-cultural communications, and natural resources and communities (MA only). Archaeology; business organization and work; ethnicity, culture and health; local values, indigenous knowledge, and environment (PhD only)
Applied Biotechnology	PSM	Graduate School	
Applied Economics	MA, MS, PhD	College of Agricultural Sciences	Resource and environmental economics, trade and development, public health economics, transportation economics (MA, MS only)
Applied Ethics	MA	School of History, Philosophy and Religion	Bioethics, environmental ethics, and art and morality
Applied Systematics in Botany	PSM	Dept. of Botany and Plant Pathology	
Applied Physics	PSM	Dept. of Physics	
Biochemistry and Biophysics	MA, MS, PhD	Dept. of Biochemistry and Biophysics	Biochemistry, biophysics
Biological and Ecological Engineering	MEng, MS, PhD	Dept. of Biological and Ecological Engineering	Bio-based products and fuels, bioprocessing, biological systems analysis, ecosystems analysis and modeling, water quality, water resources
Botany and Plant Pathology	MA, MAG, MS, PhD	Dept. of Botany and Plant Pathology	Applied systematics, ecology, genetics, genomics and computational biology, molecular and cellular biology, mycology, plant pathology, plant physiology, systemics
Business Administration	MBA, PhD	College of Business	Clean technology, commercialization, executive leadership, global operations, marketing, research thesis, wealth management
Business Administration and Accountancy	MBAA	College of Business	
Chemical Engineering	MEng, MS, PhD	School of Chemical, Biological, and Environmental Engineering	Chemical engineering
Chemistry	MA, MS, PhD	Dept. of Chemistry	Analytical chemistry, inorganic chemistry, materials chemistry, nuclear chemistry, organic chemistry, physical chemistry
Civil Engineering	MEng, MS, PhD	School of Civil and Construction Engineering	Civil engineering, coastal and ocean engineering, construction engineering management, geomatics, geotechnical engineering, infrastructure materials, structural engineering, transportation engineering, water resources engineering
College Student Services Administration	EdM, MS	College of Education	College and university characteristics and environments; history, development, and current issues in higher education; leadership and management of administrative departments; program oversight in specialized administrative areas such as financial aid, student activities, career services, multicultural affairs, recreational sports, and student housing; student development theory and application
Comparative Health Sciences	MS, PhD	Graduate School	
Computer Science	MA, MEng, MS, PhD	School of Electrical Engineering and Computer Science	Algorithms and cryptography, artificial intelligence and machine learning; computer systems and networking; human-computer interaction; programming languages; software engineering
Contemporary Hispanic Studies	MA	School of Language, Culture, and Society	Contemporary Hispanic studies
Counseling	MS, PhD	College of Education	Clinical mental health counseling (MS only), counseling (PhD only), school counseling (MS only)
Creative Writing	MFA	School of Writing, Literature, and Film	Fiction, poetry, and nonfiction writing
Crop Science	MAG, MS, PhD	Dept. of Crop and Soil Science	Crop breeding, genetics and cytogenetics (cereals, oilseeds, potatoes), forage and pasture management, grain crop production, post-harvest seed technology, seed biology, seed crop physiology, seed production, weed biology, weed management

Graduate Major <i>Note:</i> Most graduate majors may be used as a graduate minor. Also see Graduate Minor chart for additional fields approved as graduate minors only.	Graduate Degrees	Academic Unit <i>Note:</i> The academic unit is responsible for directing and managing the majors and minors.	Graduate Areas of Concentration <i>Note:</i> Areas of concentration are for reference only. They do not appear on transcripts or diplomas.
Design and Human Environment	MA, MS, PhD	School of Design and Human Environment, College of Business	Cultural/historic aspects of the near environment, design in the near environment, human behavior in the near environment, merchandising management, and textiles
Education	EdM, MS, EdD, PhD	College of Education	Community college leadership (EdD, PhD); Elementary, middle, and secondary education (EdM)
Electrical and Computer Engineering	MEng, MS, PhD	School of Electrical Engineering and Computer Science	Analog and mixed signal; artificial intelligence and machine learning; communications and signal processing; computer systems; energy systems; materials and devices; RF/microwaves
English	MA	School of Writing, Literature, and Film	Literature and culture; or rhetoric, writing, and culture
Entomology	MA, MAg, MS, PhD	Entomology Program (College of Agricultural Sciences)	Entomology
Environmental Engineering	MEng, MS, PhD	School of Chemical, Biological, and Environmental Engineering	Bioremediation, environmental fluid mechanics, environmental microbiology, environmental modeling, multiphase phenomena, subsurface flow and transport, water and wastewater treatment
Environmental Sciences	MA, MS, PhD, PSM	Graduate School	Biogeochemistry, ecology, environmental education, natural resources, quantitative analysis, social science, water resources
Exercise and Sport Science	MS, PhD	School of Biological and Population Health Sciences	Exercise physiology, movement studies in disability, neuromechanics, physical activity and public health, sport and exercise psychology, sport pedagogy
Fisheries and Wildlife Administration	PSM	Dept. of Fisheries and Wildlife	
Fisheries Science	MAg, MS, PhD	Dept. of Fisheries and Wildlife	Aquaculture, conservation biology, fish genetics, ichthyology, limnology, parasites and diseases, physiology and ecology of marine and freshwater fishes, stream ecology, toxicology, water pollution biology
Food Science and Technology	MAg, MS, PhD	Dept. of Food Science and Technology	Brewing, enology, flavor chemistry, food chemistry/biochemistry, food engineering, food microbiology/biotechnology, food and seafood processing, sensory evaluation
Forest Ecosystems and Society	MF, MS, PhD	Dept. of Forest Ecosystems and Society	Forest biology (MF only); forest, wildlife and landscape ecology; genetics and physiology; integrated social and ecological systems; silviculture (MF only); science of conservation, restoration and sustainable management; social science, policy, and natural resources; soil-plant-atmosphere continuum; sustainable recreation and tourism
Geography	MA, MS, PhD	College of Earth, Ocean, and Atmospheric Sciences	Geographic information science, physical geography, resource geography
Geology	MA, MS, PhD	College of Earth, Ocean, and Atmospheric Sciences	Solid Earth processes and history: Volcanology, igneous petrology and economic geology Active tectonics and earthquake geology Surface Earth processes and history: Earth system history Hydrogeology and hydrology Geomorphology and surface processes Climate and biogeochemical cycles
History of Science	MA, MS, PhD	School of History, Philosophy, and Religion	Development of the physical, biological, and environmental sciences; history of science and medicine; intellectual and social history of science in Europe and the U.S.
Horticulture	MAg, MS, PhD	Dept. of Horticulture	Breeding, genetics and biotechnology; community and landscape horticultural systems; sustainable crop production
Human Development and Family Studies	MS, PhD	School of Social and Behavioral Health Sciences	Human development and family studies
Industrial Engineering	MEng, MS, PhD	School of Mechanical, Industrial and Manufacturing Engineering	Human systems engineering, information systems engineering, manufacturing systems engineering, nano/micro fabrication
Interdisciplinary Studies	MAIS	Graduate School	Selected from three fields offering graduate majors or minors
Marine Resource Management	MA, MS	College of Earth, Ocean, and Atmospheric Sciences	Marine resource management
Materials Science	MS, PhD	Material Science Program (School of Mechanical, Industrial and Manufacturing Engineering-Coord Unit)	Materials science-chemistry, chemical engineering, civil engineering, electrical and computer engineering, forest products, mathematics, mechanical engineering, nuclear engineering, physics
Mathematics	MA, MS, PhD	Dept. of Mathematics	Actuarial science, algebra, analysis, applied mathematics, computational mathematics, differential equations, financial mathematics, geometry, mathematics education, number theory, numerical analysis, probability, topology
Mathematics Education	MA, MS, PhD	College of Education	Elementary school mathematics, free-choice learning, mathematics education, middle school mathematics, secondary mathematics
Mechanical Engineering	MEng, MS, PhD	School of Mechanical, Industrial and Manufacturing Engineering	Applied mechanics, applied thermodynamics, biomechanics, combustion, design, design and analysis of mechanical and thermal fluid systems, dynamics, energy, fluid mechanics, heat transfer, materials science, mechanical engineering, physical and mechanical metallurgy, solid mechanics, stress analysis, systems and control

Graduate Major <i>Note:</i> Most graduate majors may be used as a graduate minor. Also see Graduate Minor chart for additional fields approved as graduate minors only.	Graduate Degrees	Academic Unit <i>Note:</i> The academic unit is responsible for directing and managing the majors and minors.	Graduate Areas of Concentration <i>Note:</i> Areas of concentration are for reference only. They do not appear on transcripts or diplomas.
Medical Physics	MMP, MS, PhD	Dept. of Nuclear Engineering and Radiation Health Physics	Medical health physics, therapeutic radiologic physics
Microbiology	MA, MS, PhD	Dept. of Microbiology	Environmental microbiology, food microbiology, genomics, immunology, microbial ecology, microbial evolution, parasitology, pathogenic microbiology, virology
Molecular and Cellular Biology	MS, PhD	Graduate School	Bioinformatics, biotechnology, cell biology, developmental biology, genome biology, molecular biology, molecular pathogenesis, molecular virology, plant molecular biology, structural biology
Natural Resources	MNR	College of Forestry	Fisheries Management, Geographic Information Science (GIScience), Marine Resources Management, Sustainable Natural Resources, Water Conflict Management and Transformation
Nuclear Engineering	MEng, MS, PhD	Dept. of Nuclear Engineering and Radiation Health Physics	Application of nuclear techniques, arms control technology, nuclear instrumentation and applications, nuclear medicine, nuclear power generation, nuclear reactor engineering, nuclear systems design and modeling, nuclear waste management, numerical methods for reactor analysis, radiation shielding, radioisotope production, space nuclear power, and thermal hydraulics
Nutrition	MS, PhD	School of Biological and Population Health Sciences	Nutrition
Ocean, Earth and Atmospheric Sciences	MA, MS, PhD	College of Earth, Ocean, and Atmospheric Sciences	Atmospheric sciences, geophysics, biological oceanography, chemical oceanography, geological oceanography, physical oceanography
Pharmaceutical Sciences	MS, PhD	College of Pharmacy	Biopharmaceutics, medicinal chemistry, natural products chemistry, pharmaceuticals, pharmacokinetics, pharmacology, pharmacoconomics, toxicology
Physics	MA, MS, PhD	Dept. of Physics	Atomic physics, computational physics, nuclear physics, optical physics, particle physics, relativity, solid state physics, physics education
Public Health	MPH, PhD	College of Public Health and Human Sciences	Biostatistics (MPH only); environmental and occupational health and safety (MPH, PhD); epidemiology (MPH only); health management and policy (MPH only); health policy (PhD only); health promotion and health behavior (MPH, PhD); international health (MPH only)
Public Policy	MPP, PhD	College of Liberal Arts, School of Public Policy	Environmental policy, international policy, rural policy, science policy, social policy
Radiation Health Physics	MA, MHP, MS, PhD	Dept. of Nuclear Engineering and Radiation Health Physics	Application of nuclear techniques, boron neutron capture therapy, emergency response planning, environmental monitoring, environmental pathways assessment, nuclear medicine, radiation detection and instrumentation, radiation dosimetry, radiation health physics, radiation shielding, radioactive material transport, radioactive waste management, research reactor health physics, and risk assessment
Rangeland Ecology and Management	MAG, MS, PhD	Dept. of Animal and Rangeland Sciences	Agroforestry, ecology of rangelands, physiology of range plants, range improvement, range nutrition, restoration ecology, riparian zone management, watershed management
Science Education	MA, MS, PhD	College of Education	Elementary school science, free-choice learning, middle school science, science education, secondary science
Soil Science	MAG, MS, PhD	Dept. of Crop and Soil Science	Environmental soil science, forest soils, nutrient cycling, soil conservation and land use, soil fertility and plant nutrition, soil genesis and classification, soil geochemistry, soil microbiology, soil physics
Statistics	MA, MS, PhD	Dept. of Statistics	Statistics
Sustainable Forest Management	MF, MS, PhD	Department of Forest Engineering, Resources and Management	Engineering for sustainable forestry; forest biometrics and geomatics; forest operations planning and management; forest policy analysis and management; forest watershed management; silviculture, fire, and forest health
Teaching	MAT	College of Education	Teaching*
Toxicology	MAG, MS, PhD	Dept. of Environmental and Molecular Toxicology	Environmental chemistry and ecotoxicology, mechanistic toxicology, molecular and cellular toxicology, neurotoxicology
Water Resources Engineering	MS, PhD	Graduate School	Groundwater engineering, surface water engineering, watershed engineering
Water Resources Policy and Management	MS	Graduate School	Water resources policy and management
Water Resources Science	MS, PhD	Graduate School	Water resources science
Wildlife Science	MAG, MS, PhD	Dept. of Fisheries and Wildlife	Animal-habitat relationships; behavior; biology of big game and small mammals; conservation biology; community studies; ecology of avian and mammalian predators; ecology of waterfowl and upland gamebirds; effects of parasites, diseases, and environmental contaminants; nutrition; population; population dynamics; reproductive biology; toxicology of pesticides; wildlife ecology; wildlife-forestry interactions; wildlife science
Women, Gender, and Sexuality Studies	MA	School of Language, Culture, and Society	Contemporary women's issues; leadership and community engagement; race, class and gender; sexuality studies; transnational perspectives

Graduate Major <i>Note:</i> Most graduate majors may be used as a graduate minor. Also see Graduate Minor chart for additional fields approved as graduate minors only.	Graduate Degrees	Academic Unit <i>Note:</i> The academic unit is responsible for directing and managing the majors and minors.	Graduate Areas of Concentration <i>Note:</i> Areas of concentration are for reference only. They do not appear on transcripts or diplomas.
Wood Science	MS, PhD	Dept. of Wood Science and Engineering	Biodeterioration and materials protection, chemistry and chemical processing, forest products business and marketing, physics and moisture relations, process modeling and analysis, renewable materials science and engineered composites, wood anatomy and quality, wood engineering and mechanics
Zoology	MA, MS, PhD	Dept. of Zoology	Behavioral ecology, behavioral endocrinology, cell biology, chemical ecology, conservation biology, developmental biology, evolutionary biology, genetics, genomics, host-microbe interactions, marine ecology, paleontology, physiology, population biology

GRADUATE MINORS THAT DO NOT HAVE CORRESPONDING MAJORS, AND ACADEMIC UNITS

(Also see Graduate Major chart for other fields that may be utilized as a graduate minor)

Minor	Academic Unit	Graduate Areas of Concentration
Aging Science	School of Social and Behavioral Health Sciences	
Anthropology	School of Language, Culture, and Society	Applied cultural anthropology, biocultural evolution, cultural resource management, cross-cultural communication, general anthropology, historic archeology, medical anthropology, natural resource and community development, prehistoric archeology
Art	School of Arts and Communication	Art history, fine arts, photography
Community College Education	College of Education	Instruction, curriculum, management and adult extension, community college
Ecosystem Informatics	College of Earth, Ocean, and Atmospheric Sciences	Ecosystem informatics
Ethnic Studies	School of Language, Culture, and Society	Ethnic studies
Food in Culture and Social Justice	School of Language, Culture, and Society	
Foreign Languages and Literatures	School of Language, Culture, and Society	Modern languages, French, German, Spanish
Gerontology	School of Social and Behavioral Health Sciences	Gerontology
History	School of History, Philosophy, and Religion	American history (U.S.), Western U.S. history, European history, non-American and non-European history (Asian, African, Latin American, Islamic), history of science
International Agricultural Development	College of Agricultural Sciences	International agricultural development
Music	School of Arts and Communication	Composition, Conducting, music education, performance
Philosophy	School of History, Philosophy, and Religion	Ethics (including environmental ethics and biomedical ethics), logic and philosophy of science, aesthetic theory, history of philosophy, religious studies
Political Science	School of Public Policy	American politics, judicial politics, public administration, political theory, state and local government, international relations, comparative politics, gender politics, environmental policy
Psychology	School of Psychological Sciences	General psychology
Rural Studies	Graduate School	Rural studies
Sociology	School of Public Policy	Environmental and natural resources, international sociology, social policy
Speech Communication	School of Arts and Communication	Interpersonal and group communication; rhetoric and social influence; theatre arts costume and scene design; theatre arts directing, performance, and management; theatre arts history, criticism/literature, and playwriting
Water Conflict Management and Transformation	College of Earth, Ocean, and Atmospheric Sciences	Water conflict management and transformation
Water Resources	Center for Water and Environmental Sustainability (Coordinating Unit)	Hydrology, water quality, water resources planning and management

In addition to the minors listed above, most departments or schools offering a graduate major may also offer a graduate minor.

GRADUATE CERTIFICATES

Graduate Certificate	Academic Unit
College and University Teaching	Graduate School
Fisheries Management	Dept. of Fisheries and Wildlife, College of Agricultural Sciences
Geographic Information Science	College of Earth, Ocean, and Atmospheric Sciences
Health Management and Policy	College of Public Health and Human Sciences
Management for Science Professionals	College of Science
Marine Resource Management	College of Earth, Ocean, and Atmospheric Sciences
Public Health	College of Public Health and Human Sciences
Sustainable Natural Resources	College of Forestry; Dept. of Forest Ecosystems and Society
Water Conflict Management and Transformation	College of Earth, Ocean, and Atmospheric Sciences
Wildlife Management	Dept. of Fisheries and Wildlife, College of Agricultural Sciences

GRADUATE OPTIONS

Graduate Option	Graduate Major	Academic Unit
Accounting	Business Administration (PhD)	College of Business
Biomedical Sciences	Comparative Health Sciences	College of Veterinary Medicine
Clinical Mental Health Counseling	Counseling	College of Education
Commercialization	Business Administration (MBA)	College of Business
Design	Mechanical Engineering	School of Mechanical, Industrial, and Manufacturing Engineering
Engineering Management	Industrial Engineering	School of Mechanical, Industrial, and Manufacturing Engineering
Entomology	<ul style="list-style-type: none"> • Horticulture • Crop Science 	<ul style="list-style-type: none"> • Department of Horticulture • Department of Crop and Soil Science
Global Operations	Business Administration (MBA)	College of Business
Innovation/Commercialization	Business Administration (PhD)	College of Business
Marketing	Business Administration (MBA)	College of Business
Materials Mechanics	Mechanical Engineering	School of Mechanical, Industrial, and Manufacturing Engineering
Plant Breeding and Genetics	<ul style="list-style-type: none"> • Horticulture • Crop Science 	<ul style="list-style-type: none"> • Department of Horticulture • Department of Crop and Soil Science
Robotics	Mechanical Engineering	School of Mechanical, Industrial, and Manufacturing Engineering
School Counseling	Counseling	College of Education
Research Thesis	Business Administration (MBA)	College of Business
Thermal Fluid Sciences	Mechanical Engineering	School of Mechanical, Industrial, and Manufacturing Engineering
Wealth Management	Business Administration (MBA)	College of Business
Graduate Options Pending Approval	Graduate Major	Academic Unit
Clinical Sciences	Comparative Health Sciences	College of Veterinary Medicine
Energy Conversion	Mechanical Engineering	College of Engineering
English for Speakers of Other Languages	Education	College of Education
Executive Leadership	Business Administration (MBA)	College of Business
Renewable Energy	Mechanical Engineering	College of Engineering

*PROFESSIONAL TEACHER LICENSES

CONTENT AREAS FOR THE MASTER OF ARTS IN TEACHING DEGREE

(Not available for use as a graduate minor)

Advanced Mathematics Education
 Agricultural Education
 Biology Education
 Chemistry Education
 Elementary Education
 Family and Consumer Sciences Education
 Integrated Science Education
 Language Arts Education—
 Cascades campus only
 Music Education
 Physics Education
 Spanish Education

MISSION, GOALS, AND VALUES

Preamble

Oregon State University is a comprehensive, public, research-intensive university and a member of the Oregon University System serving as the state's land, sea, space and sun grant institution—one of only two universities with such designation in the country (Cornell University in Ithaca, NY, is the other). OSU programs and faculty are located in every county of the state and are dedicated to investigating the state's greatest challenges. OSU considers the state of Oregon its campus and works in partnership with the P-12 school system, Oregon community colleges and other OUS institutions to provide access to high quality educational programs. Strong collaborations with industry and state and federal agencies drive OSU's research enterprise.

MISSION

As a land grant institution committed to teaching, research, and outreach and engagement, Oregon State University promotes economic, social, cultural and environmental progress for the people of Oregon, the nation and the world. This mission is achieved by producing graduates competitive in the global economy, supporting a continuous search for new knowledge and solutions, and maintaining a rigorous focus on academic excellence, particularly in the three Signature Areas: Advancing the Science of Sustainable Earth Ecosystems; Improving Human Health and Wellness; and Promoting Economic Growth and Social Progress.

VISION

To best serve the people of Oregon, Oregon State University will be among the Top 10 land grant institutions in America.

GOALS

1. Provide outstanding academic programs that further strengthen our performance and pre-eminence in three Signature Areas of Distinction:

Advancing the Science of Sustainable Earth Ecosystems; Improving Human Health and Wellness; and Promoting Economic Growth and Social Progress.

2. Provide an excellent teaching and learning environment and achieve student access, persistence, and success through graduation and beyond that matches the best land grant universities in the country.
3. Substantially increase revenues from private fundraising, partnerships, research grants, and technology transfers while strengthening our ability to more effectively invest and allocate resources to achieve success.

OSU Strategic Plan: <http://oregonstate.edu/leadership/strategicplan/>

CORE VALUES

Accountability. We are committed stewards of the loyalty and good will of our alumni and friends of the human, fiscal, and physical resources entrusted to us.

Diversity. We recognize that diversity and excellence go hand-in-hand, enhancing our teaching, scholarship, and service as well as our ability to welcome, respect, and interact with other people.

Integrity. We practice honesty, freedom, truth, and integrity in all that we do.

Respect. We treat each other with civility, dignity, and respect.

Social responsibility. We contribute to society's intellectual, cultural, spiritual, and economic progress and well-being to the maximum possible extent.

ORGANIZATION

Graduate School

Graduate work at Oregon State University is administered by the Graduate School. The regulations, policies, and procedures governing graduate education are implemented by the dean of the Graduate School. The dean coordinates graduate programs, courses, admission standards, and certificate and degree requirements; enforces current regulations; recommends changes in graduate policy to the Graduate Council; acts on petitions to deviate from existing regulations; and is responsible for the efficient and effective operation of the Graduate School. The Graduate School office is in room A300 of OSU's Kerr Administration Building. The telephone number is 541-737-4881, and the FAX number is 541-737-3313. The email address is Graduate.School@oregonstate.edu, and the Web address is <http://gradschool.oregonstate.edu>.

Mission

The Graduate School contributes to OSU's goal of achieving top ten land

grant status by providing leadership in all aspects of graduate education, through advocacy for the critical importance of the graduate enterprise to the university's mission, and by providing core centralized services to the graduate community. In partnership with the graduate faculty, the Graduate School plays a leadership and advocacy role to ensure that OSU attracts the best graduate students and delivers a compelling and high-quality graduate experience that prepares them to create new ideas and knowledge, to educate others, to make positive impacts on society, and to lead innovation.

GRADUATE COUNCIL

The Graduate Council formulates the basic policy, procedures, and requirements for all graduate work at OSU, within the general authority granted by the State Board of Higher Education. The council establishes admission standards, basic degree requirements, and general policies; approves all graduate faculty members, new programs, and courses; and periodically reviews all existing graduate programs. Graduate Council members are appointed by the Executive Committee of the Faculty Senate, with each academic college having one representative. Major actions of the Graduate Council are referred to the Faculty Senate for review and approval.

Graduate Council Membership

Jim Coakley, Chair 2013, Business
 Murray Levine, 2013, Earth, Ocean, and Atmospheric Sciences
 Stacy Semevolos, 2013, Veterinary Medicine
 Mike Lerner, 2014, Science
 Andrew Plantinga, 2014, Agricultural Sciences
 Darrell Ross, 2014, Forestry
 Theresa Filtz, 2014, Pharmacy
 Jay Casbon, 2015, OSU-Cascades/Education
 Don Jump, 2015, Public Health and Human Sciences
 Janet Lee, 2015, Liberal Arts
 Greg Herman, 2015, Engineering
 Student Member - TBA

Ex-officios:

- Graduate School Dean Brenda McComb
- Graduate School Associate Dean Anita Azarenko
- Graduate Admissions Committee Chair Wade Marcum
- Executive Committee Liaison Andrew Karplus

Graduate Council Representation:

Distance Education Committee

Past and present membership: <http://oregonstate.edu/senate/committees/gradcncl/member/>

GRADUATE FACULTY

Graduate faculty members are chosen from the university faculty based on their academic training, experience, dem-

onstrated potential for scholarship, and evidence of their ability and competency to direct and supervise graduate students in the pursuit of advanced knowledge.

Each graduate faculty member is authorized to perform specific activities within a particular graduate program. The head and academic dean of each unit are responsible for nominating faculty members for these activities, subject to review and approval by the Graduate Council.

ACADEMIC UNITS

An academic unit is the administrative unit responsible for directing and managing a graduate major or minor field of study. An academic unit may be an academic program, department, school, or college, or composite of these. The chief administrative officer of the academic unit is responsible for managing the graduate programs in that unit and is responsible to the dean of the Graduate School for all graduate work performed by the unit.

Academic units have a major role in the success of graduate education. Within the general rules of the Graduate School, the academic units establish and teach courses, maintain a graduate faculty to teach and supervise research, establish their own admission standards and specific graduate certificate and degree requirements, make graduate student appointments, and provide advice and supervision for their graduate students.

GRADUATE ADMISSIONS REQUIREMENTS

Oregon State University offers admission to applicants whose records demonstrate the highest potential for graduate study and promise for substantial contribution to both their academic professions and to a diverse, global society. The university fosters an environment that welcomes inclusiveness.

Admission decisions are based on many factors, such as the quality of the applicant's prior academic degree and record of accomplishment, statement of purpose, letters of recommendation from professors or others familiar with the applicant's academic work, performance in aptitude and achievement tests, relevant work experience, preparation in the proposed field of study, and the connection of the applicant's academic goals with the faculty's research interests.

Requirements

The following minimum entrance requirements guide the university and its graduate programs in the consideration of applicants for graduate admission:

- A four-year baccalaureate degree (or international equivalent), a professional degree (such as

BPharm, BVsc, MBBS, MD, DVM, DPharm, etc.), or an appropriate U.S./Canadian alternative degree, from a regionally accredited (US) or recognized (International) college or university, **with**

- A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the most recent baccalaureate degree or equivalent or any subsequent graduate degree from a regionally accredited (US) or recognized (International) college or university, plus all work completed thereafter.

The graduate program may choose to calculate the GPA on the last 90 quarter credits (60 semester credits [last two years on an international record]) of graded undergraduate work on the most recent baccalaureate degree, plus all work completed thereafter, as the basis for admission.

Minimum GPA for admission to *only* graduate certificate programs is set by the departments that supervise the certificates. Applicants requesting admission to only graduate certificate programs should contact their academic program to learn about minimum GPA and other admission requirements.

OR:

- A four-year baccalaureate degree (or international equivalent), a professional degree, or an appropriate U.S./Canadian alternative degree, from a regionally accredited (US) or recognized (International) college or university, **and**
- A 45-quarter credit equivalent graduate degree from a regionally accredited (US) or recognized (International) college or university, **with**
- A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the most recent graduate degree.

If the applicant has completed his or her baccalaureate degree in a country that is a signatory of the Bologna Declaration, then:

- A Bologna compliant baccalaureate degree at a recognized college or university of at least three years duration, **with**
- A cumulative B average (equivalent 3.00 on a U.S. 4.00 grading scale) on the degree, plus all subsequent graded course work.

OR (Other three-year bachelor degree holders):

- A non-Bologna compliant baccalaureate degree of at least three years duration from a recognized college or university, **and**
- A 45-quarter credit equivalent graduate degree from a recognized college or university, **with**
- A cumulative GPA of at least 3.00 on the most recent graduate degree.

INTERNATIONAL REQUIREMENTS

All international graduate applicants must meet the following additional requirements:

- Documentation of sufficient financial resources to attend Oregon State University as a graduate student.
- AND:**
- Documentation of English language proficiency

Graduate Applicants		
	Regular Admission	Transitional Admission-TAP (formerly Conditional Admission-CAP)
TOEFL Paper based	550	500–547
Internet (iBT) TOEFL	80 Minimum score of 18 on each section	60–79 Or any sub-score less than 18
Internet (iBT) TOEFL Applicants awarded GTA	80 Minimum score of 22 on Speaking sub-score and Minimum score of 18 on all other sections	
IELTS	6.5	6.0

Please note: OSU requires graduate applicants to meet or exceed all five iBT scores to be eligible for full admission. Scores must be no more than two years old at the time of the applicant's first term of registration.

Waived from English Language Testing:

The English language proficiency requirement is waived for applicants who have demonstrated success by achieving an overall GPA greater than 3.0 on a 4.0 scale for two or more semesters/quarters in a rigorous undergraduate or postgraduate program in the U.S. or from one of the following English speaking countries**: Australia, Canada, New Zealand, and United Kingdom.

** Waivers for applicants in other countries are considered on a case-by-case basis if the medium of instruction is English. The individual program must petition the Graduate School for a waiver. Not all programs will request a waiver. Please contact your proposed graduate program to inquire about their policy.

English Language Exceptions:

Individual programs may request exceptions to the minimum English language proficiency requirements. Exceptions to the minimum TOEFL score/sub-score requirements will be considered by the Graduate School Dean on request if:

- Applicant's GRE Verbal score is greater than 500 (153 – revised GRE)
- OR**
- The chair of the Graduate Program (or designated faculty member)
 - Has personally interviewed the applicant and established a plan for language support for the applicant, if needed, which may include additional English Language Training,
 - OR**
 - The Graduate Program arranges for the applicant to complete language training at INTO OSU equivalent to the admission status as designated by the Transitional Admission Program-TAP

TRANSITIONAL ENGLISH ADMISSION

Transitional admission based on English language proficiency may be granted to applicants seeking admission to a graduate degree program. University transitional admission of international applicants may be granted only if the applicant is otherwise fully admissible.

Transitional admission for degree-seeking applicants requires:

- On-campus testing of English language proficiency prior to enrollment, and
- Compliance with the subsequently specified plan for English and academic course work during each quarter until such time as the applicant qualifies for regular admission.
- Individual graduate programs may require additional documents such as GRE and GMAT test results or set higher English and academic standards. For detailed information, refer to the website for Graduate Admissions and individual graduate programs websites.

Transitional admission based on English language proficiency may not be granted to applicants seeking admission to *only* a graduate certificate program.

All international applicants seeking graduate teaching assistantships should refer to the International Graduate Teaching Assistant English Language Requirement section of this catalog for more details.

ADMISSION REQUIREMENTS CONTINUED

Applicants not meeting minimum academic requirements still may be considered for admission with the support of their academic program, plus review and approval by the University Graduate Admissions Committee. For these applicants, decisions may rely more heavily on noncognitive criteria. However, the university encourages those applicants

whose overall cumulative undergraduate GPA of less than an equivalent 3.00 on a U.S. 4.00 grading scale to take the GRE.

Applicants whose baccalaureate degrees are awarded by an institution that issues non-graded transcripts will be considered for admission with the support of the program's written evaluation of the quality of the applicant's transcript record.

Satisfaction of minimum entrance requirements does not guarantee admission, since the number of qualified applicants far exceeds the number of places available. As a consequence, many well-qualified applicants may not be accommodated.

Please note that academic performance is not the sole criterion for admission to the university. The university may evaluate a person's behavior and background to determine their ability to maintain the standards of academic and professional conduct expected at the university. An evaluation may take into consideration current behavior and performance as well as past experiences and actions.

APPLICATION PROCESS

Application forms required for admission to the Graduate School are available electronically.

The applicant's proposed academic program will examine material submitted to determine the adequacy of scholastic background and to decide whether departmental facilities are adequate for the expressed aims of the applicant. Upon the positive recommendation of the academic program, the Graduate School will determine whether minimum university requirements for admission have been met and, subsequently, will provide to the applicant formal notification as to the action taken.

Applicants must submit application materials to the Graduate School, unless a program specifies differently. Applicants should contact their academic program(s) of interest to determine whether additional admission materials are required beyond those listed below. Applicants seeking admission to only a graduate certificate program must provide items a., b., and c. below to the Graduate School and contact their academic programs to determine what other program-specific materials may be required for admission to the graduate certificate program.

- a. One electronic version of the graduate application for each major to which the applicant seeks admission.
- b. \$60 nonrefundable application fee. Applying online requires payment by credit card.
- c. Transcripts/Academic Records* of all previous academic work,

undergraduate and graduate. International applicants must provide a certified English translation of academic records in addition to original language records.

*Unofficial records but not grade slips/reports, computer printouts, or internal transcripts may be submitted for evaluation and admission purposes.

If admitted, before registering for courses:

1. Applicants from U.S. schools must provide official transcripts from all colleges attended, including final transcripts showing degrees awarded and dates earned.
2. International applicants must provide equivalent documentation from all colleges attended, including final academic records showing degrees awarded and dates earned in the original language plus certified English translations.
- d. Three letters of professional reference are required of most applicants applying for admission to a graduate degree program.

If you have a master's degree, please include a letter from your major professor. Applicants applying only to graduate certificate programs are encouraged to consult with their academic program to determine whether this or other materials are required.

1. Non-Engineering applicants:

An optional online letter of reference system is available within the university application. If you choose to not use the letter of reference system, please ask your letter writers to mail confidential letters to the Graduate School. Reference letters should be written on official letterhead and received by the Graduate School in sealed envelopes.

2. Engineering applicants:

Use of an online letter of reference is required. The engineering online letter of reference system is available within the online departmental supplemental engineering application.

- e. Certain graduate programs require the GRE of all applicants. Address inquiries regarding GRE requirements to your proposed academic program. See specific Program Information

International applicants must also send the following documents with their application materials:

- a. One photocopy of TOEFL or IELTS scores. If admitted, official test scores must be received by the Graduate

School prior to the **start** of the applicant's first term of enrollment.

- b. Certification of Finances form with supporting documentation, demonstrating sufficient financial resources for the desired academic program. Financial documentation is not required at the time of application. If the application is accepted, the Graduate School will contact the applicant via email to request the financial materials.

Note: If you will be taking courses as a distance student through OSU Extended Campus and not entering the U.S., we ask that you complete a special certification form. Proof of funding is not required. Please contact graduate admissions to request the form.

APPLICATION DEADLINES

Department Deadlines

Academic programs establish their own application deadlines, which are often substantially earlier than the general university deadlines described below. In such cases, program deadlines supersede the more general university deadline. Some academic programs also admit applicants for specific terms only (e.g. fall term). Applicants should contact the proposed graduate program for deadlines and any other restrictions. See specific Program Information.

In the absence of earlier program deadlines, the following university deadlines exist:

U.S. Citizens and Permanent Residents

Absolutely no later than 30 days prior to the first day of classes.

International Applicants

To allow adequate time for students to obtain visas and make travel arrangements, the following deadlines have been established for international applicants:

Term	General University Deadline* for International Students Applying from Outside the U.S. * Program deadlines supersede this deadline. Please contact program directly for specific program deadline.	General University Deadline* for International Students Applying from Within the U.S. * Program deadlines supersede this deadline. Please contact program directly for specific program deadline.
Fall	April 1	June 1
Winter	July 1	September 1
Spring	October 1	December 1
Summer	January 1	March 1

SUMMER SESSION ADMISSION

See the Special Campus Programs section of this catalog and see Summer Session.

ADMISSION STATUS

Students may be admitted to the Graduate School under the following categories.

ADVANCED-DEGREE STUDENTS

1. Regularly Admitted Graduate Students. These students have been accepted by the university and by a major program to work toward an advanced degree.

2. Conditionally Admitted Graduate Students. Students who have not met the formal admission requirements but whose accomplishments have convinced the University Graduate Admissions Committee and their major program that they have potential for success as advanced degree candidates may be conditionally admitted as follows:

1. Students from nonaccredited institutions must complete at least one term of satisfactory work at Oregon State, after which they may be admitted with full standing in the Graduate School.
2. Students whose preparation does not warrant full admission to the Graduate School but who may prove acceptable later must satisfactorily complete specified conditions to demonstrate their ability to carry out graduate-level work.

3. Transitionally Admitted Graduate Students. International students who lack minimum English language proficiencies but otherwise meet all other formal admission requirements may be transitionally admitted under the following:

1. TOEFL total score is in the range of 61 to 79 (iBT).
2. IELTS total score is 6.0. Students who score below the minimum on one or more iBT subtests but meet the minimum overall iBT score requirement may be considered for transitional admission. Transitional admission based on English language proficiency may not be granted to students seeking admission to only a graduate certificate program.

4. Provisionally Admitted Graduate Students. Students who have met all of the university standards for formal admission but whose academic program or major department may have placed additional restrictions upon their admission may be provisionally admitted. These restrictions may include certain prerequisite courses that must be completed, completion

of the GRE or GMAT, submission of additional reference letters or scores, etc.

Conditionally and Transitionally admitted student cannot schedule and hold preliminary oral exams or final oral exams for their degree until they have satisfied the requirements of their admission and have been reclassified as regular graduate students.

Provisionally admitted students cannot take the final exam for their degree until they have satisfied their provisions and have been reclassified as regular graduate students.

Credit for graduate courses that students have completed acceptably while registered as conditional, transitional or provisional students may count toward the residence requirement for advanced degrees.

If students fail to satisfactorily complete their conditions or provisions, they will be dismissed from the Graduate School.

GRADUATE CERTIFICATE STUDENTS

Students admitted to *only* a graduate certificate program may be considered for reclassification as degree-seeking graduate students by following the procedure in the section below regarding reclassification.

NONDEGREE-SEEKING GRADUATE STUDENTS

The nondegree-seeking graduate student category may be used by holders of a baccalaureate degree who do not wish to pursue an advanced degree at Oregon State University. Those nondegree-seeking graduate students who wish to be reclassified as degree-seeking graduate students must follow the procedure in the next section.

International students who are currently in the U.S. on visas such as an F-1, F-2, B-2, J-1, etc. should consult with OSU's International Student Advising and Services (ISAS) (email: isas.advisor@oregonstate.edu) before submitting the OSU non-degree application for admission. Only certain visa types allow an individual to pursue part-time or non-degree-seeking course work and still maintain one's visa status.

Graduate international students who wish to enroll as nondegree students with OSU for one or more terms, but who will not participate in an established exchange program, should contact the ISAS Office isas.advisor@oregonstate.edu for further information, and before applying.

International students who plan to enroll with OSU as nondegree exchange students should use the application form that is made available at each partner institution. For a list of exchange partner

institutions, go to <http://oregonstate.edu/international/atosu/students/prospective/exchange>.

RECLASSIFICATION OF POSTBACCALAUREATE STUDENTS, NONDEGREE-SEEKING STUDENTS, AND GRADUATE CERTIFICATE STUDENTS

A postbaccalaureate, nondegree-seeking graduate, or graduate certificate student may be considered for status as a regular degree-seeking graduate student under one of the following provisions, depending upon prior academic records:

If the student would have been eligible for graduate admission at the time of entering as a postbaccalaureate, nondegree-seeking graduate, or graduate certificate student, the student is eligible for admission consideration at any time but must submit an application for admission to the appropriate level to begin the process.

If the student, prior to entering as a postbaccalaureate, nondegree-seeking graduate, or graduate certificate student had been denied graduate admission or would have been ineligible for graduate admission, as determined *a posteriori* by the University Graduate Admissions Committee, the postbaccalaureate, nondegree-seeking graduate, or graduate certificate student must complete option A or option B below and reapply or reactivate an application for admission to graduate-level study:

- a. complete 24 credits of courses each with a grade of B (3.00) or better, or
- b. complete sufficient credits to bring the cumulative grade-point average (that for the last 90 credits of undergraduate work plus that for courses taken as part of the 24-credit rule) to 3.00 or better before being eligible to apply for graduate admission.

These courses will normally be regular graduate courses relevant to the specific field, except that seminars and other blanket number graduate courses may not be used. Upper-division undergraduate courses are acceptable, provided that they eliminate specific deficiencies in requirements for entry into an identified graduate program. Lower-division undergraduate courses may not be used. All courses should be carefully selected in consultation with an academic advisor from the graduate field into which the student desires admission.

Completion of either 2(a) or 2(b) above does not guarantee graduate admission. Reclassification decisions employ the same procedures and requirements as those for admission. Postbaccalaureate, nondegree-seeking graduate, and graduate certificate students who

seek reclassification must be acceptable to the program in which they plan to major. The university does not have the capacity to accommodate all who meet the minimum requirements for regular graduate student status; when selecting among students who meet minimum requirements, the university treats students requesting reclassification the same as those applying for admission as regular graduate students.

A postbaccalaureate or nondegree-seeking graduate student may use graduate credit earned in this status toward an advanced degree or graduate certificate if the student is later reclassified as a regular graduate student. This credit cannot be used to satisfy residence requirements for an advanced degree. A graduate certificate student may use graduate credit earned in this status toward an advanced degree if the student is later reclassified as a regular graduate student. In either case, the amount of usable credit will depend on the size of the individual student's program (e.g., a maximum of 15 graduate credits could be used on a 45-credit master's program or a maximum of 6 graduate credits may be applied toward an 18-credit graduate certificate.) See section entitled "Transfer Credit" for complete details.

Students should initiate all requests for reclassification at the Graduate School.

SECOND OSU MASTER'S DEGREE

A candidate for a second master's degree from Oregon State University may request the application of up to 15 credits, appropriate to both programs, from the first master's degree program to another, subject to the following three requirements:

1. Credits used to satisfy the residency requirements of one master's degree may not be used to satisfy the residency requirements of another master's degree.
2. Students who earn two master's degrees at Oregon State University must complete all degree requirements for each degree. This requires filing separate programs of study forms for each degree, filing separate commencement applications for each degree, completing separate projects or theses for each degree, scheduling separate final oral examinations for each degree, and passing final oral examinations for each degree.
3. Such credit will be granted only for graded course work earned at Oregon State University and completed with a grade of B or higher.

PURSUIT OF THE SECOND PhD

The doctor of philosophy degree is the highest academic degree granted by North American universities. It is a research degree designed to prepare a student to become a scholar; that is, to discover, integrate, and apply knowledge, as well as communicate and disseminate it. The doctor of philosophy degree is to be distinguished from other doctorates such as the MD, JD, or EdD degrees, which are designed for professional training or which focus on applied rather than basic research. As is the common practice of most North American universities, Oregon State University seldom approves requests for pursuit of the second PhD.

The Graduate Dean will determine whether or not a student may be admitted for the second PhD. The dean may seek the advice of the Graduate Council in the deliberation of these cases.

RE-ENROLLMENT

All credential-seeking graduate students will be subject to the continuous enrollment policy. Continuous graduate enrollment refers to the policy of requiring continuous registration of graduate students from original matriculation until all graduate degree or certificate requirements are met. Please refer to Registration Requirements under Policies Governing All Graduate Programs for complete details.

A graduate student who takes an unauthorized break in registration by failing to maintain continuous enrollment or by failing to obtain regular or planned leave of absence will relinquish his/her graduate standing in the university. Students who wish to have their graduate standing reinstated will be required to file an Application for Graduate Readmission, pay the readmission fee, and register for 3 graduate credits for each term of unauthorized break in registration.

International students who wish to re-enroll after an absence should check in with International Student Advising and Services to make sure they have the required documents to return to the US.

GRADUATE TUITION AND FEES

The official Graduate Tuition and Fee Schedule for 2013–2014 can be found on the OSU Business Affairs site: <http://oregonstate.edu/fa/businessaffairs/student>.

Tuition and fees for the next year are usually finalized during the month of July prior to the academic year start.

For information about residency status, visit: <http://oregonstate.edu/admissions/main/residency-2>.

POLICIES GOVERNING ALL GRADUATE PROGRAMS

GRADUATE MAJOR

A graduate major is the area of academic specialization, approved by the State Board of Higher Education, in which the student chooses to qualify for a graduate degree. Upon completion of a graduate degree, the degree awarded and the graduate major are listed on the student's transcript.

GRADUATE OPTION

Options are for students of a specific major. An option is one of several distinct variants of course aggregations within a major that focus on an area of study designed to provide a student with specialized knowledge, competence, and skills while sharing a minimum core of courses.

A graduate option consists of a minimum of 12 designated quarter credits of related course work (excluding thesis credits), comprised of course work offered by the sponsoring unit as well as by other academic units. The option may be comprised of specific courses, completion of a designated number of credits from a longer list of alternative courses, or a combination of specific and alternative course lists. Approved options may be added to a graduate program of study, and approved by the faculty advisor(s) and the director of the sponsoring unit. On the program of study, there should be no overlap in course credits between options (the same course cannot be used to satisfy credit requirements in multiple options). When the unit submits the final examination card to validate awarding of the major to the Graduate School, the unit will also validate that the requirements of the option have been completed.

GRADUATE AREA OF CONCENTRATION

A graduate area of concentration is a subdivision of a major or minor in which a strong graduate program is available. Areas of concentration may be referenced on the student's program of study, but they are not listed on the student's transcript.

GRADUATE MINOR

A graduate minor is an academic area that clearly supports the major. Master's program minors must include a minimum of 15 quarter credits of graduate course work; doctoral minors require a minimum of 18 credits. On a master's or doctoral program, a minor may be:

1. an academic area available only as a minor,
2. a different major,
3. the same major with a different area of concentration,

4. an approved major at another institution in the Oregon University System, or
5. an integrated minor.

An integrated minor consists of a series of cognate courses from two or more areas. These courses must be outside the major area of concentration, with most of the courses being outside the major department. The graduate faculty member representing the integrated minor must be from outside the major department. Graduate minors are listed on the student's transcript.

CONCURRENT MASTER'S DEGREES

Students who earn two master's degrees at Oregon State University must complete all degree requirements for each degree. This requires filing separate programs of study forms for each degree, filing separate commencement applications for each degree, completing separate projects or theses for each degree, scheduling separate final oral examinations for each degree, and passing final oral examinations for each degree. For additional information, please refer to the Transfer Credit section of this catalog.

DUAL MAJORS

For the MA, MS, EdM, MF, or PhD degree, a student may select two graduate major areas to pursue instead of the traditional single major. Only one degree is awarded, and the student basically must satisfy all degree requirements for majors in both areas. For more details, contact the Graduate School.

GRADUATE CERTIFICATE

A graduate certificate program is a structured progression of graduate-level courses that constitute a coherent body of study with a specific defined focus within a single discipline or a logical combination of disciplines. It is designed for a student who has completed a baccalaureate degree and is in pursuit of advanced-level learning. Graduate certificates reflect the educational mission of the university.

TRANSFER CREDIT

Students who wish to transfer graduate credits from other schools must provide transcripts for courses already completed to the Graduate School prior to the submission of a study program. Undergraduate students at OSU may receive credit for graduate courses (500 and 600 level) in excess of the requirements for a baccalaureate degree. Graduate courses taken at OSU while the student was a non-degree graduate student, a post-baccalaureate student, a professional degree-seeking student (PharmD or DVM), or an undergraduate student, are considered transfer courses.

Courses to be transferred **must be graduate level** with letter grades of B (3.00) or better. Courses delivered off-campus or by electronic means must satisfy the OSU guidelines for the electronic delivery of courses. It is the responsibility of the student wishing to transfer the course to provide the necessary documentation to satisfy the OSU guidelines. Traditional extension and correspondence courses with no live or real-time interaction with the instructor are not transferable.

Graduate courses may be transferred if:

1. the work is appropriate to and will be placed on the student's graduate certificate or degree program;
2. the transfer is approved by the student's committee (for degree-seeking students), by the major program or department, and by the Graduate School; and
3. grades of B (3.00) or better have been earned.

If the transfer credit is from a foreign university, the student must provide copies of the original transcript and an English translation of the transcript, with the courses to be transferred clearly indicated. Grades and credits for the courses must be clearly identified. In some countries, the first university degree, which OSU considers to be equivalent to a baccalaureate degree, may take five years or more to complete. All of the course work toward such a degree is considered a requirement for the first university degree, and hence none of it can be transferred to a graduate certificate or graduate degree at OSU.

Students may not transfer courses graded on a nonstandard basis (e.g., Pass/No Pass, Credit/No Credit, Satisfactory/Unsatisfactory) to their graduate certificate or degree programs unless it can be verified from the registrar of the university offering the course that the grade is equivalent to a B (3.00) or better.

Graduate courses to be transferred from another institution to an OSU master's degree must not have been used to satisfy the requirements for a bachelor's degree, master's degree (or equivalent) or a doctoral degree.

Graduate courses to be transferred from an OSU master's degree to a second OSU master's degree must meet the following three requirements:

1. Credits used to satisfy the residency requirements of one master's degree may not be used to satisfy the residency requirements of another master's degree.
2. Students who earn two master's degrees at Oregon State University must complete all degree requirements for each degree. This requires filing separate programs of study forms for each degree, filing

separate commencement applications for each degree, completing separate projects or theses for each degree, scheduling separate final oral examinations for each degree, and passing final oral examinations for each degree.

3. Such credit will be granted only for graded course work earned at Oregon State University and completed with a grade of B or higher.

Up to 15 graduate credits may be transferred toward a 45-credit master's degree. Up to 6 graduate credits may be transferred toward an 18-credit graduate certificate.

Graduate courses to be transferred to a doctoral degree program can be courses that were used to satisfy the graduate course requirements for a graduate certificate or a master's degree (or equivalent). Selected 700-level courses that have been deemed equivalent to graduate-level learning may be used on doctoral programs of study upon approval of the student's graduate committee. There is no limit on transfer credit toward the doctoral degree as long as the doctoral residence requirement is satisfied.

Credits earned in fulfillment of a graduate certificate program may be applied to a graduate degree, so long as they meet the appropriate standards for use in the degree and the criteria to transfer credit as defined herein. Courses completed for a degree program may likewise be applied toward a certificate program.

PREPARATION REQUIRED FOR GRADUATE MAJOR

Preparation for a graduate major is ordinarily an undergraduate major in the same subject, or a fair equivalent. Preparation for a graduate minor is ordinarily at least one year of upper-division work in addition to foundation courses in the subject.

Academic performance is not the sole criterion for admission to and continuation in certain courses and programs at the university, such as practicum courses and internships. The university may find it necessary to evaluate a person's background to determine his or her likelihood of maintaining standards of professional conduct necessary in the academic discipline or profession. An evaluation may consider current performance as well as past experiences and actions that could affect a student's ability to perform in the particular course or program.

Qualifying Examinations. Some departments and programs require graduate students working for advanced degrees to take oral and/or written examinations in their major and minor fields to determine overall preparation and background. The examination serves as a guidance examination, the results of

which are used in setting up the graduate study program. A poor showing in any area may result in a student's taking undergraduate courses without graduate credit to gain the necessary background to proceed with the graduate program. The examination usually is taken during the first quarter of graduate enrollment.

In lieu of their own qualifying examination, departments and programs may accept a satisfactory showing in the Graduate Record Examination (GRE), or some other standard test. Check with the anticipated major department or program to find out which exams are appropriate.

REGISTRATION REQUIREMENTS

Introduction

Full-time status as a graduate student is defined by the Oregon University System as enrollment in 9 credits per term. The maximum load for a full-time graduate student is 16 credits. A student may exceed this limit only with the approval of the Graduate School. Students receiving approval to exceed 16 credits will be assessed a per-credit overload fee.

Full-time status (i.e., a minimum of 9 credits per term) may be sufficient to qualify for purposes of veterans' benefits, visa requirements, external fellowships, and federal financial aid.

To assure full compliance with visa regulations, international students should consult with the Office of International Student Advising and Services (ISAS) for additional information about registration requirements.

Continuous Enrollment

I. Minimum Registration

Unless on approved leave of absence (see Section II), all graduate students in graduate degree and certificate programs must register continuously for a minimum of 3 graduate credits until their degree or certificate is granted or until their status as a credential-seeking graduate student is terminated. This includes students who are taking only preliminary comprehensive or final examinations or presenting terminal projects. Students must register for a minimum of 3 credits and pay fees if they will be using university resources (e.g. facilities, equipment, computing and library services, or faculty or staff time) during any given term, regardless of the student's location. If degree requirements are completed between terms, the student must have been registered during the preceding term.

Graduate students who have successfully completed all course and non-course requirements in accordance with diploma deadlines (see the Graduate School website) are not required to register during the subsequent term.

Nonthesis master's degree students who complete all degree requirements

during a term for which they are registered will not be required to register for the subsequent term.

Doctoral and thesis master's students who fail to meet all deadlines and complete all course and noncourse requirements during the term will be required to register for a minimum of 3 graduate credits during the subsequent term. However, only if library copies of the thesis have been submitted to the Graduate School within the first two weeks of the subsequent term and the thesis is the only outstanding requirement remaining for certification of the student's graduate degree may an exception to this rule be considered.

Graduate students who do not plan to make use of university facilities or faculty time during summer session are not required to register during the summer session and do not need to submit a Leave of Absence/Intent to Resume Graduate Study form. In such instances, summer session will not be counted within allowed leave of absence limits (see section II.c.). However, if students do plan to utilize facilities or faculty time during summer session, they must register for a minimum of 3 graduate credits.

It should be noted that graduate assistantship eligibility requires enrollment levels that supersede those contained in this continuous enrollment policy. Various agencies and offices maintain their own registration requirements that also may exceed those specified by this continuous enrollment policy (e.g., those of the Veterans Administration, Immigration and Naturalization Service for international students, and those required for federal financial aid programs.) Therefore, it is the student's responsibility to register for the appropriate number of credits that may be required for funding eligibility and/or compliance as outlined by specific agency regulations under which they are governed.

II. Leave of Absence

On-leave status is available to students who need to suspend their program of study for good cause. Students who desire a leave of absence will work with their major professor, program administrator, and the Graduate School to arrange authorized leave. Graduate programs that are designed such that the offering of courses and/or the conduct of research/scholarly work are not on a continuous term-to-term basis will work with the Graduate School to arrange planned leave. Students understand that while on leave they will not use university resources. Graduate faculty members are students' most important resource at the university and will work closely with graduate students to ensure timely completion of academic goals, understanding of the continuous gradu-

ate enrollment policy, and that graduate students enroll each term other than when they are on authorized leave. The Graduate School will assist graduate students and graduate faculty members with administrative procedures related to the continuous graduate enrollment policy. The Graduate School recognizes the diverse circumstances and unpredictability of graduate students' lives and will work in partnership with the graduate community in arranging leaves and responding to unanticipated situations.

A graduate student intending to resume active graduate student status following interruption of his or her study program for one or more terms, excluding summer session, must apply for regular or planned leave of absence to maintain graduate student standing in his or her degree program and to avoid registration for 3 graduate credits for each term of unauthorized break in registration (See Section IV below). Leave of Absence/Intent to Resume Graduate Study Forms must be received by the Graduate School at least 15 working days prior to the first day of the term involved. The time the student spends in approved on-leave status will be included in any time limits relevant to the degree (See Sections C.1. and C.2. below). Students in on-leave status may not a) use any university facilities, b) make demands upon faculty time, c) receive a fellowship or financial aid, or d) take course work of any kind at Oregon State University.

a. **Eligibility.** Only graduate students in good standing are eligible for leave of absence.

b. **Leave of Absence Categories**

1. **Regular.** Regular leave of absence is granted on a term-by-term basis in cases where the student demonstrates good cause (e.g. illness, temporary departure from the university for employment, family issues, financial need, personal circumstances). The student must indicate reason for on-leave status.

2. **Planned.** Planned leave of absence is granted to students for whom the design of their academic program is such that the offering of courses and/or the conduct of research/scholarly work are not on a continuous term-to-term basis. Planned leave of absence is set by the program with the approval of the Graduate School. (For a current list of planned leaves, consult the Graduate School at 541-737-4881.) Planned leave of absence includes students enrolled in summer-only programs and graduate students in other programs that have been pre-approved by the Graduate School for planned leave of absence.

Summer-only students and other students who qualify for planned leave of absence must:

- a. be in good standing,
- b. submit the Leave of Absence/Intent to Resume Graduate Status form indicating each term for which leave is requested, and
- c. complete all degree requirements within the time limits established in this catalog. Requests for multiple terms of leave may be submitted at one time.

3. **Family and Medical Leave.**

This leave is different from regular leave in that it is for 12 continuous weeks that may span multiple terms and must meet FMLA leave requirements as determined by the Office of Human Resources. See policy a http://oregonstate.edu/dept/grad_school/docs/Graduate-Student-Family-and-Medical-Leave-Policy.pdf.

d. **Limits**

1. **Regular Leave of Absence** is granted for a specified time period that may not exceed three terms, excluding summer session. In no case may regular on-leave status exceed the maximum listed below throughout the student's entire degree program.

a. **Master's Degree.** Master's degree students, except for summer-only students, may request a maximum of three academic terms of regular on-leave status during the course of study for the degree. The time spent in approved on-leave status will be included in the seven-year time limit for completing all requirements to the master's degree.

b. **Doctoral Degree.** Doctoral degree students may apply for a maximum of three academic terms of regular on-leave status prior to advancement to candidacy, and they may apply for a maximum of three academic terms of on-leave status after advancement to candidacy. The time spent in approved on-leave status will be included in the maximum five years that may elapse between the preliminary oral examination and the final oral examination.

2. **Planned Leave of Absence** is available for a maximum of nine terms, excluding summer session, to students enrolled in programs for which planned leave has been

approved by the Graduate School. However, time spent in planned on-leave status will be included in all time limits pertaining to the student's degree program.

3. **Family and Medical Leave** is available for 12 continuous weeks that may span multiple terms and must meet FMLA leave requirements as determined by the Office of Human Resources. These absences will be included in all time limits pertaining to the student's degree program. Contact the Graduate School for additional details.

d. **Approval.** Approval of the major professor, department/program chair, and graduate dean are required.

III. **Student Fees**

Students with approved on-leave status are not required to pay tuition or fees. However, students who must register as per section I, "Minimum Registration," must pay both tuition and student fees.

IV. **Unauthorized Break in Registration**

A graduate student who takes an unauthorized break in registration by failing to maintain continuous enrollment or by failing to obtain regular or planned leave of absence will relinquish his or her graduate standing in the university. Students who wish to have their graduate standing reinstated will be required to file an Application for Graduate Readmission, pay the readmission fee, and register for 3 graduate credits for each term of unauthorized break in registration. The readmission application must be approved by the student's major professor, department/school/program chair, and graduate dean. Acceptance back into a graduate program is not guaranteed even if the student departed in good standing. The petitioner for readmission will be required to meet university and departmental admission requirements and degree completion requirements that are in effect on the date of readmission. Review of the Application for Graduate Readmission may also result in a change of residency status from resident to nonresident.

When readmission is approved, the student must register for a minimum of 3 graduate credits for each term of unauthorized break in registration in addition to the minimum 3 credit registration required during the first term of reinstatement and each subsequent term until all degree requirements have been met except for any subsequent term of approved leave as provided in Section II of this policy. If the accumulated credits total more than 16, the student may be required to enroll in more than one term of increased registration.

V. Appeal

In the case of extraordinarily extenuating circumstances, students may appeal the provisions of the continuous graduate enrollment policy by submitting a detailed request in writing to the dean of the Graduate School for additional terms of leave of absence or forgiveness of additional credits of registration.

IMPLEMENTATION OF CONTINUOUS ENROLLMENT POLICY

All graduate students, including those enrolled prior to fall 2002, are subject to this policy, regardless of their original matriculation date.

All graduate students should be enrolled for a reasonable number of credits sufficient to represent their use of university space, facilities or faculty time.

REGISTRATION REQUIREMENTS FOR GRADUATE ASSISTANTS

In addition to the above registration requirements, the following requirements apply to graduate teaching assistants (GTA) and graduate research assistants (GRA).

As a condition of their academic appointments, graduate teaching and research assistants are required to register for 3 credits above the minimum full-time load (i.e., a minimum of 12 credits) each term of the appointment during the academic year (fall, winter, and spring.) During summer session, a minimum registration of 9 credits is required for graduate assistants. Audit registrations, course withdrawals, and enrollment in INTO OSU courses may not be used to satisfy enrollment requirements for graduate assistant salary/stipend, tuition remission, salary supplement or health insurance benefits. Tuition charges associated with INTO OSU enrollment are not covered under graduate assistant tuition remission.

GRADE REQUIREMENT

A grade-point average of 3.00 (a B average) is required: 1) for all courses taken as a degree-seeking graduate student, and 2) for courses included in the graduate degree or graduate certificate program of study. Grades below C (2.00) can not be used on a graduate program of study. A grade-point average of 3.00 is required before the final oral or written exam may be undertaken.

COURSE NUMBERS

Graduate Courses

All graduate courses will be designed around well-defined objectives or student learning outcomes, and instructional opportunities should be designed to help students achieve these outcomes. Student learning outcomes encompass the range of student attributes and abilities that

students should be able to demonstrate after successful completion of the course.

500-Level Courses

These courses are graduate courses offered primarily in support of graduate certificate or master's degree programs but which are also available for use on doctoral level degree programs.

Undergraduates of superior scholastic achievement may be admitted to these courses on the approval of the instructor, and they may, if admitted, under some conditions, use a limited number of these courses toward a graduate certificate or a graduate degree program. These courses have one or more of the following characteristics:

1. They require upper-division prerequisites in the discipline.
2. They require an extensive theoretical base in the discipline.
3. They increase or re-examine the existing knowledge or database of the discipline.
4. They present core components or important peripheral components of the discipline at an advanced level.

600-Level Courses

These are graduate courses offered principally in support of doctoral level instructional programs but also are available for use on graduate certificate or master's level degree programs. In addition to exhibiting the characteristics of 500-level courses, these courses typically require 500-level prerequisites and they build on and increase the information presented in 500-level courses.

OTHER COURSES:

700-Level Courses

These are advanced professional or technical courses that may be applied toward a first professional degree (e.g. DVM, PharmD). They make up the bulk of the course work for these professional degree programs. In general, these courses are not considered graduate-level courses, and may not be applied toward graduate certificate, master's level or doctoral level (PhD or EdD) degree programs. However, selected 700-level courses that have been deemed equivalent to graduate-level learning may be used on doctoral programs of study upon approval of the student's graduate committee.

800-Level Courses

These courses are in-service courses aimed at practicing professionals in the discipline. These courses have an in-service or retraining focus, and provide the professionals new ways to examine existing situations or new tools to treat existing problems. These courses generally have none of the characteristics of 500-level courses. They are not graduate-level courses, and they may not be applied to graduate certificate or graduate

degree programs nor to professional degree programs.

BLANKET-NUMBERED COURSES

Blanket-numbered courses have a zero middle digit. Those that carry graduate credit may be repeated up to the maximum totals indicated below.

- **Research** (501 or 601) is for research that is not part of the thesis. Data obtained from such research should not be incorporated into the thesis.
- **Thesis** (503 or 603) covers the thesis research and writing. A student may register for thesis credit each term.
- **Reading and Conference** (505 or 605) and **Projects** (506 or 606) are used for special work not given under a formal course number.
- **Seminar** (507 or 607) is used both for departmental seminars and for special group work not given in a formal course.
- **Workshop** (508 or 608) is usually a special, short-term course covering a variety of topics.
- **Practicum** (509) is used for courses whose emphasis is the application of academic theory to the work environment.

No more than 9 credits of blanket-numbered courses, other than thesis (or research-in-lieu-of-thesis for nonthesis programs), may be applied toward the minimum 45-credit master's degree. While internship credit (510) is not considered a blanket-numbered course, no more than 6 credits of internship may be applied toward a 45-credit master's degree. The internship credit limit is in addition to the 9-credit blanket-hour limit.

No more than 15 blanket-numbered credits may be applied toward the minimum 108-credit doctoral program.

No more than 3 credits of blanket-numbered courses in each field of study may be used in the MAIS program; thesis credits or research paper credits are exempt from this limitation.

Blanket-numbered transfer courses will count toward the maximum totals specified above.

COURSES GRADED ON NONSTANDARD BASIS

Graduate students may elect to take courses on an S/U basis only if those courses are not in their graduate certificate or graduate degree program or are not required for the removal of deficiencies. Graduate students may use courses taken at OSU on a P/N basis in their graduate certificate or graduate degree programs.

4XX/5XX COURSES

No more than 50% of courses USED for a graduate program of study may be the

500-level component of a dual-listed course. Courses bearing dual-listed numbers (400/500) must provide students who are enrolled for 500-level credit with graduate-level learning.

Expectations for learning outcomes in the graduate component of dual listed (400/500 level) courses are the same as for stand-alone 500-level courses. A distinction should be made between learning outcomes for students taking the course for undergraduate credit (400 level) and those taking the course for graduate credit (500 level). In most cases this distinction should include emphasis on developing skills in analysis, synthesis, and/or evaluation for the 500-level credit. The different student learning outcomes should be accompanied by appropriate differences in instructional opportunities and evaluation procedures.

REPEATING 4XX/5XX COURSES

A graduate student who has taken a 4xx course may not normally include the corresponding 5xx course on his or her graduate program.

REMOTE ACCESS FOR GRADUATE COMMITTEE MEETINGS

It is generally expected that all members of graduate committees should be physically present at all required graduate committee meetings (i.e., program meetings, preliminary examinations, and final examinations). However, it is permissible for the student, and/or committee members to participate from a remote location provided the conditions listed below are met:

- Advance agreement of the student and all committee members has been obtained;
- All participants join in with two-way audio and video connections; audio-only connections must be approved by the major professor if the video connection is not possible. When the student is the remote participant, his or her connection must be an audio and video connection;
- Any visual aids or other materials have been distributed in advance to the remote participants;
- The committee members participate in the complete meeting, discussion, presentation, and evaluation; and
- The student is responsible for making arrangements.

PETITIONS

A student wishing to deviate from normal Graduate School regulations and procedures may submit a request and the reasons for it to the Graduate School in a letter signed by the student and his or her major professor. In reaching a

decision, the Graduate School may seek advice from the Graduate Council. The student will be advised of the decision when it has been made. Action taken on a petition will not be considered precedent for future action.

DIPLOMA APPLICATION

Graduate students wishing a printed diploma must complete a Diploma Application form. This form should be submitted prior to taking the final examination, indicating the term the student intends to graduate.

INSTITUTIONAL REVIEW BOARD APPROVAL OF HUMAN SUBJECTS RESEARCH

It is Oregon State University policy that the OSU Institutional Review Board (IRB) must review all research that involves human subjects. The results from studies conducted without obtaining IRB review and approval may not be published or widely distributed, nor can such data be used to satisfy honors thesis, master's thesis or doctoral dissertation requirements.

The requirements for IRB review of research involving human subjects is based upon research ethics and federal law, and the implications of conducting human subjects research without IRB approval are significant. Failure to follow this policy places both the individual and the institution at risk: the individual may be subject to university sanctions and/or incur personal liability for negligence and harm; the university could lose access to federal funding or be forced to cease all human subjects research. For more information, please send an email to irb@oregonstate.edu or visit the IRB website at <http://oregonstate.edu/research/irb/>.

GRADUATE WORK BY FACULTY MEMBERS

Oregon Administrative Rule (OAR) 580-020-0005 specifies that one may not simultaneously be an Oregon University System (OUS) faculty member and an OUS graduate student. This policy pertains to all OSU faculty members (both ranked and professional), is consistent with practices at most universities, and is in keeping with recognized appropriate graduate education practice.

Although faculty members are eligible to enroll for courses at staff fee rates, such course work may not be applied to a graduate certificate or graduate degree without prior approval from the graduate dean.

GRADUATE STUDENT TEACHING

Students working toward graduate certificates or advanced degrees are not permitted to teach graduate courses.

GRADUATE APPOINTMENTS

Some graduate assistants may be represented by the Coalition of Graduate Employees, American Federation of Teachers Local 6069 (CGE). For these graduate assistants, terms and conditions of employment for service not performed as a requirement for their degrees are prescribed in the collective bargaining agreement between OSU, OUS, and CGE. The CGE contract can be found on the OHR website at <http://oregonstate.edu/hr/ercc/gradstud>.

Persons interested in assistantships should write directly to the department program concerned.

To qualify for appointment as a graduate assistant the student must:

- Be a regularly admitted, conditionally admitted, or provisionally admitted graduate student at Oregon State University (i.e., not a graduate nondegree-seeking, postbaccalaureate student, or PharmD or DVM student).
- Be enrolled as a full-time degree-seeking graduate student at Oregon State University, completing a minimum of 12 credits of instruction each term (9 credits during summer session). Audit registrations, course withdrawals, and enrollment in INTO OSU may not be used to satisfy these minimum enrollment requirements.
- Be making satisfactory progress toward an advanced degree.

Graduate assistants may be appointed on an academic term basis, an academic-year basis (nine months) or a full-year basis (12 months). No appointment can be for less than .20 FTE or more than .49 FTE per term. A graduate assistant on less than .49 FTE may take on extra duties; however, **the total stipend plus salary from all sources within the Oregon University System may not exceed the equivalent of .49 FTE for any term.**

All graduate assistants are required to provide duties to OSU to justify their stipends. Teaching assistants are expected to provide duties related to the university's instructional program (e.g., teaching laboratories or discussion sections, grading papers, advising). Research assistants provide duties related to the research function of the university. Whatever the type of appointment, the graduate assistant should be regarded as a student providing service as part of a learning experience rather than as an employee whose education is secondary.

The work schedule and the duties to be performed by the graduate assistant shall be established by the department or program sponsoring the assistantship.

Graduate assistants must register for and complete a minimum of 12 credits of instruction each term except during

summer session, when a minimum of 9 credits is required. Audit registrations, course withdrawals, and enrollment in INTO OSU courses may not be used to satisfy these minimum enrollment requirements. (See section on 'Registration Requirements for Graduate Assistants' for complete details.)

Persons interested in assistantships should write directly to the department or program concerned.

INTERNATIONAL GRADUATE TEACHING ASSISTANT ENGLISH LANGUAGE REQUIREMENT

If the Graduate School determines that an applicant or current student's native language is not English, the proposed IGTA is required to take the Internet Based TOEFL (iBT) test before being appointed as a graduate teaching assistant. (Students who matriculated prior to Winter 2010 are exempt from this policy.)

Potential IGTA's scoring below 22 on the speaking section of the iBT can be appointed, but will be required to undertake further English language training.

If a department wishes to offer a student with an iBT speaking score of 18 to 21 an assistantship, the unit must:

- a. Affirm that the graduate student will be enrolled in IEPA 098NC Communication for IGTA's (with the unit paying the cost of this training).
- b. If at all possible, assign the graduate student assignments (such as paper grading, reagent preparation, etc.) that do not require personal contact with undergraduate students.
- c. If (b) above is not possible, and if possible, pair the IGTA in the laboratory or classroom with another TA who is a native speaker of English.
- d. Monitor the quality of IGTA performance using student evaluations and the evaluations of the supervising professors. The unit will document for each student the results of their evaluation of the student's performance as a GTA.

If the unit agrees to meet these conditions, the IGTA appointment can be made.

The scheduling of IEPA 098NC will be coordinated with the units so that students can attend the course and conduct teaching assistantship duties. Please check the OSU online schedule of classes for confirmation of the time and date:

<http://catalog.oregonstate.edu/CourseDetail.aspx?subjectcode=IEPA&coursenumber=098NC>

Students with an iBT speaking score of less than 18 cannot be assigned teaching assistantships.

DISMISSAL FROM GRADUATE SCHOOL

Advanced-degree students (regularly, conditionally, and provisionally admitted) are expected to make satisfactory progress toward a specific academic degree. This includes maintaining a GPA of 3.00 or better for all courses taken as a graduate student and for courses included in the graduate program, meeting departmental or program requirements, and participating in a creative activity such as a thesis.

If a student is failing to make satisfactory progress toward an academic degree, as determined by the major department/program or the Graduate School, the student may be dismissed from the Graduate School.

Any doctoral student who fails the preliminary oral examination with a committee recommendation that the student's work toward this degree be terminated may be dismissed from the Graduate School.

Any student who fails a final oral examination may be dismissed from the Graduate School.

Academic dishonesty and other violations of the Student Conduct Code may serve as grounds for dismissal from the Graduate School.

STUDENT CONDUCT REGULATIONS

Graduate students enrolled at Oregon State University are expected to conform to basic regulations and policies developed to govern the behavior of students as members of the university community. The regulations have been formulated by the Student Conduct Committee, the Student Activities Committee, the university administration, and the State Board of Higher Education. Violations of the regulations subject a student to appropriate disciplinary or judicial action. The regulations and the procedures for disciplinary action and appeal are available via the Office of Student Conduct and Community Standards website at <http://oregonstate.edu/studentconduct/>.

GRIEVANCE PROCEDURE

All students desiring to appeal matters relating to their graduate education should request a copy of Grievance Procedures for Graduate Students at Oregon State University from the Graduate School. These procedures are also available on the Web at http://oregonstate.edu/dept/grad_school/grievance.php. Graduate assistants whose terms and conditions of employment are prescribed by the collective bargaining agreement between OSU, OUS, and the Coalition of Graduate Employees, American Federation of Teachers Local 6069 should also refer to that document.

POLICIES GOVERNING GRADUATE CERTIFICATE PROGRAM

GENERAL REQUIREMENTS

The Graduate Certificate Program at Oregon State University is a structured progression of graduate-level courses that constitute a coherent body of study with a defined focus within a single discipline or a logical combination of disciplines. It is designed for a student who has completed a baccalaureate degree and is in pursuit of advanced-level learning. Graduate certificates reflect the educational mission of the university. Students desiring a graduate certificate must be admitted to the university as a credential-seeking graduate student, but are not required to be on track for a specific degree. There is no formal committee requirement for graduate certificates. Certificate students are subject to all general policies governing the courses for the master's degree.

GRADUATE CERTIFICATE STUDY PROGRAM

The graduate certificate curriculum consists of a minimum of 18 graduate credits, and may include a final project, portfolio, or report for integration of the sequence of course materials. All graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone credits. The remaining credits may be the 500 component of 400/500 slash courses. No final examination is required.

TIME LIMITS

Courses completed no more than seven years prior to the graduate certificate award may be used to satisfy certificate requirements.

FINANCIAL AID ELIGIBILITY

Students enrolled in only graduate certificate programs may qualify for federal loan and work-study financial aid. Students must complete the federal FAFSA form to begin the financial aid application process.

POLICIES GOVERNING MASTER'S DEGREE PROGRAMS

GENERAL REQUIREMENTS

All master's degree programs require a minimum of 45 graduate credits including thesis (6 to 12 credits) or research-in-lieu-of-thesis (3 to 6 credits). Exceptions to this capstone requirement are specified under the degree descriptions that follow these universal master's degree requirements. Effective fall 2005, all graduate

student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses. General regulations for all master's programs are cited here, with certain exceptions provided for master's degrees in the professional areas listed on the following pages.

All master's students must:

- Conduct research or produce some other form of creative work, and
- Demonstrate mastery of subject material, and
- Be able to conduct scholarly or professional activities in an ethical manner

The assessment of these outcomes and the specification of learning objectives related to these outcomes are to be carried out at the program level.

RESIDENCE REQUIREMENTS

The residence requirement for the master's degree is 30 graduate Oregon State University credits after admission as a degree-seeking graduate student. These 30 graduate credits must appear on the master's degree program. (This does not include credits reserved as an undergraduate or postbaccalaureate student, credits taken as a postbaccalaureate or graduate nondegree-seeking student, nor transfer courses.) Deviation from the residence requirement requires a petition to the Graduate School.

LANGUAGE REQUIREMENTS

For the master of arts degree, the student must show foreign language proficiency (including American Sign Language) equivalent to that attained at the end of a second-year university course in that language with a grade of "C" (2.00) or better. English is not considered a foreign language for purposes of this requirement. There is no language requirement for the Master of Arts in Interdisciplinary Studies degree. For other master's degrees, there is no foreign language requirement unless a language is required in the individual student's program. The foreign language requirement for the MA degree must be completed before the student takes the final oral examination for the degree.

GRADUATE STUDY PROGRAM

A regular master's degree student must complete a plan of study in consultation with an advisor/advisory committee before completing 18 graduate credits. This includes credits reserved as an undergraduate or postbaccalaureate student and credits earned as a postbaccalaureate, graduate nondegree-seeking student, or graduate student.

Students who wish to transfer credit must submit a Transfer Credit Request form before the end of their first year of study.

The final plan of study must be submitted to the Graduate School at least 15 weeks prior to the date of the student's final examination.

Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.

If a minor is declared, approximately two-thirds of the work (30 graduate credits) should be listed in the major field and one-third (15 graduate credits) in the minor field. In such cases, the student's advisory committee must include a member from the minor department.

The program is developed under the guidance of the major professor, and minor professor when a minor is included, and signed by those professors and the chair of the academic unit before filing in the Graduate School. Each candidate's program should include substantial work with at least three faculty members offering graduate instruction. Changes in the program may be made by submitting a Petition for Change in Program form, available in the Graduate School.

TIME LIMIT

All work toward a master's degree, including transferred credits, course work, thesis (if required), and all examinations, must be completed within seven years.

THESIS

When scheduling their final oral examinations, thesis option master's students are required to submit the pretext pages of their thesis to the Graduate School at least two weeks prior to the final oral examination. Pretext pages include the abstract, copyright, title page, approval page, acknowledgment page, contribution of authors, table of contents, list of figures, tables, appendices, dedication (optional), and preface (optional). It is expected that students will distribute examination copies to all their committee members, including the Graduate Council representative, sufficiently early to permit thorough review of the thesis prior to the student's final oral examination.

Within six weeks after the final oral examination or before the first day of the following term, whichever comes first, upload one PDF copy of your thesis, without signatures, electronically to ScholarsArchive and submit the signed ETD submission approval form with a copy of the title page to the Graduate School. If final submission requirements are after the initial six-week period, the

student may be subject to re-examination. Please refer to the Graduate School's website for complete details (<http://gradschool.oregonstate.edu/success/thesis-guide>).

Signatures on the ETD submission approval form can be electronic, signed, scanned and emailed or faxed. The thesis will not be accepted for graduate requirements until it has received approval by the graduate dean, which the thesis editor will get.

Full information concerning the prescribed style for theses is given in the booklet, Thesis Guide: Preparing a Thesis or Dissertation at OSU, available on the Web at <http://gradschool.oregonstate.edu/success/thesis-guide>.

The results from studies conducted using human subjects without obtaining Institutional Review Board approval shall not be used to satisfy master's thesis or doctoral dissertation requirements. For more information, please send an email to irb@oregonstate.edu or visit the IRB website at <http://oregonstate.edu/research/irb/>.

The credit allowed for the thesis, including research and preparation of the manuscript, varies from 6 to 12 credits. In certain departments and programs, the MS or MA thesis is optional, to be determined in each case by the department/school/program and the major professor. See departmental descriptions.

FINAL EXAMINATION

Successful completion of a final oral examination is required for all master's degrees with the exception of students who complete the nonthesis option under the EdM degree. In those cases, nonthesis EdM students must take a final written examination. Some departments also require the student to pass a written exam prior to the oral exam.

The final oral examination for master's candidates may, at the discretion of the graduate program, consist of a public thesis defense followed by a closed session of the examining committee with the candidate. Under normal circumstances, the final oral examination should be scheduled for two hours.

For master's candidates whose programs require a thesis, not more than half of the examination period should be devoted to the presentation and defense of the thesis; the remaining time can be spent on questions relating to the student's knowledge of the major field, and minor field if a minor is included in the program of study. Graduate faculty serving on thesis-oriented master's degree programs may contribute to the direction of the student's thesis, will assess the student's thesis and his or her defense of it in the final oral examination, will vote to pass or fail the student, and may sign the thesis when it is in acceptable final form.

The examining committee consists of at least four members of the graduate faculty—two in the major field, one in the minor field if a minor is included, and a Graduate Council representative. When a minor is not included, the fourth member may be from the graduate faculty at large. All members of the student's graduate committee must approve the scheduling of the final examination.

Students writing a thesis must have a Graduate Council representative on their committee. It is the student's responsibility to obtain his or her own Graduate Council representative from a list provided by the Graduate School. This must be done prior to scheduling the final exam.

When no thesis is involved, not more than half of the examination period should be devoted to the presentation of the research project; the remaining time can be spent on questions relating to the student's knowledge of the major field, and minor field if one is included in the program. For nonthesis master's degree programs, the major professor is responsible for directing and assigning a final grade for the research or culminating project. Other members of the nonthesis committee will assess the student's defense of the project in the final oral examination, as well as the student's knowledge of his or her field, and vote to pass or fail the student. The examining committee consists of three members of the graduate faculty—two in the major field and one in the minor field if a minor is included. When a minor is not included, the third member may be from the graduate faculty at large.

MASTER OF AGRICULTURE

The Master of Agriculture (MAG) degree requires a student to attain advanced knowledge and achievement integrated across three fields of study. Two of the three fields must be chosen from the approved graduate majors or minors offered within the College of Agricultural Sciences or closely related areas. Any graduate major or minor may serve as the third field for this degree. With appropriate justification, each of these three fields may contain integrated components.

A minimum of 45 credits is required for the degree with a minimum of 24 credits outside of the major. The program of study will include a major field and two minor fields. The major field must be in the College of Agricultural Sciences and contain a minimum of 12 credits (excluding research or thesis credit). Students have the option of a research paper (3–6 credits) or thesis (6 credits). Each minor field must contain a minimum of 9 credits. No more than 9 blanket-numbered credits are to be contained in the program, excluding research paper or thesis.

The program is administered by the academic department of the major field and requires the department head's signature. The student's committee will consist of a representative from the major and each minor field. A Graduate Council representative will serve on thesis programs. The committee will meet prior to the end of the student's second quarter in the program to approve the student's program of study and proposal. The proposal will include the student's academic/professional background, intended occupational/educational destination, and rationale for the course combinations. A final oral examination is required and may include questions from both the course work and the research paper or thesis.

MASTER OF ARTS IN INTERDISCIPLINARY STUDIES

The Master of Arts in Interdisciplinary Studies (MAIS) degree is granted for attainment of broad, advanced knowledge and achievement integrated from three fields of study. Most graduate majors or minors may serve as a field for this degree. The current list of approved majors is at <http://catalog.oregonstate.edu/MajorDetail.aspx?id=333>. Two of the three fields may be from one department if the areas of concentration within these two fields are different. A minimum of 9 credits in each of the three fields of study is required. The degree requires a minimum of 49 credits, including 4 credits of course work on interdisciplinary research methods.

No more than 21 credits (excluding thesis or research paper credit) may be taken in any field unless the total program exceeds 49 credits. There is no foreign language requirement. No more than 3 credits of blanket-numbered courses in each field of study may be used in the program; thesis credits (Option A) or research paper credits (Option B) are exempt from this limitation. The student's committee consists of four members of the graduate faculty—one from each of the three fields—and a Graduate Council representative. A formal program meeting must be held prior to the completion of 18 graduate credits. A final oral examination is required.

Two options under the program:

Option A: Thesis option. The thesis must coordinate work in the three fields. The requirement is 6 to 9 credits of Thesis 503. The thesis advisor must be a member of the graduate faculty authorized to direct theses.

Option B: Research paper option. The research paper must integrate work from at least two of the three fields. The requirement is 4 to 7 credits, registered as Research 501, Reading and Conference 505, or Projects 506.

MASTER OF ARTS IN TEACHING (MAT)

The Master of Arts in Teaching is an intensive professional degree program intended to prepare teachers for careers in public school education. Students who successfully complete the MAT can be recommended for the Oregon basic teaching license upon the positive evaluations of the university and public school supervisors.

The professional program in teacher education is full-time and one calendar year in length. Students will enroll with their subject area cohort group and complete the program in one year. Teacher licensure is offered in the following areas:

- Advanced Mathematics Education
- Agricultural Education
- Biology Education
- Chemistry Education
- Elementary Education
- Family and Consumer Sciences Education
- Integrated Science Education
- Language Arts Education (English) — *Cascades Campus only*
- Music Education
- Physics Education
- Spanish Education

The professional teacher education program begins with a 15-credit professional education core that is foundational to and a prerequisite for the 48-credit Master of Arts in Teaching degree. The 48-credit MAT includes a professional education concentration (3 credits), professional course work in the teaching specialty (18 to 21 credits), a public school professional internship (15 to 18 credits), and a minimum of 9 graduate credits in the subject matter specialization (mathematics, physics, literature, etc.). Because the professional teacher education program is a two-part program, including the professional core and the MAT, future students may plan their programs as either five-year (with a nine-month MAT) or as fifth year programs (with 12 months of graduate study including both the professional core and the MAT).

The MAT degree requires successful completion of a final oral examination.

MASTER OF BUSINESS ADMINISTRATION

The MBA program represents a broad, yet responsive general management education with an entrepreneurial focus that crosses the functional disciplines of business. Its advanced management emphasis and entrepreneurial focus creates practical value-added content for all students, both business and nonbusiness undergraduates, enabling them to solve complex business problems and successfully compete in the business marketplace.

The MBA program is concentrated in length—three academic terms for full-

time students with a BA/BS in business or who have completed the foundation courses. Full-time students with no previous business or business-related course work can complete the program in as few as six terms. The MBA degree requires no thesis. A final oral examination is required.

MASTER OF BUSINESS ADMINISTRATION AND ACCOUNTANCY

The Master of Business Administration and Accountancy is a one-year master's program for students with an undergraduate degree in accounting. It allows accounting students to receive an undergraduate degree and a master's degree during their five years of university study required to become a CPA. As an integrated program, the MBAA is designed to allow students the opportunity to plan early enough in their accounting education program to enable them to receive both an undergraduate degree and a graduate degree. The MBAA is also designed to accommodate postbaccalaureate students wishing to prepare for accounting careers.

MASTER OF EDUCATION

The Master of Education (EdM) is a professional degree requiring a minimum of 45 credits in graduate courses (including a maximum of blanket-numbered courses); additional credits may be required in some areas of concentration. A minimum of 9 additional credits in graduate courses is required for the master's degree in College Student Services Administration (CSSA).

The EdM degree requires successful completion of a final written examination.

A candidate for the EdM degree qualifies for the degree under one of these options:

1. The student submits a thesis that meets all standards for a master's thesis on some applied or professional aspect of education. For the thesis the student receives 6 credits. He or she must complete a major of 24 credits (which may include the 6 thesis credits) and 21 elective credits determined under the direction of an advisor.
2. For adult education, the student completes 30 credits in the major and at least 15 credits in the minor. The minor may be completed either inside education or from approved minors outside education and serves students focusing on training and development and developmental education.
3. The student completes 45 credits with 24 credits in specific courses for the major. No minor is identified. The remaining 21 credits are elective

under the direction of an advisor. No thesis or field studies are required. This option is designed primarily for in-service teachers working on standard licensure.

4. The student majors in College Student Services Administration and completes at least 39 credits in the major and 15 credits in a minor for a minimum of 54 credits.

MASTER OF ENGINEERING

The Master of Engineering (MEng) degree is designed to provide students the opportunity to pursue advanced-level study in a field of engineering. The degree is concerned with application of specialized, graduate-level engineering and managerial knowledge to specific engineering disciplines. The degree is a course work-only degree, with the option of substituting research or internship credits for a few courses. No thesis or project is required.

The MEng program requires a minimum of 45 credits. The examining committee consists of a minimum of three members of the graduate faculty in the engineering specialization. A final oral examination is required.

MASTER OF FINE ARTS

The Master of Fine Arts is an appropriate terminal degree for those who wish to teach in creative, performing, and studio arts in higher education. The MFA in Creative Writing is a program that helps students define and advance their literary ambitions and develop their skills as artists and teachers. Students will be introduced to three broad areas of knowledge within the field of creative writing that they need in order to become successful writers, editors, or teachers. These areas involve writing, reading, and marketing skills within contemporary literary fiction, poetry, and nonfiction. The degree requires a minimum of 60 credits comprised of 24 credits in creative writing workshops, 24 credits in literature and/or composition and rhetoric and one course emphasizing literary roots, and 12 credits in thesis and/or writing and conference. All MFA candidates are required to complete a thesis, which is to be a sustained piece of imaginative writing of literary merit. A final oral examination is required.

MASTER OF FORESTRY

The professional Master of Forestry degree is intended for potential administrators and professional forestry specialists in public and private organizations where persons of broad ability are demanded and a broad technical education is needed. The degree requires a minimum of 45 credits. At least 21 credits are to be selected from a series of designated courses within the College

of Forestry. As many as 24 credits may be elected from other courses offered by the college or university according to guidelines set forth in the program descriptions prepared by each department. The electives must contribute to a unified program that will meet the objectives of the student. A thesis is not required, but a technical report on an approved topic, correlated with courses in the major field, must be submitted. A final oral examination is required.

MASTER OF HEALTH PHYSICS

The Master of Health Physics degree is designed to be a professional, advanced graduate degree that emphasizes fundamental learning and professional development for those wishing the master's credential, but not requiring a research focus for their planned profession. The degree directs students toward professional licensing as a certified health physicist in the field of radiation protection. The program will consist of a minimum of 45 graduate credits, with 30 graduate credits in the major, and 15 elective graduate credits. A final oral examination is required.

MASTER OF MEDICAL PHYSICS

The Master of Medical Physics (MMP) degree prepares the graduate for a professional career in applied medical physics, focused on practical hands-on experience. The MMP program is designed as a clinical specialization for individuals with an undergraduate degree in science or engineering, offering areas of concentration in therapeutic radiologic physics or medical health physics. The degree requires a minimum of 45 graduate credits, including 30 graduate credits within the major and 15 elective graduate credits. The program does not require a thesis, however, candidates are required to pass a final oral examination.

MASTER OF NATURAL RESOURCES

The Master of Natural Resources (MNR) degree is designed to engage university scientists and world-wide natural resource professionals in a process that integrates diverse perspectives to address natural resource challenges at the state, regional, national, and international levels. The program is intended for individuals with at least two years of experience in natural resource disciplines who seek an advanced degree in natural resource management. The MNR curriculum, consisting of 45 credits, is organized into three sections: core (18 credits), area of emphasis (18 credits), and capstone project (9 credits). It is taught as a distance, online curriculum, although it may be possible for some students to work toward the MNR degree while in residence at Oregon State University. The

MNR degree is offered as a non-thesis option only. A final oral examination is required.

MASTER OF PUBLIC HEALTH

The Master of Public Health (MPH) degree program combines broad training in public health with specific training in one of the specialty tracks offered by the three participating universities: Oregon Health and Science University, Oregon State University, and Portland State University.

The MPH program is designed for persons who already have a bachelor's degree and who wish to obtain further formal education in the field of public health. Persons with experience in the health field or who have training in a specialized area of health may increase their knowledge regarding population-based health to prepare them for expanded administrative and service careers. Persons who do not have prior experience in health fields may prepare themselves for a broad variety of careers depending upon their choice of specialty track.

The Master of Public Health degree is offered by Oregon State University with concentrations in biostatistics; environment, safety and health; epidemiology; health management and policy; health promotion; health promotion and health behavior; international health.

Students who are admitted to a track are able to take core courses at any one of the participating universities through joint campus registration and have them count as resident courses.

The MPH program consists of 16 credits of core courses, plus additional units of required and elective courses, an internship, and a thesis or nonthesis project depending upon the specific track. Programs are approximately 60 credits in length. All students will be required to take a final oral examination as determined by their specific track.

MASTER OF PUBLIC POLICY

The Master of Public Policy is a professional degree intended to prepare students for careers in the public, non-profit, and international sectors and offer training for in-service students desiring professional growth and advancement. The degree is designed to be a generalist program, with an emphasis on analytic skills and policy knowledge. The degree requires a minimum of 62 graduate credits, 44 of which are in the required core. The core curriculum provides an important foundation in statistics, research methods, computer applications, public policy analysis, public administration and ethics, and economics. The remaining 18 credits support the student's preferred area of concentration, consisting of environmental policy,

international policy, rural policy, science policy, or social policy. Students with little work experience in public service, the nonprofit sector, or the international context will be required to engage in a supervised internship that will allow them to work closely with experienced mentors who will help them integrate theory with practice and introduce them to a professional network. Students with relevant work experience will substitute course work for internship credits. A final oral examination is required.

PROFESSIONAL SCIENCE MASTER'S DEGREE (PSM)

The Professional Science Master's (PSM) allows students to pursue advanced training in science while simultaneously developing workplace skills highly valued by employers. PSM programs consist of two years of academic training in an emerging or interdisciplinary area in science, along with a professional component that includes internships and "cross-training" in workplace skills, such as business, communications, and regulatory affairs. All have been developed in concert with employers and are designed to dovetail into present and future professional career opportunities.

The Professional Science Master's Degree (PSM) is offered with five graduate majors:

1. Applied Biotechnology
2. Applied Physics
3. Applied Systematics in Botany
4. Environmental Sciences
5. Fisheries and Wildlife Administration

For further information, contact Barbara Taylor, PhD, Director, Molecular and Cellular Biology, 3021 Agricultural and Life Sciences Building, 541-737-3799, taylorb@science.oregonstate.edu and milimag@cgrb.oregonstate.edu and Kirstin Carroll, PhD, 3029 Cordley Hall, 541-737-5259, kirstin.carroll@oregonstate.edu, Oregon State University, Corvallis, OR 97331.

POLICIES GOVERNING DOCTORAL DEGREE PROGRAMS

GENERAL REQUIREMENTS

The doctor of philosophy degree is granted primarily for creative attainments. There is no rigid credit requirement; however, the equivalent of at least three years of full-time graduate work beyond the bachelor's degree (at least 108 graduate credits) is required. Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses. After admission into the doctoral program, a

minimum of one full-time academic year (at least 36 graduate credits) should be devoted to the preparation of the thesis. The equivalent of one full-time academic year of regular non-blanket course work (at least 36 graduate credits) must be included on a doctoral program.

As a result of successfully completing the requirements toward the PhD, students shall: (a) produce and defend an original significant contribution to knowledge; (b) demonstrate mastery of subject material; and (c) be able to conduct scholarly activities in an ethical manner. Additional outcomes, the assessment of all outcomes and the specification of learning objectives related to these outcomes are to be carried out at the program level.

GRADUATE STUDY PROGRAM

The student's doctoral study program is formulated and approved subject to departmental policies at a formal meeting of his or her doctoral committee, which consists of a minimum of five members of the graduate faculty, including two from the major department and a representative of the Graduate Council. If a minor is declared, it must consist of at least 18 credits (15 credits for an integrated minor) and the committee must include a member from the minor department. All committee members must be on the graduate faculty with appropriate authorization to serve on the student's committee.

The student must be registered for a minimum of 3 credits for the term in which the program meeting is held. When the program is approved by the doctoral committee, the departmental chair, and the dean of the Graduate School, it becomes the obligation of the student to complete the requirements as formulated. Changes in the program may be made by submitting a Petition for Change of Program form available in the Graduate School.

Selected 700-level courses that have been deemed equivalent to graduate-level learning may be used on doctoral programs of study upon approval of the student's graduate committee.

No more than 15 credits of blanket-numbered courses, other than thesis, may be included in the minimum 108-credit program.

A regular graduate student who holds a master's degree must complete a plan of study in consultation with their advisory committee by the end of one calendar year of enrollment as a doctoral student.

A regular graduate student who does not hold a master's degree must complete a plan of study in consultation with their advisory committee by the end of the fifth quarter of enrollment as a doctoral student.

Students who wish to transfer credit must submit a Transfer Credit Request form before the end of their first year of study.

The final plan of study must be submitted to the Graduate School six weeks before the student's oral preliminary examination.

RESIDENCE

For the doctoral degree, the residence requirement consists of two parts:

1. a minimum of 36 graduate Oregon State University credits must be completed; and
2. the student must spend at least three terms of full-time graduate academic work (at least 9 credits per term) on campus or at an off-campus site approved by the Graduate School. The latter requirement of three terms of full-time enrollment does not have to take place in consecutive terms.

Adequate fulfillment of the residence requirement shall be determined by the Graduate School.

LANGUAGE REQUIREMENTS

The foreign language requirement is determined by the student's doctoral committee, subject to the same approval required for the graduate study program, and is so designated in the official doctoral program. Foreign language requirements must be completed before the oral preliminary examination.

PRELIMINARY EXAMINATIONS

The student working toward a doctoral degree must pass a comprehensive preliminary examination. The purpose of this exam is to determine the student's understanding of his or her major and minor fields and also to assess the student's capability for research. Students must enroll for a minimum of 3 credits during terms in which they undertake departmental written or oral preliminary examinations.

WRITTEN COMPREHENSIVE EXAMINATION

Most programs require a written comprehensive examination to be taken before the oral preliminary examination. If a written examination is required, it must be completed prior to the oral preliminary examination. The content, length, timing, passing standard, and repeatability of this examination are at the discretion of the major department. The general rules and structure of this examination, however, must be provided in writing to all candidates for this examination and a current copy of these guidelines must be on file with the Graduate School. Copies of the written examination (questions and student's answers) must be available to all members of the student's doctoral committee at

least one week prior to the oral preliminary examination.

ORAL PRELIMINARY EXAMINATION

The oral preliminary examination is taken near the completion of the student's course work. The oral examination is conducted by the student's doctoral committee, and should cover the student's knowledge in his or her major and minor subjects. The exam may cover the student's proposed research topic, although no more than one-half the time should be devoted to specific aspects of the proposal. The examination should be scheduled for at least two hours, and the exam date must be scheduled in the Graduate School at least one week in advance. If more than one negative vote is recorded by the examining committee, the candidate will have failed the oral examination. No more than two re-examinations are permitted by the Graduate School, although academic units may allow fewer re-examinations.

At least one complete academic term must elapse between the time of the preliminary oral examination and the final oral examination. If more than five years elapse between these two examinations, the candidate will be required to take another preliminary oral examination.

THESIS

Each candidate for the PhD degree must submit a thesis embodying the results of research and giving evidence of originality and ability in independent investigation. The thesis must be a real contribution to knowledge, based on the candidate's own investigation. It must show a mastery of the literature of the subject and be written in creditable literary form. The preparation of an acceptable thesis will require at least one full-time academic year. The booklet, *Thesis Guide: Preparing a Thesis or Dissertation at OSU*, is available electronically on the Web at <http://gradschool.oregonstate.edu/success/thesis-guide>.

The results from studies conducted using human subjects without obtaining Institutional Review Board approval shall not be used to satisfy master's thesis or doctoral dissertation requirements. For more information, please send an email to irb@oregonstate.edu or visit the IRB website at <http://oregonstate.edu/research/irb/>.

A formal thesis proposal meeting is recommended but not required by the Graduate School; however, it is required for some majors. This meeting should be held with the student's doctoral committee prior to the start of any substantial doctoral thesis research.

When scheduling their final oral examinations, doctoral students are required to submit the pretext pages of

their dissertations to the Graduate School at least two weeks prior to the final oral examination. Pretext pages include the abstract, copyright (optional), title page, approval page, acknowledgment page, contribution of authors, table of contents, list of figures, tables, appendices, dedication (optional), and preface (optional). It is expected that students will distribute examination copies of their thesis to all committee members, including the Graduate Council representative, sufficiently early to permit thorough review of the thesis prior to the student's final oral examination.

Within six weeks after the final oral examination or before the first day of the following term, whichever comes first, upload one PDF copy of your thesis, without signatures, electronically to ScholarsArchive and submit the signed ETD submission approval form with a copy of the title page to the Graduate School. If final submission requirements are after the initial six-week period, the student may be subject to re-examination. Please refer to the Graduate School's website for complete details (<http://gradschool.oregonstate.edu/success/thesis-guide>).

Signatures on the ETD submission approval form can be electronic, signed, scanned and emailed or faxed. The thesis will not be accepted for graduate requirements until it has received approval by the graduate dean, which the thesis editor will get.

FINAL EXAMINATION

After completion of or while concurrently registered for all work required by the program, the student must pass a final doctoral examination that may be written in part but must include an oral examination. The final oral examination must be scheduled in the Graduate School office at least two weeks prior to the date of the examination. All incomplete course work appearing on the program of study must be completed prior to scheduling the final oral examination.

The final oral examination consists of a public thesis defense followed by a closed session of the examining committee with the candidate. Under normal circumstances, the final oral examination should be scheduled for two hours.

All members of the student's graduate committee must approve the scheduling of the final examination.

It is expected that the thesis defense portion of the final oral exam be open to all interested persons and should be limited to one hour. After the open portion of the exam, the examining committee should exclude all other persons and continue with the examination of the candidate's knowledge of his or her field and the evaluation of the candidate's performance.

If the department favors a more elaborate presentation, it should be scheduled as a separate seminar. In any case, the time involved for the open presentation may not impinge upon time required for the examining committee to conduct appropriate, iterative oral inquiry with the candidate, to evaluate the candidate's performance, and to deliberate fully within the time constraints of the scheduled oral examination.

The examining committee consists of the student's doctoral committee and any additional members, including professors from other institutions, whom the major department may recommend. In the oral examination, the candidate is expected to defend the thesis and show a satisfactory knowledge of his or her field. If more than one negative vote is recorded by the examining committee, the candidate will have failed the examination. No more than two re-examinations are permitted by the Graduate School, although academic units may permit fewer re-examinations.

The final oral examination must be taken within five years after the oral preliminary examination. If more than five years elapse, the candidate will be required to take another oral preliminary examination.

DOCTOR OF EDUCATION REQUIREMENTS

The EdD program is a degree program with a major in education. It is intended for the educational professional whose career path is that of educational or teaching specialist, administrator, or other practitioner in the public schools, postsecondary institutions of higher education, or in business and industry. Its focus is on the application of knowledge to learning and teaching environments in public and private settings. The EdD program is designed to prepare educational leaders in community college education, middle-level education, or related educational settings.

A masters' degree in education or a related field, or equivalent to a master's degree in postbaccalaureate course work is required for admission. In addition, the College of Education requires the following:

1. minimum professional experience as defined by each program,
2. letter or statement of professional objectives for doctoral study and area of specialization within education,
3. three letters of recommendation, and
4. either the Graduate Record Examination or the Miller Analogies Test.

Applicants to the EdD program must have significant experience in an education or education-related setting such as teaching, school administration, curriculum specialist, instructional specialist,

child/youth counselor, supervisor; or in a setting where the primary function is education.

In general, the following requirements are in effect for the EdD:

1. A minimum of 108 credits beyond the baccalaureate degree.
2. Effective fall 2005, all graduate student programs of study submitted to the Graduate School must consist of, at a minimum, 50 percent graduate stand-alone courses. The remaining credits may be the 500 component of 400/500 slash courses.
3. Completion of the same residence requirements as listed for the PhD degree.
4. A dissertation of no less than 24 credits.
5. A mentored internship in an appropriate work setting for a minimum of 12 credits.
6. A minimum of 48 graduate credits in an area of specialty in education.
7. Completion of 24 credits of core seminars.
8. Completion of the core courses in research.

Procedures and requirements for preliminary and final examinations and thesis are the same as those for the doctor of philosophy degree.

GRADUATE FELLOWSHIPS, SCHOLARSHIPS, AND FINANCIAL AID

GRADUATE FELLOWSHIPS AND SCHOLARSHIPS

A number of Oregon State University fellowships and scholarships sponsored by industry, foundations and government agencies are available to superior students for graduate study in various graduate programs at OSU. For a listing of many these fellowships and scholarships, visit the Scholarship Management System database at https://scholarship.ucsdm.oregonstate.edu/prod/search_schol.php.

For more information about scholarships and fellowships in the database above, including application instructions, as well as additional opportunities in individual programs, contact the individual program of interest.

Students interested in general information regarding graduate student funding opportunities are encouraged to explore Financing Your Education on the Graduate School's website: <http://gradschool.oregonstate.edu/finance>.

GRADUATE STUDENT EMPLOYMENT

Each year, OSU receives grants from federal and state agencies, public and private foundations, and business and industry to support institutional and individual

projects. Funding is awarded to the various departments in most academic colleges and to other research organizations on campus, including experiment stations, centers and institutes. Many of these grants include financial support for graduate students. Interested students should direct inquiries and applications to the department concerned.

Graduate students may be employed as Graduate Teaching or Graduate Research assistants by departments on campus. In addition to monthly stipends, graduate assistants appointed at .20 FTE or above are eligible for a tuition and fee subsidy.

In addition to graduate assistantships, graduate students may be appointed to student hourly positions on campus. These appointments are not eligible for a tuition or fee subsidy.

The maximum combined appointment FTE for all jobs in the OUS system is .49 FTE.

For more information on student employment, contact the department of interest or the Office of Human Resources.

FINANCIAL AID FOR GRADUATE STUDENTS

The OSU Office of Financial Aid and Scholarships administers federal financial aid programs to assist graduate students with meeting the cost of higher education. To determine eligibility for specific federal aid programs at OSU, graduate students are required to complete the Free Application for Federal Student Aid (FAFSA) each year. Graduate students must be degree-seeking or in an approved certificate program and enrolled at least half-time (5 credits) to qualify for financial aid. Graduate students are not eligible for federal Title IV grants or subsidized loans. Students in graduate certificate programs are only eligible for aid for courses required for their certificate program.

For additional information about Financial Aid for graduate students, visit <http://oregonstate.edu/financialaid/>, or contact the OSU Office of Financial Aid and Scholarships.

GRADUATE RESEARCH SUPPORTING SERVICES

For information on Graduate Student Success, please see the Graduate School's Graduate Student Success Guide <http://gradschool.oregonstate.edu/success>.

COMPARATIVE HEALTH SCIENCES

Graduate Minor

Comparative Health Sciences

The Comparative Health Sciences graduate major is an interdisciplinary program administered by the Graduate School. Participating colleges include Veterinary Medicine, Public Health and Human Sciences, Pharmacy, and the Graduate School.

For further information about the graduate major, see the proposal at <https://secure.oregonstate.edu/ap/cps/proposals/view/84096>.

MS degree students complete a total of 45 graduate credits, including 12 thesis credits.

PhD degree students complete a total of 108 graduate credits beyond the bachelor's or professional (DVM, MD) degree, including at least 36 credits of non-blanket course work.

All students complete the core curriculum and at least two electives for a total of 12 credits. Student must also complete the Biomedical Sciences option.

Required Core

Research Perspectives Lab Rotations (3)
ST 511. Methods of Data Analysis (4)
Biomedical Ethics (1)
Grant Application Preparation (1)
Seminar (1)

Electives

BB 550. General Biochemistry (3)
MCB 524. Molecular and Cellular Biology Techniques (1)
(New course) Introduction to Bioinformatics
(New course) Introduction to Epidemiology
(New course) Introduction to Genomics
(New course) Introduction to Immunology

BIOMEDICAL SCIENCES OPTION

Students must also complete the Biomedical Sciences option:

MS Students

VMB 521. Animal Models (3)
VMC/VMB 501. Research (5)
VMC/VMB 503. Thesis (12)
VMC/VMB 507/607. Seminar (1)
Electives (24)

PhD Students:

VMB 521. Animal Models (3)
VMB 603. Thesis (36)
VMB 671. Molecular Tools (3)
VMB 607. Seminar: Dissertation Defense (1)
Electives (53)

CLINICAL SCIENCES OPTION

Graduate Major

Environmental Sciences
(MA, MS, PhD, PSM)

Graduate Minor

Environmental Sciences

Environmental sciences consists of curricula that foster interdisciplinary education for students seeking to better understand earth systems. The undergraduate curriculum leads to the BS degree in Environmental Sciences and requires students to complete courses that develop a broad base of knowledge in basic science disciplines, social sciences, and an area of specialization. A minor in environmental sciences is also available for those undergraduate students completing their degrees in other fields. The theme of the Environmental Sciences Program is central to the mission of OSU and reflects the strengths of OSU and other agencies and institutions in Corvallis and throughout the state of Oregon. The BS degree in Environmental Sciences provides excellent training for careers with agencies responsible for environmental protection and natural resource use, consulting firms, and those seeking opportunities for graduate studies.

ENVIRONMENTAL SCIENCES (MA, MS, PhD, PSM)

Graduate Areas of Concentration

Biogeochemistry, ecology, environmental education, natural resources, quantitative analysis, social science, water resources

The Environmental Sciences Graduate Program provides curricula leading to

MA, MS and PhD degrees in Environmental Science. The curricula integrates thinking across disciplines, especially life, physical, and social sciences. Environmental science explores natural processes on earth and their alteration by human activity. OSU has exceptional strength in many of the disciplines, including science, agriculture, forestry, engineering, public health, liberal arts, social science, and oceanography and atmospheric science. Strength in these disciplines allows the ES Graduate Program to provide high-quality interdisciplinary education for environmental scientists and continuing postgraduate educational opportunities to scientists who are already active in the field. The degrees administered by the program are OSU's contribution to the Joint-Campus Graduate Program for Environmental Sciences, Studies, and Policy, which links environmental graduate programs among the major research universities in Oregon.

The ES Graduate Program develops scientists who will be able to analyze and understand environmental systems, predict environmental change, and participate in the management of the environment. Each student completing a major in the ES Graduate Program will perform research and complete a thesis, dissertation, or research project. Each student will complete a core of ES graduate courses that will integrate concepts across the physical sciences, life sciences, and social sciences. Each student will also develop depth in a carefully designed, interdisciplinary area of concentration or track. Tracks that are currently available include ecology, biogeochemistry, social science, quantitative analysis, water resources, and environmental education. Methods and numerical skill courses, electives, and thesis make up the remainder of a student's program.

Students in the ES Graduate Program may choose advisors from faculty members already appointed at OSU, as well as other scientists who apply and are accepted in the environmental sciences graduate faculty. The Environmental Sciences Graduate Program fosters interdisciplinary education, and seeks connections between institutions.

For more information, contact Dr. Andrew Blaustein, Director, Environmental Sciences Graduate Program, Oregon State University, Corvallis, OR 97331-2904, or email: esgp@oregonstate.edu.

Degree Requirements

MA and MS Degrees (45 credits)

Environmental science core courses (9)
Methods and numerical skills courses (6)
ES area of concentration (Track) (15)
Elective courses (3–9)
Thesis (6–12)

Note: The MA degree requires proficiency in a foreign language.

PhD Degree (108 credits)

Environmental sciences core courses (10)
 Methods and numerical skills courses (9)
 ES area of concentration (Track) (30)
 Elective courses (3–23)
 Thesis (36–56)
 PSM Degrees Requirements (54 credits)
 Environmental science core courses (10)
 Methods and numerical skills courses (4)
 Area of concentration (16)
 Professional courses (18)
 Internship (6)

Email: renee.freeman@oregonstate.edu

Website: <http://psm.science.oregonstate.edu/>

The worlds of science and business are increasingly interconnected, creating strong demand for environmental professionals who can create partnerships for research, policy, and public outreach initiatives. The Professional Science Master's (PSM) in Environmental Science at OSU is the first program of its kind in the Pacific Northwest and was created with the help of professional affiliates employed in leadership roles in industry and agencies concerned with the environment. Special training in business management, communications, and ethics complements the core science curriculum, and students are required to complete an internship in lieu of thesis research. Several federal research laboratories are located in the Corvallis region, including the U.S. Environmental Protection Agency, the U.S. Department of Agriculture, the U.S. Forest Service, and the Bureau of Land Management.

The PSM program can usually be completed in two years, based on full-time study and at least 54 credits. Core environmental science courses form the foundation of this program by providing students with basic skills in environmental research methods and analysis (ENSC 508, ENSC 515, ENSC 520, and a 3-credit core elective). Course work in areas of concentration give focus and identity to each student's curriculum and allows for flexibility in response to changing employment demands. Areas of concentration are currently offered in biogeochemistry, ecology, environmental education, quantitative analysis, social science, natural resources, water resources, and sustainable natural resources. The sustainable natural resources concentration is offered online as an 18-unit block during summer term. Numerical skills courses expose students to research

design, statistical analysis, modeling, survey design, or other quantitative and qualitative techniques. Professional courses are required in communication, research ethics, and business management (PSM 513, PSM 565, PSM 566, PSM 567, COMM 550 and PHL 547). These courses are designed to be taken in sequence during the first academic year. Students are required to complete a 3 to 6 month internship (6–12 credits) in lieu of thesis research (ENSC 510).

For general information about PSM programs, contact the PSM Director, 2082 Cordley Hall, Corvallis OR 97331, 541-737-5259; email: kirstin.carroll@oregonstate.edu.

**ENVIRONMENTAL SCIENCES
 GRADUATE MINOR**

For more details, see the departmental advisor.

COURSES

ENSC 101. ENVIRONMENTAL SCIENCES ORIENTATION (1). Introduction to the Environmental Sciences Program and related professional and educational opportunities. Recommended for all freshman and first-year transfer environmental sciences majors, but open to all students interested in learning about career options in the environmental sciences. Graded P/N.

ENSC 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ENSC 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor and departmental approval required.

ENSC 402. INDEPENDENT STUDIES (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 405. READING AND CONFERENCE (1-12). This course is repeatable for a maximum of 12 credits. **PREREQS:** Instructor and departmental approval required.

ENSC 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 410. INTERNSHIP (1-12). Supervised practical experience working with professionals at selected cooperating institutions, agencies, laboratories, or companies. Graded P/N. This course is repeatable for a maximum of 12 credits. **PREREQS:** Instructor and departmental approval required.

ENSC 479. *^ENVIRONMENTAL CASE STUDIES (3). Improves students' ability to ask questions, gather and synthesize information, and communicate ideas on environmental topics. Instruction and information necessary for the course is entirely Web based. (Bacc Core Course) (Writing Intensive Course) **PREREQS:** One year of college biology or chemistry and junior standing required.

ENSC 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ENSC 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ENSC 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

ENSC 510. INTERNSHIP (1-12). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

ENSC 515. ENVIRONMENTAL PERSPECTIVES AND METHODS (3). Unique perspective or method each quarter. Possibilities include: remote sensing, modeling over a range of scales in time, space, and levels of system organization; and risk analysis.

ENSC 520. ENVIRONMENTAL ANALYSIS (3). Develop analytical thinking, explore analytical approaches, enhance writing skills, and gain experience in oral communication about environmental issues.

ENSC 530. RESEARCH PROFILES (1-2). Faculty and graduate student environmental research presentations.

ENSC 599. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ENSC 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ENSC 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENSC 630. RESEARCH PROFILES (1-2). Faculty and graduate student environmental research presentations.

ENSC 699. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

Graduate Major

Master of Arts Interdisciplinary Studies (MAIS)

Graduate Areas of Concentration
Selected from three fields offering graduate majors and minors

INTERDISCIPLINARY STUDIES (MAIS)

Graduate Areas of Concentration
Selected from three fields offering graduate majors and minors

The Master of Arts in Interdisciplinary Studies (MAIS) degree program is designed to permit students to formulate programs that integrate work from three separate disciplines. Breadth of study is important in designing the program. A research paper or thesis offers the opportunity to integrate the three disciplines.

Any graduate major or minor may serve as a discipline or field for this degree. Two of the three fields may be from one department if the areas of concentration within these two fields are different.

Program participation varies from year to year.

Graduate programs currently participating in this degree are:

- adult education major and minor 2070
- agricultural education major and minor 1050
- animal science major and minor 1250
- anthropology minor 8600
- applied anthropology major and minor 8640
- applied economics major and minor 1290
- applied ethics major and minor 9580
- art minor 8800
- biochemistry and biophysics major and minor 5060
- botany and plant pathology major and minor 5160
- civil engineering¹ major and minor 3060
- computer science major and minor 3070
- crop science major and minor 1200

- design and human environment major and minor 4410
- education major and minor 2310
- English major and minor 8900
- ethnic studies minor 8940
- exercise and sport science major and minor 7640
- fisheries science major and minor 1300
- foreign languages and literatures minor 8950
- forest ecosystems and society major 1100
- geography major and minor 5450
- geology¹ major and minor 5500
- gerontology¹ minor 4370
- history minor 9000
- history of science¹ major and minor 5440
- horticulture major and minor 1450
- human development and family studies¹ major and minor 4470
- industrial engineering major and minor 3190
- international agricultural development¹ minor 1070
- mathematics major and minor 5600
- music minor 9500
- nutrition¹ major and minor 4660
- ocean, earth and atmospheric sciences¹ major and minor 5001
- philosophy minor 9550
- physics major and minor 5900
- political science minor 9600
- psychology minor 9560
- queer studies minor 8777
- rangeland sciences major and minor 6220
- rural studies¹ minor 1080
- sociology¹ minor 9800
- soil science major and minor 1600
- speech communication minor 9850
- statistics major and minor 6150
- sustainable forest management major 1090
- wildlife science major and minor 1750
- women, gender, and sexuality studies major and minor
- wood science major and minor 3690

¹ Not as a primary area of concentration.

Admission

The applicant must satisfy university admission requirements at the graduate level and must gain acceptance at the point of admission by the departments offering the fields that will make up the program.

Administration

The Graduate School will handle general administration and recordkeeping. Students with general questions about the MAIS degree are encouraged to confer with the director of the MAIS graduate program.

The student should select a committee in consultation with the department/school chair of the emphasized field or

with his or her designated representative. With the advice of the committee chair, the student will select a committee member from each of the remaining two fields. The student will select the fourth committee member, a Graduate Council representative, from a list of names to be obtained in the Graduate School office. All members of the committee must be on the graduate faculty.

Before the completion of 18 credits of graduate course work, the student must file the official program form, approved by the committee. Program planning meetings are required, and the student has the responsibility for arranging the committee meetings necessary in the planning of the program. In the event that the student subsequently desires to change one or more disciplines on his or her program, the student must file a change in degree program with the Graduate School and schedule another program meeting in order to gain committee approval.

PROGRAM REQUIREMENTS

The Master of Arts in Interdisciplinary Studies (MAIS) degree is granted for attainment of broad, advanced knowledge and achievement integrated from three fields of study. Any graduate major or minor may serve as a field for this degree. Two of the three fields may be from one department if the areas of concentration within these two fields are different. A minimum of 9 credits in each of the three fields of study is required. The degree requires a minimum of 49 credits, including 4 credits of course work on interdisciplinary research methods.

No more than 21 credits (excluding thesis or research paper credit) may be taken in any field unless the total program exceeds 49 credits. There is no foreign language requirement. No more than 3 credits of blanket-numbered courses in each field of study may be used in the program; thesis credits (Option A) or research paper credits (Option B) are exempt from this limitation. The student's committee consists of four members of the graduate faculty—one from each of the three fields—and a Graduate Council representative. A formal program meeting must be held prior to the completion of 18 graduate credits. A final oral examination is required.

Two options under the program:

Option A: Thesis option. The thesis must coordinate work in the three fields. The requirement is 6 to 9 credits of Thesis 503. The thesis advisor must be a member of the graduate faculty authorized to direct theses.

Option B: Research paper option. The research paper must integrate work from at least two of the three fields. The requirement is 4 to 7 credits, registered

as Research 501, Reading and Conference 505, or Projects 506.

COURSES

IST 420. GRADUATE SCHOOL PREPARATION (1). Applying for graduate or professional school can be a daunting task. How and where to apply, how to choose an advisor, what to look for in a school, and how to obtain funding are hurdles to overcome during the application process. Supplemental materials will be provided as part of the course materials.

IST 499. SPECIAL TOPICS (4). PREREQS: Junior or senior standing, preferably with GPA greater than 3.0.

IST 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

IST 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

IST 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

IST 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

IST 511. INTRODUCTION TO INTERDISCIPLINARY GRADUATE STUDIES (1). First term graduate seminar for master's students in interdisciplinary studies to design their program of study; discover and access library and other university resources related to their fields of study; and practice synthesizing aspects of three differing fields.

IST 512. APPLYING AN INTERDISCIPLINARY PERSPECTIVE (3). Students will develop knowledge and skills in theory, research methods, and practice of approaching problems, issues, or events from an interdisciplinary perspective.
PREREQS: IST 511

IST 520. RESPONSIBLE CONDUCT OF RESEARCH (1). Covers 10 topics in responsible conduct of research: ethical decision making; human subjects; animal welfare; data acquisition, sharing, and ownership; research misconduct; conflicts of interest; authorship; peer review; mentor/trainee responsibilities; and collaborative science. Useful to all students who conduct scholarly activity. **PREREQS:** Graduate standing

IST 599. SPECIAL TOPICS (4). PREREQS: Minimum Course Prerequisites 1. Submission of an AAUS/OSU Scientific Diving Application and Diving Medical History to the OSU DSO 2. Submission of an AAUS/OSU Medical Evaluation of Fitness for Scuba Diving to the OSU DSO showing no contraindications for diving 3. Ability to complete the OSU scientific diver swim evaluation 4. Advanced Open Water certification from a recognized training agency (Rescue Diver strongly preferred). Experience in lieu of training may be recognized by the DSO 5. Current certifications in CPR, First Aid, AED, and Emergency Oxygen Administration 6. Proof of diving accident insurance (Divers Alert Network or equivalent) 7. Student must provide basic snorkeling gear, exposure protection, suitable cutting tool, light, slate, and underwater timing device

IST 607. CAPSTONE SEMINAR (3). Provides a culminating experience required for all graduate students pursuing the Graduate Certificate in College and University Teaching and for other graduate students seeking a structured opportunity to develop their teaching portfolio.
PREREQS: (AHE 547 and AHE 553)

IST 610. INTERNSHIP (3). Provides a framework for the in-depth internship experiences required of all graduate students pursuing the Graduate Certificate in College and University Teaching and for other graduate students seeking a structured opportunity to reflect on and improve their teaching. **PREREQS:** (AHE 547 and AHE 553)

Graduate Areas of Concentration

Bioinformatics
Biotechnology
Cell Biology
Developmental Biology
Genome Biology
Molecular Biology
Molecular Pathogenesis
Molecular Virology
Plant Molecular Biology
Structural Biology

Graduate Minor

Molecular and Cellular Biology

The Molecular and Cellular Biology Program provides students with comprehensive interdisciplinary training in molecular and cellular biology while reserving sufficient flexibility for students to specialize in their areas of interest. The elements of the core curriculum include courses in molecular genetics and cell structure and function, bioinformatics and genomics, scientific skills and ethics, along with research rotations with individual faculty members. Additional course work is custom-tailored to the individual student's interests and needs. Each program requires 36 units of graduate-level course work, participation in seminar programs, two quarters of supervised teaching experience, written and oral preliminary examinations, supervision by an individual committee of five faculty members, and presentation of a thesis containing the results of publishable original research.

The program also offers access to all of the participating faculty as potential research advisors. Students do three research rotations in the first year and select their advisor from over 90 faculty members in the 20 participating depart-

ments in seven colleges. Therefore, the MCB Program lowers interdisciplinary barriers and allows the students to select the advisors that most closely match their interests after they have been on campus for one or more terms.

GRADUATE MAJORS

APPLIED BIOTECHNOLOGY GRADUATE MAJOR (PSM)

Barbara J. Taylor, Director
Molecular and Cellular Biology
3021 Agricultural and Life Sciences Bldg.
Oregon State University
Corvallis, OR 97331
541-737-3799
Email: taylorb@science.oregonstate.edu
and millimag@cgrb.oregonstate.edu
Website: <http://www.mcb.oregonstate.edu>
Website: <http://psm.science.oregonstate.edu/applied-biotechnology>

The worlds of science and business are increasingly interconnected – creating strong demand for individuals who can bridge these two disciplines. Biomedical industries and start-up companies need employees who can combine their scientific and technical knowledge with good business management and communication skills. The Professional Science Master's (PSM) in Applied Biotechnology at OSU is the first program of its kind in the Pacific Northwest and was created with the help of professional affiliates employed in leadership roles in the biotech industry. The objective of this degree is to train students to be able to function effectively in industrial environments. Special training in business management, communications, and ethics complement core science curriculum, and students are required to complete an internship in lieu of thesis research.

The PSM program can usually be completed in two years, based on full-time study and at least 54 credit hours. Core lecture courses provide the conceptual framework necessary in the biotechnology sector. Microbial genetics, structure and function of eukaryotic cells, eukaryotic molecular genetics, and cell signaling and development are some of the topics that are covered (MCB 554, MCB 555, MCB 556, and MCB 575). An intensive laboratory experience (MCB 525) is a 2-week summer course that has attracted students from around the country for 8 years to learn molecular biology theory and practice. Bioinformatics training is also an option. Approved electives in an Area of Concentration give focus and identity to each student's curriculum and allow for flexibility in response to changing employment demands. Current Areas of Concentration include: Bioinformatics, Biotechnology, Cell Biology, Developmental Biology, Genome Biology, Molecular Biology, Molecular

Pathogenesis, Molecular Virology, Plant Molecular Biology and Structural Biology. Professional courses are required in communication, research ethics, and business management (PSM 513, PSM 565, PSM 566, PSM 567, COMM 550 and PHL 547). These courses are designed to be taken in sequence during the first academic year. Students are required to complete a 3 to 6 month internship (6-12 credits) in lieu of thesis research (MCB 510).

For general information about PSM programs, contact the PSM Director, Barbara J. Taylor, 3021 Agricultural and Life Sciences Building, 541-737-3799, taylorb@science.oregonstate.edu and milimlag@cgrb.oregonstate.edu.

Degree Requirements(54 credits)

Core science courses (19)
Approved electives (11)
Professional courses (18)
Internship (6)

MOLECULAR AND CELLULAR BIOLOGY (MS, PhD)

Graduate Areas of Concentration
Bioinformatics, biotechnology, cell biology, developmental biology, genome biology, molecular biology, molecular pathogenesis, molecular virology, plant molecular biology, structural biology

MCB doctoral students do research rotations in three laboratories during the first year, and then carry out their thesis research in subsequent years under the direction of a member of the MCB faculty. The MCB Program lowers interdisciplinary barriers and allows each individual the opportunity to select the most suitable advisor and committee.

MOLECULAR AND CELLULAR BIOLOGY GRADUATE MINOR

Graduate Areas of Concentration
Bioinformatics, biotechnology, cell biology, developmental biology, genome biology, molecular biology, molecular pathogenesis, molecular virology, plant molecular biology, structural biology

COURSES

MCB 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 99 credits.

MCB 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

MCB 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 99 credits.

MCB 507. SEMINAR (1-16). This course is repeatable for a maximum of 99 credits.

MCB 508. WORKSHOP (1-16). This course is repeatable for a maximum of 99 credits.

MCB 509. PRACTICUM (1-16). This course is repeatable for a maximum of 99 credits.

MCB 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 99 credits.

MCB 511. RESEARCH PERSPECTIVES IN MOLECULAR AND CELLULAR BIOLOGY (3). Provides graduate students with an in-depth exposure to faculty members at OSU involved in

molecular and cellular biology and their specific fields of research.

MCB 524. MOLECULAR AND CELLULAR BIOLOGY TECHNIQUES (1). Modern methods for manipulation of cellular macromolecules. Recombinant DNA technology and protein chemistry methods will be covered. Includes daily lectures over a two-week period. Lec/lab. Graded P/N. **PREREQS:** BB 451 or equivalent. May not be taken concurrently with MCB 525.

MCB 525. TECHNIQUES IN MOLECULAR AND CELLULAR BIOLOGY (3). An intensive laboratory course introducing modern methods for the manipulation of cellular macromolecules. Recombinant DNA technology, protein chemistry, and in situ hybridization methods presented in a format that emphasizes experimental continuity. The course requires two weeks of intensive full-time involvement. **PREREQS:** Departmental approval required.

MCB 530. INTRODUCTION TO POPULATION GENETICS (3). Genetic polymorphisms, inbreeding, genetic drift, population subdivision and gene flow, mutation and selection. Emphasis on applied rather than theoretical questions. Offered alternate years. **PREREQS:** BI 311 and ST 351 and ST 352

MCB 535. GENES AND CHEMICALS IN AGRICULTURE: VALUE AND RISK (3). A multidisciplinary course that examines the scientific, social, political, economic, environmental, and ethical controversies surrounding agricultural and natural resource biotechnologies. Lec/lab/rec. **CROSSLISTED** as BI 435/BI 535, FES 435/FES 535, TOX 435/TOX 535.

MCB 541. PLANT TISSUE CULTURE (4). Principles, methods, and applications of plant tissue culture. Laboratory is important part of course. Topics include callus culture, regeneration, somaclonal variation, micropropagation, anther culture, somatic hybridization, and transformation. **CROSSLISTED** as HORT 441/HORT 541, PBG 441/PBG 541. **PREREQS:** (BI 311 and BOT 331) or HORT 430 or PBG 430

MCB 554. GENOME ORGANIZATION, STRUCTURE, AND MAINTENANCE (4). How diverse organisms store their individual sets of genetic information (genomes). Evolution of genomes and gene families. Structures of DNA and chromatin. Biochemical and regulatory pathways that protect cellular genomes against environmental and endogenous damage and ensure transmission of faithful copies to progeny. Remodeling of genomes by recombination and transposition. **CROSSLISTED** as TOX 554. **PREREQS:** BI 311 (genetics or equivalent) and (BB 450 and BB 451 and BB 452) or (BB 490 and BB 491 and BB 492) or equivalent.

MCB 555. GENOME EXPRESSION AND REGULATION (4). Prokaryotic and eukaryotic systems will be used to describe recent advances in understanding transcriptional and posttranscriptional control mechanisms. Topics include: microbial, yeast and mouse model systems; transcriptional control mechanisms; RNA processing, silencing and microRNAs; protein synthesis and posttranslational modification; microarray- and mass spectrometry-based expression genomics. **PREREQS:** BB 451 or equivalent.

MCB 556. CELL AND DEVELOPMENTAL BIOLOGY (4). Examination of molecular and structural elements in eukaryotic cells and their relationship to function and development. Topics include nuclear organization, membranes, organelles, intracellular sorting, cell energetics, cell signaling, cell motility, cell division cycle, and developmental processes of selected model organisms. Critical reading and writing skills will be emphasized. **PREREQS:** BB 450 and BB 451 (biochemistry) or equivalent; BI 311 (genetics) or equivalent. Recommended: BI 460 (cell biology) or equivalent; MCB 554 and MCB 555.

MCB 557. SCIENTIFIC SKILLS AND ETHICS (3). Offers instruction, guest lectures and case-study based discussions of ethical issues relevant to scientists on topics such as mentoring, best practices of conducting research, research misconduct and compliance, intellectual property, peer review, ethical use of animal and human subjects and managing conflicts of interest. Training in the preparation and presentation of scientific seminars and grant writing. **PREREQS:** Graduate standing.

MCB 563. CANCER AND CHEMOPREVENTION (2). A summary of mechanisms of cancer progression, how cancer is detected, and introduction to chemoprevention using targeted therapy and alternative medicine. **PREREQS:** BB 451 and BI 314 and BI 460 or equivalent courses.

MCB 564. RECEPTORS AND SIGNAL TRANSDUCTION: ADVANCED TOPICS (3). Advanced concepts and recent developments in receptor pharmacology. Topics include receptor theory and regulation, and signal transduction pathways and functions. Offered alternate years. **CROSSLISTED** as PHAR 564. **PREREQS:** Instructor's approval required. Suggested prerequisite MCB 556 or PHAR 591.

MCB 565. MAMMALIAN MOLECULAR GENETICS (3). Covers general principles of the molecular genetics and functional genomics of mammalian organ system development. Advanced methodologies and emerging biotechnologies and their social, economic, political and cultural impacts will be discussed. **CROSSLISTED** as PHAR 565. **PREREQS:** BB 450 and BB 490 and MCB 556

MCB 575. COMPARATIVE GENOMICS (4). Principles of comparative genomics. Methods for genome assembly and annotation. Genomic approaches for the study of structural change, whole genome duplication, gene family evolution, gene networks, gene regulation and epigenetics. Lab topics include the analysis of next generation sequencing data and conducting comparative genome analyses. Lec/lab. **CROSSLISTED** as BOT 575. **PREREQS:** Students will require a basic working knowledge of cell and molecular biology and genetics. BI 314 and (BI 311 or CSS 430)

MCB 576. INTRODUCTION TO COMPUTING IN THE LIFE SCIENCES (3). Introduction to management of large datasets (e.g., nucleic acids, protein), computer programming languages, application of basic mathematical functions, and assembly of computational pipelines pertinent to life sciences. **CROSSLISTED** as BOT 476/BOT 576. **PREREQS:** Cell and molecular biology or genetics, or by approval of instructor. Familiarity with text editing software and unix/linux operating system is advantageous.

MCB 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

MCB 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

MCB 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

MCB 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

MCB 609. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

MCB 610. INTERNSHIP (1-9). Laboratory rotation. This course is repeatable for a maximum of 16 credits. **PREREQS:** MCB graduate students only.

MCB 620. DNA FINGERPRINTING (1). Principles and methods for producing and analyzing DNA fingerprints. Offered alternate years. **CROSSLISTED** as CSS 620 and PBG 620. **PREREQS:** BI 311 or CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530 or equivalent.

MCB 621. GENETIC MAPPING (1). Principles and methods for constructing genetic maps comprised of molecular and other genetic markers. Offered alternate years. CROSSLISTED as CSS 621 and PBG 621. **PREREQS:** BI 311 or CSS 430 or CSS 530 or PBG 430 or PBG 530 or HORT 430 or HORT 530 or equivalent.

MCB 622. MAPPING QUANTITATIVE TRAIT LOCI (1). Principles and methods for mapping genes underlying phenotypically complex traits. Offered alternate years. CROSSLISTED as CSS 622 and PBG 622. **PREREQS:** CSS 590 or ST 513 or equivalent.

MCB 637. MOLECULAR HOST-MICROBE INTERACTIONS (3). Lecture and discussion-based presentation of the molecular bases for interactions between organisms. Addresses bacterial, algal, and fungal symbionts of eukaryotes and considers pathogenesis, commensalism, and mutualism. A focus on the evolution of host-microbe interactions is included.

MCB 651. MOLECULAR BASIS OF PLANT PATHOGENESIS (3). Analysis of current concepts in the physiology, biochemistry, and genetics of host-parasite interactions. Topics covered include specificity, recognition, penetration, toxin production, altered plant metabolism during disease, resistance mechanisms and regulatory aspects of gene expression during host-parasite interactions. Offered alternate years. CROSSLISTED as BOT 651. **PREREQS:** BOT 550

MCB 662. HORMONE ACTION (3). Mechanisms of action of peptide and steroid hormones and related compounds at the cellular level. CROSSLISTED as ANS 662, BB 662, PHAR 662. **PREREQS:** BB 451 or BB 551 or BB 492 or BB 592

MCB 668. BIOINFORMATICS AND GENOMICS (4). This course is divided into two 2-credit modules. First module teaches both the theory and practice of basic informatics techniques including sequence alignment, sequence searching, and the evolution of protein families and their applications at a genome-wide level (comparative genomics and functional genomics). Second module introduces the fundamental tools of bioinformatics (Linux, Perl) and bioinformatics algorithms necessary to process and analyze large datasets generated from high-throughput genomics experiments. The second module is structured in three sections: Programming Concepts (PC), Biological Applications (BA) and Biological Projects (BP). Programming Concepts lays the foundation for the later two sections. PC will teach students to work within a Linux operating system in a client/server environment. Students learn to create programs in Perl scripting language, which permeates modern bioinformatics applications. Relevant programming concepts are presented and code examples illustrated using biological data. BA builds on the PC foundation to provide "snapshots" of common bioinformatics methods. For example, formatting biological sequence data into standard file formats, parsing the output from common bioinformatics software, adding notations to biosequences, calculating common statistics associated with biosequences (i.e., reverse complementation of DNA sequence). BP uses the BA snapshots to develop more extensive projects. BP incorporates extensive coverage of theoretical and algorithmic concepts to explore a biological topic where dealing with the data in a computational and mathematical framework is essential.

MCB 669. GENOME EVOLUTION (3). Recent advances in our understanding of the evolutionary mechanisms by which genomes change over time will be the central focus of this course. Specific areas of study will include principles of molecular evolution and population genetics, phylogenetics, and recent topics in evolutionary genomics. Offered alternate years.

MCB 671. MOLECULAR TOOLS (3). Intended for personnel with some scientific background who are seeking basic- and advanced-level molecular biology knowledge and who wish to become involved with molecular biology-related and biotechnological research. CROSSLISTED as VMB 671. **PREREQS:** Graduate standing or advanced undergraduate standing in science or engineering, with permission of instructor.

MCB 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

 RNG 555. Riparian Ecology and Management (3)

Total=18–21**GRADUATE MINORS:****WATER RESOURCES GRADUATE MINOR****Graduate Areas of Concentration***Hydrology, water quality, water resources planning and management*

A Water Resources graduate minor for master of science, master of arts, and doctor of philosophy degree programs is offered with specialization in hydrology, water quality, or water resources planning and management. The first two options are technically oriented, while the third gives added socioeconomic emphasis. Seminars, readings, and conferences are offered by Water Resources Graduate Program.

The graduate minor options are structured around core groups of courses and complementary courses designed to broaden the student's education. University departments and schools that offer courses related to water resources include the departments of Applied Economics; Anthropology; Biochemistry and Biophysics; Biological and Ecological Engineering; Botany and Plant Pathology; Business Administration; Chemistry; Crop and Soil Science; Entomology; Fisheries and Wildlife; Forest Engineering; Forest Resources; Mathematics; Microbiology; Public Health; Rangeland Ecology and Management; Statistics; and Zoology; the School of Chemical, Biological, and Environmental Engineering; the School of Civil and Construction Engineering; the School of Mechanical, Industrial, and Mechanical Engineering; School of Public Policy; and the College of Earth, Ocean, and Atmospheric Sciences. About 20 departments conduct teaching or research programs in water resources.

For more information, contact gradwater_director@oregonstate.edu or visit <http://oregonstate.edu/gradwater/>.

WATER RESOURCES ENGINEERING GRADUATE MINOR**Graduate Areas of Concentration***Groundwater engineering, surface water engineering, watershed engineering*

A graduate minor in Water Resources Engineering for master of science, master

of arts, and doctor of philosophy degree programs is offered with specialization in groundwater engineering, surface water engineering, or watershed engineering. Seminars, courses, and reading and conference courses in water resources engineering are offered by Water Resources Graduate Program.

The graduate minor options are structured around courses designed to broaden the student's education in one of the above areas of concentration. University departments and schools that offer courses related to water resources engineering include the departments of Biochemistry and Biophysics; Biological and Ecological Engineering; Botany and Plant Pathology; Chemistry; Crop and Soil Science; Geosciences; Mathematics; Rangeland Ecology and Management; Statistics; the School of Forest Engineering, Resources and Management; the School of Biological and Population Health Sciences; the School of Chemical, Biological, and Environmental Engineering; the School of Civil and Construction Engineering; the School of Mechanical, Industrial, and Mechanical Engineering; and the College of Earth, Ocean, and Atmospheric Sciences. About 20 departments conduct teaching or research programs in water resources.

For more information, contact gradwater_director@oregonstate.edu or visit <http://oregonstate.edu/gradwater/>.

WATER RESOURCES POLICY AND MANAGEMENT GRADUATE MINOR

Graduate Areas of Concentration *Water resources policy and management*

A graduate minor in Water Resources Policy and Management for master of science, master of arts, and doctor of philosophy degree programs is offered with specialization in the human dimensions of water resources policy and management. Seminars, readings, and conferences in water resources policy and management are offered by Water Resources Graduate Program and several affiliated departments.

The graduate minor options are structured around courses designed to broaden the student's education in water resources policy and management. University departments that offer courses related to water resources policy and management include the departments of Applied Economics; Anthropology; Fisheries and Wildlife; Geosciences; Rangeland Ecology and Management; Statistics; and Zoology; the School of Public Policy; the School of Forest Engineering, Resources and Management; the School of Biological and Population Health Sciences; the College of Business Administration, and the College of Earth, Ocean, and Atmospheric Sciences.

For more information, contact gradwater_director@oregonstate.edu or visit <http://oregonstate.edu/gradwater/>.

WATER RESOURCES SCIENCE GRADUATE MINOR

Graduate Areas of Concentration *Water resources science*

A graduate minor in Water Resources Science for master of science, master of arts, and doctor of philosophy degree programs is offered with specialization in hydrology or geochemistry. Seminars, readings, and conferences are offered by Water Resources Graduate Program.

The graduate minor options are structured around courses designed to broaden the student's education in water resources science, specifically in hydrology or geochemistry. University departments and schools that offer courses related to water resources science include the departments of Biochemistry and Biophysics; Biological and Ecological Engineering; Botany and Plant Pathology; Chemistry; Crop and Soil Science; Entomology; Fisheries and Wildlife; Geosciences; Mathematics; Microbiology; Rangeland Ecology and Management; Statistics; and Zoology; and the School of Forest Engineering, Resources and Management; the School of Biological and Population Health Sciences; the School of Chemical, Biological, and Environmental Engineering; the School of Civil and Construction Engineering; the School of Mechanical, Industrial, and Mechanical Engineering; the School of Public Policy; and the College of Earth, Ocean, and Atmospheric Sciences. About 20 departments conduct teaching or research programs in water resources.

For more information, contact gradwater_director@oregonstate.edu or visit <http://oregonstate.edu/gradwater/>.

WATER RESOURCES ENGINEERING COURSES

WRE 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

WRE 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

WRE 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

WRE 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

WRE 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

WRE 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

WRE 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

WRE 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

WRE 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

WRE 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

WRE 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

WRE 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

WRE 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

WRE 610. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

WRE 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

WATER RESOURCES POLICY AND MANAGEMENT COURSES

WRP 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

WRP 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

WRP 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

WRP 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

WRP 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

WRP 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

WRP 509. PRACTICUM (1-16). This non-traditional class explores tools, models and concepts in the collaborative decision-making process in water resources. Emphasis is on group projects and self-directed practical application of community-based natural resources. This course is repeatable for a maximum of 16 credits.

WRP 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

WRP 521. WATER CONFLICT MANAGEMENT AND TRANSFORMATION (3). Examines ways to work effectively in contentious water situations. Explores conflict tolerance, prevention, management, and transformation through collaborative structures as well as through models of negotiation and dialogue.

WRP 523. ENVIRONMENTAL WATER TRANSACTIONS (3). Covers the theory and practice of using water rights transactions to reallocate water rights to environmental purposes. Different transactional techniques and contexts appropriate to their use are presented through case studies primarily from the western United States, with some reference to the use transactions in other countries such as Australia. **PREREQS:** Graduate standing.

WRP 524. SOCIOTECHNOLOGICAL ASPECTS OF WATER RESOURCES (3). Core curriculum, graduate-level course in the Water Resources Graduate Program focusing on an interdisciplinary approach to water resources research that integrates the human and the technological dimensions of water resource issues. It is comprised of lecture and discussion sessions with guest lectures by visiting seminar speakers. **PREREQS:** Graduate student standing.

WRP 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

WRP 808. WORKSHOP (1-4). This course is repeatable for a maximum of 4 credits.

WATER RESOURCES SCIENCE COURSES

WRS 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

WRS 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

WRS 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

WRS 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

WRS 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

WRS 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

WRS 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

WRS 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

WRS 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

WRS 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

WRS 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits.

WRS 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

WRS 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

WRS 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

WRS 610. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

WRS 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

OTHER PROGRAMS WITHIN THE GRADUATE SCHOOL

COLLEGE AND UNIVERSITY TEACHING GRADUATE CERTIFICATE

The 18-credit graduate certificate in College and University Teaching is designed to provide advanced course work and experiential learning opportunities to current graduate students who plan to pursue careers in teaching and instruction in higher education settings or who plan to pursue careers that require similar skill sets in facilitation.

Core courses focus on educational/learning theory and instructional strategies for working with adult learners. The specialized course work includes student-selected course work, workshops, and/or other approved experiences appropriate to the student's field of study. The supervised teaching internship will allow students to engage in supervised field experiences to practice and refine instructional skills. The capstone teaching portfolio will provide a culminating professional development experience for students.

For further information, contact the Graduate School, A300 Kerr Administration Building, 541-737-4881; FAX 541-737-3313, Website: http://oregonstate.edu/dept/grad_school/.

The general structure of the certificate is:

- Core course work (8 credits)
- Specialized course work and experiences (4 credits)
- Supervised teaching internship (3 credits)

- Capstone teaching portfolio (3 credits)

COURSES

GRAD 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.

GRAD 420. GRADUATE SCHOOL PREPARATION (1). Applying for graduate or professional school can be a daunting task. How and where to apply, how to choose an advisor, what to look for in a school, and how to obtain funding are hurdles to overcome during the application process. Supplemental materials will be provided as part of the course materials.

GRAD 430. INTRODUCTION TO SCIENTIFIC DIVING (4). Incorporates academic, confined water and open water training to prepare the student to manage the task loading associated with performing scientific tasks underwater. Introduces the diver to basic techniques and equipment used in underwater data collection. Qualifies the student for acceptance into the OSU Scientific Diving Program as a Scientific Diver-in-Training, at the discretion of the DSO and OSU Diving Control Board. Includes field trips. **PREREQS:** Minimum Course Prerequisites - Submission of an AAUS/OSU Scientific Diving Application and Diving Medical History to the OSU DSO - Submission of an AAUS/OSU Medical Evaluation of Fitness for Scuba Diving to the OSU DSO showing no contraindications for diving - Ability to complete the OSU scientific diver swim evaluation - Advanced Open Water certification from a recognized training agency (Rescue Diver strongly preferred). Experience in lieu of training may be recognized by the DSO - Current certifications in CPR, First Aid, AED, and Emergency Oxygen Administration - Proof of diving accident insurance (Divers Alert Network or equivalent) - Student must provide basic snorkeling gear, exposure protection, suitable cutting tool, light, slate, and underwater timing device

GRAD 499. SPECIAL TOPICS (4). Graduate school preparation. **PREREQS:** Junior or senior standing, preferably with GPA greater than 3.0.

GRAD 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.

GRAD 511. DESIGNING A PATH FOR SUCCESS (1). Graduate student learners will be oriented onto paths that will help lead them toward degree completion and success. Students will receive foundational knowledge about graduate school requirements, effective mentor/mentee relationships, financing their education, research integrity and professional conduct, innovation and commercialization, and other soft skills essential for their progress through their graduate program. **PREREQS:** Graduate student standing only.

GRAD 520. RESPONSIBLE CONDUCT OF RESEARCH (1). Covers 10 topics in responsible conduct of research: ethical decision making; human subjects; animal welfare; data acquisition; sharing and ownership; research misconduct; conflicts of interest; authorship; peer review; mentor/trainee responsibilities; and collaborative science. Useful to all students who conduct scholarly activity. Graded P/N. **PREREQS:** Graduate standing.

GRAD 521. RESEARCH DATA MANAGEMENT (2). Careful examination of all aspects of research data management best practices. Designed to prepare students to exceed funder mandates for performance in data planning, documentation, preservation and sharing in an increasingly complex digital research environment. Open to students of all disciplines.

GRAD 530. INTRODUCTION TO SCIENTIFIC DIVING (4). Incorporates academic, confined water and open water training to prepare the student to manage the task loading associated with performing scientific tasks underwater. Introduces the diver to basic techniques and

equipment used in underwater data collection. Qualifies the student for acceptance into the OSU Scientific Diving Program as a Scientific Diver-in-Training, at the discretion of the DSO and OSU Diving Control Board. Includes field trips. **PREREQS:** Minimum Course Prerequisites - Submission of an AAUS/OSU Scientific Diving Application and Diving Medical History to the OSU DSO - Submission of an AAUS/OSU Medical Evaluation of Fitness for Scuba Diving to the OSU DSO showing no contraindications for diving - Ability to complete the OSU scientific diver swim evaluation - Advanced Open Water certification from a recognized training agency (Rescue Diver strongly preferred). Experience in lieu of training may be recognized by the DSO - Current certifications in CPR, First Aid, AED, and Emergency Oxygen Administration - Proof of diving accident insurance (Divers Alert Network or equivalent) - Student must provide basic snorkeling gear, exposure protection, suitable cutting tool, light, slate, and underwater timing device

GRAD 540. INTERVENING THE ISMS: DIVERSITY AWARENESS (3). Students will be afforded an opportunity to explore the ISMS within individual, societal, cultural and institutional contexts. Students will examine, document and analyze the influence of ISMS in their own lives--in their personal, community, social and professional relationships.

GRAD 550. INTRODUCTION TO ONLINE COURSE DEVELOPMENT AND FACILITATION (2). Prepares students to develop and teach distance courses. Students explore practical aspects of course development and facilitation: a brief history of distance education and pedagogical theory; course design principles; engagement of adult learners; active learning; and investigation of how online instruction, in addition to offering flexibility and convenience, also offers distinct pedagogical benefits. Open to students in all disciplines. **PREREQS:** Graduate standing.

GRAD 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.

GRAD 607. CAPSTONE SEMINAR (3). Provides a culminating experience required for all graduate students pursuing the Graduate Certificate in College and University Teaching and for other graduate students seeking a structured opportunity to develop their teaching portfolio. **PREREQS:** AHE 547 and AHE 553

GRAD 610. INTERNSHIP (3). Provides a framework for the in-depth internship experiences required of all graduate students pursuing the Graduate Certificate in College and University Teaching and for other graduate students seeking a structured opportunity to reflect on and improve their teaching. Graded P/N. **PREREQS:** AHE 547* and AHE 553*

In an increasingly complex world, solutions to issues of emerging societal importance often require crossing traditional boundaries. Recognizing that students will need information from many available sources, Oregon State University offers a variety of undergraduate and graduate opportunities for interdisciplinary exploration and enrichment.

Interdisciplinary programs depend fundamentally upon the existence of strong disciplinary programs and place signifi-

cant responsibility upon students to integrate and synthesize information.

Because there are so many choices of subjects and so many ways to approach a given interest, it is crucial that students obtain guidance in order to understand the advantages and the limitations of particular disciplinary and interdisciplinary alternatives. Students are encouraged to contact the individuals identified at the beginning of each certificate, department, and degree listing for more information and advice.

UNDERGRADUATE PROGRAMS	LOCATION IN CATALOG/ADMINISTRATIVE UNIT
American Studies Major	College of Liberal Arts (OSU Cascades Campus only)
Applied Ethics Certificate	College of Liberal Arts, School of History, Philosophy, and Religion
Bioenergy Minor	College of Agricultural Sciences
Bioresource Research Major	College of Agricultural Sciences
Environmental Sciences Major	College of Earth, Ocean, and Atmospheric Sciences
Forest Engineering - Civil Engineering Major	College of Forestry, Dept. of Forest Engineering, Resources and Management
Gerontology Certificate	College of Public Health and Human Sciences, School of Social and Behavioral Health Sciences
International Studies Major	All colleges with undergraduate programs offer this major administered through International Programs.
Latin American Affairs Certificate	College of Liberal Arts, School of Language, Culture, and Society
Liberal Studies Major	College of Liberal Arts, Dept. of Liberal Studies
Multimedia Minors	College of Liberal Arts, School of Arts and Communication
Medical Humanities Certificate	College of Liberal Arts, School of History, Philosophy, and Religion
Natural Resource and Environmental Law and Policy Minor	College of Agricultural Sciences, Dept. of Agricultural and Resource Economics
Natural Resources Major and Minor	College of Forestry, Dept. of Forest Ecosystems and Society
Peace Studies Certificate	College of Liberal Arts, School of History, Philosophy, and Religion
Religion and Culture Certificate	College of Liberal Arts, School of History, Philosophy, and Religion
Russian Studies Certificate [Suspended]	College of Liberal Arts, School of Language, Culture, and Society
Sustainability Major	All colleges with undergraduate programs offer this major administered through College of Forestry, Dept. of Forest Ecosystems and Society.
Twentieth Century Studies Certificate [Suspended]	College of Liberal Arts
Women, Gender, and Sexuality Studies Minor and Certificate	College of Liberal Arts, School of Language, Culture, and Society
GRADUATE PROGRAMS	LOCATION IN CATALOG/ADMINISTRATIVE UNIT
Comparative Health Sciences (MS, PhD)	Graduate School
Environmental Sciences (MA, MS, PhD, PSM)	Graduate School
Gerontology Minor	College of Public Health and Human Sciences, School of Social and Behavioral Health Sciences
Interdisciplinary Studies (MAIS)	Graduate School
Marine Resource Management (MA, MS)	College of Earth, Ocean, and Atmospheric Sciences
Master of Agriculture (MAG)	College of Agricultural Sciences, Dept. of Agricultural Education and General Agriculture
Materials Science (MS, PhD)	College of Engineering, School of Mechanical, Industrial, and Manufacturing Engineering
Molecular and Cellular Biology (MS, PhD)	Graduate School
Natural Resources (MNR)	College of Forestry, Dept. of Forest Ecosystems and Society
Public Policy (MPP, PhD)	College of Liberal Arts, School of Public Policy
Toxicology (MAG, MS, PhD)	College of Agricultural Sciences, Dept. of Environmental and Molecular Toxicology
Water Resources Graduate Program Majors (MS, PhD) and Minors	Graduate School

The Division of International Programs plays a leadership and collaborative role in the university's comprehensive internationalization strategy by advancing international education for U.S. and international students, scholars and faculty; furthering the integration of global learning in OSU's teaching, research and outreach; and promoting OSU as a premier international research university through partnerships and regional initiatives. The division is led by the associate provost for International Programs, and includes the Offices of International Student Advising and Services (ISAS), International Degree and Education Abroad (IDEA), and International Scholar and Faculty Services (ISFS).

The division works collaboratively with INTO Oregon State University, the university center that offers a range of English language programs including preparatory programs for international students aiming to enter OSU at both graduate and undergraduate levels via pathway programs, rather than via direct admission. As part of this collaboration, the associate provost has oversight responsibilities for INTO OSU Academic Programs and International Admissions.

In addition, OSU also houses the Oregon University System International Programs and International Internships, which support all of Oregon's public institutions.

INTERNATIONAL DEGREE AND EDUCATION ABROAD (IDEA)

Laurie Lewis, *Senior Director of Operations and Strategic Initiatives*
University Plaza
1600 SW Western Blvd., Suite 130
Oregon State University
Corvallis, Oregon 97331
541-737-3006
Website: <http://oregonstate.edu/international/studyabroad/>

International Degree and Education Abroad (IDEA) is responsible for administering OSU education abroad programs and the International Degree program.

OVERSEAS STUDY AND EXCHANGE PROGRAMS

OSU students may broaden their education by taking part in education abroad programs. All of the programs allow qualified students from a wide variety of disciplines to earn academic credit from Oregon State University while pursuing their studies abroad. Not only do students earn OSU credit, but they can also apply their financial aid to help cover the costs.

More information about education abroad programs can be obtained in International Degree and Education Abroad (IDEA), Heckart Lodge, 541-737-3006.

Study Abroad Scholarships

International Degree and Education Abroad (IDEA) offers support with scholarships for study abroad including coaching for Gilman, Fulbright and Boren scholarships and fellowships.

INTERNATIONAL SCHOLAR AND FACULTY SERVICES (ISFS)

Charlotte Ross, *Director, International Scholar and Faculty Services (ISFS)*
University Plaza
1600 SW Western Blvd., Suite 190
Oregon State University
Corvallis, Oregon 97331
charlotte.ross@oregonstate.edu
541-737-3006
Fax: 541-737-6482
Website: <http://oregonstate.edu/international/atosu/scholars>

International Scholar and Faculty Services (ISFS) assists departments, units and colleges by advising on immigration regulations and visa options for visiting scholars and international hires. ISFS prepares and files the petitions and applications with the United States Citizenship and Immigration Services (USCIS), the Department of Labor (DOL), Department of State and other government agencies. ISFS represents OSU in working with USCIS and other government agencies, and ensures that the university complies with laws and regulations in processing employment-based visa petitions. ISFS represents OSU in working with the Department of State and the Department of Homeland Security in the administration of the J-1 Exchange Visitor Program through which we host visiting scholars, professors, interns, and exchange students. ISFS serves as a resource to the campus community by providing immigration-related advice on university-wide issues.

INTERNATIONAL STUDENT ADVISING AND SERVICES (ISAS)

Rachel Weber, *Interim Director, International Student Advising and Services (ISAS)*
University Plaza
1600 SW Western Blvd., Suite 130
Oregon State University
Corvallis, Oregon 97331
rachel.weber@oregonstate.edu
541-737-6310
Fax: 541-737-6226
Website: <http://oregonstate.edu/international/atosu/students>

International Student Advising and Services (ISAS) provides a variety of services to international students, including advising on immigration issues, financial and academic concerns, cultural adjustment, and personal issues. The unit is responsible for maintaining regulatory compliance and integrity of OSU's F-1 and J-1 student programs. Staff serves as a liaison and resource to OSU colleges

and departments, community groups, and US and foreign government agencies and sponsors to promote the interests of the OSU international student population. The unit maintains strong ties with international sponsoring agencies which provide a large and diverse population of students from traditionally under-represented countries. Staff provides outreach and conducts trainings and workshops for OSU faculty, staff and students on regulatory issues, employment, and cross-cultural competency. ISAS collaborates with INTO OSU to offer quarterly orientation programs for incoming students to help provide successful transition to the US/OSU educational system. Staff also works closely with INTO OSU to streamline services and programs to better serve all international students at Oregon State University. At present, there are approximately 3,000 international students from over 90 countries studying in degree-seeking, exchange, English language, and academic preparation programs at Oregon State University.

Undergraduate Major International Studies (BA, HBA)

The International Degree is Oregon State University's unique double degree program. It allows any interested undergraduate student the opportunity to explore the international dimensions of any primary major. International Degree students complete Advanced Proficiency in a Second Language, Four additional Baccalaureate Core Courses in International Studies, an International Experience, and a Senior Thesis.

As an International Degree participant, you will earn two degrees. The first degree, the primary degree, will be your chosen major in any department on campus. The International Degree, or concurrent degree, will be in International Studies in your primary degree department.

For example, if your primary degree is a BS in Environmental Sciences, then the

International Degree would be a BA in International Studies in Environmental Sciences.

ADMISSION REQUIREMENTS TO THE INTERNATIONAL DEGREE PROGRAM

1. A minimum 2.75 cumulative GPA after completing at least 32 credits of college-level courses and good standing within your department, college and the university. The dean of your college may give you special consideration if you fall below this minimum. See the International Degree office for more information about this process.
2. Proficiency in a foreign language equivalent to that attained by the end of a second-year language sequence at OSU*. This may be met in one of the following ways:
 - a. Successful completion of four or more years of consecutive study of the same foreign language at the high school level preceding admission to Oregon State University;
 - b. Completion of the AP College Board test in a foreign language with a score of 4 or 5;
 - c. Completion of the third term of a second-year foreign language sequence at OSU or another accredited university with a GPA of 3.0 or better. This course must constitute a minimum of 4 quarter or 3 semester credits.
 - d. Completion of one term of a third-year foreign language course (i.e., any course designated 311, 312 or 313) at OSU or another accredited university with a GPA of 3.0 or better. This course must constitute a minimum of 3 quarter or 2 semester credits.
 - e. An international student whose native language is not English who wishes to use English to satisfy the foreign language entrance requirement will have satisfied the requirement upon admission to OSU.
3. Meet any additional requirements established by your major department or college.

SPECIAL NOTES ABOUT ADMISSION

If you change majors after admission to the International Degree Program, you will have to reapply for admission to the International Degree Program in your new department.

If you are pursuing two degrees besides the International Degree, you only need to apply for the International Degree in one department. The choice of depart-

ments is up to you, but you should consult your advisors before determining where to apply.

*You may be admitted to the program as a pre-International Degree student if you meet all the requirements listed above except for the two-year language requirement.

GENERAL INTERNATIONAL DEGREE REQUIREMENTS

1. You must successfully complete all departmental, college, and institutional requirements for your primary degree.
2. You must also complete a minimum of 32 credits in residence beyond the minimum 180 to 204 credits required for most primary degrees. Courses taken through an OSU-sponsored program abroad are considered in-residence credits. Depending on the level of previous foreign language study and experience abroad, you could take anywhere from a minimum of 32 additional credits to a maximum range of 70-plus additional credits to complete the degree.
3. Additional International Degree requirements may be established for your primary degree, so check with your major advisor or the International Degree contact in your department to make sure that you know what they are and that you are able to complete them. When you meet with your advisor, have a transcript in hand.
4. As is currently true for all degrees, your academic dean will verify that you have completed the International Degree requirements. The graduation audit will be done along with and in the same fashion as for your primary degree by your major department. Confirmation of the International Degree will be appropriately noted on your transcripts, and you will receive separate diplomas.

SPECIFIC INTERNATIONAL DEGREE REQUIREMENTS

1. You must demonstrate advanced level achievement or proficiency in a foreign language in one of the approved ways. Typically, this requirement is met by completing the third term of a fourth-year language sequence at OSU. Students must take language courses for letter grades and earn a cumulative GPA of 3.0. Exceptions may be considered only by petition (see International Degree office for details). To find out about additional ways to demonstrate advanced proficiency, contact the International Degree office.
2. You must successfully complete a

minimum of four courses selected from the baccalaureate core curriculum, with the approval of your departmental International Degree advisor. These courses are in addition to the university's baccalaureate core requirements. The International Degree course requirements from the baccalaureate core are as follows:

- One course selected from the Western Culture category (3–4 credits);
 - Two courses selected from the Cultural Diversity category (6–8 credits);
 - One course selected from the Western Culture, Cultural Diversity, or Contemporary Global issues categories (3–4 credits). **Note:** Not all four courses may focus on the same culture or language. For example, you cannot take all four of the additional baccalaureate core courses focusing on Spanish speaking countries/peoples.
 - To see the entire baccalaureate core list go to <http://catalog.oregonstate.edu/BCC.aspx>.
3. The third requirement of the degree is to spend a minimum of 10 weeks in a country where your International Degree language is spoken and be engaged in a study abroad program, an international internship or an international research project.
 4. The final requirement for the degree is to prepare a rigorous and integrative senior thesis, which demonstrates a fundamental and comprehensive understanding of global issues and of the international dimensions of your primary degree. Requirements for the senior thesis include successful completion of INTL 407, Seminar: International Issues: Introduction to Thesis for 1 credit, and 3 to 6 credits of 403 (Thesis) in your department.

GRADUATION LANGUAGE REQUIREMENTS

Students must demonstrate advanced level achievement or proficiency in a single foreign language in one of the following ways:

- Completion of a fourth-year foreign language sequence (designated 411, 412, 413) at OSU with a minimum 3.00 GPA cumulative in all foreign language courses. Courses must be taken for a letter grade and may not be graded S/U.
- Completion of a fourth-year foreign language sequence at another accredited university with a minimum 3.00 GPA, in a program in which the combined third-year

and fourth-year language courses constitute a minimum of 18 quarter or 12 semester credits.

- Completion of a minimum of 9 quarter (6 semester) credits with a minimum 3.00 GPA, at Oregon State University or another accredited university, of any 400-level course work (in any discipline) taught in a foreign language, if approved by the student's primary degree department or school.
- Demonstration of end of fourth-year level proficiency in a foreign language by successful completion of an achievement test administered by the School of Language, Culture, and Society at OSU.
- Demonstration of fourth-year level proficiency in a foreign language as evidenced by an oral proficiency test administered by a certified foreign language proficiency tester that is approved by the OSU School of Language, Culture, and Society.
- For languages not offered at OSU, the requirement may also be completed by a minimum of nine-month residency (study, research, work), after fulfilling the foreign language entrance requirement, in a country in which the language is spoken.
- Completion of a minimum of one term international internship using the target language after completion of a third-year language sequence (311, 312, 313) at OSU with a cumulative GPA of 3.0 or above.

EXPERIENCE ABROAD

Students must spend a minimum of 10 weeks in another country where the language used to meet the International Degree requirement is spoken and be engaged in one of the following:

- A study abroad program offered by OSU, another university, or a program designed by the student. Programs administered by other universities or those designed by students must be approved by the International Degree Program and the student's primary department. Currently OSU has university-sponsored programs in over 70 countries.
- An international internship or work program that receives academic credit, such as the IE₃ Global Internship Program offered by OSU.
- A pre-approved research project abroad.
- Previous international experience, such as the Peace Corps, approved by the primary academic department and the International Degree Program.

SENIOR THESIS

The final requirement for the degree is to prepare a rigorous and integrative senior thesis that demonstrates a fundamental and comprehensive understanding of global issues and of the international dimensions of your primary degree. This thesis places your academic discipline in an international context, often in a comparative fashion. Because it fulfills the writing intensive course requirement for the International Degree, it will involve multiple drafts and revisions. The final product will represent polished, formal writing, in a format appropriate to your academic field.

Dual Thesis Requirements:

You may write one thesis to meet the International Degree requirement and the thesis requirement in your department. If you will complete a senior thesis to meet another academic requirement in your primary degree, it is important to consult with academic advisors in your major as well as in the International Degree office.

- **Example:** If you are in the University Honors College, you will work with both the Honors College and the International Degree office to ensure that you fulfill both sets of requirements.

Thesis proposal: A copy of the thesis proposal form will be on file in the International Degree Program office. The topic will evolve as you work, and may change substantially, but identifying an appropriate advisor and developing a proposal form are crucial steps in your progress toward completion of the thesis requirement of the International Degree. If your thesis ideas change significantly, it is important to file a revised proposal with the International Degree Program office.

Thesis credit: Before graduating, you will spend two to three terms working on the thesis and will receive credits through your major department. You will register for a minimum of 3 thesis credits under the department prefix appropriate to your major (403), with your thesis advisor as the professor of record. These credits may be distributed over multiple terms, and you may receive an incomplete for the credits taken during the earlier term(s) until you have finished your thesis work. You will register for these credits during the year you plan to complete your thesis work, as incomplete grades should be removed within 12 months. Please note that credits for which you receive an incomplete do not count toward credits satisfactorily completed during that term. If you receive financial aid, you should plan ahead to ensure that this does not affect your aid eligibility.

- **Example:** If you are a sociology major, you would register for a minimum

of 3 credits of SOC 403. If you are a mathematics major, you would register for MTH 403. Some departments already have a thesis course listed in the schedule of classes, but other departments may ask the registration schedule desk to set up a CRN for that course number during the term(s) for which you wish to register for thesis credit.

These credits may be graded or pass/no pass. If you and your advisor agree that the scope of your thesis warrants additional credit, and your college and department's policies allow it, you may register for additional credits. The suggested maximum is 6 credits.

Colleges, departments, or advisors may elect to set different requirements for thesis credits that meet the needs of their programs. In this case, the requirements or preferences of the college/department take precedence over general International Degree requirements.

Requirements for the Senior Thesis Include:

Thesis class: As a part of your program, you will enroll in the 1-credit class INTL 407, Seminar: International Issues: Introduction to Thesis, offered on a pass/no pass grading basis. The course is offered twice a year during fall and winter terms. It is designed to help you define and focus your areas of interest, get an overview of research methods, develop your thesis ideas, identify a suitable advisor in your major department who will assist you throughout the process, complete a thesis proposal form, and develop a realistic and effective timetable for completion. During this course, you will receive a copy of the guide, *Preparing a Senior Thesis*, and an advisor information sheet, which will help you and your advisor as you work on your thesis. **Note:** If you are also a student in the University Honors College, you may enroll in either the UHC thesis class or the International Degree Program's thesis class.

Final thesis: This represents polished, formal writing. Theses average 30 to 50 pages, but to ensure fulfillment of the WIC requirement, even a thesis with a nonverbal component such as art, music, or photography must include a minimum of 8 to 10 pages of formal writing and place the thesis in the appropriate historical/cultural context by incorporating and documenting outside sources.

• **Example:** A graphic arts student who interned in Russia compared contemporary posters in the U.S. and Russia, and displayed examples. He also wrote an analysis of his findings.

Presentation: When your thesis is complete, you will make a public presentation of your work. The format may vary depending on your topic and your own preferences, but you will present your thesis to a group including your advisor, other interested faculty in your department, representatives of the International Degree program, and other guests whom you may want to invite.

Final copies of the log and thesis must be turned in to your major department and the International Degree office two weeks prior to the date that grades are due for graduating seniors for the term you plan to graduate. This is usually a week before finals week.

ADDITIONAL COLLEGE AND DEPARTMENTAL REQUIREMENTS

Foreign Language Majors

To earn the International Degree you must complete the second foreign language required of a language major through the fourth-year level. You must also spend two 10-week periods abroad, one in each of the countries where the two languages you are studying are spoken. For example, if you are a German major and have decided to take Russian as your second foreign language, you must complete the 400-level Russian course and study abroad in both Germany and Russia.

Additionally, you may not complete major/minor requirements without taking upper-division courses in the OSU School of Language, Culture, and Society even if you complete the hour requirements abroad.

College of Forestry Majors

As part of the four additional baccalaureate core courses required for the International Degree, you must take FE/FOR 456, *International Forestry (3).

SCHOLARSHIPS

In support of the overseas learning experience, the International Degree Program has funds available to assist students traveling abroad and to assist with costs associated with research for your thesis. These are awarded on a competitive basis. Please talk to the International Degree office for more information.

OREGON UNIVERSITY SYSTEM INTERNATIONAL PROGRAMS AND IE₃ GLOBAL INTERNSHIPS

Krista Lane, *Interim Director*
OUS International Programs
1600 SW Western Blvd., Suite 290
Corvallis, Oregon 97333-4187
541-737-3006
krista.lane@ous.edu
Website: <http://oregonabroad.ous.edu/>

In addition to furthering the international agenda for OSU, International Programs helps to fulfill OSU's mission as a land grant university by providing structure and support to the Oregon University System's International Exchange Programs and IE₃ Global Internships. These programs, open to students from all Oregon university campuses, provide unique study and professional development opportunities through institutional relationships that promote academic and cultural understanding, economic opportunities, and professional experience in an international context. OUS International Programs and IE₃ Global Internships are housed at Oregon State University and offered in cooperation with each of Oregon's public universities. For more information, visit <http://oregonabroad.ous.edu>.

INTERNATIONAL INTERNSHIPS

IE₃ Global Internships, sponsored by the Oregon University System, enables OSU students in all majors to complete a full-time internship related to their career goals in an international setting. IE₃ interns gain professional work experience while developing cross-cultural skills and, in many cases, foreign language abilities relevant to their field of study.

Internships can vary in length, usually three to six months, and in type of organization, from nonprofit groups to business to government agencies. Placements are offered in health care, conservation biology, business, education, politics, social work, communications, engineering, agriculture, and forestry. Internships are available in Europe, Latin America, Africa, Oceania and Asia.

Excellent opportunities exist for students with strong foreign language skills in addition to the many English-speaking internships offered by the program. Juniors, seniors and master's level students are eligible to participate. Full position descriptions for each placement are available on the IE₃ Global Internships website: <http://ie3global.ous.edu/>.

COURSES

INTL 199 SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

INTL 299 SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

INTL 399 SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

INTL 405 PROJECTS: INTERNATIONAL PROJECTS (1-16). Projects of an international nature. This course is repeatable for a maximum of 16 credits. **PREREQS:** Must be arranged with instructor prior to registration.

INTL 406 SPECIAL PROGRAMS/SPECIAL TOPICS (1-16). Projects of an international nature. This course is repeatable for a maximum of 16 credits.

INTL 407 SEMINAR: INTERNATIONAL ISSUES (1-16). Advanced study of selected topics related to a variety of international issues. This course is repeatable for a maximum of 16 credits.

INTL 408 WORKSHOP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

INTL 410 INTERNSHIP: INTERNATIONAL INTERNSHIPS AND SEMINAR (1-16). Internships and seminars for students working abroad or working on an international project. This course is repeatable for a maximum of 16 credits. **PREREQS:** Must be arranged with instructor prior to registration.

INTL 499 SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

INTL 599 SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

The College of Liberal Arts offers major programs in the arts, humanities, and social sciences that comprise the core of human knowledge. Students can earn degrees and minors in the college's many disciplines and interdisciplinary programs, as well as certificates of specialized training in seven other fields. Qualified students can also participate in a joint program with the College of Law at Willamette University, in which they can earn their bachelor's and law degrees in six years.

Success follows opportunity. In the College of Liberal Arts opportunities for academic success and enhanced professionalism are provided to all. Students gain the skills and knowledge required to integrate creative problem-solving with a sense of social responsibility and involvement in activities that enrich the cultural life of the university, Corvallis, the state of Oregon and the entire world.

Students in the College of Liberal Arts receive individual attention in student learning communities and have the opportunity to interact in small groups with their professors, many of whom are also their academic advisors. This more personal environment and interaction results in the possibility of going beyond surface knowledge to a deeper understanding of the discipline being studied and how it impacts human knowledge, commerce, art and science.

The qualifications and accomplishments of the faculty members in the College of Liberal Arts are truly impressive. A strong commitment to teaching by faculty of great personal achievement and learning ensures that students will receive an excellent education by enrolling in one of the majors offered in the College of Liberal Arts...where successful futures begin.

MAJORS

The College of Liberal Arts offers major programs leading to the bachelor of arts (BA) or bachelor of science (BS) degree in the following:

American Studies

(OSU-Cascades Campus only)

Anthropology

Options: Archaeology/Physical Anthropology, Biocultural Option, Cultural Anthropology, General Anthropology

Applied Visual Arts, BFA

Options: Fine Arts BFA, Photography BFA

Art

Options: Art History, Fine Arts, Photography

Digital Communication Arts

Economics

Options: Law, Economics and Policy; Managerial Economics; Mathematical Economics

English

Ethnic Studies

French

German

History

Liberal Studies

Option: Pre-Education

Music

Options: Instrumental Performance, Music Education, Music Production, Piano Performance, Vocal Performance

Philosophy

Political Science

Psychology

Sociology

Options: Crime and Justice, Environmental and Natural Resource Sociology

Social Science

(OSU-Cascades Campus only)

Option: Community Development and Leadership

Spanish

Speech Communication

Options: Communication, Theatre Arts

Women, Gender, and Sexuality Studies

Graduate Majors

Anthropology

Applied Ethics

Contemporary Hispanic Studies

English

History of Science

Public Policy

Women, Gender, and Sexuality Studies

Undergraduate Certificates

Applied Ethics

Language in Culture

Latin American Affairs

Medical Humanities

Peace Studies

Religion and Culture

Women, Gender, and Sexuality Studies

DOUBLE DEGREES IN EDUCATION OR INTERNATIONAL STUDIES OR SUSTAINABILITY

Undergraduates with majors in the College of Liberal Arts can earn a second degree in education or international studies or sustainability. See the College of Education or International Programs or Department of Forest Ecosystems and Society sections of this catalog for more information.

MINORS

Students throughout the university may elect to pursue the following undergraduate minors: Anthropology; Asian Studies; Communication; Economics; English; Ethnic Studies; French; German; History; Multimedia; Music; New Media Communications; Philosophy; Political Science; Psychology; Russian (*suspended*); Sociology; Spanish; Theatre Arts; Women, Gender, and Sexuality Studies; and Writing.

The College of Liberal Arts also offers many courses in the arts, humanities, and social sciences that are of value to all students and are basic to a liberal education. Such courses help students in their personal development and enrichment through a deeper understanding of themselves and appreciation of human cultural development.

TEACHER EDUCATION

The College of Liberal Arts offers excellent undergraduate preparation for elementary, middle or high school teach-

ers. The Liberal Studies pre-education program is ideal for elementary school teachers.

Students wanting to teach at the high school level may major in English, French, German, history/social studies, music or Spanish.

CERTIFICATE PROGRAMS

Certificate programs in Applied Ethics; Language in Culture; Latin American Affairs; Peace Studies; Religion and Culture; Russian Studies (*suspended*); and Women, Gender, and Sexuality Studies are offered to all students and may be taken concurrently with any major degree program.

PRE-LAW PREPARATION

OSU provides opportunities for a complete and rigorous preparation for students interested in attending law school. Our accomplished graduates attend some of the finest schools in the nation.

Law school is one of the few professional schools that do not require a particular set of courses as a prerequisite for admission. Students may major in any subject. Students should choose a major that engages and challenges them, a course of study where they can excel. They are advised to supplement their major courses with a diverse selection of classes that offer depth, rigor and skill in three areas: written and oral communication, deductive reasoning and logic, and a general knowledge of the institutions and values of our society.

The College of Liberal Arts offers many effective and engaging ways to prepare for law school, rather than one single pre-law program. Students interested in law school may contact Professor Rorie Solberg in the School of Public Policy. Call 541-737-2811 for her office hours. Students also may call the CLA Student Services Office, 541-737-0561. Students should also obtain the College of Liberal Arts pre-law advising brochure, which is available online at <http://liberalarts.oregonstate.edu/content/pre-law-program>.

ACCELERATED BA/BS AND LAW (JD) PROGRAM WITH WILLAMETTE UNIVERSITY COLLEGE OF LAW

This program enables OSU students to earn a BA or BS degree and a law degree in a total of six years, three years at OSU and three at Willamette University Law School.

Students may be admitted to the program anytime during their first two years of undergraduate study provided they have a 3.5 high school GPA and a minimum combined SAT score of 1950 or composite ACT score of 29. Students will complete all but 45 credits of upper-division electives for a BA or BS degree in defined majors¹ in the College of Liberal Arts. For admission to law school,

students must have earned a cumulative GPA of 3.4 or higher and a Law School Admission Test (LSAT) score no lower than the median LSAT for the prior year's entering class.

At Willamette University, the students' first-year law courses will satisfy the 45-credit upper-division elective requirements for their OSU degree. After completing the additional two years at Willamette, students will have completed both the Bachelor's and JD degrees in six years.

Note: OSU Honors College students are currently not eligible for this program due to the senior year thesis requirement.

Footnote:

¹ Anthropology; Economics; English; Ethnic Studies; French; German; History; Liberal Studies; Philosophy; Political Science; Sociology; Spanish, Speech Communication; Women, Gender, and Sexuality Studies.

ACADEMIC ADVISING

Mission Statement: The College of Liberal Arts academic advising is a teaching and learning process dedicated to student success. Academic advising engages students in developing a plan to realize their educational, career and life goals.

Values Statement: The values associated with advising in the College of Liberal Arts are closely aligned with the stated values of the university.

- **Accountability:** We are committed to providing timely, accurate and intentional advising.
- **Diversity:** We honor the unique nature and interests of each student. Advising services and delivery methods will be shaped to fit the diverse needs of our campus populations.
- **Respect:** We seek to establish a reciprocal relationship with students based on an ethic of care and shared responsibility.
- **Social Responsibility:** We foster a culture of independent thinking and global awareness so that students make informed, socially responsible choices consistent with their academic, career and life goals.
- **Integrity:** We seek to engage students in a fair and professional process of meaningful self-reflection and authentic inquiry.

COLLEGE OF LIBERAL ARTS REQUIREMENTS

A liberal arts education involves exploration and broad study beyond one's major field. Students are encouraged to understand other cultures, other ways of knowing, and other fields of study. Students are also encouraged to take more courses in areas outside their major field to enhance their experience.

Liberal arts students are required to satisfy four sets of requirements:

- Oregon State University Baccalaureate Core
- College of Liberal Arts Core
- BA or BS requirements
- Major program requirements

The university baccalaureate core course requirements are explained in a separate section, "Earning a Degree at Oregon State." The College of Liberal Arts Core and the BA and BS requirements are explained below. The major program requirements are explained in the appropriate section in the pages that follow. If you want to add a minor program, you will also need to complete the requirements for that minor. Specific requirements for interdisciplinary minors are listed in the Interdisciplinary Programs section of this catalog. Specific requirements for disciplinary minors are usually given in the appropriate school or departmental section; for example see the School of Public Policy section for requirements for the Economics minor.

You may not use a single course to satisfy more than one of these requirements. In addition, you may not use courses within your major field to satisfy either baccalaureate core or liberal arts core requirements. (However, courses taken to satisfy the baccalaureate core requirements or the liberal arts core may also be used to satisfy requirements for a minor.)

LIBERAL ARTS CORE

The liberal arts core consists of five courses (at least 15 credits) as follows:

- **Humanities (3):** Critical examination of influential traditions and ideas as defined by major scholarly works (includes English literature; ethnic studies; film studies; foreign language and literatures, including culture; history; and philosophy).
- **Fine Arts (3):** Participation in or appreciation of different forms (includes art, music, theater, and creative writing in poetry, fiction, or drama).
- **Social Science (3):** Scientific investigation and theory pertaining to human individuals, social groups, institutions, and ideologies (includes anthropology; economics; political science; psychology; sociology; women, gender, and sexuality studies; and selected geography courses).
- **Nonwestern Culture (3):** Study in any of the following areas focusing outside of Western culture—Africa, Asia, Russia, South America, Central America, Caribbean, Middle East, the Pacific, or Native North Americans.
- **One additional course** from one of the preceding four areas (3).

For a list of specific courses that satisfy the liberal arts core requirements, use the Schedule of Classes Searcher website and scroll down to the CLA Liberal Arts Core Courses search feature: <http://catalog.oregonstate.edu/SOCSearcher.aspx>.

BA/BS REQUIREMENTS

Nearly all liberal arts students graduate with either a bachelor of arts or bachelor of science degree.

- **BA Requirement:** Second-year proficiency in a second language, including ASL, at the college level with at least a C–.
- **BS Requirement:** A minimum 15-credit block of science, computer science, and quantitative studies as follows:
 1. Any computer science (CS) course approved by the student's major school or department (3–4), and
 2. Any course from the College of Science approved by the student's major school or department except math (MTH) or statistics (ST) courses (3–4), and
 3. One of the following (8–12):
 - ST 201 and ST 352 or ST 351 and ST 352 (8).
 - MTH 111 and MTH 245 (4,4).
 - Any 8 credits of MTH courses at the 200 level or above (not including MTH 211 and MTH 212).
 - MTH 211, MTH 212, or MTH 390 (4,4,4). Pre-elementary education majors only.
 - MTH 241, MTH 245 or MTH 251, and ST 351.

Many schools or departments require specific courses to satisfy the BS degree requirements; students should consult their academic advisors for details. Courses used to satisfy the BS degree requirements may not also be used to satisfy baccalaureate core requirements.

Bachelor of Fine Arts (BFA) degrees in Applied Visual Arts and in Digital Communication Arts are offered by the School of Arts and Communication. BFA degree requirements differ from those in other College of Liberal Arts programs. Students in the BFA degree program must complete the baccalaureate core and a minimum of 105 credits in art or digital communication arts.

AMERICAN STUDIES

Neil Browne, *Director*
2600 NW College Way
OSU-Cascades Campus
Bend, OR 97701
541-322-3129

Undergraduate Major

American Studies (BA, BS, HBA, HBS)
American Studies is only offered only on the OSU-Cascades Campus.

AMERICAN STUDIES (BA, BS, CRED, HBA, HBS)

Offered only on the OSU-Cascades Campus.

An interdisciplinary major that engages American culture in its historical, contemporary, and global contexts. Examines American culture through a variety of media including film, music, literature, history, politics, and art. Teaching faculty come from several different disciplines and students approach course objectives from many scholarly vantage points.

Lower Division (COCC) (20 credits)

Required Sequences:

ENG 253. Survey of American Literature: Colonial to 1900 (4)
ENG 254. Survey of American Literature: 1900 to Present (4)
HST 201, HST 202. History of the United States (4)

Choose 1 course from the following COCC courses:

ARH 207. Native American Art History (4)
HST 203. *History of the United States (4) (*OSU online*)
HST 204. History of the Civil War (4)
HST 207. History of the American West (4)
HST 218. Native American History (4)
HST 225. U.S. Women's History (4)
HST 242. History of the Pacific NW (4)
HST 258. Colonial Latin American History (4)
HST 259. Modern Latin American History (4)
HUM 212. Culture and Literature of the Americas (4)
HUM 230. Immigrant Experience American Literature (4)
HUM 240. Native American Literature and Culture (4)
HUM 256. Introduction to African-American Literature (4)
HUM 262. Popular Culture: The American Western (4)
PS 201. Introduction to U.S. Government and Politics (4)
PS 203. State/Local Government (3)
WS 101M. Introduction to Women's and Gender Studies (4)[*Not offered every year.*]
WS 102. Introduction to Women Studies: Humanities (4)[*Not offered every year.*]

COCC Course Catalog: <http://www.cocc.edu/Admissions/Catalog/>

Upper Division (32 credits)

Required:

AMS 311. Topics in American Studies (4)
AMS 350. *American Culture and the Vietnam Experience (4)
ENG/ART 386, ENG/ART 387, ENG/ART 388. A Cultural History of American Art and Literature: Part I, II, III (4,4,4)

Choose from the following list to complete 32 credits:

ART 462. Directions and Issues in Contemporary Art (3)
ART 465. Native American Art (3)
COMM 326. Intercultural Communication (3)
COMM 412. Topics in Speech Communication (3)
COMM 416. Ethnography of Communication (3)
COMM 427. Cultural Codes of Communication: *Native American Codes of Place* (3)
ENG 317. *The American Novel: Beginnings to Chopin (4)
ENG 318. *The American Novel: Modernist Period (4)
ENG 319. *The American Novel: Post-World War II (4)
ENG 360. *Native American Literature (4)
ENG 362. *American Women Writers (4)
ENG 470. ^Studies in Poetry (4)
ENG 482. Studies in American Literature, Culture, and the Environment (4)
ENG 485. ^Studies in American Literature (4)
HST 362. Women in United States History (4) (Ecampus)
HST 468. History of the American West (4) (Ecampus)
HST 469. History of the Pacific Northwest (4) (Ecampus)
HST 475. Civil War and Reconstruction (4) (Ecampus)
HST 477. The Progressive and New Deal Eras (4) (Ecampus)
HST 481. *Environmental History of the United States (4) (Ecampus)
PS 321, PS 322, PS 323. American Constitutional Law (4,4,4)
PS 363. *Gender and Race in American Political Thought (4)
PS 375. *The Civil Rights Movement and Policies (4)
PS 429. ^Topics in Judicial Politics (4)
Any changes to this curriculum must be approved by the director of American Studies.

Footnotes:

* Bacc Core Course
^ Writing Intensive Course (WIC)

COURSES

AMS 311. TOPICS IN AMERICAN STUDIES (4). Selected topics, changed annually, that investigate American ideas, regions, events, or periods. Fulfills the requirement for an integrated course in the major. May be repeated as topics vary. Open to nonmajors. This course is repeatable for a maximum of 99 credits.

AMS 350. *AMERICAN CULTURE AND THE VIETNAM EXPERIENCE (4). Examines through literature, film, and popular media the effects of the Vietnam War on American culture. Taught at OSU-Cascades only. (Bacc Core Course)
PREREQS: Sophomore standing.

AMS 405. READING AND CONFERENCE (1-16). Independent, individual studies supervised by the director, members of the American Studies Board, or assigned professors, as arranged by the student and the director. This course is repeatable for a maximum of 16 credits.

AMS 406. PROJECTS (1). Studies of American culture and society centered around topical events or cultural programs of current interest in American studies. This course is repeatable for a maximum of 99 credits.

AMS 407. ^SEMINAR (1-16). May be repeated for credit as topics vary. (Writing Intensive Course) **CROSSLISTED** as ENG 407/ENG 507. This course is repeatable for a maximum of 16 credits.

AMS 410. AMERICAN STUDIES INTERNSHIP (1-6). Supervised and evaluated work in a variety of professional fields to enhance students career preparation; arranged at the initiative of the student one semester in advance. This course is repeatable for a maximum of 16 credits.

AMS 507. SEMINAR (1-16). May be repeated for credit as topics vary. **CROSSLISTED** as ENG 407/ENG 507. This course is repeatable for a maximum of 16 credits.

LIBERAL STUDIES

Louie Bottaro, Head Advisor

213 Gilkey Hall

Oregon State University

Corvallis, OR 97331-6202

541-737-0561

Email: louie.bottaro@oregonstate.edu

Website: http://oregonstate.edu/cla/liberal_studies/

Undergraduate Major

Liberal Studies (BA, BS, HBA, HBS)

Option

Pre-Education

LIBERAL STUDIES (BA, BS, CRED, HBA, HBS)

A BA or BS degree in Liberal Studies is available for students whose academic and career interests suggest greater curricular breadth and flexibility than is available in other major programs.

Candidates for the Liberal Studies major must complete the following:

- Oregon State University Baccalaureate Core
- College of Liberal Arts Core requirements
- A program consisting of 45 or more credits that are thematic in nature and include at least 27 upper-division credits developed from the course offerings of two or more departments within the College of Liberal Arts. The plan of study and statement of justification must be approved in advance by the head advisor or designee.

- At least one Writing Intensive Course (WIC) with a grade of C or better.
- Maintain a 2.0 or better university GPA.
- Maintain a 2.3 or better major GPA.

The typical program is designed to meet the needs and interests of the particular student and is unique in content. In some cases, a prestructured program may provide a suitable match.

PRE-EDUCATION OPTION

The BA or BS degree in Liberal Studies may be used to prepare for a teacher licensure program.

Pre-Education Option Core (94–105) (This fulfills the baccalaureate core.)

Computer Science (4)

Contemporary Global Issues (3)

Cultural Diversity (3)

Difference, Power, and Discrimination (3)

Education (3)

HDFS 311. Infant and Child Development (4)

HDFS 313. Adolescent Development (4)

HHS 231. *Lifetime Fitness for Health (2)

HHS 241–HHS 248. *Lifetime Fitness:

(various activities) (1)

or any PAC course (1–2)

GEO 105. *Geography of the Non-Western World (3)

and GEO 106. *Geography of the Western World (3)

Literature (9)

MTH 211, MTH 212, MTH 390.

*Foundations of Elementary Mathematics (4,4,4)

PSY 201, PSY 202. *General Psychology (3,3)

Science (Bacc core plus two additional from approved list) (18–20)

Science, Technology and Society (3)

Spanish: strongly recommended

Speech, Writing I, II (9)

Select one of three U.S. history courses below for 4 credits:

HST 201. *History of the United States (4)

HST 202. *History of the United States (4)

HST 203. *History of the United States (4)

Plus 6 additional history credits (6)

College of Liberal Arts Core (12)

One Specialization (45)

Select one from six distinct interdisciplinary specializations listed below. Contact Tristen Shay at 541-737-0561 for detailed specifications.

Specializations (select one):

Behavioral Science

Fine Arts

Language Arts

Russian Language and Culture

Social Studies

Spanish Language and Latino(a) Studies

COURSES

LS 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

LS 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.

LS 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

LS 405. READING AND CONFERENCE (1-3). This course is repeatable for a maximum of 16 credits.

LS 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

LS 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

LS 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

LS 409. PRACTICUM (1-3). This course is repeatable for a maximum of 16 credits.

LS 410. INTERNSHIP (1-12). Restricted to students enrolled in off-campus programs. Not available to students in residence on the Corvallis campus. Maximum of 12 credits. This course is repeatable for a maximum of 12 credits. **PREREQS:** Junior or senior standing, and 15 credits of OSU residence work completed.

LS 428. ^INTERSECTIONS (3). An examination of liberal arts disciplines and their interrelations with emphasis on critical thinking and library skills. Includes attention to uses of a liberal arts degree. (Writing Intensive Course) This course is repeatable for a maximum of 6 credits.

LS 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ART

The Art Area of the School of Arts and Communication offers Bachelor of Fine Arts (BFA), Bachelor of Arts (BA), and Bachelor of Science (BS) degrees through extensive course work in fine arts, photography, and art history.

The curriculum provides an awareness and understanding of the historical and contemporary significance of art as a unique feature of society. Major programs offer the opportunity for professional artistic development while incorporating subjects that lead to a liberal education. These programs prepare the student for a range of professional opportunities or later graduate study in photography, fine art, and art history, as well as many related fields. As a cultural enrichment for our students, the Art Area sponsors exhibitions, lectures, workshops, and other events related to the visual arts.

Candidates for the BFA degree may select an option in fine arts or photography. Candidates for the BS degree may select the fine arts or photography option. Candidates for the BA degree may select an option in fine arts, art history, or photography. The BFA is a pre-professional degree. The College of Liberal Arts requirements for the BFA differ from other degree programs. (See BFA/Applied Visual Arts.) Admission into either the Fine Arts or Photography option is selective and competitive. See program requirements for specific details.

The Art History minor combines an introduction to art history with an opportunity to explore advanced topics. The Visual Arts minor is a studio concentration in either fine arts or photography. The Art Area also participates in the New Media Communications minors and Digital Communication Arts major, as well as the Master of Arts in Interdisciplinary Studies (MAIS).

MONTHLY ART EXHIBITIONS

The Art Area of the School of Arts and Communication, based in Fairbanks Hall, features monthly exhibitions by nationally and internationally recognized artists in the Fairbanks Gallery. The school is also the sponsor of the Visiting Artists and Scholars Lecture Series, which has brought in renowned artists including Philip Pearlstein, Ann Hamilton, Marina Abramović, Bill Viola, and Do Ho Suh. In 1995 the school created the JumpstART *Precollege Visual and Performing Arts Workshop* held each summer for talented high school students in art, music and theater.

MUSIC

The Music Area of the School of Arts and Communication offers programs leading to the Bachelor of Arts (BA) or Bachelor of Science (BS) degree, a variety of baccalaureate core courses for students with little or no background in music,

and opportunities for qualified students to perform in bands, choirs, and the symphony orchestra. Students wishing a greater curricular choice may wish to combine music study with courses in another school or department in the College of Liberal Arts for a liberal studies major. The Music Area also offers minors in Music and Popular Music Studies.

The Music Area also teaches graduate courses in music education, literature and history, conducting, performance and special projects. Graduate students may pursue the Master of Arts in Teaching: Music Education (MAT) degree or the Master of Arts in Interdisciplinary Studies (MAIS) degree in a broad range of fields. OSU's graduate programs in music have been approved by Oregon's Teacher Standards and Practices Commission and the National Council for Accreditation of Teacher Education. Programs are available for individuals seeking both the initial and/or continuing license in music at all levels of authorization.

Performance instruction at the intermediate and advanced levels is available with instructor consent. Students should contact the school office for application procedures and fee schedules.

The Music Area proudly presents upwards of 200 musical events of all types throughout the academic year and summer. Choral, instrumental, orchestral ensembles of all sizes and types provide students from across campus the chance to participate in and/or simply enjoy listening to music. Many ensembles and events include the chance to work with and learn from professional musicians and nationally and internationally-recognized music educators.

Scholarships are available for music majors and for outstanding performers. Auditions and interviews take place in February and March each year. Selection is based on musical and academic achievement.

The Sound Design Lab in Benton Hall includes state-of-the-art digital recording and editing hardware and software and is open to all OSU students. Work-study students are available to help students learn how to use the facilities.

Career possibilities in music include teaching in the schools, private instruction, performing in orchestras or ensembles, music librarianship, arts management, music business, and recording engineering.

NEW MEDIA COMMUNICATIONS

The New Media Communications (NMC) Area of the School of Arts and Communication offers Bachelor of Fine Arts (BFA), Bachelor of Arts (BA), and Bachelor of Science (BS) degrees in Digital Communication Arts. There is also a minor in New Media Communications. Course work explores the storytelling capacity of

contemporary media and technologies. When pursuing an NMC degree students acquire the skills they need to use today's media effectively in sharing knowledge, imagination, and information. Students also learn to anticipate how future changes in the media are likely to influence their lives. In NMC courses students explore how to make abstract concepts or hidden processes visible, how to anticipate people's reactions to innovation, how to write professionally, how to recognize the influence of media, how to produce creative content in a variety of media formats, and much more. A New Media Communications major prepares students for a lifetime of change and involvement in the digital world.

NMC courses are taught in multiple venues on campus including the Motion-Capture and Gaming labs, both currently located on the fourth floor of Strand Ag Hall.

Each year numerous New Media students participate in internships with on-campus organizations and off campus with local and regional companies. Selected students participate in the National Association of Broadcasters annual convention and other regional and national organizations and events.

SPEECH COMMUNICATION

The Communication Area of the School of Arts and Communication offers a major program leading to a Bachelor of Arts (BA) or Bachelor of Science (BS) degree. The degree examines both theoretical and practical aspects of human communication as a liberal art, as a social science, as background for further study, or as pre-professional experience. All students initially pursuing a Speech Communication major with an option in Communication take basic courses in public speaking, argumentation, and interpersonal communication. Further studies focus on areas such as rhetorical and communication theory, methods of criticism and research, and history. Students pursuing an option in Communication enhance the skills inherent in all human interactions, preparing themselves for a range of potential vocational pursuits, avocations, and graduate study. The area also offers a Communication minor.

The Communication Area is located in cottage-esque Shepard Hall on Campus Way. Communication Area students are active in *Lambda Pi Eta*, the National Communication Association's honor society for four-year colleges and universities. Students from across the university also compete on the nationally-recognized OSU Forensics Team in individual events and debate. Faculty and graduate students participate regularly in national and regional conferences as well as area-sponsored colloquia on campus.

The Communication Area also takes part in the Master of Arts in Interdisciplinary Studies (MAIS), with many master's students pursuing two areas of concentration within the area's graduate curriculum.

THEATRE ARTS

The Theatre Arts Area offers a Bachelor of Arts (BA) or Bachelor of Science (BS) degree option in theatre within the Speech Communication major. The Theatre Arts option emphasizes a liberal arts approach to theatre history, practice, and production. All students pursuing the degree complete a core of classes designed to introduce them to fundamental elements of the art. The large remaining portion of the option is split between courses in history/theory/literature and those focusing on design/technical/performance matters. Students select specific classes within each disciplinary area to match their interests (performance, design, literature, etc.) while meeting key degree requirements. The result is a theatre education grounded in a liberal arts perspective and emphasizing a basic knowledge of all theatre elements. The area offers a similarly structured minor in Theatre Arts.

The Theatre Arts Area facilities are located in Withycombe Hall. The Main Stage Theatre seats approximately 350 in a modified-proscenium arrangement while the flexible Laboratory Theatre seats around 100. Both spaces function as classrooms as well as performance venues.

The University Theatre (UT) is the producing arm of the Theatre Arts Area. Students from across campus collaborate with UT faculty, staff, and guest artists to create theatre productions throughout the academic year and summer. Students from all colleges and departments across campus are encouraged and welcome to participate.

The Theatre Arts Area also participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program.

UNDERGRADUATE MAJORS WITH OPTIONS

APPLIED VISUAL ARTS (BFA, CRED, HBFA)

Also available on the OSU-Cascades campus.

We offer two options in Applied Visual Arts:

1. Fine Arts BFA
2. Photography BFA

The Applied Visual Arts program is an interdisciplinary curriculum that enables students to gain a deeper understanding of their own ideas and how they relate to larger historical and cultural contexts. Courses at the 100 level stress fundamental aspects of visual literacy. Courses

numbered 200 through 499 offer increasingly intensive study in art history, painting, printmaking, photography, sculpture, expanded media, and drawing.

Requirements for BFA studio options in Applied Visual Arts:

Applied Visual Arts majors may not take required Art courses on an S/U graded basis. Students may not use courses in which they have earned less than a C– to satisfy BFA requirements. A minimum 3.00 grade-point average must be maintained in all art courses used to meet BFA requirements.

The core curriculum studio courses must be completed before taking upper-division studio courses for a major program. Applied Visual Arts majors are required to see the Art advisor on an annual basis.

Note: The 400-level studio block may be any combination of painting, printmaking, sculpture, photography, or drawing courses.

PHOTOGRAPHY BFA OPTION

Admission to the photography program is selective and competitive. Students wishing to enter the program must undergo a portfolio review at the end of winter term of their sophomore year. Students should complete ART 101, ART 115, ART 121, and ART 261 during the freshman year. A review of portfolios will occur at the end of winter term the next year and students will be selected to fill a limited number of openings in the photography program based on performance in ART 261 and on the portfolio review. Academic performance in other courses may also be taken into account. (Transfer students should consult with an advisor in the School of Arts and Communication before registering for OSU courses.) Students who are unsuccessful in gaining admission to the photography program may reapply one time the following year. Contact the school for additional details.

 ART 411. ^Contemporary Issues in Art (3)
 Art history (300/400-level) (3 credits may be ART 208; at least one course must be at the 400 level) (6)

Fine Arts electives (300 level) (15)

Fine Arts electives (400 level) (8)

Note: Fine arts electives include studio courses in painting, printmaking, sculpture, drawing, or photography.

PHOTOGRAPHY OPTION

Admission to the photography program is selective and competitive. Students wishing to enter the program must undergo a portfolio review at the end of winter term of their sophomore year. Students should complete ART 101, ART 115, ART 121, and ART 261 during the freshman year. A review of portfolios will occur at the end of winter term the next year and students will be selected to fill a limited number of openings in the photography program based on performance in ART 261 and on the portfolio review. Academic performance in other courses may also be taken into account. (Transfer students should consult with an advisor in the School of Arts and Communication before registering for OSU courses.) Students who are unsuccessful in gaining admission to the photography program may reapply one time the following year. Contact the school for additional details.

DIGITAL COMMUNICATION ARTS (BA, BFA, BS, CRED, HBA, HBFA, HBS)

The Digital Communication Arts major requires a 2.0 GPA for admittance and a 2.3 GPA for graduation. Students must receive a C- or better in all degree course work.

Core Requirements (33-35)

NMC 101. Introduction to New Media Communications (3)
 NMC 260. New Media Futures (3)
 NMC 301. ^Writing for the Media Professional (3)
 NMC 320. History of Telecommunications (3)
 or NMC 321. History of Broadcasting (3)
 or NMC 322. Landmarks in Media Content (3)
 NMC 351. New Media Visualization (3)
 NMC 409. Practicum (1) (*taken as three*)

1-credit courses or two 1-credit and one 2-credit courses)

or NMC 410. Internship (3)
 NMC 430. Media Theory (3)
 NMC 490. Media Ethics (3)
 NMC 498. Capstone Projects (3)

Students also must take one class from each of the two areas outside of their own specialty area as part of the core requirements (6-8)

Specialties

Students have the opportunity to focus their studies on a particular part of the discipline of New Media Communications. Students in Media Management and the Media and Society specialties must complete a minimum of 5 courses from the following list of specialty classes. Students may also choose the BFA in the Production specialty. Students must pursue a specialty to attain the BA/BS/HBA/HBS or BFA in Digital Communication Arts.

Media Management Specialty (15-16):

Students pursuing the Media Management specialty focus on business practices and the regulatory environment. Students learn effective strategies to form start-up ventures, understand communication regulation, policy, and law, and gain skills needed to manage media communications enterprises.

NMC 406. Special Problems/Special Projects (3-4)

NMC 421. *Diffusion of Innovations (3)

NMC 437. New Media and Society (3)

NMC 440. Media Management (3)

NMC 441. Media Entrepreneurship (3)

NMC 470. Media Law (3)

NMC 471. Telecommunications Policy (3)

Students pursuing the Media Management specialty will complete a BS/BA degree with a total of 48-51 credits.

Media and Society Specialty (15):

Students in this specialty study the intersection of media and social life. Throughout history, new media have produced profound changes in human interaction. Family life, politics, commerce, religion, and the distribution of privileges have all been subject to fundamental revision in the wake of new technologies for communication. This specialty provides students with theoretical and practical understanding of the nature of these changes, and prepares them to anticipate and manage inevitable future changes as the media landscape continues to evolve. This specialty is particularly appropriate for students who seek careers in media research and criticism, graduate studies in media, and work in media policy.

COMM 368. Propaganda and Social Control (3)

COMM 482. The Media in Culture and Society (3)

COMM 484. Media Criticism (3)

NMC 330. The Meaning of Video Games (3)

NMC 340. Social Media Strategy (3)
 NMC 421. *Diffusion of Innovations (3)
 NMC 427. *Digital Pornography (3)
 NMC 435. Media Effects (3)

Students pursuing the Media and Society specialty will complete a BS/BA degree with a total of 48-50 credits.

Production Specialty (BFA Students Only) (65-72):

The production specialty is designed to provide a foundation in media aesthetics, story conceptualization and preproduction planning for linear and nonlinear/interactive projects, video production, sound design and 3D modeling and animation. Students are encouraged to explore their own creativity within a carefully constructed curriculum that serves as a basis for independent work and portfolio development. Faculty members include artists, videographers, editors and composers from professional production environments.

A BFA can be earned by completing the DCA Core Requirements and the Production Specialty requirements. Students completing a BFA do not need to complete BS/BA requirements and CLA Core requirements.

Foundation Course Work (41-42)

ART 101. *Introduction to the Visual Arts (4)
 ART 115. Foundations: 2-D (4)

ART 120. Foundations: Digital Imaging (3)

ART 121. Foundations: Computers in Visual Arts (3)

ART 122. Foundations: 4-D (4)

ART 131. Foundations: Drawing I (4)

ART 263. Digital Photography (4)

NMC 330. The Meaning of Video Games (3)

TA 242. Visual Principles of Theatre (3)

TA 346. Scene and Stage Design (3)

WR 407. Seminar: *Screenwriting* (3)

One of the following:

ART 206. *Introduction to Art History - Western (3)

FILM 125. *Introduction to Film Studies: 1945-Present (3)

FILM 245. *The New American Cinema (4)

FILM 265. *Films for the Future (4)

Production Course Work (select 8 courses) (24-30)

MUS 493. Basic Recording Techniques (3)

MUS 494. Intermediate Recording Techniques (3)

MUS 495. Advanced Recording Techniques (3)

MUS 496. Surround Sound Recording and Mastering (2)

NMC 302. Reporting (3)

NMC 305. Copyediting (3)

NMC 380. Pre-Production (3)

NMC 382. Studio and Multicamera Production (4)

NMC 383. Field Production (4)

NMC 409. Practicum (*variable credit, 3 required*) (3)

NMC 433. New Media Story Telling (3)

NMC 481. Post Production (4)

NMC 482. Documentary (4)

NMC 483. New Media 3-D (4)

NMC 484. New Media Animation (4)

Students pursuing the Digital Communication Arts Production BFA will take a total of approximately 98–107 total credits from the course work listed above to complete the major. The degree does not require the College of Liberal Arts Core or the college's BA/BS requirements. The requirements within the major exceed those of the CLA core making it redundant.

Additional Electives:

The following may be used as additional electives in combination with those listed above to augment individual learning goals and credits for all of the degree options presented:

- COMM 180. Introduction to the Rhetoric of the Film (3)
 NMC 401. Research and Scholarship (3–4)
 NMC 402. Independent Study (3–4)
 NMC 403. Thesis/Dissertation (3–4)
 NMC 404. Writing and Conference (3–4)
 NMC 405. Reading and Conference (3–4)
 NMC 406. Special Problems/Special Projects (3–4)
 NMC 407. Seminar (3–4)
 NMC 408. Workshop (3–4)
 NMC 410. Internship (3–4)
 NMC 499. Special Topics (3–4)
 TA 244. Scene Crafts (3)
 TA 245. Stage Lighting (3)
 TA 248. Fundamentals of Acting I (3)
 TA 249. Fundamentals of Acting II (3)
 TA 346. Scene and Stage Design (3)
 TA 351. Principles of Playwriting (3)
 TA 354. Fundamentals of Play Direction (3)

Complementary minors and secondary majors include Art, Music, Theatre Arts, Computer Science, Business and the International Studies degree. Additionally, students from other scientific and professional fields are increasingly interested in visual technological applications to analyze, interpret and communicate data. These students will find utility in digital communication arts course work and minors as well.

Total=48–51 credits for the BA/BS degrees

Total=98–107 credits for the BFA

MUSIC (BA, BS, CRED, HBA, HBS)

Departmental degree requirements are 47 credits, of which 24 must be upper division. **Note:** College of Liberal Arts allows only 12 credits of MUP courses to be applied toward a degree.

A grade of C– or better is required for all courses used to complete music major requirements. These courses cannot be taken with S/U grading.

Transfer students must demonstrate competency in the areas of music history, music theory, aural skills, and piano skills. Placement examinations in each of these areas must be completed by Wednesday of the first week of classes.

Required Core Classes for ALL options/emphases:

- MUS 177. Group Lessons, Piano (1)
 MUS 121, MUS 122, MUS 123. Literature and Materials of Music I (3,3,3)
 MUS 125, MUS 126. Literature and Materials of Music Lab I, II (1,1)
 MUS 135, MUS 136. Aural Skills I (1,1)
 MUS 221, MUS 222, MUS 223. Literature and Materials of Music (3,3,3)
 MUS 315. Introduction to Conducting (2)
 MUS 321. Literature and Materials of Music III (3)
 MUS 324. History of Western Music (3)
 MUS 325. *History of Western Music (3)
 MUS 326. History of Western Music (3)
 Upper-division Electives (10)

Total=47

SPEECH COMMUNICATION (BA, BS, CRED, HBA, HBS)

Students majoring in Speech Communication must choose between a Communication option and a Theatre Arts option. Both options function as stand-alone majors.

The **Communication option** consists of 48 credits of course work. Students who choose the Communication option will be required to satisfactorily complete an undergraduate prerequisite core before applying (through the

School of Arts and Communication) to the major. Students who are working on completing the prerequisite core are placed in pre-communication.

The **Theatre Arts option** consists of 51 credits of course work. Students in theatre arts do not need to complete the undergraduate prerequisite core required in the Communication option. The course requirements for students pursuing a Theatre Arts option are held to a minimum with the intention of allowing the student and his or her faculty advisor to devise a program most suited to the student's specific needs and objectives.

Students pursuing the Bachelor's degree in Speech Communication must successfully complete the requirements of either the Communication option (48 credits) **or** Theatre Arts option (51 credits); the requirements of the Liberal Arts Core (15 cr); the Oregon State Baccalaureate Core (48 credits); and the requirements for the BA or BS.

OPTIONS

COMMUNICATION OPTION

The Communication option in the School of Arts and Communication consists of 48 credits. The undergraduate prerequisite core must be successfully completed before the student applies to the major through the School of Arts and Communication. Students completing the prerequisite core are placed in pre-communication until then.

Prerequisite Core:

- COMM 111. *Public Speaking (3)
 COMM 114. *Argument and Critical Discourse (3)
 COMM 218. *Interpersonal Communication (3)
 Completion of the Writing I and Writing II requirements of the baccalaureate core.
 A cumulative GPA of 2.00 or better

Communication Option:

- COMM 320. Introduction to Rhetorical Theory (3)
 COMM 321. Introduction to Communication Theory (3)

Choose one Communication Theory course (3):

- COMM 418. ^Interpersonal Communication Theory and Research (3)
 COMM 422. ^Small Group Communication Theory and Research (3)
 COMM 426. Intercultural Communication: Theories and Issues (3)
 COMM 430. Theoretical Issues in Communication Theory (3)
 COMM 440. Theories of Conflict and Conflict Management (3)

Choose one Rhetorical Theory course (3):

- COMM 454. Advanced Argumentation (3)
 COMM 456. ^Rhetoric: 500 BC to 500 AD (3)
 COMM 458. ^Rhetoric: 500 AD to 1900 (3)
 COMM 459. ^Contemporary Theories of Rhetoric (3)

COMM 466. Ethics of Rhetoric (3) Choose one Methods course (3):

- COMM 414. Communication Research Methods (3)
 COMM 416. Ethnography of Communication (3)
 COMM 464. Rhetorical Criticism (3) or another methods course outside the Dept. of Speech Communication as approved by advisor.

- **Electives:** 24 credits of electives are required in the Communication option with the following stipulations.
- A minimum of 2.0 GPA in course work used for the option is required (including the prerequisite core).
- One Writing Intensive Course (WIC) in the major is required.
- Six (6) elective credits must be taken at the 400 level. Variable credit courses cannot be used for this requirement.
- **Limitations:** Only 3 credits maximum of lower-division courses will be allowed for the elective portion of this option.
- Only 6 credits maximum of variable credit course work will apply to this option.

THEATER ARTS OPTION

Through the Degree Partnership Program (dual admission/enrollment) with Linn-Benton Community College, the Theatre Arts program at Oregon State University is building closer ties with LBCC's drama program. As this innovative program grows, theatre students from both schools will have more performance and production opportunities with greater access to a variety of performance venues and theatre faculty.

The Theatre Arts program is currently undergoing revisions. Check with the school for details.

- TA 147. *Introduction to the Theatre (3)
 TA 244. Scenecrafts (3)
 TA 247. Stage Makeup (3)
 TA 248. Fundamentals of Acting (3)
 TA 344. Playscript Analysis (3)
 History/Theory/Criticism courses (15)
 Performance studies courses (21)

In addition to course work, all majors must work on a production crew, act in a production, and serve in a front-of-house position.

UNDERGRADUATE MINORS

ART HISTORY MINOR

Art minors may not elect to take required art courses on an S/U graded basis.

- ART 101. *Introduction to the Visual Arts (4)
 ART 204, ART 205, ART 206. *Introduction to Art History-Western (3,3,3)
 ART 207. *Indigenous Art of the Americas (3)
 Upper-division art history courses including at least 3 credits at the 400 level (15)

Total=31

COMMUNICATION MINOR

Communication minors must complete 27 credits, 18 of which must be upper division.

Requirements

COMM 111. *Public Speaking (3)
 COMM 114. *Argument and Critical Discourse (3)
 COMM 218. *Interpersonal Communication (3)
 COMM 320. Introduction to Rhetorical Theory (3)
 or COMM 321. Introduction to Communication Theory (3)
 One 400-level course in COMM (3)
 Additional 12 credits of upper-division COMM courses (12)

Students may not use any variable credit courses toward their minor. Minors must take courses used to fulfill the requirements for a letter grade. A minimum GPA of 2.00 must be earned in communication course work.

MULTIMEDIA MINOR**New Media Communications Program**

The Multimedia minor consists of 36 to 38 credits. It is possible for students to complete the minor in two years, making it accessible for transfer students, as well as those who take all four years at OSU. For students majoring in computer science or any other subject offered at OSU, the minor must include 27 credits not used as part of the student's major program; 12 of the 27 credits must be upper division. All courses for the Multimedia minor must be taken for graded credit.

NEW MEDIA COMMUNICATIONS MINOR**New Media Communications Program**

207 Gilkey Hall
 Oregon State University
 Corvallis, OR 97331-6202
 541-737-4580
 Email: nmc@oregonstate.edu
 Website: http://oregonstate.edu/cla/liberal_studies/new-media-communications

New Media Communications (NMC) minor focuses on mediated storytelling and the new media technology that makes it possible. This focus within the broader discipline of mediated communications capitalizes on the historic strengths of Oregon State University. NMC takes an innovative approach to the study of mediated communications. New Media Communications is devoted to the study of mediated communications and its impact on culture, technology and society.

Courses in the New Media Communications minor are designed to prepare students for a variety of careers in media and allied fields in which knowledge of and skills in mediated communications

are an integral part of professional activity. NMC offers students the opportunity to pursue a range of theoretical and practical courses in media.

An NMC minor will allow students from across campus to complement their chosen field of study with an understanding of mediated communications from a new media perspective. Students will better understand how to process information they receive about their chosen field and how to distribute information about their own work effectively in society. The minor in New Media Communications will assist students in attaining the background necessary for leadership roles in their chosen fields.

All courses for the New Media Communications minor must be taken for graded credit.

Core Requirements (15)

NMC 101. Introduction to New Media Communications (3)
 NMC 260. New Media Futures (3)
 NMC 320. History of Telecommunications (3)
 NMC 351. Visual Media Communications (3)
 NMC 409. Practicum (1,1,1)
 Electives (15–16)

Students must select 5 courses from the following list of electives. Students have the opportunity to focus their studies on a particular part of the discipline of new media communications.

NMC 383. Field Production (4)
 NMC 409. Practicum (1–3) (*may be taken for an additional total of 3 credits*)
 NMC 421. *Diffusion of Innovations (3)
 NMC 430. Media Theory (3)
 NMC 435. Media Effects (3)
 NMC 437. Mass Media and Society (3)
 NMC 440. Media Management (3)
 NMC 441. Media Entrepreneurship (3)

Total Requirements=30–31

Footnote:

* Baccalaureate Core Course

PHOTOGRAPHY MINOR

The Photography minor creates an opportunity for non-Photography majors to study and practice photography, digital imaging and collaborative digital arts practices. Through the study of a diverse range of photographic genres and techniques, students actively practice photography, develop critical-thinking skills, study the histories of photography and key photographic practitioners, have the option to experience other time-based media genres, and further their photography skills by creating professional-level projects.

The role of photography to improve creative thinking skills is invaluable for students studying in other fields where the role of creativity as an aspect of inventiveness and independent project generation is encouraged. Furthermore, a photography minor is an ideal

companion to students majoring in the Design fields or in Digital Media Arts - students in these areas already share several courses in common with art/photography students.

To qualify as a Photography Minor, you must declare the minor when filing the application for graduation, and you must have 27 credits in photography and art history at least 12 must be upper-division. For further information please contact the academic advisor.

Required Photography Courses (16 credits)

ART 263. Digital Photography (4)
ART 340. Darkroom Photography I (4)
ART 345. Intermediate Photography (4)
ART 347. Photography: Studio Lighting (4)

POPULAR MUSIC STUDIES MINOR

Also available via Ecampus.

The online Popular Music Studies minor, offered only via Ecampus, creates an opportunity for students to examine popular music as a cultural and social practice. The minor provides students with literacy in several popular music genres of their choice, including rock n' roll, hip hop, film music, reggae, Broadway music, music technology and jazz. Through the study of a diverse range of genres, stylistic practices, performance media, and music as a commercial enterprise, students will develop analytical and critical skills to examine musical meaning through the lens of community, music production, and identity.

This minor does not require an audition or ability to read music.

Choose 12 Lower-Division credits from below:

MUS 102. *Music Appreciation II: Periods and Genres: *Hip Hop. Theory and Practice* (3)
MUS 102. *Music Appreciation II: Periods and Genres: *Film Music. Theory and Practice* (3)
MUS 102. *Music Appreciation II: Periods and Genres: *Musical Theater* (3)

MUS 102. *Music Appreciation II: Periods and Genres: *Rock and Roll* (3)

MUS 102. *Music Appreciation II: Periods and Genres: *Jazz* (3)

MUS 102. *Music Appreciation II: Periods and Genres: *Reggae* (3)

MUS 102. *Music Appreciation II: Periods and Genres: *Introduction to Popular Music Theory and Practice* (3)

MUS 103. *Music Appreciation III: Great Composers: *The Beatles* (3)

MUS 103. *Music Appreciation III: Great Composers: *Bob Marley (Reggae)* (3)

MUS 103. *Music Appreciation III: Great Composers: *Bob Dylan (Folk)* (3)

MUS 103. *Music Appreciation III: Great Composers: *Madonna and Video Culture* (3)

MUS 108. *Music Cultures of the World (3)

Choose 15 Upper-Division from below:

MUS 402. Independent Study: Capstone Project (3)

MUS 410. Internship (3)

MUS 442. Genre Studies: *Advanced Studies in Popular Music Theory and Practice* (3)

MUS 442. Genre Studies: *Women in Popular Music* (3)

MUS 442. Genre Studies: *Advanced Studies in Hip Hop* (3)

MUS 442. Genre Studies: *Regional Studies in World Popular Music (India, Indonesia, Africa, Latin America)* (3)

MUS 442. Genre Studies: *Advanced Studies in Rock and Roll* (3)

MUS 442. Genre Studies: *The Blues and African American Music* (3)

MUS 442. Genre Studies: *Music Video, MTV and American Culture* (3)

MUS 443. Theory and Composition Studies: *Advanced Studies in Film and Gaming Music* (3)

MUS 493. Basic Recording Techniques (3)

Footnote:

* Baccalaureate Core Course

THEATER ARTS MINOR

Required

TA 144. Playreading (1) (*May be repeated once for a total of 2 credits*)

TA 147. *Introduction to the Theatre (3)

TA 244. Scenecrafts (3)

TA 248. Fundamentals of Acting (3)

TA 344. Playscript Analysis (3)

In addition, students choose 15 additional credits, 12 of which must be at the upper-division level.

Activity credits (TA 250–TA 350) may not be counted toward the minor.

Minors are strongly encouraged to participate fully backstage, on stage, and front-of-house.

Total=28

VISUAL ARTS MINOR

Art minors may not elect to take required art courses on an S/U graded basis.

ART 115. Foundation: 2-D (4)

ART 117. Foundation: 3-D (4)

ART 131. Foundations: Drawing I (4)

ART 234. Drawing II/Figure (4)

Studio courses in an approved program that includes at least 12 credits of upper-division courses (15)

Total=31

GRADUATE MINORS

ART GRADUATE MINOR

Graduate Areas of Concentration

Art history, fine arts, photography

The School of Arts and Communication offers graduate work leading to the Master of Arts in Interdisciplinary Studies (MAIS) and toward minors in other advanced degree programs. Emphasis may be in fine arts, art history, or photography. These fields offer sufficient depth to provide a strong minor.

MUSIC GRADUATE MINOR

Graduate Areas of Concentration

Composition, conducting, music education, performance

The School of Arts and Communication participates in the Master of Arts in Interdisciplinary Studies degree and Master of Arts in Teaching degree. Contact the school for entrance requirements for the MAT degree. Areas of specialization include performance, conducting, composition, music history, and music education.

Music Education

Through the School of Arts and Communication, graduate students may participate in the following programs: Professional Music Teacher Education, the Master of Arts in Teaching (MAT), the Master of Arts in Interdisciplinary Studies (MAIS), and the Master of Education (EdM) with a focus in music education. The school offers graduate courses in music, music education, and music performance. OSU's music education program is approved by state of Oregon Teachers Standards and Practices Commission (TSPC) and the National Council for Accreditation of Teacher Education (NCATE). With careful planning, students may complete both the initial and continuing teaching licensure requirements, as well as a master's degree. For more information, contact the Music Education Coordinator, Oregon State University, 101 Benton Hall, Corvallis, OR 97331.

SPEECH COMMUNICATION GRADUATE MINOR

Graduate Areas of Concentration

Interpersonal and group communication; rhetoric and social influence; theatre arts costume and scene design; theatre arts directing, performance, and management; theatre arts history, criticism/literature, and playwrighting

■ ART COURSES

ART 100. ART ORIENTATION (1). Introduction to the study of art and career options in fine arts, graphic design, photography, and art history.

ART 101. *INTRODUCTION TO THE VISUAL ARTS (4). An introductory lecture course using visual materials with emphasis on methods and motivations that generate the visual experience, both past and present. (FA) (Bacc Core Course)

ART 115. FOUNDATIONS: 2-D (4). Studio course that introduces the visual language, the elements of design, and the principles of organization. Emphasizes skills, concepts, and problem solving in the areas of two-dimensional design and color. (FA)

ART 117. FOUNDATIONS: 3-D (4). Studio course examining three-dimensional design elements and their spatial organization. Emphasizes innovative problem solving and exposure to varied media. Gives students a sound conceptual basis to apply to more advanced media-oriented courses. **PREREQS:** ART 115

ART 120. FOUNDATIONS: DIGITAL IMAGING (3). Capturing, processing, and publishing digital images. Image control and manipulation. Digital images in print and electronic media.

ART 121. FOUNDATIONS: COMPUTERS IN VISUAL ARTS (3). An introductory course covering computer software for drawing and page layout and applications in art and design.

ART 122. FOUNDATIONS: 4-D (4). Introduction to video art. Aesthetics, history, and techniques. Video as installation. Role of audience, race, gender, identity. Lec/lab. **PREREQS:** ART 120 and ART 121

ART 131. FOUNDATIONS: DRAWING I (4). Introductory studio course in drawing techniques with emphasis on developing skills in perception and visual organization. (FA)

ART 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ART 204. *INTRODUCTION TO ART HISTORY - WESTERN (3). A historical survey of architecture, painting, sculpture, and crafts, from prehistory to the present, with emphasis on the development of Western art. Recommended that sequence be taken in order. (H) (Bacc Core Course)

ART 205. *INTRODUCTION TO ART HISTORY - WESTERN (3). A historical survey of architecture, painting, sculpture, and crafts, from prehistory to the present, with emphasis on the development of Western art. Recommended that sequence be taken in order. (H) (Bacc Core Course)

ART 206. *INTRODUCTION TO ART HISTORY - WESTERN (3). A historical survey of architecture, painting, sculpture, and crafts, from prehistory to the present, with emphasis on the development of Western art. Recommended that the sequence be taken in order. (H) (Bacc Core Course)

ART 207. *INDIGENOUS ART OF THE AMERICAS (3). A historical survey of native arts of South, Central, and North America, including architecture, painting, sculpture, ceramics, textiles, basketry, and beadwork, from prehistory to present. (NC) (Bacc Core Course)

ART 208. *INTRODUCTION TO ASIAN ART (3). Introduces the distinctive, yet related, aesthetic traditions of South and Southeast Asia, Inner Asia, and East Asia. It focuses on architectural sites, sculptures, and paintings from prehistory to the present. (Bacc Core Course)

ART 215. COLOR IN THE VISUAL ARTS (4). Studio course following ART 115 and ART 117 that examines the properties of colors and their interaction. Emphasizes problem solving and the experimental use of color. **PREREQS:** ART 115

ART 234. DRAWING II/FIGURE (4). Drawing from the life model with emphasis on skill and

conceptual awareness as well as anatomical consideration. **PREREQS:** ART 131

ART 261. PHOTOGRAPHY I (4). Introductory studio course in photography with creative expression and innovative possibilities stressed. Includes problems in visual theory; demonstrations and lectures on both the technical and historical growth of the medium. Student must supply suitable 35mm camera. Lec/studio. (FA)

ART 263. DIGITAL PHOTOGRAPHY (4). Studio course in digital photography. The digital camera. Digital exposure. Digital color. Workflow. Digital output. Location lighting. Students must have the use of a digital single lens reflex camera. **PREREQS:** ART 115 and ART 120 are recommended.

ART 271. PRINTMAKING I (4). Introduction to the basic processes of printmaking, with options among relief, lithography, intaglio, screen printing and monotype. **PREREQS:** (ART 115 and ART 131)

ART 281. PAINTING I (4). Introductory studio course with emphasis on basic materials and techniques in painting. (FA) This course is repeatable for a maximum of 12 credits. **PREREQS:** ART 131

ART 291. SCULPTURE I (4). Studio course in basic materials and approaches used in sculpture; a foundation for further three-dimensional work. (FA) **PREREQS:** ART 117 and Art core strongly recommended.

ART 306. ADVISOR REVIEW (1). A review, conducted by the student's advisor and another faculty member of the student's choosing, of work produced to date in the student's area of concentration. Graded P/N. **PREREQS:** Placement Test and departmental approval required. For BFA students only.

ART 310. *EARLY CHINESE ART AND ARCHAEOLOGY (3). Introduces major forms of Chinese art from the Neolithic period to the Tang dynasty (618-907 CE) and related major archaeological finds. Stresses the materials and processes of making art, development of representational art, and the role of visual arts in an aristocratic and religious culture. (Bacc Core Course)

ART 313. *ART OF JAPAN (3). Surveys the arts of Japan from the prehistoric period to the twentieth century. (Bacc Core Course)

ART 331. DRAWING CONCEPTS (4). Studio course emphasizing drawing composition as an investigative, conceptualizing and communicative nonverbal language. Independent thinking, problem solving, and creative development encouraged. This course is repeatable for a maximum of 12 credits. **PREREQS:** ((ART 131* and ART 234**)) and (Placement Test or Placement Test)

ART 334. DRAWING III: FIGURE (4). Intermediate study of the human figure utilizing life models, the skeleton, and anatomy texts. Emphasis on gaining greater knowledge of the body's underlying structure and potential for aesthetic expression. This course is repeatable for a maximum of 12 credits. **PREREQS:** (ART 234 and (Placement Test or Placement Test)) and Art core curriculum.

ART 339. PROFESSIONAL PRACTICES IN PHOTOGRAPHY (3). Professional practices appropriate for photographic-artists and those planning to run a photographic business. Topics include portfolio development, presentation skills, project-planning, contracts, permissions, copyright, promotional campaigns, pricing, grants, exhibition opportunities, business structures, and marketing strategies. This course is repeatable for a maximum of 6 credits. **PREREQS:** ART 263 and an additional two photography courses are recommended as prerequisites for this course.

ART 340. DARKROOM PHOTOGRAPHY I (4). Studio course in black-and-white film exposure and development, and printing in the darkroom. The medium of silver-based black-and-white

photography is explored as a communication mode and art form. Historical, conceptual, technical and legal aspects of traditional wet processing are surveyed. Access to a single lens reflex (SLR) film camera is required. Course fee. **PREREQS:** ART 263 Digital Photography is required for Photography majors. No prerequisite or prior darkroom experience is required for non-Photography majors.

ART 341. PHOTOGRAPHIC TECHNIQUES (3). Demonstration of the zone system, photographic chemistry, and archival processes. **PREREQS:** (Placement Test or Placement Test) and Art core curriculum and ART 262

ART 345. INTERMEDIATE PHOTOGRAPHY (4). Emphasis is on both technical and aesthetic expression of digital color photography, from initial image capture, color management to finished print along with color symbolism and composition. Exploration of narrative, sequencing and image-series concepts. Introduction to contemporary color photographers. Lab. **PREREQS:** ART 263

ART 346. PHOTO ILLUSTRATION I (3). Studio lighting. The 4x5 view camera. Sheet film. Black-and-white and color illustration. **PREREQS:** (Placement Test or Placement Test) and ART 262 and Art core curriculum

ART 347. PHOTOGRAPH: STUDIO LIGHTING (4). Practical studio class surveying the basic principles and application of light in the creation of photographs. The development of craft and technique inside the studio will be emphasized but formal and conceptual considerations related to light and photography will also be explored. **PREREQS:** ART 263 and ART 345

ART 348. CONCEPTS IN DIGITAL IMAGING (4). Approaches to non-traditional and the manipulated image in digital photography with an emphasis on producing personal imagery. Introduction to the history of the manipulated image in photography and to contemporary approaches to digital photography. **PREREQS:** ART 263 and ART 121 is recommended as some prior Photoshop knowledge is required.

ART 349. VIDEO ART (4). Studio course in video art and time-based media projects. Emphasis on experimental approaches to video art in a contemporary art context, linear and non-linear video production and the projection and screening of video art projects. Introduction to the history of video art as an art form. Lec/studio. **CROSSLISTED** as NMC 349. This course is repeatable for a maximum of 8 credits. **PREREQS:** ART 122 and ART 263 and ART 345

ART 350. PHOTOGRAPHY FOR PUBLICATION (4). An introduction to reportorial photography. Shooting and editing for content. Special techniques and processes. Basic photographic layout. History, law, and ethics. **PREREQS:** (ART 261 and (Placement Test or Placement Test) and ART 262 and Art core curriculum

ART 351. INSTALLATION (4). Studio/lecture course designed to acquaint the student with the possibilities of using non-traditional means such as site, time, and interaction to communicate ideas. **PREREQS:** (ART 291 and (Placement Test or Placement Test) and foundation curriculum.

ART 354. ALTERNATIVE PROCESSES IN PHOTOGRAPHY (4). Historical photographic printing methods in use today e.g. cyanotype, gum bichromate and more. Use of digital and analog negatives, mixing emulsions and coating paper by hand. **PREREQS:** ART 263 and ART 345 and ART 340

ART 360. HISTORY OF ART (3). Early Renaissance art. Lecture course on the principal stylistic manifestations of European architecture, painting, and sculpture from the late Middle Ages to 1750. **PREREQS:** ART 204 and ART 205 and ART 206

ART 361. HISTORY OF ART (3). High Renaissance art and mannerism. Lecture

course on the principal stylistic manifestations of European architecture, painting, and sculpture from the late Middle Ages to 1750. This course is repeatable for a maximum of 6 credits. **PREREQS:** ART 204 and ART 205 and ART 206

ART 363. HISTORY OF ART (3). Baroque art. Lecture course on the principal stylistic manifestations of European architecture, painting, and sculpture from the late Middle Ages to 1750. This course is repeatable for a maximum of 6 credits. **PREREQS:** ART 204 and ART 205 and ART 206

ART 364. HISTORY OF ART (3). Late eighteenth-century neoclassicism and the nineteenth century. Lecture course covering the principal movements and trends in architecture, painting, and sculpture in Europe and America since 1750. This course is repeatable for a maximum of 6 credits. **PREREQS:** ART 204 and ART 205 and ART 206

ART 365. HISTORY OF ART (3). Twentieth-century art from 1900 to 1945. Lecture course covering the principal movements and trends in architecture, painting, and sculpture in Europe and America. **PREREQS:** ART 204 and ART 205 and ART 206

ART 366. HISTORY OF ART (3). Art since 1945. Lecture course covering the principal movements and trends in architecture, painting, and sculpture in Europe and America. **PREREQS:** ART 204 and ART 205 and ART 206

ART 367. *HISTORY OF DESIGN (3). A survey of the impact of technology on the visual qualities of graphic, advertising, fashion, architecture, and industrial design from the Victorian Arts and Crafts Movement to the computer age. (Bacc Core Course)

ART 368. ^HISTORY OF PHOTOGRAPHY (3). The development of photographic processes and applications. Influential figures. From the early beginnings to contemporary trends. (Writing Intensive Course)

ART 375. PRINTING: RELIEF (4). Studio course in relief printmaking with emphasis on linocut and woodcut; may include other relief processes, i.e. photo polymer plate. Black-and-white and color. **PREREQS:** (Placement Test or Placement Test) and Art core curriculum.

ART 376. PRINTMAKING: INTAGLIO (4). Studio course in intaglio printmaking with emphasis on drypoint, line etching, aquatint, softground and photo process. Black-and-white and possibly color for final project. **PREREQS:** (Placement Test or Placement Test) and Art core curriculum.

ART 377. PRINTMAKING: LITHOGRAPHY (4). Studio course in lithographic printmaking with emphasis on graining the stone, drawing with crayon and tusche, etching and reworking, inking and printing lithographic limestone. Black-and-white and possibly color for final project. **PREREQS:** (Placement Test or Placement Test) and Art core curriculum.

ART 378. PRINTMAKING: MONOTYPE (4). Studio course in monotype printmaking with emphasis on drawing/painting with brushes, oil pastels, watercolors, water-based crayons, inking with a lithographic roller and printing with an etching press. Black-and-white and color. **PREREQS:** (Placement Test or Placement Test) and Art core curriculum.

ART 379. PRINTMAKING: SCREEN PRINTING (4). Studio course in screen printing with emphasis on paper stencil, drawing fluid and photo emulsion processes. Students are exposed to a range of techniques and concepts are encouraged to investigate personal motivations while making multiple color prints. **PREREQS:** (ART 115 and (Placement Test or Placement Test) and Art core curriculum. ART 100, ART 101, ART 117, ART 131, ART 204, ART 205, ART 206 are recommended. Or instructor approval.

ART 381. PAINTING THE FIGURE (4). Studio course with emphasis on painting from the live

model; understanding the figure in terms of color, form and composition, the figure as symbol, implied narrative and vehicle of expression. This course is repeatable for a maximum of 9 credits. **PREREQS:** (ART 281 and (Placement Test or Placement Test) and ART 234 and Art core curriculum.

ART 382. PAINTING II: CONCEPTS (4). Painting with emphasis on experimentation and an exploratory investigation of mixed media, new media, collage, and assemblage, utilizing either representation or abstraction. This course is repeatable for a maximum of 8 credits. **PREREQS:** (ART 281 and (Placement Test or Placement Test) and Art core curriculum.

ART 383. PAINTING II: ABSTRACT AND MULTIMEDIA (4). Intermediate studio course with emphasis on contemporary directions in painting: abstraction and non-literal approaches. This course is repeatable for a maximum of 12 credits. **PREREQS:** (ART 281 and (Placement Test or Placement Test) and Art core curriculum.

ART 384. PAINTING II: NEW GENRE (4). Exploration of current directions in painting using traditional and non-traditional concepts and techniques. This course is repeatable for a maximum of 12 credits. **PREREQS:** (ART 281 and (Placement Test or Placement Test)

ART 385. PAINTING III: ENCAUSTICS (4). Exploration and application of a variety of traditional and non-traditional techniques using encaustics paint; beeswax and pigment fused to a surface. **PREREQS:** ART 131 and ART 281 recommended or instructor approval.

ART 386. A CULTURAL HISTORY OF AMERICAN ART AND LITERATURE: PART I (3). The first in an interdisciplinary sequence of courses that examines the development and interrelationships of American art and literature from contact to the present. ART 386, Part I, covers Conquest to Civil War. **CROSSLISTED** as ENG 386. **PREREQS:** Sophomore standing.

ART 387. A CULTURAL HISTORY OF AMERICAN ART AND LITERATURE: PART II (3). The second course an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. ART 387, Part II, covers Civil War to Harlem Renaissance. **CROSSLISTED** as ENG 387. **PREREQS:** Sophomore standing.

ART 388. A CULTURAL HISTORY OF AMERICAN ART AND LITERATURE: PART III (3). The second course an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. ART 388, Part III, covers Great Depression to Postmodernity. **CROSSLISTED** as ENG 388. **PREREQS:** Sophomore standing.

ART 391. SCULPTURE II (4). Intermediate studio course with emphasis on developing greater skills and technical knowledge in moldmaking, welding, carving, plaster or metal casting. This course is repeatable for a maximum of 12 credits. **PREREQS:** (ART 291 and (Placement Test or Placement Test) and Art core curriculum.

ART 395. SPECIAL TOPICS IN EARLY ART HISTORY (3). This course is repeatable for a maximum of 99 credits.

ART 396. SELECTED TOPICS IN MODERN ART HISTORY (3). This course is repeatable for a maximum of 99 credits.

ART 397. SELECTED TOPICS IN GLOBAL ART HISTORY (3). This course is repeatable for a maximum of 99 credits.

ART 398. SPECIAL TOPICS IN ART HISTORY (3). This course is repeatable for a maximum of 99 credits.

ART 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PREREQS: Passing fine arts portfolio or graphic arts portfolio. Open to non-Art majors.

ART 400. THE DISCERNING PEN: ART CRITICISM (3). Writing on art history provides students with an opportunity to write about art using three distinct structures and styles while drawing on the student's own ideas and opinions. **PREREQS:** (ART 101 or WR 121) and ART 200 and ART 206)

ART 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** (Placement Test or Placement Test) and Departmental approval required.

ART 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** (Placement Test or Placement Test) and Departmental approval required.

ART 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** (Placement Test or Placement Test) and Departmental approval required.

ART 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** (Placement Test or Placement Test) and Departmental approval required.

ART 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** (Placement Test or Placement Test) and Departmental approval required.

ART 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** (Placement Test or Placement Test) and ART 206 and departmental approval required.

ART 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** (Placement Test or Placement Test) and Departmental approval required.

ART 409. PRACTICUM STUDENT MEDIA (1). Practical workshop class offering experiential learning in student media on the Oregon State University campus. This course is repeatable for a maximum of 12 credits.

ART 410. INTERNSHIP (1-16). A one-quarter residency with an appropriate, approved agency or organization where a student may receive practical experience related to the objectives of the Department of Art. The intern observes and produces; the work is supervised and evaluated, both by the agency and the art faculty. This course is repeatable for a maximum of 16 credits. **PREREQS:** (Placement Test or Placement Test) and Departmental approval required.

ART 411. ^CONTEMPORARY ISSUES IN ART (3). Examination of relevant issues and realities facing working artists today through research projects, writing, gallery visits, guest lectures, videos and panel discussions. (Writing Intensive Core) **PREREQS:** Placement Test and Art core curriculum plus 12 credits of upper-division studio credits.

ART 415. ART FOR TEACHERS I (4). A studio course covering basic art materials and techniques. Integrates aesthetics and art criticism, creating art, and the cultural and historical context of works of art for K-12. May be taken in any order. **PREREQS:** Fine Arts Portfolio Review (ART1) and Graphic Design Portfolio Review (ART2)

ART 416. ART FOR TEACHERS II (4). A studio course covering basic art materials and techniques. Integrates aesthetics and art criticism, creating art, and the cultural and historical context of works of art for K-12. May be taken in any order. **PREREQS:** (Placement Test or Placement Test)

ART 418. PORTFOLIO SEMINAR (2). An advanced lecture course providing an overview of pertinent issues in creating a professional graphic design portfolio. Graded P/N. **PREREQS:** Placement Test and Junior block in graphic design.

ART 422. NEW MEDIA: INTERACTIVE (4). An advanced course designing digital experiences with emphasis on innovative navigation, architectural structures, theoretical, and historical issues of new media. **PREREQS:** Placement Test and junior block in graphic design and CS 295

ART 431. DRAWING IV (3-5). Development of an individual approach to the varied aspects of drawing, emphasis on exploration of traditional and contemporary techniques and styles. Course offered 3 to 5 credits per term. This course is repeatable for a maximum of 15 credits. **PREREQS:** (Placement Test or Placement Test) and 9 credits of ART 331.

ART 434. DRAWING IV/FIGURE (3-5). Development of an individual approach to the varied aspect of figure drawing; emphasis on exploration of traditional and contemporary techniques and styles. Course offered 3-5 credits per term; maximum 15 credits. Departmental approval required for 5 credits. This course is repeatable for a maximum of 15 credits. **PREREQS:** (Placement Test or Placement Test) and 9 credits of ART 334.

ART 441. PHOTOGRAPHY III (3-5). Using the camera as a tool to sharpen aesthetic and visual perception. This course is repeatable for a maximum of 15 credits. **PREREQS:** ((ART 341 and ART 342 and ART 343)) and (Placement Test or Placement Test) and junior or senior standing.

ART 445. PHOTO ILLUSTRATION II (3). Advanced projects in studio illustration. **PREREQS:** (Placement Test or Placement Test) and ART 346

ART 446. DOCUMENTARY PHOTOGRAPHY (3). An intensive shooting course in 35mm photography designed to develop skill in telling stories using pictures. Single picture and multiple picture stories. This course is repeatable for a maximum of 9 credits. **PREREQS:** (ART 350 and (Placement Test or Placement Test) and ART 350

ART 456. PORTFOLIO-PHOTOGRAPHY/VIDEO ART (4). Culmination-level course for the creation of an exhibition-level photographic portfolio or other artistic product using lens-based media. Taught using lectures, critiques, readings, writing and self-reflection. This course is repeatable for a maximum of 12 credits. **PREREQS:** ART 340 and ART 345 and ART 347 and junior or senior standing.

ART 460. HISTORY OF AMERICAN ART (3). Specialized study of the visual arts in the United States focusing on such issues as landscape, mass culture, and American responses to European culture. Art and ideas from the colonial period to 1900. Not offered every year. **PREREQS:** 9 credits of art history and American literature or American history.

ART 461. HISTORY OF AMERICAN ART (3). Specialized study of the visual arts in the United States focusing on such issues as landscape, mass culture, and American responses to European culture. American modernism since 1900. Not offered every year. **PREREQS:** 9 credits of art history and American literature or American history.

ART 462. DIRECTIONS AND ISSUES IN CONTEMPORARY ART (3). Specialized study of current trends, developments, and critical issues, including the study of new media such as video and photography, as they manifest themselves in the contemporary art world. May be repeated with different topics. Not offered every year. This course is repeatable for a maximum of 9 credits. **PREREQS:** 9 credits of art history or instructor approval required.

ART 463. TOPICS IN RENAISSANCE AND BAROQUE ART (3). Specialized study of selected areas of special interest, including such topics as Michelangelo, Leonardo da Vinci, Bernini, and art in the Medici's Florence. Subject matter may vary year to year. Not offered every year. This course is repeatable for a maximum of 6 credits.

PREREQS: 9 credits of art history or instructor approval required.

ART 464. CULTURAL STUDIES OF THE MUSEUM (3). Overview of the history, visual culture, and cultural significance of the Western museum. Special attention paid to the development of the art museum and artist's projects that pertain to museums. **PREREQS:** 9 credits of art history or instructor approval required.

ART 465. NATIVE AMERICAN ART (3). Northwest Coast art. Courses covering the principal media, styles, and cultural influences in Native American arts from prehistory to the present. Not offered every year. (NC)

ART 467. NATIVE AMERICAN ART (3). Plains art. Courses covering the principal media, styles, and cultural influences in Native American arts from prehistory to the present. Not offered every year. (NC)

ART 469. ^METHODS AND THEORY OF ART HISTORY (3). Seminar designed to improve writing and library skills, develop interdisciplinary approaches, and explore art historical theory from Plato to the present. **PREREQS:** 9 credits of art history or instructor approval required.

ART 475. PRINTMAKING STUDIO (3-5). Studio workshop in relief, intaglio, lithographic, and silkscreen media on an individual project basis. Course offered 3-5 credits per term; maximum 15 credits. This course is repeatable for a maximum of 15 credits. **PREREQS:** (Placement Test or Placement Test) and 9 credits of 300-level printmaking.

ART 479. PRINTMAKING: ADVANCED SCREEN PRINTING (4). Studio course in screen printing with an emphasis on photo emulsion processes. Students are encouraged to integrate these processes with other art-making methods in their creative work. This course is repeatable for a maximum of 12 credits. **PREREQS:** (ART 379 and (Placement Test or Placement Test)

ART 481. PAINTING III (3-5). Development of individual interests and directions in painting. Course offered 3-5 credits per term; maximum 15 credits. This course is repeatable for a maximum of 15 credits. **PREREQS:** (Placement Test or Placement Test) and 9 credits of 300-level painting.

ART 491. SCULPTURE III (3-5). Development of individual interests and directions in sculpture. Course offered 3-5 credits per term; maximum 15 credits. This course is repeatable for a maximum of 15 credits. **PREREQS:** (Placement Test or Placement Test) and 9 credits of 300-level sculpture.

ART 494. SPECIAL TOPICS IN EARLY ART HISTORY (3). This course is repeatable for a maximum of 99 credits.

ART 495. EXHIBITION DESIGN (1). Participatory experience in art gallery exhibition design working in Fairbanks Gallery. Includes specialized study in visual design, lighting, and technical installation. Course offered 1 credit per term, maximum 3 credits. This course is repeatable for a maximum of 3 credits. **PREREQS:** (Placement Test or Placement Test)

ART 496. SELECTED TOPICS IN MODERN ART HISTORY (3). This course is repeatable for a maximum of 99 credits.

ART 497. SELECTED TOPICS IN GLOBAL ART HISTORY (3). This course is repeatable for a maximum of 99 credits.

ART 498. SPECIAL TOPICS IN ART HISTORY (3). This course is repeatable for a maximum of 99 credits.

ART 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits. **PREREQS:** (Placement Test or Placement Test)

ART 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum

of 16 credits. **PREREQS:** Departmental approval required.

ART 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ART 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

ART 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ART 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ART 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** ART 206 and departmental approval required.

ART 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ART 510. INTERNSHIP (1-12). A one-quarter residency with an appropriate, approved agency or organization where a student may receive practical experience related to the objectives of the Department of Art. The intern observes and produces; the work is supervised and evaluated, both by the agency and the art faculty. This course is repeatable for a maximum of 15 credits. **PREREQS:** Departmental approval required.

ART 515. ART FOR TEACHERS I (4). A studio course covering basic art materials and techniques. Integrates aesthetics and art criticism, creating art, and the cultural and historical context of works of art for K-12. May be taken in any order.

ART 516. ART FOR TEACHERS II (4). A studio course covering basic art materials and techniques. Integrates aesthetics and art criticism, creating art, and the cultural and historical context of works of art for K-12. May be taken in any order.

ART 546. DOCUMENTARY PHOTOGRAPHY (3). An intensive shooting course in 35mm photography designed to develop skill in telling stories using pictures. Single picture and multiple picture stories. Lec/lab. This course is repeatable for a maximum of 9 credits. **PREREQS:** ART 350

ART 556. PORTFOLIO-PHOTOGRAPHY/VIDEO ART (4). Culmination-level course for the creation of an exhibition-level photographic portfolio or other artistic product using lens-based media. Taught using lectures, critiques, readings, writing and self-reflection. This course is repeatable for a maximum of 12 credits. **PREREQS:** junior or senior standing.

ART 562. DIRECTIONS AND ISSUES IN CONTEMPORARY ART (3). Specialized study of current trends, developments, and critical issues, including the study of new media such as video and photography, as they manifest themselves in the contemporary art world. Not offered every year. May be repeated with different topics. This course is repeatable for a maximum of 9 credits. **PREREQS:** 9 credits of art history or instructor approval required.

ART 564. CULTURAL STUDIES OF THE MUSEUM (3). Overview of the history, visual culture, and cultural significance of the Western museum. Special attention paid to the development of the art museum and artist's projects that pertain to museums. **PREREQS:** 9 credits of art history or instructor approval required.

ART 565. NATIVE AMERICAN ART (3). Northwest Coast art. Courses covering the principal media, styles, and cultural influences in Native American arts from prehistory to the present. Not offered every year. (NC)

ART 567. NATIVE AMERICAN ART (3). Plains art. Courses covering the principal media, styles, and cultural influences in Native American arts

from prehistory to the present. Not offered every year. (NC)

ART 569. METHODS AND THEORY OF ART HISTORY (3). Seminar designed to improve writing and library skills, develop interdisciplinary approaches, and explore art historical theory from Plato to the present. **PREREQS:** 9 credits of art history or instructor approval required.

ART 581. PAINTING III (3-5). Development of individual interests and directions in painting. Course offered 3 to 5 credits per term; maximum 15 credits. This course is repeatable for a maximum of 15 credits. **PREREQS:** 9 credits of 300-level painting.

ART 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.

■ COMMUNICATION COURSES

COMM 111. *PUBLIC SPEAKING (3). Public communication as it relates to informative and persuasive discourse. The theory and practice of public speaking in informative and persuasive contexts. Lec/rec. (Bacc Core Course)

COMM 111H. *PUBLIC SPEAKING (3). Public communication as it relates to informative and persuasive discourse. The theory and practice of public speaking in informative and persuasive contexts. Lec/rec. (Bacc Core Course) **PREREQS:** Honors College approval required.

COMM 114. *ARGUMENT AND CRITICAL DISCOURSE (3). Examination of argumentation as a part of human interaction and investigation. The course emphasizes the processes by which people give reasons to gain adherence and to justify beliefs and actions. The course includes readings, writing, and presentations concerned with the nature of arguments, processes of arguing, and argument criticism. Lec/rec. (Bacc Core Course)

COMM 114H. *ARGUMENT AND CRITICAL DISCOURSE (3). Examination of argumentation as a part of human interaction and investigation. The course emphasizes the processes by which people give reasons to gain adherence and to justify beliefs and actions. The course includes readings, writing, and presentations concerned with the nature of arguments, processes of arguing, and argument criticism. Lec/rec. (Bacc Core Course) **PREREQS:** Honors College approval required.

COMM 180. INTRODUCTION TO THE RHETORIC OF THE FILM (3). The motion picture from prephotographic eras to the present; individuals responsible for major advances in theory and technique. The motion picture and social influence. Films viewed for discussion and analysis. Film fee required.

COMM 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

COMM 211X. COMMUNICATING ONLINE (3). Introduction to communicating online via an application of communication theory to online communication processes. Students will learn appropriate theory and apply theory to online communication contexts. Offered via Ecampus only.

COMM 218. *INTERPERSONAL COMMUNICATION (3). Introduction to dyadic and relational communication. Overview of current research in such areas as verbal and nonverbal messages, self-concept and perception, culture and gender stereotypes and styles, relational development and dissolution, deception, compliance gaining and conflict management. (Bacc Core Course)

COMM 218H. *INTERPERSONAL COMMUNICATION (3). Introduction to dyadic and relational communication. Overview of current research in such areas as verbal and nonverbal messages, self concept and perception, culture and gender stereotypes and styles, relational

development and dissolution, deception, compliance gaining and conflict management. (Bacc Core Course) **PREREQS:** Honors College approval required.

COMM 221. FORENSICS (3). Laboratory experience in debate, public speaking, and interpretation of literature. Preparation for intercollegiate debate and forensics participation.

COMM 280. MEDIA COMMUNICATION IN THE INFORMATION AGE (3). A survey of the traditional media of mass communication and the new and emerging media technologies: their development, role in contemporary society and impact upon the public. The influence of mediated communication upon living in the information society. (SS)

COMM 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

COMM 312. ADVANCED PUBLIC SPEAKING (3). Advanced theory and practice in public speaking. Simulated public speaking situations, audience analysis, and rhetorical strategies will be emphasized. Students will prepare and present a variety of public speeches. **PREREQS:** (COMM 111 or COMM 111H or COMM 114 or COMM 114H)

COMM 314. ARGUMENTATION (3). Concepts and processes of argumentation, systems of logic, critical analysis of contemporary efforts to influence. Examination of arguing to gain adherence and argumentation as a way of knowing. Development of cases and argument briefs for presentation. (H) **PREREQS:** (COMM 114 or COMM 114H)

COMM 316. ADVANCED PERSUASION (3). Advanced theory and practice in persuasion, with evidence on social and behavioral science research. Examination of the cognitive and affective aspects of persuasion, focusing particularly on the audience. Consideration of persuasion in interpersonal relations, organizations, public advocacy, and public relations. (H) **PREREQS:** COMM 111

COMM 318. ADVANCED INTERPERSONAL COMMUNICATION (3). Advanced theory and practice in communication in interpersonal relations. (SS) **PREREQS:** (COMM 218 or COMM 218H)

COMM 320. INTRODUCTION TO RHETORICAL THEORY (3). Introduction to the basic theories of rhetoric, as well as the background of rhetoric as a discipline in speech communication. (H)

COMM 321. INTRODUCTION TO COMMUNICATION THEORY (3). Introduction to 20th century models, theories, and empirical research programs in communication. Survey of selected theories and social scientific methods across diverse contexts in communication. (SS)

COMM 322. SMALL-GROUP PROBLEM SOLVING (3). Theory and practice of small-group decision making. Group processes of problem solving and decision by consensus. The history and role of group problem solving in a democratic society. Group power, leadership, and roles. Experience with problems of fact, value, and policy. (SS) **PREREQS:** COMM 218

COMM 323. COMMUNITY DIALOGUE (4). Examination of the nature and role of community dialogue in formal and informal social scenes in which participants communicate differing perspectives, values and beliefs. Taught at OSU-Cascades only. **PREREQS:** Sophomore standing.

COMM 324. COMMUNICATION IN ORGANIZATIONS (3). Examination of the nature and role of communication in formal and informal organizations. Introductory survey of central issues in the study of organizations, including corporate communication, leadership, organizational effectiveness, power, organizational culture, management styles, organizational conflict, and decision making. (SS)

COMM 325. COMMUNICATING LEADERSHIP (4). Theory and practice of communicating leadership. Communication processes of facilitating productive climates, innovative and creative leading, and goal-oriented community leading. Offered at OSU-Cascades only. **PREREQS:** Sophomore standing.

COMM 326. INTERCULTURAL COMMUNICATION (3). Perspectives, theories, and experiences of communication in intercultural, cross-cultural, and pan-cultural relations. (SS)

COMM 328. NONVERBAL COMMUNICATION (3). The study of human communication behavior that transcends the spoken and written word; nondiscursive symbolism. The course examines the relationship between nonverbal and verbal communication behavior and nonverbal communication skill development. Topics addressed include space, distance, the environment, touch, gesture, facial expression, and gaze as communication. (SS)

COMM 350. DEBATE AND FORENSICS WORKSHOP (1-3). Laboratory experience in debate, public speaking, and interpretation of literature. Preparation for intercollegiate debate and forensics participation. This course is repeatable for a maximum of 15 credits. **PREREQS:** Departmental approval required.

COMM 368. PROPAGANDA AND SOCIAL CONTROL (3). Case studies, examples, and analyses of direct and indirect influences upon thought, belief, and action involving mass media of communication, including film, theatre, radio, television, posters, and art objects. Historical approach using film, tape, and recordings for student analysis and discussion. (SS)

COMM 372. VISUAL RHETORIC (3). The course will survey the major theories of semiotics. Using semiotics as a foundation, students will explore the nature of the rhetoric of the visual image. (H)

COMM 380. IMAGE AND MYTH IN FILM (3). Film as a medium for creating, reflecting, and defining values, roles, styles, conflicts, problems, strategies, expectations, and institutions in American life. Various methods of analysis and evaluation are applied to film as an agent and artifact. Film images of the frontier, war, women, men, justice, America, progress, and beauty are explored. Film fee required. (H)

COMM 382. TELEMEDIA DESIGN AND PRODUCTION (4). Study and practice of communication through telemedia (video, audio, computer), and emphasis on the principles of telemedia authorship. The study includes telemedia distribution systems and effects on audiences. Lec/lab.

COMM 385. COMMUNICATION AND CULTURE IN CYBERSPACE (3). Covers history and culture of the Internet, as well as social, political, and economic issues of computer-mediated communication. (H)

COMM 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

COMM 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

COMM 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

COMM 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

COMM 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

COMM 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

COMM 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

COMM 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

COMM 410. COMMUNICATION INTERNSHIP (1-16). An assignment in a private or public business or agency. The student observes or works in one or more departments of the enterprise, perhaps in one area of interest or specialization (e.g., public relations, training, personnel, research and planning). Work is supervised by the agency staff, supervising school faculty members(s) provide academic evaluation. 12 credits maximum. This course is repeatable for a maximum of 12 credits. **PREREQS:** Major with minimum of 21 credits and school approval required.

COMM 412. TOPICS IN SPEECH COMMUNICATION (3). Contemporary issues in speech communication: appraisal and discussion of current theories, trends, research methods, problems, or applications. This course is repeatable for a maximum of 9 credits. **PREREQS:** 9 credits of speech communication.

COMM 414. COMMUNICATION RESEARCH METHODS (3). Communication research and its relationship to theory. Quantitative and qualitative methods of investigation in speech communication. Experimental and non-experimental research design; naturalistic observation; issues of reliability and validity; statistical analysis. Standards and principles of writing and reporting research. **PREREQS:** COMM 321 and /or instructor approval required.

COMM 416. ETHNOGRAPHY OF COMMUNICATION (3). Study and practice of using ethnography of communication as a research method for developing theory in communication studies; topics include data collection, analysis, and writing ethnographic reports. (SS) **PREREQS:** COMM 321

COMM 418. ^INTERPERSONAL COMMUNICATION THEORY AND RESEARCH (3). Current theory, research, and practice in interpersonal communication. Issues addressed may include compliance gaining, nonverbal behavior, family communication, gender issues, impression formation, rules, and human relations. (SS) (Writing Intensive Course) **PREREQS:** COMM 321 and /or instructor approval required.

COMM 422. ^SMALL GROUP COMMUNICATION THEORY AND RESEARCH (3). Current theory, research, and practice in communication and small group communication. Issues addressed may include leadership, decision making, problem solving, training, and human relations. (SS) (Writing Intensive Course) **PREREQS:** COMM 321 and /or instructor approval required.

COMM 425. COMMUNICATION AND YOUTH OUTREACH (4). Examines the role of communication outreach when working with youth. Study and examination of applied youth communication theory and research. Topics may include establishing communication boundaries, communicating identity, anti-smoking and anti-drug campaigns, social exclusion, effects of media, and pro-social communication. Students are required to volunteer in a youth context coordinated by the instructor. Taught only on the OSU-Cascades Campus.

COMM 426. INTERCULTURAL COMMUNICATION: THEORIES AND ISSUES (3). Advanced study in intercultural communication theoretical developments and research directions. Topics addressed may include intercultural research methods, training, language and culture, acculturation, and intercultural effectiveness. (SS) **PREREQS:** (COMM 321 and COMM 326) and /or instructor approval required.

COMM 427. CULTURAL CODES IN COMMUNICATION (3). Study and examination of the contextualized use of communication within speech communities and cultures; topics include the cultural patterning of communication and cultural communication theory.

COMM 430. THEORETICAL ISSUES IN COMMUNICATION INQUIRY (3). Review of conceptual, philosophical, ontological, epistemological, and methodological issues in the development of theories in human communication; application to contemporary, empirical human communication research. (SS) **PREREQS:** COMM 321 and /or instructor approval required.

COMM 432. GENDER AND COMMUNICATION (3). Investigation of impact of sex and gender on communication in conflict, decision-making, leadership, nonverbal messages, language, and interpersonal relationships. Focus on definitions of sex and gender in regard to knowledge, social constructs, and self-development. **PREREQS:** COMM 321 and /or instructor approval required.

COMM 440. THEORIES OF CONFLICT AND CONFLICT MANAGEMENT (3). Conflict on a variety of levels: intrapersonal, interpersonal, group, public, and social. Conflict in a variety of contexts: relationships, family, organizations, community, and society. Constructive and destructive means of confronting and managing conflict; social and psychological aspects of conflict; conflict analysis; causes of conflict; conflict and peace, social order, and social change; case studies of conflict. (SS) **PREREQS:** COMM 321 or instructor approval required.

COMM 442. BARGAINING AND NEGOTIATION PROCESSES (3). Theory and practice of bargaining and negotiation as means of settling disputes, with emphasis on the role of communication. Strategies and tactics of distributive and integrative bargaining orientations. Negotiation preparation and experience through case studies and simulations. (SS) **PREREQS:** COMM 321 or instructor approval required.

COMM 444. THIRD PARTIES IN DISPUTE RESOLUTION: MEDIATION & ARBITRATION (3). Philosophies, strategies, practices, and characteristics of mediation and arbitration processes in the settlement of conflicts and disputes. Study of the role of the third party neutral in the peace making process. Case studies and simulations in mediation and arbitration. (SS) **PREREQS:** COMM 321 or instructor approval required.

COMM 446. *COMMUNICATION IN INTERNATIONAL CONFLICT AND DISPUTES (3). Examination of the nature of international conflicts and disputes and the roles culture and communication play in resolving them constructively. Analysis of negotiation, mediation, and international law as approaches to dealing with international political, economic, cultural, and religious disputes. Scrutiny of contemporary world conflicts. (SS) (Bacc Core Course) **PREREQS:** COMM 321 or instructor approval required.

COMM 454. ADVANCED ARGUMENTATION (3). Advanced study in classical and current theories of the persuasive and epistemological functions of argumentation. Examination of the dominant contemporary theorists, including Toulmin, Perelman, and Willard. Analysis of research and applied perspectives, including conversational argument, argument fields, the philosophy of argument, argument as rhetoric, and argument in contexts. (H) **PREREQS:** COMM 320 and /or instructor approval required.

COMM 456. ^RHETORIC: 500 BC TO 500 AD (3). History and philosophy of rhetorical principles. (H) (Writing Intensive Course) **PREREQS:** COMM 320 and /or instructor approval required.

COMM 458. ^RHETORIC: 500 AD TO 1900 (3). History and philosophy of rhetorical principles. (H) (Writing Intensive Course) **PREREQS:** COMM 320 and /or instructor approval required.

COMM 459. ^CONTEMPORARY THEORIES OF RHETORIC (3). A survey of contemporary rhetorical theories from 1900 to the present. (H) (Writing Intensive Course) **PREREQS:** COMM 320 and /or instructor approval required.

COMM 460. RHETORIC OF REVOLUTIONARIES AND REACTIONARIES: 1750 TO 1900 (3). Speech criticism; great American speakers, relation of their speaking to the history of ideas; rhetoric and political, social, and religious movements. (H) **PREREQS:** COMM 320 and /or instructor approval required.

COMM 462. RHETORIC OF REVOLUTIONARIES AND REACTIONARIES: 1900-PRESENT (3). Speech criticism; great American speakers; relation of their speaking to the history of ideas; rhetoric and political, social, and religious movements. (H) **PREREQS:** COMM 320 and /or instructor approval required.

COMM 464. RHETORICAL CRITICISM (3). Explores the approaches to the criticism of rhetoric, including aesthetic, social movement, genre, feminist, and other modes of criticism. **PREREQS:** COMM 320

COMM 466. ETHICS OF RHETORIC (3). Examines the ethical questions raised by the use of persuasive discourse, including the derivation of standards of ethical persuasion and approaches to ethical judgment about persuasion. (H) **PREREQS:** COMM 320 and /or instructor approval required.

COMM 472. THE RHETORIC OF POPULAR CULTURE (3). A survey of theories of popular culture from Arnold to Hall. Students will examine various artifacts of popular culture and the influences they exert. (H)

COMM 476. ISSUES IN THE FREEDOM OF SPEECH (3). Examination of the theories of free expression and case materials related to tests of free speech in key U.S. Supreme Court cases. The course emphasizes the context of social and political movements from which the cases arise. (H) **PREREQS:** COMM 320 or instructor approval required.

COMM 478. POLITICAL CAMPAIGN RHETORIC (3). Theory, research and methods of political campaign rhetoric. Topics include rhetorical strategies and tactics in advertising, national conventions, broadcast debates, media coverage and public opinion polls. (H) **PREREQS:** COMM 320 or instructor approval required.

COMM 482. THE MEDIA IN CULTURE AND SOCIETY (3). The study of the societal-cultural impact on the media, and their effect upon individuals, social, cultural, political, economic, and leisure structures and systems. Special focus on the issues of media in shaping values, molding opinions, and reflecting/projecting attitudes, beliefs, and behaviors, including media's role in racial, gender, and familial relations. (SS) **PREREQS:** COMM 280

COMM 484. MEDIA CRITICISM (3). A critical examination of the media analysis of content, forms and deployment of media messages and products. A critical study of the structure, functions and economics of media systems. A consideration of media ethics and responsibilities in relation to news and information, entertainment, advertising and marketing, and social-cultural influence. (SS) **PREREQS:** COMM 280

COMM 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

COMM 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

COMM 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

COMM 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

COMM 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

COMM 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

COMM 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

COMM 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

COMM 510. COMMUNICATION INTERNSHIP (1-12). An assignment in a private or public business or agency. The student observes or works in one or more departments of the enterprise, perhaps in one area of interest or specialization (e.g., public relations, training, personnel, research and planning). Work is supervised by the agency staff, supervising school faculty member(s) provide academic evaluation. 12 credits maximum. Graded P/N. This course is repeatable for a maximum of 12 credits. **PREREQS:** Graduate committee approval required.

COMM 512. TOPICS IN SPEECH COMMUNICATION (3). Contemporary issues in speech communication: appraisal and discussion of current theories, trends, research methods, problems, or applications. This course is repeatable for a maximum of 9 credits. **PREREQS:** 9 credits of speech communication.

COMM 514. COMMUNICATION RESEARCH METHODS (3). Communication research and its relationship to theory. Quantitative and qualitative methods of investigation in speech communication. Experimental and non-experimental research design; naturalistic observation; issues of reliability and validity; statistical analysis. Standards and principles of writing and reporting research. **PREREQS:** COMM 321 or instructor approval required.

COMM 516. ETHNOGRAPHY OF COMMUNICATION (3). Study and practice of using ethnography of communication as a research method for developing theory in communication studies; topics include data collection, analysis, and writing ethnographic reports. **PREREQS:** COMM 321

COMM 518. INTERPERSONAL COMMUNICATION THEORY AND RESEARCH (3). Current theory, research, and practice in interpersonal communication. Issues addressed may include compliance gaining, nonverbal behavior, family communication, gender issues, impression formation, rules, and human relations. **PREREQS:** COMM 321 or instructor approval required.

COMM 520. GRADUATE SEMINAR IN COMMUNICATION (3). Introductory graduate seminar in the field of communication. Emphasis on the breadth and depth of the discipline, graduate study, and research directions.

COMM 522. SMALL GROUP COMMUNICATION THEORY AND RESEARCH (3). Current theory, research, and practice in communication and small group communication. Issues addressed may include leadership, decision making, problem solving, training, and human relations. **PREREQS:** COMM 321 or instructor approval required.

COMM 524. COMMUNICATION IN ORGANIZATIONS: THEORIES AND ISSUES (3). Analysis of human interaction within the informal and formal systems of organizations. Theory, research, and practice relevant to the analysis of the nature and role of communication within small, mid-range and highly complex organizations. The course addresses structural, functional, and cultural features of communication in organizational environments.

COMM 526. INTERCULTURAL COMMUNICATION: THEORIES AND ISSUES (3). Advanced study in intercultural communication theoretical developments and research directions. Topics addressed may include intercultural research methods, training, language and culture, acculturation, and intercultural effectiveness. **PREREQS:** COMM 321 and COMM 326 or instructor approval required.

COMM 527. CULTURAL CODES IN COMMUNICATION (3). Study and examination of the contextualized use of communication within speech communities and cultures; topics include the cultural patterning of communication and cultural communication theory.

COMM 530. THEORETICAL ISSUES IN COMMUNICATION INQUIRY (3). Review of conceptual, philosophical, ontological, epistemological, and methodological issues in the development of theories in human communication; application to contemporary, empirical human communication research. **PREREQS:** COMM 321 or instructor approval required.

COMM 532. GENDER AND COMMUNICATION (3). Investigation of impact of sex and gender on communication in conflict, decision-making, leadership, nonverbal messages, language, and interpersonal relationships. Focus on definitions of sex and gender in regard to knowledge, social constructs, and self-development. **PREREQS:** COMM 321 or instructor approval required.

COMM 540. THEORIES OF CONFLICT AND CONFLICT MANAGEMENT (3). Conflict on a variety of levels: intrapersonal, interpersonal, group, public, and social. Conflict in a variety of contexts: relationships, family, organizations, community, and society. Constructive and destructive means of confronting and managing conflict; social and psychological aspects of conflict; conflict analysis; causes of conflict; conflict and peace, social order, and social change; case studies of conflict. **PREREQS:** COMM 321 or instructor approval required.

COMM 542. BARGAINING AND NEGOTIATION PROCESSES (3). Theory and practice of bargaining and negotiation as means of settling disputes, with emphasis on the role of communication. Strategies and tactics of distributive and integrative bargaining orientations. Negotiation preparation and experience through case studies and simulations. **PREREQS:** COMM 321 or instructor approval required.

COMM 544. THIRD PARTIES IN DISPUTE RESOLUTION: MEDIATION/ARBITRATION (3). Philosophies, strategies, practices, and characteristics of mediation and arbitration processes in the settlement of conflicts and disputes. Study of the role of the third party neutral in the peace making process. Case studies and simulations in mediation and arbitration. **PREREQS:** COMM 321 or instructor approval required.

COMM 546. COMMUNICATION IN INTERNATIONAL CONFLICT AND DISPUTES (3). Examination of the nature of international conflicts and disputes and the roles culture and communication play in resolving them constructively. Analysis of negotiation, mediation, and international law as approaches to dealing with international political, economic, cultural, and religious disputes. Scrutiny of contemporary world conflicts. **PREREQS:** COMM 321 or instructor approval required.

COMM 550. COMMUNICATION AND THE PRACTICE OF SCIENCE (3). Communication is central to science-based decision-making, the function of science teams, the reporting and critique of scientific knowledge, and the interface between science and policy making. This seminar emphasizes communication competence in the arena of applied science; that is, science as practiced in government agencies, private corporations, and nonprofit organizations.

COMM 554. ADVANCED ARGUMENTATION (3). Advanced study in classical and current theories of the persuasive and epistemological functions of argumentation. Examination of the dominant contemporary theorists, including Toulmin, Perelman, and Willard. Analysis of research and applied perspectives, including conversational argument, argument fields, the philosophy of argument, argument as rhetoric, and argument in contexts. **PREREQS:** COMM 320 or instructor approval required.

COMM 556. RHETORIC: 500 BC TO 500 AD (3). History and philosophy of rhetorical principles. **PREREQS:** COMM 320 or instructor approval required.

COMM 558. RHETORIC: 500 AD TO 1900 (3). History and philosophy of rhetorical principles. **PREREQS:** COMM 320 or instructor approval required.

COMM 559. CONTEMPORARY THEORIES OF RHETORIC (3). A survey of contemporary rhetorical theories from 1900 to the present. **PREREQS:** COMM 320 or instructor approval required.

COMM 560. RHETORIC OF REVOLUTIONARIES AND REACTIONARIES: 1750 TO 1900 (3). Speech criticism; great American speakers, relation of their speaking to the history of ideas; rhetoric and political, social, and religious movements. **PREREQS:** COMM 320 or instructor approval required.

COMM 562. RHETORIC OF REVOLUTIONARIES AND REACTIONARIES: 1900-PRESENT (3). Speech criticism; great American speakers; relation of their speaking to the history of ideas; rhetoric and political, social, and religious movements. **PREREQS:** COMM 320 or instructor approval required.

COMM 564. RHETORICAL CRITICISM (3). Explores the approaches to the criticism of rhetoric, including aesthetic, social movement, genre, feminist, and other modes of criticism. **PREREQS:** COMM 320 or instructor approval required.

COMM 566. ETHICS OF RHETORIC (3). Examines the ethical questions raised by the use of persuasive discourse, including the derivation of standards of ethical persuasion and approaches to ethical judgment about persuasion. **PREREQS:** COMM 320 or instructor approval required.

COMM 572. THE RHETORIC OF POPULAR CULTURE (3). A survey of theories of popular culture from Arnold to Hall. Students will examine various artifacts of popular culture popular culture and the influences they exert.

COMM 576. ISSUES IN THE FREEDOM OF SPEECH (3). Examination of the theories of free expression and case materials related to tests of free speech in key U.S. Supreme Court cases. The course emphasizes the context of social and political movements from which the cases arise. **PREREQS:** COMM 320 or instructor approval required.

COMM 578. POLITICAL CAMPAIGN RHETORIC (3). Theory, research and methods of political campaign rhetoric. Topics include rhetorical strategies and tactics in advertising, national conventions, broadcast debates, media coverage and public opinion polls. **PREREQS:** COMM 320 or instructor approval required.

COMM 582. THE MEDIA IN CULTURE AND SOCIETY (3). The study of the societal-cultural impact on the media, and their effect upon individuals, social, cultural, political, economic, and leisure structures and systems. Special focus on the issues of media in shaping values, molding opinions, and reflecting/projecting attitudes, beliefs, and behaviors, including media's role in racial, gender, and familial relations. **PREREQS:** COMM 280

COMM 584. MEDIA CRITICISM (3). A critical examination of the media analysis of content, forms and deployment of media messages and products. A critical study of the structure, functions and economics of media systems. A consideration of media ethics and responsibilities in relation to news and information, entertainment, advertising and marketing, and social-cultural influence. **PREREQS:** COMM 280

COMM 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

COMM 808. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

■ MUSIC EDUCATION COURSES

MUED 277. INSTRUMENTAL TECHNIQUES (1). MUED 277: High Brass; MUED 277: Low Brass; MUED 277: Single Reeds/Flute; MUED 277: Double Reeds/Flute; MUED 277: High Strings; MUED 277: Low Strings; MUED 277: Percussion. Basic instruction for each instrumental family. Emphasis is on techniques for teaching each group of instruments. Includes a survey and evaluation of instrumental methods texts. Emphasis on pedagogical skills as they relate to a beginning instrumentalist rather than upon performance skills. This course is repeatable for a maximum of 7 credits.

MUED 353. MUSIC EDUCATION IN PUBLIC SCHOOLS (3). Examines historical practices, philosophical differences, and pedagogical approaches that influence public school music programs. Field experiences provide contextual models with genuine teaching opportunities each week. **PREREQS:** MUS 121

MUED 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUED 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUED 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUED 406. PROJECT (1). Editing and refining of portfolio materials representing professional growth in teaching throughout the Professional Teacher and Counselor Education Program. Includes work samples, assessments, reflections, and videotapes. This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUED 408. WORKSHOP (1-16). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUED 413. THEORY AND PRACTICUM: FIELD (1-4). Field experience in music classroom. For pre-MAT students taking 4 credits, the experience is approximately 10 hours per week in elementary-level classroom.

MUED 460. PSYCHOLOGY OF MUSIC (3). The study and evaluation of psychological, physiological, and neurological aspects of musical behavior and experience; including but not limited to acoustics, human hearing, perception and cognition, development and expertise, affective response and preference, unusual abilities, and selected special topics. **PREREQS:** Junior standing and instructor approval.

MUED 470. METHODS AND MATERIALS FOR THE PUBLIC SCHOOL WIND BAND (3). Includes examination of method books, instructional materials, and music for middle school and high school band. Class format is lecture, discussions, and microteaching demonstrations. Includes study of past and current methods of improving student musical understanding and performance through band literature and rehearsal techniques. **PREREQS:** MUS 318 and MUS 319 (Instrumental

conducting). Must have senior standing as a music education major.

MUED 471. FUNDAMENTALS OF MUSIC FOR ELEMENTARY CLASSROOM TEACHERS (3). Music activities for elementary teachers in training. Introductory course designed to build musicianship through experiences that are developmentally appropriate to the teaching of music in the primary elementary classroom.

MUED 473. METHODS FOR TEACHING ELEMENTARY MUSIC (3). Focuses on pedagogical content knowledge in music for specialists preparing to teach Kindergarten through grade five. Students will focus on the developmental characteristics of learners, multiple representations of the subject matter, and lesson planning incorporating state and national standards. Issues related to diverse and special needs populations will be interwoven throughout each segment of the course. **PREREQS:** MUED 353 and Admission to the Professional Music Teacher Education program or permission of instructor.

MUED 477. CLASSROOM INSTRUMENTAL TECHNIQUES (2). A brief overview of fundamental principles and playing techniques of brass, percussion, string, and woodwind instruments designed for the choral music educator who uses instrumental accompaniment or conducts an instrumental ensemble. **PREREQS:** MUS 222 and MUS 234 and MUS 319

MUED 478. TECHNIQUES FOR THE VOCAL INSTRUCTOR (2). Vocal techniques for the public school music teacher. Offered alternate years. **PREREQS:** MUS 185 or instructor approval required.

MUED 499. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUED 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUED 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUED 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

MUED 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUED 506. PROJECTS (1-16). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUED 507. THEORY AND PRACTICUM SEMINAR (1-4). Field experience in music classroom. This course is repeatable for a maximum of 10 credits. **PREREQS:** Departmental approval required.

MUED 508. WORKSHOP (1-16). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUED 510. PROFESSIONAL INTERNSHIP (3-15). A supervised teaching experience at a variety of public school levels. The student works with an experienced mentor teacher, accepting the professional responsibilities of teaching. This course is repeatable for a maximum of 15 credits. **PREREQS:** Departmental approval required.

MUED 521. SPECIAL TOPICS IN MUSIC EDUCATION (3). Advanced pedagogy in one particular area within music education, such as jazz band techniques, computer design of marching band drills, advanced technology in music education. Topics will vary. **PREREQS:** Departmental approval required.

MUED 560. PSYCHOLOGY OF MUSIC (3). The study and evaluation of psychological,

physiological, and neurological aspects of musical behavior and experience; including but not limited to acoustics, human hearing, perception and cognition, development and expertise, affective response and preference, unusual abilities, and selected special topics. **PREREQS:** Junior standing and instructor approval.

MUED 562. RESEARCH IN MUSIC EDUCATION (3). Introduction to the historical, philosophical, quantitative and qualitative research methodologies in music education. Includes interpretation and application of findings published in major research journals. **PREREQS:** Admission to the Professional Teacher and Counselor Licensure program or instructor approval required.

MUED 570. METHODS AND MATERIALS FOR THE PUBLIC SCHOOL WIND BAND (3). Includes examination of method books, instructional materials, and music for middle school and high school band. Class format is lecture, discussions, and microteaching demonstrations. Includes study of past and current methods of improving student musical understanding and performance through band literature and rehearsal techniques. **PREREQS:** Designed for vocal students enrolled in the Professional Music Teacher Education Program. Departmental approval required.

MUED 573. METHODS FOR TEACHING ELEMENTARY MUSIC (3). Focuses on pedagogical content knowledge in music for specialists preparing to teach Kindergarten through grade five. Students will focus on the developmental characteristics of learners, multiple representations of the subject matter, and lesson planning incorporating state and national standards. Issues related to diverse and special needs populations will be interwoven throughout each segment of the course. **PREREQS:** Admission to the Professional Music Teacher Education program or permission of instructor. MUED 353

MUED 574. MIDDLE LEVEL MUSIC EDUCATION (3). This methods course focuses on general music education, grades four through eight. Students explore relationships between teaching and learning in order to effectively plan for instruction. **PREREQS:** Departmental approval required.

MUED 580. SECONDARY VOCAL MUSIC EDUCATION (3). This methods course focuses on vocal music education, grades nine through twelve. Students explore relationships between teaching and learning in order to effectively plan for instruction. **PREREQS:** Departmental approval required.

MUED 581. SECONDARY INSTRUMENTAL MUSIC EDUCATION (3). This methods course focuses on instrumental music education, grades nine through twelve. Students explore relationships between teaching and learning in order to effectively plan for instruction. **PREREQS:** Departmental approval required.

MUED 591. CURRICULUM FOUNDATIONS IN MUSIC EDUCATION (3). Examination of historical, philosophical, and social influences on contemporary music education emphasizing 1950 through the present, culminating in the National Standards for Arts Education. **PREREQS:** Departmental approval required.

MUED 592. CURRICULUM IMPLEMENTATION AND EVALUATION (3). Students design and construct a comprehensive music education curriculum grounded in current research, the National Standards for Arts Education and Oregon's Common Curriculum Goals. **PREREQS:** Departmental approval required.

MUED 593. MUSIC TECHNOLOGY (3). Specific applications for teaching music incorporating appropriate software and hardware for curricular integration and curricular evolution.

MUED 599. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

■ MUSIC (STUDIO) COURSES

MUP 160. INDIVIDUAL LESSONS: BEGINNING PIANO (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 161. INDIVIDUAL LESSONS: BEGINNING STRINGS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 162. INDIVIDUAL LESSONS: BEGINNING BRASS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 163. INDIVIDUAL LESSONS: BEGINNING WOODWINDS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 164. INDIVIDUAL LESSONS: BEGINNING VOICE (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 165. INDIVIDUAL LESSONS: BEGINNING PERCUSSION (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 170. INDIVIDUAL LESSONS: INTERMEDIATE PIANO (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 171. INDIVIDUAL LESSONS: INTERMEDIATE STRINGS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 172. INDIVIDUAL LESSONS: INTERMEDIATE BRASS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 173. INDIVIDUAL LESSONS: INTERMEDIATE WOODWINDS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 174. INDIVIDUAL LESSONS: INTERMEDIATE VOICE (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required. Simultaneous participation in one OSU choir is required.

MUP 175. INDIVIDUAL LESSONS: INTERMEDIATE PERCUSSION (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 190. INDIVIDUAL LESSONS: KEYBOARD (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 191. INDIVIDUAL LESSONS: VOICE (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 192. INDIVIDUAL LESSONS: STRINGS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 193. INDIVIDUAL LESSONS: WOODWINDS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 194. INDIVIDUAL LESSONS: BRASS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 195. INDIVIDUAL LESSONS: PERCUSSION (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 290. INDIVIDUAL LESSONS: KEYBOARD (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 291. INDIVIDUAL LESSONS: VOICE (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 292. INDIVIDUAL LESSONS: STRINGS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 293. INDIVIDUAL LESSONS: WOODWINDS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 294. INDIVIDUAL LESSONS: BRASS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 295. INDIVIDUAL LESSONS: PERCUSSION (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 390. INDIVIDUAL LESSONS: KEYBOARD (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 391. INDIVIDUAL LESSONS: VOICE (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required. Simultaneous participation in one OSU choir ensemble is required.

MUP 392. INDIVIDUAL LESSONS: STRINGS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 393. INDIVIDUAL LESSONS: WOODWINDS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 394. INDIVIDUAL LESSONS: BRASS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 395. INDIVIDUAL LESSONS: PERCUSSION (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 490. INDIVIDUAL LESSONS: KEYBOARD (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 491. INDIVIDUAL LESSONS: VOICE (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required. Simultaneous participation in one OSU choir ensemble is required.

MUP 492. INDIVIDUAL LESSONS: STRINGS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 493. INDIVIDUAL LESSONS: WOODWINDS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 494. INDIVIDUAL LESSONS: BRASS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 495. INDIVIDUAL LESSONS: PERCUSSION (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 590. INDIVIDUAL LESSONS: KEYBOARD (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 591. INDIVIDUAL LESSONS: VOICE (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 592. INDIVIDUAL LESSONS: STRINGS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 594. INDIVIDUAL LESSONS: BRASS (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

MUP 595. INDIVIDUAL LESSONS: PERCUSSION (1-2). This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

■ MUSIC COURSES

MUS 101. *MUSIC APPRECIATION I: SURVEY (3). Dealing primarily with the Western classical tradition, the course focuses on developing perceptive listening skills through the study of musical forms and styles. For non-majors. (FA) (Bacc Core Course)

MUS 101H. *MUSIC APPRECIATION I: SURVEY (3). Dealing primarily with the Western classical tradition, the course focuses on developing perceptive listening skills through the study of musical forms and styles. For non-majors. (FA) (Bacc Core Course) **PREREQS:** Honors College approval required.

MUS 102. *MUSIC APPRECIATION II: PERIODS AND GENRES (3). A study of the masterworks of a single era (such as Baroque, classic, romantic, twentieth century) or a genre (such as orchestra, chamber, opera, musical theatre). See Schedule of Classes for topic being offered. For non-majors. Need not be taken in order. (FA) (Bacc Core Course) This course is repeatable for a maximum of 12 credits.

MUS 102H. *MUSIC APPRECIATION II: PERIODS AND GENRES (3). A study of the masterworks of a single era (such as Baroque, classic, romantic, twentieth century) or a genre (such as orchestra, chamber, opera, musical theatre). See Schedule of Classes for topic being offered. For non-majors. Need not be taken in order. (FA) (Bacc Core Course) This course is repeatable for a maximum of 12 credits. **PREREQS:** Honors College approval required.

MUS 103. *MUSIC APPRECIATION III: GREAT COMPOSERS (3). The life and works of one or more significant composers including Bach, Haydn, Mozart, Beethoven, and others. (See Schedule of Classes for composers being offered.) For non-majors. Does not need to be taken in sequence. (FA) (Bacc Core Course) This course is repeatable for a maximum of 18 credits.

MUS 103H. *MUSIC APPRECIATION III: GREAT COMPOSERS (3). The life and works of one or more significant composers including Bach, Haydn, Mozart, Beethoven, and others. (See Schedule of Classes for composers being offered.) For non-majors. Does not need to be taken in sequence. (FA) (Bacc Core Course) This course is repeatable for a maximum of 18 credits. **PREREQS:** Honors College approval required.

MUS 104. SURVEY OF JAZZ (3). Explores the historical, sociological and artistic development of jazz, America's musical art form. A concise review of the first 100 years of the music from its blues-based roots at the turn of the 20th century to its current eclectic state will constitute the main framework of the course. While the focus will be on the important performers and composers of jazz, key historical and social events that contributed to the evolution of the idiom will also be discussed.

MUS 108. *MUSIC CULTURES OF THE WORLD (3). Survey of the world's music with attention to musical styles and cultural contexts. Included are Oceania, Indonesia, Africa, Asia, Latin America. (See Schedule of Classes for subject being offered.) For non-majors. (NC) (Bacc Core Course) This course is repeatable for a maximum of 18 credits.

MUS 108H. *MUSIC CULTURES OF THE WORLD (3). Survey of the world's music with attention to musical styles and cultural contexts. Included are Oceania, Indonesia, Africa, Asia, Latin America. (See Schedule of Classes for subject being offered.) For non-majors. (NC) (Bacc Core Course) This course is repeatable for a maximum of 18 credits. **PREREQS:** Honors College approval required.

MUS 121. LITERATURE AND MATERIALS OF MUSIC I (3). Covers fundamentals of music theory along with a brief introduction to Western art music. This requires students to learn to read and write all notes in treble and bass clef, and all common scales, intervals, triads and seventh chords, using key signatures. They also learn to recognize basic rhythms and write them down. This course is repeatable for a maximum of 6 credits. **PREREQS:** A grade of 80% on the final exam is required to move on to MUS 122.

MUS 122. LITERATURE AND MATERIALS OF MUSIC I (3). An integrated, team-taught approach to the study of Western art music, including repertory, melodic, harmonic, and rhythmic components, formal organization, and composition. Recitation included. **PREREQS:** Placement exam and MUS 121

MUS 123. LITERATURE AND MATERIALS OF MUSIC I (3). An integrated, team-taught approach to the study of Western art music, including repertory, melodic, harmonic, and rhythmic components, formal organization, and composition. Recitation included. Lec/lab/rec. **PREREQS:** Placement exam and MUS 122

MUS 125. LITERATURE AND MATERIALS LAB I (1). Scales, all major and harmonic form of minor, interval drill. **PREREQS:** MUS 121. Music majors must take concurrently with MUS 122.

MUS 126. LITERATURE AND MATERIALS LAB II (1). Transpose scores, harmonic idioms, harmonic progressions. Lec/lab. **PREREQS:** MUS 122 and MUS 125. Music majors must take course concurrently with MUS 123.

MUS 135. AURAL SKILLS II (1). Aural comprehension of the basic melodic, rhythmic, and harmonic elements of music. **PREREQS:** Students should take concurrently with MUS 122.

MUS 136. AURAL SKILLS I (1). Aural comprehension of the basic melodic, rhythmic, and harmonic elements of music. **PREREQS:** MUS 135. Students must take concurrently with MUS 123.

MUS 137. JAZZ IMPROVISATION (1-3). Instrumental and vocal improvisation including composition and arranging techniques. This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 140. OSU CHAMBER CHOIR (1-2). A select ensemble of approximately 40 mixed voices. Performances each term. Annual tours. (FA) This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 146. WOMEN'S CHOIR (1-2). A women's ensemble designed for vocal development and exploration of treble choral literature. Performances each term. This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 147. MEN'S CHOIR (1-2). A men's ensemble designed for vocal development and exploration of TTBB choral literature. Performances each term. This course is repeatable for a maximum of 9 credits.

MUS 150. SYMPHONIC BAND (1). A select ensemble of approximately 80 wind and percussion players. Performance each term. (FA) This course is repeatable for a maximum of 9 credits.

MUS 151. CONCERT BAND (1). Wind and percussion ensemble of approximately 70 players. Performance each term. Open to all students. This course is repeatable for a maximum of 9 credits.

MUS 152. RHYTHM AND BEAVS PEP BAND (1). An auditioned group of 12 musicians who perform at university, community, and athletic events throughout the year. This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 153. MARCHING BAND (1-2). A marching and playing unit of more than 160 musicians. Performs for home football games. This course is repeatable for a maximum of 6 credits.

MUS 154. BASKETBALL BAND (1). An ensemble of approximately 50 players. Performs for home games. This course is repeatable for a maximum of 3 credits.

MUS 155. COLOR GUARD (1). A derivative of the Marching Band Color Guard, this ensemble performs and competes around the Pacific Northwest during winter term. Audition required. This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 156. INDOOR DRUM LINE (1-2). A derivative of the Marching Band Drum Line, this ensemble performs and competes around the Pacific Northwest during winter term. Audition required. This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 157. SMALL JAZZ ENSEMBLE (1). Concentration on current jazz styles. Performance each term. This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 158. LARGE JAZZ ENSEMBLE (1). Concentration on current jazz styles. Performance each term. This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 160. UNIVERSITY SYMPHONY ORCHESTRA (1). An ensemble of 65-80 players. Performance of orchestral repertoire from the eighteenth, nineteenth, and twentieth centuries. Performance each term. (FA) This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 163. ACCOMPANYING (1). Piano accompanying and chamber music skills, studio experience and weekly performance class. This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required. Must enroll concurrently in MUS 190 or MUS 290.

MUS 164. CHAMBER ENSEMBLE: STRINGS (1). This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 165. CHAMBER ENSEMBLE: WOODWINDS (1). This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 166. CHAMBER ENSEMBLE: BRASS (1). This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 167. CHAMBER ENSEMBLE: PERCUSSION (1). This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 168. CHAMBER ENSEMBLE: MISCELLANEOUS (1). This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 169. OPERA WORKSHOP (1-2). See Schedule of Classes for term offered. This course is repeatable for a maximum of 3 credits. **PREREQS:** Departmental approval required.

MUS 177. GROUP LESSONS: PIANO (1). Beginning Piano I, elementary group instruction in piano skills for non-majors. This course is repeatable for a maximum of 2 credits.

MUS 178. GROUP LESSONS: PIANO (1). Beginning Piano II: Continuation of MUS 177, piano for non-majors. This course is repeatable for a maximum of 2 credits. **PREREQS:** Departmental approval required.

MUS 179. GROUP LESSONS: PIANO (1). Beginning Piano III. Continuation of MUS 177, MUS 178. Piano for non-majors. This course is repeatable for a maximum of 2 credits. **PREREQS:** Departmental approval required.

MUS 180. GROUP LESSONS: PIANO (1). (Basic Levels - A, B, C). Elementary group instruction in piano skills and basic theory. This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 181. GROUP LESSONS: PIANO (1). (Intermediate Level I). Group instruction in piano skills. See Schedule of Classes for section offered. This course is repeatable for a maximum of 9 credits. **PREREQS:** MUS 101 and instructor and departmental approval required.

MUS 182. GROUP LESSONS: PIANO (1). (Intermediate Level II). Group instruction in piano skills. (See Schedule of Classes for section offered.) This course is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 183. GROUP LESSONS: PIANO (1). (Intermediate Level III.) Group instruction in piano skills. See Schedule of Classes for section offered. This course is repeatable for a maximum of 3 credits. **PREREQS:** Departmental approval required.

MUS 185. VOICE CLASS (1). Students improve and strengthen the voice as a solo instrument. This course is repeatable for a maximum of 9 credits.

MUS 186. GROUP GUITAR (1). Teaches fundamentals of the guitar in a small-group setting. Emphasis on practical use of the instrument. This course is repeatable for a maximum of 9 credits.

MUS 187. GROUP GUITAR II (1). A continuation of MUS 186, MUS 187 focuses on helping students learn higher functionality in techniques and attain greater ability to perform solo or in ensemble. This course is repeatable for a maximum of 9 credits. **PREREQS:** MUS 186

MUS 199. SPECIAL STUDIES (1-3). First-year level. This course is repeatable for a maximum of 18 credits.

MUS 221. LITERATURE AND MATERIALS OF MUSIC (3). Advanced harmony, techniques of analysis, musical form, composition. Continued study of the repertory of Western music through the mid-twentieth century. **PREREQS:** MUS 123 or departmental approval required. MUS 221, MUS 222, MUS 223 must be taken in sequence.

MUS 222. LITERATURE AND MATERIALS OF MUSIC (3). Advanced harmony, techniques of analysis, musical form, composition. Continued study of the repertory of Western music through the mid-twentieth century. Three lectures weekly. **PREREQS:** MUS 221 or departmental approval required. MUS 221, MUS 222, MUS 223 must be taken in sequence.

MUS 223. LITERATURE AND MATERIALS OF MUSIC (3). Advanced harmony, techniques of analysis, musical form, composition. Continued study of the repertory of Western music through the mid-twentieth century. Three lectures weekly. **PREREQS:** MUS 222 or departmental approval required. MUS 221, MUS 222, MUS 223 must be taken in sequence.

MUS 234. AURAL SKILLS II (1). Sight-singing; melodic and harmonic dictation. To be taken in sequence. **PREREQS:** MUS 123 and MUS 136 or departmental approval required.

MUS 235. AURAL SKILLS II (1). Sight-singing; melodic and harmonic dictation. To be taken in sequence. **PREREQS:** MUS 234 or departmental approval required.

MUS 236. AURAL SKILLS II (1). Sight-singing; melodic and harmonic dictation. To be taken in sequence. **PREREQS:** MUS 235 or departmental approval required.

MUS 299. SPECIAL STUDIES (1-3). Sophomore level. This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 315. INTRODUCTION TO CONDUCTING (2). Basic terminology, beat patterns, and baton technique. Introduction to score preparation. Philosophy and history of conducting are also addressed. **PREREQS:** MUS 223 and MUS 236 and piano proficiency exam.

MUS 316. CHORAL CONDUCTING (2). Continuation of MUS 315. Hand gesture technique, score reading, and score preparation of literature from all major historical periods. Focus upon principles of developing choral excellence. Includes conducting practice with a campus ensemble. To be taken in sequence. **PREREQS:** MUS 315

MUS 317. CHORAL CONDUCTING (2). Continuation of MUS 315. Hand gesture technique, score reading, and score preparation of literature from all major historical periods. Focus upon principles of developing choral excellence. To be taken in sequence. **PREREQS:** MUS 315

MUS 318. INSTRUMENTAL CONDUCTING (2). Continuation of MUS 315, including types of instrumental groups, seating arrangements, score preparation, and instrumental transposition and ranges. Advanced baton technique. To be taken in sequence. **PREREQS:** MUS 315

MUS 319. INSTRUMENTAL CONDUCTING (2). Continuation of MUS 315, including types of instrumental groups, seating arrangements, score preparation, and instrumental transposition and ranges. Advanced baton technique. To be taken in sequence. **PREREQS:** MUS 315

MUS 321. LITERATURE AND MATERIALS OF MUSIC III (3). Twentieth century harmony and counterpoint, including contrapuntal composition. Continued study and analysis of repertoire into the 21st century. **PREREQS:** MUS 223 or departmental approval.

MUS 324. HISTORY OF WESTERN MUSIC (3). Chronological survey of the Euro-American traditions in music to be taken in sequence. **PREREQS:** MUS 123 and MUS 223 recommended.

MUS 325. HISTORY OF WESTERN MUSIC (3). Traces the development of music history from the early Classic period through the end of the 19th century. Major trends in orchestral, solo, chamber and vocal music are explored through lectures, readings, research, discussion, score studies, and intensive writing assignments. (Writing Intensive Course) **PREREQS:** MUS 123 and MUS 223 recommended.

MUS 326. HISTORY OF WESTERN MUSIC (3). Chronological survey of the Euro-American traditions in music to be taken in sequence. **PREREQS:** MUS 123 and MUS 223 recommended.

MUS 337. JAZZ IMPROVISATION (1-3). Instrumental and vocal improvisation including composition and arranging techniques. This course is repeatable for a maximum of 9 credits. **PREREQS:** Two years college-level MUS 137 experience or equivalent. Departmental approval required.

MUS 340. OSU CHAMBER CHOIR (1-2). A select ensemble of approximately 40 mixed voices. Performance each term. Annual tours. Students must have two years college-level vocal experience or equivalent. (FA) This course

is repeatable for a maximum of 9 credits. **PREREQS:** Departmental approval required.

MUS 346. WOMEN'S CHOIR (1-2). A women's ensemble designed for vocal development and exploration of treble choral literature. Performances each term. This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must have two years of college-level choral singing or equivalent.

MUS 347. MEN'S CHOIR (1-2). A men's ensemble designed for vocal development and exploration of TTBB choral literature. Performances each term. This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must have two years of college-level choral singing or equivalent.

MUS 350. SYMPHONIC BAND (1). A select ensemble of approximately 80 wind and percussion players. Performance winter and spring terms. (FA) This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must have two years college-level band experience or equivalent.

MUS 351. CONCERT BAND (1). Wind and percussion ensemble of approximately 70 players. Performance each term. Open to all students. This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must have two years college-level band experience or equivalent.

MUS 352. RHYTHM AND BEATS PEP BAND (1). An auditioned group of 12 musicians who perform at university, community, and athletic events throughout the year. This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must have two years of college-level band experience or equivalent. Departmental approval required.

MUS 353. MARCHING BAND (1-2). A marching and playing unit of more than 160 musicians. Performs for home football games; one trip each year to an off-campus game. This course is repeatable for a maximum of 6 credits. **PREREQS:** Students must have two years of college-level band experience or equivalent.

MUS 354. BASKETBALL BAND (1). An ensemble of approximately 50 players. Performs for home games. Students must have two years college-level experience. This course is repeatable for a maximum of 3 credits. **PREREQS:** Students must have two years of college-level band experience or equivalent.

MUS 355. COLOR GUARD (1). A derivative of the Marching Band Color Guard, this ensemble performs and competes around the Pacific Northwest during winter term. Audition required. This course is repeatable for a maximum of 3 credits. **PREREQS:** Students must have two years of college-level color guard experience or equivalent. Departmental approval required.

MUS 356. INDOOR DRUM LINE (1-2). A derivative of the Marching Band Drum Line, this ensemble performs and competes around the Pacific Northwest during winter term. Audition required. This course is repeatable for a maximum of 3 credits. **PREREQS:** Departmental approval required.

MUS 357. SMALL JAZZ ENSEMBLE (1). Concentration on current jazz styles. Performance each term. This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must have two years college-level jazz band experience or equivalent. Departmental approval required.

MUS 358. LARGE JAZZ ENSEMBLE (1). Concentration on current jazz styles. Performance each term. This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must have two years college-level jazz band experience or equivalent. Departmental approval required.

MUS 360. UNIVERSITY SYMPHONY ORCHESTRA (1). An ensemble of 65-80 players. Performance of orchestral repertoire from the 18th, 19th, and 20th centuries. Performance each term. (FA) This course is repeatable for a

maximum of 9 credits. **PREREQS:** Students must have two years college-level orchestra experience or equivalent. Departmental approval required.

MUS 363. ACCOMPANYING (1). Piano accompanying and chamber music skills, studio experience, and weekly performance class. This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must have two years college-level ensemble or equivalent. Departmental approval required. Students must simultaneously take MUS 390 or MUS 490.

MUS 364. CHAMBER ENSEMBLE: STRINGS (1). This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must have two years college-level ensemble experience or equivalent. Departmental approval required.

MUS 365. CHAMBER ENSEMBLE: WOODWINDS (1). This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must have two years college-level ensemble experience or equivalent. Departmental approval required.

MUS 366. CHAMBER ENSEMBLE: BRASS (1). This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must have two years college-level ensemble experience or equivalent. Departmental approval required.

MUS 367. CHAMBER ENSEMBLE: PERCUSSION (1). This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must have two years college-level ensemble experience or equivalent. Departmental approval required.

MUS 368. CHAMBER ENSEMBLE: MISCELLANEOUS (1). This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must have two years college-level ensemble experience or equivalent. Departmental approval required.

MUS 369. OPERA WORKSHOP (1-2). See Schedule of Classes for term offered. This course is repeatable for a maximum of 3 credits. **PREREQS:** Students must have two years college-level vocal performance experience or equivalent. Departmental approval required.

MUS 399. SPECIAL STUDIES (1-3). Junior level. This course is repeatable for a maximum of 18 credits.

MUS 401. RESEARCH AND SCHOLARSHIP (1-6). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 402. INDEPENDENT STUDY (1-6). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 403. THESIS (1-6). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 405. READING AND CONFERENCE (1-6). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 406. PROJECTS (1-6). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 407. SEMINAR (1-6). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 408. WORKSHOP (1-6). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 410. INTERNSHIP (3). Provides experience in field settings, opportunity to develop personal and professional skills. See school for details. This course is repeatable for a maximum of 12 credits. **PREREQS:** School approval required.

MUS 442. GENRE STUDIES (3). Intensive study of selected genres, such as orchestra, chamber music, keyboard literature, vocal literature, music theatre and opera. See Schedule of Classes for topic. This course is repeatable for a maximum of 18 credits.

MUS 443. THEORY AND COMPOSITION STUDIES (3). Intensive study of selected subjects, such as analysis, composition, choral arranging, band arranging, and orchestration. See Schedule of Classes for topic. This course is repeatable for a maximum of 18 credits. **PREREQS:** MUS 223

MUS 472. ITALIAN AND LATIN DICTION FOR SINGERS (2). Presents the principles of lyric diction in Italian and liturgical Latin and provides practice in the skills needed to sing the languages accurately and expressively.

MUS 473. GERMAN DICTION FOR SINGERS (2). Presents the principles of German lyric diction and provides practice in the skills needed to sing the language accurately and expressively.

MUS 474. FRENCH DICTION FOR SINGERS (2). Presents the principles of French lyric diction and provides practice in the skills needed to sing the language accurately and expressively.

MUS 493. BASIC RECORDING TECHNIQUES (3). The first of a three-term sequence on analog and digital recording and editing techniques. The first term deals with issues such as signal processing, microphone design and placement, and an introduction to Digidesign Pro-Tools. This course is repeatable for a maximum of 9 credits. **PREREQS:** MUS 123 and instructor approval required.

MUS 494. INTERMEDIATE RECORDING TECHNIQUES (3). The second of a three-term sequence on analog and digital recording and editing techniques. The second term deals with multi-track recording, MIDI interfacing and recording, advanced microphone placement, intermediate Pro-tools, and an introduction to E-magic Logic. **PREREQS:** MUS 493 and instructor approval required.

MUS 495. ADVANCED RECORDING TECHNIQUES (3). The third of a three-part sequence on analog and digital recording and editing techniques. The third term deals with advanced multi-track recording, sampling MIDI interfacing and recording, mixing and mastering using Waveburner, advanced Pro-Tools, advanced use of E-magic Logic recording and editing and portable ADAT recording and editing. **PREREQS:** MUS 494 and instructor approval required.

MUS 496. SURROUND SOUND RECORDING AND MASTERING (2). Survey of the concepts, equipment, and standard procedures used in surround sound audio and audio-for-video, including basic equipment and software configuration, surround recording and editing techniques, advanced automation using Pro Tools, and layback/sync to video. **PREREQS:** MUS 495 and /or instructor approval.

MUS 499. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 501. RESEARCH AND SCHOLARSHIP (1-6). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 502. INDEPENDENT STUDY (1-6). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 503. THESIS (1-6). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

MUS 505. READING AND CONFERENCE (1-6). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 506. PROJECTS (1-6). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 507. SEMINAR (1-6). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 508. WORKSHOP (1-6). This course is repeatable for a maximum of 18 credits. **PREREQS:** Departmental approval required.

MUS 510. INTERNSHIP (3). Provides experience in field settings, opportunity to develop personal and professional skills. See school for details. This course is repeatable for a maximum of 12 credits. **PREREQS:** School approval required.

MUS 516. ADVANCED CONDUCTING: CHORAL (3). Baton technique, interpretation and the study of major choral scores. **PREREQS:** MUS 317

MUS 517. ADVANCED CONDUCTING: CHORAL (3). Baton technique, interpretation and the study of major choral scores. **PREREQS:** MUS 317

MUS 518. ADVANCED CONDUCTING: INSTRUMENTAL (3). Baton technique, interpretation and the study of major instrumental scores. **PREREQS:** MUS 319

MUS 519. ADVANCED CONDUCTING: INSTRUMENTAL (3). Baton technique, interpretation and the study of major instrumental scores. **PREREQS:** MUS 319

MUS 540. OSU CHAMBER CHOIR (1-2). A select ensemble of approximately 40 mixed voices. Performance each term. Annual tours. 500-level credit available only to students who can demonstrate proficiency and experience to perform at the graduate level. This will be evaluated by the instructor through audition. This course is repeatable for a maximum of 6 credits.

MUS 543. THEORY AND COMPOSITION STUDIES (3). Intensive study of selected subjects, such as analysis, composition, choral arranging, band arranging, and orchestration. See Schedule of Classes for topic. This course is repeatable for a maximum of 18 credits. **PREREQS:** MUS 223

MUS 546. WOMEN'S CHOIR (1-2). A women's ensemble designed for vocal development and exploration of treble choral literature. Performances each term. This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must be in a graduate-level program of study.

MUS 547. MEN'S CHOIR (1-2). A men's ensemble designed for vocal development and exploration of TTBB choral literature. Performances each term. This course is repeatable for a maximum of 9 credits. **PREREQS:** Students must be in a graduate-level program of study.

MUS 550. SYMPHONIC BAND (1). A select ensemble of approximately 80 wind and percussion players. Performance winter and spring terms. 500-level credit available only to students who can demonstrate proficiency and experience sufficient to perform at the graduate level. This will be evaluated by the instructor by audition. This course is repeatable for a maximum of 6 credits.

MUS 560. UNIVERSITY SYMPHONY ORCHESTRA (1). An ensemble of 65-80 players. Performance of orchestral repertoire from the 18th, 19th, and 20th centuries. Performance each term. 500-level credit available only to students who can demonstrate proficiency and experience to perform at the graduate level. This will be evaluated by the instructor through audition. This course is repeatable for a maximum of 6 credits.

MUS 563. ACCOMPANYING (1). Piano accompanying and chamber music skills, studio experience and weekly performance class. 500-level credit available only to students who can demonstrate proficiency and experience sufficient to perform at the graduate level. This will be evaluated by the instructor by audition. This course is repeatable for a maximum of 6 credits. **PREREQS:** Should take MUP 590 concurrently.

MUS 572. ITALIAN AND LATIN DICTION FOR SINGERS (2). Presents the principles of lyric diction in Italian and liturgical Latin and provides practice in the skills needed to sing the languages accurately and expressively.

MUS 573. GERMAN DICTION FOR SINGERS (2). Presents the principles of German lyric diction and provides practice in the skills needed to sing the language accurately and expressively.

MUS 599. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 6 credits. **PREREQS:** Departmental approval required.

■ NEW MEDIA COMMUNICATIONS COURSES

NMC 101. INTRODUCTION TO NEW MEDIA COMMUNICATIONS (3). Principles of new media communications. Perspectives on the communications media. How the communications media operate and how they interact with society.

NMC 183. INTRODUCTION TO MEDIA PRODUCTION (3). Provides core competency in media production: an introduction to audio and video production, and the elements of the media production and post production processes.

NMC 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

NMC 240. SURVEY OF SOCIAL MEDIA (3). Social media are curiously positioned as being both emergent media and convergent media – they function because of the coalescence of existing media forms and the creation of new ones. This class will use multiple perspectives to explore the past, present, and future of social media. **PREREQS:** NMC 101

NMC 255. INTRODUCTION TO SOUND DESIGN (3). The principals and practices of sound design for motion pictures, television and radio. Through reading, viewing, listening and discussion, students will learn the art and science of sound design. Topics include the soundtrack and film narrative--basic terms and concepts; narrative, psychological and emotive functions of sound design; components of the soundtrack--dialogue, music and sound effects; sound design process--recording, editing, mixing and exhibition.

NMC 260. NEW MEDIA FUTURES (3). Historical context and current perspectives on the various aspects of new multimedia communications, including linear and nonlinear or time-based and interactive media. Primary topics include digital cinema (compositing and nonlinear access), visual music, information visualization, interactive narrative, and virtual space.

NMC 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

NMC 301. ^WRITING FOR THE MEDIA PROFESSIONAL (3). Fundamentals of gathering information, evaluating information, writing information of the media and editing media content in written form. (Writing Intensive Course) **PREREQS:** NMC 101

NMC 302. REPORTING (3). An introduction to the practices, procedures, techniques, and organizational structures of basic news gathering and writing. **PREREQS:** WR 201

NMC 305. COPYEDITING (3). Copyreading, headline writing, newspaper layout and design.

NMC 320. HISTORY OF TELECOMMUNICATIONS (3). A historical overview of the telecommunications industry. The goal is to understand how the industry got where it is today and, by analyzing principles, events, and trends, suggest what directions it may take in the future. The emphasis is on constructing a causal chronology, interrelating developments in technology, organization, and structure of the industry. This course will focus on the technological developments in the industry.

NMC 321. HISTORY OF BROADCASTING (3). The technological, economic and corporate, legal and political, artistic, and social developments that shaped American broadcasting in the 20th century are examined. Implications for the future of broadcasting are addressed as well. **PREREQS:** NMC 101

NMC 322. LANDMARKS IN MEDIA CONTENT (3). Introduces students to media content that represents advances in the art and science of creative use of media technology. Some of these advances were recognized immediately, some only after time had passed. **PREREQS:** NMC 101

NMC 330. THE MEANING OF VIDEO GAMES (3). Examines approaches to understanding the experience of playing video games, including the role of storytelling in diverse games, the relationship between the player and the game, the game as art, and intersections between games and real life. **PREREQS:** NMC 101

NMC 340. SOCIAL MEDIA STRATEGY (3). Designing systems of interaction is important for understanding how people come to be a part of social networks. Students will participate in a series of simulation games that will explore the dimensions of the interaction between publics and social networks, culminating in an original research project. **PREREQS:** NMC 101 and NMC 240

NMC 349. VIDEO ART (4). Studio course in video art and time-based media projects. Emphasis on experimental approaches to video art in a contemporary art context, linear and non-linear video production and the projection and screening of video art projects. Introduction to the history of video art as an art form. Lec/studio. **CROSSLISTED** as ART 349. This course is repeatable for a maximum of 8 credits. **PREREQS:** ART 122 and ART 263 and ART 345

NMC 351. NEW MEDIA VISUALIZATION (3). Principles of visual composition, sequential imagery, interactive design, narrative structure, and cinematic language as they relate to new media communications. **PREREQS:** NMC 101

NMC 380. PRE-PRODUCTION (3). Focuses on pre-production or the planning phase of multimedia production, which includes concept development, scriptwriting, storyboarding, budgeting, and talent/location scouting. Class projects emphasize brainstorming, story concept/structure, conceptual art, storyboards, animatics, and interactive design. Class examines narrative structure and the languages of graphic design, cinema, and interactive story. Lec/studio. **PREREQS:** NMC 101

NMC 382. STUDIO AND MULTICAMERA PRODUCTION (4). Proficiency in organizing, producing, directing, and evaluating television programs using multicamera studio techniques, including graphics, set design, audio for television and digital video production, and lighting. Emphasis on bringing ideas from conception to realization in a studio setting. Lec/lab. **PREREQS:** NMC 101

NMC 383. FIELD PRODUCTION (4). Development of the technical abilities and conceptual approaches to audio, film, video and multimedia production. Emphasis on single-camera production techniques and concepts. Students will begin the study of post-production process. Students will also begin to study lighting and audio as they relate to single-camera field production. **PREREQS:** NMC 101

NMC 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

NMC 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

NMC 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

NMC 403. THESIS/DISSERTATION (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

NMC 404. WRITING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

NMC 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

NMC 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

NMC 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

NMC 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

NMC 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

NMC 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Students must have completed 15 credits with the NMC prefix to be eligible for an NMC internship. Departmental approval required.

NMC 421. *DIFFUSION OF INNOVATIONS (3). An introduction to old and emerging theories that explain the spread of innovative ideas and technologies among members of a society, emphasizing the role of communication processes and the special problems for diffusion in communication technology. (Bacc Core Course) **PREREQS:** NMC 101

NMC 427. *DIGITAL PORNOGRAPHY (3). Exploration of the prominent role pornography plays in digital communication innovation globally including the examination of social consequences; diffusion of technology, business models and economic impact; legal, ethical, and moral issues; and community health and well-being. (Bacc Core Course) **PREREQS:** Junior or senior standing. This requirement is to ensure all students are over the age of 18 and are able to synthesize complex social and technological concepts and trends appropriate for an STS course.

NMC 430. MEDIA THEORY (3). Specifies the concepts, hypotheses, and theoretical paradigms that have characterized the study of media since the early 20th century. The evolution of theory as new media has changed the media economy is emphasized, as well as the need for new concepts to describe phenomena unique to the Internet era (concepts such as "blogging" and "instant messaging"). **PREREQS:** NMC 101

NMC 433. NEW MEDIA STORY TELLING (3). Students will study and develop storytelling methods using new media communications technology. Storytelling will focus on telling stories using non-linear, interactive, multidimensional, multi-sensory, multimedia techniques. **PREREQS:** NMC 101

NMC 435. MEDIA EFFECTS (3). Reviews the potential for media technology and media content to influence the beliefs and behaviors of individuals. The media's ability to bring about specific changes in people's attitudes, values, political agendas, purchasing habits, and jury decisions are discussed. The impact of new media's interactive technology and content on people's beliefs and behaviors is emphasized. **PREREQS:** NMC 101

NMC 437. NEW MEDIA AND SOCIETY (3). Traces the impact of new media--from the telegraph to the Internet--on American society. Emphasizes the way that existing social institutions (e.g. schools and churches) and opinion leaders (e.g. presidents and scholars) greeted the arrival of new media with an increasingly predictable mixture of fear and euphoria. Social changes such as the westward expansion of the U.S. in the 19th century, the arrival of immigrants in the late 19th and early 20th centuries, and the rise of youth culture in the mid-20th century are discussed in terms of their connection to developments in the technology and structure of media. The integration of Internet-

based services into contemporary American society is the focus of one-half of the course. **PREREQS:** NMC 101

NMC 440. MEDIA MANAGEMENT (3). Principles of management and their application to new media. The practice of new media management including personnel, programming, sales and promotions. Students will gain an understanding of the business side of the media industries. Students will also develop the analytical methods and problem solving techniques used in the management decision-making process as they relate to the mass media. Students will study the media of radio, broadcast television, cable television, DBS, MMDS, SMATV, satellite, telephony, Internet, film, the recording industry, advertising and public relations, as well as emerging media businesses. **PREREQS:** NMC 101

NMC 441. MEDIA ENTREPRENEURSHIP (3). Studies the entrepreneurial process as it relates uniquely to the arts and sciences of new media. Students will study the basic entrepreneurial processes of law, finance, accounting, organizational structure, budgeting, business plans, market analyses, taxes, licensing, and insurance as they relate to new media enterprises. Students will also study the sales/revenue generation side of new media ventures.

NMC 470. MEDIA LAW (3). The relevant laws and regulations that govern the mass media; the participants in the law making process; the analytical methods and problem solving techniques used in the law making process; the laws and policies affecting journalists. Issues such as libel, privacy, obscenity, indecency, fair trail/free press and copyright are covered. **PREREQS:** NMC 101

NMC 471. TELECOMMUNICATIONS POLICY (3). Covers past and present telecommunications policy. Examines the agencies that govern the telecommunications industry, including the Federal Communications Commission. Studies the differences and similarities between the regulation associated with public and private telecommunications systems and services. Students will gain knowledge of telecommunications industry ownership regulations, including antitrust regulation of the telecommunications industry. **PREREQS:** NMC 101

NMC 481. POST PRODUCTION (4). Advanced film and video production with emphasis on techniques, equipment, and theories involved in editing film and video. Emphasis on the use of computer-based nonlinear editing systems. Students will also study the use of special effects in visual production. **PREREQS:** NMC 101 and NMC 383

NMC 482. DOCUMENTARY (4). Theory and production of the documentary genre. The class covers all stages of producing a documentary film from the idea through development, marketing, planning, shooting, editing, and post-production. **PREREQS:** NMC 101 and NMC 383

NMC 483. NEW MEDIA 3-D (4). Hands-on introduction to the world of 3-D computer modeling and animation, including investigations of light, texture, form, spatial design and motion. Course includes discussions of professional and artistic practice and critique of student and professional work. Lec/lab.

NMC 484. NEW MEDIA ANIMATION (4). An in-depth theoretical and hands-on investigation of advanced animation tools and techniques used for educational, scientific, entertainment, and expressive communication projects. Tools and techniques covered include motion capture (full body, face, hand), automated lip-sync dialogue processing, dynamic simulation, particle motion, and other simulation or performance-based animation approaches. Students will work individually and in teams to explore the communicative and creative possibilities of the described technologies. **PREREQS:** NMC 101

NMC 490. MEDIA ETHICS (3). Exploration of the ethical issues surrounding new media communications. Topics include professionalism in journalism, new media visual production, new media management, advertising, film, and public relations. Topics also include new media's relationship with society, violence in the media, and sex in the media. **PREREQS:** NMC 101

NMC 498. CAPSTONE PROJECTS (3). Senior-level course designed to integrate the skills and knowledge obtained through NMC course work into a group research and/or production project that will be useful to students for their professional portfolio or serve as the basis for academic publication. **PREREQS:** NMC 101 and senior standing and departmental approval.

NMC 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

■ THEATRE ARTS COURSES

TA 121. ORAL INTERPRETATION I (3). Analysis and presentation of literature. Exploration of emotional reactions, expressive vocal and physical responses, and performing techniques for effective communication. (FA)

TA 144. PLAYREADING (1). Reading/discussion/examination of plays from world theatre of past and present from the perspective of production and theatre history. This course is repeatable for a maximum of 2 credits.

TA 147. *INTRODUCTION TO THE THEATRE (3). Origins, history, nature, elements, and style of theatre production; function of artists and craftspeople of the theatre. (FA) (Bacc Core Course)

TA 147H. *INTRODUCTION TO THE THEATRE (3). Origins, history, nature, elements, and style of theatre production; function of artists and craftspeople of the theatre. (FA) (Bacc Core Course) **PREREQS:** Honors College approval required.

TA 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

TA 242. VISUAL PRINCIPLES OF THEATRE (3). An introduction to visual creativity, creative thinking, and visual problem solving as applied to theatre arts as a whole, and to scene and costume design. (FA)

TA 243. PRINCIPLES OF COSTUMING FOR THE STAGE (3). Principles and techniques of costume construction; practical application in the costume shop on theatre production. **PREREQS:** TA 147 and TA 242

TA 244. SCENE CRAFTS (3). Constructing scenery and stage properties; practical experience in backstage procedures and scene painting. Lec/lab. (FA)

TA 245. STAGE LIGHTING (3). Fundamentals of electricity as used in stage lighting; color and light, lighting instruments and control systems, theory and practice of lighting stage production. **PREREQS:** TA 244

TA 247. STAGE MAKEUP (3). Basic principles and theory with laboratory experience in most-used applications of theatrical makeup. **PREREQS:** Preference given to TA majors.

TA 248. FUNDAMENTALS OF ACTING I (3). Examination of basic principles and techniques of acting. Exploration of relaxation/focus, personal vocal/physical awareness, the actor's craft, and the performance process. (FA) **PREREQS:** TA 147 or instructor approval required.

TA 249. FUNDAMENTALS OF ACTING II (3). Continued work in the basic principles and techniques of acting. Emphasis on improvisation, character analysis, and creation, the balance between truth and technique. **PREREQS:** TA 248 and TA 248 or instructor approval required.

TA 250. WORKSHOP: THEATRE ARTS (1-3). Practical experience in performance, technical

theatre, or design. Maximum for 6 credits may be applied toward graduation. This course is repeatable for a maximum of 6 credits. **PREREQS:** Departmental approval required.

TA 250H. WORKSHOP: THEATRE ARTS (1-3). Practical experience in performance, technical theatre, or design. Maximum for 6 credits may be applied toward graduation. This course is repeatable for a maximum of 6 credits. **PREREQS:** Departmental approval required and Honors College approval required.

TA 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

TA 321. ADVANCED ORAL INTERPRETATION (3). Interpretative theory; programming, adapting materials for oral interpretation, reader's theatre, chamber theatre experimentation in presentational forms. Offered every third year. **PREREQS:** TA 121

TA 330. *HISTORY OF THE THEATRE (3). The rise and development of the composite arts of the theatre in their cultural and social context. Origins to 1500. Offered alternate years. (H) (Bacc Core Course)

TA 331. *HISTORY OF THE THEATRE (3). The rise and development of the composite arts of the theatre in their cultural and social context. 1500 to 1870. Offered alternate years. (H) (Bacc Core Course) **PREREQS:** TA 144 and TA 147 are recommended.

TA 332. **HISTORY OF THE THEATRE (3). The rise and development of the composite arts of the theatre in their cultural and social context. 1870 to present. Offered alternate years. (H) (Bacc Core Course) (Writing Intensive Course) **PREREQS:** TA 144 and TA 147 are recommended.

TA 344. PLAYSRIPT ANALYSIS (3). Study of major approaches to playscript analysis and detailed application of these systems to the theatrical production process. (H) **PREREQS:** TA 147 and TA 144

TA 346. SCENE AND STAGE DESIGN (3). Designs for stage productions including elements of color, mass, line, and lighting for various types of theatre architecture and plays. Offered alternate years. **PREREQS:** TA 147 and TA 244

TA 348. ADVANCED ACTING: REALISM (3). Discussion, research, rehearsal, performance, and criticism of scenes from realistic drama. Emphasis on the craft of acting, emotional availability/honesty, personal awareness. Offered alternate years. **PREREQS:** TA 248 and instructor approval required.

TA 349. ADVANCED ACTING: STYLES (3). Discussion, research, rehearsal, performance, and criticism of scenes from a range of period and genre styles. Offered alternate years. **PREREQS:** TA 248 and instructor approval required.

TA 350. WORKSHOP: THEATRE ARTS (1-3). Advanced work in acting, directing or technical theatre in dramatic productions; laboratory experience. Maximum of 6 credits may be applied toward graduation. This course is repeatable for a maximum of 6 credits. **PREREQS:** Departmental approval required.

TA 351. PRINCIPLES OF PLAYWRITING (3). Basic principles and techniques of playwriting. Offered alternate years. **PREREQS:** TA 144 and TA 344

TA 352. PLAYWRITING WORKSHOP (3). Intensive work on student playscripts generated in TA 351, through re-writes, revision and rehearsals. Offered alternate years. **PREREQS:** TA 351

TA 354. FUNDAMENTALS OF PLAY DIRECTION (3). History, theories and techniques of stage direction. Script analysis, study of the audience, staging, working with actors and designers, the production process. Emphasis on practical exploration and application. Offered alternate years. **PREREQS:** TA 244 and TA 248 and instructor approval required.

TA 360. *MULTICULTURAL AMERICAN THEATRE (3). Examines the rich panorama of multicultural-American theatre (e.g. African-American, gay and lesbian, Hispanic, Asian American). (H) (Bacc Core Course)

TA 360H. *MULTICULTURAL AMERICAN THEATRE (3). Examines the rich panorama of multicultural-American theatre (e.g. African-American, gay and lesbian, Hispanic, Asian American). (H) (Bacc Core Course)

TA 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

TA 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TA 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TA 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TA 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TA 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TA 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

TA 407H. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

TA 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TA 410. THEATRE ARTS INTERNSHIP (1-16). One- to three-term residency in a producing theatre, for a maximum allowable total of 15 credits. Student works in a department of the theatre and in related production activities, according to areas of interest or specialization. Work supervised and evaluated by agency staff; academic evaluation by supervising department faculty member(s). Available to upper-division theatre arts majors and graduate students approved by faculty and selected by intern agency. This course is repeatable for a maximum of 15 credits. **PREREQS:** 27 credits of theatre arts, with a minimum of 6 credits in area of skill specialization, or 12 credits of upper-division theatre arts courses, with a minimum of 6 credits in area of skill specialization. Must be arranged with instructor prior to registration. Departmental approval required.

TA 416. TOPICS IN THEATRE ARTS (3). Lectures and explorations of theories, issues, methods, problems, and applications in theatre arts. Concentrated work in a variety of selected theatre topics. Offered as demand and staffing allow. This course is repeatable for a maximum of 12 credits. **PREREQS:** 9 credits of theatre arts or instructor's approval required.

TA 443. COSTUME DESIGN (3). Theory and practice of designing costumes for a theatrical production. **PREREQS:** TA 243

TA 444. *THEORY AND CRITICISM OF THEATRE ARTS (3). Major theories that have influenced and motivated theatre practice in Western civilization throughout its development. Offered on alternate years. (Writing Intensive Course) **PREREQS:** 6 credits of theatre history, or 6 credits of dramatic literature.

TA 450. STUDIO: THEATRE ARTS (3-6). Advanced individual study on approved projects in one of the arts of the theatre: acting, directing or scene/costume/lighting design; or in stage or theatre management. This course is repeatable for a maximum of 6 credits. **PREREQS:** 9 credits of upper-division theatre arts. Departmental approval required.

TA 454. ADVANCED PLAY DIRECTION (3). Expanded exploration of directing theories and techniques. Practical application through the production of a one-act play in a laboratory theatre. Offered alternate years. **PREREQS:** TA 354 and instructor approval required.

TA 464. THEATRE MANAGEMENT (3). Managerial theory and practices of theatre operations, including organizational structure, financial practices, program promotion, and legal concerns. Offered alternate years. **PREREQS:** 6 credits of upper-division theatre arts courses of equivalent; junior or senior standing.

TA 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

TA 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TA 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

TA 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TA 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TA 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

TA 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

TA 510. THEATRE ARTS INTERNSHIP (6-15). One- to three-term residency in a producing theatre, for a maximum allowable total of 15 credits. Student works in a department of the theatre and in related production activities, according to areas of interest or specialization. Work supervised and evaluated by agency staff; academic evaluation by supervising department faculty member(s). Available to upper-division theatre arts majors and graduate students approved by faculty and selected by intern agency. This course is repeatable for a maximum of 15 credits. **PREREQS:** 27 credits in theatre arts, with a minimum of 6 credits in area of skill specialization, or 12 credits of upper-division theatre arts courses, with a minimum of 6 credits in area of skill specialization. Must be arranged with instructor prior to registration. Departmental approval required.

TA 516. TOPICS IN THEATRE ARTS (3). Lectures and explorations of theories, issues, methods, problems, and applications in theatre arts. Concentrated work in a variety of selected theatre topics. Offered as demand and staffing allow. This course is repeatable for a maximum of 12 credits. **PREREQS:** 9 credits of theatre arts or instructor's approval required.

TA 543. COSTUME DESIGN (3). Theory and practice of designing costumes for a theatrical production. **PREREQS:** TA 243

TA 544. THEORY AND CRITICISM OF THEATRE ARTS (3). Major theories that have influenced and motivated theatre practice in Western civilization throughout its development. Offered on alternate years. **PREREQS:** 6 credits of theatre history or 6 credits of dramatic literature.

TA 550. STUDIO: THEATRE ARTS (3-6). Advanced individual study on approved projects in one of the arts of the theatre: acting, directing or scene/costume/lighting design; or in stage or theatre management. This course is repeatable for a maximum of 6 credits. **PREREQS:** 9 credits of upper-division theatre arts. Departmental approval required.

TA 554. ADVANCED PLAY DIRECTION (3). Expanded exploration of directing theories and techniques. Practical application through the

production of a one-act play in a laboratory theatre. Offered alternate years. **PREREQS:** TA 354 and instructor approval required.

TA 564. THEATRE MANAGEMENT (3). Managerial theory and practices of theatre operations, including organizational structure, financial practices, program promotion, and legal concerns. Offered alternate years. **PREREQS:** 6 credits of upper-division theatre arts courses of equivalent and junior or senior standing.

Graduate Areas of Concentration

American History (U.S.)

Western U.S. History

European History

Non-American and Non-European History (Asian, African, Latin American, Islamic)

History of Science

Graduate Areas of Concentration

Development of the Physical, Biological, and Environmental Sciences

History of Science and Medicine

Intellectual and Social History of Science in Europe and the U.S.

Philosophy

Graduate Areas of Concentration

Aesthetic Theory

Ethics (including environmental ethics and biomedical ethics)

History of Philosophy

Logic and Philosophy of Science

Religious Studies

HISTORY

The School of History, Philosophy, and Religion offers major programs leading to a BA degree. Courses provide fundamental background for the social sciences and humanities and are of special value to students of government, education, law, science, journalism, and business. History majors go on to careers in teaching and jobs requiring a liberal arts background.

BA candidates must have proficiency at the second-year college level of a foreign language.

The school also offers a minor program for undergraduates with majors in other fields.

PHILOSOPHY

The School of History, Philosophy, and Religion offers a BA or BS degree in Philosophy, a Philosophy minor, an undergraduate and postbaccalaureate certificate in Applied Ethics, an MA in Applied Ethics, and participates in the Master of Arts in Interdisciplinary Studies (MAIS) program with a focus on applied ethics and other areas of philosophy. The school's Program for Ethics, Science, and the Environment (PESE) supports multidisciplinary education and scholarship on ethical and policy issues that are raised by advances in scientific knowledge, biotechnology, and natural resource use.

The Spring Creek Project seeks to bring together the practical wisdom of the environmental sciences, the clarity of philosophical analysis, and the creative, expressive power of the written word, to find new ways to understand and re-imagine our relation to the natural world.

Baccalaureate core courses are taught for students interested in broadening their intellectual horizons, developing their abilities for intellectual criticism,

and enlarging their understanding of social, ethical, religious, political, and aesthetic values in contemporary society and world cultures. Many philosophy courses have content that is relevant to the interests of women and minority students.

The school invites non-majors to combine study of philosophy with their major program by enrolling in the philosophy minor or the Applied Ethics certificate program.

Students interested in philosophy programs should contact or visit the school's undergraduate advisor or director of graduate studies.

HISTORY OF SCIENCE

The School of History, Philosophy, and Religion offers the degrees of Master of Arts (MA), Master of Science (MS) and Doctor of Philosophy (PhD) in History of Science. The History of Science graduate program provides professional training in the interdisciplinary subject of history of science. The program connects the humanities, social sciences, and natural sciences by studying and interpreting the development of the sciences within particular historical settings and analyzing the changing roles of the sciences within modern cultures. Emphasis in the program is on scientific traditions since the sixteenth century in Europe and North America, in the physical, earth, biological, medical, and social sciences, as well as on environmental history and the history of the environmental sciences.

MA IN APPLIED ETHICS DEGREE

The MA in Applied Ethics provides students skills in moral reasoning and an understanding of the ethical values and dilemmas in today's world. Students will be able to identify, analyze and suggest solutions to ethical problems that arise in their professional and civic lives.

MAIS DEGREE

The school also participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program. In other advanced degree programs, philosophy may be used as a minor. See the graduate section of this catalog for details.

UNDERGRADUATE MAJORS WITH OPTIONS

History (BA, CRED, HBA)

Minimum total credits (49)

Minimum upper-division credit (33) Courses that must be included in the 49 credits:

HST 101, HST 102, HST 103. *History of Western Civilization (or equivalent European courses approved by advisor) (4,4,4)
HST 104. *World History I: Ancient Civilizations (3)
HST 105. *World History II: Middle and Early Modern Ages (3)

HST 106. *World History III: The Modern and Contemporary World (3)
(or equivalent non-European, non-U.S. history courses approved by advisor)

HST 201, HST 202, HST 203. *History of the United States (or equivalent American courses approved by advisor) (4,4,4)

Courses in a non-European, non-U.S. history area (4)

4 credits in each of the following, for a total of 12 credits:

European history or History of Science
U.S. history or History of Science
Non-European/Non-U.S. history
HST 310. The Historian's Craft (4)
HST 407. ^Seminar (4)
History electives (12) History of Science courses may count as electives.

Freshman/Sophomore Years (20)

HST 101, HST 102, HST 103. *History of Western Civilization (4,4,4)

HST 104. *World History I: Ancient Civilizations (3)

HST 105. *World History II: Middle and Early Modern Ages (3)

HST 106. *World History III: The Modern and Contemporary World (3)

HST 201, HST 202, HST 203. *History of the United States (4,4,4)

Junior Year (12)

Non-European/Non-U.S. History (4)
HST 310. The Historian's Craft (4)

History electives (4)

Senior Year (21)

HST 407. ^Seminar (4)

History electives (4)

4 credits in each of the following, for a total of 12 credits:

European; U.S.
Non-European/Non-U.S.

Footnotes:

* Baccalaureate Core Course
^ Writing Intensive Course (WIC)

PHILOSOPHY (BA, BS, CRED, HBA, HBS)

An undergraduate major in philosophy provides a broad education and intellectual skills that are useful in many occupations and areas of life. It is also valuable background for graduate study in philosophy and religious studies and for advanced study in such professional fields as law and public service.

- At least 32 credits must be upper division.
- At least 12 credits must be 400 level.
- All courses offered by the School of History, Philosophy, and Religion must be graded, no S/U.
- Only courses with C- or better will be accepted for the major.
- Students must have a 2.5 GPA in those courses offered by the school.

Philosophical Foundations (10–12)

PHL 101. Critical Thinking (4)
or PHL 121. *Reasoning and Writing (3)
PHL 251. *Knowers, Knowing, and the Known (4)
PHL 205. *Ethics (4)

Philosophical Perspectives (24–27)

PHL 301, PHL 302, PHL 303. *History of Western Philosophy (4,4,4)

Select one Logic course:

PHL 321. Deductive Logic (4)
PHL 325. *Scientific Reasoning (4)
PHL 421. Mathematical Logic (3)

Select one Value Theory or one Metaphysics/Epistemology course from the two lists below (3–4):

Value Theory:

PHL 207. *Political Philosophy (4)
PHL 342. Contemporary Ethics (4)
PHL 344. *Pacifism, Just War, and Terrorism (4)
PHL 360. *Philosophy and the Arts (4)
PHL 365. *Law in Philosophical Perspective (4)
PHL 390. Moral Theories (3)
PHL 417. Feminist Philosophies (3)
PHL 430. History of Buddhist Philosophy (4)
PHL 439. Philosophy of Nature (3)
PHL 440. Environmental Ethics (3)
PHL 499. Topics in Philosophy [some qualify; check with professor] (1–4)

OR:

Metaphysics/Epistemology:

PHL 325. *Scientific Reasoning (4)
PHL 365. *Law in Philosophical Perspective (4)
PHL 430. History of Buddhist Philosophy (4)
PHL 436. Philosophy and Religion (3)
PHL 451. Knowledge and Reality (3)
PHL 470. Philosophy of Science (3)
PHL 474. Philosophy of Biology (4)
PHL 499. Topics in Philosophy [some qualify; check with professor] (1–4)
Diversity: Select one course from below (3–4):
PHL 208. Introduction to Buddhist Traditions (4)
PHL 280. *Ethics of Diversity (4)
PHL 312. *Asian Thought (4)
PHL 316. Intellectual Issues of Mexico and Mexican Americans (4)
PHL 371. *Philosophies of China (4)
PHL 380. *The Body, Medicine, and Culture (3)
PHL 417. Feminist Philosophies (3)
PHL 430. History of Buddhist Philosophy (4)
PHL 448. Native American Philosophies (3)
PHL 499. Topics in Philosophy: [some qualify; check with professor] (1–4)
PHL 407. Seminar (3)
Electives (12–16) Consultation with advisor is required.

Total=46–55 (14–15 courses)

UNDERGRADUATE MINORS

HISTORY MINOR

Also available via Ecampus.

Undergraduate students may elect a minor in History to complement course work in their major discipline. History minors must complete 28–29 credits, depending on the area:

U.S. History

HST 201, 202, 203. *History of the United States (4,4,4) (or equivalent)
Minimum of 12 upper-division credits in

U.S. history courses (300+ level)
Additional history credits (any history courses) (4)

European History

HST 101, 102, 103. *History of Western Civilization (4,4,4) (or equivalent)

Minimum 12 upper-division credits in "European" history (300+ level)

Additional history credits (any history courses) (8)

Non-European, Non-U.S. History (African, Asian, Islamic World, Latin American History)

HST 104. *World History I: Ancient Civilizations (3) (or equivalent)

HST 105. *World History II: Middle and Early Modern Ages (3) (or equivalent)

HST 106. *World History III: The Modern and Contemporary World (3) (or equivalent)

Minimum 12 upper-division credits in non-European, non-U.S. history (300+ level)

Additional history credits (any history courses) (8)

All courses for a History minor must be taken for graded credit. Minor courses may be used to fulfill baccalaureate core, CLA, and minor requirements.

PHILOSOPHY MINOR

The Philosophy minor allows students to specialize in such areas as ethics, legal and political philosophy, philosophy and religion, non-Western philosophies and religious ideas, philosophy of art, logic, philosophy of science, and the history of philosophy.

History of Philosophy—Select one course from:

PHL 301. *History of Western Philosophy (4)

PHL 302. *History of Western Philosophy (4) or PHL 303. *History of Western Philosophy (4)

Logic—Select one course from:

PHL 101. Critical Thinking (4)

PHL 121. *Reasoning and Writing (3)

PHL 321. Deductive Logic (4)

PHL 325. *Scientific Reasoning (4)

or PHL 421. Mathematical Logic (3)

Concentration:

Students must arrange a minor area of concentration with approval of a faculty advisor.

Electives:

As many as needed to complete the total credit requirement.

Total must include 12 credits of upper-division with at least 3 credits at the 400 level.

Total=27

A grade of C– or better is required in all courses used to complete minor requirements. Only one elective may be taken with S/U grading.

GRADUATE MAJORS

APPLIED ETHICS (MA, MAIS)

Graduate Areas of Concentration

Art and morality, bioethics, environmental ethics

The MA in Applied Ethics is designed to provide students with skills of moral reasoning and an understanding of ethical values and dilemmas in today's world. Students will be able to identify, analyze and suggest solutions to ethical problems that arise in their professional and civic lives.

Students are required to take courses in ethical theory, as well as courses in applied ethics and in an appropriate disciplinary or integrated minor. Completion of the degree requires a practicum and thesis. Please note that Oregon State University also requires completion of two years of a foreign language for the master of art's degree.

Required Course of Study (45 credits minimum)

A. Philosophy Core (9)

PHL 525. Philosophical Methods (3)

PHL 541. Classical Moral Theories (3)

PHL 542. Contemporary Moral Theories (3)

B. Applied Ethics (15 credits, with maximum of 6 from PHL 501, PHL 502, PHL 505)

PHL 501. Research (1–16)

PHL 502. Independent Study (1–16)

PHL 505. Reading and Conference (1–16)

PHL 507. Seminar (1–16)

PHL 512. Great Figures in Philosophy (4)

PHL 517. Feminist Philosophies (3)

PHL 540. Environmental Ethics (3)

PHL 543. World View and Environmental Values (3)

PHL 544. Biomedical Ethics (4)

PHL 547. Research Ethics (3)

PHL 555. Death and Dying (3)

PHL 561. Art and Morality (3)

PHL 570. Philosophy of Science (3)

PHL 599. Topics in Philosophy (1–4)

C. PHL 510. Practicum (3–6)

D. PHL 503. Thesis (6–9)

E. Disciplinary or Integrated Minor (12)

HISTORY OF SCIENCE (MA, MS, PhD, MAIS)

Graduate Areas of Concentration

Development of the physical, biological, and environmental sciences; history of science and medicine; intellectual and social history of science in Europe and the U.S.

The graduate program leading to the MS, MA, and PhD is offered through the School of History, Philosophy, and Religion. Graduate work in the school may apply to the Master of Arts in Interdisciplinary Studies and to minors in other advanced-degree programs.

Students applying for graduate work in history must meet the following requirements:

1. Minimum overall undergraduate GPA of 3.00
2. Appropriate undergraduate course work in history
3. Have Graduate Record Examination scores sent to the School of History, Philosophy, and Religion

Course work in the history of science graduate major provides a critical perspective on the scientific enterprise through the centuries. It is valuable by graduate students in a variety of disciplines in the sciences and the humanities.

Admission Requirements

Students must have completed a four-year baccalaureate degree from an accredited college or university and have achieved a combined GPA of 3.00 on the last 90 quarter (60 semester) credits of graded undergraduate work of the first baccalaureate and all subsequent graded credits.

The applicant must submit photocopies of official transcripts of all previous academic work at the college or university level.

Applicants must also provide:

- A statement of the student's particular fields of interest and overall aims and purpose in the study of the history of science. An additional writing sample (no more than 25 pages) would be helpful to the graduate admissions committee.
- A photocopy of the official Graduate Record Examination (GRE) scores.
- Three letters of recommendation that specifically evaluate academic abilities and professional potential.

Graduate Degree Requirements

Requirements for a Master's Degree:

Either the MA or MS may be earned. The MA requires demonstration, either by course work or examination, of a reading knowledge of a foreign language appropriate for research. Both degrees require the successful completion of 45 graduate credits. Candidates are required to have a major field of at least 24 credits of course work (including historiography) from a list of approved history of science courses and a minor field of 15 credits of course work in science, history, or a related (or integrated) field; a thesis is optional.

Requirements for a Doctoral Degree:

The equivalent of three years of graduate work beyond the bachelor's degree is required including a doctoral thesis. This must include the requirements for, or the equivalent of, a master's degree in history of science. Course work should have history of science as a major; the minor field can be in science, history, or a related (or integrated) field. Generally one foreign language is required.

GRADUATE MINORS**APPLIED ETHICS
GRADUATE MINOR**

For more information, see the departmental advisor.

HISTORY GRADUATE MINOR

Graduate Areas of Concentration
American history (U.S.) Western U.S. history, European history, non-American and non-European history (Asian, African, Latin American, Islamic), history of science

Graduate work in the School of History, Philosophy, and Religion may apply to the Master of Arts in Interdisciplinary Studies degree and to minors in other advanced degree programs.

Students applying for graduate work in history must meet the following requirements:

1. Minimum overall undergraduate GPA of 3.00
2. Appropriate undergraduate course work in history
3. Have Graduate Record Examination scores sent to the School of History, Philosophy, and Religion.
4. History of Science Graduate Minor

Graduate Areas of Concentration
History of science and medicine, development of the physical, biological, and environmental sciences, intellectual and social history of science in Europe and the U.S.

Graduate work in the School of History, Philosophy, and Religion may apply to the Master of Arts in Interdisciplinary Studies and to minors in other advanced degree programs.

Students applying for graduate work in history must meet the following requirements:

1. Minimum overall undergraduate GPA of 3.00
2. Appropriate undergraduate course work in history
3. Have Graduate Record Examination scores sent to the School of History, Philosophy, and Religion.

PHILOSOPHY GRADUATE MINOR

Graduate Areas of Concentration
Aesthetic theory, ethics (including environmental ethics and biomedical ethics), history of philosophy, logic and philosophy of science, religious studies

The School of History, Philosophy, and Religion is committed to teaching students the skills and knowledge they need to reason cogently and decide wisely about difficult issues they will confront as citizens and professionals. The school offers graduate work leading to the Master of Arts in Interdisciplinary Studies degree with specialization in applied ethics and in other areas of philosophy and religious studies. The MAIS thesis op-

tion is encouraged. The study of applied ethics builds on a special strength among school faculty.

Graduate credit is offered in logic, ethics (including environmental ethics and biomedical ethics), aesthetics, religious studies, philosophy of science, contemporary philosophy, and history of philosophy. PHL 550 Ideas Matter is offered in conjunction with the "IDEAS MATTER" lecture series.

Prospective students should request additional program literature from the school. Some teaching assistantship support is available.

CERTIFICATES**APPLIED ETHICS CERTIFICATE**

The Applied Ethics undergraduate certificate builds upon the various courses in ethics taught in the School of History, Philosophy, and Religion and courses with ethics-related content found throughout the university, in order to provide students with a systematic and thorough understanding of the moral world for their civic, professional, and personal lives.

Students pursuing a major in any academic or professional field may also pursue applied ethics for educational interest and for professional preparation. The certificate adds a critical philosophical dimension to students' understanding of their professional aspirations.

Students seeking a baccalaureate degree at OSU may earn the Applied Ethics certificate by completing a minimum of 28 credits of approved course work.

For more information, contact Courtney Campbell, 541-737-5651, ccampbell@oregonstate.edu.

Philosophy Requirements

PHL 205. *Ethics (4)

12 credits from any of the following courses:

PHL 150. *Great Ideas in Philosophy (3)

PHL 280. *Ethics of Diversity (4)

PHL 325. *Scientific Reasoning (4)

PHL 342. Contemporary Ethics (4)

PHL 390. Moral Theories (3)

PHL 405. Reading and Conference (1–16)

PHL 417. Feminist Philosophies (3)

PHL 440. Environmental Ethics (3)

PHL 443. *Worldviews/Environmental Values (3)

PHL 444. *Biomedical Ethics (4)

PHL 450. Topics (1)

PHL 499. Topics in Contemporary Philosophy [w/approval] (1–4)

Elective Requirements (12)

Three concentrations of courses to achieve the 12 elective credits for the Applied Ethics certificate have already been established, but creating an individualized program is possible. The established concentrations are:

1. Ethics and scientific inquiry
2. Ethics and the environment

3. Ethics, health and medicine

Total=28

The Applied Ethics certificate coordinator will assist students in course selection from a list available in the School of History, Philosophy, and Religion.

**MEDICAL HUMANITIES
CERTIFICATE**

The undergraduate certificate in Medical Humanities offers OSU students a multi-disciplinary integrated program to study health, medicine and the healing professions. The certificate relies on key courses in medical anthropology, literature and medicine, medical history, and biomedical ethics for its core content foundations. Courses from additional different disciplines—biology; ethnic studies; exercise science; philosophy; political science; psychology; public health; religious studies; sociology; and women, gender, and sexuality studies—can fulfill complementary elective courses. In addition, the certificate program provides a team-taught colloquium on "the art of healing" that emphasizes skills in professional identity, reflective writing, cultural competency, and diversity as a complement to the scientific features of the healing professions. The certificate will prepare students to empathize with the sufferings of others, reflect critically on medical knowledge and discourse, create new representations of the medical experience, and confront moral, psychological, and ethical dilemmas.

For further information, please contact Courtney Campbell, 541-737-5651, ccampbell@oregonstate.edu.

**Medical Humanities Core
(minimum 10 credits)**

ANTH 345. *Biological and Cultural Constructions of Race (3)

ANTH 383. *Introduction to Medical Anthropology (3)

ENG 489/ENG 589. Writing, Literature and Medicine (4)

HSTS 416/HSTS 516. *History of Medicine Pre-1800 (4)

HSTS 417/HSTS 517. *History of Medicine (4)

PHL 299/HC 299. Selected Topics: *The Art of Healing* (2)

PHL 444/PHL 544. *Biomedical Ethics (4)

RELIGION AND CULTURE CERTIFICATE

The Religion and Culture undergraduate certificate is designed to provide undergraduate students with both breadth and depth in the academic study of religion, with a focus on how religious practice and ideas are manifested as both a shaper and critic of broader cultures nationally and globally.

The certificate is open to all OSU undergraduates as a supplement to any undergraduate degree program. It builds on a core curriculum of courses in the study of religion in the School of History, Philosophy, and Religion and extends student learning to courses in religion and culture, diversity, literature, and western religious experience in many other academic units. The certificate is recognized with a transcript-visible notation.

For advising, contact David Bishop, Academic Coordinator, School of History, Philosophy, and Religion, 322B Milam

Hall, 541-737-8918, David.Bishop@oregonstate.edu.

Required Core (8):

PHL 160. *Quests for Meaning: World Religions (4)
 PHL 202. Introduction to Religious Studies (4)

Religion and Culture Electives (10): Select from the following courses:

HST 387. *Islamic Civilization (4)

■ HISTORY COURSES

HST 101. *HISTORY OF WESTERN CIVILIZATION (4). Provides an awareness and understanding of the Western cultural heritage. Stresses the major ideas and developments that have been of primary importance in shaping the Western tradition. Covers the Ancient World to 1000 A.D. HST 101, HST 102 and HST 103 need not be taken in sequence. (H) (SS) (Bacc Core Course)

HST 101H. *HISTORY OF WESTERN CIVILIZATION (4). Provides an awareness and understanding of the Western cultural heritage. Stresses the major ideas and developments that have been of primary importance in shaping the Western tradition. Covers the Ancient World to 1000 A.D. HST 101H, HST 102H and HST 103H need not be taken in sequence. (H) (SS) (Bacc Core Course) **PREREQS:** Honors College approval required.

HST 102. *HISTORY OF WESTERN CIVILIZATION (4). Provides an awareness and understanding of the Western cultural heritage. Stresses the major ideas and developments that have been of primary importance in shaping the Western tradition. Covers 1000 A.D. to 1789. HST 101, HST 102 and HST 103 need not be taken in sequence. (H) (SS) (Bacc Core Course)

HST 102H. *HISTORY OF WESTERN CIVILIZATION (4). Provides an awareness and understanding of the Western cultural heritage. Stresses the major ideas and developments that have been of primary importance in shaping the Western tradition. Covers 1000 A.D. to 1789. HST 101H, HST 102H and HST 103H need not be taken in sequence. (H) (SS) (Bacc Core Course) **PREREQS:** Honors College approval required.

HST 103. *HISTORY OF WESTERN CIVILIZATION (4). Provides an awareness and understanding of the Western cultural heritage. Stresses the major ideas and developments that have been of primary importance in shaping the Western tradition. Covers 1789 to the present. HST 101, HST 102 and HST 103 need not be taken in sequence. (H) (SS) (Bacc Core Course)

HST 103H. *HISTORY OF WESTERN CIVILIZATION (4). Provides an awareness and understanding of the Western cultural heritage. Stresses the major ideas and developments that have been of primary importance in shaping the Western tradition. Covers 1789 to present. HST 101H, HST 102H, and HST 103H need not be taken in sequence. (H) (SS) (Bacc Core Course) **PREREQS:** Honors College approval required.

HST 104. *WORLD HISTORY I: ANCIENT CIVILIZATIONS (3). A survey of the historical development of several world civilizations from antiquity to roughly 600 to 700 A.D. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. Not offered every year. (H) (Bacc Core Course)

HST 105. *WORLD HISTORY II: MIDDLE AND EARLY MODERN AGES (3). A survey of the historical development of several world civilizations roughly from the 8th century to the late 18th century. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. Not offered every year. (H) (Bacc Core Course)

HST 106. *WORLD HISTORY III: THE MODERN AND CONTEMPORARY WORLD (3). A survey of the historical development of several world civilizations from the 18th century to the contemporary period. Exploration of religious, cultural, social, political, and economic institutions of various societies. Cultural diversity analysis of both ancient Western and non-Western civilizations. Not offered every year. (H) (Bacc Core Course)

HST 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

HST 201. *HISTORY OF THE UNITED STATES (4). Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers pre-Columbian and colonial origins to 1820. HST 201, HST 202, HST 203 need not be taken in sequence. (H) (SS) (Bacc Core Course)

HST 201H. *HISTORY OF THE UNITED STATES (4). Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to the international relations. Covers pre-Columbian and colonial origins to 1820. HST 201H, HST 202H, and HST 203H need not be taken in sequence. (H) (SS) (Bacc Core Course) **PREREQS:** Honors College approval required.

HST 202. *HISTORY OF THE UNITED STATES (4). Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers 1820 to 1920. HST 201, HST 202, HST 203 need not be taken in sequence. (H) (SS) (Bacc Core Course)

HST 202H. *HISTORY OF THE UNITED STATES (4). Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers 1820 to 1920. HST 201H, HST 202H, and HST 203H need not be taken in sequence. (H) (SS) (Bacc Core Course) **PREREQS:** Honors College approval required.

HST 203. *HISTORY OF THE UNITED STATES (4). Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers 1920 to present. HST 201, HST 202, HST 203 need not be taken in sequence. (H) (SS) (Bacc Core Course)

HST 203H. *HISTORY OF THE UNITED STATES (4). Provides an overview of the development of the U.S. from the pre-Columbian era to the present. Attention is given to economic, political, and social trends, as well as to international relations. Covers 1920 to present. HST 201H, HST 202H, and HST 203H need not be taken in sequence. (H) (SS) (Bacc Core Course) **PREREQS:** Honors College approval required.

HST 210. *RELIGION IN THE UNITED STATES (4). A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. CROSSLISTED as PHL 210. (Bacc Core Course)

HST 210H. *RELIGION IN THE UNITED STATES (4). A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. CROSSLISTED as PHL 210H. (Bacc Core Course) **PREREQS:** Honors College approval required.

HST 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HST 310. THE HISTORIAN'S CRAFT (4). A study of the practice as well as theory of historical work. Combines training in reading, writing, and thinking historically with a survey of the development of history, philosophies of history, types and use of historical evidence, varieties of historical investigation, and factors that influence the writing of history. (H) **PREREQS:** 9 credits of history or upper-division standing.

HST 315. THE EUROPEAN MILITARY, 1400-1815 (4). Major aspects of European military history, 1400-1815, notable developments in weaponry and strategy, the social history of the military, impact of war on the civilian front, and pacifism and antimilitarism. Not offered every year. (H)

HST 316. THE AMERICAN MILITARY, 1607-1865 (4). Major aspects of American military history, 1607-1865, notable developments in weaponry and strategy, the social history of the military, impact of war on the civilian front, and pacifism and antimilitarism. Not offered every year. (H)

HST 317. *WHY WAR: A HISTORICAL PERSPECTIVE (4). An inquiry into the origins of mass violence. Theory and case studies are used to suggest possible causes of international war, civil war, revolution, and genocide. (H) (Bacc Core Course)

HST 318. THE AMERICAN MILITARY, 1865-PRESENT (4). Major aspects of American military history, 1865-present: evolution of strategy, tactics, and technology in war; the impact of the military on American society in peace and war; historiographic aspects of U.S. military history. Not offered every year. (H)

HST 320. *ANCIENT NEAR EAST (4). A detailed survey of the peoples and cultures of the ancient Near East, including Assyria, Babylon, Egypt, Israel, Mesopotamia, and Persia, from the earliest recorded beginnings of civilization to about 500 B.C. Particular attention is given to the art, religion, law, and literature of these civilizations. (H) (NC) (Bacc Core Course)

HST 321. GREECE (4). The history of the Greek city-states and the civilization they produced; the archaeological discovery of early Greece; the development of the polis; Sparta, Athenian democracy, the Persian and Peloponnesian Wars; Greek private life and religion. (H)

HST 322. ROMAN REPUBLIC (4). The rise of Rome from a city-state to a world power, Rome's wars with Carthage, her growing domination of the Mediterranean, the ensuing breakdown of Roman society and traditional values, and the rise of ambitious leaders who ultimately destroyed the Republic. (H)

HST 323. ROMAN EMPIRE (4). Roman history from 31 B.C. to A.D. 493. The establishment of the Principate, Roman social and private life, the rise of Christianity, the decline and fall of the Western Empire, Rome's contributions to arts, religion, and law. Not offered every year. (H)

HST 327. HISTORY OF MEDIEVAL EUROPE (4). Cultural, political, and economic history of the European Middle Ages from the fall of the Roman Empire in the West to the Renaissance. Covers 284 A.D. to 1000. HST 327 and HST 328 need not be taken in sequence. Not offered every year. (H)

HST 328. HISTORY OF MEDIEVAL EUROPE (4). Cultural, political, and economic history of the European Middle Ages from the fall of the Roman

Empire in the West to the Renaissance. Covers 1000 to 1400. HST 327 and HST 328 need not be taken in sequence. Not offered every year. (H)

HST 329. HISTORY OF EARLY MODERN EUROPE (4). Political, social, intellectual, and cultural history of Europe from 1400-1789. Focuses on the Renaissance. HST 329, HST 330, and HST 331 need not be taken in sequence. Not offered every year. (H)

HST 330. HISTORY OF EARLY MODERN EUROPE (4). Political, social, intellectual, and cultural history of Europe from 1400-1789. Focuses on the Reformation. HST 329, HST 330, and HST 331 need not be taken in sequence. Not offered every year. (H)

HST 331. HISTORY OF EARLY MODERN EUROPE (4). Political, social, intellectual, and cultural history of Europe from 1400-1789. Focuses on the scientific revolution. HST 329, HST 330, and HST 331 need not be taken in sequence. Not offered every year. (H)

HST 333. MEDIEVAL AND EARLY MODERN SPANISH HISTORY (4). From Islamic conquest to conquest of America, the social, religious, political and economic history of Spain from 1000 to 1700. Not offered every year. (H)

HST 335. NINETEENTH-CENTURY EUROPE (4). A thematic overview of the "long" nineteenth century, from the French Revolution (1789) to the outbreak of the first World War (1914): the industrial revolution and the class struggles that accompanied it; the growing importance of the nation in politics and culture; imperial expansion and Europeans' contacts with non-Europeans; psychoanalysis and the new sciences of the mind; and the developments leading to the cataclysm of Europe's first "modern" war. Not offered every year. (H)

HST 336. TWENTIETH-CENTURY EUROPE (4). Examines the politics, culture, and society of Europe from World War I to the present. Themes include total war; ways that art and literature influenced politics; communist and fascist visions of the relationship of the individual to the society or collective; racial theories and genocide; the cold war division of Europe into East and West; decolonization; and the development of the European Community. Not offered every year. (H)

HST 340. HISTORY OF RUSSIA (4). Survey of political, economic, and social developments from the origin of Russia to the post-Soviet period. Focuses on the period from 862 to 1917. Not offered every year. HST 340 and HST 341 need not be taken in sequence. (H)

HST 341. HISTORY OF RUSSIA (4). Survey of political, economic, and social developments from the origin of Russia to the post-Soviet period. Focuses on the period from 1917 to the present. Not offered every year. HST 340 and HST 341 need not be taken in sequence. (H)

HST 344. SPECIAL TOPICS IN RUSSIAN HISTORY (4). Special topics and problems in Russian history not covered in other courses. May be repeated when topic varies. Not offered every year. (H) This course is repeatable for a maximum of 8 credits.

HST 345. SOCIETY IN MODERN RUSSIA (4). Development of Russian/Soviet/Post-Soviet society since 1861, focusing on gender, urbanization, and the general social ramifications of modernization. Not offered every year. (H)

HST 350. *MODERN LATIN AMERICA (4). History of Latin America leading up to and after Spanish and Portuguese conquest. Focus on indigenous American, European and African cultures and religions in contact under colonial government and economic systems. Covers the period from 1400 to 1810. HST 350 and HST 351 need not be taken in sequence. (H) (NC) (Bacc Core Course)

HST 350H. *MODERN LATIN AMERICA (4). History of Latin America leading up to and after Spanish and Portuguese conquest. Focus on indigenous American, European and African cultures and religions in contact under colonial government and economic systems. Covers the period from 1400 to 1810. HST 350H and HST 351H need not be taken in sequence. (H) (NC) (Bacc Core Course) **PREREQS:** Honors College approval required.

HST 351. *MODERN LATIN AMERICA (4). History of the development of Latin America, emphasizing the issues of imperialism, economic dependency, social stratification, political instability, and nationalism within an international context. Covers 1850 to the present. (H) (NC) (Bacc Core Course) **PREREQS:** HST 350 and HST 351 need not be taken in sequence.

HST 351H. *MODERN LATIN AMERICA (4). History of the development of Latin America, emphasizing the issues of imperialism, economic dependency, social stratification, political instability, and nationalism within an international context. Covers 1850 to the present. (H) (NC) (Bacc Core Course) **PREREQS:** HST 350 and HST 351 need not be taken in sequence. Honors College approval required.

HST 352. *AFRICANS IN LATIN AMERICAN HISTORY (4). A survey of the role of Africans and their descendants in Latin American history, linking the history of the Americas, Europe and Africa. (Baccalaureate Core Course) **PREREQS:** HST 350 and HST 351 suggested.

HST 362. WOMEN IN UNITED STATES HISTORY (4). Women in the United States--their roles in and contribution to American political, economic, social, cultural, and intellectual life. Course sequence pays particular attention to the diversity of American women's backgrounds and experiences. Covers 1620 to 1890. Not offered every year. HST 362 and HST 363 need not be taken in sequence. (H)

HST 363. WOMEN IN UNITED STATES HISTORY (4). Women in the United States--their roles in and contribution to American political, economic, social, cultural, and intellectual life. Course sequence pays particular attention to the diversity of American women's backgrounds and experiences. Covers 1890 to the present. Not offered every year. HST 362 and HST 363 need not be taken in sequence. (H)

HST 365. THE CIVIL RIGHTS MOVEMENT IN THE MODERN U.S. (4). An exploration of the "long civil rights movement" among African Americans and their allies during the 20th century United States, with attention to the structure of racial inequality, movement philosophies and strategies, white allies and opponents, relationships to other freedom movements, and the movement's legacies. (Bacc Core Course)

HST 366. HISTORY OF THE AMERICAN INDIAN (4). A study of the American Indian north of Mexico from before European contact to the present. Focuses on the indigenous population prior to European contact; initial alterations in and continued disruption of Indian society and culture; Indian-white conflict; emergence of U.S. Government Indian policy to 1848. Not offered every year. (H)

HST 368. *LESBIAN AND GAY MOVEMENTS IN MODERN AMERICA (4). Examination of lesbian and gay male identities, lives, and collectivities in American culture from the post-Civil War period to the present. The political and cultural participation, rather than human sexual behaviors, orientations, or values. Not offered every year. (H) (Bacc Core Course)

HST 369. *^IMMIGRATION TO THE U.S. SINCE 1880 (4). The history of immigrants to the U.S. after 1880. Focuses on the experience of immigrants and their children in the U.S. and on the history of U.S. immigration policy. Includes several types of writing assignments: nongraded,

drafts and revisions, and a research paper using outside primary and secondary sources and scholarly notations specific to the discipline of history. HST 369 satisfies WIC requirement for Liberal Studies majors but not History majors. (Baccalaureate Core Course) (Writing Intensive Course) Taught via Ecampus only.

HST 370. *SOCIAL CHANGE AND AMERICAN POPULAR MUSIC (4). An examination of the interactions between social history and popular music, including creation, performance, production, distribution, and reception. Social, ethnic, and economics groups have notoriously used popular music to identify themselves and their boundaries. This course examines how the functions of popular music in our culture and economy have changed over time, and the ways in which popular music reflects and sometimes helps precipitate social change. (Bacc Core Course)

HST 381. *HISTORY OF AFRICA (4). History of Africa from earliest times to present, including origins of human society, slave trade, European imperialism and African nationalism. Covers Africa before 1830. HST 381 and HST 382 need not be taken in sequence. (H) (NC) (Bacc Core Course)

HST 382. *HISTORY OF AFRICA (4). History of Africa from earliest times to present, including origins of human society, slave trade, European imperialism and African nationalism. Covers Nineteenth and Twentieth century Africa. HST 381 and HST 382 need not be taken in sequence. (H) (NC) (Bacc Core Course)

HST 385. *THE ARAB-ISRAELI CONFLICT (4). Examination of the origins of the Arab-Israeli conflict and subsequent efforts to find a lasting solution. (H) (Bacc Core Course)

HST 386. *MODERN IRAN: REVOLUTION AND ITS AFTERMATH (4). The history of 20th century Iran with a focus on the Islamic revolution and its consequences. Readings will provide the cultural and political background for understanding contemporary Iran and its place in the world. (Bacc Core Course)

HST 386H. *MODERN IRAN: REVOLUTION AND ITS AFTERMATH (4). The history of 20th century Iran with a focus on the Islamic revolution and its consequences. Readings will provide the cultural and political background for understanding contemporary Iran and its place in the world. (Bacc Core Course) **PREREQS:** Honors College approval required.

HST 387. *ISLAMIC CIVILIZATION (4). Political, social, and religious developments from 600 to 1400. Early history and the formation of Islamic society to the Mongol invasion. HST 387 and HST 388 need not be taken in sequence. (H) (NC) (Bacc Core Course)

HST 388. *ISLAMIC CIVILIZATION (4). Political, social, and religious developments from 1400 to the present. The expansion of Islam, Turkic, and Asian dynasties, impact of Western imperialism and modern Islamic world. HST 387 and HST 388 need not be taken in sequence. (H) (NC) (Bacc Core Course)

HST 390. *MIDEAST WOMEN: IN THEIR OWN WORDS (4). The lives of modern Middle Eastern women as told in memoirs, autobiography and film. First-person narratives and film portrayals provide the means for understanding historical events and contemporary trends in the region. (Bacc Core Course)

HST 390H. *MIDEAST WOMEN: IN THEIR OWN WORDS (4). The lives of modern Middle Eastern women as told in memoirs, autobiography and film. First-person narratives and film portrayals provide the means for understanding historical events and contemporary trends in the region. (Bacc Core Course) **PREREQS:** Honors College approval required.

HST 391. *TRADITIONAL CHINA AND JAPAN (4). Prehistory to Western encounters in the middle of the nineteenth century, with emphasis

on the philosophical, artistic heritage, and social institutions of these two countries which form East Asia. HST 391 and HST 392 need not be taken in sequence. (H) (NC) (Bacc Core Course)

HST 392. *MODERN CHINA AND JAPAN (4). From the opening of East Asia in the mid-nineteenth century to the present, with emphasis on modern political movements and cultural transformation. HST 391 and HST 392 need not be taken in sequence. (H) (NC) (Bacc Core Course)

HST 396. *GENDER, FAMILY AND POLITICS IN TRADITIONAL CHINA (4). Study of the interaction between gender, family and politics as major factors shaping traditional Chinese experience. (Bacc Core Course)

HST 397. *GENDER, FAMILY AND POLITICS IN MODERN CHINA (4). Study of the interaction between gender, family and politics as three factors shaping modern Chinese experience. Elective for history majors. (Bacc Core Course)

HST 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HST 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HST 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

HST 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

HST 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

HST 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

HST 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

HST 407. *SEMINAR (5). (Writing Intensive Course) This course is repeatable for a maximum of 20 credits.

HST 410. HISTORY INTERNSHIP (1-12). Supervised work of a historical nature with historical societies, archives, museums, or other public or private organizations. No more than 6 of the maximum 12 credits may be used to satisfy the history major requirement of 51 credits. This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

HST 415. SELECTED TOPICS (4). Selected topics of special or current interest not covered in other courses. (H) This course is repeatable for a maximum of 99 credits.

HST 415H. SELECTED TOPICS (4). Selected topics of special or current interest not covered in other courses. (H) This course is repeatable for a maximum of 99 credits. **PREREQS:** Honors College approval required.

HST 416. FOOD IN WORLD HISTORY (4). Historical analysis of food and cooking from pre-history to the present, with an emphasis on cross-cultural differences of food production and consumption.

HST 421. HELLENISTIC GREECE (4). History of the Greek world from the end of the Peloponnesian War to the Roman conquest of Greece; the careers of Alexander the Great and his successors; the art, literature, science, religion, and philosophy of the post-classical or Hellenistic world. Not offered every year. (H)

HST 425. *THE HOLOCAUST IN ITS HISTORY (4). An inquiry into the causes, course, and impact of the Holocaust. The general theme of anti-Semitism in European history is explored for background. Topics discussed for comparative

purposes include anti-Semitism in American history; other episodes of mass murder in the 20th century. Not offered every year. (H) (Bacc Core Course)

HST 425H. *THE HOLOCAUST IN ITS HISTORY (4). An inquiry into the causes, course, and impact of the Holocaust. The general theme of anti-Semitism in European history is explored for background. Topics discussed for comparative purposes include anti-Semitism in American history; other episodes of mass murder in the 20th century. Not offered every year. (Bacc Core Course) **PREREQS:** Honors College approval required.

HST 426. WORLD WAR I: A GLOBAL HISTORY (4). Examines World War I from a global perspective, its origins, the course of the conflict and its aftermath, looking especially at Great Britain, France, Russia, Germany and their colonial possessions. Topics will include the concept of total war and the home fronts of a number of nations. **PREREQS:** HST 103

HST 427. TEACHING THE HOLOCAUST (4). Provides a broad sense of the Holocaust; reviews the event itself, its long-term background (the history of anti-Semitism), and the rise of Nazism and Fascism in the years before World War II. Examines what has been learned from the Holocaust and addresses the broader issue of genocide, especially in the 20th century. "Teaching the Holocaust" is directed toward certified teachers and students preparing for teaching careers. Lectures are delivered online. Course includes a day-long set of workshops that deal with issues associated with teaching the Holocaust and genocide.

HST 428. HISTORY OF WESTERN THOUGHT (4). A synthesis of major developments in philosophy, science, social, and political theory and the arts in the European Enlightenment (1715-1789). Not offered every year. HST 428, HST 429, HST 430 need not be taken in sequence. (H)

HST 429. HISTORY OF WESTERN THOUGHT (4). A synthesis of major developments in philosophy, science, social, and political theory and the arts between 1789 and 1890. Not offered every year. HST 428, HST 429, HST 430 need not be taken in sequence.

HST 430. HISTORY OF WESTERN THOUGHT (4). A synthesis of major developments in philosophy, science, social, and political theory and the arts between 1890 and 1945. Not offered every year. HST 428, HST 429, HST 430 need not be taken in sequence. (H)

HST 432. THE HISTORY OF SEXUALITY (4). The history of human sexuality from ancient Greece to the present. (H) (SS)

HST 432H. HISTORY OF SEXUALITY (4). The history of human sexuality from ancient Greece to the present. (H) (SS) **PREREQS:** Honors College approval required.

HST 433. ENGLISH HISTORY (4). The major political, cultural, economic, social and religious developments that have shaped the history of England and ultimately of America and much of the world. Medieval and Tudor-Stuart England. HST 433/HST 533, HST 434/HST 534 need not be taken in sequence. Not offered every year. (H)

HST 434. ENGLISH HISTORY (4). The major political, cultural, economic, social and religious developments that have shaped the history of England and ultimately of America and much of the world. England since 1688. HST 433/HST 533, HST 434/HST 534 need not be taken in sequence. Not offered every year. (H)

HST 435. THE HISTORY OF EUROPEAN WOMEN FROM 1400 TO 1789 (4). Focuses on the social, economic, and cultural roles women in Europe between 1400 and 1789. Topics include Christianity and women, the Renaissance lady, the European witch craze, women rulers,

the debate about female intellectual abilities, and the beginning of the campaign for female equality. **PREREQS:** HST 102 and HST 103 recommended.

HST 436. HISTORY OF MODERN GERMANY (4). Political, economic, social and intellectual developments from 1815 through the imperial, Weimar, and Nazi eras to the present. Not offered every year. (H)

HST 438. THE WILL AND THE SELF (4). A seminar on three major figures of nineteenth-century German intellectual history: Arthur Schopenhauer, Friedrich Nietzsche, and Robert Musil. The central theme is the emergence of philosophical irrationalism, a distinctive view of human nature that developed in the context of modern science from Newton to Darwin to Einstein.

HST 452. MODERN MEXICO (4). History of Mexico since 1810--economic, political, and social change and relations with the United States. Not offered every year. (H) **PREREQS:** HST 350 or HST 351 or upper-division standing.

HST 456. PROBLEMS IN LATIN AMERICAN HISTORY (4). A focused examination of the origins and development of selective institutions and problems important to understanding the region, such as the church, the military, labor, political instability, economic stagnation, and social stratification. (H) **PREREQS:** HST 350 or HST 351 or upper-division standing.

HST 460. AMERICAN THOUGHT AND CULTURE (4). An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1776 to 1860. Not offered every year. HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not be taken in sequence. (H) **PREREQS:** HST 201 and HST 202 and HST 203 or upper-division standing.

HST 461. AMERICAN THOUGHT AND CULTURE (4). An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1860 to 1930. HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not be taken in sequence. Not offered every year. (H) **PREREQS:** HST 201 and HST 202 and HST 203 or upper-division standing.

HST 462. AMERICAN THOUGHT AND CULTURE (4). An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1930 to the present. HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not be taken in sequence. Not offered every year. (H) **PREREQS:** HST 201 and HST 202 and HST 203 or upper-division standing.

HST 464. AMERICAN DIPLOMATIC HISTORY (4). American diplomatic relations from the nation's founding to 1898. HST 464/HST 564 and HST 465/HST 565 need not be taken in sequence. Not offered every year. (H) **PREREQS:** HST 201 and HST 202 and HST 203 or upper-division standing.

HST 465. *AMERICAN DIPLOMATIC HISTORY (4). American diplomatic relations from 1898 to the present. HST 464/HST 564 and HST 465/HST 565 need not be taken in sequence. Not offered every year. (H) (Bacc Core Course) **PREREQS:** HST 201 and HST 202 and HST 203 or upper-division standing.

HST 465H. *AMERICAN DIPLOMATIC HISTORY (4). American diplomatic relations from 1898 to the present. HST 464/HST 564 and HST 465/HST 565 need not be taken in sequence. Not offered every year. (H) (Bacc Core Course) **PREREQS:** HST 201 and HST 202 and HST 203 or upper-division standing. Honors College approval required.

HST 467. HISTORY OF THE AMERICAN WEST (4). Important themes in the transformation of western America from the pre-industrial world of native Americans to the emergence of the region as a major force in the cultural, economic, and political life of the United States. HST 467/HST 567 and HST 468/HST 568 need not be taken in sequence. Not offered every year. (H) **PREREQS:** HST 201 and HST 202 and HST 203 or upper-division standing.

HST 468. HISTORY OF THE AMERICAN WEST (4). Important themes in the transformation of western America from the pre-industrial world of native Americans to the emergence of the region as a major force in the cultural, economic, and political life of the United States. HST 467/HST 567 and HST 468/HST 568 need not be taken in sequence. Not offered every year. (H) **PREREQS:** HST 201 and HST 202 and HST 203 or upper-division standing.

HST 469. HISTORY OF THE PACIFIC NORTHWEST (4). The demographic, ecological, and cultural transformation of Oregon, Washington, and Idaho from Indian times to the present. Not offered every year. (H) **PREREQS:** HST 201 and HST 202 and HST 203 or upper-division standing.

HST 471. COLONIAL AMERICA (4). Economic, political, social, religious, and intellectual development of colonial North America from the English background to 1689. HST 471/HST 571, HST 472/572 need not be taken in sequence. Not offered every year. (H) **PREREQS:** HST 201 or upper-division standing.

HST 472. COLONIAL AMERICA (4). Economic, political, social, religious, and intellectual development of colonial North America from 1689 to 1763. HST 471/HST 571, HST 472/572 need not be taken in sequence. Not offered every year. (H) **PREREQS:** HST 201 or upper-division standing.

HST 473. THE ERA OF THE AMERICAN REVOLUTION (4). The American Revolution, the drafting of the Constitution, and the launching of the new nation, 1763 to 1789. Not offered every year. (H) **PREREQS:** HST 201 or upper-division standing.

HST 474. JEFFERSONIAN AND JACKSONIAN DEMOCRACY (4). American political, economic, religious, and social development during the early and middle national era with emphasis on the formation and growth of political parties, territorial expansion and western settlement, and the beginnings of sectional conflict. Not offered every year. (H) **PREREQS:** HST 201 and HST 202 or upper-division standing.

HST 475. CIVIL WAR AND RECONSTRUCTION (4). Origins of the war, nature of the war, and the critical postwar era, 1830s to 1880s, with special attention to the changing historiography of the period. Not offered every year. (H) **PREREQS:** HST 202 or upper-division standing.

HST 477. THE PROGRESSIVE AND NEW DEAL ERAS (4). Twentieth-century U.S. history from 1900 to 1939, with emphasis on political and economic developments; attention given to diplomatic, cultural, and social change. Not offered every year. (H) **PREREQS:** HST 203

HST 478. THE UNITED STATES SINCE 1939 (4). United States political, cultural, and diplomatic history from the Second World War through the 1970s, with special emphasis on the Cold War at home and abroad. Not offered every year. (H) **PREREQS:** HST 203 or upper-division standing.

HST 481. *ENVIRONMENTAL HISTORY OF THE UNITED STATES (4). A study of human interaction with the environment and the transformation of the landscape and ecology of North America from the Indian period to the present, with special attention to the progressive alterations induced by the modernizing world of agriculture, industry, urbanism, and their relation to the market system in the United States. Not

offered every year. (H) (Bacc Core Course) **PREREQS:** Upper-division standing. HST 201, HST 202, HST 203 are recommended.

HST 485. *POLITICS AND RELIGION IN THE MODERN MIDDLE EAST (4). The role of religious and secular ideologies in the politics of the 20th century Middle East. Topics include the impact of liberal and nationalist thought, the Iranian revolution, radical Islamist movements, and Zionism. (H) (NC) (Bacc Core Course) **PREREQS:** Upper-division standing or instructor approval required.

HST 486. A HISTORY OF CHRISTIANITY IN AFRICA (4). An investigation of the historical development and changing character of Christianity in Africa. Topics include the examination of the role of Christianity in the development of social identity and politics in historic Ethiopia from the early first millennium CE; Portuguese missionary efforts in Central Africa during the period of the Atlantic slave trade from the 15th to the 18th centuries; the role of 19th century missionaries in both spreading Christianity in Africa and during the European colonization of Africa at the end of the 19th century, the emergence of African independence churches and prophetic Christianity in the 20th century; and the "Africanization" of Christianity. (H) **PREREQS:** HST 381 and/or HST 382

HST 487. WORLD WAR II: A GLOBAL HISTORY (4). Examines World War II from a global perspective, its origins, the course of the conflict and its aftermath, looking especially at the US, USSR, Britain, Germany and Japan. Topics will include the concept of total war and the home fronts of a number of nations. **PREREQS:** HST 103

HST 488. *THE UNITED STATES AND VIETNAM 1945-1995 (4). Examines the Vietnam War from both the US and Vietnamese perspective within the context of the Cold War. Political, military, social and moral issues will be covered within the concept of American exceptionalism. (Bacc Core Course)

HST 494. MODERN JAPAN: A CULTURAL HISTORY (4). Japanese history from the Meiji to the contemporary period (1980s/1990s). Examination of Japanese tradition and the Tokugawa period. Investigation of Westernization/modernization, imperialism, national identity, gender, atomic bomb(s), and post-war culture. (H)

HST 495. CHINA IN THE TWENTIETH CENTURY (4). Treats the decline of the Confucian tradition, shifts in the economy, and metamorphoses of the political system. Attention is given to China's attempt to balance her Communistic revolutionary legacies with her current modernizing goals. (H) (NC) **PREREQS:** HST 391 and HST 392 or upper-division standing.

HST 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

HST 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

HST 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

HST 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

HST 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

HST 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

HST 507. SEMINAR (5). This course is repeatable for a maximum of 20 credits.

HST 510. HISTORY INTERNSHIP (1-12). Supervised work of a historical nature with historical societies, archives, museums, or other public or private organizations. No more than 6 of the maximum 12 credits may be used to satisfy the history major requirement of 51 credits. This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

HST 513. HISTORY OF SCIENCE (4). Stresses the interaction of scientific ideas with their social and cultural context. Development of modern science in the 18th and 19th centuries and to the present. HST 511, HST 512, HST 513 need taken in sequence. **PREREQS:** Graduate standing; at least one science sequence.

HST 515. SELECTED TOPICS (4). Selected topics of special or current interest not covered in other courses. This course is repeatable for a maximum of 16 credits.

HST 516. FOOD IN WORLD HISTORY (4). Historical analysis of food and cooking from pre-history to the present, with an emphasis on cross-cultural differences of food production and consumption.

HST 521. HELLENISTIC GREECE (4). History of the Greek world from the end of the Peloponnesian War to the Roman conquest of Greece; the careers of Alexander the Great and his successors; the art, literature, science, religion, and philosophy of the post-classical or Hellenistic world. Not offered every year. **PREREQS:** HST 101 or graduate standing.

HST 525. THE HOLOCAUST IN ITS HISTORY (4). An inquiry into the causes, course, and impact of the Holocaust. The general theme of anti-Semitism in European history is explored for background. Topics discussed for comparative purposes include: anti-Semitism in American history; other episodes of mass murder in the 20th century. Not offered every year.

HST 526. WORLD WAR I: A GLOBAL HISTORY (4). Examines World War I from a global perspective, its origins, the course of the conflict and its aftermath, looking especially at Great Britain, France, Russia, Germany and their colonial possessions. Topics will include the concept of total war and the home fronts of a number of nations. **PREREQS:** HST 103

HST 527. TEACHING THE HOLOCAUST (4). Provides a broad sense of the Holocaust; reviews the event itself, its long-term background (the history of anti-Semitism), and the rise of Nazism and Fascism in the years before World War II. Examines what has been learned from the Holocaust and addresses the broader issue of genocide, especially in the 20th century. "Teaching the Holocaust" is directed toward certified teachers and students preparing for teaching careers. Lectures are delivered online. Course includes a day-long set of workshops that deal with issues associated with teaching the Holocaust and genocide.

HST 528. HISTORY OF WESTERN THOUGHT (4). A synthesis of major developments in philosophy, science, social, and political theory and the arts in the European Enlightenment (1715-1789). Not offered every year. HST 528, HST 529, HST 530 need not be taken in sequence.

HST 529. HISTORY OF WESTERN THOUGHT (4). A synthesis of major developments in philosophy, science, social, and political theory and the arts between 1789 and 1890. Not offered every year. HST 528, HST 529, HST 530 need not be taken in sequence.

HST 530. HISTORY OF WESTERN THOUGHT (4). A synthesis of major developments in philosophy, science, social, and political theory and the arts between 1890 and 1945. Not offered every year. HST 528, HST 529, HST 530 need not be taken in sequence.

HST 532. THE HISTORY OF SEXUALITY (4). The history of human sexuality from ancient Greece to the present.

HST 533. ENGLISH HISTORY (4). The major political, cultural, economic, social and religious developments that have shaped the history of England and ultimately of America and much of the world. Medieval and Tudor-Stuart England. HST 433/HST 533, HST 434/HST 534 need not be taken in sequence. Not offered every year.

HST 534. ENGLISH HISTORY (4). The major political, cultural, economic, social and religious developments that have shaped the history of England and ultimately of America and much of the world. England since 1688. HST 433/HST 533, HST 434/HST 534 need not be taken in sequence. Not offered every year.

HST 535. THE HISTORY OF EUROPEAN WOMEN FROM 1400 TO 1789 (4). Focuses on the social, economic, and cultural roles women in Europe between 1400 and 1789. Topics include Christianity and women, the Renaissance lady, the European witch craze, women rulers, the debate about female intellectual abilities, and the beginning of the campaign for female equality. **PREREQS:** HST 102, HST 103 recommended.

HST 536. HISTORY OF MODERN GERMANY (4). Political, economic, social and intellectual developments from 1815 through the imperial, Weimar, and Nazi eras to the present. Not offered every year.

HST 552. MODERN MEXICO (4). History of Mexico since 1810--economic, political, and social change and relations with the United States. Not offered every year. **PREREQS:** HST 350 or HST 351 or graduate standing.

HST 556. PROBLEMS IN LATIN AMERICAN HISTORY (4). A focused examination of the origins and development of selective institutions and problems important to understanding the region, such as the church, the military, labor, political instability, economic stagnation, and social stratification. **PREREQS:** HST 350 or HST 351 or graduate standing.

HST 560. AMERICAN THOUGHT AND CULTURE (4). An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1776 to 1860. HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not be taken in sequence. Not offered every year. **PREREQS:** HST 201 and HST 202 and HST 203 or graduate standing.

HST 561. AMERICAN THOUGHT AND CULTURE (4). An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1860 to 1930. HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not be taken in sequence. Not offered every year. **PREREQS:** HST 201 and HST 202 and HST 203 or graduate standing.

HST 562. AMERICAN THOUGHT AND CULTURE (4). An examination of the main currents of American thought and culture, emphasizing ideas and concepts that have influenced the development and growth of American institutions and values from 1930 to the present. HST 460/HST 560, HST 461/HST 561, HST 462/HST 562 need not be taken in sequence. Not offered every year. **PREREQS:** HST 201 and HST 202 and HST 203 or graduate standing.

HST 564. AMERICAN DIPLOMATIC HISTORY (4). American diplomatic relations from the nation's founding to 1898. HST 464/HST 564 and HST 465/HST 565 need not be taken in sequence. Not offered every year. **PREREQS:** HST 201 and HST 202 and HST 203 or graduate standing.

HST 565. AMERICAN DIPLOMATIC HISTORY (4). American diplomatic relations from 1898 to

the present. HST 464/HST 564 and HST 465/HST 565 need not be taken in sequence. Not offered every year. **PREREQS:** HST 201 and HST 202 and HST 203 or graduate standing.

HST 567. HISTORY OF THE AMERICAN WEST (4). Important themes in the transformation of western America from the pre-industrial world of native Americans to the emergence of the region as a major force in the cultural, economic, and political life of the United States. HST 467/HST 567 and HST 468/HST 568 need not be taken in sequence. Not offered every year. **PREREQS:** HST 201 and HST 202 and HST 203 or graduate standing.

HST 568. HISTORY OF THE AMERICAN WEST (4). Important themes in the transformation of western America from the pre-industrial world of native Americans to the emergence of the region as a major force in the cultural, economic, and political life of the United States. HST 467/HST 567 and HST 468/HST 568 need not be taken in sequence. Not offered every year. **PREREQS:** HST 201 and HST 202 and HST 203 or graduate standing.

HST 569. HISTORY OF THE PACIFIC NORTHWEST (4). The demographic, ecological, and cultural transformation of Oregon, Washington, and Idaho from Indian times to the present. Not offered every year. **PREREQS:** HST 201 and HST 202 and HST 203 or graduate standing.

HST 571. COLONIAL AMERICA (4). Economic, political, social, religious, and intellectual development of colonial North America from the English background to 1689. HST 471/HST 571, HST 472/572 need not be taken in sequence. Not offered every year. **PREREQS:** HST 201 or graduate standing.

HST 572. COLONIAL AMERICA (4). Economic, political, social, religious, and intellectual development of colonial North America from 1689 to 1763. HST 471/HST 571, HST 472/572 need not be taken in sequence. Not offered every year. **PREREQS:** HST 201 or graduate standing.

HST 573. THE ERA OF THE AMERICAN REVOLUTION (4). The American Revolution, the drafting of the Constitution, and the launching of the new nation, 1763 to 1789. Not offered every year. **PREREQS:** HST 201 or graduate standing.

HST 574. JEFFERSONIAN AND JACKSONIAN DEMOCRACY (4). American political, economic, religious, and social development during the early and middle national era with emphasis on the formation and growth of political parties, territorial expansion and western settlement, and the beginnings of sectional conflict. Not offered every year. **PREREQS:** HST 201 and HST 202 or graduate standing.

HST 575. CIVIL WAR AND RECONSTRUCTION (4). Origins of the war, nature of the war, and the critical postwar era, 1830s to 1880s, with special attention to the changing historiography of the period. Not offered every year. **PREREQS:** HST 202 or graduate standing.

HST 577. THE PROGRESSIVE AND NEW DEAL ERAS (4). Twentieth-century U.S. history from 1900 to 1939, with emphasis on political and economic developments; attention given to diplomatic, cultural, and social change. Not offered every year. **PREREQS:** HST 203

HST 578. THE UNITED STATES SINCE 1939 (4). United States political, cultural, and diplomatic history from the Second World War through the 1970s, with special emphasis on the Cold War at home and abroad. Not offered every year. **PREREQS:** HST 203 or graduate standing.

HST 581. ENVIRONMENTAL HISTORY OF THE UNITED STATES (4). A study of human interaction with the environment and the transformation of the landscape and ecology of North America from the Indian period to the present, with special attention to the progressive

alterations induced by the modernizing world of agriculture, industry, urbanism, and their relation to the market system in the United States. Not offered every year. **PREREQS:** Graduate standing. HST 201, HST 202, HST 203 recommended.

HST 585. POLITICS AND RELIGION IN THE MODERN MIDDLE EAST (4). The role of religious and secular ideologies in the politics of the 20th century Middle East. Topics include the impact of liberal and nationalist thought, the Iranian revolution, radical Islamist movements, and Zionism. **PREREQS:** Graduate standing or instructor approval required.

HST 586. A HISTORY OF CHRISTIANITY IN AFRICA (4). An investigation of the historical development and changing character of Christianity in Africa. Topics include the examination of the role of Christianity in the development of social identity and politics in historic Ethiopia from the early first millennium CE; Portuguese missionary efforts in Central Africa during the period of the Atlantic slave trade from the 15th to the 18th centuries; the role of 19th century missionaries in both spreading Christianity in Africa and during the European colonization of Africa at the end of the 19th century; the emergence of African independence churches and prophetic Christianity in the 20th century; and the "Africanization" of Christianity. **PREREQS:** HST 381 and/or HST 382

HST 587. WORLD WAR II: A GLOBAL HISTORY (4). Examines World War II from a global perspective, its origins, the course of the conflict and its aftermath, looking especially at the US, USSR, Britain, Germany and Japan. Topics will include the concept of total war and the home fronts of a number of nations. **PREREQS:** HST 103*

HST 588. THE UNITED STATES AND VIETNAM 1945-1995 (4). Examines the Vietnam War from both the US and Vietnamese perspective within the context of the Cold War. Political, military, social and moral issues will be covered within the concept of American exceptionalism.

HST 594. MODERN JAPAN: A CULTURAL HISTORY (4). Japanese history from the Meiji to the contemporary period (1980s/1990s). Examination of Japanese tradition and the Tokugawa period. Investigation of Westernization/modernization, imperialism, national identity, gender, atomic bomb(s), and post-war culture.

HST 595. CHINA IN THE TWENTIETH CENTURY (4). Treats the decline of the Confucian tradition, shifts in the economy, and metamorphoses of the political system. Attention is given to China's attempt to balance her Communistic revolutionary legacies with her current modernizing goals. **PREREQS:** HST 391 and HST 392 or graduate standing.

HST 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

■ HISTORY OF SCIENCE COURSES

HSTS 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

HSTS 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

HSTS 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

HSTS 411. *HISTORY OF SCIENCE (4). Stresses the interaction of scientific ideas within their social and cultural contexts. Scientific thought from ancient civilizations to the post-Roman era. Not offered every year. HSTS 411/HSTS 511, HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence. (H) (SS) (Bacc Core Course) **PREREQS:** Upper-division standing; at least one science sequence.

HSTS 412. *HISTORY OF SCIENCE (4). Stresses the interaction of scientific ideas within their social and cultural context. Origin of modern science in the 16th and 17th centuries. HSTS 411/HSTS 511, HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence. (Bacc Core Course) **PREREQS:** Upper-division standing and at least one science sequence.

HSTS 413. *HISTORY OF SCIENCE (4). Stresses the interaction of scientific ideas with their social and cultural context. Development of modern science in the 18th and 19th centuries and to the present. HSTS 411/HSTS 511, HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence. (Bacc Core Course) **PREREQS:** Upper-division standing and at least one science sequence.

HSTS 414. *HISTORY OF TWENTIETH-CENTURY SCIENCE (4). Focuses on the organization, practice, and theories of the natural sciences in the twentieth century, with emphasis primarily on the European and American scientific traditions from the 1890s to the present. (H) (SS) (Bacc Core Course)

HSTS 415. **THEORY OF EVOLUTION AND FOUNDATION OF MODERN BIOLOGY (4). Origin and development of Darwin's theory of evolution. Reception of theory and history of evolution to the present. (H) (SS) (Bacc Core Course) (Writing Intensive Course) **PREREQS:** Upper-division standing.

HSTS 415H. **THEORY OF EVOLUTION AND FOUNDATION OF MODERN BIOLOGY (4). Origin and development of Darwin's theory of evolution. Reception of theory and history of evolution to the present. (H) (SS) (Bacc Core Course) (Writing Intensive Course) **PREREQS:** Upper-division standing and Honors College approval required.

HSTS 416. *HISTORY OF MEDICINE PRE-1800 (4). History of medical theory and the changing role of the physician; internal development of medicine as a discipline as well as a profession; relationship of medicine's development to general changes in science and culture, to 1800. (Bacc Core Course)

HSTS 417. **HISTORY OF MEDICINE (4). History of medical theory and the changing role of the physician; internal development of medicine as a discipline as well as a profession; relationship of medicine's development to general changes in science and culture. (H) (SS) (Bacc Core Course) (Writing Intensive Course) **PREREQS:** Upper-division standing.

HSTS 418. *SCIENCE AND SOCIETY (4). Historical study of the interaction of science and society. Case studies are used from the 18th through 20th centuries. Topics vary by term. (Bacc Core Course)

HSTS 419. **STUDIES IN SCIENTIFIC CONTROVERSY: METHODS AND PRACTICES (4). Course focuses on accounts of scientific discoveries that have been controversial, to understand the rational, psychological, and social characteristics which have defined the meaning and procedures of the natural sciences. Case studies are used from the 18th through 20th centuries. (H) (SS) (Bacc Core Course) (Writing Intensive Course)

HSTS 421. *TECHNOLOGY AND CHANGE (4). Current views of technology and associated cultural changes and the contexts in which these developed; the changing role of technology in modern industrial society, especially in the United States; recent efforts to predict and control technological developments and the social and cultural consequences. (H) (SS) (Bacc Core Course) **PREREQS:** Upper-division standing.

HSTS 422. **HISTORICAL STUDIES OF SCIENCE AND POLITICS (4). The historical study of scientists, their work, their political and ethical choices mainly in the United States and Europe from the 1920s to the 1950s. (H) (Bacc

Core Course) (Writing Intensive Course)

HSTS 423. *SCIENCE AND RELIGION (4). A historical survey of critical issues in the relationship of Western science and religion from ancient times to the end of the twentieth century. (H) (Bacc Core Course)

HSTS 425. **HISTORY OF THE LIFE SCIENCES (4). History of ideas about life from Greeks to present day. Cultural background and development of major theories of the life sciences with emphasis on natural history. (Bacc Core Course) (Writing Intensive Course) **PREREQS:** Upper-division standing plus one year college sciences.

HSTS 437. **HISTORY OF ANIMALS IN SCIENCE (4). Using a variety of sources, this course explores the ways humans have thought about and used animals in science and medicine from the seventeenth century to the present. How has science constructed the boundaries between humans and animals, and what have the consequences been for each? (Writing Intensive Course)

HSTS 440. *HISTORY OF PSYCHOTHERAPY (4). The history of psychotherapy in modern Western societies, from biomedical, cultural, political, and psychosocial perspectives. Not offered every year. (H) (Bacc Core Course)

HSTS 440H. *HISTORY OF PSYCHOTHERAPY (4). The history of psychotherapy in modern Western societies, from biomedical, cultural, political, and psychosocial perspectives. Not offered every year. (H) (Bacc Core Course) **PREREQS:** Honors College approval required.

HSTS 470. *ECOLOGY AND HISTORY: LANDSCAPES OF THE COLUMBIA BASIN (3). Integrates environmental history and landscape ecology of the Columbia River Basin from geologic origins to the present, to create an understanding of change caused by natural processes and human activities. **CROSSLISTED** as FW 470/FW 570. (H) (Bacc Core Course) **PREREQS:** (HST 201 and HST 202 and HST 203) or BI 370

HSTS 499. SPECIAL TOPICS (1-16). (H) This course is repeatable for a maximum of 16 credits.

HSTS 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

HSTS 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Graduate standing; departmental approval required.

HSTS 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

HSTS 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

HSTS 511. HISTORY OF SCIENCE (4). Stresses the interaction of scientific ideas within their social and cultural context. Scientific thought from ancient civilizations to the post-Roman era. Not offered every year. HSTS 411/HSTS 511, HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence. **PREREQS:** Graduate standing and at least one science sequence.

HSTS 512. HISTORY OF SCIENCE (4). Stresses the interaction of scientific ideas with their social and cultural context. Origin of modern science in the 16th and 17th centuries. HSTS 411/HSTS 511, HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence. **PREREQS:** Graduate standing and at least one science sequence.

HSTS 513. HISTORY OF SCIENCE (4). Stresses the interaction of scientific ideas with their social and cultural context. Development of modern science in the 18th and 19th centuries and to the present. HSTS 411/HSTS 511, HSTS 412/HSTS 512, HSTS 413/HSTS 513 need not be taken in sequence. **PREREQS:** Graduate standing and at least one science sequence.

HSTS 514. HISTORY OF TWENTIETH-CENTURY SCIENCE (4). Focuses on the organization, practice, and theories of the natural sciences in the twentieth century, with emphasis primarily on the European and American scientific traditions from the 1890s to the present.

HSTS 515. THEORY OF EVOLUTION AND FOUNDATION OF MODERN BIOLOGY (4). Origin and development of Darwin's theory of evolution. Reception of theory and history of evolution to the present. **PREREQS:** Graduate standing.

HSTS 516. HISTORY OF MEDICINE PRE-1800 (4). History of medical theory and the changing role of the physician; internal development of medicine as a discipline as well as a profession; relationship of medicine's development to general changes in science and culture, to 1800.

HSTS 517. HISTORY OF MEDICINE (4). History of medical theory and the changing role of the physician; internal development of medicine as a discipline as well as a profession; relationship of medicine's development to general changes in science and culture. **PREREQS:** Graduate standing.

HSTS 518. SCIENCE AND SOCIETY (4). Historical study of the interaction of science and society. Case studies are used from the 18th through 20th centuries. Topics vary by term.

HSTS 519. STUDIES IN SCIENTIFIC CONTROVERSY: METHOD AND PRACTICE OF (4). Course focuses on accounts of scientific discoveries that have been controversial, to understand the rational, psychological, and social characteristics which have defined the meaning and procedures of the natural sciences. Case studies are used from the 18th through 20th centuries.

HSTS 521. TECHNOLOGY AND CHANGE (4). Current views of technology and associated cultural changes and the contexts in which these developed; the changing role of technology in modern industrial society, especially in the United States; recent efforts to predict and control technological developments and the social and cultural consequences. **PREREQS:** Graduate standing.

HSTS 522. HISTORICAL STUDIES OF SCIENCE AND POLITICS (4). The historical study of scientists, their work, their political and ethical choices mainly in the United States and Europe from the 1920s to the 1950s.

HSTS 523. SCIENCE AND RELIGION (4). A historical survey of critical issues in the relationship of Western science and religion from ancient times to the end of the twentieth century. **PREREQS:** Graduate standing.

HSTS 525. HISTORY OF THE LIFE SCIENCES (4). History of ideas about life from Greeks to present day. Cultural background and development of major theories of the life sciences with emphasis on natural history. **PREREQS:** Graduate standing plus one year college sciences.

HSTS 537. HISTORY OF ANIMALS IN SCIENCE (4). Using a variety of sources, this course explores the ways humans have thought about and used animals in science and medicine from the seventeenth century to the present. How has science constructed the boundaries between humans and animals, and what have the consequences been for each? **PREREQS:** Upper-division standing.

HSTS 540. HISTORY OF PSYCHOTHERAPY (4). The history of psychotherapy in modern Western societies, from biomedical, cultural, political, and psychosocial perspectives. Not offered every year.

HSTS 570. ECOLOGY AND HISTORY: LANDSCAPES OF THE COLUMBIA BASIN (3). Integrates environmental history and landscape ecology of the Columbia River Basin from geologic origins to the present, to create an understanding of change caused by natural processes and

human activities. CROSSLISTED as FW 470/FW 570. **PREREQS:** (HST 201 and HST 202 and HST 203) or BI 370

HSTS 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 36 credits.

HSTS 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Graduate standing and departmental approval required.

■ PEACE STUDIES COURSES

PAX 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PAX 201. STUDY OF PEACE AND THE CAUSES OF CONFLICT (3). Examination of the causes of personal, social, and institutional conflict and peaceful, constructive means of dealing with conflict. The history and current status of peace movements within and outside governments; prospects for world peace. Case studies in peace and conflict. (H)

PAX 402. INDEPENDENT STUDY (1-16). Individual basic and applied study projects on peace-related issues, designed in consultation with the Peace Studies Program director or a member of the Peace Studies faculty. This course is repeatable for a maximum of 16 credits.

PAX 405. READING AND CONFERENCE (1-16). Study supervised and directed by members of the Peace Studies Program committee or approved faculty, as arranged by the student and Peace Studies Program director. This course is repeatable for a maximum of 16 credits.

PAX 407. SEMINAR (1-16). Close examination of peace-related topics, including theory, method, research, and application. May be taken more than one time as topics vary. This course is repeatable for a maximum of 16 credits.

PAX 410. PEACE STUDIES INTERNSHIP (1-16). Directed, supervised, and evaluated field work, to supplement the student's classroom work, arranged one term in advance. This course is repeatable for a maximum of 16 credits.

PAX 415. TOPICS IN PEACE STUDIES (1-16). Selected topics relevant to the study of conflict, peace, and war. May be taken more than one time as topics vary.

PAX 499. TOPICS IN PEACE STUDIES (1-4). Examination of the work of a particular nonviolence theorist or of a specific problem; e.g. pacifism and humanitarian intervention, nonviolence and gender. Course may be repeated as appropriate. Not offered every year. This course is repeatable for a maximum of 8 credits.

PAX 502. INDEPENDENT STUDY (1-16). Individual basic and applied study projects on peace-related issues, designed in consultation with the Peace Studies Program director or a member of the Peace Studies faculty. This course is repeatable for a maximum of 16 credits.

PAX 505. READING AND CONFERENCE (1-16). Study supervised and directed by members of the Peace Studies Program committee or approved faculty, as arranged by the student and Peace Studies Program director. This course is repeatable for a maximum of 16 credits.

PAX 507. SEMINAR (1-16). Close examination of peace-related topics, including theory, method, research, and application. May be taken more than one time as topics vary. This course is repeatable for a maximum of 16 credits.

PAX 510. PEACE STUDIES INTERNSHIP (1-16). Directed, supervised, and evaluated field work, to supplement the student's classroom work, arranged one term in advance. This course is repeatable for a maximum of 16 credits.

PAX 515. TOPICS IN PEACE STUDIES (1-16). Selected topics relevant to the study of conflict, peace, and war. May be taken more than one time as topics vary.

PAX 599. TOPICS IN PEACE STUDIES (1-4). Examination of the work of a particular nonviolence theorist or of a specific problem; e.g. pacifism and humanitarian intervention, nonviolence and gender. Course may be repeated as appropriate. Not offered every year. This course is repeatable for a maximum of 8 credits.

■ PHILOSOPHY COURSES

PHL 101. CRITICAL THINKING (4). Analysis of arguments, basic patterns of inductive and deductive reasoning, logical relations, and logical fallacies. Intended to improve analytical, critical and reasoning skills.

PHL 110. CRITICAL ANALYSIS (3). Development of a question-asking attitude for academic study. Enables students to explore issues and make informed decisions. **PREREQS:** EOP students only.

PHL 121. *REASONING AND WRITING (3). Develops critical thinking skills to increase clarity and effectiveness of student writing; uses writing experiences to teach critical thinking skills. Subjects include identifying and evaluating arguments, analyzing assumptions, justifying claims with reasons, avoiding confused or dishonest reasoning, applying common patterns of reasoning in everyday contexts, and writing cogent complex arguments. (Bacc Core Course)

PHL 150. *GREAT IDEAS IN PHILOSOPHY (3). Explores the assumptions and deeper meanings of familiar concepts and experiences. An introduction to some basic and famous ideas in Western thought. Topics may include truth, beauty, infinity, perception, freedom, pleasure, knowledge, mind and body, morality, justice, and political authority. (H) (Bacc Core Course)

PHL 160. *QUESTS FOR MEANING: WORLD RELIGIONS (4). A survey and analysis of the search for meaning and life fulfillment represented in major religious traditions of the world, such as Hinduism, Buddhism, Taoism, Zen, Confucianism, Judaism, Christianity, and Islam. (H) (Bacc Core Course)

PHL 160H. *QUESTS FOR MEANING: WORLD RELIGIONS (4). A survey and analysis of the search for meaning and life fulfillment represented in major religious traditions of the world, such as Hinduism, Buddhism, Taoism, Zen, Confucianism, Judaism, Christianity, and Islam. (H) (Bacc Core Course) **PREREQS:** Honors College approval required.

PHL 170. *THE IDEA OF GOD (4). Concepts and images of God and their connections to world-views, experience, science, gender, society, self-understanding, and religions. (Bacc Core Course)

PHL 199. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.

PHL 201. *INTRODUCTION TO PHILOSOPHY (4). An in-depth introduction to the methods and ideas of Western philosophy, concentrating on such great figures as Socrates, Plato, Aristotle, Descartes, Kant and Nietzsche and such topics as the nature of reality, the existence of God, knowledge and doubt, the relation of consciousness to the world, free will and determinism, good and evil, and minds and machines. Philosophers and ideas covered will vary by the section. Written assignments are required. (H) (Bacc Core Course)

PHL 202. INTRODUCTION TO RELIGIOUS STUDIES (4). An introduction to the academic study of religion. It examines the concepts of religion and the sacred, approaches to the study of religion, ubiquitous features of religious experience, including symbol, myth, ritual, and community, understandings of the human condition in diverse religious traditions, and ways religious communities address challenges of pluralism and secularization.

PHL 205. *ETHICS (4). Introduction to ethical theory and to the evaluation of ethical issues in

society such as sexual ethics and euthanasia. Includes the study of philosophical theories of moral responsibility and moral virtue, and the philosophical ideas behind ethics debates in society. Students are encouraged to develop their own positions on ethical issues through discussion projects and term papers. (H) (Bacc Core Course)

PHL 205H. *ETHICS (4). Introduction to ethical theory and to the evaluation of ethical issues in society such as sexual ethics and euthanasia. Includes the study of philosophical theories of moral responsibility and moral virtue, and the philosophical ideas behind ethics debates in society. Students are encouraged to develop their own positions on ethical issues through discussion projects and term papers. (H) (Bacc Core Course) **PREREQS:** Honors College approval required.

PHL 206. *RELIGIOUS ETHICS AND MORAL PROBLEMS (4). An examination of the practical ethics of the monotheistic religious traditions of the West—Judaism, Christianity, Islam—and their different approaches to concrete moral problems. Topics include sexuality and marriage, euthanasia, capital punishment, pacifism and just war, and environmentalism. (Bacc Core Course)

PHL 207. *POLITICAL PHILOSOPHY (4). Introductory study of the philosophical justifications of political systems and philosophical theories about the rights and obligations of citizens and governments. (H) (Bacc Core Course)

PHL 207H. *POLITICAL PHILOSOPHY (4). Introductory study of the philosophical justifications of political systems and philosophical series about the rights and obligations of citizens and government. (H) (Bacc Core Course) **PREREQS:** Honors College approval required.

PHL 208. INTRODUCTION TO BUDDHIST TRADITIONS (4). Survey of the historical development of Buddhism in India and its spread throughout Asia and beyond by investigating the literature, rituals, history and social structure of the Buddhist traditions of Sri Lanka and Southeast Asia, Tibet and the Himalayan region, China, Taiwan, Korea, Japan, and finally its growth in the West.

PHL 210. *RELIGION IN THE UNITED STATES (4). A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. CROSSLISTED as HST 210. (Bacc Core Course)

PHL 210H. *RELIGION IN THE UNITED STATES (4). A thematic overview of the historical study of religion in the United States, with an eye toward ways that social and cultural contexts have shaped the religious experience of Americans in different places and times. Surveys a wide array of religious movements, groups, and individuals from the colonial period to present. CROSSLISTED as HST 210H. (Bacc Core Course) **PREREQS:** Honors College approval required.

PHL 213. *INTRODUCTION TO HINDU TRADITIONS (4). Survey of the historical development of Hinduism in India and the "Hindu Diaspora." Topics will include the Indus Valley civilization, the Vedic tradition, yoga, and Hindu renunciation, "Classical" Hindu theism and devotion, Hindu philosophy and ritual, and modern and contemporary Hinduism. (Bacc Core Course)

PHL 214. *INTRODUCTION TO ISLAMIC TRADITIONS (4). Development of Islamic traditions in the Arab world and in the global context. Origins of Islam, the narrative of the Prophet Muhammad, the development of the Qur'an, and the central tenets of Islamic faith and practice. Transformation of Islam from a regional to a global tradition. (Bacc Core Course)

PHL 220. *WORLD-VIEWS AND VALUES IN THE BIBLE (4). A study of central portions of the Bible (in the Old Testament: Torah, prophets, psalms, and wisdom; in the New Testament:

Jesus, gospels, and letters) from the perspective of the academic discipline of biblical scholarship, exploring the philosophical questions of the relationships between story, myth, thought, values, and understandings of life. (H) (Bacc Core Course)

PHL 220H. *WORLD-VIEWS AND VALUES IN THE BIBLE (4). A study of central portions of the Bible (in the Old Testament: Torah, prophets, psalms, and wisdom; in the New Testament: Jesus, gospels, and letters) from the perspective of the academic discipline of biblical scholarship, exploring the philosophical questions of the relationships between story, myth, thought, values, and understandings of life. (H) (Bacc Core Course) **PREREQS:** Honors College approval required.

PHL 251. *KNOWERS, KNOWING, AND THE KNOWN (4). An introduction to the major debates in Western philosophy concerning the nature of reality, and the ways we come to know about that reality. One example concerns debates about the problem of skepticism: Is it possible that humans could be completely mistaken about the way the world is? Another example concerns debates about human identity and free will. Beginning with historical figures such as Descartes and Hume, the course also provides an introduction to more contemporary thinkers. (Bacc Core Course)

PHL 251H. *KNOWERS, KNOWING, AND THE KNOWN (4). An introduction to the major debates in Western philosophy concerning the nature of reality, and the ways we come to know about that reality. One example concerns debates about the problem of skepticism: Is it possible that humans could be completely mistaken about the way the world is? Another example concerns debates about human identity and free will. Beginning with historical figures such as Descartes and Hume, the course also provides an introduction to more contemporary thinkers. (Bacc Core Course) **PREREQS:** Honors College approval required.

PHL 280. *ETHICS OF DIVERSITY (4). Uses moral philosophy to examine difference-based discrimination and prejudice in the human community. (H) (Bacc Core Course)

PHL 299. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 99 credits.

PHL 301. *HISTORY OF WESTERN PHILOSOPHY (4). A study of the history of Western philosophy from the early Greeks into the twentieth century. Designed to give an appreciation and understanding of the Western philosophical tradition and the philosophical foundations of Western civilization. May be taken independently. PHL 301: Greek and Roman philosophy. PHL 302: The rise of modern philosophy through Hume. PHL 303: Kant and the nineteenth century. (H) (Bacc Core Course) **PREREQS:** 3 credits of philosophy recommended.

PHL 302. *HISTORY OF WESTERN PHILOSOPHY (4). A study of the history of Western philosophy from the early Greeks into the twentieth century. Designed to give an appreciation and understanding of the Western philosophical tradition and the philosophical foundations of Western civilization. May be taken independently. PHL 301: Greek and Roman philosophy. PHL 302: The rise of modern philosophy through Hume. PHL 303: Kant and the nineteenth century. (H) (Bacc Core Course) **PREREQS:** 3 credits of philosophy recommended.

PHL 303. *HISTORY OF WESTERN PHILOSOPHY (4). A study of the history of Western philosophy from the early Greeks into the twentieth century. Designed to give an appreciation and understanding of the Western philosophical tradition and the philosophical foundations of Western civilization. May be taken independently. PHL 301: Greek and Roman philosophy. PHL 302: The rise of modern philosophy through Hume. PHL 303: Kant and the nineteenth century. (H) (Bacc Core Course) **PREREQS:** 3 credits of philosophy recommended.

PHL 312. *ASIAN THOUGHT (4). Familiarizes students with key figures in the history of Asian religious ideas and philosophy. While the emphasis will be on the philosophical traditions of Asia, it will quickly become apparent that philosophy and religion are not so easily distinguishable in many Asian traditions. Areas of thought studied will include Hindu, Buddhist, Confucian, and Taoist. (NC) (Bacc Core Course)

PHL 315. *GANDHI AND NONVIOLENCE (4). An examination of the life and work of Mohandas K. Gandhi, the 20th century activist and author, and the theory and practice of nonviolence in his life and work. Emphasis will be placed upon Gandhi's biographical narrative, the development of satyagraha, Gandhi's nonviolent approach to social transformation, and post-Gandhian nonviolent movements. (Bacc Core Course)

PHL 315H. *GANDHI AND NONVIOLENCE (4). An examination of the life and work of Mohandas K. Gandhi, the 20th century activist and author, and the theory and practice of nonviolence in his life and work. Emphasis will be placed upon Gandhi's biographical narrative, the development of satyagraha, Gandhi's nonviolent approach to social transformation, and post-Gandhian nonviolent movements. (Bacc Core Course) **PREREQS:** Honors College approval required.

PHL 316. INTELLECTUAL ISSUES OF MEXICO AND MEXICAN AMERICANS (4). The philosophical, social, cultural, and political reality of Mexican Americans and their historical roots in Mexico since the Spanish Conquest. Analysis of internal colonialism, racism, machismo, fatalism, alienation, cultural identity, as well as more contemporary including NAFTA, immigration, and U.S.-Mexican relations. (NC)

PHL 321. DEDUCTIVE LOGIC (4). Development of formal language and deductive systems for first-order, quantificational logic. Emphasis on translation of ordinary English statements into formal language. Discussion of the contrast between semantic and syntactic treatment of logical concepts. **PREREQS:** Upper-division standing or PHL 101.

PHL 325. *SCIENTIFIC REASONING (4). Introduction to and analysis of scientific reasoning. Emphasis on understanding and evaluation of theoretical hypotheses, causal and statistical models, and uses of scientific knowledge to make personal and public decisions. (Bacc Core Course)

PHL 325H. *SCIENTIFIC REASONING (4). Introduction to and analysis of scientific reasoning. Emphasis on understanding and evaluation of theoretical hypotheses, causal and statistical models, and uses of scientific knowledge to make personal and public decisions. (Bacc Core Course) **PREREQS:** Honors College approval required.

PHL 342. CONTEMPORARY ETHICS (4). A study of significant ethical developments and issues in contemporary society, including ethical principles and concepts behind social debates on such matters as sexual ethics, abortion, discrimination, the uses of animals in scientific research, and responsibilities of corporations. Not offered every year. (H) **PREREQS:** PHL 205 recommended.

PHL 344. *PACIFISM, JUST WAR, AND TERRORISM (4). An examination of the philosophical and theological issues pertaining to pacifism, justified war, and forms of terrorism in Islamic and Western traditions. Special attention is given to concepts of jihad, justifications of war, and restraints on conduct in war. (Bacc Core Course)

PHL 344H. *PACIFISM, JUST WAR, AND TERRORISM (4). An examination of the philosophical and theological issues pertaining to pacifism, justified war, and forms of terrorism in Islamic and Western traditions. Special attention is given to concepts of jihad, justifications of war, and restraints on conduct in war. (Bacc Core Course) **PREREQS:** Honors College approval required.

PHL 360. *PHILOSOPHY AND THE ARTS (4). Major philosophical theories about art and its meaning, from ancient to modern times. How philosophers have understood beauty, the imagination, art and knowledge, art and pleasure, art and emotion. Offered every other year. (H) (Bacc Core Course) **PREREQS:** 3 credits of philosophy, or upper-division standing recommended.

PHL 365. *LAW IN PHILOSOPHICAL PERSPECTIVE (4). A study of philosophical issues in the law through the examination of legal cases and major essays in jurisprudence. Special attention given to concepts of justice, responsibility, liberty, law, and legal ethics. Offered every other year. (H) (Bacc Core Course) **PREREQS:** 3 credits of philosophy or upper-division standing.

PHL 371. *PHILOSOPHIES OF CHINA (4). A study of the traditional philosophies of China, including Confucianism, Taoism, Mohism, Legalism, and Buddhism. Not offered every year. (NC) (Bacc Core Course) **PREREQS:** 3 credits of philosophy or upper-division standing.

PHL 371H. *PHILOSOPHIES OF CHINA (4). A study of the traditional philosophies of China, including Confucianism, Taoism, Mohism, Legalism, and Buddhism. Not offered every year. (NC) (Bacc Core Course) **PREREQS:** 3 credits of philosophy or upper-division standing. Honors College approval required.

PHL 390. MORAL THEORIES (3). Examines the evolution of moral philosophy from the beginning of Western, Greek-based philosophy through contemporary moral theory, and will include philosophical questions about moral philosophy generally, virtue ethics, deontology, utilitarianism, environmental ethics, animal rights, and feminism and ecofeminism. **PREREQS:** PHL 205

PHL 399. SPECIAL TOPICS IN PHILOSOPHY (1-4). Examination of the work of a philosopher or of a specific philosophical problem; e.g., Wittgenstein, determinism, perception, philosophy of mind. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for a maximum of 16 credits. **PREREQS:** 3 credits of upper-division philosophy recommended.

PHL 399H. SPECIAL TOPICS IN PHILOSOPHY (1-4). Examination of the work of a philosopher or of a specific philosophical problem; e.g., Wittgenstein, determinism, perception, philosophy of mind. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required. 3 credits of upper-division philosophy recommended.

PHL 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Sophomore standing.

PHL 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PHL 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required and sophomore standing.

PHL 407. ^SEMINAR (1-16). (Writing Intensive Course) This course is repeatable for a maximum of 16 credits. **PREREQS:** Two upper-division philosophy courses or the equivalent and sophomore standing.

PHL 407H. ^SEMINAR (1-16). (Writing Intensive Course) This course is repeatable for a maximum of 16 credits. **PREREQS:** Two upper-division philosophy courses or the equivalent and sophomore standing. Honors College approval required.

PHL 410. INTERNSHIP (1-12). This course is repeatable for a maximum of 16 credits. **PREREQS:** Sophomore standing.

PHL 411. GREAT FIGURES IN PHILOSOPHY (4). Study of the works of a major philosopher such as Plato, Aristotle, Descartes, Hume, Kant, or Marx. Each course normally devoted to the work of a single figure. Need not be taken in sequence. Not offered every year. (H) This course is repeatable for a maximum of 16 credits. **PREREQS:** 6 credits of philosophy and sophomore standing.

PHL 417. FEMINIST PHILOSOPHIES (3). Diverse forms of feminist philosophy, including a variety of critiques, especially those based on race and class, with in-depth consideration of selected social issues such as rape and pornography. **CROSSLISTED** as WGSS 417/WGSS 517. (H) **PREREQS:** 6 credits of philosophy or upper-division standing.

PHL 421. MATHEMATICAL LOGIC (3). Rigorous definition of a formal logic and investigation of its characteristics. Emphasis on the distinction and relation between semantic and syntactic methods (model theory and proof theory) and on the meta-mathematical analysis of axiomatic theories. Not offered every year. **PREREQS:** PHL 321 or 6 credits of 400-level mathematics or computer science and sophomore standing.

PHL 430. HISTORY OF BUDDHIST PHILOSOPHY (4). Examination of the major philosophical schools, texts, and thinkers in Buddhist history, emphasizing its Indian origins, but looking beyond to the various Buddhist traditions throughout Asia.

PHL 430H. HISTORY OF BUDDHIST PHILOSOPHY (4). Examination of the major philosophical schools, texts, and thinkers in Buddhist history, emphasizing its Indian origins, but looking beyond to the various Buddhist traditions throughout Asia. **PREREQS:** Honors College approval required.

PHL 431. BUDDHISM, NON-VIOLENCE, AND SOCIAL JUSTICE (4). Contemporary ideas, theories, and practices of the international movement of socially and politically active Buddhists known as Engaged Buddhism. Particular attention will be given to the philosophical presentations of non-violence and social justice, and their applications in living Buddhist traditions.

PHL 431H. BUDDHISM, NON-VIOLENCE, AND SOCIAL JUSTICE (4). Contemporary ideas, theories, and practices of the international movement of socially and politically active Buddhists known as Engaged Buddhism. Particular attention will be given to the philosophical presentations of non-violence and social justice, and their applications in living Buddhist traditions. **PREREQS:** Honors College approval required.

PHL 432. *YOGA AND TANTRIC TRADITIONS (4). An examination of the theory and practice of yoga and tantra in the traditions of Hinduism, Buddhism, and Jainism, and in their contemporary popular manifestations. Emphasis on the representation of yoga and tantra in Indian literature and history, including contemplative practices, bodily disciplines, and ritual. (Bacc Core Course)

PHL 436. PHILOSOPHY AND RELIGION (3). Examination of significant philosophical issues or movements and their relationship to theology and religion. **PREREQS:** 6 credits of philosophy and sophomore standing.

PHL 439. PHILOSOPHY OF NATURE (3). Intensive one-week field course taught in the Cascade Range. What is nature? What is the relation of humans to the rest of the natural world? How are our concepts of nature and decisions about land use shaped by the words and metaphors we use? What is the value of wild places? What can we learn from a close study of the natural world about right ways of acting in communities, both civic and biotic? The course will draw on many ways of knowing—philosophical

analysis, close observation, and especially writing. Camping required. **PREREQS:** Admission by application, departmental approval required.

PHL 440. ENVIRONMENTAL ETHICS (3). Philosophical ideas about our ethical relationships to the land, with applications to current environmental issues. Includes a study of different conceptions of environmental ethics; philosophical problems in environmental ethics, such as the rights of animals and plants; the uses of environmental ethics by environmental groups; and selected contemporary issues on the environmental front. (H) **PREREQS:** PHL 205 and PHL 342 and PHL 365 or 6 credits of philosophy and sophomore standing.

PHL 440H. ENVIRONMENTAL ETHICS (3). Philosophical ideas about our ethical relationships to the land, with applications to current environmental issues. Includes a study of different conceptions of environmental ethics; philosophical problems in environmental ethics, such as the rights of animals and plants; the uses of environmental ethics by environmental groups; and selected contemporary issues on the environmental front. **PREREQS:** PHL 205 and PHL 342 and PHL 365 or 6 credits of philosophy and sophomore standing and Honors College approval required.

PHL 443. *WORLD VIEWS AND ENVIRONMENTAL VALUES (3). A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. (Bacc Core Course) (NC) **PREREQS:** One introductory-level science course and sophomore standing.

PHL 443H. *WORLD VIEWS AND ENVIRONMENTAL VALUES (3). A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. (Bacc Core Course) **PREREQS:** One introductory-level science course and sophomore standing and Honors College approval required.

PHL 444. *BIOMEDICAL ETHICS (4). Application of ethical principles and decision-making processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decisions in medicine. (H) (Bacc Core Course) **PREREQS:** Sophomore standing.

PHL 444H. *BIOMEDICAL ETHICS (4). Application of ethical principles and decision-making processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decision in medicine. (Bacc Core Course) **PREREQS:** Sophomore standing and Honors College approval required.

PHL 448. NATIVE AMERICAN PHILOSOPHIES (3). Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry, theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. **CROSSLISTED** as ES 448/ES 548.

PHL 450. TOPICS (1-16). Uses the IDEAS MATTER lectures as the focus for an exploration of ideas that make a difference in the world.

Students read background materials, attend lectures, meet with the speakers, and write essays on the ideas they learn. This course is repeatable for a maximum of 16 credits. **PREREQS:** Sophomore standing.

PHL 451. KNOWLEDGE AND REALITY (3). Examination of significant theories of knowledge, theories concerning the nature of reality, and their connections. Includes an analysis of important concepts and problems, such as perception, induction, belief, empiricism, rationalism, and skepticism. Not offered every year. (H) **PREREQS:** 6 credits of philosophy, sophomore standing.

PHL 455. DEATH AND DYING (3). A multidisciplinary study of cultural, philosophical, and religious perspectives on death, dying, and grieving. Not offered every year. **PREREQS:** 6 credits of philosophy or sophomore standing.

PHL 461. ART AND MORALITY (3). The arts in the context of their connections to, and conflicts with, varied conceptions of the common good. Topics include free expression and community standards, museums and obligations toward cultural treasures, art in public places, public funding of art, the politics of taste. **PREREQS:** Sophomore standing.

PHL 462X. AESTHETICS OF THE NATURAL WORLD (3). Aesthetics appreciation of the natural world in Western thought and concepts and activities that shaped it. Relationship of aesthetic experiences of the natural world to art and philosophies of art, to moral reasoning, environmentalism and how we live, to concepts of knowledge and reality, to UNESCO heritage concepts.

PHL 470. PHILOSOPHY OF SCIENCE (3). Examination of philosophical questions, classic and contemporary, about science and scientific knowledge. Scientific explanations, the structure of theories, the concept of a natural law, revolutions in science, influences of the sciences and philosophy on one another, science and values. Not offered every year. (H) **PREREQS:** 6 credits of philosophy (upper-division philosophy recommended), sophomore standing.

PHL 474. PHILOSOPHY OF BIOLOGY (4). An introduction to some of the conceptual challenges engendered by contemporary evolutionary biology, including the nature of fitness, natural selection, adaptations, and species; identifying organisms, traits, and the units of selection; the evidence required to support particular adaptive or historical hypotheses; and others. **PREREQS:** Previous university-level course work in either philosophy or the biological sciences is strongly recommended.

PHL 499. TOPICS IN PHILOSOPHY (1-4). Examination of the work of a philosopher or of a specific problem; e.g., Wittgenstein, determinism, perception. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for a maximum of 16 credits. **PREREQS:** 6 credits of upper-division philosophy, sophomore standing.

PHL 499H. TOPICS IN PHILOSOPHY (1-4). Examination of the work of a philosopher or of a specific problem; e.g., Wittgenstein, determinism, perception. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for a maximum of 4 credits. **PREREQS:** 6 credits of upper-division philosophy, sophomore standing; Honors College approval required.

PHL 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PHL 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Sophomore standing.

PHL 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

PHL 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of

16 credits. **PREREQS:** Departmental approval required.

PHL 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Two upper-division philosophy courses or the equivalent and sophomore standing.

PHL 510. INTERNSHIP (1-12). This course is repeatable for a maximum of 16 credits. **PREREQS:** Sophomore standing.

PHL 511. GREAT FIGURES IN PHILOSOPHY (4). Study of the works of a major philosopher such as Plato, Aristotle, Descartes, Hume, Kant, or Marx. Each course normally devoted to the work of a single figure. Need not be taken in sequence. Not offered every year. This course is repeatable for a maximum of 16 credits. **PREREQS:** 6 credits of philosophy and sophomore standing.

PHL 517. FEMINIST PHILOSOPHIES (3). Diverse forms of feminist philosophy, including a variety of critiques, especially those based on race and class, with in-depth consideration of selected social issues such as rape and pornography. **CROSSLISTED** as WGSS 417/WGSS 517. **PREREQS:** 6 credits of philosophy or upper-division standing.

PHL 525. PHILOSOPHICAL METHODS (3). Examines diverse ways of approaching philosophical issues. Contains readings from different philosophical traditions. Develops understanding of the skills and conventions of philosophical argumentation.

PHL 530. HISTORY OF BUDDHIST PHILOSOPHY (4). Examination of the major philosophical schools, texts, and thinkers in Buddhist history, emphasizing its Indian origins, but looking beyond to the various Buddhist traditions throughout Asia.

PHL 531. BUDDHISM, NON-VIOLENCE, AND SOCIAL JUSTICE (4). Investigates the philosophical grounding of Buddhist ideas about non-violence, justice and social responsibility. Looks at broad-based Buddhist social activism movements and leaders; their methods of training, issues and types of actions taken by "Socially Engaged Buddhists."

PHL 532. YOGA AND TANTRIC TRADITIONS (4). An examination of the theory and practice of yoga and tantra in the traditions of Hinduism, Buddhism, and Jainism, and in their contemporary popular manifestations. Emphasis on the representation of yoga and tantra in Indian literature and history, including contemplative practices, bodily disciplines, and ritual.

PHL 536. PHILOSOPHY AND RELIGION (3). Examination of significant philosophical issues or movements and their relationship to theology and religion. **PREREQS:** 6 credits of philosophy and sophomore standing.

PHL 539. PHILOSOPHY OF NATURE (3). Intensive one-week field course taught in the Cascade Range. What is nature? What is the relation of humans to the rest of the natural world? How are our concepts of nature and decisions about land use shaped by the words and metaphors we use? What is the value of wild places? What can we learn from a close study of the natural world about right ways of acting in communities, both civic and biotic? The course will draw on many ways of knowing—philosophical analysis, close observation, and especially writing. Camping required. **PREREQS:** Admission by application, departmental approval required.

PHL 540. ENVIRONMENTAL ETHICS (3). Philosophical ideas about our ethical relationships to the land, with applications to current environmental issues. Includes a study of different conceptions of environmental ethics; philosophical problems in environmental ethics, such as the rights of animals and plants; the uses of environmental ethics by environmental

groups; and selected contemporary issues on the environmental front. **PREREQS:** PHL 205 and PHL 342 and PHL 365 or 6 credits of philosophy and sophomore standing.

PHL 541. CLASSIC MORAL THEORIES (3). Philosophical issues in ethics analyzed through the examination of such classical works in moral philosophy as Aristotle's Nichomachean ethics. Not offered every year. **PREREQS:** Either PHL 205 or PHL 342 or PHL 440 or one course in the history of philosophy.

PHL 542. CONTEMPORARY MORAL THEORIES (3). Examines contemporary ethical theories through study of moral philosophy in the 20th century, including recent developments in such areas as environmental ethics and feminist/feminine ethics. **PREREQS:** At least two philosophy courses including at least one of PHL 205 or PHL 342 or PHL 541.

PHL 543. WORLD VIEWS AND ENVIRONMENTAL VALUES (3). A comparative study of world-views (secular and religious, Western and Eastern, modern and ancient) and how they affect concepts of nature, environmental values, and selected environmental issues. **PREREQS:** One introductory-level science course and sophomore standing.

PHL 544. BIOMEDICAL ETHICS (4). Application of ethical principles and decision-making processes to selected problems in medicine, health care, and biotechnology. Special attention given to end-of-life choices, reproductive rights and technologies, organ transplantation, research ethics, genetic engineering, and allocating scarce resources. An interdisciplinary focus that draws on social, legal, economic, and scientific issues in ethical decisions in medicine. **PREREQS:** Sophomore standing.

PHL 547. RESEARCH ETHICS (3). An examination of the interrelationship between ethical values and scientific practice. Topics include professionalism in science; scientific integrity, misconduct, and whistleblowing; the ethics of authorship; conflicts of interest between academic science and commercial science, and social responsibilities in science.

PHL 548. NATIVE AMERICAN PHILOSOPHIES (3). Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry, theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. **CROSSLISTED** as ES 448/ES 548.

PHL 550. TOPICS (1-16). Uses the IDEAS MATTER lectures as the focus for an exploration of ideas that make a difference in the world. Students read background materials, attend lectures, meet with the speakers, and write essays on the ideas they learn. This course is repeatable for a maximum of 16 credits. **PREREQS:** Sophomore standing.

PHL 551. KNOWLEDGE AND REALITY (3). Examination of significant theories of knowledge, theories concerning the nature of reality, and their connections. Includes an analysis of important concepts and problems, such as perception, induction, belief, empiricism, rationalism, and skepticism. Not offered every year. **PREREQS:** 6 credits of philosophy, sophomore standing.

PHL 555. DEATH AND DYING (3). A multidisciplinary study of cultural, philosophical, and religious perspectives on death, dying, and grieving. Not offered every year. **PREREQS:** 6 credits of philosophy or sophomore standing.

PHL 561. ART AND MORALITY (3). The arts in the context of their connections to, and conflicts with, varied conceptions of the common good.

Topics include free expression and community standards, museums and obligations toward cultural treasures, art in public places, public funding of art, the politics of taste. **PREREQS:** Sophomore standing.

PHL 562X. AESTHETICS OF THE NATURAL WORLD (3). Aesthetics appreciation of the natural world in Western thought and concepts and activities that shaped it. Relationship of aesthetic experiences of the natural world to art and philosophies of art, to moral reasoning, environmentalism and how we live, to concepts of knowledge and reality, to UNESCO heritage concepts.

PHL 570. PHILOSOPHY OF SCIENCE (3). Examination of philosophical questions, classic and contemporary, about science and scientific knowledge. Scientific explanations, the structure of theories, the concept of a natural law, revolutions in science, influences of the sciences and philosophy on one another, science and values. Not offered every year. **PREREQS:** 6 credits of philosophy (upper-division philosophy recommended), sophomore standing.

PHL 574. PHILOSOPHY OF BIOLOGY (4). An introduction to some of the conceptual challenges engendered by contemporary evolutionary biology, including the nature of fitness, natural selection, adaptations, and species; identifying organisms, traits, and the units of selection; the evidence required to support particular adaptive or historical hypotheses; and others. **PREREQS:** Previous university-level course work in either philosophy or the biological sciences is strongly recommended.

PHL 599. TOPICS IN PHILOSOPHY (1-4). Examination of the work of a philosopher or of a specific problem; e.g., Wittgenstein, determinism, perception. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for a maximum of 16 credits. **PREREQS:** 6 credits of upper-division philosophy, sophomore standing.

TCS 301. *WORLD COMMUNITY IN THE TWENTIETH CENTURY: UNDERDEVELOPMENT (3). A study of the relations of dependence in the contemporary world, emphasizing the impact of metropolitan centers upon geographically dispersed, predominantly agricultural societies of the Third World. An examination of the altered social and cultural patterns that dependence entails for traditional communities. (Bacc Core Course)

TCS 407. SEMINAR (1-12). Advanced study of selected topics related to issues and problems in the twentieth century introduced in TCS core course offerings. Section I seminars will be graded pass/no pass and carry 1 credit; other sections will be graded A-F and will carry variable credit. This course is repeatable for a maximum of 16 credits.

TCS 507. SEMINAR (1-12). Advanced study of selected topics related to issues and problems in the Twentieth Century introduced in TCS core course offerings. Section I seminars will be graded P/N and carry 1 credit; other sections will be graded A-F and will carry variable credit. This course is repeatable for a maximum of 16 credits.

ANTHROPOLOGY

Anthropology offers courses to meet the needs of students interested in a comprehensive understanding of human societies and cultures past and present. Prehistoric, historic, ethnographic, and linguistic study provides the basis for understanding how a variety of societies solve common problems. The anthropology curriculum provides a cross-cultural perspective, a sound basis for later professional or graduate education.

An anthropology degree enables students to pursue a broad range of jobs requiring a liberal arts background; for example, education, human and governmental services, law, business, media, and medicine. It prepares them especially well for work situations that emphasize cross-cultural awareness, international contacts and management of cultural resources.

Anthropology bridges sciences and the humanities and develops critical thinking, communication skills, facility with group processes, and the ability to work independently. It can help students succeed in an increasingly interconnected and complex world.

ETHNIC STUDIES

Ethnic studies is an established academic discipline traditionally defined by a concentration on the experiences and concerns of the four major ethnic minority groups historically under-represented in United States political and institutional life and in university curricula. Ethnic studies faculty bring a variety of methodological approaches to bear on the exploration of issues affecting African American, Asian American, Chicano/a-Latino/a, and American Indian and Alaskan Native communities. A degree in ethnic studies provides a sound basis for future work in graduate or professional programs and is of value to students interested in careers in a broad range of jobs requiring a liberal arts background and an understanding of race, ethnicity and cultural competency.

WORLD LANGUAGES

World languages and cultures (WLC) offers major programs leading to a BA degree in French, German, or Spanish, as well as minor programs in Asian Languages and Cultures, French, German, Russian [Suspended], and Spanish for undergraduate students with majors in other disciplines. The major and minor

programs provide students with the opportunity to develop language skills and to raise their understanding of and appreciation for foreign literatures and cultures.

Proficiency in a foreign language and knowledge of a foreign culture can enhance career possibilities in fields that range from business, library work, and government service to park service, oceanography, agriculture, and forestry. Students often find it possible to combine languages with another major such as business administration, psychology, political science, sociology, and professional training to prepare for an exciting, internationally oriented career.

Study of a language other than English can help students improve communication skills in English, become more linguistically aware, develop analytical skills, and communicate on an equal basis with non-English-speaking people. Through language courses, students can gain a global perspective, more fully understand different cultures and value systems, and enhance their general knowledge of world development.

An undergraduate academic major (French, German, or Spanish) is required as a prerequisite to the Fifth-Year Teacher Education Program designed to prepare students for licensure and/or other graduate programs in education.

WLC cooperates with institutions of the Oregon University System and with other Northwest institutions of higher education in administering overseas study centers at Beijing and Fujian, China; Quito, Ecuador; Angers, Lyon, and Poitiers, France; Baden-Wurtemberg and Cologne, Germany; Tokyo, Japan; Seoul, Korea; Puebla, Mexico; Santander, Oviedo, and Segovia, Spain. Students may also study at different institutions in Russia and in the former Soviet republics. The school cooperates with the Office of International Student and Faculty Services to offer study programs in Chillan, Chile; San Jose, Costa Rica. See the International Programs section of this catalog.

LIBERAL STUDIES

The BA degree in Liberal Studies offers area studies that allow students to use language and culture courses taken in the School of Language, Culture, and Society to fulfill core course requirements. Students majoring in liberal studies can elect to complete their undergraduate degree using prestructured programs in the following areas: Asian studies, Chinese studies, European studies, Japanese studies, and Russian studies [suspended].

A minimum of 45 credits of course work in the concentration area is required to complete the Liberal Studies major.

WOMEN, GENDER, AND SEXUALITY STUDIES

Women, Gender, and Sexuality Studies is the multidisciplinary study of gender and women's lives and experience. Course work explores women's realities in such areas as the political and social sciences, health, psychology, history, literature and arts. Women studies programs grew out of the women's movement, involving understandings of sexist discrimination in society and a need to celebrate women's strengths, contributions and forms of resistance. Grounded in this feminist knowledge, women studies is constantly growing and changing in order to understand and affirm the role that issues of race, class, age, ability, appearance and sexual identities play in women's everyday lives. It is hoped that students will find Women, Gender, and Sexuality Studies to be academically challenging and personally rewarding. The goal is to provide a program that is intellectually sound and vocationally useful, as well as one that encourages personal growth. The Women, Gender, and Sexuality Studies Program offers an undergraduate major, minor, and certificate, as well as the MA in Women, Gender, and Sexuality Studies and the opportunity to declare Women, Gender, and Sexuality Studies as a primary and/or secondary area in the MAIS.

Women studies faculty are also drawn from colleges across the university. Many teach Women Studies Program courses in their home schools and are involved in research projects that give them different perspectives on the challenges in women studies knowledge. These faculty are not listed on this page.

CERTIFICATE PROGRAMS

The School of Language, Culture, and Society participates in the Languages in Culture, Latin American Affairs and Russian Studies certificate programs. These interdisciplinary programs are designed for students who wish to combine their school major with a broad knowledge of Latin American or Russian affairs, past and present, or who wish to explore how languages and cultures interact. Core courses are typically taken in language, in the humanities and social sciences.

GRADUATE PROGRAMS

The School of Language, Culture, and Society offers master's of arts and doctor of philosophy degrees in Applied Anthropology, Contemporary Hispanic Studies, and Women Studies. Graduate minors are offered in Anthropology, Applied Anthropology, Contemporary Hispanic Studies, Ethnic Studies, Food in Culture and Social Justice, Foreign Languages and Literatures, and Women, Gender, and Sexuality Studies.

Students may earn the Master of Arts in Interdisciplinary Studies (MAIS) degree in the areas of anthropology, applied anthropology, ethnic studies, foreign languages and literatures, French, German, Spanish, and women studies. Typically, candidates who select French, German or Spanish as one of their primary areas complete graduate course work in language, linguistics, literature and culture studies. To be admitted to a foreign language component of the MAIS degree, students must meet the Graduate School's general entrance requirements and obtain the consent of a graduate faculty member of the School of Language, Culture, and Society who agrees to serve as the field advisor. A maximum of 6 graduate credits completed at an overseas study center may be used to satisfy requirements for any one of three fields of the MAIS degree.

MASTER OF ARTS IN TEACHING [SUSPENDED]

(French, German, Spanish)

In conjunction with the Professional Teacher Education Program the School of Language, Culture, and Society offers a Master of Arts in Teaching (MAT) degree that prepares students for initial Oregon teaching certification in the following licensure areas: French, German, and Spanish. The program consists of courses in education, practicum, and subject graduate course work in the target language. To be admitted to the program students must demonstrate advanced proficiency in French, German or Spanish (as defined by the School of Language, Culture, and Society). For complete program details students should contact the school's MAT graduate advisor or the College of Education.

(Bilingual Education/ESOL)

The School of Language, Culture, and Society also supports an MAT program leading to a secondary endorsement in Bilingual Education and in English to Speakers of Other Languages (ESOL). To obtain the bilingual education endorsement students must complete course work in education and achieve a proficiency level in a target foreign language as defined by the school. For complete program details students should contact the school's MAT graduate advisor or the College of Education.

UNDERGRADUATE MAJORS WITH OPTIONS

Anthropology (BA, BS, CRED, HBA, HBS)

Major Requirements

Majors develop a broad anthropological background. You must select one of the four following options:

1. Archaeology/Physical Anthropology (50 credits)

2. Biocultural Option (50 credits)
3. Cultural Anthropology (48 credits)
4. General Anthropology (49 credits) is for distance education students only.

The curriculum accommodates upper division and transfer students. Requirements take two years to complete.

A grade of C– or better is required for all courses used to complete major requirements. Such courses cannot be taken S/U. Major requirements are listed in each option.

OPTIONS

ARCHAEOLOGY/PHYSICAL ANTHROPOLOGY OPTION

Core (Select 20 credits)

- ANTH 110. *Introduction to Cultural Anthropology (3)
 or ANTH 210. *Comparative Cultures (3)
 ANTH 230. Time Travelers (3)
 ANTH 240. Introduction to Biological Anthropology (3)
 ANTH 350. Language, Culture and Society (4)
 ANTH 370. ^Anthropological Theories (4)
 ANTH 441. Hominid Evolution (4)

Advanced (Select 30 credits)

- ANTH 331. Mesoamerican Prehistory (3)
 ANTH 345. *Biological and Cultural Constructions of Race (3)
 ANTH 380. *Cultures in Conflict (3)
 ANTH 420. World Cultures-Topics (4)
 ANTH 421. Analysis of Lithic Technologies (3)
 ANTH 422. Historic Materials Analysis (3)
 ANTH 423. Method and Theory in Historical Archaeology (3)
 ANTH 424. Settlement Archaeology (3)
 ANTH 425. Ceramic Analysis in Archaeology (3)
 ANTH 430. Topics in Archaeology (1–4)
 ANTH 432. *The Archaeology of Domestication and Urbanization (3)
 ANTH 433. First Americans, Last Frontiers (3)
 ANTH 434. North America After the Ice Age (3)

ETHNIC STUDIES (BA, BS, CRED, HBA, HBS)

In addition to an ethnic studies core of issue-based courses that examine the intersections of race, class and gender and their relation to the construction of ethnicity, one area of emphasis on a specific ethnic group and a community internship are required.

Students work closely with a departmental advisor to determine a program of study that best meets their needs.

A grade-point average of 2.00 is required and majors must earn a grade of C- or above in all major courses.

Individualized research and study is limited to 3 credits.

Ethnic Studies Core (22)

- ES 101. *Introduction to Ethnic Studies (3)
 ES 201. Inventing Ethnic America (3)
 ES 354. ^Literature of Ethnic Minorities in the United States (4)
 ES 410. Internship (9)
 ES 451. Theories of Race and Ethnicity (3)
 ES 455. Internship Seminar (1)

Emphasis (30)

One sequence from the following focus areas (6 credits total):

Chicano/a-Latino/a Studies

- ES 212. *Survey of Chicano/a-Latino/a Studies (3)
 ES 213. *Contemporary Latino/a Culture and Issues (3)

African American Studies

- ES 221, ES 223. *Survey of African American Studies I, II (3,3)

Asian American Studies

- ES 231. *Asian American Studies: Mid-1800s-Present (4)
 ES 233. *Asian American Studies II: Activism and Empowerment (3)

Native American Studies

- ES 243. *Native American Experience in the 20th Century U.S. (3)
 9 credits distributed across of the remaining focus areas listed above (3 credits from each; 9 total).

15 credits of upper-division electives in an area of emphasis to be approved by the major advisor and to include a minimum of 6 credits at the 400 level (some courses may be taken from a list of nondepartmental offerings, subject to departmental approval).

Total=52

FRENCH (BA, CRED, HBA)

The minimum upper-division course requirements are listed below. Additional requirements are available from departmental advisors and the departmental office. Required courses may not be taken S/U.

French (45)

- FR 311, FR 312, FR 313. Third-Year French (3,3,3)⁸
 FR 333. *French Culture and Society Since the Revolution (3)^{7,8}
 FR 339. French: Francophone Studies (3)⁸
 FR 340. Introduction to French Literary Studies (3)⁸
 FR 411. Fourth-Year French (3)^{7,8}
 FR 439. ^French: Francophone Studies (3)⁸
 Upper-division French electives, to be approved by the major advisor (21)

Total=45

All prospective majors and minors must see a departmental advisor at least once a year.

WLC majors must participate in an OUS and OSU-approved study abroad program or in an approved internship experience in a French-, German-, or Spanish-speaking country or fulfill this requirement as determined by the director.

Students who do not find an OSU-approved program (this includes OUS and other programs run through IDEA and OUS) that fits their academic and/or geographical needs can petition to have a different program approved by a sub-committee of the Study Abroad Advisory Committee. The requirement for petitioning a program must include an academic and/or geographic reason why a student is choosing a program not on the approved list.

Footnotes:

- ⁷ Must be taken on the Corvallis campus.
⁸ These courses must be completed with a B average.

GERMAN (BA, CRED, HBA)

Also available via Ecampus.

Critical study of issues in German language, literature, culture, and film.

The minimum upper-division course requirements are listed below. Additional requirements are available from departmental advisors and the departmental office. Required courses may not be taken S/U.

German (45)

- GER 311, GER 312, GER 313. Third-Year German (3,3,3)
 GER 331. *German Culture (3)

* Bacc Core Course

^ Writing Intensive Course (WIC)

WOMEN, GENDER, AND SEXUALITY STUDIES (BA, BS, CRED, HBA, HBS)

Also available via Ecampus.

The Women, Gender, and Sexuality Studies major represents an interdisciplinary curriculum composed of course work in the social sciences and humanities with gender as the focal point of analysis. The curriculum examines women's experiences, past and present, through feminist theory and research to better understand differences in power and privilege based on gender as well as race and ethnicity, religion, socioeconomic status, sexual identity, age, physical appearance, and mental or physical ability. Many classes incorporate a social activism component, and students are required to complete an internship to put their course work into action as well as a senior research project to understand and contribute to the scholarship in this field.

A total of 51 credits is required for the major, 33 credits of required Women, Gender, and Sexuality Studies core courses and 18 credits of elective courses chosen from Women, Gender, and Sexuality Studies or Women, Gender, and Sexuality Studies Program courses. An approved program course is one that has a focus on gender and/or women's issues, is taught in a unit other than the Women, Gender, and Sexuality Studies Program, and has been approved as fulfilling the requirements of a Women, Gender, and Sexuality Studies course.

No more than 9 credits of Women, Gender, and Sexuality Studies Program courses may be used toward the major. All required course work must be taken on campus and no more than 6 credits of online elective course work can be used toward the on-campus major.

Baccalaureate Core (48 credits excluding WIC)

Liberal Arts Core (15 credits)

Fine Arts (3)
Humanities (3)
Non-Western Culture (3)
Social Sciences (3)
Plus one additional course from the above areas (3)

College of Liberal Arts BA/BS Requirements (15)

- The BA requires second year language proficiency at the college level with C grade or better
- The BS requires 15 credits in science, computer science, and quantitative studies.

Free Electives to allow for a minor or second major (51)

WGSS Major Requirements (51 credits)

With the exception of WIC, courses used to satisfy requirements for the major may not be used to meet baccalaureate or liberal arts core requirements.

Core

ASIAN LANGUAGES AND CULTURES MINOR

Requirements

A total of 21 upper-division credits are required. Fifteen credits out of the 21 credits must be completed in residence with an average grade of C. The courses offered through Ecampus are included.

Chinese Concentration

CHN 311, CHN 312, CHN 313. Third-Year Chinese Language (3,3,3)

CHN 333. *Chinese Culture (3)

Japanese Concentration

JPN 311, JPN 312, JPN 313. Third-Year Japanese (3,3,3)

JPN 333. *Japanese Culture (3)

Electives

9 credits from the following courses after consultation with an advisor:

CHN 331, CHN 332. *Chinese Culture (3,3)

JPN 331, JPN 332. *Japanese Culture (3,3)

Special topics in Chinese/Japanese Language, culture, and literature (1-3 credits):

CHN 399. Special Topics (1-3)

JPN 399. Special Topics (1-3)

Courses related to China or Japan in other OSU departments or completed abroad on an approved study-abroad program

ETHNIC STUDIES MINOR

In addition to an ethnic studies core of issue-based courses that examine the intersections of race, class and gender and their relation to the construction of ethnicity, one area of emphasis on a specific ethnic group is required.

Students will work closely with a departmental advisor to determine a program of study that best meets their needs.

A grade-point average of 2.00 and a grade of C- or above in all minor course work are required. Individualized research or study is limited to 3 credits.

Note: The internship for this minor, ES 410, is optional. If the internship is taken for 3 credits, upper-division electives will be reduced to 6 credits.

Ethnic Studies Core (9)

ES 101. *Introduction to Ethnic Studies (3)

ES 201. Inventing Ethnic America (3)

One 400-level comparative Ethnic Studies course (3)

One sequence from an area of emphasis below (6 credits total): *Chicano/a-Latino/a Studies*

ES 212. *Survey of Chicano/a-Latino/a Studies I (3)

GER 410. Internship (1-15)

GER 488. German Studies, German Study Center (1-12)

QUEER STUDIES MINOR

The undergraduate minor in Queer Studies prepares students to examine how gender and sexuality are constructed and policed and, further, imagines liberatory futures for people of all genders and sexualities. Centering itself on the activism and scholarship of women of color, transnational feminisms, Two-Spirit Indigenous people, and Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) people of color, this minor examines homophobia and transphobia's relationship with racism, colonialism, sexism, ableism, classism and other forms of power.

A total of 30 credits is required for the minor, with at least 12 of these credits at the upper-division level.

Core Requirements (21 Credits)

QS 262. *Introduction to Queer Studies (3)

QS 364. *Transgender Politics (3)

QS 409. Practicum: Projects in Queer Studies (3 cr. min.)

QS 431. *Queer of Color Critiques (3)

QS 462. *Queer Theories (3)

QS 472. ^Indigenous Two-Spirit and Queer Studies (3)

QS 475. Transnational Sexualities (3)
[Pending approval]

The remaining 9 credits may be taken from the Queer Studies electives (any course with the QS prefix) and from approved program courses offered by other departments. However, no more than 6 credits of approved program courses may be used toward the Queer Studies minor.

HST 368. *Lesbian and Gay Movements in Modern America (4)

QS 299. Special Topics (3)

QS 399. Special Topics in Queer Studies (3)

QS 473. Transgender Lives (3)

QS 477. *Queer/Trans People of Color, Arts and Activism (3)

QS 499. Special Topics in Queer Studies (4)

WGSS 360. *Men and Masculinities in a Global Context (3)

WGSS 460. ^Women and Sexuality (3)

SPAN 336, SPAN 337, SPAN 338. *Latin American Culture (3,3,3)

SPAN 339. Mexican Immigrant Experience in the United States (3)

Upper-division Spanish electives, to be approved by the minor advisor (6)

Total=30

All prospective majors and minors must see a departmental advisor at least once a year.

WOMEN, GENDER, AND SEXUALITY STUDIES MINOR**Also available via Ecampus.**

The Women, Gender, and Sexuality Studies minor provides an exploration of gender and a focus on the lives of women both in the U.S. and worldwide. It studies the interaction of gender within a complex matrix of class, race, age, ethnicity, nationality, sexual identity, appearance, and ability. Students are expected to take the bulk of their course work toward the minor from core and elective courses offered by the Women, Gender, and Sexuality Studies Program. A total of 27 credits is required for the minor, with at least 12 credits at the upper-division level.

All required course work must be taken on campus and no more than 3 credits of online elective course work can be used toward the on-campus minor.

Core Requirements (24)

WGSS 223. *Women: Self and Society (3)

WGSS 224. *Women: Personal and Social Change (3)

WGSS 262. *Introduction to Queer Studies (3)

WGSS 410. Internship (3)

WGSS 414. *Systems of Oppression in

Women's Lives (4) [Pending approval]

WGSS 416. Theories of Feminism (4)

WGSS 480. *Women in a Cross-Cultural Context (4) [Pending approval]

The remaining 3 credits may be taken from Women, Gender, and Sexuality Studies electives and from approved program courses offered in other departments. An approved program course is one that has a focus on gender and/or women's issues, is taught in a unit other than the Women, Gender, and Sexuality Studies Program, and has been approved as fulfilling the requirements of a Women, Gender, and Sexuality Studies Program course. See the electives for the Women, Gender, and Sexuality Studies major. In addition, WGSS 270: Violence Against Women (3), WGSS 340: *Gender and Science (3), WGSS 430: Women of Color in the U.S. (4), and WGSS 460: ^Women and Sexuality (4) may be taken as electives for the minor. No more than 3 credits of WGSS 402 Independent Study and WGSS 410 Internship may count toward the minor.

Total=27**GRADUATE MAJORS****APPLIED ANTHROPOLOGY (MA, PhD, MAIS)****Graduate Areas of Concentration**

MA in Applied Anthropology: Native Americans: past and present, biocultural medical anthropology, cultural resource management, globalization/localization, historic archaeology, language and cross-cultural communications, natural resources and communities. PhD in Applied Anthropology: Archaeology; Business, organization and work; ethnicity, culture and health; local values, indigenous knowledge and environment

The MA and PhD degrees in Applied Anthropology provide advanced education in anthropology that will prepare students to practice their skills in occupations in both public and private sectors at the local, national, and international levels. These courses of study integrate anthropological theory and practice within a specific concentration chosen by the student.

Electives will be drawn from university-wide graduate-level courses that complement core courses and courses chosen in one of the above concentrations.

MA Program Requirements

Core program (10–11)

Course work in major concentration (10–12)

Methods courses (3–4)

Minor credits from single or multiple schools or departments (15)

Demonstrated foreign or field language proficiency

Internship (6–12)

Research and thesis writing (6–12)

PhD Program Requirements (121)

Core program (18)

Course work in chosen concentration (18)

Minor area (18)

Methods course work (6–8)

Gender/ethnicity (3)

Seminar (1)

Thesis credits:

Comprehensive review (9)

Internship/Residency (12)

Dissertation (36)

Demonstrated proficiency in a foreign language

PhD Program Total=121 (includes course work completed for MA degree)

MAIS Degree

The school also participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program. In other advanced degree programs, anthropology may be used as a minor. See the Graduate School for details.

CONTEMPORARY HISPANIC STUDIES (MA)**Graduate Areas of Concentration**

Contemporary Hispanic studies

The MA degree in Contemporary Hispanic Studies provides an alternative to traditional pre-doctoral programs focused on literary theory or linguistics.

Based on the multidimensional approach to language education promoted in the National Standards for Foreign Language Education, this program brings together theoretical knowledge and practical skills in a single program designed to prepare students for further graduate study or for careers in education, migrant programs, nongovernmental organizations, and other sectors affected by rapidly changing demographics. The integrated minor provides additional exploration of themes related to intercultural communication from a broad, interdisciplinary perspective.

The Master of Arts in Contemporary Hispanic Studies requires completion of 48 credits of graduate-level course work. A 15-credit integrated minor emphasizing intercultural studies must also be completed.

Core Requirements (33 credits)**Spanish Language (6)**

SPAN 561. Fifth-Year Spanish (3)

SPAN 562. Fifth-Year Spanish (3)

Hispanic Cultural Studies (9)

SPAN 538. Selected Topics in Luso-Hispanic Culture (3)

GRADUATE MINORS**ANTHROPOLOGY GRADUATE MINOR****Graduate Areas of Concentration**

Applied cultural anthropology, biocultural evolution, cross-cultural communication, cultural resource management, general anthropology, historic archaeology, medical anthropology, natural resource and community development, prehistoric archaeology

The School of Language, Culture, and Society offers graduate work leading to a Master of Arts in Applied Anthropology. Areas of concentration within the applied program include applied cultural anthropology, biocultural evolution, cross-cultural communication, cultural resource management, general anthropology, historic archaeology, medical anthropology, natural resource and community development, prehistoric archaeology. The school also offers graduate work leading to a master of arts in interdisciplinary studies and participates as a minor field in other advanced degree programs. A variety of individualized programs are available within the MAIS framework.

APPLIED ANTHROPOLOGY GRADUATE MINOR**Graduate Areas of Concentration**

American Indians-past and present, cultural resource management, historic archaeology, language and cross-cultural communications, natural resources and communities

The School of Language, Culture, and Society offers graduate work leading to a Master of Arts in Applied Anthropology. Areas of concentration within the applied program include American Indians-past and present, cultural resource management, historic archaeology, language and cross-cultural communications, natural resources and communities. The school also offers graduate work leading to a master of arts in interdisciplinary studies and participates as a minor field in other advanced degree programs. A

variety of individualized programs are available within the MAIS framework.

CONTEMPORARY HISPANIC STUDIES GRADUATE MINOR

See an advisor for more information.

ETHNIC STUDIES GRADUATE MINOR

Graduate Areas of Concentration *Ethnic studies*

Graduate work in the School of Language, Culture, and Society may serve as a field of study for the Master of Arts in Interdisciplinary Studies degree or as a minor in other advanced degree programs. The program offers an interdisciplinary exploration of the critical areas of race, class, ethnicity, and gender in American life, as well as focused study of the four major ethnic minority groups of the United States (African Americans, Asian Americans, Chicano/Latinos and Native Americans).

Students applying for graduate work in ethnic studies must meet the following requirements:

1. a minimum GPA of 3.00 in the last 90 credits of graded undergraduate work on the first baccalaureate degree plus all work completed thereafter;
2. appropriate undergraduate or postgraduate work in ethnic studies. Applicants are urged to speak with an advisor prior to submitting their materials.

FOOD IN CULTURE AND SOCIAL JUSTICE GRADUATE MINOR

This interdisciplinary graduate minor in Food in Culture and Social Justice prepares students to examine food from a variety of perspectives. When and how we eat, what is considered acceptable to eat, how we prepare it, and how we learn about producing and eating food are all fascinating questions to explore by humanists and social scientists. Histories of particular food commodities and changes in the way people think about sustaining healthy bodies richly contextualizes our present practices. Cultural analyses of food and food production lead us to question the level of social justice within the local and global food systems. Students complete at least 1 credit of experiential/service learning which will be spent volunteering with food-related organizations.

Required Service Learning Course ANTH 506. *Projects: Food Projects* (1)

Choose 15 credits (master's) or 18 credits (PhD) from the following courses:

- ANTH 544. *Nutritional Anthropology* (4)
ANTH 547. *Research Methods in Food, Culture and Social Justice* (4) **[Pending submission and approval of a proposal]**
ANTH 586. *Anthropology of Food* (4)

ES 599. *Special Topics: Food and Ethnic Identity* (3)

HDFS 547. *Families in Poverty* (3)

HST 599. *Special Topics: Food in World History* (4)

RS 517. *Food Systems: Local to Global* (4) **[Pending submission and approval of a proposal]**

WGSS 565. *Women, Weight, and Body Image* (3)

FOREIGN LANGUAGES AND LITERATURES GRADUATE MINOR

Graduate Areas of Concentration *Modern languages, French, German, Spanish*

See an advisor for more information.

QUEER STUDIES GRADUATE MINOR

The graduate minor in Queer Studies prepares students to examine how gender and sexuality are constructed and policed and, further, imagines liberatory futures for people of all genders and sexualities. Centering itself on the activism and scholarship of women of color, transnational feminisms, Two-Spirit Indigenous people, and Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) people of color, this graduate option examines homophobia and transphobia's relationship with racism, colonialism, sexism, ableism, classism and other forms of power.

Master's students must complete a total of 15 credits, and doctoral students must complete a total of 18 credits. Students must complete a total of 12 credits. Students whose primary area is WGSS must select courses that are *in addition* to the WGSS requirements.

Required of All Students:

QS/WGSS 562. *Queer Theories* (3)

In each of the following two sections, both master's and doctoral students will complete 6 credits. In addition, doctoral students will complete an additional 3 credits from either section.

Sexuality, Gender, Race, and Nation (6 credits)

QS/WGSS 531. *Queer of Color Critiques* (3)

QS/ES/WGSS 572. *Indigenous Two-Spirit and Queer Studies* (3)

QS/ES/WGSS 577. *Queer/Trans People of Color Arts and Activism* (3)

QS 599. *Special Topics in Queer Studies* (4)

SPAN 569. *Topics in Joteria Studies* (3)

Students must complete 6 credits in the following area:

Gender Politics (6 credits)

QS/WGSS 524. *Trans/Gender Politics* (3)

QS/WGSS 573. *Transgender Lives* (3)

QS 599. *Special Topics in Queer Studies* (4)

WGSS 514. *Systems of Oppression in Women's Lives* (3)

WGSS 560. *Women and Sexuality* (3)

WGSS 585. *Transnational Feminisms* (3)

WOMEN, GENDER, AND SEXUALITY STUDIES GRADUATE MINOR

Graduate Areas of Concentration *Contemporary women's issues; leadership and community engagement; race, class and gender; sexuality studies; transnational perspectives*

Women, Gender, and Sexuality Studies is the multidisciplinary study of gender and women's lives and experiences.

Course work explores women's realities in such areas as the political and social sciences, health, psychology, history, literature, and the arts. Women, Gender, and Sexuality Studies programs grew out of the women's movement, involving understandings of discrimination in society and a need to celebrate different women's strengths, contributions, and forms of resistance.

Women, Gender, and Sexuality Studies can be elected as a primary and/or secondary field for the Master of Arts in Interdisciplinary Studies degree (MAIS) and as a graduate minor. Areas of specialization include contemporary women's issues; gender, race and class; and global women's issues. The master's program requires a thesis or research report (nonthesis option) and the completion of a core curriculum. This curriculum includes an understanding of how issues of gender, race, class, and other differences among women affect their status in Western and global perspectives. It also emphasizes the relationship between theory and strategies for social change. An internship or field placement in an agency that is concerned with gender issues or women's role and status in society is required and is designed to help students integrate classroom knowledge with practical experience. The graduate program is beneficial for any work experience in which gender is negotiated or women are affected. Women, Gender, and Sexuality Studies graduates are employed in human service agencies and programs, advocacy organizations such as battered women's shelters and women's resource centers and community organizing, teaching, business, administration, and cultural work. Many students have used their degree as a preparatory base for doctoral work.

Women, Gender, and Sexuality Studies faculty are drawn from colleges across the university. Many teach Women, Gender, and Sexuality Studies program courses in their home departments and are involved in research projects that give them different perspectives on the challenges in Women, Gender, and Sexuality Studies. These courses and faculty are not listed in this entry. For more information, contact Susan Shaw, Director, Women, Gender, and Sexuality Studies, 252 Waldo Hall, OSU, Corvallis, OR 97331.

Master of Arts in Interdisciplinary Studies (MAIS)–Primary Area in Women, Gender, and Sexuality Studies

CERTIFICATES

FOOD IN CULTURE AND SOCIAL JUSTICE CERTIFICATE

Food is more than simple nourishment. It is part of a system of communication firmly rooted in individual and group identities within cultures around the world. When and how we eat, what is considered acceptable to eat, how we prepare it, and how we learn about producing and eating food are all fascinating questions to explore by humanists and social scientists. Histories of particular food commodities and changes in the way people think about sustaining healthy bodies richly contextualizes our present practices. Cultural analyses of food and food production lead us to question the level of social justice within the local and global food systems. Community food security is a condition in which all community residents obtain a safe, culturally acceptable, nutritionally adequate diet through a sustainable food system that maximizes community self-reliance and social justice. Students who complete this certificate will not only have a clear idea of the cultural bases of food and food production, but will obtain some experience working towards community food security.

Complete 16 credits of core classes and then choose 6 credits of electives within the College of Liberal Arts and 6 credits of electives from outside the College of Liberal Arts.

**LATIN AMERICAN AFFAIRS
 CERTIFICATE**

Juan A. Trujillo, *Director*

36 Kidder Hall

Oregon State University
 Corvallis, OR 97331-4603
 541-737-3956

Email: jtrujillo@oregonstate.edu

Students earning a Latin American Affairs certificate will have gained a broad knowledge and understanding of the history and current situation in Latin America. The program allows students with majors in any discipline to complement their professional studies; certificates are awarded concurrently with the undergraduate or graduate degree.

Course work is drawn from several departments and schools, primarily in the College of Liberal Arts. Interested students should contact the program director early in their academic careers in order to plan their schedules.

Certificate Curriculum

The course of study consists of a minimum of 30 credits: 9 credits of required core courses, and 21 credits of appropriate electives. In addition, the student must have proficiency in Spanish or Portuguese equivalent to that attained by the end of the third-year language sequence, as certified by the School of Language, Culture, and Society, or by placement scores.

The minimum of 30 credits of approved courses must include:

Core Requirement (9)

HST 350, HST 351. *Modern Latin America (4,4)

SPAN 336. *Latin American Culture (3)

Electives (21)

A minimum of 21 credits of approved Latin American courses outside the major from at least two departments/schools.

ANTH 313. *Peoples of the World-Latin America (3)

or ANTH 413. World Cultures-Latin America (4)

ES 311. Narratives of Latino Migrations (3)

HST 456. Problems in Latin American History (4)

PHL 316. Intellectual Issues of Mexico and Mexican Americans (4)

PS 344. Latin American Politics (4)

SPAN 311. Advanced Spanish Grammar (3)

SPAN 312. Intermediate Writing Skills (3)

SPAN 313. Spanish Language Through Culture (3)

or SPAN 314, SPAN 315, SPAN 316.

Spanish for Native Speakers (3,3,3)

SPAN 337. *Latin American Culture (3)

SPAN 338. *Latin American Culture (3)

SPAN 438. ^Selected Topics in Luso-Hispanic Culture (3)

SPAN 445. Selected Topics in the Literature of Latin America (3)

Appropriate open-ended courses (402, 405, 407) through participating departments/schools, as well as transfer credits, may also be used to satisfy requirements when approved in advance by the program director.

**WOMEN, GENDER, AND
 SEXUALITY STUDIES
 CERTIFICATE**

Also available via Ecampus.

The Women, Gender, and Sexuality Studies undergraduate certificate is designed to facilitate the broad interdisciplinary study of gender and women's issues. It emphasizes the diversity of women's experience through a focus on disciplinary-based knowledge about women's lives and relationships in the many schools/departments where courses on gender are taught.

While core course work taught by the Women, Gender, and Sexuality Studies Program is required, students are expected to take the bulk of their elective course work from approved Women, Gender, and Sexuality Studies Program classes offered throughout the different academic units on campus. A total of 27 credits is required for the certificate, with at least 12 of these credits at the upper-division level.

All required course work must be taken on campus and no more than 3 credits of online elective course work can be used toward the on-campus certificate. The undergraduate certificate in Women, Gender, and Sexuality Studies is also available through Ecampus.

Core Requirements (10)

WGSS 223. *Women: Self and Society (3)

WGSS 410. Internship (3)

WGSS 414. *Systems of Oppression in Women's Lives (4)(Pending approval 3 to 4 credits)

The remaining 17 credits can be taken from elective courses offered by the Women, Gender, and Sexuality Studies Program and from approved program courses offered in any school/department at OSU. However, at least 12 of these 17 credits must consist of approved program courses. An approved program course is one that has a focus on gender and/or women's issues, is taught in a unit other than the Women, Gender, and Sexuality Studies Program, and has been approved as fulfilling the requirements of

a Women, Gender, and Sexuality Studies Program course. See the electives for the Women, Gender, and Sexuality Studies major.

No more than 3 credits of WGSS 402 Independent Study, and WGSS 410 Internship, may count toward the Women, Gender, and Sexuality Studies undergraduate certificate.

■ ANTHROPOLOGY COURSES

ANTH 110. *INTRODUCTION TO CULTURAL ANTHROPOLOGY (3). Investigates cultural adaptation and change in different environmental and historical contexts. Compares the means by which cultures solve common human problems. Shows similarities and differences throughout the world in systems of values, family, religion, economics, and politics. Students are asked to consider future cultural conditions. Uses a video format. (SS) (Bacc Core Course)

ANTH 199. SPECIAL STUDIES (1-3). This course is repeatable for a maximum of 3 credits.

ANTH 208. *WESTERN CULTURE STUDY ABROAD (3). Overseas study of the history and contemporary form of important features of Western culture. Based on at least 10 weeks of studying abroad. **CROSSLISTED** as LING 208. (Bacc Core Course) **PREREQS:** Must be arranged with instructor prior to registration. Enrolled in Study Abroad program.

ANTH 209. *CULTURAL DIVERSITY STUDY ABROAD (3). Overseas study of non-Western cultures. Based on at least 10 weeks of studying abroad. **CROSSLISTED** as LING 209. (Bacc Core Course) **PREREQS:** Must be arranged with instructor prior to registration. Enrolled in Study Abroad program.

ANTH 210. *COMPARATIVE CULTURES (3). Compares the cultures originating in Asia, Africa, and precolonial Australia, Oceania, and North and South America. Introduces method and theory for comparative cultural analysis from historical, ethnographic, and indigenous viewpoints. Considers the contribution and influences of minority and ethnic groups on the mainstream culture in nation states. Summarizes the characteristics of cultures in the major world culture areas. (Bacc Core Course)

ANTH 230. TIME TRAVELERS (3). Introduction to the historical developments of modern archaeology. The often romanticized public image of archaeology will be contrasted with scientific reality. The nature of archaeological data, modern field methods, analytical techniques, and theoretical background will be reviewed in order to illustrate how the unwritten record of human cultural behavior is deciphered. (SS)

ANTH 240. INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY (3). An investigation of the origin of modern people (*Homo sapiens*) in a historical context; review of key discoveries and current research on the relationships between humans and other primates; exploration of contrasting views of humanity. (SS)

ANTH 251. *LANGUAGE IN THE USA (3). Examines the linguistic aspects of ethnic, class, and gender differences in the United States of America, with a focus on language attitudes. Uses both oral and written materials and quantitative and qualitative approaches. (Bacc Core Course) **PREREQS:** Freshman and sophomore standing.

ANTH 251H. *LANGUAGE IN THE USA (3). Examines the linguistic aspects of ethnic, class, and gender differences in the United States of America, with a focus on language attitudes. Uses both oral and written materials and quantitative and qualitative approaches. (Bacc Core Course) **PREREQS:** Freshman and sophomore standing. Honors College approval required.

ANTH 311. *PEOPLES OF THE WORLD-NORTH AMERICA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) **PREREQS:** ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 311H. *PEOPLES WORLD-NORTH AMERICA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) **PREREQS:** ANTH 110 or ANTH 210 or completion of social processes and institutions requirement and Honors College approval required.

ANTH 312. *PEOPLES OF THE WORLD-EUROPE (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (Bacc Core Course) **PREREQS:** ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 312H. *PEOPLES OF THE WORLD-EUROPE (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (Bacc Core Course) **PREREQS:** ANTH 110 or ANTH 210 or completion of social processes and institutions requirement. Honors College approval required.

ANTH 313. *PEOPLES OF THE WORLD-LATIN AMERICA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) **PREREQS:** ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 314. *PEOPLES OF THE WORLD-MIDDLE EAST (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) **PREREQS:** ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 314H. *PEOPLES OF THE WORLD-MIDDLE EAST (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) **PREREQS:** ANTH 110 or ANTH 210 or completion of social

processes and institutions requirement. Honors College approval required.

ANTH 315. *PEOPLES OF THE WORLD-AFRICA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) **PREREQS:** ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 316. *PEOPLES OF THE WORLD-SOUTH AND SOUTHEAST ASIA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) **PREREQS:** ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 317. *PEOPLES OF THE WORLD-PACIFIC (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) **PREREQS:** ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 318. *PEOPLES OF THE WORLD-CHINA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) **PREREQS:** ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 319. *PEOPLES OF THE WORLD-JAPAN AND KOREA (3). Survey of peoples around the world. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world. Emphasis is placed on dispelling stereotypic images, both past and present. (NC) (Bacc Core Course) **PREREQS:** ANTH 110 or ANTH 210 or completion of social processes and institutions requirement.

ANTH 330. *EVOLUTION OF PEOPLE, TECHNOLOGY, AND SOCIETY (3). Overview of the evolution and prehistory of the human species, including the development and interaction of human biology, technology, and society. (SS) (Bacc Core Course) **PREREQS:** Sophomore standing.

ANTH 331. MESOAMERICAN PREHISTORY (3). Explores the archaeology and prehistory of Mesoamerica from Paleo-Indian times through the Olmec, Maya, Zapotec, and Aztec cultures to the Spanish Conquest. Themes include the transition to settled agriculture, emergence of social inequality and political authority, the role of the natural environment, and the rich cultural heritage of Mesoamerican civilizations. **PREREQS:** Students need to understand the fundamentals of archaeology.

ANTH 345. *BIOLOGICAL AND CULTURAL CONSTRUCTIONS OF RACE (3). The social, cultural, and historical context of human biological

diversity in the United States. Students become acquainted with primary resources relating to biological diversity within the modern human species and will offer a critical perspective on racial/ethnic categorization of that diversity. (Bacc Core Course) **PREREQS:** Sophomore standing and completion of one anthropology course.

ANTH 345H. *BIOLOGICAL AND CULTURAL CONSTRUCTIONS OF RACE (3). The social, cultural, and historical context of human biological diversity in the United States. Students become acquainted with primary resources relating to biological diversity within the modern human species and will offer a critical perspective on racial/ethnic categorization of that diversity. (Bacc Core Course) **PREREQS:** Sophomore standing and completion of one anthropology course and Honors College approval required.

ANTH 350. LANGUAGE, CULTURE AND SOCIETY (4). An examination of the communicative functions of language and the role of language in the construction of social relations. Covers the origins, structure, and diversity of language. Explores the relationships between language and thought and the use of linguistic models in the study of culture. (SS) **PREREQS:** 3 credits of social science.

ANTH 352. *ANTHROPOLOGY, HEALTH, AND ENVIRONMENT (3). Major threats to human health are increasingly linked to global environmental changes. This course engages medical and environmental anthropology research to critically explore the values, meanings and ideologies associated with ecological and public health issues in given localities throughout the world. (Bacc Core Course)

ANTH 361. FOOD STUDIES IN A SOCIAL JUSTICE PERSPECTIVE (4). Contemporary food systems are examined from a cultural and social justice perspective. The human right to food as recognized by the United Nations serves as the justice grounding point. Impediments to realizing the right to food will be examined in national and international contexts. Lec/rec.

ANTH 370. ^CULTURAL ANTHROPOLOGY: CONCEPTS AND METHODS (4). Students learn the basic theories, concepts, and methods of cultural anthropology. Designed for anthropology majors, the class involves students in understanding, critiquing, and participating in the approaches and issues central to anthropologists past and present. As a writing intensive course, students practice conducting and writing up interviews, critiquing anthropological issues, and analyzing real-life material for cultural values and power differences. Students write a major research paper on a topic of interest relevant to anthropology, using anthropology sources. (Writing Intensive Course) **PREREQS:** ANTH 110 or completion of social processes and institutions requirement.

ANTH 371. RESEARCH METHODS IN CULTURAL ANTHROPOLOGY (4). Designed for anthropology majors, this course involves students in learning about and practicing anthropological research methods. Students practice ethnographic fieldwork by conducting participant observation and interviews, writing fieldnotes, analyzing real-life material for cultural values and power differences, and writing up a research paper. **PREREQS:** ANTH 110

ANTH 373. APPROACHES TO SOCIAL JUSTICE (3). Students study various ways of thinking about social justice and evaluate these in case studies and current events. As a basis for the Social Justice minor, students write a research paper on the theoretical and practical aspects of a social justice issue. **CROSSLISTED** as ES 373, WGSS 373, WLC 373.

ANTH 380. *CULTURES IN CONFLICT (3). Communication and commerce draw East and West, industrial and pre-industrial, state and stateless societies together. Beliefs and values clash and complement one another. Explores

the processes of intercultural contact, cross-cultural interaction, and the consequences of global penetration of European-American culture. Evaluates theoretical explanations for cultural persistence and change. (SS) (Bacc Core Course) **PREREQS:** ANTH 110 or completion of non-Western cultures requirement.

ANTH 380H. *CULTURES IN CONFLICT (3). Communication and commerce draw East and West, industrial and pre-industrial, state and stateless societies together. Beliefs and values clash and complement one another. Explores the processes of intercultural contact, cross-cultural interaction, and the consequences of global penetration of European-American culture. Evaluates theoretical explanations for cultural persistence and change. (SS) (Bacc Core Course) **PREREQS:** ANTH 110 or completion of non-Western cultures requirement. Honors College approval required.

ANTH 383. *INTRODUCTION TO MEDICAL ANTHROPOLOGY (3). Examines human health and healing systems from evolutionary and cross-cultural perspectives. Using a case study approach, this class explores individual- and population-level experiences of illness and healing, while providing students with the tools to evaluate global disease patterns and international health promotion and education programs. (Bacc Core Course)

ANTH 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ANTH 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

ANTH 401. RESEARCH (1-6). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 402. INDEPENDENT STUDY (1-6). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 403. THESIS (1-6). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 405. READING AND CONFERENCE (1-6). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 405H. READING AND CONFERENCE (1-6). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

ANTH 406. PROJECTS (1-6). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 407. SEMINAR (1-3). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 407H. SEMINAR (1-3). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

ANTH 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

ANTH 410. INTERNSHIP (1-16). Opportunities for students at junior and first-term senior class levels to take advantage of off-campus work experiences during regular term sessions for academic credit. Allows students to broaden and deepen their understanding and appreciation of the value of their academic activity. Internship is supervised and evaluated by individual faculty members. This course is repeatable for a maximum of 16 credits. **PREREQS:** 6 credits of anthropology.

ANTH 420. WORLD CULTURES—TOPICS (4). In-depth study of world cultures. Early settlement, cultural history, ecological adaptations, population, family and gender roles, religious ideology, political and economic systems, modern social changes, and contemporary issues pertaining to indigenous peoples in culturally distinct regions of the world.

Emphasis is placed on dispelling stereotypic images, both past and present. Includes three hours of lecture and one hour of seminar. Cannot be taken if student is taking or has completed the 300-level course in the same geographical area. Graded P/N. **PREREQS:** 9 credits of social science including 3 credits of anthropology or graduate standing.

ANTH 421. ANALYSIS OF LITHIC TECHNOLOGIES (3). Covers the principles, procedures, and purpose of archaeological lithic analysis and the anthropological interpretation of lithic technologies used by prehistoric hunter-gatherers. **PREREQS:** ANTH 230

ANTH 422. HISTORIC MATERIALS ANALYSIS (3). Introduction to the analytical and descriptive methods and techniques used by historical archeologists to study late 18th through 20th century machine and handmade objects. **PREREQS:** ANTH 230

ANTH 423. METHOD AND THEORY IN HISTORICAL ARCHAEOLOGY (3). Examines the origins and growth of historical archaeology in the Americas. Students will critically learn about the linkages with history and anthropology and explore the theoretical underpinnings of historical archaeology.

ANTH 424. SETTLEMENT ARCHAEOLOGY (3). Explores the evolution of the theoretical underpinnings and field methods of settlement archaeology as well as the refinement of the meaning of "settlement archaeology" over time.

ANTH 425. CERAMIC ANALYSIS IN ARCHAEOLOGY (3). Provides fundamental practical skills and theoretical perspectives for the analysis and interpretation of archaeological ceramics. On the practical side, students will learn both basic and advanced techniques for describing and analyzing pottery assemblages encountered by field archaeologists. On the theoretical side, the course will explore the diversity of research questions in which pottery can play a critical role, as well as the various ways in which ceramic data can be interpreted. Lec/lab. **PREREQS:** ANTH 230

ANTH 430. TOPICS IN ARCHAEOLOGY (1-4). Recent advances in archaeology and their application to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 99 credits. **PREREQS:** (ANTH 230 or ANTH 330) and /or equivalent.

ANTH 432. *THE ARCHAEOLOGY OF DOMESTICATION AND URBANIZATION (3). Reviews the development of culture in the Old and New Worlds with special emphasis placed on the when, where, and how of early domestication of plants and animals. Examines the process of urbanization. (Bacc Core Course) **PREREQS:** 6 credits of anthropology.

ANTH 433. FIRST AMERICANS, LAST FRONTIERS (3). The initial human occupation of the Western Hemisphere is explored with particular emphasis on northeast Siberian cultural progenitors, routes and timing of entry into the Americas, population dispersal theory, the paleoenvironmental record, and human cultural responses to the conditions of the last frontier prior to 8,000 years ago. **PREREQS:** 6 credits of anthropology.

ANTH 434. NORTH AMERICA AFTER THE ICE AGE (3). The development of regional hunting and gathering adaptive strategies in North America from 8000 B.C. to the historic period are examined against a backdrop of changing climate, natural disasters, population growth, and human invention. **PREREQS:** ANTH 433 or 6 credits of anthropology.

ANTH 435. CULTURAL RESOURCES: POLICY AND PROCEDURES (3). Description and analysis of requirements and demands of cultural resource management. Historical development of cultural resource laws and appropriate field

techniques and strategies to implement legislation. **PREREQS:** ANTH 230 and /or instructor approval required.

ANTH 436. NORTHWEST PREHISTORY (3). Materials and theories relating to prehistoric aboriginal cultures of the Northwest. Evaluation of different theories on the origins and adaptations of prehistoric populations to ecological zones within the Northwest; comparisons of the cultural development through prehistoric times of the Columbia Plateau, intermontane and coastal zones of Oregon, Washington, and British Columbia. Special emphasis on the theories of origin, subsequent development of prehistoric cultures in the Northwest, and the present circumstances of archaeology in the Northwest. **PREREQS:** 6 credits of anthropology.

ANTH 437. GEOARCHAEOLOGY (3). Provides an introduction to geoarchaeological concepts and methods. Emphasis will be placed on the use of geoscientific perspectives and datasets to solve archaeological problems. **PREREQS:** ANTH 230

ANTH 438. ARCHAEOLOGY FIELD SCHOOL (10-12). Practical skills, archaeological methods and techniques including use of equipment, site surveying and mapping techniques, site excavation strategies, record keeping, field cataloging, report writing, and field camp management. **PREREQS:** 6 credits of anthropology and instructor approval required.

ANTH 439. ARCHAEOLOGICAL STUDY OF FORAGING LIFEWAYS (3). Provides an in-depth review of the concepts and approaches employed to study cultural aspects of past foraging peoples using archaeological research methods and theoretical perspectives.

ANTH 440. TOPICS IN PHYSICAL ANTHROPOLOGY (1-4). Recent advances in physical anthropology and their applications to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. **PREREQS:** (ANTH 240 or ANTH 330) and /or general biology or equivalent.

ANTH 441. HUMAN EVOLUTION (4). The evolutionary history of the primate order as it is represented by fossils of the Paleocene through the Holocene. Special attention given to development of the Hominoids in the Miocene, the Australopithecines in the Pliocene, and members of the genus Homo in the Pleistocene. Lec/lab. **PREREQS:** ((ANTH 110 or ANTH 210) and ANTH 240) and /or general biology or equivalent.

ANTH 442. BIOCULTURAL PERSPECTIVES ON HUMAN BIOLOGY (4). Overview of human biology and its various subfields, applications of human biology in areas of nutrition, health, growth, adaptation, and demography. Understanding adaptive variations among populations and individuals in responses to environment, disease, and nutritional stress. **PREREQS:** ANTH 240 and /or ANTH 340 or general biology or equivalent.

ANTH 443. HUMAN OSTEOLOGY LAB (4). Identification and analysis of human skeletal materials in an archaeological context. **PREREQS:** ANTH 240

ANTH 444. NUTRITIONAL ANTHROPOLOGY (4). Examines human nutrition and food systems from comparative, biocultural and evolutionary perspectives. Long-term evolutionary processes are examined within an ecological framework as significant factors affecting human biology and susceptibility to diet-related disease. An emphasis on anthropological methods in nutritional assessment including anthropometry, paleodietary assessment and nutritional participant-observation will provide students with the tools to evaluate human diet from skeletal and fossil collections through contemporary cross-cultural populations. **PREREQS:** (ANTH 110 and (ANTH 240 or ANTH 330))

ANTH 446. FORENSIC ANTHROPOLOGY (3). Concepts and practices in the use of anthropology in legal matters and police cases, especially

involving identification of human remains. Offered alternate years. **PREREQS:** ANTH 443 or equivalent.

ANTH 449. BIOCULTURAL PERSPECTIVES ON HUMAN REPRODUCTION (4). Examines human reproduction and sexuality from the perspective of the New Biocultural Synthesis, a theoretical approach in anthropology that examines the interface of evolved biological, sociocultural and political-economic factors that interact to produce complex human behaviors and biologies. Topics are presented from a life-history perspective where questions related to human reproduction and evolutionary history are examined across the lifespan from mating and conception through elderhood and menopause. Lec/lab.

ANTH 450. TOPICS IN LINGUISTIC ANTHROPOLOGY (1-4). Recent advances in the study of culture and communication and their application to special fields of knowledge. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. **PREREQS:** 3 credits of linguistic anthropology.

ANTH 452. FOLKLORE AND EXPRESSIVE CULTURE (4). The study of folklore/popular culture in its social and historical context. Examines content, structure, communicative potential, and performative aspects of various forms of oral and written expression. Includes familiarization with the analysis of myths, legends, tall tales, proverbs, riddles, and play languages. (FA) **PREREQS:** 3 credits of social science.

ANTH 461. NEUROANTHROPOLOGY (4). The emerging interdisciplinary field of neuroanthropology combines anthropological understandings of human biological and cultural variation with recent findings in neuroscience. Key topics include socialization and enculturation, addiction, ritual, depression, and psychiatric disorders. **PREREQS:** ANTH 240 or ANTH 345 or ANTH 383

ANTH 463. ANTHROPOLOGICAL RESEARCH: PROFESSIONAL AND ETHICAL CONDUCT (4). Examines the history and scope of professional and ethical guidelines in anthropology; critically evaluate major issues involving ethics, confidentiality, and anonymity that academic and professional anthropologists face during their careers. **PREREQS:** At least 6 credits of anthropology courses or graduate standing.

ANTH 465. POPULAR CULTURE: AN ANTHROPOLOGICAL PERSPECTIVE (4). Introduces some of the debates and issues swirling around analyses of late twentieth-, early twenty-first century popular/mass/public/mediated/commercial culture. Learning about its pervasive forms, its origins and effects, how we are situated in it, and how it situates us is vital to understanding the changes that characterize our postmodern world.

ANTH 466. *RURAL ANTHROPOLOGY (4). Concentrates on study of the socio-cultural dynamics in rural communities as they develop in national and global contexts of political and economic change. Includes anthropological readings on rural issues in domestic and international contexts and a research paper on a contemporary rural issue. (Bacc Core Course) **PREREQS:** 3 credits of social science.

ANTH 468. ANTHROPOLOGY OF CHILDHOOD (4). Ethnographies of the organization of children's lives in different cultural contexts are combined with readings on the conceptual and methodological genealogies that have constructed children as research subjects in anthropology. **PREREQS:** 3 credits of social science

ANTH 470. TOPICS IN CULTURAL ANTHROPOLOGY (1-16). Covers recent advances in cultural anthropology and their applications to the field. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. **PREREQS:** 3 credits of social science.

ANTH 471. CASH, CLASS AND CULTURE: HUNTER-GATHERERS TO CAPITALISM (4). Students explore the cultural and social effects of capitalism in the contemporary world within the larger question of how economics and society intersect and change over time. Special emphases are put on food and work, but students explore the linkages of global forces and local life in a variety of ways. **PREREQS:** 3 credits of social science.

ANTH 472. CONTEMPORARY INDIAN ISSUES (4). Examines the background of Indian treaties and reservations with discussions of present issues such as health care, education, the Indian Child Welfare Act, fishing rights, and religious freedom. Issues are discussed in class with considerable class participation and some role playing. **PREREQS:** 3 credits of social science.

ANTH 473. *GENDER, ETHNICITY, AND CULTURE (4). Study of the practices and ideologies of gender as they intersect with those of ethnicity, race, class, and culture. (Bacc Core Course) **PREREQS:** 3 credits of social science.

ANTH 474. CROSS-CULTURAL HEALTH AND HEALING (4). A comprehensive overview of current issues in global health with particular emphasis on social, cultural, and behavioral interventions. Explores issues of health and development in the international context, focusing on such issues as inequality, structural adjustment, economic development, and community-based approaches to health care, specific cultural beliefs and practices, and the influence of people's perceptions of health, illness, and healing.

ANTH 477. ECOLOGICAL ANTHROPOLOGY (4). Examines past and present interactions between humans and their environments. Emphasizes the concept of system and process of human adaptation. **PREREQS:** Upper-division standing and 3 credits of social science.

ANTH 478. ANTHROPOLOGY OF TOURISM (4). Examines the cultural practices and impacts of tourism in relation to both host and guest communities, and travel itself as part of culture. We will explore theories of tourism and what role anthropology can play in influencing the industry and tourist and host relationships. **PREREQS:** 3 credits of social science.

ANTH 479. ANTHROPOLOGY OF MIGRATION (4). Focuses on the multiple aspects of population movements around the globe. Investigates the history of recent human migration; current theories, trends and policies; as well as issues of immigrant incorporation and anti-immigrant politics. **PREREQS:** 3 credits of social science.

ANTH 480. TOPICS IN APPLIED ANTHROPOLOGY (1-4). Recent advances in applied anthropology and their application to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. **PREREQS:** 3 credits of social science.

ANTH 481. *NATURAL RESOURCES AND COMMUNITY VALUES (3). Investigates relations between human communities and the values of community members. Resource issues integrate concepts from social science, economics, and ecology. (Bacc Core Course) **PREREQS:** 3 credits of social science.

ANTH 482. *ANTHROPOLOGY OF INTERNATIONAL DEVELOPMENT (4). Examines the ideological and theoretical bases of world assistance programs and their effects on different sectors and classes, including women. Causes of world hunger in terms of agronomic, mainstream economic and radical economic paradigms are developed and contrasted. (Bacc Core Course) **PREREQS:** Senior standing.

ANTH 483. ADVANCED MEDICAL ANTHROPOLOGY (4). An overview of anthropological studies of the health of human communities from a biological and behavioral perspective. Topics include prehistory of disease,

cultural perspectives on causation of disease and approaches to healing; anthropological approach to international health issues; and case studies. **PREREQS:** (ANTH 110 or ANTH 210) and (ANTH 240 or ANTH 330)

ANTH 484. *WEALTH AND POVERTY (3). Summarizes the distribution of wealth observed cross-culturally and through time. Determines the relation between wealth distribution and economic productivity. Shows the impact of industrialization and economic wealth distribution in Western civilization and cross-culturally. Evaluates how cultural practices affect wealth distribution in Western and non-Western societies. (Bacc Core Course) **PREREQS:** 3 credits of social science.

ANTH 485. CAPSTONE IN SOCIAL JUSTICE (2). Working with an advisor from the Social Justice minor, students conduct research to synthesize and extend analysis of a particular social justice issue, building on three previous papers or projects. Results are presented in a 10-15 page paper and a public poster, presentation or website. CROSSLISTED as ES 485, WGSS 485, WLC 485. This course is repeatable for a maximum of 4 credits. **PREREQS:** (ANTH 373 or ES 373 or WGSS 373 or WLC 373) and (ANTH 410 or ES 410 or WGSS 410 or WLC 410)

ANTH 486. ANTHROPOLOGY OF FOOD (2-6). The role of food in human cultures, both past and present. Includes discussion of different food procurement styles, social movements and the political economy of food. Looks at the symbolic aspects of food as well as its relationship with the environment. This course is repeatable for a maximum of 6 credits. **PREREQS:** 3 credits of social science.

ANTH 487. ^LANGUAGE IN GLOBAL CONTEXT (4). Deals with practical uses of linguistics in the global political arena. Explores use of official vs. unofficial languages, language standardization, the preservation of dying languages; problems in learning first and second languages, and the relevance of linguistic knowledge to education and cross-cultural communication. (Writing Intensive Course) **PREREQS:** (ANTH 251 or ANTH 350) and /or some knowledge of linguistic structure or graduate standing.

ANTH 488. *BUSINESS AND ASIAN CULTURE (3). Examines the mutual influence of business organization and culture in Asia. Starts with the premise that a business organization contains a set of values. These values are analyzed as to their effect on society in general and some Asian societies in particular, including Japan, China, Korea, India, and Indonesia. A second area of investigation is the influence of Asian societies on the organization and practice of Western businesses both in Asia and the West. (Bacc Core Course) **PREREQS:** 3 credits of social science.

ANTH 489. ANTHROPOLOGY OF BUSINESS (3). Students are exposed to the methods and perspectives used by anthropologists working in business. How does anthropology contribute in such areas as product development, workplace organization and communication, marketing and interfacing with technology? Students do a lengthy project in one of these areas and present it as if in a corporate setting.

ANTH 490. TOPICS IN METHODOLOGY (1-4). Recent advances in anthropological methodologies and their application to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. **PREREQS:** 6 credits of anthropology or graduate standing.

ANTH 492. ARCHAEOLOGICAL LABORATORY METHODS (1-3). Provides information on the basics of archaeological laboratory work. Students learn the day-to-day operations of a lab, how to classify and catalog artifacts, and how to do artifact analysis, research hypothesis. **PREREQS:** 6 credits of anthropology or graduate standing.

ANTH 494. LINGUISTIC ANTHROPOLOGY LAB (1-3). A training and practicum in the elicitation, transcription and analysis of language. **PREREQS:** ANTH 350 and /or graduate standing.

ANTH 497. ARCHAEOLOGICAL FIELD METHODS (1-3). Archaeological field strategies emphasizing reconnaissance and survey. Application of field equipment and project management.

ANTH 498. ORAL TRADITIONS (1-3). Method of examining unwritten culture preserved in speech, including local history, folklore, and songs passed from one generation to another. May include the use of life history, genealogy, and other means of collecting information. Attention is given to ethics, legal issues, and the process of transcription. **PREREQS:** ANTH 350 and ANTH 452* or graduate standing

ANTH 499. SPECIAL TOPICS IN ANTHROPOLOGY (1-16). This course is repeatable for a maximum of 16 credits.

ANTH 499H. SPECIAL TOPICS IN ANTHROPOLOGY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

ANTH 501. RESEARCH (1-6). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 502. INDEPENDENT STUDY (1-6). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 503. THESIS (1-12). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

ANTH 505. READING AND CONFERENCE (1-6). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 506. PROJECTS (1-6). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 507. SEMINAR (1-3). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

ANTH 510. GRADUATE INTERNSHIP (1-16). Opportunities for students at junior and first-term senior class levels to take advantage of off-campus work experiences during regular term sessions for academic credit. Allows students to broaden and deepen their understanding and appreciation of the value of their academic activity. Internship is supervised and evaluated by individual faculty members. This course is repeatable for a maximum of 16 credits. **PREREQS:** 6 credits of anthropology.

ANTH 521. ANALYSIS OF LITHIC TECHNOLOGIES (3). Covers the principles, procedures, and purpose of archaeological lithic analysis and the anthropological interpretation of lithic technologies used by prehistoric hunter-gatherers. This course is repeatable for a maximum of 6 credits. **PREREQS:** ANTH 230.

ANTH 522. HISTORIC MATERIALS ANALYSIS (3). Introduction to the analytical and descriptive methods and techniques used by historical archeologists to study late 18th through 20th century machine and handmade objects. **PREREQS:** ANTH 230

ANTH 523. METHOD AND THEORY IN HISTORICAL ARCHAEOLOGY (3). Examines the origins and growth of historical archaeology in the Americas. Students will critically learn about the linkages with history and anthropology and explore the theoretical underpinnings of historical archaeology.

ANTH 524. SETTLEMENT ARCHAEOLOGY (3). Explores the evolution of the theoretical

underpinnings and field methods of settlement archaeology as well as the refinement of the meaning of "settlement archaeology" over time.

ANTH 525. CERAMIC ANALYSIS IN ARCHAEOLOGY (3). Provides fundamental practical skills and theoretical perspectives for the analysis and interpretation of archaeological ceramics. On the practical side, students will learn both basic and advanced techniques for describing and analyzing pottery assemblages encountered by field archaeologists. On the theoretical side, the course will explore the diversity of research questions in which pottery can play a critical role, as well as the various ways in which ceramic data can be interpreted. Lec/lab. **PREREQS:** ANTH 230

ANTH 530. TOPICS IN ARCHAEOLOGY (1-4). Recent advances in archaeology and their application to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. **PREREQS:** ANTH 230 or ANTH 330 or equivalent.

ANTH 531. ARCHAEOLOGICAL THEORY (3). Historical development of archaeological field techniques and theoretical concepts with an emphasis on modern method and theory in North American archaeology. **PREREQS:** ANTH 230 or equivalent.

ANTH 533. FIRST AMERICANS, LAST FRONTIERS (3). The initial human occupation of the Western Hemisphere is explored with particular emphasis on northeast Siberian cultural progenitors, routes and timing of entry into the Americas, population dispersal theory, the paleoenvironmental record, and human cultural responses to the conditions of the last frontier prior to 8,000 years ago. **PREREQS:** 6 credits of anthropology.

ANTH 534. NORTH AMERICA AFTER THE ICE AGE (3). The development of regional hunting and gathering adaptive strategies in North America from 8000 B.C. to the historic period are examined against a backdrop of changing climate, natural disasters, population growth, and human invention. **PREREQS:** ANTH 433 or 6 credits of anthropology.

ANTH 535. CULTURAL RESOURCES: POLICY AND PROCEDURES (3). Description and analysis of requirements and demands of cultural resource management. Historical development of cultural resource laws and appropriate field techniques and strategies to implement legislation. **PREREQS:** ANTH 431 or instructor approval required

ANTH 536. NORTHWEST PREHISTORY (3). Materials and theories relating to prehistoric aboriginal cultures of the Northwest. Evaluation of different theories on the origins and adaptations of prehistoric populations to ecological zones within the Northwest; comparisons of the cultural development through prehistoric times of the Columbia Plateau, intermontane and coastal zones of Oregon, Washington, and British Columbia. Special emphasis on the theories of origin, subsequent development of prehistoric cultures in the Northwest, and the present circumstances of archaeology in the Northwest. **PREREQS:** 6 credits of anthropology.

ANTH 537. GEOARCHAEOLOGY (3). Provides an introduction to geoarchaeological concepts and methods. Emphasis will be placed on the use of geoscientific perspectives and datasets to solve archaeological problems. **PREREQS:** ANTH 230

ANTH 538. ARCHAEOLOGY FIELD SCHOOL (1-10). Practical skills, archaeological methods and techniques including use of equipment, site surveying and mapping techniques, site excavation strategies, record keeping, field cataloging, report writing, and field camp management. **PREREQS:** 6 credits of anthropology and instructor approval required.

ANTH 539. ARCHAEOLOGICAL STUDY OF FORAGING LIFEWAYS (3). Provides an in-depth

review of the concepts and approaches employed to study cultural aspects of past foraging peoples using archaeological research methods and theoretical perspectives.

ANTH 540. TOPICS IN PHYSICAL ANTHROPOLOGY (1-4). Recent advances in physical anthropology and their applications to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. **PREREQS:** ANTH 240 or ANTH 330 or general biology or equivalent

ANTH 541. HUMAN EVOLUTION (4). The evolutionary history of the primate order as it is represented by fossils of the Paleocene through the Holocene. Special attention given to development of the Hominoids in the Miocene, the Australopithecines in the Pliocene, and members of the genus Homo in the Pleistocene. Lec/lab. **PREREQS:** (ANTH 110 or ANTH 210) and ANTH 240

ANTH 542. BIOCULTURAL PERSPECTIVES ON HUMAN BIOLOGY (4). Overview of human biology and its various sub fields, applications of human biology in areas of nutrition, health, growth, adaptation, and demography. Understanding adaptive variations among populations and individuals in responses to environment, disease, and nutritional stress. **PREREQS:** ANTH 240 and ANTH 240 or ANTH 340 or general biology or equivalent.

ANTH 543. HUMAN OSTEOLOGY (4). Identification and analysis of human skeletal materials in an archaeological context. **PREREQS:** ANTH 240

ANTH 544. NUTRITIONAL ANTHROPOLOGY (4). Examines human nutrition and food systems from comparative, biocultural and evolutionary perspectives. Long-term evolutionary processes are examined within an ecological framework as significant factors affecting human biology and susceptibility to diet-related disease. An emphasis on anthropological methods in nutritional assessment including anthropometry, paleodietary assessment and nutritional participant-observation will provide students with the tools to evaluate human diet from skeletal and fossil collections through contemporary cross-cultural populations. **PREREQS:** ANTH 110 and (ANTH 240 or ANTH 330)

ANTH 547. METHODS IN FOOD IN CULTURE AND SOCIAL JUSTICE STUDIES (4). Exposes graduate students to the methodological approaches and methods used in guiding empirical research on the socio-cultural aspects of food, focusing on vulnerable populations, food security, procurement, foodways, disasters, and climate change. Methodological approaches and methods as evidenced in peer-reviewed publications is the grounding for the course. **PREREQS:** Graduate standing.

ANTH 549. BIOCULTURAL PERSPECTIVES ON HUMAN REPRODUCTION (4). Examines human reproduction and sexuality from the perspective of the New Biocultural Synthesis, a theoretical approach in anthropology that examines the interface of evolved biological, sociocultural and political-economic factors that interact to produce complex human behaviors and biologies. Topics are presented from a life-history perspective where questions related to human reproduction and evolutionary history are examined across the lifespan from mating and conception through elderhood and menopause. Lec/lab.

ANTH 550. TOPICS IN LINGUISTIC ANTHROPOLOGY (1-4). Recent advances in the study of culture and communication and their application to special fields of knowledge. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. **PREREQS:** 3 credits of linguistic anthropology.

ANTH 551. LINGUISTIC ANTHROPOLOGY (4). The study of language in social context including the relationships between language and

age, gender, personality, religion, ethnicity and social class. Examines pidgins, creoles, dialects, genres and the processes of language change. **PREREQS:** ANTH 251 or ANTH 350 or graduate standing.

ANTH 552. FOLKLORE AND EXPRESSIVE CULTURE (4). The study of folklore/popular culture in its social and historical context. Examines content, structure, communicative potential, and performative aspects of various forms of oral and written expression. Includes familiarization with the analysis of myths, legends, tall tales, proverbs, riddles, and play languages. **PREREQS:** ANTH 251 or ANTH 350 or graduate standing. **COREQS:** ANTH 598

ANTH 561. NEUROANTHROPOLOGY (4). The emerging interdisciplinary field of neuroanthropology combines anthropological understandings of human biological and cultural variation with recent findings in neuroscience. Key topics include socialization and enculturation, addiction, ritual, depression, and psychiatric disorders. **PREREQS:** ANTH 240 or ANTH 345 or ANTH 383

ANTH 563. ANTHROPOLOGICAL RESEARCH: PROFESSIONAL AND ETHICAL CONDUCT (4). Examines the history and scope of professional and ethical guidelines in anthropology; critically evaluate major issues involving ethics, confidentiality, and anonymity that academic and professional anthropologists face during their careers. **PREREQS:** At least 6 credits of anthropology courses or graduate standing.

ANTH 565. POPULAR CULTURE: AN ANTHROPOLOGICAL PERSPECTIVE (4). Introduces some of the debates and issues swirling around analyses of late twentieth-, early twenty-first century popular/mass/public/mediated/commercial culture. Learning about its pervasive forms, its origins and effects, how we are situated in it, and how it situates us is vital to understanding the changes that characterize our postmodern world.

ANTH 566. RURAL ANTHROPOLOGY (4). Concentrates on study of the socio-cultural dynamics in rural communities as they develop in national and global contexts of political and economic change. Includes anthropological readings on rural issues in domestic and international contexts and a research paper on a contemporary rural issue. **PREREQS:** 3 credits of social science.

ANTH 567. AGRI-FOOD MOVEMENTS (4). Investigates the origins and contemporary status of producer and consumer food movements including, but not limited to, organics, agricultural labor movements, animal welfare, vegetarian and vegan movements, farmers' markets, and permaculture.

ANTH 568. ANTHROPOLOGY OF CHILDHOOD (4). Ethnographies of the organization of children's lives in different cultural contexts are combined with readings on the conceptual and methodological genealogies that have constructed children as research subjects in anthropology. **PREREQS:** 3 credits of social science

ANTH 570. TOPICS IN CULTURAL ANTHROPOLOGY (1-16). Covers recent advances in cultural anthropology and their applications to the field. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. **PREREQS:** 3 credits of social science.

ANTH 571. CASH, CLASS AND CULTURE: HUNTER-GATHERERS TO CAPITALISM (4). Students explore the cultural and social effects of capitalism in the contemporary world within the larger question of how economics and society intersect and change over time. Special emphases are put on food and work, but students explore the linkages of global forces and local life in a variety of ways. **PREREQS:** 3 credits of social science.

ANTH 572. CONTEMPORARY INDIAN ISSUES (4). Examines the background of Indian treaties and reservations with discussions of present issues such as health care, education, the Indian Child Welfare Act, fishing rights, and religious freedom. Issues are discussed in class with considerable class participation and some role playing. **PREREQS:** 3 credits of social science.

ANTH 573. GENDER, ETHNICITY, AND CULTURE (3). Study of the practices and ideologies of gender as they intersect with those of ethnicity, race, class, and culture. **PREREQS:** 3 credits of social science.

ANTH 574. CROSS-CULTURAL HEALTH AND HEALING (4). A comprehensive overview of current issues in global health with particular emphasis on social, cultural, and behavioral interventions. Explores issues of health and development in the international context, focusing on such issues as inequality, structural adjustment, economic development, and community-based approaches to health care, specific cultural beliefs and practices, and the influences of people's perceptions of health, illness, and healing.

ANTH 575. THEORY OF CULTURE (3). Core ideas in the discipline of anthropology. Examination of the contributions to anthropological method and theory of the major schools of thought in the history of anthropology. **PREREQS:** 9 credits of upper-division social science, including at least one 400-level anthropology course.

ANTH 576. ADVANCED ANTHROPOLOGICAL THEORY SEMINAR (3). Investigates theories used by current anthropologists to explicate issues of concern in a world of movement, fragmentation, global-local interactions, individuation via state and media unequal power relations, and neoliberal agendas. Students will participate in discussions, essays and a paper that links these theories to their research topics for theses or dissertations. **PREREQS:** Must be a PhD student or have taken ANTH 575.

ANTH 577. ECOLOGICAL ANTHROPOLOGY (4). Examines past and present interactions between humans and their environments. Emphasizes the concept of system and process of human adaptation. **PREREQS:** Upper-division standing and 3 credits of social science.

ANTH 578. ANTHROPOLOGY OF TOURISM (4). Examines the cultural practices and impacts of tourism in relation to both host and guest communities, and travel itself as a part of culture. We will explore theories of tourism and what role anthropology can play in influencing the industry and tourist and host relationships. **PREREQS:** 3 credits of social science.

ANTH 579. ANTHROPOLOGY OF MIGRATION (4). Focuses on the multiple aspects of population movements around the globe. Investigates the history of recent human migration; current theories, trends and policies; as well as issues of immigrant incorporation and anti-immigrant politics. **PREREQS:** 3 credits of social science.

ANTH 580. TOPICS IN APPLIED ANTHROPOLOGY (1-4). Recent advances in applied anthropology and their application to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. **PREREQS:** 3 credits of social science.

ANTH 581. NATURAL RESOURCES AND COMMUNITY VALUES (4). Investigates relations between human communities and the values of community members. Resource issues integrate concepts from social science, economics, and ecology. **PREREQS:** 3 credits of social science.

ANTH 582. ANTHROPOLOGY OF INTERNATIONAL DEVELOPMENT (4). Examines the ideological and theoretical bases of world assistance programs and their effects on different sectors and classes, including women. Causes of world hunger in terms of agronomic, mainstream

economic and radical economic paradigms are developed and contrasted. **PREREQS:** Graduate standing.

ANTH 583. ADVANCED MEDICAL ANTHROPOLOGY (4). An overview of anthropological studies of the health of human communities from a biological and behavioral perspective. Topics include prehistory of disease, cultural perspectives on causation of disease and approaches to healing; anthropological approach to international health issues; and case studies. **PREREQS:** (ANTH 110 or ANTH 210) and (ANTH 240 or ANTH 330)

ANTH 584. WEALTH AND POVERTY (3). Summarizes the distribution of wealth observed cross-culturally and through time. Determines the relation between wealth distribution and economic productivity. Shows the impact of industrialization and economic wealth distribution in Western civilization and cross-culturally. Evaluates how cultural practices affect wealth distribution in Western and non-Western societies. **PREREQS:** 3 credits of social science.

ANTH 585. USES OF ANTHROPOLOGY (4). Examines the practical applications of anthropological knowledge in historical and contemporary contexts. Focuses on planned social change and roles of anthropologists in interdisciplinary research and nonacademic settings such as international business, industrial relations, economic and technological development, education, legal institutions, environmental change, minority relations, health care, and cultural preservation. Emphasizes relevance to public policy and ethical issues associated with applications of anthropological knowledge. **PREREQS:** 3 credits of social science.

ANTH 586. ANTHROPOLOGY OF FOOD (2-6). The role of food in human cultures, both past and present. Includes discussion of different food procurement styles, social movements and the political economy of food. Looks at the symbolic aspects of food as well as its relationship with the environment. This course is repeatable for a maximum of 6 credits. **PREREQS:** ANTH 370 recommended or graduate standing.

ANTH 587. LANGUAGE IN GLOBAL CONTEXT (4). Deals with practical uses of linguistics in the global political arena. Explores use of official vs. unofficial languages, language standardization, the preservation of dying languages; problems in learning first and second languages, and the relevance of linguistic knowledge to education and cross-cultural communication. **PREREQS:** ANTH 251 or ANTH 350 or some knowledge of linguistic structure or graduate standing.

ANTH 588. BUSINESS AND ASIAN CULTURE (3). Examines the mutual influence of business organization and culture in Asia. Starts with the premise that a business organization contains a set of values. These values are analyzed as to their effect on society in general and some Asian societies in particular, including Japan, China, Korea, India, and Indonesia. A second area of investigation is the influence of Asian societies on the organization and practice of Western businesses both in Asia and the West. **PREREQS:** 3 credits of social science.

ANTH 589. ANTHROPOLOGY OF BUSINESS (3). Students are exposed to the methods and perspectives used by anthropologists working in business. How does anthropology contribute in such areas as product development, workplace organization and communication, marketing and interfacing with technology? Students do a lengthy project in one of these areas and present it as if in a corporate setting.

ANTH 590. TOPICS IN METHODOLOGY (1-4). Recent advances in anthropological methodologies and their application to special fields of study. Topics vary from term to term. This course is repeatable for a maximum of 16 credits. **PREREQS:** 6 credits anthropology or graduate standing.

ANTH 591. ETHNOGRAPHIC METHODS (4). Cultural descriptions are produced through systematic observation, elicitation, and analysis to achieve proximity to the insider's point of view. Covers techniques of interviewing, validating, and interpreting cultural data. Allows students to practice what they have learned. **PREREQS:** 6 credits of anthropology or graduate standing.

ANTH 592. ARCHAEOLOGICAL LABORATORY METHODS (1-3). Provides information on the basics of archaeological laboratory work. Students learn the day-to-day operations of a lab, how to classify and catalog artifacts, and how to do artifact analysis. **PREREQS:** 6 credits of anthropology or graduate standing.

ANTH 593. STATISTICAL APPLICATIONS IN ANTHROPOLOGY (1-3). Develops the skills necessary to use statistical software to analyze and interpret numerical data. Covers descriptive statistics, correlation, and multivariate statistical procedures. Evaluate the adequacy of data for parametric and nonparametric statistical tests. **PREREQS:** 6 credits of anthropology or graduate standing.

ANTH 594. LINGUISTIC ANTHROPOLOGY LAB (1-3). A training and practicum in the elicitation, transcription and analysis of language. **PREREQS:** ANTH 350 or graduate standing.

ANTH 595. ANTHROPOLOGICAL RESEARCH DESIGN (4). Critical examination of research design and methodology in anthropology; analysis of methods and procedures of research in the subfields of anthropology. **PREREQS:** 9 credits of upper-division social science, including at least one 400-level anthropology course.

ANTH 597. ARCHAEOLOGICAL FIELD METHODS (1-3). Archaeological field strategies emphasizing reconnaissance and survey. Application of field equipment and project management.

ANTH 598. ORAL TRADITIONS (1-3). Method of examining unwritten culture preserved in speech, including local history, folklore, and songs passed from one generation to another. May include the use of life history, genealogy, and other means of collecting information. Attention is given to ethics, legal issues, and the process of transcription. **PREREQS:** ANTH 350 and ANTH 452* or graduate standing

ANTH 599. SPECIAL TOPICS IN ANTHROPOLOGY (1-16). This course is repeatable for a maximum of 16 credits.

ANTH 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

ANTH 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 610. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ANTH 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ANTH 808. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

■ ARABIC COURSES

ARAB 111. FIRST-YEAR ARABIC (4). Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Initiation to Arabic culture and attitudes. Designed for students with no prior training in Arabic. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 111, ARAB 112, ARAB 113. **PREREQS:** ARAB 111, ARAB 112, ARAB 113 must be taken in order.

ARAB 111H. FIRST-YEAR ARABIC (4). Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Initiation to Arabic culture and attitudes. Designed for students with no prior training in Arabic. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 111H, ARAB 112H, ARAB 113H. **PREREQS:** ARAB 111H, ARAB 112H, ARAB 113H must be taken in order. Honors College approval required.

ARAB 112. FIRST-YEAR ARABIC (4). Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Initiation to Arabic culture and attitudes. Designed for students with no prior training in Arabic. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 111, ARAB 112, ARAB 113. **PREREQS:** ARAB 111 or ARAB 111H

ARAB 112H. FIRST-YEAR ARABIC (4). Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Initiation to Arabic culture and attitudes. Designed for students with no prior training in Arabic. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 111H, ARAB 112H, ARAB 113H. **PREREQS:** ARAB 111 or ARAB 111H and Honors College approval required.

ARAB 113. FIRST-YEAR ARABIC (4). Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Initiation to Arabic culture and attitudes. Designed for students with no prior training in Arabic. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 111, ARAB 112, ARAB 113. **PREREQS:** ARAB 112 or ARAB 112H

ARAB 113H. FIRST-YEAR ARABIC (4). Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Initiation to Arabic culture and attitudes. Designed for students with no prior training in Arabic. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 111H, ARAB 112H, ARAB 113H. **PREREQS:** ARAB 112 or ARAB 112H and Honors College approval required.

ARAB 199. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

ARAB 211. SECOND-YEAR ARABIC (4). Further development of listening comprehension, speaking, reading, and writing skills. Completion of ARAB 213 with a grade of C- or better satisfies the BA requirement in foreign languages. **PREREQS:** ARAB 113 and/or instructor approval. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 211.

ARAB 212. SECOND-YEAR ARABIC (4). Further development of listening comprehension, speaking, reading, and writing skills. Completion of ARAB 213 with a grade of C- or better satisfies the BA requirement in foreign languages. **PREREQS:** ARAB 211 and/or instructor approval. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 212.

ARAB 213. SECOND-YEAR ARABIC (4). Further development of listening comprehension, speaking, reading, and writing skills. Completion of ARAB 213 with a grade of C- or better satisfies the BA requirement in foreign languages. **PREREQS:** ARAB 212 and/or instructor approval. Native and/or bilingual speakers of Arabic will not receive credit for ARAB 213.

ARAB 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ARAB 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor permission and school approval are required to register for this course.

ARAB 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

■ AMERICAN SIGN LANGUAGE COURSES

ASL 111. FIRST-YEAR AMERICAN SIGN LANGUAGE (4). A beginning course to learn the basics of American Sign Language. The course focuses on the ASL language and its uses of syntax, grammar, vocabulary, facial expressions and deaf culture.

ASL 112. FIRST-YEAR AMERICAN SIGN LANGUAGE (4). A continuation of ASL 111 with the development of structures, receptive/ expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 111, ASL 112, ASL 113. **PREREQS:** ASL 111 and/or placement test or instructor permission. Students need to have a basic foundation of the language in order to continue with the first-year series.

ASL 113. FIRST-YEAR AMERICAN SIGN LANGUAGE (4). A continuation of ASL 111 and ASL 112 with the further development of structures, receptive/ expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 111, ASL 112, ASL 113. **PREREQS:** ASL 112

ASL 211. SECOND-YEAR AMERICAN SIGN LANGUAGE (4). A continuation of the first-year ASL courses with the further development of structures, receptive/ expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 211, ASL 212, ASL 213. **PREREQS:** ASL 113

ASL 212. SECOND-YEAR AMERICAN SIGN LANGUAGE (4). A continuation of the second-year ASL series with the further development of structures, receptive/ expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 211, ASL 212, ASL 213. **PREREQS:** ASL 211

ASL 213. SECOND-YEAR AMERICAN SIGN LANGUAGE (4). A continuation of the second-year ASL series with the further development of structures, receptive/ expressive skills and vocabulary. Native and/or bilingual speakers of ASL will not receive credit for ASL 211, ASL 212, ASL 213. **PREREQS:** ASL 212

ASN 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

■ CHINESE COURSES

CHN 111. FIRST-YEAR CHINESE (5). Essentials of colloquial Mandarin with emphasis on conversation, reading, and writing. Designed for students with no prior training in Chinese. Native and/or bilingual speakers of Chinese will not receive credit for CHN 111, CHN 112, CHN 113. Lec/Rec. **PREREQS:** CHN 111, CHN 112, CHN 113 must be taken in order.

CHN 112. FIRST-YEAR CHINESE (5). Essentials of colloquial Mandarin with emphasis on conversation, reading, and writing. Designed for students with no prior training in Chinese. Native and/or bilingual speakers of Chinese will not receive credit for CHN 111, CHN 112, CHN 113. Lec/Rec. **PREREQS:** CHN 111 and CHN 111, CHN 112, CHN 113 must be taken in order.

CHN 113. FIRST-YEAR CHINESE (5). Essentials of colloquial Mandarin with emphasis on conversation, reading, and writing. Designed for students with no prior training in Chinese. Native and/or bilingual speakers of Chinese will not

receive credit for CHN 111, CHN 112, CHN 113. Lec/Rec. **PREREQS:** CHN 112 and CHN 111, CHN 112, CHN 113 must be taken in order.

CHN 199. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

CHN 211. SECOND-YEAR CHINESE (4). Further development of listening comprehension, speaking, reading, and writing skills. Emphasis on conversational fluency and increased vocabulary. Native and/or bilingual speakers of Chinese will not receive credit for CHN 211, CHN 212, CHN 213. Completion of CHN 213 with grade of C- or better satisfies BA requirement in foreign languages. Lec/Rec. **PREREQS:** CHN 113 and / or placement. CHN 211, CHN 212, CHN 213 must be taken in order.

CHN 212. SECOND-YEAR CHINESE (5). Further development of listening comprehension, speaking, reading, and writing skills. Emphasis on conversational fluency and increased vocabulary. Native and/or bilingual speakers of Chinese will not receive credit for CHN 211, CHN 212, CHN 213. Completion of CHN 213 with grade of C- or better satisfies BA requirement in foreign languages. Lec/discussion/activity. **PREREQS:** CHN 211

CHN 213. SECOND-YEAR CHINESE (5). Further development of listening comprehension, speaking, reading, and writing skills. Emphasis on conversational fluency and increased vocabulary. Native and/or bilingual speakers of Chinese will not receive credit for CHN 211, CHN 212, CHN 213. Completion of CHN 213 with grade of C- or better satisfies BA requirement in foreign languages. Lec/discussion. **PREREQS:** CHN 212 and /or placement.

CHN 299. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

CHN 311. THIRD-YEAR CHINESE LANGUAGE (3). Further development of listening, speaking, reading, and writing skills to a more advanced level with emphasis on the practical application of the Chinese language. **PREREQS:** CHN 213

CHN 312. THIRD-YEAR CHINESE LANGUAGE (3). Further development of listening, speaking, reading, and writing skills to a more advanced level with emphasis on the practical application of the Chinese language. Lec/rec. **PREREQS:** CHN 311 and .

CHN 313. THIRD-YEAR CHINESE LANGUAGE (3). Continuation of CHN 312. A language-use course for business and travel. Study of the vocabulary and sentence structures used in business communication. Reading of authentic business documents. Viewing of a video series on traveling in China. Integrated practice of listening, speaking, reading and writing. Lec/rec. **PREREQS:** CHN 312 and .

CHN 331. *CHINESE CULTURE (3). Introduction to basic features of Chinese culture from ancient times to the present. The Classical and Medieval Periods--17th century B.C. to 14th century A.D. Topics include history, philosophy, religion, literature and the arts, science and technology, political and economic systems, and everyday life. Taught in English. Open to all students. May not be offered every year. (NC) (Bacc Core Course) **PREREQS:** Sophomore standing. CHN 331, CHN 331, CHN 333 need not be taken in order.

CHN 332. *CHINESE CULTURE (3). Introduction to basic features of Chinese culture from ancient times to the present. The late Imperial Period--15th century to early 20th century. Topics include history, philosophy, religion, literature and the arts, science and technology, political and economic systems, and everyday life. Taught in English. Open to all students. May not be offered every

year. (NC) (Bacc Core Course) **PREREQS:** Sophomore standing. CHN 331, CHN 331, CHN 333 need not be taken in order.

CHN 333. *CHINESE CULTURE (3). Introduction to basic features of Chinese culture from ancient times to the present. Focus on 20th century. Topics include history, philosophy, religion, literature and the arts, science and technology, political and economic systems, and everyday life. Taught in English. Open to all students. May not be offered every year. (NC) (Bacc Core Course) **PREREQS:** Sophomore standing. CHN 331, CHN 331, CHN 333 need not be taken in order.

CHN 379. PROCTOR EXPERIENCE (1-2). Supervised practicum for advanced students, with assignments as proctor or tutor in lower-division Chinese courses. May be repeated for credit. No credit may be used to satisfy requirements for a minor in Chinese. Graded P/N. This course is repeatable for a maximum of 6 credits. **PREREQS:** Completion of third-year Chinese with a minimum 3.0 GPA in that sequence and prior authorization from supervisor.

CHN 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

CHN 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CHN 403. THESIS (1-16). **PREREQS:** Departmental approval required.

CHN 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CHN 410. INTERNSHIP (1-15).

CHN 411. FOURTH-YEAR CHINESE (NEWSPAPER CHINESE) (3). Development of reading, writing, and speaking skills at a more advanced level; reading of newspaper articles from China, Taiwan, and other sources; oral reports and compositions in Chinese. Not offered every year. **PREREQS:** CHN 313 or placement and departmental approval required. CHN 411, CHN 412, CHN 413 must be taken in order.

CHN 412. FOURTH-YEAR CHINESE (NEWSPAPER CHINESE) (3). Development of reading, writing, and speaking skills at a more advanced level; reading of newspaper articles from China, Taiwan, and other sources; oral reports and compositions in Chinese. Not offered every year. **PREREQS:** CHN 411 or placement and departmental approval required.

CHN 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

CHN 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

■ ETHNIC STUDIES COURSES

ES 101. *INTRODUCTION TO ETHNIC STUDIES (3). This interdisciplinary course focuses on the ethnic group experience in the United States with emphasis on African Americans, Native Americans, Chicanos/as, Latinos/as, and Asian Americans. (Bacc Core Course)

ES 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ES 201. INVENTING ETHNIC AMERICA (3). Examination of contemporary America, focusing on the way elements of diverse ethnic societies--family, leisure, education, and employment--intersect, determine identity, and shape lifestyles.

ES 212. *SURVEY OF CHICANO/A-LATINO/A STUDIES (3). An interdisciplinary survey of the Chicano/a-Latino/a experience, 1848-present. Topics include conquest and colonization, cultural resistance, social stratification, immigration, grassroots movements, and expressive culture. (Bacc Core Course)

ES 213. *CONTEMPORARY LATINO/A CULTURE AND ISSUES (3). A comparative interdisciplinary treatment of contemporary Latino/a cultures and current issues affecting their status in the United States. (Bacc Core Course)

ES 221. *SURVEY OF AFRICAN AMERICAN STUDIES I (3). An interdisciplinary survey of the African American experience beginning with pre-colonial Africa and ending with World War I. (H) (NC) (Bacc Core Course)

ES 221H. *SURVEY OF AFRICAN AMERICAN STUDIES I (3). An interdisciplinary survey of the African American experience beginning with pre-colonial Africa and ending with World War I. (H) (NC) (Bacc Core Course) **PREREQS:** Honors College approval required.

ES 223. *SURVEY OF AFRICAN AMERICAN STUDIES II (3). Interdisciplinary survey of the African American experience beginning with the economic collapse of 1929, the New Deal, and ending in the 1990s with conservative efforts to end civil rights laws of the 1960s. (Bacc Core Course)

ES 231. *ASIAN AMERICAN STUDIES: MID-1800S-PRESENT (4). Examination of the histories and experiences of Asian Americans from the mid-1800s to the present through historical texts, oral histories, personal essays, video, audio, and creative writings. (H) (Bacc Core Course)

ES 233. *ASIAN AMERICAN STUDIES II: ACTIVISM AND EMPOWERMENT (3). A look at historical and contemporary Asian American activism and issues, from early labor organizing to the Asian American Movement of the 1960s and 70s to contemporary issues and efforts toward community empowerment. (H) (Bacc Core Course)

ES 241. *SURVEY OF NATIVE AMERICANS AND ALASKAN NATIVES (3). Comprehensive examination of Native American and Alaskan Native cultures and history, both prior to and following contact with outsiders. (H) (NC) (Bacc Core Course)

ES 241H. *SURVEY OF NATIVE AMERICANS AND ALASKAN NATIVES (3). Comprehensive examination of Native American and Alaskan Native cultures and history, both prior to and following contact with outsiders. (H) (NC) (Bacc Core Course) **PREREQS:** Honors College approval required.

ES 242. *FEDERAL-INDIAN RELATIONS IN 19TH CENTURY U.S. AND CANADA (3). Comprehensive ethno historical course analyzing native experience with the developing United States and Canadian federal government policies to 1900. (H) (NC) (Bacc Core Course)

ES 243. *NATIVE AMERICAN EXPERIENCE IN THE 20TH CENTURY U.S. (3). Comprehensive course dealing with Native American, Alaskan Native, and Native Hawaiian experience under the 20th century United States government. (H) (NC) (Bacc Core Course)

ES 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ES 311. NARRATIVES OF LATINO MIGRATIONS (3). A study of the scholarship and creative literature dealing with migrations from Mexico and other Latin American countries to the United States.

ES 314. CHICANO/A LITERATURE (3). A survey of select works in various genres. Attention to questions of cultural production, reception, critical approaches and how factors such as race, gender, and class impact Chicano/a discursive practices.

ES 321. AFRICAN AMERICAN POLITICAL & SOCIAL THOUGHT IN 20TH CENTURY (3). This interdisciplinary course examines the dialogues, conflicts and self-representations produced by African Americans beginning with the closing years of the 19th century (1895) and ending with the opening days of World War II.

ES 323. CONTEMPORARY AFRICAN AMERICAN SOCIAL DISCOURSE (3).

Interdisciplinary course examines key African American political discourse(s) that emerged in response to major social and cultural transformations occurring in the United States after World War II to the present.

ES 332. ASIAN PACIFIC AMERICANS AND THE MEDIA (3). A broad study of representations of Asians/Pacific Islanders and Asian Pacific Americans in various United States media and their effects.

ES 334. *ASIAN AMERICAN LITERATURE (3). An examination of various work by Asian Americans with particular attention to critical frameworks and issues of identity and representation. (Bacc Core Course)

ES 345. NATIVE AMERICANS IN OREGON (4). Analysis and understanding of the complex experiences of Native Americans in the present state of Oregon, from early contact with those of other ethnicities to contemporary demographic contexts. (H) (NC)

ES 351. *ETHNIC MINORITIES IN OREGON (3). Exploration of the cultures and contributions of major ethnic groups in the state of Oregon. With timelines, oral histories, and audiovisual aids, the course will allow students to learn the ethnic and regional diversity in Oregon history. (Bacc Core Course)

ES 352. *ASIAN REPRESENTATION IN HOLLYWOOD AND INDEPENDENT CINEMAS (3). This four-week summer seminar held annually at Central University for Nationalities (CUN) in Beijing introduces students to ethnic representation in American film culture. The course is organized around the themes of image, identities, and representation, and focuses on Asian representation in Hollywood movies and independent films made by Asian Americans. (Bacc Core Course)

ES 353. ENVIRONMENTAL RACISM (4). *Introduces environmental racism; the unequal impact of environmental harm on communities of color and indigenous peoples. Presents empirical evidence and theoretical frames, and explores efforts by government, residents, and activists to combat it. Considers questions of environmental justice via social structure, public access, open space, indigeneity, food, and media. (Bacc Core Course)

ES 354. ^LITERATURE OF ETHNIC MINORITIES IN THE UNITED STATES (3). Literary works by ethnic minorities addressing issues of race and ethnicity in U.S. culture and society. (Writing Intensive Course) **PREREQS:** ES 101 or ES 201

ES 355. *RACE, SPACE, AND DIFFERENCE (4). A hands-on approach to exploring how we make space, and why geography is always infused with markers of social identity and exercises of power. We will practice "reading" space and landscapes, and learn how notions of race and other forms of "difference" shape space (and vice versa) to produce experiences of inclusion, exclusion, cooperation, and conflict. (Bacc Core Course)

ES 373. APPROACHES TO SOCIAL JUSTICE (3). Students study various ways of thinking about social justice and evaluate these in case studies and current events. As a basis for the Social Justice minor, students write a research paper on the theoretical and practical aspects of a social justice issue. **CROSSLISTED** as ANTH 373, WGSS 373, WLC 373.

ES 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ES 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

ES 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ES 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ES 403. THESIS (1-16). **PREREQS:** Departmental approval required.

ES 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ES 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ES 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ES 408. WORKSHOP (1-16). This course is repeatable for a maximum of 99 credits.

ES 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ES 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ES 411. CHICANO/AS IN/ON FILM (3). Exploration of how Mexicans and Mexican Americans have been portrayed in Hollywood film and how contemporary filmmakers from this group are challenging traditional representations.

ES 431. *QUEER OF COLOR CRITIQUES (3). "Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. (Bacc Core Course) **CROSSLISTED** as QS 431 and WGSS 431. **PREREQS:** Junior standing.

ES 437. GENDER ISSUES IN ASIAN AMERICAN STUDIES (3). An examination of various ways gender issues have affected Asian American Studies and the ways race and gender are conceptualized as categories of oppression within the field.

ES 444. NATIVE AMERICAN LAW: TRIBES, TREATIES, AND THE UNITED STATES (4). Examination of the parameters of native treaty relationships with the federal and state governments, and considers the future of these agreements.

ES 445. *NATIVE AMERICAN SCIENCE AND TECHNOLOGY (3). Examination of scientific and technological discovery, continuity, and change among indigenous peoples, with particular emphasis on selected communities of pre- and post-European contact North America. (H) (NC) (Bacc Core Course)

ES 448. NATIVE AMERICAN PHILOSOPHIES (3). Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry, theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. **CROSSLISTED** as PHL 448/PHL 548.

ES 451. THEORIES OF RACE AND ETHNICITY (3). A seminar examining various theories of race and ethnicity, their historical contexts, and applications.

ES 452. *ETHNICITY IN FILM (3). Using ethnicity and gender as primary frames of reference, this upper-division/graduate level seminar seeks to introduce students to critical film theory and examine ethnicity and gender as a force both in front of and behind the camera. (Bacc Core Course)

ES 453. ETHNOHISTORY METHODOLOGY (3). A seminar developing techniques for collecting, analyzing, and incorporating ethnic community histories in research papers and theses. (Bacc Core Course)

ES 455. INTERNSHIP SEMINAR (1). Prepares students for the internship and provides an opportunity to explore career options and/or graduate study. **PREREQS:** ES 101 and ES 201

ES 457. LITERATURE BY WOMEN OF COLOR IN THE UNITED STATES (3). A comparative examination of works by various women writers of color and their treatment of such issues as race, ethnicity, class, sexuality, and gender.

ES 458. RACIAL PATTERNS OF URBANIZATION (3). This interdisciplinary course will examine the linkages between race and patterns of urbanization. It will examine how ideologies about race and gender have set the themes of debate and discussion about urbanization in both theoretical and popular discourses. **PREREQS:** ES 101 and ES 201

ES 460. ETHNICITY AND SOCIAL JUSTICE (3). Seminar addresses serious inequities and social justice issues in contemporary American society. With a textbook specifically on pedagogy, the class will examine the role of race and ethnicity in our public policy and social justice, specifically focusing on housing, poverty, employment, public health, education, law enforcement and the environment.

ES 461. RACISM AND THE PRISON INDUSTRIAL COMPLEX (4). The prison industrial/punishment complex in the late 20th and early 21st centuries has become a growth industry with the privatization of prisons, and mass incarceration of mostly people-of-color. This course examines the history and growth of this industry and the implications that it has on this democracy.

ES 472. ^INDIGENOUS TWO-SPIRIT AND QUEER STUDIES (3). "Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land. This course addresses indigenous two-spirit/GLBTQ issues through theory, literature, activism, and art. **CROSSLISTED** as QS 472, WGSS 472. **PREREQS:** QS 262 or ES 242 or WGSS 414 or instructor permission

ES 477. *QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM (3). LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. (Bacc Core Course) **CROSSLISTED** as QS 477/ QS 577, WGSS 477/WGSS 577. **PREREQS:** QS 262 and QS 462

ES 485. CAPSTONE IN SOCIAL JUSTICE (2). Working with an advisor from the Social Justice minor, students conduct research to synthesize and extend analysis of a particular social justice issue, building on three previous papers or projects. Results are presented in a 10-15 page paper and a public poster, presentation or website. **CROSSLISTED** as ANTH 485, WGSS 485, WLC 485. This course is repeatable for a maximum of 4 credits. **PREREQS:** (ANTH 373 or ES 373 or WGSS 373 or WLC 373) and (ANTH 410 or ES 410 or WGSS 410 or WLC 410)

ES 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ES 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ES 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ES 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

ES 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ES 506. SPECIAL PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ES 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ES 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

ES 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ES 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ES 531. QUEER OF COLOR CRITIQUES (3). "Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. **CROSSLISTED** as QS 531 and WGSS 531. **PREREQS:** Junior standing.

ES 537. GENDER ISSUES IN ASIAN AMERICAN STUDIES (3). An examination of various ways gender issues have affected Asian American Studies and the ways race and gender are conceptualized as categories of oppression within the field.

ES 544. NATIVE AMERICAN LAW: TRIBES, TREATIES, AND THE U.S. (4). Examination of the parameters of native treaty relationships with the federal and state governments, and considers the future of these agreements.

ES 548. NATIVE AMERICAN PHILOSOPHIES (3). Native American perspectives on ways of knowing, sources of meaning and ethics, the nature of reality, self, community, and cosmos. Includes lectures, scholarship, story-telling, poetry, theater, and music as forums for this exploration. Introduces ideas of leading Native American thinkers about the human relation to the natural world, sources of strength and wisdom, the nature of time and place and spirit, right ways of acting in communities, both civic and biotic, and the place of beauty in a well-lived life. **CROSSLISTED** as PHL 448/PHL 548.

ES 551. THEORIES OF RACE AND ETHNICITY (3). A seminar examining various theories of race and ethnicity, their historical contexts, and applications.

ES 552. ETHNICITY IN FILM (3). Using ethnicity and gender as primary frames of reference, this upper-division/graduate level seminar seeks to introduce students to critical film theory and examine ethnicity and gender as a force both in front of and behind the camera.

ES 553. ETHNOHISTORY METHODOLOGY (3). A seminar developing techniques for collecting, analyzing, and incorporating ethnic community histories in research papers and theses.

ES 557. LITERATURE BY WOMEN OF COLOR IN THE UNITED STATES (3). A comparative examination of works by various women writers of color and their treatment of such issues as race, ethnicity, class, sexuality, and gender.

ES 558. RACIAL PATTERNS OF URBANIZATION (3). This interdisciplinary course will examine the linkages between race and patterns of urbanization. It will examine how ideologies about race and gender have set the themes of debate and discussion and about urbanization in both theoretical and popular discourses. **PREREQS:** ES 101 and ES 201

ES 560. ETHNICITY AND SOCIAL JUSTICE (3). Seminar addresses serious inequities and social justice issues in contemporary American society. With a textbook specifically on pedagogy, the class will examine the role of race and ethnicity in our public policy and social justice, specifically focusing on housing, poverty, employment, public health, education, law enforcement and the environment.

ES 561. RACISM AND THE PRISON INDUSTRIAL COMPLEX (4). The prison industrial/punishment complex in the late 20th and early 21st centuries has become a growth industry with the privatization of prisons, and mass incarceration of mostly people-of-color. This course examines the history and growth of this industry and the implications that it has on this democracy.

ES 572. INDIGENOUS TWO-SPIRIT AND QUEER STUDIES (3). "Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land. ES 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ES 808. WORKSHOP (1-16). This course is repeatable for a maximum of 99 credits.

■ FRENCH COURSES

FR 111. FIRST-YEAR FRENCH (4). Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with no prior training in French. Native and/or bilingual speakers of French will not receive credit for FR 111, FR 112, FR 113. **Lec/rec. PREREQS:** Simultaneous enrollment in FR 199 strongly recommended. FR 111, FR 112, FR 113 must be taken in order.

FR 112. FIRST-YEAR FRENCH (4). Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with no prior training in French. Native and/or bilingual speakers of French will not receive credit for FR 111, FR 112, FR 113. **Lec/rec. PREREQS:** FR 111 or Placement Test and simultaneous enrollment in FR 199 strongly recommended.

FR 113. FIRST-YEAR FRENCH (4). Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with no prior training in French. Native and/or bilingual speakers of French will not receive credit for FR 111, FR 112, FR 113. **Lec/rec. PREREQS:** FR 112 or Placement Test and simultaneous enrollment in FR 199 strongly recommended.

FR 121. SURVIVAL FRENCH FOR STUDENTS AND TRAVELERS (3). Provides practical linguistic tools for short stays in France. Basic conversation skills, pronunciation, introduction to French non-verbal language, as well as cultural tools, introduction to French etiquette, visual dictionary, and tips for avoiding cross-cultural misunderstandings common between Americans and the French.

FR 188. FRENCH STUDIES, FRENCH STUDY CENTERS (1-12). May be repeated for credit when topic varies. Section 1: Topics, French language. Section 2: Practical work (exercises). Section 3: Topics, French arts and letters. Section 4: Topics, France and French society. This course is repeatable for a maximum of 12 credits.

FR 199. SPECIAL STUDIES (1-16). Conversation, pronunciation, vocabulary-building, etc. Supplements basic sequence FR 111, FR 112, FR 113. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.

FR 211. SECOND-YEAR FRENCH (4). Continued development of basic language skills, pronunciation, and vocabulary acquisition; introduction to extensive reading. Native and/or bilingual speakers of French will not receive credit for FR 211, FR 212, FR 213. **Lec/rec. PREREQS:** FR 113 or Placement Test and simultaneous enrollment in FR 299 strongly recommended. FR 211, FR 212, FR 213 must be taken in order.

FR 212. SECOND-YEAR FRENCH (4). Continued development of basic language skills, pronunciation, and vocabulary acquisition; introduction to extensive reading. Native and/or bilingual speakers of French will not receive credit for FR 211, FR 212, FR 213. **Lec/rec. PREREQS:** FR 211 or Placement Test and simultaneous enrollment in FR 299 strongly recommended.

FR 213. SECOND-YEAR FRENCH (4). Continued development of basic language skills, pronunciation, and vocabulary acquisition; introduction to extensive reading. Completion of FR 213 with a grade of C- or better satisfies BA requirement in foreign languages. Native and/or bilingual speakers of French will not receive credit for FR 211, FR 212, FR 213. **Lec/rec. PREREQS:** FR 212 or Placement Test and simultaneous enrollment in FR 299 strongly recommended.

FR 270. *FRANCE TODAY: CULTURES WITHIN AND BEYOND ITS BORDERS (3). An exploratory study of French culture and society since 1945. Topics include: decolonization, immigration, Francophone intellectual currents, France's European vocation, and social conflict today. Conducted in English. (Bacc Core Course)

FR 270H. *FRANCE TODAY: CULTURES WITHIN AND BEYOND ITS BORDERS (3). An exploratory study of French culture and society since 1945. Topics include: decolonization, immigration, Francophone intellectual currents, France's European vocation, and social conflict today. Conducted in English. (Bacc Core Course) **PREREQS:** Honors College approval required.

FR 288. FRENCH STUDIES, FRENCH STUDY CENTERS (1-12). May be repeated for credit when topic varies. Section 1: Topics, French language. Section 2: Practical work (exercises). Section 3: Topics, French arts and letters. Section 4: Topics, France and French society. This course is repeatable for a maximum of 12 credits.

FR 299. SPECIAL STUDIES (1-16). Conversation, pronunciation, vocabulary-building, etc. Supplements basic sequence FR 211, FR 212, FR 213. May not be offered every year. May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. This course is repeatable for a maximum of 16 credits.

FR 311. THIRD-YEAR FRENCH (3). A language-use course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; written assignments including original compositions. Conducted in French. **PREREQS:** FR 213 and departmental approval. FR 311, FR 312, FR 313 must be taken in order.

FR 312. THIRD-YEAR FRENCH (3). A language-use course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; written assignments including original

compositions. Conducted in French. **PREREQS:** FR 311 and departmental approval.

FR 313. THIRD-YEAR FRENCH (3). A language-use course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; written assignments including original compositions. Conducted in French. **PREREQS:** FR 312 and departmental approval.

FR 315. FRENCH FOR BUSINESS (3). An introduction to the French business world and business language. Development of business vocabulary; discussion; practice in writing resumes, business letters and business reports. Conducted in French. May not be offered every year. **PREREQS:** FR 213 or placement.

FR 319. SELECTED TOPICS IN FRENCH LANGUAGE (3). Skill-orientation variable. Conducted in French. May be repeated for credit when topic varies. See Schedule of Classes for current topics and prerequisites. Not offered every year. This course is repeatable for a maximum of 9 credits.

FR 329. *FRANCOPHONE CULTURES IN FILM (3-9). An exploration of the different cultures of France and the Francophone world through film. Students will delve into the heart of these societies and discover their socio-historical, political, economic and cultural context. Students' analytical and critical skills will be thoroughly solicited through various research and writing activities. Taught in English. (Bacc Core Course) This course is repeatable for a maximum of 9 credits.

FR 329H. *FRANCOPHONE CULTURES IN FILM (3-9). An exploration of the different cultures of France and the Francophone world through film. Students will delve into the heart of these societies and discover their socio-historical, political, economic and cultural context. Students' analytical and critical skills will be thoroughly solicited through various research and writing activities. Taught in English. (Bacc Core Course) This course is repeatable for a maximum of 9 credits. **PREREQS:** Honors College approval required.

FR 331. *FRENCH CULTURE AND SOCIETY SINCE THE REVOLUTION (3). Cultural life of the French people from 1789 to the present. Conducted in French. Need not be taken in order. (H) (Bacc Core Course) **PREREQS:** Completion of 3 credits of 300-level French or placement for FR 331 and FR 332.

FR 332. *FRENCH CULTURE AND SOCIETY SINCE THE REVOLUTION (3). Cultural life of the French people from 1789 to the present. Conducted in French. Need not be taken in order. (H) (Bacc Core Course) **PREREQS:** Completion of 3 credits of 300-level French or placement for FR 331 and FR 332.

FR 333. *FRENCH CULTURE AND SOCIETY SINCE THE REVOLUTION (3). Cultural life of the French people from 1789 to the present. Conducted in French. Need not be taken in order. (H) (Bacc Core Course) **PREREQS:** Completion of 6 credits of 300-level French or placement for FR 333.

FR 340. INTRODUCTION TO FRENCH LITERARY STUDIES (3). Concepts and vocabulary fundamental to the study of French literature; general view of the main currents of French literary history; introduction to French versification; techniques of literary analysis; practice in literary analysis and in writing about literature; explication de texte. Conducted in French. (H) **PREREQS:** FR 213 or placement.

FR 349. SELECTED TOPICS IN FRANCOPHONE LITERATURE (3). Literary works, themes, movements, or authors from French-speaking areas of the world. Conducted in French. May be repeated for credit when topic varies. See Schedule of Classes for current topics and prerequisites. Not offered every year. This course is repeatable for a maximum of 9 credits.

FR 379. PROCTOR EXPERIENCE (1-2). Supervised practicum for advanced students. Assignments as proctors or tutors in lower-division French courses. No more than 2 credits may be used to satisfy degree requirements for a major in French; may not be used to satisfy requirements for a minor in French. Graded P/N. This course is repeatable for a maximum of 6 credits. **PREREQS:** Completion of 12 upper-division credits in French, including FR 311, FR 312, FR 313 and FR 351, with a minimum 3.0 GPA and prior authorization from supervisor.

FR 388. FRENCH STUDIES, FRENCH STUDY CENTERS (1-12). May be repeated when topic varies. Section 1: Topics, French language. Section 2: Practical work (exercises). Section 3: Topics, French arts and letters. Section 4: Topics, France and French society. This course is repeatable for a maximum of 12 credits.

FR 399. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

FR 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FR 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FR 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FR 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FR 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FR 410. INTERNSHIP (1-15).

FR 411. FOURTH-YEAR FRENCH (3). A language-use course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; analysis of writing styles and techniques; oral reports and original presentations in French; original compositions. Conducted in French. **PREREQS:** FR 313 and departmental approval.

FR 412. FOURTH-YEAR FRENCH (3). A language-use course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; analysis of writing styles and techniques; oral reports and original presentations in French; original compositions. Conducted in French. **PREREQS:** FR 313 and departmental approval.

FR 413. FOURTH-YEAR FRENCH (3). A language-use course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; analysis of writing styles and

techniques; oral reports and original presentations in French; original compositions. Conducted in French. **PREREQS:** FR 313 and departmental approval.

FR 439. ^FRENCH: FRANCOPHONE STUDIES (3). Variable topics in language, culture, or literature. May be repeated for credit when topic varies. Conducted in French. See Schedule of Classes for current topics and prerequisites. Not offered every year. (Writing Intensive Course) This course is repeatable for a maximum of 9 credits.

FR 449. SELECTED TOPICS IN FRANCOPHONE LITERATURE (3). Conducted in French. May be repeated for credit when topic varies. See Schedule of Classes for current topics and prerequisites. Not offered every year. This course is repeatable for a maximum of 9 credits.

FR 488. FRENCH STUDIES, FRENCH STUDY CENTERS (1-12). May be repeated for credit when topics varies. Section 1: Topics, French language. Section 2: Practical work (exercises). Section 3: Topics, French arts and letters. Section 4: Topics, France and French Society. This course is repeatable for a maximum of 12 credits.

FR 499. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 9 credits.

FR 499H. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 9 credits. **PREREQS:** Honors College approval required.

FR 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FR 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FR 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

FR 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FR 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

FR 511. FOURTH-YEAR FRENCH (3). A language-use course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; analysis of writing styles and techniques; oral reports and original presentations in French; original compositions. Conducted in French. **PREREQS:** FR 313 and departmental approval.

FR 512. FOURTH-YEAR FRENCH (3). A language-use course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; analysis of writing styles and techniques; oral reports and original presentations in French; original compositions. Conducted in French. **PREREQS:** FR 511 and departmental approval.

FR 513. FOURTH-YEAR FRENCH (3). A language-use course; primary emphasis on developing oral and written proficiency; extensive practice in speaking and writing. Grammar review; vocabulary study; analysis of writing styles and techniques; oral reports and original presentations in French; original compositions. Conducted in French. **PREREQS:** FR 512 and departmental approval.

FR 539. FRENCH: FRANCOPHONE STUDIES (3). Variable topics in language, culture, or literature. May be repeated for credit when topic varies. Conducted in French. See Schedule of

Classes for current topics and prerequisites. Not offered every year. This course is repeatable for a maximum of 12 credits.

FR 549. SELECTED TOPICS IN FRANCOPHONE LITERATURE (3). Conducted in French. May be repeated for credit when topic varies. See Schedule of Classes for current topics and prerequisites. Not offered every year. This course is repeatable for a maximum of 9 credits.

FR 588. FRENCH STUDIES, FRENCH STUDY CENTERS (1-12). May be repeated for credit when topic varies. Section 1: Topics, French language. Section 2: Practical work (exercises). Section 3: Topics, French arts and letters. Section 4: Topics, France and French society. This course is repeatable for a maximum of 12 credits.

■ GERMAN COURSES

GER 111. FIRST-YEAR GERMAN (4). Development of basic writing, reading, listening, and speaking skills; includes cultural component. Designed solely for students with no prior training in German. Native or bilingual speakers of German will not receive credit for GER 111, GER 112, or GER 113. Lec/lab/rec. **PREREQS:** GER 111, GER 112, GER 113 must be taken in order.

GER 112. FIRST-YEAR GERMAN (4). Development of basic writing, reading, listening, and speaking skills; includes cultural component. Designed solely for students with no prior training in German. Native or bilingual speakers of German will not receive credit for GER 111, GER 112, or GER 113. Lec/lab/rec. **PREREQS:** GER 111 or placement test score.

GER 113. FIRST-YEAR GERMAN (4). Development of basic writing, reading, listening, and speaking skills; includes cultural component. Designed solely for students with no prior training in German. Native or bilingual speakers of German will not receive credit for GER 111, GER 112, or GER 113. Lec/lab/rec. **PREREQS:** GER 112 or placement test score.

GER 121. GERMAN CONVERSATION FOR BEGINNERS I (1). Optional course that can be taken along with GER 111 or for general practice. Designed for students who would like to continue developing basic learning and speaking skills in German through independent work with a variety of media. Graded P/N.

GER 122. GERMAN CONVERSATION FOR BEGINNERS II (1). Optional course that can be taken along with GER 112 or for general practice. Designed for students who would like to continue developing basic learning and speaking skills in German through independent work with a variety of media. Graded P/N.

GER 123. GERMAN CONVERSATION FOR BEGINNERS III (1). Optional course that can be taken along with GER 111 or for general practice. Designed for students who would like to continue developing basic learning and speaking skills in German through independent work with a variety of media. Graded P/N.

GER 188. GERMAN STUDIES, GERMAN STUDY CENTER (1-12). May be repeated for credit when topic varies. Section 1: Topics, German language. Section 2: Practical work (exercises). This course is repeatable for a maximum of 12 credits.

GER 199. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

GER 211. SECOND-YEAR GERMAN (4). Continuing development of writing, reading, listening, and speaking skills; cultural component. Completion of second-year German or equivalent with a GPA of 2.50 or higher serves as a prerequisite for upper-division courses. Native or bilingual speakers of German will not receive credit for GER 211, GER 212 or GER 213. Lec/

lab/rec. **PREREQS:** GER 113 or placement test score.

GER 212. SECOND-YEAR GERMAN (4). Continuing development of writing, reading, listening, and speaking skills; cultural component. Completion of Second-Year German or equivalent with a GPA of 2.50 or higher serves as a prerequisite for upper-division courses. Native or bilingual speakers of German will not receive credit for GER 211, GER 212, or GER 213. Lec/rec. **PREREQS:** GER 211 or placement test score.

GER 213. SECOND-YEAR GERMAN (4). Continuing development of writing, reading, listening, and speaking skills; cultural component. Completion of Second-Year German or equivalent with a GPA of 2.50 or higher serves as a prerequisite for upper-division courses. Completion of GER 213 with grade of C- or better satisfies BA requirement in foreign languages. Native or bilingual speakers of German will not receive credit for GER 211, GER 212, or GER 213. Lec/rec. **PREREQS:** GER 212 or placement test score.

GER 221. GERMAN CONVERSATION FOR INTERMEDIATE SPEAKERS I (1). Optional course that can be taken along with GER 211 or for general practice. Designed for students who would like to continue developing basic learning and speaking skills in German through independent work with a variety of media. Graded P/N.

GER 222. GERMAN CONVERSATION FOR INTERMEDIATE SPEAKERS II (1). Optional course that can be taken along with GER 212 or for general practice. Designed for students who would like to continue developing basic learning and speaking skills in German through independent work with a variety of media. Graded P/N.

GER 223. GERMAN CONVERSATION FOR INTERMEDIATE SPEAKERS III (1). Optional course that can be taken along with GER 213 or for general practice. Designed for students who would like to continue developing basic learning and speaking skills in German through independent work with a variety of media. Graded P/N.

GER 231. *GERMAN DICTATORSHIPS: NAZIS AND COMMUNISTS (3). Introduction to the two best-known dictatorships in German society, National Socialism of the Third Reich from 1933-1945 and Socialism in the German Democratic Republic from 1949-1989 via the study of visual media (feature films, documentaries, newsreels, etc.) and other primary and secondary sources. (Bacc Core Course) **PREREQS:** Sophomore standing.

Class lectures discussing key works of German cinema will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films accompany the lectures. Taught in English. Film fee will be required. (Bacc Core Course)

GER 261H. *MASTERPIECES OF GERMAN CINEMA (3). An introduction to the serious study of German cinema, 1920 to present. Class lectures discussing key works of German cinema will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films accompany the lectures. Taught in English. Film fee will be required. (Bacc Core Course) **PREREQS:** Honors College approval required.

GER 288. GERMAN STUDIES, GERMAN STUDY CENTER (1-12). May be repeated for credit when topic varies. Section 1: Topics, German language. Section 2: Practical work (exercises). Section 3: Topics, German arts and letters. Section 4: Topics, Germany and German society. This course is repeatable for a maximum of 12 credits.

GER 299. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

GER 311. THIRD-YEAR GERMAN (3). Focus on development of German writing, speaking, and listening skills. Conducted in German. Required of German majors and minors. **PREREQS:** GER 213 or equivalent.

GER 312. THIRD-YEAR GERMAN (3). Focus on development of German writing, speaking, and listening skills. Conducted in German. Required of German majors and minors. **PREREQS:** GER 213 or equivalent.

GER 313. THIRD-YEAR GERMAN (3). Focus on development of German writing, speaking, and listening skills. Conducted in German. Both courses required of German majors and minors. **PREREQS:** GER 213 or equivalent.

GER 319. SELECTED TOPICS IN GERMAN LANGUAGE (3). Focus on development of German language skills and/or history of the language. Conducted in German. May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Lec/rec. Not offered every year. This course is repeatable for a maximum of 9 credits.

GER 321. GERMAN CONVERSATION FOR ADVANCED SPEAKERS I (1). Designed for students who would like to continue developing basic listening and speaking skills in German through independent work with a variety of media. Graded P/N. **PREREQS:** GER 213

GER 322. GERMAN CONVERSATION FOR ADVANCED SPEAKERS II (1). Designed for students who would like to continue developing basic listening and speaking skills in German through independent work with a variety of media. **PREREQS:** GER 213

GER 323. GERMAN CONVERSATION FOR ADVANCED SPEAKERS III (1). Designed for students who would like to continue developing basic listening and speaking skills in German through independent work with a variety of media. Graded P/N. **PREREQS:** GER 213

GER 329. SELECTED TOPICS IN LITERATURE AND/OR CULTURE (3). May be repeated for credit when topic varies. See Schedule of Classes for current offerings. Not offered every year. This course is repeatable for a maximum of 9 credits. **PREREQS:** Sophomore standing.

GER 331. *GERMAN CULTURE (3). Aspects of history, politics, art, music, literature, and everyday life in German-speaking countries. Attention to development of German language skills. Conducted in German. (H) (Bacc Core Course) **PREREQS:** GER 213

GER 332. *GERMAN CULTURE (3). Aspects of history, politics, art, music, literature, and everyday life in German-speaking countries. Attention to development of German language skills. Conducted in German. (H) (Bacc Core Course) **PREREQS:** GER 213

GER 339. SELECTED TOPICS IN GERMAN CULTURE (3). Focus on specific aspects of German culture. Attention to development of German language skills. Conducted in German. May be repeated for credit when topic varies. See Schedule of Classes for current offerings. Not offered every year. This course is repeatable for a maximum of 9 credits. **PREREQS:** Completion of 9 credits from GER 311, GER 312, GER 313.

GER 341. SURVEY OF GERMAN LITERATURE (3). Major works and literary theories of German literature in their cultural context. Attention to development of German language skills with special emphasis on reading and discussion. Conducted in German. (H) **PREREQS:** GER 213 or placement.

GER 342. SURVEY OF GERMAN LITERATURE (3). Major works and literary theories of German literature in their cultural context. Attention to development of German language skills with special emphasis on reading and discussion. Conducted in German. (H) **PREREQS:** GER 213 or placement.

GER 343. SURVEY OF GERMAN LITERATURE (3). Major works and literary theories of German literature in their cultural context. Attention to development of German language skills with special emphasis on reading and discussion. Conducted in German. (H) **PREREQS:** GER 213 or placement.

GER 349. SELECTED TOPICS IN GERMAN LITERATURE (3). Attention to development of German language skills. Conducted in German. May be repeated for credit when topic varies. See Schedule of Classes for current offerings. Not offered every year. This course is repeatable for a maximum of 9 credits. **PREREQS:** GER 213 or placement.

GER 351. GERMAN PRONUNCIATION AND PHONETICS (3). Analysis of the fundamentals of the German sound system, including pronunciation, phonology, phonetic and contrastive analysis of sounds; phonemes, intonation, and tone patterns. Required of students working toward a teaching certificate in German. Not offered every year. **PREREQS:** GER 213 or placement.

GER 355. TRANSLATION (3). Introduces students to translation studies in theory and practice. Students will learn problems behind translating texts and strategies to overcome these issues, before working on shorter and longer translation projects of a variety of texts. Taught in English. **PREREQS:** GER 312

Compares and contrasts films made in East and West Germany to understand differences and similarities in the political and cultural set-up of the two states.

GER 363. CONTEMPORARY GERMAN CINEMA (3). Introduces German cinema after unification in 1990. Analyzes German films from various genres, "schools," and directors. Reflects and compares contemporary issues of Germany, Austria, and Switzerland to Hollywood cinema.

GER 379. PROCTOR EXPERIENCE (1-2). Supervised practicum for advanced students, with assignments as proctors or tutors in lower-division German language courses. No more than 2 credits may be used to satisfy degree requirements for a major in German; no credit may be used to satisfy requirements for a minor in German. Graded P/N. This course is repeatable for a maximum of 6 credits. **PREREQS:** Completion of 12 upper-division credits in German, including GER 311, GER 312, GER 313 and prior authorization of supervisor.

GER 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

GER 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GER 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GER 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GER 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GER 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GER 410. INTERNSHIP (1-15).

GER 411. ^FOURTH-YEAR GERMAN (3). Focus on development of German writing, speaking, and listening skills. Conducted in German. (Writing Intensive Course) **PREREQS:** GER 313 and departmental approval.

GER 412. FOURTH-YEAR GERMAN (3). Focus on development of German writing, speaking, and listening skills. Conducted in German. **PREREQS:** GER 411 and departmental approval.

GER 413. FOURTH-YEAR GERMAN (3). Focus on development of German writing, speaking, and listening skills. Conducted in German. **PREREQS:** GER 412 and departmental approval.

GER 421. GERMAN LANGUAGE TANDEM (1). Optional course that can be taken to fine-tune advanced German speaking skills with the help of a native speaker. Graded P/N. This course is repeatable for a maximum of 6 credits.

GER 449. SELECTED TOPICS IN GERMAN LITERATURE (3). May be repeated for credit when topic varies. Conducted in German. This course is repeatable for a maximum of 9 credits. **PREREQS:** 9 upper-division credits in German.

GER 488. GERMAN STUDIES, GERMAN STUDY CENTER (1-12). May be repeated for when topic varies. Section 1: Topics, German language. Section 2: Practical work (exercises). Section 3: Topics, German arts and letters. Section 4: Topics, Germany and German society. This course is repeatable for a maximum of 12 credits.

GER 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GER 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GER 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

GER 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GER 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

GER 511. FOURTH-YEAR GERMAN (3). Focus on development of German writing, speaking, and listening skills. Conducted in German. **PREREQS:** GER 313 and departmental approval.

GER 512. FOURTH-YEAR GERMAN (3). Focus on development of German writing, speaking, and listening skills. Conducted in German. **PREREQS:** GER 411 or GER 511 and departmental approval.

GER 513. FOURTH-YEAR GERMAN (3). Focus on development of German writing, speaking, and listening skills. Conducted in German. **PREREQS:** GER 412 or GER 512 and departmental approval.

GER 549. SELECTED TOPICS IN GERMAN LITERATURE (3). May be repeated for credit when topic varies. Conducted in German. This course is repeatable for a maximum of 9 credits. **PREREQS:** 9 upper-division credits in German.

GER 588. GERMAN STUDIES, GERMAN STUDY CENTER (1-12). May be repeated for credit when topic varies. Section 1: Topics, German language. Section 2: Practical work (exercises). Section 3:

Topics, German arts and letters. Section 4: Topics, Germany and German society. This course is repeatable for a maximum of 12 credits.

■ HEBREW COURSES

HEBR 111. INTRODUCTION TO HEBREW (4). Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with no prior training in Hebrew. Native and/or bilingual speakers of Hebrew will not receive credit for HEBR 111, HEBR 112, HEBR 113.

HEBR 112. INTERMEDIATE HEBREW (4). Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with no prior training in Hebrew. Native and/or bilingual speakers of Hebrew will not receive credit for HEBR 111, HEBR 112, HEBR 113. **PREREQS:** HEBR 111

HEBR 113. INTERMEDIATE HEBREW II (4). Pronunciation, grammar, reading, writing, listening comprehension, speaking, conversation. Designed specifically for students with no prior training in Hebrew. Native and/or bilingual speakers of Hebrew will not receive credit for HEBR 111, HEBR 112, HEBR 113. **PREREQS:** (HEBR 111 and HEBR 112)

HEBR 211. SECOND-YEAR HEBREW I (4). Further development of listening comprehension, speaking, reading, and writing skills. Native and/or bilingual speakers of Hebrew will not receive credit for HEBR 211. Taught via Ecampus only. **PREREQS:** HEBR 113

HEBR 212. SECOND-YEAR HEBREW II (4). Continued development of basic language skills, pronunciation, and vocabulary acquisition; introduction to extensive reading. Native and/or bilingual speakers of Hebrew will not receive credit for HEBR 211, HEBR 212, HEBR 213. Taught via Ecampus only. **PREREQS:** HEBR 211

HEBR 213. SECOND YEAR HEBREW III (4). Continued development of basic language skills, pronunciation, and vocabulary acquisition; introduction to extensive reading. Native and/or bilingual speakers of Hebrew will not receive credit for HEBR 211, 212, 213. **PREREQS:** HEBR 212

HEBR 231. *INTRODUCTION TO JEWISH CULTURE (3). An overview of Jewish culture from its origins to the present day. Students will compare and contrast the lifestyles, ideologies, religious and cultural practices of Jews living in Israel and the United States; two divergent cultures that developed from similar roots. Native speakers of Italian will not receive credit for IT 111, IT 112, IT 113. Not offered every year. **PREREQS:** IT 111, IT 112, IT 113 must be taken in order.

IT 112. FIRST-YEAR ITALIAN (4). Development of listening comprehension, speaking, reading, and writing skills. Designed for students with no previous training in Italian. Native speakers of Italian will not receive credit for IT 111, IT 112, IT 113. Not offered every year. **PREREQS:** IT 111

IT 113. FIRST-YEAR ITALIAN (4). Development of listening comprehension, speaking, reading, and writing skills. Designed for students with no previous training in Italian. Native speakers of Italian will not receive credit for IT 111, IT 112, IT 113. Not offered every year. **PREREQS:** IT 112

IT 188. ITALIAN STUDIES, ITALIAN STUDY CENTER (1-12). May be repeated for credit when topic varies. Section 1: Topics, Italian language. Section 2: Practical work (exercises). This course is repeatable for a maximum of 99 credits.

IT 199. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. See schedule of classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

IT 211. SECOND-YEAR ITALIAN (4). Further development of listening comprehension, speaking, reading, and writing skills. Native speakers of Italian will not receive credit for IT 211, IT 212, IT 213. Not offered every year. **PREREQS:** IT 113 and /or placement. IT 211, IT 212, IT 213 must be taken in order.

IT 212. SECOND-YEAR ITALIAN (4). Further development of listening comprehension, speaking, reading, and writing skills. Native speakers of Italian will not receive credit for IT 211, IT 212, IT 213. Not offered every year. **PREREQS:** IT 211 and /or placement.

IT 213. SECOND-YEAR ITALIAN (4). Further development of listening comprehension, speaking, reading, and writing skills. Native speakers of Italian will not receive credit for IT 211, IT 212, IT 213. Completion of IT 213 with a grade of C- or better satisfies BA requirement in foreign languages. Not offered every year. **PREREQS:** IT 212 and /or placement.

IT 299. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

IT 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

IT 410. INTERNSHIP (1-15).

IT 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

■ JAPANESE COURSES

JPN 111. FIRST-YEAR JAPANESE (4). Designed to help students develop an understanding of basic language structures and to acquire the ability to use them appropriately in a variety of practical, everyday social contexts. Primary focus is on verbal and non-verbal communication skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 111, JPN 112, JPN 113. Lec/lab/rec. **PREREQS:** JPN 111, JPN 112, JPN 113 must be taken in order.

JPN 112. FIRST-YEAR JAPANESE (4). Designed to help students develop an understanding of basic language structures and to acquire the ability to use them appropriately in a variety of practical, everyday social contexts. Primary focus is on verbal and non-verbal communication skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 111, JPN 112, JPN 113. Lec/lab/rec. **PREREQS:** JPN 111

JPN 113. FIRST-YEAR JAPANESE (4). Designed to help students develop an understanding of basic language structures and to acquire the ability to use them appropriately in a variety of practical, everyday social contexts. Primary focus is on verbal and non-verbal communication skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 111, JPN 112, JPN 113. Lec/lab/rec. **PREREQS:** JPN 112

JPN 199. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

JPN 211. SECOND-YEAR JAPANESE (4). Continued development of basic oral communication skills as required in a variety of social contexts. Initial development of reading skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 211, JPN 212, JPN 213. Lec/lab/rec. **PREREQS:** JPN 113 and /or placement.

JPN 212. SECOND-YEAR JAPANESE (4). Continued development of basic oral communication skills as required in a variety of social contexts. Initial development of reading skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 211, JPN 212, JPN 213. Lec/lab/rec. **PREREQS:** JPN 211 and /or placement.

JPN 213. SECOND-YEAR JAPANESE (4). Continued development of basic oral communication skills as required in a variety of social contexts. Initial development of reading skills. Native and/or bilingual speakers of Japanese will not receive credit for JPN 211, JPN 212, JPN 213. Completion of JPN 213 with a grade of C- or better satisfies BA requirement in foreign languages. Lec/rec. **PREREQS:** JPN 212 and /or placement.

JPN 299. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

JPN 311. THIRD-YEAR JAPANESE (3). Continued development of oral communication skills as required in a variety of social contexts. Further development of reading skills. Lec/lab/rec. **PREREQS:** JPN 213 or placement and departmental approval.

JPN 312. THIRD-YEAR JAPANESE (3). Continued development of oral communication skills as required in a variety of social contexts. Further development of reading skills. Lec/lab/rec. **PREREQS:** JPN 311 or placement and departmental approval.

JPN 313. THIRD-YEAR JAPANESE (3). Continued development of oral communication skills as required in a variety of social contexts. Further development of reading skills. Lec/rec. **PREREQS:** JPN 312 or placement and departmental approval.

JPN 329. SPECIAL TOPICS IN LANGUAGE, CULTURE, OR LITERATURE (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

JPN 331. *JAPANESE CULTURE (3). An introductory survey of Japanese history, arts, literature, society, and traditions from the ancient to the mid-19th century. Taught in English. JPN 331, JPN 332, JPN 333 need not be taken in order. May not be offered every year. (NC) (Bacc Core Course) **PREREQS:** Sophomore standing.

JPN 332. *JAPANESE CULTURE (3). An introductory survey of Japanese history, arts, literature, society, and traditions from the ancient to the mid-19th century. Taught in English. JPN 331, JPN 332, JPN 333 need not be taken in order. May not be offered every year. (NC) (Bacc Core Course) **PREREQS:** Sophomore standing.

JPN 333. *JAPANESE CULTURE (3). A survey of Japan from the mid-19th century to the present in areas including arts, literature, business, education, society, politics, and foreign relations. Taught in English. JPN 331, JPN 332, JPN 333 need not be taken in order. May not be offered every year. (NC) (Bacc Core Course) **PREREQS:** Sophomore standing.

JPN 379. PROCTOR EXPERIENCE (1-2). Supervised practicum for advanced students, with assignment as proctor or tutor in lower-division Japanese courses. No credit may be used to satisfy requirements for a minor in Japanese. Graded P/N. This course is repeatable for a maximum of 6 credits. **PREREQS:** Completion of third-year Japanese with a minimum 3.00 GPA in that sequence and prior authorization from supervisor.

JPN 388. JAPANESE STUDIES, JAPANESE STUDY CENTER (1-12). May be repeated for credit when topic varies. This course is repeatable

for a maximum of 12 credits.

JPN 399. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

JPN 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

JPN 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

JPN 410. INTERNSHIP (1-15).

JPN 411. FOURTH-YEAR JAPANESE (3). Further development of conversational, reading, and writing skills. Readings include excerpts from contemporary essays, short stories, novels, plays, and newspaper articles. Not offered every year. **PREREQS:** JPN 313 or placement and departmental approval. JPN 411, JPN 412, JPN 413 must be taken in order.

JPN 412. FOURTH-YEAR JAPANESE (3). Further development of conversational, reading, and writing skills. Readings include excerpts from contemporary essays, short stories, novels, plays, and newspaper articles. Not offered every year. **PREREQS:** JPN 411 or placement and departmental approval.

JPN 413. FOURTH-YEAR JAPANESE (3). Further development of conversational, reading, and writing skills. Readings include excerpts from contemporary essays, short stories, novels, plays, and newspaper articles. Not offered every year. **PREREQS:** JPN 412 or placement and departmental approval.

JPN 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

JPN 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

■ KOREAN COURSES

KOR 111. FIRST-YEAR KOREAN (4). For students with no prior training in Korean. Basic language skills along with cultural understanding by introducing the history of Hangul, traditional holidays, games, songs, foods and drama. Provides the Korean alphabet (Hangul), basic vocabulary, grammar, listening, speaking, reading, and writing skills. Three areas of focus: (1) reading and writing the Korean alphabet; (2) basic colloquial expressions; and (3) cultural understanding.

KOR 112. FIRST-YEAR KOREAN (4). Basic language skills along with cultural understanding by introducing the history of Hangul, traditional holidays, games, songs, foods and drama. Provides the Korean alphabet (Hangul), basic vocabulary, grammar, listening, speaking, reading, and writing skills. Three areas of concentration: (1) reading and writing the Korean alphabet, (2) basic colloquial expressions, and (3) cultural understanding. **PREREQS:** KOR 111

KOR 113. FIRST-YEAR KOREAN (4). Designed to increase fluency in listening, speaking, reading and writing skills through various topics that are relevant to students' life; sports, health, experiences, housing. Enlarge vocabulary and knowledge of grammar and sentence structure with honorifics, adjectives, connectives, and comparatives. Discuss Korean culture and literature using folk tales. **PREREQS:** KOR 112

■ LATIN COURSES

LAT 111. FIRST-YEAR LATIN (4). Basics of the Latin language, including grammar, syntax, and vocabulary for the purpose of reading and understanding Latin texts.

LAT 112. FIRST-YEAR LATIN (4). Continues to introduce students to the basics of the Latin language, including grammar, syntax, and vocabulary for the purpose of reading and understanding Latin texts. **PREREQS:** LAT 111

LAT 113. FIRST-YEAR LATIN (4). Continues to introduce students to the basics of the Latin language, including grammar, syntax, and vocabulary for the purpose of reading and understanding Latin texts. **PREREQS:** LAT 112

■ LINGUISTICS COURSES

LING 111. CLASSROOM STUDY OF A LESS COMMONLY TAUGHT LANGUAGE (4). Beginning classroom-based instruction of a language otherwise not taught at OSU. Skill areas addressed include reading, writing, speaking, listening and culture. Not for students who have previous proficiency in the target language. May be repeated for credit for different languages. For a master-apprentice approach, enroll instead in the LING 114, LING 115, LING 116 sequence. This course is repeatable for a maximum of 12 credits. **PREREQS:** LING 111, LING 112, LING 113 must be taken in sequence.

LING 112. CLASSROOM STUDY OF A LESS COMMONLY TAUGHT LANGUAGE (4). Beginning classroom-based instruction of a language otherwise not taught at OSU. Skill areas addressed include reading, writing, speaking, listening and culture. Not for students who have previous proficiency in the target language. May be repeated for credit for different languages. For a master-apprentice approach, enroll instead in the LING 114, LING 115, LING 116 sequence. This course is repeatable for a maximum of 12 credits. **PREREQS:** LING 111, LING 112, LING 113 must be taken in sequence.

LING 113. CLASSROOM STUDY OF A LESS COMMONLY TAUGHT LANGUAGE (4). Beginning classroom-based instruction of a language otherwise not taught at OSU. Skill areas addressed include reading, writing, speaking, listening and culture. Not for students who have previous proficiency in the target language. May be repeated for credit for different languages. For a master-apprentice approach, enroll instead in the LING 114, LING 115, LING 116 sequence. This course is repeatable for a maximum of 12 credits. **PREREQS:** LING 111, LING 112, LING 113 must be taken in sequence.

LING 114. MASTER/APPRENTICE STUDY OF A LESS COMMONLY TAUGHT LANGUAGE (1-4). LING 114, LING 115, LING 116 provide context-rich beginning language instruction, in close collaboration with a native speaker, of a language otherwise not taught at OSU. Learners work toward a level of communicative proficiency approaching the intermediate low level in each of the primary skill areas. Four credits of one language are required before moving on to the next course in the sequence. May be repeated for credit for up to three languages. Not for students who have previous proficiency in the target language. This course is repeatable for a maximum of 12 credits.

LING 115. MASTER/APPRENTICE STUDY OF A LESS COMMONLY TAUGHT LANGUAGE (1-4). LING 114, LING 115, LING 116 provide context-rich beginning language instruction, in close collaboration with a native speaker, of a language otherwise not taught at OSU. Learners work toward a level of communicative proficiency approaching the intermediate low level in each of the primary skill areas. Four credits of one language are required before moving on to the next course in the sequence. May be repeated for credit for up to three languages. Not for students who have previous proficiency in the target language. This course is repeatable for a maximum of 12 credits.

LING 116. MASTER/APPRENTICE STUDY OF A LESS COMMONLY TAUGHT LANGUAGE (1-4). LING 114, LING 115, LING 116 provide

context-rich beginning language instruction, in close collaboration with a native speaker, of a language otherwise not taught at OSU. Learners work toward a level of communicative proficiency approaching the intermediate low level in each of the primary skill areas. Four credits of one language are required before moving on to the next course in the sequence. May be repeated for credit for up to three languages. Not for students who have previous proficiency in the target language. This course is repeatable for a maximum of 12 credits.

LING 199. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

LING 208. *WESTERN CULTURE STUDY ABROAD (3). Overseas study of the history and contemporary form of important features of Western culture. Based on at least 10 weeks of studying abroad. **CROSSLISTED** as ANTH 208. (Bacc Core Course) **PREREQS:** Must be arranged with instructor prior to registration. Simultaneous enrollment in Study Abroad program.

LING 209. *CULTURAL DIVERSITY STUDY ABROAD (3). Overseas study of non-Western cultures. Based on at least 10 weeks of studying abroad. **CROSSLISTED** as ANTH 209. (Bacc Core Course) **PREREQS:** Must be arranged with instructor prior to registration. Must also be enrolled in the Study Abroad program.

LING 251. *LANGUAGES OF OREGON (3). Basic lessons in languages spoken in Oregon's minority language communities presented by native informants; discussion, language analysis, and assessment facilitated by linguistics faculty. Languages presented will vary. (Bacc Core Course)

LING 251H. *LANGUAGES OF OREGON (3). Basic lessons in languages spoken in Oregon's minority language communities presented by native informants; discussion, language analysis, and assessment facilitated by linguistics faculty. Languages presented will vary. (Bacc Core Course) **PREREQS:** Honors College approval required.

LING 299. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

LING 359. SELECTED TOPICS IN LINGUISTICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

LING 399. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

LING 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

LING 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

LING 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

LING 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

LING 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

LING 410. INTERNSHIP (1-15). This course is repeatable for a maximum of 16 credits.

LING 451. GENERAL LINGUISTICS (3). Language systems; comparative philology; historical, descriptive, and structural linguistics; semantics; phonetics and phonemics. Not offered every year. **PREREQS:** 9 credits upper-division foreign language training or equivalent.

LING 499. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

LING 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

LING 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

LING 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

LING 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

LING 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

LING 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

LING 510. INTERNSHIP (1-15). This course is repeatable for a maximum of 15 credits. **PREREQS:** Departmental approval required.

LING 545. METHODS AND MATERIALS FOR SECOND LANGUAGE ACQUISITION (4). Historical and contemporary approaches to teaching and assessment in the second language classroom; emphasis on evaluating second language teaching methods and materials. **PREREQS:** Departmental approval required.

LING 551. GENERAL LINGUISTICS (3). Language systems; comparative philology; historical, descriptive, and structural linguistics; semantics; phonetics and phonemics. Not offered every year. **PREREQS:** 9 credits upper-division foreign language training or equivalent.

LING 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

■ QUEER STUDIES COURSES

QS 262. *INTRODUCTION TO QUEER STUDIES (3). Centering itself on activism and scholarship, this course examines homophobia's and transphobia's relationship with racism, colonialism, sexism, ableism, classism and other forms of oppression. Introduces key concepts, histories, and political frameworks within Lesbian, Gay, Bisexual, Transgender, and Queer political movements. (Bacc Core Course) **CROSSLISTED** as WGSS 262.

QS 262H. *INTRODUCTION TO QUEER STUDIES (3). Centering itself on activism and scholarship, this course examines homophobia's and transphobia's relationship with racism, colonialism, sexism, ableism, classism and other forms of oppression. Introduces key concepts, historic histories, and political frameworks within Lesbian, Gay, Bisexual, Transgender, and Queer political movements. (Bacc Core Course) **CROSSLISTED** as WGSS 262H. **PREREQS:** Honors College approval required.

QS 299. SPECIAL TOPICS (3). This course is repeatable for a maximum of 9 credits.

QS 364. *TRANSGENER POLITICS (3). Addresses transgender politics—including transsexual, genderqueer, and gender non-conforming issues—through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. (Bacc Core Course) **CROSSLISTED** as WGSS 364. **PREREQS:** Sophomore standing.

QS 399. SPECIAL TOPICS IN QUEER STUDIES (3). This course is repeatable for a maximum of 12 credits.

QS 409. PRACTICUM: PROJECTS IN QUEER STUDIES (1-12). Capstone projects bring theory into practice through research, design, and implementation of a project that synthesizes and demonstrates learning in the Queer Studies program. This course is repeatable for a maximum of 12 credits. **PREREQS:** Junior or senior standing.

QS 431. *QUEER OF COLOR CRITIQUES (3). "Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. (Bacc Core Course) **CROSSLISTED** as ES 431 and **WGSS 431. PREREQS:** Junior standing.

QS 462. *QUEER THEORIES (3). Engages key themes and critical frameworks in queer theories. Topics include histories of sexuality; forms of oppression, including heterosexism, homophobia, and transphobia; resistance to oppression; violence against LGBTQ people; queer activism; diverse experiences of sexuality; and representations in literature, art, and popular media. (Bacc Core Course) **CROSSLISTED** as **WGSS 462/WGSS 562.**

QS 472. ^INDIGENOUS TWO-SPIRIT AND QUEER STUDIES (3). "Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land. This course addresses indigenous two-spirit/GLBTQ issues through theory, literature, activism, and art. **CROSSLISTED** as **ES 472, WGSS 472 (Writing Intensive Course) PREREQS:** QS 262 or ES 242 or **WGSS 414** or instructor permission

QS 473. TRANSGENDER LIVES (3). Many people in our Western cultures perceive gender as bimodal and fixed from birth. Individuals whose identity of self does not match the individual's biological sex face significant social pressures to conform to gender norms. Students will be introduced to the biological, social and cultural contexts for transgendered individuals. **CROSSLISTED** as **WGSS 473. PREREQS:** **WGSS 262** or **QS 262** or equivalent.

QS 477. *QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM (3). LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. (Bacc Core Course) **CROSSLISTED** as **ES 477/ES 577, WGSS 477/WGSS 577. PREREQS:** **QS 262** and **QS 462**

QS 499. SPECIAL TOPICS IN QUEER STUDIES (3). Topics in gay, lesbian, bisexual, transgender, and queer issues and scholarship. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits.

QS 524. TRANS/GENDER POLITICS (3). Addresses transgender politics—including transsexual, genderqueer, and gender non-conforming issues—through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. **CROSSLISTED** as **WGSS 524. PREREQS:** Graduate student standing.

QS 531. QUEER OF COLOR CRITIQUES (3). "Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. **CROSSLISTED** as **ES 531** and **WGSS 531. PREREQS:** Junior standing.

QS 562. QUEER THEORIES (3). Engages key themes and critical frameworks in queer theories. Topics include histories of sexuality; forms of oppression, including heterosexism, homophobia, and transphobia; resistance to oppression; violence against LGBTQ people; queer activism; diverse experiences of sexuality; and representations in literature, art, and popular media. **CROSSLISTED** as **WGSS 462/WGSS 562.**

QS 572. INDIGENOUS TWO-SPIRIT AND QUEER STUDIES (3). "Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land. This course addresses indigenous two-spirit/GLBTQ issues through theory, literature, activism, and art. **CROSSLISTED** as **ES 572, WGSS 572 PREREQS:** **QS 262** or **ES 242** or **WGSS 414** or **WGSS 514** or instructor permission

QS 573. TRANSGENDER LIVES (3). Many people in our Western cultures perceive gender as bimodal and fixed from birth. Individuals whose identity of self does not match the individual's biological sex face significant social pressures to conform to gender norms. Students will be introduced to the biological, social and cultural contexts for transgendered individuals. **CROSSLISTED** as **WGSS 573. PREREQS:** **WGSS 262** or **QS 262** or equivalent.

QS 577. QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM (3). LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. **CROSSLISTED** as **ES 477/ES 577, WGSS 477/ WGSS 577. PREREQS:** **QS 262** and **QS 462**

QS 599. SPECIAL TOPICS IN QUEER STUDIES (3). Topics in gay, lesbian, bisexual, transgender, and queer issues and scholarship. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits.

■ RUSSIAN COURSES

RUS 111. FIRST-YEAR RUSSIAN (4). Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Designed for students with no prior training in Russian. Native and/or bilingual speakers of Russian will not receive credit for **RUS 111, RUS 112, RUS 113. PREREQS:** **RUS 111, RUS 112, RUS 113** must be taken in order.

RUS 112. FIRST-YEAR RUSSIAN (4). Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Designed for students with no prior training in Russian. Native and/or bilingual speakers of Russian will not receive credit for **RUS 111, RUS 112, RUS 113. PREREQS:** **RUS 111**

RUS 113. FIRST-YEAR RUSSIAN (4). Pronunciation, intonation, grammar, reading, writing, listening comprehension and conversation. Designed for students with no prior training in Russian. Native and/or bilingual speakers of Russian will not receive credit for **RUS 111, RUS 112, RUS 113. PREREQS:** **RUS 112**

RUS 199. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

RUS 211. SECOND-YEAR RUSSIAN (4). Further development of listening comprehension, speaking, reading, and writing skills. Native and/or bilingual speakers of Russian will not receive credit for **RUS 211, RUS 212, RUS 213. PREREQS:** **RUS 113** and/or placement. **RUS 211, RUS 212, RUS 213** must be taken in order.

RUS 212. SECOND-YEAR RUSSIAN (4). Further development of listening comprehension, speaking, reading, and writing skills. Native and/or bilingual speakers of Russian will not receive credit for **RUS 211, RUS 212, RUS 213. PREREQS:** **RUS 211** and/or placement.

RUS 213. SECOND-YEAR RUSSIAN (4). Further development of listening comprehension, speaking, reading, and writing skills. Native and/or bilingual speakers of Russian will not receive credit for **RUS 211, RUS 212, RUS 213.** Completion of **RUS 213** with a grade of C- or better satisfies BA requirement in foreign languages. **PREREQS:** **RUS 212** and/or placement.

RUS 231. *RUSSIAN CULTURE (3). Introduction to basic features of Russian culture originating in the past and continuing into the present. Aspects of history, politics, economics, geography, art, music, literature, and everyday life. Compares Russian culture with Western European and American culture. **RUS 231: Old Russia; RUS 232: 19th Century; RUS 233: 20th Century.** Taught in English. Need not be taken in order. (H) (Bacc Core Course)

RUS 232. *RUSSIAN CULTURE (3). Introduction to basic features of Russian culture originating in the past and continuing into the present. Aspects of history, politics, economics, geography, art, music, literature, and everyday life. Compares Russian culture with Western European and American culture. **RUS 231: Old Russia; RUS 232: 19th Century; RUS 233: 20th Century.** Taught in English. Need not be taken in order. (H) (Bacc Core Course)

RUS 233. *RUSSIAN CULTURE (3). Introduction to basic features of Russian culture originating in the past and continuing into the present. Aspects of history, politics, economics, geography, art, music, literature, and everyday life. Compares Russian culture with Western European and American culture. **RUS 231: Old Russia; RUS 232: 19th Century; RUS 233: 20th Century.** Taught in English. Need not be taken in order. (H) (Bacc Core Course)

RUS 299. SPECIAL STUDIES (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

RUS 311. THIRD-YEAR RUSSIAN (3). Extensive practice in writing, reading, and speaking; refinement of grammar and pronunciation. **PREREQS:** **RUS 213** and departmental approval. **RUS 311, RUS 312, RUS 313** must be taken in order.

RUS 312. THIRD-YEAR RUSSIAN (3). Extensive practice in writing, reading, and speaking; refinement of grammar and pronunciation. **PREREQS:** **RUS 311** and departmental approval.

RUS 313. THIRD-YEAR RUSSIAN (3). Extensive practice in writing, reading, and speaking; refinement of grammar and pronunciation. **PREREQS:** **RUS 312** and departmental approval.

RUS 329. SPECIAL TOPICS IN LANGUAGE, CULTURE, AND/OR LITERATURE (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 16 credits.

RUS 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

RUS 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

RUS 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

RUS 410. INTERNSHIP (1-15).

RUS 411. FOURTH-YEAR RUSSIAN (3). Emphasis on developing writing, speaking, and listening skills for proficiency progressing from textbook Russian to real-life Russian. Includes vocabulary study and some grammar review. Conducted in Russian. **PREREQS:** RUS 313 and departmental approval.

RUS 412. FOURTH-YEAR RUSSIAN (3). Emphasis on developing writing, speaking, and listening skills, so that student's proficiency progresses from textbook Russian to real-life Russian. Includes vocabulary study and some grammar review. Conducted in Russian. **PREREQS:** RUS 411 and departmental approval.

RUS 413. FOURTH-YEAR RUSSIAN (3). Emphasis on developing writing, speaking, and listening skills, so that the student's proficiency progresses from textbook Russian to real-life Russian. Includes vocabulary study and some grammar review. Conducted in Russian. **PREREQS:** RUS 412 and departmental approval.

RUS 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

RUS 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

RUS 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

■ SPANISH COURSES

SPAN 111. FIRST-YEAR SPANISH (4). Development of listening comprehension, speaking, reading, and writing skills. Native speakers and bilingual speakers will not receive credit for SPAN 111, SPAN 112, SPAN 113. Lec/rec. **PREREQS:** Students with previous study of Spanish are admitted only by departmental approval. SPAN 111, SPAN 112, SPAN 113 must be taken in order.

SPAN 112. FIRST-YEAR SPANISH (4). Development of listening comprehension, speaking, reading, and writing skills. Native speakers and bilingual speakers may not receive credit for SPAN 111, SPAN 112, SPAN 113. Lec/rec. **PREREQS:** SPAN 111 or Placement Test and students with previous study of Spanish are admitted only by departmental approval. SPAN 111, SPAN 112, SPAN 113 must be taken in order.

SPAN 113. FIRST-YEAR SPANISH (4). Development of listening comprehension, speaking, reading, and writing skills. Native speakers and bilingual speakers may not receive credit for SPAN 111, SPAN 112, SPAN 113. Lec/rec. **PREREQS:** SPAN 112 or Placement Test and students with previous study of Spanish are admitted only by departmental approval. SPAN 111, SPAN 112, SPAN 113 must be taken in order.

SPAN 117. FIRST-YEAR SPANISH-COMPLETE SEQUENCE (12). Introduction to Spanish. Listening, speaking, reading, and writing skills developed. Students must take all twelve credits. Entire first-year sequence in eight weeks. **PREREQS:** Students with previous study of Spanish are admitted only by approval of the School of Language, Culture, and Society.

SPAN 188. HISPANIC STUDIES, HISPANIC STUDY CENTERS (1-12). Section 1: Topics, Hispanic language. Section 2: Practical work (exercises); Section 3: Topics, Hispanic arts and letters. Section 4: Topics, Hispanic society.

SPAN 199. SPECIAL STUDIES (1-3). This course is repeatable for a maximum of 9 credits.

SPAN 211. SECOND-YEAR SPANISH (4). Further development of listening comprehension, speaking, reading, and writing skills. Native speakers will not receive credit for SPAN 211,

SPAN 212, SPAN 213. **PREREQS:** SPAN 113 or Placement Test and SPAN 211, SPAN 212, SPAN 213 must be taken in order.

SPAN 212. SECOND-YEAR SPANISH (4). Further development of listening comprehension, speaking, reading, and writing skills. Native speakers may not receive credit for SPAN 211, SPAN 212, SPAN 213. **PREREQS:** SPAN 211 or Placement Test

SPAN 213. SECOND-YEAR SPANISH (4). Further development of listening comprehension, speaking, reading, and writing skills. Native speakers may not receive credit for SPAN 211, SPAN 212, SPAN 213. Completion if SPAN 213 with a grade of C- or better satisfies BA requirement for foreign languages. **PREREQS:** SPAN 212 or Placement Test

SPAN 214. SECOND-YEAR SPANISH FOR NATIVE SPEAKERS (4). Designed for native speakers who learned Spanish in a home environment. Introduction to written Spanish. **PREREQS:** SPAN 214, SPAN 215, SPAN 216 must be taken in order.

SPAN 215. SECOND-YEAR SPANISH FOR NATIVE SPEAKERS (4). Designed for native speakers who learned Spanish in a home environment. Introduction to written Spanish. **PREREQS:** SPAN 215

SPAN 216. SECOND-YEAR SPANISH FOR NATIVE SPEAKERS (4). Designed for native speakers who learned Spanish in a home environment. Introduction to written Spanish. Completion of SPAN 216 with a grade of C- or better satisfies BA requirement for foreign languages. **PREREQS:** SPAN 216

SPAN 217. SECOND-YEAR SPANISH-COMPLETE SEQUENCE (12). Intermediate Spanish. Listening, speaking, reading, and writing skills developed. Students must take all 12 credits. Entire second-year sequence in eight weeks. **PREREQS:** SPAN 113 or SPAN 117

SPAN 236. *CONTEMPORARY LATIN AMERICAN CULTURE (3). Students will examine the main currents of modern Latin American culture since the beginning of the 20th century. Key subjects covered include the mural movement, "magical realism" in postwar literature, syncretism in the region's music and religion, and environmentalism in literature and the arts. (Bacc Core Course)

SPAN 237. *U.S. LATINO/A IDENTITIES AND CULTURES (3). An introduction to past and contemporary experiences of Latinos/as in the U.S. related to patterns of (im)migration as well as sociohistorical and political events that have shaped U.S. Latino identities. In addition, the course will explore the current social, political, economical and cultural status and experiences of Latinos/as in different regions of the United States. (Taught in English) (Bacc Core Course)

SPAN 288. HISPANIC STUDIES, HISPANIC STUDY CENTERS (1-12). Section 1: Topics, Hispanic language; Section 2: Practical work (exercises); Section 3: Topics, Hispanic arts and letters; Section 4: Topics, Hispanic society. This course is repeatable for a maximum of 12 credits.

SPAN 299. SPECIAL STUDIES (1-3). This course is repeatable for a maximum of 9 credits.

SPAN 311. ADVANCED SPANISH GRAMMAR (3). Students further develop language skills acquired in earlier courses while studying more complex structural aspects of the language through the application of grammar concepts in composition and other language tasks. **PREREQS:** SPAN 213 or passing score on placement tests.

SPAN 312. INTERMEDIATE WRITING SKILLS (3). Focuses on written communication in Spanish. Authentic texts are used to identify writing processes and products and see how composition is informed by cultural considerations. Special attention will be paid to the author's purpose

and the distinctiveness of the target audience. Students will create original written works and reinforce oral communication skills through class discussions. **PREREQS:** SPAN 213 or passing score on placement tests.

SPAN 313. SPANISH LANGUAGE THROUGH CULTURE (3). Development of Spanish language through an exploration of cultural products, perspectives and practices of Spanish-speaking communities around the world. **PREREQS:** SPAN 213 or passing score on placement tests.

SPAN 314. THIRD-YEAR SPANISH FOR NATIVE SPEAKERS (3). Extensive practice in reading, writing, and speaking; refinement of spelling, grammar and vocabulary within a dynamic cultural context. Native speakers should take SPAN 314, SPAN 315, SPAN 316 instead of SPAN 311, SPAN 312, SPAN 313; credit is not allowed for both. **PREREQS:** SPAN 216 or placement. SPAN 314, SPAN 315, SPAN 316 must be taken in order.

SPAN 315. THIRD-YEAR SPANISH FOR NATIVE SPEAKERS (3). Extensive practice in reading, writing, and speaking; refinement of spelling, grammar and vocabulary within a dynamic cultural context. Native speakers should take SPAN 314, SPAN 315, SPAN 316 instead of SPAN 311, SPAN 312, SPAN 313; credit is not allowed for both. **PREREQS:** SPAN 314 or placement. SPAN 314, SPAN 315, SPAN 316 must be taken in order.

SPAN 316. THIRD-YEAR SPANISH FOR NATIVE SPEAKERS (3). Extensive practice in reading, writing, and speaking; refinement of spelling, grammar and vocabulary within a dynamic cultural context. Native speakers should take SPAN 314, SPAN 315, SPAN 316 instead of SPAN 311, SPAN 312, SPAN 313; credit is not allowed for both. **PREREQS:** SPAN 315 or placement. SPAN 314, SPAN 315, SPAN 316 must be taken in order.

SPAN 317. DIRECTED READING AND WRITING IN SPANISH (3). Emphasis on reading comprehension and improving writing ability. Students will build on their language skills and cultural awareness using different forms of literary expression from the Spanish-speaking world. **PREREQS:** 9 credits of upper-division SPAN.

SPAN 318. INTRODUCTION TO SPANISH LANGUAGE LITERATURE (3). Provides the literary background and analytical tools for students to discuss Spanish language literature with some depth and prepares students for more advanced literature courses. Some discussion of Latin American and Spanish history, politics and culture will provide a context for the readings. **PREREQS:** 9 credits of upper-division Spanish or instructor approval.

SPAN 319. SPANISH FOR BUSINESS (3). Introduction to the Spanish business world and commercial language. Development of business vocabulary, discussion, practice in writing resumes, business letters and reports. Conducted in Spanish. May not be offered every year. **PREREQS:** SPAN 312 or instructor approval required.

SPAN 320. SPANISH CONVERSATION (3). Extensive listening and speaking practice in Spanish, and systematic contact with Latin culture. Emphasis on vocabulary, pronunciation, intonation, and comprehension. Native speakers of Spanish are not eligible to take this course. May be used to satisfy requirements for the major or minor. **PREREQS:** 6 credits of upper-division Spanish.

SPAN 327. MEXICAN-AMERICAN LIT & COMP FOR SPAN HERITAGE LANG LEARNERS (3). Combines the study of fiction, drama, and poetry in Spanish language produced by people of Mexican origin in what is today the United States, with intensive practice in the writing of formal Spanish. Students are encouraged to develop their independent thinking and analytical ability. Designed for students from a Spanish-speaking background. **PREREQS:** SPAN 316 or instructor approval.

SPAN 331. *THE CULTURES OF SPAIN AND PORTUGAL (3). Historical development of the cultures and societies of the Iberian peninsula. Taught in Spanish. (H) (Bacc Core Course)
PREREQS: Completion of 9 credits from SPAN 311, SPAN 312, SPAN 313, SPAN 317, SPAN 318.

SPAN 332. *THE CULTURES OF SPAIN AND PORTUGAL (3). Historical development of the cultures and societies of the Iberian peninsula. Taught in Spanish. (H) (Bacc Core Course)
PREREQS: Completion of 9 credits from SPAN 311, SPAN 312, SPAN 313, SPAN 317, SPAN 318.

SPAN 333. CULTURES OF SPAIN AND PORTUGAL (3). Historical development of the cultures and societies of today's Iberian peninsula. Taught in Spanish. **PREREQS:** Completion of 9 credits from SPAN 311, SPAN 312, SPAN 313, SPAN 317, SPAN 318.

SPAN 336. *LATIN AMERICAN CULTURE (3). Historical development of the cultures and societies of Latin America, with an emphasis on Spanish- and Portuguese-speaking peoples. Taught in Spanish. (H) (Bacc Core Course)
PREREQS: Completion of 9 credits from SPAN 311, SPAN 312, SPAN 313, SPAN 317, SPAN 318.

SPAN 337. *LATIN AMERICAN CULTURE (3). Historical development of the cultures and societies of Latin America, with an emphasis on Spanish- and Portuguese-speaking peoples. Taught in Spanish. (H) (Bacc Core Course)
PREREQS: Completion of 9 credits from SPAN 311, SPAN 312, SPAN 313, SPAN 317, SPAN 318.

SPAN 338. *LATIN AMERICAN CULTURE (3). Historical development of the cultures and societies of Latin America, with an emphasis on Spanish- and Portuguese-speaking peoples. Taught in Spanish. (H) (Bacc Core Course)
PREREQS: Completion of 9 credits from SPAN 311, SPAN 312, SPAN 313, SPAN 317, SPAN 318.

SPAN 339. MEXICAN IMMIGRANT EXPERIENCE IN THE UNITED STATES (3). An interdisciplinary analysis of the immigration from Mexico to the United States. It will include discussions of literary, cultural and political accounts. Emphasis on the development of presentational communication skills in Spanish. Taught in Spanish. **PREREQS:** 12 credits from SPAN 314, SPAN 315, SPAN 316, SPAN 317, SPAN 318, SPAN 331, SPAN 332, SPAN 336, SPAN 337, SPAN 338.

SPAN 344. SELECTED TOPICS IN LITERATURE (3). Taught in Spanish. May be repeated for credit when topic varies. See Schedule of Classes for current term offering. This course is repeatable for a maximum of 9 credits. **PREREQS:** Completion of 9 credits from SPAN 311, SPAN 312, SPAN 313, SPAN 317, SPAN 318.

SPAN 350. PHONETICS AND PRONUNCIATION (3). An exploration of the organs of speech and hearing, acoustic analysis, and transcription of native and learner Spanish speech samples. **PREREQS:** 3 credits of upper-division Spanish.

SPAN 351. HISPANIC LINGUISTICS (3). Scientific approach to the structure of the Spanish language: syntax, phonology, word formation, dialectal differences. Taught in Spanish. Recommended for teacher certification. **PREREQS:** SPAN 350

SPAN 379. PROCTOR EXPERIENCE (1). Supervised practicum for advanced students, with assignments as proctors or tutors in lower-division Spanish language courses. No more than 2 credits may be used to satisfy degree requirements for a major in Spanish; no credit may be used to satisfy requirements for a minor in Spanish. Graded P/N. This course is repeatable for a maximum of 3 credits. **PREREQS:** Completion of 21 upper-division credits in Spanish with a minimum 3.00 GPA.

SPAN 388. HISPANIC STUDIES, HISPANIC STUDY CENTERS (1-12). Section 1: Topics, Hispanic language. Section 2: Practical work

(exercises). Section 3: Topics, Hispanic arts and letters. Section 4: Topics, Hispanic society. This course is repeatable for a maximum of 12 credits.

SPAN 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

SPAN 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SPAN 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SPAN 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SPAN 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SPAN 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SPAN 410. INTERNSHIP (1-15).

SPAN 411. SPECIALIZED GRAMMAR OR LINGUISTICS TOPICS (3). Students develop an in-depth knowledge of various linguistic aspects of Spanish, particularly in regard to problematic grammatical structures and the development of writing proficiency. The main focus is on integrating a thorough understanding of grammatical structures into writing using selected literary works as models. Students analyze their own linguistic progress and apply this meta-knowledge to their writing. **PREREQS:** 18 credits of upper-division Spanish.

SPAN 412. ADVANCED COMPOSITION (3). Emphasis on creative writing. Students will read and discuss a series of stories with the same theme, then write their own. The subjunctive and other advanced grammar topics will be reviewed and incorporated into the writing activities. Taught in Spanish. **PREREQS:** 18 credits of upper-division Spanish or instructor approval.

SPAN 413. ADVANCED COMMUNICATION SKILLS (3). Contextualized exploration of skills outlined in the National Standards Project's "Five Cs" and in the additional area of critical consciousness with particular emphasis on language used in journalism and the mass media. This course meets 3 hours per week. **PREREQS:** 18 credits of upper-division Spanish or instructor approval.

SPAN 435. SPECIAL TOPICS IN LATIN AMERICAN CULTURE (3). Historical and contemporary aspects of the cultures of Latin America. May include material relevant to Spain and U.S. Latinos. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. This course is repeatable for a maximum of 9 credits. **PREREQS:** 18 credits of upper-division Spanish or instructor approval.

SPAN 438. ^SELECTED TOPICS IN LUSO-HISPANIC CULTURE (3). Contemporary aspects of the cultures of Spain, Portugal, or Latin America with a cross-cultural perspective. Topics and language of instruction vary. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. Not offered every year. (Writing Intensive Course) This course is repeatable for a maximum of 9 credits. **PREREQS:** Completion of 6 credits from SPAN 331, SPAN 332, SPAN 333, SPAN 336, SPAN 337, SPAN 338.

SPAN 439. ^TOPICS IN MEXICAN CULTURE AS EVIDENCED THROUGH MEXICAN FILM (3). Critical analysis and evaluation of films as cultural texts that open up a window into Mexican society. Movies with strong sexual content, explicit violence, language, and/or drug use will be viewed in the class. Taught in Spanish with some readings in English. May be repeated for credit when topic varies. Not offered every year. (Writing Intensive

Course) This course is repeatable for a maximum of 9 credits. **PREREQS:** Course is designed for Spanish heritage learners and advanced students of Spanish as a second language who have completed 12 credits from SPAN 316, SPAN 317, SPAN 318, SPAN 331, SPAN 332, SPAN 333, SPAN 336, SPAN 337, SPAN 338, SPAN 339, SPAN 411, SPAN 412, SPAN 413 with a grade of B- or better.

SPAN 444. SELECTED TOPICS IN THE LITERATURE OF SPAIN (3). Representative Spanish prose, poetry, and drama, with an emphasis on the 19th and 20th centuries. Taught in Spanish. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for a maximum of 12 credits. **PREREQS:** Completion of 21 upper-division credits in Spanish.

SPAN 445. SELECTED TOPICS IN THE LITERATURE OF LATIN AMERICA (3). Representative prose, poetry, and drama of Spanish America and/or Brazil, with an emphasis on the mid-19th century to the present. Topics and language of instruction may vary. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. Not offered every year. This course is repeatable for a maximum of 18 credits. **PREREQS:** Completion of 21 upper-division credits in Spanish.

SPAN 446. RECENT LATIN AMERICAN LITERATURE (3). Recent fiction that goes beyond Magical Realism. Discussion includes literary techniques, as well as Latin American history, politics and cultural values. Taught in Spanish. **PREREQS:** Completion of 21 upper-division credits of Spanish.

SPAN 447. MEXICAN WOMEN WRITERS (3). Fiction by contemporary Mexican women, emphasizing how the writing reflects the authors' lives, as well as Mexican history, politics and cultural values. Taught in Spanish. **PREREQS:** Completion of 21 upper-division credits of Spanish.

SPAN 448. LATIN AMERICAN GREAT WORKS (3). Major works by Latin American writers, concentrating on literary style and technique, as well as Latin American history, politics and culture. Taught in Spanish. **PREREQS:** Completion of 21 upper-division credits of Spanish.

SPAN 453. SPANISH SOCIOLINGUISTICS (3). Provides a foundation of sociolinguistic theory from which various topics can be analyzed, discussed and applied to language situations that are specific to Spanish. These include language contact, Spanish varieties, language policy, and language attitudes. All topics are presented within the context of speech communities and the external and internal variables that affect these communities. **PREREQS:** SPAN 350

SPAN 455. INTRODUCTION TO SPANISH TRANSLATION (3). Combines beginning translation theory with hands-on practice using a variety of activities from several areas of professional specialization. Includes a brief introduction to simultaneous interpretation as it is done in professional conference or broadcast media settings. Participants must be highly proficient in both English and Spanish. **PREREQS:** 12 credits of upper-division Spanish.

SPAN 456. SPANISH IN THE UNITED STATES (3). Provides a foundation for the study of Spanish in the United States. Focuses on the diverse identities of Latino/as and Spanish speakers as they define what it means to be bilingual locally, regionally, and nationally. Spanish and Spanish-English bilingualism will be studied from critical sociolinguistic, historical and political perspectives. **PREREQS:** SPAN 350

SPAN 461. FIFTH-YEAR SPANISH (3). Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to

specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing. **PREREQS:** SPAN 413 or placement, and departmental approval required. SPAN 461, SPAN 462, SPAN 463 must be taken in order.

SPAN 462. FIFTH-YEAR SPANISH (3). Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing. **PREREQS:** SPAN 461 or placement, and departmental approval required.

SPAN 463. FIFTH-YEAR SPANISH (3). Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing. **PREREQS:** SPAN 462 or placement, and departmental approval required.

SPAN 470. *^ADVANCED SPANISH COORDINATED STUDIES (1-30). Interdisciplinary examination of a topic related to points of contact between Spanish- and English-speaking populations in Oregon and beyond. Includes the study of literature, culture, language skills, and a service-learning component. Constitutes a full-time course load. Taught in Spanish. (Bacc Core Course) (Writing Intensive Course) This course is repeatable for a maximum of 30 credits.

SPAN 488. HISPANIC STUDIES, HISPANIC STUDY CENTERS (1-12). Section 1: Topics, Hispanic language. Section 2: Practical work (exercises). Section 3: Topics, Hispanic arts and letters. Section 4: Topics, Hispanic society. This course is repeatable for a maximum of 12 credits.

SPAN 499. SPECIAL TOPICS (1-16). May be repeated for credit when topic varies. See Schedule of Classes for current offerings and prerequisites. Not offered every year. This course is repeatable for a maximum of 99 credits.

SPAN 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SPAN 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SPAN 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

SPAN 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SPAN 506. SPECIAL PROJECTS (1-16). **PREREQS:** Departmental approval required.

SPAN 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SPAN 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

SPAN 510. INTERNSHIP (1-15). This course is repeatable for a maximum of 15 credits.

SPAN 511. SPECIALIZED GRAMMAR OR LINGUISTICS TOPICS (3). Students develop an in-depth knowledge of various linguistic aspects of Spanish, particularly in regard to problematic grammatical structures and the development of writing proficiency. The main focus is on integrating a thorough understanding of grammatical structures into writing using selected literary works as models. Students analyze their own linguistic progress and apply this meta-knowledge to their writing. **PREREQS:** 18 credits of upper-division Spanish.

SPAN 512. ADVANCED COMPOSITION (3). Emphasis on creative writing. Students will read and discuss a series of stories with the same theme, then write their own. The subjunctive and other advanced grammar topics will be reviewed and incorporated into the writing activities. Taught in Spanish. **PREREQS:** 18 credits of upper-division Spanish or instructor approval.

SPAN 513. ADVANCED COMMUNICATION SKILLS (3). Contextualized exploration of skills outlined in the National Standards Project's "Five Cs" and in the additional area of critical consciousness with particular emphasis on language used in journalism and the mass media. This course meets 3 hours per week. **PREREQS:** 18 credits of upper-division Spanish or instructor approval.

SPAN 535. SPECIAL TOPICS IN LATIN AMERICAN CULTURE (3). Historical and contemporary aspects of the cultures of Latin America. May include material relevant to Spain and U.S. Latinos. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. This course is repeatable for a maximum of 9 credits. **PREREQS:** 18 credits of upper-division Spanish or instructor approval.

SPAN 538. SELECTED TOPICS IN LUSO-HISPANIC CULTURE (3). Contemporary aspects of the cultures of Spain, Portugal, or Latin America with a cross-cultural perspective. Topics and language of instruction vary. Not offered every year. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. This course is repeatable for a maximum of 9 credits. **PREREQS:** Completion of 6 credits from SPAN 331, SPAN 332, SPAN 333, SPAN 336, SPAN 337, SPAN 338.

SPAN 544. SELECTED TOPICS IN THE LITERATURE OF SPAIN (3). Representative Spanish prose, poetry, and drama, with an emphasis on the 19th and 20th centuries. Taught in Spanish. Not offered every year. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits. **PREREQS:** Completion of 21 upper-division credits in Spanish.

SPAN 545. SELECTED TOPICS IN THE LITERATURE OF LATIN AMERICA (3). Representative prose, poetry, and drama of Spanish America and/or Brazil, with an emphasis on the mid-19th century to the present. Topics and language of instruction may vary. Not offered every year. See Schedule of Classes for current term offering. May be repeated for credit when topic varies. This course is repeatable for a maximum of 18 credits. **PREREQS:** Completion of 21 upper-division credits in Spanish.

SPAN 546. RECENT LATIN AMERICAN LITERATURE (3). Recent fiction that goes beyond Magical Realism. Discussion includes literary techniques, as well as Latin American history, politics and cultural values. Taught in Spanish. **PREREQS:** Completion of 21 upper-division credits in Spanish.

SPAN 547. MEXICAN WOMEN WRITERS (3). Fiction by contemporary Mexican women, emphasizing how the writing reflects the authors' lives, as well as Mexican history, politics and cultural values. Taught in Spanish. **PREREQS:** 21 upper-division credits of Spanish.

SPAN 548. LATIN AMERICAN GREAT WORKS (3). Major works by Latin American writers, concentrating on literary style and technique, as well as Latin American history, politics and culture. Taught in Spanish. **PREREQS:** 21 upper-division credits of Spanish.

SPAN 552. INTRODUCTION TO SPANISH SOCIOLINGUISTICS (3). Provides a foundation of sociolinguistic theory in order to analyze, discuss and apply the theory to Spanish language situations, such as language contact, Spanish

varieties, language politics, and language attitudes; all within the context of a speech community and the external and internal variables that affect it.

SPAN 553. SPANISH SOCIOLINGUISTICS (3). Provides a foundation of sociolinguistic theory from which various topics can be analyzed, discussed and applied to language situations that are specific to Spanish. These include language contact, Spanish varieties, language policy, and language attitudes. All topics are presented within the context of speech communities and the external and internal variables that affect these communities. **PREREQS:** SPAN 350

SPAN 555. INTRODUCTION TO SPANISH TRANSLATION (3). Combines beginning translation theory with hands-on practice using a variety of activities from several areas of professional specialization. Includes a brief introduction to simultaneous interpretation as it is done in professional conference or broadcast media settings. Participants must be highly proficient in both English and Spanish. **PREREQS:** 12 credits of upper-division Spanish.

SPAN 556. SPANISH IN THE UNITED STATES (3). Provides a foundation for the study of Spanish in the United States. Focuses on the diverse identities of Latino/as and Spanish speakers as they define what it means to be bilingual locally, regionally, and nationally. Spanish and Spanish-English bilingualism will be studied from critical sociolinguistic, historical and political perspectives. **PREREQS:** SPAN 350

SPAN 561. FIFTH-YEAR SPANISH (3). Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing. **PREREQS:** SPAN 413 or placement, and departmental authorization. SPAN 561, SPAN 562, SPAN 563 must be taken in order.

SPAN 562. FIFTH-YEAR SPANISH (3). Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing. **PREREQS:** SPAN 561 or placement, and departmental authorization.

SPAN 563. FIFTH-YEAR SPANISH (3). Continued development of listening comprehension, speaking, and writing skills. Introduction to debate and platform speaking in Spanish, and to specialized interests of students, e.g., methods and philosophies of interpretation and translation, business Spanish, creative writing. **PREREQS:** SPAN 562 or placement, and departmental authorization.

SPAN 569. TOPICS IN JOTERIA STUDIES (3). Creates a space for engaging with arts, activism and scholarship emerging from queer Latin@/Chican@ experiences and consciousness. Offered winter term in odd years. This course is repeatable for a maximum of 6 credits. **PREREQS:** Instructor approval.

SPAN 570. GRAD SPANISH COORDINATED STUDIES (1-15). An intensive, team-taught course in which learners engage in advanced exploration of issues of importance to Spanish-speaking communities in Oregon and facilitate the learning of undergraduate native speaker and second language students. Topics change regularly. The course addresses all communicative areas (reading, writing, speaking and listening) and includes content in the areas of literature, linguistics, culture, civic engagement, and service-learning. Successful completion of the full 15 credits with a grade of B or higher meets requirements for the graduate minor in

Contemporary Hispanic Studies. This course is repeatable for a maximum of 30 credits.

PREREQS: Completion of SPAN 599, Special Topics: "Developing a Learning Community".

SPAN 588. HISPANIC STUDIES, HISPANIC STUDY CENTERS (1-12). Section 1: Topics, Hispanic language. Section 2: Practical work (exercises). Section 3: Topics, Hispanic arts and letters. Section 4: Topics, Hispanic society.

SPAN 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits.

SPAN 808. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

■ WOMEN, GENDER AND SEXUALITY STUDIES COURSES

WGSS 199. SPECIAL STUDIES (1-3). Special topics of contemporary relevance to research of women and gender role issues. For students who seek an elementary introduction to a specific realm of women, gender, and sexuality studies. May be repeated for credit when topic varies. This course is repeatable for a maximum of 9 credits.

WGSS 223. *WOMEN: SELF AND SOCIETY (3). Multidisciplinary introduction to women, gender, and sexuality studies. Focuses on the lives and status of women in society and explores ways institutions such as family, work, media, law and religion affect different groups of women. Explores issues of gender, race, class, age, sexual orientation, size and ability. (SS) (Bacc Core Course)

WGSS 223H. *WOMEN: SELF AND SOCIETY (3). Multidisciplinary introduction to women, gender, and sexuality studies. Focuses on the lives and status of women in society and explores ways institutions such as family, work, media, law and religion affect different groups of women. Explores issues of gender, race, class, age, sexual orientation, size and ability. (SS) (Bacc Core Course) **PREREQS:** Honors College approval required.

WGSS 224. *WOMEN: PERSONAL AND SOCIAL CHANGE (3). Examines the way the questioning of traditional gender roles and their accompanying power structures can lead to change in women's personal and public lives. Explores women's heritage and contributions and focuses on issues of self-growth and social movements for change. (SS) (Bacc Core Course)

WGSS 230. *WOMEN IN THE MOVIES (3). Examines ways women are depicted in the movies and how those depictions are created by and create larger social constructions of women. Special attention is given to the intersections of race, class, sexual identity, and age with gender. (Bacc Core Course)

WGSS 230H. *WOMEN IN THE MOVIES (3). Examines ways women are depicted in the movies and how those depictions are created by and create larger social constructions of women. Special attention is given to the intersections of race, class, sexual identity, and age with gender. (Bacc Core Course) **PREREQS:** Honors College approval required.

WGSS 235. *WOMEN IN WORLD CINEMA (3). Explores constructions and practices of gender in a transnational, multi-religious, and global framework by examining a wide variety of films about women around the world. (Bacc Core Course)

WGSS 235H. *WOMEN IN WORLD CINEMA (3). Explores constructions and practices of gender in a transnational, multi-religious, and global framework by examining a wide variety of films about women around the world. (Bacc Core Course) **PREREQS:** Honors College approval required.

WGSS 240. *WOMEN IN SPORT (3). Focuses on the influence of sport, a gendered institution, on women from cultural, psychosocial, and political

perspectives, as well as how influential women can be in redefining sport to be more socially inclusive. Examines intersections of gender with age, social class, income status, race and ethnicity and politics. (Bacc Core Course)

WGSS 262. *INTRODUCTION TO QUEER STUDIES (3). Centering itself on activism and scholarship, this course examines homophobia's and transphobia's relationship with racism, colonialism, sexism, ableism, classism and other forms of oppression. Introduces key concepts, histories, and political frameworks within Lesbian, Gay, Bisexual, Transgender, and Queer political movements. (Bacc Core Course) **CROSSLISTED** as QS 262.

WGSS 262H. *INTRODUCTION TO QUEER STUDIES (3). Centering itself on activism and scholarship, this course examines homophobia's and transphobia's relationship with racism, colonialism, sexism, ableism, classism and other forms of oppression. Introduces key concepts, histories, and political frameworks within Lesbian, Gay, Bisexual, Transgender, and Queer political movements. (Bacc Core Course) **CROSSLISTED** as QS 262H. **PREREQS:** Honors College approval required.

WGSS 270. VIOLENCE AGAINST WOMEN (3). Addresses issues of domestic violence, rape, dating violence, as well as contemporary social debates about pornography and the media's impact on increasing violence against women. (SS)

WGSS 280. *WOMEN WORLDWIDE (3). Focuses on women's experiences throughout the world and examines women's issues and status cross-culturally. (Bacc Core Course)

WGSS 280H. *WOMEN WORLDWIDE (3). Focuses on women's experiences throughout the world and examines women's issues and status cross-culturally. (Bacc Core Course) **PREREQS:** Honors College approval required.

WGSS 299. TOPICS IN WOMEN, GENDER, AND SEXUALITY STUDIES (1-6). Current topics related to women, gender and sexuality. Description and analysis of different realms of knowledge about gender issues. This course is repeatable for a maximum of 12 credits.

WGSS 320. *GENDER IN TECHNOLOGY (3). Explores women's contributions and focuses in technology fields. Analyzes gendered nature of technology. Theory and practice of technologies. (Bacc Core Course)

WGSS 325. *DISNEY: GENDER, RACE, EMPIRE (3). Explores constructions of gender, race, class, sexuality, and nation in the animated films of Walt Disney; introduces concepts in film theory and criticism, and develops analyses of the politics of representation. (Bacc Core Course)

WGSS 325H. *DISNEY: GENDER, RACE, EMPIRE (3). Explores constructions of gender, race, class, sexuality, and nation in the animated films of Walt Disney; introduces concepts in film theory and criticism, and develops analyses of the politics of representation. (Bacc Core Course) **PREREQS:** Honors College approval required.

WGSS 340. *GENDER AND SCIENCE (3). Analyzes the relationship between society and science by explaining technology and science as gendered practices and bodies of knowledge. Focuses on the ways the making of women and men affect the making of science and explores the roles of women in scientific pursuits. (SS) (Bacc Core Course)

WGSS 350. *POLITICS OF MOTHERHOOD IN A GLOBAL CONTEXT (3). Introduces students to the politics of motherhood in global contexts, focusing on politics of transnational adoption; motherhood, surrogacy, and biotechnologies; effects of globalization on mothering across borders; mothering in the global welfare state; movements for reproductive justice; and transnational representations of motherhood.

(Bacc Core Course)

WGSS 360. *MEN AND MASCULINITIES IN A GLOBAL CONTEXT (3). Students will become familiar with central topics in global masculinity studies, analyze texts in diverse media, develop original arguments, and engage with issues of masculinity and representation through written and creative work. (Bacc Core Course)

WGSS 360H. *MEN AND MASCULINITIES (3). Students will become familiar with central topics in global masculinity studies, analyze texts in diverse media, develop original arguments, and engage with issues of masculinity and representation through written and creative work. (Bacc Core Course) **PREREQS:** Honors College approval required.

WGSS 364. *TRANSGENDER POLITICS (3). Addresses transgender politics--including transsexual, genderqueer, and gender non-conforming issues--through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. (Bacc Core Course) **CROSSLISTED** as QS 364. **PREREQS:** Sophomore standing.

WGSS 373. APPROACHES TO SOCIAL JUSTICE (3). Students study various ways of thinking about social justice and evaluate these in case studies and current events. As a basis for the Social Justice minor, students write a research paper on the theoretical and practical aspects of a social justice issue. **CROSSLISTED** as ANTH 373, ES 373, WLC 373.

WGSS 380. *MUSLIM WOMEN (3). Examines the lives and experiences of Muslim women in Islamic communities around the world from a variety of perspectives in order to highlight issues significant for contemporary Muslim women: family, education, work, politics, health, marriage, divorce, war, and violence. (Bacc Core Course)

WGSS 380H. *MUSLIM WOMEN (3). Examines the lives and experiences of Muslim women in Islamic communities around the world from a variety of perspectives in order to highlight issues significant for contemporary Muslim women: family, education, work, politics, health, marriage, divorce, war, and violence. (Bacc Core Course) **PREREQS:** Honors College approval required.

WGSS 399. TOPICS IN WOMEN, GENDER, AND SEXUALITY STUDIES (1-6). Current topics in women, gender, and sexuality. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits.

WGSS 399H. TOPICS IN WOMEN, GENDER, AND SEXUALITY STUDIES (1-6). Current topics in women, gender, and sexuality. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits. **PREREQS:** Honors College approval required.

WGSS 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WGSS 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WGSS 407. SEMINAR (3). This course is repeatable for a maximum of 99 credits.

WGSS 410. INTERNSHIP (1-16). The internship experience provides the opportunity to gain experience within an off-campus private, public, or community agency or organization which has as one of its goals the improvement of the status of women in society. Students work with an on-site mentor who guides their field experience in collaboration with the internship coordinator in the WGSS program. Only 6 credits will count toward the Women, Gender, and Sexuality Studies major. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WGSS 414. SYSTEMS OF OPPRESSION IN WOMEN'S LIVES (3). Explores the ways different

systems of oppression and discrimination impact women's lives. Examines sexism, classism, racism, and anti-Jewish oppression, as well as discrimination against queer women, older women, and those who differ in ability and appearance. (SS) (Bacc Core Course) **PREREQS:** WS 223 or WS 223H or WGSS 223 or WGSS 223H and/or instructor approval required.

WGSS 414H. *SYSTEMS OF OPPRESSION IN WOMEN'S LIVES (3). Explores the ways different systems of oppression and discrimination impact women's lives. Examines sexism, classism, racism, and anti-Jewish oppression, as well as discrimination against queer women, older women, and those who differ in ability and appearance. (SS) (Bacc Core Course) **PREREQS:** WS 223 or WS 223H or WGSS 223 or WGSS 223H and Honors College approval required or instructor approval required.

WGSS 416. THEORIES OF FEMINISM (4). Explores feminist conceptions about the nature of the world, women's reality and visions for change. Analyzes major issues raised by the women's movement and the development of feminist ideas, as well as provides a critical examination of feminist thought and different theories which comprise it. **PREREQS:** WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 and/or instructor approval required.

WGSS 417. FEMINIST PHILOSOPHIES (3). Diverse forms of feminist philosophy, including a variety of critiques, especially those based on race and class, with in-depth consideration of selected social issues, such as rape and pornography. **CROSSLISTED** as PHL 417/PHL 517. **PREREQS:** 6 credits of philosophy or upper-division standing.

WGSS 418. FEMINIST RESEARCH METHODS (4). Introduces feminist research methods associated with research design, analysis, and interpretation. It utilizes feminist social justice frameworks and focuses on in-depth interviewing and focus groups, oral histories, ethnography, and visual and textual analysis, as well as survey design and community-based participatory research. **PREREQS:** WGSS 414 and junior standing

WGSS 420. *HATE, RESISTANCE, AND RECONCILIATION (3). Examines hate movements, hate-related activities, and resistant acts and movements. Special attention is given to the role of gender. (Bacc Core Course)

WGSS 420H. *HATE, RESISTANCE, AND RECONCILIATION (3). Examines hate movements, hate-related activities, and resistant acts and movements. Special attention is given to the role of gender. (Bacc Core Course) **PREREQS:** Honors College approval required.

WGSS 430. WOMEN OF COLOR FEMINISMS (4). Explores the contemporary experiences of women of color, as well as the theoretical and practical frameworks of women of color feminisms. Analyses key themes in women of color feminisms, including politics of representation, multiple forms of state and interpersonal violence, intersecting forms of oppression, economic justice, reproductive justice, and strategies of resistance. **PREREQS:** WS 223 or WS 223H or WGSS 223 or WGSS 223H and WGSS 223 or WGSS 223H or WS 223 or WS 223H

WGSS 431. *QUEER OF COLOR CRITIQUES (3). "Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. (Bacc Core Course) **CROSSLISTED** as ES 431 and QS 431. **PREREQS:** Junior standing.

WGSS 440. *WOMEN AND NATURAL RESOURCES (3). Explores the relationship between women and natural resources. In

particular, the course examines the roles of policy, technology, culture, and management in women's use and control of natural resources. (Bacc Core Course)

WGSS 450. ECOFEMINISM (3). Focuses on the ecological and feminist principles that mediate humanity's relationship with nature. (See Schedule Comment regarding Bacc Core status.) **PREREQS:** Upper-division standing.

WGSS 460. ^WOMEN AND SEXUALITY (3). Explores the historical, theoretical, and political dimensions of female sexuality. The course also examines the basic assumptions about the meaning of female sexuality, how it has been shaped and controlled, and why women's sexuality has been/is a source of both women's liberation and subjugation. (SS) (Writing Intensive Course) **PREREQS:** WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 and/or instructor approval required.

WGSS 462. *QUEER THEORIES (3). Engages key themes and critical frameworks in queer theories. Topics include history of sexuality; forms of oppression including heterosexism, homophobia, and transphobia; resistance to oppression; violence against LGBTQ people; queer activism; diverse experiences of sexuality; and representations in literature, art, and popular media. (Bacc Core Course) **CROSSLISTED** as QS 462/QS 562. **PREREQS:** Junior standing.

WGSS 463. *GLOBAL SEX WORK AND TRAFFICKING (3). Examination of sex work and trafficking, cross culturally drawing upon case studies from Africa, Asia, the Americas, and Europe. It explores legal and regulatory debates, diversity of sex work-related experiences, and sex work-related social activism to uncover the gendered intersections of power and privilege from a global perspective. (Bacc Core Course) **PREREQS:** WGSS 223 or WS 223 or WGSS 224 or WS 224

WGSS 465. WOMEN, WEIGHT, AND BODY IMAGE (3). Focuses on women's increasing struggles with weight, eating disorders, and broader body image issues in contemporary society. Explores how social institutions such as media, medicine, and government contribute to weight bias and unhealthy standards for appearance. Examines weightism as a system of oppression that intersects with other systems of oppression including sexism, racism, classism, heterosexism, ableism, and ageism. **PREREQS:** WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224

WGSS 466. *FAT STUDIES (3). Examines body weight, shape, and size as an area of human difference subject to privilege and discrimination that intersects with other systems of oppression based on gender, race, class, age, sexual orientation, and ability. Employs a multi-disciplinary approach spanning the behavioral sciences and humanities. Frames weight-based oppression as a social justice issue, exploring forms of activism used to counter weightism perpetuated throughout various societal institutions. **CROSSLISTED** as PSY 466/PSY 566 (Bacc Core Course) **PREREQS:** WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224

WGSS 472. ^INDIGENOUS TWO-SPIRIT AND QUEER STUDIES (3). "Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land. This course addresses indigenous two-spirit/GLBTQ issues through theory, literature, activism, and art. **CROSSLISTED** as ES 472, QS 472. **PREREQS:** QS 262 or ES 242 or WGSS 414 or instructor permission

WGSS 473. TRANSGENDER LIVES (3). Many people in our Western cultures perceive gender as bimodal and fixed from birth. Individuals

whose identity of self does not match the individual's biological sex face significant social pressures to conform to gender norms. Students will be introduced to the biological, social and cultural contexts for transgendered individuals. **CROSSLISTED** as QS 473. **PREREQS:** WGSS 262 or QS 262 or equivalent.

WGSS 477. *QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM (3). LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. (Bacc Core Course) **CROSSLISTED** as ES 477/ES 577, QS 477/QSS 577. **PREREQS:** QS 262 and QS 464

WGSS 480. *INTERNATIONAL WOMEN (3). Examines the lives and experiences of women in different parts of the world, looking at work, education, the family, the arts and social movements. Explores the comparative realities of various women's struggles for social justice and studies key definitions and theoretical assumptions relevant to the subject of global feminism. (NC) (Bacc Core Course) **PREREQS:** WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 and/or instructor approval.

WGSS 480H. *INTERNATIONAL WOMEN (3). Examines the lives and experiences of women in different parts of the world, looking at work, education, the family, the arts and social movements. Explores the comparative realities of various women's struggles for social justice and studies key definitions and theoretical assumptions relevant to the subject of global feminism. (NC) (Bacc Core Course) **PREREQS:** / or instructor approval. Honors College approval required.

WGSS 482. GLOBAL PERSPECTIVES ON WOMEN'S HEALTH (4). Women's health issues are examined from a global perspective in the context of a woman's life and through a feminist political lens. Central to our discussions will be an analysis of the interplay among race, class, and gender in shaping particular health care outcomes. The course stresses the potential for women's agency and autonomy with respect to improving their health and environments.

WGSS 485. CAPSTONE IN SOCIAL JUSTICE (2). Working with an advisor from the Social Justice minor, students conduct research to synthesize and extend analysis of a particular social justice issue, building on three previous papers or projects. Results are presented in a 10-15 page paper and a public poster, presentation or website. **CROSSLISTED** as ANTH 485, ES 485, WLC 485. This course is repeatable for a maximum of 4 credits. **PREREQS:** (ANTH 373 or ES 373 or WGSS 373 or WLC 373) and (ANTH 410 or ES 410 or WGSS 410 or WLC 410)

WGSS 486. GLOBAL EXPERIENCE I (1). Prepares students to participate in a short-term study abroad experience that emphasizes volunteer experiences in women's organizations and analysis from transnational feminist perspectives.

WGSS 487. GLOBAL EXPERIENCE II (1). Engages students in a short-term study abroad experience that emphasizes volunteer experiences in women's organizations and analysis from transnational feminist perspectives. **PREREQS:** WS 486 or WS 586 or WGSS 486 or WGSS 586

WGSS 488. GLOBAL EXPERIENCE III (1). Students reflect on their short-term study abroad experience by engaging in in-depth transnational feminist analysis of particular aspects of the study abroad experience. **PREREQS:** WS 486 or WS 487 or WGSS 486 or WGSS 487

WGSS 490. SELF-ESTEEM AND PERSONAL POWER (3). Explores ways to improve self-

esteem and develop personal power. Focuses on issues of self and identity, contextualizing these in the ways gender is constructed in society. (SS) **PREREQS:** Upper-division standing.

WGSS 495. *GLOBAL FEMINIST THEOLOGIES (3). Explores the connections between women's religious experiences around the world and the global problems addressed by feminist theology and spirituality. (Bacc Core Course) **PREREQS:** WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 and junior standing.

WGSS 495H. *GLOBAL FEMINIST THEOLOGIES (3). Explores the connections between women's religious experiences around the world and the global problems addressed by feminist theology and spirituality. (Bacc Core Course) **PREREQS:** WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 and junior standing. Honors College approval required.

WGSS 496. *FEMINIST THEOLOGIES IN THE UNITED STATES (3). Explores U.S.-based feminist critiques of traditional theologies and examines feminist constructions of theologies rooted in diverse human experiences. (Bacc Core Course) **PREREQS:** WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 and junior standing.

WGSS 496H. *FEMINIST THEOLOGIES IN THE UNITED STATES (3). Explores U.S.-based feminist critiques of traditional theologies and examines feminist constructions of theologies rooted in diverse human experiences. (Bacc Core Course) **PREREQS:** (WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224) and junior standing and Honors College approval required.

WGSS 498. SENIOR SEMINAR (4). For graduating seniors in women, gender, and sexuality studies. Building on knowledge and experiences acquired in required and elective women, gender, and sexuality studies courses, it focuses on central questions for feminist research. In particular, the course helps students identify their approaches to women's studies scholarship and develop deeper understandings of the process of generating feminist knowledge, especially in relation to gender, race, class, sexuality, and national belonging. **PREREQS:** (WS 414 and WS 416) or (WGSS 414 and WGSS 416)

WGSS 499. TOPICS (1-6). Topics on contemporary research in women, gender, and sexuality studies. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits. **PREREQS:** Upper-division standing.

WGSS 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

WGSS 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WGSS 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

WGSS 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WGSS 510. INTERNSHIP (1-16). The internship experience provides the opportunity to gain experience within an off-campus private, public, or community agency or organization which has as one of its goals the improvement of the status of women in society. Students work with an on-site mentor who guides their field experience in collaboration with the internship coordinator in the Women, Gender, and Sexuality Studies program. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WGSS 511. ORIENTATION AND PROFESSIONALIZATION I (1). The WGSS 511, 512, 513 sequence prepares Women,

Gender, and Sexuality Studies graduate students to succeed in their courses of study and in their chosen profession. WGSS 511 provides knowledge about Women, Gender, and Sexuality Studies as a discipline and as a course of study that helps students manage the transition to graduate school. Graded P/N.

WGSS 512. ORIENTATION AND PROFESSIONALIZATION II (1). The WGSS 511, 512, 513 sequence prepares Women, Gender, and Sexuality Studies graduate students to succeed in their courses of study and in their chosen profession. WGSS 512 guides students in the development of an intellectual life with a focus on thriving and surviving as a scholar in Women, Gender, and Sexuality Studies. Graded P/N.

WGSS 513. ORIENTATION AND PROFESSIONALIZATION III (1). The WGSS 511, 512, 513 sequence prepares Women, Gender, and Sexuality Studies graduate students to succeed in their courses of study and in their chosen profession. WGSS 513 focuses on helping students shape a future that utilizes the graduate degree in Women, Gender, and Sexuality Studies. It helps students manage the transition to life after the Women, Gender, and Sexuality Studies Master's program at OSU. Graded P/N.

WGSS 514. SYSTEMS OF OPPRESSION IN WOMEN'S LIVES (3). Explores the ways different systems of oppression and discrimination impact women's lives. Examines sexism, classism, racism, and anti-Jewish oppression, as well as discrimination against queer women, older women, and those who differ in ability and appearance. **PREREQS:** WS 223 or WS 224 or WGSS 223 or WGSS 224 or instructor approval required.

WGSS 516. THEORIES OF FEMINISM (4). Explores feminist conceptions about the nature of the world, women's reality and visions for change. Analyzes major issues raised by the women's movement and the development of feminist ideas, as well as provides a critical examination of feminist thought and different theories which comprise it. **PREREQS:** WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 or instructor approval required.

WGSS 517. FEMINIST PHILOSOPHIES (3). Diverse forms of feminist philosophy, including a variety of critiques, especially those based on race and class, with in-depth consideration of selected social issues, such as rape and pornography. **CROSSLISTED** as PHL 417/PHL 517. **PREREQS:** 6 credits of philosophy or upper-division standing.

WGSS 518. FEMINIST RESEARCH (4). Explores the socio-political and historical context out of which traditional research methodologies emerge and the relationship of gender to scientific pursuits. Teaches what it means to do emancipatory anti-sexist and participatory research.

WGSS 520. HATE, RESISTANCE, AND RECONCILIATION (3). Examines hate movements, hate-related activities, and resistant acts and movements. Special attention is given to the role of gender.

WGSS 521. FEMINIST LEADERSHIP AND MANAGEMENT (3). Consideration of leadership and management through a feminist lens. Through this course participants explore and develop their own leadership style and examine various contexts in which leadership can occur. This course also examines principles of effective management within organizations.

WGSS 522. GRANT WRITING & FUND DEVELOPMENT FOR FEMINIST ORGANIZATIONS (3). Provides students with the skills needed to be successful in grant-writing and fundraising for feminist organizations.

WGSS 523. COMMUNITY ORGANIZING AND COLLECTIVE ACTION (2). Addresses relationships between theory and action in feminist

context. Explores both social change activism in terms of individual and collective action strategies and social movement theory in historical and contemporary perspectives.

WGSS 524. TRANS/GENDER POLITICS (3). Addresses transgender politics—including transsexual, genderqueer, and gender non-conforming issues—through feminist and intersectional approaches by analyzing transgender theories, arts, and activism. **CROSSLISTED** as QS 524. **PREREQS:** Graduate student standing.

WGSS 525. GENDER AND TECHNOLOGY (3). Explores women's contributions and focuses in technology fields. Analyzes gendered nature of technology. Theory and practice of technologies for change and activism.

WGSS 530. WOMEN OF COLOR FEMINISMS (4). Explores the contemporary experiences of women of color, as well as the theoretical and practical frameworks of women of color feminisms. Analyzes key themes in women of color feminisms, including politics of representation, multiple forms of state and interpersonal violence, intersecting forms of oppression, economic justice, reproductive justice, and strategies of resistance. **PREREQS:** WS 223 or WS 223H or WGSS 223 or WGSS 223H or WGSS 223 or WGSS 223H or WS 223 or WS 223H

WGSS 531. QUEER OF COLOR CRITIQUES (3). "Queer of color critiques" refers to political theories and activism that emerge from LGBTQ people of color to examine the intersections between race, sexuality and gender. This course addresses these intersections through theory, history, and activism. **CROSSLISTED** as ES 531 and QS 531. **PREREQS:** Junior standing.

WGSS 535. FEMINIST TEACHING AND LEARNING (4). Focuses on the experiences and practices of the feminist classroom. Key components of the class include issues associated with the identity and development of the teacher, as well as the development of skills to help facilitate understanding, empowerment, and the personal and social agency of students.

WGSS 540. WOMEN AND NATURAL RESOURCES (3). Explores the relationship between women and natural resources. In particular, the course examines the roles of policy, technology, culture, and management in women's use and control of natural resources.

WGSS 550. ECOFEMINISM (3). Focuses on the ecological and feminist principles that mediate humanity's relationship with nature. **PREREQS:** Upper-division standing.

WGSS 560. WOMEN AND SEXUALITY (3). Explores the historical, theoretical, and political dimensions of female sexuality. The course also examines the basic assumptions about the meaning of female sexuality, how it has been shaped and controlled, and why women's sexuality has been/is a source of both women's liberation and subjugation. **PREREQS:** WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 or instructor approval required.

WGSS 562. QUEER THEORIES (3). Introduces key themes and critical frameworks in queer theories. Topics include histories of sexuality; forms of oppression including heterosexism, homophobia, and transphobia; resistance to oppression; violence against LGBTQ people; queer activism; diverse experiences of sexuality; and representations in literature, art, and popular media. **CROSSLISTED** as QS 462/QS 562. **PREREQS:** Junior standing.

WGSS 565. WOMEN, WEIGHT, AND BODY IMAGE (3). Focuses on women's increasing struggles with weight, eating disorders, and broader body image issues in contemporary society. Explores how social institutions such as media, medicine, and government contribute

to weight bias and unhealthy standards for appearance. Examines weightism as a system of oppression that intersects with other systems of oppression including sexism, racism, classism, heterosexism, ableism, and ageism. **PREREQS:** WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224

WGSS 566. FAT STUDIES (4). Examines body weight, shape, and size as an area of human difference subject to privilege and discrimination that intersects with other systems of oppression based on gender, race, class, age, sexual orientation, and ability. Employs a multi-disciplinary approach spanning the behavioral sciences and humanities. Frames weight-based oppression as a social justice issue, exploring forms of activism used to counter weightism perpetuated throughout various societal institutions. **CROSSLISTED** as PSY 466/PSY 566. **PREREQS:** WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224

WGSS 572. INDIGENOUS TWO-SPIRIT AND QUEER STUDIES (3). "Two-spirit" refers to North American indigenous genders outside of European male/female binaries. Two-spirit communities argue for decolonization as a central political struggle, calling all people to unlearn settler colonial gender/sexuality on Native land. This course addresses indigenous two-spirit/GLBTQ issues through theory, literature, activism, and art. **CROSSLISTED** as ES 572, QS 572. **PREREQS:** QS 262 or ES 242 or WGSS 414 or WGSS 514 or instructor permission

WGSS 573. TRANSGENDER LIVES (3). Many people in our Western cultures perceive gender as bimodal and fixed from birth. Individuals whose identity of self does not match the individual's biological sex face significant social pressures to conform to gender norms. Students will be introduced to the biological, social and cultural contexts for transgendered individuals. **CROSSLISTED** as QS 573. **PREREQS:** WGSS 262 or QS 262 or equivalent.

WGSS 577. QUEER/TRANS PEOPLE OF COLOR ARTS AND ACTIVISM (3). LGBTQ people of color often engage struggles for social justice through artistic movements. This course will focus on arts by LGBTQ people of color and the way these artistic movements contribute to activism that interrupts interlocking systems of oppression. **CROSSLISTED** as ES 477/ES 577, QS 477/QS 577. **PREREQS:** QS 262 and QS 464

WGSS 580. INTERNATIONAL WOMEN (3). Examines the lives and experiences of women in different parts of the world, looking at work, education, the family, the arts and social movements. Explores the comparative realities of various women's struggles for social justice and studies key definitions and theoretical assumptions relevant to the subject of global feminism. **PREREQS:** WS 223 or WS 223H or WS 224 or WGSS 223 or WGSS 223H or WGSS 224 or instructor approval required.

WGSS 582. GLOBAL PERSPECTIVES ON WOMEN'S HEALTH (4). Women's health issues are examined from a global perspective in the context of a woman's life and through a feminist political lens. Central to our discussions will be an analysis of the interplay among race, class, and gender in shaping particular health care outcomes. The course stresses the potential for women's agency and autonomy with respect to improving their health and environments.

WGSS 585. TRANSNATIONAL FEMINISMS (4). Introduces students to themes and theoretical principles of transnational feminisms, with special emphasis placed on feminist movements of the global South. We will explore colonialism, globalization, nation-building, representation, global economies, militarism, human rights, and politics of gender, race, class, sexuality, and nation.

WGSS 586. GLOBAL EXPERIENCE I (1). Prepares students to participate in a short-term study abroad experience that emphasizes

volunteer experiences in women's organizations and analysis from transnational feminist perspectives.

WGSS 587. GLOBAL EXPERIENCE II (1). Engages students in a short-term study abroad experience that emphasizes volunteer experiences in women's organizations and analysis from transnational feminist perspectives. **PREREQS:** WS 486 or WS 586 or WGSS 486 or WGSS 586

WGSS 588. GLOBAL EXPERIENCE III (1). Students reflect on their short-term study abroad experience by engaging in in-depth transnational feminist analysis of particular aspects of the study abroad experience. **PREREQS:** (WS 586 and WS 587) or (WGSS 586 and WGSS 587)

WGSS 590. SELF-ESTEEM AND PERSONAL POWER (3). Explores ways to improve self-esteem and develop personal power. Focuses on issues of self and identity, contextualizing these in the ways gender is constructed in society. **PREREQS:** Upper-division standing.

WGSS 595. GLOBAL FEMINIST THEOLOGIES (3). Explores the connections between women's religious experiences around the world and the global problems addressed by feminist theology and spirituality **PREREQS:** WS 223 or WS 224 or WGSS 223 or WGSS 224

WGSS 596. FEMINIST THEOLOGIES IN THE UNITED STATES (3). Explores U.S.-based feminist critiques of traditional theologies and examines feminist constructions of theologies rooted in diverse human experiences. **PREREQS:** WS 223 or WS 224 or WGSS 223 or WGSS 224

WGSS 599. TOPICS (1-6). Topics on contemporary research in women, gender, and sexuality. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits. **PREREQS:** Upper-division standing.

WGSS 603. THESIS (1-12). Graded P/N. This course is repeatable for a maximum of 999 credits.

WGSS 610. INTERNSHIP (1-6). The internship experience provides opportunities to gain experience in a private, public, or community agency or organization, which has social justice advocacy as one of its goals. Students work with an on-site mentor who guides their field experience in collaboration with the internship coordinator in the WGSS program. One feature of graduate internships is the opportunity to shadow key personnel in order to meet internship goals. Graded P/N. This course is repeatable for a maximum of 6 credits. **PREREQS:** Post-master's level standing.

WGSS 611. COLLOQUIUM (1). Provides presentations of feminist research by OSU faculty and graduate students and faculty members from other institutions. Graded P/N. This course is repeatable for a maximum of 4 credits.

■ WORLD LANGUAGES AND CULTURES COURSES

WLC 345 MULTIMODAL LITERACIES IN WORLD LANGUAGES AND CULTURES (2). Introduction to the analysis and production of multimodal literacies. Study of semiotic resources such as language and images across modalities such as film, manga, and social media. Required of all majors in World Languages and Cultures. Taught in English. **PREREQS:** CHN 213 or JPN 213 or GER 213 or FR 213 or SPAN 213 or SPAN 216 or SPAN 217 or equivalent.

WLC 360. INTERNATIONAL FILM FESTIVAL (3). Critical study of a selection of films screened at the Oregon State University's International Film Festival. Topics include acting, sound, special effects, cinematography. This course is repeatable for a maximum of 9 credits. **PREREQS:** Sophomore standing or higher.

WLC 373. APPROACHES TO SOCIAL JUSTICE (3). Students study various ways of thinking about

social justice and evaluate these in case studies and current events. As a basis for the Social Justice minor, students write a research paper on the theoretical and practical aspects of a social justice issue. **CROSSLISTED** as ANTH 373, ES 373, WGSS 373.

WLC 399. SPECIAL TOPICS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

WLC 410. WORLD LANGUAGE INTERNSHIP (1-12). Opportunities for juniors and seniors to apply skills in world language and knowledge of world culture at selected government, industry, or business placement sites. Allows students to prepare for transition from academic to work world. Interns are supervised and evaluated by employer and faculty coordinator. See also Oregon International Internships in the catalog section on International Programs. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Completion of 90 credits with 2.75 GPA or higher; completion of the third-year language course in one foreign language with 3.00 GPA or better, with at least three terms of study in the OSU School of Language, Culture, and Society.

WLC 473. COMMUNITY-BASED LEARNING (3). A service-learning course that allows students to apply the theory and skills acquired in advanced linguistics, culture, and literature courses to specific needs of populations that speak a language taught in the department. It combines 80 hours of community-supervised fieldwork with an online academic component consisting of assigned readings, independent research, and ongoing reflective writing. Each student is expected to make significant contributions toward the completion of a deliverable product that benefits a native speaker community. Pre-advanced oral proficiency required. This course is repeatable for a maximum of 6 credits.

WLC 485. CAPSTONE IN SOCIAL JUSTICE (2). Working with an advisor from the Social Justice minor, students conduct research to synthesize and extend analysis of a particular social justice issue, building on three previous papers or projects. Results are presented in a 10-15 page paper and a public poster, presentation or website. **CROSSLISTED** as ANTH 485, ES 485, WGSS 485. This course is repeatable for a maximum of 4 credits. **PREREQS:** (ANTH 373 or ES 373 or WGSS 373 or WLC 373) and (ANTH 410 or ES 410 or WGSS 410 or WLC 410)

WLC 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

WLC 499H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

WLC 510. WORLD LANGUAGE INTERNSHIP (1-12). Opportunities for juniors and seniors to apply skills in world language and knowledge of world culture at selected government, industry, or business placement sites. Allows students to prepare for transition from the academic world to the work world. Interns are supervised and evaluated by the employer and a faculty coordinator. See also Oregon International Internships in the catalog section on International Programs. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Completion of 90 credits with 2.75 GPA or higher; completion of the third-year language course in one foreign language with 3.00 GPA or better, with at least three terms of study in the OSU School of Language, Culture, and Society.

WLC 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

SCHOOL OF PSYCHOLOGICAL SCIENCES

John Edwards, Director

126 Reed Lodge
2950 SW Jefferson Way
Oregon State University
Corvallis, OR 97331-5303

FACULTY

Associate Professors Bernieri, Edwards, Lien, Ryan, Sherman, Watkins
Assistant Professors Becker-Blease, Bogart, Kerr, Lewis, Macuga, Sanchez, Saturn

Assistant to the Director Mann

Undergraduate Major

Psychology (BA, BS, HBA, HBS)

Minor

Psychology

Graduate Minor-MAIS

Psychology

Graduate Area of Concentration
General Psychology

The psychology curriculum explores scientific approaches to a wide range of psychological phenomena. Courses meet the needs of students desiring a knowledge of psychology as part of their general education or professional background, planning to secure entry-level jobs in human services occupations, or preparing for graduate study in psychology or related fields. The department offers a major program leading to a BA or BS degree in Psychology, a minor program for undergraduate students with majors in other disciplines, and participates in the Master of Arts in Interdisciplinary Studies (MAIS) degree program offered by the Graduate School.

Graduates with bachelor degrees in psychology often find entry-level career positions in human services, law enforcement, business, education, management, sales, and also may go on to graduate study in such fields as psychology, counseling, social work, public and business administration, and law.

MASTER OF ARTS IN INTERDISCIPLINARY STUDIES

Students design their own MAIS program around three fields or areas of study, and may use specific areas of psychology for up to two of their fields. At least three courses must be in each field. Students wishing to include psychology as a specialty area in an MAIS program should

submit the following to the Graduate School:

1. Graduate Record Exam (GRE) scores for the verbal, quantitative, and analytic segments of the examination
2. Overall GPA
3. A list of psychology courses taken and the grades achieved in each
4. Transcripts of all previous university work
5. Names of two references who can be contacted by the department
6. A one- or two-page statement of the purpose for including psychology in their graduate program.

To be admitted to a psychology component of the MAIS program students must obtain written consent of a faculty member in this department who agrees to serve as the field or area advisor, as well as meeting general Graduate School entrance requirements.

PSYCHOLOGY (BA, BS, CRED, HBA, HBS)

Also available at OSU-Cascades campus and via Ecampus.

Major Requirements (65)

Core (29)

BI 102, BI 103. *General Biology (4,4) or BI 212, BI 213. *Principles of Biology (4,4)
PHL 121. *Reasoning and Writing (3) or WR 327. *Technical Writing (3)
PSY 201, PSY 202. *General Psychology (3,3)
PSY 301. Research Methods in Psychology (4)
ST 351. Introduction to Statistical Methods (4)
ST 352. Introduction to Statistical Methods (4)

Survey (16)

Select four courses from below:

PSY 330. Brain and Behavior (4) or PSY 340. Cognition (4)
PSY 350. Human Lifespan Development (4) or PSY 360. Social Psychology (4)
PSY 370. Personality (4) or PSY 381. Abnormal Psychology (4)

Plus any one additional course from above.

Advanced and Variable Courses (16)

Select four courses from below

(includes variable credit courses):

PSY 426. *Psychology of Gender (4)
PSY 432. Physiological Psychology (4)
PSY 433. Psychopharmacology (4)
PSY 437. Motivation (4)
PSY 442. Perception (4)
PSY 444. Learning and Memory (4)
PSY 448. Consciousness (4)
PSY 454. Cognitive Development (4)
PSY 456. Social Development (4)
PSY 458. Language Acquisition (4)
PSY 464. Social Cognition (4)
PSY 466. *Fat Studies (4)
PSY 482. Psychotherapy (4)
PSY 483. Developmental Psychopathology (4)
PSY 485. Behavior Modification (4)
PSY 492. Conservation Psychology (4)
PSY 494. Engineering Psychology (4)

PSY 496. Industrial and Organizational Psychology (4)

PSY 498. Health Psychology (4)

PSY 499. Special Topics (4)

Variable Credit Courses (*maximum 6 credits):

PSY 401. Research (1-16)

PSY 402. Independent Study (1-16)

PSY 403. Thesis (1-16)

PSY 405. Reading and Conference (1-16)

PSY 406. Projects (1-16)

PSY 407. Seminar (1-16)

PSY 408. Workshop (1-16)

PSY 410. Field Experience in Human Services (1-16)

Writing Intensive Course (WIC) Select one from below (4)

PSY 434. ^Brain and Behavior Methods (4)

PSY 440. ^Cognition Research (4)

PSY 460. ^Advanced Social Research Methods (4)

PSY 470. ^Psychometrics and Psychological Testing (4)

PSY 480. ^Clinical Research Methods (4)

Footnotes:

1. Students must receive a grade of C- or better in any course applied toward the major. Such courses cannot be taken with S/U grading.
 2. A maximum of 4 credits of individualized course work (PSY 401-PSY 410) can be applied to the major.
- * Baccalaureate Core Course
^ Writing Intensive Courses (WIC)

PSYCHOLOGY MINOR

Also available via Ecampus.

Core (6)

PSY 201, PSY 202. *General Psychology (3,3)

Survey (8)

Select two of the following courses (8):

PSY 330. Brain and Behavior (4)

PSY 340. Cognition (4)

PSY 350. Human Lifespan Development (4)

PSY 360. Social Psychology (4)

PSY 370. Personality (4)

PSY 381. Abnormal Psychology (4)

Advanced/Variable Courses (16)

- a. At least two must be at the 400 level
- b. No more than 4 credits of individualized research and field experience may be applied to the minor.

Total=30

Note: Students should consult their major advisors to see if specific courses are required for their major. Students must receive a grade of C- or better in any course applied toward the minor. Such courses cannot be taken with S/U grading.

PSYCHOLOGY GRADUATE MINOR

Graduate Areas of Concentration
General psychology

Graduate work in the School of Psychological Sciences may apply to the Master of Arts in Interdisciplinary Studies degree or to minors in other advanced degree programs.

■ PSYCHOLOGY COURSES

PSY 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PSY 201. *GENERAL PSYCHOLOGY (3). Scientific study of behavior and experience. Biological bases of behavior; sensation and perception; conditioning, learning and memory; thinking, problem solving, language, and consciousness; cognitive, personal and social development. (SS) (Bacc Core Course)

PSY 202. *GENERAL PSYCHOLOGY (3). Motivation and emotion; personality; measurement of human differences; adjustment, psychopathology and psychotherapy; attitudes and social behavior. (SS) (Bacc Core Course)

PSY 301. RESEARCH METHODS IN PSYCHOLOGY (4). Study of scientific methodology in psychology, including experimental and observational techniques. Topics include problem identification and hypothesis formation, research design, application of statistics, collection and interpretation of data, computer usage, and research report writing. Lec/lab. **PREREQS:** (PSY 201 and PSY 202 and (ST 211 or ST 351 or ST 351H))

PSY 330. BRAIN AND BEHAVIOR (4). Introduction to the relationships of the structure and functioning of the human brain to behavior. Information from neuroanatomy, neurochemistry, neurosurgery and neurology is combined with psychological research on both normal and abnormal human behavior. (SS) **PREREQS:** PSY 201 and PSY 202

PSY 340. COGNITION (4). Theories, research and applications concerning cognition. Topics include perception, attention, memory, learning, thinking and language. (SS) **PREREQS:** PSY 201 and PSY 202

PSY 350. HUMAN LIFESPAN DEVELOPMENT (4). An introduction to physical, social, cognitive and linguistic development with an emphasis on theory and methodology. (SS) **PREREQS:** (PSY 201 and PSY 202)

PSY 360. SOCIAL PSYCHOLOGY (4). The study of behavior and experience in a social context. Topics include person perception, attribution, attraction and love, attitudes and attitude change, aggression, social influence and group dynamics. Applications of social psychological principles to other fields, e.g. law, health care, etc. (SS) **PREREQS:** PSY 202 and PSY 201

PSY 360H. SOCIAL PSYCHOLOGY (4). The study of behavior and experience in a social context. Topics include persons perception, attribution, attraction and love, attitudes and attitude change, aggression and social influence and group dynamics. Applications of social psychological principles to other fields, e.g., law, health care, etc. (SS) **PREREQS:** PSY 202 and PSY 201. Honors College approval required.

PSY 370. PERSONALITY (4). An overview of major theories of personality is followed by an introduction to personality testing and research. (SS) **PREREQS:** (PSY 201 and PSY 202)

PSY 381. ABNORMAL PSYCHOLOGY (4). Survey of various forms of psychological disorders; theories regarding etiology and treatment. Special emphasis on research approaches to such disorders. **PREREQS:** (PSY 201 and PSY 202)

PSY 381H. ABNORMAL PSYCHOLOGY (4). Survey of various forms of psychological disorders; theories regarding etiology and treatment. Special emphasis on research approaches to such disorders. **PREREQS:** (PSY 201 and PSY 202) and Honors College approval required.

PSY 399. SPECIAL TOPICS (1-6). This course is repeatable for a maximum of 6 credits.

PSY 399H. SPECIAL TOPICS (1-6). This

course is repeatable for a maximum of 6 credits. **PREREQS:** Honors College approval required.

PSY 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 402. INDEPENDENT STUDY (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 407. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 408. WORKSHOP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 410. FIELD EXPERIENCE IN HUMAN SERVICES (1-16). Practicum/internship placement in community human service agencies. Includes regular on-site supervision, relevant readings, projects, and faculty site visits. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 426. *PSYCHOLOGY OF GENDER (4). Survey of theories, life cycles and contemporary problems of women and men in a social context. Scientific examination of gender related to psychological functioning and behavior. Topics can include psychological research on human similarities and differences in gender attitudes, relationships, sexuality, violence, employment, and mental health. (Bacc Core Course) **PREREQS:** PSY 202

PSY 432. PHYSIOLOGICAL PSYCHOLOGY (4). Basic vertebrate neurophysiology and neuroanatomy in relation to behavior. Neural and hormonal correlates of sensation, learning, memory and motivation. **PREREQS:** PSY 330 and /or equivalent biological science background.

PSY 433. PSYCHOPHARMACOLOGY (4). Drug-brain-behavior interactions. Psychoactive drugs and their relationships to normal and abnormal behavior in humans. **PREREQS:** Upper-division standing. Biological science background helpful.

PSY 434. ^BRAIN AND BEHAVIOR METHODS (4). Methodology primarily in the area of neuropsychological research. Topics include the finding and interpretation of background literature, critical evaluation of research, hypothesis formulation, experimental design, data interpretation, reporting of results and methods, and weaving a conclusion and review article. (Writing Intensive Course) **PREREQS:** (PSY 301 and PSY 330)

PSY 437. MOTIVATION (4). Biological, learning, and cognitive approaches to human and animal motivation. Topics include evolution, homeostasis, drive, arousal, incentive motivation, achievement motivation, and social motivation. **PREREQS:** (PSY 330 or PSY 340) and PSY 301

PSY 440. ^COGNITION RESEARCH (4). Advanced scientific methodology primarily in the areas of attention, learning, memory, and thinking. Students will design their own research projects, collect and analyze data, and write a professional report. (Writing Intensive Course) **PREREQS:** (PSY 301 and PSY 340)

PSY 442. PERCEPTION (4). Fundamental concepts of animal and human sensation and perception, with emphasis on audition and vision.

Applications of psychophysical methods to research in all sensory modalities. Includes review workshops on basic mathematical, physical and physiological concepts necessary to interpret research in this field. **PREREQS:** (PSY 330 or PSY 340) and PSY 301

PSY 444. LEARNING AND MEMORY (4). Experimental and theoretical work on learning, conditioning, and memory in animals and humans. **PREREQS:** PSY 340 and PSY 301

PSY 448. CONSCIOUSNESS (4). Psychological, phenomenological, and physiological approaches to the content and processes of subjective awareness. Topics include philosophical issues, cortical and reticular neurophysiology, sleeping and dreaming, selective attention, imagery, and self-awareness. **PREREQS:** PSY 340 and PSY 301

PSY 454. COGNITIVE DEVELOPMENT (4). Discusses intellectual development from infancy to adulthood. Topics include the origin of thinking, the development of perception, attention, memory, problem solving, language, academic skills, and social cognition. Piaget, Vygotsky, and information processing approaches will be discussed. **PREREQS:** PSY 350

PSY 456. SOCIAL DEVELOPMENT (4). Covers theories and research concerning human social development. Topics include theories of socialization; the development of social relationships; the self-concept; emotion; sex roles; social cognition; pro-social behavior; morality; self-control; and aggression. **PREREQS:** PSY 350

PSY 458. LANGUAGE ACQUISITION (4). Psychological processes involved in the acquisition and use of language throughout childhood. Biological, cognitive, and social influences on language will be discussed, as well as personal uses of language, such as language in thought and reading. **PREREQS:** PSY 350

PSY 460. ^ADVANCED SOCIAL RESEARCH METHODS (4). Advanced experimental research methods in the social sciences. Issues in psychological construct operationalization, experimental design, data collection, analysis, and report writing will be emphasized. (Writing Intensive Course) **PREREQS:** (PSY 301 and PSY 360)

PSY 464. SOCIAL COGNITION (4). Research and theory concerning cognitive structures and processes underlying social judgment and social behavior. Topics include attribution theory, social inference, person memory, schema-based information processing. **PREREQS:** PSY 360

PSY 466. *FAT STUDIES (4). Examines body weight, shape, and size as an area of human difference subject to privilege and discrimination that intersects with other systems of oppression based on gender, race, class, age, sexual orientation, and ability. Employs a multi-disciplinary approach spanning the behavioral sciences and humanities. Frames weight-based oppression as a social justice issue, exploring forms of activism used to counter weightism perpetuated throughout various societal institutions. CROSSLISTED as WGSS 466/WGSS 566. (Bacc Core Course) **PREREQS:** WS 223 or WS 223H or WGSS 223 or WGSS 223H or WS 224 or WGSS 224

PSY 468. THE PSYCHOLOGY OF CLOSE RELATIONSHIPS (4). Explores the research and theory on the development, maintenance, and dissolution of human relationships. The course will examine various directions to the study of interpersonal relationships, including attachment, evolutionary-biological, cognition, and interdependence. Topics will also include physical attraction, love, friendship, communication, trust, jealousy, and several issues that are specific to troubled dyadic relations. **PREREQS:** PSY 360

PSY 470. ^PSYCHOMETRICS AND PSYCHOLOGICAL TESTING (4). An introduction to psychological measurement is provided with

emphasis on the notions of reliability and validity; advanced correlation techniques are introduced. These methods are applied to contemporary tests of personality, aptitude, and achievement. (Writing Intensive Course) **PREREQS:** (PSY 301 and (PSY 340 or PSY 370 or PSY 380 or PSY 381 or PSY 481))

PSY 480. ^CLINICAL RESEARCH METHODS (4). Advanced research methods used in clinical psychology research. Design of studies, assessment, data collection, and interpretation will be discussed. The clinical content area focused on will vary. (Writing Intensive Course) **PREREQS:** (PSY 301 and (PSY 380 or PSY 381 or PSY 481))

PSY 482. PSYCHOTHERAPY (4). Survey of the theory, techniques and research on the major contemporary systems of psychotherapy. **PREREQS:** (PSY 370 or PSY 380 or PSY 381 or PSY 481)

PSY 483. DEVELOPMENTAL PSYCHOPATHOLOGY (4). Developmental perspective on child and adolescent psychological disorders including causal factors, associated features, and research-supported interventions. **PREREQS:** (PSY 350 or PSY 381 or PSY 481) and /or equivalent.

PSY 485. BEHAVIOR MODIFICATION (4). Review of basics of operant and classical conditioning. Research on behavior modification and behavior therapy with both normal and abnormal animals, human adults, and children. Application areas include behavior problems, handicaps, eating disorders, time management, self control stress management, contingency contracts, and cognitive therapies. **PREREQS:** (PSY 350 or PSY 380 or PSY 381 or PSY 481) and /or equivalent work in family life or education.

PSY 492. CONSERVATION PSYCHOLOGY (4). Explores connections between the study of human behavior and the achievement of conservation goals. Understanding how people think about and interact with nature is crucial for promoting environmental sustainability and human well-being. Students will examine theory and research on human cognitive, emotional, and behavioral responses to nature. **PREREQS:** PSY 201 and PSY 202

PSY 494. ENGINEERING PSYCHOLOGY (4). Survey human capabilities and limitations in human-machine interaction, including vision, memory, attention, motor control, and human error. Emphasis on theory and implications for system designs. **PREREQS:** (PSY 301 and PSY 340)

PSY 496. INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY (4). Survey of psychological research and theory relevant to organizations, industry, and other work settings. Topics include training, employee selection, performance evaluation, work attitudes, and motivation. **PREREQS:** (PSY 360 or PSY 370)

PSY 498. HEALTH PSYCHOLOGY (4). Psychological factors in the maintenance of good health and in the prevention of, treatment of, and recovery from illness: Behavioral contributions to illness, life-style risk factors, stress and the immune system, psychological response to symptoms and care-givers, health habits and self-care, management of pain and chronic illness, disability and terminal illness. **PREREQS:** (PSY 330 or PSY 340 or PSY 350 or PSY 360 or PSY 370 or PSY 381 or PSY 481)

PSY 499. SPECIAL TOPICS (1-16). Newly emerging or specialized topics that can only be offered occasionally or for particular purposes. Each offering will be structured with a syllabus. This course is repeatable for a maximum of 30 credits. **PREREQS:** To be determined for each offering.

PSY 499H. SPECIAL TOPICS (1-16). Newly emerging or specialized topics that can only be offered occasionally or for particular purposes. Each offering will be structured with a syllabus.

PREREQS: To be determined for each offering and Honors College approval.

PSY 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 502. INDEPENDENT STUDY (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

PSY 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 506. PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 507. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 508. WORKSHOP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 510. FIELD EXPERIENCE IN HUMAN SERVICES (3-15). Practicum/internship placement in community human service agencies. Includes regular on-site supervision, relevant readings, projects, and faculty site visits. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PSY 526. PSYCHOLOGY OF GENDER (4). Survey of theories, life cycles and contemporary problems of women and men in a social context. Scientific examination of gender related to psychological functioning and behavior. Topics can include psychological research on human similarities and differences in gender attitudes, relationships, sexuality, violence, employment, and mental health. **PREREQS:** PSY 202

PSY 532. PHYSIOLOGICAL PSYCHOLOGY (4). Basic vertebrate neurophysiology and neuroanatomy in relation to behavior. Neural and hormonal correlates of sensation, learning, memory and motivation. **PREREQS:** PSY 330 or equivalent biological science background.

PSY 533. PSYCHOPHARMACOLOGY (4). Drug-brain-behavior interactions. Psychoactive drugs and their relationships to normal and abnormal behavior in humans. **PREREQS:** Graduate standing. Biological science background helpful.

PSY 534. BRAIN AND BEHAVIOR METHODS (4). Methodology primarily in the area of neuropsychological research. Topics include the finding and interpretation of background literature, critical evaluation of research, hypothesis formulation, experimental design, data interpretation, reporting of results and methods, and weaving a conclusion and review article. **PREREQS:** PSY 301 and PSY 330

PSY 537. MOTIVATION (4). Biological, learning, and cognitive approaches to human and animal motivation. Topics include evolution, homeostasis, drive, arousal, incentive motivation, achievement motivation, and social motivation. **PREREQS:** PSY 301 and (PSY 330 or PSY 340)

PSY 540. COGNITION RESEARCH (4). Advanced scientific methodology primarily in the areas of attention, learning, memory, and thinking. Students will design their own research projects, collect and analyze data, and write a professional report. **PREREQS:** PSY 301 and PSY 340

PSY 542. PERCEPTION (4). Fundamental concepts of animal and human sensation and perception, with emphasis on audition and vision. Applications of psychophysical methods to research in all sensory modalities. Includes review workshops on basic mathematical, physical and

physiological concepts necessary to interpret research in this field. **PREREQS:** PSY 301 and (PSY 330 or PSY 340)

PSY 544. LEARNING AND MEMORY (4). Experimental and theoretical work on learning, conditioning, and memory in animals and humans. **PREREQS:** PSY 301 and PSY 340

PSY 548. CONSCIOUSNESS (4). Psychological, phenomenological, and physiological approaches to the content and processes of subjective awareness. Topics include philosophical issues, cortical and reticular neurophysiology, sleeping and dreaming, selective attention, imagery, and self-awareness. **PREREQS:** PSY 301 and PSY 340

PSY 554. COGNITIVE DEVELOPMENT (4). Discusses intellectual development from infancy to adulthood. Topics include the origin of thinking, the development of perception, attention, memory, problem solving, language, academic skills, and social cognition. Piaget, Vygotsky, and information processing approaches will be discussed. **PREREQS:** PSY 350 and graduate standing.

PSY 556. SOCIAL DEVELOPMENT (4). Covers theories and research concerning human social development. Topics include theories of socialization; the development of social relationships; the self-concept; emotion; sex roles; social cognition; pro-social behavior; morality; self-control; and aggression. **PREREQS:** PSY 350 and graduate standing.

PSY 558. LANGUAGE ACQUISITION (4). Psychological processes involved in the acquisition and use of language throughout childhood. Biological, cognitive, and social influences on language will be discussed, as well as personal uses of language, such as language in thought and reading. **PREREQS:** PSY 350

PSY 560. ADVANCED SOCIAL RESEARCH METHODS (4). Advanced experimental research methods in the social sciences. Issues in psychological construct operationalization, experimental design, data collection, analysis, and report writing will be emphasized. **PREREQS:** PSY 301 and PSY 360

PSY 564. SOCIAL COGNITION (4). Research and theory concerning cognitive structures and processes underlying social judgment and social behavior. Topics include attribution theory, social inference, person memory, schema-based information processing. **PREREQS:** PSY 360 and graduate standing.

PSY 566. FAT STUDIES (4). Examines body weight, shape, and size as an area of human difference subject to privilege and discrimination that intersects with other systems of oppression based on gender, race, class, age, sexual orientation, and ability. Employs a multi-disciplinary approach spanning the behavioral sciences and humanities. Frames weight-based oppression as a social justice issue, exploring forms of activism used to counter weightism perpetuated throughout various societal institutions. **CROSSLISTED** as WGSS 466/WGSS 566 **PREREQS:** WS 223 or WS 223H or WGSS 223 or WGSS 223H or WS 224 or WGSS 224

PSY 570. PSYCHOMETRICS AND PSYCHOLOGICAL TESTING (4). An introduction to psychological measurement is provided, with emphasis on the notions of reliability and validity; advanced correlational techniques are introduced. These methods are applied to contemporary tests of personality, aptitude, and achievement. **PREREQS:** PSY 301 and (PSY 340 or PSY 370)

PSY 580. CLINICAL RESEARCH METHODS (4). Advanced research methods used in clinical psychology research. Design of studies, assessment, data collection, and interpretation will be discussed. The clinical content area focused on will vary. **PREREQS:** PSY 301 and (PSY 380 or PSY 381 or PSY 481)

PSY 582. PSYCHOTHERAPY (4). Survey of the theory, techniques and research on the major contemporary systems of psychotherapy. **PREREQS:** PSY 370 or PSY 381

PSY 583. DEVELOPMENTAL PSYCHOPATHOLOGY (4). Developmental perspective on child and adolescent psychological disorders including causal factors, associated features, and research-supported interventions. **PREREQS:** PSY 350 or PSY 381 or PSY 481

PSY 585. BEHAVIOR MODIFICATION (4). Review of basics of operant and classical conditioning. Research on behavior modification and behavior therapy with both normal and abnormal animals, human adults, and children. Application areas include: behavior problems, handicaps, eating disorders, time management, self control, stress management, contingency contracts, and cognitive therapies. **PREREQS:** PSY 350 or equivalent work in family life or education.

PSY 592. CONSERVATION PSYCHOLOGY (4). Explores connections between the study of human behavior and the achievement of conservation goals. Understanding how people think about and interact with nature is crucial for promoting environmental sustainability and human well-being. Students will examine theory and research on human cognitive, emotional, and behavioral responses to nature. **PREREQS:** PSY 201 and PSY 202

PSY 594. ENGINEERING PSYCHOLOGY (4). Survey human capabilities and limitations in human-machine interaction, including vision, memory, attention, motor control, and human error. Emphasis on theory and implications for system designs. **PREREQS:** (PSY 301 and PSY 340)

PSY 596. INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY (4). Survey of psychological research and theory relevant to organizations, industry, and other work settings. Topics include training, employee selection, performance evaluation, work attitudes, and motivation. **PREREQS:** PSY 360 and PSY 370

PSY 598. HEALTH PSYCHOLOGY (4). Psychological factors in the maintenance of good health and in the prevention of, treatment of, and recovery from illness: Behavioral contributions to illness, life-style risk factors, stress and the immune system, psychological response to symptoms and care-givers, health habits and self-care, management of pain and chronic illness, disability and terminal illness. **PREREQS:** 300-level course in psychology.

PSY 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 99 credits. **PREREQS:** To be determined for each offering.

Policy is about the way we make decisions in both private and public contexts. Faculty and students in the School of Public Policy are interested in a wide variety of decision contexts and are particularly interested in advancing the social and policy-related dimensions of OSU's three areas of distinction: sustainable ecosystems, health and wellness, and economic growth and progress. The School of Public Policy offers undergraduate majors and minors in economics, political science, and sociology, as well as the Master in Public Policy (MPP) degree, PhD in Public Policy, and graduate minors in political science and sociology. School faculty members also participate

in the Master of Arts in Interdisciplinary Studies (MAIS) program.

FACULTY

Professors Conway, M. Edwards, Färe, Foster, Gallagher, Lach, Plaza, Ray, Steel, C. Tremblay, V. Tremblay, Warner, Weber
Associate Professors Akins, Cramer, Emerson, Hammer, Henderson, Inderbitzen, Li, Loges, Meng, Ortiz, Solberg, Valls
Assistant Professors Baker, Below, Bernell, Boudet, Burkhardt, Eisenhuth, Hurst, Johnston, Jones, Pugatch, Schroeder
Instructors Andersen, Clark, Crawford, Hellman, Jennings, C. Soltau Nelson, M. Nelson, Stanley, Worters
Professor Emeriti Clinton, Cordray, Grosskopf, Lunch, Sahr

Undergraduate Majors

Economics (BA, BS, HBA, HBS)

Options

Law, Economics and Policy
Managerial Economics
Mathematical Economics

Political Science (BA, BS, HBA, HBS)

Options

Environmental Politics and Policy
International Affairs
Law, Politics and Society

Sociology (BA, BS, HBA, HBS)

Options

Crime and Justice
Environmental and Natural Resource Sociology

Social Science (BA, BS)

(OSU-Cascades only)

Option

Community Development and Leadership

Minors

Asian Studies
Economics
Political Science
Sociology

Graduate Major

Public Policy (MPP, PhD)

Graduate Areas of Concentration

Energy Policy
Environmental Policy
International Policy
Law, Crime, and Policy
Rural Policy
Science and Technology Policy
Social Policy

Graduate Minors

Political Science
Sociology

Master of Arts in Interdisciplinary Studies

(See http://oregonstate.edu/dept/grad_school/mais.html)

UNDERGRADUATE PROGRAMS

The School of Public Policy offers undergraduate major and minor programs in economics, political science, and sociology.

ECONOMICS PROGRAM

The economics program is an excellent choice for students interested in:

- Law school or graduate programs in business, economics, public administration or other social sciences.
- Careers in business or public management.
- Becoming wiser consumers and better informed citizens.

The study of economics provides a framework for logical thought that can be used to address a wide variety of practical problems and situations. It can provide uncommon insights into society itself. Indeed, people holding degrees in economics are increasingly sought for positions of responsibility and authority in government, business, and industry. The economics major is useful preparation for various careers and for graduate study in many fields, primarily because it does not lead simply to the accumulation of facts but rather develops analytical skills that can be used in many ways.

POLITICAL SCIENCE PROGRAM

Graduates of the political science program pursue:

- Careers in all levels of government, foreign service, national and international nongovernmental organizations, journalism, business or public management.
- Law school or graduate programs in political science, public administration, public policy, business, or other social sciences.
- Elected office.

Students can focus their interests in different subfields, including American politics, public law, political theory, international relations, and comparative politics (for example, Asia, Latin America, Western Europe, Russia). Political science majors are encouraged to incorporate a minor in other social science fields such as economics, psychology, or sociology, or in a field of interest related to their specialization in political science. For example, students with interest in international relations or comparative politics may choose to minor in a language or in history, emphasizing a specific part of the world. Political science majors also are encouraged to consider the International Degree and Global Graduates Internship programs.

SOCIOLOGY PROGRAM

Graduates of the sociology program pursue:

- Careers in community development,

criminal justice, business, public administration, social services, recreation, and research and teaching.

- Graduate programs in sociology, criminology, public policy, social services, human resources, law, social work and other social sciences.

Sociology is the study of human social behavior and sociologists examine interactions within and between groups and resulting social institutions. The undergraduate program in sociology provides a general analysis and broad understanding of human societies and culture for persons in all fields. Selecting courses around a topic or theme of interest adds meaning to one's education and strengthens the base of understanding from which one can pursue a career or further education. Two options are currently available for those interested — Crime and Justice, and Environmental and Natural Resource Sociology — although students can shape a custom theme such as international development or social policy.

GRADUATE PROGRAMS

The School of Public Policy offers a Master in Public Policy degree, PhD in Public Policy, and graduate minors in Political Science and Sociology, and courses applicable toward the graduate degree in Applied Economics. Faculty members also participate in the Master of Arts in Interdisciplinary Studies (MAIS) program.

MASTER IN PUBLIC POLICY (MPP)

Graduates of the MPP program:

- Are employed at all levels of government as policy analysts, project managers, and managers.
- Work in national and international nongovernmental organizations like the United Nations.
- Pursue further graduate training in law, public administration, public affairs, public policy, and other social science disciplines.

Policy students at OSU focus their studies around environmental and natural resource policy, international policy, social policy, and rural policy, working with strong researchers around campus. Internships with agencies and organizations give policy students real world experience and networks to enhance their classroom education.

PHD IN PUBLIC POLICY

The PhD in Public Policy prepares students for academic or nonacademic research careers in the public, private, and nongovernmental sectors. The Public Policy Graduate Program accepts students with backgrounds in related academic disciplines. Like the MPP, the PhD program offers concentrations in energy policy; international policy; law, crime,

and policy; rural policy; science and technology policy; and/or social policy.

MASTER OF ARTS IN INTERDISCIPLINARY STUDIES (MAIS)

The MAIS program is designed to meet the particular needs and interests of individual students and features collaborative work in any two or three pertinent departments or schools. Political science and sociology faculty members may serve as one or two of the minor fields of concentration.

GRADUATE MINORS**POLITICAL SCIENCE**

Master's or PhD students interested in adding a Political Science minor should follow the guidelines within their major program in declaring a minor. All students declaring political science as a graduate minor must contact the program coordinator prior to doing so. See the Political Science website <http://oregonstate.edu/cla/polisci/graduate-programs> for a listing of requirements for the minor concentration.

SOCIOLOGY

Master's or PhD students interested in adding a Sociology minor should follow the guidelines within their major program in declaring a minor. The minimum number of credits for sociology is 15 or higher if required by the major. All students declaring sociology as a graduate minor must contact the program coordinator prior to doing so. See the Sociology website <http://oregonstate.edu/cla/sociology/graduate-minor> for a listing of requirements for the minor concentration.

UNDERGRADUATE MAJORS WITH OPTIONS**ECONOMICS (BA, BS, CRED, HBA, HBS)**

Businesses want employees who can think, communicate orally, write, and solve problems and who are comfortable with quantitative analysis. The traditional economics major perfectly prepares students to meet these demands.

Economics Core Curriculum (32)

ECON 201. *Introduction to Microeconomics (4)
 ECON 202. *Introduction to Macroeconomics (4)
 ECON 411. Microeconomic Theory (4) or ECON 311. Intermediate Microeconomic Theory I (4)
 ECON 415. Macroeconomic Theory (4) or ECON 315. Intermediate Macroeconomic Theory I (4)
 ECON 423. Econometrics I (4)
 ECON 427. Econometrics II (4) or ECON 424. Introduction to Econometrics (4)

ECON 428. ^Introduction to Economic Research (4)
or ECON 439. ^Public Policy Analysis (4)
or ECON 463. ^Efficiency and Productivity Analysis (4)
MTH 241. *Calculus for Management and Social Science (4)
or MTH 251. *Differential Calculus (4)

Additional Requirements (19)

19 credits of additional approved economics courses at the 300 level or above, at least 4 credits of which must be in courses numbered 411 or higher.

Total credits=51

All students must receive a grade of C (2.00) or better in all upper-division required courses and must maintain an overall grade-point average (GPA) of 2.00 in all economics courses. Majors may not select S/U grading in any economics classes. No more than 4 credits from ECON 402, ECON 403, ECON 405, and ECON 410 may be used to satisfy major requirements.

A recommended program of study for economics majors:

Freshman Year or Sophomore Year

ECON 201. *Introduction to Microeconomics (4)
ECON 202. *Introduction to Macroeconomics (4)
MTH 241. *Calculus for Management and Social Science (4)
or MTH 251. *Differential Calculus (4)

Sophomore or Junior Year

ECON 411. Microeconomic Theory (4)
or ECON 311. Intermediate Microeconomic Theory I (4)
ECON 415. Macroeconomic Theory (4)
or ECON 315. Intermediate Macroeconomic Theory I (4)
ECON 423. Econometrics I (4)
ECON 427. Econometrics II (4)
or ECON 424. Introduction to Econometrics (4)
Economics electives

Junior or Senior Year

ECON 428. ^Introduction to Economic Research (4)
or ECON 439. ^Public Policy Analysis (4)
or ECON 463. ^Efficiency and Productivity Analysis (4)
Economics electives

Footnotes:

* Baccalaureate Core Course
^ Writing Intensive Course (WIC)

OPTIONS

LAW, ECONOMICS AND POLICY OPTION

The Law, Economics and Policy option is an interdisciplinary program drawing from political science and philosophy courses as well as economics. This option serves students interested in public service or advanced study in law or public policy.

Economics Core Curriculum (28)

ECON 201. *Introduction to Microeconomics (4)
ECON 202. *Introduction to Macroeconomics (4)
ECON 311. Intermediate Microeconomic Theory (4)
or ECON 411. Microeconomic Theory (4)
ECON 315. Intermediate Macroeconomic Theory (4)
or ECON 415. Advanced Macroeconomic Theory (4)
ECON 424. Introduction to Econometrics (4)
or ECON 427. Econometrics II (4)
ECON 428. ^Introduction to Economic Research (4)
or ECON 439. ^Public Policy Analysis (4)
or ECON 463. ^Efficiency and Productivity Analysis (4)
ST 351. Introduction to Statistical Methods (4)
or ECON 423. Econometrics I (4)

Law, Economics and Policy Option Additional Requirements (23)

A. Four of the following courses, at least two must be from economics:

ECON 414. Political and Behavioral Economics (4)
ECON 435. The Public Economy (4)
ECON 439. ^Public Policy Analysis (4)
ECON 461. Law, Economics, and Regulation (4)
ECON 480. Labor Economics (4)
PHL 321. Deductive Logic (4)
PS 321. American Constitutional Law (4)
PS 326. Judicial Process and Politics (4)
PS 371. Public Policy Problems (4)
PS 479. Topics in Public Policy and Public Administration (4)

B. Two additional courses in economics at the 300- or 400-level

Total credits=51

All students must receive a grade of C (2.00) or better in all upper-division required courses and must maintain an overall grade-point average (GPA) of 2.00 in all courses taken for the option. Majors may not select S/U grading in any economics classes. No more than 4 credits from ECON 402, ECON 403, ECON 405, and ECON 410 may be used to satisfy major requirements.

MANAGERIAL ECONOMICS OPTION

The Managerial Economics option emphasizes applications of economics to the problems of management for students planning to enter business careers upon graduation.

Economics Core Curriculum (32)

ECON 201. *Introduction to Microeconomics (4)
ECON 202. *Introduction to Macroeconomics (4)
ECON 311. Intermediate Microeconomic Theory (4)
or ECON 411. Advanced Microeconomic Theory (4)
ECON 315. Intermediate Macroeconomic Theory (4)

or ECON 415. Advanced Macroeconomic Theory (4)
ECON 424. Introduction to Econometrics (4)
or ECON 427. Econometrics II (4)
ECON 428. ^Introduction to Economic Research (4)
or ECON 439. ^Public Policy Analysis (4)
or ECON 463. ^Efficiency and Productivity Analysis (4)
MTH 241. *Calculus for Management and Social Science (4)
or MTH 251. *Differential Calculus (4)
ST 351. Introduction to Statistical Methods (4)
or ECON 423. Econometrics I (4)

Additional Requirements (19–23)

ECON 462. Managerial Economics (4)
or ECON 460. Industrial Organization Theory and Policy (4)
BA 215. Fundamentals of Accounting (4)
or BA 211. Financial Accounting (4) and BA 213. Managerial Economics (4)
BA 360. Introduction to Financial Management (4)

Plus any two courses below (8):

BA 351. Managing Organizations (4)
BA 357. Operations Management (4)
BA 390. Marketing (4)
ECON 330. Money and Banking (4)
ECON 340. International Economics (4)
ECON 460. Industrial Organization (4)
[Cannot be used here if used above.]
ECON 463. ^Efficiency and Productivity Analysis (4)[Cannot be used here if used for WIC]
ECON 480. Labor Economics (4)

No more than 4 credits of self-study courses (ECON 401–406, 408–410) may be counted toward the 51-credit requirement.

All students must receive a grade of C (2.00) or better in all upper-division required courses and must maintain an overall grade-point average (GPA) of 2.00 in all courses taken for the option.

Majors may not select S/U grading in any economics classes.

Total=51–55

Footnotes:

* Baccalaureate Core Course
^ Writing Intensive Course (WIC)

MATHEMATICAL ECONOMICS OPTION

As the economics profession becomes increasingly mathematical, economics majors who plan to go to graduate school need a strong math background. The Mathematical Economics option provides the necessary mathematical preparation for graduate school bound economics majors. It also serves students who desire a more quantitative program or who come into the major with significant math preparation to apply math toward their degrees in economics.

Economics Core Curriculum (32)

ECON 201. *Introduction to Microeconomics (4)
ECON 202. *Introduction to Macroeconomics (4)

ECON 411. Advanced Microeconomic Theory (4)
 ECON 415. Advanced Macroeconomic Theory (4)
 ECON 423. Econometrics I (4)
 ECON 427. Econometrics II (4)
 ECON 428. ^Introduction to Economic Research (4)
 or ECON 439. ^Public Policy Analysis (4)
 or ECON 463. ^Efficiency and Productivity Analysis (4)
 MTH 241. *Calculus for Management and Social Science (4)
 or MTH 251. *Differential Calculus (4)

Additional Requirements (19)

ECON 329. Introduction to Mathematical Economics (4)
 MTH 252. Integral Calculus (4)
 MTH 254. Vector Calculus I (4)
 MTH 341. Linear Algebra I (3)
 MTH 342. Linear Algebra II (4)

Total credits=51

All students must receive a grade of C (2.00) or better in all upper-division required courses and must maintain an overall grade-point average (GPA) of 2.00 in all courses taken for the option.

Majors may not select S/U grading in any economics classes.

No more than 4 credits from ECON 402, ECON 403, ECON 405, and ECON 410 may be used to satisfy major requirements.

POLITICAL SCIENCE (BA, BS, CRED, HBA, HBS)

Students selecting the Political Science major must complete 52 credits of political science course work, of which at least 36 credits must be upper-division courses. As part of these overall credit totals, Political Science majors must complete:

I. Three Foundation Courses

The school encourages students to take the foundation courses in their first or second year.

Students must take 3 out of 4 introductory courses from:

PS 201. *Introduction to United States Government and Politics (4)
 PS 204. *Introduction to Comparative Politics (4)
 PS 205. *Introduction to International Relations (4)
 PS 206. *Introduction to Political Thought (4)

Students who choose to specialize in one of the options for the major are required to take two of the introductory courses as specified for the option and can choose the third introductory course.

Prerequisites for upper-division political science courses are determined on a course-by-course basis by the appropriate instructor(s). Often, the corresponding introductory course is a prerequisite for an upper-division course in the same subfield. (For example, PS 201 Introduction to United States Government and

Politics must be taken prior to enrolling in PS 321 American Constitutional Law.)

II. Methods/WIC

Students must take the designated Methods/WIC course for the major. The school encourages students to take the Methods/WIC course late in their second or early in their third year.

PS 300. ^Political Analysis (4)

III. Political Field Work Requirement Either:

PS 406. Projects (2) and PS 410. Political Science Internship (2–12)

Or:

Petition the program in writing to accept other field political experience.

Students may take up to 12 credits of PS 410, Political Science Internship, but only 4 of these credits will count toward the Political Science major or minor.

Credits over the 4-credit maximum may be applied toward general graduation requirements.

IV. Upper-Division Subfield Courses

A. For the general major, students must take:

One course each from at least three of the four following subfields:

1. American national government and politics, to include the judiciary, state and local government, public policy, public administration: PS 317, 321, 322, 323, 326, 331, 371, 375, 411, 412, 413, 414, 415, 416, 419, 425, 427 (pending approval #83333), 429, 455, 475, 476, 477, or 479.
2. Comparative politics: PS 340, 341, 343, 344, 345, 348, 350, 446, or 449.
3. International relations: PS 351, 454, 455, 456, 457, 458, 459, or 477.
4. Political philosophy: PS 361, 362, 363, 365, 461, 462, or 469.

B. For the options, students will choose from a list of courses approved for the option.

V. Potential for Specialization

Students may choose a general political science major or may choose from one of three transcript-visible options:

1. Environmental Politics and Policy
2. International Affairs
3. Law, Politics, and Society

VI. Additional Requirements for the Major

- Majors are required to maintain a minimum cumulative 2.50 grade-point average for all political science course work.
- No more than 8 credits from PS 401–PS 410 may be applied to the major.
- Students must complete the BA or BS requirements specified by the College of Liberal Arts.

Footnotes:

* Bacc Core Course

^ Writing Intensive Course

OPTIONS

ENVIRONMENTAL POLITICS AND POLICY OPTION

The Environmental Politics and Policy option under the Political Science major will provide students with the opportunity to focus their undergraduate studies on topics involving:

- Historical and contemporary environmental problems
- Governmental and non-governmental efforts to address problems on local, state, federal and international levels
- Interactions between key actors and institutions involved in environmental policymaking in the United States and internationally

Foundation Courses (12)

Students must take 3 of the introductory courses (12)

PS 201. *Introduction to United States Government and Politics (4)

PS 205. *Introduction to International Relations (4)

Either PS 204. *Introduction to Comparative Politics (4) or PS 206. *Introduction to Political Thought (4)

Methods/WIC (4)

PS 300. ^Political Analysis (4)

Political Science Internship (4)

PS 406. Projects (2)

PS 410. Political Science Internship (2)

Upper-Division Option Courses (32) Select 32 credits from the list below.

Up to 8 upper-division credits can come from classes listed below in the programs of economics and sociology. Other courses as approved by the department.

PS 331. State and Local Government and Politics (4)

PS 370. *Science, Religion, and Politics (4)

PS 371. Public Policy Problems (4)

PS 411. Legislative Politics (4)

PS 412. Presidential Politics (4)

PS 414. Interest Groups (4)

PS 416. Public Opinion and Politics (4)

PS 454. International Law and Organizations (4)

PS 455. The Politics of Climate Change (4)

PS 461. Environmental Political Theory (4)

PS 473. US Energy Policy (4)

PS 475. Environmental Politics and Policy (4)

PS 476. *Science and Politics (4)

PS 477. International Environmental Politics and Policy (4)

PS 479. Topics in Public Policy and Public Administration (4)

Up to 8 credits from the list below:

ECON 352. *Environmental Economics and Policy (3)

or AREC 352. *Environmental Economics and Policy (3)

ECON 466. Energy Economics (4)

SOC 456. *Science and Technology in Social Context (4)

SOC 480. *Environmental Sociology (4)

SOC 481. *Society and Natural Resources (4)

SOC/ANS/FS/FW 485. *Consensus and Natural Resources (3)

Footnotes:

* Baccalaureate Core Course. Major courses cannot double count for baccalaureate core requirements.

^ Writing Intensive Course

INTERNATIONAL AFFAIRS OPTION

The International Affairs option provides students with the opportunity to focus their undergraduate studies on topics involving:

- The political systems and dynamics of different countries and regions around the world
- Relations among countries and non-state actors
- Global issues, problems, and institutions

Foundation courses (12 credits)

Select 3 of the following introductory courses:

PS 204. *Introduction to Comparative Politics (4)

PS 205. *Introduction to International Relations (4)

Either PS 201. *Introduction to United States Government and Politics (4)
or PS 206. *Introduction to Political Thought (4)

Methods/WIC (4 credits)

PS 300. ^Political Analysis (4)

Political Science Internship (4 credits)

PS 406. Projects (2)

PS 410. Political Science Internship (2)

Upper Division Option Courses (32 credits)

Select 32 credits from the list below.

Up to 8 upper-division credits can come from classes listed below in the programs of Economics and Sociology. Other courses as approved by the department.

PS 340. Eastern and Central European Politics (4)

PS 341. Politics of Western Europe and the European Union (4)

PS 343. *Russian Politics (4)

PS 344. Latin American Politics (4)

PS 345. Politics of Developing Nations (4)

PS 348. Chinese Politics (4)

PS 350. Government and Politics of Modern Japan (4)

PS 351. American Foreign Policy (4)

PS 446. East Asian Political Economy (4)

PS 449. ^Topics in Comparative Politics (4)

PS 453. The Geopolitics of Oil and Energy (4) [**Pending approval of 83517**]

PS 454. International Law and Organizations (4)

PS 455. The Politics of Climate Change (4)

PS 456. International Politics of Asia Pacific (4)

PS 457. US-China Relations (4)

PS 458. International Political Economy (4)

PS 459. ^Topics in International Relations (4)

PS 477. International Environmental Politics and Policy (4)

Select up to 8 credits from:

ECON 340. International Economics (4)

ECON 440. Economics of Globalization (4)

ECON 441. International Finance Theory and Policy (4)

ECON 455. Economic Development (4)

SOC 460. The Sociology of Globalization (4)

SOC 466. International Development: Gender Issues (4)

LAW, POLITICS AND SOCIETY OPTION

The Law, Politics and Society option offers students the opportunity to focus their undergraduate studies on topics involving:

- The role of the courts and other relevant institutions in defining the breadth and scope of government
- Judicial procedures and behaviors and their implications for our democracy
- Relationships between the various branches of the U.S. government, as well as between state and federal governments
- Normative arguments regarding justice and equality in theory and in practice

Foundation Courses (12 credits)

Students must take 3 of introductory courses from below:

PS 201. *Introduction to United States Government and Politics (4)

PS 206. *Introduction to Political Thought (4)

Either PS 204. *Introduction to Comparative Politics (4)

or PS 205. *Introduction to International Relations (4)

Methods/WIC (4 credits)

PS 300. ^Political Analysis (4)

Political Science Internship (4 credits)

PS 406. Projects (2)

PS 410. Political Science Internship (2)

Upper-Division Option Courses (32 credits)

Select 32 credits from the list below.

Up to 8 upper division credits can come from classes listed below in the programs of Economics and Sociology. Other courses as approved by the department.

PS 321. American Constitutional Law (4)

PS 322. American Constitutional Law (4)

PS 326. Judicial Process and Politics (4)

PS 331. State and Local Government and Politics (4)

PS 361. Classical Political Thought (4)

PS 362. Modern Political Thought (4)

PS 363. *Gender and Race in American Political Thought (4)

PS 365. American Political Thought (4)

PS 411. Legislative Politics (4)

PS 412. Presidential Politics (4)

PS 423. American Constitutional Law (4)

Pending approval of 83330

PS 425. *Gender and Law (4)

PS 427. Courts and Social Change (4)

Pending approval of 83333

PS 429. ^Topics in Judicial Politics (4)

PS 454. International Law and Organizations (4)

PS 462. Theories of Law (4)

Select up to 8 credits from:

ECON 461. Law, Economics, and Regulation (4)

SOC 340. Deviant Behavior and Social Control (4)

SOC 438. US Immigration Issues in the 21st Century (4)

SOC 440. Juvenile Delinquency (4)

SOC 441. Criminology and Penology (4)

SOC 442. Sociology of Drug Use and Abuse (4)

SOC 448. Law and Society (3)

SOCIOLOGY (BA, BS, CRED, HBA, HBS)

Sociology (BA, BS) is also available on the OSU-Cascades Campus.

Sociology is the study of human social behavior and sociologists examine interactions within and between groups and resulting social institutions. The undergraduate program in sociology provides a general analysis and broad understanding of human societies and culture for persons in all fields. Selecting courses around a topic or theme of interest adds meaning to one's education and strengthens the base of understanding from which one can pursue a career or further education. Two options are currently available for those interested — Crime and Justice, and Environmental and Natural Resource Sociology — although students can shape a custom theme such as international development or social policy.

Core

SOC 204. *Introduction to Sociology (3)

[Prereq. to all upper-division sociology courses]+

SOC 315. ^Methods I: Research Design (4)+

SOC 316. ^Methods II: Quantitative Analysis (4)+

SOC 413. Sociological Theory (4)+

Sociology electives (33)

Maximum of 12 at lower division

Maximum of 8 credits in courses numbered SOC 401 to 410.

Total=48

Transfer students may apply a maximum of 12 credits of lower-division sociology credits toward a degree in sociology.

A minimum grade-point average of 2.00 must be earned in sociology course work. A grade of C– or above is required in SOC 315, SOC 316, and SOC 413.

OPTIONS**CRIME AND JUSTICE OPTION**

This option provides students with the ability to apply social science concepts and approaches to better understand and analyze relationships between crime, justice, and public policy from a sociological perspective. The option has particular relevance for sociology students aspiring to careers in criminal justice, law, or social services, as well as those preparing for advanced/graduate programs in criminology, criminal justice, or public policy. Academic internships are available in local criminal justice and social service agencies, offering a unique combination of scholarly analysis and practical experience for students seeking careers in fields such as law, policing, corrections, and social work.

Required

SOC 241. Introduction to Criminal Justice (3)+

Choose 3 of the following 4 courses:

- SOC 340. Deviant Behavior and Social Control (4)+
- SOC 440. Juvenile Delinquency (4)
- SOC 441. Criminology and Penology (4)+
- SOC 442. Sociology of Drug Use and Abuse (4)

Elective Courses

- SOC 206. Social Problems (3)+
- SOC 299. Special Topics: *Sociology of Madness* (3)
- SOC 410. Internship Practicum (1–4)+
- SOC 426. *Social Inequality (4)+
- SOC 430. Gender and Society (4)
- SOC 437. Race and Ethnic Relations (4)
- SOC 448. Law and Society (4)
- SOC 470. Collective Behavior (4)
- SOC 499. Special Topics (1–16)

Total=27**Footnotes:**

- * Baccalaureate Core Course
- + Also offered online via Ecampus

ENVIRONMENTAL AND NATURAL RESOURCE SOCIOLOGY OPTION

The option is designed to provide students with the ability to apply social science concepts and approaches to better understand relationships between societies and their bio-physical environment from a sociological perspective. This option has great relevance for sociology students aspiring to careers in natural resource and environmental policy, planning, management, and education, as well as preparation for advanced/graduate programs related to environmental law and environment/natural resource sociology or policy.

Required Courses

SOC 480. *Environmental Sociology (4)+
SOC 481. *Society and Natural Resources (4)+

Elective Courses

- SOC 360. *Population Trends and Policy (4)+
- SOC 454. *Leisure and Culture (4) (SS)+
- SOC 456. *Science and Technology in a Social Context (4)+
- SOC 475. Rural Sociology (4)+
- SOC 485. *Consensus and Natural Resources (3)+
- SOC 499. Special Topics (related to community and demography) (1–16)
- SOC 410. Internship Experience (1–4)

No more than two of the following elective courses can count toward the option:

- ANTH 481. *Natural Resources and Community Values (3)+
- GEO 420. Geography of Resource Use (3)
- GEO 423. Land Use in the American West (3)
- PHL 440. Environmental Ethics (3) (HC)+
- PHL 443. *World Views and Environmental Values (3) (NC)+
- PS 475. Environmental Politics and Policy (4)+
- NR 455. Natural Resource Decision Making (3)+ (*on-campus section needs instructor approval*)

Total=21**Footnotes:**

- SS = College of Liberal Arts (social core)
- HC = CLA (humanities core)
- NC = CLA (non-Western core)

SOCIAL SCIENCE (BA, BS, CRED, HBA)**Available only****on OSU-Cascades Campus.**

The Social Science major is only offered at the OSU-Cascades Campus through the Division of Arts and Sciences, College of Liberal Arts at OSU. The first two years of course work will be offered at Central Oregon Community College (COCC). The upper-division courses are offered on the OSU-Cascades campus. Students will also be able to take advantage of distance courses offered by OSU E-campus and streamed via TV from Corvallis.

Baccalaureate Core (48)**College of Liberal Arts****Requirements**

Courses taken to fulfill College of Liberal Arts Requirements cannot be used to fulfill BACC Core, major cores or Option requirements.

Core (5 courses)

[*These requirements can be fulfilled at Oregon Community Colleges.*]

- Humanities
- Fine Arts
- Non-Western Culture
- Social Science
- Methods course (fulfills additional course requirement)

Lower-Division Requirements

Choose either BS or BA: [*These requirements can be fulfilled at Oregon community colleges.*]

For a Bachelor of Science (20 credits):

1. Select 8 credits from the following MTH courses: MTH 111, 112, 113, 211, 241, 243, 244, 247, 251
2. One additional 3-credit course from the science departments except Math and ST (no lab required) (3 credits)
3. One computer science course (4 credits)

For a Bachelor of Arts (18 credits):

Two years of a foreign language with a grade of C– or better

Social Science Major (28–35 credits)

Note: Courses taken to fulfill major requirements cannot be used to fulfill Bacc Core, College of Liberal Arts, or option requirements. Not all courses are offered every year. Students should consult the annual schedule of classes for a listing of available courses for the academic year.

Social Science Core**Choose 6 courses, no more than 3 from any discipline:**

- ANTH 311, 313, 314, 315, 316, 317, 318, or 319. Peoples of the World (3)
- ANTH 350. Language, Culture and Society (4)
- ANTH 370. ^Anthropological Theories (4)
- ANTH 473. Gender, Ethnicity, and Culture (3)
- ANTH 477. Ecological Anthropology (4)
- ANTH 479. Anthropology of Migration (4)
- ANTH 484. *Wealth and Poverty (3)
- ANTH 486. Anthropology of Food (2–6)
- COMM 321. Introduction to Communication Theory (3)
- COMM 322. Small-Group Problem Solving (3)
- COMM 326. Intercultural Communication (3)
- COMM 328. Nonverbal Communication (3)
- COMM 416. Ethnography of Communication (3)
- COMM 418. ^Interpersonal Communication Theory and Research (3)

OPTIONS

COMMUNITY DEVELOPMENT AND LEADERSHIP OPTION

Not all courses are offered every year. Students should consult the annual schedule of classes for a listing of available courses for the academic year. All courses are offered at OSU-Cascades with the exception of COMM 114 and PS 201, which are offered at Oregon community colleges.

Choose one course:
 COMM 323. Community Dialogue (4) [Pending curriculum council approval.]
 or COMM 325. Communicating Leadership (4) [Pending curriculum council approval.]
Choose five courses different from the one taken above:
 BA 352. Managing Individual and Team Performance (4)
 COMM 114. Argument and Critical Discourse (3)
 COMM 323. Community Dialogue (4) [Pending curriculum council approval.]
 or COMM 325. Communicating Leadership (4) [Pending curriculum council approval.]

COMM 425. Communication and Youth Outreach (4)
 COMM 440. Theories of Conflict and Conflict Management (3)
 LS 499. Special Topics: *Funding and Resource Development* (4)
 PS 201. *Introduction to US Government and Politics (4)
 PS 331. State and Local Government and Politics (4)
 PS 461. Environmental Political Theory (4)
 PS 475. Environmental Politics and Policy (4)

Total=22–24

UNDERGRADUATE MINORS

ASIAN STUDIES MINOR

The minor program will provide an opportunity for students majoring in fields such as business, engineering, or sciences who will be working in Asia or with Asians. They will gain a significant degree of cultural literacy that will be critical for their professional success. In addition, the program will be an outstanding supplement to a traditional liberal arts major for students with particular interests in Asia, who want to study abroad, or who plan to go on to do graduate work in areas with concentrations in aspects of Asia.

Required 27–28 credits

HST 392. *Modern China and Japan (4)
 PHL 312. *Asian Thought (4)

Select 15–16 credits from the following (two disciplines):

ANTH 316. *Peoples of the World—South and Southeast Asia (3)
 ANTH 318. *Peoples of the World—China (3)
 ANTH 319. *Peoples of the World—Japan and Korea (3)
 ART 208. *Introduction to Asian Art (3)
 ART 397. Selected Topics in Global Art History: Art of China I (3)
 ART 397. Selected Topics in Global Art History: Art of China II (3)
 ART 397. Selected Topics in Global Art History: Art of Japan (3)
 BA 347. International Business (4)
 CHN 331. *Chinese Culture (3)
 CHN 332. *Chinese Culture (3)
 CHN 333. *Chinese Culture (3)
 ES 231. *Asian American Studies: Mid-1800s-Present (4)
 ES 233. *Asian American Studies II: Activism and Empowerment (3)
 ES 332. Asian Pacific Americans and the Media (3)
 ES 334. *Asian American Literature (3)
 ES 352. *Asian Representation in Hollywood and Independent Cinemas (3)
 GEO 327. *Geography of Asia (3)
 GEO 330. *Geography of International Development and Globalization (3)
 HST 391. *East Asia (4)
 HST 396. *Gender, Family and Politics in Traditional China (4)
 HST 397. *Gender, Family and Politics in Modern China (4)
 JPN 331. *Japanese Culture (3)

JPN 332. *Japanese Culture (3)
 JPN 333. *Japanese Culture (3)
 PHL 208. Introduction to Buddhist Traditions (4)
 PHL 371. *Philosophies of China (4)
 PS 348. Chinese Politics (4)
 PS 350. Government and Politics of Modern Japan (4)

Select 7–8 credits from the following:

ANTH 488. *Business and Asian Culture (3)
 ANTH 562. Minority Cultures of China (3)
 ART 497. Selected Topics in Global Art History: Chinese Calligraphy (3)
 ART 497. Selected Topics in Global Art History: Contemporary Chinese Art (3)
 ES 437/ES 537. Gender Issues in Asian American Studies (3)
 HST 494. Modern Japan: a Cultural History (4)
 HST 495. China in the Twentieth Century (4)
 PHL 430/PHL 530. History of Buddhist Philosophy (4)
 PS 446/PS 546. East Asian Political Economy (4)
 PS 456/PS 556. International Politics of Asia Pacific (4)
 PS 457/PS 557. US-China Relations (4)

ECONOMICS MINOR

Also available via Ecampus.

Students minoring in economics must complete a minimum of 27 credits with a GPA of at least 2.0 in their program of study. A maximum of two classes (8 credits) may be taken on an S/U basis. Course requirements for the Economics minor:

ECON 201. *Introduction to Microeconomics (4)
 ECON 202. *Introduction to Macroeconomics (4)
 ECON 311. Intermediate Microeconomic Theory I (4)
 or ECON 411. Advanced Microeconomic Theory (4)
 Plus upper-division courses in economics (15)

Notes:

- ST 351, Introduction to Statistical Methods, serves as a substitute for 4 credits of economics upper-division course work when ECON 424, Introduction to Econometrics, is part of the student's program.
- Students cannot receive credit toward the minor for both ECON 311 and ECON 411.
- Students are advised to consult with the Economics advisor before completing their course work.

POLITICAL SCIENCE MINOR

Also available via Ecampus.

Students selecting the Political Science minor must complete 28 credits of political science, including at least two 4-credit introductory courses (chosen from PS 201, PS 204, PS 205, and PS 206) and

at least 20 credits at the upper-division level.

No more than 8 credits from PS 401–PS 410 may be applied to the minor.

SOCIOLOGY MINOR

Also available via Ecampus.

Undergraduate students may elect a Sociology minor to complement course work in their major discipline. The Sociology minor also is available through Extended Campus (Ecampus).

Transfer students may apply a maximum of 12 credits of lower-division sociology credits toward the Sociology minor.

A minimum GPA of 2.00 must be earned in sociology course work.

Core (7)

SOC 204. *Introduction to Sociology (3)
(Prerequisite to all upper-division courses)

Select one theory or methods course from the following:

SOC 340. Deviant Behavior and Social Control (4)

SOC 418. Qualitative Research Methods (4)

SOC 421. Social Change and Modernization (3)+

SOC 424. Social Psychology (4)

SOC 426. *Social Inequality (4)+

SOC 450. Sociology of Education (4)+

SOC 452. Sociology of Religion (4)

SOC 456. *Science and Technology in Social Context (4)+

A maximum of 12 credits of lower-division courses.

A maximum of 3 credits from SOC 401 to SOC 410.

Additional sociology courses as necessary to total 27 credits.

Total=27

+ Also offered online via Ecampus

PUBLIC POLICY (MPP, PhD)

Graduate Areas of Concentration

Energy policy; environmental policy; international policy; law, crime, and policy; rural policy; science and technology policy; social policy

Oregon State University offers graduate programs in public policy to students interested in energy policy; environmental policy; international policy; law, crime, and policy; rural policy; science and technology policy; and/or social policy. The degrees are granted by the College of Liberal Arts and provide graduate education for students wishing to develop their interests and careers in the public and nonprofit sectors. The Master of Public Policy (MPP) specifically prepares students for careers in domestic and international organizations and offers training for “in-service” students (already employed) desiring professional growth and advancement. The PhD in Public Policy prepares students for academic or non-academic research careers in the public, private, and nongovernmental

sectors. The Public Policy Graduate Program accepts students with backgrounds in related academic disciplines. The degrees are designed to provide individuals with analytic skills, an understanding of public policy processes, and substantive knowledge in a specific policy area.

To see details outlined in a brochure, go to <http://oregonstate.edu/cla/spp/graduate>.

POLITICAL SCIENCE GRADUATE MINOR

Graduate Areas of Concentration

American politics, judicial politics, public administration, political theory, state and local government, international relations, comparative politics, gender politics, environmental policy

Graduate work in the School of Public Policy may serve as a field of study for a Master of Arts in Interdisciplinary Studies degree or the Master of Public Policy degree or as a minor in other advanced degree programs.

The program aims to provide a systematic understanding of political processes, institutions, theories, and behavior. Students are strongly urged to acquire competence in statistics and computer data processing as aids in analyzing political phenomena. A program of study suited to the student's individual interests is arranged with a faculty advisor.

Students applying for graduate work in political science must meet the following requirements:

1. A minimum overall undergraduate GPA of 3.00.
2. Appropriate undergraduate course work in political science (normally such course work will include foundation courses such as American government and politics, introduction to political science, or introduction to political thought).
3. Prior approval of an advisor in the applicant's chosen area of study.

No action will be taken on any applicant's materials until a meeting with an advisor has taken place. Areas of study include American politics, public policy, judicial politics, public administration, political theory, state and local government, international relations, comparative politics, methodology, and gender politics.

SOCIOLOGY GRADUATE MINOR

Graduate Areas of Concentration

Environmental and natural resources, international sociology, social policy

Sociology in the School of Public Policy serves as a minor field in the Master of Arts in Interdisciplinary Studies degree program and participates as a minor field in other advanced degree programs. The MAIS program is designed to meet the particular needs and interests of the individual student and features collaborative work in any two other pertinent departments. Further information can be obtained by writing the School of Public Policy, 307 Fairbanks Hall, OSU, Corvallis, OR 97331-3703.

ECONOMICS COURSES

ECON 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ECON 201. *INTRODUCTION TO MICROECONOMICS (4). An introduction to microeconomic principles including the study of price theory, economic scarcity, consumer behavior, production costs, the theory of the firm, market structure, and income distribution. Other selected topics may include market failure, international economics, and public finance. (SS) (Bacc Core Course) **PREREQS:** MTH 111 or equivalent is recommended.

ECON 201H. *INTRODUCTION TO MICROECONOMICS (4). An introduction to microeconomic principles including the study of price theory, economic scarcity, consumer behavior, production costs, the theory of the firm, market structure, and income distribution. Other selected topics may include market failure, international economics, and public finance. (SS) (Bacc Core Course) **PREREQS:** MTH 111 or equivalent is recommended. Honors College approval required.

ECON 202. *INTRODUCTION TO MACROECONOMICS (4). An introduction to macroeconomic principles including study of the theories of output determination, consumption, investment, inflation, unemployment, and fiscal and monetary policy. Other selected topics may include the study of the international balance of payments, growth and development, and urban and regional problems. (SS) (Bacc Core Course) **PREREQS:** MTH 111 or equivalent is recommended.

ECON 202H. *INTRODUCTION TO MACROECONOMICS (4). An introduction to macroeconomic principles including study of the theories of output determination, consumption, investment, inflation, unemployment, and fiscal and monetary policy. Other selected topics may include the study of the international balance of payments, growth and development, and urban and regional problems. (SS) (Bacc Core Course) **PREREQS:** MTH 111 or equivalent is recommended. Honors College approval required.

ECON 311. INTERMEDIATE MICROECONOMIC THEORY (4). An examination of demand theory, production and cost theory, game theory, behavioral economics, competitive and imperfectly competitive markets, and general equilibrium and welfare economics. ECON 311 and ECON 411 cannot both be taken for credit toward the economics major. **PREREQS:** ECON 201

ECON 312. INTERMEDIATE MICROECONOMIC THEORY II (4). An examination of the theories of imperfect competition, input markets, general equilibrium, and welfare economics. **PREREQS:** ECON 311

ECON 315. INTERMEDIATE MACROECONOMIC THEORY (4). An examination of macroeconomic

aggregates, income determination, aggregate demand and supply. The basic macroeconomic models will be discussed such as Keynesian, Classical, Monetarist, and Neo-Classical. ECON 315 and ECON 415 cannot both be taken for credit toward the Economics major. **PREREQS:** ECON 201 and ECON 202

ECON 316. INTERMEDIATE MACROECONOMIC THEORY II (4). An examination of individual sectors of the macro economy, including theories of consumption, investment, money demand and money supply; an introduction to economic growth, open economy macroeconomics, and monetary and fiscal policy issues. **PREREQS:** ECON 315

ECON 329. INTRODUCTION TO MATHEMATICAL ECONOMICS (4). Mathematical methods of economic analysis. Theory of economic structure and optimization developed through calculus and linear algebra, dynamic systems analyzed through integral calculus and difference and differential equations. The mathematical tools are developed in conjunction with their application to economic problems. Some acquaintance with calculus recommended. **PREREQS:** ECON 201 and ECON 202 and (MTH 241 or MTH 251)

ECON 330. MONEY AND BANKING (4). Nature and functions of money; functions and operations of depository institutions; the money market; central banking and monetary policy. (SS) **PREREQS:** ECON 201 and ECON 202

ECON 340. INTERNATIONAL ECONOMICS (4). An overview of international economics with an emphasis on current events and applications, including classical and modern trade theory and the study of trade and exchange-rate policies. (SS) (See Schedule Comment regarding Bacc Core status.) **PREREQS:** ECON 201 and ECON 202

ECON 352. *ENVIRONMENTAL ECONOMICS AND POLICY (3). Provides an overview of the interrelationships between economic activity, the environment, and public policy. Through case studies, discussion groups, readings, and group activities, students learn how economists define and analyze environmental problems and the types of policies they advocate for managing environmental quality. CROSSLISTED as AREC 352. (Bacc Core Course) **PREREQS:** AREC 250 or ECON 201 or ECON 201H

ECON 383. *THE ECONOMICS OF DISCRIMINATION (4). An economic analysis of discrimination, focusing on labor market inequities for women and minorities. Historical and current trends in pay, education, and employment disparities, economic explanations for such disparities, and econometric evidence for wage and employment discrimination. (SS) (Bacc Core Course) **PREREQS:** ECON 201

ECON 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

ECON 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

ECON 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

ECON 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 410. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 411. ADVANCED MICROECONOMIC THEORY (4). Rigorous treatment of optimizing behavior of economic agents and markets. Examines utility maximization and demand; cost minimization, profit maximization and supply; perfect competition and monopoly; imperfect competition and game theory; and general equilibrium, social welfare and market failure using sophisticated mathematical tools. Students cannot receive credit toward the major for both ECON 311 and ECON 411. **PREREQS:** ECON 201 and (MTH 241 or MTH 251)

ECON 414. POLITICAL AND BEHAVIORAL ECONOMICS (4). Economic analysis of politics and the intersection of psychology and economics. Topics include voter behavior, strategic policy formation and influence, and the primary behavioral deviations from the neoclassical model of rational self-interest. **PREREQS:** ECON 311 or ECON 411

ECON 415. ADVANCED MACROECONOMIC THEORY (4). Macroeconomics as an application of general equilibrium theory. Macroeconomic models are developed taking preferences and technology as primitives. The models' short and long run predictions are analyzed and compared to the data. The welfare implications of fiscal and monetary policy are discussed. ECON 315 and ECON 415 cannot both be taken for credit toward the major. **PREREQS:** ECON 201 and ECON 202 and (MTH 241 or MTH 251)

ECON 423. ECONOMETRICS I (4). Introduction to probability and statistics with an emphasis on estimation and hypothesis testing. Applications to economic models. **PREREQS:** MTH 241 or MTH 251 or MTH 251H and MTH 241 or MTH 251

ECON 424. INTRODUCTION TO ECONOMETRICS (4). Application of statistical techniques, including sampling theory, hypothesis testing, and multiple regression analysis, to economic models. Economic modeling, analysis of economic data, and policy analysis are emphasized. ECON 424 and ECON 427 cannot both be taken for credit toward the major. Lec/lab. **PREREQS:** ((ECON 311 and ST 351) or (ECON 411 and ECON 423))

ECON 427. ECONOMETRICS II (4). Addresses both the theory and practice of econometrics, including properties of estimators, modeling economic processes, estimation, hypothesis testing, prediction and interpretation of results. Students cannot receive credit toward the major for both ECON 424 and ECON 427. Lec/lab. **PREREQS:** ECON 423 and (MTH 241 or MTH 251)

ECON 428. ^INTRODUCTION TO ECONOMIC RESEARCH (4). Basic methods of economic research: concepts and models; data sources, collection, and presentation; hypothesis formulation and testing; policy analysis. Written assignments apply methods. (Writing Intensive Course) **PREREQS:** ECON 311 or ECON 315

ECON 435. THE PUBLIC ECONOMY (4). Composition and growth of government spending; theory of public expenditure; analysis of public expenditure programs; benefit-cost analysis; theory and practice of taxation; analysis of local, state, and federal taxes; government borrowing and fees; current issues in tax and expenditure policy. **PREREQS:** ECON 311

ECON 439. ^PUBLIC POLICY ANALYSIS (4). Theory of public problems and decision making. Evaluation of public policy strategies, selected public programs and individual public projects

considering the full range of efficiency and equity effects. Direct and indirect impacts of policy, strength of implicit incentives, administrative feasibility, and problems of policy implementation. (Writing Intensive Course) **PREREQS:** ECON 311 and ECON 435 or equivalent

ECON 440. ECONOMICS OF GLOBALIZATION (4). Examination of the phenomenon of globalization using economic analysis to explore controversial themes of the globalization debate--offshoring, sweatshops, child labor, environmental standards, intellectual property protection, cultural diversity, economic development, immigration, and governance. **PREREQS:** ECON 311

ECON 441. INTERNATIONAL FINANCE THEORY AND POLICY (4). Theories and policies of exchange rate regimes; fixed, floating and managed floats; internal and external trade and capital balances; international capital flows and institutions. **PREREQS:** ECON 315

ECON 455. ECONOMIC DEVELOPMENT (4). History, theories and policies for economic development in the Third World of underdeveloped countries. (SS) **PREREQS:** ECON 201 and ECON 202

ECON 460. INDUSTRIAL ORGANIZATION THEORY AND POLICY (4). The study of the causes and effects of firm and market structures, conduct, and performance; United States antitrust and other laws regulating business behavior. **PREREQS:** ECON 311

ECON 461. LAW, ECONOMICS, AND REGULATION (4). The analysis of the effectiveness of laws and government regulations in fostering economic efficiency and fairness. Topics include the design of laws and policies to promote social welfare and the study of the effectiveness of criminal law, antitrust law, and the government regulation of business in promoting social goals. **PREREQS:** ECON 201

ECON 462. MANAGERIAL ECONOMICS (4). The application of microeconomic theory and quantitative methods to management decisions. Case-oriented course emphasizing actual business decisions. **PREREQS:** ECON 311

ECON 463. ^EFFICIENCY AND PRODUCTIVITY ANALYSIS (4). Workshop on the theory and measurement of performance, especially efficiency and productivity. Emphasis on application including introduction to user-friendly software. Design, implementation and write-up of an analysis of performance. (Writing Intensive Course) **PREREQS:** ECON 201 and ECON 202 and ECON 311

ECON 465. TRANSPORTATION ECONOMICS (4). Demand, supply, and pricing for transport facilities, (airports, ports) right of way (highways, waterways), including optimal user fees, congestion tolls, and second-best pricing schemes. Theories of economic regulation and evaluation of experience in the transport sector. **PREREQS:** ECON 311

ECON 466. ENERGY ECONOMICS (4). Examines the economics of oil, coal, natural gas production and their use, as well as substitutes such as conservation and renewables, focusing on electricity markets, federal and state regulatory frameworks, and resulting public policy issues from a regional and national perspective. **PREREQS:** ECON 201

ECON 480. LABOR ECONOMICS (4). Individual and business choices as determinants of wages and working conditions; human capital theory and the education and training of workers; discrimination and other sources of wage differentials; unemployment and public policy toward labor markets. **PREREQS:** ECON 311

ECON 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ECON 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

ECON 510. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

ECON 512. MICROECONOMIC THEORY I (4). Economic theories of consumer behavior and demand, production, cost, the firm, supply, and competitive and monopoly market structures. **PREREQS:** ECON 312 or AREC 312

ECON 513. MICROECONOMIC THEORY II (4). Economic theories of imperfect competition, input markets, general equilibrium and welfare economics. **PREREQS:** ECON 512

ECON 514. POLITICAL AND BEHAVIORAL ECONOMICS (4). Economic analysis of politics and the intersection of psychology and economics. Topics include voter behavior, strategic policy formation and influence, and the primary behavioral deviations from the neoclassical model of rational self-interest. **PREREQS:** ECON 311 or ECON 411

ECON 515. MACROECONOMIC THEORY I (4). Determination of income, employment, and prices in classical, Keynesian, monetarist, and new classical macroeconomic models. Theories of consumption, investment, money demand, and money supply. Monetary and fiscal policies, the role of expectations. **PREREQS:** ECON 315 or equivalent

ECON 517. MICROECONOMIC THEORY FOR MPP (4). Familiarizes MPP students who do not have a strong background in microeconomics with the material they will need for their future economics course work. **PREREQS:** Working knowledge of algebra and geometry.

ECON 523. STATISTICS FOR ECONOMETRICS (4). Examines mathematical and statistical topics essential for graduate-level econometric analysis, including matrix algebra, probability and distribution theory (emphasizing joint and conditional distributions), statistical inference, and econometric optimization algorithms. **PREREQS:** MTH 253 and ST 351 and (ST 352 or ECON 424 or ECON 524)

ECON 524. INTRODUCTION TO ECONOMETRICS (4). Application of statistical techniques, including sampling theory, hypothesis testing, and multiple regression analysis, to economic models. Economic modeling, analysis of economic data, and policy analysis are emphasized. **PREREQS:** (ECON 311 and ST 351) or (ECON 411 and ECON 423)

ECON 525. ECONOMETRIC METHODS (4). The use of multiple regression under generalized assumptions, specification problems, an introduction to simultaneous equation estimation, the classical linear model using matrices. Emphasis on the analysis of data and communication of findings. **PREREQS:** (AREC 523 or ECON 523) and (ECON 424 or ECON 524) and (AREC 512 or ECON 512)

ECON 526. APPLIED ECONOMETRICS (4). Model building, hypothesis testing, and appropriate estimation procedures including generalized least squares, seemingly unrelated regressions, simultaneous equations, maximum likelihood, and limited dependent variables. Emphasis on applications and interpretation of results. **PREREQS:** ECON 525

ECON 529. INTRODUCTION TO MATHEMATICAL ECONOMICS (4). Review of the basic linear algebra, vector calculus, and analysis of dynamic systems needed for graduate work in economics. **PREREQS:** MTH 251 or equivalent recommended.

ECON 535. THE PUBLIC ECONOMY (4). Composition and growth of government spending; theory of public expenditure; analysis of public expenditure programs; benefit-cost analysis; theory and practice of taxation; analysis of local, state, and federal taxes; government borrowing and fees; current issues in tax and expenditure policy. **PREREQS:** ECON 311

ECON 539. PUBLIC POLICY ANALYSIS (4). Theory of public problems and decision making. Evaluation of public policy strategies, selected public programs and individual public projects considering the full range of efficiency and equity effects. Direct and indirect impacts of policy, strength of implicit incentives, administrative feasibility, and problems of policy implementation. **PREREQS:** ECON 311 and ECON 435 or equivalent

ECON 540. ECONOMICS OF GLOBALIZATION (4). Examination of the phenomenon of globalization using economic analysis to explore controversial themes of the globalization debate--offshoring, sweatshops, child labor, environmental standards, intellectual property protection, cultural diversity, economic development, immigration, and governance. **PREREQS:** ECON 311

ECON 541. INTERNATIONAL FINANCE THEORY AND POLICY (4). Theories and policies of exchange rate regimes; fixed, floating and managed floats; internal and external trade and capital balances; international capital flows and institutions. **PREREQS:** ECON 315

ECON 555. ECONOMIC DEVELOPMENT (4). History, theories and policies for economic development in the Third World of underdeveloped countries. **PREREQS:** ECON 201 and ECON 202

ECON 560. INDUSTRIAL ORGANIZATION THEORY AND POLICY (4). The study of the causes and effects of firm and market structures, conduct, and performance; United States antitrust and other laws regulating business behavior. **PREREQS:** ECON 311

ECON 561. LAW, ECONOMICS, AND REGULATION (4). The analysis of the effectiveness of laws and government regulations in fostering economic efficiency and fairness. Topics include the design of laws and policies to promote social welfare and the study of the effectiveness of criminal law, antitrust law, and the government regulation of business in promoting social goals. **PREREQS:** ECON 201

ECON 562. MANAGERIAL ECONOMICS (4). The application of microeconomic theory and quantitative methods to management decisions. Case-oriented course emphasizing actual business decisions. **PREREQS:** ECON 311

ECON 563. EFFICIENCY AND PRODUCTIVITY ANALYSIS (4). Workshop on the theory and measurement of performance, especially efficiency and productivity. Emphasis on application including introduction to user-friendly software. Design, implementation and write-up of an analysis of performance. **PREREQS:** ECON 512

ECON 565. TRANSPORTATION ECONOMICS (4). Demand, supply, and pricing for transport facilities, (airports, ports) right of way (highways, waterways), including optimal user fees, congestion tolls, and second-best pricing schemes. Theories of economic regulation and evaluation of experience in the transport sector. **PREREQS:** ECON 311

ECON 566. ENERGY ECONOMICS (4). Examines the economics of oil, coal, natural gas production and their use, as well as substitutes such as conservation and renewables, focusing

on electricity markets, federal and state regulatory frameworks, and resulting public policy issues from a regional and national perspective.

PREREQS: ECON 201

ECON 570. MACROECONOMIC THEORY I (4). Introduction to dynamic macroeconomic theory, including a review of Keynesian models, continuous and discrete time programming, Solow, Ramsey, and endogenous growth models, and real business cycle theory. **PREREQS:** ECON 315 or equivalent.

ECON 571. MACROECONOMIC THEORY II (4). Advanced topics in macroeconomics, including complete and incomplete markets for risk, monetary theory and policy, New-Keynesian models of the business cycle, fiscal policy analysis, and labor markets and unemployment. **PREREQS:** ECON 570

ECON 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 602. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits.

ECON 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ECON 610. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits.

ECON 615. ADVANCED MACROECONOMIC THEORY (4). Seminar on advanced macroeconomic issues which include the analysis of open economy macroeconomic models and the application of time series techniques to macroeconomic issues and problems. **PREREQS:** ECON 515

ECON 626. EFFICIENCY AND PRODUCTION MEASUREMENT (4). Axiomatic production theory; efficiency indicators and indexes; issues in aggregation; productivity; network and dynamic models and computational issues. **PREREQS:** (ECON 523 or AREC 523) and (ECON 525 or AREC 525) and (ECON 526 or AREC 526)

ECON 627. APPLIED MICRO-ECONOMETRICS (4). Estimation of panel data models and dynamic panels; nonparametric density estimation; nonparametric and semiparametric regression; local polynomial and NW estimation; stochastic and deterministic frontier models; nonparametric frontiers. **PREREQS:** ECON 626

ECON 628. ADVANCED ECONOMETRICS I (4). Introduction to stochastic processes: stationarity, ergodicity, dependence and Martingale Theory; models of conditional mean: ARMA models; models of conditional variance: GARCH models; multivariate time series: VAR, impulse response functions and Granger causality; unit roots; cointegrating regression; binary choice models and multinomial models truncated and censored models. **PREREQS:** (ECON 523 or AREC 523) and (ECON 525 or AREC 525) and (ECON 526 or AREC 526)

ECON 640. INTERNATIONAL TRADE AND ECONOMIC GROWTH (4). Issues of international trade in the contemporary world, including protection with perfect and imperfect competition, political economy of protection and multilateral trade negotiations, international factor movements, economic integration, and international debt. Analysis of the effects of endogenous innovation

and growth on world trade. **PREREQS:** ECON 513 and ECON 526 and ECON 540

ECON 660. INDUSTRIAL ORGANIZATION AND TECHNOLOGICAL CHANGE (4). Examination of traditional and new theories of industrial organization including causes and consequences of technological change and the study of firm and market organization, behavior, and performance. **PREREQS:** ECON 513 and ECON 526 and ECON 560 or instructor approval required

■ MASTER OF PUBLIC POLICY COURSES

MPP 507. SEMINAR (1-16). Selected issues concerning government, public policy, public affairs or non-profit organizations. This course is repeatable for a maximum of 16 credits. **PREREQS:** MPP Director approval required.

MPP 510. INTERNSHIP (1-16). Supervised work experience in government, public policy, public affairs or non-profit organizations. Reports and appraisals required. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** MPP Director approval required.

MPP 808. WORKSHOP (1-16). This course is repeatable for a maximum of 32 credits.

■ PUBLIC POLICY COURSES

PPOL 501. RESEARCH AND SCHOLARSHIP (1-12). Graded P/N. This course is repeatable for a maximum of 99 credits. **PREREQS:** Faculty permission.

PPOL 505. READING AND CONFERENCE (1-4). This course is repeatable for a maximum of 16 credits. **PREREQS:** Faculty permission.

PPOL 507. SEMINAR (1-4). This course is repeatable for a maximum of 16 credits. **PREREQS:** Faculty permission.

PPOL 599. SPECIAL TOPICS (1-4). This course is repeatable for a maximum of 16 credits. **PREREQS:** Faculty permission.

PPOL 602. INDEPENDENT STUDY (1-4). This course is repeatable for a maximum of 16 credits. **PREREQS:** Faculty permission.

PPOL 603. THESIS (1-12). This course is repeatable for a maximum of 999 credits. **PREREQS:** Faculty permission.

PPOL 609. PRACTICUM (1-12). This course is repeatable for a maximum of 24 credits. **PREREQS:** Faculty permission.

PPOL 613. ADVANCED POLICY THEORY I (4). First of two-class series introducing a comprehensive review of public policy theory focused on examining theoretical approaches to understanding the complex and contentious assumptions and premises that pose challenges to the way we conduct public policy. **PREREQS:** PhD standing.

PPOL 614. ADVANCED POLICY THEORY II (4). Second course in a two-course series providing a comprehensive review of public policy theory. The course examines theoretical approaches to understanding the complex and contentious assumptions and premises that pose challenges to the way we conduct public policy.

PPOL 621. ADVANCED QUANTITATIVE METHODS (4). Methods used in research in the social sciences, focused on causal inference in public policy contexts. Covers methods used at the frontier of research to estimate the causal effect of policies on outcomes, including instrumental variables, regression discontinuity, and difference-in-differences estimation. **PREREQS:** ECON 524 or equivalent

PPOL 622. ADVANCED POLICY ANALYSIS (4). Introduction to advanced quantitative modeling used in policy analysis, with an emphasis on the application of modeling techniques to research papers. Focus is predominantly on counts and

zero-truncated modeling, time series, and panel regression. **PREREQS:** ((SOC 516 and ECON 524) or PPOL 621 or (AEC 523 and AEC 525))

PPOL 628. ADVANCED QUALITATIVE METHODS (4). Focus on epistemological approaches, research design, data analysis techniques and critiques of qualitative research, with emphasis on participant observation and interviewing. Culminates in the written and oral presentation of a qualitative research proposal, including preliminary results from fieldwork conducted during the course. **PREREQS:** ANTH 591 or HDF5 538 or SOC 518 and PhD standing or permission of instructor.

PPOL 699. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

■ POLITICAL SCIENCE COURSES

PS 126. INTRODUCTION TO LAW AND POLITICS (3). Introductory course to the Summer Pre-Law Series. Topics include role of courts and lawyers in society, basic judicial process, and pre-law advising. Conducted via Ecampus blackboard portal. Students taking PS 126 should plan to enroll in PS 321, PHL 321, WR 329. Graded P/N. **PREREQS:** PS 321* and PHL 321* and WR 329*

PS 201. *INTRODUCTION TO UNITED STATES GOVERNMENT AND POLITICS (4). Description and analysis of American politics and government, including such topics as interest groups, parties, elections, media, the presidency, Congress, the Constitution, and the courts. (SS) (Bacc Core Course)

PS 204. *INTRODUCTION TO COMPARATIVE POLITICS (4). Major concepts of comparative politics applied to various political settings; the United States, Western Europe, Communist regimes, and developing countries. (SS) (Bacc Core Course)

PS 205. *INTRODUCTION TO INTERNATIONAL RELATIONS (4). Analysis of the international system and factors affecting world politics. (SS) (Bacc Core Course)

PS 205H. *INTRODUCTION TO INTERNATIONAL RELATIONS (4). Analysis of the international system and factors affecting world politics. (SS) (Bacc Core Course) **PREREQS:** Honors College approval required.

PS 206. *INTRODUCTION TO POLITICAL THOUGHT (4). Introduction to political philosophy. Major ideas and issues of selected political thinkers. (H) (Bacc Core Course)

PS 299. SPECIAL STUDIES (1-4). This course is repeatable for a maximum of 4 credits. **PREREQS:** Departmental approval required.

PS 300. ^POLITICAL ANALYSIS (4). Qualitative and quantitative approaches to the study of political phenomena. The role of values, theory, hypothesis, data collection, and analysis in evaluating and conducting political science research. (Writing Intensive Course) **PREREQS:** (PS 201 and PS 204 and (PS 205 or PS 206))

PS 317. GENDER AND POLITICS (4). Analyzes the role that gender plays in shaping politics and other aspects of society. The course will cover theories of gender difference, gender-based movements, gender and political office, and gender and public policy. (SS) **PREREQS:** PS 201 or PS 204

PS 321. AMERICAN CONSTITUTIONAL LAW (4). The Supreme Court's work from 1789 to 1876; origins of judicial power, issues of federalism, contracts clause, status of blacks, women, and Native Americans. (PS 321, PS 322, and PS 323 form a sequence, though each course may be taken independently.) **PREREQS:** PS 201

PS 322. AMERICAN CONSTITUTIONAL LAW (4). The Supreme Court's work from 1876-1948; economic substantive due process, judicial formalism, incorporation doctrine, rise

of administrative state, beginnings of Second Reconstruction. **PREREQS:** PS 201

PS 323. AMERICAN CONSTITUTIONAL LAW (4). The Supreme Court's work from 1950 to the present; status of women and racial minorities, freedom of expression versus social order, defendant's rights versus crime control, privacy issues, equal protection doctrine. **PREREQS:** PS 201

PS 326. JUDICIAL PROCESS AND POLITICS (4). Study of the operation, processes, behavior and influence of the state and federal judiciaries, as well as current research in the judiciary as it relates to politics.

PS 331. STATE AND LOCAL GOVERNMENT AND POLITICS (4). Role, organization, and functions of government at the state and local level. Satisfies teaching certification requirement for course work in state and local government.

PS 340. EASTERN AND CENTRAL EUROPEAN POLITICS (4). Analyzes domestic and international politics in Central and Eastern Europe, focusing on the period since WW II. Particular attention will be paid to the establishment and dissolution of the Soviet bloc; the interplay of Soviet foreign policy and domestic politics in the various states; and comparisons of domestic political structures, especially since 1989. **PREREQS:** PS 204

PS 341. POLITICS OF WESTERN EUROPE AND THE EUROPEAN UNION (4). Describes and analyzes the political situation in Europe and the European Union. Special focus is given to issues concerning European security and the European Union, its institutions, politics, and the challenges it faces since the opening of Europe to the East. **PREREQS:** PS 204

PS 343. *RUSSIAN POLITICS (4). Brief survey of Russian politics in Tsarist and Soviet periods followed by extensive analysis of Russian politics in the late Soviet period under Gorbachev (1985-91), the collapse of the USSR in 1991, and post-Soviet Russian politics (1992-present). (Bacc Core Course) **PREREQS:** PS 204

PS 344. LATIN AMERICAN POLITICS (4). Exploration of the region's political culture and of the forces contending for maintenance of the status quo, for reform, and for revolution. **PREREQS:** PS 204

PS 345. *THE POLITICS OF DEVELOPING NATIONS (4). Analyzes the concepts of development and modernization. Also focuses on the economic, political, and cultural problems faced by developing nations. (NC) (Bacc Core Course) **PREREQS:** PS 204

PS 348. CHINESE POLITICS (4). Examines China's post-1949 political and economic development. Special attention is given to the reform era from the late 1970s to the present. The course also addresses the impact of the reforms on society and on the country's relationship with the world. (NC) **PREREQS:** PS 204

PS 350. GOVERNMENT AND POLITICS OF MODERN JAPAN (4). Examination of the Japanese political system during the postwar period. Topics include prewar historical influences, political parties, bureaucracy, interest groups, policy processes and issues, political economy, foreign policy, and United States-Japan relations. Attention will also be given to recent dramatic changes in Japan's political system.

PS 351. AMERICAN FOREIGN POLICY (4). Overview of the role of the United States in the world since World War II and of the factors influencing the formation of American foreign policy. **PREREQS:** PS 201 or PS 205

PS 361. CLASSICAL POLITICAL THOUGHT (4). Major political theorists from the pre-Socratics through the Scholastics. (H) **PREREQS:** PS 206

PS 362. MODERN POLITICAL THOUGHT (4). Major political theorists from the Renaissance to the mid-nineteenth century. (H) **PREREQS:** PS 206

PS 363. *GENDER AND RACE IN AMERICAN POLITICAL THOUGHT (4). Traditional canon of American political thought scrutinized from vantage point of feminist and critical race theory scholarship. (Bacc Core Course)

PS 365. AMERICAN POLITICAL THOUGHT (4). Political values and theoretical systems in the American tradition, from the Puritans to the present. **PREREQS:** PS 201 and PS 206

PS 370. *SCIENCE, RELIGION, AND POLITICS (4). Addresses historical interplay between religion and science in Western culture, then focuses on the perceived conflicts between science and religion within American socio-political context; illustrates role of politics as the "playing field" on which social differences contend; requires students to grapple with viewpoints that differ from their own. Team taught. (Bacc Core Course)

PS 371. PUBLIC POLICY PROBLEMS (4). The content and the politics of adoption and application of such policy areas as defense, poverty and welfare, macroeconomics, and regulation. **PREREQS:** PS 201

PS 375. *THE CIVIL RIGHTS MOVEMENT AND POLICIES (4). Political and social evolution of the civil rights movement, emphasizing events 1954-1965, and major contemporary civil rights politics and policies in the South and the nation. (Bacc Core Course) **PREREQS:** PS 201

PS 399. CURRENT PROBLEMS IN POLITICS (1-4). Selected issues of recent American and international concern such as Vietnam, Central America, or similar topical issues. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.

PS 399H. CURRENT PROBLEMS IN POLITICS (1-4). Selected issues of recent American and international concern such as Vietnam, Central America, or similar topical issues. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

PS 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PS 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PS 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PS 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PS 405H. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

PS 406. PROJECTS (1-16). Section 1-5: Reading. Associated with the internship for which credit is given in PS 410. Section 11: MU Field Training, 3 credits. Section 12: ASOSU Field Training, 3 credits. Completion of this course is required to receive credit for PS 410. Each section graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required. **COREQS:** PS 410

PS 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PS 407H. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required, Honors College approval required.

PS 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PS 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PS 410. POLITICAL SCIENCE INTERNSHIP (1-12). Supervised work experience in government- or law-related programs or other public affairs organizations. Reports and appraisals required. Only 4 credits may be applied to the major. This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required. Concurrent enrollment in either PS 406 or PS 506, Sections 1-5, is required.

PS 411. LEGISLATIVE POLITICS (4). Congressional (and state legislative) politics, both on Capitol Hill and in the district, including campaigns, constituent relations, lobbying, legislating, and the legislature in democratic theory. **PREREQS:** PS 201

PS 412. PRESIDENTIAL POLITICS (4). Office, powers, and politics of the American presidency, with reference to other executive offices in American government; emphasis on the importance and effect of the presidency in American politics. **PREREQS:** PS 201

PS 413. POLITICAL PARTIES AND ELECTIONS (4). Political parties and elections, the electorate and voting behavior, electoral system, exercise of the suffrage, extent and consequences of voter participation. **PREREQS:** PS 201

PS 414. INTEREST GROUPS (4). Interest group formation, resources, strategies, and internal struggles, as well as group influence on elections and politics, in government and policy making, and in relation to democratic theory. **PREREQS:** PS 201

PS 415. POLITICS AND THE MEDIA (4). Examination of the methods of operation, content and effects of the media in relation to politics and government. Includes analysis of newspaper, radio and television, political advertising, and other forms of political communication. **PREREQS:** PS 201

PS 416. PUBLIC OPINION AND POLITICS (4). Examination of methods of study, formation, and content of public opinion and of its effect on elections and politics, government operations, and public policy, primarily in the United States. **PREREQS:** PS 201

PS 419. ^TOPICS IN AMERICAN POLITICS (4). Topics in American politics not covered in other courses. May be repeated for credit when topic varies. (Writing Intensive Course) This course is repeatable for a maximum of 16 credits. **PREREQS:** PS 201 and at least one upper-division course in American politics.

PS 424. ADMINISTRATIVE LAW (4). Origins of administrative state; elements of administrative law; assessment of judicial control of bureaucracy. **PREREQS:** PS 201 and at least one of PS 321 or PS 322 or PS 323

PS 425. *GENDER AND THE LAW (4). Legal status of American women, with emphasis on constitutional law, the 1964 Civil Rights Act and its amendments, and various state laws as they relate to the legal rights of women. (Bacc Core Course) **PREREQS:** PS 201 or PS 326

PS 425H. *GENDER AND THE LAW (4). Legal status of American women, with emphasis on constitutional law, the 1964 Civil Rights Act and its amendments, and various state laws as they relate to the legal rights of women. (Bacc Core Course) **PREREQS:** PS 201 or PS 326 and Honors College approval required

PS 429. ^TOPICS IN JUDICIAL POLITICS (4). Topics in judicial politics not covered in other courses. May be repeated for credit when topic varies. (Writing Intensive Course) This course is repeatable for a maximum of 8 credits. **PREREQS:** PS 201

PS 446. EAST ASIAN POLITICAL ECONOMY (4). Surveys and analyzes the economic and political development of China, Japan, South Korea, Taiwan, Hong Kong, and Singapore. Japan is examined as a developmental model for the East Asian Newly Industrializing Countries (NICs) and as a major player in the regional economy. China is examined as a contrasting model in terms of its changing pattern of economic development and its importance for the region. **PREREQS:** PS 204

PS 449. ^TOPICS IN COMPARATIVE POLITICS (4). Topics in comparative politics not covered in other courses. May be repeated for credit when topic varies. (Writing Intensive Course) This course is repeatable for a maximum of 16 credits. **PREREQS:** At least one upper-division course in comparative politics.

PS 451. AMERICAN FOREIGN POLICY (4). Overview of the role of the United States in the world since World War II and of the factors influencing the formation of our foreign policy. **PREREQS:** PS 201 or PS 205

PS 452. ALTERNATIVE INTERNATIONAL FUTURES (4). Search for long-term goals, policies, and institutions that can influence the building of bridges between the present and a more sustainable future. **PREREQS:** PS 205

PS 454. INTERNATIONAL LAW AND ORGANIZATIONS (4). Theories and historical development of international law and organizations; the United Nations system. **PREREQS:** PS 204 or PS 205

PS 455. THE POLITICS OF CLIMATE CHANGE (4). Covers domestic and international political aspects of global climate change. Topics include local, state, and national activity as well as roles played by presidents, Congress, the Supreme Court, corporations and media. International focus on conventions and treaties, tensions between developed and developing nations and possible national security impacts.

PS 456. INTERNATIONAL POLITICS OF ASIA PACIFIC (4). Examines the most pressing issues facing the region: security and regional economic integration. The major players, their interests, and their differing perspectives on regional issues will be analyzed. **PREREQS:** PS 205

PS 457. US-CHINA RELATIONS (4). Historical evolution of US-China relationship. Emphasis on economic ties, tensions, and conflicts surrounding trade, investment, security, human rights, political reform, Tibet, and Taiwan. **PREREQS:** PS 205

PS 458. INTERNATIONAL POLITICAL ECONOMY (4). Examines topics in which politics and economics meet in the international arena, such as trade, debt, finance, development, multinational corporations, and globalization. Does not require a background in economics.

PS 459. ^TOPICS IN INTERNATIONAL RELATIONS (4). Topics in international relations not covered in other courses. May be repeated for credit when topic varies. (Writing Intensive Course) This course is repeatable for a maximum of 16 credits. **PREREQS:** PS 205 and at least one upper-division course in international relations.

PS 461. ENVIRONMENTAL POLITICAL THEORY (4). Examines the ways in which political theory enhances our understanding of environmental issues. Focuses on the political and philosophical premises of various environmental perspectives, and how different theories of justice and democracy address issues such as environmental racism, ecological justice, and global climate change.

PS 462. THEORIES OF LAW (4). Covers some of the main theories and approaches to the nature of law. What is law? What is its relation, if any, to morality? What is it that judges do? Questions such as these are explored through reading some of the classic works on the topic.

PS 469. ^TOPICS IN POLITICAL PHILOSOPHY (4). Topics in political philosophy not covered in other courses. May be repeated for credit when topic varies. (Writing Intensive Course) This course is repeatable for a maximum of 16 credits. **PREREQS:** At least one upper-division course in political philosophy.

PS 473. US ENERGY POLICY (4). Addresses US energy policy with respect to how the U.S. governs the production and use of different energy sources, along with the management of its energy infrastructure. Examines policies currently in place, as well as proposals for alternatives, while examining the economic, environmental, national security and energy security implications of different policy approaches.

PS 474. NATURAL RESOURCE POLICY AND BUREAUCRATIC POLITICS (4). Investigates relations between natural resource policies, such as the Endangered Species Act or the National Forest Management Act and agencies responsible for administering them, such as the National Marine Fisheries Service or U.S. Forest Service. Organizational culture and conflicts, external support and opposition, relations with interested groups and elected officials, state and local agencies, the press, and public pressures are discussed. **PREREQS:** PS 201 or 6 credits of upper-division natural resource or related course work or instructor approval required.

PS 475. ENVIRONMENTAL POLITICS AND POLICY (4). Environmental and natural resource issues and policies in national and regional context, emphasizing public attitudes, elections, Congress, public policy, and relevant national and state agencies. **PREREQS:** PS 201 or instructor approval required.

PS 476. *SCIENCE AND POLITICS (4). Relationship between science and the political system in political ideas and history, in bureaucratic politics of science policy, and in contemporary scientific disputes. (Bacc Core Course) **PREREQS:** PS 201 or 6 credits of lower-division courses in political science or instructor approval required.

PS 477. INTERNATIONAL ENVIRONMENTAL POLITICS AND POLICY (4). Analysis of international environmental theory and politics, the development of international environmental regimes, agreements and treaties, and the process of globalization and the quality of the environment.

PS 479. TOPICS IN PUBLIC POLICY AND PUBLIC ADMINISTRATION (4). Topics in public policy or public administration not covered in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits. **PREREQS:** PS 201 and at least one upper-division course in public policy or public administration.

PS 499. SPECIAL TOPICS (1-16). Selected topics in political science of special or current interest not covered in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 99 credits. **PREREQS:** At least one lower-division political science course.

PS 501. RESEARCH AND SCHOLARSHIP (1-16). Independent research project under supervision of graduate faculty. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PS 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PS 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

PS 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PS 506. PROJECTS (1-16). Section 1-5: Reading. Associated with the internship for which credit is given in PS 410. Completion of this course is required to receive credit for PS 410. Section 11: MU Field Training, 3 credits. Section 12: ASOSU Field Training, 3 credits, each graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required. **COREQS:** PS 510

PS 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PS 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PS 509. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PS 510. POLITICAL SCIENCE INTERNSHIP (1-12). Supervised work experience in government- or law-related programs or other public affairs organizations. Reports and appraisals required. This course is repeatable for a maximum of 12 credits. **PREREQS:** Departmental approval required.

PS 511. LEGISLATIVE POLITICS (4). Congressional (and state legislative) politics, both on Capitol Hill and in the district, including campaigns, constituent relations, lobbying, legislating, and the legislature in democratic theory. **PREREQS:** PS 201

PS 512. PRESIDENTIAL POLITICS (4). Office, powers, and politics of the American presidency, with reference to other executive offices in American government; emphasis on the importance and effect of the presidency in American politics. **PREREQS:** PS 201

PS 513. POLITICAL PARTIES AND ELECTIONS (4). Political parties and elections, the electorate and voting behavior, electoral system, exercise of the suffrage, extent and consequences of voter participation. **PREREQS:** PS 201

PS 514. INTEREST GROUPS (4). Interest group formation, resources, strategies, and internal struggles, as well as group influence on elections and politics, in government and policy making, and in relation to democratic theory. **PREREQS:** PS 201

PS 515. POLITICS AND THE MEDIA (4). Examination of the methods of operation, content and effects of the media in relation to politics and government. Includes analysis of newspaper, radio and television, political advertising, and other forms of political communication. **PREREQS:** PS 201

PS 516. PUBLIC OPINION AND POLITICS (4). Examination of methods of study, formation, and content of public opinion and of its effect on elections and politics, government operations, and public policy, primarily in the United States. **PREREQS:** PS 201

PS 519. TOPICS IN AMERICAN POLITICS (1-4). Topics in American politics not covered in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits. **PREREQS:** PS 201 and at least one upper-division course in American politics.

PS 523. AMERICAN CONSTITUTIONAL LAW (4). Examines constitutional law with a heavy emphasis on the practices and procedures of the criminal justice system. Pays particular attention to the rights of the criminally accused; how these rights have changed over time; and the role of politics in the decisions of the Supreme Court.

PS 524. ADMINISTRATIVE LAW (4). Origins of administrative state; elements of administrative law; assessment of judicial control of bureaucracy. **PREREQS:** PS 201 and at least one of PS 321 or PS 322 or PS 323

PS 525. GENDER AND THE LAW (4). Legal status of American women, with emphasis on constitutional law, the 1964 Civil Rights Act and its amendments, and various state laws as they relate to the legal rights of women. **PREREQS:** PS 201 or PS 326

PS 529. TOPICS IN JUDICIAL POLITICS (1-4). Topics in judicial politics not covered in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 8 credits. **PREREQS:** PS 201 and at least one of PS 321 or PS 322 or PS 323

PS 546. EAST ASIAN POLITICAL ECONOMY (4). Surveys and analyzes the economic and political development of China, Japan, South Korea, Taiwan, Hong Kong, and Singapore. Japan is examined as a developmental model for the East Asian Newly Industrializing Countries (NICs) and as a major player in the regional economy. China is examined as a contrasting model in terms of its changing pattern of economic development and its importance for the region. **PREREQS:** PS 204

PS 549. TOPICS IN COMPARATIVE POLITICS (4). Topics in comparative politics not covered in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits. **PREREQS:** At least one upper-division course in comparative politics.

PS 552. ALTERNATIVE INTERNATIONAL FUTURES (4). Search for long-term goals, policies, and institutions that can influence the building of bridges between the present and a more sustainable future. **PREREQS:** PS 205

PS 554. INTERNATIONAL LAW AND ORGANIZATIONS (4). Theories and historical development of international law and organizations; the United Nations system. **PREREQS:** PS 204 or PS 205

PS 555. THE POLITICS OF CLIMATE CHANGE (4). Covers domestic and international political aspects of global climate change. Topics include local, state, and national activity as well as roles played by presidents, Congress, the Supreme Court, corporations and media. International focus on conventions and treaties, tensions between developed and developing nations and possible national security impacts.

PS 556. INTERNATIONAL POLITICS OF ASIA PACIFIC (4). Examines the most pressing issues facing the region: security and regional economic integration. The major players, their interests, and their differing perspectives on regional issues will be analyzed. **PREREQS:** PS 205

PS 557. US-CHINA RELATIONS (4). Historical evolution of US-China relationship. Emphasis on economic ties, tensions, and conflicts surrounding trade, investment, security, human rights, political reform, Tibet, and Taiwan. **PREREQS:** PS 205

PS 558. INTERNATIONAL POLITICAL ECONOMY (4). Examines topics in which politics and economics meet in the international arena, such as trade, debt, finance, development, multinational corporations, and globalization. Does not require a background in economics.

PS 559. TOPICS IN INTERNATIONAL RELATIONS (4). Topics in international relations not covered in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits. **PREREQS:** PS 205 and at least one upper-division course in international relations.

PS 561. ENVIRONMENTAL POLITICAL THEORY (4). Examines the ways in which political theory enhances our understanding of environmental issues. Focuses on the political and philosophical premises of various environmental perspectives, and how different theories of justice and democracy address issues such as environmental racism, ecological justice, and global climate change.

PS 562. THEORIES OF LAW (4). Covers some of the main theories and approaches to the nature of law. What is law? What is its relation, if any, to morality? What is it that judges do? Questions such as these are explored through reading some of the classic works on the topic.

PS 569. TOPICS IN POLITICAL PHILOSOPHY (4). Topics in political philosophy not covered in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits. **PREREQS:** At least one upper-division course in political philosophy.

PS 571. PUBLIC POLICY THEORY (4). Theoretical approaches to the study of the policy process, policy elements, policy tools, (e.g., regulation), and policy typologies. **PREREQS:** Departmental approval required.

PS 572. PUBLIC ADMINISTRATION (4). Principles of public administration, administrative organization and procedures, public relations. **PREREQS:** PS 201

PS 573. US ENERGY POLICY (4). Addresses US energy policy with respect to how the U.S. governs the production and use of different energy sources, along with the management of its energy infrastructure. Examines policies currently in place, as well as proposals for alternatives, while examining the economic, environmental, national security and energy security implications of different policy approaches.

PS 574. NATURAL RESOURCE POLICY AND BUREAUCRATIC POLITICS (4). Investigates relations between natural resource policies, such as the Endangered Species Act or the National Forest Management Act and agencies responsible for administering them, such as the National Marine Fisheries Service or U.S. Forest Service. Organizational culture and conflicts, external support and opposition, relations with interested groups and elected officials, state and local agencies, the press, and public pressures are discussed. **PREREQS:** PS 201 or 6 credits of upper-division natural resource or related course work or instructor approval required.

PS 575. ENVIRONMENTAL POLITICS AND POLICY (4). Environmental and natural resource issues and policies in national and regional context, emphasizing public attitudes, elections, Congress, public policy, and relevant national and state agencies. **PREREQS:** PS 201 or instructor approval required.

PS 576. SCIENCE AND POLITICS (4). Relationship between science and the political system in political ideas and history, in bureaucratic politics of science policy, and in contemporary scientific disputes. **PREREQS:** PS 201 or 6 credits of lower-division courses in political science or instructor approval required.

PS 577. INTERNATIONAL ENVIRONMENTAL POLITICS AND POLICY (4). Analysis of international environmental theory and politics, the development of international environmental regimes, agreements and treaties, and the process of globalization and the quality of the environment.

PS 579. TOPICS IN PUBLIC POLICY AND PUBLIC ADMINISTRATION (4). Topics in public policy or public administration not covered in other courses. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits. **PREREQS:** PS 201 and at least one upper-division course in public policy or public administration.

PS 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PS 808. WORKSHOP (4). Principles of public administration, administrative organization and procedures, public relations. It will include collaborative governance, leadership, and other issues.

■ SOCIOLOGY COURSES

SOC 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

SOC 204. *INTRODUCTION TO SOCIOLOGY (3). Development and application of sociological concepts and perspectives concerning human groups; includes attention to socialization, culture, organization, stratification, and societies. Consideration of fundamental concepts and research methodology. (SS) (Bacc Core Course)

SOC 204H. *INTRODUCTION TO SOCIOLOGY (3). Development and application of sociological concepts and perspectives concerning human groups, includes attention to socialization, culture, organization, stratification, and societies. Consideration of fundamental concepts and research methodology. (SS) (Bacc Core Course) **PREREQS:** Honors College approval required.

SOC 205. *INSTITUTIONS AND SOCIAL CHANGE (3). Sociological study of the dynamic organizational nature of society through analysis of social change and major social institutions such as family, education, religion, the economy, and political systems. (SS) (Bacc Core Course)

SOC 206. *SOCIAL PROBLEMS AND ISSUES (3). Examination of social problems with particular focus upon U.S. society. Sociological perspectives on definition, description, and analysis of contemporary and recurrent problems in industrialized societies. Investigation of causes and consequences of social problems considered in societal context. (SS) (Bacc Core Course)

SOC 241. INTRODUCTION TO CRIME AND JUSTICE (3). Provides a sociological understanding of criminal justice system institutions and processes. Emphasis is placed on understanding the criminal law; police and policing; courts and the prosecution process; and prisons, jails and corrections.

SOC 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

SOC 312. *SOCIOLOGY OF THE FAMILY (4). Survey of the family as a social institution. Addresses historical and cultural perspectives with emphasis on family diversity, variations in family form and life style, interdependence between family and other institutions, analysis of major family issues, forces for change in the family. (Bacc Core Course) **PREREQS:** (SOC 204 or SOC 204H)

SOC 312H. *SOCIOLOGY OF THE FAMILY (4). Survey of the family as a social institution. Addresses historical and cultural perspectives with emphasis on family diversity, variations in family form and life style, interdependence between family and other institutions, analysis of major family issues, forces for change in the family. (Bacc Core Course) **PREREQS:** (SOC 204 or SOC 204H) and Honors College approval required.

SOC 315. ^METHODS I: RESEARCH DESIGN (4). First in a two-course sequence required of all sociology majors. Students learn to formulate researchable questions, devise measures, select data collection techniques, and examine ethical and practical dilemmas in constructing sociological research. (Writing Intensive Course) **PREREQS:** (SOC 204 or SOC 204H) and junior standing. Sociology majors only.

SOC 316. METHODS II: QUANTITATIVE ANALYSIS (4). Second in a two-course sequence required of all sociology majors. The primary objective is to provide students with the statistical skills necessary to analyze sociological data. Covers the construction and interpretation of contingency tables, basic ideas of probability and statistical inference, and an introduction to correlation and regression. **PREREQS:** ((SOC 204 or SOC 204H) and SOC 315) and junior standing. Sociology majors only.

SOC 340. DEVIANT BEHAVIOR AND SOCIAL CONTROL (4). Current perspectives, research and theories of deviant behavior. Review and analysis of various approaches and programs designed to prevent and deal with deviant behavior. **PREREQS:** (SOC 204 or SOC 204H)

SOC 350. HEALTH, ILLNESS AND SOCIETY (4). Social and cultural factors in the identification, course, and treatment of illness; analysis of selected health settings and professions. **PREREQS:** (SOC 204 or SOC 204H)

SOC 355. DEATH AND DYING (4). An overview of cross-cultural and historical attitudes and practices around end of life, death and dying. Assessment of contemporary legal, professional, cultural and technological issues surrounding end of life/death and dying. **PREREQS:** (SOC 204 or SOC 204H)

SOC 360. *POPULATION TRENDS AND POLICY (4). Basic socio-demographic factors affecting population size, distribution, composition and change; examination of local, national, and international trends, and demographic policy. (Bacc Core Course) **PREREQS:** (SOC 204 or SOC 204H)

SOC 399. SPECIAL TOPICS (1-16). Selected topics of special or current interest not covered in other courses. This course is repeatable for a maximum of 16 credits. **PREREQS:** (SOC 204 or SOC 204H)

SOC 399H. SPECIAL TOPICS (1-16). Selected topics of special or current interest not covered in other courses. This course is repeatable for a maximum of 16 credits. **PREREQS:** (SOC 204 or SOC 204H) and Honors College approval required.

SOC 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SOC 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Department approval required.

SOC 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SOC 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SOC 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** (SOC 204 or SOC 204H)

SOC 410. INTERNSHIP PRACTICUM (1-16). Graded P/N. This course is repeatable for a maximum of 30 credits. **PREREQS:** Departmental approval required.

SOC 412. SOCIOLOGY OF WORK AND FAMILY (4). Survey of the intersections between families and work; variations in family structure, policies and paid and unpaid work in the United States; interdependence between paid and unpaid family labor and broader social change.

SOC 413. SOCIOLOGICAL THEORY (4). Historical and philosophical foundations of sociological theory; major schools of thought and their major contributors. **PREREQS:** (SOC 204 or SOC 204H)

SOC 418. QUALITATIVE RESEARCH METHODS (4). An introduction to the theory and methods of qualitative research. Students will be exposed to various qualitative research methods through practical field exercises. These include ethnographic field observation, content analysis, interviewing, focus groups and unobtrusive measures. Other commonly used methods of collecting qualitative data are also examined. **PREREQS:** (SOC 204 or SOC 204H)

SOC 421. SOCIAL CHANGE AND MODERNIZATION (3). Major theories of the nature, types, causes and consequences of social change. Political, social, psychological,

and economic dimensions of modernization.
PREREQS: (SOC 204 or SOC 204H)

SOC 422. SOCIOLOGY OF ORGANIZATIONS (4). Introduces sociological thinking about organizations in contemporary society with an emphasis on exploring the range of frameworks used to think about and explain modern organizations; applies knowledge to specific contemporary organizations. **PREREQS:** (SOC 204 or SOC 204H)

SOC 424. SOCIAL PSYCHOLOGY (4). Examines individuals in social context; explores dynamics of interpersonal relationships; evaluates link between self and society, including concepts of role/status/identity. Contemporary research design, problems, and findings pertinent to social psychology. **PREREQS:** (SOC 204 or SOC 204H)

SOC 426. *SOCIAL INEQUALITY (4). Evolution of social inequality in society. Emphasis upon the causes and consequences of inequality in power, privilege, and prestige in human societies, with special attention to the United States. (Bacc Core Course) **PREREQS:** (SOC 204 or SOC 204H)

SOC 430. GENDER AND SOCIETY (4). Examination of nature and consequences of social differentiation and stratification on the basis of sex and gender. Analysis of social position of women and men in society, focusing on their positions in institutional areas such as the family, politics, work and education. Evaluation of theories of biological, psychological, and sociological bases for the behavior and characteristics of women and men. **PREREQS:** (SOC 204 or SOC 204H)

SOC 432. SOCIOLOGY OF AGING (3). Examination of the social significance of age, position and problems of the elderly in society; discusses the societal and individual consequences of an aging population; explores social theories of aging. **PREREQS:** (SOC 204 or SOC 204H)

SOC 437. RACE AND ETHNIC RELATIONS (4). Comparative/international perspective on the social construction of race and ethnicity. Social, economic and political experiences of selected groups in the U.S. and other countries are examined. **PREREQS:** (SOC 204 or SOC 204H)

SOC 438. US IMMIGRATION ISSUES IN THE 21ST CENTURY (4). Provides a critical overview of immigration to the United States from a socio-historic perspective. Examines how successive waves of immigrants have influenced American society from the earliest groups of Europeans in the 19th century to the most recently arriving immigrants from Asia, Latin America and the Caribbean. **PREREQS:** (SOC 204 or SOC 204H)

SOC 439. WELFARE AND SOCIAL SERVICES (4). Analysis of social, political, and economic forces affecting welfare and social service systems, with overview of current programs, policy issues, public opinions, occupational aspects and societal impacts. **PREREQS:** (SOC 204 or SOC 204H)

SOC 440. JUVENILE DELINQUENCY (4). Contemporary research and theories of juvenile delinquency. Review and evaluation of various strategies and programs designed to prevent delinquency or for treatment of delinquents. **PREREQS:** (SOC 204 or SOC 204H)

SOC 441. CRIMINOLOGY AND PENOLOGY (4). Review of sociological perspectives on crime and criminal justice, with emphasis upon North America. Review of crime statistics, types of crime, theories of criminality, corrections programs and prisons, and programs to reduce crime. **PREREQS:** (SOC 204 or SOC 204H)

SOC 442. SOCIOLOGY OF DRUG USE AND ABUSE (4). Emphasizes a sociological understanding of drug use, drug problems and drug policy. In order to understand drug use and abuse it is necessary to understand the chemical properties of the substances at issue, the attributes of the people who use and abuse drugs,

and the norms and characteristics of the society in which the substance use occurs. **PREREQS:** (SOC 204 or SOC 204H)

SOC 444. INSIDE-OUT: PRISONS, COMMUNITIES, AND PREVENTION (4). Course takes place in a state correctional facility, with OSU students learning along side "inside" students from the facility for a full quarter. Course content examines prisons, communities, crime, and prevention from a sociological perspective. All students participate in service-learning projects. **PREREQS:** SOC 204 and junior standing.

SOC 448. LAW AND SOCIETY (4). An introduction to social scientific approaches to law, covering major topics in the area. Topics may include disputing, legal consciousness, social movements and law, punishment, legal actors, and legal institutions. **PREREQS:** (SOC 204 or SOC 204H) with minimum grade of D-.

SOC 450. SOCIOLOGY OF EDUCATION (4). Contemporary perspectives and research on schools, students, teachers and social forces affecting the educational system. Review of comparative and evaluation research on alternative educational strategies and programs. Overview of the literature of educational critics. **PREREQS:** (SOC 204 or SOC 204H)

SOC 452. SOCIOLOGY OF RELIGION (4). Social patterns within U.S. religious groups, relation of religious groups to society, and the methodological problems in studying such groups. **PREREQS:** (SOC 204 or SOC 204H)

SOC 453. SOCIOLOGY OF SPORT (4). Critical analysis of sport. Examines sport socialization; deviance; violence; gender; race/ethnicity; professional sport careers; intercollegiate athletics; marriage/family; and the media. **PREREQS:** (SOC 204 or SOC 204H)

SOC 454. *LEISURE AND CULTURE (4). Examination of the social, cultural, and global significance of leisure activity (in particular, tourism and recreation) from a historical perspective relative to attitudes, values, behaviors, and use of natural resources. (SS) (Bacc Core Course) **PREREQS:** (SOC 204 or SOC 204H)

SOC 456. *SCIENCE AND TECHNOLOGY IN SOCIAL CONTEXT (4). Study of social aspects of science and technology (values, practices, organization, impacts) by analysis of issues revealing their relationship to other social and cultural processes. (Bacc Core Course) **PREREQS:** (SOC 204 or SOC 204H)

SOC 460. THE SOCIOLOGY OF GLOBALIZATION (4). Examines the sociological effect of globalization on Western and non-Western societies. The course focuses on changes in the global economy and how this has influenced the social structure, patterns of change, and mutual influences among societies. (NC) **PREREQS:** (SOC 204 or SOC 204H)

SOC 466. INTERNATIONAL DEVELOPMENT: GENDER ISSUES (4). Examines roles and statuses of women and men throughout the world and differential impact of development on men and women. Evaluates traditional development policies and programs and discusses theories of gender stratification and of modernization. (NC) **PREREQS:** (SOC 204 or SOC 204H)

SOC 470. COLLECTIVE BEHAVIOR (4). Examines current theories; focuses on behavior in crowds and diverse social settings including fads/fashions, ecstatic crowds/miracles, natural/ technological disasters, urban legends, collective delusions/mass hysteria, protest/demonstrations, riots/mobs. **PREREQS:** (SOC 204 or SOC 204H)

SOC 471. SOCIAL MOVEMENTS (4). Introduces core theoretical and methodological issues related to social movements in the US and abroad. Emphasizes social forces giving rise to movements, tactics employed by movements, and impacts of them on society. **PREREQS:** (SOC 204 or SOC 204H)

SOC 472. GIVING AND VOLUNTARISM (4). Examines concepts of donor motivation, giving, charity, voluntarism, philanthropy, and the nonprofit sector through the analysis of gender roles, ethnicity, power, status, and social institutions. **PREREQS:** SOC 204 or SOC 204H and /or instructor approval.

SOC 475. RURAL SOCIOLOGY (4). Helps students understand the rich diversity in rural society, with an emphasis on the interdependencies between urban and rural contexts. Current issues and social problems experienced by rural populations and how sociology is used to understand and address issues affecting rural communities are explored. **PREREQS:** (SOC 204 or SOC 204H)

SOC 480. *ENVIRONMENTAL SOCIOLOGY (4). Explores the evolution of environmental thought, paradigm shifts, and institutional structures associated with environmental concerns, social movements, and social impacts. (Bacc Core Course) **PREREQS:** (SOC 204 or SOC 204H)

SOC 481. *SOCIETY AND NATURAL RESOURCES (4). Explores the complex interrelationships between humans and natural resources, emphasizing how management decisions and organizations are enmeshed in social and cultural contexts. (Bacc Core Course) **PREREQS:** (SOC 204 or SOC 204H)

SOC 485. *CONSENSUS AND NATURAL RESOURCES (3). Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. **CROSSLISTED** as ANS 485/ANS 585, FES 485/FES 585, FS 485/FS 585, FW 485/FW 585. (Bacc Core Course)

SOC 499. SPECIAL TOPICS (1-16). Selected topics of special or current interest not covered in other courses. For advanced undergraduate and graduate students. This course is repeatable for a maximum of 16 credits. **PREREQS:** (SOC 204 or SOC 204H)

SOC 499H. SPECIAL TOPICS (1-16). Selected topics of special or current interest not covered in other courses. For advanced undergraduate and graduate students. This course is repeatable for a maximum of 16 credits. **PREREQS:** (SOC 204 or SOC 204H) and Honors College approval required.

SOC 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SOC 502. INDEPENDENT STUDY (1-16).

SOC 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

SOC 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SOC 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SOC 507. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

SOC 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

SOC 510. INTERNSHIP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

SOC 512. SOCIOLOGY OF WORK AND FAMILY (4). Survey of the intersections between families and work; variations in family structure, policies and paid and unpaid work in the United States; interdependence between paid and unpaid family labor and broader social change. **PREREQS:**

SOC 204 or SOC 204H

SOC 513. SOCIOLOGICAL THEORY (4). Historical and philosophical foundations of sociological theory; major school of thought and their major contributors. **PREREQS:** SOC 204 or SOC 204H

SOC 515. UNDERSTANDING SOCIAL RESEARCH (4). Study of basic concepts and principles of qualitative and quantitative social research, including selection of general strategies and specific designs, conceptual and operational measurement, sample selection, data collection, data processing and analysis techniques, interpretation and reporting. Utilizes reports of social research in scholarly journals, popular media, and agency documents. Emphasis on critical evaluation and interpretation. **PREREQS:** Reserved for MPP students only.

SOC 516. CONDUCTING SOCIAL RESEARCH (4). Reviews concepts and principles covered in SOC 415 with emphasis on actual experiences in using techniques of social research and gaining greater depth of knowledge and skill. Assignments involve practicing techniques used in various phases of the research process, including both qualitative field observation and computerized processing and analysis of quantitative information. Individual or group research projects will be required. **PREREQS:** SOC 515 and reserved for MPP students only.

SOC 518. QUALITATIVE RESEARCH METHODS (4). An introduction to the theory and methods of qualitative research. Students will be exposed to various qualitative research methods through practical field exercises. These include ethnographic field observation, content analysis, interviewing, focus groups and unobtrusive measures. Other commonly used methods of collecting qualitative data are also examined. **PREREQS:** SOC 204 or SOC 204H

SOC 519. APPLIED RESEARCH METHODS (4). Application of sociological theory, concepts, and methods. Topics vary but may include program evaluation, social impact assessment, policy analysis, focus group research, survey research, among others. **PREREQS:** SOC 204 or SOC 204H and at least one upper-division course in sociology.

SOC 522. SOCIOLOGY OF ORGANIZATIONS (4). Introduces sociological thinking about organizations in contemporary society with an emphasis on exploring the range of frameworks used to think about and explain modern organizations; applies knowledge to specific contemporary organizations. **PREREQS:** SOC 204 or SOC 204H

SOC 524. SOCIAL PSYCHOLOGY (4). Examines individuals in social context; explores dynamics of interpersonal relationships; evaluates link between self and society, including concepts of role/status/identity. Contemporary research design, problems, and findings pertinent to social psychology. **PREREQS:** SOC 204 or SOC 204H

SOC 526. SOCIAL INEQUALITY (4). Evolution of social inequality in society. Emphasis upon the causes and consequences of inequality in power, privilege, and prestige in human societies, with special attention to the United States. **PREREQS:** SOC 204 or SOC 204H

SOC 530. GENDER AND SOCIETY (4). Examination of nature and consequences of social differentiation and stratification on the basis of sex and gender. Analysis of social position of women and men in society, focusing on their positions in institutional areas such as the family, politics, work and education. Evaluation of theories of biological, psychological, and sociological bases for the behavior and characteristics of women and men. **PREREQS:** SOC 204 or SOC 204H

SOC 532. SOCIOLOGY OF AGING (3). Examination of the social significance of age, position and problems of the elderly in society; discusses the societal and individual

consequences of an aging population; explores social theories of aging. **PREREQS:** SOC 204 or SOC 204H

SOC 537. RACE AND ETHNIC RELATIONS (4). Comparative/international perspective on the social construction of race and ethnicity. Social, economic and political experiences of selected groups in the U.S. and other countries are examined. **PREREQS:** SOC 204 or SOC 204H

SOC 538. US IMMIGRATION ISSUES IN THE 21ST CENTURY (4). Provides a critical overview of immigration to the United States from a socio-historic perspective. Examines how successive waves of immigrants have influenced American society from the earliest groups of Europeans in the 19th century to the most recently arriving immigrants from Asia, Latin America and the Caribbean.

SOC 539. WELFARE AND SOCIAL SERVICES (4). Analysis of social, political, and economic forces affecting welfare and social service systems, with overview of current programs, policy issues, public opinions, occupational aspects and societal impacts. **PREREQS:** SOC 204 or SOC 204H

SOC 540. JUVENILE DELINQUENCY (4). Contemporary research and theories of juvenile delinquency. Review and evaluation of various strategies and programs designed to prevent delinquency or for treatment of delinquents. **PREREQS:** SOC 204 or SOC 204H

SOC 541. CRIMINOLOGY AND PENOLOGY (4). Review of sociological perspectives on crime and criminal justice, with emphasis upon North America. Review of crime statistics, types of crime, theories of criminality, corrections programs and prisons, and programs to reduce crime. **PREREQS:** SOC 204 or SOC 204H

SOC 542. SOCIOLOGY OF DRUG USE AND ABUSE (4). Emphasizes a sociological understanding of drug use, drug problems and drug policy. In order to understand drug use and abuse it is necessary to understand the chemical properties of the substances at issue, the attributes of the people who use and abuse drugs, and the norms and characteristics of the society in which the substance use occurs.

SOC 544. INSIDE-OUT: PRISONS, COMMUNITIES, AND PREVENTION (4). Course takes place in a state correctional facility, with OSU students learning along side "inside" students from the facility for a full quarter. Course content examines prisons, communities, crime, and prevention from a sociological perspective. All students participate in service-learning projects. **PREREQS:** SOC 204 and junior standing.

SOC 548. LAW AND SOCIETY (4). An introduction to social scientific approaches to law, covering major topics in the area. Topics may include disputing, legal consciousness, social movements and law, punishment, legal actors, and legal institutions. **PREREQS:** (SOC 204 or SOC 204H) with minimum grade of D-.

SOC 550. SOCIOLOGY OF EDUCATION (4). Contemporary perspectives and research on schools, students, teachers and social forces affecting the educational system. Review of comparative and evaluation research on alternative educational strategies and programs. Overview of the literature of educational critics. **PREREQS:** SOC 204 or SOC 204H

SOC 552. SOCIOLOGY OF RELIGION (4). Social patterns within U.S. religious groups, relation of religious groups to society, and the methodological problems in studying such groups. **PREREQS:** SOC 204 or SOC 204H

SOC 553. SOCIOLOGY OF SPORT (4). Critical analysis of sport. Examines sport socialization; deviance; violence; gender; race/ethnicity; professional sport careers; intercollegiate athletics; marriage/family; and the media. This course is repeatable for a maximum of 3 credits.

PREREQS: SOC 204 or SOC 204H

SOC 554. LEISURE AND CULTURE (4). Examination of the social, cultural, and global significance of leisure activity (in particular, tourism and recreation) from a historical perspective relative to attitudes, values, behaviors, and use of natural resources. **PREREQS:** SOC 204 or SOC 204H

SOC 556. SCIENCE AND TECHNOLOGY IN SOCIAL CONTEXT (4). Study of social aspects of science and technology (values, practices, organization, impacts) by analysis of issues revealing their relationship to other social and cultural processes. **PREREQS:** SOC 204 or SOC 204H

SOC 560. THE SOCIOLOGY OF GLOBALIZATION (4). Examines the sociological effect of globalization on Western and non-Western societies. The course focuses on changes in the global economy and how this has influenced the social structure, patterns of change, and mutual influences among societies. **PREREQS:** SOC 204 or SOC 204H

SOC 566. INTERNATIONAL DEVELOPMENT: GENDER ISSUES (4). Examines roles and statuses of women and men throughout the world and differential impact of development on men and women. Evaluates traditional development policies and programs and discusses theories of gender stratification and of modernization. **PREREQS:** SOC 204 or SOC 204H

SOC 570. COLLECTIVE BEHAVIOR (4). Examines current theories; focuses on behavior in crowds and diverse social settings including fads/fashions, ecstatic crowds/miracles, natural/technological disasters, urban legends, collective delusions/mass hysteria, protest/demonstrations, riots/mobs. **PREREQS:** SOC 204 or SOC 204H

SOC 571. SOCIAL MOVEMENTS (4). Introduces core theoretical and methodological issues related to social movements in the US and abroad. Emphasizes social forces giving rise to movements, tactics employed by movements, and impacts of them on society. **PREREQS:** SOC 204 or SOC 204H

SOC 572. GIVING AND VOLUNTARISM (4). Examines concepts of donor motivation, giving, charity, voluntarism, philanthropy, and the nonprofit sector through the analysis of gender roles, ethnicity, power, status, and social institutions. **PREREQS:** SOC 204 or SOC 204H or instructor approval.

SOC 575. RURAL SOCIOLOGY (4). Helps students understand the rich diversity in rural society, with an emphasis on the interdependencies between urban and rural contexts. Current issues and social problems experienced by rural populations and how sociology is used to understand and address issues affecting rural communities are explored. **PREREQS:** SOC 204 or SOC 204H

SOC 580. ENVIRONMENTAL SOCIOLOGY (4). Explores the evolution of environmental thought, paradigm shifts, and institutional structures associated with environmental concerns, social movements, and social impacts. **PREREQS:** SOC 204 or SOC 204H

SOC 581. SOCIETY AND NATURAL RESOURCES (4). Explores the complex interrelationships between humans and natural resources, emphasizing how management decisions and organizations are enmeshed in social and cultural contexts. **PREREQS:** SOC 204 or SOC 204H

SOC 585. CONSENSUS AND NATURAL RESOURCES (3). Students will use a working group approach. They will select a natural resource topic, study the team process and interaction as a method of learning, explore the issue using systems practice, and strive for consensus on solutions to their issue. **CROSSLISTED as ANS 485/ANS 585, FES 485/**

FES 585, FS 485/FS 585, FW 485/FW 585.

SOC 599. SPECIAL TOPICS (1-16). Selected topics of special or current interest not covered in other courses. For advanced undergraduate and graduate students. This course is repeatable for a maximum of 16 credits. **PREREQS:** SOC 204 or SOC 204H

SOC 808. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

Creative Writing English

The School of Writing, Literature, and Film offers instruction in literary studies, writing (creative, critical, professional/technical), and critical film studies to students in all disciplines who seek the cultural and intellectual values of the humanities and arts, as well as the broadening influence of humanistic studies, creative expression, cultural studies, and writing for the professions. In addition, the school provides courses for those interested in the major or minor in English, especially for those who plan to teach in the elementary, secondary, or college professions, or who plan to pursue graduate work in English, writing, or film. The Writing minor, which is also offered via Ecampus, serves students interested in creative writing and/or writing for the scientific and/or technical and professional fields.

MINOR PROGRAMS

The minor in English allows students to concentrate in the area of the liberal arts and develop the reading and writing skills often demanded by employers. Students taking a minor in English choose from among three areas: general English studies, English literature, and American literature.

The minor in Writing requires a total of 27 credits to be taken as a minimum of 11 credits (3 courses, with at least one at the 300 level) from the following: WR 199, WR 214, WR 222, WR 224, WR 241, WR 323, WR 324, WR 327, WR 341, WR 362, and WR 383 and 12 credits (3 courses) from the following: WR 406, WR 407, WR 408, WR 411, WR 414, WR 416, WR 420, WR 424, WR 441, WR 448, WR 493, WR 495; and one upper-division literature or writing elective.

GRADUATE PROGRAMS

The School of Writing, Literature, and Film offers graduate work leading to a Master of Arts degree in English. The major area of concentration may be in literature and culture, or rhetoric, writing, and culture. The school also offers the Master of Fine Arts degree in Creative Writing. Graduate work in the school may also be applied to Master of Arts in Interdisciplinary Studies (MAIS) degree or to minors in other advanced degree programs.

UNDERGRADUATE MAJORS WITH OPTIONS

ENGLISH (BA, CRED, HBA)

Undergraduate English majors must attain proficiency in a foreign language,

as certified by the School of Language, Culture, and Society, equivalent to that assumed at the end of a second-year language course.

Lower Division

From one of the following sequences, 8 credits:

Survey of British Literature (ENG 204, ENG 205, ENG 206) (4,4,4)

Survey of American Literature (ENG 253, ENG 254) (4,4)

From the following, 12 additional credits (at least 4 credits pre-1800):

Survey of British Literature (ENG 204, ENG 205, ENG 206) (4,4,4)

Survey of American Literature (ENG 253, ENG 254) (4,4)

Literature of Western Civilization (ENG 207, ENG 208) (4,4)

Literatures of the World (ENG 210, ENG 211, ENG 212, ENG 213) (4,4,4,4)

Shakespeare (ENG 201, ENG 202) (4,4)

ENG 200. Library Skills for Literary Study (1)

Upper Division

ENG 345. Introduction to Literary Criticism and Theory (4)

Pre-1800 Literature

(Select a minimum of 2, 8 credits)¹

ENG 417. The English Novel: Defoe Through Scott (4)

ENG 425. Studies in Medieval Literature (4)

ENG 426. Studies in Chaucer (4)

ENG 430. Studies in Early Modern Literature (4)

ENG 433. Studies in the Long Eighteenth Century (4)

ENG 435. Studies in Shakespeare (4)

ENG 490. History of the English Language (4)

Post-1800 Literature

(Select a minimum of 2 courses, 8 credits)¹

ENG 317. *The American Novel: Beginnings to Chopin (4)

ENG 318. *The American Novel: Modernist Period (4)

ENG 319. *The American Novel: Post-World War II (4)

ENG 320. Studies in Page, Stage, and Screen (4)

UNDERGRADUATE MINORS

ENGLISH MINOR

The minor in English allows students to concentrate in the area of the liberal arts and develop the reading and writing skills often demanded by employers. There are three options for completing the English minor: General English, the English Literature, and the American Literature.

General English Studies (28)

A. Required sequence. Choose one of the following sequences (12):

ENG 204. *Survey of British Literature: Beginnings to 1660 (4)

ENG 205. *Survey of British Literature: Restoration to Romantic Era (4)

ENG 206. *Survey of British Literature: Victorian Era to 20th Century (4)

OR

ENG 253. *Survey of American Literature: Colonial to 1900 (4)

ENG 254. *Survey of American Literature: 1900 to Present (4)

B. Upper Division (12 credits)

C. One additional upper- or lower-division English OR one upper-level Writing (4)

English Literature Area (28)

A. Lower Division

ENG 204. *Survey of English Literature: Beowulf to Milton (4)

ENG 205. *Survey of British Literature: Restoration to Romantic Era (4)

ENG 206. *Survey of English Literature: Byron to the Present (4)

Choose one course from below:

ENG 201. *Shakespeare (4)

ENG 202. *Shakespeare (4)

ENG 203. *Shakespeare (4)

B. Upper Division

English Literature Courses (12 credits)

American Literature Area (28)

A. Lower Division

ENG 253. *Survey of American Literature: Colonial to 1900 (4)

ENG 254. *Survey of American Literature: 1900 to Present (4)

Choose one course from below:

ENG 221 *African-American Literature (4)

ENG 260 *Literature of American Minorities (4)

ENG 275 *The Bible as Literature (4)

ENG 317 *The American Novel: Beginnings to Chopin (4)

ENG 318 *The American Novel: Modernist Period (4)

ENG 319 *The American Novel: Post World War II (4)

FILM 245 *The New American Cinema (4)

B. Upper Division

Courses in American Literature (12 credits)

Total=28

Footnotes:

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

FILM STUDIES MINOR

The Film Studies minor is designed to give students a coherent introduction to film criticism, theory, and history (what those of us in the field call “critical studies”) as well as more specialized and/or advanced classes in film genres, authors (auteurs), and cultural studies.

Film Minor Requirements

- Minimum total credits (including electives): 28
- Minimum total upper-division credits (including electives): 12
- Minimum total credits in FILM classes: 24
- Minimum total upper division credits in FILM classes: 8

To be selected from:

FILM 101. Film Criticism and Theory: The Basics (3)

FILM 110. *Introduction to Film Studies, 1895–1945 (3)

FILM 125. *Introduction to Film Studies, 1945–Present (3)

FILM 220. *Topics in Difference, Power, and Discrimination (4)

FILM 245. *The New American Cinema (4)

FILM 255. *World Cinema Part I: Origins to 1968 (4)

FILM 256. *World Cinema Part II: 1968–Present (4)

FILM 265. *Films for the Future (4)

FILM 301. Advanced Film Criticism and Theory (4)[**Pending submission and approval of a proposal**]

FILM 452. ^Studies in Film (4) (*can be taken two times for up to 8 credits*)

FILM 480. Studies in Literature, Culture and Society (4) [Pending approval 87588]

Any other FILM courses of at least 3 credits

Electives:

Select no fewer than 3 and no more than 6 credits selected from the following:

German

GER 261. *Masterpieces of German Cinema (3)

GER 361. Critical Issues of German Cinema (3)

GER 362. Divided Screen: German Cinema Between 1945 and 1990 (3)

GER 363. Contemporary German Cinema (3)

French

FR 329. *Francophone Cultures in Film (3–9)

Spanish

SPAN 439. ^Topics in Mexican Culture as Evidenced Through Mexican Film (3)

Ethnic Studies

ES 352. *Asian Representation in Hollywood and Independent Cinemas (3)

ES 411. Chicano/as In/On Film (3)

ES 452. *Ethnicity in Film (3)

Women Studies

WGSS 230. *Women in the Movies (3)

WGSS 235. *Women in World Cinema (3)

WGSS 325. *Disney: Gender, Race, Empire (3)

Footnotes:

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

WRITING MINOR

Also available via Ecampus.

The Writing minor benefits students who wish to learn about, practice and hone their writing skills, primarily to prepare them for their careers and to increase their qualifications for professional positions in a world where communication skills are ever more needed and revered by employers. Some students with aspirations for graduate, law or medical school studies pursue the Writing minor to better enable themselves to write more proficiently at higher academic levels, where work is more rigorous and written output is expected to be of a very high level. Others engage in the Writing minor for the pure joy of expressing themselves, working with ideas and words, and many publish works in student publications on campus and in external publications. Writing minors may also participate in on-campus and off-campus internships for credit.

The Writing minor requires a minimum of 27 credits, as follows: a minimum of 11 credits from 100-300-level writing courses, plus a minimum of 12 credits from 400-level upper division writing courses, plus one elective upper-division (300/400) 4-credit course in writing or literature.

Part A. A minimum of 11 credits from 100-300-level writing courses. Choose from this list with at least one course at the 300 level:

WR 199. Special Studies (3)

WR 201. *Writing for Media (3)

WR 214. *Writing in Business (3)

WR 222. *English Composition (3)

WR 224. *Introduction to Fiction Writing (3)

WR 241. *Introduction to Poetry Writing (3)

WR 323. *English Composition (3)

WR 324. *Short Story Writing (4)

WR 327. *Technical Writing (3)

WR 329. Writing for Law and Law School (3)

WR 330. *Understanding Grammar (3)

WR 341. *Poetry Writing (4)

WR 362. *Science Writing (3)

WR 383. Food Writing (4)

Part B. A minimum of 12 credits from 400-level upper-division writing courses from the following list:

- ENG 410. Internship (1–16)
 WR 406. Projects (1–16)
 WR 407. Seminar (variable)
 WR 408. Workshop (1–16)
 WR 411. ^The Teaching of Writing (4)
 WR 414. Advertising and Public Relations Writing (4)
 WR 416. Advanced Composition (4)
 WR 420. Studies in Writing (4)
 WR 424. Advanced Fiction Writing (4)
 WR 441. Advanced Poetry Writing (4)
 WR 448. Magazine Article Writing (4)
 WR 449. Critical Reviewing (4)
 WR 493. ^The Rhetorical Tradition and the Teaching of Writing (4)
 WR 495. ^Introduction to Literacy Studies (4)

Part C. One elective upper-division (300/400) 4-credit course in film, literature, or writing, from this list, which does not duplicate any course used in Parts A or B.

Film Electives

- FILM 452. ^Studies in Film (4)

Literature Electives

- ENG 311. ^Studies in British Prose (4)
 ENG 312. ^Studies in British Drama (4)
 ENG 313. ^Studies in British Poetry (4)

GRADUATE MAJORS

CREATIVE WRITING (MFA)

Graduate Areas of Concentration
Fiction, poetry, nonfiction writing

The School of Writing, Literature, and Film offers the Master of Fine Arts degree in Creative Writing (fiction, poetry, nonfiction writing) at the Corvallis campus and a Low-Residency MFA partner program on the OSU-Cascades campus in Bend, Oregon.

The MFA Program in Creative Writing on the OSU Corvallis campus is a two-year, high residency, studio/research program that interweaves literary artistic practice and literary scholarship. Tracks in fiction, nonfiction, and poetry are supported by writing workshops led by nationally known writers, as well as by courses in form, craft, and theory. Intensive mentoring during the thesis year, training in creative writing pedagogy, professional internships, and opportunities for outreach and community engagement produce graduates who are both accomplished creative writers and advocates for the role of literary arts in American culture and society.

OSU-Cascades's Low-Residency MFA is a two-year program combining writing workshop with studies in craft, literature, and vocation. The program offers intensive 10-day residency sessions in June and October and individualized mentorships by nationally known writers throughout the year. The program's intensive low-residency format is designed to balance the modern writer's need for both solitude and community, for both freedom and responsibility—to give our students the freedom as well as the discipline to write. Our curriculum builds sustainable writing habits, develops skills needed to support a creative livelihood after graduation, and creates an environment for taking imaginative risks.

ENGLISH (MA, MAIS)

Graduate Areas of Concentration
Literature and culture; rhetoric, writing, and culture

The School of Writing, Literature and Film offers graduate work leading to a Master of Arts degree in English. The major area of concentration may be literature and culture; or rhetoric, writing, and culture. Graduate work in the school may also be applied to a Master of Arts in Interdisciplinary Studies degree or to minors in other advanced degree programs.

GRADUATE MINORS

CREATIVE WRITING GRADUATE MINOR

For more details, see the departmental advisor.

ENGLISH GRADUATE MINOR

For more details, see the school advisor.

ENGLISH COURSES

ENG 104. *INTRODUCTION TO LITERATURE: FICTION (3). Study of fiction for greater understanding and enjoyment. (H) (Bacc Core Course)

ENG 104H. *INTRODUCTION TO LITERATURE: FICTION (3). Study of fiction for greater understanding and enjoyment. (H) (Bacc Core Course) **PREREQS:** Honors College approval required.

ENG 105. *INTRODUCTION TO LITERATURE: DRAMA (3). Study of drama for greater understanding and enjoyment. (H) (Bacc Core Course)

ENG 106. *INTRODUCTION TO LITERATURE: POETRY (3). Study of poetry for greater understanding and enjoyment. (H) (Bacc Core Course)

ENG 107. *INTRODUCTION TO CREATIVE NONFICTION (3). An introduction to the study of creative nonfiction as a diverse genre, from journalism to memoir and essay. (Bacc Core Course) **PREREQS:** WR 121 or its equivalent in college credit.

ENG 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENG 200. LIBRARY SKILLS FOR LITERARY STUDY (1). Introduction to library resources for the study of literature. Required for English majors.

ENG 201. *SHAKESPEARE (4). The earlier plays. (H) (Bacc Core Course)

ENG 202. *SHAKESPEARE (4). The later plays. (H) (Bacc Core Course)

ENG 204. *SURVEY OF BRITISH LITERATURE: BEGINNINGS TO 1660 (4). English literature presented in chronological sequence. (H) (Bacc Core Course)

ENG 204H. *SURVEY OF BRITISH LITERATURE: BEGINNINGS TO 1660 (4). English literature presented in chronological sequence. (H) (Bacc Core Course) **PREREQS:** Honors College approval required.

ENG 205. *SURVEY OF BRITISH LITERATURE: RESTORATION TO ROMANTIC ERA (4). English literature presented in chronological sequence. (H) (Bacc Core Course)

ENG 206. *SURVEY OF BRITISH LITERATURE: VICTORIAN ERA TO 20TH CENTURY (4). English literature presented in chronological sequence. (H) (Bacc Core Course)

ENG 206H. *SURVEY OF BRITISH LITERATURE: VICTORIAN ERA TO 20TH CENTURY (4). English literature presented in chronological sequence. (H) (Bacc Core Course) **PREREQS:** Honors College approval required.

ENG 207. *LITERATURE OF WESTERN CIVILIZATION: CLASSICAL-RENAISSANCE (4). The great plays, poems and fiction of Western civilization. Covers the Classical World: (Greek, Hebrew, Roman) and Western European major authors through the Renaissance. (H) (Bacc Core Course)

ENG 208. *LITERATURE OF WESTERN CIVILIZATION: 18TH CENTURY TO PRESENT (4). The great plays, poems and prose of Western civilization from the 18th century Enlightenment through Romanticism and beyond. (H) (Bacc Core Course)

ENG 210. *LITERATURES OF THE WORLD: ASIA (4). Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Asia. (H) (NC) (Bacc Core Course)

ENG 211. *LITERATURES OF THE WORLD: AFRICA (4). Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Africa. (H) (NC) (Bacc Core Course)

ENG 212. *LITERATURES OF THE WORLD: MESO/SOUTH AMERICA, CARIBBEAN (4). Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of Meso- and South America and the Caribbean. (H) (NC) (Bacc Core Course)

ENG 213. *LITERATURES OF THE WORLD: MIDDLE EAST (4). Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of the Middle East. (H) (NC) (Bacc Core Course)

ENG 213H. *LITERATURES OF THE WORLD: MIDDLE EAST (4). Representative works of poetry, prose, and drama from nonwestern cultural traditions. Covers literature of the Middle East. (H) (NC) (Bacc Core Course) **PREREQS:** Honors College approval required.

ENG 215. *CLASSICAL MYTHOLOGY (4). Greek and Roman mythology, its allusions, continuing influences. Not offered every year. (H) (Bacc Core Course)

ENG 220. *TOPICS IN DIFFERENCE, POWER, AND DISCRIMINATION (4). A comparative treatment of literary topics in the context of institutional and systematic discrimination. Not offered every year. **CROSSLISTED** as FILM 220. (H) (Bacc Core Course)

ENG 221. *AFRICAN-AMERICAN LITERATURE (4). Reading and critical analysis of African-American literature in historical, political, and/or thematic perspective. Content changes from term to term; see Schedule of Classes. Not offered every year. (H) (Bacc Core Course) This course is repeatable for a maximum of 8 credits.

ENG 253. *SURVEY OF AMERICAN LITERATURE: COLONIAL TO 1900 (4). Readings from American literature presented in chronological sequence, important eras and movements with emphasis on major writers. (H) (Bacc Core Course)

ENG 254. *SURVEY OF AMERICAN LITERATURE: 1900 TO PRESENT (4). Readings from American literature presented in chronological sequence, important eras and movements with emphasis on major writers. (H) (Bacc Core Course)

ENG 254H. *SURVEY OF AMERICAN LITERATURE: 1900 TO PRESENT (4). Readings from American literature presented in chronological sequence, important eras and movements with emphasis on major writers. (H) (Bacc Core Course) **PREREQS:** Honors College approval required.

ENG 260. *LITERATURE OF AMERICAN MINORITIES (4). Study of the literature of American minorities: North American Indian, black, Chicano/Chicana, Asian, Middle Eastern, gay and lesbian. Not offered every year. (H) (Bacc Core Course) **PREREQS:** Sophomore standing.

ENG 260H. *LITERATURE OF AMERICAN MINORITIES (4). Study of the literature of American minorities: North American Indian, black, Chicano/Chicana, Asian, Middle Eastern, gay and lesbian. Not offered every year. (H) (Bacc Core Course) **PREREQS:** Sophomore standing and Honors College approval required.

ENG 275. *THE BIBLE AS LITERATURE (4). Biblical structure, literary types, ideas, influences. Not offered every year. (H) (Bacc Core Course)

ENG 275H. *THE BIBLE AS LITERATURE (4). Biblical structure, literary types, ideas, influences. Not offered every year. (H) (Bacc Core Course) **PREREQS:** Honors College approval required.

ENG 311. ^STUDIES IN BRITISH PROSE (4). An introduction to the prose genre in British literature

with intensive practice in reading and writing practices for literary study. (Writing Intensive Course)

ENG 312. ^STUDIES IN BRITISH DRAMA (4). An introduction to the dramatic arts genre in British literature with a special emphasis in reading and writing for literary study. (Writing Intensive Course)

ENG 313. ^STUDIES IN BRITISH POETRY (4). An introduction to the poetry genre in British literature with intensive practice in reading and writing for literary study. (Writing Intensive Course)

ENG 317. *THE AMERICAN NOVEL: BEGINNINGS TO CHOPIN (4). Chronological survey of the novel in America. Covers from the beginnings to Chopin. (H) (Bacc Core Course)

ENG 318. *THE AMERICAN NOVEL: MODERNIST PERIOD (4). Chronological survey of the novel in America. Covers Modernist Period from Dreiser to Faulkner. (H) (Bacc Core Course)

ENG 319. *THE AMERICAN NOVEL: POST-WORLD WAR II (4). Chronological survey of the novel in America. Covers Post-World War II: Mailer to the present. (H) (Bacc Core Course)

ENG 320. *STUDIES IN PAGE, STAGE, AND SCREEN (4). Study of a particular theme, genre, movement, or author through the relations of text and performance. Topics change from term to term and may include content from film, drama, digital sources, and other visual media. (H) (Bacc Core Course) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing or above.

ENG 321. *STUDIES IN WORD, OBJECT, AND IMAGE (4). Study of a particular theme, genre, movement, or author through the relations of texts to material artifacts and/or static visual objects (e.g. paintings, engravings, printed matter, or photographs). Topics change from term to term. (Bacc Core Course) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing or above.

ENG 322. *STUDIES IN GLOBALISM, TEXT, AND EVENT (4). Study of a particular theme, genre, movement, or author as informed by patterns of globalization, issues in international relations, and/or landmark moments of cultural exchange. Topics change from term to term. (Bacc Core Course) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing.

The first course in an interdisciplinary sequence of courses that examines the development and interrelationships of American art and literature from contact to the present. ENG 386 covers Conquest to Civil War. **CROSSLISTED** as ART 386. **PREREQS:** Sophomore standing.

ENG 387. A CULTURAL HISTORY OF AMERICAN ART AND LITERATURE: PART II (4). The second course in an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. ENG 387 covers Civil War to Harlem Renaissance. **CROSSLISTED** as ART 387. **PREREQS:** Sophomore standing.

ENG 388. A CULTURAL HISTORY OF AMERICAN ART AND LITERATURE: PART III (4). The third course in an interdisciplinary sequence that examines the development and interrelationships of American art and literature from contact to the present. ENG 388 covers Great Depression to Postmodernity. **CROSSLISTED** as ART 388. **PREREQS:** Sophomore standing.

ENG 399. SELECTED TOPICS (1-16). (H) This course is repeatable for a maximum of 16 credits.

ENG 399H. SELECTED TOPICS (1-16). (H) This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

ENG 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENG 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENG 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENG 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENG 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENG 406H. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

ENG 407. *SEMINAR (1-16). May be repeated as topics vary. **CROSSLISTED** as AMS 407. (Writing Intensive Core) This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENG 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

ENG 410. INTERNSHIP IN ENGLISH (1-16). Provides upper-division English majors with supervised, on-the-job work experience, accompanying academic readings. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Junior standing in English; 16 credits of literature; 6 credits of writing beyond WR 121. Departmental approval required.

ENG 412. STUDIES IN BRITISH THEATER AND SOCIETY (4). Study of major dramatists and the audiences they addressed, of socio-economic conditions and their interrelations with theatrical institutions. Readings may include dramatic and non-dramatic literature. Historical period and content may vary. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 416. *POWER AND REPRESENTATION (4). Critical analysis of works by colonized peoples, women, and ethnic minorities, with a focus on the issue of representation. Not offered every year. (H) (Bacc Core Course) **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 417. THE ENGLISH NOVEL: DEFOE THROUGH SCOTT (4). Selected English novels from Defoe through Scott. Not offered every year. (H) **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 418. THE ENGLISH NOVEL: VICTORIAN PERIOD (4). Selected English novels focusing on those from the Victorian period. (H) **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 419. THE ENGLISH NOVEL: 20TH CENTURY (4). Selected English novels of the 20th century. (H) **PREREQS:** Sophomore standing; 8 credits in English at 200-level or above.

ENG 420. *STUDIES IN DIFFERENCE, POWER, AND DISCRIMINATION (4). Comparative studies in literature documenting or illuminating institutional and systematic discrimination. Not offered every year. (H) (Bacc Core Course) **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 425. STUDIES IN MEDIEVAL LITERATURE (4). Particular genres, themes, and writers in medieval literature. Topics change from term to term. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 426. STUDIES IN CHAUCER (4). The works of Geoffrey Chaucer in their historical, cultural, and poetic contexts. Topics change from term to term. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 430. STUDIES IN EARLY MODERN LITERATURE (4). Literature and culture of the Tudor, early Stuart, and Interregnum periods, 1485-1660. Content and genres will vary and may include non-English writers who influenced the English Renaissance. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 433. STUDIES IN THE LONG EIGHTEENTH CENTURY (4). Literature of the period 1660-1800, with emphasis on one or more of the following poets: Dryden, Pope, Swift, Johnson, Gray, Cowper. May also include prose writers (e.g. Behn, Fielding, Richardson, Addison and Steele) and dramatists (e.g. Congreve, Wycherly, Gay). Not offered every term. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 434. STUDIES IN ROMANTICISM (4). Romantic-period writing and culture, with emphasis on one or more of the following authors: Blake, Wordsworth, Coleridge, Keats, Byron and Shelley. May also include Romantic novelists and prose writers (e.g. Austen, Wollstonecraft,

Burke). Not offered every term. (H) This course is repeatable for a maximum of 8 credits.

PREREQS: Sophomore standing; 8 credits of ENG 200-level or above.

ENG 435. STUDIES IN SHAKESPEARE (4). Shakespeare's works from a variety of critical and scholarly perspectives. Not offered every term. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 436. STUDIES IN VICTORIAN LITERATURE (4). Fiction, poetry, and nonfiction prose of the Victorian era. Topics change from term to term; see Schedule of Classes. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 438. STUDIES IN MODERNISM (4). Studies in the literature and contexts of the Modernist period in Anglo-American letters (1890s to 1940s). Authors may include Wilde, Crane, Conrad, Eliot, Stevens, James, Woolf, Joyce, Lawrence, Shaw, Forster. Topics change from term to term. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 440. STUDIES IN MODERN IRISH LITERATURE (4). Studies in the literature and contexts of the period of Irish writing often referred to as the Irish Renaissance. Authors may include Yeats, Joyce, Shaw, O'Casey, Gregory, Synge, Bowen, Moore, Behan, O'Brien, Kavanaugh, Cronin. Sometimes offered as a study of Joyce's works alone. Topics change from term to term. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 445. *STUDIES IN NONFICTION (4). Particular essayists and journalists, movements, problems, conventions, and types of nonfiction writing in English. Topics change from term to term; see Schedule of Classes. Not offered every year. (H) (Writing Intensive Course) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 450. STUDIES IN SHORT FICTION (4). Particular writers, movements, and types of short fiction. Topics change from term to term; see Schedule of Classes. Not offered every year. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 454. MAJOR AUTHORS (4). Advanced study of major and influential authors from various cultures and backgrounds. Subjects change from term to term; see Schedule of Classes. Not offered every year. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 457. *COMPARATIVE LITERATURE: COLONIALISM (4). Major works from Europe and the non-Western world during the colonial era: 1800-1945. Not offered every year. (H) (NC) (Bacc Core Course) **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 458. *COMPARATIVE LITERATURE: POSTCOLONIALISM (4). Major works from Europe and the non-Western world in the postcolonial period: WW II to present. Not offered every year. (H) (NC) (Bacc Core Course) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 460. STUDIES IN DRAMA (4). Particular dramatists, movements, conventions, and types of world drama. Topics change from term to term; see Schedule of Classes. Not offered every term. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 465. STUDIES IN THE NOVEL (4). Particular novelists, movements, conventions, and types of the novel throughout its history. Topics change from term to term; see Schedule of Classes. Not offered every term. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 470. ^STUDIES IN POETRY (4). Particular poets, movements, problems, conventions, and types of poetry in English or English translation. Topics change from term to term; see Schedule of Classes. Not offered every term. (H) (Writing Intensive Course) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 475. STUDIES IN CRITICISM (4). Particular critics, critical movements, issues, and histories of criticism. Topics change from term to term; see Schedule of Classes. Not offered every year. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 480. STUDIES IN LITERATURE, CULTURE AND SOCIETY (4). Study of literature in its relationship to society and culture; study of literary culture. Topics change from term to term; see Schedule of Classes. Not offered every term. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 482. STUDIES IN AMERICAN LITERATURE, CULTURE, AND THE ENVIRONMENT (4). Creative nonfiction, fiction, poetry, and film from the mid-19th century to the present, examining relationships between rural and urban, and investigating the development of important patterns in how the physical environment is perceived, represented, interpreted, and used in the United States. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 485. ^STUDIES IN AMERICAN LITERATURE (4). Special topics in American literary history. Organized around movements, regions, themes, or major authors. Topics change from term to term; see Schedule of Classes. Not offered every term. (H) (Writing Intensive Course) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 486. STUDIES IN BRITISH LITERATURE (4). Particular British writers, movements, conventions, genres, and problems. Topics change from term to term; see Schedule of Classes. Not offered every year. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 488. LITERATURE AND PEDAGOGY (4). Practices, approaches, histories, and theories of teaching literature appropriate for secondary through college settings. Considers text selection, assignments, and evaluation. (H) **PREREQS:** Upper-division standing.

ENG 489. WRITING, LITERATURE AND MEDICINE (4). Considers medical themes in literature, social meanings of illness, and writing strategies appropriate to the healing arts. **PREREQS:** Sophomore and above.

ENG 490. HISTORY OF THE ENGLISH LANGUAGE (4). A study of the origins, changes, and reasons for changes in the grammar, sounds, and vocabulary of English from its earliest stages through its modern forms. (H) **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 495. LANGUAGE, TECHNOLOGY, AND CULTURE (4). Explores relationship between literacy, technology, and thought. (H) **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 497. *INTERNATIONAL WOMEN'S VOICES (4). A study of women and literature in an international context, focusing on the cultural differences among women and the effects of gender on language and literature. (H) (Bacc Core Course) **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 498. WOMEN AND LITERATURE (4). Study of the relations between women and literature, including such issues as images of women in literature, women writers, and the effects of gender on language. This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 499. SELECTED TOPICS (1-16). (H) This course is repeatable for a maximum of 16 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

ENG 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval and graduate standing required.

ENG 502. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval and graduate standing required.

ENG 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval and graduate standing required.

ENG 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval and graduate standing required.

ENG 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval and graduate standing required.

ENG 507. SEMINAR (1-16). May be repeated for credit as topics vary. **CROSSLISTED** as AMS 507. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval and graduate standing required.

ENG 510. GRADUATE INTERNSHIP IN ENGLISH (1-2). Provides graduate students with supervised, on-the-job work experience and professional development. Includes academic readings. Graded P/N. This course is repeatable for a maximum of 4 credits. **PREREQS:** Graduate standing in English, departmental approval.

ENG 512. STUDIES IN BRITISH THEATER AND SOCIETY (4). Study of major dramatists and the audiences they addressed, of socio-economic conditions and their interrelations with theatrical institutions. Readings may include dramatic and non-dramatic literature. Historical period and content may vary. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 514. INTRODUCTION TO GRADUATE STUDIES (4). Introduction to the MA program; theories and methods of English studies. Offered fall term only. Required for first-year MA students.

ENG 516. POWER AND REPRESENTATION (4). Critical analysis of works by colonized peoples, women, and ethnic minorities, with a focus on the issue of representation. Not offered every year. **PREREQS:** Graduate standing.

ENG 517. THE ENGLISH NOVEL: DEFOE THROUGH SCOTT (4). Selected English novels from Defoe through Scott. Not offered every year. **PREREQS:** Graduate standing.

ENG 518. THE ENGLISH NOVEL: VICTORIAN PERIOD (4). Selected English novels focusing on those from the Victorian period. **PREREQS:** Graduate standing.

ENG 519. THE ENGLISH NOVEL: 20TH CENTURY (4). Selected English novels of the 20th century. **PREREQS:** Graduate standing.

ENG 520. STUDIES IN DIFFERENCE, POWER, AND DISCRIMINATION (4). Comparative studies in literature documenting or illuminating institutional and systematic discrimination. Not offered every year. **PREREQS:** Graduate standing.

ENG 525. STUDIES IN MEDIEVAL LITERATURE (4). Particular genres, themes, and writers in medieval literature. Topics change from term to term. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 526. STUDIES IN CHAUCER (4). The works of Geoffrey Chaucer in their historical, cultural, and poetic contexts. Topics change from term to term. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 530. STUDIES IN EARLY MODERN LITERATURE (4). Literature and culture of the Tudor, early Stuart, and Interregnum periods, 1485-1660. Content and genres will vary and may include non-English writers who influenced the English Renaissance. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 533. STUDIES IN THE LONG EIGHTEENTH CENTURY (4). Literature of the period 1660-1800, with emphasis on one or more of the following poets: Dryden, Pope, Swift, Johnson, Gray, Cowper. May also include prose writers (e.g. Behn, Fielding, Richardson, Addison and Steele) and dramatists (e.g. Congreve, Wycherly, Gay). Not offered every term. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 534. STUDIES IN ROMANTICISM (4). Romantic-period writing and culture, with emphasis on one or more of the following authors: Blake, Wordsworth, Coleridge, Keats, Byron and Shelley. May also include Romantic novelists and prose writers (e.g. Austen, Wollstonecraft, Burke). Not offered every term. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 535. STUDIES IN SHAKESPEARE (4). Shakespeare's works from a variety of critical and scholarly perspectives. Not offered every term. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing and at least one quarter of Shakespeare.

ENG 536. STUDIES IN VICTORIAN LITERATURE (4). Fiction, poetry, and nonfiction prose of the Victorian era. Topics change from term to term; see Schedule of Classes. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 538. STUDIES IN MODERNISM (4). Studies in the literature and contexts of the Modernist period in Anglo-American letters (1890's to 1940's). Authors may include Wilde, Crane, Conrad, Eliot, Stevens, James, Woolf, Joyce, Lawrence, Shaw, Forster. Topics change from term to term. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 540. STUDIES IN MODERN IRISH LITERATURE (4). Studies in the literature and context of the period of Irish writing often referred to as the Irish Renaissance. Authors may include Yeats, Joyce, Shaw, O'Casey, Gregory, Synge, Bowen, Moore, Behan, O'Brien, Kavanaugh, Cronin. Sometimes offered as a study of Joyce's works alone. Topics change from term to term. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 545. STUDIES IN NONFICTION (4). Particular essayists and journalists, movements, problems, conventions, and types of nonfiction writing in English. Topics change from term to term; see Schedule of Classes. Not offered every year. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 550. STUDIES IN SHORT FICTION (4). Particular writers, movements, and types of short fiction. Topics change from term to term; see

Schedule of Classes. Not offered every year. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 554. MAJOR AUTHORS (4). Advanced study of major and influential authors from various cultures and backgrounds. Subjects change from term to term; see Schedule of Classes. Not offered every year. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 557. COMPARATIVE LITERATURE: COLONIALISM (4). Major works from Europe and the non-Western world during the colonial era: 1800-1945. Not offered every year. **PREREQS:** Graduate standing.

ENG 558. COMPARATIVE LITERATURE: POSTCOLONIALISM (4). Major works from Europe and the non-Western world in the postcolonial period: WW II to present. Not offered every year. **PREREQS:** Graduate standing.

ENG 560. STUDIES IN DRAMA (4). Particular dramatists, movements, conventions, and types of world drama. Topics change from term to term; see Schedule of Classes. Not offered every term. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 565. STUDIES IN THE NOVEL (4). Particular novelists, movements, conventions, and types of the novel throughout its history. Topics change from term to term; see Schedule of Classes. Not offered every term. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 570. STUDIES IN POETRY (4). Particular poets, movements, problems, conventions, and types of poetry in English or English translation. Topics change from term to term; see Schedule of Classes. Not offered every term. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 575. STUDIES IN CRITICISM (4). Particular critics, critical movements, issues, and histories of criticism. Topics change from term to term; see Schedule of Classes. Not offered every year. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 580. STUDIES IN LITERATURE, CULTURE AND SOCIETY (4). Study of literature in its relationship to society and culture; study of literary culture. Topics change from term to term; see Schedule of Classes. Not offered every term. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 582. STUDIES IN AMERICAN LITERATURE, CULTURE, AND THE ENVIRONMENT (4). Creative nonfiction, fiction, poetry, and film from the mid-19th century to the present, examining relationships between rural and urban, and investigating the development of important patterns in how the physical environment is perceived, represented, interpreted, and used in the United States. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 585. STUDIES IN AMERICAN LITERATURE (4). Special topics in American literary history. Organized around movements, regions, themes, or major authors. Topics change from term to term; see Schedule of Classes. Not offered every term. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 586. STUDIES IN BRITISH LITERATURE (4). Particular British writers, movements, conventions, genres, and problems. Topics change from term to term; see Schedule of Classes. Not offered every year. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

ENG 588. LITERATURE AND PEDAGOGY (4). Practices, approaches, histories, and theories of teaching literature appropriate for secondary through college settings. Considers text selection,

assignments, and evaluation. **PREREQS:** Graduate standing.

ENG 589. WRITING, LITERATURE AND MEDICINE (4). Considers medical themes in literature, social meanings of illness, and writing strategies appropriate to the healing arts. **PREREQS:** Sophomore and above.

ENG 590. HISTORY OF THE ENGLISH LANGUAGE (4). A study of the origins, changes, and reasons for changes in the grammar, sounds, and vocabulary of English from its earliest stages through its modern forms. **PREREQS:** Graduate standing.

ENG 595. LANGUAGE, TECHNOLOGY, AND CULTURE (4). Explores relationship between literacy, technology, and thought. **PREREQS:** Graduate standing.

ENG 597. INTERNATIONAL WOMEN'S VOICES (4). A study of women and literature in an international context, focusing on the cultural differences among women and the effects of gender on language and literature. **PREREQS:** Graduate standing.

ENG 598. WOMEN AND LITERATURE (4). Study of the relations between women and literature, including such issues as images of women in literature, women writers, and the effects of gender on language. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

■ FILM STUDIES COURSES

FILM 110. *INTRODUCTION TO FILM STUDIES: 1895-1945 (3). An introduction to the serious study of world cinema, 1895-1945. Class lectures will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films from the U.S., Europe, and Asia accompany the lectures. Film fee required. (H) (Bacc Core Course)

FILM 125. *INTRODUCTION TO FILM STUDIES: 1945-PRESENT (3). Provides an introduction to the serious study of world cinema, 1945-present. Class lectures will offer a variety of historical, critical and theoretical approaches. Weekly screenings of important films from the U.S., Europe, and Asia accompany the lectures. Film fee required. (H) (Bacc Core Course)

FILM 220. *TOPICS IN DIFFERENCE, POWER, AND DISCRIMINATION (4). A comparative treatment of literary topics in the context of institutional and systematic discrimination. Not offered every year. **CROSSLISTED** as ENG 220. (H) (Bacc Core Course)

FILM 245. *THE NEW AMERICAN CINEMA (4). A formalist, ideological, and commercial investigation into contemporary American cinema. Three hours of lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Bacc Core Course)

FILM 245H. *THE NEW AMERICAN CINEMA (4). A formalist, ideological, and commercial investigation into contemporary American cinema. Three hours of lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Bacc Core Course) **PREREQS:** Honors College approval required.

FILM 255. *WORLD CINEMA PART I: ORIGINS TO 1968 (4). A systematic introduction to the arts and history of international cinema, from the invention of the medium in 1895 to the rise of New Wave and Third Cinema in the 1960s. Weekly screenings of films such as Rashomon, Tokyo Story, Pather Panchali, Terra em Transe, and La Noire de. (Bacc Core Course)

FILM 256. *WORLD CINEMA PART II: 1968-PRESENT (4). A systematic introduction to the arts and history of international cinema, from the decolonization movement in the 1960s and the 1970s to the dynamics of globalization that we are experiencing today. Weekly screenings include

such films as A Better Tomorrow, Chungking Express, Spirited Away, Oldboy, Bombay, and City of God. (Bacc Core Course)

FILM 265. *FILMS FOR THE FUTURE (4). An interdisciplinary study of film, literary, and philosophical visions of the future. Three hours of lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Bacc Core Course)

FILM 452. ^STUDIES IN FILM (4). Particular cinematographers, movements, types, conventions, or problems in film. Topics change from term to term; see Schedule of Classes. Lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Writing Intensive Course) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

FILM 452H. ^STUDIES IN FILM (4). Particular cinematographers, movements, types, conventions, or problems in film. Topics change from term to term; see Schedule of Classes. Lecture and separate screenings each week. Film fee required. Not offered every year. (H) (Writing Intensive Course) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above. Honors College approval required.

FILM 480. STUDIES IN LITERATURE, CULTURE AND SOCIETY (4). Study of literature in its relationship to society and culture; study of literary culture. Topics change from term to term; see Schedule of Classes. Not offered every term. (H) This course is repeatable for a maximum of 8 credits. **PREREQS:** Sophomore standing; 8 credits of ENG 200-level or above.

FILM 552. STUDIES IN FILM (4). Particular cinematographers, movements, types, conventions, or problems in film. Topics change from term to term; see Schedule of Classes. Lecture and separate screenings each week. Film fee required. Not offered every year. This course is repeatable for a maximum of 16 credits. **PREREQS:** Graduate standing.

FILM 580. STUDIES IN LITERATURE, CULTURE AND SOCIETY (4). Study of literature in its relationship to society and culture; study of literary culture. Topics change from term to term; see Schedule of Classes. Not offered every term. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

■ WRITING COURSES

WR 115. INTRODUCTION TO EXPOSITORY WRITING (3). Introduction to rhetorical concepts and writing strategies necessary for university level written composition. Includes substantial discussion of grammar, punctuation, and usage conventions of standard written English. Does not satisfy WR 121 requirement. Graded P/N. This course is repeatable for a maximum of 6 credits.

WR 121. *ENGLISH COMPOSITION (3). Introduction to critical thinking, the writing process, and the forms of expository writing. Intensive writing practice, with an emphasis on revision. The term in which the student takes the course is determined alphabetically; see Schedule of Classes. (Bacc Core Course) **PREREQS:** Alpha Section H-N and required of all students.

WR 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WR 201. *WRITING FOR MEDIA (3). Introduction to newspaper style. Introduction to reporting. (Bacc Core Course) **PREREQS:** Grade B or higher in WR 121 and 30 wpm typing speed.

WR 214. *WRITING IN BUSINESS (3). Continued practice in writing with an emphasis on the rhetorical and critical thinking demands of writers in business and industry. (Bacc Core Course) **PREREQS:** WR 121 or Placement Test

WR 222. *ENGLISH COMPOSITION (3).

Continued practice in expository writing with an emphasis on argumentation and research. (Bacc Core Course) **PREREQS:** WR 121 or Placement Test

WR 224. *INTRODUCTION TO FICTION

WRITING (3). Discussion workshop. Student work examined in context of contemporary published work. (FA) (Bacc Core Course) **PREREQS:** WR 121 or Placement Test

WR 239. INTRODUCTION TO WRITING FICTION

AND CREATIVE NONFICTION (3). Explores how to write good stories, whether real or imagined. Students will read and write in both genres, identifying the elements that make stories more vivid, more human, and more true. Students will write informal pieces and one longer work in each genre, and will workshop one story or essay. Taught via Ecampus only.

WR 240. INTRODUCTION TO NONFICTION

WRITING (3). Discussion workshop. Student work examined in context of contemporary published work. This course is repeatable for a maximum of 9 credits. **PREREQS:** WR 121

WR 241. *INTRODUCTION TO POETRY

WRITING (3). Discussion workshop. Rudiments of mechanics and some background in development of modern poetry. (FA) (Bacc Core Course) **PREREQS:** WR 121 or Placement Test

WR 303. *WRITING FOR THE WEB (3).

The production of instructive, informative, and rhetorically savvy writing for Web-based locations and applications. Helps people find information, get things done, convey their opinions, build communities, and collaborate on complex projects. (Bacc Core Course) **PREREQS:** WR 121

WR 323. *ENGLISH COMPOSITION (3).

Continued practice in writing with an emphasis on the elements of style: diction, tone, precision and economy, emphasis, figurative language. (Bacc Core Course) **PREREQS:** WR 121 or Placement Test

WR 324. *SHORT STORY WRITING (4).

Study and writing of the short story. (FA) (Bacc Core Course) This course is repeatable for a maximum of 8 credits. **PREREQS:** WR 224 and /or instructor approval required.

WR 327. *TECHNICAL WRITING (3).

Continued practice in writing with an emphasis on the rhetorical and critical thinking demands of writers in scientific and technological fields. (Bacc Core Course) **PREREQS:** WR 121 or Placement Test

WR 329. WRITING FOR LAW AND LAW

SCHOOL (3). Improves the rhetorical and structural sophistication of persuasive writing, and gives practice in writing the law application essay. Provides a thorough review of logical, grammatical, usage, and sentence-level errors. **PREREQS:** WR 121

WR 330. *UNDERSTANDING GRAMMAR

(3). Advanced study of traditional grammatical forms and conventional grammatical terms with emphasis on the assumptions underlying the structure of traditional grammar. (Bacc Core Course) **PREREQS:** WR 121 or Placement Test

WR 341. *POETRY WRITING (4).

Study and writing of verse. (FA) (Bacc Core Course) This course is repeatable for a maximum of 8 credits. **PREREQS:** WR 241 and /or instructor approval required.

WR 353. WRITING ABOUT PLACES (3).

Utilizing personal experience, reading, and research, students, study, discuss, and practice the conventions of writing about place far and near, global and local, for various audiences and in a range of formats. **PREREQS:** WR 121

WR 362. *SCIENCE WRITING (3).

Students learn and practice the conventions for writing scientific material for a variety of audiences. Involves writing and research assignments, multimedia presentations, lecture, and in-class

and online activities. (Baccalaureate Core Course)

PREREQS: WR 121

WR 383. FOOD WRITING (4).

Students will write about food and food issues for a variety of audiences, including print and digital, adapting their texts to become increasingly sophisticated critical thinkers and writers who can shape material effectively. Will also address food science and food studies from a historical and cultural background. **PREREQS:** (WR 121 and (HC 199 or PHL 121 or WR 201 or WR 214 or WR 222 or WR 224 or WR 241 or WR 323 or WR 324 or WR 327 or WR 330 or WR 341 or WR 362)) and Students need to have cleared their Baccalaureate WR II requirement in order to have the necessary writing skills to build upon for this course.

WR 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

WR 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

PREREQS: Honors College approval required.

WR 401. RESEARCH AND SCHOLARSHIP

(1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WR 402. INDEPENDENT STUDY (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WR 403. THESIS (TBA) (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WR 404. WRITING AND CONFERENCE (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WR 405. READING AND CONFERENCE (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WR 406. PROJECTS (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WR 407. SEMINAR (1-16).

Topic TBA. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WR 408. WORKSHOP (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WR 411. ^THE TEACHING OF WRITING (4).

Pedagogy and theory in composition; prepares teachers (secondary through college) in writing process, assignment design, evaluation, and grammar. Also focuses on students' own writing. (Writing Intensive Course) **PREREQS:** Upper-division standing.

WR 414. ADVERTISING AND PUBLIC

RELATIONS WRITING (4). Writing news releases, annual reports, brochures, newsletters, and other PR materials. Writing advertising copy. **PREREQS:** WR 121 and upper-division standing.

WR 416. ADVANCED COMPOSITION (4).

The development of style and voice in both the personal and the academic essay. This course is repeatable for a maximum of 8 credits. **PREREQS:** Upper-division standing.

WR 420. STUDIES IN WRITING (4).

Selected topics in rhetoric and composition. This course is repeatable for a maximum of 8 credits. **PREREQS:** Upper-division standing.

WR 424. ADVANCED FICTION WRITING (4).

Advanced fiction workshop with an emphasis on developing longer pieces. (FA) This course is repeatable for a maximum of 8 credits. **PREREQS:** WR 324 and /or instructor approval required.

WR 441. ADVANCED POETRY WRITING (4).

Advanced poetry workshop. (FA) This course is repeatable for a maximum of 8 credits. **PREREQS:** WR 341 and /or instructor approval required.

WR 448. MAGAZINE ARTICLE WRITING (4).

Writing the magazine article. Analyzing markets and writing query and cover letters, marketing manuscripts to magazines. Interviewing and researching. **PREREQS:** Upper-division standing.

WR 449. CRITICAL REVIEWING (4).

Writing critical reviews of books, television programs, movies, plays, and restaurants for newspapers and magazines. The role of criticism in popular culture. **PREREQS:** Upper-division standing.

WR 462. SCIENCE WRITING (4).

Reporting and writing about science and technology. Interviewing scientists and interpreting scientific information. This course is repeatable for a maximum of 12 credits.

WR 466. PROFESSIONAL WRITING (4).

Introduces the texts, contexts, and concepts important to the practice of professional communication in organizational contexts, addressing practical writing skills, rhetoric, ethics, and information design. Course readings concern what professional writers do and what theories govern their actions, bridging the gap between real-world problems and academic research. **PREREQS:** WR 121 and upper-division standing for undergraduates.

WR 493. ^THE RHETORICAL TRADITION AND

THE TEACHING OF WRITING (4). Major past and contemporary theories of written communication, their historical context, and their impact on writing and the teaching of writing. (Writing Intensive Course) **PREREQS:** Upper-division standing.

WR 495. ^INTRODUCTION TO LITERACY

STUDIES (4). Literacy studies in multidisciplinary contexts. Examines historical, theoretical, and practical relationships among reading, writing, language, culture, and schooling. (Writing Intensive Course) **PREREQS:** Upper-division standing.

WR 499. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

WR 501. RESEARCH AND SCHOLARSHIP (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval and graduate standing required.

WR 502. INDEPENDENT STUDY (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval and graduate standing required.

WR 503. THESIS (1-16).

This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval and graduate standing required.

WR 504. WRITING AND CONFERENCE (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

WR 505. READING AND CONFERENCE (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval and graduate standing required.

WR 506. PROJECTS (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval and graduate standing required.

WR 507. SEMINAR (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval and graduate standing required.

WR 508. WORKSHOP (1-16).

This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval and graduate standing required.

WR 509. PRACTICUM (1-16).

Required practicum for graduate students teaching introduction to poetry writing. This course is repeatable for a maximum of 16 credits.

WR 511. THE TEACHING OF WRITING (4). Pedagogy and theory in composition; prepares teachers (secondary through college) in writing process, assignment design, evaluation, and grammar. Also focuses on student's own writing. **PREREQS:** Graduate standing.

WR 512. CURRENT COMPOSITION THEORY (4). Current rhetoric and composition theory and its applications for teachers and writers. **PREREQS:** Graduate standing.

WR 514. ADVERTISING AND PUBLIC RELATIONS WRITING (4). Writing news releases, annual reports, brochures, newsletters, and other PR materials. Writing advertising copy. **PREREQS:** Graduate standing.

WR 516. ADVANCED COMPOSITION (4). The development of style and voice in both the personal and the academic essay. This course is repeatable for a maximum of 16 credits. **PREREQS:** Graduate standing.

WR 517. TEACHING PRACTICUM: ENGLISH COMPOSITION (2). Required practicum for graduate students teaching English Composition.

WR 518. TEACHING PRACTICUM: WRITING IN BUSINESS (1). Pedagogy practicum for graduate students in the teaching of professional writing and communication. This course is required for GTA's who will teach WR 214, Writing in Business. This course is repeatable for a maximum of 3 credits.

WR 519. TEACHING PRACTICUM: TECHNICAL WRITING (1). Required practicum for graduate students teaching technical writing.

WR 520. STUDIES IN WRITING (4). Selected topics in rhetoric and composition. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

WR 521. TEACHING PRACTICUM: FICTION WRITING (1). Required practicum for graduate students teaching introduction to fiction writing. This course is repeatable for a maximum of 3 credits.

WR 522. TEACHING PRACTICUM: POETRY WRITING (1). Required practicum for graduate students teaching introduction to poetry writing. This course is repeatable for a maximum of 3 credits.

WR 524. ADVANCED FICTION WRITING (4). Advanced fiction workshop with an emphasis on developing longer pieces. This course is repeatable for a maximum of 24 credits. **PREREQS:** Instructor approval and graduate standing required.

WR 525. ADVANCED SCIENTIFIC AND TECHNICAL WRITING (4). Combines scientific and technical writing with science journalism. Students will draw on a data set (preferably their own) to draft a scientific journal article, short grant proposal, magazine article, and letter of inquiry. They will also critically evaluate and edit documents by reviewing classmates' drafts. **CROSSLISTED** as PSM 525.

WR 540. ADVANCED NONFICTION WRITING (4). Advanced creative nonfiction workshop with an emphasis on developing longer pieces. This course is repeatable for a maximum of 24 credits. **PREREQS:** Instructor approval.

WR 541. ADVANCED POETRY WRITING (4). Advanced poetry workshop. This course is repeatable for a maximum of 24 credits. **PREREQS:** Instructor approval and graduate standing required.

WR 548. MAGAZINE ARTICLE WRITING (4). Writing the magazine article. Analyzing markets and writing query and cover letters, marketing manuscripts to magazines. Interviewing and researching. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

WR 549. CRITICAL REVIEWING (4). Writing critical reviews of books, television programs, movies, plays, and restaurants for newspapers and magazines. The role of criticism in popular culture. **PREREQS:** Graduate standing.

WR 562. SCIENCE WRITING (4). Reporting and writing about science and technology. Interviewing scientists and interpreting scientific information. This course is repeatable for a maximum of 8 credits. **PREREQS:** Graduate standing.

WR 566. PROFESSIONAL WRITING (4). Introduces the texts, contexts, and concepts important to the practice of professional communication in organizational contexts, addressing practical writing skills, rhetoric, ethics, and information design. Course readings concern what professional writers do and what theories govern their actions, bridging the gap between real-world problems and academic research.

WR 593. THE RHETORICAL TRADITION AND THE TEACHING OF WRITING (4). Major past and contemporary theories of written communication, their historical context, and their impact on writing and the teaching of writing. **PREREQS:** Graduate standing.

WR 595. INTRODUCTION TO LITERACY STUDIES (4). Literacy studies in multidisciplinary contexts. Examines historical, theoretical, and practical relationships among reading, writing, language, culture, and schooling. **PREREQS:** Graduate standing.

WR 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

OTHER DEGREES & PROGRAMS WITHIN THE COLLEGE OF LIBERAL ARTS

20TH CENTURY STUDIES CERTIFICATE

As of January 2005, students are not being admitted to the 20th Century Studies Undergraduate Certificate program.

To complete the certificate program, students are required to take a minimum of 27 credits, consisting of 9 credits of core courses, 9 credits of thematic interdisciplinary courses, and 9 credits of approved elective courses.

Core Courses (9)

TCS 201. *Twentieth Century Dreams: The U.S. (3)

TCS 301. *World Community in the Twentieth Century: Underdevelopment (3)

Thematic Interdisciplinary Courses (9)

Elective Courses (9)

Elective courses may be chosen from among the many regular departmental offerings in the College of Liberal Arts. Elective credits must be outside the student's major.

RUSSIAN STUDIES CERTIFICATE

This program has been suspended.

Option I

The course of study consists of a minimum of 30 credits: 21 credits of required core courses and 9 credits of appropriate electives. In the distribution of electives, students must complete at least one course in two of the following areas: economics, history, political science.

Requirements (21)

RUS 211, RUS 212, RUS 213. Second-Year Russian (4,4,4)

RUS 231, RUS 232, RUS 233. *Russian Culture (3,3,3)

Elective Courses (9)

HST 340, HST 341. History of Russia (4,4)

HST 344. Special Topics in Russian History (4,4)

HSTS 418/HSTS 518. *Science and Society (4)

HST 345. Society in Modern Russia (4)

PS 343. *Russian Politics (4)

PS 399. Current Problems in Politics (3)

PS 402. Independent Study (1-16)

RUS 341. *20th Century Russian Literature in Translation (3)

Option II

The course of study consists of a minimum of 30 credits: 12 credits of required core courses and 18 credits of appropriate electives. In the distribution of electives, students must complete at least one course in three of the following areas: foreign languages; economics; history; political science.

Requirements (12)

RUS 111, RUS 112, RUS 113. First-Year Russian (4,4,4)

Elective Courses (18)

HST 341. History of Russia (4)

HST 344. Special Topics in Russian History (4,4)

HST 345. Society in Modern Russia (4)

HSTS 418/HSTS 518. *Science and Society (4)

PS 343. *Russian Politics (4)

PS 399. Current Problems in Politics (3)

PS 402. Independent Study (1-16)

RUS 233. *Russian Culture [20th Century] (3)

RUS 341. *20th Century Russian Literature in Translation (3)

Courses offered on a one-time basis that are directly related to Russian Studies may be used if the student receives prior approval from the Russian Studies coordinator. For example, HST 415/HST 515. Selected Topics: Stalin and Stalinism (3).

Footnote:

* Baccalaureate Core Course

The Oregon State University College of Pharmacy's Doctor of Pharmacy (PharmD) Program is accredited by the Accreditation Council for Pharmacy Education (<http://www.acpe-accredit.org/>), 135 S. LaSalle Street, Suite 4100, Chicago, IL 60603-4810, 312-664-3575, 800-533-3606; Fax, 312-664-4652. The PharmD degree is jointly conferred by Oregon State University and Oregon Health and Science University. The Oregon State University College of Pharmacy is a member of the American Association of Colleges of Pharmacy. The College of Pharmacy is dedicated to advancing societal health through leadership in pharmacy education, research, community engagement, and improved patient care.

Apetition from the pharmacists of Oregon led to the establishment of the Department of Pharmacy at Oregon State College in 1898. The department grew steadily and in 1917 became the School of Pharmacy. In 1983 it became the College of Pharmacy.

There are many career options available to individuals having a pharmacy degree. Some graduates are employed in privately owned or chain pharmacies and practice in a community setting, while others practice in hospitals or nursing homes. The pharmaceutical industry offers careers in many areas including sales, marketing, public and government relations, manufacturing, and basic research. Pharmacy graduates are also employed in various local, state and federal health agencies, including the U.S. Public Health Service and the Department of Veterans Affairs. Individuals who decide to acquire advanced professional or graduate training may follow a career in research and academics.

College of Pharmacy graduates are eligible for licensure as pharmacists throughout the United States.

Professional Program Doctor of Pharmacy (PharmD)

Graduate Major Pharmaceutical Sciences (MS, PhD)

Graduate Areas of Concentration

Biopharmaceutics
Medicinal Chemistry
Natural Products Chemistry
Pharmaceutics
Pharmacoeconomics
Pharmacokinetics
Pharmacology
Toxicology

Graduate Minor Pharmaceutical Sciences

FACULTY

Professors Block (Emeritus), Christensen, Ito, Kradjan (Emeritus), Leid, Olyaei, Zabriskie

Associate Professors

Bearden, DeLander, Filtz, Furuno, Haxby, Indra, Ishmael-Leid, Kioussi, Mahmud, McPhail, Munar, P. Proteau, R. Proteau, Singh, Stevens, Williams

Assistant Professors Alani, Cherala, Hartung, Irwin, Lee, McGregor, Morgun, Rackham, S. Ramirez, Sikora, Suchy, Taratula

Senior Instructor Zweber

Instructors Anderson, Boyce, Ketchum, Linares, Samuels, Schnabel, Starwalt

Professional Faculty Austin Haney, Beaumont, Clark, Kinsella, Mettie, Peters, J. Ramirez, Ruder

RESEARCH FACULTY

Professor, Sr. Research Associate Professor, Sr. Research Gross
Assistant Professors, Sr. Research
G. Indra, Reed, Taratula, Yin, Zielke

COURTESY FACULTY AND PRECEPTORS

The College of Pharmacy utilizes practicing pharmacists, physicians, and pharmaceutical scientists as lecturers in the professional pharmacy program and in the college's graduate education program. This group includes over 400 pharmacy preceptors. These individuals make a very important and significant contribution to the educational programs of the college.

PHARMACY INFORMATION

Professional pharmacy education has advanced both in Oregon and throughout the United States in order to meet the expectations of an evolving health care system. To be eligible for admission to the PharmD program, students must complete the PharmD prerequisites, which will require three to four years of college study. Completion of the pharmacy professional program requires an additional four years.

After completion of the four-year professional pharmacy program, the graduate is eligible to take a licensing exam administered by state boards of pharmacy. After passing the licensing exam and completing required internship training, the graduate is licensed to practice as a registered pharmacist. While time requirements may vary from state to state, most graduates become licensed as pharmacists approximately three months after graduation from Oregon State University.

PharmD PREREQUISITES

Required PharmD prerequisites may be taken at Oregon State University or any other accredited college or university. The PharmD prerequisites must be completed prior to beginning the professional program.

Required courses must be taken for a letter grade; however, an exception may be made if a course is only offered pass/no pass. The student should make a specific request for waiver of grade requirement directly to the College of Pharmacy Admissions Committee prior to taking the course.

Students from community colleges, other colleges and universities, may transfer to OSU at any time to complete the PharmD prerequisites.

EARLY ADMISSION PROGRAM

The Early Admission Program is intended to guarantee highly qualified students admitted to Oregon State University the opportunity to enter the College of Pharmacy Doctor of Pharmacy (PharmD)

program after the successful completion of the program prerequisites and the maintenance of certain academic criteria.

GENERAL INFORMATION AND ELIGIBILITY

Acceptance to the program is competitive. The College of Pharmacy's Doctor of Pharmacy Early Admission Program applicants must meet the following **minimum criteria:**

Current high school seniors:

- High school GPA of 3.5
- At least one standardized test score (ACT of 24, SAT of 1650)

Applicants that do not meet the minimum criteria will not be considered. Students are only allowed to apply to the Early Admission Program once. Denied EAP applicants are encouraged to apply to the PharmD program through the standard process.

THE PROFESSIONAL PHARMACY PROGRAM

Enrollment in the four-year professional program is limited. Students must apply for admission to the professional pharmacy program. Application information and forms are available at <http://www.pharmCAS.org/>. Contact the OSU College of Pharmacy for other information or visit the college website at <http://pharmacy.oregonstate.edu/>. Students are admitted to the professional program beginning fall term only.

Once admitted to the professional program, each student is assigned a faculty advisor. Students may register only for those courses for which they have completed the stated prerequisite courses. Exceptions are allowed only after approval by the College of Pharmacy's Academic and Professional Standards Committee. Students will complete the first two years of their course work on the Oregon State University campus. The third professional year will be at the College of Pharmacy Satellite Campus at Oregon Health and Science University in Portland, Oregon. Most students choose to live in the Portland area during the third year. The fourth year will be off-campus at various pharmacy practice sites throughout the state of Oregon and the Northwest, including Hawaii. Contact the college directly for additional information about the PharmD curriculum.

Immunization and vaccination requirements for PharmD students are stricter than for other university students. PharmD students must satisfy all college immunization and vaccination requirements before starting classes and each year in the program. Failure to meet these requirements may delay enrollment.

The four-year professional pharmacy program provides a broad, scientifically based, clinically focused education.

Through appropriate selection of professional elective courses in the fourth year, a student may concentrate in such areas as community, institutional, geriatric, or managed care pharmacy; or prepare for graduate study.

The pharmacy profession is experiencing profound changes. These changes include an increased focus toward patient care, in addition to the study of pharmaceutical products. All students will be required to give immunizations (shots), take medical histories from patients, and perform physical examinations. These experiences will involve asking sensitive questions and physically touching other people. Throughout the curriculum, students are assigned to off-campus practice sites where they are supervised by licensed pharmacists who are affiliate faculty members of the college. Practice sites are located primarily throughout Oregon. Completion of practicum courses at these off-campus practice sites in the fourth professional year generally requires up to 40 hours per week at the practice site. Practicum experience may include nights, evenings, and weekends. Practice sites are varied but include community pharmacies, hospitals, long-term care facilities, and outpatient clinics. PharmD students are required to provide their own transportation to sites.

The College of Pharmacy requires all pharmacy students to complete criminal background checks and recommends that all pharmacy students submit to drug screening. Criminal background checks and drug screenings have become standard requirements for employment in a pharmacy and placement in experiential rotations. Criminal background checks and drug screening may also be required for licensure. Students who cannot participate in experiential rotations due to criminal or other activities of concern that are revealed in criminal background checks or drug screenings may be unable to fulfill the requirements of the professional PharmD program. Therefore, it is in everyone's interest to resolve any issues prior to commitment of resources by the college and by students.

PharmD students must immediately disclose any criminal activity that occurs prior to or while enrolled in the PharmD program. PharmD students must immediately reveal any action taken by a Board of Pharmacy, including but not limited to warning, probation and revocation of licensure. Failure to do so could result in dismissal from the PharmD program.

To become licensed by the state of Oregon to practice pharmacy, an individual must meet at least three criteria:

1. Possess a baccalaureate or PharmD degree in pharmacy from an accredited U.S. college of pharmacy,

2. Pass the North American Pharmacist Licensing Exam (NAPLEX), and
3. Complete the Oregon Board of Pharmacy internship requirements.

ADMISSION STANDARDS

Equal Opportunity and Disability Accommodation

The College of Pharmacy, as a part of Oregon State University, is committed to the principle of equal opportunity. The college does not discriminate on the basis of race, color, creed, religion, national origin, gender, sexual orientation, age, marital status, disability, and disabled veteran or Vietnam-era veteran status. When requested, the college will provide reasonable accommodation to otherwise qualified students with disabilities. Disabled students must work with and be approved by the Disability Access Services office.

Essential Characteristics of Student Pharmacists

The essential characteristics of student pharmacists identified below are drawn from a number of different resources that govern the professional expectations of pharmacists and student pharmacists, including but not limited to the national Pharmacy Code of Ethics, the Oath of a Pharmacist, and the Pledge of Professionalism. Please see Appendices to view these resources. The essential characteristics are intended to ensure that student pharmacists and pharmacists educated at the College of Pharmacy (the "college") have the capacity to meet federal and state regulations and policies that pertain to pharmacy, and to meet or exceed expectations that the public has for professional competence and behavior among pharmacy professionals.

Academic and professional environments present different challenges, but the essential characteristics required to succeed in pharmacy are common to both settings. Students in the college must observe and fulfill the essential characteristics, which have been divided into the following relevant categories: intellectual ability, empathetic and collegial communication skills, psychomotor skills, respect for diversity, high ethical standards, and behavioral and social expectations. Under each category are examples that describe and clarify these essential characteristics.

Intellectual Ability

- Comprehend, interpret and analyze new information
- Reason and carry out evidence-based decision making
- Use critical thinking skills and problem solving to evaluate information from multiple sources and synthesize a plan of action
- Thrive in a rigorous foundational and clinical science-based curriculum

- Participate in self- and programmatic-assessment intended to sustain a continual improvement process
- Be curious and pursue lifelong learning

Empathetic and Collegial Communication Skills

- Formulate concise, accurate synopses of essential information
- Contribute in a meaningful and collaborative manner in group discussions
- Interact constructively with other members of a health care team
- Communicate difficult concepts orally and in writing at an appropriate level for specific patients or audiences
- Listen empathetically and develop rapport
- Appropriately display, and interpret, nonverbal communication signals
- Communicate fluently in English
- Effectively utilize resources to communicate in non-English languages

Psychomotor Skills¹

- Participate effectively in preparation and distribution of sterile and non-sterile drug products
- Utilize and analyze information from varied sensory inputs
- Participate in drug administration, including injections
- Carry out tasks required for objective and subjective assessment of patient health
- Discern critical elements of a problem through observation

Respect for Diversity

- Communicate in a manner that respects all individuals
- Proactively seek ways to provide an inclusive environment that addresses unique patient needs
- Provide care without judgment of a patients' personal choices or situation
- Individualize care with consideration of cultural norms for the patient
- Individualize care with consideration of unique therapeutic needs or challenges

High Ethical Standards

- Maintain confidentiality
- Act with compassion, empathy and altruism
- Accept responsibility and provide leadership
- Abstain from illicit drug use
- Act with integrity and expect the same of professional colleagues

Behavioral and Social Expectations

- Demonstrate a history of appropriate behavior in personal actions
- Perform effectively and display sound judgment while under stress

- Perform appropriately in academic or professional settings
- Address disagreements with tact and avoid public altercations
- Exhibit the capacity to adapt to change readily and adjust responses in dynamic, unpredictable situations
- Accept constructive criticism and adapt behavior

Footnote:

¹ Students may be able to be admitted and progress to graduation while not possessing selected psychomotor skills. In the instance of a documented disability, the college will work to provide reasonable accommodation. The absence of some skills, however, may limit the variety of settings in which a pharmacist can work.

REQUIREMENTS FOR PROGRESSION

Doctor of Pharmacy (PharmD) students must meet university requirements and standards and adhere to the university Student Conduct Regulations (<http://oregonstate.edu/studentconduct/>). The College of Pharmacy faculty has adopted additional requirements to assure that all pharmacy graduates have the best possible educational background and preparation for their pharmacy practice careers. College of Pharmacy standards may vary from the university standards in order to ensure compliance with policies, regulations and expectations specific to the pharmacy profession.

Students are expected to meet specific academic and professional requirements to matriculate in the College of Pharmacy and to progress to each successive year of the professional program. Each student's standing in the College of Pharmacy is reviewed at the end of every term, or at any time in the interim 'for cause'. The review includes core pharmacy term GPA, cumulative GPA, and other characteristics identified as being essential to student pharmacists and pharmacists.

The professional PharmD degree program at Oregon State University is designed to be completed within four years. The program combines didactic courses, structured clinical practice opportunities, and, optimally, significant work experience to educate pharmacists that have both in-depth and up-to-date knowledge to be change agents in their chosen profession. In order to assure this current and in-depth knowledge base for each graduate, the professional program must be completed within a five-year period.

To begin the first

professional year, students:

- Must receive, and respond in a timely manner, to an offer of admission.
- Must complete all pre-pharmacy courses with a grade of C– or better.

- Must hold a current CPR and first aid certification from an approved provider.
- Must successfully complete a background check following guidelines established by the college.
- Must submit to the recommended drug screening or provide written acknowledgement of the potential consequences of declining the drug screening.
- Must attend the first-year professional orientation program, and verify an understanding and acceptance of College of Pharmacy policies and procedures.
- Must obtain an Oregon Pharmacy Intern License.
- Must fulfill the essential characteristics of student pharmacists identified by the college.

To advance into the second professional year, students:

- Must successfully complete all courses that are included in the curriculum of the first professional year, including electives with a cumulative pharmacy GPA of 2.00 and a P (Pass) in all P/N (Pass/No Pass) courses.
- Must have no more than one D grade in pharmacy courses.
- Must maintain a current Oregon Pharmacy Intern License.
- Must have a current CPR certification from an approved provider.
- Must fulfill the essential characteristics of student pharmacists identified by the college.

To advance into the third professional year, students:

- Must successfully complete all courses that are included in the curriculum of the first two professional years, including electives with a cumulative pharmacy GPA of 2.00 and a P (Pass) in all P/N (Pass/No Pass) courses.
- Must have no more than one D grade in pharmacy courses.
- Must have completed two approved elective courses with a grade of C– or better in graded courses, or with a P in Pass/No Pass (P/N) courses.
- Must successfully complete a background check during the summer preceding the third professional year
- Must maintain a current Oregon Pharmacy Intern License.
- Must have a current CPR certification from an approved provider.

- g. Must have earned a bachelor's degree.
- h. Must fulfill the essential characteristics of student pharmacists identified by the college.

To advance into the fourth professional year, students:

- a. Must successfully complete all courses that are included in the curriculum of the first three professional years, including electives with a cumulative GPA of 2.00 and a P (Pass) in all P/N (Pass/No Pass) courses.
- b. Must have no more than one D grade in pharmacy courses.
- c. Must have completed three approved elective courses, one of which must be completed after the second professional year, with a grade of C– or better in graded courses, or with a P in Pass/No Pass (P/N) courses.
- d. Must maintain a current Oregon Pharmacy Intern License. (Licensure in additional states may be required for students completing clerkships outside of Oregon.)
- e. Must have a current CPR certification from an approved provider.
- f. Must be willing to meet site specific requirements for all assigned clerkship rotations.
- g. Must verify an understanding and acceptance of College of Pharmacy policies and procedures as they pertain to advanced experiential learning.
- h. Must fulfill the essential characteristics of student pharmacists identified by the college.

To graduate with the PharmD degree, students:

- a. Must have met all requirements defined for progression through each professional year.
- b. Must successfully complete all required and elective advanced clerkships with a passing grade.
- c. Must fulfill the essential characteristics of student pharmacists identified by the college.

STUDENT STANDING IN THE COLLEGE OF PHARMACY

The Academic and Professional Standards Committee (“APSC”) may, at any time, review a student’s standing in the college. APSC is charged with ensuring that students are aware of academic performance or behavior which is not consistent with essential characteristics of student pharmacists and that, therefore, places their completion of the PharmD program at risk. Academic performance and behavioral concerns are often evaluated independently but have equal signifi-

icance in determining whether a student is meeting the essential characteristics of student pharmacists. Severe, continuing or repeated academic or behavioral problems can result in dismissal from the PharmD program.

APSC, when necessary, provides student standing information to communicate performance deficits, insufficient student progress, and lack of progress in a student addressing academic or behavioral problems. APSC and the college’s director of student services/head advisor provide students guidance regarding what the college expects from a student to increase their opportunities for success in the college. Student performance and progress are evaluated on a case-by-case basis, utilizing the experience of APSC members. APSC uses good faith, informed judgment to determine appropriate recommendations for each student’s situation.

The following student standing notifications may be received by students who are demonstrating performance deficits or insufficient progress in the PharmD program:

Warning

Warning status is cautionary and identifies student performance which may place a student’s completion of the PharmD program at risk.

Students are placed on warning status if they have a term core pharmacy GPA of less than 2.5 or receive 2 or more C grades in core or elective professional courses in a term. Students may also be placed on Warning status if they engage in behavior that does not meet the Essential Characteristics of Student Pharmacists.

- The first time students are placed on Warning status, they must meet with the Director of Student Services/Head Advisor to discuss their situation.
- The second time students are placed on Warning status, they must meet with the Director of Student Services/Head Advisor and develop a holistic action plan for overcoming academic and non-academic barriers to success. They must subsequently execute this action plan.
- The third time students are placed on Warning status, they are automatically placed on Probation.

Probation

Probation status identifies an academic or behavioral concern that places the student’s completion of the PharmD program at serious risk. Probation may be accompanied by a delay in progression at the determination of the APSC.

Students are placed on Probation status if they have a term core pharmacy GPA of less than a 2.0 or if they receive a C– or lower grade in any core or elective professional course. A third warning

automatically results in Probation.

Student behavior that is a significant departure from the Essential Characteristics of Student Pharmacists will also result in Probation status. Such behavior includes, but is not limited to, violations of Academic Integrity policies, criminal violations, repeated or intentional violation of college policies, or significant breaches of the University Student Conduct Code (see <http://oregonstate.edu/studentconduct/home/>).

Students on Probation status must follow recommendations of the APSC and the Director of Student Services/Head Advisor. Students on Probation status must meet with the Director of Student Services/Head Advisor following each term to review their progress and standing in the college. Students that successfully fulfill the recommendations prescribed will be removed from Probation status.

Students that fail to follow or are unsuccessful in fulfilling the recommendations will be suspended and evaluated for dismissal from the college. Students who are placed on Probation status for a second time will also be evaluated for dismissal from the college.

Suspension

Students that have failed to make adequate progress, or who have displayed severe or repeated departures from the Essential Characteristics of Student Pharmacists, may be placed on Suspension status. The college will place an indefinite hold on the progression of a student placed on Suspension status until APSC can adequately evaluate whether the student will be allowed to continue in the PharmD program. Students engaged in an appeal of their dismissal from the college will also be placed on Suspension status.

Students placed on Suspension status will not be allowed to progress in the PharmD program. APSC will review the status of a student on Suspension no later than the beginning of the next academic term. After review, APSC may recommend immediate Dismissal from the college, recommend that the student be continued on Suspension status pending receipt of additional information, or prescribe a plan to address specific concerns that resulted in the student’s Suspension status. If a plan for progression is developed by APSC, the student will be changed to Probation status. If at any time it becomes evident that the student will not be able to address concerns and graduate within the required five year window, the student will be dismissed immediately.

Dismissal

Students will be dismissed from the professional program if they are not making adequate academic progress, or if they fail to constructively address professional or behavioral concerns.

PROFESSIONAL ASSOCIATIONS

Students are encouraged to join various professional organizations. At OSU they may choose the following:

NCPA—National Community Pharmacists Association—Open to all students in pharmacy; affiliated with the national parent organization.

Academy of Students of Pharmacy—Open to all students in pharmacy; includes affiliation with the American Pharmaceutical Association and the Oregon State Pharmacists Association.

American Society of Health-System Pharmacists—Open to all students in pharmacy; includes membership in the Oregon Society of Health-System Pharmacists.

Rho Chi—Membership in Beta chapter of Rho Chi, national pharmaceutical honor society, is selective and based on high scholastic achievement.

Phi Delta Chi—Membership in the Beta Iota chapter of this 100-year-old national pharmacy fraternity is limited. Individuals must meet the pledge requirements.

Phi Lamda Sigma—Membership in the Beta Zeta chapter of the national fraternity is limited to qualified individuals who meet requirements for professional development and leadership.

AACP—American Association of Colleges of Pharmacy.

OSSP—Oregon State Student Pharmacists is an umbrella professional development organization for pharmacy students that includes membership in several national and state professional organizations.

SCHOLARSHIPS AND LOANS

Information about scholarships and loans is available from the College of Pharmacy website and the Office of Financial Aid and Scholarships, 541-737-2241.

WICHE PROGRAM

The College of Pharmacy accepts students supported through the Western Interstate Commission for Higher Education (WICHE) Professional Student Exchange Program. This interstate program provides the opportunity for students from the 12 cooperating states to obtain professional training not available in their home states. Residents from the states of Alaska and Nevada are eligible to apply for support in pharmacy.

To apply, the applicant must become “certified” by his or her home state. Applicants must apply to their home offices before October 15 prior to the academic year in which they plan to enroll. State certifying office contact information is available at <http://wiche.edu/psep/cert-off>.

PHARMACEUTICAL SCIENCES (MS, PhD)**Graduate Areas of Concentration**

Biopharmaceutics, medicinal chemistry, natural products chemistry, pharmaceutics, pharmacoeconomics, pharmacokinetics, pharmacology, toxicology

The emphasis of most graduate programs is on foundational research investigating drug discovery, chemistry, mechanisms of drug action, molecular biology, genomics, drug metabolism, and dosage form design.

Faculty in the department are involved in identification of new drugs from the ocean and other biological sources, biochemical toxicology, and drug metabolism studies; the design and development of new drug delivery and dosage forms; and studies on the clinical efficacy and distribution of drugs through the body as a function of dosing regimen or dosage form. They are using biochemical and molecular biological techniques to investigate signal transduction pathways mediated by phospholipids and retinoids; electrophysiological approaches to studying ion channel function; and the molecular biology of nuclear receptors and factors regulating gene expression.

PHARMACY, DOCTOR OF PHARMACY (4-YEAR) (DPhar)**First Professional Year —****Corvallis campus**

BB 490, BB 491, BB 492. Biochemistry (3,3,3)
 PHAR 707. Pharmacy Practice Symposium I: Professional Development (2)
 PHAR 708. Pharmacy Practice Symposium II: Interprofessional Communication (2)
 PHAR 709. Pharmacy Practice Symposium III: Pharmacy Law and Ethics (2)
 PHAR 710. Community Pharmacy Orientation Clerkship (6 credits, 4 weeks)
 PHAR 720, PHAR 721, PHAR 722. Pharmacy Practice I, II, III (3,3,3)
 PHAR 729. Principles of Evidence-Based Medicine I: Information Science (3)
 PHAR 733. Pharmaceutics I (3)
 PHAR 734. Pharmaceutics II (3)
 PHAR 735. Foundations of Drug Actions (4)
 PHAR 736. Foundations II: Autonomic Drug Actions (3)
 PHAR 737. Foundations of Drug Action III (3)
 PHAR 738. Health Care Systems I (2)
 PHAR 739. Health Care Systems II (2)
 Z 441, Z 442, Z 443. Advanced Human Anatomy and Physiology Laboratory (2,2,2)
 Electives (2–4)

Second Professional Year —**Corvallis campus**

PHAR 711. Institutional Orientation Clerkship (6 credits, 4 weeks)
 PHAR 726. Principles of Evidence-Based Medicine II: Drug Literature Evaluation (3)
 PHAR 740, PHAR 741, PHAR 742. Pharmacy Practice IV, V, VI (3,3,3)
 PHAR 743. Clinical Applications I: Interprofessional Communications (1)

PHAR 744. Clinical Applications II: Ethical Decision Making (1)

PHAR 745. Clinical Applications III: Transitions of Care (1)

PHAR 746. Pharmacy Management (3)

PHAR 750. Pharmacokinetics (3)

PHAR 751. Biopharmaceutics (3)

PHAR 752, PHAR 753, PHAR 754.

Pharmacology and Medicinal Chemistry I, II, III (6,7,8)

Electives (2–4)

Third Professional Year — Portland campus at OHSU

PHAR 760. Transitional Clerkship (2)
 Repeatable for 6 credits.

PHAR 761. Pathophysiology and Therapeutics I, II, III (7,7,7)

PHAR 764, PHAR 765, PHAR 766. Pharmacy Practice VII, VIII, IX (3,3,3)

PHAR 770. Advanced Pharmacokinetics (4)

PHAR 773. EBM III: Evidence Synthesis and Decision Analysis (3)

PHAR 774. Principles of Evidence-Based Medicine IV: Drug Policy (4)

Electives (2–4)

Fourth Professional Year — Off-campus Practicum

PHAR 780. Community Pharmacy Clerkship (8)

PHAR 785. Ambulatory Primary Care Clerkship (8 credits, 6 weeks)

PHAR 790. General Internal Medicine (8 credits, 6 weeks)

PHAR 792. Hospital/Health Systems Patient Care Clerkship (8)

PHAR 795. Patient Care Elective Clerkship (8 credits, 6 weeks)

PHAR 797. Elective Clerkship (8 credits, 6 weeks)

A total of seven clerkships are required. Required clerkships include PHAR 780, PHAR 785, PHAR 790, PHAR 792, and at least two selected from the list of PHAR 795 clerkships.

PHARMACEUTICAL SCIENCES GRADUATE MINOR

For more details, see the departmental advisor.

COURSES**PHAR 201. PHARMACY ORIENTATION (1).**

Career opportunities in pharmacy including community and institutional practice, government, and industry. Discussion of available educational pathways. Open to non-pharmacy students. Graded P/N.

PHAR 210. TERMINOLOGY OF THE HEALTH SCIENCES (2). Provides the student in any of the health science disciplines or pre-professional studies with a working knowledge of the terminology used in the health sciences. Open to non-pharmacy students.

PHAR 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PHAR 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PHAR 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PHAR 407. SEMINAR (1-16). One-credit section. Graded P/N. This course is repeatable for a maximum of 16 credits.

PHAR 432. ^WRITING IN THE PHARMACEUTICAL SCIENCES (2). A writing intensive course emphasizing writing used in pharmacy. **PREREQS:** Completion of WR II. **COREQS:** PHAR 321

PHAR 501. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PHAR 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

PHAR 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PHAR 507. SEMINAR (1-16). One-credit section. Graded P/N. This course is repeatable for a maximum of 16 credits.

PHAR 536. PRODUCT DEVELOPMENT (3). Current and novel dosage forms; product stability; therapeutic design.

PHAR 537. BIOORGANIC CHEMISTRY (3). A contemporary treatment of the chemistry, enzymology and molecular genetics techniques used in studying major natural products biosynthesis pathways in nature. Offered alternate years. **PREREQS:** CH 530 and CH 531 and CH 535. BB 590, BB 591, BB 592 are recommended.

PHAR 540. MEDICINAL NATURAL PRODUCTS CHEMISTRY (3). An overview of natural products research. Focuses on the isolation and characterization of medicinally-relevant natural products. **PREREQS:** BB 452 and CH 337. Graduate or senior standing.

PHAR 563. CANCER AND CHEMOPREVENTION (2). A summary of mechanisms of cancer progression, how cancer is detected, and introduction to chemoprevention using targeted therapy and alternative medicine. **PREREQS:** (BB 451 or BB 551) and BI 314 and (BI 460 or BI 560) or equivalent courses or second year standing in the PharmD program.

PHAR 564. RECEPTORS AND SIGNAL TRANSDUCTION: ADVANCED TOPICS (3). Advanced concepts and recent developments in receptor pharmacology. Topics include receptor theory and regulation and signal transduction pathways and functions. Offered alternate years. **CROSSLISTED** as MCB 564. **PREREQS:** Instructor's approval required. Suggested prerequisite MCB 556 or PHAR 591.

PHAR 565. MAMMALIAN MOLECULAR GENETICS (3). Covers general principles of the molecular genetics and functional genomics of mammalian organ system development. Advanced methodologies and emerging biotechnologies and their social, economic, political and cultural impacts will be discussed. **CROSSLISTED** as MCB 565. **PREREQS:** BB 450 and BB 490 and MCB 556

PHAR 571. EXPERIMENTAL APPROACH TO BIOPHARMACEUTICS (3). Experimental protocol, rationale, and procedures in clinical pharmacokinetic, pharmacokinetic, and biopharmaceutical experiments. **PREREQS:** PHAR 750

PHAR 572. APPLIED BIOPHARMACEUTICS AND PHARMACOKINETICS (3). Pharmacokinetics and bioavailability of drugs in clinical care, including changing disease states. **PREREQS:** Graduate standing.

PHAR 573. CURRENT TOPICS IN PHARMACEUTICAL SCIENCES (1-3). Critical evaluation of contemporary pharmaceuticals and pharmacokinetics research articles. This course is repeatable for a maximum of 9 credits.

PHAR 575. ADVANCED XENOBIOTIC METABOLISM (3). Familiarizes students with basic principles of drug/xenobiotic metabolism. Concepts addressed include how foreign chemicals or xenobiotics are absorbed, distributed and metabolized; induction and inhibition of metabolism; effect of age, species, hormones, and disease on metabolism; genetic polymorphisms: effect of diet and environment; experimental techniques in xenobiotic metabolism; and regulatory issues (FDA and EPA). **PREREQS:** Graduate or professional pharmacy student standing.

PHAR 580. PHARMACODYNAMIC AND PHARMACOKINETIC MODELING (3). Evaluation of strengths and weaknesses of mathematical models relative to pharmacodynamic and pharmacokinetic data. **PREREQS:** PHAR 750

PHAR 591. PHARMACOLOGY I (5). Principles of pharmacology; molecular, cellular, and physiologic mechanisms of drug action; pharmacological rationale for therapeutic and toxicologic treatment outcomes. **PREREQS:** Graduate standing and instructor permission.

PHAR 592. PHARMACOLOGY II (5). Principles of pharmacology; molecular, cellular, and physiologic mechanisms of drug action; pharmacologic rationale for therapeutic and toxicologic treatment outcomes. **PREREQS:** Graduate standing and instructor permission.

PHAR 593. PHARMACOLOGY III (5). Principles of pharmacology; molecular, cellular, and physiologic mechanisms of drug action; pharmacologic rationale for therapeutic and toxicologic treatment outcomes. **PREREQS:** Graduate standing and instructor permission.

PHAR 601. RESEARCH (1-16). This course is repeatable for a maximum of 99 credits. **PREREQS:** Departmental approval required.

PHAR 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

PHAR 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PHAR 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

PHAR 662. HORMONE ACTION (3). Mechanisms of action of peptide and steroid hormones and related compounds at the cellular level. **CROSSLISTED** as ANS 662, BB 662, MCB 662. **PREREQS:** BB 451 or BB 551 or BB 492 or BB 592

PHAR 701. RESEARCH AND SCHOLARSHIP (1-8). Research conducted by professional pharmacy students under faculty supervision. This course is repeatable for a maximum of 12 credits.

PHAR 703. THESIS (1-8). Independent study and analysis that culminates in a thesis. This course is repeatable for a maximum of 999 credits.

PHAR 705. READING AND CONFERENCE (1-8). This course is repeatable for a maximum of 12 credits.

PHAR 707. PROFESSIONAL PRACTICE SYMPOSIUM I: PROFESSIONAL DEVELOPMENT (2). Orientation for future pharmacists with an emphasis on professionalism and legal aspects of pharmacy, in addition to ethical decision-making. Preparation for the experiential component of the program will also take place within the course. Graded P/N. **PREREQS:** First-year standing in the PharmD program.

PHAR 708. PROFESSIONAL PRACTICE SYMPOSIUM II: INTERPROFESSIONAL COMM (2). Orientation for future pharmacists with an emphasis on professionalism and legal aspects of pharmacy, in addition to ethical decision-making.

Preparation for the experiential component of the program will also take place within the course. Graded P/N. **PREREQS:** PHAR 707. **COREQS:** PHAR 721.

PHAR 709. PHARMACY PRACTICE SYMPOSIUM III: PHARMACY LAW AND ETHICS (2). Provides an orientation to the future pharmacist with an emphasis on professionalism and legal aspects of pharmacy, in addition to ethical decision-making. Preparation for the experiential component of the program will also take place within the course. Graded P/N. **PREREQS:** PHAR 708. **COREQS:** PHAR 722.

PHAR 710. COMMUNITY PHARMACY ORIENTATION CLERKSHIP (6). Supervised education in community pharmacy practice environments, emphasizing the application of basic pharmaceutical care skills. Graded P/N. This course is repeatable for a maximum of 99 credits. **PREREQS:** Second year PharmD standing, Oregon pharmacy intern license, current first aid and CPR certification, College of Pharmacy immunization documentation.

PHAR 711. INSTITUTIONAL ORIENTATION CLERKSHIP (6). Supervised professional education in institutional pharmacy practice environments, emphasizing the application of basic pharmaceutical care skills. Graded P/N. **PREREQS:** Second year PharmD standing, Oregon pharmacy intern license, current first aid and CPR certification, College of Pharmacy immunization documentation.

PHAR 713. SPANISH FOR PHARMACY PROFESSIONALS (2). For the pharmacy professional with little or no Spanish language background (those with some Spanish language skills would find it beneficial). The course is presented in a video format with in-class facilitator for discussion. Provides basic Spanish grammar instruction but the focus will be on vocabulary and communication in a community pharmacy environment. **PREREQS:** **COREQS:** PHAR 723.

PHAR 714. EVIDENCE-BASED EVALUATION OF NUTRITION SUPPLEMENTS (2). Investigation of the biochemical basis and examination of the evidence behind therapeutic claims of nutritional supplements. **PREREQS:** BB 491 and PHAR 722 and PHAR 729 and PHAR 736. **COREQS:** BB 492 and PHAR 723 and PHAR 737

PHAR 715. PRESCRIPTION DRUG ABUSE (2). Examines the issue of prescription drug abuse among the general population. Graded P/N. **PREREQS:** Current standing in PharmD program.

PHAR 716. HEALTHCARE CHALLENGES FOR PERSONS WITH DISABILITIES (1). Students develop an understanding of healthcare challenges faced by persons with physical and mental disabilities. Graded P/N. This course is repeatable for a maximum of 2 credits.

PHAR 717. SENIOR CARE PHARMACY (2). Provides an overview of senior care pharmacy practice including an introduction to the senior patient, the senior care healthcare environment, medication-related problems in the elderly, the role of the pharmacist as a member of the interdisciplinary senior healthcare team, and employment opportunities in senior care pharmacy. Graded P/N. **PREREQS:** First-year professional standing in the College of Pharmacy and PHAR 723 and PHAR 735 and PHAR 739

PHAR 718. NATURAL PRODUCT DRUG DEVELOPMENT (2). Overview of the process of drug development, with an emphasis on natural product sources of lead components. Top-selling and mainstay drugs will be researched in literature assignments and discussed to illustrate historical and current drug development paradigms. In addition, future approaches to drug discovery and paradigm shifts to incorporate concepts such as network pharmacology will be explored. **PREREQS:** Second-year standing in the PharmD program.

PHAR 719. POISONS AND TOXINS (2). Covers many different types of substances, including common household poisons, poisonous plants and mushrooms, toxic gases/metals, shellfish toxins, and other natural toxins. Aspects of the chemistry and pharmacology of the poisons, antidotes/treatments, and occasional case studies will be covered. Historical examples and current events will also be incorporated into the course materials. **PREREQS:** PHAR 735

PHAR 720. PHARMACY PRACTICE I (3). Basic dispensing procedures, patient communications, nonprescription drugs, clinical data collection, care plans, drug information and education. Dispensing practices; patient counseling principles; nonprescription drugs. **PREREQS:** PHAR 723 should be taken concurrently.

PHAR 721. PHARMACY PRACTICE II (3). Interviewing skills; patient drug, education; nonprescription drugs. **PREREQS:** PHAR 720. **COREQS:** PHAR 724 and PHAR 730.

PHAR 722. PHARMACY PRACTICE III (3). Pharmacy Practice III continues the progression of topics introduced in Pharmacy Practice I and II. Patient interview and assessment techniques, communication skills, nonprescription products, and compounding techniques are emphasized in the lab. Lec/lab. **PREREQS:** PHAR 720 and PHAR 721 and PHAR 735 and BB 490 and BB 491. **COREQS:** PHAR 725 and BB 492

PHAR 726. PRINCIPLES OF EVIDENCE-BASED MEDICINE II: DRUG LIT EVAL (3). Students will learn to critique and evaluate health-related scientific journal articles using valid established techniques. **PREREQS:** Second-year standing in the PharmD program.

PHAR 728. PHARMACY LAW (3). Federal and state laws regulating pharmacy practice. **PREREQS:** PHAR 727

PHAR 729. PRINCIPLES OF EVIDENCE-BASED MEDICINE I: INFORMATION SCIENCE (3). Students will learn to identify appropriate information resources and will systematically collect, arrange, and analyze pertinent information related to a particular patient or drug product problem. **PREREQS:** First-year standing in the PharmD program.

PHAR 733. PHARMACEUTICS I (3). Students develop an in-depth understanding of drug dosage formulation concepts to optimize drug therapy. **PREREQS:** BB 490 and PHAR 735 and first-year standing in PharmD program.

PHAR 734. PHARMACEUTICS II (3). Preformulation and formulation factors affecting the development, production and use of pharmaceutical dosage forms, including ingredients in, and physical, chemical, and biological properties affecting storage, stability, and handling of dosage forms. Lec/lab. **PREREQS:** PHAR 733 and PHAR 735 and BB 491 and first-year standing in the professional PharmD program.

PHAR 735. FOUNDATIONS OF DRUG ACTIONS (4). Introductory course into actions of chemicals on physiological systems. Concepts encompass drug absorption and distribution, drug design and characterization of drug interactions with specialized cellular components, drug activation of biological response via biochemical or molecular transduction mechanisms, drug-induced toxicities and drug biotransformation or excretion. Approved for use on a graduate program of study. **PREREQS:** BB 490 and PHAR 729 and Z 430. **COREQS:** Z 442 and BB 491 or Z 431.

PHAR 736. FOUNDATIONS II: AUTONOMIC DRUG ACTIONS (3). Drug actions in the autonomic nervous system (ANS) provide a template for understanding drug actions throughout biological systems. Provides a complete consideration of pharmacologic and medicinal chemistry principles as they relate to drug interactions with the ANS. Treatment options for selected diseases that respond to drugs acting

on the ANS are also addressed. **PREREQS:** PHAR 729 and PHAR 735. **COREQS:** BB 491.

PHAR 737. FOUNDATIONS OF DRUG ACTION III (3). Vitamins and their role in biochemical processes, the specifics of immunologic responses, and the application of genetics to drug discovery are areas of expertise increasingly required for characterization of disease processes and recognition of novel treatment strategies. Foundations III builds upon the general background of students in these three areas to provide a common baseline of knowledge and allow for integration of concepts required to understand drug discovery and drug action. **PREREQS:** PHAR 729 and PHAR 736. **COREQS:** PHAR BB 492

PHAR 738. HEALTHCARE SYSTEMS I (2). Examination of the U.S. healthcare industry and the public healthcare system, as they relate to pharmacy. Emphasis is given to changing relationships between healthcare systems, patients, providers of care, hospitals, insurers, employers and the government. **PREREQS:** Must also take PHAR 728 concurrently.

PHAR 739. HEALTHCARE SYSTEMS II (2). Examination of the U.S. healthcare industry and the public healthcare system, as they relate to pharmacy. Emphasis is given to changing relationships between healthcare systems, patients, providers of care, hospitals, insurers, employers and the government. **PREREQS:** PHAR 728 and PHAR 738

PHAR 740. PHARMACY PRACTICE IV (3). Basic physical assessment skills and identification of therapeutic endpoints and monitoring parameters for drugs presented in the medicinal chemistry/pharmacology sequence. Students will gain experience in basic physical assessment skills, interviewing skills, history taking, organizing pharmacy notes, and documenting information. Lec/lab. **PREREQS:** PHAR 722 and PHAR 725 and PHAR 729 and PHAR 734 and PHAR 735. **COREQS:** PHAR 743 and PHAR 752

PHAR 741. PHARMACY PRACTICE V (3). Basic physical assessment skills and identification of therapeutic endpoints and monitoring parameters for drugs presented in the medicinal chemistry/pharmacology sequence. Students will gain experience in basic physical assessment skills, interviewing skills, history taking, organizing pharmacy notes, and documenting information. Lec/lab. **PREREQS:** PHAR 740. **COREQS:** PHAR 744 and PHAR 753

PHAR 742. PHARMACY PRACTICE VI (3). Basic physical assessment skills and identification of therapeutic endpoints and monitoring parameters for drugs presented in the medicinal chemistry/pharmacology sequence. Students will gain experience in basic physical assessment skills, interviewing skills, history taking, organizing pharmacy notes, and documenting information. Lec/lab. **PREREQS:** PHAR 741. **COREQS:** PHAR 745 and PHAR 754

PHAR 743. CLINICAL APPLICATIONS I: INTERPROFESSIONAL COMMUNICATIONS (1). Students are assigned to institutional or ambulatory care pharmacy settings, and experiences emphasize topics and communication methods covered in the corresponding pharmacy practice course. Graded P/N. **PREREQS:** Oregon pharmacy intern license required. **COREQS:** PHAR 740

PHAR 744. CLINICAL APPLICATIONS II: ETHICAL DECISION MAKING (1). Students are assigned to institutional or ambulatory care pharmacy settings, and experiences emphasize topics and communication methods covered in the corresponding pharmacy practice course. Graded P/N. **PREREQS:** Oregon pharmacy intern license required. **COREQS:** PHAR 741

PHAR 745. CLINICAL APPLICATIONS III: TRANSITIONS OF CARE (1). Students are assigned to institutional or ambulatory care

pharmacy settings, and experiences emphasize topics and communication methods covered in the corresponding pharmacy practice course. Graded P/N. **PREREQS:** Oregon pharmacy intern license required. **COREQS:** PHAR 742

PHAR 746. PHARMACY MANAGEMENT (3). Concepts, principles and fundamentals of pharmacy financial and personnel management. Approved for use on a graduate program of study.

PHAR 750. PHARMACOKINETICS (3). Pharmacokinetics and bioavailability of drugs in clinical care, including changing disease states. Approved for use on a graduate program of study. **PREREQS:** PHAR 734. **COREQS:** PHAR 752

PHAR 751. BIOPHARMACEUTICS (3). Preformulation and formulation factors affecting physiological outcomes in terms of bioavailability and drug product selection. Approved for use on a graduate program of study. **PREREQS:** PHAR 734. **COREQS:** PHAR 753

PHAR 752. PHARMACOLOGY AND MEDICINAL CHEMISTRY I (6). Molecular, cellular and physiologic basis of drug action. Influence of chemical and physical properties in structure-activity relationships. Drug design as it relates to drug metabolism and drug action. Pharmacologic rationale for therapeutic and toxicologic treatment outcomes. Approved for use on a graduate program of study. **PREREQS:** Second-year standing in the PharmD program. Z 441 and Z 442 and Z 443 and PHAR 734 and PHAR 735

PHAR 753. PHARMACOLOGY AND MEDICINAL CHEMISTRY II (7). Molecular, cellular and physiologic basis of drug action. Influence of chemical and physical properties in structure-activity relationships. Drug design as it relates to drug metabolism and drug action. Pharmacologic rationale for therapeutic and toxicologic treatment outcomes. Approved for use on a graduate program of study. **PREREQS:** PHAR 752 and second-year standing in the PharmD program. **COREQS:** PHAR 741, PHAR 751

PHAR 754. PHARMACOLOGY AND MEDICINAL CHEMISTRY III (8). Molecular, cellular and physiologic basis of drug action. Influence of chemical and physical properties in structure-activity relationships. Drug design as it relates to drug metabolism and drug action. Pharmacologic rationale for therapeutic and toxicologic treatment outcomes. Approved for use on a graduate program of study. **PREREQS:** Second-year standing in the PharmD program. PHAR 751 and PHAR 753. **COREQS:** PHAR 742

PHAR 759. INTRODUCTION TO PATHOPHYSIOLOGY AND THERAPEUTICS (3). Introduction to the pathophysiological basis of disease and drug therapy management. **PREREQS:** Second year standing in the PharmD program. **COREQS:** PHAR 754.

PHAR 760. TRANSITIONAL CLERKSHIP (2). Supervised introductory professional education in a variety of health care settings. Emphasis will be on gaining familiarity with the provision of clinical pharmacy services and the patients, health care providers, and administrative procedures of the clinical site. Graded P/N. This course is repeatable for a maximum of 6 credits. **PREREQS:** Oregon pharmacy intern license required. **COREQS:** PHAR 764 and PHAR 765 and PHAR 766

PHAR 761. PATHOPHYSIOLOGY AND THERAPEUTICS I (8). Pathophysiological basis of disease and drug therapy management. **PREREQS:** Third-year standing in the PharmD program. **COREQS:** PHAR 764 and PHAR 770

PHAR 762. PATHOPHYSIOLOGY AND THERAPEUTICS II (7). Pathophysiological basis of disease and drug therapy management. **PREREQS:** PHAR 761. **COREQS:** PHAR 765 and PHAR 771

PHAR 763. PATHOPHYSIOLOGY AND THERAPEUTICS III (7). Pathophysiological basis of disease and drug therapy management.

PREREQS: PHAR 762. **COREQS:** PHAR 766 and PHAR 774

PHAR 764. PHARMACY PRACTICE VII (3). Development of skills for advanced drug therapy problem identification, assessment, and plan resolution for patients with diseases discussed in PHAR 761, PHAR 762, PHAR 763. Students will integrate interviewing, physical assessment, and problem-solving to identify, assess, and resolve drug therapy problems, and communicate findings in SOAP notes, care plans, and case presentations. **PREREQS:** PHAR 740 and PHAR 741 and PHAR 742 and third-year standing in the PharmD program. **COREQS:** PHAR 760 and PHAR 761 and PHAR 770

PHAR 765. PHARMACY PRACTICE VIII (3). Development of skills for advanced drug therapy problem identification, assessment, and plan resolution for patients with diseases discussed in PHAR 761, PHAR 762, PHAR 763. Students will integrate interviewing, physical assessment, and problem-solving to identify, assess, and resolve drug therapy problems, and communicate findings in SOAP notes, care plans, and case presentations. **PREREQS:** PHAR 761 and PHAR 764. **COREQS:** PHAR 760 and PHAR 762 and PHAR 771

PHAR 766. PHARMACY PRACTICE IX (3). Development of skills for advanced drug therapy problem identification, assessment, and plan resolution for patients with diseases discussed in PHAR 761, PHAR 762, PHAR 763. Students will integrate interviewing, physical assessment, and problem-solving to identify, assess, and resolve drug therapy problems, and communicate findings in SOAP notes, care plans, and case presentations. Lec/lab/rec. **PREREQS:** PHAR 762 and PHAR 765. **COREQS:** PHAR 760 and PHAR 772

PHAR 770. ADVANCED PHARMACOKINETICS (4). A physiologic approach to understanding advanced pharmacokinetic principles. Approved for use on a graduate program of study. **PREREQS:** PHAR 750 and PHAR 751 and third-year standing in the PharmD program

PHAR 773. EBM III: EVIDENCE SYNTHESIS AND DECISION ANALYSIS (3). Covers the principles required for evidence-based medicine, including interpreting and applying results from clinical, humanistic, and economic research to medical decision-making. Approved for use on a graduate program of study. **PREREQS:** PHAR 726 and PHAR 729 and third-year standing in the PharmD curriculum.

PHAR 774. PRINCIPLES OF EVIDENCE-BASED MEDICINE IV: DRUG POLICY (4). Covers a variety of issues related to drug policy and drug use management. Population-based strategies to improve drug use will be emphasized along with developing an evidence-based process for evaluating drug therapy. Two major course projects will focus on application of principles taught in this and previous courses. Approved for use on a graduate program of study. **PREREQS:** PHAR 773

PHAR 775. PROFESSIONAL TRANSITIONS (1). Professional pharmacy students are directed in preparations for transition to postgraduate educational opportunities or entry-level pharmacist positions. Graded P/N. **PREREQS:** Fourth-year standing in the PharmD program.

PHAR 776. PHARMA-CSI (2). Application of PK, PD, and P'genomic concepts, principles, and equations in computer workshops to solve drug therapy misadventures. Approved for use on a graduate program of study. **PREREQS:** PHAR 770; third-year standing in the PharmD program or permission of instructor.

PHAR 777. ACUTE MEDICAL EMERGENCIES (2). Drug therapy management in the critically ill patient. Graded P/N. **PREREQS:** PHAR 762

PHAR 778. ADVANCED ADULT MEDICINE (2). Adult medicine elective utilizes actual patient cases to enhance knowledge of pharmacy and the pharmacologic basis of therapeutics in the setting of adult medicine, emphasizing application or current guidelines and major clinical trials for commonly encountered disease states. Graded P/N. **PREREQS:** Third-year standing in PharmD program and PHAR 761 and PHAR 762 and PHAR 764 and PHAR 765.

PHAR 780. COMMUNITY PHARMACY CLERKSHIP (8). Supervised advanced professional education in ambulatory care pharmacy practice environment. Emphasis is placed on the application of direct and indirect pharmaceutical patient care and direct interactions with other health care professionals. Students will evaluate, assess and monitor pharmacotherapy of acute and chronic diseases in addition to providing drug information. Graded P/N. This course is repeatable for a maximum of 32 credits. **PREREQS:** PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774 and Oregon pharmacy intern license and current CPR certification and College of Pharmacy immunization documentation.

PHAR 785. AMBULATORY PRIMARY CARE CLERKSHIP (8). Supervised advanced professional education in ambulatory care pharmacy practice environment. Emphasis is placed on the application of direct and indirect pharmaceutical patient care and direct interactions with other health care professionals. Students will evaluate, assess and monitor pharmacotherapy of acute and chronic diseases in addition to providing drug information to patients and health care professionals. Graded P/N. This course is repeatable for a maximum of 32 credits. **PREREQS:** PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774 and Oregon pharmacy intern license and current CPR certification and College of Pharmacy immunization documentation.

PHAR 790. GENERAL INTERNAL MEDICINE CLERKSHIP (8). Supervised advanced professional education located in internal medicine inpatient pharmacy practice environment. Emphasis is placed on the application of biomedical and pharmaceutical sciences to direct and indirect pharmaceutical patient care and direct interactions with other health care professionals. Students will evaluate, assess, and monitor pharmacotherapy involved in a wide variety of acute and chronic diseases. In addition, students will provide drug information to other health care professionals and patients. Graded P/N. This course is repeatable for a maximum of 32 credits. **PREREQS:** PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774 and Oregon pharmacy intern license and current CPR certification and College of Pharmacy immunization documentation.

PHAR 792. HOSPITAL/HEALTH SYSTEMS PATIENT CARE CLERKSHIP (8). Supervised advanced professional education located in various hospital or health care systems patient care-oriented settings. Emphasis is placed on application of pharmaceutical sciences and pharmacotherapy to patient care. Graded P/N. This course is repeatable for a maximum of 24 credits. **PREREQS:** (PHAR 760* and PHAR 763* and PHAR 766* and PHAR 774*) and Oregon Pharmacy Intern License and current CPR certification and fourth year standing in the pharmacy professional program and College of Pharmacy immunization documentation.

PHAR 795. PATIENT CARE ELECTIVE CLERKSHIP (8). Supervised advanced professional education located in various patient care-oriented settings. Emphasis is placed on the application of pharmaceutical sciences and pharmacotherapy to direct and indirect pharmaceutical care. Specialties include but are not limited to geriatrics, pediatrics, infectious disease, oncology, general patient care, nutrition support, nuclear pharmacy, home infusion, critical care, anticoagulation, pain management, etc. Graded P/N. This course is repeatable for a maximum of 24 credits. **PREREQS:** PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774 and Oregon pharmacy intern license and current CPR certification and College of Pharmacy immunization documentation.

PHAR 797. ELECTIVE CLERKSHIP (8). Supervised advanced professional education located in various pharmacy-oriented settings. Emphasis is placed on the application of pharmaceutical sciences and pharmacotherapy to a variety of environments involving pharmacy. Specialties include but are not limited to managed care, drug information, administration, pharmaceutical research, pharmaceutical industry, professional pharmacy organizations, etc. Graded P/N. This course is repeatable for a maximum of 24 credits. **PREREQS:** PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774 and Oregon pharmacy intern license and current CPR certification and College of Pharmacy immunization documentation.

PHAR 798. PHARMACY HEALTH ADMINISTRATION (8). Provides students the opportunity to integrate and apply leadership and business principles necessary to operate and manage a pharmacy business or department in a diverse organizational environment. This course is repeatable for a maximum of 16 credits. **PREREQS:** PHAR 760 and PHAR 763 and PHAR 766 and PHAR 772 and PHAR 774 and Oregon Pharmacy Intern License, current CPR certification, College of Pharmacy immunization documentation, reading and understanding the Advanced Experiential Manual.

PHAR 799. SELECTED TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

Lifelong health and well-being for every person, every family, every community.

Inspired by our mission as a leading land grant university, we create synergy in teaching, research, and outreach to develop the next generation of globally minded public health and human sciences professionals. Through interdisciplinary research and innovative curricula, we advance knowledge, policies, and practices that improve population health in communities across Oregon and beyond.

The College of Public Health and Human Sciences offers a comprehensive array of undergraduate and graduate education programs under the public health umbrella.

Our graduates are employed in a wide variety of research, education, service, management, and leadership positions in business, government, industry, education, and agencies related to health, nutrition, education, community development, and family relationships.

The college's scholarly and creative work improves the lives of individuals, families, and communities. Reflecting the strength and diversity of our faculty and disciplines, this work includes laboratory-based investigations of nutrition and physiology.

Our outreach and engagement initiatives and programs serve individuals, families, professionals, and communities across the campus, Oregon, the nation, and the world. This outreach includes OSU Extension's Family and Community Health program, active continuing education initiatives ranging from credit and noncredit courses to full degrees, and service programs that serve OSU students, faculty, staff, as well as individuals and families.

DEGREE PROGRAMS

Advanced degrees include the master of arts (MA), master of public health (MPH), the master of science (MS), and doctor of philosophy (PhD). The MS and PhD degrees are offered in units of the college. Most units also participate in the master of arts interdisciplinary studies (MAIS) graduate degree program.

ADVISING

The Office of Academic Advising is a primary source of information for all College of Public Health and Human Sciences undergraduate students. Students receive accurate, thorough, and timely information regarding their degree requirements, academic progress, job opportunities, and campus activities. Professional advisors oversee the undergraduate students within the college. Faculty members also serve a vital role to undergraduates by providing professional and career advice. Faculty members often involve students in research and professional activities that create opportunities for leadership, personal growth, and discovery.

INTERNSHIPS AND PRACTICUMS

To help prepare students in the College of Public Health and Human Sciences for careers, many of the degree programs include internships and/or practicum experiences as part of their academic programs. These opportunities provide students with invaluable work experience in their field of study and may lead to postgraduate employment. Faculty members help place students and assist in the structure of these experiences. Additional information is available at <http://health.oregonstate.edu/students/current/undergraduate/internships>.

DOUBLE DEGREES IN EDUCATION OR INTERNATIONAL STUDIES OR SUSTAINABILITY

Undergraduates with majors in the College of Public Health and Human Sciences can earn a second degree in education or international studies or sustainability. See the College of Education or International Programs or Department of Forest Ecosystems and Society sections of this catalog for more information.

SCHOLARSHIPS

The College of Public Health and Human Sciences offers a variety of scholarships to deserving students. Many are reserved for students in designated majors or for first-year students. A list of scholarships and application forms are available from the college's website at <http://health.oregonstate.edu/students/current/undergraduate/scholarships>.

Additional scholarship information is also available at the OSU Office of Financial Aid and Scholarships.

COLLEGE REQUIREMENTS

The College of Public Health and Human Sciences requires H 100, Introduction to Public Health (4), for all undergraduate majors in the college, effective Fall 2012.

SCHOOL OF BIOLOGICAL AND POPULATION HEALTH SCIENCES

International Health (MPH only)

Graduate Minors

Exercise and Sports Science
Nutrition
Public Health

Graduate Certificate

Graduate Certificate in Public Health

The School of Biological and Population Health Sciences comprises the fields of exercise and sport science, nutrition, and the public health disciplines of biostatistics, epidemiology, international health, and environmental and occupational health and safety. These disciplinary approaches link individual biology and behavior to population and environmental health to better understand how environmental and behavioral factors, including food and nutrition, physical activity, water, pollution, carcinogens, biohazards, etc., influence the development and progression of biological disease. Applying the quantitative methods of epidemiology and biostatistics allows better understanding of the causes of population-level disease as well as methods of intervention and prevention.

The School of Biological and Population Health Sciences houses the undergraduate degrees of Exercise and Sport Science, Nutrition, and Athletic Training. Nationally recognized programs prepare students for careers as athletic trainers, dietitians, medical and allied health science professionals, teachers in physical education, nutritionists, researchers, personal trainers, and fitness and nutrition professionals. The majors and their options are described below.

The Bachelor of Science degree in Public Health is offered through the School of Social and Behavioral Health Sciences, which can be found at <http://health.oregonstate.edu/sbhs>.

The school houses the Masters in Public Health (MPH) tracks of biostatistics, epidemiology, international health, and environmental and occupational health and safety. For more information about the MPH program and its areas of concentration, see <http://health.oregonstate.edu/degrees/graduate/public-health/mph>. Environment, safety and health is also an area of concentration within the Public Health doctoral program (see <http://health.oregonstate.edu/degrees/graduate/public-health/phd-program>).

Master's and doctoral degrees are available in Nutrition (see [\[health.oregonstate.edu/degrees/graduate/nutrition\]\(http://health.oregonstate.edu/degrees/graduate/nutrition\)\) and Exercise and Sport Science \(see <http://health.oregonstate.edu/degrees/graduate/exercise-sport-science>\).](http://health.</p>

<div data-bbox=)

UNDERGRADUATE MAJORS

ATHLETIC TRAINING MAJOR

This major provides the academic and practical experience necessary to prepare for certification as an athletic trainer to aid in the prevention, treatment, and rehabilitation of athletic injuries. The Athletic Training major is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). Graduates work as athletic trainers for professional, college and high school athletic teams, in clinics or hospitals, or enter graduate programs for the allied health professions.

EXERCISE AND SPORT SCIENCE MAJOR AND OPTIONS

Applied Exercise and Sport Science Option

This option allows students to individualize their program of study to prepare for a variety of professional goals such as medical school, graduate and professional programs, adult fitness, sport business, athletics, youth programs, and leadership of non-school sports programs for people of all ages.

Fitness and Nutrition Option

This option has a strong focus in exercise physiology, exercise programming, and nutrition. Graduates of the Fitness and Nutrition option provide leadership for organizing, directing, and managing physical fitness programs in business and industrial settings, health clubs, and hospital-based fitness/wellness cardiac rehabilitation programs. This program is excellent preparation for graduate school.

Physical Education

Teacher Education Option

Students seeking careers in teaching physical education would select this option. If you want to teach in an elementary and/or secondary school setting, this program provides the academic major and prerequisites needed for application into the fifth-year, master's-level teacher education program that leads to teaching licensure.

Pre-Therapy and Allied Health Option

Students who choose this option prepare for admission into medical school or a professional training program in the allied health professions. Graduates become physical therapists, occupational therapists, physicians, physician assistants, or nurses.

NUTRITION MAJOR AND OPTIONS

Dietetics Option

Dietitians provide guidance to the public regarding nutrition and diet. The Dietetics option at OSU is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics and prepares students to become Registered Dietitians (RD). This option provides the course work and preparation to enter a supervised dietetic internship, pass the Registered Dietitian Exam, and become a leader in the profession. Graduates from OSU's program consistently exceed the national average for placement into accredited dietetic internships and for passing the RD Exam the first time.

Nutrition and Foodservice Systems Option

This option prepares graduates for professional careers directing foodservice operations that focus on serving healthy menu options and using local ingredients. Foodservice opportunities exist in both non-commercial operations including schools, universities and healthcare, as well as others in the retail environment; all are striving to meet the consumer demand for healthier food options. This program integrates course work taken at OSU and the Culinary Arts program at Linn-Benton Community College.

Nutrition and Health Sciences Option

This option is designed for students who want to focus on the scientific basis of nutrition for careers in medicine and the health sciences or in nutrition science research. Tracks within the option allow students to specifically focus and prepare for careers in medicine and the allied health sciences or for academia and/or health-related research. Professionals trained in nutrition science have many career options due to the growth and aging of our population, the focus on prevention of obesity and other chronic diseases, and a growing emphasis on health, nutrition, and wellness.

UNDERGRADUATE STUDIES

Preparation

Entering first-year and undergraduate transfer students should prepare to enter the College of Public Health and Human Sciences with a strong foundation in the sciences, balanced with good writing and critical thinking skills. Students transferring from other institutions are best prepared for the college curriculum if they have taken chemistry or biology or both.

Admission

Any student who has met the admission requirements of Oregon State University may be admitted to a nutrition or exer-

cise and sport science program of study. To transfer from another OSU college or school, the student must have the approval of the head advisor of the College of Public Health and Human Sciences.

PHYSICAL ACTIVITY COURSES

The Physical Activity Course (PAC) Program is an elective, academic-credit program designed to provide OSU students with the opportunity to learn and engage in a wide variety of physical activities with the goal of promoting health and lifelong participation in physical activity. Students may take any number of PAC credits, but only 11 credits may be counted toward graduation. Successful completion of any PAC section will satisfy the one-credit laboratory requirement of the fitness category of the baccalaureate core. Courses may be repeated for credit and a grade. There is a PAC fee for each class, and some courses have additional fees. All fees are listed in the online *Schedule of Classes*. Student accounts are billed upon registration. Refunds of the PAC fee are automatic upon dropping or withdrawing from the course and follow university policies as listed in the *OSU General Catalog*. Some additional fees are refunded through the PAC Office (Langton 123). Social dance classes are listed with a men's and a women's section in order help balance the number of students in the traditional lead-and-follow roles within the same class.

RETENTION

Students are expected to make satisfactory progress toward a degree. Satisfactory progress includes, but is not limited to:

1. Maintaining a minimum Nutrition and Exercise Sciences option program GPA of 2.25.
2. Maintaining a minimum GPA of 2.50 in all EXSS and NUTR-prefixed courses.

UNDERGRADUATE MAJORS WITH OPTIONS

ATHLETIC TRAINING (BS, CRED, HBS)

The Athletic Training major at Oregon State University is a four-year degree program. The first year is classified as the Pre-Athletic Training year. This Pre-Athletic Training year precedes formal admission into the Athletic Training major. Once admitted to the Athletic Training major, the student will take three years of specialized course work and will complete supervised clinical-educational experiences at an affiliated athletic training facility.

Upon successful completion of the Athletic Training major, the student is eligible to sit for the Board of Certification (BOC) examination. BOC certification (ATC) establishes the entry-level creden-

tial to work as an athletic trainer. Athletic training encompasses the prevention, diagnosis and intervention of emergency, acute and chronic medical conditions involving impairment, functional limitations and disabilities. Athletic trainers work in a variety of settings, including sports medicine clinics, hospitals, high schools, colleges and universities, professional sports teams, and corporate/industrial settings.

The Athletic Training major is transitioning to a master's-level degree, therefore the 2013–2014 academic year is the last year in which students can apply for admission into the undergraduate Athletic Training program. Beginning in 2014–2015, students interested in becoming certified athletic trainers can pursue an undergraduate degree in Exercise and Sport Science and then apply for admission to the master's-level degree in Athletic Training that will be in place upon the completion of the undergraduate degree. Please see the following site for updated information on the transition: <http://health.oregonstate.edu/degrees/athletic-training/graduate>.

Pre-Athletic Training Year

During this year (2013–2014) the student will complete the prerequisite courses and, in early May of 2014, apply for admission into the Athletic Training major. Admission to the Athletic Training major is competitive and based on measures of student performance in both academic and clinical settings.

Application Criteria:

1. Completion of the following prerequisite courses:
EXSS 158. Care and Prevention of Athletic Injuries (3 cr)
EXSS 159. Directed Observation in Athletic Training (1 cr)
CH 121 or CH 221 or (CH 231 and CH 261). General Chemistry (5 cr)^a
PHAR 210. Terminology of the Health Sciences (2 cr)
(**Note:** Students may be in the process of taking one or more of these courses during the Spring term in which they apply.)
2. A minimum OSU GPA of 2.75 on a 4.0 scale.
3. Completion of clinical observation arranged in conjunction with EXSS 159.
4. Completion of admission interview.

Application Information:

The application, official application due date, and the ranking criteria for admission can be found at the Athletic Training major website at <http://health.oregonstate.edu/degrees/athletic-training>.

Athletic Training Major

Following admission into the Athletic Training major, the following course work must be completed. Athletic

training-specific course work must be completed in order as stipulated on the AT major course progression sheet found at <http://health.oregonstate.edu/degrees/athletic-training>.

Baccalaureate Core Requirements (51 credits)

17 of the 51 credits required in the baccalaureate core may be fulfilled by courses in the Athletic Training option and/or major.

Athletic Training Major Courses (85–86 credits)

- EXSS 131. Introduction to Exercise and Sport Science (1)[*Recommended.*]
 EXSS 158. Care and Prevention of Athletic Injuries (3)
 EXSS 159. Directed Observation in Athletic Training (1)
 EXSS 259. Athletic Training Practicum (2)
 EXSS 322. Anatomical Kinesiology (4).
 EXSS 323. Biomechanics of Sport and Exercise (4)
 EXSS 324. Exercise Physiology (4)
 EXSS 325. Fitness Assessment and Exercise Prescription (2)
 EXSS 350. Orthopedic Assessment of Upper Extremity Injuries (4)
 EXSS 351. Orthopedic Assessment of Lower Extremity Injuries (4)
 EXSS 358. Athletic Training Practicum (2)
 EXSS 359. Athletic Training Practicum (2)
 EXSS 365. Emergency Management of Sports Trauma (3)
 EXSS 370. Psychology of Sport and Physical Activity (3)
 EXSS 380. Therapeutic Modalities (4)
 EXSS 385. Therapeutic Exercise (4)
 EXSS 394. Professional Activities: Resistance Training Program Design (2)
 EXSS 410. Internship (12)
 EXSS 411. Movement Skill Learning and Control (3)
 EXSS 444. Adapted Physical Activity (4)
 EXSS 452. Athletic Training Program Management (3)
 EXSS 455. ^Pharmacology in Athletic Training (3)
 H 225. *Social and Individual Health Determinants (4)
 NUTR 240. Human Nutrition (3)
 NUTR 341. Nutrition for Exercise (3)
 PHAR 210. Terminology of the Health Sciences (2)

Science and Social Science Courses (47–48)

Complete a total of 15 credits of chemistry:

- CH 121, CH 122, CH 123 *General Chemistry (5,5,5)
OR
 CH 231, CH 232, CH 233. *General Chemistry (4,4,4) **and** CH 261, CH 262, CH 263. *Laboratory for Chemistry 231, 232, 233 (1,1,1)
 H 100. Introduction to Public Health (4)
 MTH 112. *Elementary Functions (4)
 PH 201. *General Physics (5)
 PSY 201. *General Psychology (3)
 ST 201. Principles of Statistics (4)
 or ST 351. Introduction to Statistical Methods (4)

- or H 220. Introduction to Health Data Analysis (3)
 Z 331, Z 332, Z 333. Human Anatomy and Physiology (3,3,3)
 Z 341, Z 342. Human Anatomy and Physiology Lab (2,2)

Electives:

Additional electives to complete a total of 180 credits required for the bachelor of science degree.

Total=180 credits

Footnotes:

* All 15 credits of the required series of chemistry courses must be completed prior to admission to the Athletic Training major.

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

Pre-Athletic Training (Major code 248)

Professional Athletic Training (Major code 244)

EXERCISE AND SPORT SCIENCE (BS, CRED, HBS)

The exercise and sport science curriculum meets university requirements for the bachelor's degree and provides general education needed for professional preparation. Undergraduate major students complete the general baccalaureate core requirements and an option selected from applied exercise and sport science, fitness and nutrition, physical education teacher education, and pre-therapy and allied health. **Note:** The Exercise and Sport Science option is the only option available at the OSU-Cascades Campus.

The bachelor's degree in Exercise and Sport Science can serve as direct preparation for such careers as organizing, directing or managing physical fitness programs. It can also serve as preparation for applications to a master's level physical education teacher education program, medical school, a professional program in the allied health professions (e.g. physical or occupational therapy, nursing, physician assistant) or other graduate education.

Baccalaureate Core Requirements (48)

Skills

- Fitness (3)
 Mathematics (3)
 Speech (3)
 Writing I (3)
 Writing II (3)
 Writing Intensive Course

Perspectives

- Biological science (lab) (4)
 Physical science (lab) (4)
 Plus an additional 4 credits from another biological or physical science lab
 Cultural diversity (3)
 Literature and the arts (3)
 Social processes and institutions (3)
 Western culture (3)

Difference, power and discrimination (3)

Synthesis

- Contemporary global issues (3)
 Science, technology, and society (3)

OPTIONS

APPLIED EXERCISE AND SPORT SCIENCE OPTION

Also available at

OSU-Cascades Campus

The Applied Exercise and Sport Science option allows students to develop an academic experience designed to meet very specific career goals that are not met by one of the other three options.

Curriculum requirements for the four-year program are listed below:

Baccalaureate Core Requirements (48)

17 of the 48 credits required in the baccalaureate core may be fulfilled by courses in the Applied Exercise and Sport Science option.

Applied Exercise and Sport Science Option Courses (53–60)

- EXSS 131. Introduction to Exercise and Sport Science (1)^a
 EXSS 307. Seminar (Sect. 2, Pre-Internship) (1)
 EXSS 312. *Sociocultural Dimensions of Physical Activity (3)
 EXSS 322. Anatomical Kinesiology (4)
 EXSS 323. Biomechanics of Sport and Exercise (4)
 EXSS 324. Exercise Physiology (4)
 EXSS 325. Fitness Assessment and Exercise Prescription (2)
 EXSS 333, EXSS 334. Exercise and Sport Science Practicum (2,2)^b
 EXSS 370. Psychology of Sport and Physical Activity (3)
 EXSS 381. ^Analysis of Critical Issues in Exercise and Sport Science (3)
 EXSS 410. Internship (9–15)
 EXSS 411. Movement Skill Learning and Control (3)
 EXSS 444. Adapted Physical Activity (4)
 Additional EXSS course work (9)^c

Supporting Courses (27)

The courses taken in the Applied Option Courses and Supporting Courses should be integrated into a coherent program based on the goals of the student and should be planned and agreed on by the student and the student's academic advisor. The program of study must be approved by one of the school co-directors.

Science and Social Science Courses (49–51)

- CH 121. General Chemistry (5)
 CH 122. *General Chemistry (5)
and CH 123. *General Chemistry (5)
 or CH 130. General Chemistry of Living Systems (4)

OR:

- CH 231, CH 232, CH 233. *General Chemistry (4,4,4)

and CH 261, CH 262, CH 263.

*Laboratory for Chemistry 231, 232, 233 (1,1,1)

H 100. Introduction to Public Health (4)

H 220. Introduction to Health Data Analysis (3)

or ST 351. Introduction to Statistical Methods (4)

or ST 201. Principles of Statistics (4)

MTH 112. *Elementary Functions (4)

NUTR 240. Human Nutrition (3)

or NUTR 225. General Human Nutrition (3)

PH 201. *General Physics (5)

PSY 201. *General Psychology (3)

Z 331, Z 332, Z 333. Human Anatomy and Physiology (3,3,3)

Z 341, Z 342. Human Anatomy and Physiology Lab (2,2)

Total=160–186

Courses listed under Applied EXSS Option Courses, Supporting Courses, and Science and Social Science Courses must be taken in the normal grading basis, A–F, except for EXSS 131, which is graded P/N.

Students must select additional electives to complete a total of 180 credits required for the bachelor's degree.

Footnotes:

^a Recommended course

^b It is strongly recommended that students also take EXSS 335.

^c EXSS 131 may be used to satisfy 1 of these 9 credits.

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

FITNESS AND NUTRITION OPTION

This option combines a strong focus in exercise physiology and exercise programming with a foundation in nutrition. It uniquely prepares graduates to provide leadership for organizing, directing, and managing physical fitness programs in business and industrial settings, health clubs, and hospital-based fitness/wellness cardiac rehabilitation programs. Graduates can earn professional certifications in fitness and conditioning. The program is also excellent preparation for graduate school.

Curriculum requirements for the four-year program are listed below:

Baccalaureate Core Requirements (48)

Selected required courses within the option may be used toward these requirements.

Exercise Science Courses (58–67)

EXSS 131. Introduction to Exercise and Sport Science (1)[*Recommended.*]

EXSS 307. Seminar (Sect. 2, Pre-Internship) (1)

EXSS 322. Anatomical Kinesiology (4)

EXSS 323. Biomechanics of Sport and Exercise (4)

EXSS 324. Exercise Physiology (4)

EXSS 325. Fitness Assessment and Exercise Prescription (2)

EXSS 333. Exercise and Sport Science Practicum (2)

and EXSS 335. Exercise and Sport Science Practicum (2)[*Strongly recommended.*]

EXSS 370. Psychology of Sport and Physical Activity (3)

EXSS 381. ^Analysis of Critical Issues in EXSS (3)

EXSS 410. Internship (9–15)

EXSS 434. Applied Muscle Physiology (3)

EXSS 435. Physical Activity Promotion (3)

EXSS 436. Exercise Management of Chronic Disease (3)

EXSS 474. Exercise Physiology Lab Methods (2)

Choose at least two of the following:

EXSS 394. Professional Activities: Resistance Training Program Design (2)

EXSS 395. Professional Activities: Group Fitness (2)

EXSS 396. Professional Activities: Aquatics (2)

Choose at least three courses from the following list:

EXSS 158. Care and Prevention of Athletic Injuries (3)

EXSS 312. *Sociocultural Dimensions of Physical Activity (3)

EXSS 313. Lifespan Motor Development (4)

EXSS 411. Movement Skill Learning and Control (3)

EXSS 414. Physical Activity and Aging (3)

EXSS 444. Adapted Physical Activity (4)

EXSS 475. *Power and Privilege in Sport (3)

Human Nutrition Courses (13)

NUTR 240. Human Nutrition (3)

NUTR 241. Applications in Human Nutrition (1)

NUTR 312. *Issues in Nutrition and Health (3)

NUTR 325. Nutrition Through the Life Cycle (3)

NUTR 341. Nutrition for Exercise (3)

Science and Social Science Courses (46–48)

CH 121. General Chemistry (5)

CH 122. *General Chemistry (5)

CH 123. *General Chemistry (5)

or CH 130. General Chemistry of Living Systems (4)

OR:

CH 231, CH 232, CH 233. *General Chemistry (4,4,4)

and CH 261, CH 262, CH 263.

*Laboratory for Chemistry 231, 232, 233 (1,1,1)

H 100. Introduction to Public Health (4)

H 220. Introduction to Health Data Analysis(3)

or ST 351. Introduction to Statistical Methods (4)

or ST 201. Principles of Statistics (4)

MTH 112. *Elementary Functions (4)

PH 201. *General Physics (5)

PSY 201. *General Psychology (3)

Z 331, Z 332, Z 333. Human Anatomy and Physiology (3,3,3)

Z 341, Z 342. Human Anatomy and Physiology Lab (2,2)

Supporting Courses (12)

PHL 205. *Ethics (4)

PHAR 210. Terminology of the Health Sciences (2)

Choose at least one of the following:

COMM 111. *Public Speaking (3)

COMM 114. *Argument and Critical Discourse (3)

COMM 218. *Interpersonal Communication (3)

Choose at least one of the following:

COMM 324. Communication in Organizations (3)

COMM 326. Intercultural Communication (3)

COMM 432. Gender and Communication (3)

All of the above-listed courses must be taken on an A–F grading basis, except for those that satisfy the baccalaureate core but not the major, and EXSS 131, which is graded P/N.

Students must select additional elective credits to complete a total of 180 credits required for the bachelor's degree. Students are encouraged to consult with an advisor or faculty member in choosing electives.

Suggested Electives

BA 215. Fundamentals of Accounting (4)

BA 230. Business Law I (4)

BA 260. Introduction to Entrepreneurship (4)

BA 351. Managing Organizations (4)

BB 350. Elementary Biochemistry (4)

CH 331, CH 332. Organic Chemistry (4,4)

EXSS 335. Exercise and Sport Science Practicum (2)

H 225. *Social and Individual Health Determinants (4)

H 312. *AIDS and STDs in Modern Society (3)

H 320. Introduction to Human Disease (3)

MB 230. *Introductory Microbiology (4)

or BB 331. *Introduction to Molecular Biology (3)

PHL 444. *Biomedical Ethics (4)

SOC 454. *Leisure and Culture (4)

Footnotes:

^ Writing Intensive Course (WIC)

PHYSICAL EDUCATION TEACHER EDUCATION OPTION

For students who seek careers teaching physical education in an elementary and/or secondary school setting, this option provides the academic major and prerequisites needed for application into the fifth-year master's level teacher education program that leads to teaching licensure.

Curriculum requirements for the four-year program are listed below:

Baccalaureate Core Requirements (48)

20 of the 48 credits required in the baccalaureate core may be fulfilled by courses in the Physical Education Teacher Education option.

Physical Education Teacher**Education Option Courses (72–73)**

- EXSS 131. Introduction to Exercise and Sport Science (1)^a
- EXSS 158. Care and Prevention of Athletic Injuries (3)
- EXSS 194. Professional Activities: Basic Rhythms (1)
- EXSS 312. *Sociocultural Dimensions of Physical Activity (3)
- EXSS 313. Lifespan Motor Development (4)
- EXSS 322. Anatomical Kinesiology (4)
- EXSS 323. Biomechanics of Sport and Exercise (4)
- EXSS 324. Exercise Physiology (4)
- EXSS 353. EXSS 354, EXSS 355. Physical Education Teacher Education Practicum (2,2,2)
- EXSS 360. Sport Skill Analysis I (2)
- EXSS 361. Sport Skill Analysis II (2)
- EXSS 362. Sport Skill Analysis III (2)
- EXSS 370. Psychology of Sport and Physical Activity (3)
- EXSS 371. Measurement and Data Analysis in Exercise Science (4)
- EXSS 381. ^Analysis of Critical Issues in EXSS (3)
- EXSS 394. Professional Activities: Resistance Training Program Design (2)
- EXSS 395. Professional Activities: Group Fitness (2)
- EXSS 396. Professional Activities: Aquatics (2)
- EXSS 411. Movement Skill Learning and Control (3)
- EXSS 420. Physical Activity for Children (3)
- EXSS 421. Physical Activity for Adolescents (3)
- EXSS 444. Adapted Physical Activity (4)
- PAC courses approved by advisor (8)
- PAC courses in different activities required to reflect content taught in public schools and other physical activity settings, including fitness games and sports, outdoor leisure pursuits and aquatics.

Supporting Courses (12–17)

- PSY 350. Human Lifespan Development (3)
or HDFS 311. Infant and Child Development (4) **and** HDFS 313. Adolescent Development (4)
- TCE 216. *Purpose, Structure, and Function of Education in a Democracy (3)
- TCE 219. Civil Rights and Multicultural Issues in Education (3)
- TCE 253. Learning Across the Lifespan (3)

Science and Social Science Courses (46–47)**Choose one CH series below:**

- CH 121. General Chemistry (5), CH 122. *General Chemistry (5)
and CH 123. *General Chemistry (5) or CH 130. General Chemistry of Living Systems (4)

OR:

- CH 231, CH 232, CH 233. *General Chemistry (4,4,4)
and CH 261, CH 262, CH 263.
*Laboratory for Chemistry 231, 232, 233 (1,1,1)
- H 100. Introduction to Public Health (4)
- MTH 112. *Elementary Functions (4)
- NUTR 240. Human Nutrition (3)
or NUTR 225. General Human Nutrition (3)

- PH 201. *General Physics (5)
- PSY 201. *General Psychology (3)
- Z 331, Z 332, Z 333. Human Anatomy and Physiology (3,3,3)
- Z 341, Z 342. Human Anatomy and Physiology Lab (2,2)

All of the above-listed courses must be taken on an A-F grading basis, except for those that satisfy the baccalaureate core but not the major, and EXSS 131, which is graded P/N.

Students must select additional electives to complete a total of 180 credits required for the bachelor's degree.

PRE-THERAPY AND ALLIED HEALTH OPTION

This program is designed for students interested in pursuing admission into medical school or a professional program in the allied health professions, such as nursing, occupational therapy, physical therapy, or physician assistant.

The Pre-Therapy and Allied Health option requires the completion of one of five professional tracks:

1. Pre-Medicine
2. Pre-Nursing
3. Pre-Occupational Therapy
4. Pre-Physical Therapy
5. Pre-Physician Assistant

Curriculum requirements for the four-year program are listed below.

Baccalaureate Core Requirements (48)

Selected required courses within the option may be used toward these requirements.

Pre-Therapy and Allied Health Option Required EXSS Courses (32)

- EXSS 132. Introduction to the Allied Health Professions (1)
or BI 109. Health Professions: Medical (1) [for Pre-Med]
- EXSS 312. *Sociocultural Dimensions of Physical Activity (3)
- EXSS 322. Anatomical Kinesiology (4)
- EXSS 323. Biomechanics of Sport and Exercise (4)
- EXSS 324. Exercise Physiology (4)
- EXSS 325. Fitness Assessment and Exercise Prescription (2)
- EXSS 343. Pre-Therapy/Allied Health Seminar (1)
or GS 410. Science Internship (1–12) [for Pre-Med]
- EXSS 370. Psychology of Sport and Physical Activity (3)
- EXSS 381. ^Analysis of Critical Issues in Exercise and Sport Science (3)
- EXSS 411. Movement Skill Learning and Control (3)
- EXSS 444. Adapted Physical Activity (4)

PTAH Option Supporting Courses for All Tracks (29–34)

- H 100. Introduction to Public Health (4)
- NUTR 240. Human Nutrition (3)

- PHAR 210. Terminology of the Health Sciences (2)
- PSY 201, PSY 202. *General Psychology (3,3)
- SOC 204. *Introduction to Sociology (3)

Choose one of the following communication courses:

- COMM 111. *Public Speaking (3)
- COMM 114. *Argument and Critical Discourse (3)
- COMM 218. *Interpersonal Communication (3)

Choose four of the following EXSS supporting courses:

- EXSS 158. Care and Prevention of Athletic Injuries (3)
- EXSS 313. Lifespan Motor Development (4)
- EXSS 360. Sport Skill Analysis I (2)
or EXSS 361. Sport Skill Analysis II (2)
- EXSS 394. Professional Activities: Resistance Training Program Design (2)
- EXSS 395. Professional Activities: Group Fitness (2)
- EXSS 396. Professional Activities: Aquatics (2)
- EXSS 414. Physical Activity and Aging (3)
- EXSS 434. Applied Muscle Physiology (3)
- EXSS 436. Exercise Management of Chronic Disease (3)
- EXSS 455. ^Pharmacology in Athletic Training (3)

PTAH Option Science Core for All Tracks (42–43)

- CH 121. General Chemistry (5)
and CH 122, CH 123. *General Chemistry (5,5)
OR: CH 231, CH 232, CH 233. *General Chemistry (4,4,4)
and CH 261, CH 262, CH 263.
*Laboratory for Chemistry 231, 232, 233 (1,1,1)

- MTH 112. *Elementary Functions (4)
- PH 201. *General Physics (5)
- ST 351. Introduction to Statistical Methods (4)
or ST 201. Principles of Statistics (3)
- Z 331, Z 332, Z 333. Human Anatomy and Physiology (3,3,3)
- Z 341, Z 342, Z 343. Human Anatomy and Physiology Lab (2,2,2)

All courses above must be taken in the normal grading basis, A-F.

Important note: To enroll in EXSS 343 and EXSS 344, a student must meet the following prerequisites:

- EXSS 132, Introduction to the Allied Health Professions (1), with a grade of C or better.
- Z 331, Z 332, Z 333, Z 341, Z 342, and Z 343 with a grade of C or better in each course and a GPA of 2.7 or greater across the 6-course series.
- Overall GPA of 3.0 or greater.
- Instructor or school approval.

Additional required science and social science courses for the following pre-professional tracks are listed farther below:

1. Pre-Medicine
2. Pre-Nursing
3. Pre-Occupational Therapy

4. Pre-Physical Therapy
5. Pre-Physician Assistant.

PTAH Option Suggested Electives for All Tracks:

ANTH 483. Advanced Medical Anthropology (4)
 BB 350. Elementary Biochemistry (4)
 BI 311. Genetics (4)
 CH 331, CH 332. Organic Chemistry (4,4)
 CH 337. Organic Chemistry Lab (4)
 H 210. *Introduction to the Health Care System (4)
 H 225. *Social and Individual Health Determinants (4)
 H 250. Introduction to Health Care Management (3)
 H 312. *AIDS and STDs in Modern Society (3)
 H 320. Introduction to Human Disease (3)
 MB 230. *Introductory Microbiology (4)
 NUTR 312. *Issues in Nutrition and Health (3)
 PHL 205. *Ethics (4)
 PHL 444. *Biomedical Ethics (4)
 PSY 330. Brain and Behavior (4)
 PSY 350. Human Lifespan Development (4)
 PSY 381. Abnormal Psychology (4)
 PSY 432. Physiological Psychology (4)
 PSY 442. Perception (4)
 SOC 205. *Institutions and Social Change (3)
 SOC 340. Deviant Behavior and Social Control (4)

- Students must complete a total of 180 credits required for a degree.
- It is strongly suggested that students examine prerequisite requirements for professional schools and utilize elective credits to meet additional requirements.
- Students may complete foreign language credits as elective credits.
- It is strongly suggested that the "Suggested Elective" courses listed above and the track-specific required courses listed below also be taken in the normal grading basis, A–F.

1. Pre-Medicine Science and Social Science Courses (54)

BB 450. General Biochemistry (4)
 BB 451. General Biochemistry Lab (3)
 BI 211, BI 212, BI 213. *Principles of Biology (4,4,4)
 BI 314. Cell and Molecular Biology (4)
 CH 331, CH 332. Organic Chemistry (4,4)
 CH 337. Organic Chemistry Lab (4)
 MB 302. General Microbiology (3)
 MB 303. General Microbiology Lab (2)
 MTH 251. *Differential Calculus (4)
 PH 202, PH 203. *General Physics (5,5)

Total Required Courses/Credits for Pre-Medicine Option

PTAH Option Required EXSS Course Work (32–43)

PTAH Option Required Science Course Work (42–43)

PTAH Option Supporting Course Work (29–34)

Pre-Medicine Science/Social Science (54)

Total = 157–174

2. Pre-Nursing Science and Social Science Courses (26)

H 225. *Social and Individual Health Determinants (4)

H 312. *AIDS and STDs in Modern Society (3)

NUTRITION (BS, CRED, HBS)

Baccalaureate Core (48)

Plus choose one option from below:

1. Pre-Dietetics
2. Dietetics (must first complete Pre-Dietetics)
3. Nutrition and Foodservice Systems
4. Nutrition and Health Sciences

OPTIONS

PRE-DIETETICS OPTION

Dietetics Admission Requirements
 To be considered for admission to the Dietetics option within the Nutrition major, students must complete the Pre-Dietetics courses listed below with a grade of B– or higher in each of the NUTR courses listed, a grade of C– or higher in each of the other courses listed, and a grade-point average of 3.0 or higher for the listed courses as a whole. Applicants

to the Dietetics option must achieve an overall GPA of 3.0 or higher based on completing at least 60 quarter credits [OSU (institutional) and transfer], including the prerequisite courses listed below. At least 12 credits must be taken at OSU.

Information on how to apply for admission to the Dietetics option can be found at the PHHS Advising Office and on the BPHS Nutrition Dietetics Web page at <http://health.oregonstate.edu/bphs/dietetics>.

NUTRITION AND FOODSERVICE SYSTEMS OPTION

The Nutrition and Foodservice Systems option prepares graduates for professional careers directing foodservice operations that focus on serving healthy menu options and using local ingredients. Foodservice opportunities exist in both non-commercial operations including schools, universities and healthcare as well as others in the retail environment; all are striving to meet the consumer demand for healthier food options. This program integrates course work taken at OSU and the Culinary Arts program at Linn-Benton Community College.

Please contact Dr. Mary M. Cluskey, 541-737-0960, cluskeym@oregonstate.edu for more information about the Nutrition and Foodservice Systems option.

² Recommend spring term of senior year.

NUTRITION AND HEALTH SCIENCES OPTION

The Nutrition Science and Health Sciences option is designed for students who want to focus in the scientific basis of nutrition for careers in medicine and the health sciences or in nutrition science research. Tracks within the option allow students to specifically focus and prepare for careers in medicine and the allied health sciences or for academia and/or health-related research. Professionals trained in nutrition science have many career options due to the growth and aging of our population, the focus on prevention of obesity and other chronic diseases, and a growing emphasis on health, nutrition, and wellness.

Science/Social Science Core**(all Tracks) (105 credits):**

BB 450, BB 451. General Biochemistry (4,3)
 BI 211, BI 212, BI 213. *Principles of
 Biology (4,4,4)

BI 314. Cell and Molecular Biology (4)

CH 121, CH 122, CH 123. *General
 Chemistry (5,5,5)
 or CH 231, CH 232, CH 233. *General
 Chemistry (4,4,4)

and CH 261, CH 262, CH 263.

*Laboratory for Chemistry 231, 232, 233
 (1,1,1)

CH 331, CH 332, Organic Chemistry (4,4)
 or CH 334, CH 335, CH 336. Organic
 Chemistry (3,3,3)

CH 337. Organic Chemistry Laboratory (4)

COMM 111. *Public Speaking (3)

or COMM 114. *Argument and Critical
 Discourse (3)

or COMM 218. Interpersonal
 Communication (3)

* Baccalaureate Core Course

^ Writing Intensive Course (WIC)

EXERCISE PHYSIOLOGY MINOR

Students pursuing this minor develop
 a deeper understanding of the motiva-
 tional, psychosocial, and lifespan factors
 affecting human behavior within the
 context of sport and physical activity
 settings. A theory-to-research-to-practice
 approach is followed in the core course
 work, with supplemental course work
 focusing on the individual needs and
 interests of the students.

EXSS 322. Anatomical Kinesiology (4)

EXSS 324. Exercise Physiology (4)

EXSS 325. Fitness Assessment and Exercise
 Prescription (2)

EXSS 406. Projects (Athletic Administration)
 (3)

EXSS 434. Applied Muscle Physiology (3)

EXSS 436. Exercise Management for
 Chronic Disease (3)

EXSS 474. Exercise Physiology Lab Methods (2)

Z 331, Z 332, Z 333. Human Anatomy and
 Physiology (3,3,3)

Z 341. Human Anatomy and Physiology Lab (2)

Note: Prerequisites for EXSS 324 are Z
 333 and CH 121 and CH 122 and (CH
 123 or CH 130) and Z 331 or equivalent.

Total=32

NUTRITION MINOR

This minor requires 34 credits, including
 12 credits at the upper-division level.

Students are strongly encouraged to
 consult an advisor in the School of Bio-
 logical and Population Health Sciences to
 be sure that prerequisites are taken.

BB 450, BB 451. General Biochemistry (4,3)

NUTR 240. Human Nutrition (3)

NUTR 241. Applications in Human Nutrition (1)

NUTR 325. Nutrition Through the Life Cycle (3)

NUTR 340. Principles in Nutrient
 Metabolism (3)

NUTR 417, NUTR 418. Human Nutrition
 Science (4,4)

Z 331, Z 332, Z 333. Human Anatomy and
 Physiology (3,3,3)

**EXERCISE AND SPORT SCIENCE
(MS, PhD, MAIS)****Graduate Areas of Concentration**

*Exercise physiology, movement studies
 in disability, neuromechanics, physical
 activity and public health, sport and
 exercise psychology, sport pedagogy
 (MS only)*

The graduate program in exercise and
 sport science offers courses and learning
 experiences in the theoretical and practi-
 cal study of physical activity (including
 exercise and sport) for the promotion of
 optimal health and disease prevention.
 Graduate fields in exercise and sport sci-
 ence include exercise physiology, move-
 ment studies in disability, neuromechan-
 ics, physical activity and public health,
 sport and exercise psychology, and sport
 pedagogy (master's degree only).

The MS degree can be completed via a
 thesis or project. The PhD degree requires
 the completion of a dissertation. For

further information about the graduate program in Exercise and Sport Science, visit the school's website at <http://health.oregonstate.edu/bphs>.

NUTRITION (MS, PhD, MAIS)

Graduate Areas of Concentration Nutrition

The School of Biological and Population Health Sciences offers graduate programs leading to the Master of Science (MS) and Doctor of Philosophy (PhD) degrees in nutrition. The program of study integrates multiple disciplines relevant to nutrition, including molecular, biochemical, physiological and clinical nutrition. The overall goal of the program is for the student to gain a "cutting-edge" understanding of contemporary issues in nutrition and apply these concepts to human health.

Research in nutrition is focused on human nutrition and nutrient effects on physiological systems impacting human health. Our research programs seek the discovery of new knowledge, information, techniques and/or interventions that can promote the optimal health of individuals and families in Oregon, nationally, and worldwide. A thesis based on original research is required for the MS and PhD degree programs.

Since nutrition builds upon the natural sciences, entering graduate students should have a strong background in chemistry, physiology, nutrition, statistics, and biochemistry.

Depending upon their concentration, graduates are prepared for positions in academic research and teaching or research and development in industry or government.

Information on the nutrition graduate program graduate fellowships and assistantships is available at the website: <http://health.oregonstate.edu/degrees/graduate/nutrition>, click on the "Application and Admission Requirements" link.

For additional information about the college and school, visit the website at <http://health.oregonstate.edu/about/>.

PUBLIC HEALTH (MPH, PhD)

Graduate Areas of Concentration *Biostatistics (MPH only); environmental and occupational health and safety (MPH, PhD); epidemiology (MPH only); health management and policy (MPH only); health policy (PhD only); health promotion and health behavior (MPH, PhD); international health (MPH only)*

The PhD and MPH in public health degree programs are summarized below.

For further information about public health graduate programs, contact 541-737-3825 or visit the Public Health major website at <http://health.oregonstate.edu/degrees/graduate/public-health>.

Doctor of Philosophy (PhD) in Public Health

The PhD in Public Health is for individuals who wish to prepare themselves for careers in university teaching, research, consulting, policy development, or other high-level public health positions. There are currently three areas of concentration offered for the PhD degree:

1. Environmental and occupational health and safety;
2. Health policy;
3. Health promotion and health behavior.

A master's degree in a relevant field is required before admission into the PhD program.

The PhD program consists of a minimum of 109 credits, including at least 36 graduate credits devoted to preparation of the thesis. Doctoral students take courses in research and quantitative methods, theory, ethics, and their area of emphasis. Each student and his or her doctoral committee jointly determine the student's specific program of doctoral study. This process allows students to design a course of study uniquely suited to their particular needs and career goals. Further information about these requirements is available in the PhD in Public Health website and PhD handbook at <http://health.oregonstate.edu/degrees/graduate/public-health/phd-program>.

Master of Public Health (MPH)

The Oregon Master of Public Health (OMPH) program is a joint graduate program offered by Oregon State University (OSU), Oregon Health and Sciences University (OHSU), and Portland State University (PSU). Oregon State University offers six tracks in the OMPH Program:

1. Biostatistics Track
2. Environmental and Occupational Health and Safety Track
3. Epidemiology Track
4. Health Management and Policy Track
5. Health Promotion and Health Behavior Track
6. International Health Track

All students in the OMPH must take a common MPH core of five courses in the following areas:

- Biostatistics
- Environmental health
- Epidemiology
- Health behavior
- Health systems organization

In addition, each OMPH track has specific course requirements. The OMPH tracks offered at OSU are summarized below. The minimum number of credits varies by track.

All MPH students must do a 6-credit internship upon completion of their core and track classes. Upon completion of all required course work and the internship, all MPH students must schedule a final oral examination. Students must receive

approval to take the exam from their academic advisors. For MPH students who choose to do a thesis or project, the oral exam will be included as part of the thesis/project defense.

Further information about the OMPH program and tracks can be found at the OMPH website at <http://www.oregonmph.org/> and MPH handbooks at <http://health.oregonstate.edu/degrees/graduate/public-health/graduate-handbooks>.

Total=20 credits

■ EXERCISE AND SPORT SCIENCE COURSES

EXSS 131. INTRODUCTION TO EXERCISE AND SPORT SCIENCE (1).

Overview of the field; career opportunities in exercise and sport science and other professions dealing with the discipline of human movement; orientation to support services. Graded P/N.

EXSS 132. INTRODUCTION TO THE ALLIED HEALTH PROFESSIONS (1).

Overview of allied health professions including physical and occupational therapy, physician assistant, nursing, athletic training and others. Discuss job responsibilities, employment opportunities and educational requirements.

EXSS 158. CARE AND PREVENTION OF ATHLETIC INJURIES (3).

Introduction to the athletic training profession. Lecture and laboratory experiences related to the prevention, assessment, treatment, and rehabilitation of sport-related injuries.

EXSS 159. DIRECTED OBSERVATION IN ATHLETIC TRAINING (1).

Directed observational experiences in the profession of athletic training under the supervision of certified athletic trainers. Gives students a laboratory setting in which to acquire the introductory skills of wound care, taping, range of motion assessment, and modality knowledge. **PREREQS:** EXSS 158

EXSS 194. PROFESSIONAL ACTIVITIES (1-2). Basic movement skills, basic rhythms, track and field.

EXSS 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

EXSS 230. INTRODUCTION TO ADVENTURE PROGRAMS (3). Foundation course for leadership opportunities in the Adventure Leadership Institute (ALI). Provides overview of history, theoretical foundations, and utilization of adventure programs in education, recreation, and therapy.

EXSS 231. GROUP DYNAMICS AND FACILITATION (3). Provides students with the fundamental concepts and theories essential for understanding dynamics that occur in groups in recreation, leisure, and everyday settings.

EXSS 259. ATHLETIC TRAINING PRACTICUM (2). Clinical experiences in athletic training under professional supervision with follow-up seminars. Lec/lab. **PREREQS:** EXSS 159 and admission into the Athletic Training major.

EXSS 265. EMERGENCY MANAGEMENT OF SPORTS TRAUMA (3). Knowledge and skills related to the specialized care required for serious and/or life-threatening sport-related injuries. **PREREQS:** EXSS 158 or equivalent

EXSS 299. SPECIAL TOPICS (1-3). This course is repeatable for a maximum of 24 credits.

EXSS 301. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

EXSS 305. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

EXSS 306. PROJECTS (1-16). This course is repeatable for a maximum of 36 credits. **PREREQS:** Departmental approval required.

EXSS 307. SEMINAR (1-3). Section 2: Seminar Pre-Internship (1 credit). This course is repeatable for a maximum of 3 credits.

EXSS 311. MOTOR BEHAVIOR (4). Underlying mechanisms and factors affecting movement function, skill acquisition, and changes in movement behavior across the lifespan. **PREREQS:** Z 332

EXSS 312. *SOCIOCULTURAL DIMENSIONS OF PHYSICAL ACTIVITY (3). Physical activity in contemporary society. Relationships with the social processes; interrelationships between physical activity and cultural institutions. (Bacc Core Course) **PREREQS:** Social processes course.

EXSS 313. LIFESPAN MOTOR DEVELOPMENT (4). Physical, neurological and physiological changes occurring throughout childhood and adolescence and their resultant effects upon motor skill learning and performance. Lec/lab. **PREREQS:** Junior standing.

EXSS 321. BIOMECHANICS OF HUMAN MOVEMENT (4). Integration of the physical laws and anatomical structures governing human movement; qualitative analytical processes emphasized. **PREREQS:** Z 331 and Z 341 and MTH 112

EXSS 322. ANATOMICAL KINESIOLOGY (4). Anatomical aspects of human movement; actions of bones and muscles in motor activities. Lec/lab. **PREREQS:** (Z 331 and Z 341)

EXSS 323. BIOMECHANICS OF SPORT AND EXERCISE (4). The physical laws and mechanical aspects governing human motor function; analytical processes emphasized. Lec/lab. **PREREQS:** (Z 331 and Z 341 and PH 201)

EXSS 324. EXERCISE PHYSIOLOGY (4). Physiological effects of acute and chronic exercise; factors affecting human performance; exercise training principles. **PREREQS:** Z 333 and

CH 121 and CH 122 and (CH 123 or CH 130) and Z 331 or equivalent

EXSS 325. FITNESS ASSESSMENT AND EXERCISE PRESCRIPTION (2). Introduction to lab- and field-based physical fitness assessments and the skills needed to design safe and effective exercise programs for apparently healthy adults. Lec/lab. **PREREQS:** EXSS 324

EXSS 333. EXERCISE AND SPORT SCIENCE PRACTICUM (2). Field experience under professional supervision. This course is repeatable for a maximum of 4 credits. **PREREQS:** Departmental approval required.

EXSS 334. EXERCISE AND SPORT SCIENCE PRACTICUM (2). Field experience under professional supervision. This course is repeatable for a maximum of 4 credits. **PREREQS:** Instructor approval.

EXSS 335. EXERCISE AND SPORT SCIENCE PRACTICUM (2). Field experience under professional supervision. This course is repeatable for a maximum of 4 credits. **PREREQS:** Instructor approval.

EXSS 340. ORGANIZATION OF SPORT PROGRAMS (3). Organizational theory of youth and adult sport programs in a variety of environments; includes competition schemes; requires application of theory to a specific activity experience. **PREREQS:** Sophomore standing.

EXSS 343. PRE-THERAPY/ALLIED HEALTH SEMINAR (1). Provides knowledge in professional school preparation and current issues related to the allied health professions. **PREREQS:** Overall GPA of 3.0; grade of C or better in EXSS 132; Grade of C or better and average of 2.7 in Z 331, Z 332, Z 333, Z 341, Z 342, Z 343. Instructor/school approval.

EXSS 344. PRE-THERAPY/ALLIED HEALTH PRACTICUM (2). Clinical field experiences under the supervision of a licensed professional in the allied health or related setting enhanced with classroom discussion. **PREREQS:** Overall GPA of 3.0; grade of "C" or better in EXSS 132; grade of "C" or better and average of 2.7 in Z 331, Z 332, Z 333, Z 341, Z 342, Z 343. Instructor/school approval. **COREQS:** EXSS 343

EXSS 345. ALLIED HEALTH PRACTICUM (2). Field experience under professional supervision in an allied health or related setting. Includes arranged consultations with the instructor to discuss current issues related to the allied health professions. **PREREQS:** overall GPA 2.75. Departmental approval required.

EXSS 350. ORTHOPEDIC ASSESSMENT OF UPPER EXTREMITY INJURIES (4). Mastery of educational competencies and clinical proficiencies associated with medical history taking, evaluation, diagnosis and treatment of sports-related upper extremity and cervical spine injuries and conditions. Lec/lab. **PREREQS:** (EXSS 158 and Z 331 and Z 341) and instructor approval if not admitted to the Athletic Training major.

EXSS 351. ORTHOPEDIC ASSESSMENT OF LOWER EXTREMITY INJURIES (4). Mastery of educational competencies and clinical proficiencies associated with medical history taking, evaluation, diagnosis and treatment of sports-related lower extremity and lumbar spine injuries and conditions. Lec/lab. **PREREQS:** EXSS 350

EXSS 353. PHYSICAL EDUCATION TEACHER EDUCATION PRACTICUM (2). Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting. **PREREQS:** OSU GPA 2.00, EXSS GPA 2.50, PETE GPA 2.25, and departmental approval required.

EXSS 354. PHYSICAL EDUCATION TEACHER EDUCATION PRACTICUM (2). Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting. **PREREQS:** OSU

GPA 2.00, EXSS GPA 2.50, PETE GPA 2.25, EXSS 353 and departmental approval required. Should also concurrently enroll in either EXSS 360 or EXSS 420.

EXSS 355. PHYSICAL EDUCATION TEACHER EDUCATION PRACTICUM (2). Supervised K-12 physical education field experience with seminars. May include one instructor-approved coaching experience in school setting. **PREREQS:** OSU GPA 2.00, EXSS GPA 2.50, PETE GPA 2.25, EXSS 354. Departmental approval required. Should also concurrently enroll in either EXSS 360 or EXSS 420.

EXSS 358. ATHLETIC TRAINING PRACTICUM (2). Clinical experiences in athletic training under professional supervision with follow-up seminars. Lec/lab. **PREREQS:** (EXSS 350 and EXSS 351) and admission into the Athletic Training major.

EXSS 359. ATHLETIC TRAINING PRACTICUM (2). Clinical experiences in athletic training under professional supervision with follow-up seminars. Lec/lab. **PREREQS:** (EXSS 350 and EXSS 351) and admission to the Athletic Training major.

EXSS 360. SPORT SKILL ANALYSIS I (2). Introduction to a variety of sports skills; opportunities for sports skill analysis. Focus is on identifying and assessing the critical elements of skills.

EXSS 361. SPORT SKILL ANALYSIS II (2). Introduction to a variety of sport skills; opportunities for sport skill analysis. Focus is the "Teaching Games for Understanding" (TGUFU) approach to teaching movement skills.

EXSS 362. SPORT SKILL ANALYSIS III (2). Introduction to a variety of sport skills; opportunities for sport skill analysis. Focus is the Sport Education approach that emphasizes learning through sport.

EXSS 365. EMERGENCY MANAGEMENT OF SPORTS TRAUMA (3). Knowledge and skills related to the specialized care required for serious and/or life-threatening sport-related injuries. **PREREQS:** EXSS 351 and admission to the Athletic Training major.

EXSS 370. PSYCHOLOGY OF SPORT AND PHYSICAL ACTIVITY (3). Interaction between psychological variables and human motor performance.

EXSS 371. MEASUREMENT AND DATA ANALYSIS IN EXERCISE SCIENCE (4). Elementary statistical methods and evaluation techniques applied to Exercise and Sport Sciences. Lec/lab. **PREREQS:** (MTH 111 or MTH 112)

EXSS 380. THERAPEUTIC MODALITIES (4). Indications, contraindication, techniques, and effects of various physical agents used in the care and treatment of musculoskeletal injuries and diseases. **PREREQS:** Admission to the Athletic Training option or enrollment in a pre-therapy program in the Department of Nutrition and Exercise Sciences or College of Science.

EXSS 381. ^ANALYSIS OF CRITICAL ISSUES IN EXERCISE AND SPORT SCIENCE (3). Review current literature, professional issues, and societal interrelationships in EXSS. The course emphasizes writing as a tool for learning and the products of writing. (Writing Intensive Course) **PREREQS:** Junior standing.

EXSS 385. THERAPEUTIC EXERCISE (4). Principles and techniques of therapeutic exercise; rehabilitative activities and programs for musculoskeletal injuries, conditions, and diseases. Lec/lab. **PREREQS:** EXSS 322 and .

EXSS 394. PROFESSIONAL ACTIVITIES: RESISTANCE TRAINING PROGRAM DESIGN (2). Presents the conceptual basis for optimizing resistance training program designs, exercise routines for all ages and fitness levels, correct exercise technique. Lec/lab. **PREREQS:** EXSS 324

EXSS 395. PROFESSIONAL ACTIVITIES: GROUP FITNESS (2). Application of

biomechanical, physiological, psychological and safety principles for the development of group exercise classes in a variety of modes and settings. Lec/lab. **PREREQS:** (EXSS 324 and EXSS 325*)

EXSS 396. PROFESSIONAL ACTIVITIES: AQUATICS (2). Aquatic overview; emphasis on underlying hydrodynamic principles; includes safety, survival, stroke mechanics, aquatic exercise, training, games; certification opportunity in ARC Basic Water Rescue. Lec/lab/activity. **PREREQS:** PAC 250 or comparable skills.

EXSS 399. SPECIAL TOPICS (1-3). This course is repeatable for a maximum of 18 credits.

EXSS 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

EXSS 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits.

EXSS 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

EXSS 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

EXSS 407. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits.

EXSS 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

EXSS 410. INTERNSHIP (3-15). Planned experiences at selected cooperating agencies, companies or institutions; supervised by university and program personnel; supplementary conference, reports and appraisal required. This course is repeatable for a maximum of 16 credits. **PREREQS:** Completion of required courses, cumulative EXSS program GPA of 2.25 and EXSS overall GPA of 2.50, completion of 165 credits or departmental approval.

EXSS 411. MOVEMENT SKILL LEARNING AND CONTROL (3). Motor control and learning, including neural and mechanical mechanisms underlying motor behavior and application of theoretical concepts to instructional and clinical settings. **PREREQS:** EXSS 322

EXSS 414. PHYSICAL ACTIVITY AND AGING (3). Examination of structural, physiological, psychological, and functional changes occurring during late adulthood and implications for the planning, implementation, and evaluation of physical activity programs for the older adult population.

EXSS 420. PHYSICAL ACTIVITY FOR CHILDREN (3). Elementary school physical education practices with an emphasis on effective instructional strategies and developmentally appropriate activities for children ages 5-12.

EXSS 421. PHYSICAL ACTIVITY FOR ADOLESCENTS (3). Introduction for prospective teachers in physical education in recent trends and developments in delivery of physical education programs at secondary school levels.

EXSS 434. APPLIED MUSCLE PHYSIOLOGY (3). Skeletal muscle structure, function, and metabolism; applications to muscle fatigue, exercise training, inactivity, and aging. **PREREQS:** EXSS 324

EXSS 435. PHYSICAL ACTIVITY PROMOTION (3). Application of behavioral science and public health research to the promotion of physical activity in individuals, groups and communities. **PREREQS:** EXSS 370

EXSS 436. EXERCISE MANAGEMENT OF CHRONIC DISEASE (3). Use of exercise to manage chronic disease and limit disease progression, including disease effects on exercise capacity and adaptation to training. Design

and implementation of appropriate exercise prescriptions at the population and individual level. **PREREQS:** EXSS 325

EXSS 444. ADAPTED PHYSICAL ACTIVITY (4). Overview of cognitive, neuromuscular, sensory and orthopedic impairments; design and implementation of physical activity programs for individuals with disabilities. Lec/lab. **PREREQS:** EXSS 411 and EXSS 324

EXSS 452. ATHLETIC TRAINING PROGRAM MANAGEMENT (3). Administrative aspects of athletic training program management, including medical-legal issues, personnel, budgetary, record keeping, supply requisition and inventory, and current professional issues. **PREREQS:** Admission to the Athletic Training major.

EXSS 455. *PHARMACOLOGY IN ATHLETIC TRAINING (3). Pharmacology in sports medicine, topics including, but not limited to, the mechanisms and actions of drugs commonly administered and prescribed in sports medicine environments. (Writing Intensive Course) **PREREQS:** EXSS 359 and admission to the Athletic Training Practicum.

EXSS 474. EXERCISE PHYSIOLOGY LAB METHODS (2). Practical experience and projects in exercise physiology lab methods, including measurement of submaximal and maximal oxygen consumption body composition, anaerobic power, and electrocardiography. This course is repeatable for a maximum of 3 credits. **PREREQS:** (EXSS 324 and EXSS 325)

EXSS 475. *POWER AND PRIVILEGE IN SPORT (3). Issues of power and privilege in sport including race, gender, sexual orientation, disability and aggression and the consequences of long held societal norms and stereotypes. (Bacc Core Course) **PREREQS:** EXSS 312 or 6 credits of social science.

EXSS 499. SELECTED TOPICS (1-3). Impact of human movement development on people, their movement behavior, and environment. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 24 credits. **PREREQS:** Senior standing.

EXSS 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

EXSS 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Instructor's approval required.

EXSS 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

EXSS 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

EXSS 507. SEMINAR (1-16). Section 1: Seminar. Graduate research seminar that emphasizes student oral presentations of current research topics in exercise and sport science. One credit required for all graduate students. Section 2: Current Developments (1). Discussion of contemporary issues in the exercise and sport literature. Topics vary by term. Two credits required of all doctoral students. Section 9: International Aspects (1). Discussion of international aspects of study in exercise and sport science. Required of all doctoral students. Graded P/N. This course is repeatable for a maximum of 16 credits.

EXSS 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

EXSS 510. PROFESSIONAL INTERNSHIP: PHYSICAL EDUCATION (1-15). Field experience in which the intern will integrate academic study with classroom teaching experience to learn specific competencies relating to functioning well in the context of the classroom and the school,

and demonstrate this competency through the assessment of work by supervisors and by evidence collected and presented in work samples. This course is repeatable for a maximum of 25 credits.

EXSS 512. APPLIED MOTOR LEARNING (3). Application of research and theory to the teaching of motor skills with emphasis on development of instructional strategies related to modeling, knowledge of results, practice, and motivational aspects of learning. **PREREQS:** EXSS 411

EXSS 515. MOTOR CONTROL AND MOVEMENT DYSFUNCTION (3). Contemporary motor control theories and their application to the development of instructional and training programs for individuals with movement disorders caused by neurological disease and/or trauma. **PREREQS:** EXSS 411 and (EXSS 444 or EXSS 544)

EXSS 523. BIOMECHANICS OF MOTOR ACTIVITIES (3). Kinematic and kinetic analysis of volitional human movement with emphasis on analytical techniques and quantitative problem solving. **PREREQS:** EXSS 323 or PH 201

EXSS 525. BIOMECHANICS OF MUSCULOSKELETAL INJURY (3). Mechanical causes and effects of forces applied to the musculoskeletal system, material properties of human tissues, pathomechanics of injury, and degenerative changes across the lifespan. Not offered every year.

EXSS 531. ORTHOPEDIC SPORTS MEDICINE: LUMBAR SPINE INJURIES (3). Lecture and discussion of lumbar spine functional anatomy, biomechanics of movement and assessment of sports-related musculoskeletal injuries and conditions.

EXSS 533. ENERGETICS AND BIOCHEMISTRY OF EXERCISE (3). Metabolic and energetic responses to acute and chronic physical activity; emphasis on recent research. **PREREQS:** Undergraduate course in biochemistry or exercise physiology.

EXSS 534. MUSCLE PHYSIOLOGY AND PLASTICITY (3). Physiological, metabolic, and molecular aspects of muscle contraction; muscle plasticity in response to mechanical loading, exercise, aging, injury, and disease. **PREREQS:** EXSS 324

EXSS 536. EXERCISE MANAGEMENT OF CHRONIC DISEASE (3). Use of exercise to manage chronic disease and limit disease progression, including disease effects on exercise capacity and adaptation to training. Design and implementation of appropriate exercise prescriptions at the population and individual level. **PREREQS:** EXSS 325

EXSS 544. ADAPTED PHYSICAL ACTIVITY (4). Overview of cognitive, neuromuscular, sensory and orthopedic impairments; design and implementation of physical activity programs for individuals with disabilities. **PREREQS:** EXSS 411 and EXSS 324

EXSS 547. INCLUSION IN PHYSICAL ACTIVITY (3). Effectiveness of physical activity programs provided in inclusive settings. This will include a lifespan/noncategorical approach to program development. **PREREQS:** EXSS 444 or equivalent

EXSS 548. ASSESSMENT AND PROGRAMMING FOR SPECIAL POPULATIONS (3). Use of appropriate assessment procedures for developing effective psychomotor programs for the disabled. **PREREQS:** EXSS 444 and EXSS 471

EXSS 549. PHYSICAL ACTIVITY FOR PERSONS WITH SEVERE DISABILITIES (3). Plan, develop and implement appropriate physical activity programs, functional program design, assistive technology, instructional strategies, behavior management practices, and data analysis systems that address the needs for psychomotor performance of persons with low incidence disabilities. **PREREQS:** EXSS 444 or EXSS 544

EXSS 550. HEALTH PROMOTION FOR PEOPLE WITH DISABILITIES (3). Discussion will focus on disability and health, theory driving health promotion program development, guidelines for developing a program for individuals with disabilities, and program evaluation.

EXSS 551. CURRENT TRENDS AND ISSUES IN PHYSICAL EDUCATION (4). Current trends and issues in physical education, including curriculum development, professional ethics, instructional practices, and physical activity for the school community. **PREREQS:** Admission to the MS-PETE Program.

EXSS 552. ANALYSIS OF MOVEMENT SKILLS (3). Isolating and analyzing movement tasks; organizing tasks into teachable components; arranging sequences into logical progressions for students; using information feedback to refine skills; extending, refining, and applying movement tasks. **PREREQS:** Admission to the MS-PETE Program.

EXSS 553. INSTRUCTIONAL ANALYSIS TECHNIQUES I (3). Introduction to techniques of instructional analysis. Provides in-depth information and training in systematic observation techniques, raw data conversion and inter/intraobserver reliability. **PREREQS:** Admission to the MS-PETE Program.

EXSS 554. INSTRUCTIONAL ANALYSIS TECHNIQUES II (3). Laboratory/seminar experience to accompany student teaching winter and spring terms. Provides continued application of systematic observation techniques throughout the elementary student teaching experience. **PREREQS:** Admission to the MS-PETE Program.

EXSS 555. SKILL ANALYSIS AND ASSESSMENT IN K-12 (3). Develop proficiency in assessing movement skills, execution of sport techniques, and game play performance. Assessment trends and practices utilized in physical education programs is included. **PREREQS:** Admission to MS-PETE Program.

EXSS 556. INSTRUCTIONAL SKILLS I (3). Skills of planning, implementing, and evaluating programs of instruction in physical education, grades K-12. **PREREQS:** Admission to the MS-PETE Program.

EXSS 557. INSTRUCTIONAL SKILLS II (2). Applying and refining skills of planning, implementing and evaluating programs of instruction in physical education, grades K-12. **PREREQS:** Admission to the MS-PETE Program.

EXSS 558. PHYSICAL EDUCATION CURRICULUM DESIGN AND ORGANIZATION (3). Curricular programs and variations from kindergarten through grade 12, administrative policies and practices. **PREREQS:** Admission to the MS-PETE Program.

EXSS 559. THE PHYSICAL EDUCATOR AS A PROFESSIONAL (1). Transitioning to teaching, developing a portfolio, certification, obtaining a position, teacher burnout, professionalism, problems of first-year teachers, developing patterns of behavior that lead to a successful career. **PREREQS:** Admission to the MS-PETE Program.

EXSS 560. MOTIVATION IN PHYSICAL ACTIVITY (3). A social psychological approach to understanding the role of self-perceptions and cognitions in explaining motivated behavior in the sport and exercise settings. **PREREQS:** EXSS 370

EXSS 561. PSYCHOSOCIAL FACTORS IN PHYSICAL ACTIVITY (3). A social psychological approach to understanding the role of social interactions and contextual factors in explaining human behavior in the sport and exercise settings. **PREREQS:** EXSS 560

EXSS 562. LIFESPAN SPORT AND EXERCISE PSYCHOLOGY (3). Social-psychological issues across the lifespan in the context of sport and exercise. **PREREQS:** EXSS 561

EXSS 573. MEASUREMENT IN HUMAN MOVEMENT (3). Measurement theory applied to the study of human movement. Principles and methods for assessing validity and reliability of norm-referenced and criterion-referenced tests in the motor domain. **PREREQS:** EXSS 471 and ST 511

EXSS 575. RESEARCH IN HUMAN MOVEMENT (3). Investigation and evaluation of research methods applicable to human movement study and professional physical education. **PREREQS:** EXSS 471 and ST 511

EXSS 599. SPECIAL TOPICS (1-3). Impact of human movement development on people, their movement behavior, and environment. Topics vary from term to term and year to year. May be repeated for credit when topics differ. This course is repeatable for a maximum of 99 credits. **PREREQS:** Graduate standing.

EXSS 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

EXSS 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Instructor's approval required.

EXSS 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

EXSS 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

EXSS 607. SEMINAR (1-16). Section 1: Graduate Research (1); Seminar emphasizes student oral presentations of current research topics in exercise and sport science. One credit required of all graduate students. Section 3: Current Developments (1); Discussion of contemporary issues in the exercise and sport science literature. Topics vary by term. Two credits required of all doctoral students. Section 9: International Aspects (1); Discussion of international aspects of study in exercise and sport science. Required of all doctoral students. Graded P/N. This course is repeatable for a maximum of 16 credits.

EXSS 699. SPECIAL TOPICS (1-16). Current issues, trends, and topics in EXSS research. May be repeated for credit with different topics. This course is repeatable for a maximum of 25 credits.

EXSS 808. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits.

■ PUBLIC HEALTH COURSES

H 100. INTRODUCTION TO PUBLIC HEALTH (4). A basic overview of public health. Uses a mix of lectures, guest speakers, classroom activities and homework to help students understand the role of public health in eliminating health disparities, understanding epidemics, and setting policy.

H 120. *HEALTH AND CULTURE: USING THEATRE TO PROMOTE HEALTH (3). A fun and interactive way to promote safer sex and communication with your partner, cultural awareness, healthy body image, responsible drinking, and other health issues. Course work focuses on the major health and social issues facing college students, health disparities, cultural differences in health beliefs and behaviors, acting techniques and performance preparation skills. (Bacc Core Course)

H 199. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

H 210. *INTRODUCTION TO THE HEALTH CARE SYSTEM (3). Provides tools to understand and critically assess the health care delivery system, its components, and the challenges created by its structure. The health care system will be considered from the perspective of several main players [e.g., patients, hospitals, doctors, health plans]. (Bacc Core Course)

H 220. INTRODUCTION TO HEALTH DATA ANALYSIS (3). Introduction to the application of biostatistics and probability to the health sciences. Topics include quantitative analysis and inference, statistical methods in the biosciences, and quantitative study to evaluate and control health problems. **PREREQS:** MTH 105 or MTH 111 or higher mathematics.

H 225. *SOCIAL AND INDIVIDUAL HEALTH DETERMINANTS (4). Overview of the macro (social/system/environmental) and micro (individual) contributors to premature disease, disability and population health. Selected behavioral theories supporting health risks and strategies for the prevention of premature disease/disability and the promotion of health. (Bacc Core Course)

H 250. INTRODUCTION TO HEALTH CARE MANAGEMENT (3). Participants will learn key principles, practices and personalities of health care management. The content is broadly applicable to health care enterprises of every kind: public health organizations, physician practices and clinics, hospitals and health systems, agencies and service organizations, for-profit firms, not-for-profit enterprises, etc. **PREREQS:** H 210*

H 309. PRACTICUM IN HEALTH CARE SERVICES (3-6). Supervised work experience in a health care service setting or health-related agency or program. Weekly progress reports and post-experience summary report and evaluation will be expected. Preplanned with instructor approval. Open to health care administration majors. Graded P/N. This course is repeatable for a maximum of 12 credits. **PREREQS:** Junior standing. Instructor consent required.

H 310. HEALTH FIELD EXPERIENCES (3-6). Introductory field experience in a health or health-related worksite. Graded P/N. This course is repeatable for a maximum of 12 credits. **PREREQS:** H 225 and H 210 and H 220 and junior standing.

H 312. *AIDS AND SEXUALLY TRANSMITTED DISEASES IN MODERN SOCIETY (3). Fundamental principles relating to etiology, nature, prevention, and control of AIDS and other sexually transmitted diseases in contemporary society; emphasis on social, psychological, legal, economic, and ethical issues surrounding these diseases. (Bacc Core Course)

H 319. INTRODUCTION TO HEALTH POLICY (3). Describe the policy development process, including problem conceptualization, agenda setting, role of interest groups and public opinion, analysis of alternatives and selection of policy alternative. **PREREQS:** H 210

H 320. INTRODUCTION TO HUMAN DISEASE (3). Fundamental principles relating to etiology, nature, prevention, and control of communicable and noncommunicable diseases in human populations. Special emphasis on disease prevention and health promotion in the high risk diseases of modern, industrialized society.

H 344. FOUNDATIONS OF ENVIRONMENTAL HEALTH (3). Introductory course examining environmentally-linked disease, and health effects associated with toxic substances, food quality, pesticides, air, water, and noise pollution, and solid/hazardous wastes.

H 349. PEER HELPER SKILLS DEVELOPMENT (3). Prepares the student for an active role as a peer helper in alcohol and drug abuse prevention and health education. Course work will include: drug, alcohol, addiction and other related health issues, basic listening and communication skills, conflict resolution, crisis recognition and referral. A major component will be affective learning situations designed to promote self-awareness and personal growth.

H 364. DRUGS, SOCIETY AND HUMAN BEHAVIOR (3). Drug use and abuse; theories of addiction; basic principles of drug action regarding

the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual's value orientation, decision-making, and self-responsibility in treatment and educational approaches to prevention. **PREREQS:** (PSY 201 or PSY 202)

H 364H. DRUGS, SOCIETY AND HUMAN BEHAVIOR (3). Drug use and abuse; theories of addiction; basic principles of drug action regarding the use of sedative and stimulative compounds; alcohol; opiates; hallucinogens; designer drugs; cocaine; and over-the-counter products. Particular emphasis on the role of the individual's value orientation. **PREREQS:** (PSY 201 or PSY 202) and Honors College approval required.

H 385. SAFETY AND HEALTH STANDARDS AND LAWS (3). Emphasis on the Occupational Safety and Health Act; study includes the scope and duties under the act, enforcement, and adjudication procedures and OSHA litigation; components of Oregon-OSHA.

H 399. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

H 399H. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Honors College approval required.

H 401. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor's consent required.

H 402. INDEPENDENT STUDY (1-16). This course is repeatable for a maximum of 16 credits.

H 403. THESIS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor's consent required.

H 405. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor's consent required.

H 406. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor's consent required.

H 407. SEMINAR (2). Seminar to prepare students for their internship in public health. This course is repeatable for a maximum of 6 credits. **PREREQS:** HMP (Health Management Promotion) option students are required to take H 436 in preparation and hold junior standing. HPHB (Health Promotion and Health Behavior) option students are required to take H 225 and H 320 and hold junior standing.

H 407H. SEMINAR (2). Seminar to prepare students for their internship in public health. This course is repeatable for a maximum of 6 credits. **PREREQS:** HMP (Health Management Promotion) option students are required to take H 436 in preparation and hold junior standing. HPHB (Health Promotion and Health Behavior) option students are required to take H 225 and H 320 and hold junior standing. Honors College approval required.

H 408. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Instructor consent required.

H 409. PRACTICUM (1-6). Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior standing and departmental approval.

H 410. INTERNSHIP (1-12). Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N. This course is repeatable for a maximum of 24 credits. **PREREQS:** For Health Promotion and Health Behavior students only: H 225, H 320, H 407, H 449 and H 476; junior standing and instructor approval.

H 418. PUBLIC HEALTH ETHICS AND ISSUES (3). Current ethical issues in public health, including gender and ethnicity in employment, pharmaceutical controls, product liability, advertising, and export of high technology. **PREREQS:** Senior standing.

H 421. MENTAL HEALTH (3). Examination of social, governmental, legal and individual mental health issues. Brief overview of some major mental disorders. **PREREQS:** (H 225 and H 320) and junior standing.

H 422. HEALTH, AGING AND CONTROL OF CHRONIC DISEASES (4). Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging. **PREREQS:** 9 credits of health course work.

H 425. FOUNDATIONS OF EPIDEMIOLOGY (3). Measures of disease frequency; measures of effect; association and causation; sources of inaccuracy; experimental and observational study designs. **PREREQS:** (H 220 or ST 201) and junior standing.

H 429. INTERNATIONAL HEALTH (3). Overview of the epidemiological, economic, political, sociological, and cultural factors that impact on international health. Special emphasis on the methods of prevention/intervention utilized in coping with health problems on an international level. **PREREQS:** Senior standing.

H 431. HEALTH CARE MARKETING (3). Principles, elements and methods of marketing health care services. Role of the consumer, governing body, administration and medical staff as well as impact of professional ethics.

H 432. ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE (3). Application of economic principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets. **PREREQS:** ((ECON 201 or ECON 201H) and H 210 and H 457) and junior standing.

H 434. HEALTH CARE LAW AND REGULATION (3). Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access. (Writing Intensive Course) **PREREQS:** (H 210 and H 250) and Admission to HMP program and junior standing.

H 436. ADVANCED TOPICS IN HEALTH CARE MANAGEMENT (3). Covers how health services are governed and organized; how health care organizations assess and adapt to change; constraints/opportunities in shaping organizational performance; leadership; strategic decision-making and the use of evidence-based management in health care. **PREREQS:** (H 210 and H 250) and junior standing.

H 445. OCCUPATIONAL HEALTH (3). Current and historical topics in the area of occupational health, with particular emphasis on the types of materials that produce human health effects; clinical and epidemiologic data used to assess the public health importance of occupational pollutants and to evaluate control strategies. (Bacc Core Course)

H 448. ENVIRONMENTAL & OCCUPATIONAL TOXICOLOGY & RISK ASSESSMENT (3). Introduction to the basic principles of toxicology and risk assessment as they apply to environmental and occupational health. **PREREQS:** One year basic college chemistry and biology and two terms organic chemistry.

H 449. MASS MEDIA AND HEALTH (3). Designed to examine the effects of mass media on population health, from the negative impact of advertising of cigarettes, alcohol and junk food,

to the (hopefully) positive impact of public-health campaigns. **PREREQS:** (H 225 and H 320) and junior standing.

H 456. STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS (3). Theories and methodologies of long-range planning and strategic management in health care organizations. **PREREQS:** Admission to HMP program.

H 457. FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS (3). Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies. **PREREQS:** (H 210 and H 250)

H 458. REIMBURSEMENT MECHANISMS (3). Introduces and analyzes the different types of healthcare reimbursement methodologies used in the U.S. health care system. **PREREQS:** H 210 and junior standing.

H 461. SEXUALITY: A HEALTH SCIENCE PERSPECTIVE (3). Exploration of the meaning of sexuality from a variety of contemporary health science perspectives; aspects of sex and sexuality fundamental to total health; issues central to the health educator role examined. **PREREQS:** Senior standing.

H 465. PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES (3). Public health approach to the identification of women's health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability. (Bacc Core Course) **PREREQS:** 6 credits in public health.

H 467. LONG-TERM CARE ALTERNATIVES (3). Overview of the long-term care alternatives. Comparisons of nursing homes with community based facilities; adult day care centers, respite to hospice facilities, social HMOs and other services; cost, quality of life and practicality are addressed.

H 468. FINANCING AND ADMINISTRATION OF LONG-TERM CARE (3). Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management. **PREREQS:** Admission to HMP program.

H 474. PUBLIC HEALTH AND VIOLENCE IN SOCIETY (3). Examination of violence as a major public health issue. Historical, social, environmental, economic, behavioral and psychological aspects of assaultive violence, spousal abuse, rape and sexual assault, child abuse, child sexual abuse, suicide, the effects of the media on violence, drug abuse and violence, and related public health problems in contemporary American society. Emphasis on health and the efficacy of current efforts aimed at ameliorating these problems and potential for alternative public health models for prevention and intervention.

H 476. PLANNING AND EVALUATING HEALTH PROMOTION PROGRAMS (4). A systematic approach to planning, implementing and evaluating health promotion programs in a variety of health related settings. Students will be writing a series of drafts to effectively develop a health promotion program plan. (Writing Intensive Course) **PREREQS:** (H 225 and H 320) and at least junior standing.

H 477. DIETARY INTERVENTIONS FOR PUBLIC HEALTH (3). A public health perspective on the practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/educators. CROSSLISTED as NUTR 477/NUTR 577. **PREREQS:** NUTR 225

H 489. EMERGENCY AND DISASTER MANAGEMENT (3). Study of preparedness, response, recovery and business resumption

strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 491. SELECTED TOPICS (1-3). Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year. This course is repeatable for a maximum of 6 credits. **PREREQS:** Senior standing.

H 491H. SPECIAL TOPICS (1-3). Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year. This course is repeatable for a maximum of 6 credits. **PREREQS:** Senior standing and Honors College approval required.

H 494. APPLIED ERGONOMICS (3). Principles of occupational ergonomics for managing optimal worker performance and well-being.

H 495. DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH (3). Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes. **PREREQS:** Junior or senior standing.

H 501. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 503. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Instructor approval required.

H 505. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 506. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 507. SEMINAR (1-16). Section 1. Internship (1). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 508. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 509. PRACTICUM (1-16). Supervised work experience in a public health or health care administration setting. Open to majors in public health. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Senior standing and departmental approval.

H 510. INTERNSHIP (1-16). Directed field experience with participation in a community, worksite, or health agency program. Experience is individually arranged to meet student needs. Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Graduate standing in Public Health Department, instructor approval required, departmental approval required.

H 512. INTRODUCTION TO ENVIRONMENTAL & OCCUPATIONAL HEALTH SCIENCES (3). Introduction to environmental and occupational health. Hazards affecting human health are examined in the context of current social, political and regulatory pressures.

H 514. ENVIRONMENT, SAFETY AND HEALTH SEMINAR (1). One-credit graduate seminar on current topics of interest and importance to the environmental health and occupational safety field. Critical reading of research publications, discussion of controversial issues facing ESH professionals, and/or presentation of current ESH research. This course is repeatable for a maximum of 3 credits.

H 515. RESEARCH METHODS IN SOCIAL AND BEHAVIORAL HEALTH SCIENCES (3). Provides an introduction to quantitative research methods

and design. Topics include definition of research problems and questions, hypothesis generation, research design, sampling, variable definition and measurement, data collection, and ethical considerations. Also provides a brief introduction to qualitative and mixed methods.

H 518. PUBLIC HEALTH ETHICS AND ISSUES (3). Current ethical issues in public health, including gender and ethnicity in employment, pharmaceutical controls, product liability, advertising, and export of high technology. **PREREQS:** Graduate standing.

H 520. HEALTH DISPARITIES (3). Health disparities based on race/ethnicity, culture, social class, and rural/urban residence, among others; strategies to reduce disparities, promote health, and prevent disease in diverse populations.

H 521. MENTAL HEALTH (3). Focus upon mental health policy development, in relation to federal and state government services and regulations, implementation of services.

H 522. HEALTH, AGING AND CONTROL OF CHRONIC DISEASES (4). Epidemiology of the major chronic diseases, risk factors, potential methods of prevention/intervention, ethical issues, and efficacy of current methods of prevention and control. Emphasis on adult populations and public health services, policies, and programs at the local, state, and federal levels designed to promote healthy aging. **PREREQS:** 9 credits of public health course work.

H 523. FOUNDATIONS OF PUBLIC HEALTH (4). Fundamental principles, concepts and tools used in public health to promote the health of populations. Using a combination of case study method, lecture and discussion, students will develop a broad understanding of public health and recognition of how discipline-specializations address the social, behavioral and environmental determinants of public health. **PREREQS:** Graduate standing.

H 524. INTRODUCTION TO BIOSTATISTICS (4). Quantitative analysis and interpretation of health data including probability distributions, estimation of effects, and hypothesis-tests such as Chi-square, one-way ANOVA, and simple linear regression.

H 525. PRINCIPLES OF EPIDEMIOLOGY (4). Introduction to the concepts and methods of epidemiology. Topics include measures of population health, screening, study design, measures of association, and interpretation of epidemiological data.

H 526. EPIDEMIOLOGIC METHODS (3). Principles and methods of epidemiologic analysis; standardization; stratified analysis; confounding and its control; planning and conducting epidemiologic research; role of multivariate analysis in epidemiologic research. **PREREQS:** H 525

H 527. CASE STUDIES IN INTERNATIONAL HEALTH (3). International, public health challenges using case studies from different countries. Includes tropical disease and injury epidemiology in a variety of social, political, and economic contexts. **PREREQS:** Graduate standing.

H 528. GLOBAL HEALTH ISSUES (3). Examines major issues in health developments of global significance, their causes and impacts on international health, and methods and strategies to address them.

H 529. INTERNATIONAL HEALTH (3). Overview of the epidemiological, economic, political, sociological, and cultural factors that impact on international health. Special emphasis on the methods of prevention/intervention utilized in coping with health problems on an international level.

H 530. HEALTH POLICY ANALYSIS (3). Analysis of public policies affecting health care programs, services and organizations and the impact of those programs on citizens; processes by which

health policy proposals are generated, promoted, defeated, modified and implemented.

H 531. HEALTH CARE MARKETING (3). Principles, elements and methods of marketing health care services. Role of the consumer, governing body, administration and medical staff as well as impact of professional ethics.

H 532. ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE (3). Application of economics principles to the health care field: the demand for medical care and insurance, health care suppliers, health care markets. **PREREQS:** ECON 201

H 533. HEALTH SYSTEMS ORGANIZATION (3). Examines the nature of health and health care services and reviews the role of government and the free market on health services. Alternative ways of organizing, financing, and delivery of health care services are explored.

H 534. HEALTH CARE LAW AND REGULATION (3). Legal aspects of health care delivery; tort law and its applications; professional liability and liability insurance; laws relative to health care institutions, cost controls, antitrust and access.

H 536. HEALTHCARE ORGANIZATION THEORY AND BEHAVIOR (3). Administrative practice in health care settings with emphasis on long-term care and acute care services. Provides a framework for health care systems and managerial process and roles. Focus on operations, planning, marketing, human resources, finance, productivity and control as well as emerging trends in health services.

H 538. PUBLIC AND PRIVATE HEALTH INSURANCE (3). Introduction to the principles and practices of public or social and commercial health insurance, and their financial reimbursement mechanisms.

H 539. HEALTH CARE INFORMATION SYSTEMS (3). Information systems in health care institutions, programs, and services; review of managerial information needs and data collection and reporting mechanisms.

H 540. WATER AND HUMAN HEALTH (3). Critically examine the complex relationship between water quality, human activities, and population health.

H 541. AIR QUALITY AND HUMAN HEALTH (3). Examination of the major sources of air pollution, its impact on ecosystems and climate change, and population health. Will also discuss technologies and introduce regulations that are used to control air pollutants.

H 544. ENVIRONMENTAL AND OCCUPATIONAL EPIDEMIOLOGY (3). Examines exposure assessment methodology and epidemiological study designs that are commonly used in environmental and occupational health science in order to characterize the impact of environmental and occupational exposures on population health. **PREREQS:** H 525 and a graduate level statistics course.

H 545. OCCUPATIONAL HEALTH (3). A broad overview of occupational health including recognizing and preventing risks from toxic chemical, radiation and physical hazards in the workplace.

H 546. ENVIRONMENTAL AND OCCUPATIONAL SAMPLING (4). An overview of environmental and occupational sampling principles and practices for anticipating, recognizing, evaluating, and controlling exposures is provided.

H 548. ENVIRONMENTAL & OCCUPATIONAL TOXICOLOGY & RISK ASSESSMENT (3). Introduction to the basic principles of toxicology and risk assessment as they apply to environmental and occupational health. **PREREQS:** One year basic college chemistry and biology and two terms organic chemistry.

H 549. MASS MEDIA AND HEALTH (3). Examines the effects of mass media on population health, from the negative impact of advertising of

cigarettes, alcohol and junk food, to the (hopefully) positive impact of public health campaigns. **PREREQS:** H 571

H 552. DISASTER EPIDEMIOLOGY (3). Describe the impact of natural and manmade disasters on human health, understand epidemiologic methods specific to disasters, and apply fundamental epidemiologic methods to identify and characterize disaster-related adverse health outcomes. **PREREQS:** H 525

H 554. EPIDEMIOLOGY OF AGING (3). An overview of the core principles of the epidemiology of aging is provided. There will be an emphasis on health and disease processes in older adults. Students will learn essential study design and analytic issues that may arise in studies of aging. **PREREQS:** H 525

H 555. CANCER EPIDEMIOLOGY (3). Introduction to basic concepts and methodology in cancer epidemiology. **PREREQS:** H 525

H 556. STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS (3). Theories and methodologies of long-range planning and strategic management in health care organizations.

H 557. FINANCIAL MANAGEMENT OF HEALTH CARE ORGANIZATIONS (3). Utilization of standard financial tools needed to manage the capital resources of health care organizations. Includes funding capital projects, product costing, budgeting methods, capital formation and investment strategies. **PREREQS:** H 210 and H 250

H 558. REIMBURSEMENT MECHANISMS (3). Techniques used in cost-effectiveness analysis. Examples are drawn from the public health and health economics literature. **PREREQS:** Graduate standing.

H 559. CONTRACTS AND NEGOTIATION (3). Different negotiation styles and strategies used in healthcare contracting are explored—distributive, integrative, and mixed motive negotiation styles. Students examine various contracts and the role the healthcare administrator plays in a variety of health care settings.

H 560. PUBLIC HEALTH SURVEILLANCE (3). An introduction to public health surveillance systems (national and international) for chronic and infectious diseases. Utility of existing surveillance systems for secondary epidemiological data analysis. **PREREQS:** H 524 and H 525 or instructor's consent.

H 561. SEXUALITY: A HEALTH SCIENCE PERSPECTIVE (3). Exploration of the meaning of sexuality from a variety of contemporary health science perspectives; aspects of sex and sexuality fundamental to total health; issues central to the health educator role examined. **PREREQS:** Graduate standing.

H 562. INFECTIOUS DISEASE EPIDEMIOLOGY (3). Understand epidemiologic methods specific to infectious diseases, apply fundamental epidemiologic methods to infectious disease questions, and describe the broad trends in global infectious disease burden. The application methods and principles will be explored through lectures, discussions, assignments and writing projects. **PREREQS:** H 525

H 564. COMPUTING TOOLS AND HEALTH DATA ANALYSIS (3). Modern computational biostatistics for analyzing health data, emphasizing important technologies and methods for data processing and understanding of how they work. Topics will evolve over time as new procedures are developed. **PREREQS:** (H 524 or HDFS 530)

H 565. PUBLIC HEALTH AND WOMEN: SOCIAL AND POLICY ISSUES (3). Public health approach to the identification of women's health needs in the United States and in other countries as it relates to the intersection of race, ethnicity, social class, sexual orientation, age, and ability. **PREREQS:** 6 credits in public health.

H 566. DATA MINING IN PUBLIC HEALTH (3). An introduction to high-dimensional data analysis and data mining techniques used as an information technology tool to extract previously unknown and potentially useful information from large databases in biology, medicine, and public health. **PREREQS:** H 581 or permission of instructor; H 564 recommended.

H 567. LONG-TERM CARE ALTERNATIVES (3). Overview of the long-term care alternatives. Comparisons of nursing homes with community based facilities; adult day care centers, respite to hospice facilities, social HMOs and other services; cost, quality of life and practicality are addressed.

H 568. FINANCING AND ADMINISTRATION OF LONG-TERM CARE (3). Examines the financing and administration of long term care. Emphasis is on a system-wide overview and specific application to nursing facility management.

H 569. MATERNAL AND CHILD HEALTH (3). Women's reproductive health and health of children stressing causation, management, and prevention of public health problems. Epidemiological analysis of morbidity and mortality in children and women of childbearing age; impact of social, political and economic influences on the health of women and children; comparison of issues and problems of industrialized versus developing nations. Consideration of health issues of interest to the many diverse racial and ethnic groups of women and children in the U.S. as well as the global village.

H 570. WORKFLOW OF DATA ANALYSIS (3). Covers the management of workflow for studies involving data management and coordination including planning the work, documenting activities, creating, validating, and verifying variables, statistical analyses, replicating findings, and archiving work. Emphasizes tight control of data management: making changes to data in a documented and replicable manner. Lec/rec. **PREREQS:** HDFS 532 and /or equivalent or permission of instructor.

H 571. PRINCIPLES OF HEALTH BEHAVIOR (3). Theoretical approaches to behavior change in health promotion/education research and practice; factors influencing health behaviors, ethical behavior change issues, behavioral interventions for special populations.

H 572. COMMUNITY ORGANIZATION FOR HEALTH PROMOTION AND EDUCATION (3). History, theory, and practice of community organizing for health advocacy; focus on group processes, use of media, leadership, coalitions, grass roots methods and social change.

H 573. INTRODUCTION TO MULTILEVEL/ HIERARCHICAL MODELS (3). Introduction to the theory and application of hierarchical models to problems in epidemiology and public health. Hierarchical models will be dealt with using both frequentist and Bayesian frameworks. **PREREQS:** H 581 or permission of instructor.

H 574. PUBLIC HEALTH AND VIOLENCE IN SOCIETY (3). Examination of violence as a major public health issue. Historical, social, environmental, economic, behavioral and psychological aspects of assaultive violence, spousal abuse, rape and sexual assault, child abuse, child sexual abuse, suicide, the effects of the media on violence, drug abuse and violence, and related public health problems in contemporary American society. Emphasis on health and the efficacy of current efforts aimed at ameliorating these problems and potential for alternative public health models for prevention and intervention.

H 575. EVALUATION OF HEALTH PROMOTION AND EDUCATION PROGRAMS (3). Provides theoretical and practical bases for program evaluation. Develops basic skills in a variety of approaches to evaluation, including techniques that are particularly suitable for evaluating health promotion, community health improvement, and

related health and social services programs. Course learning is synthesized through designing an evaluation framework and methodology for a relevant program. **PREREQS:** H 515 and /or instructor consent.

H 576. PROGRAM PLANNING/PROPOSAL WRITING IN HEALTH/HUMAN SERVICES (4). Planning and preparing of proposals for program initiation, financing, delivery and evaluation in health-related settings; emphasis on funding sources, community, individual, and organizational support. **PREREQS:** 9 credits of graduate course work in public health.

H 577. DIETARY INTERVENTIONS FOR PUBLIC HEALTH (3). A public health perspective on the practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/educators. CROSSLISTED as NUTR 477/NUTR 577. **PREREQS:** NUTR 225

H 578. INTRODUCTION TO MOLECULAR EPIDEMIOLOGY I (3). A survey of and introduction to the methods and issues arising in genetics and molecular epidemiology, including key biostatistical methods, study designs, and technologies used in the conduct of these studies. Students will gain experience conducting critical reviews of research papers with respect to study design and biostatistical analysis. **PREREQS:** (H 524 and H 526) and knowledge of and familiarity with basic concepts of molecular biology (DNA replication, transcription, and translation).

H 579. MOLECULAR EPIDEMIOLOGY II (3). An introduction to the data analysis methods arising in genetics and molecular epidemiology. Students will obtain hands-on experience with the analysis of high-throughput data obtained from population-based molecular studies. Lec/lab. **PREREQS:** (H 578 and H 581) and H 564

H 580. LINEAR REGRESSION AND ANALYSIS OF TIME TO EVENT DATA (4). Multiple linear regression analysis for measurement data and survival analysis methods for time to event health data, including modes of inference, diagnostics, model selection, and reporting conclusions. Lec/lab. **PREREQS:** (H 524 or HDFS 530)

H 581. GENERALIZED LINEAR MODELS AND CATEGORICAL DATA ANALYSIS (4). Biostatistical methods focusing on binary and count data will provide a foundation for understanding and implementing generalized linear regression and categorical data models that are commonly used to analyze epidemiological and public health data from cohort, case-control, and clinical trial study designs. Lec/lab. **PREREQS:** H 580

H 582. ANALYSIS OF CORRELATED HEALTH DATA (3). Biostatistical methods for clustered, repeated measures, and longitudinal correlated health data, with an introduction to applications of linear and generalized linear mixed models and generalized estimating equations. **PREREQS:** H 581

H 583. ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT (3). The management principles and practices in the environment, safety and health profession are examined.

H 584. ANALYSIS OF INTERVENTION STUDIES AND CLINICAL TRIALS (3). Principles of data analysis from intervention studies and clinical trials, including professional graphical and tabular presentation, reproducibility and reliability of measurements, and controlling the Type I error rate when analyzing multiple endpoints. Basic principles of designing experiments are also covered including blocking, stratification, interaction, and control of variability. **PREREQS:** (H 524 or HDFS 530)

H 585. ENVIRONMENT, SAFETY AND HEALTH POLICY AND LAW (3). Survey of the environment, safety and health policy and law in the United States. Furnishes the basic knowledge and general understanding about policy and

law-related issues important to all environmental health and safety professionals. **PREREQS:** H 385 or graduate standing.

H 586. BAYESIAN BIOSTATISTICS IN PUBLIC HEALTH (3). An examination of methods for designing and implementing Bayesian analysis to address scientific questions through hands-on experience with health data. This survey course also covers proper interpretation and communication of results from practical Bayesian methods for biostatistics data analysis, with illustrations of the utility of Bayesian ideas in public health. **PREREQS:** H 581

H 587. TIME TO EVENT ANALYSIS OF HEALTH DATA (3). Biostatistical models and methods for survival analysis of time to event data that are routinely encountered in biomedical and health research. **PREREQS:** (H 524 or HDFS 530)

H 588. APPLIED OCCUPATIONAL SAFETY AND HEALTH (3). The management and technical aspects of a workplace safety and health program are identified and assessed. Students completing the course receive a 30-hour OSHA General Industry card.

H 589. EMERGENCY AND DISASTER MANAGEMENT (3). Study of preparedness, response, recovery and business resumption strategies, activities and applications needed to effectively deal with emergency and disaster incidents.

H 591. SELECTED TOPICS (1-3). Recent changes and advances in public health and health care administration and their application to special fields of study. Topics vary from term to term and year to year. This course is repeatable for a maximum of 9 credits. **PREREQS:** Graduate standing.

H 592. SPATIAL BIOSTATISTICS AND EPIDEMIOLOGY (3). Epidemiologic and biostatistical methods for spatial analysis of health data. Topics include risks and rates, types of spatial data, visualizing spatial data, analysis of spatial point patterns, spatial clustering of health events based on case-control studies and based on regional counts, linking spatial exposure data to health events through regression modeling. **PREREQS:** H 581

H 594. APPLIED ERGONOMICS (3). Principles of occupational ergonomics for managing optimal worker performance and well-being.

H 595. DESIGN FOR ENVIRONMENT, SAFETY, AND HEALTH (3). Systematic consideration of environmental, safety, and health concerns at the earliest possible stage in the lifecycle design engineering of products, technologies, and manufacturing processes. **PREREQS:** Graduate standing.

H 599. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 24 credits.

H 601. RESEARCH AND SCHOLARSHIP (1-16). This course is repeatable for a maximum of 16 credits.

H 603. THESIS (1-16). This course is repeatable for a maximum of 999 credits. **PREREQS:** Departmental approval required.

H 605. READING AND CONFERENCE (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 606. PROJECTS (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 607. SEMINAR (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 608. WORKSHOP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 610. INTERNSHIP (1-16). This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

H 612. DOCTORAL SEMINAR IN PUBLIC HEALTH: RESEARCH AND PRACTICE (1). Contemporary research and professional issues specific to the discipline of public health. Includes responsible conduct of research, writing for publication, professional development and leadership, and faculty research in public health. This course is repeatable for a maximum of 9 credits. **PREREQS:** Restricted to public health doctoral students.

H 613. INDEPENDENT RESEARCH PROJECT (1-9). Independent research project for PhD students, including research design, execution or research, and the formal presentation of findings in written form. Student will develop an original research topic based on knowledge and review of the literature in a public health-relevant area of inquiry. Graded P/N. This course is repeatable for a maximum of 9 credits.

H 614. RESEARCH MANUSCRIPT (4). PhD students write a manuscript to submit to a peer-reviewed journal as part of the course requirements. Graded P/N.

H 615. ADVANCED EVALUATION AND RESEARCH DESIGN (3). Provides an in-depth examination of advanced research designs and methods for establishing causal statements about the efficacy, effectiveness and generalizability of public health and social service interventions designed to alter public health and social risk or protective factors. **PREREQS:** H 515 and H 575 or instructor permission.

H 630. ADVANCED TOPICS IN HEALTH POLICY ANALYSIS (3). Survey and analyze the healthcare system in the United States, with an emphasis on new and emerging issues. An important aspect of the course will be to analyze past, present and potential solutions to improve the performance of the U.S. health system. **PREREQS:** H 530

H 632. ECONOMIC ISSUES IN HEALTH AND MEDICAL CARE (3). Demonstrate how economists think about healthcare issues. Emphasis on looking at a wide variety of health-related topics from an economist's perspective. By the end of the course, students should have a sense of how to use economic theory and empirical analysis to evaluate health policy issues.

H 635. COST EFFECTIVENESS ANALYSIS IN HEALTH AND MEDICAL CARE (3). The primary objective of this course is to introduce students to cost-effectiveness studies in health and medical care. Covers the core concepts of CEA, quality adjusted life years, cost calculations, and decision rules.

H 638. PUBLIC AND PRIVATE HEALTH INSURANCE (3). Introduction to the principles and practices of public or social and commercial health insurance, their finance mechanisms, and theoretical foundation behind the selection of certain system of health insurance and finance method. **PREREQS:** H 533

H 639. COMMUNITY-BASED PARTICIPATORY RESEARCH (4). Focuses on initiating and conducting research in partnership with communities. Includes in-depth examination of community-based participatory research (CBPR) elements, principles, theories, and approaches; how researchers can successfully partner with communities; and research with minority and/or underprivileged communities; with examples from environmental health, gerontology, and health promotion. **PREREQS:** 9 credits of public health (H) or human development and family sciences (HDFS) graduate course work.

H 642. ENVIRONMENTAL AND REGULATORY RISK ASSESSMENT (3). Understand concepts, principles and practices in modern risk analysis and how they are utilized to make evidence-based decisions in public health. Focus will be on real world examples of risk assessment by environmental and occupational regulatory agencies.

H 643. SUSTAINABLE DEVELOPMENT AND ENVIRONMENTAL HEALTH (3). Introduction to the concepts and practices of sustainable development by examining the environmental, social, and economic dimensions of human health.

H 659. HEALTH POLICY RESEARCH METHODS (3). Familiarize doctoral students with the health policy research literature and selected questions in the field. The focus is an in-depth exploration of the research methods and technical details of the research literature. **PREREQS:** (H 515 and H 524)

H 671. ADVANCED THEORIES OF HEALTH BEHAVIOR (3). Provides an in-depth examination of major theories of health behavior (both health compromising and health enhancing). **PREREQS:** H 571 or permission of instructor.

H 672. ADVANCED QUALITATIVE METHODS IN HEALTH BEHAVIOR (3). Provides an in-depth examination of the use of qualitative methods in health behavior research and practice. **PREREQS:** H 515 and SOC 518 and HDFS 538; or permission of instructor.

H 673. MEASUREMENT OF HEALTH BEHAVIOR CONCEPTS (4). Provides in-depth study and field work for graduate students in public health and related fields of the methods used in the conceptualization, development, and evaluation of quantitative measures of health behavior and related concepts. **PREREQS:** H 524, H 515, and 3 credits in other quantitative research methods or social behavioral methods (e.g., in sociology or psychology or health promotion or education programs) or equivalents, or permission of instructor.

H 675. DEVELOPMENT OF HEALTH BEHAVIOR INTERVENTIONS (3). Examines the application of social/behavioral theories in health promotion interventions and in conducting intervention research in diverse populations. The course will focus on program development, on implementation strategies, and on translation into practice. **PREREQS:** (H 571 and H 575 and H 576) or equivalents or consent of instructor.

H 676. ADVANCED TOPICS IN HEALTH PROMOTION AND HEALTH BEHAVIOR (3). Examines topics of relevance to health promotion and health behavior. Specific topics include current issues and emerging research findings, with a focus on social and behavior science perspectives, analysis of public health problems, and application of principles and practices of health promotion and health behavior. This course is repeatable for a maximum of 6 credits. **PREREQS:** H 515 and H 571 or permission of instructor.

H 681. ADV TOPICS IN ENVIRONMENTAL & OCCUPATIONAL HEALTH & SAFETY (3). Advanced topics in the environment, safety and health discipline. Content varies with each offering.

H 682. ENVIR & OCCUP HLTH & SAFE: MOVING FROM RESEARCH TO PRACTICE (3). An examination of research transfer models that can be adapted and implemented to environmental and occupational settings. Case studies and content will vary with each course offering.

H 685. RACE, CLASS, CULTURE AND AGING (4). Examines the diversity among the older population in health status, health beliefs/behaviors, and health care, and explores the interaction of culture and structure as determinants of their life chances. The empirical literature used in the course is drawn from the experiences of aging of African-American, Latino, and Asian-Pacific Islander elderly. Taught spring term even years. **CROSSLISTED** as HDFS 685. **PREREQS:** 9 credits of public health or HDFS graduate course work, or permission of instructor.

H 699. SPECIAL STUDIES (1-16). This course is repeatable for a maximum of 16 credits.

HEALTH AND HUMAN SCIENCES

HHS 220. COMMUNITY EDUCATION PROGRAMS AND PRACTICES: EXTENSION SYSTEM (2). Theory and practice of community education programs; evolution of land-grant university outreach programs; emphasis on addressing current issues and engaging diverse audiences through responsive instructional practices; some site visits.

HHS 231. *LIFETIME FITNESS FOR HEALTH (2). Physical activity and positive health behaviors in human health; topics include physical fitness, nutrition, weight control, stress management, addictive behaviors, and sexually transmitted infections. Lec/lab. (Bacc Core Course)

HHS 241. *LIFETIME FITNESS (1). Assessment, evaluation and practice of physical fitness and health behaviors leading to the development of a personal fitness program. (Bacc Core Course)

HHS 242. *LIFETIME FITNESS FOR HEALTH: CARDIO CONDITIONING LAB (1). Assessment, evaluation and practice of physical fitness and health behaviors; development of a personal fitness program with a focus on aerobic exercise. (Bacc Core Course)

HHS 243. *LIFETIME FITNESS: RESISTANCE TRAINING (1). Assessment, evaluation and practice of physical fitness and health behaviors; development of a personal fitness program with a focus on muscular fitness. (Bacc Core Course)

HHS 244. *LIFETIME FITNESS: WEIGHT MANAGEMENT (1). Assessment, evaluation and practice of physical fitness and health behaviors; development of a personal fitness program focusing on maintaining or achieving a healthy body composition. (Bacc Core Course)

HHS 245. *LIFETIME FITNESS: RUNNING (1). Assessment, evaluation and practice of physical fitness and health behaviors; development of a personal fitness program with a focus on running as a physical activity. (Bacc Core Course)

HHS 246. *LIFETIME FITNESS: WALKING (1). Assessment, evaluation and practice of physical fitness and health behaviors; development of a personal fitness program with a focus on walking as a physical activity. (Bacc Core Course)

HHS 247. *LIFETIME FITNESS: AQUATIC EXERCISE (1). Assessment, evaluation and practice of physical fitness and health behaviors; development of a personal fitness program focusing on aquatic exercise as the physical activity. (Bacc Core Course)

HHS 248. *LIFETIME FITNESS: YOGA (1). Assessment, evaluation and practice of physical fitness and health behaviors; development of a personal fitness program with a focus on yoga activities. (Bacc Core Course)

NUTRITION COURSES

NUTR 104. ORIENTATION: NUTRITION AND FOOD MANAGEMENT (1). Identify professional resources, job opportunities, markets and trends. Study academic and professional requirements for successful entry into professional careers in dietetics, food systems management, foods in business, and nutrition science. Graded P/N.

NUTR 199. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

NUTR 216. *FOOD IN NON-WESTERN CULTURE (3). Cultural determinants influencing food habits of humans. Interrelation of eating patterns and socio-cultural, ecological, psychological and economic factors in cross-cultural settings. Roles of men and women in food provision. Lec/rec. (Bacc Core Course)

NUTR 225. GENERAL HUMAN NUTRITION (3). The relationship of food, its nutrients and other components to the promotion of health and fitness with emphasis on the young adult. Current health

concerns on a national and international level. This course is for non-majors; NES majors and those in the health sciences should take NUTR 240.

NUTR 235. SCIENCE OF FOODS (5). Composition, functional properties, and structure of foods, including modified ingredients. Principles underlying preparation of food products of standard quality. Lec/lab. **PREREQS:** (CH 123 or CH 223 or ((CH 263 or CH 263H or CH 273) and (CH 233 or CH 233H))

NUTR 240. HUMAN NUTRITION (3). An introductory nutrition course for exercise science, nutrition, dietetics, food science, and health science majors who have taken general chemistry. Concepts of nutrient metabolism and utilization, nutrient deficiencies and toxicities and their relationship to disease prevention and treatment. **PREREQS:** (CH 121 or CH 224H or (CH 221 or CH 231 or CH 231H)) and may be taken concurrently with NUTR 241.

NUTR 241. APPLICATIONS IN HUMAN NUTRITION (1). Application of nutrition theory from NUTR 240 using a dietary project and hands-on recitation activities. A key focus of the course will be on applying nutrition theory. Rec. **PREREQS:** NUTR 240*

NUTR 299. SPECIAL TOPICS (1-16). This course is repeatable for a maximum of 16 credits.

NUTR 306. PROJECTS (1-16). This course is repeatable for a maximum of 36 credits. **PREREQS:** Departmental approval required.

NUTR 311. FOODSERVICE PRODUCTION AND PURCHASING (4). Food production, purchasing, facility and materials management in foodservice operations. Quantity production styles, safety and sanitation, service methods and equipment. Lec/lab/rec. **PREREQS:** NUTR 235

NUTR 312. *ISSUES IN NUTRITION AND HEALTH (3). Impact of nutrition as one component of complex environmental, behavioral, social, and genetic factors significant to health promotion. Apply scientific knowledge to current health issues of changing dietary patterns, technological development in food products and nutrition controversies. Recognize economic and public policy implications. Lec/rec. (Bacc Core Course) **PREREQS:** (NUTR 225 or NUTR 240) and completion of science requirement in baccalaureate core.

NUTR 319. PROMOTING FOOD AND NUTRITION (3). Strategies in promoting products, services or ideas; negotiating, advertising, public policy, consumer service, social marketing, market research, trends and strategies. Lec/lab. **PREREQS:** (NUTR 240 or NUTR 241)

NUTR 325. NUTRITION THROUGH THE LIFE CYCLE (3). Nutritional needs and concerns in pregnancy and lactation, infancy, childhood, adolescence, adult and later years. **PREREQS:** ((NUTR 240 or NUTR 225) and NUTR 241) and / or equivalent, junior standing recommended.

NUTR 340. PRINCIPLES OF NUTRIENT METABOLISM (3). Cellular mechanism for digestion and utilization of nutrients; structure and function of macronutrients; nutrients and gene expression; relationship of nutrition to human health. **PREREQS:** (NUTR 240 and NUTR 241 and CH 331) and NUTR 241 or equivalents.

NUTR 341. NUTRITION FOR EXERCISE (3). Review the interrelationship between nutrition and exercise, including macronutrient, micronutrient and fluid needs for active individuals. **PREREQS:** (EXSS 324 and NUTR 240)

NUTR 399. SPECIAL TOPICS (1-3). This course is repeatable for a maximum of 16 credits.

NUTR 401. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

NUTR 403. THESIS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits. **PREREQS:** Departmental approval required.

NUTR 405. READING AND CONFERENCE (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 406. SPECIAL PROBLEMS; PROJECTS (1-16). This course is repeatable for a maximum of 16 credits.

NUTR 407. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 408. WORKSHOP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 409. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

NUTR 410. FIELD EXPERIENCE (3-15). Supervised work experience with professional-level responsibilities in community agency or business firm. Supplementary conferences, readings, reports. Supervised by agency/firm and instructor. For advanced students. Applications made and approved term preceding enrollment. Graded P/N. This course is repeatable for a maximum of 50 credits.

NUTR 416. ^CULTURAL ASPECTS OF FOODS (3). Regional, ethnic, and religious influences on food patterns; worldwide trends in food practices. Laboratory experience with foods from several cultures. Lec/lab. (Writing Intensive Course) **PREREQS:** NUTR 235

NUTR 417. HUMAN NUTRITION SCIENCE (4). Application of biochemistry and physiology to nutrition of the individual. **PREREQS:** (NUTR 340 and BB 350) and /or equivalent courses and one physiology course.

NUTR 418. HUMAN NUTRITION SCIENCE (4). Application of biochemistry and physiology to nutrition of the individual. **PREREQS:** NUTR 417 and biochemistry, physiology.

NUTR 419. HUMAN NUTRITION LABORATORY (3). Techniques of nutritional assessment; laboratory experiences covering basic nutrition and chemical assays. Lab fee. Lec/lab. **PREREQS:** NUTR 417

NUTR 420. MEDICAL NUTRITION THERAPY (5). Application of nutrition principles to diseases/disorders that may alter nutritional requirements or respond to dietary modification. Lecture and case study. Lec/lab. **PREREQS:** NUTR 418*

NUTR 423. COMMUNITY NUTRITION (4). Meeting nutritional needs in community settings; nutritional status of individuals and groups; programs of public and private agencies and industry; intervention techniques. Roles of community nutritionist. **PREREQS:** NUTR 325

NUTR 439. ^COMMUNICATIONS IN DIETETICS (3). Theory and practice in food and nutrition communications in dietetics. Experience in nutritional counseling and interviewing, employee training and nutritional education materials development, public speaking, and media presentation strategies. (Writing Intensive Course) **PREREQS:** NUTR 325 and NUTR 417*

NUTR 446. MANAGING FOOD AND NUTRITION SERVICES (4). Overview of organizational structure, functions of managers in food and nutrition service organizations: human and financial resources, regulatory influences, health care organizations, current issues in operations. Lec/rec. **PREREQS:** NUTR 311

NUTR 447. MANAGEMENT OF FOOD SYSTEMS LABORATORY (3). Application of theory in managing a university food service as part of a student team: planning, production, projecting resource needs, evaluation of outcomes and financial goals. **PREREQS:** NUTR 446 or NUTR 546

NUTR 477. DIETARY INTERVENTIONS FOR PUBLIC HEALTH (3). A public health perspective on the practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/educators. CROSSLISTED as H 477/H

577. **PREREQS:** NUTR 225

NUTR 499. SPECIAL TOPICS IN DIETETICS (2-6). Current issues, trends, and topics in nutrition and dietetics. May be repeated for credit when topic varies. This course is repeatable for a maximum of 12 credits.

NUTR 501. RESEARCH (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 502. INDEPENDENT STUDY (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 503. THESIS (1-16). Graded P/N. This course is repeatable for a maximum of 999 credits.

NUTR 505. READING AND CONFERENCE (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 506. SPECIAL PROBLEMS; PROJECTS (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 507. SEMINAR (1-16). 1 credit graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 508. WORKSHOP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 509. PRACTICUM (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 510. FIELD EXPERIENCE: INTERNSHIP (1-16). Supervised work experience with professional-level responsibilities in community agency or business firm. Supplementary conferences, readings, reports. Supervised by agency/firm and instructor. Limited to students admitted to degree program. Application made and approved in the term preceding enrollment. No more than 6 credits may be applied to a master's degree program. This course is repeatable for a maximum of 6 credits.

NUTR 514. HEALTH BENEFITS OF FUNCTIONAL FOODS, NUTRACEUTICALS, DIETARY SUPPLEMENTS (3). Functional foods, nutraceuticals and dietary supplements represent a rapidly expanding segment of domestic and international markets. This course will overview the principles and procedures necessary to evaluate and market these products. The chemistry and mechanisms of major nutraceutical ingredient categories and current scientific information supporting their biochemical and physiological efficacy will be addressed. Special dietary products, such as medical, weight control, sport, and herbal supplements, will be addressed. Regulatory aspects of labeling and structure-function claims will be covered. **CROSSLISTED** as FST 514. **PREREQS:** BB 350 and CH 332

NUTR 516. CULTURAL ASPECTS OF FOODS (3). Regional, ethnic, and religious influences on food patterns; worldwide trends in food practices. Laboratory experience with foods from several cultures. Lec/lab. **PREREQS:** NUTR 235

NUTR 517. HUMAN NUTRITION SCIENCE (4). Application of biochemistry and physiology to nutrition of the individual. **PREREQS:** NUTR 340 and BB 350 and/or equivalent courses and one physiology course.

NUTR 518. HUMAN NUTRITION SCIENCE (4). Application of biochemistry and physiology to nutrition of the individual. **PREREQS:** NUTR 517 and biochemistry, physiology.

NUTR 519. HUMAN NUTRITION LABORATORY (3). Techniques of nutritional assessment; laboratory experiences covering basic nutrition and chemical assays. Lab fee. Lec/lab. **PREREQS:** NUTR 417 or NUTR 517

NUTR 520. MEDICAL NUTRITION THERAPY (5). Application of nutrition principles to diseases/disorders that may alter nutritional requirements or respond to dietary modification. Lecture and case study. Lec/lab. **PREREQS:** NUTR 418 or NUTR 518

NUTR 523. COMMUNITY NUTRITION (4). Meeting nutritional needs in community settings; nutritional status of individuals and groups; programs of public and private agencies and industry; intervention techniques. Roles of community nutritionist. **PREREQS:** NUTR 325

NUTR 535. NUTRITION AND EXERCISE: MACRONUTRIENTS AND ENERGY METABOLISM (3). Current research examining the interrelationship of macronutrients and exercise and energy balance will be reviewed, including their roles in health, disease prevention and exercise performance. **PREREQS:** NUTR 517 or EXSS 533 or equivalent.

NUTR 539. COMMUNICATIONS IN DIETETICS (3). Theory and practice of food and nutrition communications in dietetics. Experience in nutritional counseling and interviewing, employee training and nutritional education materials development, public speaking, and media presentation strategies. **PREREQS:** NUTR 325

NUTR 546. FOODSERVICE ORGANIZATIONS (3). Overview of organizational structure, functions of managers in foodservice organizations: human resources, regulatory influences, health care organizations, current issues in operations. Lec/rec. **PREREQS:** NUTR 311 and NUTR 445

NUTR 550. NUTRITIONAL STATUS (4). Research studies with emphasis on estimation of nutrient intake and assessment of nutritional status, including biochemical, clinical, epidemiological and anthropometric measures. Interpretation of status indicators. **PREREQS:** NUTR 418 or NUTR 518

NUTR 577. DIETARY INTERVENTIONS FOR PUBLIC HEALTH (3). A public health perspective on the practice of population-based dietary intervention. Examination of relevant theories, research, and practice that pertain to health promoters/educators. **CROSSLISTED** as H 477/H 577. **PREREQS:** NUTR 225

NUTR 599. SPECIAL TOPICS IN NUTRITION (3-6). Current issues, trends, and topics in nutrition and health. May be repeated for credit when topic varies. This course is repeatable for a maximum of 18 credits.

NUTR 601. RESEARCH (1-16). This course is repeatable for a maximum of 16 credits.

NUTR 602. INDEPENDENT STUDY (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 603. THESIS (1-16). Graded P/N. This course is repeatable for a maximum of 999 credits.

NUTR 605. READING AND CONFERENCE (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 607. SEMINAR (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 609. PRACTICUM (1-16). This course is repeatable for a maximum of 16 credits.

NUTR 610. INTERNSHIP (1-16). Graded P/N. This course is repeatable for a maximum of 16 credits.

NUTR 617. METABOLIC INTERRELATIONSHIPS IN NUTRITION (1-16). Interrelationships between nutrients and metabolism at the cellular and human level as influenced by external and internal factors, including age, and environment. NUTR 617 and NUTR 618 may be taken out of order. Offered alternate years. This course is repeatable for a maximum of 16 credits. **PREREQS:** NUTR 418 or NUTR 518

NUTR 618. METABOLIC INTERRELATIONSHIPS IN NUTRITION (3). Interrelationships between nutrients and metabolism of humans at the cellular level as influenced by external and internal factors. NUTR 617 and NUTR 618 may be taken out of order. Offered alternate years. **PREREQS:** NUTR 418 or NUTR 518

NUTR 699. SPECIAL TOPICS IN NUTRITION RESEARCH (3-16). Current issues, trends, and topics in nutrition research. May be repeated for credit when topic varies. This course is repeatable for a maximum of 16 credits.

■ PHYSICAL ACTIVITY COURSES

PAC 100. ADAPTED PHYSICAL ACTIVITY (1). Individual workout for students with permanent or temporary physical disabilities and for students enrolled in another PAC who sustain an injury. This course is repeatable for a maximum of 11 credits.

PAC 102. AQUA AEROBICS (1). Fitness class using a variety of movements in shallow and deep water, mostly in a vertical position. Do not need swimming skills. This course is repeatable for a maximum of 11 credits.

PAC 103. DEEP WATER AEROBICS (1). Fitness class using a variety of movements in a deep water pool, mostly in a vertical position. Should be comfortable in deep water. This course is repeatable for a maximum of 11 credits.

PAC 107. DANCE AEROBICS (1). Fitness class set to music using a variety of movement; high/low intensity cardiovascular workout supplemented with strength and flexibility exercises. This course is repeatable for a maximum of 11 credits.

PAC 108. STEP AEROBICS (1). Low-impact, high intensity workout adjustable to all fitness levels utilizing adjustable height benches. Strengthening and flexibility exercises included. This course is repeatable for a maximum of 11 credits.

PAC 109. POWER STEP AEROBICS (1). Advanced high intensity step workout that includes plyometric jumps and movements through a wide range of motion. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 108, Step Aerobics or equivalent.

PAC 113. BADMINTON I (1). Singles and doubles skills, practice, rules, strategies and play. This course is repeatable for a maximum of 11 credits.

PAC 114. BADMINTON II (1). Intermediate skill development in badminton. This course is repeatable for a maximum of 11 credits. **PREREQS:** Fundamental skills, rules and strategy of singles and doubles play.

PAC 116. BASKETBALL I (1). Fundamental basketball skills, drills, rules, strategies, and practice. Game play appropriate for the skill level. This course is repeatable for a maximum of 11 credits.

PAC 117. BASKETBALL COMPETITIVE (1). Team play, individual and team skills developed and refined, competitive round robin tournaments. This course is repeatable for a maximum of 11 credits. **PREREQS:** Prior competitive experience.

PAC 120. MOUNTAIN BIKING (1). Touring trails in Corvallis area; riding techniques, safety, maintenance, environmental concerns. Required equipment: mountain bike, tire repair kit, helmet. This course is repeatable for a maximum of 11 credits.

PAC 121. BILLIARDS (1). Skills, technique, strategy, game knowledge as introduction to billiards (pool), a «cue» sport; rules and gaming for variations of pocket billiards; practice and class tournament play. This course is repeatable for a maximum of 11 credits.

PAC 122. BODY SCULPTING (1). Fitness workout set to music using lighter resistance training aids such as dumbbells, resistance tubing, bands, and aerobic steps. This course is repeatable for a maximum of 11 credits.

PAC 123. BOWLING I (1). Fundamentals of the game including etiquette, spot bowling, natural hook and straight ball delivery, scoring, handicap computation, spare pickup, and error correction. Additional fee; equipment supplied. This course is repeatable for a maximum of 11 credits.

PAC 124. BOWLING II (1). Review and refinement of basic fundamentals of bowling. Emphasis on spot bowling, adjusting for lane conditions, choices in equipment, league play, and mental training. This course is repeatable for a maximum of 11 credits. **PREREQS:** Bowling I or equivalent.

PAC 126. CARDIO KICKBOXING I (1). High intensity group workout set to motivational music and combining skills and techniques from boxing, kickboxing, and other martial arts. This course is repeatable for a maximum of 11 credits.

PAC 127. CARDIO KICKBOXING II (1). Applies what students have learned in basic cardio kickboxing and increases the difficulty of combinations in a way that intensifies the workout in complexity and cardio training; sometimes referred to as turbo kickboxing. This course is repeatable for a maximum of 11 credits.

PAC 129. CARDIO COMBO (1). Combination of aerobic training classes that use music such as Cardio Kickboxing, Body Sculpture, Sports Conditioning, and/or Step Aerobics. Actual curriculum may vary with instructors. This course is repeatable for a maximum of 11 credits.

PAC 130. CONDITIONING (1). Total body approach to fitness, cardiorespiratory conditioning, muscular strength and endurance; flexibility emphasized. May follow a specific training format, e.g. ROTC section follows Army conditioning format. This course is repeatable for a maximum of 11 credits.

PAC 131. SNOWBOARD-SKI CONDITIONING (1). Strength, muscular endurance, flexibility, balance, and cardiovascular exercises specific to downhill skiing and snowboarding; designed to help prepare students for participation in these sports. This course is repeatable for a maximum of 11 credits.

PAC 133. DANCE: TAP I (1). Individual and group dance with specialized shoes; basic step technique and vocabulary; warm up exercises progressing into rhythmic combinations performed to music; culminates in full routine to music. This course is repeatable for a maximum of 11 credits.

PAC 135. BALLETSPOUT: BALLET SKILLS FOR ATHLETES (1). Fundamental ballet technique to enhance balance, agility, alignment, strength and rhythmic movement in sports. Stretching techniques and Pilates mat-work included. No prior dance experience needed. All students welcome. Additional fee for accompanist. This course is repeatable for a maximum of 11 credits.

PAC 136. DANCE: BALLET I (1). Introduction to basic ballet technique and aesthetics, terminology, alignment, stretch and strength exercises. No previous dance experience needed. Additional fee for accompanist. This course is repeatable for a maximum of 11 credits.

PAC 137. DANCE: BALLET II (1). Review and practice of beginning ballet technique, introduction of more advanced stretches, steps, and combinations. Additional fee for accompanist. This course is repeatable for a maximum of 11 credits. **PREREQS:** Ballet I or previous ballet experience.

PAC 138. DANCE: BALLET III (1). Intermediate and advanced ballet technique, comprehensive exploration of the discipline. Additional fee for accompanist. This course is repeatable for a maximum of 11 credits. **PREREQS:** Ballet II, previous comparable experience or instructor approval required.

PAC 140. DANCE: JAZZ I (1). Introduction to jazz dance, technique, isolations, and combinations. Different jazz styles are explored. No previous dance experience is necessary. This course is repeatable for a maximum of 11 credits.

PAC 141. DANCE: JAZZ II (1). Intermediate jazz technique, isolations and combinations. This course is repeatable for a maximum of 11 credits. **PREREQS:** Jazz I or comparable experience.

PAC 142. DANCE: JAZZ III (1). Advanced approach to jazz technique; challenging warm ups, combinations, and dances. Performance opportunity. This course is repeatable for a maximum of 11 credits. **PREREQS:** Jazz II, comparable experience, departmental approval required.

PAC 145. DANCE: MODERN I (1). Introduction to modern dance movement fundamentals. Technique, stretch, strength, and alignment are included, as well as an appreciation for movement expression. No previous dance experience needed. Additional fee for accompanist. This course is repeatable for a maximum of 11 credits.

PAC 146. DANCE: MODERN II (1). An intermediate level of modern dance technique and movement expression. Additional fee for accompanist. This course is repeatable for a maximum of 11 credits. **PREREQS:** Modern Dance I or comparable experience.

PAC 147. DANCE: MODERN III, OREGON DANCE PERFORMANCE (1). Modern dance advanced technical skills, compositions, and combinations. Additional fee for accompanist. This course is repeatable for a maximum of 11 credits. **PREREQS:** Previous intermediate modern dance experience or instructor approval.

PAC 148. DANCE: CUBAN SALSA I (MEN/WOMEN) (1). Foundations of Cuban Salsa (Casino) as well as Rueda de Casino with focus on musical development and fundamentals of leading and following in partner dance. This course is repeatable for a maximum of 11 credits.

PAC 150. CULTURAL WORLD DANCE (MEN/WOMEN) (1). Introduction to traditional dance forms from Europe, Israel, North America and Asia, focusing on movement, cultural heritage, history, and diversity. This course is repeatable for a maximum of 11 credits.

PAC 152. DANCE: SALSA I (MEN/WOMEN) (1). Steps and rhythmic accent of Salsa and Merengue style; fundamentals of leading and following; basic moves and combinations. No prior experience needed. This course is repeatable for a maximum of 11 credits.

PAC 153. DANCE: SALSA II (MEN/WOMEN) (1). Intermediate moves, rhythmic accents and step combinations of Salsa; development of leading and following. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 152 and/or instructor approval.

PAC 154. DANCE: COUNTRY WESTERN I (MEN/WOMEN) (1). Focus on traditional Country Western Swing patterns. Emphasizes fundamentals of leading and following. Also including introduction to waltz, two-step, cowboy cha-cha and 10-step polka. This course is repeatable for a maximum of 11 credits.

PAC 155. DANCE: COUNTRY WESTERN II (MEN/WOMEN) (1). Build on CW I with advanced waltz, two-step, and cha-cha patterns; introduces schottische and East Coast swing. This course is repeatable for a maximum of 11 credits. **PREREQS:** Country Western I or instructor approval.

PAC 156. DANCE: COUNTRY WESTERN III (MEN/WOMEN) (1). Advanced two-step patterns and styling with a focus on musical interpretation; development of leading and following. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 155

PAC 158. DANCE: BEGINNING SWING (MEN/WOMEN) (1). Introduction to single time, double time, and triple time (jitterbug) swing; variations for each style, covering most swing music rhythms. Emphasizes fundamentals of leading and following. Men/women. This course is repeatable for a maximum of 11 credits.

PAC 159. DANCE: BALLROOM I (MEN/WOMEN) (1). Posture and alignment, fundamentals of leading and following, basic steps and variations

for waltz, foxtrot, swing, tango, and cha-cha. This course is repeatable for a maximum of 11 credits.

PAC 160. DANCE: BALLROOM II (MEN/WOMEN) (1). Additional steps and patterns of popular ballroom dances. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 159

PAC 161. DANCE: BALLROOM III (MEN/WOMEN) (1). Styling; additional dances: rumba, silver fox trot, and Viennese waltz; advanced dance figures for tango and cha-cha. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 160

PAC 162. DANCE: SWING II (MEN/WOMEN) (1). Social dance focusing on Twenties-style Charleston, pure Balboa and Balboa-Swing, and Blues Dance. This course is repeatable for a maximum of 11 credits.

PAC 163. DANCE: LATIN I (MEN/WOMEN) (1). Latin dances including cha-cha, mambo, salsa, rumba, merengue, bolero, salsa, and paso doble. Emphasis on proper styling and technical execution of each dance; effective leading and following techniques. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 159

PAC 164. DANCE: LATIN II (MEN/WOMEN) (1). Continuation of Latin Dance I; more advanced dance patterns in cha-cha, salsa, merengue, rumba and samba. Introduction to mambo and bolero; emphasis on technical and stylistic details of each dance. This course is repeatable for a maximum of 11 credits. **PREREQS:** Latin I.

PAC 165. DANCE: WEST COAST SWING (MEN/WOMEN) (1). Focus on style, technique and many different step patterns of the west coast swing dance. This course is repeatable for a maximum of 11 credits. **PREREQS:** (PAC 154 or PAC 159)

PAC 166. BALLROOM 2 STEP, HUSTLE (MEN/WOMEN) (1). Smooth, romantic social dance that is neither ballroom, Latin, nor swing but a rhythm dance identified as club-style, danced to contemporary ballad-like music. Hustle is fast-paced, swing-related dance to disco beat. Class encompasses intermediate step patterns, technique and styling, stationary, traveling patterns. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 160

PAC 167. DANCE: LINDY HOP (MEN/WOMEN) (1). Ballroom dance style based on original eight-count swing dance evolved in Harlem ballrooms during the late 1920s; styling emphasized. This course is repeatable for a maximum of 11 credits. **PREREQS:** (PAC 158 or PAC 159)

PAC 168. DANCE: LINDY HOP II (MEN/WOMEN) (1). Intermediate patterns, syncopations, play techniques, and styling with a focus on musical interpretation in the Lindy Hop style; development of leading and following. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 167

PAC 169. COOL SHOES, BALLROOM PERFORMANCE (MEN/WOMEN) (1). Focus on advanced steps and styling. A dance suite is choreographed each term. Two to three performances each term. This course is repeatable for a maximum of 11 credits. **PREREQS:** Departmental approval by audition required.

PAC 170. DANCE: WEST COAST SWING II (MEN/WOMEN) (1). Intermediate patterns, syncopations, play techniques, and styling with a focus on musical interpretation; development of leading and following. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 165

PAC 174. FLAG FOOTBALL (1). Skill instruction and practice; drills; strategies, game play of America football; emphasis on teamwork and sportsmanship in a competitive but non-threatening or stressful environment. This course is repeatable for a maximum of 11 credits.

PAC 178. FLY FISHING I (1). Casting and fishing techniques, lure making, equipment selection, terminology, and regulation for fishing in Oregon's

marine environment. This course is repeatable for a maximum of 11 credits.

PAC 179. FLY FISHING II (1). Advanced fly casting and fly fishing techniques for trout, fly-tying, equipment selection, basic aquatic organism identification, terminology, and regulations for fishing in Oregon's freshwater environment. This course is repeatable for a maximum of 11 credits.

PAC 180. STEELHEAD FISHING (1). Casting and fishing techniques, lure making, equipment selection, terminology, and regulations for fishing in Oregon's marine environment for steelhead. This course is repeatable for a maximum of 11 credits.

PAC 181. ADVANCED FLY TYING (1). Tying of artificial flies useful for trout, steelhead, and bass fishing; dubbing techniques, spinning hair, parachute hackling, and precise winging methods included. This course is repeatable for a maximum of 11 credits. **PREREQS:** Fly Fishing I or previous fly tying experience.

PAC 182. DISC GOLF I (1). Techniques for throwing discs; equipment, knowledge, etiquette, and rules associated with playing a disc golf course; experience playing practice and official disc golf courses. This course is repeatable for a maximum of 11 credits.

PAC 184. GOLF I (1). Basic fundamental principles in all phases of golf; rules, terminology, etiquette, safety and scoring. Equipment provided. This course is repeatable for a maximum of 11 credits.

PAC 185. GOLF II (1). Individual practice and course play; skill refinement as continuation of Golf I. Equipment available. Course play expected, additional fee. This course is repeatable for a maximum of 11 credits. **PREREQS:** Golf I or equivalent.

PAC 186. GOLF III (1). Advanced skills, knowledge involved in competitive play. Course play expected, additional fee. This course is repeatable for a maximum of 11 credits. **PREREQS:** Handicap below 15 or Golf II; competitive play.

PAC 187. GOLF ON TOUR (1). Area golf courses are played in a variety of competitive formats to improve on-course competitive performance; includes rules understanding and handicap procedures. This course is repeatable for a maximum of 11 credits. **PREREQS:** GOLF II/III (PAC 184/PAC 185) or instruction from an experienced coach or instructor; the ability to consistently score under 95, and the ability to keep a 4-hour pace for 18 holes. Previous competitive golf experience is preferred.

PAC 188. GYMNASTICS (1). Fundamental techniques on vault, bars, beam, and floor. This course is repeatable for a maximum of 11 credits.

PAC 189. GYMNASTICS II (1). Build upon previous gymnastics experiences or classes; floor exercise, uneven parallel bars, vault, mini-trampoline and beam apparatus are available. This course is repeatable for a maximum of 11 credits. **PREREQS:** Gymnastics I or competitive experience.

PAC 190. KARATE (1). Instruction in traditional Japanese karate basic striking and blocking techniques, kata (forms), philosophy, conditioning, and etiquette. Self-defense applications are also emphasized. This course is repeatable for a maximum of 11 credits.

PAC 192. JUDO I (1). Skill instruction in landing, throwing and grappling for this style of martial arts; etiquette for practice and competition; basic knowledge of vocabulary, rules and scoring. This course is repeatable for a maximum of 11 credits.

PAC 193. JUDO II (1). Intermediate skill instruction in landing, throwing, pins, chokes in Kodokan Judo style; principles of Seiryoku-Zenyou and Jita-Kyoei designed to help individuals become better members of society

through training body and mind; instruction for competition knowledge and skills. Judo etiquette for practice and competition expected. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 192 or instructor approval.

PAC 194. PILATES (1). Non-impact, invigorating approach to physical conditioning and mind/body awareness; helps develop core body strength, improve posture and balance, and increase muscle endurance, tone, flexibility. This course is repeatable for a maximum of 11 credits.

PAC 195. PILATES II (1). Progression of Joseph Pilates mat exercises; emphasis on intermediate and advanced levels; application of Pilates' principles to new exercises; use of props; application of principles to daily living. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 194, Pilates.

PAC 197. PICKLEBALL (1). Fast-paced, self-officiated net game with similarities to tennis, badminton, table tennis, and racquetball. Course covers rules, strategies, technique, preparation for play, and includes extensive active practice and play; played with two, three, or four people. This course is repeatable for a maximum of 11 credits.

PAC 199. SPECIAL TOPICS (1-3). Experimental or new classes. This course is repeatable for a maximum of 11 credits.

PAC 201. RELAXATION (1). Introduction to relaxation techniques; posture awareness, gentle stretching, source of your energy, and creative imagery to relieve stress. This course is repeatable for a maximum of 11 credits.

PAC 205. ROWING, CREW I (MEN/WOMEN) (1). Introduction to the sport of rowing; designed for the novice (beginner). Includes basic technique and terminology, related water safety, and development of strength, endurance, and flexibility. This course is repeatable for a maximum of 11 credits. **PREREQS:** Swim Test (1).

PAC 209. ROCK CLIMBING, CONDITIONING I (1). Physical conditioning for, and instruction in, the skills and techniques of rock climbing; environmental impact issues; held at on-campus indoor climbing center. This course is repeatable for a maximum of 11 credits.

PAC 210. ROCK CLIMBING, CONDITIONING II (1). Advanced technical skills, training techniques, rescue rigging, anchor and belay systems, basic aid climbing, hauling, and other big wall techniques; three-stage training; practice. Held at on-campus climbing center. Additional fee may be required for off-campus practice. This course is repeatable for a maximum of 11 credits. **PREREQS:** Rock Climbing and Conditioning I or instructor approval.

PAC 212. RUNNING, JOGGING (1). Cardiorespiratory fitness with scenic running routes; training, nutrition, and physiology. Beginning and intermediate level. This course is repeatable for a maximum of 11 credits.

PAC 213. RUNNING: 10K TRAINING (1). Intermediate to advanced conditioning and training program for road racing. This course is repeatable for a maximum of 11 credits. **PREREQS:** Prior training in running.

PAC 214. HALF MARATHON TRAINING (2). Progressive training combining walking, running, core strengthening, interval techniques in preparation for a 13.1 mile (1/2 marathon) event. Open to all levels; may choose to walk, walk/run, or run. This course is repeatable for a maximum of 11 credits.

PAC 215. RUGBY, TOUCH (1). Basic skills of open field rugby; emphasis on ball handling and attacking strategy; rules and history; game play. This course is repeatable for a maximum of 11 credits.

PAC 217. SELF-DEFENSE (1). Nonviolent self-defense. Develop self-confidence and skills for assault situations. Conditioning and practical

skills. Men and women, all levels. This course is repeatable for a maximum of 11 credits.

PAC 224. TELEMAR SKIING (1). Winter sport that is a cross between cross country and downhill skiing. Requires telemark equipment where the heel is unattached. Class accommodates all levels and practices on the downhill slopes. Additional fee covers bus transportation, lessons, and lift ticket. Rental of equipment is not included. This course is repeatable for a maximum of 11 credits.

PAC 225. DOWNHILL SKIING (1). Travel to area facilities, 1-1/2 hour lesson followed by open practice, students grouped according to skill level: beginner, intermediate, advanced, racer. Special fee covers bus transportation, lessons, and lifts. Additional fee for rentals. This course is repeatable for a maximum of 11 credits.

PAC 227. SNOWBOARDING (1). Travel to area facilities, 1 1/2 hour lesson followed by open practice, students grouped according to skill level: beginner, intermediate, advanced. Special fee covers bus transportation, lessons, and lifts. Additional fee for rentals. This course is repeatable for a maximum of 11 credits.

PAC 229. SOCCER I (1). Basic skills of controlling the ball; conditioning; lead-up games; team play. This course is repeatable for a maximum of 11 credits.

PAC 230. SOCCER II (1). Review of basic skills of offense and defense in controlled game play; concepts of team position and play, pressure and attack. This course is repeatable for a maximum of 11 credits. **PREREQS:** Previous soccer experience.

PAC 231. SOCCER III (1). High level soccer skills; team play and transition concepts; set plays and alignments for both offense and defense. This course is repeatable for a maximum of 11 credits. **PREREQS:** Soccer II or competitive playing experience.

PAC 233. SOCCER: INDOOR (1). Skill instruction and development; strategies and rules for indoor play; game play in indoor gymnasium. This course is repeatable for a maximum of 11 credits. **PREREQS:** Previous soccer experience.

PAC 236. SOFTBALL, WHIFFLEBALL (1). Skills, rules, strategies, practice, and game play of the popular outdoor slow pitch game. Modified softball with whiffleball when play is indoors. This course is repeatable for a maximum of 11 credits.

PAC 242. SCUBA: OPEN WATER (2). Lecture includes physiology, water environment, equipment, and techniques for fundamental SCUBA diving. Laboratory includes practice in techniques, skills, and equipment usage; sessions held in pool and open water. Successful completion leads to PADI certification. Additional fee covers most equipment, texts, certification, and open water dive trip. This course is repeatable for a maximum of 11 credits. **PREREQS:** Mandatory 200-yard swim, 10-minute survival skills and good health.

PAC 243. SCUBA: ADVANCED OPEN WATER (1). Classroom lecture and laboratory in hypothermics, natural navigation, dive physiology, compass navigation, night and limited visibility procedures, boat diving, search and salvage techniques, deep diving procedures, health for diving, and an introduction to dive rescue. Successful completion of this course can lead to PADI certification. Additional fee. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 242

PAC 244. SCUBA: RESCUE DIVER (1). Techniques, skills, knowledge, and practice in self-rescue and rescue of others in underwater emergencies; may lead to PADI certification; lecture and pool laboratory; open water dive required. Additional fee. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 243 or equivalent.

PAC 245. SCUBA SPECIAL TOPICS (1).

Specialized courses requiring previous certification in SCUBA. Check the current schedule of classes for more information and prerequisites. Possible classes: altitude diver, night diver, search and recovery, deep diver, underwater navigation, equipment specialist. Additional fee. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 242

PAC 246. DIVEMASTER TRAINING (2).

Entry level PADI certification course for preparation to instruct SCUBA; lecture, lab, open water experience; must take two consecutive terms. Additional fee: \$160 per term. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 244. PADI Advanced, Advanced Plus, and Rescue Diver certifications or equivalent; 20 logged dives.

PAC 247. SURFING (1).

Knowledge and fundamental skills of this aquatic sport including history, terminology, safety precautions, the ocean environment, and equipment. Additional fee. This course is repeatable for a maximum of 11 credits. **PREREQS:** Equivalent to Swim I (PAC 250). Students must pass a swim test in the pool before going into the ocean.

PAC 248. SWIM: NON-SWIMMER (1).

Skills for self-rescue; fundamental skills in swimming and safety. Designed for people with a fear of water. Recommended S/U grading. This course is repeatable for a maximum of 11 credits.

PAC 250. SWIM I (1).

Swimming concepts, survival and breathing techniques, front crawl and elementary backstroke as minimum instruction. This course is repeatable for a maximum of 11 credits. **PREREQS:** Minimal swimming skill.

PAC 251. LAP SWIM, STROKE ASSISTANCE (1).

Noncompetitive swim, exercise program with individual stroke skill assistance. This course is repeatable for a maximum of 11 credits.

PAC 252. SWIM II (1).

Fitness swimming, swimming strokes and skills. This course is repeatable for a maximum of 11 credits. **PREREQS:** 75 yd. front crawl. Swim I skills.

PAC 253. SWIM TRAINING WORKOUT (1).

Competitive skills and strokes; emphasis on training. This course is repeatable for a maximum of 11 credits. **PREREQS:** Ability to do interval training.

PAC 254. COMPETITIVE SWIMMING (1).

Prepares students for competitive swimming and emphasizes lifetime aquatic fitness; interval swim workouts designed for speed and endurance; instruction on legal techniques of strokes and turns; culminates in intra-class swim meet; 2,000-3,000 yards/day. This course is repeatable for a maximum of 11 credits. **PREREQS:** 300 yd. front crawl; 50 yd. backstroke and breaststroke; ability to do interval training.

PAC 256. TAIJI, TAI CHI I (1).

Introduction to ancient Chinese 'internal martial art' based upon concepts of Yin and Yang; detailed slow and relaxed form movements provide benefits to body, mind, and spirit. This course is repeatable for a maximum of 11 credits.

PAC 257. TAIJI, TAI CHI II (1).

Continuation of study of the Yang-style Taiji form; more in-depth exploration of underlying principles and push-hands exercises. This course is repeatable for a maximum of 11 credits.

PAC 258. TAP DANCE I (1).

Basic vocabulary and steps; will emphasize proper technique and include a progression to more rhythmic combinations using a variety of music and creative styles. This course is repeatable for a maximum of 11 credits.

PAC 259. TAP DANCE II (1).

An expansion of the skills and vocabulary of Tap Dance I; progression to more advanced and longer combinations; may be opportunities to perform in a concert. This course is repeatable for a maximum of 11 credits. **PREREQS:** Tap Dance I or instructor approval.

PAC 260. TENNIS I (1). Introduction to fundamental strokes, singles and doubles play, scoring, and basic concepts in tennis. This course is repeatable for a maximum of 11 credits.

PAC 261. TENNIS II (1). Review and refinement of fundamental strokes; volley, lob, return of serve; introduction to singles and doubles strategy. This course is repeatable for a maximum of 11 credits. **PREREQS:** Tennis I or instructor approval.

PAC 262. TENNIS III (1). Focus on ground stroke, serve consistency; approach shots and overheads; tactics for net and baseline play. This course is repeatable for a maximum of 11 credits. **PREREQS:** Tennis II or instructor approval.

PAC 264. TEAM HANDBALL (MEN/WOMEN) (1).

Fast-paced indoor court game that combines skills and strategies similar to water polo, basketball, soccer and hockey; rules, regulations, strategies, and skills introduced and practiced; requires teamwork, cooperation, and court strategy. This course is repeatable for a maximum of 11 credits.

PAC 265. TUMBLING I (1). Technical instruction, progressions, and practice in basic, intermediate, and advanced tumbling skills; emphasis on safety and fitness concepts; floor and mini-trampoline skills; no apparatus instruction. This course is repeatable for a maximum of 11 credits.

PAC 266. TUMBLING II (1). Technical instruction, progressions, safety, and practice building upon skills taught in PAC 265, Tumbling I. This course is repeatable for a maximum of 11 credits. **PREREQS:** Tumbling I or prior experience.

PAC 268. TRIATHLON TRAINING (2). Training in swimming, running, and bicycling to prepare for triathlon participation. Strategies, transitioning technique, and weight training information; training plan formation; event planning; culminates in class or community event. This course is repeatable for a maximum of 11 credits. **PREREQS:** Experience in at least one of the three activities.

PAC 271. ULTIMATE FRISBEE I (1).

Fundamentals for the beginning and intermediate player; individual skill development, rules, game play, and strategy. This course is repeatable for a maximum of 11 credits.

PAC 273. VOLLEYBALL I (1). Fundamental volleyball skills, drills, rules, strategies, and practice. Game play appropriate for skill level. This course is repeatable for a maximum of 11 credits.

PAC 274. VOLLEYBALL II (1). Fundamental skills and knowledge refined; intermediate skills developed, competitive play. This course is repeatable for a maximum of 11 credits. **PREREQS:** Volleyball I and good fundamental skills.

PAC 275. VOLLEYBALL III (1). Skill refinement and development; intense, highly competitive drills and game situations, doubles through sixes play. This course is repeatable for a maximum of 11 credits. **PREREQS:** Volleyball II and instructor's approval or varsity-level experience.

PAC 278. FITNESS WALKING (1). Establishment of personal fitness programs through walking with emphasis on technique and aerobic components. This course is repeatable for a maximum of 11 credits.

PAC 282. WATER POLO (1). Team game, played in deep water; instruction in skills, drills, strategies, techniques; game play; knowledge of rules and terminology. This course is repeatable for a maximum of 11 credits. **PREREQS:** Swim I skills.

PAC 286. WEIGHT TRAINING: CIRCUITS (1).

Fast-paced fitness class using stations of resistance training exercises. Designed to improve cardiovascular fitness and muscular endurance more than strength. This course is repeatable for a maximum of 11 credits.

PAC 287. WEIGHT TRAINING I (1).

Exercise techniques in both free and fixed resistance training equipment; safety procedures,

terminology, and principles of exercise. This course is repeatable for a maximum of 11 credits.

PAC 288. WEIGHT TRAINING II (1). Intermediate level of weight training in free and fixed weights. This course is repeatable for a maximum of 11 credits. **PREREQS:** Weight Training I.

PAC 292. WRESTLING (1). Collegiate wrestling fall and winter terms; freestyle and Greco wrestling spring term. All levels. This course is repeatable for a maximum of 11 credits.

PAC 294. YOGA I (1). Principles and practice of basic yoga postures, techniques of posture alignment, yogi breathing styles and their impact on the body and mind. This course is repeatable for a maximum of 11 credits.

PAC 295. YOGA II (1). Intermediate level course to improve yoga practice and to develop overall deeper understanding of yoga methodology in more advanced posture. This course is repeatable for a maximum of 11 credits. **PREREQS:** Yoga I or previous yoga experience.

PAC 296. FITNESS YOGA (1). Dynamic sequence of movements and sustained yoga positions; regulated breathing; encourages systematic discipline and approach to life. Open to beginners. This course is repeatable for a maximum of 11 credits.

PAC 297. YOGATHON (1). Expands on knowledge and skills learned in Yoga I or Fitness Yoga through three to five class sessions, each 3-6 hours; longer sessions provide students with an intensive mental and physical experience centering on the concepts of yoga; includes introductory relaxation and meditation skills. This course is repeatable for a maximum of 11 credits. **PREREQS:** Yoga I or Fitness Yoga highly recommended. PAC 294 and PAC 295 and PAC 296

PAC 299. SPECIAL TOPICS (1-3). Advanced information, skills, practice, and application; experimental and new classes. May have additional fee. This course is repeatable for a maximum of 11 credits. **PREREQS:** Intermediate to advanced skills in an activity area or instructor approval required.

PAC 301. ALI: CHALLENGE COURSE

EXPERIENCE (1). Emphasis on gaining practical experience and understanding of various components that occur in challenge course activities/programs; group dynamic mental and physical challenges; cooperative games and initiatives that promote communication, problem solving skills and leadership; Low and High challenge course activities that promote self confidence and agility. This course is repeatable for a maximum of 11 credits.

PAC 304. ALI: BACKPACKING (1). Hiking and camping while carrying all gear; tent set-up, camp site selection, operation of single-burner stoves, loading a backpack, water infiltration, navigation, proper hiking technique, energy conservation; leave-no-trace principles in every aspect of the trip and class; includes classroom instruction and required overnight trip. This course is repeatable for a maximum of 11 credits.

PAC 314. ALI: BOULDERING (1). Introduction to the sport of bouldering, a subset of rock climbing using an indoor climbing facility; emphasis on safety, spotting, climbing movement, training techniques and improvement; provides activities that promote muscular strength and endurance, flexibility, and cardiovascular endurance. This course is repeatable for a maximum of 11 credits.

PAC 315. ALI: ROCK CLIMBING I (1). Physical conditioning for, and instruction in, the skills and techniques of rock climbing; environmental impact issues; held at on-campus indoor climbing center. This course is repeatable for a maximum of 11 credits. This course is repeatable for a maximum of 11 credits.

PAC 316. ALI: ROCK CLIMBING II (1). Advanced technical skills, training techniques, rescue rigging, anchor and belay systems, basic aid

climbing, hauling, and other big wall techniques; three-stage training; practice. Held at on-campus climbing center. Additional fee may be required for off-campus practice. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 315

PAC 320. ALI: MOUNTAINEERING I (1). Snow climbing techniques, anchoring, belaying and rappelling techniques, snow camping/living skills, and wilderness ethics; classroom instruction and required overnight alpine trip. This course is repeatable for a maximum of 11 credits.

PAC 321. ALI: MOUNTAINEERING II (1). Building on skills learned in Mountaineering I; rope team/glacier travel experience, fundamentals of crevasse rescue, advanced snow climbing techniques, safe anchoring, belaying and rappelling techniques, snow camping/living skills, and wilderness ethics. This course is repeatable for a maximum of 11 credits. **PREREQS:** PAC 320

PAC 325. ALI: WILDERNESS FIRST AID (1). Fundamentals of emergency care in a non-urban environment including anatomy, physiology, injury assessment, short-term care, small-group rescues; backcountry emphasis with long-term care and evacuation complications. This course is repeatable for a maximum of 11 credits.

PAC 329. ALI: WILDERNESS FIRST RESPONDER (2). Fundamentals of emergency care in a non-urban environment, including physiology, injury assessment, short-term care, anatomy, and small-group rescues. This course is repeatable for a maximum of 11 credits. **PREREQS:** CPR certification.

Graduate Certificate in Public Health Health Management and Policy

The School of Social and Behavioral Health Sciences comprises the fields of health management and policy, health promotion and health behavior, and human development and family sciences. These disciplinary approaches use social and behavioral sciences to improve understanding of the factors that influence the health and well-being of individuals, families, and communities. In addition, these fields develop sound policy, programs, and interventions to improve health and well-being at multiple

levels. Finally, through our curricula, we develop the next generation of globally minded public health and human sciences professionals.

The School of Social and Behavioral Health Sciences houses the undergraduate degrees of Human Development and Family Sciences and Public Health. The majors and their options are described below.

The school also houses the MS and PhD in Human Development and Family Studies (see <http://health.oregonstate.edu/degrees/graduate/hdfs.>)

The school houses the following tracks of the Master of Public Health (MPH): health management and policy, and health promotion and health behavior. For more information about the MPH program and its areas of concentration, see <http://health.oregonstate.edu/degrees/graduate/public-health/mph.>

The school also houses the following concentrations of the Public Health doctoral program: health policy, and health promotion and health behavior, see <http://health.oregonstate.edu/degrees/graduate/public-health/phd-program.>

UNDERGRADUATE PROGRAMS

HUMAN DEVELOPMENT AND FAMILY SCIENCES MAJOR

The field of human development and family sciences (HDFS) applies an interdisciplinary perspective to understand the development of individuals across the life course and their diverse family, school, and community environments. Students who major in HDFS have diverse and exciting career options in schools and in the helping professions, or can pursue advanced academic study in HDFS or related areas.

The School of Social and Behavioral Health Sciences offers a BS in Human Development and Family Sciences with three options:

- Child Development
- Human Development and Family Sciences, General
- Human Services

All three options provide students with the prerequisites for graduate programs in human development and family sciences.

FAMILY AND CONSUMER SCIENCES TEACHER TRAINING

Students desiring a license to teach family and consumer sciences (grades 5 through 12) should contact PHHS Advising, <http://health.oregonstate.edu/students/current/undergraduate/advising>

PUBLIC HEALTH MAJOR

Public health is an exciting and diverse field for those interested in the health and well-being of populations and their environments. Careers in the public

and private sectors offer opportunities to work locally, regionally, nationally, and internationally to promote health and prevent disease. Recognizing that multiple and complex factors affect the public's health, our faculty and students examine environmental issues, access to health care services, health policies, and social and contextual factors as determinants of health.

Students in this major will choose one of the following major options:

- Health Management and Policy
- Health Promotion and Health Behavior

Both options provide students with the prerequisites for graduate programs in public health.

HEALTH MANAGEMENT AND POLICY OPTION

This option provides training and skills in the management of public health, health care programs and agencies, and in the analysis of public health policies. The program is appropriate for those who want to manage health programs in a wide range of institutions, both public and private, and is particularly well-suited for students interested in the business aspects associated with the delivery and financing of health services. Students can also receive a certificate of Gerontology.

HEALTH PROMOTION AND HEALTH BEHAVIOR OPTION

This option prepares students for many career opportunities in the areas of public health promotion, health behavior, and disease prevention. Students learn a variety of skills and strategies that will provide them with the necessary proficiencies to improve population health in diverse settings. The program focuses on the social and behavioral determinants of health and disease across the lifespan, with a particular emphasis on health disparities. Graduates are qualified to assist with the planning, implementing, and evaluation of programs that address health disparities and that are intended to improve the health of diverse populations.

UNDERGRADUATE MAJORS WITH OPTIONS

HUMAN DEVELOPMENT AND FAMILY SCIENCES (BS, CRED, HBS)

HDFS majors study interdisciplinary research and theory on human development across the lifespan within the contexts of families, school, work, and communities to prepare for careers in schools and helping professions, and to pursue advanced academic degrees. The BS in Human Development and Family Sciences can be pursued through one of three options listed below:

1. Child Development option

2. Human Development and Family Sciences, General
3. Human Services option

See each option in the HDFS overview for detailed information.

Note: It is possible to choose more than one option. Students should meet with an advisor in the college's Academic Advising Office in Milam Hall 116 for additional information.

Credits Needed to Graduate:

180 credits, 60 of which must be upper division. Credits are to include baccalaureate core courses, HDFS core courses, classes required for each option, and electives.

Baccalaureate Core (48)

48 credits required of all students; courses may include BCC courses in the HDFS core and options as indicated by an asterisk.

HDFS Core Courses (40-46)

Required of all HDFS students:

- COMM 218. *Interpersonal Communication (3)
 H 100. Introduction to Public Health (4)
 HDFS 240. *Human Sexuality (3)
 HDFS 314. Adult Development and Aging (4)
 HDFS 341. Family Studies (4)
 HDFS 360. Critical Thinking in Human Development and Family Sciences (4)
 HDFS 361. Applied Research Methods (4)
 NUTR 225. General Human Nutrition (3)
 PSY 201. *General Psychology (3)
 PSY 202. *General Psychology (3)
 SOC 204. *Introduction to Sociology (3)
 WR 327. *Technical Writing (3)

Choose one of three statistics options below:

1. H 220. Introduction to Health Data Analysis (3)
2. ST 201, ST 202. Principles of Statistics (4,4)
3. ST 351. Introduction to Statistical Methods (4)

OPTIONS

CHILD DEVELOPMENT OPTION

The Child Development option prepares students to work directly with children of all ages and their families. This option is a strong foundation for work in preschool and Head Start classrooms, early intervention, adolescent intervention, parent education and support, or for graduate work in HDFS, psychology, sociology, or education. With additional course work, students can pursue teacher licensure through the OSU College of Education or through other institutions.

HDFS Core

- HDFS 240. *Human Sexuality (3)
 HDFS 314. Adult Development and Aging (4)
 HDFS 341. Family Studies (4)
 HDFS 360. Critical Thinking in Human Development and Family Sciences (4)
 HDFS 361. Applied Research Methods (4)

Non-HDFS Courses

- COMM 218. *Interpersonal Communication (3)

NUTR 225. General Human Nutrition (3)
 PSY 201. *General Psychology (3)
 PSY 202. *General Psychology (3)
 SOC 204. *Introduction to Sociology (3)
 WR 327. *Technical Writing (3)

Choose one of three statistics options below:

H 220. Introduction to Health Data Analysis (3)
 ST 201, ST 202. Principles of Statistics (4,4)
 ST 351. Introduction to Statistical Methods (4)

Child Development Curriculum (36–39)

HDFS 311 Infant and Child Development (4)
 HDFS 313 Adolescent Development (4)
 HDFS 330. Fostering Learning in Early Childhood Development (4)
 HDFS 430. ^Student Teaching in Early Childhood Development and Education (12)
 HDFS 431. Family, School, and Community Collaboration (3)

Choose any three (9–12):

ED 140. Introduction to Early Childhood Education (4) **Central Oregon Community College Only**
 HDFS 201. *Contemporary Families in the U.S. (3)
 HDFS 312. Parenting Research and Application (4)
 HDFS 331. Directed Experience in Early Childhood (3) **Cascades Only**
 HDFS 431. Family, School, and Community Collaboration (3)
 HDFS 432. Children and Youth With Special Needs (3)
 HDFS 444. Family Violence and Neglect (4)
 HDFS 447. *Families and Poverty (4)
 HDFS 465. Topics in Human Development and Family Sciences (3)

HUMAN DEVELOPMENT AND FAMILY SCIENCE, GENERAL OPTION

Students majoring in Human Development and Family Sciences learn how people change across the life course within the contexts of families, school, work, and communities. Information from many disciplines is applied to the study of individuals and families, preparing students to fully understand people and to develop skills in critical thinking and in research. Students learn about infants and toddlers, teens and adults of all ages, and families.

On completing the HDFS General option, students are prepared to be involved and effective community members and to improve people's lives. The HDFS General option is ideal for students interested in the helping professions and also pairs well with a minor or a second major in liberal studies; pre-medicine or pre-nursing; psychology; public health; sociology; Spanish; or women studies, gender, and sexuality studies. It provides exceptional preparation for graduate work in counseling, education, public policy, social work, or human development and family sci-

ences, each of which can lead to a productive, satisfying career.

HDFS Core

HDFS 240. *Human Sexuality (3)
 HDFS 314. Adult Development and Aging (4)
 HDFS 341. Family Studies (4)
 HDFS 360. Critical Thinking in Human Development and Family Sciences (4)
 HDFS 361. Applied Research Methods (4)

Non-HDFS Courses

COMM 218. *Interpersonal Communication (3)
 NUTR 225. General Human Nutrition (3)
 PSY 201. *General Psychology (3)
 PSY 202. *General Psychology (3)
 SOC 204. *Introduction to Sociology (3)
 WR 327. *Technical Writing (3)

Choose one of three statistics options below:

H 220. Introduction to Health Data Analysis (3)
 ST 201, ST 202. Principles of Statistics (4,4)
 ST 351. Introduction to Statistical Methods (4)

Required for Option (12)

HDFS 311. Infant and Child Development (4)
 HDFS 313. Adolescent Development (4)
 HDFS 461. ^Program Development and Proposal Writing (4)

Choose at least 11 credits from the following courses not previously taken:

ED 140. Introduction to Early Childhood Education (4) **COCC Course**
 HDFS 201. *Contemporary Families in the U.S. (3)
 HDFS 312. Parenting Research and Application (4)
 HDFS 331. Directed Experience in Early Childhood (3) **Cascades Only**
 HDFS 431. Family, School, and Community Collaboration (3)
 HDFS 432. Children and Youth With Special Needs (3)
 HDFS 444. Family Violence and Neglect (4)
 HDFS 447. *Families and Poverty (4)
 HDFS 465. Topics in Human Development and Family Sciences (3)

HUMAN SERVICES OPTION

The Human Services option prepares students for entry-level positions in a variety of human services settings including the juvenile justice system, health care settings and hospices, criminal justice agencies, community advocacy groups, the child welfare system, elderly services, children and youth services, substance abuse programs, and many others. Students gain an understanding of the social and human service delivery systems and acquire basic skills to communicate effectively with clients, develop intervention strategies, and solve interpersonal and social problems. At least two internship experiences in human services programs are required for degree completion. Students are prepared to pursue a graduate degree in several areas including counseling, social work, psychology, marriage and family therapy, human development

and family sciences, nonprofit administration, public policy, and others.

HDFS Core

HDFS 240. *Human Sexuality (3)
 HDFS 314. Adult Development and Aging (4)
 HDFS 341. Family Studies (4)
 HDFS 360. Critical Thinking in Human Development and Family Sciences (4)
 HDFS 361. Applied Research Methods (4)

Non-HDFS Courses

COMM 218. *Interpersonal Communication (3)
 NUTR 225. General Human Nutrition (3)
 PSY 201. *General Psychology (3)
 PSY 202. *General Psychology (3)
 SOC 204. *Introduction to Sociology (3)
 WR 327. *Technical Writing (3)

Choose one of three statistics options below:

H 220. Introduction to Health Data Analysis (3)
 ST 201, ST 202. Principles of Statistics (4,4)
 ST 351. Introduction to Statistical Methods (4)

Human Services (36–47)

HDFS 107 Internship Orientation (1)
 HDFS 209. Introductory Internship (4) (*may be repeated for a max. of 8 credits*)
 HDFS 311. Infant and Child Development (4) or HDFS 313. Adolescent Development (4)
 HDFS 410. Advanced Internship (10)
 HDFS 461. ^Program Development and Proposal Writing (4)
 HDFS 462. Skills for Human Services Professionals (4)

Choose any three:

ED 140. Introduction to Early Childhood Education (4) **COCC Only**
 HDFS 201. *Contemporary Families in the U.S. (3)
 HDFS 311. Infant and Child Development (4)
 HDFS 312. Parenting Research and Application (4)
 HDFS 313. Adolescent Development (4)
 HDFS 331. Directed Experience in Early Childhood (3) **Cascades Only**
 HDFS 431. Family, School, and Community Collaboration (3)
 HDFS 432. Children and Youth With Special Needs (3)
 HDFS 444. Family Violence and Neglect (4)
 HDFS 447. *Families and Poverty (4)
 HDFS 465. Topics in Human Development and Family Sciences (3)

PUBLIC HEALTH (BS, CRED, HBS)

Public Health majors are required to complete the Public Health core and one of two options in order to earn the BS in Public Health degree:

- Health Management and Policy
- Health Promotion and Health Behavior

Before admission to the Public Health major, the student must complete the Public Health pre-major (major code 738), which requires a minimum average GPA of 3.0 in the following four courses. Additionally, a minimum grade of C is required in each.

H 100. Introduction to Public Health (4)
 H 210. *Introduction to the Health Care System (3)
 H 220. Introduction to Health Data Analysis (3)
 or ST 201. Principles of Statistics (4)
 H 225. *Social and Individual Health Determinants (4)

Public Health Core (Both Options)

H 100. Introduction to Public Health (4)
 H 210. *Introduction to the Health Care System (3)
 H 220. Introduction to Health Data Analysis (3)
 or ST 201. Introduction to Statistics (4)
 H 225. *Social and Individual Health Determinants (4)
 H 319. Introduction to Health Policy (3)
 H 320. Introduction to Human Disease (3)
 H 344. Foundations of Environmental Health (3)
 H 425. Foundations of Epidemiology (3)

OPTIONS

HEALTH MANAGEMENT AND POLICY OPTION

This option provides training and skills in the management of public health and health care programs and agencies, and in the analysis of public health policies. The program is appropriate for those who want to manage health programs in a wide range of institutions, both public and private and is particularly well-suited for students interested in the business aspects associated with the delivery and financing of health services. Students can also focus on administration in assisted living facilities, continuing care retirement centers and nursing homes and receive a Certificate in Gerontology.

Health Management and Policy Required Track Core (21)

H 250. Introduction to Health Care Management (3)
 H 431. Health Care Marketing (3)
 H 432. Economic Issues in Health and Medical Care (3)
 H 434. ^Health Care Law and Regulation (3)
 H 436. Health Services Administration and Management (3)
 H 457. Financial Management of Health Care Organizations (3)
 H 458. Reimbursement Mechanisms (3)

Required Internship (13)

H 407. Seminar (Sect. 1, Pre-Internship) (1)
 H 410. Internship (12)

Required Supporting Courses (36)

BA 215. Fundamentals of Accounting (4)
 BA 351. Managing Organizations (4)
 BA/MGMT 453. Human Resources Management (4)
 CS 101. Computers: Applications and Implications (4)
 ECON 201. *Introduction to Microeconomics (4)
 ECON 202. *Introduction to Macroeconomics (4)
 MB 230. *Introductory Microbiology (4)

MTH 245. *Mathematics for Management, Life, and Social Sciences (4)
 PHL 444. *Biomedical Ethics (4)

Footnotes:

* Baccalaureate Core Course
 ^ Writing Intensive Course (WIC)

HEALTH PROMOTION AND HEALTH BEHAVIOR OPTION

This option prepares students for many career opportunities in the areas of public health promotion, health behavior, and disease prevention. Students learn a variety of skills and strategies that will provide them with the necessary proficiencies to improve population health in diverse settings. The program focuses on the social and behavioral determinants of health and disease across the lifespan, with a particular emphasis on health disparities. Graduates are qualified to assist with the planning, implementing, and evaluation of programs that address health disparities and that are intended to improve the health of diverse populations.

Health Promotion and Behavior Required Track Core (21)

H 310. Health Field Experiences: Peer Helper (3)
 or H 349. Peer Helper Skills Development (3)
 H 407. Seminar (Sect. 1, Pre-Internship) (2)
 H 410. Internship (12)
 H 476. ^Planning and Evaluating Health Promotion Programs (4)

Required Supporting Courses (16)

BI 101. *General Biology (4)
 or BI 102. *General Biology (4)
 or BI 103. *General Biology (4)
 ES 101. *Introduction to Ethnic Studies (3)
 NUTR 225. General Human Nutrition (3)
 or NUTR 240. Human Nutrition (3)
 PSY 201. *General Psychology (3)
 SOC 204. *Introduction to Sociology (3)

^ Writing Intensive Course, WIC

HEALTH MANAGEMENT AND POLICY MINOR

The Health Management and Policy minor provides students with a background in public health with an emphasis on the management of health care programs and agencies.

ECON 201. *Introduction to Microeconomics (4)

H 100. Introduction to Public Health (4)
 H 210. *Introduction to the Health Care System (3)

H 220. Introduction to Health Data Analysis (3) *(not required for business majors)*

H 225. *Social and Individual Health Determinants (4)

H 250. Introduction to Health Care Management (3)

H 436. Advanced Topics in Health Care Management (3)

Check prerequisites/corequisites for H 250 and H 436.

Select 9 credits from the following (business majors select 12 credits):

H 425. Foundations of Epidemiology (3)
 H 431. Health Care Marketing (3)
 H 432. Economic Issues in Health and Medical Care (3)
 H 434. ^Health Care Law and Regulation (3)
 H 457. Financial Management of Health Care Organizations (3)
 H 458. Reimbursement Mechanisms (3)
 H 468. Financing and Administration of Long-Term Care (3)

PUBLIC HEALTH MINOR

The Public Health minor provides students with a general background in public health. Students with this minor may not take any of the required courses listed below with S/U grading, including the "any other H course" requirement. Students may, however, take additional public health courses not required for the minor with S/U grading.

H 100. Introduction to Public Health (4)
 H 210. *Introduction to the Health Care System (3)

H 220. Introduction to Health Data Analysis (3)
 or ST 201. Principles of Statistics (4)

H 225. *Social and Individual Health Determinants (4)

H 319. Introduction to Health Policy (3)

H 320. Introduction to Human Disease (3)

H 344. Foundations of Environmental Health (3)

H 425. Foundations of Epidemiology (3)

Any other H course of at least 3 credits

Total = 29 credits

HUMAN DEVELOPMENT AND FAMILY STUDIES (MS, PhD, MAIS)

Graduate Areas of Concentration *Human development and family studies*

The School of Social and Behavioral Health Sciences offers course work and programs of study in the area of human development and family studies. The Gerontology Program is also administered by the College of Public Health and Human Sciences through the school. Areas of study and degrees granted are described below.

Human development and family studies offers graduate work leading to master of science and doctor of philosophy degrees. Graduate programs take a multidisciplinary approach, preparing students for college and university teaching and research, as well as development, administration, and evaluation of programs serving individuals and families across the lifespan.
